Re: Property @
1309 NE Goshen Dr.
Lee's Summit, MO

Dear Mr. Hatton:

On October 15, 2018, I inspected the subgrade, forming and reinforcement for the foundation footing to be poured for the house at the above referenced property. Probes of the subgrade with a pocket penetrometer indicate soil bearing capacities to be generally uniform and well in excess of the required 2,000 psf. I recommend using a standard 8" x 16" footing with 2 @ #4 bars continuous.

The forming and reinforcement were in place and had been installed properly. The footings are approved for concrete placement.

Cordially

David P. Ainsworth, P.E.
