Dear Recipient:

As requested by Trumark Custom Homes, I observed the modifications to the framing plan for an area above the master bathroom and have determined that the modifications as installed are adequate to transfer the loading from the rafter stsyem into the load bearing components of the framing system. A picture of the area observed is below for reference. The address of the house is 2090 NW Obrien Road, Lee's Summit, MO 64081.

Sincerely,

Daniel Nyberg, P.E.
