Marriott Item ID	304829
Description	AREA RUG-Z802Z-INSET RUG-FLEX SPACE-CYP-8' X 13'
Vendor Name	SHAW INDUSTRIES INC
Vendor Item ID	Z802Z
Item UOM	EA
Marriott BOM Name	304829
Specification	ITEM: CARPET - RUG INSET - FLEX SPACE

CONSTRUCTION: CYP TUFTED, CUT AND LOOP PILE

CUT AND LOOP PERCENTAGE: 55% CUT & 45% LOOP

PATTERN NUMBER: Z802Z

COLOR NUMBER(S): A:5728D B:5501D C:5500D D:5725D

CUSTOM DESIGN/COLOR: YES

WIDTH/SIZE: 12' (RUG 8' X 13')

PATTERN REPEAT: V: 8' H: 13'

YARN COMPOSITION: 100% NYLON ECO SOLUTION Q BRANDED YARN

DYE METHOD: SOLUTION DYED

GAUGE: 1/10

FINISHED FACE/PILE WEIGHT: 36 OZ

FINISHED PILE HEIGHT: 0.218"

YARN DENSITY: 7297 PER C/YRD

YARN PLY: 2 PLY

YARN DENIER: 1352/2

STITCHES PER INCH: 10"

BACKING:

PRIMARY- POLYPROPYLENE

SECONDARY- U-PATTERN

ALL CARPETS MUST MEET:

COLOR FASTNESS- 4-5

LIGHT FASTNESS- 4-5

FLAMMABILITY- CLASS 1 ASTM E-648

TWISTS PER INCH- 4.5 PER INCH MINIMUM

BUNDLE WRAP- 80%

TUFT BIND- CLASSICBAC RATING 5.9 LBS LOOP PILE/ 2 LBS CUT PILE

DELAMINATION: 4.5 LBS

TWISTS PER INCH: 4.5 PER INCH MINIMUM

WEAR WARRANTY: 10 YEAR COMMERCIAL LIMITED

STAIN WARRANTY: LIFETIME STAIN

OTHER TOPICAL TREATMENTS: N/A

NOTE: QUANTITIES AND DIMENSIONS MUST BE VERIFIED BY AN INSTALLER

RECYCLED CONTENT:

CRADLE TO CRADLE SILVER CERTIFIED PRODUCT

PACKAGING: WRAPPED IN POLYETHYLENE BAGS AND PALLETIZED; INCLUDED IN COST

ALL CARPETS MUST MEET:

COLOR FASTNESS- 4-5

LIGHT FASTNESS- 4-5

FLAMMABILITY- CLASS 1 ASTM E-648

TWISTS PER INCH- 4.5 PER INCH MINIMUM

BUNDLE WRAP- 80%

TUFT BIND- CLASSICBAC RATING 5.9 LBS LOOP PILE/ 2 LBS CUT PILE

DELAMINATION: 4.5 LBS

TWISTS PER INCH: 4.5 PER INCH MINIMUM

WEAR WARRANTY: 10 YEAR COMMERCIAL LIMITED

STAIN WARRANTY: LIFETIME STAIN

NOTE: QUANTITIES MUST BE VERIFIED BY AN INSTALLER

INSTALLATION INSTRUCTIONS: CORRIDOR CARPETS SHOULD BE INSTALLED FIRST ON ALL FLOORS; ELEVATOR CARPET PATTERNS SHOULD BE DRY LAID FIRST TO ENSURE PROPER PATTERN MATCH, ONCE THE CARPET IS ALIGNED IT CAN BE CUT AND INSTALLED. THERE WILL BE SLIGHT VARIATIONS IN SHADE DUE TO THE CARPET BEING TURNED 90 DEGREES FROM THE CORRIDOR RUNNER TO ELIMINATE SEAMS IN THIS AREA. IF YOU HAVE QUESTIONS, PLEASE CONTACT SHAW DIRECTLY.

RECYCLED CONTENT: CRADLE TO CRADLE SILVER CERTIFIED PRODUCT

PACKAGING: WRAPPED IN POLYETHYLENE BAGS AND PALLETIZED; INCLUDED IN COST

Marriott Global Design Product Guidelines
Artwork

The following are the guidelines for artwork used by Marriott International. Any deviation, modification or change, must be submitted in writing detailing each deviation. Artwork must meet or exceed the following guidelines. Supplier is responsible for the structural integrity and durability of finish and design of any artwork produced. Supplier is to provide shop drawings and finish samples for all custom artwork as required. Supplier is to obtain approval prior to production of custom art.

Supplier represents and warrants that (i) the Product Designs are original designs created by Supplier(or its employees or independent contractors) and to the best of Supplier's knowledge do not infringe the copyright or other property rights of any third party; (ii) Supplier owns all right, title and interest in the Product Designs herein conveyed, free and clear of any liens, encumbrances, or other third party interests of any kind, and free and clear of any claims or litigation, whether pending or threatened. For third party sourced content, Supplier shall provide account with a copy of all content license agreement(s) for review and verification.

Frames - Wood

Wood frames will be milled, machined, or carved from hardwoods and softwoods, as specified to achieve structural integrity and aesthetic requirements. All woods are to be kiln dried and register not greater than 9% moisture content for hardwoods and not more than 12% moisture content softwoods. Wood frames must not exhibit surface defects of flaws. Loose knots and knotholes are not acceptable.

Frames - Polyurethane

Frames are to be of rigid polyurethane with a density of two pounds(+/-) per cubic foot Polyurethane is to be manufactured without ozone depleting materials (CFC's).

Frames - MDF

Engineered wood made from refined wood particles 8% (+/-) resin made into hardboard. No MDF frames in guest bathrooms.

Canvas

Should be 65% cotton, 35% polyester with acrylic coating, water proof and scratch resistant. Unframed gallery wrap canvas must be made using minimum 1 5/8" deep wood bars, applicable wood support, and Masonite/hardboard backing.

Paper

Watercolor paper: Bright white, cotton rag based water resistant textured matte paper, acid free and lignin free. Brightness - 95, Whiteness - 96.5
Matte paper: Premium grade, bright white, 9 mil, 50#.
Latex infused paper: Latex saturated wet strength, ultimate durable poster paper, bright white matte finish, environmental certificates, 10 mil / 235 gsm.

Mat

100% EcoCore, 2 ply paper mat

Inks

Inks for paper: aqueous water base
Latex infused paper and canvas inks: eco-solvent

Joints

All corners are to be miter cut, glued and joined with pneumatic "V" nail joining equipment. The placement of the "V" nail will be suitable to ensure the structural integrity of the joint. In no case will there be less than two "V" nails per joint or less than one "V" mail per inch of molding width.

Backing

All backing must be 3/16" foam board. 40 lb. craft paper must be provided for dust backing covering the entire back of the frame.

Glass

2.2 to 2.3 mm thickness

Mounting

Dry mount or wet mount is required.

Finishes

Finishes will meet AWI (Architectural Woodworking Institute) system TR1 for hand applied finishes. Finishes must have proper, permanent adhesion. Finish is to be protected with both chemical and abrasion resistant topcoats, per ASTM standards. All corners must be cosmetically blended and retouched to eliminate visual discontinuity across the joint on both face and sides of frame. Visible raw wood/polyurethane is not permitted. Production finishes must be consistent with the pre-approved finish sample. Must be sealed if sprayed or painted. Foiling and wrapped finishes are acceptable.

Security Hangers

Unless otherwise specified, all artwork must have 3 point security hardware as a method of hanging. Mounting/Security hardware will be attached to the back of the artwork/mirror, with the matching wall mount portion packaged and securely fastened to the back of each individual corresponding piece. Security hardware is to be mounted in the same position on each style and detailed on the approved shop drawings.

Packaging

All items are to be cartoned. The cost of cartoning is to be included in the cost of goods.

All cartons will be labeled in accordance with MIDCS labeling instructions.

Artwork is to be wrapped in plastic or foam and then fitted with corrugated corner protectors with foam.

All wall hardware is to be attached to the back of each piece of art. Artwork may then be placed in a master carton (edge crush test to withstand a minimum of 275 lbs.).

Packaging material must be used to alleviate any movement of the artwork inside the master carton.

The master carton must then be placed on a pallet and secured with a strap and shrink-wrapped.

Warranty

All artwork must have a 10 year warranty.

CARB (California Air Resources Board) Requirements

All items containing hardwood plywood, particleboard, or medium density fiberboard shipped into California must be in compliance with 93120-93120.12, title 17, California Code of Regulations regarding reducing formaldehyde emissions.

Marriott Global Design Product Guidelines
Banquet Chairs

The following are the specifications, test and code criteria for banquet chairs used by Marriott International properties. All banquet chairs must meet or exceed these specifications, tests and codes. All Marriott banquet chair suppliers are responsible for the structural integrity and durability of finish and design of any banquet chairs they produce. Each supplier is responsible for providing shop drawings with complete construction information, including where-used and finished samples. Banquet chairs are those chairs used in conference rooms or other areas where guests gather for conferences, seminars, luncheons, or other public gatherings. They generally have upholstered seats and backs and they may or may not have stack/ganging devices. **Any deviation, modification or other changes to original or existing specifications must be submitted to the appropriate Marriott associate or outsourced specifier in writing with drawings clearly showing all changes and locations on the items.**

Warranty

- All Marriott banquet chair suppliers are responsible for the functional durability and conformance to design intent of any banquet chairs they produce. The chairs shall be warranted for a minimum of 12 years or as specified.

General Specifications

- **Steel tubular frames** shall be a minimum of 13/16" 18 gauge, unless otherwise specified, and shall meet ASTM A-513 for 1008/1010; (wall thickness for 18 gauge tubing shall be .049, ± 10% Carbon). All frames shall be sufficient to withstand guest weight loads for 12 years.
- **Chemical Analysis of Steel Tubing:** Carbon: .054 to .11, Manganese: .30 to .60, Phosphorous: .035 Max., Sulfur: .035 Max., Rockwell Hardness: B45 to B75.
- **Frames** shall have a minimum of 24 structural frame welds and shall be electric welded steel tubing w/seamless joints and corners.
- **Glides:** 4 premium metal base glides with a chrome metal base and steel umbrella clip (.030 spring steel) sufficient to withstand 300 pounds minimum force shall be included. Each glide shall have a clear vinyl boot with protective bumper for stacking and sufficiently affixed so as to prevent accidental removal during use. **(Must be suitable for use on the floor surface of the areas in which the chairs are used).**
- **Stacking ability** is required for all brands. Stacking shall be 8 to 12 high.
- **Linking/ganging devices** shall be constructed so as to not interfere with dining or other configurations when not ganged. (Linking devices are required for orders of 100 or more chairs).
- **Legs** shall have support stretchers sufficient in number and placement to maintain structural stability over the life of the chairs.
- **Finishes**
    - Metals shall be pre-treated for corrosion resistance and to enhance finish adhesion. The finish shall be epoxy powder coat or plated.
    - All production finishes must match approved samples.
    - Finishes are to be clean and clear in tone, smooth and without variation between any sides.
- **Inner back wood** shall have a minimum of ½" thick curved plywood, unless otherwise specified, with 1" thick 1.2 lb. /cubic foot density Ca 117 flame retardant polyurethane foam over a passive lumbar support.
- **Outer back wood** shall have a minimum of 1/8" non tempered hardboard, or as specified, covered by ¼" Ca 117 fire retardant polyurethane foam. Outer back shall be attached so that fasteners are not exposed. (Flex back chairs are the preferred option for Marriott Full Service, Renaissance and JW Marriott).
- **Seat construction** shall be have a minimum of ¾" MDF, or as specified, covered with 2" thick 2.8 density Ca 117 flame retardant conventional foam with an IFD of 60. It shall be glued to panels to prevent shifting.
- **Face Fabrics**

- **Banquet chair** suppliers are not responsible for construction and performance of face fabrics NOT specified by them, but they are ***responsible for construction and performance of face fabrics from their lines included with the products.*** In all cases the banquet chairs supplier is responsible for diligence in identifying defective fabrics, and in the timely notification of the Marriott buyer.
- **All banquet chair** suppliers shall fully insure that they have complete understanding of the direction the designer wants directional fabrics to take on the piece; side-to-side or floor-to-back.
- **It is the seating supplier's** responsibility to insure that all fabric pattern matching is appropriate and utilizes the best yields. All banquet chairs suppliers shall notify the designer or commodity manager if there are ways to have better fabric yields.
- **All face fabric** tailoring is to be smooth and evenly applied. (If COM, the fabric shall be specified with each scheme or custom project).
- **Seams** are to be of sufficient depth and stitches to be within industry standards with a minimum yield (grab) of 1/2", or greater if necessary to minimize seam slippage. Triple stitched French seams shall be used on the seat, double folded with ½" tape sewn along the backside of the seam. Thread used in stitching is to be of sufficient quality for contract use. All seams, including piping/welts, shall be sufficiently sewn to perform without failure for the life of the chair.

- **Overall tolerances** shall be ± ½".
- **Carriers:** Marriott Full Service orders shall specify carriers at the rate of one per 250 chairs.

Packaging

All items shall be cartoned unless an approved alternate has been authorized. The cost of cartoning shall be included in the cost of goods. Prior to packing in cartons, all items shall be wrapped in polyethylene film of sufficient thickness to protect and stabilize the products. Cartoning shall meet or exceed the NMFC regulations for strength as required for shipments via common carriers. **(National Motor Freight Classification**. **Freight is classified based on an evaluation of four transportation characteristics: density, stowability, handling and liability. Together, these characteristics establish a commodity's "transportability.**") All cartons will be labeled in accordance with Marriott International labeling instructions.

Test Criteria for Banquet Chairs

Marriott International Banquet and Stack Chair Test Criteria, ANSI/BIFMA X5.1-12-31-2002

(ANSI: American National Standards Institute; BIFMA: Business & Institutional Manufacturer's Association. Consult the BIFMA Test above for full criteria and Illustrations. All chairs shall meet all applicable tests).

Purpose

To evaluate the safety, durability, and structural adequacy of banquet and task chairs in their entirety as well as their parts.

ACT (Association of Contract Textiles) as Modified for Marriott Use for Banquet Chair Fabrics)

- **Abrasion Resistance, All Decorative Fabrics**: Wyzenbeek: 50,000 Double Rubs for Banquet Chair Fabrics, ASTM D4157-02; Back and Forth Motion, #10 Duck; 62,500 if Martindale, ASTM D4966-98; 12 KPa pressure; Circular Motion, #10 Duck.

- **Flammability**: TB 117, Section E, Class 1 or any other jurisdictional requirements.

- **Colorfastness to Light:** AATCC 16 Option 1 or 3; **40 Hours, Grade 4.**

- **Wet and Dry Crocking**: All Fabrics, 4.0 Dry, 3.5 Wet –AATCC 8-2001.

- **Pill**: Brush Pill ASTM D 3511-02, Class 4.5.

- **Seam Slippage:** ASTM D3597-02-D434-95, 35 pounds.

- **Tensile Strength:** ASTM D5034-95 (2001) (Grab Test): Upholstery: 50 lbs. warp and fill (no knits).

- **Soil Release:** Upholstery fabrics are to be treated with the appropriate soil release, not Scotchgard. Fabrics with Crypton or Crypton-like finishes do not require soil release**.**

Marriott Global Design Product Guidelines
Bed Skirts – Box Spring/Foundation Covers- Bed Throw Pillows

The following are the specifications and codes for top-of-bed decorative products. Any deviations, modification or other changes must be submitted to the appropriate specifier in writing with drawings clearly showing all item changes. All top-of-bed decorative products must meet or exceed the specifications and codes included within and any applicable local code requirements.

Top of Bed Specifications

Information Common to all Items

Decorative Fabrics

- Patterns that run the length of the roll are addressed as “up-the-roll” and patterns that run selvedge-to-selvedge are addressed as “railroaded”. It is critical that the fabricator knows how the specifier wants the pattern to run. It is also the fabricator’s responsibility during development to suggest alternate direction of the fabric orientation, if possible, in order to achieve the design intent and optimum yield.
- Cleaning instruction labels (if applicable) shall be attached to all bed skirts, box spring / foundation covers and throw pillow covers. Label verbiage shall be submitted to specifier for review and approval prior to production.
- **All threads** shall be selected by the fabricator to blend with the colors of the products.
- **Sample Approval:** The fabricator shall make a production sample of all products to send to the specifier prior to production start-up for aesthetic and proper-fit approval.
- **Tolerance:** ± ½” on each side for all products.
- **Platform top for bed skirts and box spring covers:** 70/30 white poly/cotton or 78/54 white cotton/poly with 4” face fabric strip sewn all around the perimeter’s top with mitered and serged corners.
- **Stitches:**
  1. Single or double needle lockstitch: 7 to 9 per inch
  2. All seams to be serged: 5 per inch
  3. Blindstitch: 3 per inch

Bed Skirts

- If seamed, the seam must be concealed in the pleat, not in the center of the pleat where it would be visible.
- Bed skirts shall be constructed with various drop lengths dependent upon the box spring and bed rail or base being used. Therefore, all properties shall confirm their box spring height, width and length, as well as all drops before orders are placed.
- 12" Head huggers made of decking fabric shall be stitched to the side of the skirts at the head of the bed to hold the skirts in place.
- May be specified with inverted pleats, and the number per skirt shall be identified during development. Each pleat apex shall have reinforced stitching to help prevent tears. Pleat turn-back shall be 3” each side to equal 12 inches extra fabric. The apex of the pleat shall be located at a point down from the top of the skirt to be determined by the specifier prior to production.
- Shall be constructed to withstand daily housekeeping adjustments during linen change.

Box Spring / Foundation Covers

- **Box Spring Cover Dimensions:** Determined by the size of the box springs: height, width and length
- **Lined:** Not typically; if lined, lining shall be specified
- **Construction:** To fit snugly around all 4 sides of the box springs and to tuck 2" under the box springs / foundations all around.
- **Elastic:** 3/8" or ½" elastic serged (overlock stitched) at hems.

Decorative Bed Throw Pillows

- Decorative throw pillow covers for top of bed use shall be constructed to withstand daily laundering.
- Generally knife edges for square or rectangular, unless otherwise specified.
- **Seams:** Serged and single-needle lockstitched.
- **Closure:** Zippers shall have opposing face fabric flaps over them and they shall be adjacent to the longest seam to produce a hidden appearance.
- **Inserts**
- Minimum 180 thread count, 100% cotton, white
- **Fill:** Durafill® garneted fiber fill or equal.

Codes and Test Parameters

Marriott Modified ACT Tests for Top-of-Bed fabrics

- Abrasion Resistance, All Decorative Fabrics: Wyzenbeek: ASTM D4157-02; Back and Forth Motion, #10 Duck; Martindale, ASTM D4966-98; 12 KPa pressure; Circular Motion, #10 Duck; (20,000 Double Rubs for Bed Wyzenbeek, 25,000 for Martindale)
- Colorfastness to Light – AATCC 16 Option 1 or 3-2003: Top-of-bed fabrics: 40 Hours, Grade 4 (High sunlight through window areas should be 60 Hours, Grade 4)
- Wet and Dry Crocking, All Fabrics, 4.0 Dry, 3.5 Wet –AATCC 8-200, (Except prints: AATCC 116—2001)
- Pill, All Fabrics: Brush Pill ASTM D 3511-02, Class 4.5
- Seam Slippage, ASTM D3597-02-D434-95: (Fabric Pulls Apart Near the Seam, Warp or Fill) 35 lbs.
- Tensile Strength. Fabrics – ASTM D5034-95 (2001) (Grab Test): Comforter/Duvet, Scarf, or Bed Skirt: 35 lbs.
- Picking: Any construction subject to picking, such as floats in excess of 2 to 4, dependent upon construction, genuine Chenille yarns, etc., should not be used unless warranted in writing against picking.
- Whiteness/Yellowness Index: (For predominantly white fabrics only) ASTM E 313/D 1925.
- Dimensional Change to Laundering : AATCC 96 +/- 3.5% change, maximum

Packaging

All items shall be packaged in polyethylene bags, folded in a manner to minimize wrinkles and cartoned All internal packaging materials and the carton costs are to be included in the price of the goods.

Marriott Global Design Product Guidelines
Carpet, Area Rugs and Padding

The following are the specifications and codes for all Carpet, Area Rugs and Padding for Marriott International NALO properties. Any deviations, modifications or other changes must be submitted to the appropriate specifier in writing with drawings clearly showing all changes and location on the items. All Carpet, Area Rugs, and Padding must meet or exceed these specifications and codes. All Carpet, Area Rugs and Padding suppliers are responsible for the structural integrity and durability of the construction through the ten-year life cycle. The specifier is responsible for fully explaining the end usage so the carpet supplier may suggest construction choices best suited to the application. If the carpet is intended to be seamed, it is to be manufactured such that it will pattern match after seaming. The suppliers shall provide flooded floor plans in color and shall have field measuring capabilities for public spaces and other areas as required.

• **Dye Method:** Skein Dyed or Solution Dyed
• **Pile Finish:** Cut, Cut & Loop, Tip Sheared, Carved **MH & RH:** Cut Pile Preferred
• **Primary Backing:** 100% Cotton Canvas or Polyester
• **Secondary Backing:** Integrated Non-Skid Backing,100% Cotton Scrim/Rubberized Latex or Action Bac
• **Edge Binding:** Sewn on Synthetic or Cotton Binding Tape, Turned Edges, or Hand Surged Edges are acceptable. A binding tape, that is close in color, should be sewn on first with surged edges for added protection. Sew over the top of the tape with the serging yarn for a finished edge. Where binding tape is not used, provide a sewn on selvage edge of no less that two inches, fully coated with backing material. Provide with mitered edges which are in compliance with current **ADA** requirements. Serged Edges with no binding tape are for low traffic areas only.
• **Rows Per Inch:** Minimum 5.50 - 6.10
• **Stitches Per Inch:** 6.0
• **Yarn Size:** 1/81's 4 Ends
• **Pile Weight: Guestrooms:** 72 Oz/SY-88 Oz/SY **Public Space:** 88 Oz/SY-104 Oz/SY
• **Pile Height:** 0.394" (10mm) – 0.472" (12mm) Cut Pile / 0.354" (9mm) – 0.433" (11mm) Loop Pile
• **Total Weight:** 141 Oz/SY – 152 Oz/SY Cut / 138 Oz/SY – 149 Oz/SY Loop
• **Yarn Treatment:** Moth Proofed
• **Flammability:** Passes ASTM D2859 CPSC FF 1-70 Pill Test and ASTM E-648 Class I Radiant Panel for Public Space and Class II for Guestrooms
• **Electrostatic Propensity:** Permanent Anti-Stat Less than 3.5 KV AATCC 134

Carpet Tiles Specification Minimums
• **NOTE: These are the minimum specifications. Design may dictate alternate spec's which will need to be tested and reviewed prior to approval**
• **Construction:** 100% Cut Pile; 100% Loop Pile; Cut & Loop Pile
• **Pile Fiber:** 100% Nylon Type 6 or 6.6
• **Dye Method:** Solution Dyed
• **Gauge:** 1/10
• **Stitches Per Inch:** 10
• **Finished Pile Height:** 0.129"
• **Face Weight: Guestrooms:** Minimum of 17 Oz **Public Space:** Minimum of 20 Oz
• **Pile Density:** 5500 Oz per C/Yd
• **Yarn Ply:** 2 Ply
• **Tuft Bind: Cut Pile:** 3.5 lbs. / **Loop Pile:** 6.25 lbs.
• **Delamination:** Lifetime Commercial Warranty
• **Primary Backing:** Synthetic
• **Secondary Backing:** Thermoplastic Polyolefin Compound
• **Warranty:** Lifetime Commercial

Woven Axminster Carpet Specification Minimums			
• **Pile Fiber: MHR & RHR:** 80/20 Wool/Nylon Type 6.6 **CFRST (Courtyard, Fairfield Inn & Suites, Residence Inn, SpringHill Suites & TownePlace Suites):** 100% Nylon Type 6.6			
• **Dye Method:** Skein Dyed **Wool Source:** New Zealand Wool, British Wool or Mediterranean Wool			
• **Row Per Inch: (see above where used)**	7 Row	8 Row	9 Row
• **Rows per Decimeter:**	7 Row: 27.6	8 Row: 31.5	9 Row: 35.4
• **Finished Pile Weight 80%Wool / 20%Nylon:**	7 Row: 28.1 Oz/SY	8 Row:32.1 Oz/SY	9 Row:36.2 Oz/SY
• **Finished Pile Weight 100% Nylon:**	7 Row: 25.6 Oz/SY	8 Row: 29.3 Oz/SY	9 Row:32.9 Oz/SY
• **Pile Density 80%Wool / 20%Nylon:**	7 Row: 4055	8 Row: 4635	9 Row: 5214
• **Pile Density 100% Nylon:**	7 Row: 3686	8 Row: 4213	9 Row: 4740
• **Finished Pile Height:** 0.250”			
• **Yarn ply:** 2 **Singles twist ± 10%:** 3.6 **2-Ply twist ± 10%:** 4.1			
• **Yarn Count: 80% Wool / 20% Nylon:** 2/47 Dewsbury / R660/2 Tex **100% Nylon:** 2/52 Dewsbury / R660/2			
• **Tufts per Square Inch:**	7 Row: 49	8 Row: 56	9 Row: 63
• **Pitch per Inch:** 7 **Pitch per Decimeter:** 27.6			
• **Backing:** Woven Polypropylene **Back Coat:** 6.5 oz/yd²			
• **Width:** As ordered, ± 1.25%			
• **Bow tolerance:** < 1% **Squareness/skew tolerance:** < 1%			
• **Light fastness, ISO-B02:** 5 **Wet Fastness, ISO105-E01:** 4 **Rubbing Fastness, ISO 105-X12:** 3			
• **Static Electricity:** Stroll Test EN-1815: < 2 Kv Thermal Resistance, ISO 8302: ≤ 0.075(M²kw)			
• **Static Electricity**: Horizontal Resistance, ISO 10965: ≤ 10¹°ohms Vertical, ISO 19065: ≤ 10¹° ohms			
• **Warranty:** 10 Year Wear, 5 Year Manufacturing Defects			
• **Selvedges:** Protected			
• **Soil and Stain Treated:** Yes			
• **Design and color match:** As sampled **Size per dye lot:** No color variation/phase			
• **Installation method:** As specified			
• **Pattern match finished:** Exact **Carpet pattern match tolerance:** 0.8% before stretching			

Tufted Broadloom Carpet Specification Minimums
• **Construction:** Cut & Loop Pile; 100% Loop Pile **4" Bound Base**: 100% Cut Pile or 100% Loop Pile **Binding for Base:** ½" Binding Tape – color to match carpet
• **Pile Fiber:** 100% Nylon Type 6 or 6.6
• **Dye Method:** Solution Dyed
• **Gauge:** 1/10
• **Stitches Per Inch:** 10
• **Twists Per Inch:** 4.5
• **Finished Pile Height: Cut & Loop Pile:** 0.25" / **100% Loop Pile:** 0.125" (not to exceed 0.50")
• **Face Weight: Guestrooms:** Cut & Loop Pile: 32 Oz / Loop Pile: 26 Oz **Corridors:** Cut & Loop Pile: 36 Oz **4" Bound Base:** 100% Cut Pile: 30 Oz / 100% Loop Pile: 28 Oz
• **Total Face Weight: Guestrooms:** Cut & Loop Pile: 64 Oz / Cut Pile: 64 Oz / Loop Pile: 56 Oz **Corridors:** Cut & Loop Pile: 76 Oz **4" Bound Base:** 100% Cut Pile: 60 Oz / 100% Loop Pile: 56 Oz
• **Pile Density: Cut & Loop Pile:** 4600 Oz per C/Yd / **100% Loop Pile:** 7800 Oz per C/Yd
• **Yarn ply:** 2 Ply
• **Yarn Denier:** 1350/2
• **Tuft Bind: Cut Pile:** 3.5 lbs. / **Loop Pile:** 6.25 lbs.
• **Delamination:** 4.5 lbs. ClassicBac / ActionBac
• **Primary Backing:** Polypropylene
• **Secondary Backing:** Equal to ClassicBac or ActionBac – SBR Latex Pre-Coat and secondary coat laminated to a woven secondary backing
• **Bundle Wrap:** 80%
• **Warranty:** 10 Year Wear / Lifetime Stain per Commercial Warranty

CYP (Computer Yarn Placement) Broadloom Carpet Specification Minimums
• **Construction:** Cut & Loop Pile; 100% Cut Pile
• **Pile Fiber:** 100% Nylon Type 6 or 6.6
• **Dye Method:** Solution Dyed
• **Gauge: Corridors:** 1/10 (10x10) all Brands **Public Space:** 1/11 (11x11) CFRST
• **Stitches Per Inch:** 10 (10x10); 11 (11x11)
• **Pile Height:** 0.250"
• **Finished Pile Height:** 0.272"
• **Face Weight: Corridors:** 36 Oz **Public Space: CFRST:** 42 Oz
• **Pile Density:** 5000 Oz per C/Yd for 10x10; 5600 Oz per C/Yd for 11x11
• **Yarn Ply:** 2 Ply
• **Yarn Denier:** 1350/2
• **Tuft Bind: Cut Pile:** 3.5 lbs. / **Loop Pile:** 6.25 lbs.
• **Delamination:** Lifetime Commercial Warranty
• **Primary Backing:** Polypropylene
• **Secondary Backing:** Equal to ClassicBac or ActionBac (Other backings will need to be reviewed and approved)
• **Bundle Wrap:** 80%
• **Warranty:** 10 Year Wear / Lifetime Stain per Commercial Warranty

Codes, Test Parameters and Cleaning

Tests Applicable to Carpet and Padding

- **Colorfastness to Light: AATCC Test Method 16 – 1998 Option E (Rating: Min. 5).** Standard test method to determine resistance to fading using a water-cooled Xenon Arc Lamp, continuous light.
- **Colorfastness to Ozone: AATCC 129. (Rating: Min. 4)**
- **Backing Breaking Load test: ASTM D2646-05, Sections 16 to 24.** Standard test method for backing tensile strength
- **Delamination: ASTM D-3936.** Standard test method for measuring the force required to strip the secondary. (Rating: 3.5 lbs. for Cut Pile/ 6.25 lbs. for Loop Pile)
- **Surface Flammability Test (Radiant Panel): ASTM E-648. (Rating: Class 1)** Standard test method for testing the surface flammability of carpets and rugs. **Class II** — average minimum 0.22 watts per square centimeter within exits, access to exits (corridors
- **Optical smoke density: ASTM E-662.** Standard test method for specific optical density of smoke generation of a light beam by smoke (With the exception of New York City, very few jurisdictions require this test)

Tests Applicable to Carpet

- **Resistance to Crocking: AATCC 165. (Rating: Min. 4)** Standard test method for resistance to crocking for textile floor coverings using the crockmeter method.
- **Mass: ASTM D5848-07 Section 9.** Standard test method for mass-per-unit area of pile yarn floor coverings – pile weight – coated.
- **Height/Thickness: ASTM D6859.** Standard test method to determine the tuft height and pile thickness of pile floor coverings.
- **Bind: ASTM D1335-05. (6.25 lbs. loop pile; 3 lbs. cut pile)** Standard test method for the tuft bind of pile floor coverings
- **Abrasion: ASTM D4158-08.** Standard test method for abrasion resistance of carpet (Uniform abrasion, 70,000 revolutions required)
- **Surface Appearance Retention: ASTM D-6119, Hexapod Drum Test.** Based on a 12,000 cycle Hexapod exposure conditioning test, all carpets and area rugs shall have a least a:
  - 2.5 ARR, moderate traffic end use
  - 3.0 ARR, heavy traffic end use
  - 3.5 ARR, severe traffic use
  - **End use Application Traffic Level Classification guideline performance ratings:**
    - 3.5 ARR, conference rooms
    - 3.0 ARR, suites and guest rooms
    - 3.5 ARR, dining rooms
    - 3.0 ARR, back of house
    - 3.5 ARR, general public spaces; lobby etc.
- **Residual Grease: BS 3582.** British test method for determining the amount of residual grease or oils
- **Compression: ISO 3415 – Static Loading Compression Test.** ISO test to determine the effects of weights placed on it to replicate the effects of furniture. 77% thickness recovery, 62% compression recovery required
- **Electrostatic Properties: AATCC 134.** Standard test method for determining the electrostatic properties when a person walks across the carpet, in step and scuff modes.

CRI Carpet Green Label/Green Label Plus Test Criteria are required for LEED Volume New Builds and Recommended for all Others

- **Green Label/Green Label Plus.** The Green Label program tests carpet, cushions and adhesives to help the specifiers identify products with very low emissions of VOCs. CRI has recently launched its next series of improvements called Green Label Plus for Carpet and Adhesives. This enhanced program sets an even higher standard for IAQ and ensures that customers are purchasing the very lowest emitting products. Carpet is recommended for all projects but required for Green Label Plus.

    - **Green Label Plus:** To receive initial certification, carpet products undergo a 14-day testing process, as required by Section 01350 that measures emissions for a range of possible chemicals.
        - **Carpet products**: An independent laboratory tests carpet products for emission levels for seven chemicals as required by Section 01350, plus six additional chemicals as required by CRI. There are 13 chemicals measured in total.
        - **Adhesives:** An independent laboratory tests adhesives for emission levels for 10 chemicals as required by Section 01350, plus 5 additional chemicals as required by CRI. There are 15 chemicals measured in total.

    - **Green Label:** CRI has established the Green Label program to test for VOCs in cushion used under carpet. This programs helps the carpet manufacturer, installer and end user identify and utilize low-emission cushion. Cushion products that meet the current emissions criteria can display the program's green and white seal. Products are retested regularly for continued compliance.
        - **Cushion products**: Characterized as prime polyurethane, bonded polyurethane, mechanically frothed polyurethane, rubber-hair, rubber–jute, synthetic fiber, resonated or coated synthetic fiber, rubber and rubberized polyurethane.
        - For additional information, contact the Carpet Cushion Council at ww.carpetcushion.org

Marriott Global Design Product Guidelines

Casegoods

The following are guidelines for casegoods used in Marriott International properties. Any deviation, modification or change to a new or existing item must be submitted in writing to the appropriate Marriott contact for written approval.

Casegoods manufacturers are responsible for the structural integrity, durability of finish and design of any casegoods they produce for Marriott International Design and Construction Services (MIDCS). Casegoods supplied for hotel properties in the United States must meet the minimum federally mandated requirements in addition to those listed throughout these guidelines. Other local or jurisdictional requirements are to be established with the specifier/client prior to fabrication.

A. DRAWINGS

1. Provide drawing documentation specifically identifying each deviation and item location within the property.
2. Each manufacturer is responsible for providing shop drawings with complete construction information.
3. Drawings should clearly show exactly which pieces require field assembly.
4. Manufacturers are responsible for providing field assembly instructions.

B. SAMPLES

1. Each manufacturer is responsible for providing samples of finishes, components and assembled furniture prior to fabrication as requested.

C. MATERIALS and COMPONENTS

1. GENERAL

- **a.** All materials used in the construction of casegoods must be new and suitable for commercial use for the duration of life cycle. Life cycle duration varies by brand and ranges between 14 – 21 years.
- **b.** Each component and surface should be appropriate for its intended use, which must be reviewed with the specifier/client prior to drawing submittal.
- **c.** Item production must be in accordance with the approved drawings.

2. WOOD

- **a. Veneer**
  The veneer should be real specified species, first quality unless otherwise specified. Exposed work shall be carefully matched to produce uniformity of veneer lines and designs. Exposed veneer can be used for vertical surfaces including doors, drawer fronts, front and side panels. Engineered veneer is acceptable.
- **b. Solids**
  Exposed solids must be hard woods, Select Number 1 Common unless otherwise specified. Wood materials must be kiln dried to moisture content between 8% to 10%.

Interior solids can be alternate species such has poplar, birch, pine, etc. Where possible, SFI (Sustainable Forest Initiative) lumber shall be used.

c. Core Materials
Vertical panels are to be a minimum 3ply construction. Approved core materials include minimum 45 pounds density particle board, medium density fiberboard (MDF), plywood or marine grade plywood (used on bathroom vanities).

d. CARB (California Air Resources Board) Requirements
Items containing hardwood plywood, particleboard, or medium density fiberboard must be compliant with 93120-93120.12, title 17, California Code of Regulations regarding reducing formaldehyde emissions. Product and cartons must be labeled in accordance with this regulation.

3. METAL

a. Metal framing shall be a minimum 16-gauge steel.
b. Brushed stainless or powder coat finishes are preferred over plated finishes.
c. All welds shall be sanded smooth.
d. Provide adjustable glides at bottom of metal legs or bases for cabinets and desks.

4. VERTICAL FACES

The materials listed below are approved for use on Marriott guestroom casegoods. Refer to brand specific décor scheme specification documents to identify the exact vertical material approved for the current brand program.

a. Veneer:
Veneer should be the real specified species, first quality unless otherwise specified. Veneer cut shall be specified to match approved finish panel. Engineered veneer is acceptable. Construction shall be 3 ply and lesser quality veneer faces are allowed for unexposed areas. Same veneer species and quality must be used where exposed such as the interior of doors.

b. High Pressure Laminate
HPL must be 3 ply construction with a minimum ¾" core used. Inside face shall be HPL when exposed or gator ply backer sheet is acceptable when not exposed. Edges shall be finished with a minimum 1 ml thick PVC edge banding when exposed. All edges shall be sealed to prevent moisture seepage.

c. Thermofused laminate (TFL), Thermosfused melamine (TFM) or Low Pressure Laminate (LPL)
TFL/TFM/LPL must be 3 ply construction with a minimum ¾" core used. Inside face shall be TFL, TFM or LPL to match vertical face pattern unless alternate pattern is specified. Edges shall be finished with a minimum 1 ml thick PVC edge banding when exposed. All edges shall be sealed to prevent moisture seepage.

5. TOP SURFACES

The top materials listed below are approved for use on Marriott guestroom casegoods. Refer to brand specific décor scheme specification documents to identify the exact vertical material

approved for the current brand program. Case piece must provide adequate support structure to prevent warping or sagging for the specified top.

a. Laminate
Must be 3 ply construction with minimum ¾" thick core with high pressure laminate (HPL) top and gator-ply backer to balance top. 5 ply construction laminate top can be used to accommodate various edge profiles and prevent telegraphing. Particle board or MDF are typical core materials. Edges on laminate tops can be solid lumber stained to match laminate pattern or PVC edge banding at minimum 1 ml thick. 2 ml thick is recommended for edges on desks. Veneer or HPL edge banding is not acceptable on laminate tops. Tops should be smooth and free from nail pops.

b. Engineered Quartz or Stone
Minimum thickness of ¾" (2cm) with eased edges, ½" thick is acceptable if used with fully supported sub-top. Top, sides, and front edges of pieces that back to a wall must be polished. Desk tops may require polishing on four sides if specified and to be determined by specifier/client. Engineered Quartz shall contain minimum 88% mineral content. Granite and quartzite are approved stones for use of tops. Marble is not acceptable for top surfaces. All-natural stones must be pre-sealed by stone supplier prior to installation to prevent staining.

c. Luggage bench tops are recommended to be non-white engineered quartz or HPL with inset metal strips for protection. Low height firmly padded tops with eased corners may be used for luggage bench tops.

d. Epoxy based solid surface tops are not recommended as furniture tops.

e. Back painted glass is acceptable using paint suitable for glass application. Glass shall be tempered using a minimum ¼" thick glass with pencil polished edges. Low iron glass is recommended for lighter color paints.

f. Protective glass tops over veneer or laminate shall be tempered using a minimum ¼" thickness with pencil polished edges.

g. Veneer tops are not recommended for high usage areas. If used, acceptable protective top coat finishes include polyurethane, acrylic or UV finishes. Conversion varnish or catalyzed lacquer top coat is not acceptable over wood veneer horizontal top surfaces.

h. Inset tops of any type (laminate, stone or veneer) are not recommended.

6. CABINET INTERIORS for REFRIGERATORS and MICROWAVES

a. Casegoods cabinet bottoms holding refrigerators and microwaves shall be HPL and have edges aligned with vertical panels sealed against moisture seepage.

b. Provide large opening in cabinet back for ventilation and cord access to wall outlet. Provide opening in cabinet base and bottom for ventilation intake of cool air.

c. Follow appliance manufacturer's recommended clearances at top, sides and back for adequate ventilation to maintain appliance warranty.

d. Provide wood or metal strip stop attached to cabinet bottom to prevent refrigerator from moving forward when opened.

e. If microwave is optional, provide a perforated back panel that can be field cut open when microwave is used.

f. As needed, may provide FPDU rated outlet within cabinet cavity to allow appliances to be plugged in at cabinet with adequate cord length to reach wall outlet.

7. CASEGOOD DOORS

- **a.** Doors shall be 3 ply construction faced with veneer, HPL, TFL, TFM or LPL as specified for specific décor scheme. Formed solid wood is acceptable provided the doors are warranted to not warp over their life spans. Solid wood framing is preferred on all impact areas.
- **b.** Door edges shall be lumber banded where hardware hinges or door pulls are attached. Other edges shall be veneer or PVC banded to match décor scheme materials.
- **c.** Concealed European style hinges are approved. Number of hinges per door to be adequate to support weight of door. Door swing shall be determined based on function and shall exceed 90 degrees if function allows. Soft close hinges are acceptable if specified.
- **d.** Provide magnetic catch on cabinet to ensure door remains closed.

8. DRAWERS

- **a.** Both 4 and 5-sided drawer constructions are acceptable
- **b.** Drawer fronts shall be ¾" thick using particleboard or MDF core. Screws to attach drawer fronts to drawer box shall be countersunk to prevent damage to drawer contents. 3-ply drawer front construction is typical using face, backing and core materials consistent with casegoods décor scheme. Drawer front edges shall be solid wood, veneer, or PVC banded consistent with overall casegoods construction and shall match décor scheme finish.
- **c.** Drawer sides and backs shall be of minimum 7/16" thickness solid wood or plywood, sanded smooth and splinter free. Drawer sides shall be securely joined with English or French dovetailed joints connected to the drawer fronts with full Groove and Tenon at each back. Box sides shall be at least ¾ of the height of the drawer face. Drawer depth from front-to-back shall be as deep as possible. Each part shall be sanded smooth and sealed with a moisture resistant coater. All joints are to be glued. Vinyl wrapped drawer boxes are not approved.
- **d.** Drawer bottoms shall be of minimum 1/8" thick epoxy coated hardboard, glued plywood, birch or maple, or veneer faced and finished to be resistant to spills and stains. The perimeter under the bottom shall be continuous hot melt glued with no breaks, and fully captured in a groove at front sides and back. Additional stretchers shall be used underneath as needed for structural stability and strength.
- **e.** Maximum width of drawer boxes not to exceed 36" with 30" maximum width preferred.
- **f.** Interior of drawer boxes shall be clear coated or stained to match casegoods finish as specified.
- **g.** Drawer side guides shall be a minimum of 75-pound heavy duty full extension guides. Guides shall be secured with screws to draw sides and case sides and partitions. Undermount, soft close or self- close guides are acceptable when specified.
- **h.** If guestroom safe is specified, manufacturer to provide drawers with interior dimensions and adequate structural support to fit secure installation of safe per manufacturer's specifications.

9. OUTSIDE BACKS

- **a.** All case pieces are typically recessed minimum 1.5" for electrical cord plugs and shall be attached using coated industrial type staples or screws secured into when possible.
- **b.** Back panels shall be secure at all four corners with wood screws and include and cut out for base at floor. Construction to be min. ½" thick MDF, 3ply veneer panel or plywood for structural support.
- **c.** Outside backs are semi-finished with sealed edges unless otherwise specified.

10. DECORATIVE HARDWARE

- **a.** Pulls, handles and other decorative hardware should be of the type and finish as specified on the approved drawings.
- **b.** To ensure design intent, samples shall be submitted to the specifier for approval.
- **c.** Acceptable decorative hardware finishes include plated metal, powdercoat and solid wood

11. GLIDES and LEVELERS

- **a.** Furniture glides with a minimum diameter of 5/8" shall be used in all four corners.
- **b.** Non-rusting metal or nylon glides are acceptable.
- **c.** Adjustable glides are required on all furniture pieces with doors, pieces that exceed 36" wide or furniture placed on LVT flooring of any width.
- **d.** Glides to adjust a minimum of ½" and larger adjustment may be required on longer cabinets and those with doors.
- **e.** Fixed glides are approved for narrow width furniture pieces installed on carpet.
- **f.** For small accent tables used on carpeted surface, glides may be eliminated to allow for easier movement.

12. ELECTRICAL

- **a. Owner Furnished Decorative Light Fixtures**
  Casegood pieces will have cutouts for the specified light fixture on the program décor scheme. If alternate light fixture is specified it is the designer/specifier's responsibility to confirm the new dimensional cutouts and placement required. All owner furnished decorative lighting fixtures shall be UL or ETL listed and so labeled.
- **b. Power Supply Unit (Self-Contained Plug-In Unit**s)
  All power supply units for guest charging must be rated and labeled as Furniture Powered Distribution Units (FPDU). Outlets must be tamper-resistant with TR visible markings. USB charging to be a minimum 2.1 AMP shared rating with higher amperage preferred for faster charging. Cord shall be 14/3 SJT round commercial cord with 3-prong grounded plug. These units must be plugged directly into wall outlets and cannot be plugged into a consolidating power strip outlet.
- **c. Power Strips**
  Casegoods supplier may provide consolidating power strips that are used behind the casegood pieces. All units shall be rated and labeled as Furniture Powered Distribution Units (FPDU). These units can be used to consolidate lighting components only and cannot be used as extensions for charging outlets.

d. Supplier Furnished Lighting
Specified lighting that is provided by the supplier must be UL or ETL listed and labeled.

e. Headboards, nightstand panels and cabinets may require access panels to allow electrical fixtures to plug into wall outlets. Panels must be secured with Velcro or hinges and must open without the use of tools.

f. Furniture design to provide routing for electrical cords from owner furnished or supplier furnished electrical components to reach outlets. Cords shall be routed in the most direct routing to the wall outlet and wire management clips or channels provided on the furniture to conceal cords as much as possible from view.

g. Marriott does not require furniture assemblies to be UL listed. Individual electrical components used in or attached to casegoods must be UL or ETL listed and labeled. Local jurisdictional requirements for UL listing of furniture assemblies should be verified by the specifier/client and addressed as necessary prior to production on an individual project basis.

D. CONSTRUCTION and WORKMANSHIP

1. JOINTS

a. The type of construction used shall be concealed finger joints, mortise-tenon and dowel panel, rigidly assembled. Panels shall be corner blocked, glued and cross-screwed. Furniture quality screws #8 to #10 with sufficient screw type bite shall be used. Clamp nails shall be used on mitered bases and aprons.

b. Joints, corners and miters with glued double dowels shall be accurately fitted and rigidly secured using the case clamp technique. Joints shall be splined, mortised and tenoned, tongued, doweled, or full length blocked as well as glued and screwed in two directions.

c. Glues used in joint construction shall be commercial furniture grade. Excess glue shall be removed from visible areas prior to finishing.

2. EDGES

a. All exposed edges shall be edge banded and sealed for moisture resistance.

3. FINISHING

a. Stained finish shall be a uniform color between veneer, solid wood and laminate with a smooth and even surface.

b. The stain color shall match wood grain high pressure laminate or Marriott approved custom finish sample.

c. Approved stains include Akzo Nobel, Lily and Sherwin Williams certified stains.

d. Protective topcoat on wood furniture to be polyurethane, modified polyurethane, catalyzed lacquer or UV finish.

e. Grain shall be open pore or closed pore as defined by control finish panel.

f. Exterior of case pieces shall be in finished three sides with outside back semi-finished unless otherwise required. Semi-finished backs are not suitable to be exposed. Desks and occasional tables are to be finished on 4 sides.

g. The interior sidewalls next to the doors and drawers are to be stained to match exterior of casegoods finish.

E. ASSEMBLIES

1. HEADBOARDS

a. All headboards with the design intent to hang from the wall shall be cleated to the wall. The cleat should be positioned to be able to secure the headboard tightly against the wall after installation. The top half of the wood cleat shall be factory applied with the headboard and the bottom half shall be included in the same carton. The manufacturer shall supply all brackets and cleats for installation. The fasteners required to attach headboards to the wall shall be supplied by the FF&E installer due to varying wall materials and construction. The supplier shall provide all hardware necessary to assemble headboard components including those to align headboards with adjacent nightstand panels.

h. Solid interior parts shall be hardwood unless otherwise specified and shall be free from defects which may impair serviceability. The species shall be of types that are aesthetically and structurally correct for their intended purposes.

i. The vertical face of the headboard shall conform to the décor scheme vertical panel material and construction.

j. It is the designer's/specifier's responsibility to ensure that all headboards meet all jurisdictional requirements including, but not limited to, UL-962, UL-723, ASTM E-84 or NFPA-255 as they apply to the selected headboards, with or without lighting and/or electrical drops. If headboard include upholstered panels, panels shall be attached to headboard using industrial Velcro or cleat for easy removal and recovering without requiring headboard assembly to be removed from the wall.

k. If headboard includes upholstered panels, panels shall be attached to headboard using industrial Velcro or cleat for easy removal and reupholstery without requiring headboard assembly to be removed from the wall.

l. Upholstered panels to be constructed as separate components using a minimum ½" thick panel of MDF or plywood topped with minimum 1.8 density foam with Dacron layer between foam and decorative fabric/coated fabric. Foam shall pass TB117-2013 flame requirements at a minimum or higher rating as required by local jurisdictions

2. BED PLATFORMS

a. Core materials for bed platforms shall be MDF and/or hardwood solids.

b. Platform structure shall provide appropriate weight support across all surfaces and as necessary at areas with openings below.

c. Bed platform vertical faces shall conform to the brand décor scheme material.

d. LPL (Melamine), HPL, wood veneer and upholstered panel finishes are acceptable.

e. Exposed edges shall be radiused or eased to avoid sharp corners.

f. Accessible platform bed base height shall provide overall 22" AFF (21 to 23" range) from finished floor to top of uncompressed mattress, unless otherwise dictated by applicable state or local laws.

Provide 7" high clearance under accessible bed platform bed with a depth and width to accommodate a lift unless otherwise dictated by applicable state or local laws.

g. Supplier to provide non-skid material at platform top surface, such as Velcro strips, placed 12" in from outside edges to prevent mattress from slipping.
h. Bed platform to ship KD for field assembly.
i. Supplier to include all necessary hardware for field assembly.
j. Provide adjustable glides for leveling across uneven floor surfaces.

3. VANITIES

k. Marine grade plywood core construction is required.
l. Supplier to provide a sub top to support weight of top material-typically engineered quartz or stone.
m. Designer/Specifier to provide cut out size for specified sink and faucet set and physical sample of each to be installed and approved prior to project production.
n. Clearance under vanity to be minimum 27", higher for accessible rooms. Designer/specifier to verify local code requirement and specify accordingly.
o. Base or legs of vanity are to be sealed against moisture seepage with metal base or ferrules recommended.
p. Adjustable glides are required.

4. DINING TABLES

a. Tops
1) Provide highly durable surfaces such as HPL or **engineered** quartz. Marble tops are not acceptable.
2) Core materials or sub tops for tables shall be MDF, particle board, or plywood including multiply Baltic Birch plywood.
3) If wood tops are used, solid wood is preferred over veneer. All wood tops much be used protective top coat such as polyurethane, acrylic or UV finish.
4) Thickness of top or apron to be sized to provide adequate leg clearance when seated.
5) Table top and apron edges shall be generously (3/16") eased.
6) Designer/specifier is responsible to coordinate table height with seating height for comfortable usage.

b. Bases
1) Bases shall be sized to fit top size and weight that is being supported. Follow manufacturers recommendations.
2) Bases supporting quartz or stone tops require fully welded assembly. Wider spread, heavier weight bases are required to support quartz/stone tops. X shape bases are not recommended for quartz/stone tables due to tipping risk.
3) Provide adjustable glides on all bases for leveling. Glides should be specified based on specific floor type.
4) Powder coated, clear-coated plated, cast iron or stainless metal bases are recommended.

5. OCCASIONAL TABLES

a. Framing shall be solid wood, metal tubing or panel construction based on design intent.

b. Tops shall be durable materials such as HPL, quartz or tempered glass. Veneer tops are not recommended unless protected with ¼" tempered glass or top coat finishes such as polyurethane, acrylic or UV finish. Provide silicone spacers between furniture top and protective glass top to keep in position. If table will be moved, protective glass is not recommended.

c. Top edges shall be solid wood with generously eased edges.

d. Provide adjustable metal or nylon glides at bottom of legs or panels for tables that will remain fixed in location. For tables that will be moved frequently, provide fixed glides.

e. Provide adjustable glides for any cabinet that has doors.

f. Narrow console tables less than 15" deep shall be attached to the wall using anti-tip devise or cleat to prevent tipping.

6. COMMUNAL TABLES

a. Ensure overall length of table can be transported and installed on site. Table may need to be manufactured in parts and assembled on site. Installation instructions and hardware to assemble table to be included by supplier.

b. Clearance under table apron shall be a minimum of 27" AFF. Table aprons to be sized to allow for adequate leg clearance when seated.

c. Provide highly durable top surface such as quartz or HPL. Veneer is not recommended unless protected with durable top coat such as polyurethane, acrylic or UV finish. Conversion varnish or catalyzed lacquer is not recommended. Protective glass tops are not recommended due to wicking of spilled liquids and difficulty of cleaning.

d. All table edges to be generously (3/16") eased. Recommend solid wood or quartz aprons to protect from chair or stool impact.

e. All charging outlets to be rated as Furniture Power Distribution Outlets (FPDU) and so labeled. Cord length to be adequate to allow for charging outlets to plug directly into floor or wall outlet. Provide wire management clips or channels underneath top to conceal excess electrical cords. Provide access panel or cut out in table support panels or legs to allow outlets to be plugged to outlet with table in place.

f. Provide adjustable glides on all support legs or panels.

7. ACCESSIBLE FURNITURE

a. Designer is responsible to identify local accessible code requirements and specify furniture to meet accessible standards.

b. Desks shall allow minimum 27" clearance AFF to underside of desk apron, 30" wide clearance between desk support legs or panels and 17" deep clearance from front edge towards back of desk.

c. Accessible bed platform must have 7"h x 56" w x 30" deep cutout on long sides of platform to allow for use of wheelchair transfer lift. Overall height of bed in accessible rooms including platform and mattress to be 21" to 23" h. Platform height to be determined based on thickness of mattress and platform to meet target overall height of bed.

d. Height of switches for electrical components on headboards or nightstand panels in accessible rooms to be located 48" AFF for front approach or 54" for side approach.

Note that on/off switch at light fixture may be included with decorative fixture or may be a separate on/off switch installed in the casegoods furniture piece.

F. INSTALLATION

1. Furniture over 27" high that holds clothing or supports a television must be secured to the wall with an anti-tip device, cleat, or other means in compliance with ASTM F2057-19.
2. Hardware required to attach furniture to walls is to be provided by the FF&E installer.
3. Hardware to assemble furniture shall be included with step-by-step instructions for assembly packaged in furniture cartons.

G. SHIPPING

1. PACKING

- **a.** All casegoods items shall be fully cartoned suitable for Less than Truckload (LTL) shipment. Reduced packing is acceptable for truck load shipments only with prior approval.
- **b.** Cartons shall be minimum 200 lb. test corrugated board.
- **c.** Furniture items shall be wrapped in microfoam and packed with cardboard or Styrofoam corner guards and blocking to prevent shifting during transit.
- **d.** All cartons shall be clearly marked with contents to include purchase order number, material ID number, supplier model number. Items that ship in components parts with multiple cartons must be clearly identified.
- **e.** Supplier to Provide pallets as necessary to prevent freight damage during transit.
- **f.** All engineered quartz or stone shall be multi packed on edge in crates with contents clearly labeled on exterior of crate.

