THIS IS A TRUSS PLACEMENT DIAGRAM ONLY. These trusses are designed as individual building components to be incorporated into the building design at the specification of the building designer. See individual design sheets for etruss design identified on the placement drawing. The building designer is responsible for temporary and permanent brace of the roof and floor system and for the overall structure. The design of the truss support structure including headers, bear walls, and columns is the responsibility of the building designer. For general guidance regarding bracing, consult "Bracing walls, and columns is the responsibility of the building designer. For general guidance regarding bracing, wood trusses," available from the Truss Plate Institute, 583 D'Onifrio Drive. Madison, WI 53.179
