Re:

Notification of Substantial Completion

Lot 7B (Area C)

Mine Remediation at Streets of West Pryor

Lee's Summit, Missouri

Geotechnology Project No. J035637.02

Dear Mr. Olson,

Please be advised that the planned mine remediation for Lot 7B (Area C), as shown on the attached Figures 1 through 3, has been substantially completed. Previous remediation activities have been completed for Areas A and B with Notification of Substantial Completion provided on October 11, 2021. Mine remediation was performed in general accordance with (1) the intent of the plans and specifications provided in the *Revised Mine Remediation Plan* dated May 6, 2021, (2) *Revised Field Test Evaluation* report dated September 1, 2021 and (3) the *Response to Comments* letter dated September 14, 2021. A summary of field observations made by Geotechnology representatives is presented on Table 1. The following attachments are included in and complete this substantial completion notification.

Drill Hole Summary

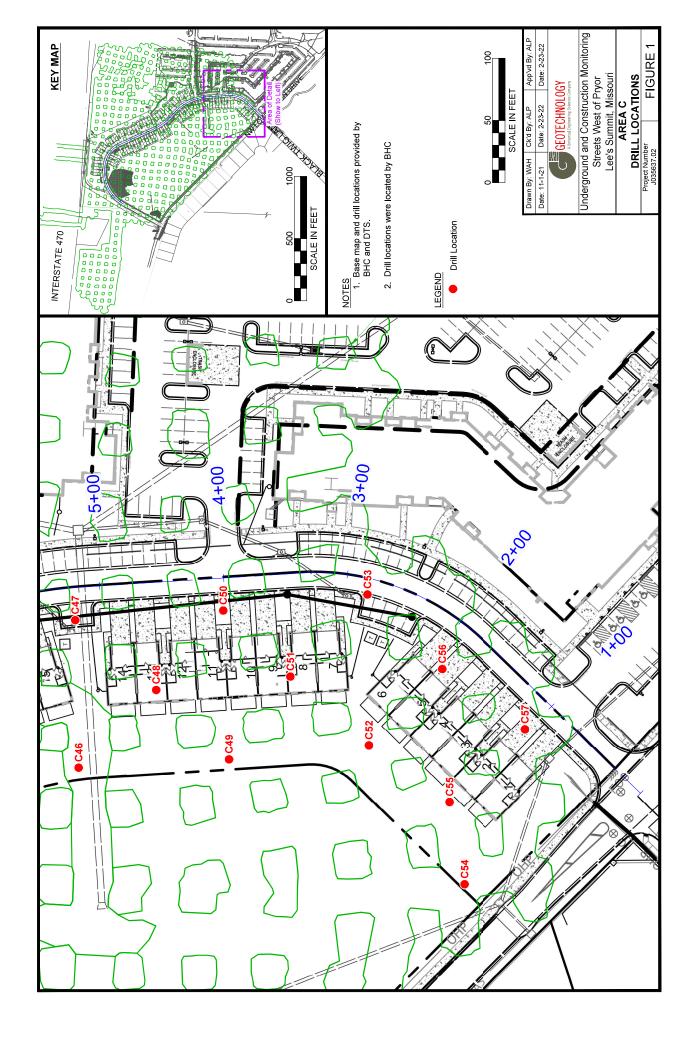

We appreciate the opportunity to provide geotechnical services for this project. If you have a question regarding this letter, or if we may be of additional service to you, please contact the undersigned.