2. LABELING, BILL of LADING and ROUTING

- **a.** Must comply with Marriott International Standards Routing Guide
- **b.** Cartons are to be loaded so as to prevent damage enroute.
- **c.** Reduced cartoning is acceptable for truckload shipments only if authorized in advance. Blanket wrapped shipments must be approved prior to shipment.
- **d.** The supplier is to supervise the packing to avoid over stacking, wrong sides up, and crushing of the contents.
- **e.** Freight charges shall be third party billed by the carrier to account.
- **f.** The Bill of Lading is to be marked with the purchase order number, material ID number and/or supplier's model number, and any other markings required by the purchase order. Bill of Lading is to be noted as prepaid.
- **g.** Freight charges are to be billed to the appropriate account.
- **h.** Any LTL or TL, except RPS and UPS shipments, shall be shipped per Marriott International's Routing Guide.

Marriott Global Design Product Guidelines
Decorative Lighting

This guideline covers portable and hardwired light fixtures whose primary function is task or ambient illumination. All Marriott lighting product suppliers are responsible for the structural integrity, durability of finish and design of all lighting product they produce. Each supplier is responsible for providing shop drawings with complete construction information, including where-used and finished samples for all upholstered products. All lighting products must meet or exceed these specifications.

Base

- The base must pass the UL requirement which states that all floor & table lamps must be stable enough to be placed on an 8 degree angle without tipping over. The base shall include a protective coating to prevent corrosion and rust. Bottom of bases to be covered in felt or rubber to prevent skidding on the table surface top.

Wall Arm Brackets

- Wall bracket arms should have two points of connection to the back plates. Any single arms with one point of connection are not recommended but should be tightly fixed and glued to prevent rotation.

Ballasts

- Ballasts are considered a part of the fixture and must be warranted for the life of the fixture and replaceable by the supplier. Recommended ballasts: Advance or Universal.

Sockets

- Phenolic or porcelain are recommended for use. Use medium base sockets for all portable fixtures and wherever possible for hardwired fixtures; GU24 or pin based sockets can be used in hardwired fixtures when necessary.

Switches

- Switches must be rocker style and ADA compliant. The ADA (American Disabilities Act) requires that switches are not more than 48" off the floor if the switch is accessible only by forward reach (reaching in front of a wheel chair). If a wheel chair can be positioned alongside the switch for side-reach, it can be 54" off the floor. Switches should be secured with a metal clip and glue.

Fabric Shades and Components

- The shade frame and spiders, and all components (harps, finials, etc.) shall have a protective coating to prevent rust. All fabrics used on shades must be in compliance with UL requirements for weight and distance-from-the-lamp dependent upon the lamp wattage. The inner lining, referred to as "Hardback" must be virgin (non-recycled) polystyrene and shall be of sufficient thickness to avoid creasing and maintain the shape of the shade during normal handling. Polystyrene should have a minimum thickness of .4mm. Fabrics shall be trimmed neatly to avoid raw edges or loose threads showing through the lit shade. Any trim used must be glued or machined in place for permanency. Any diffusers used must be selected carefully to perform properly based on design and heat considerations.

Finishes

- To be determined by the specifier for specific applications. All finishes should be durable and protected to withstand possible corrosion from multi-purpose surface cleaners used by housekeeping.

Powder Coating

- Powder coating is recommended when humidity is a factor to retard rust. Powder coat must be durable enough to prevent scratching.

Painted Finishes

- All Painted finished are to be coated to prevent scratching.

Plated Finishes

- All plated finishes must comply with ASTM standards and be coated to prevent rust. The fixtures must be coated after any bending of metal.

Metal Gauge

- Metal gauge (or thickness) shall be fit and sufficient for the intended use of all fixture applications and meet all necessary requirements in a hospitality environment. Metal gauge is to be thick enough to prevent any deflection or denting (when used on bases for portables and back plates for wall mounted fixtures) and to prevent leaning (when used on vertical posts for table and floor lamps).

Convenience Outlets and Cords:

- Outlets must be securely attached to fixture using metal clips and glue and must last the life of the fixture. Fixtures that contain outlets are to have a minimum 3.5 amp, 125V electric outlet with 18 gauge cord set. Higher amperage outlets may be specified if required; outlet amperage ratings at 15 amp or higher will require a 14 gauge cord set. If multiple outlets are used, they must have different orientations for easy application for multiple charger styles. Tamper resistant outlets may be required dependent upon local jurisdictional requirements. Cord length specified should to be measured from the base of the fixture to the end of the plug.

USB Outlets:

- Transformers are to be10 watt, 2amp minimum to allow for charging both cell phones and tablets/computers.

Light Bulbs:

- LED bulbs are preferred, and Compact Fluorescents (CFL's) are acceptable. Check the light fixture socket configuration as use of CFL bulbs in base up orientation may decrease the life expectancy of the bulb. Integrated LED panels and strip tapes can be used for specific applications.

Dimming Systems:

- If using dimming systems, predominately in the public space, ensure that all specified dimmable light bulbs and LED drivers (used in integrated LED light fixtures) are compatible with the dimming system being used.

Voltage:

- Voltage should be clearly marked on the light fixture. Check with specifier prior to production to verify voltage requirements, especially with corridor fixtures where 277 volt may be used. Use of dual voltage ballasts in corridors and public spaces will avoid potential voltage coordination errors.

Lighting Component Codes for California Properties

- Light fixtures to be used in California must comply with Title 20 and Title 24 California Electric Code, or applicable current code.

Certification

- Marriott accepts OSHA approved independent certification laboratory standards and all lighting products must meet or exceed these guidelines and codes, including but not limited to UL, CUL, ETL, ANSI and NFPA, however some local jurisdictions specifically require UL. Light Fixtures must display the approval label of an OSHA-approved independent certification laboratory. Local jurisdiction requirements should be checked in order to meet compliance.

Marriott Global Design Product Guidelines
Upholstered Furniture Fabrics

- The following are the general specifications for all fabrics used in upholstered furniture products. All fabrics must meet or exceed these specifications within and perform as required for their intended use. Each supplier shall provide complete specifications including applicable performance test data. All fabrics must be suitable for commercial applications and must meet industry standards. Any deviation, modification or other changes to the approved original or existing specifications must be submitted to the appropriate requestor in writing.

Fabric Cleaning Codes

- The applicable cleaning codes and cleaning techniques shall be included in the information provided with all quotations.

Performance Requirements against ACT tests

- **Abrasion resistance: ASTM D4157 Wyzenbeek or ASTM D4966-98 Martindale, 12 KPa pressure. #10 Duck**
  - Upholstery/guestroom: 50,000 double rubs Wyzenbeek or 60,000 Martindale
  - Upholstery/Public space: 50,000 double rubs Wyzenbeek
- **Flammability:**
  - Upholstery: CA-117-2013 and NFPA-260
- **Colorfastness to Light AATCC 16, Option 1(Carbon-Arc lamp) or Option 3(Xenon-Arc lamp):**
  - Upholstery in extreme light conditions, such as exposure to sunlight through windows: 60 hours, grade 4
  - All other fabrics: 40 hours, grade 4
- **Wet and Dry Crocking: AATCC 8:** Rating of 4.0 dry and 3.5 wet.
- **Pil: Brush Pil ASTM D 3511,** Class 4.5
- **Snag Resistance, All Fabrics except tightly woven fabrics with no floats; ASTM D3939** Rating ≥4.5
- **Seam Slippage ASTM D4034:** 35 LBS. Minimum
- **Snag Resistance, all Fabrics: ASTM D 3939,** Rating ≥ 4.5
- **Tensile Strength, Fabrics, ASTM D5034 Grab Test:**
  - Upholstery: 50 lbs. warp and fill (no knits).
- **Picking: (**Separation of yarn from plane of fabric) Any construction subject to picking, such as floats in excess of 2 to 4, dependent upon construction, genuine Chenille yarns, etc., should not be used unless warranted in writing against picking.

Finish Requirements

- **Soil Release, Upholstery Fabrics: ASTM D1308-CFFA 141** ≥4.5 Permanent finish such as Nanotex, Crypton, ALTA or INCASE
- **Ink Resistant:** Ink resistant finishes are recommended for chair seats
- **Backing:** Backing is highly recommended and should be suitable for the use intended. Acrylic backings are generally acceptable for most uses. Knit or other stronger backings may be required for loosely woven fabrics based on its intended use.
- **Flame Treatments:** Marriott does NOT accept topical flame retardant finish

Coated Fabrics – Performance Specifications

If Polyurethane is used, the use of PU whose main component is polycarbonate is highly recommended. Hydrolysis performance listed below.
PVC's shall be phthalate free

- **Abrasion: ASTM D4157** 100,000 double rubs minimum
  ASTM D3389 (PRINTS ONLY) 250 cycles
- **Blocking: CFFA 4/Fed.Std191a TM5872**, no blocking, slight adhesion, minimum
- **Cleanability: ASTM D1308/CFFA 141**, Class 4.5 minimum, Stain testing: ink, denim dye, oil-based stains, beverage stains
- **Durability to cleaners: AT DTC-01,** Pass
- **Coating Adhesion: ASTM D751**, 3 lbs, minimum (1" width)
- **Cold Crack Resistance: CFFA 6a** no cracking at 20 degrees Fahrenheit
- **Colorfastness to Crocking: AATCC 8**, Dry: class 5 minimum/ Wet: Class 5 minimum
- **Colorfastness to Light**: **AATCC 16.3, Opt. 3**, Class 4 minimum (200 hours)
- **Flammability: Cal 117-2013**, Pass; **NFPA 260**, Class 1
- **Flex Resistance**: **ASTM D2097/CFFA10,** 25,000 cycle, no appreciable crazing, cracking
- **Hydrolysis: ISO 1419 Method C,** 10 weeks no cracking, peeling, delamination; Pass (Applicable to Polyurethane)
- **Puncture Resistance: ASTM D751,** 30 lbs. minimum
- **Seam Strength, Tack Tear: ASTM D751/CFFA14**, 35 lbs. minimum
- **Stretch and set: SAE J855,** set 5%
- **Tear Strength: ASTM D751, CFFA 16b**, 4 lbs. minimum (tongue method-woven); **ASTM D751, CFFA 16c**, 15 lbs. minimum (trapezoid method – non woven)
- **Tensile Strength: ASTM D751/CFFA 17**, 50 lbs. minimum

Packaging

All rolls shall be wrapped sufficiently to protect them during shipment. The cost of covering the rolls is to be included in the cost of goods. Dependent upon quantity, the rolls shall be loose or on pallets. The packaging method shall meet or exceed the NMFC regulations for strength as required for shipments via common carriers. All rolls will be labeled in accordance with Marriott International labeling instructions.

Marriott Global Design Product Guidelines
Luxury Vinyl Tile (LVT)

The following are the specifications and codes for all Luxury Vinyl Tile and Underlayment Products for Marriott International NALO properties. Any deviations, modifications or other changes must be submitted to the appropriate specifier in writing with drawings clearly showing all changes and location on the items. All Luxury Vinyl Tile and Underlayment Products must meet or exceed these specifications and codes. Suppliers are responsible for the structural integrity and durability of the construction through the life cycle that is needed for a specified program and the suppliers warranty. The specifier is responsible for fully explaining the end usage so the Luxury Vinyl Tile supplier may recommend Color, Gloss and Embossing/Pattern choices best suited to the application.

Overview: Printing processes used in the development of Luxury Vinyl Tile provide a realistic visual. The ability to replicate the look of hardwoods and stones using this advanced photographic technology is a key benefit of Luxury Vinyl Tile (LVT) flooring systems. A high performance clear wear layer provides durability necessary for commercial environments. Available in tile or plank format, LVT is comfortable under foot, water resistant and easy to clean and maintain.

ASTM has industry standards for resilient flooring. The Vinyl Tile category includes: VCT (Vinyl Composition Floor Tile) and SVT (Solid Vinyl Tile). The term LVT (Luxury Vinyl Tile) is not recognized as a separate flooring category by ASTM however it falls under the SVT category due to the amount of vinyl or binder content. SVT products have 34% or higher vinyl or binder content and VCT products have less than 34%. LVT products have 34% or higher therefore, it falls under the SVT category.

There are multiple layers to LVT flooring that are fused together:

- UV Cured Urethane, Acrylic, or Aluminum Oxide Top Coat Layer – Provides stain and abrasion resistance and adds durability
- Wear Layer(s) – Protects the design and adds long lasting appearance retention, measured in mils
- Decorative Film Layer – The design and color layer
- Core and Backing Layer(s) – For dimensional stability, impact resistance and durability

Marriott requirements are listed below the LVT Guidelines along with information regarding ASTM Test Codes and Parameters, and Certifications.

LVT Design Guidelines – Commercial

When selecting your LVT flooring, there are design guidelines to consider for long lasting appearance retention. Similar to carpet not being stain-proof, LVT flooring is not scratch-proof or scuff-proof. Generally when designing a carpet we stay away from solid colors and light colors. We often add texture and design using multiple colors to mask any soiling or staining, LVT is no different.

- Embossed surfaces are best to mask scratches and scuffs, smooth surfaces will show all scratches
- Variations in color are best to mask scratches and scuffs
- Darker, solid colors naturally show more scratches and dirt and require more maintenance
- Lighter, solid colors naturally show more scuffs and dirt and require more maintenance

LVT Installation Guidelines – Commercial

Installation methods are dependent upon the environment the product is being installed. The specifier is responsible for fully explaining the end usage so the Luxury Vinyl Tile supplier can recommend the best installation method best suited to the application.

- Floating (Acoustically quiet, easy and quick to install or replace, must maintain a 5/16" expansion around perimeter of room to allow the product to move)
    - Locking System/Clic Joint, No Adhesives Required, Can be installed with or without Underlayment, Can be used in a bathroom with a silicone caulk around perimeter and toilet

- Glue Down (Follow suppliers installation guidelines and suggested adhesives)
    - Roll on applied or trowel
    - Spray Adhesives

Proper acclimation of flooring materials and adhesives MAY be necessary. Vinyl contracts when cold and expands when warm. It is important to make sure temperature conditions are stabilized before and after installation. Refer to suppliers instructions before installing.

Subfloors must be dry, firm, smooth, level, clean and dust-free. Subfloor preparation must comply with ASTM F710 (Standard Practice for Preparing Concrete Floors to Receive Resilient Flooring) or other applicable National Standards & Building Codes for the installation of LVT flooring and in strict accordance with the suppliers installation guidelines. Moisture testing according to ASTM F1869 and Relative Humidity testing according to ASTM F2170, must be performed in advance of any installation. Proper installation will protect and extend the life of the flooring.

Clean floor to remove any dirt, dust and loose debris from jobsite post installation. Cover the floor with construction paper, cardboard boxes, or masonite sheets to protect from traffic from other trades while furnishing the areas.

When moving furniture/heavy objects, always lift and carry across the floor, never slide them over the surface. Always use the proper glides, carts, or furniture protectors.

Underlayments are required by Marriott for better sound abatement above the minimum requirements listed below. Some suppliers have the underlayment already attached to the LVT and some offer their own separate underlayment that is compatible with their LVT. The specifier is responsible for fully explaining the end usage so the LVT supplier can recommend the underlayment choices best suited to the application and the product.

LVT Care and Maintenance Guidelines – Commercial

Follow the Suppliers recommended Care and Maintenance Guides for Routine Maintenance. Proper care and maintenance will protect and extend the life of the flooring.

Initial and Routine Maintenance:

- Sweep or dust mop to remove loose debris and dirt
- If needed, use a diluted neutral pH cleaner to remove spots or stains, and any dry adhesive residue. Damp mop with water to remove the cleaning solution. Follow suppliers cleaning instructions.
- Never use highly abrasive scrubbing tools or harsh chemicals. A red 3M pad is recommended.

Preventative Maintenance:

- Always protect floors when moving heavy objects to prevent permanent scratches.
- Use appropriate furniture protectors under tables, chairs and heavy furniture to prevent scratching and indentations. Chair glides, felt pads and stainless steel glides are recommended.
- Walk-off mats should be used at all entrances from the outside to absorb moisture, soil and debris.
- Avoid exposure to long periods of intense, direct sunlight.
- Do NOT use ball type castors as they can damage the floor. Castors must be easy swiveling. Use minimum of 1" wide or more furniture protector with rounded over edges. Clean up spills immediately.

Luxury Vinyl Tile (LVT) Minimum Specifications (Must meet or exceed)

- **Class: ASTM F1700** Composition of Material: Class III Printed Film Vinyl Plank or Tile,Type B (Embossed)
  - **Size/Squareness: ASTM F2055** +/-0.016 in. per linear foot in size / <0.010 in. for squareness
  - **Thickness: ASTM F386** +/- 0.020 in. (0.5mm)
  - **Dimensional Stability: ASTM F2199** < 0.020 in. per linear foot max
  - **Residual Indentation: ASTM F1914** <8% of total thickness
  - **Flexibility: ASTM F137** <1.0 in. diameter, no cracks or breaks
  - **Chemical Resistance: ASTM F925** No more than slight change in surface dulling, attack or color change
  - **Heat Resistance: ASTM F1514** <8 color change
  - **Light Resistance: ASTM F1515** <8 color change
- **Wearlayer Thickness: Marriott requires a minimum of 20 mil** (0.5mm) thickness. The wearlayer is a heavy clear vinyl film of vinyl covered with a UV Cured Urethane, Acrylic or Aluminum Oxide wearlayer for better scuff, stain and scratch resistance.
- **Overall Thickness: Marriott requires a minimum of 4mm** or above for all areas
- **Backing Class:** Commercial Grade
- **Finish:** UV Cured Urethane, Acrylic or Aluminum Oxide Layer provides additional scuff, stain and scratch resistance during the early life of the floor.
- **Acoustic Ratings:** A "Marriott IIC Sound Test" currently underway at Intertek labs
  - **Impact Insulation Class (IIC): Marriott lab requirements are pending**
  - **Field Impact Insulation Class (AIIC): ≥ 55**
- **Static Load Limit (PSI): ASTM F970** >250 is the standard for light commercial. **Marriott requires 750 or above.**
- **Critical Radiant Flux: ASTM E648 Class I:** >0.45 watts/sq.cm (The higher the wattage value, the more heat and time required for the product to support a flame.)
- **Smoke Density: ASTM E662** <450
- **Slip Resistance: ASTM D2047** >0.5 ADA Compliant
- **Warranty:** 20 yr Commercial Warranty for Guestrooms and 10 yr Commercial Warranty for Public Space
- **Edge Profile:** Square or MicroBevel
- **Installation:** Glue Down or Floating with a Clic/Locking Mechanism
- **Adhesive:** Supplier/Manufacturer approved adhesive for LVT and Underlayment
- **Underlayment:** Supplier/Manufacturer approved Underlayment for specified LVT or must be already attached
- **Raw Materials:** Must use virgin raw materials unless recycled stream can be clearly identified
- **Certifications:** FloorScore (Required), GreenGuard Gold, or Green Label Plus
- Must not contain Ortho Phthalates or any other chemicals listed on California's Proposition 65 List of Chemicals.

Codes and Test Parameters

ASTM F1700, Class III, Type B (Embossed). The ASTM F1700 establishes the material and performance characteristics that determine serviceability and recommended applicability of solid vinyl floor tiles intended for use in commercial, light commercial, and residential buildings. Floor tiles shall be classified as Class I for monolithic vinyl tiles: Solid color tile with no backing, Class II for surface-decorated vinyl tiles: Usually inlaid with backing, and Class III for printed film vinyl tiles: Photographic print film with a clear vinyl wearlayer and a backing system. Furthermore, these classes of tiles shall be subgrouped as Type A for smooth surfaces, and Type B for those with embossed surfaces. The tiles shall be composed of binder, filler, and pigments compounded with suitable lubricants and processing aids, the composition for all of which shall be dictated by their respective classes. When tested, the tiles shall adhere to the following physical requirements: binder content; dimension including size, squareness (ASTM F2055), thickness (ASTM F386), dimensional stability (ASTM F2199); residual indentation (ASTM F1914); flexibility (ASTM F137); resistance to chemicals (ASTM F925); resistance to heat (ASTM F1514); and resistance to light (ASTM F1515). The following requirements must be met to receive the ASTM F1700 certification. If the binder content is 34% or more it is considered either SVT or LVT flooring. If the thickness of the wearlayer is 20 mils or more it classifies the Class III product as Commercial. Type B, Embossed is preferred.

- **Size/Squareness: ASTM F2055.** Both dimension and squareness of resilient floor tile are important considerations, because installed flooring may exhibit an objectionable appearance when either or both characteristics deviate from established tolerances. This test method provides a means of determining actual dimensions (both length and width) and squareness by using a single apparatus and procedure. It is intended for use with square tiles ranging from a nominal 9 inches to 40 inches in dimension. +/- 0.016 inches per linear foot in size and <0.010 inches for squareness.
- **Thickness: ASTM F386.** This test method covers the determination of thickness of resilient non-textile floor coverings including tile and sheet having flat surfaces. Should not be used on materials having a foamed layer. As specified +/- 0.005 inches.
- **Dimensional Stability: ASTM F2199.** This test method covers the determination of the change in linear dimensions of resilient floor tile after exposure to heat. Linear change requirements 0.020 in./lf max.
- **Residual Indentation: ASTM F1914.** Standard test method to determine the indentation recovery properties of resilient flooring. It covers the “short term indentation” from foot falls, heels, sitting in a chair, etc., and measures after a load of 250 psi is applied to the flooring for a period of time after which the product's thickness is calculated and the recovery is compared to original after 60 minutes.
- **Flexibility: ASTM F137.** Flexibility is the property of a material which allows it to be deformed by bending or rolling without cracking, breaking, or other permanent defects, using whatever force is necessary to bend or roll it. It is an important characteristic of flooring in that it provides for ease of handling in rolling, cutting, and fitting. This test method covers the determination of the flexibility of resilient flooring materials by means of Cylindrical mandrel apparatus.
- **Chemical Resistance: ASTM F925.** Resilient flooring products are designed and formulated to have good resistance to most common chemicals encountered in typical use. High performance wear layers can also be used to enhance cleanability and chemical resistance. Performance is dependent upon the flooring formulation and that of the maintenance products used on the flooring. This test method provides a means of estimating the relative susceptibility of resilient floor covering to change when exposed to chemical reagents. It is not intended as a staining test. Catgories for rating are surface dulling, surface attack and color change.
- **Heat Resistance: ASTM F1514.** Resilient floor covering is made by fusing polymer materials under heat or pressure, or both, in various manufacturing processes. The polymer material may be compounded with plasticizers, stabilizers, fillers, and other ingredients for processibility and product performance characteristics. The formulation of the compound can be varied considerably depending on the desired performance characteristics and methods of processing. Heat stability, which is resistance to discoloration from heat, is a basic requirement for processing and functional use. This test method provides a means of measuring the amount of color change in flooring products when subjected to elevated temperatures over a period of time (functional use of the flooring product). It is not intended to be a means of predicting the amount of color change that occurs during processing (manufacture).
- **Light Resistance: ASTM F1515.** Light stability, which is resistance to discoloration from light, is a basic requirement for functional use. This test method provides a means of measuring the amount of color change in flooring products when subjected to accelerated light exposure over a period of time (functional use of the flooring product). It is the intent that this test method be used for testing light stability performance properties to be referenced in resilient flooring specifications.

Codes and Test Parameters continued

Acoustic Ratings: IIC ASTM E492. IIC stands for Impact Insulation Class. It is defined as a single number rating derived from the normalized impact sound pressure levels through a floor ceiling assembly. The sound source is a standard tapping machine through which sound pressure levels radiate off the bottom of the assembly into a receiving room and are then normalized for the rating calculation. **STC ASTM E90.** STC stands for sound transmission class. It is defined as an integer-number rating of how well a building element reduces airborne sound. It is a calculation based on transmission loss values through an element. Transmission loss is the measurement of the noise reduction in individual frequency bands from a source room containing noise to a receiving room containing a microphone. The transmission loss values are also corrected for room absorption on the receiving side. The ASTM tests for both are performed using the same floor system, 6" concrete slab with a ceiling plenum. Every floor and underlayment combination will achieve different results. It is very difficult to predict what results a particular floor will get. Typical results for the system range from the mid 50s to the low 60s in IIC rating. Typically carpets will get much higher ratings. **Marriott will be testing different systems and will be posting the results and minimum requirements soon.**

Static Load Limit (PSI): ASTM F970. Standard test method to determine the indentation recovery properties of resilient flooring. The reported value, residual indentation of the "long term indentation", is the depth of the depression remaining 24 h after removal of the specified load. The pass/fail criterion is a residual indentation of no greater than 5 mils. The tests are performed on uninstalled products. Few objects within a commercial environment exceed 750 PSI. ASTM product specifications do not cite a static load requirement higher than 250 PSI for any product specification covering the category of resilient flooring.

Slip Resistance: ASTM D2047. Standard test method covers the use of the James Machine for measurement of the static coefficient of friction of polish-coated flooring surfaces with respect to human locomotion safety. Further, this test method also establishes a compliance criterion to meet the requirement for a nonhazardous polished walkway surface. Polishes and other floor maintenance coatings having a static coefficient of friction of not less than 0.5, as measured by this test method, have been recognized as providing nonhazardous walkways. It is not intended for use on "wet" surfaces wherein the texture, projections, profile or clearance between the sculptured pattern of the surface does not permit adequate contact between the machine foot and the test surface. Coefficient of friction is tested clean and dry with a leather sensor pad.

Critical Radiant Flux: Class I ASTM E648. Standard test method designed to identify the critical heat flux of mounted floor covering systems. The tested material is exposed to a flaming ignition source to simulate thermal radiation levels that the material may be exposed to due to fire and/or smoke radiation. A CRF of 0.45 watts/cm2 or more, Class I Rating.

Optical Smoke Density: ASTM E662. Standard test method for specific optical density of smoke generation of a light beam by smoke (With the exception of New York City, very few jurisdictions require this test), maximum specific Optical Density of 450 or less, Class I Rating.

Certifications

FloorScore. This is a Marriott Requirement. FloorScore tests and certifies all hard surface flooring and flooring adhesive products, ensuring they meet stringent indoor air quality emissions requirements: the emission level of specific volatile organic compounds (VOCs). The program was developed by the Resilient Floor Covering Institute (RFCI) in conjunction with Scientific Certification Systems (SCS). FloorScore conforms with USGBC LEED criteria for EQ4.3 (carpet systems, flooring), and California 01350 Special Environmental Requirements. The FloorScore seal tells you that the products have been independently tested and certified by SCS Global Services (SCS) and meets the volatile organic compound emissions criteria of the California Section 01350 standard.

GreenGuard Gold. The GREENGUARD Gold standard includes health based criteria for additional chemicals and also requires lower total VOC emissions levels to ensure that products are acceptable for use in environments such as schools and healthcare facilities. In addition to limiting emissions of more than 360 VOCs and total chemical emissions, GREENGUARD Gold Certified products must also comply with requirements of the State of California's Department of Public Health "Standard Method for the Testing and Evaluation of Volatile Organic Chemical Emissions from Indoor Sources Using Environmental Chambers, Version 1.1 (2010)" (aka California Section 01350).

Green Label Plus. The Green Label Plus program tests carpet, cushions and adhesives to help the specifiers identify products with very low emissions of VOCs. This program sets an even higher standard than Green Label for IAQ and ensures that customers are purchasing the very lowest emitting products. For the adhesives, and independent laboratory tests adhesives for emission levels for chemicals as required by Section 01350, plus other chemicals as required by CRI.

Marriott Global Design Product Guidelines
Decorative Mirrors

Decorative mirrors must meet or exceed the following specifications. Deviations or modifications must be submitted in writing with a drawing, clearly and specifically detailing each deviation and location of the detail. Supplier is responsible for the structural integrity and durability of finish and design of any mirror produced. Supplier is to provide shop drawings and finish samples for all custom mirrors. Supplier is to obtain approval prior to production of custom mirrors.

Glass/Mirror

Clear 5mm glass is to have three layers of metals, sealed by a layer of paint. The glass is to have a fully applied layer of tin. Tin layer is to have a full application of silver. Silver layer is to have a complete application of copper. The copper layer is to be completely sealed with a layer of organic paint. Mirrored glass must meet the Federal Standard Mirror Specifications, DDM-411C.

Frames - Wood

Wood frames will be milled, machined, or carved from hardwoods and softwoods, as specified to achieve structural integrity and aesthetic requirements. All woods are to be kiln dried and register not greater than 9% moisture content for hardwoods and not more than 12% moisture content softwoods, prior to matching. Wood must not exhibit surface defects of flaws. Loose knots and knotholes are not acceptable.

Frames - Urethane

Frames are to be of rigid polyurethane with a consistent density of twenty pounds per cubic foot (+/-) two pounds. Polyurethane is to be manufactured without ozone depleting materials (CFC').

Frames - MDF

Engineered wood made from refined wood particles 6% resin made into hardboard. Use wrap grade double refined only.

Joints

All corners are to be miter cut, glued and joined with pneumatic "V" nail joining equipment. The placement of the "V" nail will be suitable to ensure the structural integrity of the joint. In no case will there be less than two "V" nails per joint or less than one "V" mail per inch of molding width.

Backing

All mirrors must have a backing for stability. Backing is to be recessed so as to be flush with the back of the frame. Unless otherwise approved, backing is to be 1/8" plywood.

Finishes

Finishes will meet AWI (Architectural Woodworking Institute) system TR1 for hand applied finishes. Finishes must have proper, permanent adhesion. Finish is to be protected with both chemical and abrasion resistant topcoats, per ASTM standards. All corners must be cosmetically blended and retouched to eliminate visual discontinuity across the joint on both face and sides of frame. Visible raw wood/polyurethane is not permitted. Production finishes must be consistent with the pre-approved finish sample. Must be sealed if sprayed or painted. Foiling and wrapped finishes are acceptable.

Security Hangers

Unless otherwise specified, all mirror must have 3 point security hardware hanging method with security locking. Mounting/Security hardware will be attached to the back of the mirror, with the

matching wall mount portion packaged and securely fastened to the back of each individual corresponding piece. Security hardware is to be mounted in the same position on each style and detailed on the approved shop drawings.

Packaging

All items are to be cartoned. The cost of cartoning is to be included in the cost of goods.
Mirrors are to be wrapped in plastic or foam and then fitted with corner protectors.
All wall hardware is to be attached to the back of each piece. Depending on size, mirrors may then be placed in a master carton (edge crush test to withstand a minimum of 275 lbs.)
Packaging material must be used to alleviate any movement of the mirrors inside the master carton.
The master carton must then be placed on a pallet and secured with a strap and shrink-wrapped.
All cartons will be labeled in accordance with MIDCS labeling instructions.

Warranty

All mirrors must have a 10 year warranty.

CARB (California Air Resources Board) Requirements

All items containing hardwood plywood, particleboard, or medium density fiberboard shipped into California must be in compliance with 93120-93120.12, title 17, California Code of Regulations regarding reducing formaldehyde emissions.

Marriott Global Design Product Guidelines
Outdoor Balcony and Pool Furniture

The following are the guidelines for outdoor balcony and pool furniture used by Marriott International. Any deviation, modification or change, must be submitted in writing to the client. Supplier is responsible for the structural integrity and durability of finish for all outdoor furniture produced. Supplier is to provide shop drawings and samples for all custom outdoor furniture as required. Supplier is to obtain approval prior to production of all custom outdoor furniture.

General Requirements

- When product is used in California or other earthquake or hurricane prone areas supplier must provide anchoring support to pass earthquake security and hurricane requirements.
- At a minimum, cushions to be certified to CA 117-2013 and so labelled.
- Fabrics to be certified to NFPA-260 and CA117-2013.
- In all cases, Supplier shall provide products that are in compliance with all local, state and Federal code requirements for the property location.
- Vendor must provide detailed cleaning instructions.
- Product shall be suitable for commercial use with a minimum 7 year express product warranty.
- Slings, straps and cushions should constructed so as to be replaceable in the field.

Stainless Steel – Aluminum - Wood- Frames

- Aluminum frames to be extruded, typically 1.6mm thickness cold drawn tube.
- Finish on aluminum to be electrostatic polyester powder coat.
- Cast Materials -100% solid cast aluminum alloy
- Stainless Steel should be marine grade
- Hardware to be non-corrosive stainless steel (no aluminum or galvanized steel parts)
- All screws shall be buried in the frame.
- Welds – Full 360 degree circumference, helix-arc welds (not riveted) fully ground, polished and free of burrs.
- Wood frames shall be mahogany or other hardwood suitable for outdoor use. Due to ongoing maintenance required, Marriott Operations prefers to avoid using teak for tables and wood frames. Faux teak is an option.
- Where wood is provided, supplier shall certify that product is compliant with California 93120 (for formaldehyde)

Chaise Lounges and Chairs

- Glides and Caps – Provide replaceable nylon glides and frame caps for all chairs, chaise lounges and tables secured with stainless steel rivets.
- Stretchers – include where necessary to provide support (1.5 mm (1/6 inch) minimum.
- If arms are used, they shall be braced with vertical supports.
- The latching bar to move the back of the chaise shall be recessed and positioned so as to avoid injury. Should be weighted if intended for use in windy areas.
- The back legs of chaise lounges shall have fillers to minimize tipping.
- Straps: 100% virgin vinyl or injection molded vinyl, .11" minimum thickness, with ultraviolet stabilizers and mildew inhibitors. Straps should be attached to frame with a double wrap, secured with a nylon rivet.
- Stacking Chairs – minimum of 4 to a maximum of 6

Cushions

- Core material to be drain-dry reticulated foam with Dacron wrap.
- Must pass California TB-117-2013 and be so labelled.
- Cushions shall have concealed zippers.
- Drain holes shall be added if required.
- Where fabric is used on like pieces, patterns to be matched to each like piece.

Fabrics and Resin

- Cushion cover fabric shall be exterior contract commercial quality solution dyed acrylic that is resistant to fading, mold/mildew water, food stains, dirt and sunscreen products for a minimum of 7 years from installation.
- Fabrics) to include written certification:
- Abrasion Resistance: ASTM D4157 #10 Duck Wyzenbeek: 30,000 double rubs;
- Wet and Dry Crocking: AATCC 8-2001 (except prints) AATCC 116-2001 Dry 5.0, Wet 5
- Pill: SDTM D 3511-02 Class 4.5
- Seam Slippage: ASTM D3597-02 D434-95,35 lbs. warp and fill
- Snag Resistance ASTM D 3990-03 Minimum rating of 4.5
- Tensile Strength ASTM D5034-95-2001 (Grab Test) 50 lbs. warp
- Sling Fabrics: Vinyl coated polyester (VCP) or blend of VCP and 100% acrylic fabrics, with ultraviolet stabilizers and mildew inhibitors.
- Resin (such as faux wicker or rattan, faux teak): Shall be High Density Polyethylene with UV inhibitors

Tables

- Table Tops –: Fiberglass, acrylic surfaces, aluminum tops or tempered glass.
- Table tops shall be acrylic, aluminum or fiberglass when used around pools.
- Tempered glass is to be encased within a metal frame.
- Top to be coordinated with base to ensure compatibility, weight support and to prevent tipping.
- Tops to be mechanically attached to bases, pre-drilled with necessary hardware and instructions supplied if field assembly is required.
- If umbrellas are used, center grommet should be supplied that coordinates with umbrella pole dimension.

Umbrellas

- Umbrellas should typically be used with tables to ensure support.
- Stainless "shot" or sterilized sand to be used as fill weight for umbrella bases. Minimum base weight should be 65 lbs, although 95 is generally recommended to ensure appropriate weight for most weather conditions. If umbrella is free standing, base should be 95 lbs. minimum.
- Umbrella fabric shall be 100% solution dyed acrylic, Sunbrella or equal, minimum of 8 ounces per square yard.
- Pole should be one piece, with stainless hardware.
- Umbrella lift should be easy to operate.

Marriott Global Design Product Guidelines
Task Chairs

General

The following are the specifications for task chairs used in Marriott International properties. All task chairs must meet or exceed these specifications. All Marriott task chair suppliers are responsible for the structural integrity, durability of finish and design of any task chairs they produce. Each supplier is responsible for providing shop drawings with complete construction information, including where-used and finished samples for all task chairs. **Any deviation, modification or other changes to original or existing specifications must be submitted to the client in writing with drawings clearly showing all changes and locations on the items.**

Warranty

- All Marriott task chair suppliers are responsible for the functional durability and conformance to design intent of any task chairs they produce. The chairs shall be warranted for a minimum of six years.

Task Chair Construction, General

- **Surroundings Compatibility.** All task chair suppliers shall ensure that the chairs they design will work with their surroundings without damage to the chairs or their surroundings. All interaction points such as desk edges, wall, etc., during chair movement shall be examined and measured so as to insure compatibility. This shall be a joint effort between the specifier, the task chair supplier, as well as desk and other interaction point suppliers.

- **Tilt:** The tilt mechanism shall be knee-tilt with locking device in full-upright position only unless otherwise specified **and shall tilt no more than 18 degrees.**

- **Webbing/mesh**: Construction and where used shall be shown on shop drawings or other appropriate places. The mesh tensile strength and application method shall be sufficient to perform without failure or sagging over the six-year life of the chair.

- **Plywood (if applicable)**

    - **Back**
        - Inner back wood shall be a minimum of ½" thick curved plywood with 1" thickness, minimum 1.2 density CA 117 flame retardant foam over a passive lumbar support.
        - Outer back wood shall be a minimum of 1/8" non-tempered hardboard covered with ¼" CA 117 foam. Fasteners shall not be exposed.

    - **Seat**
        - Minimum 5 plies; 7 or 9 preferred and a minimal number of unused holes to prevent structural weakness.
        - The seat shall be connected to the back sufficiently with a metal plate to prevent failure over the minimum six-year life of the chair.

- **Cardboard, chipboard or other support material.** Construction and where used shall be shown on shop drawings or other appropriate places.

- **Face Fabric Application.**
  - Task chair suppliers are not responsible for construction and performance of face fabrics NOT specified by them, but they ***are responsible for construction and performance of face fabrics from their lines included with the products.*** In all cases the task chair suppliers are responsible for diligence in identifying defective fabrics, and in the timely notification of the purchaser.
  - All task chair suppliers are to fully insure complete understanding of the direction the designer wants directional fabrics to take on the piece, side-to-side or seat-to-back (horizontal or vertical)
  - It is the task chair supplier's responsibility to insure that all pattern matching is appropriate and utilizes the best yields. All task chair suppliers shall notify the designer or commodity manager if there are ways to have better yields.
  - All tailoring is to be smooth and evenly applied.

- **Seams.**
  - Seams shall be of sufficient depth and stitches shall be within industry standards with a minimum yield (grab) of ½", or greater if necessary to minimize seam slippage.
  - Thread used in stitching is to be of sufficient quality for contract use.
  - Double needle stitching shall be used with tape on the back and is most often design intent. However, it is also to be used in areas where reinforced seams are needed due to tensile load or where extended load-bearing strength is needed.
  - Welts are to be applied relative to their location. For cushions, welts shall always be sewn into the fabric so that they are an integral part of the seams. For welts between the seat and seat rail, a welt groove shall be cut into the frame and the welt must be secured in the groove sufficiently to remain in place over the minimum six-year life of the product. The grooves shall be cut so that they do not affect the structural integrity of the chair over its life. For outside backs of chairs, the welt may be glued or stapled, provided the staples are not visible.

- **The lowest seat and arm heights** shall be specified**.**

- **Spider:** All spiders shall be glass-filled nylon, cast aluminum or steel.

- **Stationary Base and Chair Control:** The stationary base and chair control shall be sufficient to perform without failure throughout the life of the chair. The self-centering swivel/tilt chair control which is attached to the base shall return the chair to its starting position.

- **Gas Cylinders:** Class III shall be used: WDF, MDI, KGS, SHS, Suspa or equals, and the range of travel shall be specified.

- **Moving parts** shall be properly graphite-lubricated. The metal surfaces of the mechanisms shall be smooth and finished with the appropriate finish. The materials used shall be free from hazardous surfaces, rust, and other defects which affect appearance or which might affect the safety of the use, the durability or the serviceability of the finished mechanisms.
- **Metal**
  - Steel tubing shall meet ASTM A-513 for 1008/1010; wall thickness for 18 gauge tubing shall be .049, ± 10% Carbon.
  - Chemical analysis of steel tubing: Carbon: .054 to .11 Manganese: .30 to .60 Phosphorous: .035 Max. Sulfur: .035 Max. Rockwell Hardness: B45 to B75.
  - All exposed ferrous metals shall have a corrosion resistant finish or the manufacturer's best commercial coating. The finish shall produce a finished chair satisfactory in function and appearance.
  - Metals shall be pre-treated for corrosion resistance and to enhance finish adhesion.
  - The finish shall be epoxy powder coat or plate.
  - All production finishes must match approved samples.
  - Finishes are to be clean and clear in tone, smooth and without variation between any sides.

- **Star Base**. The star base shall consist of five (six legs for heavy duty) with a metal ring set into the hub to prevent excessive cylinder "creep" (to prevent the chair from settling more than ¼" after break-in). Glass filled nylon bases shall have a web or honeycomb structure underneath the legs. Metal bases shall have longitudinal and latitudinal ribs to prevent twist. High profile metal bases shall have solid tubular or legs drawn into a deep U-shape. The base assembly shall be free from wobble when moved in any direction.
- **Caster** selection is dependent upon the type task chair and where it is to be used. The typical twin-wheel nylon caster shall be 50mm to 60mm (2" to 2.4") with an 11mm pintle (stem, .4") Phenolic casters may be specified for thick-pile carpeted areas or for executive chairs, but they shall not be used on vinyl floors. Soft polyurethane treads, and minimum 3" diameter caster shall be used on chairs that will be used on wood or LVT floors. Casters shall be ball bearing swivel. Caster hood and scuff plate finishes shall match each other. Dual wheel casters shall carry the same specification requirements as single wheel. Casters shall be capable of functioning without failure over the minimum six-year life of the task chair under the maximum load-bearing weight of guests.
- **Approval:** Acceptability of "ride", firmness, padding, pitch and comfort will be determined during the development phase.
- **Tolerance:** Overall width, depth and height**:** ± ½"; Height of arms from seat: ± ½"; Dimensions of wood parts: ± ½"; Dimensions of upholstered parts: ± ½"; Dimensions between arms: ± ½"; Contour of bent arm from top of arm to the rail: ± ½"; Depth of seat: ± ½".

Packaging

- All items shall be cartoned unless an approved alternate has been authorized. The cost of cartoning is to be included in the cost of goods. All items shall be wrapped in commercial grade plastic bags prior to cartoning.
- Cartoning shall meet or exceed the National Motor Freight Classification regulations for strength as required for shipments via common carriers. Sufficient cushioning shall be inserted in the bottom of the carton to absorb shock during shipment.
- Task chairs may be packed two per carton and corner blocks are required to prevent damage to the casters or any part of the chair if the task chair is shipped with casters installed. All cartons shall be labeled in accordance with Marriott International labeling instructions when ordered by MIDCS.

Test Requirements

Task chairs shall be tested and certified to Business and Institutional Manufacturers' Association test **BIFMA X5.1-2011,** unless there is a more recent version of the test applicable at the time of the purchase. Consult the BIFMA Test above for full criteria and Illustrations.

Fire Code: Chair components shall be tested and chairs shall be labelled to pass CAL117-2013 and any other applicable local code.

CARB (California Air Resources Board) Requirements

All items containing hardwood plywood, particleboard, or medium density fiberboard shipped into California must be in compliance with 93120-93120.12, title 17, California Code of Regulations regarding reducing formaldehyde emissions.

Upholstery fabrics –Performance Specifications.

- **Abrasion Resistance, All Decorative Fabrics**: Wyzenbeek: 50,000 Double Rubs for Task Chair Fabrics, ASTM D4157-02; Back and Forth Motion, #10 Duck; 62,500 if Martindale, ASTM D4966-98; 12 KPa pressure; Circular Motion, #10 Duck;

- **Flammability**: CA 117, Section E, Class 1;

- **Colorfastness to Light:** AATCC 16 Option 1 or 3; **40 Hours, Grade 4**
- **Wet and Dry Crocking**: All Fabrics, 4.0 Dry, 3.5 Wet –AATCC 8-2001
- **Pill**: Brush Pill ASTM D 3511-02, Class 4.5
- **Seam Slippage**: ASTM D3597-02-D434-95, 35 pounds.
- Tensile Strength. ASTM D5034-95 (2001) (Grab Test): Upholstery: 50 lbs., warp and fill (no knits)
- **Soil Release**: Upholstery fabrics are to be treated with the appropriate permanent soil and stain release such as Encase, NanoTex or Alta. Ink-release finish is highly recommended for task chair seats that are not black in color.
  Backing: Upholstery fabrics are to be acrylic, latex or knit backed sufficiently to prevent seam slippage.

Coated Fabrics – Performance Specifications

If Polyurethane is used, the use of PU whose main component is polycarbonate, without a foam layer, is highly recommended. Hydrolysis performance listed below.
PVC's shall be phthalate free

- **Abrasion:** ASTM D4157 100,000 double rubs minimum
  ASTM D3389 (PRINTS ONLY**)** 250 cycles
- **Blocking:** CFFA 4/Fed.Std191a TM5872, no blocking, slight adhesion, minimum
- **Cleanability:** ASTM D1308/CFFA 141, Class 4.5 minimum, Stain testing: ink, denim dye, oil-based stains, beverage stains
- **Durability to cleaners:** AT DTC-01**,** Pass
- **Coating Adhesion:** ASTM D751, 3 lbs, minimum (1" width)
- **Cold Crack Resistance:** CFFA 6a no cracking at 20 degrees Fahrenheit
- **Colorfastness to Crocking:** AATCC 8, Dry: class 5 minimum/ Wet: Class 5 minimum
- **Colorfastness to Light**: AATCC 16.3, Opt. 3, Class 4 minimum (200 hours)
- **Flammability:** Cal 117-2013, Pass; NFPA 260, Class 1
- **Flex Resistance**: ASTM D2097/CFFA10**,** 25,000 cycle, no appreciable crazing, cracking
- **Hydrolysis:** ISO 1419 Method C**,** 10 weeks no cracking, peeling, delamination; Pass (Applicable to Polyurethane)
- **Puncture Resistance:** ASTM D751, 30 lbs. minimum
- **Seam Strength, Tack Tear:** ASTM D751/CFFA14, 35 lbs. minimum
- **Stretch and set:** SAE J855**,** set 5%
- **Tear Strength:** ASTM D751, CFFA 16b, 4 lbs. minimum (tongue method-woven); ASTM D751, CFFA 16c, 15 lbs. minimum (trapezoid method – non woven)
- **Tensile Strength:** ASTM D751/CFFA 17, 50 lbs. minimum

Marriott Global Design Product Guidelines
Upholstered Furniture

All upholstered products must meet or exceed these specifications. All Marriott upholstered seating or related product suppliers are responsible for the structural integrity, durability of finish and design of any upholstered product they produce. Each supplier is responsible for providing shop drawings with complete construction information, including where-used and finished samples for all upholstered products.

Tolerances

- Overall width, depth and height: ± ½"; Height of arms from seat: ± ½"; Dimensions of wood parts: ± ½"; Dimensions of upholstered parts: ± ½"; Dimensions between arms: ± ½"; Contour of bent arm from top of arm to the rail: ± ½"; Depth of seat: ± ½".

Wood

- All wood shall be seasoned, kiln dried to moisture content of 7% - 9% and worm free number one solid lumber.
- Load bearing frames: Solid frame grade hardwoods: Maple, birch, oak, poplar or solid hardwood plywood. (Alder may be used but must be approved in advance)
- Non load bearing supports may be hardwood.
- Finished, exposed wood: Maple, mahogany, Beech, European Beech, cherry, oak. (Alder may be acceptable in certain chairs but must be approved in advance)
- Exposed Wood surfaces shall be free from defects and corners shall be sufficiently eased so as to avoid sharp impact points.
- Curved frames shall be steam bent hardwood with kiln dried hardwood used in non-curved major frame components. (Solid hardwood glued face-to-face, or hardwood plywood, band sawed or steam bent is also appropriate for curved frames. The number of plies shall be determined by the application and shall be sufficient to perform without failure. The number of plies shall be clearly identified in your specifications)
- Where possible, and without affecting costs, of the species listed, SFI (Sustainable Forest Initiative) lumber shall be used.
- All finish undercoats are to be sanded smooth and sharp edges softened.
- All finishes shall be conversion varnishes, catalyzed lacquer or polyurethane, tested and warranted for commercial use. If available, polyurethane shall be used in public spaces.

Frames

- Stretchers shall be used on all dining, counter or bar stools and desk chairs to provide support to the legs. Stretchers shall be appropriately placed so as to perform without breakage. If the design indicates they will act as foot rails, then they are to be designed as foot rails. All applications shall be constructed to perform based on the intended use.
- Webbing construction and where-used shall be shown on shop drawings and it shall be sufficient to perform based on the intended use.
- Cardboard, chipboard or other support material: construction and where-used, to be shown on shop drawings.
- Upholstered seat and back supports shall be sinuous springs but webbing may be used when appropriate for the type chair or piece specified. Seat springs shall be 8 gauge sinuous wire and back springs shall be 11 or 12 gauge sinuous wire. Springs shall be attached to upholstered frames using noise-abating coated and lateral stabilizing wrapped edge wire, 2 oz. polyester insulator steel clips. Seat back sinuous springs may be stapled to the frames without clips. Springs shall be of sufficient number and to be offset to ensure even weight distribution during use and guaranteed to prevent sagging. A woven synthetic material shall be used to cover back springs with foam applied on top.

- All joints shall be double-dowel or mortise-and-tenon construction with corner blocks (gusseted and screwed or lag bolted where appropriate).
- Metal fasteners are to be used where appropriate to ensure commercial frame strength.
- Seat suspension shall be no-sag (95% memory for 5 years) 8-gauge sinuous coil wire tied with 16 gauge fiber wire. .
- Chair cushion-backs shall be constructed with 10 to 12 gauge no sag sinuous wire with 1 oz. heavy-duty compressed low-melt fiber covered on sinuous springs.

Padding and Cushions

- Padding shall be sufficient to insure that face fabric does not touch wood or other support material at any point.
- Specify padding type and composition or density: 1) 85/15 gin flues cotton, 2) polyurethane of appropriate density and IFD, 3) Heavy-duty compressed low-melt fiber, at least 1.5 oz. shall cover Sinuous springs. Universal springs to have lifetime guarantees 4) perma-firm deck insulator (bonded felt fiber)
- Arm panels and other high impact points shall be sufficiently padded to prevent impacts from damaging face fabrics, vinyls or polyurethanes
- Public Space: All foam used for seat cushions shall have a minimum density of 2.5 lbs per cubic foot for seats, 1.5 for backs. All foam shall pass the requirements of California Bulletin 117-2013. Foam shall be covered in a one ounce layer of Dacron (or equal) batting.
- Rooms: Same as public space except the seats shall be a minimum of 1.8 density per cubic feet, 24-28 ILD foam, Dacron wrapped. A sample chair shall be constructed for approval to verify the appropriate density and compression of the foam, considering the length of cushion, type of cover fabric and intended use.
- Inside arms shall be reinforced with cardboard or synthetic woven webbing padded with one inch of foam. (For certain applications, ½" foam is acceptable if required to achieve a specific style or look provided it does not produce issues such as insufficient padding for comfort or fabric wear protection) Outside arms shall be covered with synthetic woven fabric covered by face fabric.
- Outside back shall be micro foam padded and covered with fabric.
- All seat cushions must have a system for venting air when the cushion is compressed by seated guests; grommets or other systems will suffice provided they do not negatively affect structural integrity especially with the restricted airflow when using leather, PVC, Durablock or a moisture barrier
- If the cushions are semi attached, the construction must be such that the cushions maintain their appearance and function.
- The upholstered products supplier is responsible for insuring that all internal foam, batting, or other components subject to CA-117-2013 fire code are in compliance. The supplier is also responsible for insuring that all upholstered products meet local code where applicable.

Face Fabric Application

- The upholstered products supplier is not responsible for face fabric construction and performance of face fabric selections provided by others but the upholstered supplier ***is responsible for construction and performance of face fabrics selected by the upholstered supplier.*** In all cases the upholstered products supplier is responsible for diligence in identifying defective fabrics, in halting production and informing the Purchasing Agent.
- All upholstered products suppliers are to fully insure complete understanding of the direction the designer wants directional fabrics to take on the piece; side-to-side or floor-to-back.
- It is the supplier's responsibility to insure that all pattern matching is appropriate and utilizes the best yields. Suppliers shall notify the Designer or Purchasing Agent if there are ways to have better fabric yields.
- All tailoring is to be smooth and fabric evenly applied.
- All fabric shall cover all exposed wood on the interior frame when guest facing.

Flaps

- All flaps are to be lined with 78 x 44 market cloth and added buckram where needed for stiffness.
- An 8" to 10" flap shall be affixed at the leading edge of the seat surface to lay over the leading edge of the sleeper mechanism when it is stored in the sofa.

Seams/Stitches

- Seams are to be sufficient depth with a minimum yield (grab) of 1/2", or greater if necessary to minimize seam slippage.
- The stitches per inch generally range from 7-10 with most fabrics performing well at 7-8, however, some fabrics require an 8-10 stitch. That determination will be the responsibility of the seating supplier based on the type of fabric. Thread used in stitching is to be of contract quality. Double Needle stitching, sometimes called "Baseball" Stitching, is generally used in concert with tape on the back and is most often design intent. However, it is to also be used in areas where reinforced seams are needed due to tensile load.

- General Characteristics: The characteristics of a properly constructed sewn seam are strength, elasticity, durability, security, and appearance. These characteristics must be balanced with the properties of the material to be joined to form the optimum sewn seam. The end use of the item will govern the relative importance of these characteristics. The selection of the seam type and stitch type should be based upon these considerations.

Stitch Defects	*Seam Assembly Defects*
Loose stitches	Puckers
Poorly formed stitches	Twists
Crowded stitches	Plaits
Tight stitches	Undulations
Crooked stitches	Run-off (raised seams)
Skipped stitches	Raw edges exposed (felled seams)

- Welts are specified for design intent and should be applied relative to their location. For cushions, welts are always sewn into the fabric and are an integral part of seams. For welts between the seat and seat rail, a welt groove is cut into the frame and the welt must be secured in the groove sufficiently. For outside backs of chairs, the welt is most often stapled to the back.

Sleeper Mechanism and Mattress

- Leggett and Platt Classic Square 3500-16 or Hickory Springs 9002 Sleeper with the 'Fall-Away Cross Bar. The sleeper shall be constructed sufficiently to prevent sag and must be guaranteed by the supplier to remain solid over the life of the sleeper. The mechanism shall have an operating instruction label in English and Spanish permanently affixed to the webbing. **Alternate products must be submitted with detailed specifications, and approved prior to use.**

  Mattress: Prestige 206104, or Equivalent, Contract Linen Innerspring Mattress Specifications
  Dimensions: 37" W x 72" L x 5" H Coil Count (207 coils)
  Dimensions: 40" W x 72" L x 5" H Coil Count (207 coils)

Dimensions: 48” W x 72” L x 5” H Coil Count (276 coils)
Dimensions: 52” W x 72” L x 5” H Coil Count (299 coils)
Dimensions: 60” W x 72” L x 5” H Coil Count (345 coils)
Spring unit: High tempered steel; 13 gauge; 3 ¾” four turn Bonnell type coils
Ticking: Top and Sides – Beige, Fire Retardant Cover, 16 CFR 1633 Safe Slumber compliant surround barrier across top, bottom and sides of mattress and sewn with Kevlar thread.
Top Quilting: Foam ½” thick, CA117, 2.8 density ILD/IFD: 30
Top Pad/Insulator: 2 oz. Synthetic
Topper: Foam 1” thick, 2 density, and ILD/IFD: 18
Corner: Padding: Minimum 3 ½ “foam, 2 per corner
Side border Quilting: .25” foam, ½” thick, ILD/IFD: 30
Bottom Padding: ¼” thick batting pad
Bottom: Filler cloth
Ties: Two – for attachment to spring decks
Top deck assembly is ring stapled to every other coil spring on sides and ends for frequent folding in contract use.

