

ENGINEER, RESIDENTIAL ENGINEERING SERVICES, LLC

WESTPORT CRAFTSMAN 3-CAR

Truss performance depends not only on proper design and fabrication, but also on proper handling, installation and bracing. The truss engineering and the HB-91 SUMMARY SHEET provided should be carefully reviewed before installing any truss. If you need any additional information regarding specific installation or bracing requirements for your particular project, consult with the engineer of record or building designer for your project.

ing requirements for your particular project, consult the manufacturer's literature or your local building record or building designer for your project.
