Good morning Andrea,

I am emailing to explain the recent updated uploads to the portal for 3014 NW Thoreau Pl. During excavation we determined the basement wall height along the rear wall line needed to be taller due to grade. We stopped and updated the plans and plot plan to match what we were able to do in the field. I also have the pier design uploaded. We have stopped the project until we have city approvals on the new submittals thinking this is the proper procedure for the proposed changes. Please let me know if you have any further questions.

Thanks,

Matt Faulkner