Glides

- Commercial contract Nylon or silicone glides or equal shall be used on chairs that will be used on carpet. Chairs intended for use on hardwood shall have stainless steel metal glides with nylon covers. Chairs intended for use on LVT shall have stainless steel, durable nylon or felt glides depending on use intended. Felt shall not be used on chairs that will be moved frequently. **(In general, all glides shall be suitable for use on the floor surfaces on which the chairs will be used)**

Metal

- All exposed ferrous metals shall have a rust and corrosion resistant finish. They must have durable clear enamel matte coating, clear rust inhibitor, baked enamel or powder coated finish to prevent rust and corrosion. The finish shall be approved prior to production.
  Manufacturer to ensure materials are non-corrosive and suitable for use in highly humidity and salt air locations if required.

Packaging

- All items shall be cartoned unless an approved alternate has been authorized. All items shall be wrapped in 2 ml. Plastic bags prior to cartoning. Cartoning shall meet or exceed the NMFC regulations for strength as required for shipments via common carriers. Lounge chairs shall be packed one per carton. Desk chairs may be packed two per carton. Chairs with legs may need to be suspended within cartoning to ensure safe transit. All cartons will be labeled in accordance with Marriott International labeling instructions.

Warranty

- All furniture is to be warranted for commercial use for a minimum of six years.

Codes

- CA 117-2013: All components shall pass and the chair shall be so labelled, and chairs shall be tested to comply with any other local code requirements.
- CARB (California Air Resources Board) Requirements**:** All items containing hardwood plywood, particleboard, or medium density fiberboard shipped into California must be in compliance with 93120-93120.12, title 17, California Code of Regulations regarding reducing formaldehyde emissions.

Definitions

- **Density:** Measurement of mass in pounds per cubic foot.
- **IFD/ILD: Indentation Load Deflection/Indentation Force Deflection**. A measure of the load bearing capacity of flexible polyurethane foam. It is generally measured as the force (in pounds) required to compress a 50 square inch indenter foot into a 4" thick sample, typically 15" square or larger, to a stated percentage of the sample's initial height. Common IFD/ILD values are generated at 25% and 65% of initial height.
- **Compression:** Support factor = 65% IFD divided by 25% IFD determined after one minute of rest or recovery. When the support factor is known it can be used in conjunction with a known 25% IFD value to determine the 65% IFD value. Upholstered foams with low support factors are more likely to bottom out under load.
- **Flex Fatigue (dynamic fatigue):** A softening or loss of firmness. In general, fatigue is measured in the laboratory by repeatedly compressing a foam sample and measuring the change in IFD. Several different protocols, including methods contained in ASTM, ISO, and BIFMA testing standards, may be used. Even ASTM 3574, one of the more widely used sets of testing standards, contains multiple testing methods. In selecting one or more test methods, it is important to consider the intended foam application and to choose a testing protocol that closely simulates the intended application.
- **Tear Strength:** A measure of the force required to continue a tear in foam after a split or break has been started and expressed in pounds per inch (lb. /in.). This property is important in determining suitability of foam in applications where the material is sewed, stapled, or otherwise anchored to a solid substance.
- **Resilience:** An indicator of the surface elasticity or "springiness" of foam. It is measured by dropping a steel ball onto the foam cushion and measuring how high the ball rebounds.
- **Hysteresis:** Measurement of foam's ability to maintain original support characteristics after flexing. Normally, the firmness (IFD) is tested at 25% indentation, 65% indentation and again at 25% on the way up. Hysteresis is the percent of 25% IFD loss measure as a compression tester returns to the normal (25% IFD) position after measuring 65% compression. Lower hysteresis values, or less IFD loss are desirable. Current research indicates that hysteresis values may provide a good indication of overall flexible foam durability. Low hysteresis in conventional foam is equal to less IFD loss in durability and fatigue tests.
- **Air Flow:** Amount of air expressed in cubic feet per minute, which can be drawn through a 2" x 2" x 1" foam sample at .5" water differential. High air flow equates to very open foam while low air flow tends to be pneumatic. Air flow can be a critical factor in FPF performance depending on the application. For instance, in normal furniture cushioning applications, pneumatic foam with low air flow will have poor durability and high compression sets, regardless of density.

Marriott Global Design Product Guidelines
Wall Coverings

The following are the specifications, test and code criteria for wall coverings used by Marriott International hotels within the United States. All wall coverings must meet or exceed these specifications, tests, codes and any other requirements of local jurisdictions. Each supplier is responsible for providing samples up to and including finished samples. **Any deviation, modification or other changes to original or existing specifications must be submitted to the appropriate specifier in writing.**

Warranty

- All Marriott wall coverings suppliers are responsible for the functional durability and conformance to design intent of any wall coverings they produce. The products are to be warranted for a minimum of 6 years or as specified.

General Specifications

- **Material:** The construction of the material is to be clearly identified and agreed upon between the specifier and the supplier; vinyl, polyurethane or paper.

- **Re-Cycled Content:** Any re-cycled content is to be clearly identified with the percent content of pre-consumer and post-consumer material.

- **Roll Sizes:** The roll sizes of each specified product is to be agreed upon by the specifier and supplier and is to be clearly noted on the quotation.

- **Unit-of-measure:** The unit-of-measure shall always be in linear yards and the usable width in inches shall be clearly noted for each specified product.

- **Tolerance:** Overshipment tolerances are to be clearly noted on each quotation, except for Marriott prototypical items, which shall be limited to up-to-the-next-full roll to fill orders.

- **Pattern:** The pattern name and number, color name and number and film base color shall be clearly noted. It is critical that patterns are developed that facilitate commercial installation speed. Geometrics that match horizontally are to be avoided if possible unless the pattern is designed such that it can be installed at commercial speed. It is the wall covering supplier's responsibility to inform specifiers in writing of the relative hanging difficulties of patterns they select.

- **Repeats:** The supplier shall clearly inform the specifier in writing prior to final selection of any issues with pattern repeats relative to hanging and appearance.

- **Type and Weight (Minimum Requirements, Individual Projects May Vary):**

  1. Type I, Category IV: 15 ounces per 54" linear yard
  2. Type II, Category V: 20 or 21 ounces per 54" linear yard
  3. Rooms: Type I and II are approved (Normally, Type I is used in new builds and Type II in renovations)
  4. Baths: Type I normally

5. Public spaces: All areas require Type II

- **Weight Tolerance:** Types I and II: 2 ounces above or 1 ounce below per 54" linear yard.

- **Flame Retardancy:** The flame spread test shall be ASTM E-84 and a rating of Class A is required.

- **Backing:** The backing shall be agreed upon and will be noted as scrim, Osnaburg, non-woven or other material. Wovens are preferred due to stretch but if the supplier is restricted to non-wovens due to the pattern, the specifier is to be informed in writing.

- **Embossing Pattern:** The embossing pattern is to be agreed upon between the specifier and the supplier. The supplier shall recommend embossings from light gauge to heavy, {(light: .017 mil. to .021 mil.) (medium: .022 to .025 mil.) (heavy: .026 to .032 mil)} dependent upon the project, wall covering location and whether or not it is a new build or renovation project. Embossings selected for renovations typically should be heavier embossed patterns than those for new build projects due to imperfect walls.

- **Inks:** Water based inks are preferred but if other types are required due to the design, it is to be clearly noted in writing along with the reasons for its use and it is to be agreed upon by the specifier.

- **Storage:** All wall coverings shall be stable from 60º F to 105º F.

- **Bow and Bias:** Tolerance shall be 3/8" or less bow or bias per 54" linear yard normally; less if the design demands it, as in horizontal geometric designs.

- **Film and Print Color Controls:** Color standards shall be controlled by computerized systems as well as human judgment. Computer matching standards such as CieLab shall be used for all film production as well as for printing, where possible. Final approval or rejection shall be by eye. Color standards that have been approved by the specifier are to be maintained away from light and are to be updated as needed. These standards are to be used with each lot produced to insure commercial matches. There shall be no side-to-side shading. Final approval shall be by eye and shall include hanging 3 drops to be observed from all angles.

- **UV Curing:** UV curing is acceptable for all applications but the supplier shall recommend it when appropriate and it shall be agreed upon by the specifier.

- **Cleaning:** Wall coverings shall withstand spot cleaning using the following process.

  Note: When attempting to remove marks from vinyl, always test in an inconspicuous place first. Spray Ecolab Power Force directly on the mark. Wait and allow several minutes of dwell time. Using a microfiber cloth, gently rub with the grain of the vinyl starting with light pressure and increasing slightly (if necessary) to remove the mark.

  Packaging: Each roll is to have complete storage, handling, preparation and installation instructions enclosed and all rolls are to be sequentially polyethylene bagged, labeled, and pyramid pallet-packed by lot.

Marriott International Test Requirements for Wall Coverings, ASTM F 793-93 Reapproved 2004, Outlined Below

General: Each manufacturer or distributor is responsible for determining conformance of each wall covering to each test procedure of ASTM F 793-93, reapproved 2004. Statistically valid sample testing is appropriate provided adequate records are kept that document with a high degree of assurance that all test requirements are met.

TESTS (See Table 1 for Criteria)

1. Colorfastness: Federal Standard No. 191, Method 5660.1.

2. Washability (The ability of wall covering to withstand occasional sponging with a prescribed detergent solution)

3. Stain Resistance, Test Method D 1308 (The ability of wall covering to show no appreciable change in appearance after application and removal of specified reagents)

4. Crocking Resistance (The ability to resist transfer of color from a wall covering surface when rubbed): Federal Standard No. 191, Method 5651-B.

5. Scrubability (The ability of wall covering to withstand scrubbing with a brush and a prescribed detergent solution)

6. Abrasion Resistance (The ability of wall covering to withstand mechanical action such as rubbing, scraping, or scrubbing that may progressively tend to remove material from the surface.)

7. Breaking Strength (The ability of wall covering to withstand a pulling force in the plane of the web):
Federal Standard No. 191, Method 5100-1.

8. Tear Resistance (The ability of wall covering to resist the propagation of an existing tear):
Test Methods D 751.

9. Blocking Resistance (The ability of wall covering to resist adhesion or sticking between two surfaces that touch under uniform loading and temperature conditions for a specified time) Federal Standard No. 191, Method 5872.

10. Coating Adhesion (A measure of the strength of the bond between the surface coating and the backing or substrate of a wall covering): Test Method D 751.

11. Cold Cracking Resistance (The ability of wall covering to resist cracking of the coated or decorative surface when it is folded during exposure to low temperatures)

12. Heat Aging Resistance (The ability of wall covering to resist deterioration of the coated or decorative surface when it is exposed to elevated temperatures over an extended period). Federal Standard No 191, Method 5850

13. Flammability (The ability of wall covering to resist the propagation of flame and the development of smoke under prescribed test conditions): 6-5.1.5.6 of NFPA 101, the Life Safety Code. (E-84)

14. Strippability (Wall covering that can be dry-stripped from the wall after having been installed and stripped in accordance with the manufacturer's instructions, leaving a minimum of product residue on the wall and without damage to the wall surface)

15. Mildew Resistance, where specified: (Wall covering that has been treated to deter the growth of mildew on the decorative surface): Practice G 21

TABLE 1 Classification Criteria

Property	Section Reference		Category IV Type I Commercial Serviceability	Category V Type II Commercial Serviceability	Category VI Type III Commercial Serviceability
Min. Colorfastness		7.3	200 hours	200 hours	200 hours
Min. Washability		7.4	100 cycles	100 cycles	100 cycles
Min. Scrubability		7.7	200 cycles	300 cycles	500 cycles
Min. Abrasion Resistance		7.8	200 cycles	300 cycles	1000 cycles
Min. Break Strength,Mach. Direction		7.9	40 pounds	50 pounds	100 pounds
Cross Mach. Direction	7.9		30 pounds	55 pounds	95 pounds
Min. Crocking Resistance		7.6	Good	Good	Good
Min. Stain Resistance		7.5	1 to 9	1 to 12	1 to 12
Min. Tear Resistance		7.10	12	25	50
Min. Blocking Resistance		7.11	2	2	2
Min. Coating Adhesion	7.12		2 lb per inch	3 lb per inch	3 lb per inch
Min. Cold Cracking Resistance	7.13		No change	No change	No change
Min. Heat Aging Resistance		7.14	Pass	Pass	Pass
Max. Flame Spread		7.15	25	25	25
Max. Smoke Development		7.15	450	450	450
Max. Shrinkage	7.19				
MD (Machine Direction)		7.19	2	2	2
CMD (Cross Machine Direction)	7.19		1	1	1.5

Category IV, Type I Commercial Serviceability: Wall covering manufactured for use where higher abrasion resistance, stain resistance and Scrubability are necessary in heavy consumer & light commercial use. Category IV wall covering must also meet crocking resistance, tear resistance, blocking resistance, cold cracking resistance, heat aging resistance & breaking strength criteria. Wall covering meets Type I performance as defined in Federal Specification CCCW-408C.

Category V, Type II Commercial Serviceability: Wall covering manufactured for use where better wearing qualities are required & exposure to wear is greater than normal. Category V wall covering must meet high abrasion resistance, stain resistance, and colorfastness criteria in addition to higher crocking resistance, tear resistance, and breaking strength criteria than Categories I to IV. Blocking resistance, cold cracking resistance, coating adhesion & heat aging resistance tests also apply. Wall covering meets Type II performance as defined by Federal Specification CCCW-408C.

Category VI, Type III Commercial Serviceability: Wall covering manufactured for use in heavy traffic areas. Category VI wall covering must meet the highest abrasion resistance, stain resistance, tear resistance, colorfastness, crocking resistance, and breaking strength criteria. Blocking resistance, coating adhesion, cold cracking resistance & heat aging resistance tests also apply. Wall covering meets Type III performance as defined by Federal Specification CCCW-408C.

Marriott Global Design Product Guidelines
Window Treatment

The following are the specifications for window treatments used by Marriott International. Any deviation, modification or other changes must be discussed with the appropriate requester verbally and confirmed in writing with documents and pictures clearly showing all changes and locations on the items. All window treatment items must meet or exceed the specifications contained within this document. All Marriott International window treatment or related window treatment products fabricators are responsible for the design and functional performance of any window treatment product they provide. If a design allows for light leakage, it shall be called to the requestor's attention. Each fabricator is responsible for providing review samples as needed. All fabricators are responsible for ***always*** obtaining approval from the appropriate requestor prior to starting production.

Fabrics, General

- All fabrics used in window treatment must meet the codes in the next section. (The fabricator is not responsible for these codes if the fabric is COM).
- If defects are found which will affect production, the purchasing agent shall be contacted immediately so that disposition of the defective fabric may be worked out.

Fabrics, Codes

- **Abrasion Resistance, All Decorative Fabrics:** Wyzenbeek: ASTM D4157-02; 20,000 double rubs back and forth motion, #10 Duck; Martindale, 25,000 double rubs, ASTM D4966-98; 12 KPa pressure; Circular Motion, #10 Duck; (Although there are no abrasion standards for sheers, they should be constructed sufficiently to prevent yarn separation during commercial use).

- **Flammability, Window Treatment:** All items, including drapes, sheers, fabric valances, swags, jabots, or any other window treatment: *NFPA 701-04, Test Method 1* (Vinyl coated blackout, Test Method 2) and BFD1X-1 Boston, in addition to local jurisdictional requirements. **(Custom one-off window projects do not need BFDIX-1 if NOT used within the city limits of Boston).** This treatment MUST be inherent, not topical. *All BFDIX-1 items require a permit from the Boston Fire Department:* To get Boston Permits, go to http://www.cityofboston.gov/fire/, Permits and Applications section.

- **Colorfastness to Light** – AATCC 16 Option 1 or 3-2003, or dated version current when specified*:* Drapery fabrics: 60 Hours, Grade 4.

- **Wet and Dry Crocking,** All Fabrics, 4.0 Dry, 3.5 Wet –AATCC 8-200: (Except prints: AATCC 116—2001 or dated version current when specified*)*.

- **Tensile Strength. Fabrics** – ASTM D5034-95 (2001, or dated version current when specified) (Grab Test*):* **25 lbs. for over 6 Ounce/yd. squared Drapery & 15 lbs. for less than 6 Ounce.**

- **Fabrics & Black Out** - No PBDE's (Polybromide Diphenyl Ethers) shall be used and formaldehyde content shall be below the allowable threshold limit.

-

Performance

- All draperies, hardware and installation shall be provided in accordance with the specifications contained herein and **shall not have deviations other than orders written and issued by the purchasing agent.**

Measurement and Project Quotation

- The fabricator is responsible for taking measurements at the job sites and for dimension accuracy in their quotations.
- The fabricator shall make no variations, additions, or deletions to the contract issued by the purchasing agent without a confirmed addendum.
- Tentative start dates shall be provided by the purchasing agent at the time the quotation is requested. It is the responsibility of the contractor to call the purchasing agent periodically to insure the install date has not changed.
- The fabricator shall be responsible for forwarding quotations to the purchasing agent within six (6) weeks of the installation start dates for new builds and within eight (8) weeks for renovations.
- Hardware and parts shall be itemized, priced and listed separately.

Material & Services Provided by Fabricator

- Unless other provisions are made, the fabricator shall:
    - Provide all raw materials except COM drape/sheer fabrics and blackout.
    - Provide proper storage for all fabrics, materials and equipment.
    - Maintain a current inventory & report it to the purchasing agent monthly.
    - Provide the purchasing agent with scaled sections of any non-prototypical (custom) window treatment before fabrication is begun.
    - Advise the purchasing agent immediately when it is known that rooms will not be available on dates that installation is scheduled.
    - Advise the purchasing agent immediately when issues arise that may affect install ation schedules or quality.
    - Ensure that all install staff is neatly attired with the fabricator's name prominently displayed so as to be quickly identified.
    - Furnish supervision and installers acceptable to the purchasing agent's representative on the job site.
    - Supply all labor, transportation equipment, appliances, and service necessary to furnish completed window treatment.
    - Make all necessary adjustments in the Work as may be required to render the Work in proper condition suitable for final acceptance.
    - Notify the purchasing agent if steaming is required as soon as it is known if steaming is not part of the contract.
    - Remove all generated trash daily from the job site.
    - Ensure that all fabrication and installation sub-contractors return to the job and make any needed adjustments, repairs, lengthening or shortening as may be considered necessary by the purchasing agent.
    - Assume all costs stemming from defects caused by the fabricator, including the replacement of fabrics due to poor workmanship, shrinkage (pertaining to hems) due to improper styling or size as specified herein.
    - Show proof of performance and delivery as required.

- If requested, fittings and supplies such as buckram, weights, thread, and samples shall be submitted to the purchasing agent for approval before fabrication has started.

Applicable to all Fabrication

- All drapes and sheers shall be made with the required widths of fabric specified and never shall less than one-half of a width be used in any panel. All ceiling-to-floor draperies and sheers shall fall to ¾" to 1" from the carpet or any finished floor surface, unless otherwise noted on the drawings. All ceiling-to-PTAC, bench or other surface elevated from the floor surface treatments shall fall to ½" from the top of the elevated surface unless otherwise specified.
- All selvages shall be removed, patterns shall be matched; drapes and sheers shall be made to exact size.
- All corners on the bottom hem shall be mitred. Face fabric hems shall be blind-stitched. The thread shall be poly-cotton and color matched.
- If center-close, the overlaps shall be 3 ½" with the buckram double folded back.
- The returns shall be 3" to 6" depending on the application with the double fold back of the return.
- If specified, all slant tops shall follow the angle of the window and all pleats shall be upright. All bottom hems shall be level.
- All seams shall be overlock stitched (serged) with safety stitches, and all seams shall be hidden at the side of the pleat, or back of the ripple fold, using poly/cotton neutral-color thread, unless otherwise specified.
- The side hems shall be 1 ½", blind stitched and double folded using poly/cotton thread.
- If the drapes are not wall-to-wall, the fabrication is to ensure that the returns reach the walls the drapes cover.

Drapes Fabrication

- Applicable to all pinch pleat drapes:
    - Headings shall be 4" and double folded with permanent finished buckram, double-back folds at the overlaps and returns and sewn closures using poly/cotton thread.
    - Unless otherwise specified, guestroom drapes shall be 200% fullness (fabric used is twice the width of the finished drape) Public space and suites should use 250% to 300% fullness. (**NOTE: Fullness varies by brand and property. If the properties do not adhere to prototypical designs, please consult with the purchasing agent or design firm. If the fullness is not specified, consult with the purchasing agent or design firm).**
    - Stationary side panel pleats shall be tacked down with matching thread and the fullness shall be 200%. The hem shall be the standard double 4".
    - If triple fold French pleats are specified, they shall be machine sewn with 14 thread bar, "L" tacked or "F" tacked 1/2" inch up from the bottom of the buckram, using poly/cotton thread.
- Applicable to all ripple fold drapes:
    - The fullness range shall be 60%, 80%, 100% or 120% as specified per project.
- Lined drapes:
    - The buckram shall be inserted between the face fabric and the lining and stitched across the top. On overlaps and returns, double fold the buckram back by 12".
    - The lining shall extend to the top of the finished drapery (Pillow case top), and all the way to the sides.
    - The lining fabric shall be 2" straight single needle lockstitched with a single turn-up above face fabric using poly/cotton thread.
    - The bottom hem of the face fabric shall be double folded by 4" using straight single-needle lock stitches, with poly/cotton thread. The side hems shall be 1 ½" and blind stitched with the lining extending to the edge of the drapery using poly/cotton thread.
    - 1" covered lead weights shall be tacked into the hemline on each seam and corner of the face fabric. It is not required in the lining.

Sheers Fabrication

- Applicable to all sheers:
    - Unless otherwise specified, the fullness shall be 250% to 300%, except for ripple fold. (**NOTE: Fullness varies by brand and property. If the property does not adhere to prototypical designs, please consult with the purchasing agent or design firm. If the fullness is not specified, consult with the purchasing agent or design firm).**
    - The bottom hems shall be 4", double folded and sewn using straight single needle lockstitches with poly/cotton thread. Lobbies and suites bottom hems shall be blindstitched. Hanky hems may be specified. (Bottom weight serged in the hem)
    - The side hems shall be 1 ½", blind stitched and double folded using poly/cotton thread.
    - Kirsch or Kirsch style weighted tape shall be used the entire length of the bottom hems at or near the bottom.
    - The overlaps shall be 3 ½" with double fold back of the buckram.
    - The returns shall be 3" inches with double fold back of the buckram.
- Applicable to all ripple fold sheers:
    - The fullness range shall be 120%, or as specified per project.
- Pinch pleat:
    - Headings shall be 4" and double folded with permanent finished buckram, double-back folds at the overlaps and returns and sewn closures using poly/cotton thread.
    - If triple-fold French pleats are selected, they shall be machine sewn with 14 thread bar or "L" tacked 1/2" inch up from the bottom of the buckram, using poly/cotton thread.

Blackout

- The seams joining the blackout shall be ½" "Z" type.
- Fabrication shall be done so that pin holes are minimized.
- If the blackout is 2-color, the side facing the room shall be specified by the purchasing agent and verified by the fabricator.

Cornice Fabrication and Installation

- The fabricator shall construct and install cornices as follows, unless otherwise specified:
    - 1/2" particleboard shall be used. Plywood is not authorized.
    - 5 ounce fill or padding, flame retardant shall be used.
    - 1" by 2" inch header board shall be used.
    - Self cord welt top, bottom and sides shall be used.
    - The lining shall be blind tacked with tackless stripping on the bottom to hide the staples.
    - Stainless steel staples shall be used.
    - All cornice installations shall use "L" brackets on the walls and Z" brackets on ceilings.
    - A full width of fabric shall be centered on the cornice with seams equidistant from each end.
    - If the cornices are not self lined, the fabricator shall ensure that the lining fabric has an FR rating suitable to the jurisdiction in which it is installed.

Hardware

All hardware shall be of commercial quality and workmanship and shall be Kirsch or Kirsch style. The following are specific area requirements that shall be followed:

- All hardware shall be commercial grade.
- Tracks shall be extruded aluminum only.
- All other metal components, including but not limited to master carriers, ball bearings, baton screws and baton key rings shall be stainless steel.

- Fiberglass batons shall be used and shall be rounded at both ends. ADA batons shall have their bottom ends hanging 48” off the floor. (Note: ADA batons MAY be acrylic if fiberglass is not available).
- Acrylic batons are never appropriate except for ADA applications.
- All hooks shall be stainless steel and Kirsch or Kirsch quality.
- All masters shall be wheeled and there shall be 6 to 8 included.

Hanging Finished Window Treatment

- All window treatments shall be mounted so that they do not separate from the wall or ceiling.
- All drapes and sheers shall be hung so that they drape properly (When viewed from the top, the fabric drapes in a continuous “S” pattern). Check buckram and break it if needed to insure S folds start at the buckram and flow to the floor.
- All pinch pleat draperies shall be pinned and hung evenly with appropriate pin-on hooks except for draperies over 12 feet long. They shall be hung using sew-on hooks.
- Angle brackets shall be attached to the wall with a screw to attach the return. Tenter hooks shall not be used.
- If needed in instances where the draperies end at doorways, the fabricator shall install a Lucite cuff mounted against mullion and lined up with the doorknob. (The cuff shall be supplied by the fabricator as part of the original quote and shall be billed to the purchasing agent. In cases where it is not part of the quote, it is shall be billed as a separate item).
- All sheers shall be hung so that they are not visible at any edge when the drapes are in their closed position.

First Floor Plan
(Total Floors: 1)

Cpt. 9 Note:
Cpt. 9 AF0658_BC45J_719480 has a listed repeat of 72"W x 28.8"L. It was estimated as a random installation, without regard for the full repeat. It was estimated to have a repeat of 12"W x 12"L.

Cpt. 7 Note:
Cpt. 7 AF0994_Z308Y_659167 has a listed repeat of 90"W x 121.6"L. It was estimated to have a repeat of 90"W x 12"L in order to conserve waste. Additional repeats were added to account for cuts required for pattern match and varying roll sizes.

*This diagram is based on drawings provided to Shaw Hospitality® for the purpose of flooring layout, yardage estimation, and seaming location. Please have your installer site verify all measurements and yardage calculations contained herein and return this diagram, signed and dated, to your Shaw Hospitality® representative.

The drawing and design contained herein are the sole property of Shaw Hospitality® and may not be used, or reproduced, without express written permission. Unauthorized use could result in a claim for damages. This drawing depicts interior design intent only and should not be used for construction purposes. Every attempt has been made to ensure this drawing is error free; however, Shaw Hospitality® makes no guarantee. Anyone using this drawing in connection with this project is responsible for verifying all dimensions, yardage quantities, conditions, codes, and ordinances, and he must immediately report any discrepancies to Shaw Hospitality®.

This job was based on information submitted by the customer and/or an agent thereof. Shaw Hospitality® is not responsible for final yardage requirements. These plans must be field verified by a carpet installer for accuracy and final yardage requirements. Dimensions, sizes, amounts, known seams, and/or any other information provided on these plans, may require on site adjustments due to job site conditions, minimal shrinking, and/or stretching in manufacturing processes. Sizes and amounts provided on these plans are net. Additional amounts and/or pattern repeats are included in the quantities provided in the corresponding Shaw Hospitality® estimating quote.

Doors

Ref	ID	Description
DR-003-CE	Hollow metal door, exterior	Exterior hollow metal doors fabricated as thermal insulating door and frame assemblies and tested in accordance with ASTM C236 or ASTM C976 on fully operable door assemblies. Provide thermal-rated assemblies with U-factor of 0.24 or better. Hot-dipped galvanized or electrolytic zinc-coated steel with a stretcher level degree of flatness. Provide weep-holes in bottom of exterior doors to permit moisture to escape. Seal joints in top edges of doors against water penetration.
DR-003-CU	Hollow metal door, exterior	Exterior hollow metal doors fabricated as thermal insulating door and frame assemblies and tested in accordance with ASTM C236 or ASTM C976 on fully operable door assemblies. Provide thermal-rated assemblies with U-factor of 0.24 or better. Hot-dipped galvanized or electrolytic zinc-coated steel with a stretcher level degree of flatness. Provide weep-holes in bottom of exterior doors to permit moisture to escape. Seal joints in top edges of doors against water penetration.
DR-003-RDF	Hollow metal door, exterior	Exterior hollow metal doors fabricated as thermal insulating door and frame assemblies and tested in accordance with ASTM C236 or ASTM C976 on fully operable door assemblies. Provide thermal-rated assemblies with U-factor of 0.24 or better. Hot-dipped galvanized or electrolytic zinc-coated steel with a stretcher level degree of flatness. Provide weep-holes in bottom of exterior doors to permit moisture to escape. Seal joints in top edges of doors against water penetration.
DR-003-SC	Hollow metal door, exterior	Exterior hollow metal doors fabricated as thermal insulating door and frame assemblies and tested in accordance with ASTM C236 or ASTM C976 on fully operable door assemblies. Provide thermal-rated assemblies with U-factor of 0.24 or better. Hot-dipped galvanized or electrolytic zinc-coated steel with a stretcher level degree of flatness. Provide weep-holes in bottom of exterior doors to permit moisture to escape. Seal joints in top edges of doors against water penetration.

Door Frames

Ref	ID	Description
DF-001-CE	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.
DF-001-CU	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.

Ref	ID	Description
DF-001-RDF	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.
DF-001-SC	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.

Door Hardware

Ref	ID	Description

T11_Stair Exterior_Rear Exterior Entrance

Ref	ID	Description
DH-006-PK_T11	Door seal	Fire/smoke gasketing, adhesive-backed
DH-008-VD_T11	Exit Device	Panic exit device, exit only (no outside trim), electric latch retraction
DH-009-YA_T11	Door closer	Heavy-Duty Non-Hold Open Parallel Arm with Removable Stop, Adjustable Size
DH-010-PK_T11	Threshold	Saddle Threshold
DH-011-PK_T11	Door bottom	Door bottom sweep
DH-014-SG_T11	Lock cylinder	Rim cylinder, 6-pin configuration
DH-017-MK_T11	Hinge	Five Knuckle Standard Weight Hinge with Non-Removable Pin, Concealed Circuit Electric Hinge
DH-018-SA_T11	Remote RFID Reader	Stand-alone remote RFID reader to control electronic access control devices in perimeter areas, common areas, and restricted areas.

T12_Exterior from Pool

Ref	ID	Description
DH-012-RX_T12	Door closer	Concealed overhead door closer
DH-013-VD_T12	Exit Device	Panic exit device, exit only (no outside trim), electric latch retraction
DH-014-SG_T12	Lock cylinder	Rim cylinder, 6-pin configuration
DH-015-TM_T12	Door stop	Door stop, mounted to floor
DH-016-SA_T12	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)

T13_Community Room Exterior

Ref	ID	Description
DH-012-RX_T13	Door closer	Concealed overhead door closer
DH-013-VD_T13	Exit Device	Panic exit device, exit only (no outside trim), electric latch retraction
DH-014-SG_T13	Lock cylinder	Rim cylinder, 6-pin configuration
DH-015-TM_T13	Door stop	Door stop, mounted to floor
DH-016-SA_T13	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)

T14_Flex Exterior

Ref	ID	Description
DH-012-RX_T14	Door closer	Concealed overhead door closer
DH-013-VD_T14	Exit Device	Panic exit device, exit only (no outside trim), electric latch retraction
DH-014-SG_T14	Lock cylinder	Rim cylinder, 6-pin configuration
DH-015-TM_T14	Door stop	Door stop, mounted to floor
DH-016-SA_T14	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)

T15_ Exterior Vestibule Entry

Ref	ID	Description
DH-018-SA_T15	Remote RFID Reader	Stand-alone remote RFID reader to control electronic access control devices in perimeter areas, common areas, and restricted areas.
DH-025-SA_T15	Exit push button for automatic sliding door	Flush-mounted Exit Pushbutton
DH-026-SL_T15	Key switch	Key switch for automatic sliding doors
DH-027-SG_T15	Lock cylinder	Mortise lock cylinder, 6-pin
DH-029-SA_T15	Power Supply	Boxed power supply unit for electronic door hardware
DH-030-AI_T15	Intercom/ remote door control system	Audio door answering and door release system • Simple door answering (1 door) • Electronic call tone from door station • Press-to-talk communication at master • Hands free communication at door • Monitor entry area undetected from inside • Voice and call tone volume controls • Variety of remote stations available • Door release

Ref	ID	Description
		• Simple 2 conductor wiring between door and master station (with separate 2 conductor wiring for door release)

T19_Exterior Pool_Storage_Food Prep_Electrical

Ref	ID	Description
DH-006-PK_T19	Door seal	Fire/smoke gasketing, adhesive-backed
DH-009-YA_T19	Door closer	Heavy-Duty Non-Hold Open Parallel Arm with Removable Stop, Adjustable Size
DH-010-PK_T19	Threshold	Saddle Threshold
DH-011-PK_T19	Door bottom	Door bottom sweep
DH-028-PK_T19	Door head seal	Weatherstripping seal for door head applications
DH-040-SG_T19	Lock	Mortise lock with trim
DH-047-MK_T19	Hinge	Five Knuckle Standard Weight Hinge with non-removable pin

T41_Exterior Gates

Ref	ID	Description
DH-061-SA_T41	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)

Windows - Beige Color Scheme

Ref	ID	Description
WN-001-A1-IW_BEIGE	Aluminum Window, Horizontal Sliding, With Louver	Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-A1-KA_BEIGE	Aluminum Window, Horizontal Sliding, With Louver	Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-A1-QU_BEIGE	Aluminum Window, Horizontal Sliding, With Louver	Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-A1-WJ_BEIGE	Aluminum Window, Horizontal Sliding, With Louver	Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-A2-IW_BEIGE	Aluminum Window, Horizontal Sliding,	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame

Ref	ID	Description
	With Louver	
WN-001-A2-KA_BEIGE	Aluminum Window, Horizontal Sliding, With Louver	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-A2-QU_BEIGE	Aluminum Window, Horizontal Sliding, With Louver	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-A2-WJ_BEIGE	Aluminum Window, Horizontal Sliding, With Louver	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-002-A1-PE_BEIGE	Fiberglass Window	Sliding fiberglass window with sills, trim, and closures. Manufacturer's standard sash lock, wheels, and sliding mechanism.
WN-002-A2-PE_BEIGE	Fiberglass Window	Sliding fiberglass windows, with sills, trim, and closures. Manufacturer's standard sash lock, wheels, and sliding mechanism

Windows - Grey Color Scheme

Ref	ID	Description
WN-001-IW_GREY	Aluminum Window, Horizontal Sliding, With Louver	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-KA_GREY	Aluminum Window, Horizontal Sliding, With Louver	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-QU_GREY	Aluminum Window, Horizontal Sliding, With Louver	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-001-WJ_GREY	Aluminum Window, Horizontal Sliding, With Louver	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
WN-002-PE_GREY	Fiberglass Window	Sliding fiberglass windows, with sills, trim, and closures. Manufacturer's standard sash lock, wheels, and sliding mechanism

Automatic Entrance Doors - Beige Color Scheme

Ref	ID	Description
DR-001-A1-BE_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-A1-HA_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.

Ref	ID	Description
DR-001-A1-REC_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-A1-STA_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-A2-BE_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-A2-HA_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-A2-REC_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-A2-STA_BEIGE	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.

Automatic Entrance Doors - Grey Color Scheme

Ref	ID	Description
DR-001-BE_GREY	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-HA_GREY	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-REC_GREY	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
DR-001-STA_GREY	Automatic Entrance Doors, Single Sliding	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.

Aluminum Storefront - Beige Color Scheme

Ref	ID	Description
AS-001-A1-EF / DR-002-A1-EF_BEIGE	Glazed Storefront & Entrance Doors	Interior and Exterior Aluminum Storefront Framing, Doors, Door Frames, Lights, and Fixed Windows

Glazing

Ref	ID	Description
WGL-001-AGC	Exterior Glazing	1/4", Condition C (other coated glass), Type I (transparent glass, flat), Class I (clear), Quality q3 (glazing select), with coating. Low E Coating: Side [2] [3] on insulated units.
WGL-001-GG	Exterior Glazing	1/4", Condition C (other coated glass), Type I (transparent glass, flat), Class I (clear), Quality q3 (glazing select), with coating. Low E Coating: Side [2] [3] on insulated units.
WGL-001-VG	Exterior Glazing	1/4", Condition C (other coated glass), Type I (transparent glass, flat), Class I (clear), Quality q3 (glazing select), with coating. Low E Coating: Side [2] [3] on insulated units.
WGL-001-VI	Exterior Glazing	1/4", Condition C (other coated glass), Type I (transparent glass, flat), Class I (clear), Quality q3 (glazing select), with coating. Low E Coating: Side [2] [3] on insulated units.
WGL-002-AGC	Exterior Glazing	Preassembled units consisting of organically sealed panes of glass

Ref	ID	Description
		enclosing a hermetically sealed dehydrated air space and complying with ASTM E2190 for performance classification indicated as well as with other requirements specified for glass characteristics, air, space, sealing system, sealant, space material, and desiccants.
WGL-002-OB	**Exterior Glazing**	**Preassembled units consisting of organically sealed panes of glass enclosing a hermetically sealed dehydrated air space and complying with ASTM E2190 for performance classification indicated as well as with other requirements specified for glass characteristics, air, space, sealing system, sealant, space material, and desiccants.**
WGL-002-VI	**Exterior Glazing**	**Preassembled units consisting of organically sealed panes of glass enclosing a hermetically sealed dehydrated air space and complying with ASTM E2190 for performance classification indicated as well as with other requirements specified for glass characteristics, air, space, sealing system, sealant, space material, and desiccants.**

Window Operators

Ref	ID	Description
WO-001-SHP	**Window Operators**	**Actuators with hand crank and other features which enable window system to operate within ADAAG, UFAS, and ANSI A117.1 standards. Actuator device to operate vertical or horizontal sliding windows.**

Exterior Wall & Soffit Panel - Beige Color Scheme

Ref	ID	Description
EWP-001-NI_BEIGE	Wall panel, fiber-cement	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
EWP-002-NI_BEIGE	Wall panel, fiber-cement	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
EWP-003-BNI_BEIGE	Metal soffit for Porte Cochere ceiling	Extruded decorative aluminum panel
EWP-004-A1-JH_BEIGE	Fiber cement board soffit, lower roofs	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
EWP-004-A1-NI_BEIGE	Fiber cement board soffit, lower roofs.	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-004-A2-JH_BEIGE	Fiber cement board soffit, lower roofs with DEFS finish.	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A
EWP-004-A2-NI_BEIGE	Fiber cement board soffit, lower roofs with DEFS finish	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-005-A1-JH_BEIGE	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-005-A1-NI_BEIGE	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-005-A2-JH_BEIGE	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A
EWP-005-A2-NI_BEIGE	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A

Exterior Wall & Soffit Panel - Grey Color Scheme

Ref	ID	Description
EWP-001-NI_GREY	Wall panel, fiber-cement	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
EWP-002-NI_GREY	Wall panel, fiber-cement	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
EWP-003-BNI_GREY	Metal soffit for Porte Cochere ceiling	Extruded decorative aluminum panel
EWP-004-A1-JH_GREY	Fiber cement board soffit, lower roofs	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
EWP-004-A1-NI_GREY	Fiber cement board soffit, lower roofs.	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-004-A2-JH_GREY	Fiber cement board soffit, lower roofs with DEFS finish.	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A
EWP-004-A2-NI_GREY	Fiber cement board soffit, lower roofs with DEFS finish	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-005-A1-JH_GREY	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-005-A1-NI_GREY	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
EWP-005-A2-JH_GREY	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A
EWP-005-A2-NI_GREY	Fiber cement board soffit, upper roofs	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A

Exterior Canopy

Ref	ID	Description
ECA-001-MSA	Building canopy, pre-engineered, pre-finished	Pre-engineered, pre-finished metal-framed building canopies with exposed metal enclosures and trim, structural suspension components, and connections to the building sub-structure.

Exterior Decorative Paving

Ref	ID	Description
EDP-001	Exterior Concrete Deck	Portland cement concrete pool deck, broom finish, natural gray concrete color.

Ref	ID	Description
EDP-001-A1-MX	Special concrete finish	Decorative polymer-modified decorative pavement overlay with acrylic topcoat for Outdoor pool deck finish.
EDP-001-A1-SUN	Special concrete finish	Decorative polymer-modified decorative pavement overlay with acrylic topcoat for Outdoor pool deck finish
EDP-002-HAP	Decorative Unit Paving	Precast concrete unit pavers with integral coloring.
EDP-003-CT	Exterior Tile	Exterior porcelain tile for the Patio

Exterior Roofing

Ref	ID	Description
ERF-004-CSS	Low-slope roofing system	EPDM Membrane Roofing, fully adhered installation
ERF-004-FS	Low-slope roofing system	EPDM Membrane Roofing, fully adhered installation
ERF-004-RPI	Low-slope roofing system	EPDM Membrane Roofing, fully adhered installation
ERF-004-VE	Low-slope roofing system	EPDM Membrane Roofing, fully adhered installation
ERF-005-A1-CSS	Low-slope roofing system	EPDM Membrane Roofing, mechanically-fastened installation
ERF-005-A1-FS	Low-slope roofing system	EPDM Membrane Roofing, mechanically-fastened installation
ERF-005-A1-RPI	Low-slope roofing system	EPDM Membrane Roofing, mechanically-fastened installation
ERF-005-A1-VE	Low-slope roofing system	EPDM Membrane Roofing, mechanically-fastened installation
ERF-005-CSS	Low-slope roofing system	EPDM Membrane Roofing, fully adhered installation
ERF-005-FS	Low-slope roofing system	EPDM Membrane Roofing, fully adhered installation

Exterior Fence Material

Ref	ID	Description
EFM-001-CRL	Pool fence and gates	Tubular aluminum fence and gates.
EFM-001-JB	Pool fence and gates	Tubular aluminum fence and gates
EFM-001-JW	Pool fence and gates	Tubular aluminum fence and gates.
EFM-001-KI	Pool fence and gates	Tubular aluminum fence and gates
EFM-002	Fences and Gates	Wood Fence and Gates at Trash Enclosure
EFM-003-BNI	Exterior Fence	Metal post and rail fence fabricated with extruded aluminum rails posts and balusters.
EFM-004	Wood trellis at Lower Roof	Wood trellis with field-applied paint finish.

Exterior Fire Pit Assembly

Ref	ID	Description
CT-004-DK_BEIGE_FIRE PIT	Countertop Exterior	Ultracompact surfacing sheet for countertops and other applications
CT-004-DK_GREY_FIRE PIT	Countertop Exterior	Ultracompact surfacing sheet for countertops and other applications
CT-005-DK_FIRE PIT	Countertop Exterior	Ultracompact surfacing sheet for applications indicated
EFP-001-HP	Gas Fire Pit	UL Certified, Square Flat Fire Pit Insert Kit complete with #304 stainless steel pan and burner, with pilot assembly and whistle-free flex line in location shown on Design Guideline Drawings.

Exterior Grill Assembly

Ref	ID	Description
CT-004-DK_BEIGE_GRILL	Countertop Exterior	Ultracompact surfacing sheet for countertops and other applications
CT-004-DK_GREY_GRILL	Countertop Exterior	Ultracompact surfacing sheet for countertops and other applications
CT-005-DK_GRILL	Countertop Exterior	Ultracompact surfacing sheet for applications indicated
ERA-013-WBR	Barbeque	Commercial Type Grill. Six stainless steel grill burners, 60,000 BTUH input. Push-button electronic ignition. 769 Sq. In. Total Cooking Area.

Unit Masonry - Clay Brick and Split-faced CMU

Ref	ID	Description
UM-001-BB	Clay masonry	Clay facing brick
UM-001-ET	Clay masonry	Clay facing brick
UM-001-GG	Clay masonry	Clay facing brick
UM-001-MM	Clay masonry	Clay facing brick

Exterior Coatings

Ref	ID	Description
ECT-001-A1-SW	High-performance coating system	Waterborne acrylic epoxy coating for exterior hollow metal doors, frames, and handrails
ECT-001-A1-TN	High-performance coating system	Waterborne acrylic epoxy coating for exterior hollow metal doors, frames, and handrails
ECT-001-SW	Exterior Paint	Exterior Ferrous Metal Acrylic Gloss Enamel Paint Coating for exterior hollow metal doors, frames, and handrails
ECT-002-AF	Intumescent Coating	Intumescent Mastic Fireproofing for Application to Exposed Steel
ECT-002-IL	Intumescent Coating	Intumescent Mastic Fireproofing for Application to Exposed Steel
ECT-003	High-performance coating system	Waterborne acrylic epoxy coating for exterior metal fabrications (bollards).

Exterior Pools

Ref	ID	Description
SPL-001-PAQ	Swimming pool - Site-constructed, Shotcrete	Shotcrete swimming pool with pressure filter system, flow meters, water treatment system, heaters, recirculating pumps, motors, piping, deck drainage system, piping, fittings, lights, accessories, and finishes.
SPL-002-MY	Swimming pool - packaged	Pre-engineered, modular swimming pool system, with pool wall and floor panels, PVC liner, piping, and equipment.

Exterior Pool Finishes

Ref	ID	Description
EPC-001-FST	Precast Concrete Coping	Precast concrete, wet pour, white, safety hand grip style, raised safety edge, coping stone with raised slip resistant pattern on upper surface.
GR-005-LA	Grout	High Performance Epoxy Grout, Sanded
TF-005-CT	Tile Floor	Pool Stair Nosing Tile
TW-004-CT	Wall Tile	Porcelain Tile
TW-004-DA	Wall TIle	Penny Round Wall Tile

TownePlace Suites Generation 5 Building Site + Exterior Preamble

PREAMBLE

Instruction For Use of Documentation

The total required information provided to design and build a TownePlace Suites by Marriott is contained in the criteria documents identified below which relay standardized public space, guestrooms, guestroom corridors, back of house and building site + exterior. Real Living is the decor package for the Public Space and Guestrooms.

Comprehensive Criteria Documents for TownePlace Suites by Marriott are:

1. Design Standards
2. Design Guideline Drawings
3. Specifications as indicated below:
   - **A. Building Product Manual (BPM)**
     Volume 1 - Building Site + Exterior
     Volume 2 - Public Space
     Volume 3 - Guestroom
     Volume 4 - Food Service & Guest Laundry Equipment
   - **B.** Exterior Signage Specifications
   - **C.** Interior Signage Specifications
   - **D.** Interior Design Specification Manual

Alternate Sources of Information:

1. Change Bulletins
2. Additional Tools

Description Follows:

1. Design Standards provide a written macro view of the overall design elements required for TownePlace Suites by Marriott.
2. The Design Guideline Drawings - provide more specific design direction via drawings to supplement the Design Standards.
3. The Interior Design Specification Manual lists items required that are generally referred to as Furniture, Fixture, & Equipment or FF&E items. These items and the accepted suppliers listed, have been contracted by Marriott and can be supplied through Marriott's procurement division.
4. The Building Product Manual (BPM) lists all the finishes required for the building and the building products that are typically installed and supplied by the General Contractor. This document must be used in conjunction with the drawings for the contractor supplied items as specific dimensions and criteria are referenced in both documents. Because of the high quality of design expected for TownePlace Suites by Marriott, Marriott has specified acceptable suppliers who have worked closely with Marriott on the initial TownePlace Suites Design. All of these documents are integral elements of the complete design and construction information. The project architect is responsible for incorporating all components of the criteria documents in the development of any TownePlace Suites by Marriott Project.

Use of Drawings

Building Product Manual (BPM) mark numbers and Interior Design Specification Manual x-ref numbers are shown on the Design Guideline Drawings as a base number only. Refer to the BPM and Interior Design Specification Manual for mark numbers and x-ref numbers plus a suffix for product and FFE alternates and additional acceptable manufacturers.

** In the BPM **acceptable manufacturers** of same material/product are indicated by a suffix of "XX", the abbreviation of the manufacturer's name. (i.e., PL-101-MO for MOEN or PL-101-KO for Kohler). If there aremultiple manufacturers, and the item looks very similar, and it is only a matter of style, then it is considered avariation of manufacturer and not an alternate and would receive the mfr. suffix.*

** In the BPM **alternate** materials/products/designs are indicated by a suffix of "A1", "A2", "A3", etc. indicating "alternate", following the base number (i.e., PL-101-A1).*

General Compliance Requirements

The Owner's / Franchisee's Consulting Design Professional shall be responsible for verifying and complying with all applicable laws, covenants, codes, ordinances, rules, regulations, restrictions, etc. The Design Professional shall pay close attention to the requirements of the federal accessibility law, Americans with Disability Act (ADA), local and state accessibility regulations, and the applicable fire, life safety requirements. It is also the responsibility of each hotel owner to ensure that all products have been adjusted in dimension, quantity and hand suit the specific site conditions.

GENERAL NOTES

1. All images, photographs, renderings of specified items contained in this specification package area for general design intent and reference only.
2. Refer to the preamble for terms, conditions, abbreviations, definitions, responsibilities, and general guidelines for all specified items.
3. Refer to drawings for exact locations and/or mounting heights of furniture, fixtures, and equipment. In the event of a discrepancy between drawings and specifications, please contact Marriott International immediately for written clarification.
4. Submittal of shop drawings & finish samples to Marriott International for review and written approval is required for any item supplied by a vendor other than the specified source.
5. Design Documentation firm to verify that all flammability requirements are met for property location. The requirements noted within this specification are general and local flammability may be more stringent.
6. Install all products and finishes per manufacturer's recommendations.
7. Final quantity of items to be based on final plans, room quantity, and final matrix.

Plumbing Fixture and Residential Appliances - General Notes

1. All plumbing fixtures and residential appliances to be of contract quality and suitable for commercial use.
2. Site measurements required.

ABBREVIATIONS

General Schedule Abbreviations:

ADA	Americans with Disabilities Act
AFF	Above Finish Floor
ASTM	American Society of Testing Materials
AWI	American Woodworking Institute
CEF	Corridors, Elevators, and Foyers
CF/CI	Contractor Furnished/ Contractor Installed
COM	Customer's Own Material
GC	General Contractor
GR	Guest Room
GRB	Guest Room Bath
LY	Lineal Yard
MF/MI	Manufacturer Furnished/Manufacturer Installed
N/A	Not Applicable
NFPA	National Fire Protection Association
NY	Narrow Yards
OF/CI	Owner Furnished/ Contractor Installed
OF/MI	Owner Furnished/ Manufacturer Installed
OF/CI	Owner Furnished/ Owner Installed
RFP	Request for Proposal
SF	Square Feet
SY	Square Yard
UL	Underwriters Laboratory

A. Toilet Accessory Abbreviations:

For your use in utilizing the Toilet Accessories within the Building Product Manuals, the following information is supplied:

1. The Assembly is the type of restroom or bathroom. The Assembly is not recognized by a number.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'TA' for Toilet Accessory Commodity. The first character of the 3-character suffix categorizes each toiletaccessory commodity component, then is numbered sequentially.

   100 – Grab Bars
   200 – Toilet Tissue / Facial Tissue
   300 – Glass Shelf / Iron Board Caddy
   400 – Towel Bar / Towel Ring / Robe Hook
   500 – Soap Dish / Shampoo Dispenser / Shower Accessory Ledge / Shower Footrest
   600 – Shower Curtain Rod / Glass Shower (components)
   700 – Shower Seat / Tub Seat
   800 – Public Restroom (Feminine Napkin Dispenser / Paper Towel Dispenser / Receptacle / Soap Dispenser / Seat Cover)
   900 – Miscellaneous

B. Plumbing Fixture Abbreviations:

For your use in utilizing the Plumbing Fixtures within the Building Product Manuals, the following information is supplied:

1. The Assembly No. contains 3 characters or prefix to define the type of assembly. The 2-character suffix is numericallysequential. Example TUB-01.

TUB - Tub	EWS - Eye Wash
WHL - Whirlpool	MOP - Mop Sink
SHR - Shower	CLO - Cleanout
SNK - Sink	FLD - Floor Drain
SVS - Service Sink	FSK - Floor Sink
WCL - Water Closet	LIT - Lint Interceptor
URN - Urinal	HYD - Hydrant
WCR - Water Cooler	RDR - Roof Drain

2. Mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'PL' for Plumbing Commodity. The first character of the 3-character suffix categorizes each plumbing commodity component, then isnumbered sequentially. Example PL-101, PL-102, etc.

100 – Sinks & Mop Sinks
200 – Faucets
300 – Toilets / Urinal / Water Cooler
400 – Shower Heads
500 – Shower Diverters
600 – Shower Surrounds / Shower Pans / Base / Tub
700 – Shower Doors
800 – Fittings
900 – Miscellaneous (Floor Drains, Clean Outs)

C. Door Hardware Abbreviations:

For your use in utilizing the Door Hardware within the Building Product Manuals, the following information is supplied:

1. The Assembly No. or Door Hardware Type No. contains 1 character or prefix "T". The 2-character suffix is numericallysequential. Example T-01.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'DH' for Door Hardware Commodity. The 3-character suffix is numbered sequentially. Example DH-001,DH-002, etc.

D. Carpet or wall coverings will no longer be specified within the Building Product Manuals. Reference the Interior DesignSpecification Manuals.

