### EXPANSIVE SOILS DISCLAIMER

These plans have been prepared based on a presumptive allowable bearing capacity as allowed by IRC code and the local enforcing jurisdiction.

Apex Engineers, Inc. (APEX) recommends that all footing excavations be evaluated by a licensed geotechnical engineer prior to the placement of any foundation elements. Geotechnical investigation and/or testing is NOT a service provided or offered by APEX.

APEX has not been retained to determine the expansive soil characteristics of the subgrade soil and therefore cannot be held responsible for the volumetric changes of the soil (including below the basement slab). By use of these plans without an accompanying geotechnical engineering report, APEX shall not be held liable for any future movement and/or differential movement of the proposed structure and the possible damage that may be caused as a result of such movement.
