Workers were installing trash enclosure walls but no other work was being done on site.

I had some concerns with the base material appearing to have sunken in by the southwest curb inlet. Talked to Dustin Walters and he stated it shouldn't be an issue since they are going to pour the throat for the curb inlet where I had noticed the low spot.

Observed there orange safety fence had fallen down around the hole on the north side of Jones Industrial.

Erosion control needs to be worked on for this site particularly the west side of the site.