BPM (Building Product Manual) Number Nomenclature

(Items are numbered with the item prefix and then consecutive numbers starting with 001 - "Mark Number" unless indicated otherwise)

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Hollow metal door, exterior
Item Type	Flush hollow metal door
Description	Exterior hollow metal doors fabricated as thermal insulating door and frame assemblies and tested in accordance with ASTM C236 or ASTM C976 on fully operable door assemblies. Provide thermal-rated assemblies with U-factor of 0.24 or better. Hot-dipped galvanized or electrolytic zinc-coated steel with a stretcher level degree of flatness. Provide weep-holes in bottom of exterior doors to permit moisture to escape. Seal joints in top edges of doors against water penetration.
Manufacturer	Ceco Door / Assa Abloy
Model	Insulated Polystyrene Foam Core Doors - Legion
Dimensions	1-3/4" thick x dimensions indicated on the Drawings and in Schedules.
Color	Refer to Design Guideline Drawings for Finish Mark No.
Finish	Factory-primed, field-finished
Material Composition	Cold rolled steel complying with ASTM A1008; hot-dip galvanized according to ASTM A653.
CSI #	081113 - Hollow Metal Doors and Frames
Omniclass #	22-081113 - Hollow Metal Doors and Frames
Classification	ANSI/SDI Level 3, Extra Heavy Duty, 16-gage, and Physical Performance Level B (Extra Heavy Duty), Model 2 (Seamless).
Structural Performance	Complying with ANSI/SDI requirements for Physical Performance Level B (Extra Heavy Duty)
Thermal Performance	U-factor of 0.24 or better
Operation	Swinging doors.
Best Practices	Recycled content
Quality Standards	ANSI/SDI A250.8 - SDI-100 "Recommended Specifications for Standard Steel Doors and Frames" and ANSI/BHMA A156.115 Hardware Preparation in Steel Doors or Steel Frames
Accessibility Compliance	ADA and ANSI A117.1 current version
Glazing	Refer to Design Guideline Drawings Door Schedule
Louver	As required
Acoustical	Refer to Brand Design Guideline Standards
Hardware	Refer to Design Guideline Drawings Door Schedule
Door Type	Full flush hollow metal door
Fire Rating	Refer to Design Guideline Drawings Door Schedule
Core	1" polystyrene

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Hollow metal door, exterior
Item Type	Flush hollow metal door
Description	Exterior hollow metal doors fabricated as thermal insulating door and frame assemblies and tested in accordance with ASTM C236 or ASTM C976 on fully operable door assemblies. Provide thermal-rated assemblies with U-factor of 0.24 or better. Hot-dipped galvanized or electrolytic zinc-coated steel with a stretcher level degree of flatness. Provide weep-holes in bottom of exterior doors to permit moisture to escape. Seal joints in top edges of doors against water penetration.
Manufacturer	Curries / Assa Abloy
Model	707 Series
Dimensions	1-3/4" thick x dimensions indicated on the Drawings and in Schedules.
Color	Refer to Design Guideline Drawings for Finish Mark No.
Finish	Factory-primed, field-finished.
Material Composition	Cold rolled steel complying with ASTM A1008; hot-dip galvanized according to ASTM A653.
CSI #	081113 - Hollow Metal Doors and Frames
Omniclass #	22-081113 - Hollow Metal Doors and Frames
Classification	ANSI/SDI Level 3, Extra Heavy Duty, 16-gage, and Physical Performance Level B (Extra Heavy Duty), Model 2 (Seamless).
Structural Performance	Complying with ANSI/SDI requirements for Physical Performance Level B (Extra Heavy Duty)
Thermal Performance	U-factor of 0.24 or better

Detail

1 Prefixes

None	Standard
AX	Accessible device
CD	Cylinder dogging - panic only
CDSI	Cylinder dogging with security indicator
CI	Cylinder dogging indicator
CD-CX	Chexit cylinder dogging
CX	Chexit
DI	Dogging indicator
E	Electric locking mortise/lever
EL	Electric latch retraction
HDSI	Hex dogging with security indicator
HH	Hurrican device
LD	Less dogging
LX	Latch bolt monitoring
LX-LC	Latch bolt monitoring, low current
LX-RX	Latch bolt monitoring, request to exit
LX-RX-LC	Latch bolt monitoring, request to exit low current
PL	Pullman latch
PN	Pneumatic latch retraction
QEL	Quiet electric latch retraction
QM	Quiet mechanical
RX	Request to exit
RX2	Double request to exit
RX-AUX	Request to exit, auxiliary
RX-LC	Request to exit, low current
SD	Special dogging -panic only
SS	Signal switch
WP-RX	Waterproof request to exit
WS	Windstorm (FEMA rated) surface vertical rod device
XP	Heavy protection - rim

2 Device series

98	Series 98-smooth
99	Series 99-grooved

3 Device type

None	Rim device
27	Surface mounted vertical rod device
47	Concealed vertical rod device
47WDC	Concealed vertical rod wood door device
48	Concealed vertical rod device
49	Concealed vertical cable device
50WDC	Concealed vertical cable wood door device
52	Rim device with remote trim input (pool exit hardware)
57	Three-point latch device
75	Mortise lock device

4 Trim functions

EO	For AD or CO locks, order the panic as Exit Only (EO)
DT	Dummy trim
EO	Exit only
HL	Hospital pull trim
K	Knob
K-BE	Knob - blank escutcheon
K-DT	Knob, rigid - dummy trim
K-NL	Knob, rigid - night latch
L	Lever (classroom)
L-BE	Lever - blank escutcheon
L-DT	Lever, rigid - dummy trim
L-NL	Lever, rigid - night latch
NL	Night latch
NL-OP	Night latch cylinder assembly, optional pull
TL	Turn lever
TL-BE	Turn lever - blank escutcheon
TP	Thumbpiece
TP-BE	Thumbpiece - blank escutcheon

5 Rating

F	Fire exit hardware
Blank	Panic exit hardware

6 Suffix

-2	Double cylinder (rim and mortise only)
-2SI	Double cylinder with security indicator (rim only)
CON	Connectors
WH	Weep holes

7 Finish

605	Bright Brass
606	Satin Brass
612	Satin Bronze
619	Satin Nickel
622/711	Matte Black/Matte Black, Anodized
625	Bright Chrome
626	Satin Chrome
626AM	Satin Chrome, Antimicrobial
628	Aluminum, Anodized
630	Satin Stainless
630AM	Satin Stainless, Antimicrobial
643e	Aged Bronze
693	Black Paint
710	Dark Brown, Anodized

8 Door width / Door thickness

Door width		Door thickness	
3'	Standard default	1 3/4"	Standard
4'		2 1/4"	Optional
2'	Vertical only		

9 Handing

LHR	Left hand reverse
RHR	Right hand reverse

10 Less bottom rod/cable

LBR	Less bottom rod
LBL	Less bottom latch
LBR-AFL	LBR with fire pin
LBL-AFL	LBL with fire pin

11 Trim options/finish

See trim options/finish for each device type

12 Lever style

06	Standard default (optional levers available

13 Accessories

CYL	Cylinder
GBK	Glass bead kit
SEC	Security screws
SLM	SLM blocking
SNB	Sex bolts

14 Other information

Touchbar options

BRAILLE	Vision impaired touchpad, raised letter, and braille
PUSH	Touchbar trim embossed 'PUSH'
RSS	Red silk-screened lettered touchbar trim
KN	Knurled touchbar
SG	Safety glow

Miscellaneous

CE	CE labeled
LCP	Less cover plate
IOWDA	#lOWDA cover plate
RAT REL	Ratchet release assy

Door material

AL	Aluminum door
HM	Hollow metal
WD	Wood door
CP	Composite door
INS2	Insulclad - 1/2"
INS4	Insulclad - 1/4"
SC	Steelcraft, HH device only

Door application

D	Double egress
P	Pair of doors
S	Single door

Note: Not all options are listed. See the specific device type pages for complete options available.

98/99 Rim exit device

98 and 99 rim exit devices for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 2014, Grade 1. The 98 device has a smooth mechanism case and the 99 device has a grooved case. The rim device is non-handed except when the following device options are used: SD (special dogging), -2 (double cylinder) or SS (signal switch). Covers stock hollow metal doors with 86 or 161 cutouts on single doors (may cover cutouts on pairs – consult template).

Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	3' 2'4' to 3' (711mm to 914mm) Door size 4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 13/16" (1011mm) 39 11/16" (1008mm) with mullion
Center case	8" x 2 3/4" x2 3/8" (203mm x 70mm x 60mm)
Mechanism case	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97mm) Pushbar depressed – 3 1/16" (78mm)
Latch bolt	Deadlocking, 3/4" (19mm) throw
Finishes	605, 606, 612, 625, 626/626AM, 628, 710, 711 and 643e (619 and 630 available with 98 Series only)
Fasteners and sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) and 2 1/4" (57mm) thick metal or wood doors (Optional 425 SNB available, see page 64 for quantities)

Accessories

299 Strike
Ships standard,
optional strikes available.

Hex key dogging
Comes standard on
98/99 rim exit devices.

Features and options

Electrified options

LX	Latch bolt monitor switch
RX	Request to exit
RX2	Double request to exit
E	Electric locking and unlocking trim
EL	Electric latch retraction
QEL	Quiet electric latch retraction
SS	Signal switch
CX	Chexit delayed exit
ALK	Alarm exit kit
WP-RX	Waterproof request to exit
CON	Allegion Connect

Mechanical options

-2	Double cylinder

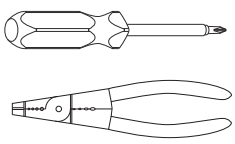
Electric Power Transfer (EPT)

EPT2, EPT10, & EPT10C

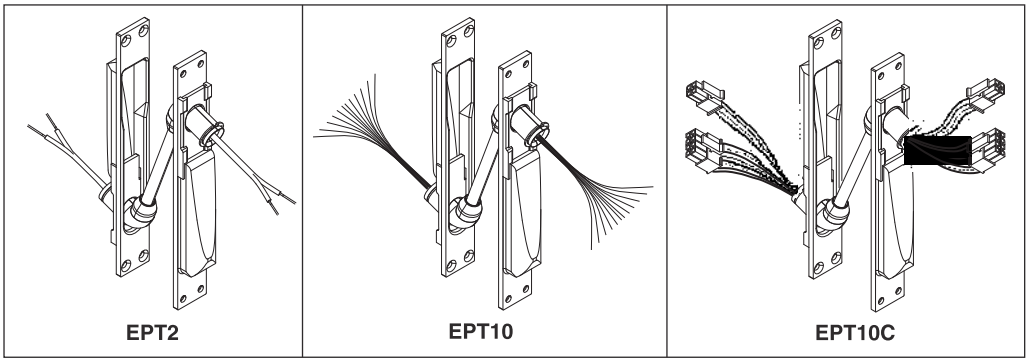
VON DUPRIN®

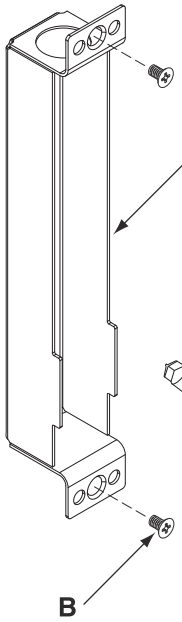
Installation Instructions

Tools for Install

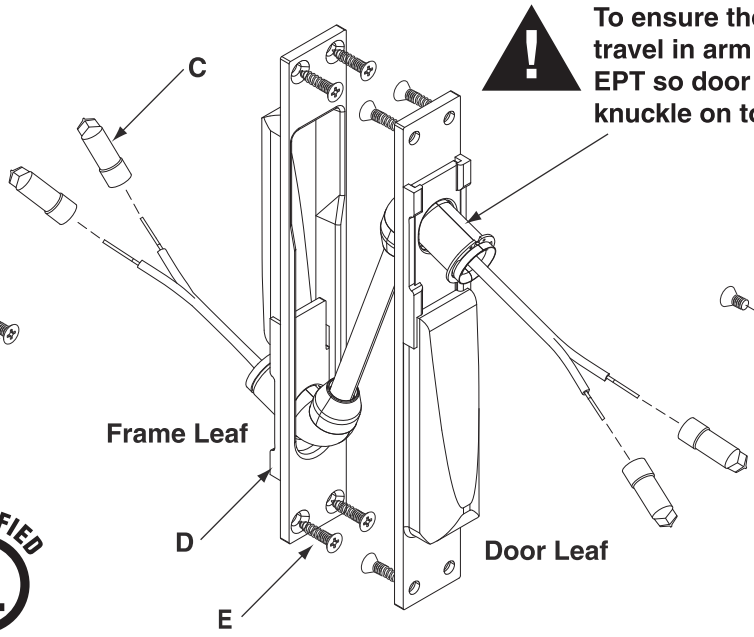


Read all Warnings Before Starting Installation!

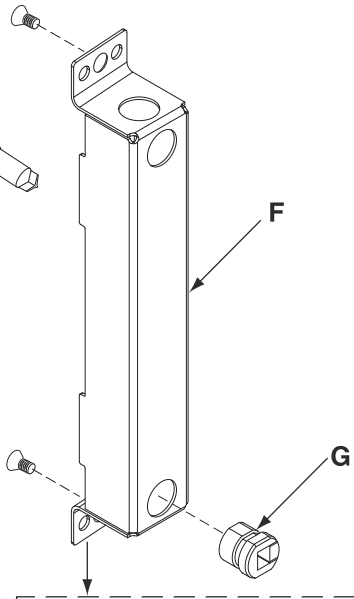


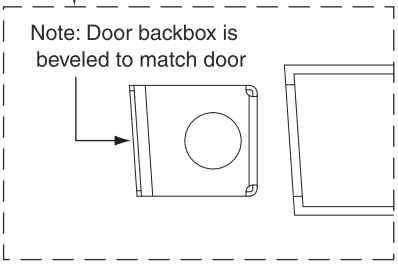


To ensure the maximum amount of travel in arm for cam lift hinges, install EPT so door side leaf is oriented with knuckle on top.



EPT2 Shown





A. Frame Backbox
B. Metal - #10-24 x 3/8” Flat Phillips Head Machine Screw (4)
   Wood - #10 x 3/4” Flat Phillips Head Wood Screw (4)

General Information

An electric power transfer (EPT) provides a wiring path from the door to the frame.

These instructions assume that a factory-prepped door and frame are being used. If the door and frame have not been factory-prepped, see the included dimensioned template.

Before beginning the installation, review “Specifications” and “Warnings”.

Specifications

Applications

EPT **can** be used for:

- Door Thickness - 1-3/4” minimum
  Note: The following specifications apply to a 1-3/4” thick door.
- 0 - 180° opening with up to 5” butt hinges
- 0 - 180° opening with up to 3/4” offset pivots
- 0 - 130° opening with 5-1/2” butt hinges
- 0 - 110° opening with 6” butt hinges

EPT **cannot** be used for:

- 1-1/2” offset pivots
- larger than 6” butt hinges
- pocket pivots
- swing clear hinges
- center hung door (center pivot)
- balanced door

Electrical Ratings

EPT2

- Two 18AWG wires
- Max. Rating: 24VDC, 5A or 120VAC NEC Class 3

EPT10 & EPT10C

- Ten 24AWG wires
- Max Rating: 24VDC, 1A

Read all Warnings Before Starting Installation!

⚠ CAUTION Do not exceed rated specifications (shown above).

⚠ CAUTION EPT must be installed in accordance with these instructions by a qualified electrician.

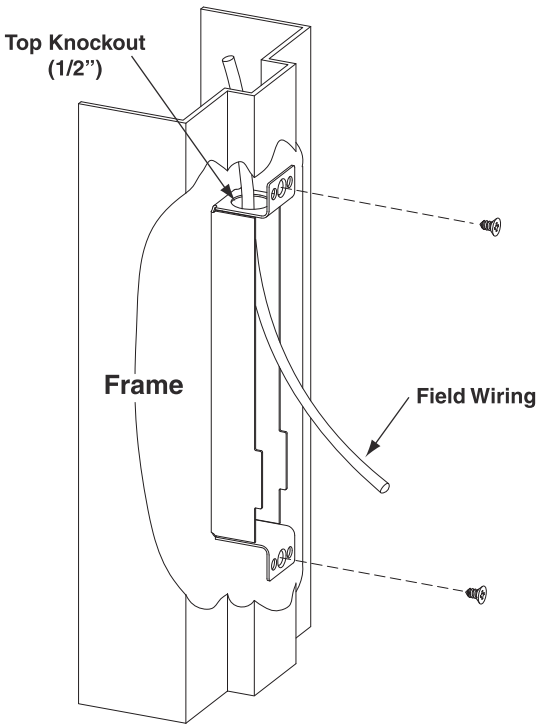
⚠ CAUTION Wiring must be in accordance with all local codes and regulations.

Installation

1 Use Template from Back Page to Verify Preparation

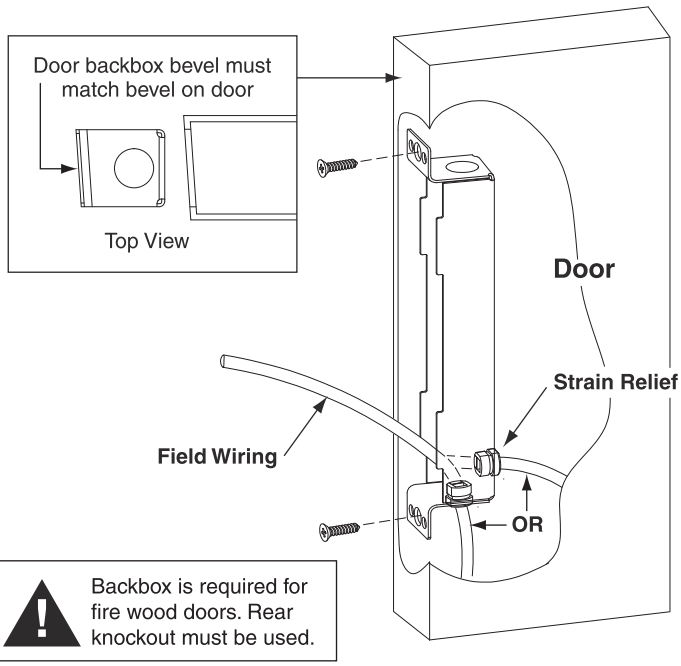
2 Mount Frame Backbox

A. Remove knockout from top
B. Install 1/2" conduit, if used
C. Pull 5" of field wiring through knockout



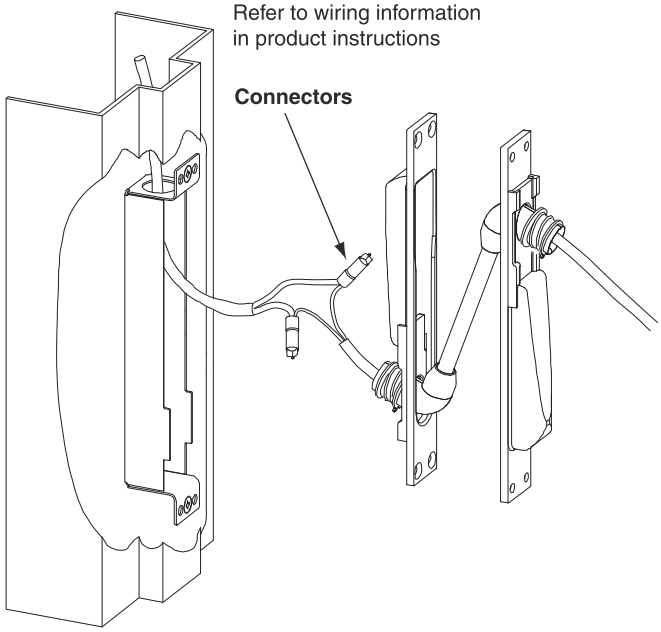
3 Mount Door Backbox

A. Ensure backbox bevel matches door bevel
B. Remove knockout: - from bottom for **metal** doors
- from back for **wood** doors
C. Pull 5" of field wiring through knockout
D. Install strain relief

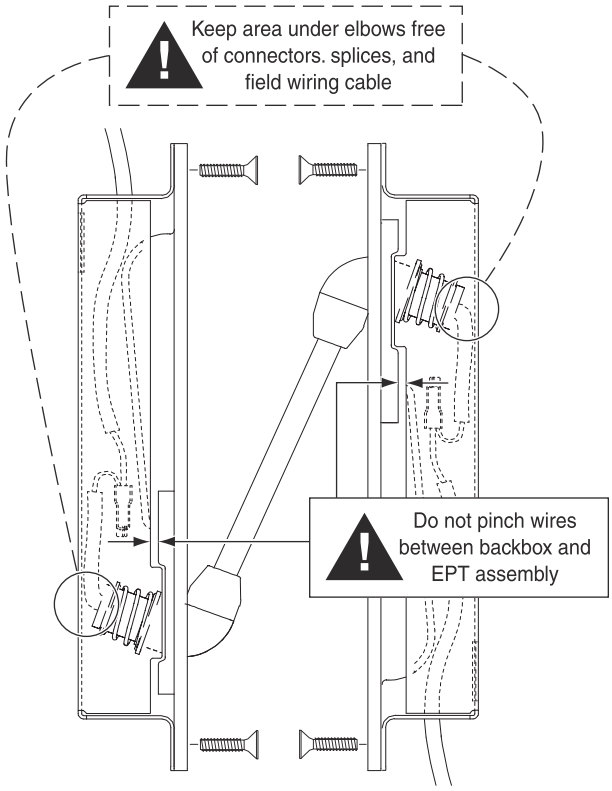


Backbox is required for fire wood doors. Rear knockout must be used.

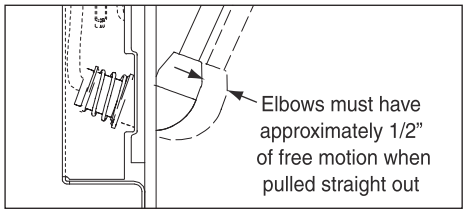
4 Connect Wires



5 Mount EPT Assembly

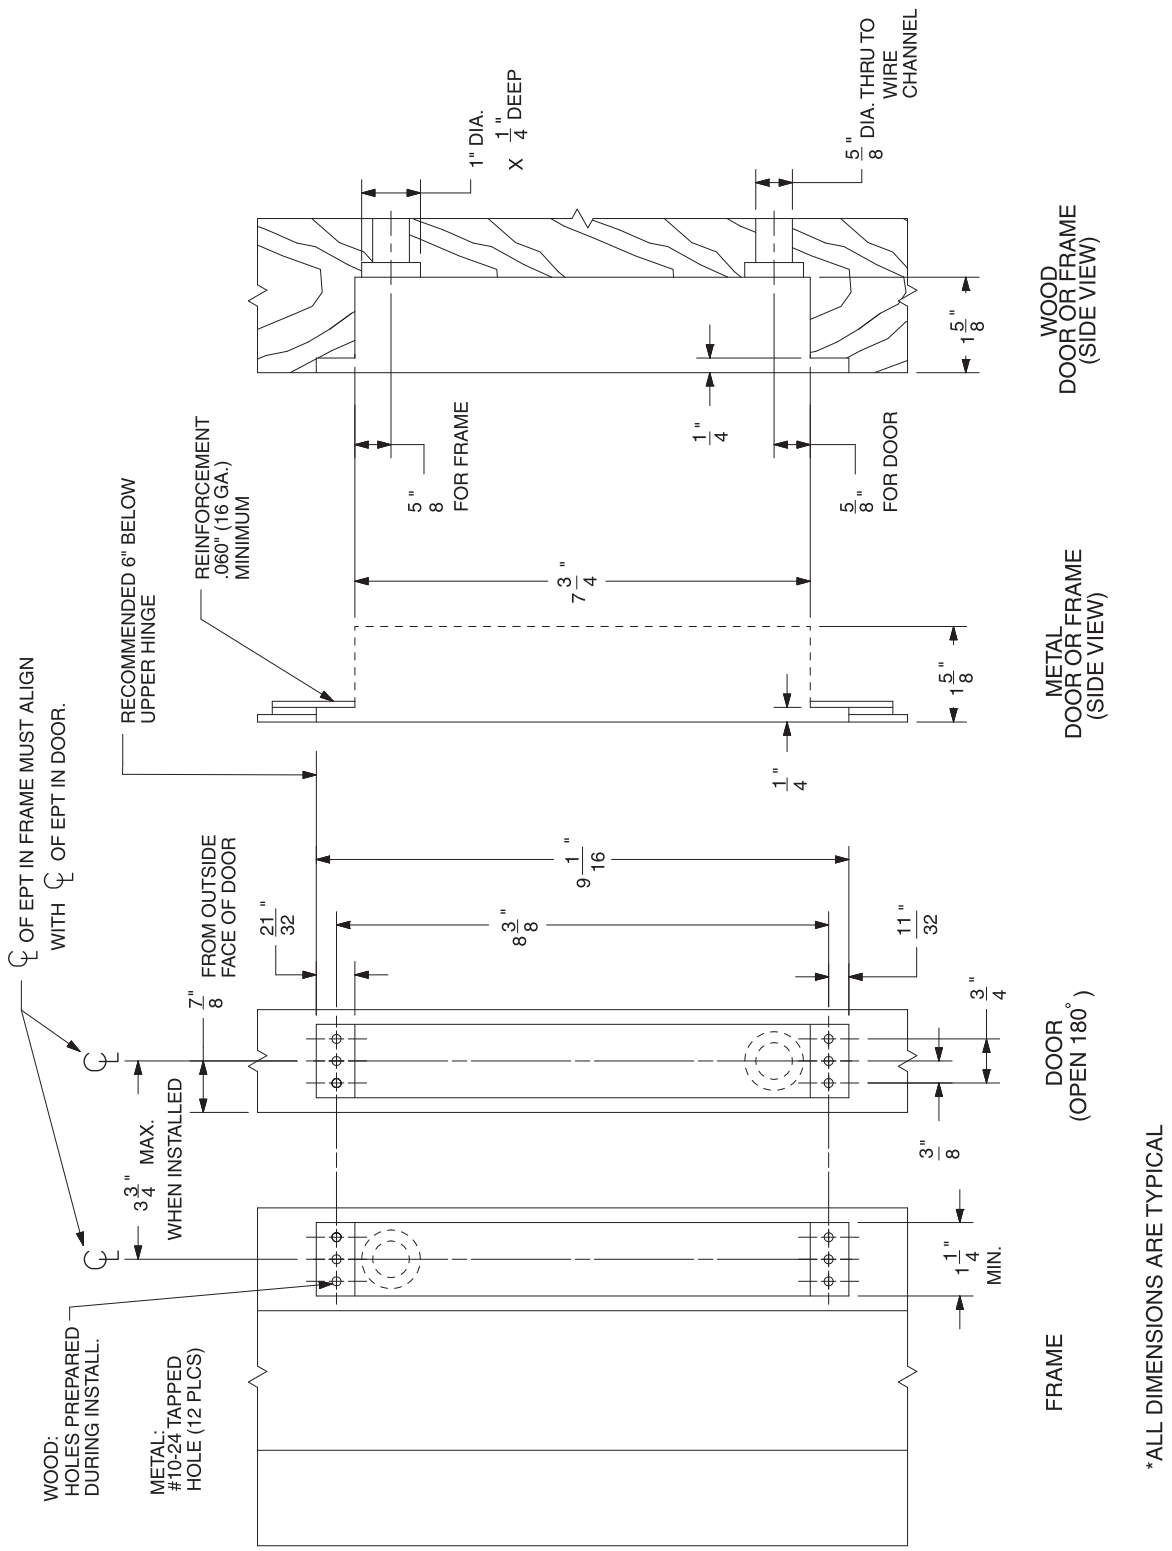


6 Verify that door opens and closes properly without binding and that electrical components function



Template

Note: This drawing is not to scale



ALLEGION™

VON DUPRIN®

PS914

4 amp high in rush power supply

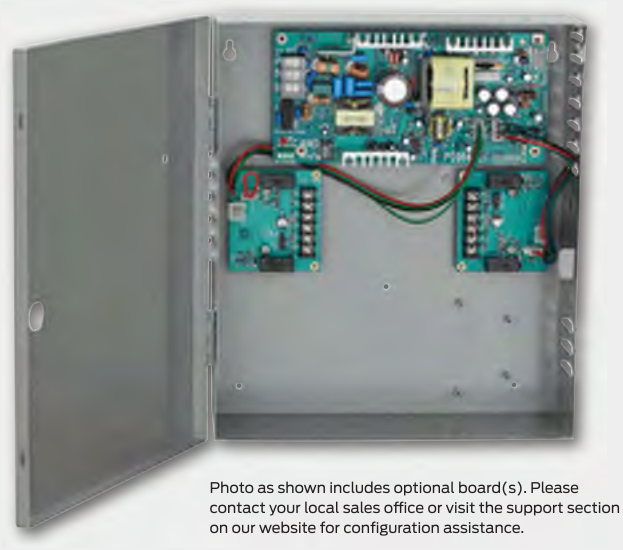


Photo as shown includes optional board(s). Please contact your local sales office or visit the support section on our website for configuration assistance.

Overview

Von Duprin power supply and option board products were designed to meet the specific requirements of electrified fire exit devices.

Installation is simplified by utilizing a flat mounting design and polarized locking connectors for option boards. This design eliminates the need for racks and side connectors. The flat mounting of the option boards also provides for easier access to the terminal blocks for connection of electrified devices (such as electrified panic devices, strikes, card readers, etc.).

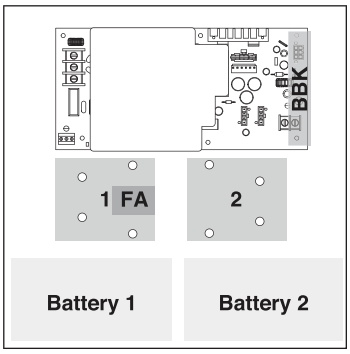
Common to the line of PS900 Series power supplies is a constant output rating at both 12v and 24v settings, universal 120 VAC to 240 VAC input, and polarized option board connectors. New fire alarm interface board mounting allows outputs to be configured as switched (power cut) or unswitched (power continues) when signal is provided.

Features and benefits

- 4A @ 12/24 VDC constant output, field selectable with jumper
- Designed for use with electrified panic devices requiring high in rush current
- Provides low-voltage, Class 2, filtered and regulated power
- Universal 120-240 VAC, fused primary input
- Two polarized option board connectors
- AC input and DC output monitoring circuit with LED indicators
- Externally visible AC input indicator with isolated SPDT contacts
- High-voltage protective cover for AC circuitry (not shown)
- Battery back-up board auto-selects voltage
- Optional Fire Alarm plug-in board available
- UL 294, ULC-S318, RoHS, and FCC Part 15 certified

Configuration options

Available option board, fire alarm and battery backup connection locations:



Exit device support

Von Duprin QEL	Up to 8[1]
Von Duprin EL	Up to 8[1,2]
Falcon EL	Up to 8[1,2]

1. Requires the use of two 900-4RL option boards

2. Distance from power supply may be limited with multiple EL applications - consult technical support for wire run lengths

PS914 power supply specifications

Specification	Description
Input voltage	120/240 VAC, 50/60 Hz, universal input
Output voltage	4A @ 12 or 24 VDC Field selectable with jumper Switching supply, 5% regulation, 360mVpp max ripple
Enclosure	Grey/baked enamel 14" x 12" x 4" (H x W x D) Eight ½" x ¾" knockouts Hinged cover with lock down screws
Operating temperature	32º - 120ºF (0º - 49ºC)
Certifications	ANSI/UL 294 ULC-S318 RoHS FCC Part 15 Class 2
Battery backup (install on main board)	900-BB: Battery backup board only 900-BBK: Battery backup kit (backup board plus battery pack)
Available option boards	900-FA: Plug-in fire alarm (must be installed on option board) 900-2RS*: 2 Relay option board capable of individual or sequential operation for single and pair door applications 900-4R*: 4 Relay option board 900-4RL*: 4 Relay option board with integrated logic and individual or sequential operation capability for controlling security interlocks, auto operators and time delay function 900-8F*: Fused, 8 zone option board 900-8P*: PTC, 8 zone option board
AC primary fuse size	6.3A, 250v, 5 x 20mm
Battery fuse size	7.5A 32v ATO blade style
DC output protection	Overload protection - current limited foldback circuit
Indicators	LED indicators: - AC input (visible on outside of enclosure) - DC output Isolated SPDT contacts to monitor AC power status
Weight (power supply)	Approx. 9.0 lbs
Weight (each battery)	4.0 lbs
AC input termination	3 position terminal block with protective cover Wire capacity: 10 AWG max.
DC output termination	2 position terminal block Wire capacity: 12 AWG max.
Option board connectors	2
Fire alarm board connector	Yes (requires connection on option board)
Keylock	Optional
Accessories	900-BAT: Backup battery pack

* Compatible with plug-in fire alarm board (900-FA)

Item Name	Door closer
Item Type	Door closer
Description	Heavy-Duty Non-Hold Open Parallel Arm with Removable Stop, Adjustable Size
Manufacturer	Yale
Model	2721
Dimensions	12-45/64" x 1-15/32"
Color	NA
Finish	689
Material Composition	Cast aluminum
CSI #	08 71 00 - Door Hardware
Omniclass #	22-08 71 00 - Door Hardware
Grade	1
Classification	Door closer
Fire/Smoke Rating	UL 10B and UL 10C compliance
Thermal Performance	Extreme temperature fluid (temperature range from -30 degrees F to 120 degrees F.)
Operation	Manual. Stop only arm, non-hold open.
Best Practices	Recycled content
Quality Standards	ANSI A156.4 Door Controls - Closers
Accessibility Compliance	ADA and ANSI A117.1
Accessories	Door mounting kit
Cover Finish	Paint
Opening Degree	180
Cover Material	Plastic
Mounting Type	Surface
Stop Type	Integral spring
Warranty	2 years

PRODUCT TESTING:

- ***Barrier-Free (ADA)*** – Meets the requirements of ADAAG-2010 (Amended) and ANSI A117.1-2009 for:
  - Overall height is no greater than ½"
  - A vertical rise no more than ¼" and/or change in elevation being beveled with a slope of 1:2
  - Does not require more than 5lbs of operating force
  - Non-Skid/Pemkote – Meets the requirements of ASTM D 2047, UL 410, and Federal Specifications P-F-430C for high static coefficient of friction resulting in a slip resistance surface
- ***Fire Rated*** – Tested to UL10B Standard Fire Tests and UL10C Positive Pressure Fire Tests of Door Assemblies
- ***BHMA Certified*** – Tested for performance with regards to the requirements in:
  - ANSI/BHMA A156.21 – Thresholds

MATERIAL SAFETY / FIRE HAZARDS

Per OSHA Regulations (Standards – 29 CFR) this Pemko item is considered an "article" as described in section 1910.1200 paragraph (c), meaning that it is a manufactured item other than a fluid and is not a hazard. To help our customers we are providing additional information in this section to cover relevant topics found on Safety Data Sheets (SDS) but not found elsewhere in this document.

FIRE HAZARD:

Aluminum alloy is a non-combustible material. Solid aluminum does not present a fire hazard.

FIRST AID MEASURES

Under normal conditions this item presents no small parts and so this item cannot be inhaled or swallowed and has no adverse reaction when coming in contact with skin. Observe good industrial hygiene after installation.

Note to physician: treat symptomatically and supportively

FIREFIGHTING MEASURES

As in any fire, prevent human exposure to fire, smoke, fumes, or products of combustion. Evacuate non-essential personnel from the fire area. Firefighters should wear face mask with self-contained breathing apparatus (SCBA) and impervious protective clothing. In case of aluminum fire, use class D dry powder to extinguish. DO NOT USE water or halogenated extinguishing media.

- Hazardous combustion products: none.

SPILL PROCEDURES

Sweep up any off-cuts from product and store in a suitable container for disposal

HANDLING, STORAGE, AND DISPOSAL

There are no specific handling instructions. Always store at room temperature and keep away from heat sources. When disposing, if possible, recycle the item and its packaging. Otherwise disposal should be in accordance with local, state, or federal legislation. Bury in an authorized landfill site or incinerate under approved controlled conditions.

EFFECTS OF EXPOSURE

There are no effects under normal conditions of use. Observe good industrial hygiene.

TOXICITY

There is no toxicity hazard under normal conditions of use

HEALTH HAZARD

This product may contain hazardous ingredients; harmful effects are unlikely under normal conditions.

Copyright © 2018 Pemko Manufacturing Co., an ASSA ABLOY Group company. All rights reserved.

CARE AND MAINTENANCE

CLEANING

Pemko's aluminum products and solid gasket products can be cleaned with a mild soap with warm water. A clean non-abrasive cloth should be used to clean the surface of these products. For removing grease, sealant, or other minimal adhesives a mild solvent such as mineral spirits may be used; then clean with mild soap mixed with warm water. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

For sponge gasket and weatherstrip products, wipe with a damp cloth. Do not use mineral spirits or other chemical as this may cause the plastic to "melt" or deteriorate. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

The use of strong solvents or cleaner concentrations may cause damage to the finish surface and isn't recommended.

MAINTENANCE

Pemko products are generally low-maintenance and require nothing more than general cleaning. Should anything outside of "general cleaning" arise, please consult Pemko Customer Service.

If you have any questions, or if you have a situation outside this scope, please contact Pemko Customer Service.

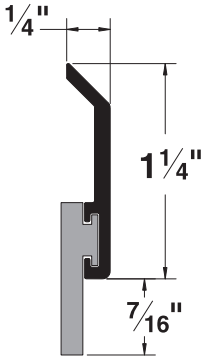
Pemko Product Reference Tech-Spec

315_N_

Door Bottom



Example: **315 | C | N | 36**

Profile# Finish Insert Length

TYPE: Door Bottom Sweep

MATERIAL: 6063-T6 Aluminum Alloy and Temper

FINISHES: B (Brass), C (Clear Anodized), D (Dark Bronze Anodized), G (Gold Anodized), PW (Painted White), SN (Satin Nickel Anodized)

LENGTHS: Up to 185"

WIDTH: 1/4" (6.4 mm)

HEIGHT: 1-11/16" (42.86 mm)

WEIGHT: Estimated per foot: 0.15 lbs

Product Test Ratings:

10C

BHMA CERTIFIED

CLASSIFIED UL c UL us 4L10

See Product Testing section for more information.

ANSI NUMBER: Aluminum: R3G434; Brass: R1G434

LEAD TIME: Standard lead time

AVAILABLE: 315_N_ is shipped from Pemko's Memphis, Ventura,and Toronto locations

WARRANTY: 5 Years from purchase date

CROSS REFERENCE: NGP: 200; Zero: 39

INSTRUCTIONS, CAD DRAWINGS, PROFILE DRAWINGS and CUT SHEET
Available upon request and on website

PRODUCT TESTING:

- ***Air Infiltration Tested*** – Tested to ASTM E-283-04 (2012) for low air leakage allowance; allows no more than 0.3 cfm per square foot at 1.57 psf.
- ***Sound Tested*** – Tested to ASTM E90 – 2009 in a single or in multiple sound seal configurations for sound attenuation in an opening
- ***Smoke Tested*** – Tested to UL 1784 and meets the requirements of NFPA 105-2013 for smoke leakage in an opening; allows no more than 3.0 cfm per square foot at 0.10" water column (about 75 Pa).
- ***Fire Rated*** – Tested to UL10B Standard Fire Tests and UL10C Positive Pressure Fire Tests of Door Assemblies
- ***BHMA Certified*** – Tested for performance with regards to the requirements in:
  - ANSI/BHMA A156.22 – Door Gasketing and Edge Seal Systems

MATERIAL SAFETY / FIRE HAZARDS

Per OSHA Regulations (Standards – 29 CFR) this Pemko item is considered an "article" as described in section 1910.1200 paragraph (c), meaning that it is a manufactured item other than a fluid and is not a hazard. To help our customers we are providing additional information in this section to cover relevant topics found on Safety Data Sheets (SDS) but not found elsewhere in this document.

FIRE HAZARD:

Aluminum alloy is a non-combustible material. Solid aluminum does not present a fire hazard.

FIRST AID MEASURES

Under normal conditions this item presents no small parts and so this item cannot be inhaled or swallowed and has no adverse reaction when coming in contact with skin. Observe good industrial hygiene after installation.

Note to physician: treat symptomatically and supportively

FIREFIGHTING MEASURES

As in any fire, prevent human exposure to fire, smoke, fumes, or products of combustion. Evacuate non-essential personnel from the fire area. Firefighters should wear face mask with self-contained breathing apparatus (SCBA) and impervious protective clothing. In case of aluminum fire, use class D dry powder to extinguish. DO NOT USE water or halogenated extinguishing media.

- Hazardous combustion products: none.

SPILL PROCEDURES

Sweep up any off-cuts from product and store in a suitable container for disposal

HANDLING, STORAGE, AND DISPOSAL

There are no specific handling instructions. Always store at room temperature and keep away from heat sources. When disposing, if possible, recycle the item and its packaging. Otherwise disposal should be in accordance with local, state, or federal legislation. Bury in an authorized landfill site or incinerate under approved controlled conditions.

EFFECTS OF EXPOSURE

There are no effects under normal conditions of use. Observe good industrial hygiene.

TOXICITY

There is no toxicity hazard under normal conditions of use

HEALTH HAZARD

This product may contain hazardous ingredients; harmful effects are unlikely under normal conditions.

CARE AND MAINTENANCE

CLEANING

Pemko's aluminum products and solid gasket products can be cleaned with a mild soap with warm water. A clean non-abrasive cloth should be used to clean the surface of these products. For removing grease, sealant, or other minimal adhesives a mild solvent such as mineral spirits may be used; then clean with mild soap mixed with warm water. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

For sponge gasket and weatherstrip products, wipe with a damp cloth. Do not use mineral spirits or other chemical as this may cause the plastic to "melt" or deteriorate. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

The use of strong solvents or cleaner concentrations may cause damage to the finish surface and isn't recommended.

MAINTENANCE

Pemko products are generally low-maintenance and require nothing more than general cleaning. Should anything outside of "general cleaning" arise, please consult Pemko Customer Service.

If you have any questions, or if you have a situation outside this scope, please contact Pemko Customer Service.

Concealed Circuit Electric Hinge (CC option)

McKinney Concealed Circuit (CC) electric hinges allow a constant flow of current from the power source through the hinge to electrified door hardware. No external wires can be seen, eliminating disruption of power due to tampering or disconnection, and improving the aesthetics of the opening.

c UL us LISTED

- Allows operation of devices requiring power such as electric locks, electric strikes, and electric latch retraction exit devices
- Wires are contained within the hinge – invisible and tamperproof
- Available with most two, three, and five knuckle bearing hinges.
- Available with 4, 8 or 12 wires
- Materials: standard and heavy weight, brass, steel, and stainless steel
- Four amp continuous @ 24 volts AC or DC per circuit 16.0 Amps intermittent duty (pulse) for 300 milliseconds
- CC option has 28 gauge wire
- CC-18 option has 2 18 gauge wires and the remainder 28 gauge wire. Available 2,4,6,8 and 10 wire
- Can be used in conjunction with MM option on most full mortise hinges. CC12 x MM not recommended for wood or solid core doors
- Optional Mortar guard MG-16 available
- Hinges are supplied with 8" (305) leads as standard. Extra lengths are available at additional cost

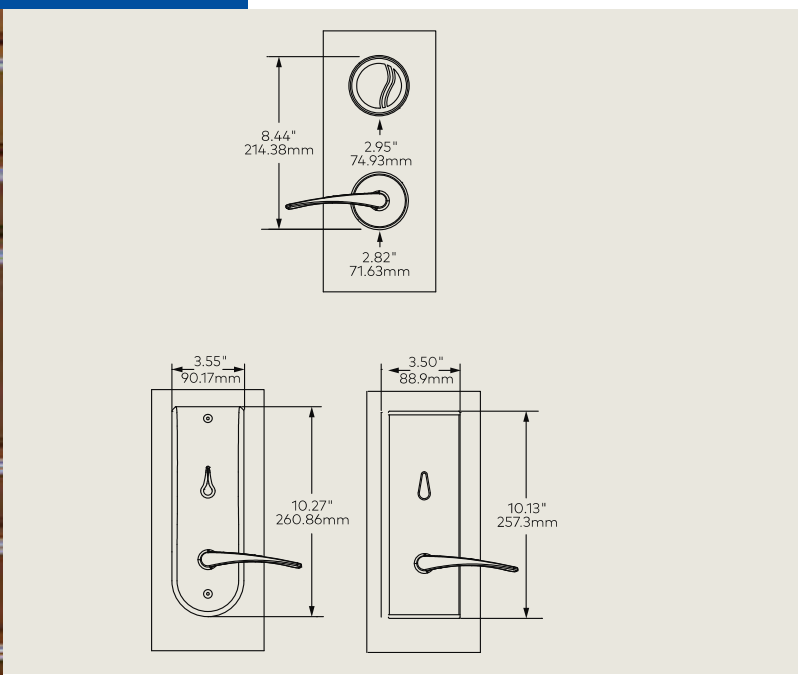
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

DH-016-SA_T12

Mechanical Features

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Handing	Factory-handed mortise (left, right, left reverse, right reverse)
Lever	ADA Compliant Apogee Arc Continental Elevon Gala Troy
Deadbolt	1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Door Thickness	1¾" (44.5mm) to 2⅛" (53.98mm) for standard product
Weight	Approx. 8.0 lbs with hardware
Housing Construction	Escutcheons: Zinc Levers: Brass, zinc, or stainless steel
Standard Finishes	Bright chrome, bright brass, satin chrome, satin brass, dark mahogany
Inside Trim Options	Optional ädəse or MT inside escutcheon
Standard Backset	2¾" (69.9mm) from door edge to lever
Locking Options	ANSI lock case with 1¼" or 1" lock front mortise Options: automatic deadbolt, door ajar European lock case mortise (20 x 165 mm) with 20 x 233 mm lock front mortise
Online Configurations	Messenger Ready: DAJ mortise (ANSI lock case) Standard (stand alone) inside escutcheon
	Messenger Online: Lock controller board with Messenger capability DAJ mortise (ANSI lock case) Inside escutcheon equipped with Messenger module

Mobile Access Options (Quantum RFID Series)

BLE compatible BLE ready BLE enabled	Standard Lock. Upgradable to BLE by adding BLE connector cable, end cap and BLE module Upgradable to BLE with BLE module End cap with BLE module included, no further upgrades needed

Batteries

Alkaline - Four AA battery pack	Battery life is up to 2 years Low battery indicator: alerts staff that batteries need to be changed soon

Lock Operation

Date/Time Stamp	Real-time; date and hours/minutes
Interrogation	Obtain key usage reports from the lock by using a handheld unit at the door, or increase efficiency by performing a remote Interrogation using Messenger (optional)
Pre-registered Keycards	Keys can be made up to ten days in advance without cancelling current or arriving guests
Keycard Expiration	Configurable expiration dates; can be automatically set for check out date or manually applied when making key during check in process.
Passage Mode	Set by authorized keycard or Messenger system. Can also be configured to perform an automated/pre-defined passage mode time.
Lockout Mode	Set by authorized keycard or Messenger system
Keycards Accepted	Mifare Classic keycards (4 byte NUID)
Feedback	Light indicators in reader
Diagnostics	Light indicators and handheld display
Audit Trail	Up to 4,000 events
Disability Feature	RCU readers interface with automatic power operated doors for special openings
Privacy Override	Emergency keycards

Certifications & Testing

Accessibility Standard	ADA compliant levers (Code of Federal Regulations 28 CFR Part 36 – 1994 "ADA Standards for Accessible Design")
BHMA/ANSI	Certified to be compliant with Grade One performance tests for "ANSI/BHMA A256.13-2012 Standard for Mortise Locks and Latches," and "ANSI/BHMA A256.25-2013 Standard for Electrified Locking Devices." (Only locks tested and approved by non-biased third-party test lab are allowed in the "BHMA Certified Products Directory" found at www.buildershardware.com)
Fire Rating	Listed for pre-prepared manufactured doors and certified for retrofitting on existing doors by Underwriters Laboratories for use on fire doors having up to a three-hour rating. a. U.L. Certification: GWVW.R12071 "Accessories for Single-point Locks and Latches and Fire Exit Hardware." Evaluated in accordance with UL 10B and UL 10C. b. U.L. Listing: GYQS.R11247 "Electrically Controlled Single-point Locks and Latches." Evaluated in accordance with UL 10B and UL 10C. c. Also classified in accordance with Uniform Building Code Standard 7-2, "Fire Test of Door Assemblies" (1997)
Electronics	FCC Part 15 Class A and CE directive 89/336/EEC compliant
Environmental Operating Conditions	Indoor side: 32°F to 151°F (0°C to 66°C) Outdoor side: -31°F to 151°F (-35°C to 66°C) 0% to 85% non-condensing humidity at 86°F (30°C)

Warranty

Standard Warranty	Two years

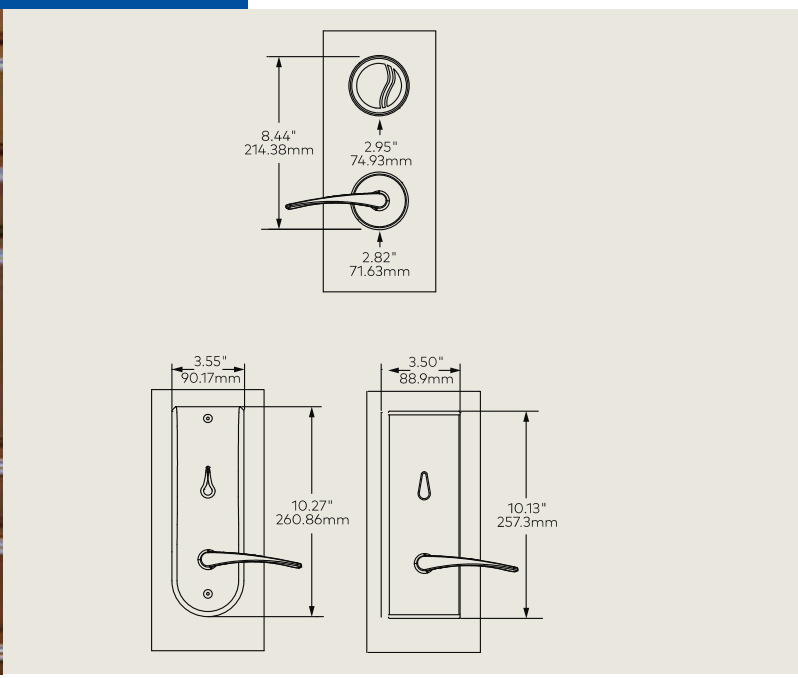
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

DH-016-SA_T13

Mechanical Features

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Handing	Factory-handed mortise (left, right, left reverse, right reverse)
Lever	ADA Compliant Apogee Arc Continental Elevon Gala Troy
Deadbolt	1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Door Thickness	1¾" (44.5mm) to 2⅛" (53.98mm) for standard product
Weight	Approx. 8.0 lbs with hardware
Housing Construction	Escutcheons: Zinc Levers: Brass, zinc, or stainless steel

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Intercom/ remote door control system
Item Type	Intercom/remote door release system
Description	Audio door answering and door release system • Simple door answering (1 door) • Electronic call tone from door station • Press-to-talk communication at master • Hands free communication at door • Monitor entry area undetected from inside • Voice and call tone volume controls • Variety of remote stations available • Door release • Simple 2 conductor wiring between door and master station (with separate 2 conductor wiring for door release)
Manufacturer	Aiphone Communication Systems
Model	LEM-1DLS Access Sentry Set
Dimensions	5-5/8" w x 7-1/16" h x 2-1/8" d
Color	Brushed stainless steel
Finish	US32D
Material Composition	Stainless steel
CSI #	08 71 00 - Door Hardware
Omniclass #	22-08 71 00 - Door Hardware
Operation	Press-to-talk, release-to-listen at master station. Hands free at remote station.
Accessibility Compliance	ADA and ANSI A117.1
Accessories	1 LEM-1DL Master Station; 1 LE-D Door Station; 1 PT-1210N Transformer
Warranty	Not available

ANSI NUMBER: Aluminim: J32100, J32130; Brass: J12100, J12130

LEAD TIME: 4 working days (or less)

AVAILABLE: Shipped from Pemko's Memphis, Ventura, Vancouver and Toronto locations

WARRANTY: 5 Years from purchase date

INSTRUCTIONS, CAD DRAWINGS, PROFILE DRAWINGS and CUT SHEET
Available upon request and on website

PRODUCT TESTING:

- ***Barrier-Free (ADA)*** – Meets the requirements of ADAAG-2010 (Amended) and ANSI A117.1-2009 for:
  - Overall height is no greater than ½"
  - A vertical rise no more than ¼" and/or change in elevation being beveled with a slope of 1:2
  - Does not require more than 5lbs of operating force
  - Non-Skid/Pemkote – Meets the requirements of ASTM D 2047, UL 410, and Federal Specifications P-F-430C for high static coefficient of friction resulting in a slip resistance surface
- ***Fire Rated*** – Tested to UL10B Standard Fire Tests and UL10C Positive Pressure Fire Tests of Door Assemblies
- ***BHMA Certified*** – Tested for performance with regards to the requirements in:
  - ANSI/BHMA A156.21 – Thresholds

MATERIAL SAFETY / FIRE HAZARDS

Per OSHA Regulations (Standards – 29 CFR) this Pemko item is considered an "article" as described in section 1910.1200 paragraph (c), meaning that it is a manufactured item other than a fluid and is not a hazard. To help our customers we are providing additional information in this section to cover relevant topics found on Safety Data Sheets (SDS) but not found elsewhere in this document.

FIRE HAZARD:

Aluminum alloy is a non-combustible material. Solid aluminum does not present a fire hazard.

FIRST AID MEASURES

Under normal conditions this item presents no small parts and so this item cannot be inhaled or swallowed and has no adverse reaction when coming in contact with skin. Observe good industrial hygiene after installation.

Note to physician: treat symptomatically and supportively

FIREFIGHTING MEASURES

As in any fire, prevent human exposure to fire, smoke, fumes, or products of combustion. Evacuate non-essential personnel from the fire area. Firefighters should wear face mask with self-contained breathing apparatus (SCBA) and impervious protective clothing. In case of aluminum fire, use class D dry powder to extinguish. DO NOT USE water or halogenated extinguishing media.

- Hazardous combustion products: none.

SPILL PROCEDURES

Sweep up any off-cuts from product and store in a suitable container for disposal

HANDLING, STORAGE, AND DISPOSAL

There are no specific handling instructions. Always store at room temperature and keep away from heat sources. When disposing, if possible, recycle the item and its packaging. Otherwise disposal should be in accordance with local, state, or federal legislation. Bury in an authorized landfill site or incinerate under approved controlled conditions.

EFFECTS OF EXPOSURE

There are no effects under normal conditions of use. Observe good industrial hygiene.

TOXICITY

There is no toxicity hazard under normal conditions of use

HEALTH HAZARD

This product may contain hazardous ingredients; harmful effects are unlikely under normal conditions.

CARE AND MAINTENANCE

CLEANING

Pemko's aluminum products and solid gasket products can be cleaned with a mild soap with warm water. A clean non-abrasive cloth should be used to clean the surface of these products. For removing grease, sealant, or other minimal adhesives a mild solvent such as mineral spirits may be used; then clean with mild soap mixed with warm water. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

For sponge gasket and weatherstrip products, wipe with a damp cloth. Do not use mineral spirits or other chemical as this may cause the plastic to "melt" or deteriorate. To dry, either allow to air dry or wipe dry with a chamois, squeegee, or lint-free cloth.

The use of strong solvents or cleaner concentrations may cause damage to the finish surface and isn't recommended.

MAINTENANCE

Pemko products are generally low-maintenance and require nothing more than general cleaning. Should anything outside of "general cleaning" arise, please consult Pemko Customer Service.

If you have any questions, or if you have a situation outside this scope, please contact Pemko Customer Service.

