General Information (see reverse for instructions)						
Name of Project	Discover	y Park Lee's Summit		CGP Tracking No.	MODNR# MORA23630	Inspection Date 8/5/2025
Inspector Name, Titl Contact Information	e &	Anika	Car	eaga, f	E, CESC	- Enviro Proofille
Present Phase of Cor	nstruction	Mass Grading, Utility	construct	ion, road paving, stat	oilization efforts.	
inspections are requ						
Inspection Frequency (Note: you may be subject to different inspection frequencies in different areas of the site. Check all that apply.) Standard Frequency: Weekly Every 14 days and within 24 hours of a 0.25" rain						
Increased Frequ	Increased Frequency: Every 7 days and within 48 hours of a 2.0" rain (for areas of sites discharging to sediment or nutrient-impaired waters or to waters designated as Tier 2, Tier 2.5, or Tier 3)					
Reduced Frequency: - Once per month (for stabilized areas) - Once per month and within 24 hours of a 0.25" rain (for arid, semi-arid, or drought-stricken areas during seasonally dry periods or during drought) - Once per month (for frozen conditions where earth-disturbing activities are being conducted)						
Was this inspection triggered by a 2.0" storm event? Yes No If yes, how did you determined whether a 0.25" storm event has occurred? Rain gauge on site Weather station representative of site. Specify weather station source: Rain Dop Total rainfall amount that triggered the inspection (in inches): 0.09 - 5ince (ast in specify)						
Unsafe Conditions for Inspection Did you determine that any portion of your site was unsafe for inspection per CGP Part 4.1.5? Yes If "yes", complete the following: Describe the conditions that prevented you from conducting the inspection in this location:						
- Location(s) where conditions were found:

u.				and those requiring corrective action. The permit requires maintenance in

^{*} Note: The permit differentiates between conditions requiring repairs and maintenance, and those requiring corrective action. The permit requires maintenance in order to keep controls in effective operating condition and requires repairs if controls are not operating as intended. Corrective actions are triggered only for specific, more serious conditions, which include: 1) A required starmwater control was never installed, was installed incorrectly, or not in accordance with the requirements in Part 2 and/or 3; 2) You become aware that the starmwater controls you have installed and are maintaining are not effective enough for the discharge to meet applicable water quality standards or applicable requirements in Part 3.1; 3) One of the prohibited discharges in Part 2.3,1 is occurring or has occurred; or 4) EPA requires corrective actions as a result of a permit violation found during an inspection carried out under Part 4.2. If a condition on your site requires a corrective action, you must also fill out a corrective action form found at www.epa.gov/npdes/starmwater/swppp.. See Part 5 of the permit for more information.

Condition and Effectiveness of Pollution Prevention (P2) Practices (CGP Part 2.3) (see reverse for instructions)

7.	Temporary/Permanent Vegetation	☐ YES ☐ NO If yes, provide date:		

Description of Discharges (CGP Part 4.1.6.6) (see reverse for instructions)					
Was a stormwater discharge or other discharge occurring from any part of your site at the time of the inspection? Yes No If "yes", provide the following information for each point of discharge:					
Discharge Location [Add an additional sheet if necessary]	Observations				
1. Outfall #001	Describe the discharge:				
Tributary to Unity Lake Number Two (Zone 1)	At points of discharge and the channels and banks of surface waters in the immediate vicinity, are there any visible signs of erosion and/or sediment accumulation that can be attributed to your discharge? Yes No				
	If yes, describe what you see, specify the location(s) where these conditions were found, and indicate whether modification, maintenance, or corrective action is needed to resolve the issue:				
2. Outfall #002	Describe the discharge:				
Tributary to Unity Lake Number One (Zone 3)	Signs of erosions in discharge? Yes No				
	Yes? Plan of corrective action?				
*					
3.	Describe the discharge:				
	Signs of erosions in discharge?				
	Yes? Plan of corrective action?				

Contractor or Subcontractor Certification and Signature

(see reverse for instructions)

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

Signature of Contractor or Subcontractor: Luka Canooga, PEUESL Date: 8/5/2025

Printed Name and Affiliation: Environment of Contractor of Subcontractor of Subc

Date: 8 | 5 | 2025

Certification and Signature by Permittee

Discovery Park Lee's Summit 8/5/2025 Inspection

The site did not receive a rain event measuring at least 2.0 inches since the last inspection. Site received approximately 0.09" rain since last inspection. Clear discharge was noted during the inspection. Monitoring BMPs over site will continue to help improve storm water flow on property. It should be noted that City of Lee's Summit NW Colbern Road project has a separate permit, contractor and BMPs.

Photo 1 – Zone 1 & 3 – Recommend additional water trucks for dust.

Photo 3 – Outfall 001 in Zone 1 – Clear discharge noted.

Photo 2 – Zone 1/Aria – Silt fence added, and grading activities started.

Photo 4 – Outfall 002 in Zone 3 – Clear discharge noted.
