RE: Valmont Order No.166958-2-1
PO No. 0043211 - Lee's Summit HyVee

Veronica:

This letter is in regards to your request for written confirmation that the upright (Valmont part number J169836) and 32' mast arm (Valmont part number J160197) will not be structurally compromised by the additional degree of rise incorporated into the mast arm when the field work was done switching out simplex plates on the mast arm.

The mast arm and the upright were both checked by engineering with the additional one degree of rise added to the arm using standard City of Lee's Summit loadings per DB00947 Rev. A. These structures will not be compromised by the additional degree of rise.

The standard Valmont warranty remains on these structures. If you have any questions, please feel free to contact me.