- Backset 2-3⁄4" (70mm) only
- Outside Front Plate Brass, bronze or stainless steel. 8" (203mm) x 1-1⁄4" (31mm), ANSI/BHMA Standard A156.115
- Front adjustable at any angle from flat to beveled 1⁄8" (3mm) in 2" (51mm)
- Hubs for Knobs/Levers
  - 7800: sintered iron copper infiltrated
  - 8200: cold forged steel
  - R8200: investment cast steel
- Auxiliary Deadlatch is stainless steel and non-handed
- Specify hand on order; easily field reversible (if no hand is specified RH will be provided)
- Strike: Brass, bronze or stainless steel; ANSI Standard; curved lip, non-handed (strike box optional)
- Keys: Two, nickel silver (control key or emergency key must be ordered when required)
- Cylinder: Brass, size #41 (1-1/8") standard (except for Freewheeling, size #46 (1-3/4"))
- Can be masterkeyed or grand masterkeyed. Construction keying available. LA standard keyway
- Stile: 4-1/2" (114mm) minimum stile for 7800/8200/R8200, 4-3/4" (121mm) minimum stile for electrical function locks
- Door Prep: ANSI/BHMA A156.115 or A156.115W modified per template (see template)
- Warranty: 10 year limited warranty, 2 year limited warranty on electrified locks. Warranty limited to replacement of lockbody and/or components

Maximum Strength & Durability

- Certified to and exceeds ANSI/BHMA A156.13, Series 1000, Operational Grade 1 and Security Grade 1 with all standard trims
- Exceeds cycle testing requirements by 14 times the ANSI/BHMA A156.13 Grade 1 standard
- Case: 12 gauge heavy duty wrought steel, zinc dichromate plated. Thickness 7/64" (3mm) (.109")
- 1/8" (.125") cold-rolled steel inside front holds lock securely in door
- Heavy duty wrought steel hubs and high carbon steel spring cartridge provide superior strength and cycle life for 8200 locks
- Latchbolt is stainless steel with 3/4" (19mm) projection one-piece, anti-friction reversible latch
- Deadbolt is one-piece hardened stainless steel with 1" (25mm) projection
- Optional 8200 stainless steel hubs for Institutional setting (specify 3- option)
- Patent pending and/or patent www.assaabloydss.com/patents

Features

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Maximum Flexibility

- Fast and easy installation. Lock is easily re-handed without removing parts or opening the lock case
- Aesthetic design. Many escutcheon and lever styles available to match a wide range of styles
- Many standard architectural grade finishes, including Polished Nickel (US14) & Satin Nickel (US15) finishes
- 53 functions including 4 electrical functions. The most in the industry for a broad range of applications
- Versatile. Offered for door thicknesses ranging from 1-3/8" (35mm) to 6" (152mm)
- Available with vandalism deterrent trim and/or secure fastener options Torx® and spanner screws for high abuse conditions
- Available with push/pull trim, perfect for hospital applications
- Status indicator options provide peace of mind on the locked/unlocked status of a door

Innovation

- First in the industry to offer a multi-functional lockbody that embodies 8 functions in 1 lockbody
- Easy operation. Only 30° of lever rotation required to retract latchbolt
- Lever springs contained inside of the lock case for easier installation
- SARGENT's revolutionary MicroShield® available. This antimicrobial silver-based finish coating permanently suppresses the growth of bacteria, algae, fungus, mold and mildew. EPA and NSF approved and FDA listed
- Broad offering of electro-mechanical configurations offer higher security for the most demanding access/egress control applications featuring ElectroLynx® quick connectors

Security

- Multiple security trim options available: free-wheeling, security escutcheon and anti-vandal pull trim (patent pending)
- Security key systems available (Degree, Signature, Keso, Keso F1, & XC)

Simplí™ Roseless Trim & R8200 Series Mortise Locks

SARGENT
ASSA ABLOY

Information

This elegant trim by SARGENT seamlessly unifies the lever and the door. Compatible with most Studio Collection and Coastal Series decorative levers, Simplí creates a flawless aesthetic vision on any door opening.

Simpli is offered on the R8200 Series mortise lock, which was specially designed to accept the roseless trim. In addition to the R8200 Series, Simpli is also available with the RDL Series tubular locks and Harmony R8200 Series mortise locks.

- Certified to and exceeds ANSI/BHMA A156.13, Series 1000, Operational Grade 1 and Security Grade 1
- Offered with most 8200 functions
- Available with Coastal Series and many Studio Collection levers (except MC, MK, MN, MP, MT, Gramercy Series, Wooster Square and Grant Park)
- Selected levers return within ½" of the door face
- Simpli roseless trim is not compatible with the 8200 lockbody; can only be used with R8200 locks
- All standard cylinder options are available
- Patent pending and/or patent www.assaabloydss.com/patents

Escutcheon Designs

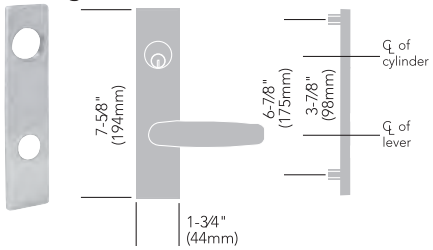
8200/R8200/7800 Series Mortise Locks

SARGENT ASSA ABLOY

Cylinders will protrude from escutcheon face on double cylinder functions only.

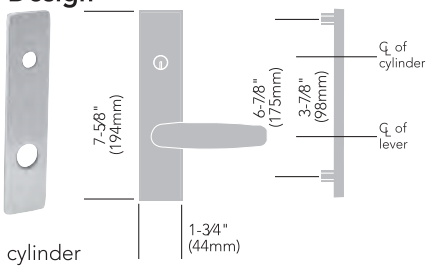
LE1/LE2 Escutcheon Design

- Escutcheon: LE-Cast
- LE1- (2) Exposed screws inside
- LE2- (2) Concealed screws inside
- LE1 is available with standard, Coastal & Studio Levers
- LE2 is available with standard levers only



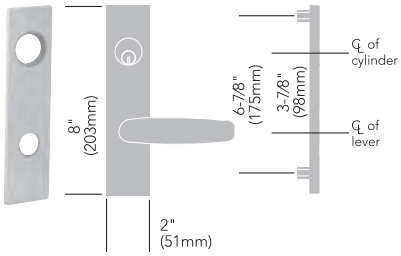
LE3/LE4 Escutcheon Design

- Concealed Cylinder designed Escutcheon, Exposed Barrel Only
- Escutcheon: LE-Cast
- LE3- (2) Exposed screws inside
- LE4- (2) Concealed screws inside
- Not available on double cylinder functions
- Only available with #41 size cylinders
  - limited keyway and key system offerings – see cylinders section
- If cylinder is ordered separately: specify 78- for concealed cylinder
- LE3 & LE4 are available with standard levers only
- UL437 not available
- Not available with DG2 & DG3 cylinders



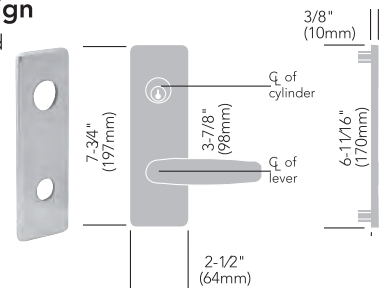
LW1 Escutcheon Design

- Escutcheon: LW1- Wrought
- (2) Exposed screws inside
- LW1 is available with standard levers only



LS Escutcheon Design

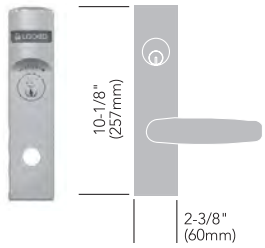
- Escutcheon: LS-Forged
- Security Trim: Cylinder is protected by the Escutcheon
- (4) Spanner security screws are exposed on inside trim standard
- LS is available with standard levers only



Note: The LS Escutcheon is not available with cylinder options: 10-63-, 11-60-, 11-63-, 11-64-, 60-, 63-, 64-, 70-, 72-, 73-, 65-73-, 65-73-7P-, 73-7P-, 81-, 82-, 83-, 84-, F1-82-, F1-82- & F1-83-. Also not available with electrified functions: 70, 71, 72, 73

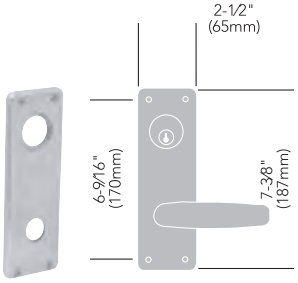
VN1 Escutcheon Design

- Escutcheon: Forged
- Thrubolt mounting screws (2)
- Exposed screws inside
- Used only with indicator options
- Available with all lever styles
- Refer to page 34



WT Escutcheon Design

- Escutcheon: WT-Heavy wrought
- Surface mounted both inside and outside
- (4) Exposed screws both inside and outside
- WT is available with standard levers only



SARGuide™ 8200 Mortise Lock (TL- Option)

- Escutcheon: TL-WT Heavy wrought
- Surface mounted both inside and outside
- (4) Exposed screws both inside and outside
- SARGuide opening 2" x 3/4"
- TL-WT is available with standard levers only

Note: SARGuide is only available with TL- WT Escutcheon.

SARGuide™, with integrated electroluminescent "EXIT" signage, addresses the increasing concern about safe public egress, particularly in low-visibility conditions. SARGuide™ can be wired for continuous operation or for operation only when an emergency alarm is activated.

Mortise Features

- Lamp can be used on internal trim (for external trim, consult factory)
- Includes all features of the 8200 Mortise Lock
- Available with WT escutcheon design only and all standard lever designs. Must specify TL- Option when ordering

SARGuide™ Features

- Illuminated utilizing the patented FLATLITE® electroluminescent lamp embedded within the mortise lock escutcheon
- Dual voltage: 24VAC or VDC input with battery back-up
- Lamp replacement kit available

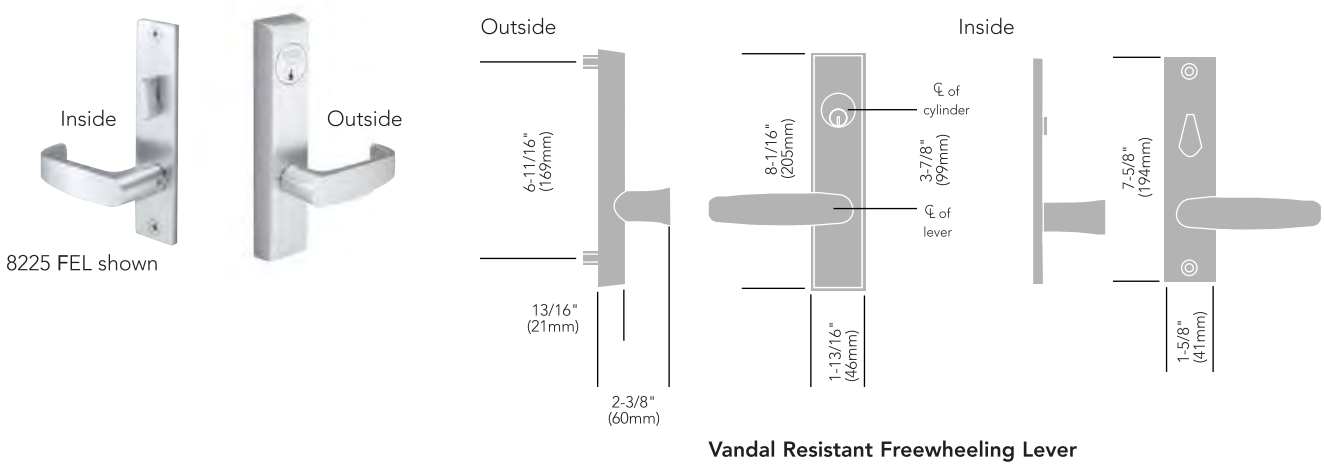
Freewheeling (FE) Trim Design

8200 Series Mortise Locks



Vandal Resistant Freewheeling Lever

Note: Maximum projection varies by lever design. Largest projection is "A" lever – 3-9/16" (90mm)

Features

The Freewheeling Mortise Trim is designed for areas that are susceptible to vandalism including schools, universities, public buildings, back doors of businesses and any exterior doors where excessive or abusive force might be applied to the lever handle trim.

This design allows the outside lever handle to swing freely, down to 70°, in the "locked" mode. This eliminates resetting the trim after vandalism attempts because the lever automatically returns to its original position.

- For 1-3/4" (44mm) doors standard. For 2" (51mm) and 2-1/4" (57mm) thick doors, must specify door thickness on order
- Vandal resistant trim
- Meets or exceeds ANSI/BHMA A156.13 Series 1000 Operational Grade 1 and Security Grade 1. LFIC (Removable) and SFIC cylinders do not meet Security Grade 1
- Forged brass outside escutcheon trim provides added protection against vandalism (32 and 32D finishes not available)
- Stainless steel lever bushing protects against wear
- Stainless steel lugs and through-bolted trim design for proper alignment and increased security
- Functions available — 04, 05, 16, 17, 24, 25, 26, 31, 35, 36, 37, 38, 39, 40, 51, 65, 66
- Levers A, B, E, F, J, L, P, W available
- Lever designs J, L and P have lever returns within 1/2" (13mm)
- Cylinder will protrude from escutcheon face on double cylinder functions only
- Cylinder sizes #46 (1-3/4") outside, #41 (1-1/8") inside standard on 1-3/4" (44mm) doors
- Specify hand. Easily field rehanded
- Patent pending and/or patent www.assaabloydss.com/patents
- Options available: 3-, 10-, 11-, 11-60-*, 11-63-*, 11-64-*, 11-70-7P-*, 11-72-7P-*, 11-73-7P-*, 11-65-73-7P-*, 21-, 23-, 36-, 37-, 60-*, 63-*, 64-*, 70-*, 72-*, 73-*, 65-73-*, 65-73-7P-*, 73-7P-*, 74-, 75-, 76-, 77-, 82-, SG- & WBS-

* Can not be used as the inside cylinder with freewheeling trim (#41 cylinder required)

Behavioral Health Series™ Trim

8200 Series Mortise Locks

SARGENT
ASSA ABLOY

8200 Push/Pull Trim (ALP)

(Paddle shown horizontally)

The 8200 mortise lock with push/pull trim provides an aesthetically-pleasing alternative to standard push/pull products. Ease of operation, along with the strength, versatility and integrity of the 8200 mortise lock, allows its use in many types of environments. Perfect for health care facilities, including behavioral health units, patient room doors and operating rooms.

Features

- Paddles can be mounted in vertically (up or down) and horizontally (towards hinge)
  - with Cylinder - paddle mounts vertically down or horizontally
- Easy installation
- Trim is non-handed; lockbody is easily field reversible
- Through-bolted trim for stability
- Torx® and spanner screws optional with ALP
- Lead lining is optional (Lockbody only), specify 74- option
- Covers are cast stainless steel
- Paddles are cast stainless steel
- Finish: 32D
- Patent pending and/or patent www.assaabloydss.com/patents

See Specialty Hardware Catalog 90712 for more details

8200 Series with BHW* Trim

Part of the Behavioral Health Series™ of products, the 8200 mortise lock with BHW trim provides an innovative solution for behavioral health environments. The unique integrated lever and escutcheon combines aesthetics with safety. Ease of operation, along with the strength and versatility of the 8200 mortise lock allows its use in many applications.

Features

- Available in 37 functions
- Uses standard mortise prep
- ANSI/BHMA Grade 1
- Tapered surfaces on all components
- Handed
- Available with MicroShield® antimicrobial coating
- Trim only option available with existing sectional and escutcheon trim only
- Trim only kits
  - 694-1 Trim only, non-keyed functions
  - 694-2 Trim only, single cylinder functions
  - 694-3 Trim only, double cylinder functions
- ADA Compliant
- Matching thumbturn available
- Finish: 32D
- 6 Lobe head security screws (Torx® type)
- Patent pending and/or patent www.assaabloydss.com/patents

See Specialty Hardware Catalog 90712 for more details

8200 with BHL* Trim

The SARGENT BHL trim is part of the Behavioral Health Series™ of products. With an array of functions, this trim can be used on virtually any opening in healthcare applications. Sloping surfaces and overlapping rose and lever address safety concerns common in behavioral health. Optimal for tough environments, the SARGENT 8200 mortise lock provides impressive strength and reliability.

Features

- Available in 21 functions
- UL Fire Rated
- ANSI/BHMA Grade 1
- Outside and inside levers will freely rotate up and down 45° when in the locked condition.
- Sloped surfaces
- Non-Handed
- Concealed hardware
- Overlapping lever and rose construction
- ADA compliant
- Finish: 32D
- Available with MicroShield® antimicrobial coating

See Specialty Hardware Catalog 90712 for more details

* Although these products are better designed for behavioral health applications than traditional trim, they do not eliminate the risk that an object can be affixed to, or around them

PT Push/Pull Trims & Anti-Vandal Option

8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

7800 Push/Pull Trim (PT)

(Paddle shown horizontally)

Typically used in the healthcare environment, push/pull trim is known for its ease of operation. Because the mortise lock with trim is more durable and secure than a cylindrical lock, conference rooms, handicapped restrooms, laboratories and pharmacies are appropriate applications.

Features

- Paddles can be mounted in vertically (up or down) and horizontally (towards hinge)
  - with Cylinder — paddle mounts vertically down or horizontally
  - with thumb turn — paddle mounts horizontally only
- Handing is easily field reversible
- Through-bolted trim for stability
- Functions available: 04, 15, 16, 17, 24, 26, 37, 43, 45, 50, 65
- Paddles & Covers are cast stainless steel, brass or bronze

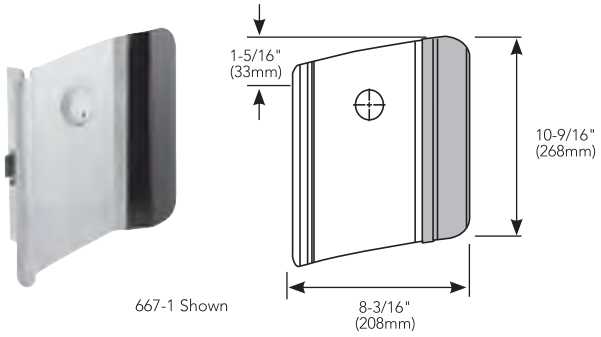
See Specialty Hardware Catalog 90712 for more details

7800/8200 Anti-Vandal Trim (AV)

Designed for exterior doors that require extra security or resistance to vandalism. AV anti-vandal trim plates have an extended lip on the active side of the door to provide extra protection for the latchbolt, deadbolt and deadlatch. A matte plastic coated grip edge provides a comfortable pull that feels good over wide temperature ranges. Fully through-bolted without exposed exterior fasteners for a clean look and increased security.

Features

- Heavy duty 12 gauge stainless steel in 32D finish only
- Through-bolted through mortise lockbody and door for added strength
- Handed: specify RHRB or LHRB
- ADA Compliant
- Patent Pending
- Available with all inside trim except LS/KS, FE and PT
- Options not available with AV trim: 1-, 31-, 49-, 50-, 68-, 69, 76, 77-, 85, 86, 87, DX- & SG-
- See chart to right for available functions
- For inactive door, available without protective lip
- Anti-Vandal Trim is available as a retrofit (667-_ Kit) or with the lock, as an "AV" option



667 AV Retrofit Kit

Retrofit kits for 7800, 7900, 8200 & 9200 mortise locks 667 Kit includes:

- AV Pull
- (4) 1/4-20 screws
- (4) Cup washers
- 1SB Rosette
- Instructions & Templates

Functions & Descriptions

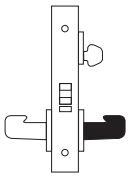
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Single Cylinder without Deadbolt

*‡04 Storeroom or Closet

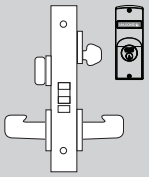
8200, R8200 & 7800



- Key outside retracts latchbolt
- Trim outside locked at all times
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- A Multi-Function 8200/R8200/7800 Lockbody
- **ANSI F07**

*05 Office or Entry

8200, R8200 & 7800



- Key outside retracts latchbolt, also locks & unlocks outside trim
- Trim inside always retracts latchbolt, trim outside remains locked
- Thumbturn inside locks & unlocks outside trim
- Auxiliary deadlatch
- A Multi-Function 8200/R8200/7800 Lockbody
- **ANSI F04**

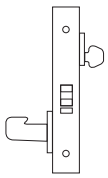
The Multi-Function Advantage with rose trim:

1. Lock will accommodate 04, 05, 15 & 37 functions without additional parts.
2. By adding an additional cylinder, lock will accommodate 38 function.
3. By adding a Trim One Side Kit, lock will accommodate 06, 13, 31 & 36 functions.

NOTE: Office/Entry Function with toggle is a 55 function.

06 Storeroom or Service

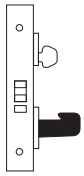
8200, R8200 & 7800



- No trim outside, cylinder only
- Key outside retracts latchbolt
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- A Multi-Function 8200/R8200/7800 Lockbody
- Same as 04 Function without trim outside

◊*31 Utility

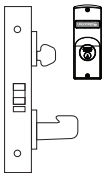
8200, R8200 & 7800



- Key outside retracts latchbolt
- Trim outside is always locked
- No inside trim or cylinder
- A Multi-Function 8200/R8200/7800 Lockbody
- Auxiliary deadlatch

*◊36 Closet

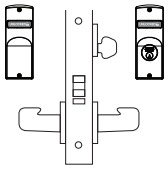
8200, R8200 & 7800



- Key locks and unlocks trim
- No inside trim or cylinder
- A Multi-Function 8200/R8200/7800 Lockbody
- Auxiliary dead latch

*‡37 Classroom

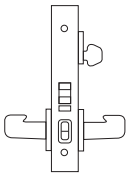
8200, R8200 & 7800



- Key outside retracts latchbolt, also locks & unlocks outside trim
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- A Multi-Function 8200/R8200/7800 Lockbody
- **ANSI F05**

55 Office or Entry

8200, R8200 & 7800



- Key outside retracts latchbolt
- Trim inside always retracts latchbolt, outside trim remains locked
- Trim outside is locked & unlocked by the toggle only
- Auxiliary deadlatch

Copyright © 2004-2020, SARGENT Manufacturing Company. All rights reserved. Reproduction in whole or in part without the express written permission of SARGENT Manufacturing Company is prohibited. Patent pending and/or patent www.assabloydss.com/patents.

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Functions & Descriptions

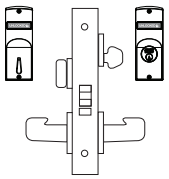
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Single Cylinder without Deadbolt

56 Office & Inner Entry Lock

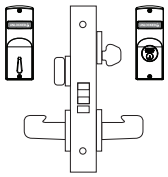
8200, R8200 & 7800



- Key outside retracts latchbolt
- Trim inside always retracts latchbolt and unlocks outside trim
- Trim outside is locked by thumbturn or key
- Auxiliary deadlatch

57 Institutional Privacy

8200, R8200, 7800

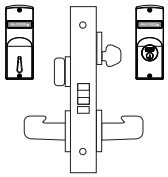


- Key outside retracts latchbolt, overriding thumbturn when held in locked position
- Thumbturn inside locks & unlocks outside trim
- Trim outside unlocks when the door closes or operating trim inside
- Trim inside always retracts latchbolt
- Auxiliary deadlatch

Note: Key locks & unlocks trim outside

58 Institutional Privacy

8200, R8200, 7800

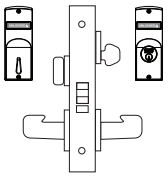


- Key outside retracts latchbolt, overriding thumbturn when held in locked position
- Thumbturn inside locks & unlocks outside trim
- Trim outside does not unlock when the door closes
- Trim outside unlocks when operating trim inside
- Trim inside always retracts latchbolt
- Auxiliary deadlatch

Note: Key locks & unlocks trim outside

67 Institutional Privacy

8200, R8200 & 7800

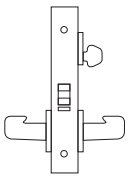


- Key outside retracts latchbolt, overriding thumbturn when held in locked position
- Thumbturn inside locks & unlocks outside trim
- Trim outside unlocks when the door closes or operating trim inside
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- **ANSI F26**

Note: Key does not lock trim outside, only unlocks it

89 Holdback

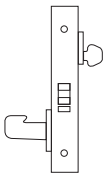
8200



- Key outside retracts latchbolt, also locks & unlocks outside trim
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- Latch holdback — to set, rotating & hold lever, then rotate key twice toward latchbolt. Lever will remain in rotated position indicating it is unlocked
- **ANSI F06**

91 All Purpose Holdback

8200



- Key outside retracts latchbolt
- Key outside can lock latchbolt in retracted position
- Trim inside always retracts latchbolt
- No outside trim
- Auxiliary deadlatch
- Latch holdback — set by rotating & holding trim, then rotate key toward latchbolt. Lever will remain in rotated position for unlocked indication

Indicator options available for both sectional and escutcheon trim.

Functions & Descriptions

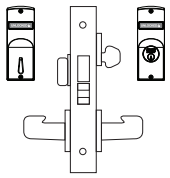
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Single Cylinder with Deadbolt

◊*‡24 Room Door

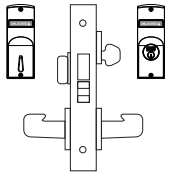
8200, R8200 & 7800



- Key outside or thumbturn inside retracts and projects deadbolt
- Trim either side retracts latchbolt
- Latchbolt & deadbolt operate independently of each other
- **ANSI F21**

*25 Dormitory or Exit

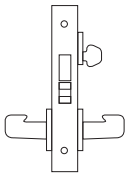
8200, R8200 & 7800



- Key outside or thumbturn inside retracts and projects deadbolt
- Trim from either side retracts latchbolt, when the deadbolt is in the retracted position
- Trim outside is locked, when the deadbolt is projected
- When deadbolt is projected, Trim inside retracts latchbolt and deadbolt simultaneously, unlocking outside trim
- **ANSI F13**

◊27 Closet or Storeroom

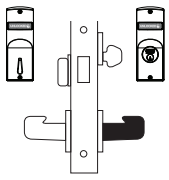
8200, R8200 & 7800



- Key outside retracts and projects deadbolt
- Trim from either side retracts latchbolt
- Same as 24 function without thumbturn
- Latchbolt & deadbolt operate independently of each other

28 Dummy Trim Deadlock

8200, R8200 & 7800

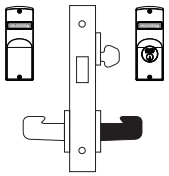


- Deadbolt operation only
- Key outside retracts and projects deadbolt
- Trim inside always retracts deadbolt
- Trim outside is always locked
- Thumbturn inside retracts and projects deadbolt

Note: Indicator shows deadbolt position only

30 Dummy Trim Deadlock

8200, R8200 & 7800

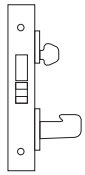


- Deadbolt operation only
- Key outside retracts and projects deadbolt
- Trim inside always retracts deadbolt
- Trim outside is always locked
- Same as 28 Function without a thumbturn

Note: Indicator shows deadbolt position only

◊*35 Storeroom

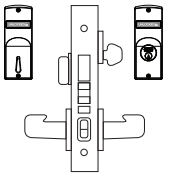
8200, R8200 & 7800



- Key outside retracts and projects deadbolt
- Trim outside retracts latchbolt, except when deadbolt is projected
- No inside trim or cylinder

‡43 Apartment Corridor Door

8200, R8200 & 7800



- Key and thumbturn both retract & project the deadbolt
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Key retracts both latchbolt and deadbolt, trim outside remains locked
- Trim inside always retracts latchbolt (and deadbolt simultaneously), trim outside remains locked
- Auxiliary deadlatch
- **ANSI F20**

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim
◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

Functions & Descriptions

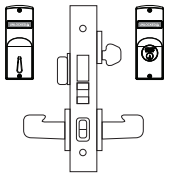
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Single Cylinder with Deadbolt

‡45 Dormitory or Exit

8200, R8200 & 7800

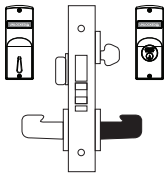


- Key and thumbturn both retract & project deadbolt
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Key retracts both latchbolt and deadbolt, trim outside remains locked
- Trim inside always retracts latchbolt (and deadbolt simultaneously), trim outside remains locked
- Same as an 8243 without Auxiliary Deadlatch
- **ANSI F12**

Note: Indicator shows deadbolt position only

*‡ 50 Hotel Guest

8200, R8200 & 7800

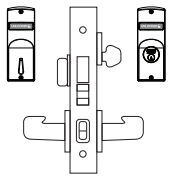


- Hotel Cylinder (50 Function) Required (Standard & Emergency Keys)
- Standard Key retracts latchbolt only, will not retract or project deadbolt
- Emergency Key (ordered separately) will retract latchbolt & deadbolt and also project deadbolt
- Thumbturn retracts & projects deadbolt
- Trim inside retracts latchbolt & deadbolt simultaneously
- Trim outside is always locked
- Auxiliary deadlatch
- Available with Conventional, LFIC (60- & 63-), Degree (60-, 63-, & 64-) and Keso (82- & F1-82-) key systems
- **ANSI F15**

Note: Indicator shows deadbolt position only

◊47 Front Door or Apartment Corridor Door

8200, R8200 & 7800

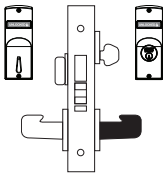


- Key and thumbturn both retract & project deadbolt
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Key retracts both latchbolt and deadbolt, trim outside remains locked
- Trim inside retracts latchbolt only, deadbolt is retracted manually & trim outside remains locked
- **ANSI F08/F10**

Note: Indicator shows deadbolt position only

*51 Storeroom Deadbolt

8200, R8200 & 7800



- Key and thumbturn both retract & project the deadbolt
- Key will also retract latchbolt
- Trim inside retracts latchbolt & deadbolt simultaneously
- Trim outside is always locked
- Auxiliary deadlatch
- Same as 50 function with a std. cylinder

Note: Indicator shows deadbolt position only

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Functions & Descriptions

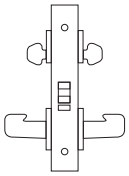
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Double Cylinder without Deadbolt

*‡16 Apartment, Exit or Public Restroom

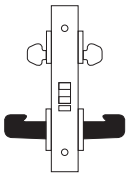
8200, R8200 & 7800



- Key outside retracts latchbolt
- Key inside is required to lock and unlock trim outside
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- Special -105 cam, required for inside cylinder (supplied)
- **ANSI F09**

◊‡17 Asylum or Institutional

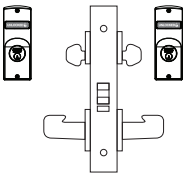
8200, R8200 & 7800



- Key from either side retracts latchbolt
- Trim on both sides are locked at all times
- Auxiliary deadlatch
- **ANSI F30**

*38 Classroom Security Intruder Latchbolt

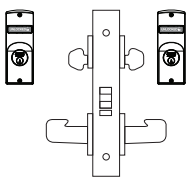
8200, R8200 & 7800



- Key from either side locks & unlocks outside trim
- Key from either side retracts latchbolt
- Trim outside retracts latchbolt, except when locked
- Trim inside always retracts latchbolt
- A Multi-Function 8200/R8200/7800 Lockbody
- Auxiliary deadlatch
- **ANSI F32**

*42 Classroom Security Intruder Latchbolt

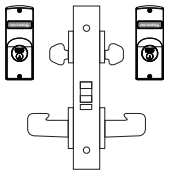
8200



- **Handed function; handing must be specified. This function is NOT field reversible for handing.**
- Key inside only locks outside trim (does not unlock)
- Key outside locks and unlocks outside trim
- Key outside retracts latchbolt
- Trim outside retracts latchbolt, except when locked
- Trim inside always retracts latchbolt
- Auxiliary deadlatch

◊59 Double Locking

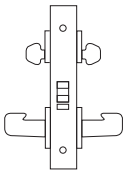
8200 & R8200



- Key from either side locks & unlocks both the inside & outside trims
- Key from either side retracts latchbolt
- Key from either side can retract latchbolt without unlocking trims
- Auxiliary deadlatch

90 Classroom Security Holdback

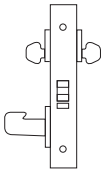
8200



- Key from either side retracts latchbolt, also locks & unlocks outside trim
- Latchbolt can be locked in the retracted position by key from either side
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- Latch holdback — to set, rotating & hold lever, then rotate key twice toward latchbolt. Lever will remain in rotated position indicating it is unlocked

92 All Purpose Holdback

8200 & 7800



- Key outside retracts latchbolt
- Key inside can lock latchbolt in retracted position when the lever is rotated
- Trim inside always retracts latchbolt
- No outside trim
- Auxiliary deadlatch
- 7892 "T " turn is used in place of knob
- Special -105 cam required for inside cylinder (Supplied Standard)
- Latch holdback — to set, rotating & hold lever, then rotate key twice toward latchbolt. Lever will remain in rotated position indicating it is unlocked

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

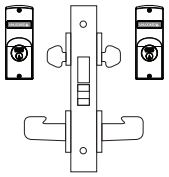
SARGENT ASSA ABLOY

Double Cylinder with Deadbolt

◊*‡26 Store Door

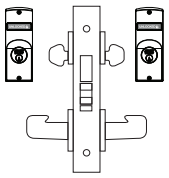
8200, R8200 & 7800



- Key from either side retracts & projects deadbolt
- Trim from either side retracts latchbolt
- Latchbolt and deadbolt are independent of each other
- **ANSI F14**

*40 Classroom Security Intruder Deadbolt

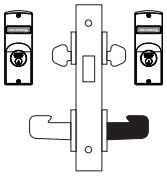
8200, R8200 & 7800



- Key from either side retracts or projects deadbolt which also unlocks or locks outside trim
- Trim outside retracts latchbolt, except when locked
- Trim outside is only locked by projecting the deadbolt
- Trim inside retracts both latchbolt and deadbolt simultaneously, and unlocks outside trim
- Auxiliary deadlatch
- Same as an 8239 with Auxiliary deadlatch
- **ANSI F34**

29 Dummy Trim Deadlock

8200, R8200 & 7800

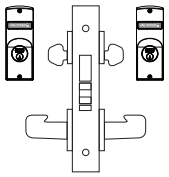


- Deadbolt operation only
- Key on either side retracts & projects deadbolt
- Trim inside retracts deadbolt
- Trim outside is always locked

Note: Indicator shows deadbolt position only

41 Classroom Security Intruder Deadbolt

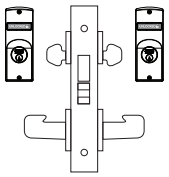
8200, R8200 & 7800



- Key from either side retracts and projects deadbolt
- When deadbolt is projected, 1st key rotation retracts deadbolt, 2nd key rotation unlocks trim outside
- Key retraction of latchbolt from either side unlocks trim outside
- Trim outside retracts latchbolt, except when locked
- Trim inside (when deadbolt is projected) retracts both latchbolt and deadbolt simultaneously and the outside trim remains locked
- Auxiliary deadlatch

*39 Classroom Security Intruder Deadbolt

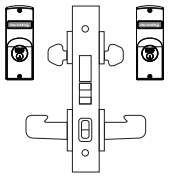
8200, R8200 & 7800



- Key either from side retracts or projects deadbolt which also unlocks or locks outside trim
- Trim outside retracts latchbolt, except when locked
- Trim outside is only locked by projecting the deadbolt
- Trim inside retracts both latchbolt and deadbolt simultaneously, and unlocks outside trim
- **ANSI F33**

46 Dormitory or Exit

8200, R8200 & 7800



- Key from either side retracts and projects deadbolt
- Key from either side retracts both latchbolt and deadbolt, trim outside remains locked
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Trim inside (when deadbolt is projected) retracts both latchbolt and deadbolt simultaneously and the outside trim remains locked

Note: Indicator shows deadbolt position only

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

Functions & Descriptions

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

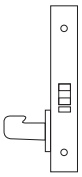
Non-Keyed

13 Exit Latch

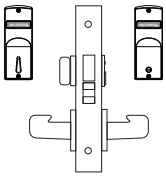
8200, R8200 & 7800



- No outside trim or cylinder
- Trim inside retracts latchbolt
- A Multi-Function 8200/R8200/7800 Lockbody
- Auxiliary deadlatch
- **ANSI F31**

*66 Privacy Bath/Bedroom

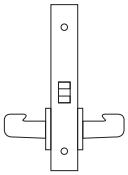
8200, R8200 & 7800



- Trim outside retracts latchbolt except when deadbolt is projected
- Trim inside retracts both latchbolt and deadbolt simultaneously, unlocking the outside trim
- Emergency Release retracts and projects deadbolt — by coin, screw driver or Emergency key (14-0057) ordered separately
- Thumbturn retracts and projects deadbolt
- **ANSI F19**

‡15 Passage or Closet

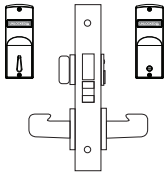
8200, R8200 & 7800



- Trim from either side retracts latchbolt at all times
- **ANSI F01**

◊68 Privacy Bath/Bedroom

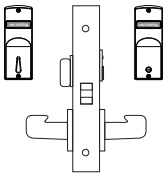
8200, R8200 & 7800



- Trim from either side retracts latchbolt at all times
- Thumbturn retracts and projects deadbolt
- Emergency release retracts and projects deadbolt — by coin, screwdriver or Emergency key (14-0057) ordered separately
- Latchbolt and deadbolt are independent of each other
- **ANSI F02**

*‡ 65 Privacy Bath/Bedroom

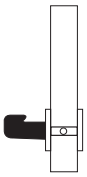
8200, R8200 & 7800



- Trim outside retracts latchbolt except when locked by thumbturn
- Trim inside retracts latchbolt and unlocks outside trim
- Emergency Release locks/unlocks trim outside-by coin, screwdriver or Emergency key (14-0057) ordered separately
- Thumbturn locks and unlocks trim outside
- Closing the door will unlock outside trim
- **ANSI F22**

93 Trim Dummy

8200, R8200 & 7800



- Trim on inside of door is always rigid
- Trim only used as door pull
- For double door applications, installed on the inactive door, use template #4298 to accept latchbolt from active door

Note: Lever is through-bolted

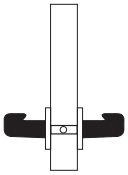
ASSA ABLOY

Non-Keyed

94 Trim Dummy

8200, R8200 & 7800

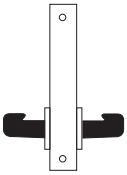


- Trim on both sides are always rigid
- Trim only used as door pull
- Recommended for double door applications on the inactive door, use template #4298, to accept latchbolt from active door

Note: Lever not surface mounted

96 Double Trim Dummy

8200, R8200 & 7800



- Trim on both sides of the door
- Both trims are always rigid
- Includes lock case and armor front
- Not recommended on double door applications (will not accept latchbolt from active door)

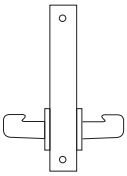
95 Single Trim Dummy

8200, R8200 & 7800

- Trim inside only
- Trim is always rigid
- Includes lock case and armor front
- Not recommended on double door applications (will not accept latchbolt from active door)

97 Active Trim Dummy

8200, R8200 & 7800



- Trim on both sides are active
- Includes lock case and armor front
- Not recommended on double door applications (will not accept latchbolt from active door)

Electrical Functions & Monitoring Options

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

SARGENT 8200 Electromechanical Mortise locks are designed to handle single opening, stand alone applications, or can be readily integrated into sophisticated access control systems. They meet ANSI/BHMA A156.13 Grade 1 requirements, are UL listed on fire doors, and satisfy industry standards for operating temperature, shock and fire hazard.

Featuring EcoFlex® Technology*

- **Reduces energy consumption up to 96%, as certified by GreenCircle**
  - Lower operating costs
  - Assists with load reduction in optimizing energy performance credit in LEED
  - Reduces number of power supplies required
- **Field configurable to fail-safe or fail-secure**
- **Operates from 12-24VDC, offering greater flexibility in system design**
- **Innovative actuator design provides superior reliability**
  - Higher performance and reduced maintenance
  - Ability to have longer cable runs without negatively impacting lock function
  - Reduces risk of voltage drops and eliminates inductive kickback
  - Lower total cost of ownership

**Patent pending*

Electrical Requirements for electromechanical functions:

Voltage: Operates from 12-24VDC Regulated. Full wave rectification installed inside the lockbody.

Current:

- Actuator draw = .015 Amp continuous
- Maximum (2) locks per 1 Amp power supply (1/2 Amp peak current draw)

Operating Temp.: Max. 151°F (66°C), Min –31°F (-35°C)

UL and CUL listed for use on Fire Doors

Note: Repeated operation at voltage exceeding +/- 10% is not recommended

Warning:

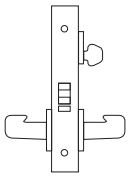
- **Do not** connect locks to a circuit sharing an additional electromagnetic device as the lock may be damaged
- Transient voltage must be suppressed at the source or before connecting with the lock
- Varistor rated at 35 volts (peak) may be used for transient voltage protection

Note: Opening the lockbody or the actuator replacement in the field by non-authorized personnel voids UL label and lock warranty

Electromechanical Functions

70 Electrical (Fail Safe)
71 Electrical (Fail Secure)

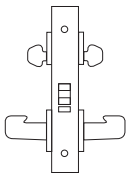
8200 & R8200



- 70 function — Power ON, locks outside lever
- 71 function — Power ON, unlocks outside lever
- Specify voltage: 12VDC or 24VDC (operates from 12-24VDC)
- Key outside retracts latchbolt
- Lever outside retracts latchbolt, except when locked
- Lever outside can only be locked electronically
- Lever inside always retracts latchbolt
- Auxiliary deadlatch

72 Electrical (Fail Safe)
◊73 Electrical (Fail Secure)

8200 & R8200



- 72 function — Power ON, locks both levers
- 73 function — Power ON, unlocks both levers
- Specify voltage: 12VDC or 24VDC (operates from 12-24VDC)
- Key on either side retracts latchbolt
- Lever from either side retracts latchbolt, except when levers are locked
- Both Levers can only be locked & unlocked electronically
- Levers can not be locked separately, only together
- Auxiliary deadlatch

Electrified Mortise Locks with Standard Monitoring Options

- Single Pole Double Throw (SPDT) type C switches
- **RX- option — Request-to-Exit or Enter Signaling Switch**
  - Two switches mounted internally in lockbody that provide independent monitoring of inside and outside lever rotation
  - Available in all functions with non rigid levers
  - Not available for the following options: 1-, 3-, 74-
  - Not available for the following trims: LS or FE
- **LX- option — Latchbolt Monitor**
  - Single switch mounted within lockbody signaling latchbolt position
  - Available for all non deadbolt functions
  - Not available with DX or 74-
- **DX- option — Deadbolt Monitor**
  - Switch mounted internally in lockbody that indicates deadbolt position
  - Not available for the following options: 3-, 74- or LX-
  - Available in all deadbolt functions

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Electrical Functions & High Security Monitoring Options

8200/R8200/7800 Series Mortise Locks

SARGENT ASSA ABLOY

Electrified Mortise Locks with High Security Monitoring:

The high security monitoring options of our industry-leading Integrated Wiegand locks are now available in a mortise lock that can be used as a stand-alone electrified lock or in conjunction with a wall reader. Every NAC lock is shipped with door position and request to exit monitoring installed. NAC locks ordered with deadbolt are supplied with deadbolt monitoring.

Functions:

Function	Description		Illustration
NAC-82274	Fail Safe	No key override, no deadbolt	NAC-82275	Fail Secure		
NAC-82284	Fail Safe	No key override with deadbolt	NAC-82285*	Fail Secure		NAC-82270	Fail Safe	Key override, no deadbolt	NAC-82271	Fail Secure		
NAC-82280	Fail Safe	Key override with deadbolt	NAC-82281*	Fail Secure		
- Fail Safe: Power off, unlocks outside trim
- Fail Secure: Power off, locks outside trim
- Key Override: Key outside retracts latch and/or deadbolt when trim is locked electronically
- Deadbolt projected and retracted by thumbturn or key

Indicator available for NAC-82281 and NAC-82285, Fail Secure, only when used with PHR option

Indicator options available for both sectional and escutcheon trim.

High Security Monitoring Options

- **Internal End-of-Line Monitoring**

  Integrated directly into the mortise lock, internal end-of-line resistors monitor the line from the access control panel to the lock. Typically, resistors are installed at the panel or above the door, creating vulnerability between the resistors and the locks. Incorporating resistors within the lock eliminates any risk of undetected tampering or damage, while also reducing installation costs, simplifying specifications, and offering the assurance of a factory installed and tested product.

  Select a compatible resistor configuration and add the appropriate prefix to your order string:

  – **R01:** Mercury and Lenel compatible 1KΩ/2KΩ resistance supervision

  – **R03:** Software House compatible 1KΩ/2KΩ resistance supervision

  – **R04:** AMAG compatible 4-state supervision

- **Deadbolt Privacy Function (PHR-)**

  – Engaging the deadbolt disables remote access control unlocking (keypad or card reader) or scheduled unlock.

  – Ideal for personal privacy areas, such as nursing rooms, on-call doctors' rooms, restrooms, and shower areas

  – To order, add the PHR- prefix to your order string

  Note: PHR is only available on Fail Secure functions

- **Integrated Door Position Switch (IDP-)**

  – The patented IDP option adds a magnetic door position switch in series with the internal auxiliary latch and latchbolt position switches to provide three factor monitoring.

  – This offers added assurance that the door is secure, reduces the likelihood of attack, and is aesthetically pleasing because it conceals the door position switch behind the front plate and the magnet behind the strike.

  – To order, add the IDP- prefix to your order string

Electrical Requirements & Accessories

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Requirements for Electrical and Data Transfer

To answer the demand for "smart" electronic access control and locking solutions that require fast, easy, and cost-effective installation, ASSA ABLOY Group brands use the ElectroLynx® standardized plug-in connectors and color-coded wiring system.

With ElectroLynx®, doorway components come pre-wired for easy hookup to the power source. The key to the system is the transfer device hinge that carries power from the frame to the locking hardware.

Features of ElectroLynx®:

- Makes it easy to bring power to the locking hardware
- Wires have connectors that snap together, like plugging a telephone into a jack

To connect an 8200 & R8200 Electrified Mortise Lock to the electronic access control system, the following items are required:

- 8200 & R8200 Electrified Mortise Lock
- ASSA ABLOY Door Group pre-wired door, or ElectroLynx® retrofit cable (order from McKINNEY)
- Electronic transfer device (ElectroLynx® electronic transfer hinge or Electrical Power Transfer with standard hinge, from McKINNEY)
- ElectroLynx® cable from the hinge to above the ceiling (order from McKINNEY)

Information regarding cable selection, hinge requirements and order strings can be found in the McKINNEY Transfer Device Solutions catalog. Consult 800-810-WIRE (9473) with questions on application specifications and requirements.

McKINNEY QC8 ElectroLynx® Hinges for 8270-8274 functions and the RX- Option is recommended.
McKINNEY QC12 ElectroLynx® Hinges for LX- or DX- Option is recommended.

Securitron PowerJump™ ICPT

The Securitron PowerJump ICPT Inductive Coupling Power Transfer delivers power contactlessly and invisibly between the frame and door to power electrified hardware on the door. The PowerJump can be installed at the latch side or hinge side of the door and transfers up to 6 watts of power without pins or wires across the door gap, eliminating points of vulnerability and wear…and no need to core drill the door. The PowerJump is field selectable for 12VDC or 24VDC systems and is ideal for fail secure applications. The unit can hold electrified latches open in continuous duty or can momentarily energize the lockset for latch retraction.

Additional information regarding this product can be found at www.securitron.com

12VDC & 24VDC Power Supplies:

- UL Class 2 Listed
- Four 12V models and four 24V models available
- Integral battery charging capability keeps sealed lead acid gel/cell at full charge in case of line voltage failure (737-battery sold separately)
- Fused line voltage input with one, four, or eight DC outputs (depending on model)
- Each circuit can be individually turned on and off via a slide
  switch; the power status of each is shown by an LED
- In the event of a DC short, the problem is confined to the zone of difficulty
- Fire alarm interface standard

SARGENT MODEL No.	DESCRIPTION

Indicators

7800/8200 Series Mortise Locks

SARGENT
ASSA ABLOY

Applications

7800/8200 Series indicators can be used in a variety of applications and are most commonly used to identify occupancy or display the locked/unlocked status of a room.

- Restrooms
- Quiet rooms
- Nursing mother's rooms
- Classroom doors

Features

- Inside, outside or both sides of the door
- Sectional or escutcheon trim
- Available with 34 different functions – including thumbturn functions
- Viewing window 25% larger than competition
- Patent pending curved design for viewing at multiple angles
- Window located prominently above the cylinder
- Highly reflective viewing window for increased safety
- Optional directional engraving available – must specify handing
- Retrofitable for existing applications

Functions

- Indicators are available with the following 7800 and 8200 Series functions. See pages 19-28 for details.

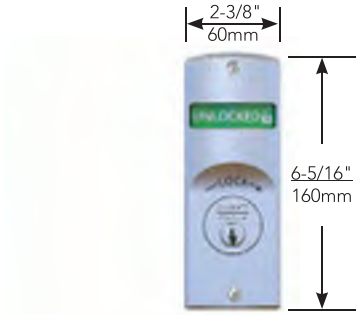
Sectional Trim

- Surface mounted
- Torx security screws provided
- Compatible with select sectional trim rose designs: O, LN, E, TR, CR, CO, TO, E2, E3
- Compatible with all thumbturn designs
- Available with optional directional arrow engraving
- Not compatible with BHW, BHL, or BHD trims

Specify option code when ordered with lock. See page 35 for indicator codes.



Retrofit/Upgrade Kits

Retrofit/upgrade kits are available for existing applications only. Each kit includes single side indicator plate with mechanism, screw pack, plastic template and instructions.

To order retrofit/upgrade kits, specify by model number. Door thickness, handing and indicator option code must also be specified with kit. Retrofit/upgrade kits with directional engraving must include lock handing.

See page 36 for how to order examples. **Note: Indicators for both sides of door require two kits.**

	Model #	Used with Functions	Available Option Codes	Indicator Location
	SA190	20, 21, 22, 24, 25, 26, 28, 29, 30, 39, 40, 41, 43, 45, 46, 47, 50, 51, 52, PHR-NAC-82281	Outside Trim: V10, V20, V30, V40, V50, V60 Inside Trim: V01, V03, V04, V06	Inside and/or Outside*
	SA191	36, 56, 57, 58, 67		
	SA192	05, 37, 38, 42, 59		
	SA193	65, 66, 68	V10, V20, V30, V40, V50, V60	Outside
	SA194	21, 24, 25, 28, 43, 45, 47, 50, 51, 66, 68, PHR-NAC-82281, PHR-NAC-82285	V01, V03, V04, V06	Inside
	SA196	56, 57, 58, 65, 67		
	SA197	30, 37, PHR-NAC-82285	Outside Trim: V10, V20, V30, V40, V50, V60 Inside Trim: V01, V03, V04, V06	Inside, Outside

*When indicators are required on both sides of the door, 2 upgrade kits must be ordered, one kit for each side.

Indicators

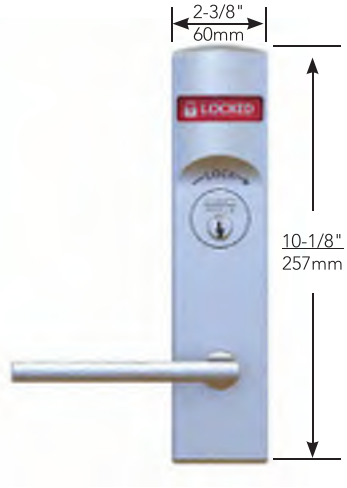
7800/8200 Series Mortise Locks

SARGENT
ASSA ABLOY

Escutcheon Trim

- Unique escutcheon (VN1) for both inside and outside of door for indicator functions
- Non-indicator functions provide with standard escutcheons as ordered, i.e. LE1, LE2, LE3, LE4, LW1, LS or WT
- Through-bolted
- Torx security screws optional
- Compatible with all thumbturn designs
- Available with optional directional arrow engraving
- Not compatible with select lever designs: MK, MT, H001, H002, H003, H004, H005, H006, H007, H008, H009, H010, H011

Specify option code when ordered with lock. See page 35 for indicator option codes.



Trim Kits

Complete trim kits are available to retrofit/upgrade existing applications.

Trim kit includes levers and escutcheons with mechanism for both sides of door, screw pack, door marker and instructions.

To order trim kit only, specify by adding option code IS and the indicator option code (see pg. 35 for codes) to the complete order string. The IS option code will be used for all trim kits for the VN1 escutcheon with indicators. Both inside and outside will be supplied.

Option Code	Functions
IS	All functions*

*Escutcheon indicator trim kits available for all functions as listed on page 32

Note: Escutcheon applications require both sides of the door to have the unique VN1 escutcheon. Kits will be provided as a set.

How to Order Example

Option Codes	Function	Esctucheon	Lever	Door Thickness	Hand	Finish
IS-V04-	8256*	VN1	L	1-3/4"	RH	26D

* The function of the existing lock is required so the proper escutcheons can be provided.

Office & Inner Entry Lock x escutcheon trim x inside indicator - Unlocked/Locked – Red/White x trim only.

Sectional Trim Only Indicators

The following indicators are available with sectional trim only and have different features and options than the indicators found on pages 32-36. To order the following sectional indicators with locksets, specify option codes 49- or 50-.

