RE: PRCOM20181345 – Mediquick Aesthetics

Dear Mr. Frogge,

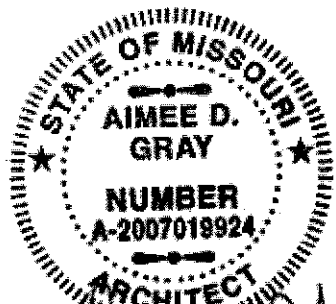

At the request of the contractor, we are eliminating the new 5-gallon water heater and expansion tank proposed in Laundry Room 107 and will tie into the existing water heater located in the utility room of the existing Mediquick Aesthetics in Suite 100B. This 30-gallon tank is adequate to supply the existing and proposed sinks and washing machine.

Please contact me with any questions.

Sincerely,

Aimee Gray
