RE: Subgrade Inspection for Lot # 105 Manor at Stoney Creek – 4412 SW Tanzanite Cir Lee's Summit, MO 64082 - Permit # PRRES20202156

On August 14, 2020, a special inspection was performed by Residential Engineering Services, LLC (R.E.S.) at the above referenced property. The purpose of this inspection was to determine structural adequacy of the existing soil for construction of concrete foundation.

Findings:

- The soils observed at footing elevation were silty clay; dark brown; medium-high plasticity and dry.
- Probes and penetrometer readings indicated that the soils do not have sufficient bearing capacity for the loads applied by foundation per permit plans.

Recommendations:

- RES recommends that the footings be enlarged to 24"X8" with three (3) #4 rebar continuous (see attached specifications)
- Basement and garage pier pads shall be enlarged a minimum of 6" each way (i.e existing 30"x30" shall be enlarged to 36"x36", etc.) (see attached specifications)

We would like to thank you for the opportunity to consult you on your project. Please feel free to contact us if you have any questions regarding this report or need any further consultation.

Sincerely,

Bradley Huxol, PE

ALTERNATIVE HELIX OPTION:

- SLAB HELIX DOSAGE = 12.5 LB/YD³
- FOOTING HELIX DOSAGE = 12.5 LB/YD³
- PIER PAD HELIX DOSAGE = 12.5 LB/YD³
- HORIZONTAL REBAR IS NOT REQUIRED IN FOOTINGS FOR HELIX
- SLAB ONLY REQUIRES TOP STEEL REBAR OVER PIER PADS FOR HELIX
- VERTICAL REBAR IN WALL IS STILL REQUIRED. HOOK REBAR 6" HORIZONTALLY INTO FOOTING @ 24" O.C.