49- Option Visual Status Indicator for Non Secure Applications

Inside Only

- Designed to work with Classroom security functions
- Red/White indicator plate standard
- Mounts on inside of door
- Functions and Roses available:
  – 30, 36 & 37 Functions with 7800, 8200 and R8200 locks, CR, L, LN, TR, E & O Roses
  – 26, 29, 38, 39, 40 and 41 Functions with 7800, 8200, and R8200 locks & LN Roses Only
- As retrofit, order 185C x finish

185C

49- Option Occupancy Indicator with Emergency Release

- Ideal for restrooms or conference rooms where easy determination of use needs to be made
- OCC/VAC indicator plate standard
- Mounts on outside of door
- Emergency coin operated release standard
- Functions and Roses available:
  – 65, 66, 68 Functions with 7800, 8200, and R8200 locks, CR, E, L, LN, O & TR Roses
- As retrofit, order 185P x finish

185P

50- Option Secured Indicator Rose

- Non-handed with lever and mounting posts field reversible
- VAC/OCC indicator plate standard
- Mounts on outside of door
- Available for the following functions: 24, 25, 26, 28, 29, 30, 36, 37, 38, 39, 40, 41, 43, 45, 50, 51, 52, 57, 58, 67 - with Rose Trim only
- Patent pending design
- Not available with Roseless trim (R8200)
- For retrofit, order 185S x suffix x finish:

Suffix	Door Thickness
-1	1-3/8" (35mm)
-2	1-3/4" (44mm)
-3	2" (51mm)
-4	2-1/4" (57mm)

Note: For 49- and 50- Options, key will not retract latch when used with 37 and 38 functions

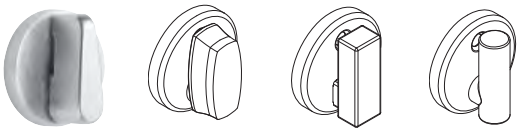
Thumbturn Designs

8200/R8200/7800 Series Mortise Locks

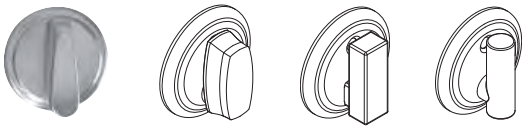
SARGENT
ASSA ABLOY

130KB Round Backplate
(Shown with Standard Turn)



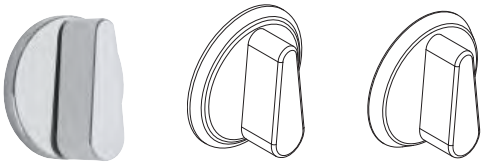
- Round backplate supplied standard with L, O, LN roses and R8200 roseless trim
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-1/2" (38mm) round brass or stainless steel plate
- Meets ADA Requirements

130KT Traditional Backplate
(Shown with Standard Turn)



- Dual radii edge backplate supplied standard with TO and TR roses
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-3/4" (44mm) round brass plate
- Meets ADA Requirements

130LB Large Round Backplate
(Shown with Large ADA Turn)

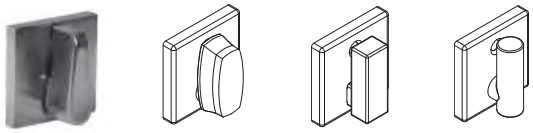


- Available with R8200 & 8200 with sectional trim
- 40% larger than standard thumbturn
- Specify LB as an option for ADA turn
- 2" (51mm) round brass, zinc, or stainless steel plate & turn
- 130LT - Traditional backplate, 130LC — Contemporary backplate
- Meets ADA Requirements

126 T-Turn
(7892 function only)

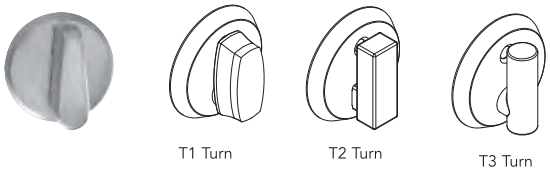
- 2-3/16" (56mm) round stainless steel backplate
- 2-3/8" (61mm) tall thumbturn
- Available in brass or bronze finishes only
- Surface mounted with three screws
- Order as "SST" trim with 7892 function

130KA Square Backplate
(Shown with Standard Turn)



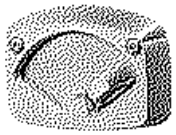
- Square backplate supplied standard with E, E2, E3 or E4 roses
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-1/2" (38mm) round brass or stainless steel plate
- Meets ADA Requirements

130KC Contemporary Backplate
(Shown with Standard Turn)



- Beveled edge backplate supplied standard with CO and CR roses
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-3/4" (44mm) round brass or stainless steel plate
- Meets ADA Requirements

130KBHA Turn for use with 8200 Mortise BHW, ALP, BHL and BHD Trim



- 3-3/4" x 2-1/2" rectangular shape
- Stainless steel housing
- Meets ADA and OMH Requirements

130W Round Backplate
(Shown with Standard Turn)

- Used with 7800 with sectional trim
- 1-1/2" (38mm) round brass or stainless steel plate

Emergency Releases & Accessories

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Emergency Releases

184KB Emergency Release (used with R8200 & 8200 with sectional trim)

- 1-1/2" (38mm) round brass, bronze or stainless steel plate
- For 65, 66 and 68 functions only

Studio Collection Emergency

- 184KC Emergency Release Contemporary
- 184KT Emergency Release – Traditional

184W Emergency Release (used with 7800 with sectional trim)

- 1-1/2" (38mm) round brass, bronze or stainless steel plate
- For 65, 66 and 68 functions only

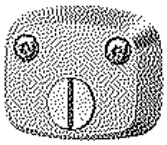
184KA Emergency Release (used with E rose)

- 1-1/2" (38mm) square brass, bronze or stainless steel plate
- For 65, 66 and 68 functions only

Emergency Key 14-0057

- Carbon steel
- For 65, 66 and 68 functions only
- Must be ordered separately

184KBHA Emergency Release (used with BHW, ALP, BHL and BHD trim)



- 3-3/4" x 2-1/2" rectangular shape
- Stainless steel housing
- Meets ADA and OMH Requirements

Accessories

130KBCVR Cap

- Thumbturn plate
- Covers hole in door when thumb turn is no longer needed

82-4023 Cap

- 2" round
- Covers hole for levers and roses

Door Thickness	Part Number
1-3/8"	82-4022
1-3/4"	82-4023
2"	82-4024
2-1/4"	82-4025

Trim One Side Kit

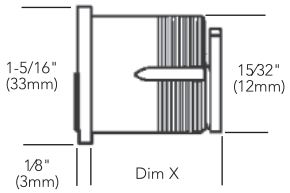
40 Series Type Cylinder

- Cylinder body: Solid brass
- Cap: Brass, bronze or stainless steel
- All functions take a Standard Cam Functions
- Standard Cam 13-0664
- 16 & 92 Inside Cam -105
- 50 Hotel Cam -115 supplied standard with all Hotel Function Cylinders



7850/8250 Function Hotel Cylinder

- When door is locked by deadbolt, only emergency key is able to unlock
- Must request emergency key separately (7268EMX x reg #)
- Supplied with Cam suffix -115 for Hotel Functions

78- Option Exposed Barrel

- Standard for use only with SARGENT Escutcheon Trims KE3, KE4, LE3, LE4
- Available 6-Pin standard or 7-Pin optional
- NOT available with 50-, 60-, 70- or other specialty or higher security options
- See function table for cam required
- Not available in 50 function
- Plug finishes: 4, 15 (similar to 26 finish)

124 Series Mortise Cylinder Turn Lever

- Turn lever: Brass, bronze or aluminum
- Cap: Brass, bronze or stainless steel
- Must be ordered separately

10- Option Signature Series

- The protected system offers the building owner full control over duplication of keys. Highly pick-resistant cylinders
- 10-63- Option — Signature cylinder with Large Format Interchangeable Cores

F1-82- and 82- Option KESO

- The system offers the building owner full control over duplication of keys
- Highly pick-resistant cylinders
- Expanded levels of masterkeying
- F1-83- & 83- Option — Keso removable core
- 84- Option — Keso construction core cylinder

11- Option XC Key System

- Patented system works with existing SARGENT keyway adding increased security
- 11- XC standard cylinder
- 11-63- Large format interchangeable core
- 11-73- Small format interchangeable core

DG1, DG2, DG3 - Degree Series

- Utility patented, bump resistant and requires the use of a patented key
- All three locking mechanisms within the same system to be operated with just one key
- See Degree Key System Catalog for available options

Not all cylinder series offered in sizes listed above, for complete cylinder information, see Cylinders & Components, Degree, Signature, Keso, Keso F1 or XC catalogs.

Cylinders & Rosettes

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

51- Option Old Style Removable Core

- Available for **existing systems only** Permanent Removable Cores
- Control key used to remove core, must request control key separately

60- or 70- Option Plastic Construction Core

- For doors that do not require key locking during the construction period
- Operate with coin or flat screw driver
- For use with LFIC (removable) (60- Option) or SFIC (70- Option) core

63- Option Large Format Interchangeable (Removable) Core

- Allows immediate removal of the core. Virtually unlimited key changes
- Available 10-63-, 11-60-, 11-63- & 11-64-
- For disposable core, see 60- Option
- 64- Option- LFIC 6-Pin construction core
- Control key used to remove core, must request control key separately

7300B Interchangeable Core

- Small Format Interchangeable Core (SFIC)
- SARGENT Interchangeable Core cylinders and MasterKey Systems are available for increased security through quick change of keying. It is unnecessary to remove a cylinder
- SARGENT 7300B Interchangeable Cores are available in SARGENT 4A and 4B keyways, as well as the following standard competitor keyways: A, B, C, D, E, F, G, H, J, K, L, M
- For disposable core, see 70- Option
- 65-73 Option — 6-Pin SFIC uncombinated
- 65-73-7P Option — 7-Pin SFIC - uncombinated
- 70- Option — Disposable SFIC
- 72- Option — Construction SFIC
- 11-72- Construction core provided for use with 11-7300 cylinder housing
  11-70- temporary plastic core prepared to accept 11-7300 core
- 73- Option — 6-Pin SFIC, SARGENT 4A, 4B keyways
- 73-7P Option — 7-Pin SFIC, SARGENT 4A, 4B keyways
- Control key used to remove core (ordered separately)

1SB Cylinder Collar

- Standard for 7800 BHD, 8200 BHL & BHW mortise locks
- Stainless steel
- 1-29/32" diameter
- Available in 4 sizes
- Projection from door:
  1SB-1 5/16" (8mm)
  1SB-2 7/16" (11mm)
  1SB-3 9/16" (14mm)
  1SB-4 11/16" (16mm)
- Finishes: 32, 32D

21- Option Lost Ball Construction System

- The SARGENT construction keying system protects the building owner by providing temporary masterkeying during the construction period

1KB Rosette with 8200 & R8200 sectional trim

- Used with mortise cylinders and No. 90 blocking rings when cylinders project from door
- Furnished standard with L, O, LN, CO, CR, TO and TR roses
- Brass, bronze or stainless steel
- 1-1/2" (38mm) diameter, includes compression spring
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP
- Projection from door:
  1KB-1 5/16" (8mm) — Standard
  1KB-2 7/16" (11mm)
  1KB-3 9/16" (14mm)
  1KB-4 11/16" (16mm)

IKA Rosette with 8200 sectional trim

- Used with mortise cylinders
- Furnished standard with the E, E2, E3 and E4 roses
- Brass, bronze or stainless steel
- 1-1/2" (38mm) Square, includes compression spring
- Projection from door:
  1KA-1 5/16" (8mm) — Standard
  1KA-2 7/16" (11mm)
  1KA-3 9/16" (14mm)
  1KA-4 11/16" (16mm)
  1KB-4 11/16" (16mm)
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP

No. 97 Rosette

- Standard for cylinders ordered separately from hardware
- Standard for 7800 knob mortise & 4870 deadbolt
- Brass, bronze or stainless steel
- 1-11/16" diameter (43mm), 9/32" (7mm) projection, includes compression spring
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 32, 32D, BSP, WSP

No. 90 Blocking Ring

- Used with 1KB rosettes as spacer when mortise cylinder projects from face of door
- Brass, bronze or stainless steel
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP

1KB-5 Cylinder Retaining Cap

- Required for double cylinder functions on KS and LS Escutcheon *only*
- Steel or stainless steel
- 1-15/32" (37mm) diameter
- 9/16" (14mm) projection
- Finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP

Cylinder Cams For Mortise Locks

SARGENT Conventional Cylinders

- Standard

Std Cam
(13-0664)
for all functions except for 50 and the Inside cam for 16 & 92 function locks

-105 Cam
(13-0665)
16 & 92 Function Inside Cylinder Cam

-115 Cam
(13-2045)
50 Function Hotel Cam, supplied with 50 function cylinders

SARGENT Large Format Interchangeable Core Cylinders

- 6300 Cams are factory installed and are not removable
- 6300 Cams are not sold separately
- Specify required Cam as a suffix: 63-44-105 cam
- For Standard Cam: no suffix is required

Std 6300 Cam
for all functions except for 50 and the Inside cam for 16 & 92 function locks

-105 Cam
for 6300 Series 16 & 92 function I/S Cylinder

-115 Cam
for 6300 Series 50 (Hotel) function, supplied with 50 function cylinders

See Cylinder catalogs for additional information

ADA and Handicap Warning

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

ADA and Handicap Warning

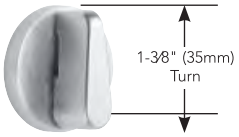
Lever Return to Door

- Lever designs J, L and P
- Lever returns within 1/2" (13mm) of door face or less
- Meets ADA Compliance for national codes

Tactile Handicapped Warning

- Abrasive Coating:
  Options 85-, 86- & 87-
  – Complete lever abrasive coated
- Milled 1/16" Grooves:
  Options 75-, 76- & 77-
  – B, E, J, L, P and W Levers — Grooves on backside surface of lever
  – F Lever — Grooves on top and bottom surface of lever

Standard Thumbturn



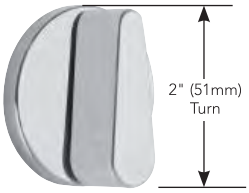
- Meets ADA Compliance for national codes
- Order as: 130KB, 130KC, 130KT, 130W or 130KA x finish

See page 38 for design

Tactile Handicapped Warning

- Knurled B & C Knobs available ; options 75-, 76-, & 77-
- Knobs are NOT ADA compliant

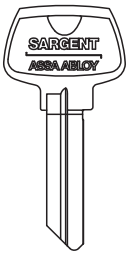
LB - Thumbturn



- Meets the tougher local ADA requirements
- 40% larger than standard thumb turn
- Order as: 130LB, 130LC or 130 LT x finish

See page 38 for design

Keys



- Large key bows are available in Sargent C family of keyways
- Standard key bows can have attachments added to increase the grip area
- Keys are NOT ADA compliant

Cylinder Options

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Cylinder Options:

Categories	How to Specify	Detailed Description	Cylinder Sizes Available
Large Format Interchangeable Core	**60-**	Hardware to accept SARGENT permanent LFIC (removable core), disposable plastic core provided (permanent cores ordered separately)	42, 43, 44 & 46
	63-	Hardware provided with LFIC (removable core) cylinder - (Includes masterkeying, grand masterkeying)	42, 43, 44 & 46
	64-	Hardware provided with Keyed construction core to accept LFIC (removable) permanent core (ordered separately)	42, 43, 44 & 46
Small Format Interchangeable Cores	**70-***	Hardware to accept 6- or 7-Pin SFIC permanent cores, disposable plastic core provided	43 & 46
	72-*	Hardware to accept 6- or 7-Pin SFIC (keyed construction core provided) cylinder (permanent core ordered separately)	43 & 46
	73-*	Hardware provided with 6-Pin SFIC (Includes masterkeying, grand masterkeying)	43 & 46
	65-73-*	Hardware provided to accept uncombinated 6-Pin SFIC (permanent) core — (packed loose for field keying)	43 & 46
	65-73-7P-*	Hardware provided to accept uncombinated 7-Pin SFIC (permanent) core — (packed loose for field keying)	43 & 46
	73-7P-*	Hardware provided with Small Format 7-Pin interchangeable core (Includes masterkeying, grand masterkeying)	43 & 46
Keso & Keso F1	**81-***	Hardware provided with housings to accept Keso (83) & Keso F1 (F1-83-) removable cores (permanent cores ordered separately)	172-174,176
	82-	Hardware provided with SARGENT Keso security cylinder	71-74,76
	F1-82-	Hardware provided with SARGENT Keso F1 security cylinder (patented)	71-74,76
	83-*	Hardware provided with SARGENT Keso security removable core cylinder	172-174,176
	F1-83-*	Hardware provided with SARGENT Keso F1 security removable core cylinder (patented)	172-174,176
	84-*	Hardware provided with SARGENT Keso construction cores (permanent cores ordered separately)	172-174,176
Additional Security	**BR-**	Bump resistant cylinder (available with conventional & conventional XC cylinders only)	—
Less Cylinder	**LC-**	Less cylinder – SARGENT supplies standard blocking rings for 1-1/8" cylinders (for longer cylinders order collars/rings separately)	—
Schlage Keyways	**SC-*^**	Schlage C keyway cylinder, 0 bitted	#41 Only
	SE-*^	Schlage E keyway cylinder, 0 bitted	#41 Only
Note: For V-10 Cylinders and information contact ASSA			

^ Options not available with Freewheeling Trim

* Options not available with 50 function lockout cylinder

Note: When using Interchangeable Core Cylinders, the ANSI/BHMA Cylinder Grade determines the grade of the lock, even if the lock is certified ANSI/BHMA Grade 1 with a standard cylinder

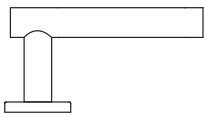
How to Order Gramercy Series Levers

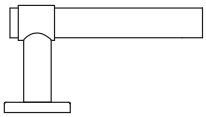
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

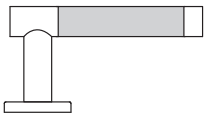
Gramercy Series Levers



REM, RGM



RCM



RAG, RAL, RAM, RAS

Gramercy Finish Codes

ANSI/BHMA Finish	SARGENT Finish	Gramercy Code*	Description
630	32D	30	Satin Stainless Steel
629	32	29	Bright Stainless Steel
613E	10BE	3E	Dark Oxidized Satin Bronze, Equivalent
N/A	BSP	BS	Black Suede Powder Coat
N/A	WSP	WS	White Suede Powder Coat
N/A	N/A	BK	Black (Santoprene™ or leather insert)
N/A	N/A	BN	Brown (leather insert)

*Code used to specify Gramercy Series finishes only. Use available finishes list to specify desired finish when ordering.

Gramercy Lever Descriptions & Available Finishes

Lever Designation	Lever Description	Available Finishes (AS ORDERED)
RAG	Grooved Insert	3030, 2929, 2930, 3029, 3E3E, BSBS or WSWS
RAL	Leather Insert	30BK30, 30BN30, 29BK30, 29BN30, 3EBK3E, BSBKBS, WSBKWS, 3EBN3E, BSBNBS or WSBNWS
RAM	Satin Metal Insert	2930 only (SEE NOTATION)
RAS	Santoprene Insert	30BK30, 29BK29, 3EBK3E, BSBKBS or WSBKWS
RCM	Raised Band	2930, 2929, 3030, 3029, 3E3E, BSBS or WSWS
REM	Plain	2930, 2929, 3030, 3029, 3E3E, BSBS or WSWS
RGM	Two Grooves	2929, 3030, 3E3E, BSBS or WSWS

Notes for Two-tone finishes:

- 2930 Finish: grip of lever is 32D, balance of lever is 32. Rose/escutcheon and lock finish will be 32
- 3029 Finish: grip of lever is 32, balance of lever is 32D. Rose/escutcheon and lock finish will be 32D

To order Gramercy Series levers with SARGENT products, see the examples below. When specifying finish, use the last two digits of the ANSI/BHMA standard finish code, i.e. use "29" for polished stainless, ANSI/BHMA finish 629

Multi-Functional Lockbody

8200/R8200/7800 Series Mortise Locks

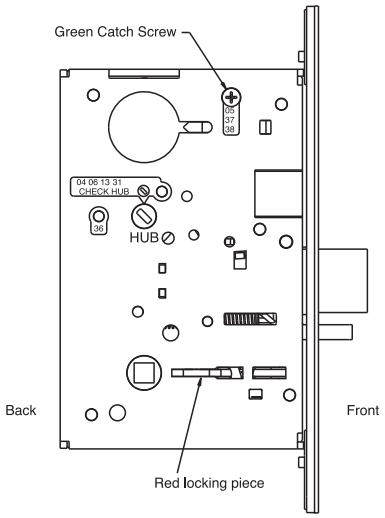
SARGENT
ASSA ABLOY

How to Change Lock Function:

The Green Catch Screw must be located in the designated location as specified on the lock case to produce the desired function.

There are three locations: one location for 05, 37 & 38 functions; one location for 04, 06, 13, & 31 functions; and one location for 36 function.

Note: To change to functions 04, 06, 13, & 31, the hub must be at the 45° position as specified on the case before screwing in the green catch screw.



Function & Part Listing for the Multifunction Lockbody

Function	#41 Cylinder	Cyl. Collars	Lever/Knob Requirements	Thumb turn
04 Store Room / Closet (F07)	1	* 1 - 1KB	** Inside Trim Set & *** Outside Trim Set	Not used
05 Office / Entry (F04)	1	* 1 - 1KB	** Inside Trim Set & *** Outside Trim Set	++ 1
06 Store Room / Service	1	* 1 - 1KB	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
13 Communicating / Exit	Not used	Not used	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
31 Utility	1	* 1 - 1KB	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
36 Closet	1	* 1 - 1KB	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
37 Classroom (F05)	1	* 1 - 1KB	** Inside Trim Set & *** Outside Trim Set	Not used
38 Classroom Security (F32)	2	* 2 - 1KB-2	** Inside Trim Set & *** Outside Trim Set	Not used

***Cylinder Collars:** Noted are based on 1-3/4" Thick Doors with standard #41 size cylinders. Other sized doors and cylinders will required different collar sizes and possibly blocking rings - see chart on page 41 of this catalog for details
****Inside trim sets include:** Inside lever/knob, inside rose or escutcheon, trim pack (spindles, through-bolt screws, set screw, inside adapter plate assembly), trim finish screws (for escutcheons)
*****Outside trim sets include:** Outside lever/knob, outside rose or escutcheon, outside mounting plate, two through-bolt studs, washers, retaining nut, and cylinder rosettes (for cylinder functions only)
+ Trim One-Side Kit includes: adapter assembly, spindle, through-bolt screws and plate adapter assembly. An inside lever is always used with this kit and is used on either side of the door as required
++ Thumb turn: Rose trims use 130KB thumb turn for Levers, and 130W thumb turn for Knobs.
Escutcheon trims require escutcheon to be ordered according to function/design, to receive thumb turn affixed to it

Type of Rose/Escutcheon		Kit Part Number
Trim One Side Kit	**E, O, KW, LN & LW1** (Standard trim only — not for use with Studio levers)	**82-3208**
Trim One Side Kit	**KE & LE (1 & 3)** (Standard trim only — not for use with Studio levers)	**82-3209**
Trim One Side Kit	**L Rose & WT**	**82-3210**
Trim One Side Kit	**Blank Rose (1-3/4" door)**	**82-4023**

Note: 8200/R8200/7800 Series Mortise Locks are certified for all functions including electrical functions and trims without exceptions.

Architectural Specifications

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

2.1 Heavy Duty Mortise Locks

A. Heavy duty mortise locks shall be 8200/R8200/7800 Series as manufactured by SARGENT Manufacturing Company, New Haven, CT.
B. Locks shall meet or exceed the requirements of ANSI/BHMA A156.13 Series 1000, Operational Grade 1, and Security Grade 1 with all standard trims.
C. Locks shall be easily re-handed without opening the lockbody.
D. Locks shall comply with UL 10C positive pressure requirements.
E. Locks required for fire doors shall be listed by Underwriters Laboratories for ratings of A label (3 hours) and less, for doors up to 4'0" (1.2m) x 10' 0" (3.05m) and pairs of doors 8'0" (2.4m) x 10'0" (3.05m).
F. Construction:
   1. Lock functions shall be manufactured in a single-sized case formed from 12 gauge steel minimum.
   2. Lock cases shall be closed on all sides and back.
   3. Locks shall have field adjustable, beveled, armored front, with a .125 inch (3mm) thickness minimum.
   4. Locks shall have a one piece, 3/4" inch (19mm) throw anti-friction stainless steel latch.
   5. Deadbolts, where specified, shall be full one inch (25mm) throw made of one-piece hardened stainless steel.
   6. Where required by the Federal Bureau of Prisons, locks can be furnished optionally with stainless steel hubs.
G. Locks shall have a 2-3/4" (70mm) backset, standard.
H. Strikes shall be non-handed with a curved lip.
I. To ensure proper alignment, trim, knobs or levers, shall be through-bolted and fully interchangeable between rose and escutcheon.
J. Locks shall have brass 6-Pin cylinder, standard.
K. Provide status indicators with highly reflective color and wording for "locked/unlocked" or "vacant/occupied" with customer wording options if required. Indicator to be located above the cylinder with the inside thumbturn not blocking the visibility of the indicator status. Indicator window size to be a minimum of 2.1" x 0.6" with a curved design allowing a 180 degree viewing angle with protective covering to prevent tampering.
L. Locks shall have a 10 year limited warranty. 2 year limited warranty on electrified locks.
M. Behavioral Health, Mortise: ANSI/BHMA A156.13, Series 1000, Operational and Security Grade 1 mortise type manufactured to Office of Mental Health (OMH) requirements with behavioral health lever and rose trim or integrated trim. Locksets to be manufactured with a corrosion resistant, formed steel case. Levers and roses are manufactured from stainless steel material. Provide optional lead-lining (lock body), Torx® fasteners, and Antimicrobial coating as specified in Hardware Sets.

2.2 EcoFlex® Electrified Mortise Locks

A. SARGENT 8200/R8200 Electrified Mortise Locks
   1. General: ANSI/BHMA certified extra heavy duty, lever type mortise lock conforming to ANSI/BHMA A156.13 Series 1000, Grade 1 requirements and ANSI A117.1 accessibility guidelines. All functions manufactured in a single sized case formed from a minimum 12 gauge steel. Lockset is field-adjustable for handing without opening the lock body with a beveled armored front that is 0.125" minimum thickness and utilizes a one-piece 3/4" anti-friction stainless steel latchbolt. To insure proper alignment, all trim, shall be thru-bolted and fully interchangeable between rose and escutcheon designs. Lock is UL listed and labeled for use on up to 3 hour fire rated openings.
      a. Backsets: 2-3/4".
      b. Deadbolt: Optional 1" throw made of stainless steel and 2 hardened steel roller inserts.
      c. Strikes: Provide wrought boxes and strikes with proper lip length to protect trim but not to project more than 1/8" beyond trim, frame or inactive leaf. Where required, provide open back strike and protected to allow practical and secure operation.
   2. Provide access control mortise lock series, type and functions where specified in hardware groups, with provisions below:
      a. Emergency override access capability with key cylinder retraction of lock latch bolt without necessary electronic activation.
      b. Inside lever retracts latch and deadbolt simultaneously for free egress.
      c. Refer to "KEYING" specification section for keying system requirements.
      d. Lever and finish to match corresponding mechanical locking hardware.
   3. Locking and unlocking of the lever handle by electronic operation contained completely within the body of the mortise lock.
      a. Field configurable Fail Safe /Fail Secure by means of an external DIP switch setting.
      b. Operationally voltage-insensitive 12 to 24 VDC.
      c. Energy Performance: Maximum standby current required for functional operation not to exceed 50 mA at 24 VDC limiting potential inductive kickback or the need for external diodes.
      d. Functional locking operation not affected by cable runs greater than 500 feet using a minimum 22 AWG wire.
   4. Monitoring: Optional real time monitoring of latchbolt, deadbolt, door open/closed status and valid egress where specified. Valid egress signaled by activation of the Request-to-Exit (RX) micro switch integral to the inside lever of the lockset on the unsecure side of the door capable of shunting external alarms. Door open/closed status provided by monitoring the deadlatch and latchbolt in series with optional integrated magnetic door position switch.
   5. Perform centralized control of the integrated locking functions by means of a single cable run to the access control panel independent of any proprietary power supplies, interface boards or controllers.
      a. End of line termination points by means of factory pre-wired Molex® connectors and harnesses.
      b. Source power electrical hard wiring and connections by others.
   6. Specified Manufacturer: Sargent Manufacturing (SA) — 8200/R8200 Series.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Entry Lock (less deadbolt)
Item Type	Entry Lock with RFID Reader
Description	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
Manufacturer	DormaKaba/Saflok
Model	Saflok Quantum RFID x BLE x Troy x F-18-R
Color	Satin chrome
Finish	US26D
Material Composition	Plated carbon steel
CSI #	087100 - Door Hardware
Omniclass #	22-087100 - Door Hardware
Grade	ANSI Grade 1
Best Practices	Recycled content of steel
Quality Standards	ANSI/BHMA A256.13-2012 Standard for Mortise Locks and Latches," and "ANSI/BHMA A256.25-2013 Standard for Electrified Locking Devices."
Accessibility Compliance	At a minimum, comply with accessibility regulations and standards of the country where the project is located. If governing accessibility regulations and standards do not exist, comply with the criteria as outlined by the U.S. ADA Standards for persons with disabilities. (www.ada.gov)
Accessories	Four (4) AA batteries
Handle Finish	Satin Chrome US26D
RFID Finish	Black
Handle	Troy
Lead Time	Verify with manufacturer at time of purchase.
Warranty	2 Years
Notes	Case hardened full 1 inch (ANSI) Throw. Deadbolt with panic release function - deadbolt and latch are automatically retracted by inside handle for easy egress in case of emergency

SPECIAL INSTRUCTIONS

GC/Designer to determine handing necessary for project and order accordingly.

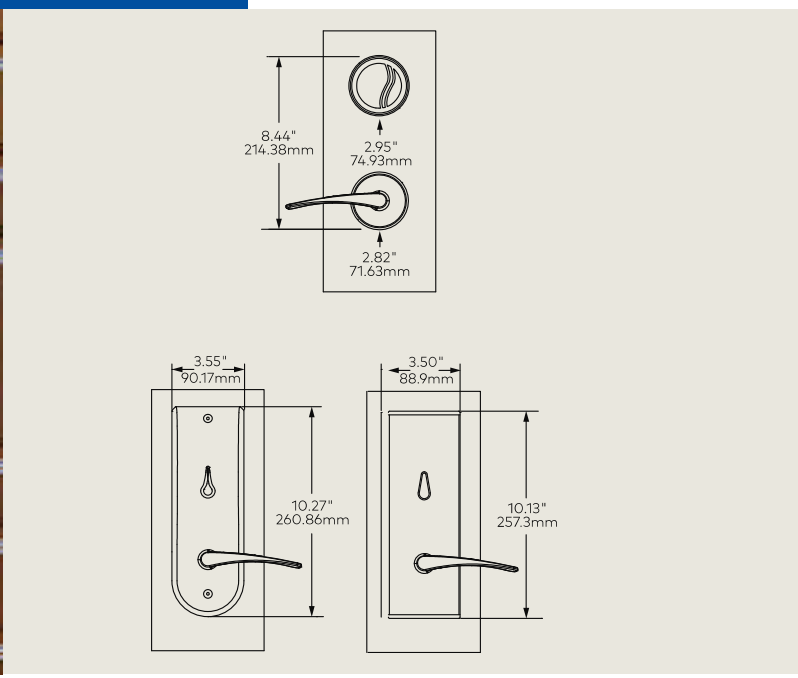
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

DH-061-SA_T41

Mechanical Features

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Handing	Factory-handed mortise (left, right, left reverse, right reverse)
Lever	ADA Compliant Apogee Arc Continental Elevon Gala Troy
Deadbolt	1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Door Thickness	1¾" (44.5mm) to 2⅛" (53.98mm) for standard product
Weight	Approx. 8.0 lbs with hardware
Housing Construction	Escutcheons: Zinc Levers: Brass, zinc, or stainless steel
Standard Finishes	Bright chrome, bright brass, satin chrome, satin brass, dark mahogany
Inside Trim Options	Optional ädəse or MT inside escutcheon
Standard Backset	2¾" (69.9mm) from door edge to lever
Locking Options	ANSI lock case with 1¼" or 1" lock front mortise Options: automatic deadbolt, door ajar European lock case mortise (20 x 165 mm) with 20 x 233 mm lock front mortise
Online Configurations	Messenger Ready: DAJ mortise (ANSI lock case) Standard (stand alone) inside escutcheon
	Messenger Online: Lock controller board with Messenger capability DAJ mortise (ANSI lock case) Inside escutcheon equipped with Messenger module

Mobile Access Options (Quantum RFID Series)

BLE compatible BLE ready BLE enabled	Standard Lock. Upgradable to BLE by adding BLE connector cable, end cap and BLE module Upgradable to BLE with BLE module End cap with BLE module included, no further upgrades needed

Batteries

Alkaline - Four AA battery pack	Battery life is up to 2 years Low battery indicator: alerts staff that batteries need to be changed soon

Lock Operation

Date/Time Stamp	Real-time; date and hours/minutes
Interrogation	Obtain key usage reports from the lock by using a handheld unit at the door, or increase efficiency by performing a remote Interrogation using Messenger (optional)
Pre-registered Keycards	Keys can be made up to ten days in advance without cancelling current or arriving guests
Keycard Expiration	Configurable expiration dates; can be automatically set for check out date or manually applied when making key during check in process.
Passage Mode	Set by authorized keycard or Messenger system. Can also be configured to perform an automated/pre-defined passage mode time.
Lockout Mode	Set by authorized keycard or Messenger system
Keycards Accepted	Mifare Classic keycards (4 byte NUID)
Feedback	Light indicators in reader
Diagnostics	Light indicators and handheld display
Audit Trail	Up to 4,000 events
Disability Feature	RCU readers interface with automatic power operated doors for special openings
Privacy Override	Emergency keycards

Certifications & Testing

Accessibility Standard	ADA compliant levers (Code of Federal Regulations 28 CFR Part 36 – 1994 "ADA Standards for Accessible Design")
BHMA/ANSI	Certified to be compliant with Grade One performance tests for "ANSI/BHMA A256.13-2012 Standard for Mortise Locks and Latches," and "ANSI/BHMA A256.25-2013 Standard for Electrified Locking Devices." (Only locks tested and approved by non-biased third-party test lab are allowed in the "BHMA Certified Products Directory" found at www.buildershardware.com)
Fire Rating	Listed for pre-prepared manufactured doors and certified for retrofitting on existing doors by Underwriters Laboratories for use on fire doors having up to a three-hour rating. a. U.L. Certification: GWVW.R12071 "Accessories for Single-point Locks and Latches and Fire Exit Hardware." Evaluated in accordance with UL 10B and UL 10C. b. U.L. Listing: GYQS.R11247 "Electrically Controlled Single-point Locks and Latches." Evaluated in accordance with UL 10B and UL 10C. c. Also classified in accordance with Uniform Building Code Standard 7-2, "Fire Test of Door Assemblies" (1997)
Electronics	FCC Part 15 Class A and CE directive 89/336/EEC compliant
Environmental Operating Conditions	Indoor side: 32°F to 151°F (0°C to 66°C) Outdoor side: -31°F to 151°F (-35°C to 66°C) 0% to 85% non-condensing humidity at 86°F (30°C)

Warranty

Standard Warranty	Two years
Support Programs	dormakaba Service Plans (Platinum, Gold, Silver)

Windows - Beige Color Scheme

Item Name	Aluminum Window, Horizontal Sliding, With Louver
Item Type	Aluminum Horizontal Sliding Window
Description	Horizontal Sliding Window Units Above Louver in Integral Master Frame
Manufacturer	SealCraft by Contour Windows (formerly Impact Windows)
Model	4100HS-FX Louver
Dimensions	Frame Depth: 2 1/2." Refer to the Design Guideline Drawings for rough opening dimensions.
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum Extrusions: ASTM B221, 6063T-5 alloy.
CSI #	085113 - Aluminum Windows
Omniclass #	22-085113 Aluminum Windows
Grade	AAMA AAMA Performance-Class CW-35 minimum, Grade 50 (except where local conditions require higher performance grade)
Classification	AAMA CW (Commercial Window)
Fire/Smoke Rating	NA
Acoustical Performance	STC 31 minimum
Compressive Strength	NA
Structural Performance	Air Leakage (ASTM E283)-Maximum 0.37 CFM per sq./ft. of total exterior surface area, when tested at a static air pressure difference of 1.57 PSF minimum. Forced Entry Resistant -(ASTM F588) Performance Level 10. Impact Resistance-In jurisdictions where required, comply with IBC Section 1609.1.4
Thermal Performance	Entire Window Assembly & Components - Comply with CW classification and IECC
Operation	Manual sliding
Best Practices	Recycled content of aluminum. Meet or exceed International Energy Code Conservation (IECC)
Quality Standards	AAMA/WDMA/CSA 101/I.S.2/A440-08 NAFS – North American Fenestration Standard/Specification for windows, doors, and skylights
Accessibility Compliance	ANSI A117.1 and ADA.
Water Sense	NA
Accessories	Operating Hardware-Manufacturer's standard sash lock, wheels, and sliding mechanism. Insect Screen-18 by 16 mesh of 0.013" diameter aluminum wire; formed or extruded aluminum frames and removable vinyl fabric-retainer spline. Assistive Window Activators - refer to specification.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Part of an Assembly	Y
Assembly Description	Assembly: Horizontal sliding window assembly with louver.
Finish Warranty	Refer to Notes
Size	Refer to Design Guideline Drawings
Product	4100HS-FX Louver
Finish	Refer to Notes
Warranty	Insulating glass warranty: 10 years. Refer to Notes for finish warranties.
Notes	Product Data Web Link: https://tinyurl.com/2n5ysyp5 Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty. Glazing shall be clear, insulated, low-e, fully-tempered where required by code. Low-e glass shall comply with the following: 1) Visible Light Transmittance (VLT): 70/ 2) Solar Heat Gain Coefficient (SHGC): 0.38; 3) Light to Solar Gain (LSG) Ratio: 1.84-1.85. Aluminum louvers to be furnished and installed glazed within integral master frame of window units where shown on Drawings. Louver free area to be coordinated with mechanical PTAC units supplied by Division 23. - Fixed Blade Angle: 42 degrees - Provide PTAC Collar - Provide 0.032-inch aluminum sheet blank-off panels with 1" insulation on each side of PTAC unit on rear side of louver. - Finish: Match Windows. Insect Screens: Provide removable insect screen panel for each moveable glazed sash.

- Screen Fabric: 18 by 16 mesh of 0.013" diameter aluminum wire. Comply with FS-RRW-365, Type VII, except black anodized or "gun metal" coating on wire.
- Screen Frame: Provide formed or extruded aluminum frames and removable vinyl fabric-retainer spline.
- Finish shall match window

SPECIAL INSTRUCTIONS

Design glass framing system to limit lateral deflections of glass edges to less than 1/175 of glass-edge length at design pressure based on AAMA/WDMA/CSA 101/I.S.2/A440-08, Uniform Load Deflection Test.
Operating sash in guest rooms to be located closest to center of room.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Assembly Description	Assembly: Horizontal sliding window assembly with louver.
Finish Warranty	Refer to Notes
Size	Refer to Design Guideline Drawings
Product	4100HS-FX Louver
Finish	Refer to Notes
Warranty	Insulating glass warranty: 10 years. Refer to notes for finish warranties.
Notes	Product Data Web Link: https://tinyurl.com/2n5ysyp5 Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty. Glazing shall be clear, insulated, low-e, fully-tempered where required by code. Low-e glass shall comply with the following: 1) Visible Light Transmittance (VLT): 70/ 2) Solar Heat Gain Coefficient (SHGC): 0.38; 3) Light to Solar Gain (LSG) Ratio: 1.84-1.85. Aluminum louvers to be furnished and installed glazed within integral master frame of window units where shown on Drawings. Louver free area to be coordinated with mechanical PTAC units supplied by Division 23. - Fixed Blade Angle: 42 degrees - Provide PTAC Collar - Provide 0.032-inch aluminum sheet blank-off panels with 1" insulation on each side of PTAC unit on rear side of louver. - Finish: Match Windows. Insect Screens: Provide removable insect screen panel for each moveable glazed sash. - Screen Fabric: 18 by 16 mesh of 0.013" diameter aluminum wire. Comply with FS-RRW-365, Type VII,

except black anodized or "gun metal" coating on wire.
- Screen Frame: Provide formed or extruded aluminum frames and removable vinyl fabric-retainer spline.
- Finish shall match window

SPECIAL INSTRUCTIONS

Design glass framing system to limit lateral deflections of glass edges to less than 1/175 of glass-edge length at design pressure based on AAMA/WDMA/CSA 101/I.S.2/A440-08, Uniform Load Deflection Test.
Operating sash in guest rooms to be located closest to center of room.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Aluminum Window, Horizontal Sliding, With Louver
Item Type	Aluminum Horizontal Sliding Window
Description	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
Manufacturer	Traco, div. of Kawneer International
Model	NX-6400 Series Slider over louver
Dimensions	Frame Depth: 2 1/2." Refer to the Design Guideline Drawings for rough opening dimensions.
Color	To Match PPG Bone White, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum Extrusions: ASTM B221, 6063T-5 alloy.
CSI #	085113 - Aluminum Windows
Omniclass #	22-085113 Aluminum Windows
Grade	AAMA AAMA Performance-Class CW-35 minimum, Grade 50 (except where local conditions require higher performance grade)
Classification	AAMA CW (Commercial Window)
Fire/Smoke Rating	NA
Acoustical Performance	STC 31 minimum
Compressive Strength	NA
Structural Performance	Air Leakage (ASTM E283)-Maximum 0.37 CFM per sq./ft. of total exterior surface area, when tested at a static air pressure difference of 1.57 PSF minimum. Forced Entry Resistant -(ASTM F588) Performance Level 10. Impact Resistance-In jurisdictions where required, comply with IBC Section 1609.1.4
Thermal Performance	Entire Window Assembly & Components - Comply with CW classification and IECC
Operation	Manual sliding
Best Practices	Recycled content of aluminum. Meet or exceed International Energy Code Conservation (IECC)
Quality Standards	AAMA/WDMA/CSA 101/I.S.2/A440-08 NAFS – North American Fenestration Standard/Specification for windows, doors, and skylights
Accessibility Compliance	ANSI A117.1 and ADA
Water Sense	NA
Accessories	Operating Hardware-Manufacturer's standard sash lock, wheels, and sliding mechanism. Insect Screen-18 by 16 mesh of 0.013" diameter aluminum wire; formed or extruded aluminum frames and removable vinyl fabric-retainer spline. Assistive Window Activators - refer to specification.
Part of an Assembly	Y

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Assembly Description	Assembly: Horizontal sliding window assembly with louver.
Finish Warranty	Refer to Notes
Size	Refer to Design Guideline Drawings
Product	NX-6400 Series Slider over louver
Finish	Refer to Notes
Warranty	Insulating glass warranty: 10 years. Refer to Notes for finish warranties.
Notes	Product Data Web Link: https://tinyurl.com/4apm877z Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Fiberglass Window
Item Type	Fiberglass Horizontal Slider Window with louver
Description	Sliding fiberglass window with sills, trim, and closures. Manufacturer's standard sash lock, wheels, and sliding mechanism.
Manufacturer	Pella Corporation
Model	Impervia
Dimensions	Frame depth: 3" Refer to the Design Guideline Drawings for other dimensions.
Color	Match Anodized Clear as approved by Marriott International
Finish	Painted (PVDF) fiberglass pultrusion
Material Composition	Frame and Sash Material: 5-layer, pultruded-fiberglass material, reinforced with interlocking mat.
CSI #	085413 - Fiberglass Windows
Omniclass #	22-085413 Fiberglass Windows
Grade	AAMA/WDMA 40
Classification	AAMA/WDMA Performance Class: LC (Light Commercial)
Acoustical Performance	STC 31 minimum
Structural Performance	Uniform Structural Properties (ASTM E330): Pressure acting inward and outward. Window to be operable and maximum 0.4% permanent deformation, per member, when tested at a static air pressure difference of the following: AAMA/WDMA Class LC-40. Water Resistance (ASTM E547): No water penetration through window when tested under static pressure of 6.0 psf after 4 cycles of 5 minutes each, with water being applied at a rate of 5 gallons per hour per square foot. Air Leakage (ASTM E283): Maximum 0.25 CFM per sq./ft. of total exterior surface area, when tested at a static air pressure difference of 1.57 PSF minimum.
Thermal Performance	U-0.36 Manxiumum
Operation	Horizontal sliding
Best Practices	Thermal performance complying with ASHRAE 90.1.
Quality Standards	ANSI/AAMA/WDMA 101/I.S.2/NAFS-02 “Voluntary Performance Specification for Windows, Skylights and Glass Doors”
Accessibility Compliance	Compliant with ADA / ANSI/ICC A117.1.
Accessories	Fiberglass louvers to be furnished and installed glazed within integral master frame of window units where shown on Drawings. Louver free area to be coordinated with mechanical PTAC units supplied by HVAC Contractor. Fixed Blade Angle: 42 degrees.

	Provide PTAC Collar. Provide 0.032 inch aluminum sheet blank-off panels with 1" insulation on each side of PTAC unit on rear side of louver. Finish: match windows. Window Screen: 18 by 16 mesh of 0.013" diameter aluminum wire; formed or extruded aluminum frames and removable vinyl fabric-retainer spline.
Finish Warranty	10 years
Size	Refer to the Design Guideline Drawings
Product	Impervia
Material Warranty	2 years
Warranty	10 years (Insulating glass)
Notes	Glazing: Insulated units consisting of 1/8" clear x 1/2" Argon x 1/8" Low-E. Safety glass complying with CPSC 16 CFR Part 1201.

SPECIAL INSTRUCTIONS

Insulating Glass: Manufacturer's standard Low "E2" units consisting of manufacturer's special design to conform to required thermal ratings, as approved by the Architect.
- Outer Light: Clear Glass with Low-E coating on Side 2. Provide Tempered Glass where shown on Drawings and as required by local Codes and Ordinances.
- Air Chamber: Hermetically sealed space between panes, low-conductance spacer, desiccated butyl or polyisobutylene chamber sealant, Argon gas filled to minimum 90 percent initial fill.
- Inner Light: Clear Glass

Glaze fixed window units with removable glazing beads utilizing a closed cell foam or butyl tape.
- Thermal Performance: Minimum Winter U-Value of 0.25
- Solar Heat Gain Coefficient: Maximum SHGC of 0.41

Awning	Block Frame	Integral Nailing Fin
Sizes		
Standard Vent/Fixed	●	●
Standard Fixed Companion Sizes	●	●
Special Sizes	●	●
Performance[1]		
Meets or Exceeds AAMA/WDMA Ratings	AP-LC50 Hallmark Certified	AP-LC50 Hallmark Certified
Air Infiltration (cfm/ft² of frame @ 1.57 psf wind pressure)	0.05	0.05
Water Resistance	7.5 psf	7.5 psf
Design Pressure	50 psf	50 psf
Other Performance Criteria		
Forced Entry Resistance Level (Minimum Security Grade)[2]	40	40
Maximum Operating Force (lb) Initiate Motion/Maintain Motion	15/6	15/6

Large Awning	Block Frame	Integral Nailing Fin
Sizes		
Standard Vent/Fixed	●	●
Special Sizes	●	●
Performance[1]		
Meets or Exceeds AAMA/WDMA Ratings	AP-LC30 – AP-LC50 Hallmark Certified	AP-LC30 – AP-LC50 Hallmark Certified
Air Infiltration (cfm/ft² of frame @ 1.57 psf wind pressure)	0.05	0.05
Water Resistance	7.5 psf	7.5 psf
Design Pressure	30 - 50 psf	30 - 50 psf
Other Performance Criteria		
Forced Entry Resistance Level (Minimum Security Grade)[2]	40	40
Maximum Operating Force (lb) Initiate Motion/Maintain Motion	6/3	6/3

Sound Transmission Class and Outdoor-Indoor Transmission Class

Product	Frame Size Tested[3]	Glazing System			STC Rating	OITC Rating
		Overall Glazing Thickness	Exterior Glass Thickness	Interior Glass Thickness		
Awning, Vent	59-1/2" x 23-1/2"	11/16"	2.5mm	2.5mm	25	22
	59-1/2" x 23-1/2"	11/16"	3mm	5mm	32	28
	59-1/2" x 23-1/2"	11/16"	3mm	6mm Laminated	32	28
Awning, Fixed	59-1/2" x 47-1/2"	11/16"	3mm	3mm	27	23
	59-1/2" x 47-1/2"	11/16"	3mm	5mm	31	26
	59-1/2" x 47-1/2"	11/16"	3mm	6mm Laminated	32	27
	59-1/2" x 47-1/2"	11/16"	4mm	7mm Laminated	33	29

(1) See Design Data pages in this section for specific product performance class and grade values.

(2) The higher the level, the greater the product's ability to resist forced entry.

(3) ASTM E 1425 defines standard sizes for acoustical testing. Ratings achieved at that size are representative of all sizes of the same configuration.

Impervia® Awning Windows

Features and Options

	Block Frame	Integral Nailing Fin
Glazing		
Glazing Type		
Dual-pane Insulating Glass	S	S
Insulated Glass Options / Low-E Types		
Clear Insulating Glass (no Low-E coating)	S	S
Advanced Low-E Insulating Glass	O	O
SunDefense™ Low-E Insulating Glass	O	O
AdvancedComfort Low-E Insulating Glass	O	O
NaturalSun Low-E Insulating Glass	O	O
Additional Glass Options		
Annealed Glass	S	S
Tempered Glass	O	O
Noise reduction glass (3/5mm, 4/6mm combinations)	O	O
Noise reduction laminated glass (non-impact)	O	O
Tinted glass (Bronze, Gray, Green) Advanced Low-E	O	O
Obscure Glass[1]	O	O
Gas Fill / High Altitude		
Argon	S	S
High Altitude	O	O
High Altitude with argon	O	O
Exterior / Interior		
Powder-Coat White	S	S
Powder-Coat Tan, Brown, Black, or Morning Sky Gray	O	O
Dual-color (All Exterior Colors with White interior)	O	–
Hardware		
Match interior finish	S	S
Satin Nickel, Bright Brass or Oil-Rubbed Bronze	O	O
Sash Locks		
SureLock® System	S	S
Unison Lock System[2]	S	S
Screens		
Conventional Black Fiberglass	O	O
InView™ screens	O	O
Grilles		
Grilles-Between-the-Glass		
Traditional, Prairie, Top Row and Custom - Equally Divided	O	O

S = Standard; O = Optional; (–) = Not available

Impervia® Awning Windows

Combination Assemblies, Grilles

A combination is defined as an assembly formed by two or more separate windows or doors whose frames are mulled together utilizing a combination mullion or reinforcing mullion.

Below are available factory-assembled combinations. See the Combination section for requirements and limitations related to mulling various combinations plus configuration size range information.

2-Wide	3-Wide

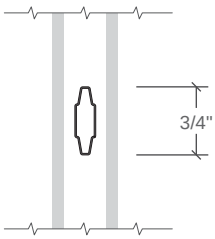
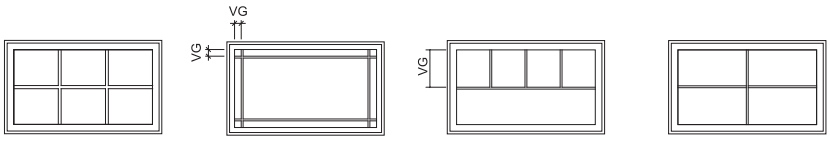
Grille Profiles

Grilles-Between-the-Glass



3/4" Contour

Grille Patterns



Traditional | 9-Lite Prairie | Top Row | Special

Standard corner lite dimension for Prairie patterns = 4" visible glass (VG).

(1) Standard visible glass to center line of separator bar dimension = 14" or half of total visible glass height, whichever is smaller.

Multiple rows are available up to 50% glass size.

Pattern availability may vary depending on size of unit.

Impervia® Awning Windows

Detailed Product Descriptions

Frame

- Frame is Duracast® fiberglass composite – five-layer pultruded fiberglass material [with optional foam insulation[1]], reinforced with a Pella® patented interlocking mat.
- Overall frame depth is 3-1/4".
- Nominal wall thickness of Duracast fiberglass composite members is .050" to .070" thick.
- Frame corners are mitered, joined and bonded with corner lock and injected polyurethane adhesive.
- Sill is fitted with weep valve assemblies.
- Jambs contain factory-drilled (counter-bored) installation screw holes on block frame and flush flange only.

Sash

- Sash is Duracast fiberglass composite – five-layer pultruded fiberglass material, reinforced with a Pella patented interlocking mat.
- All sash members have mitered corners bonded with corner lock and sealed with injected polyurethane adhesive.

Exterior / Interior

- Duracast fiberglass composite surfaces with powder-coat paint finish.
  - Color is [White] [Tan] [Brown] [Black] [Morning Sky Gray].

    - or -
  - Dual-color option [Tan] [Brown] [Black] [Morning Sky Gray] exterior with White interior[2].

Glazing System

- Quality float glass complying with ASTM C 1036.
- 11/16" insulating glass [awning: [annealed] [tempered]] [large awning: tempered] [obscure[3]] [clear] [[Advanced] [SunDefense™] [AdvancedComfort] [NaturalSun] Low-E coated, [with argon]]] [[bronze] [gray] [green] Advanced Low-E [with Argon]] sealed and bonded to sash.
- High altitude glazing [with argon] available.

Weatherstripping

Dual weatherstripping.

- Continuous, flexible ThermoPlastic Vulcanizate material in dual durometer design, compressed between frame and sash for positive seal on all four sides.
- Secondary ThermoPlastic Vulcanizate leaf-type weatherstrip between edge of sash and frame.

Hardware

- Roto operator assembly
  - Steel worm gear sash operator with hardened gears.
  - Operator base is zinc die cast with painted finish.
  - Operator linkage is 300 series stainless steel.
  - Exposed fasteners are stainless steel.
  - Hardware will exceed 1,000 hours salt spray exposure per ASTM B 117.
  - Hinge slide and hinge arms are [Awning: 300 series stainless steel] [Large Awning: wash hinge].
- Finish of integrated fold-away crank is [[baked enamel [White] [Brown] [Tan] [Matte Black] [Morning Sky Gray]] [Bright Brass] [Satin Nickel] [Oil-Rubbed Bronze].
- All vent units are available with operator located on the [Awning: left or right side as viewed from the exterior] [Large Awning: bottom center of the unit].
- SureLock® System – A single handle locking system operates positive-acting arms that reach out and pull the sash into a locked position: [Awning: one installed on units 29" and smaller frame width, two unison operating locks installed on units over 29" frame width] [Large Awning: one installed on units with frame heights 41" and less, two unison operating locks installed on units over 41" frame height].
- Lock handle finish is [[baked enamel [White] [Brown] [Tan] [Matte Black] [Morning Sky Gray]] [Bright Brass] [Satin Nickel] [Oil-Rubbed Bronze].

Optional Products

Screens

- Conventional Black Vinyl-coated 18/16 mesh fiberglass screen cloth complying with ASTM D 3656 and SMA 1201, set in aluminum frame fitted to inside of window, supplied complete with all necessary hardware.
- InView™ screens
  - Vinyl-coated 18/18 mesh fiberglass screen cloth complying with SMA 1201, set in aluminum frame fitted to inside of window, supplied complete with all necessary hardware.
  - Screen frame finish is baked enamel, color to match interior.

Grilles

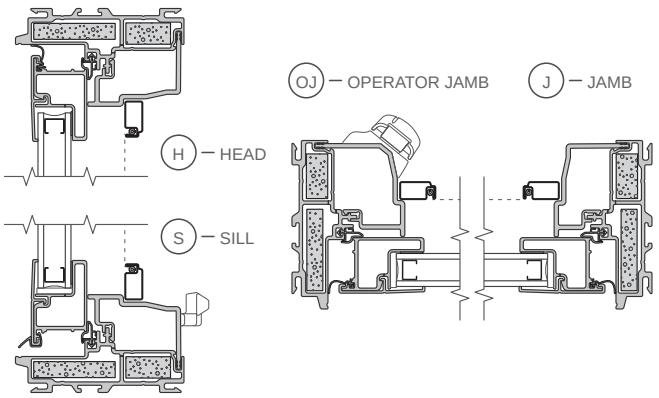
- Grilles-Between-the-Glass
  - Insulating glass contains 3/4" contoured aluminum grilles permanently installed between two panes of glass.
  - Grilles are factory prefinished [White] [Tan] [Brown] [Black] [Morning Sky Gray] to match interior and exterior finish.

Hardware

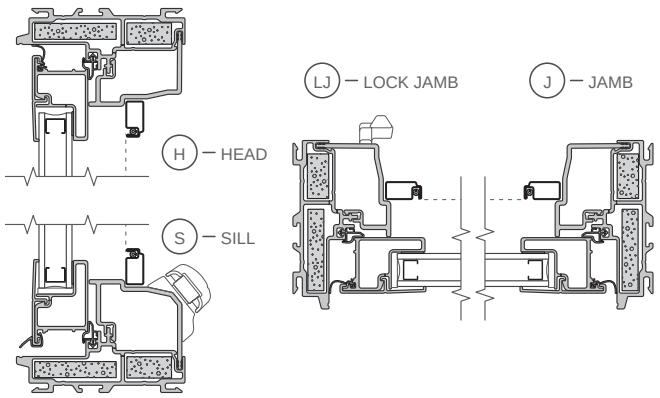
- Optional limited opening hardware available for vent units in stainless steel; nominal 3" opening.

Foam Insulation Inserts[1]

Awning



Large Awning



(1) Foam insulation inserts are not available with clear glazing.

(2) Dual-color finish is not available on products with integral nailing fin.

(3) Obscure glazing is not available when AdvancedComfort Low-E coated IG is specified.

