Re: Coldwater Community Center  
Permit No. PRCOM20210533

Mr. Joe Frogge

This letter is in regard to make you aware that I have been asked by the community center representative to take over as the engineer of record for the Mechanical and Plumbing aspects of the project. Conversation with the previous engineer with MMC has acknowledged this change and released themselves from the project per the attached letter.

I have developed a updated, revised and modified set of Mechanical and Plumbing plans for your review showing clarification or additional information on previous items previously identified in your plan review comments.

Should you have any questions or require discussion about any of these comments, please contact myself as you require.

Respectfully,

Erik Knudsen, PE
