Lee's Summit, MO 64082

This letter addresses revisions to the number of studs supporting girder truss bearings and clarifies support at stairs and at fireplace header.

- Revision of number of studs for Girder Truss bearings shall be as shown on revised A4-A6 pages.
 - Stud packs shall be Douglas Fir Larch #2 and shall be carried down to foundation or load supporting member.
- It is structurally acceptable to place (2) #2 2x10 Douglas Fir Larch #2 header as a double rim joist along East Great Room wall. The interior edge of fireplace bump out is non-structural.
- It is structurally acceptable to support (2) #2 2x12 flush Douglas Fir Larch #2 with (3) #2 2x4 and an "A" size footing at stairs as shown in image below.