Item Name	Aluminum Window, Horizontal Sliding, With Louver
Item Type	Aluminum Horizontal Sliding Window
Description	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
Manufacturer	SealCraft by Contour Windows (formerly Impact Windows)
Model	4100HS-FX Louver
Dimensions	Frame Depth: 2 1/2." Refer to the Design Guideline Drawings for rough opening dimensions.
Color	Match Manufacturer's Standard White color as approved by Marriott Representative.
Finish	Refer to Notes
Material Composition	Aluminum Extrusions: ASTM B221, 6063T-5 alloy.
CSI #	085113 - Aluminum Windows
Omniclass #	22-085113 Aluminum Windows
Grade	AAMA AAMA Performance-Class CW-35 minimum, Grade 50 (except where local conditions require higher performance grade)
Classification	AAMA CW (Commercial Window)
Fire/Smoke Rating	NA
Acoustical Performance	STC 31 minimum
Compressive Strength	NA
Structural Performance	Air Leakage (ASTM E283)-Maximum 0.37 CFM per sq./ft. of total exterior surface area, when tested at a static air pressure difference of 1.57 PSF minimum. Forced Entry Resistant -(ASTM F588) Performance Level 10. Impact Resistance-In jurisdictions where required, comply with IBC Section 1609.1.4
Thermal Performance	Entire Window Assembly & Components - Comply with CW classification and IECC
Operation	Manual sliding.
Best Practices	Recycled content of aluminum. Meet or exceed International Energy Code Conservation (IECC)
Quality Standards	AAMA/WDMA/CSA 101/I.S.2/A440-08 NAFS – North American Fenestration Standard/Specification for windows, doors, and skylights
Accessibility Compliance	ANSI A117.1 and ADA.
Water Sense	NA
Accessories	Operating Hardware-Manufacturer's standard sash lock, wheels, and sliding mechanism. Insect Screen-18 by 16 mesh of 0.013" diameter aluminum wire; formed or extruded aluminum frames and removable vinyl fabric-retainer spline. Assistive Window Activators - refer to specification.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Part of an Assembly	Y
Assembly Description	Assembly: Horizontal sliding window assembly with louver.
Warranty	Insulating glass warranty: 10 years. Refer to Notes for finish warranties.
Notes	Product Data Web Link: https://tinyurl.com/2n5ysyp5 Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty. Glazing shall be clear, insulated, low-e, fully-tempered where required by code. Low-e glass shall comply with the following: 1) Visible Light Transmittance (VLT): 70/ 2) Solar Heat Gain Coefficient (SHGC): 0.38; 3) Light to Solar Gain (LSG) Ratio: 1.84-1.85. Aluminum louvers to be furnished and installed glazed within integral master frame of window units where shown on Drawings. Louver free area to be coordinated with mechanical PTAC units supplied by Division 23. - Fixed Blade Angle: 42 degrees - Provide PTAC Collar - Provide 0.032-inch aluminum sheet blank-off panels with 1" insulation on each side of PTAC unit on rear side of louver. - Finish: Match Windows. Insect Screens: Provide removable insect screen panel for each moveable glazed sash. - Screen Fabric: 18 by 16 mesh of 0.013" diameter aluminum wire. Comply with FS-RRW-365, Type VII, except black anodized or "gun metal" coating on wire. - Screen Frame: Provide formed or extruded aluminum frames and removable vinyl fabric-retainer spline.

- Finish shall match window

SPECIAL INSTRUCTIONS

Design glass framing system to limit lateral deflections of glass edges to less than 1/175 of glass-edge length at design pressure based on AAMA/WDMA/CSA 101/I.S.2/A440-08, Uniform Load Deflection Test.
Operating sash in guest rooms to be located closest to center of room.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Aluminum Window, Horizontal Sliding, With Louver
Item Type	Aluminum Horizontal Sliding Window
Description	Guest Room Horizontal Sliding Window Units Above Louver in Integral Master Frame
Manufacturer	Wojan Window and Door Corporation
Model	M-85 Series Slider over Louver Series
Dimensions	Frame Depth: 2 1/2." Refer to the Design Guideline Drawings for rough opening dimensions.
Color	Match Manufacturer's Standard White color as approved by Marriott Representative.
Finish	Refer to Notes
Material Composition	Aluminum Extrusions: ASTM B221, 6063T-5 alloy.
CSI #	085113 - Aluminum Windows
Omniclass #	22-085113 Aluminum Windows
Grade	AAMA AAMA Performance-Class CW-35 minimum, Grade 50 (except where local conditions require higher performance grade)
Classification	AAMA CW (Commercial Window)
Fire/Smoke Rating	NA
Acoustical Performance	STC 31 minimum
Compressive Strength	NA
Structural Performance	Air Leakage (ASTM E283)-Maximum 0.37 CFM per sq./ft. of total exterior surface area, when tested at a static air pressure difference of 1.57 PSF minimum. Forced Entry Resistant -(ASTM F588) Performance Level 10. Impact Resistance-In jurisdictions where required, comply with IBC Section 1609.1.4
Thermal Performance	Entire Window Assembly & Components - Comply with CW classification and IECC
Operation	Manual sliding.
Best Practices	Recycled content of aluminum. Meet or exceed International Energy Code Conservation (IECC)
Quality Standards	AAMA/WDMA/CSA 101/I.S.2/A440-08 NAFS – North American Fenestration Standard/Specification for windows, doors, and skylights
Accessibility Compliance	ANSI A117.1 and ADA.
Water Sense	NA
Accessories	Operating Hardware-Manufacturer's standard sash lock, wheels, and sliding mechanism. Insect Screen-18 by 16 mesh of 0.013" diameter aluminum wire; formed or extruded aluminum frames and removable vinyl fabric-retainer spline. Assistive Window Activators - refer to specification.
Part of an Assembly	Y

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Assembly Description	Assembly: Horizontal sliding window assembly with louver.
Warranty	Insulating glass warranty: 10 years. Refer to Notes for finish warranties.
Notes	Product Data Web Link: https://www.wojan.com/wp-content/uploads/2022/02/BROCHURE__M-85__10-8-21.pdf Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty. Glazing shall be clear, insulated, low-e, fully-tempered where required by code. Low-e glass shall comply with the following: 1) Visible Light Transmittance (VLT): 70/ 2) Solar Heat Gain Coefficient (SHGC): 0.38; 3) Light to Solar Gain (LSG) Ratio: 1.84-1.85. Aluminum louvers to be furnished and installed glazed within integral master frame of window units where shown on Drawings. Louver free area to be coordinated with mechanical PTAC units supplied by Division 23. - Fixed Blade Angle: 42 degrees - Provide PTAC Collar - Provide 0.032-inch aluminum sheet blank-off panels with 1" insulation on each side of PTAC unit on rear side of louver. - Finish: Match Windows. Insect Screens: Provide removable insect screen panel for each moveable glazed sash. - Screen Fabric: 18 by 16 mesh of 0.013" diameter aluminum wire. Comply with FS-RRW-365, Type VII, except black anodized or "gun metal" coating on wire. - Screen Frame: Provide formed or extruded aluminum frames and removable vinyl fabric-retainer spline.

- Finish shall match window

SPECIAL INSTRUCTIONS

Design glass framing system to limit lateral deflections of glass edges to less than 1/175 of glass-edge length at design pressure based on AAMA/WDMA/CSA 101/I.S.2/A440-08, Uniform Load Deflection Test.
Operating sash in guest rooms to be located closest to center of room.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Fiberglass Window
Item Type	Fiberglass Horizontal Slider Window with louver
Description	Sliding fiberglass windows, with sills, trim, and closures. Manufacturer's standard sash lock, wheels, and sliding mechanism
Manufacturer	Pella Corporation
Model	Impervia
Dimensions	Frame depth: 3" Refer to the Design Guideline Drawings for other dimensions
Color	Standard White by Manufacturer
Finish	Painted (PVDF) fiberglass pultrusion
Material Composition	Frame and Sash Material: 5-layer, pultruded-fiberglass material, reinforced with interlocking mat.
CSI #	085413 - Fiberglass Windows
Omniclass #	22-085413 Fiberglass Windows
Grade	AAMA/WDMA 40
Classification	AAMA/WDMA Performance Class: LC (Light Commercial)
Acoustical Performance	STC 31 minimum.
Structural Performance	Uniform Structural Properties (ASTM E330): Pressure acting inward and outward. Window to be operable and maximum 0.4% permanent deformation, per member, when tested at a static air pressure difference of the following: AAMA/WDMA Class LC-40. Water Resistance (ASTM E547): No water penetration through window when tested under static pressure of 6.0 psf after 4 cycles of 5 minutes each, with water being applied at a rate of 5 gallons per hour per square foot. Air Leakage (ASTM E283): Maximum 0.25 CFM per sq./ft. of total exterior surface area, when tested at a static air pressure difference of 1.57 PSF minimum.
Thermal Performance	U-0.36 Manxiumum
Operation	Horizontal sliding.
Best Practices	Thermal performance complying with ASHRAE 90.1.
Quality Standards	ANSI/AAMA/WDMA 101/I.S.2/NAFS-02 “Voluntary Performance Specification for Windows, Skylights and Glass Doors”
Accessibility Compliance	Compliant with ADA / ANSI/ICC A117.1.
Accessories	Fiberglass louvers to be furnished and installed glazed within integral master frame of window units where shown on Drawings. Louver free area to be coordinated with mechanical PTAC units supplied by Division 23. Fixed Blade Angle: 42 degrees. Provide PTAC Collar. Provide 0.032 inch aluminum sheet

	blank-off panels with 1" insulation on each side of PTAC unit on rear side of louver. Finish: Match Windows. 18 by 16 mesh of 0.013" diameter aluminum wire; formed or extruded aluminum frames and removable vinyl fabric-retainer spline.
Finish Warranty	10 years
Size	Refer to the Design Guideline Drawings
Product	Impervia
Material Warranty	2 years
Warranty	10 years (Insulating glass)
Notes	Glazing: Insulated units consisting of 1/8" clear x 1/2" Argon x 1/8" Low-E. Safety glass complying with CPSC 16 CFR Part 1201.

SPECIAL INSTRUCTIONS

Insulating Glass: Manufacturer's standard Low "E2" units consisting of manufacturer's special design to conform to required thermal ratings, as approved by the Architect.
- Outer Light: Clear Glass with Low-E coating on Side 2. Provide Tempered Glass where shown on Drawings and as required by local Codes and Ordinances.
- Air Chamber: Hermetically sealed space between panes, low-conductance spacer, desiccated butyl or polyisobutylene chamber sealant, Argon gas filled to minimum 90 percent initial fill.
- Inner Light: Clear Glass

Glaze fixed window units with removable glazing beads utilizing a closed cell foam or butyl tape.
- Thermal Performance: Minimum Winter U-Value of 0.25
- Solar Heat Gain Coefficient: Maximum SHGC of 0.41

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Single-sliding doors.
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Besam (Assa Abloy)
Model	Unislide OHC Series, Single-Slide - Unislide OC-S (Exterior) / Type 310, Unislide OC-A" with Access Control Package (Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the BEA Wizard Threshold" by Besam. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the “STAN-GUARD Threshold Sensor” by Stanley. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Single-sliding doors.
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Besam (Assa Abloy)
Model	Unislide OHC Series, Single-Slide - Unislide OC-S (Exterior) / Type 310, Unislide OC-A" with Access Control Package (Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail
Color	To Match PPG Bone White, refer to Notes
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination Activation Motion Sensor/Safety Presence Sensor.

	Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing

Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the BEA Wizard Threshold" by Besam. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Single-sliding doors
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Horton Automatics
Model	Series 2003 Belt Drive, Single-Slide - Type 310, Model SO-SX,SX-SO (Exterior) / Type 310, Model SO-SX,SX-SO with optional muntin(Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail
Color	Custom color to match Aluminum Window color and as approved by the Marriott Representative
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the "Optional Sensor with added threshold scan" by Horton. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Glazed Storefront & Entrance Doors
Item Type	Aluminum-Framed Storefront system, thermally-broken
Description	Interior and Exterior Aluminum Storefront Framing, Doors, Door Frames, Lights, and Fixed Windows
Manufacturer	EFCO
Model	Storefront: Series 403, Outside Glazed/Set; Doors: with D500 Wide / D300 Medium/ or D200 Narrow Stile Entrance Doors
Dimensions	Frame: 2" sightline x 4-1/2" depth; Refer to Design Guideline Drawings for Door & Assembly Dimensions
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum extrusions, complying with ASTM B221, 6063-T6 alloy and temper. Glazing as specified below.
CSI #	084113 - Aluminum-Framed Entrances and Storefronts
Omniclass #	22-084113 Aluminum-Framed Entrances and Storefronts
Acoustical Performance	Enhanced OITC and STC Performance available. Comply with the Owner's requirements according to project conditions.
Structural Performance	Design for windload of 30 PSF with maximum deflection in both vertical and horizontal mullions not to exceed 1/175 of span. Water Penetration: ASTM E331 no water penetration at a test pressure of 6.24 PSF. Air Leakage per ASTM E283: Fixed window walls maximum of 0.06 CFM per sq. ft. of total exterior surface areas.
Thermal Performance	System U-factor shall comply with requirements of Authorities Having Jurisdiction.
Operation	NA
Best Practices	Recycled content of aluminum.
Quality Standards	AAMA “Storefront and Entrance Manual”. ANSI/AAMA 101 "Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors"
Accessibility Compliance	Comply with ANSI A117.1 and ADA.
Accessories	Entrance door hardware shall be supplied with doors as follows: Continuous Hinges, 780-112 HD, Hager, Kynar finish, color to match door. Push/Pull, Style “CO-12” by Kawneer, or approved substitution by other listed manufacturer, No. 26 Finish. Closers, surface mounted type, LCN 4041-CUSH, cover to be color to match door. Weather Stripping (3 sides).

	Bottom Sweep .Handicapped Threshold, clear aluminum mill finish. Provide construction cylinder and replace with final cylinder specified in Door Hardware Section within Building Product Manual. Final cylinders, panic devices, electric strikes and card readers by Door Hardware Section within Building Product Manual.
Part of an Assembly	N
Warranty	5 years (Structural). For Finish warranties, refer to notes
Notes	Product Data Web Link: https://tinyurl.com/yy6fpcdf Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Insulating Glass complying with IGCC requirements and as follows: - Total Thickness: 1” - Thickness of Each Pane: 1/4" - Air Space Thickness: 1/2" Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Low-e coating shall be applied to No. 2 surface. Minimum insulated glass assembly performance: - Visible Light Transmittance (VLT): 70 - Solar Heat Gain Coefficient (SHGC): 0.38 - Light to Solar Gain (LSG) Ratio: 1.85 Sealing System: Manufacturer's Standard Dual Seal as follows: - Desiccant: Molecular Sieve or Silica Gel or Blend of Both. - Spacer Material: Manufacturer's Standard Metal with Anodized Finish. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

Insulating Glass complying with IGCC requirements and as follows: - Total Thickness: 1” - Thickness of Each Pane: 1/4" - Air Space Thickness: 1/2" Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Low-e coating shall be applied to No. 2 surface. Minimum insulated glass assembly performance: - Visible Light Transmittance (VLT): 70 - Solar Heat Gain Coefficient (SHGC): 0.38 - Light to Solar Gain (LSG) Ratio: 1.85 Sealing System: Manufacturer's Standard Dual Seal as follows: - Desiccant: Molecular Sieve or Silica Gel or Blend of Both. - Spacer Material: Manufacturer's Standard Metal with Anodized Finish. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.11

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Glazed Storefront & Entrance Doors
Item Type	Aluminum-Framed Storefront system, thermally-broken
Description	Interior and Exterior Aluminum Storefront Framing, Doors, Door Frames, Lights, and Fixed Windows
Manufacturer	Oldcastle Building Envelope
Model	Storefront: Series 3000 Front Set; Doors: WS-500 Wide / MS-375 Medium / or NS-212 Narrow Stile Entrance Doors
Dimensions	Frame: 2" sightline x 4-1/2" depth; Refer to Design Guideline Drawings for Door & Assembly Dimensions
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum extrusions, complying with ASTM B221, 6063-T6 alloy and temper. Glazing as specified below
CSI #	084113 - Aluminum-Framed Entrances and Storefronts
Omniclass #	22-084113 Aluminum-Framed Entrances and Storefronts
Acoustical Performance	Enhanced OITC and STC Performance available. Comply with the Owner's requirements according to project conditions.
Structural Performance	Design for windload of 30 PSF with maximum deflection in both vertical and horizontal mullions not to exceed 1/175 of span. Water Penetration: ASTM E331 no water penetration at a test pressure of 6.24 PSF. Air Leakage per ASTM E283: Fixed window walls maximum of 0.06 CFM per sq. ft. of total exterior surface areas.
Thermal Performance	System U-factor shall comply with requirements of Authorities Having Jurisdiction.
Operation	NA
Best Practices	Recycled content of aluminum.
Quality Standards	AAMA “Storefront and Entrance Manual”. ANSI/AAMA 101 "Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors"
Accessibility Compliance	Comply with ANSI A117.1 and ADA.
Accessories	Entrance door hardware shall be supplied with doors as follows: Continuous Hinges, 780-112 HD, Hager, Kynar finish, color to match door. Push/Pull, Style “CO-12” by Kawneer, or approved substitution by other listed manufacturer, No. 26 Finish. Closers, surface mounted type, LCN 4041-CUSH, cover to be color to match door. Weather Stripping (3 sides). Bottom Sweep .Handicapped Threshold, clear

	aluminum mill finish. Provide construction cylinder and replace with final cylinder specified in Door Hardware Section within Building Product Manual. Final cylinders, panic devices, electric strikes and card readers by Door Hardware Section within Building Product Manual.
Part of an Assembly	N
Warranty	5 years (Structural). For Finish warranties, refer to notes
Notes	Product Data Web Link: https://tinyurl.com/5e7sw4bd Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Insulating Glass complying with IGCC requirements and as follows: - Total Thickness: 1” - Thickness of Each Pane: 1/4" - Air Space Thickness: 1/2" Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Low-e coating shall be applied to No. 2 surface. Where required, provide safety glass complying with CPSC 16 CFR Part 1201.

Insulating Glass complying with IGCC requirements and as follows:
- Total Thickness: 1”
- Thickness of Each Pane: 1/4"
- Air Space Thickness: 1/2"
Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201.
Low-e coating shall be applied to No. 2 surface.
Minimum insulated glass assembly performance:
- Visible Light Transmittance (VLT): 70
- Solar Heat Gain Coefficient (SHGC): 0.38
- Light to Solar Gain (LSG) Ratio: 1.85
Sealing System: Manufacturer's Standard Dual Seal as follows:
- Desiccant: Molecular Sieve or Silica Gel or Blend of Both.
- Spacer Material: Manufacturer's Standard Metal with Anodized Finish.
Finish Options:
1. Powder Coat Systems:
a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4).
b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon).
2. Liquid-applied systems:
a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar).
b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar).
3. Anodized Finish Systems:
a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Glazed Storefront & Entrance doors
Item Type	Aluminum-Framed Storefront system, thermally-broken
Description	Interior and Exterior Aluminum Storefront Framing, Doors, Door Frames, Lights, and Fixed Windows
Manufacturer	YKK-AP
Model	Storefront: YES-45-TU, Front Glazed/Set; Doors: 50D Wide/ 30D Medium / or 20D Narrow Stile Entrance Doors
Dimensions	Frame: 2" sightline x 4-1/2" depth; Refer to Design Guideline Drawings for Door & Assembly Dimensions
Color	To Match PPG Bone White, refer to Notes
Finish	Refer to Notes
Material Composition	Aluminum extrusions, complying with ASTM B221, 6063-T6 alloy and temper. Glazing as specified below.
CSI #	084113 - Aluminum-Framed Entrances and Storefronts
Omniclass #	22-084113 Aluminum-Framed Entrances and Storefronts
Acoustical Performance	Enhanced OITC and STC Performance available. Comply with the Owner's requirements according to project conditions.
Structural Performance	Design for windload of 30 PSF with maximum deflection in both vertical and horizontal mullions not to exceed 1/175 of span. Water Penetration: ASTM E331 no water penetration at a test pressure of 6.24 PSF. Air Leakage per ASTM E283: Fixed window walls maximum of 0.06 CFM per sq. ft. of total exterior surface areas.
Thermal Performance	System U-factor shall comply with requirements of Authorities Having Jurisdiction.
Operation	NA
Best Practices	Recycled content of aluminum.
Quality Standards	AAMA “Storefront and Entrance Manual”. ANSI/AAMA 101 "Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors"
Accessibility Compliance	Comply with ANSI A117.1 and ADA.
Accessories	Entrance door hardware shall be supplied with doors as follows: Continuous Hinges, 780-112 HD, Hager, Kynar finish, color to match door. Push/Pull, Style “CO-12” by Kawneer, or approved substitution by other listed manufacturer, No. 26 Finish. Closers, surface mounted type, LCN 4041-CUSH, cover to be color to match door. Weather Stripping (3 sides). Bottom Sweep .Handicapped Threshold, clear aluminum mill finish. Provide construction cylinder and replace with final cylinder specified in Door Hardware Section within Building Product Manual. Final cylinders, panic devices, electric strikes and card readers by Door Hardware Section within Building Product Manual.
Part of an Assembly	N
Warranty	5 years (Structural). For Finish warranties, refer to notes
Notes	Product Data Web Link: https://www.ykkap.com/commercial/productguide/storefront/yes45tufront/product-

data-sheet/
Where required, provide safety glass complying with CPSC 16 CFR Part 1201.

Insulating Glass complying with IGCC requirements and as follows:
- Total Thickness: 1”
- Thickness of Each Pane: 1/4"
- Air Space Thickness: 1/2"
Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201.
Low-e coating shall be applied to No. 2 surface.
Minimum insulated glass assembly performance:
- Visible Light Transmittance (VLT): 70
- Solar Heat Gain Coefficient (SHGC): 0.38
- Light to Solar Gain (LSG) Ratio: 1.85
Sealing System: Manufacturer's Standard Dual Seal as follows:
- Desiccant: Molecular Sieve or Silica Gel or Blend of Both.
- Spacer Material: Manufacturer's Standard Metal with Anodized Finish.
Finish Options & Colors:
1. Powder Coat Systems:
a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4).
b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon).
2. Liquid-applied systems:
a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar).
b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar).
3. Anodized Finish Systems:
a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Exterior Glazing
Item Type	Coated Low Emissitivity Glass
Description	1/4", Condition C (other coated glass), Type I (transparent glass, flat), Class I (clear), Quality q3 (glazing select), with coating. Low E Coating: Side [2] [3] on insulated units.
Manufacturer	AGC Glass Company North America
Model	Comfort Select 40
Dimensions	Refer to Design Guideline Drawings
Color	Clear
CSI #	088000 - Glazing
Omniclass #	22-088000
Quality Standards	ASTM C1036 “Standard Specification for Flat Glass”; "GANA Glazing Manual"
Glass Type	III
Warranty	A. General: Warranties shall be in addition to, and not a limitation of, other rights the Owner may have under the Contract Documents. B. All material shall be free from manufacturer defects and installation workmanship. Any material or workmanship judged to be defective shall be replaced at no cost to the Owner. C. Insulating glass units shall be jointly guaranteed for a period of ten (10) years by the manufacturer and installer against obstruction of vision between interior glass surfaces caused by failure of the hermetic seal. Units damaged during guarantee period shall be replaced at no cost to the Owner.
Notes	1) Visible Light Transmittance (VLT): 72 2) Solar Heat Gain Coefficient (SHGC): 0.40 3) Light to Solar Gain (LSG) Ratio: 1.83

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Exterior Glazing
Item Type	Sealed Insulating Glass Units
Description	Preassembled units consisting of organically sealed panes of glass enclosing a hermetically sealed dehydrated air space and complying with ASTM E2190 for performance classification indicated as well as with other requirements specified for glass characteristics, air, space, sealing system, sealant, space material, and desiccants.
Manufacturer	AGC Glass Company North America
Model	1" Clear Insulating
Dimensions	1" thick, Refer to Design Guideline Drawings
Color	Clear
CSI #	088000 - Glazing
Omniclass #	22-088000
Quality Standards	ASTM C1036 “Standard Specification for Flat Glass”; "GANA Glazing Manual"; ASTM E2190 “Standard Specification for Insulating Glass Unit Performance and Evaluation”
Warranty	A. General: Warranties shall be in addition to, and not a limitation of, other rights the Owner may have under the Contract Documents. B. All material shall be free from manufacturer defects and installation workmanship. Any material or workmanship judged to be defective shall be replaced at no cost to the Owner. C. Insulating glass units shall be jointly guaranteed for a period of ten (10) years by the manufacturer and installer against obstruction of vision between interior glass surfaces caused by failure of the hermetic seal. Units damaged during guarantee period shall be replaced at no cost to the Owner.
Notes	Total Thickness: 1” Thickness of Each Pane: 1/4" Air Space Thickness: 1/2" Minimum Assembly U-Value 0.42 Exterior Pane of Glass: Glass Type [I] [or] [II], tempered in locations shown on Drawings Interior Pane of Glass: Glass [I] [or] [III], tempered in locations shown on Drawings. Sealing System: Manufacturer's Standard Dual Seal. Desiccant: Manufacturer's Standard - Either Molecular Sieve or Silica Gel or Blend of Both. Spacer Material: Manufacturer's Standard Metal, with match assembly frame finish

SPECIAL INSTRUCTIONS

Sealing System:

1) Spacer Material: Thermal Plastic Spacer (TPS), IGMAC approved low-conductance spacer bar material with

integrated desiccant.
2) Approved Manufacturers:
(a) “TPS Warm edge spacer”; Traco, A Division of Kawneer, a part of Alcoa Building & Construction Systems (800-837-7002)
(b) “SureSeal TPS Spacer Bar”; Virginia Glass and Mirror (800-368-3011)

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Window Operators
Item Type	Window Actuator
Description	Actuators with hand crank and other features which enable window system to operate within ADAAG, UFAS, and ANSI A117.1 standards. Actuator device to operate vertical or horizontal sliding windows.
Manufacturer	Southwest Home Products LLC
Model	Window Ease Window Actuator
Finish	Cover Finish: Match window color. Standard cover corners and controls shall be black.
CSI #	087516 - Window Operators
Omniclass #	22-087516
Accessories	Side cover closures for surface (wall) mounting, shallow jamb mounting or center ganged or mulled window trim. Special mounting hardware for ganged or mulled window. Oversize window kit. Heavy duty drive for windows over 35lbs and up to 55lbs operating force. Alternative crank handles. Custom (non-standard) sash or chassis brackets and adapters. Crank or latch control extension(s) kits.
Warranty	Furnish a written guarantee which shall cover the periods stated below from and after the completion of the building and its acceptance by the Owner. Warranty to cover system installation and all components required to actuate windows. In event of failure, warranty shall provide for replacement parts, removal, installation, and repair. For a period of one (1) year after final acceptance by the Owner. Hardware failing to comply with warranty shall be removed and replaced with new material including labor at no cost to Owner.
Notes	Manual Hand Operation [Jamb Mounted] [Sill Mounted] Technical features: 1. Actuator maintains inherent operating range of window. 2. All actuator control functions from one location. 3. Internal balance mechanism to ensure tight weather gasket closure. 4. Emergency escape and rescue opening requirement in eight crank revolutions or less. 5. Synchronous two sided pull for jam resistant operation. 6. Clutching or power disengagement capability shall prevent damage to window or window actuator due to occasional excessive operational force. 7. "Free wheeling" emergency egress feature to ensure compliance with Life Safety Code 101. 8. Latching feature capable of infinite number of latched open window positions.

IMAGE NOT AVAILABLE

9. Actuator shall not require routine maintenance and shall essentially be self adjusting and maintenance free.

Materials:

1. All parts to be corrosion resistant.
2. Bearings: Self lubricating ball bearings.

SPECIAL INSTRUCTIONS

Special Cover finishes available: Special powder coating, high solid paint, anodized available. Standard covers are powder coated bronze or white. Standard cover corners and controls are black.

Item Name	Exterior insulation and finish system (EIFS), water-drainage
Item Type	Water-drainage, hydrophobic
Description	Non-structural, insulated composite cladding system
Manufacturer	BASF (Senergy)
Model	Senturion II
Color	Benjamin Moore "Weimaraner" No. AF-155
Finish	Dirt Pick-Up Resistant (DPR)
Material Composition	Silicone-based finish coat, polymermodified basecoat, polymer reinforcing mesh, polystyrene insulation board.
CSI #	072419 - Exterior Insulation and Finish Systems
Omniclass #	22-072419 Exterior Insulation and Finish Systems
Fire/Smoke Rating	NFPA 285: Passes
Thermal Performance	R-10 continuous insulation
Best Practices	ASHRAE 90.1 compliance for continuous insulation.
Quality Standards	ANSI/EIMA American National Standard for Exterior Insulation & Finish Systems (EIFS)
Accessories	Per manufacturer. Refer to Special Instructions. 3/4" PB Control Joint; 1-1/4" Reveal Expansion Joint.
Texture	Fine
Warranty	Manufacturer System Warranty: 10 years. High-Performance Color Warranty: 6 years. Installer Warranty: 3 years.
Notes	Acceptable Manufacturers: Senergy div. of BASF Wall Systems; Customer Service; 800-221-9255; https://www.basf.com/us/en/products/General-Business-Topics/senergy-wall-systems-home/senergy-stucco-eifs-ci-wall-systems.html Dryvit Systems; Bob Dazel; bob.dazel@dryvit.com; (734) 276-0404; www.dryvit.com Master Wall Incorporated; Grant Smithwick; 800-755-0825; https://masterwall.com/ Parex USA; Randy Campbell; randy.campbell@parexusa.com; (877) 547-8822; www.parexusa.com Sto Corporation; Customer Service; 888-786-3437; https://www.stocorp.com/

SPECIAL INSTRUCTIONS

1. EIFS Manufacturer’s Air/Water-Resistive Barrier Coating and compatible wall penetration Flashing Treatment to be used throughout and behind all cladding material areas.
2. Provide EIFS High Impact Mesh Assembly for lower 8’-0” of wall areas at grade. Provide Ultra-High Impact Mesh Assembly for
High Impact Areas.

3. Coordinate for minimum exterior continuous insulation thickness / R-Value requirements in accordance with adopted energy code requirements for all cladding areas.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Exterior insulation and finish system (EIFS), water-drainage
Item Type	Water-drainage, hydrophobic
Description	Non-structural, insulated composite cladding system
Manufacturer	Parex USA
Model	Standard Watermaster CI
Color	NAC 54374 Benjamin Moore "Weimaraner" AF-155
Finish	Dirt Pick-Up Resistant (DPR)
Material Composition	Silicone-based finish coat, polymermodified basecoat, polymer reinforcing mesh, polystyrene insulation board.
CSI #	072419 - Exterior Insulation and Finish Systems
Omniclass #	22-072419 Exterior Insulation and Finish Systems
Fire/Smoke Rating	NFPA 285: Passes
Thermal Performance	R-10 continuous insulation
Best Practices	ASHRAE 90.1 compliance for continuous insulation.
Quality Standards	ANSI/EIMA American National Standard for Exterior Insulation & Finish Systems (EIFS)
Accessories	Per manufacturer. Refer to Special Instructions. 3/4" PB Control Joint; 1-1/4" Reveal Expansion Joint.
Texture	Sand Fine
Warranty	Manufacturer System Warranty: 10 years. High-Performance Color Warranty: 6 years. Installer Warranty: 3 years.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Exterior Insulation and Finish System (EIFS) with Moisture Drainage
Item Type	Building Exterior Envelope Solution
Description	Non-structural, insulated composite cladding system
Manufacturer	Dryvit Systems, Tremco CPG Inc.
Model	“Outsulation Plus MD” EIFS with Moisture Drainage
Color	MATP 08 2745 - White Diamond
Finish	Hydrophobic (HDP)
CSI #	072419 - Exterior Insulation and Finish Systems
Omniclass #	22-072419 Exterior Insulation and Finish Systems
Accessories	Per manufacturer. Refer to Special Instructions. 3/4" PB Control Joint; 1-1/4" Reveal Expansion Joint.
Texture	Lymestone HDP
Notes	Marriott Minimum Design Guidelines: Coordinate EIFS manufacturer’s system, products, finishes and warranty criteria in accordance with requirements outlined in Marriott Supplemental Product Information document, current Prototype Drawings, Design Guidelines, and this Building Product Manual (BPM). Provide high performance colorant for all non-EIFS manufacturer / special colors as required to comply with 6-year min. UV fade resistance warranty. Coordinate for minimum exterior continuous insulation thickness / R-value criteria in accordance with local adopted energy code requirements and/or energy efficiency design objectives. Product Data Weblink: https://tinyurl.com/536ywndm

SPECIAL INSTRUCTIONS

Based on Color, Finish and Textured referenced above, specify and install in strict accordance with EIFS manufacturer's current supporting documentation such as Data Sheets, Specifications, Details and Application Instructions.

New Build - Generation 5 - 112 Key
TownePlace Suites New Build 112K Building Site +

EEF-003-STO_BEIGE

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Exterior Insulation and Finish System (EIFS) with Moisture Drainage
Item Type	Building Exterior Envelope Solution
Description	Non-structural, insulated composite cladding system
Manufacturer	Sto Corp
Model	StoTherm CI
Color	NA17-0037 White Diamond
Finish	StoEssence DPR (Dirt Pickup Resistant), Stolit Lotusan Limestone
CSI #	072419 - Exterior Insulation and Finish Systems
Omniclass #	22-072419 Exterior Insulation and Finish Systems
Accessories	Per manufacturer. Refer to Special Instructions. 3/4" PB Control Joint ; 1-1/4" Reveal Expansion Joint.
Texture	Stolit Lotusan Limestone
Notes	Marriott Minimum Design Guidelines: Coordinate EIFS manufacturer's system, products, finishes and warranty criteria in accordance with requirements outlined in Marriott Supplemental Product Information document, current Prototype Drawings, Design Guidelines, and this Building Product Manual (BPM). Provide high performance colorant for all non-EIFS manufacturer / special colors as required to comply with 6-year min. UV fade resistance warranty. Coordinate for minimum exterior continuous insulation thickness / R-value criteria in accordance with local adopted energy code requirements and/or energy efficiency design objectives. Product Data Web link: https://tinyurl.com/y3vap638

SPECIAL INSTRUCTIONS

Based on Color, Finish and Textured referenced above, specify and install in strict accordance with EIFS manufacturer's current supporting documentation such as Data Sheets, Specifications, Details and Application Instructions.

Item Name	Exterior insulation and finish system (EIFS), water-drainage
Item Type	Water-drainage, hydrophobic
Description	Non-structural, insulated composite cladding system
Manufacturer	BASF (Senergy)
Model	Senturion II
Dimensions	NA
Color	Benjamin Moore "Manor Blue" No. 1627 (CLR13414)
Finish	Hydrophobic (HDP)
Material Composition	Silicone-based finish coat, polymermodified basecoat, polymer reinforcing mesh, polystyrene insulation board.
CSI #	072419 - Exterior Insulation and Finish Systems
Omniclass #	22-072419 Exterior Insulation and Finish Systems
Fire/Smoke Rating	NFPA 285: Passes
Thermal Performance	R-10 continuous insulation
Best Practices	ASHRAE 90.1 compliance for continuous insulation.
Quality Standards	ANSI/EIMA American National Standard for Exterior Insulation & Finish Systems (EIFS)
Accessories	Per manufacturer. Refer to Special Instructions. 3/4" PB Control Joint; 1-1/4" Reveal Expansion Joint
Texture	Fine
Warranty	Manufacturer System Warranty: 10 years. High-Performance Color Warranty: 6 years. Installer Warranty: 3 years.
Notes	Acceptable Manufacturers: Senergy div. of BASF Wall Systems; Customer Service; 800-221-9255; https://www.basf.com/us/en/products/General-Business-Topics/senergy-wall-systems-home/senergy-stucco-eifs-ci-wall-systems.html Dryvit Systems; Bob Dazel; bob.dazel@dryvit.com; (734) 276-0404; www.dryvit.com Master Wall Incorporated; Grant Smithwick; 800-755-0825; https://masterwall.com/ Parex USA; Randy Campbell; randy.campbell@parexusa.com; (877) 547-8822; www.parexusa.com Sto Corporation; Customer Service; 888-786-3437; https://www.stocorp.com/

SPECIAL INSTRUCTIONS

1. EIFS Manufacturer’s Air/Water-Resistive Barrier Coating and compatible wall penetration Flashing Treatment to be used throughout and behind all cladding material areas.
2. Provide EIFS High Impact Mesh Assembly for lower 8’-0” of wall areas at grade. Provide Ultra-High Impact Mesh

Assembly for High Impact Areas.
3. Coordinate for minimum exterior continuous insulation thickness / R-Value requirements in accordance with adopted energy code requirements for all cladding areas.

1. EIFS Manufacturer’s Air/Water-Resistive Barrier Coating and compatible wall penetration Flashing Treatment to be used throughout and behind all cladding material areas.
2. Provide EIFS High Impact Mesh Assembly for lower 8’-0” of wall areas at grade. Provide Ultra-High Impact Mesh Assembly for High Impact Areas.
3. Coordinate for minimum exterior continuous insulation thickness / R-Value requirements in accordance with adopted energy code requirements for all cladding areas.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Exterior insulation and finish system (EIFS), water-drainage
Item Type	Water-drainage, hydrophobic
Description	Non-structural, insulated composite cladding system
Manufacturer	Parex USA
Model	Standard Watermaster CI
Dimensions	NA
Color	31193; Benjamin Moore "November Rain" No. 2142-60 (CLR13415)
Finish	Hydrophobic (HDP)
Material Composition	Silicone-based finish coat, polymermodified basecoat, polymer reinforcing mesh, polystyrene insulation board.
CSI #	072419 - Exterior Insulation and Finish Systems
Omniclass #	22-072419 Exterior Insulation and Finish Systems
Fire/Smoke Rating	NFPA 285: Passes
Thermal Performance	R-10 continuous insulation
Best Practices	ASHRAE 90.1 compliance for continuous insulation.
Quality Standards	ANSI/EIMA American National Standard for Exterior Insulation & Finish Systems (EIFS)
Accessories	Per manufacturer. Refer to Special Instructions. 3/4" PB Control Joint; 1-1/4" Reveal Expansion Joint
Texture	Sand Fine
Warranty	Manufacturer System Warranty: 10 years. High-Performance Color Warranty: 6 years. Installer Warranty: 3 years.
Notes	Acceptable Manufacturers: Senergy div. of BASF Wall Systems; Customer Service; 800-221-9255; https://www.basf.com/us/en/products/General-Business-Topics/senergy-wall-systems-home/senergy-stucco-eifs-ci-wall-systems.html Dryvit Systems; Bob Dazel; bob.dazel@dryvit.com; (734) 276-0404; www.dryvit.com Master Wall Incorporated; Grant Smithwick; 800-755-0825; https://masterwall.com/ Parex USA; Randy Campbell; randy.campbell@parexusa.com; (877) 547-8822; www.parexusa.com Sto Corporation; Customer Service; 888-786-3437; https://www.stocorp.com/

New Build - Generation 5 - 112 Key
TownePlace Suites New Build 112K Building Site +

EWP-001-NI_BEIGE

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Wall panel, fiber-cement
Item Type	Fiber cement board siding
Description	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
Manufacturer	Nichiha
Model	IIlumination Designer Series AWP 1818
Dimensions	17 " H x 60" L , 5/8" (16mm) thick, without score. Horizontal installation.
Color	Carriage Red (BMCW 250)
Finish	Smooth
Material Composition	Fiberglass reinforced concrete panels, through-colored with UV-stable pigments.
CSI #	07 46 46 - Fiber Cement Siding
Omniclass #	22-074646 Fiber Cement Siding
Fire/Smoke Rating	ASTM E 84, Class A
Structural Performance	Flexural Strength (ASTM C1185) : 1850 length direction; 2500 transverse direction of sheet.
Thermal Performance	Wall system u-factor shall comply with requirements of authorities having jurisdiction.
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Non-Asbestos Fiber-Cement Sheets"
Accessories	1) Manufactured Corners with 3-1/2” returns in matching colors. 2) Aluminum trim to be painted per finish schedule to match adjacent color(s): Outside corners (Corner Key, Open Outside Corner), vertical joints (Bead Reveal, H-Mold), terminations (J-Mold, L-Mold). 3) Flashing System: Manufacturers Starter, Compression Joint, Overhang. 4) Panels profiled along all four edges, such that both horizontal and vertical joints between the installed panels are ship-lapped. 5) Factory-applied sealant gasket added to top and right panel edges; all joints contain a factory sealant.
Thickness	16 mm
Texture/Luster	Smooth
Lead Time	10 weeks
Warranty	30 years
Notes	Review wall panels which are manufactured in metric sizes to coordinate with imperial (feet & inches) dimensions of structure. Pay particular attention to window sizes.

NICHIHA ARCHITECTURAL WALL PANELS

DESIGN REVIEW GUIDE

AWP 1818
AWP 3030 - HORIZONTAL
AWP 3030 - VERTICAL

March 2021

NICHIHA fiber cement

AWP DESIGN GUIDE

TABLE OF CONTENTS

NICHIHA RAINSCREEN 3

PRODUCTS 4

PRODUCT PARTICULARS 5

PLANNING AND LAYOUT 6

7 CONTINUOUS INSULATION

8 ARCHITECTURAL LAYOUT

10 HORIZONTAL REQUIREMENTS

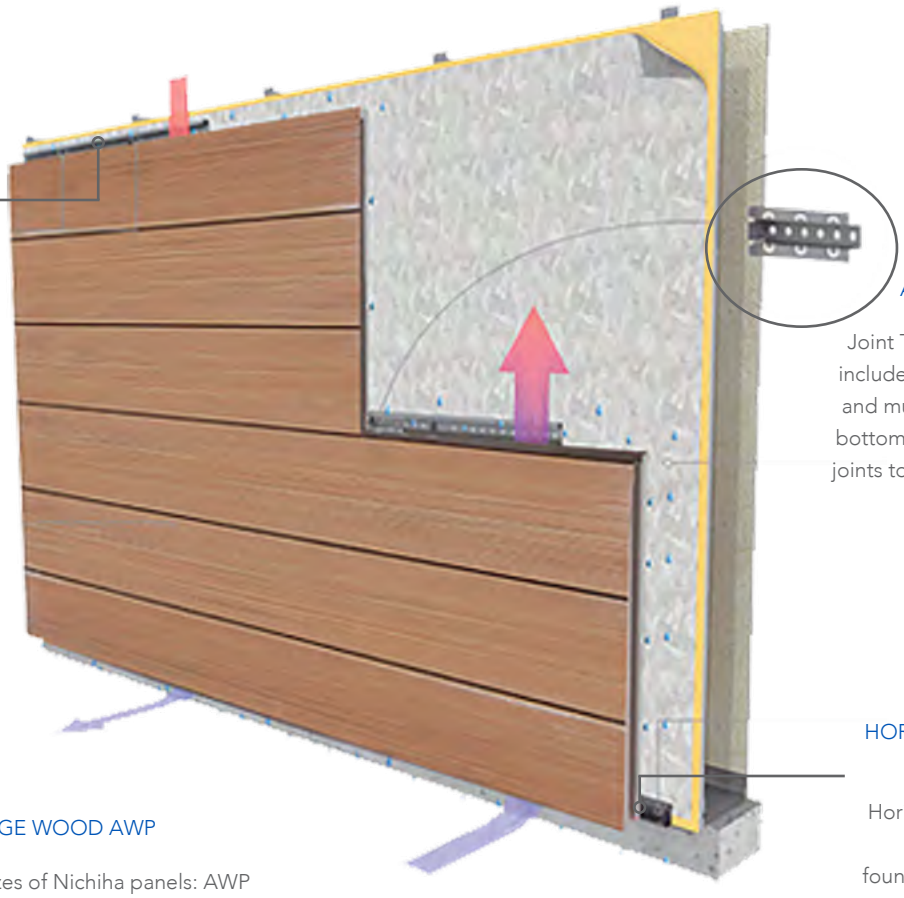
12 VERTICAL REQUIREMENTS

14 TECHNICAL REQUIREMENTS

Always install products in accordance with the latest installation guidelines and all applicable building codes and other laws, rules, regulations and ordinances. Review all installation instructions and other applicable product documents before installation. This design guide does not include KuraStone: Stacked Stone or Ledge Stone products.

THE NICHIHA RAINSCREEN

Moisture intrusion in a wall system can be the cause of building defects, as well as health ailments for the building's occupants, making rainscreens a very important tool in water mitigation. Rather than attacking the symptoms of moisture intrusion, rainscreens tackle the source – the forces that drive water into the building shell. Nichiha's concealed installation system creates a 10mm (3/8") drainage and ventilation plane behind our panels.



ULTIMATE CLIPS

Ultimate Clips sit on the panel shiplaps, securing AWP to the wall and distributing dead loads to the structure.

JOINT TAB ATTACHMENT

Joint Tab Attachments are included with Ultimate Clips and must be secured at the bottom of AWP 1818 vertical joints to support panel lateral stability.

VINTAGE WOOD AWP

There are two sizes of Nichiha panels: AWP 1818 and 3030. See next page for information on product dimensions.

HORIZONTAL STARTER TRACK

Horizontal Starter Track serves as the foundational support for the AWP system while also providing faster and greater ease of installation.

THE PRODUCTS

Before you jump into the design process, we recommend taking a minute to familiarize yourself with the dimensions of Nichiha's family of Architectural Wall Panels. All panels have the same height (455mm) but are either 1818mm or 3030mm wide.

AWP 1818

Horizontal Installation Allowed (only)
Stacked or Staggered Layout

Dimensions: *17-7/8" [H] x 71-9/16" [L]*
455mm [H] x 1818mm [L]
Thickness (unless noted): *5/8" (16mm)*

Architectural Block
Canyon Brick
Illumination[c]
Miraia
Novenary Tile *7/8" (21 mm) Thickness*
PlymouthBrick
RiftSawn *3/4" (18mm) Thickness*
SandStone *3/4" (18mm) Thickness*
Tuff Block[c]
VintageBrick *3/4" (18mm) Thickness*
VintageWood

AWP 3030

Horizontal or Vertical Installation Allowed
Stacked Layout Only

Dimensions: *17-7/8" [H] x 119-5/16" [L]*
455mm [H] x 3030mm [L]
Thickness: *5/8" (16mm)*

EmpireBlock
Illumination[c]
IndustrialBlock
Ribbed[c]
RoughSawn
VintageWood

Nichiha's **Architectural Detail Finder** is ready to help with all your detailing needs and is found at nichiha.com/architectural-details. Panel dimension profiles, installation components & accessories, trims, and wall details for many assembly types and conditions are available in AutoCAD, Revit, and PDF.

[c] *Panel profiles offering the Color Xpressions system (Illumination, Ribbed, and TuffBlock) require a lead-time versus stock colors. Contact a Sales Representitive for more information.*

THE PARTICULARS

PANEL RELATIONSHIPS AND COMPATIBILITY

AWP 1818 have shiplap edges on all four sides and the panels joint directly with each other. The vertical joints may be aligned or staggered with each course. Because of their edge shapes, AWP 1818 can only be installed horizontally.

AWP 3030 have shiplap edges only on the long dimension (3030mm (119-5/16")). The short edges (455mm (17-7/8")) are square cut. This enables a vertical installation option for AWP 3030 with a different Starter Track (FA710T). However, it also requires all vertical joints to align when the panels are installed horizontally. This means an AWP 3030 layout can *only* be stacked. The vertical joints must use the Double Flange Sealant Backer with sealant or H-Mold Trim.

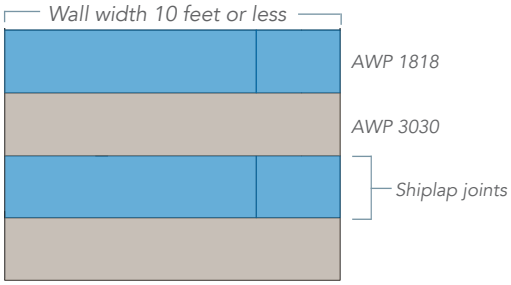
The difference of the vertical edge jointing means AWP 1818 and AWP 3030 can only be matched directly together in a mixed arrangement on walls 10 feet or less in width so that AWP3030 will not require any vertical joints. (Elevation A)

On walls wider than 10 feet (3048mm), the two sizes can be used togeteher with AWP 3030 grouped ***below*** the AWP 1818 or separated as like groups via vertical trim or sealant backer joints. They can be fitted directly together at horizontal joints only. Vertical edges are not compatible and a trim or sealant backer is required. (Elevation B)

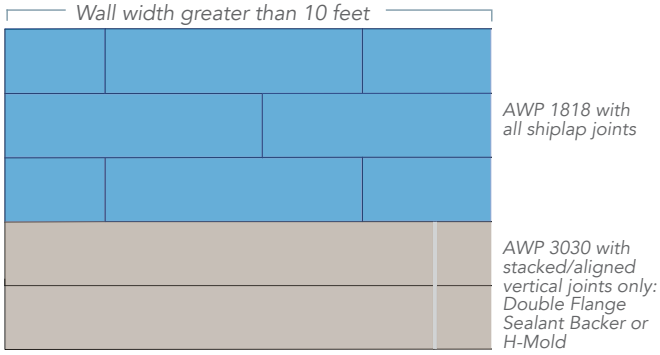
AWP 1818 THICKNESSES

SandStone and VintageBrick (18mm) require use of the JEL788 Ultimate Clip, which accounts for a thicker panel edge. All other panels, including Novenary Tile (21mm) and RiftSawn (18mm) are designed with edges compatible with the JEL778 Ultimate Clip. Because of the difference in edge thicknesses and required clips, SandStone and VintageBrick cannot be jointed directly with any other AWP profiles. These two panels must be separated from all other panel types by Horizontal/Compression Joints and Vertical Control/Expansion Joints.

Novenary Tile (21mm) panels joint normally with any 16mm-thick AWP 1818 on all four sides.



A) 16mm & 21mm AWP 1818 and AWP 3030 mixed on walls ten feet or less in width.



B) 16mm & 21mm AWP 1818 and AWP 3030 together on walls wider than ten feet. 1818's grouped on top with 3030's below only.

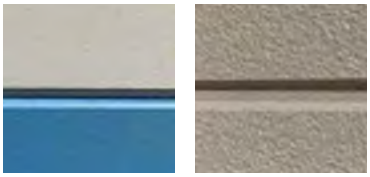
AWP1818 JOINT PROFILES

V-Groove: Architectural Block, Illumination 1818

Split V-Groove: TuffBlock, EmpireBlock, IndustrialBlock

Soft U: Illumination 3030

Implications: Illumination 3030 meeting Illumination 1818 or ArchitecturalBlock at a corner will result in different neighboring joint aesthetics. The same is true where TuffBlock may neighbor Illumination 1818 or ArchitecturalBlock.



These are joint profiles for Illumination 1818 or Architectual Block (left) with a V-Groove joint versus TuffBlock (right) with a Split V-Groove.

PLANNING & LAYOUT

The Nichiha system works most efficiently when full panels are used. Designing panel layouts symmetrically from a wall center, outwards will help to create less product waste. It is important to keep in mind the actual metric dimensions when considering the modular panel layout, including placement of control and compression joints, and also with respect to sizing window and door openings.

Detailing around openings involves a number of variables such as the depth of the opening and the overall thickness of the wall assembly. For example, a continuous insulation and furring condition with recessed windows will necessitate a jamb, head, and sill return material/finish. Depending on the dimensions, Nichiha factory Corners or cut panels may be used at jambs, or an alternate material such as metal may be necessary. Nichiha Corners may not be used for head and sill return conditions. Please reach out to Nichiha Technical for detailing recommendations.

VERTICAL CONTROL/EXPANSION JOINT REQUIREMENTS

On walls wider than 30 feet, when using AWP 1818 panels and metal trim outside corners, Vertical Control/Expansion Joints (Double Flange Sealant Backers) are required within 2 to 12 feet of outside corners (on both sides of corner) and then approximately every 30 feet thereafter.

When using AWP 1818 panels and Nichiha factory Corners, control joints are required at the factory Corner and then approximately every 30 feet thereafter.

When using AWP 3030 panels installed horizontally, vertical control joints or H-molds are required at each vertical joint. Panels may not be butted together and these vertical joints may not be split up or staggered.

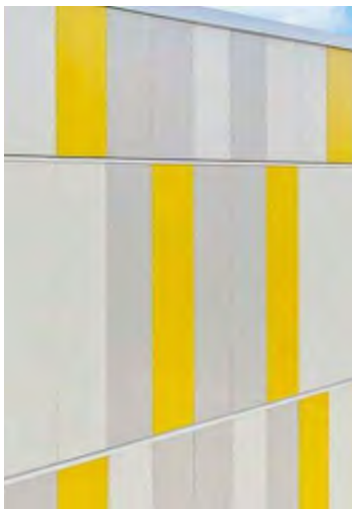
Control/Expansion Joints are 10mm (3/8”) wide.

HORIZONTAL/COMPRESSION JOINT REQUIREMENTS

Metal Framed projects taller than three stories/45 feet: Place compression joints approximately every 25 feet.

Wood Framed projects three stories or taller: Compression Joints required at each floor.

Compression Joint requirements:
Compression Joint Flashing - heavy gauge z-shaped metal flashing or similar, 1/2" (min.) gap between panels at floor lines/plate, and Starter Track.



Installed Horizontal/Compression Joint examples

CONTINUOUS INSULATION

Nichiha AWP (horizontal) may be installed directly over up to one inch of foam plastic insulation such as polyiso or E(X)PS over wood or gypsum sheathing. Insulation compressive strength of 25 psi or greater is strongly recommended. ***For horizontal panels***, continuous insulation (c.i.) thicker than one inch and mineral wool c.i. of any thickness must be paired with a furring or other solution* to satisfy the *Framing & Sheathing Requirements* set out in the AWP install guides. ***For vertical panels***, the presence of any c.i. requires an assembly adjustment and is subject to a required Technical Review process. Refer to the guides for complete installation requirements and instructions. This document is not intended to prohibit options or furring combinations not covered herein. Please contact the Technical Department for assistance.

Exterior Continuous Insulation Requirements	Horizontal Panel Installation (With foam plastic >1" or any mineral wool)	Vertical Panel Installation (With any c.i., contact Nichiha Technical Services)	Energy Code Friendly Options
	Shaped Metal Furrings (Z, hat channel, C, etc.), Min. 18 ga. -or- 2x P.T. Lumber -or- Energy Code Option -with- Furring aligned vertically at 16" o.c. Layer Two: Minimum 18 gauge *hat channels* Aligned horizontally every 16" plus additional for FA710T ("Vertical") Starter Track locations	Engineered third party systems Cascadia Clips® CL Talon® FERO Cladding Support® Hunter XciPly® ISO Clip® Knight Wall Systems® SmartCI Green Girt®

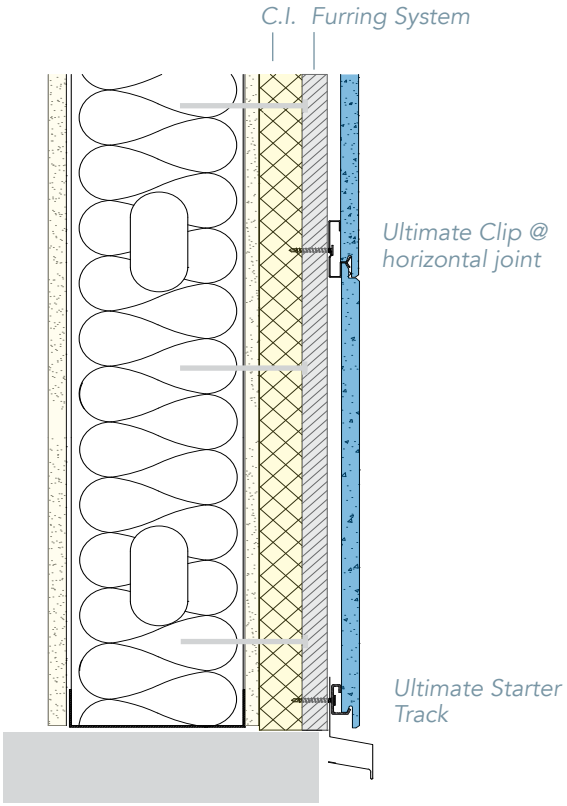
IBC 2015 Table 2603.12.2

The model building codes for 2015 and later include information in Chapter 26 about foam plastic insulation/ sheathing and furring minimum fastening requirements. Table 2603.12.2 shows various configurations depending upon framing gauge and spacing, fastener size and spacing, thickness of insulation and cladding weight. Under this approach, the furring members are installed on top of the insulation.

*Consult a structural engineer to design the furring system to manage the AWP system dead load of minimum 5 psf and also meet the project wind load design criteria. Furring must account for expected building compression. Nichiha does not provide fastener design for anchoring the furring to structure. Refer to IBC 2015 Table 2603.12.2 for more info.

NFPA 285 and Hourly Ratings

Refer to Intertek CCRR 0299 and our Priest Associates engineering evaluations for NFPA 285 compliant and hourly-rated assemblies.



