RE: Special Inspection Report No. 4
Discovery Park Pet Spa
1921 NE Trails Edge Boulevard
Lee' Summit, Missouri
Report Period: July 27, 2025 to September 20, 2025
Permit No.: PRCOM20243938
UES Project No.: A23129.00089.007
Legacy Project No: J044702.08

Dear Mr. Maenner:

This letter with attachments will constitute our Special Inspection transmittal for the above referenced project. Representatives of UES have provided field observation and testing services for drilled and epoxy-grouted anchors and wood framing during the report period. Our services have been provided on a part-time basis as scheduled by representatives of Goebel Mitts Construction. The compliance of materials or work not observed by our personnel is not addressed, or implied, by this or any previous report.

Summary of Activities

Drilled and Epoxy-Grouted Anchors

Installation of the drilled and epoxy-grouted anchors for the shear walls into the existing foundations was observed on August 4. The drilled holes were observed for the required location, depth, diameter, and cleaning procedures. Installation of the all-thread dowels was observed with respect to the project documents for the specified anchor bolt diameter, grade, embedment, projection, and type of epoxy used.

Wood Framing

The wood framing and shear walls for the building were observed on July 31 and August 6. The wood framing was observed for anchoring type and spacing, opening header type and count, stud and shear wall framing type and spacing, member size, location, and connection geometry. The OSB sheathing for the shear walls was observed for the type, thickness, and joint location indicated in the project documents. The nail patterns to the wall framing were compared with the project documents for the required nail size and spacing. The shear wall hold-down brackets, truss hangers, tie down brackets, and coil straps were observed for the required type, configuration, and installation type.

Status of Compliance

The specific items discussed above in this report appeared to be in general compliance with the contract documents.

Closure

The results of our field observations and testing were reported to authorized personnel during our site visits. If you have any questions regarding this report, or if we may be of further service, please contact us.

Respectfully submitted,

Steve Damron
CMT Department Manager