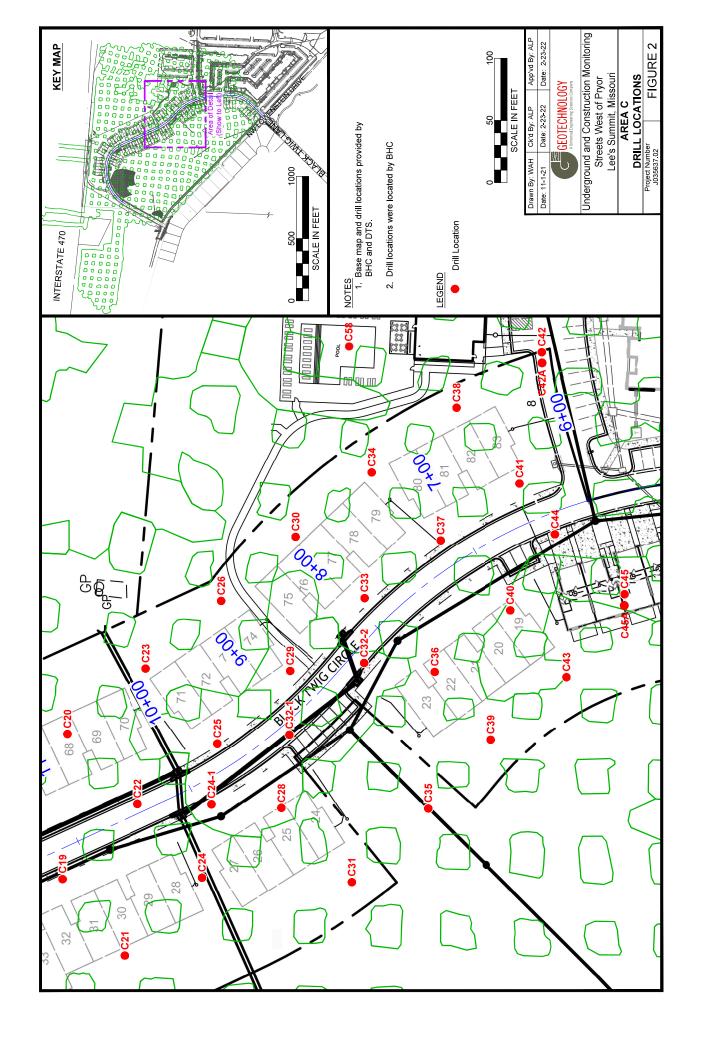

Respectfully submitted,

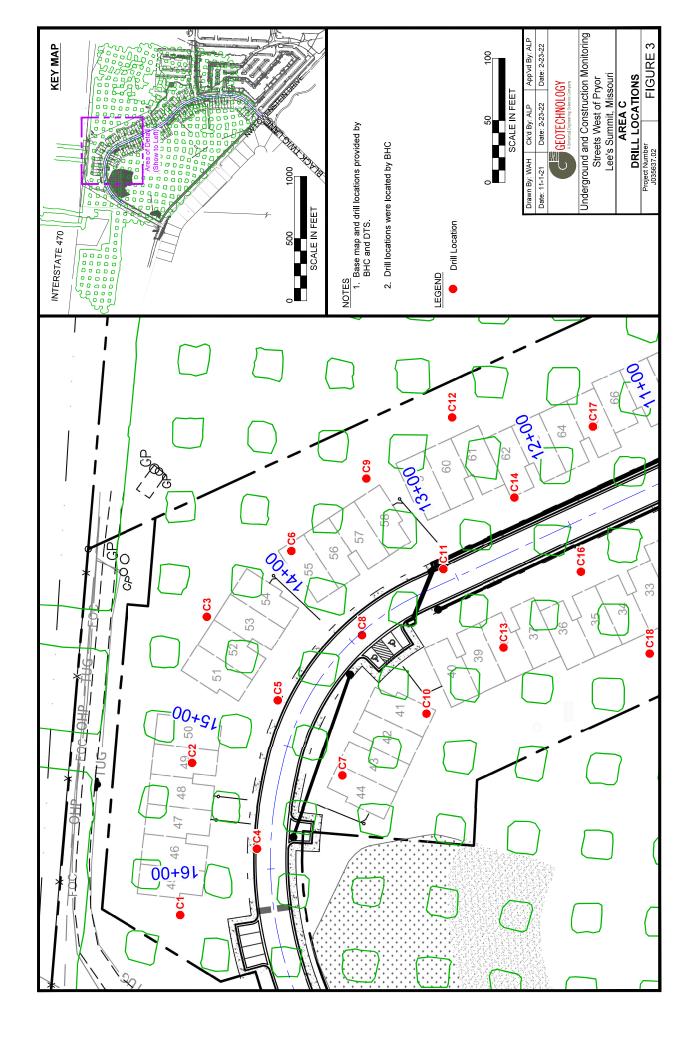

GEOTECHNOLOGY, LLC

Andrea Prince, P.G. Senior Project Manager
