Deck Support Piers and Anchorage

Dear Mr. Richards:

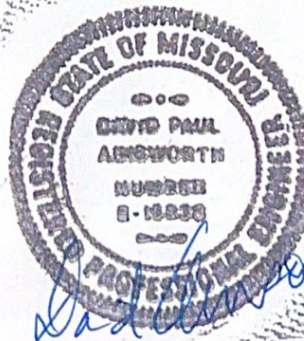

On May 20, 2021, I inspected the deck support piers and anchorage at the above referenced address. The support piers as installed are adequate to support the imposed loads.

The model number of the deck support post anchorage is ABA66R2 and 1/2" x 5-1/2" wedge anchors were used. The installation was done in accordance with the manufacturer's recommendations.

In summary, the deck support piers and anchorage as installed is adequate for the imposed loads.

Cordially,

David P. Ainsworth, P.E.
