

The Following is a list of items that will be different than what is shown on the architect's drawings:

- Poured concrete floor, rather than pavers
- Ventless fireplace insert, instead of direct vent
- Windows will be 3'w x 8'h, rather than 3'w x 6'h with transoms
- Stairs coming down from house will not have a landing, and will come straight out of house, toward the east (drawing shows them coming down toward the north). We will still include the railing.
