City of Lee's Summit, MO

Permitting and Plans review

RE: Boyer Residence, 725 SW 15<sup>th</sup> Circle

Dear Sir or Madam:

As the AOR I have reviewed the engineered floor and roof truss drawings and calculations prepared by MiTek USA. The design loads are properly transferred from the roof to the load bearing walls and point loads indicated on the architect's drawings and are approved for construction.

Thank You,

Aaron Brown, AIA RA
