

Received a call back from Joe Frogge regarding the building permit. He essentially said this is a general note communicated by planning that the building permit is to be issued prior to the sign permit. As long as ,the signage is called out in the original plans submitted, we are good to proceed. I confirmed that the wall signs and ground signs have been included in the plans since the original issue set in 2024. Once I receive the updated site plan with the required setback mentioned, we should be good to proceed. I'll get that to you as soon as I get it back.
