FINISH WALL MOUNT ONLY (Where No Backing is Installed)

1. Select desired location for wall mount platform (MUST BE 16" CENTER STUD SPACING MAXIMUM).
2. Use template printed on bottom of platform box to mark four attachments points on wall surface; verify that template is held level when making marks. (See Fig #6A)
3. Use box template lay-out marks (step 2 above) to draw upper and lower horizontal lines on wall surface. (See Fig #6A) 3.1. Lines must span completely across three studs (16" center stud spacing maximum).
4. Locate the center line of each wood or metal stud, mark intersection point with horizontal lines. Six center points must be located - two on each of three studs. (See Fig #6B)
   - 4.1. On either Wood or Metal Stud Framing drill ¼" pilot holes in 12 locations (2 for each of 6 item 'A' brackets). (See Fig #6A and #6B)
   - 4.2. On Metal Framed Walls Only- Using ¼" pilot holes as guides (from step 4.1 above), drill ¾" holes to accept Toggler® Bolts (item 'F1') in 12 locations. (See Fig #6B)
   - 4.3. On Metal Framed Walls Only- Install 12 Toggler® bolt items 'F1' in the ¾" holes. (See Fig #7A & #7B)
5. Pre-assemble three item 'P' brackets to each of two item 'G' Unistrut Channels (channels must be 36" minimum length) using hardware items 'C', 'D' and 'H'. (See Fig #5A and #8B)
   - 5.1. Build two Fig #8A assemblies (Only hand-tighten these hardware components at this point)
6. Mount both the upper and lower unistrut assemblies to the wall. (See Fig #9)
   - 6.1. For Wood Framed Walls Only- Use lag bolt item 'E' (12 ea.) and washer item 'C' (12 ea.)
   - 6.2. For Metal Framed Walls Only- Use Toggler® Bolt item 'F2' (12 ea.) and washer item 'C' (12 ea.)
7. Tighten all hardware securely (if vibrating equipment will be mounted, Loctite® or similar is recommended)
8. Locate the four equipment platform mounting locations and mark these onto the Unistrut® assemblies. (See Fig #10A for locations or use the box template)
9. Install the four Unistrut® channel studs, item 'H' in the locations located in step 8 above using items 'I', 'C' and 'D'. (See Fig #10B)
10. Affix 45° Brackets 'J' (4) to ends of both 3/8" threaded rods item 'Q'. (See Fig #11)
11. Affix one rod assembly to each of the upper two Strut Channel Studs item 'H' and Suspension Washer item 'I' under nut and washer 'C' & 'D'.