Section view: AWP System on vertical furring

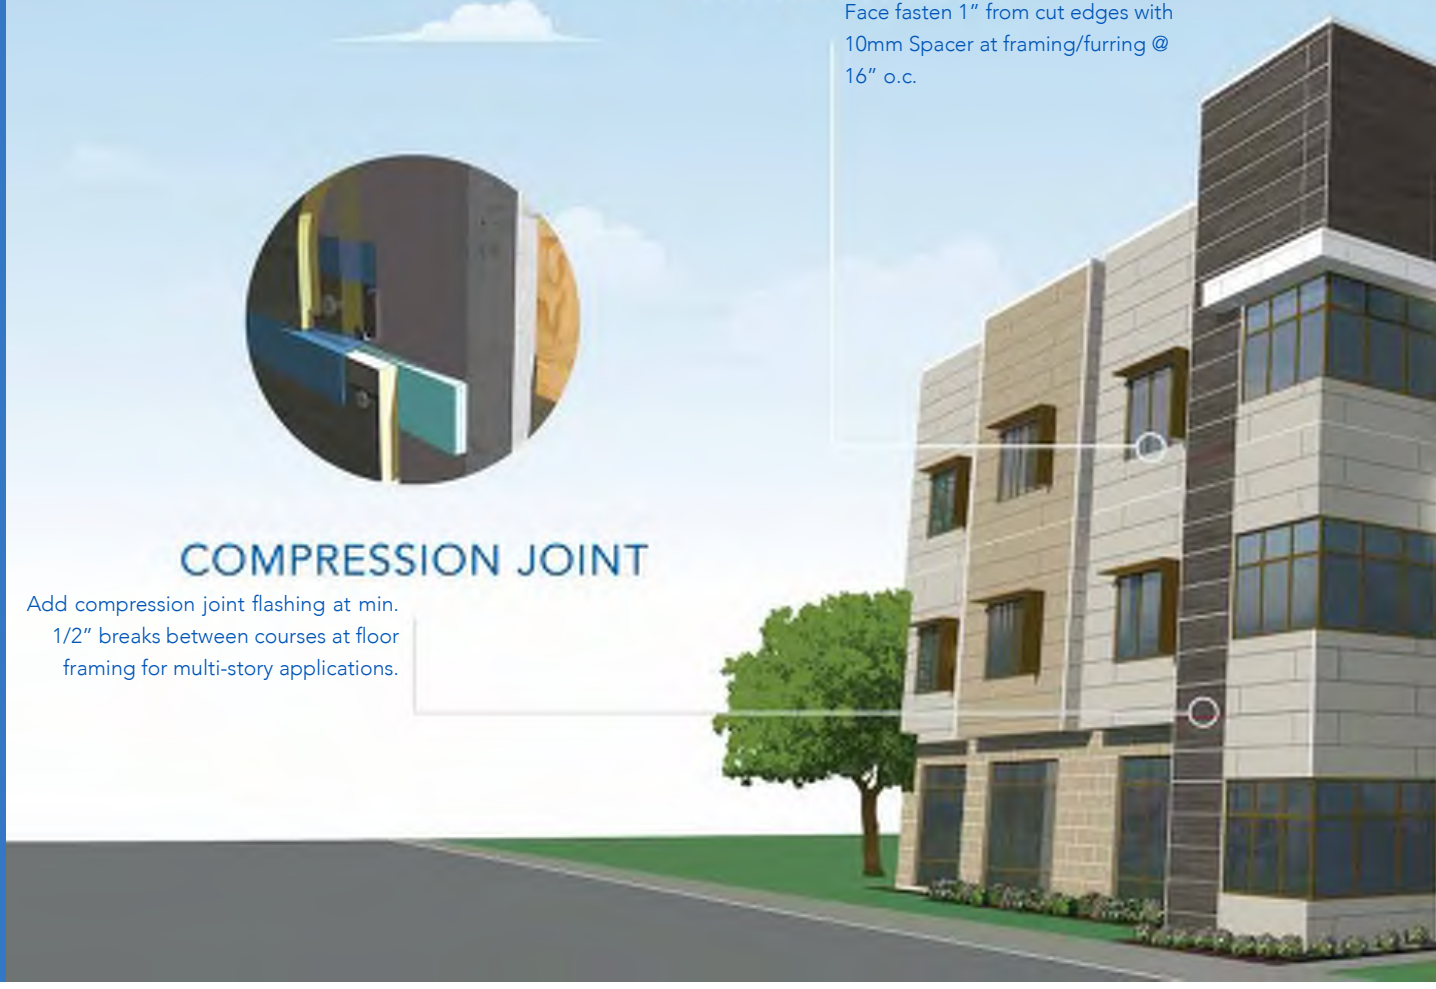
ARCHITECTURAL LAYOUT

WINDOW SILL

Face fasten 1" from cut edges with 10mm Spacer at framing/furring @ 16" o.c.

COMPRESSION JOINT

Add compression joint flashing at min. 1/2" breaks between courses at floor framing for multi-story applications.



INSIDE CORNER

Butt line-of-sight panels to corner. On opposite wall, add Single Flange Sealant Backer and caulk or use Inside Corner metal trim.

VERTICAL CONTROL JOINT

Often aligned with window jambs, Double Flange Sealant Backer is fastened to framing/furring, wood sheathing, or blocking.

OUTSIDE CORNER

- Factory Corners with 3-1/2" Face Returns
- Corner Key Trim
- Open Outside Corner Trim
- Fiber Cement Trim Boards

HORIZONTAL DESIGN REQUIREMENTS

AWP1818 - HORIZONTAL

- Ultimate Horizontal Starter Track - ***always level***
- Ultimate Clip II – JEL778 for most panels (JEL788 for SandStone and VintageBrick only) - 2-1/2 clips per panel edge | 10mm (~3/8") rain screen
- Joint Tab Attachments required between panels at vertical factory joints
- Vertical Control/Expansion Joints (Double Flange Sealant Backer) on 30'+ walls with metal trim outside corners: 2'-12' from edges + every ~30' thereafter
- Vertical Control/Expansion Joints with Nichiha Corners plus every ~30' thereafter
- Vertical Control/Expansion Joints every ~30' on walls with no outside corners.
- Horizontal/Compression Joints: ***Wood Framing*** three stories or more = joint at every floor
- Horizontal/Compression Joints: ***Metal Framing*** over three stories/45' = joint about every 25'
- Sealant Joints (Single Flange Sealant Backer) or Inside Corner trim at inside corners
- Horizontally cut edges require face fastening with Spacer
- MIN. Clearances: 6" above soil grade, 2" above hardscape and decking, 1" above roof
- 1/4" clearance between the panel edge and flashings
- Panel Thickness – 16-21mm | 5/8" - 7/8"
- Total System Depth – 26mm - 31mm | 1-1/32" - 1-7/32"

See table for Framing & Sheathing Requirements
Reference page 4 for panel thickness

HORIZONTAL AWP CONTINUOUS INSULATION REQUIREMENTS

Exterior Continuous Insulation Requirements

Greater than 1 inch

Horizontal Panel Installation

Shaped Metal Furrings
(Z, hat channel, C, etc.), Min. 18 ga.
-or-
2x P.T. Lumber
-or-
Energy Code Option
-with-
Furring aligned vertically at 16" o.c. (max) or fastening adjustments

Energy Code Friendly Options

Engineered third party systems:

Cascadia Clips®
CL Talon®
FERO Cladding Support®
Hunter XciPly®
ISO Clip®
Knight Wall Systems®
SmartCI Green Girt®

AWP3030 - HORIZONTAL

- Ultimate Horizontal Starter Track - ***always level***
- Ultimate Clip II – JEL778 for all 3030mm panels - 4 clips per panel edge | 10mm (~3/8") rain screen
- Vertical Control/Expansion Joints (Double Flange Sealant Backer) or H-Mold trim at each vertical joint
- Stacked layout only - no staggering of vertical joints
- Horizontal/Compression Joints: ***Wood Framing*** three stories or more = joint at every floor
- Horizontal/Compression Joints: ***Metal Framing*** over three stories/45' = joint about every 25'
- Sealant Joints (Single Flange Sealant Backer) or Inside Corner trim at inside corners
- Horizontally cut edges require face fastening with Spacer
- MIN. Clearances: 6" above soil grade, 2" above hardscape and decking, 1" above roof
- 1/4" clearance between the panel edge and flashings
- Panel Thickness – 16mm | 5/8"
- Total Wall System Depth – 26mm | 1-1/32"

See table for Framing & Sheathing Requirements

HORIZONTAL AWP FRAMING & SHEATHING REQUIREMENTS

WALL TYPES	ATTRIBUTES	STUD SPACING	SHEATHING
Metal Studs	18 gauge min.	16" o.c. max.	Min. 7/16" OSB/Plywood 1/2" or 5/8" Gypsum
Wood Studs	2X Lumber	16" o.c. max.	Min. 7/16" OSB/Plywood 1/2" or 5/8" Gypsum
Concrete Furring is required	18 ga shaped metal or P.T. 2X Lumber	16" o.c. max.	N/A
SIPs & NailBase C.I.	Per SIP Standard (sips.org) w/ min. four (4), evenly spaced screws per clip		
PEMBs	24 gauge up to -31.41 PSF 22 gauge up to -39.29 PSF	Deflection Criteria: L/120 max. Fastening: #10 fastener @12" o.c.	

VERTICAL DESIGN REQUIREMENTS

AWP3030 - VERTICAL

- Ultimate Vertical Starter Track - *always level and continuous, bearing the dead loads of vertical AWP3030, fastened @ 8-9" o.c. to structure*
- *No vertical panel staggering*
- Ultimate Clip II – JEL778 for all 3030mm panels - 4 clips per panel edge | 10mm (~3/8") rain screen
- Vertical Control/Expansion Joints not required
- Horizontal/Compression Joints after each course
- Don't span floors
- Sealant Joints (Single Flange Sealant Backer) or Inside Corner trim at inside corners
- Vertically cut edges require face fastening to structure, through Spacer
- MIN. Clearances: 6" above soil grade, 2" over hardscape and decking, 1" over roof
- 1/4" clearance between the panel edge and flashings
- Panel Thickness – 16mm | 5/8"
- Total System Depth – 26mm | 1-1/32"
- Structural Sheathing Method or Custom Stud/ Furring Spacing Method required for installation

See table for Framing & Sheathing requirements

WALL TYPES	ATTRIBUTES	STUD SPACING	SHEATHING
Metal Studs	18 gauge min.	16" o.c. max.	Min. 7/16" OSB/Plywood
Wood Studs	2X lumber	16" o.c. max.	Min. 7/16" OSB/Plywood
Concrete Furring is required	18 ga shaped metal or p.t. 2X lumber	17-7/8" o.c. max plus additional 9" o.c. Furring at Starter Track	N/A
SIPs	Per SIP Standard (sips.org) and Vertical Starter Track must be fastened directly into solid lumber with min. 1" penetration		
PEMBs	Product not intended for this application		

VERTICAL AWP CONTINUOUS INSULATION REQUIREMENTS

Continuous Insulation – also refer to the installation guides.
For vertical AWP, the presence of *any* c.i. necessitates adjustments. Please contact the Technical Department.

Exterior Continuous Insulation Requirements

Standard Stud Walls w/ C.I.
Shaped Metal Furring Grid

Layer One:
Minimum 18 gauge
Thermally broken, Aligned vertically
Spaced per studs/framing.

Layer Two:
Minimum 18 gauge *hat channels*
Aligned horizontally every 16" plus additional for FA710T ("Vertical") Starter Track locations

Standard Stud Walls w/ C.I.
Wood Sheathing added to Vertical Furring

Furring: minimum 18 gauge shaped metal or 2X lumber
-and-
Furring aligned vertically at 16" o.c. (max) - secured to wall framing
-and-
Min. 7/16" APA Rated Plywood/OSB - secured to furring
-and-
Code-approved WRB

CMU and Concrete
Shaped Metal Furring or 2X Lumber

Minimum 18 gauge or 2X lumber
-and-
Aligned Vertically at 17-7/8" o.c.
-and-
Additional vertical furring segments at Vertical Starter Track locations to enable 9" o.c. fastener spacing for track

Specialty 3rd Party Systems

CL Talon®
SmartCI Green Girt®
Custom Engineered Options
5/8" Plywood or greater Nail-Base Insulation Sheathing

Contact Nichiha Technical Department

TECHNICAL REQUIREMENTS

STANDARD REQUIREMENTS

Let's start with the basics. Each of the following criteria must be met in order for Nichiha Architectural Wall Panels to perform as intended.

- Refer to Intertek CCRR-0299 for product building code compliance certification as well as wind load engineering requirements. For this and other Nichiha product approvals for Florida, Miami-Dade, Texas TDI, and L.A.R.R., visit nichiha.com/resource-center, and select Product Certifications under the Design Support filter
- **Continuous Insulation** — refer to the installation guides
- **Vapor Permeable Weather Resistive Barriers** — required over stud walls and SIPs. CMU/concrete - defer to local code. Sheathings and C.I. with integrated code compliant WRB are acceptable
- Hardware, Corners, Trims, Flashings (nichiha.com/hardware-and-accessories)
- **Minimum Clearances** — a minimum of 6" above soil grade, 2" above hard surfaces, 1" above roofing, or per local building codes
- **Single Flange Sealant Backers** — at inside corners, along window & door jambs and transition points with other cladding
- **Double Flange Sealant Backers** — Vertical Control/ Expansion joints, Non-90-Degree Corners and at Nichiha Corners
- **Sealants** — refer to *Technical Bulletin - Sealants*
- **10mm Spacer** — required at all face fastening locations
- **Face fastening** — every 12-16" o.c. to framing/furring spaced min. 1" distance from the panel edge
- **Fasteners must penetrate:** Wood Studs a min. 1", Metal Studs a min. 1/2" with three threads needed for grab
- **Fasteners** — must be stainless steel or corrosion resistant such as hot dipped zinc or ceramic coated - pan, wafer, or hex head required for clip and track fastening (min. #8)
- **Equipment/Mechanical Screens** - must be fully enclosed wall system
- **Soffit and Angled Wall** applications (with standard warranties) are prescribed in the *Horizontal AWP Install Guide*. See pages 38-41.

ADDITIONAL REQUIREMENTS

- Structural Insulating Panels (SIPs)
- Nail-base insulation sheathings
- Continuous Insulation (C.I.) greater than one inch in thickness
- Insulated Concrete Forms (ICFs) require additional measures
- Retrofits and atypical applications
- Modular or panelized wall structures

All of the above require a technical review by Nichiha to evaluate feasibility via our Technical Design Review (TDR) process. Submission of a TDR does not imply or guarantee project approval.

TECHNICAL DESIGN REVIEWS

If your project meets any of the criteria listed below, or you simply wish to take advantage of the service, your Nichiha Sales Representative can connect you to Technical Department staff for a Technical Design Review. It's our way of making your specification of Nichiha AWP as easy as possible. Refer to nichiha.com/technical-design-review.

- Any project of more than three stories or 45 feet
- Those located in high wind coastal areas (Exposure Categories C and D with Wind Speed in excess of 130 mph (Vult) per ASCE 7-10)
- Those with any wall assembly not described in the *Framing & Sheathing Requirements*
- *Continuous Insulation* projects (thicker than 1")

NOs

If your project includes any of the following attributes, contact Nichiha Technical Services for clarification and advice. Refer also to Technical Bulletins in our Resource Center under the Install Support filter.

- No Radius/Curved Walls
- No existing or new masonry w/o furring
- No remodels over hard coat & synthetic stucco/ EIFS
- No Pre Engineered Metal Building retrofits. New construction only with horizontal installation, no vertical installation allowed
- Do not use AWP on *open* screen walls
- Do not cut panels to less than 4" in width or length
- For Vertical Panels: do not span floors with panels. Place compression joints at each floor line. No staggering of joints

THE POWER OF POSSIBILITIES AND PARTNERSHIPS

The way we see it, we're in this together. Our mutual success is the only real success. If you have questions or concerns let your Nichiha Sales Representative know and they'll do everything they can to keep your project moving in the right direction… *up*.

If you're not sure who your local sales representative is, visit nichiha.com/contact-a-rep and we'll direct you to the representative closest to you.

NICHIHA *the power of possibilities™*

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe Safety Instructions. For further information or questions, please consult the SDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, SDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Wall panel, fiber-cement
Item Type	Fiber cement board siding
Description	Non-combustible fiber cement, exterior grade siding and soffit board complying with ASTM C1186, Grade II, Type A
Manufacturer	Nichiha
Model	Rough Sawn Series AWP 3030
Dimensions	10" H x 18" L , 5/8" (16mm) thick. Vertical installation.
Color	Tobacco EPC247N
Material Composition	Fiberglass reinforced concrete panels, through-colored with UV-stable pigments.
CSI #	07 46 46 - Fiber Cement Siding
Omniclass #	22-074646 Fiber Cement Siding
Fire/Smoke Rating	ASTM E 84, Class A
Structural Performance	Flexural Strength (ASTM C1185) : 1850 length direction; 2500 transverse direction of sheet.
Thermal Performance	Wall system u-factor shall comply with requirements of authorities having jurisdiction.
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Non-Asbestos Fiber-Cement Sheets"
Accessories	1) Manufactured Corners with 3-1/2” returns in matching colors. 2) Aluminum trim to be painted per finish schedule to match adjacent color(s): Outside corners (Corner Key, Open Outside Corner), vertical joints (Bead Reveal, H-Mold), terminations (J-Mold, L-Mold). 3) Flashing System: Manufacturers Starter, Compression Joint, Overhang. 4) Panels profiled along all four edges, such that both horizontal and vertical joints between the installed panels are ship-lapped. 5) Factory-applied sealant gasket added to top and right panel edges; all joints contain a factory sealant.
Thickness	16 mm
Texture/Luster	Rough Sawn
Lead Time	10 weeks +
Warranty	30 years
Notes	Review wall panels which are manufactured in metric sizes to coordinate with imperial (feet & inches) dimensions of structure. Pay particular attention to window sizes.

PACKAGING (PIECES PER PACK)	2 (17.75 SQ. FT.)

Add rustic sophistication with RoughSawn and RiftSawn.

Nichiha's Wood Series provides the look of wood without the drawbacks of natural wood cladding, and the array of options continues to grow with the introduction of RiftSawn™. With its earthy appeal and rich texture, RiftSawn and RoughSawn™ add a rustic quality to all types of projects. They showcase the ridges, grooves and textures of natural wood while maintaining a consistent length that is easy to work with. RiftSawn is unique in the Wood Series with its full panel design, which incorporates a darker edge to create the look of a reveal. This provides the appearance of an open joint system with the added performance of a closed joint system.

Like VintageWood, these products also pair well with glass, metal, and block panels. And when it comes to installation, hidden fasteners provide a clean and beautiful look that works for exterior and interior applications. Nichiha gives you the perfect match — the beauty of wood backed by the brawn of fiber cement.

Gain rock solid solutions with

THE MASONRY SERIES

Get the beauty of stone for a fraction of the price.

Nichiha's Masonry Series makes grandeur attainable for every situation. Offering a distinct finish, this series of stone panels is as elegant as it is affordable.

With its subtle color and deep texture, our SandStone™ captures the look of limestone and adds a traditional design aesthetic to any commercial building. Covering approximately 9 square feet per panel, this finish goes up in a fraction of the time required by a crew of masonry contractors. Plus, with three color options, you have even more possibilities for customization — all backed by the power of fiber cement.

ESSENTIAL FLASHING

Create a clean, polished look for your building with the highest level of precision.

COMPRESSION JOINT FLASHING (10')

OVERHANG FLASHING (10') - JOH7288

OVERHANG FLASHING INSIDE CORNER - JOH72880

OVERHANG FLASHING OUTSIDE CORNER - JOH72988

OVERHANG FLASHING CLIP - JOH73585

STARTER FLASHING (10') - F1104768

STARTER FLASHING OUTSIDE CORNER - F1104788

STARTER FLASHING INSIDE CORNER - F1104780

NOTE: SOLD COMPONENTS OF ESSENTIAL FLASHING IS SOLD SEPARATELY. STARTER AND OVERHANG FLASHING AVAILABLE IN BLACK ONLY.

Nichiha takes accessory protection to the next level with a **removable film layer.** Once installed, simply peel off the film to reveal blemish-free features.

Our starter flashing serves a dual role in ensuring your footprint is installed to perfection and operating as a bug screen to keep annoying pests away.

EWP-002-NI_BEIGE

INSTALLATION HARDWARE

Easily take your vision from the drawing board to reality.

ULTIMATE CLIP II WITH JOINT TAB ATTACHMENT - JEL778* & JEL788**

Creates a hidden fastening system that all but eliminates face fastening. The joint tab helps support panel lateral stability.

THICKNESS	10MM
PACKAGING (PCS PER BOX)	30

ULTIMATE HORIZONTAL STARTER TRACK (10') - FA700

Ensures a fast, level installation. Its patented drainage channel directs water out and away from the base of the wall.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

ULTIMATE VERTICAL STARTER TRACK (10') - FA710T

Ensures a fast, level installation with 3030 panels. Its patented drainage channel directs water out and away from the base of the wall.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

SINGLE FLANGE SEALANT BACKER (6.5') - FHK1015R

Used for vertical jambs at doors and windows and at inside corners of the building.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	65

DOUBLE FLANGE SEALANT BACKER (10') - FH1015R

Used for vertical expansion joints. Placed at the end of each 3030 panel, and every 30' with 1818 panels and with the preformed outside corner.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

CORRUGATED SHIM (4') - FS1005 & FS1010

Used for face fastening where required (top of building, doors, windows, etc.)

THICKNESS (FS1005)	5MM
THICKNESS (FS1010)	10MM
PACKAGING (LN. FT. PER BOX)	200

KURASTONE™ CLIP - JE720CA

Creates a hidden fastening system that all but eliminates face fastening for Kurastone panels and corners.

THICKNESS	10MM
PACKAGING (PCS PER PACK)	50

CORNER CLIP - JE777C* & JE787C**

Corner clip for the preformed Nichiha fiber cement corners.

THICKNESS	10MM
PACKAGING (PCS PER BOX)	6

CORNERS

Prefinished corners are used in conjunction with horizontal panel installation.

17 7/8"H x 3-1/2" [face]
1818MM H x 88.9MM [face]

**JEL778 and JE777C are compatible with all panels except SandStone and VintageBrick.*
***JEL788 and JE787C are compatible with SandStone and VintageBrick only.*

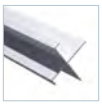
METAL TRIM

With our customized metal trim, your project practically finishes itself.

CORNER KEY

Extrusion used at outside corners instead of a preformed corner. A vertical expansion joint is required 2' to 10' from the corner when using this corner.

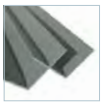
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	3" x 10' (76.2MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



OPEN OUTSIDE CORNER

Extrusion used at outside corners instead of a preformed corner. A vertical expansion joint is required 2' to 12' from the corner when using this corner.

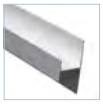
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	2.96" x 10' (75MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



INSIDE CORNER

Used where two Nichiha panels meets in an inside corner; alternative to Single Flange Sealant backer with sealant.

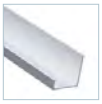
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	3.4" x 10' (86.4MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



H-MOLD

Can be used at the end of 3030 panels instead of the Double Flange Sealant Backer, but not at the preformed outside corners.

DIMENSIONS (NOM. FT. ~ ACTUAL MM)	2" x 10' (50.8MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



J-MOLD

Can be used instead of Single Flange Sealant Backer at vertical jambs for doors and windows, but not at the inside corners of the building.

DIMENSIONS (NOM. FT. ~ ACTUAL MM)	0.375" x 10' (9.5MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50

Our trim gives you options

All of our metal trim is available in four finishes: primed, clear anodized, powder coated, or custom color. For pricing and lead times, view our Price Catalog at nichiha.com/price-catalog.

For popular panels like VintageWood, we've made ordering easier by color matching all of our trim profiles to have in stock for fast delivery.

Thanks to our Color Xpressions system, Nichiha can customize trim to match any color you use on custom color panels.

THE POWER OF POSSIBILITIES AND PARTNERSHIPS

Your creative vision is unique. That's why Nichiha offers you the power of cooperation to help your project move from conception to completion. Our ever-expanding offering of textures and finishes lifts buildings to new and unexpected places, and we want to share them with you. We place a high value on our relationships and are proud to work with our dedicated partners across the country. Join us to discover the power of possibilities and partnerships with Nichiha.

Item Name	Metal soffit for Porte Cochere ceiling
Item Type	Metal soffit, pre-manufactured
Description	Extruded decorative aluminum panel
Manufacturer	B&N Industries
Model	Fortina TRA-150MF
Dimensions	176 mm W x 13mm H x manufacturer's standard lengths
Color	Match Nichiha "White Diamond ED680-CUS"
Finish	Baked acrylic coating over aluminum extrusion, followed by application of decorative adhesive film
Material Composition	A 6063 Aluminum alloly, polyolefin resin, ink pigment, polyvinylidene fluoride, methacrylic acid alkyl ester/acrylic acid alkyl ester copolymer
CSI #	057500 - Decorative Formed Metal
Omniclass #	22-057500 Decorative Formed Metal
Best Practices	Recycled content
Thickness	1/4"
Texture/Luster	Smooth
Warranty	2 years

HardieSoffit®

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

EFFECTIVE SEPTEMBER 2013

INSTALLATION REQUIREMENTS - PRIMED & COLORPLUS® PRODUCTS

Visit www.jameshardie.com for the most recent version.

IMPORTANT: FAILURE TO INSTALL AND FINISH THIS PRODUCT IN ACCORDANCE WITH APPLICABLE BUILDING CODES AND JAMES HARDIE WRITTEN APPLICATION INSTRUCTIONS MAY LEAD TO PERSONAL INJURY, AFFECT SYSTEM PERFORMANCE, VIOLATE LOCAL BUILDING CODES, AND VOID THE PRODUCT ONLY WARRANTY. BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

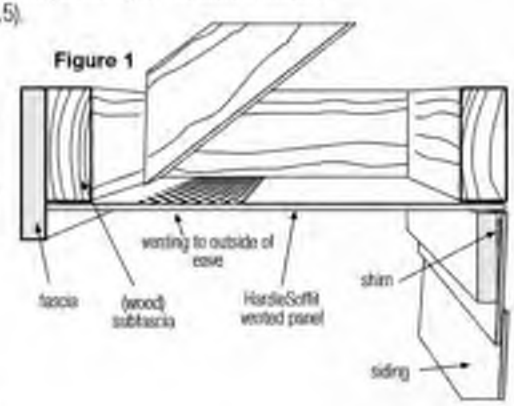
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

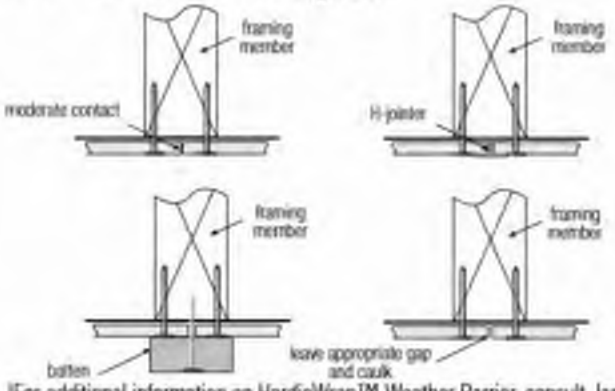


Figure 3

less than or equal to 12" Wide Soffit

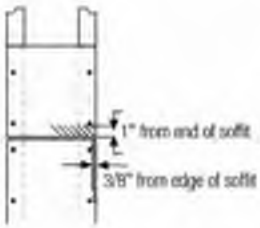

Figure 4

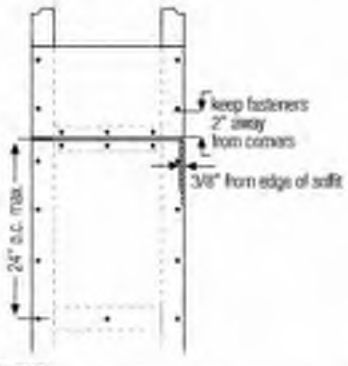
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

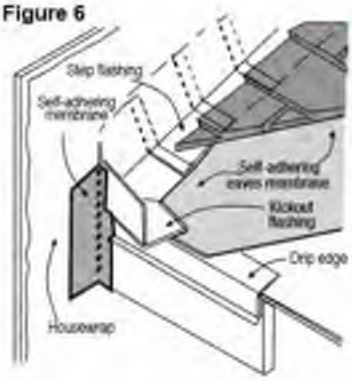
SF1204-P1/3 6/13

EWP-004-A1-JH_BEIGE

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-004-A1-JH_BEIGE

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications.

We're looking forward

At Nichiha the future is bright

Every day more and more people are discovering the beauty and performance of Nichiha fiber cement cladding products. Once you've seen or used a Nichiha product, you'll be looking for ways to use it again.

Your projects come in all shapes, markets and styles ... at Nichiha we make an attractive fiber cement cladding solution for most of them. Our products help you capture the look of wood in considerably less time and at a fraction of the cost. Our large offering of textures and finishes lifts buildings of all kinds to new and unexpected places.

Discover the performance and versatility of NichiPanel

There's no end to what you can do

There's very little a solid building pro can't do with NichiPanel™. Available in three convenient sizes and four unique textures, this product offers numerous design options. It's an obvious choice for covering big areas quickly and economically. But that's just one dimension. NichiPanels are also great for wrapping posts, creating wainscoting, as a ceiling and for many more applications where performance and aesthetics collide head on with budget concerns.

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe the Safety Instructions above. For further information or questions, please consult the MSDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

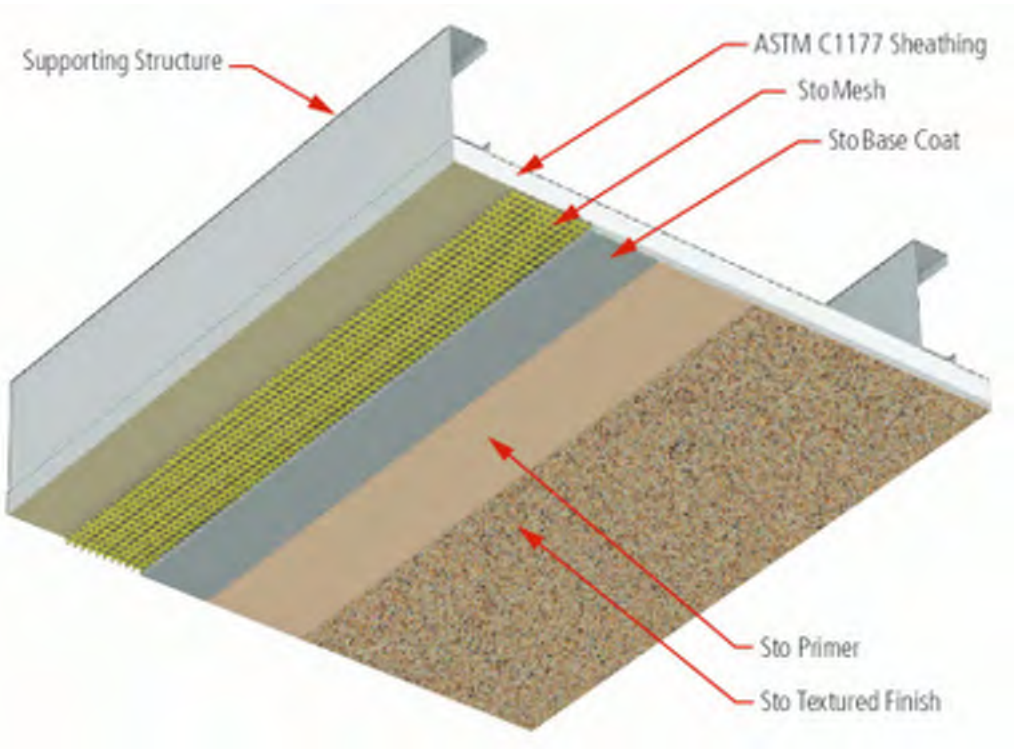
StoQuik® Gold System for Soffits & Ceilings
System Components

Detail No.: 14.00
Date: December 2012



Property of Sto Corp. All Rights Reserved.

Notes:

1. Illustration identifies components of the StoQuik® Gold for Soffits. System to be installed as per Sto®Specification F 601S.

2. Sheathing must comply with ASTM C1177 / C1177M - 08 Standard Specification for Glass Mat Gypsum Substrate for Use as Sheathing.

3. Sheathing is to be installed on a structure sufficient to resist live loads limiting deflection to L/360 normal to the plane of the soffit.

4. Soffit shall be protected from wind blown rain.

5. Soffit shall be designed to prevent accumulation of water behind the sheathing and finish system.

6. StoQuik® Gold for Soffits is not designed to function as an air barrier. The designer should not vent interior conditioned air into the cavity above the soffit.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

www.stocorp.com

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto's instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto's control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO'S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

HardieSoffit®

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

INSTALLATION REQUIREMENTS - PRIMED & COLORPLUS® PRODUCTS

IMPORTANT: FAILURE TO INSTALL AND FINISH THIS PRODUCT IN ACCORDANCE WITH APPLICABLE BUILDING CODES AND JAMES HARDIE WRITTEN APPLICATION INSTRUCTIONS MAY LEAD TO PERSONAL INJURY, AFFECT SYSTEM PERFORMANCE, VIOLATE LOCAL BUILDING CODES, AND VOID THE PRODUCT ONLY WARRANTY. BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

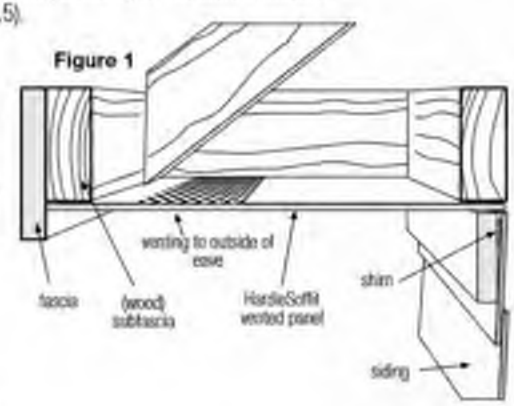
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

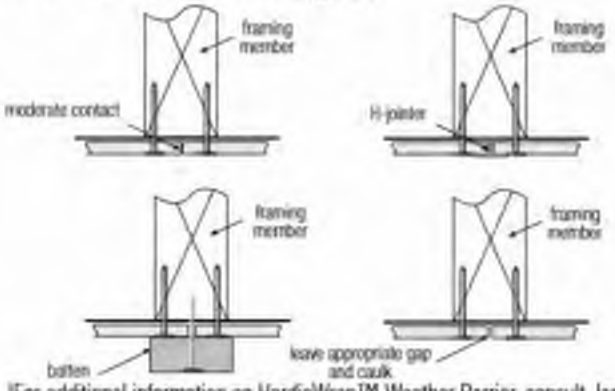


Figure 3

less than or equal to 12" Wide Soffit

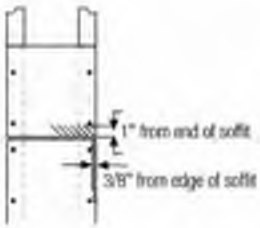

Figure 4

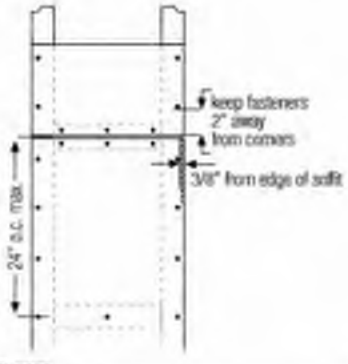
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

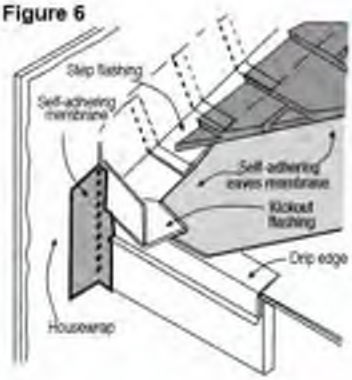
SF1204-P1/3 6/13

EWP-004-A2-JH_BEIGE

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-004-A2-JH_BEIGE

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications.

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Fiber cement board soffit, lower roofs with DEFS finish
Item Type	Fiber cement board soffit material, solid (no perforations) with metal strip vent.
Description	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
Manufacturer	Nichiha
Model	NichiSoffit
Dimensions	1/4" x 48" x 96"
Color	Match Nichiha "White Diamond ED680-CUS"
Finish	Sto Quick Gold System for Ceilings and Soffits.
Material Composition	Portland cement with fiberglass reinforcing fibers.
CSI #	074646 - Fiber Cement Siding
Omniclass #	22-074646 - Fiber Cement Siding
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Fiber-Cement Sheets"
Accessories	Stainless steel perforated vent strip
Thickness	1/4"

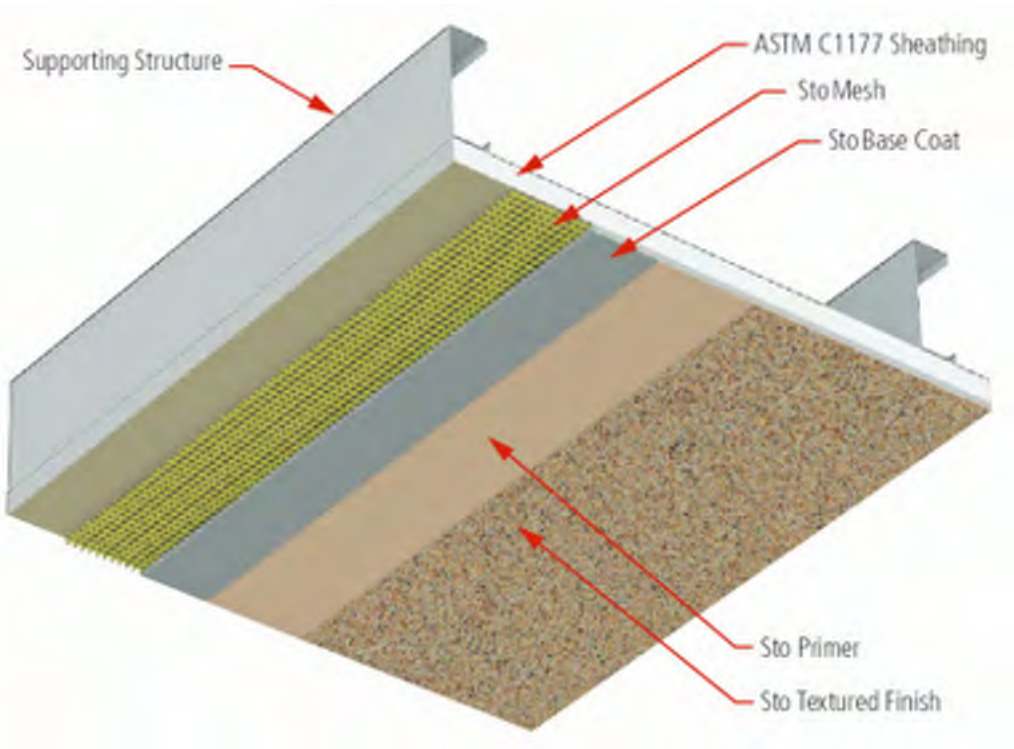
StoQuik® Gold System for Soffits & Ceilings
System Components

Detail No.: 14.00
Date: December 2012



Property of Sto Corp. All Rights Reserved.

Notes:

1. Illustration identifies components of the StoQuik® Gold for Soffits. System to be installed as per Sto®Specification F 601S.

2. Sheathing must comply with ASTM C1177 / C1177M - 08 Standard Specification for Glass Mat Gypsum Substrate for Use as Sheathing.

3. Sheathing is to be installed on a structure sufficient to resist live loads limiting deflection to L/360 normal to the plane of the soffit.

4. Soffit shall be protected from wind blown rain.

5. Soffit shall be designed to prevent accumulation of water behind the sheathing and finish system.

6. StoQuik® Gold for Soffits is not designed to function as an air barrier. The designer should not vent interior conditioned air into the cavity above the soffit.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto's instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto's control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO'S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

We're looking forward

At Nichiha the future is bright

Every day more and more people are discovering the beauty and performance of Nichiha fiber cement cladding products. Once you've seen or used a Nichiha product, you'll be looking for ways to use it again.

Your projects come in all shapes, markets and styles ... at Nichiha we make an attractive fiber cement cladding solution for most of them. Our products help you capture the look of wood in considerably less time and at a fraction of the cost. Our large offering of textures and finishes lifts buildings of all kinds to new and unexpected places.

Discover the performance and versatility of NichiPanel

There's no end to what you can do

There's very little a solid building pro can't do with NichiPanel™. Available in three convenient sizes and four unique textures, this product offers numerous design options. It's an obvious choice for covering big areas quickly and economically. But that's just one dimension. NichiPanels are also great for wrapping posts, creating wainscoting, as a ceiling and for many more applications where performance and aesthetics collide head on with budget concerns.

Finish the job with confidence and performance

Our fiber cement trim and soffits provide an attractive, trouble-free solution that's guaranteed to look great for many years to come.

NichiSoffit™ panels are factory primed and sealed assuring a long-lasting, attractive appearance. The panels are available in smooth or in cedar texture and in vented and non-vented styles.

Trimming a home has never been easier than with NichiTrim™ boards. Available in a smooth or cedar texture, NichiTrim boards offer the low maintenance façade homeowners desire. NichiTrim products are factory primed and sealed providing a beautiful and long-lasting appearance.

Performance, Possibilities and Partnerships

Nichiha upholds the highest level of standards for product performance. Our fiber cement siding is built to last. We are confident enough to back our products with some of the strongest warranties in the business. Offering a wide range of design possibilities, Nichiha siding brings all types of unique homes to life. Nichiha also values partnerships and believes our success is directly tied to our dedicated partners. Nichiha is proud to deliver the power of possibilities and partnerships to the residential building community.

Get social with Nichiha. Share your project photos, thoughts, and inspiration with us on social media. We would love to hear from you.

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe the Safety Instructions above. For further information or questions, please consult the MSDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

HardieSoffit®

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

INSTALLATION REQUIREMENTS - PRIMED & COLORPLUS® PRODUCTS

IMPORTANT: FAILURE TO INSTALL AND FINISH THIS PRODUCT IN ACCORDANCE WITH APPLICABLE BUILDING CODES AND JAMES HARDIE WRITTEN APPLICATION INSTRUCTIONS MAY LEAD TO PERSONAL INJURY, AFFECT SYSTEM PERFORMANCE, VIOLATE LOCAL BUILDING CODES, AND VOID THE PRODUCT ONLY WARRANTY. BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

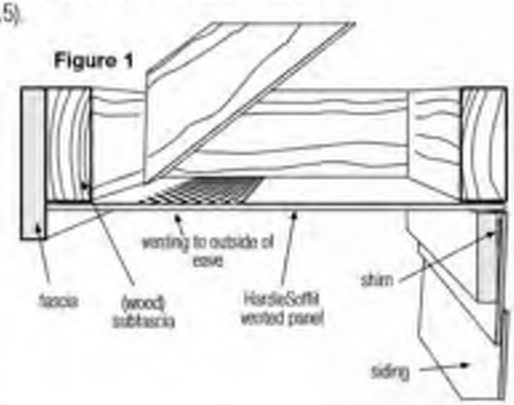
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

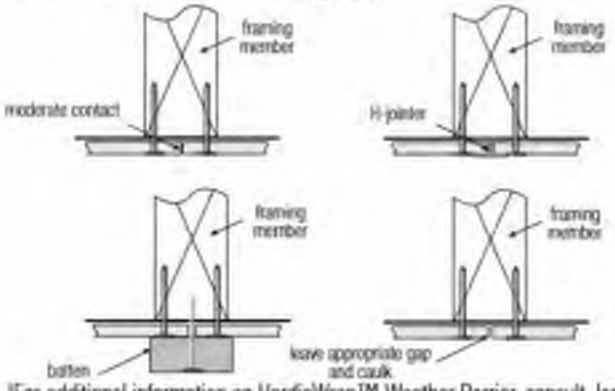


Figure 3

less than or equal to 12" Wide Soffit

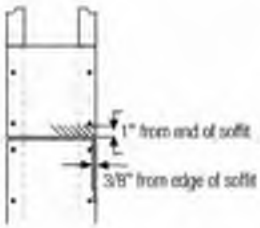

Figure 4

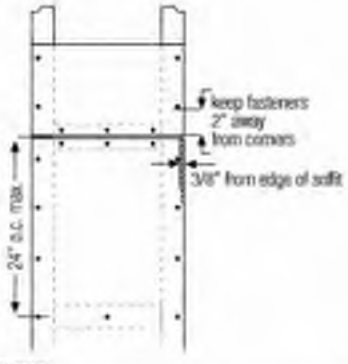
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

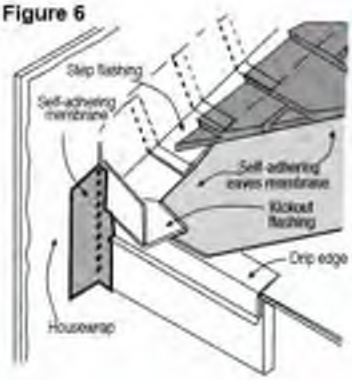
SF1204-P1/3 6/13

EWP-005-A1-JH_BEIGE

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-005-A1-JH_BEIGE

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications.

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Fiber cement board soffit, upper roofs
Item Type	Fiber cement board soffit material, perforated for ventilation
Description	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
Manufacturer	Nichiha
Model	NichiSoffit
Dimensions	1/4" x 48" x 96"
Color	Painted to match Benjamin Moore "Smoky Ash 986" Gloss
Finish	Vented Smooth, Painted
Material Composition	Portland cement with fiberglass reinforcing fibers
CSI #	074646 - Fiber Cement Siding
Omniclass #	22-074646 - Fiber Cement Siding
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Fiber-Cement Sheets"
Thickness	1/4"
Texture/Luster	Smooth
Warranty	50 years

We're looking forward

At Nichiha the future is bright

Every day more and more people are discovering the beauty and performance of Nichiha fiber cement cladding products. Once you've seen or used a Nichiha product, you'll be looking for ways to use it again.

Your projects come in all shapes, markets and styles ... at Nichiha we make an attractive fiber cement cladding solution for most of them. Our products help you capture the look of wood in considerably less time and at a fraction of the cost. Our large offering of textures and finishes lifts buildings of all kinds to new and unexpected places.

Discover the performance and versatility of NichiPanel

There's no end to what you can do

There's very little a solid building pro can't do with NichiPanel™. Available in three convenient sizes and four unique textures, this product offers numerous design options. It's an obvious choice for covering big areas quickly and economically. But that's just one dimension. NichiPanels are also great for wrapping posts, creating wainscoting, as a ceiling and for many more applications where performance and aesthetics collide head on with budget concerns.

Finish the job with confidence and performance

Our fiber cement trim and soffits provide an attractive, trouble-free solution that's guaranteed to look great for many years to come.

NichiSoffit™ panels are factory primed and sealed assuring a long-lasting, attractive appearance. The panels are available in smooth or in cedar texture and in vented and non-vented styles.

Trimming a home has never been easier than with NichiTrim™ boards. Available in a smooth or cedar texture, NichiTrim boards offer the low maintenance façade homeowners desire. NichiTrim products are factory primed and sealed providing a beautiful and long-lasting appearance.

Performance, Possibilities and Partnerships

Nichiha upholds the highest level of standards for product performance. Our fiber cement siding is built to last. We are confident enough to back our products with some of the strongest warranties in the business. Offering a wide range of design possibilities, Nichiha siding brings all types of unique homes to life. Nichiha also values partnerships and believes our success is directly tied to our dedicated partners. Nichiha is proud to deliver the power of possibilities and partnerships to the residential building community.

Get social with Nichiha. Share your project photos, thoughts, and inspiration with us on social media. We would love to hear from you.

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe the Safety Instructions above. For further information or questions, please consult the MSDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

PermaBASE® Cement Board

09 28 00 / NGC

Technical Information
800.NATIONAL • 800.628.4662

DESCRIPTION

PermaBASE® Cement Board is a rigid substrate made of Portland cement, aggregate and glass mesh. It has an exceptionally hard, durable surface that can withstand prolonged exposure to moisture.

Use it as an underlayment or backing surface in a variety of interior and exterior applications, including (but not limited to) tub and shower surrounds, countertops, floors, and for cement board stucco and adhered masonry veneer wall systems.

BASIC USES

Applications

Interior

PermaBASE® Cement Board is a superior underlayment for many interior applications, including kitchen countertops and backsplashes; bathroom shower and tub enclosures, garden and whirlpool tubs, and steamrooms and saunas; flooring for kitchens, bathrooms, entryways, foyers and laundry rooms; walls for bathrooms, accent areas and fireplaces; and special additions, such as swimming pool and whirlpool decks and enclosures.

Exterior

PermaBASE provides an excellent substrate for many exterior applications, including Cement Board Masonry Veneer Wall System (CBMV), Cement Board Stucco System (CBSS), Continuous Insulation (CI), and Exterior Insulation and Finish Systems (EIFS).

PermaBASE allows the combination of exterior finishes on one continuous substrate, providing greater design flexibility. It works well for commercial exteriors, residential exteriors, outdoor kitchens and decks.

Advantages

- EdgeTech® Technology allows for closer fastener application of nails or screws at the edge without crumbling or spinout.
- Use as a substrate for direct-applied finishes, tile, stone and thin brick in exterior applications (as outlined in UL Evaluation Report ER22158-01).
- Use in combustible and non-combustible construction under the IBC and IRC (as outlined in UL Evaluation Report ER22158-01).
- Resists the growth of mold per ASTM D3273 with a score of 10, the best possible score.
- Can be cut using a standard utility knife and straightedge. With the unique PermaBASE core composition, little or no additional labor is needed to clean the edge after a cut.
- Is impact resistant, extremely durable and dimensionally stable. It has excellent overall flexural, compressive and tensile strength characteristics.
- IBC/IRC Compliant. Meets ASTM C1325.
- Is highly moisture resistant, and will not rot, disintegrate or swell when exposed to water.
- Use 1/2 in. (12.7 mm) PermaBASE® in 1-hour and 2-hour rated assemblies (UL Classified).
- Achieves the lowest water-absorption rating of any cement board per ASTM C473, offering better tile bond.
- Achieves GREENGUARD and GREENGUARD Gold Certification. GREENGUARD Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit: **ul.com/gg**.
- Qualifies as a low-VOC emitting material by meeting California Specification 01350. For more information, visit: **calrecycle.ca.gov/greenbuilding/specs/section01350**.

Heat Shield Applications

- UL approved for heat shield/wall protector per ANSI/UL 1618 and ULC 632.
- Protects combustible walls.
- Reduces required clearance from wall by 40 percent.
- Lightweight and easy to install.

Cement Board Stucco Wall System (CBSS)

- Engineered system that allows a faster installation while providing superior quality control (manufactured product that must comply with ASTM product specifications).
- Provides a 15-year exterior warranty – the industry's best.

Cement Board Masonry Veneer Wall System (CBMV)

- Engineered system that allows a faster installation while providing superior quality control (manufactured product that must comply with ASTM product specifications).
- Approved for use in ASTM C1780, and cement board is cited as an approved substrate for this system by the Masonry Veneer Manufacturers Association (MVMA): Installation Guide and Detailing Options for Compliance with ASTM C1780.
- Easily allows for the inclusion of continuous insulation into the assembly.
- Speed up your schedule – faster, easier and cleaner than traditional metal lath/scratch coat method.

1. Specified values per ASTM C1325, tested in accordance with ASTM C473.
2. Tested in accordance with ASTM E84.
3. Tested in accordance with ASTM C518.
4. Tested in accordance with ASTM E96.
5. Tested in accordance with ASTM D3273.
6. Tested in accordance with ASTM G21.
7. Specified values per ASTM C1325, tested in accordance with ASTM D1037.
8. Specified values per ASTM C1325, tested in accordance with ASTM D947.
9. Tested in accordance with ASTM C473, 24-hour immersion.
10. Per ANSI A118.9 procedure B. Tested in accordance with ASTM C666.
11. Tested in accordance with ASTM D2394.
12. Tested in accordance with ASTM E330.

Perma BASE® CEMENT BOARD

PermaBASE® Cement Board

(Continued from page 1)

INSTALLATION RECOMMENDATIONS

Interior Applications

General: All framing should comply with local building code requirements and be designed to provide support with a maximum allowable deflection of L/360 under all intended loads. Framing members should be spaced a maximum of 16 in. o.c.

Note: Cut or score PermaBASE on printed side of panel. Install tile and tile setting materials in accordance with current ANSI specifications and Tile Council of North America (TCNA) guidelines.

Control joints: For interior installations, allow maximum of 30 lineal feet between control joints. A control joint must be installed, but is not limited to the following locations: where expansion joints occur in the framing or building (discontinue all cross furring members located behind joint); when boards abut dissimilar materials; where framing material changes; at changes of building shape or structural system; at each story separation. Place control joints at corners of window and door openings, or follow specifications of architect. Control joint cavity shall not be filled with coating or other materials.

Walls & Ceilings

Wall framing: Edges of PermaBASE parallel to framing should be continuously supported. Provide additional blocking when necessary to permit proper PermaBASE attachment.

Do not install PermaBASE directly over protrusions from stud plane such as heavy brackets or fastener heads. Studs above a shower floor should be either notched or furred to accommodate the thickness of the waterproof membrane or pan. The surround opening for a tub or precast shower receptor should not be more than 1/4 in. larger than unit to be installed.

Ceiling framing: The deflection of the complete ceiling assembly due to dead load (including insulation, PermaBASE, bonding material and facing material) should not exceed L/360. The dead load applied to the ceiling frame should not exceed 10 psf. Ceiling joist or furring channel should not exceed 16 in. o.c.

(Edges of PermaBASE parallel to framing should be continuously supported.) Provide additional blocking when necessary to permit proper PermaBASE attachment.

PermaBASE Cement Board: Apply PermaBASE with ends and edges closely butted, but not forced, together. Stagger end joints in successive courses. Drive fasteners into field of cement board first, working toward ends and edges. Space fasteners maximum 8 in. o.c. for walls, 6 in. o.c. for ceilings with perimeter fasteners at least 3/8 in. and less than 5/8 in. from ends and edges. Ensure PermaBASE is tight to framing.

Joint reinforcement: Trowel bonding material to completely fill the tapered recessed board joints and gaps between each panel. On non-tapered joints, apply a 6" wide, approx. 1/16" thick, coat of bonding material over entire joint. For all joints, immediately embed 2" alkali-resistant fiberglass mesh tape fully into applied bonding material and allow to cure. Same bonding material should be applied to corners, control joints, trims or other accessories. Feather bonding material over fasteners to fully conceal.

Floors & Counters

Subfloor or Base: For flooring applications with 16 in. o.c. floor joists, 5/8 in. tongue and groove exterior grade plywood or 3/4 in. tongue and groove exterior grade OSB may be used. For 19.2 in. o.c. and 24 in. o.c. floor joists, 3/4 in. tongue and groove exterior grade plywood or OSB must be used. Tile size for floors with 24 in. o.c. floor joists must be 12 in. x 12 in. or larger. The joists and subfloor assembly must meet L/360, as well as the appropriate code tables, for live and dead loads.

Underlayment: Using a 1/4 in. square-notched trowel, apply a setting bed of Latex-Portland Cement mortar or Thin-Set mortar to the subfloor or counter base. Immediately laminate PermaBASE to subfloor or base leaving a 1/8 in. space between boards at all joints and corners. Leave a 1/4 in. gap along walls. Stagger joints so they do not line up with underlying substrate joints. Fasten PermaBASE every 8 in. o.c. throughout board field and around all edges while setting bed mortar is still workable. Around perimeter of each board, locate fasteners 2 in. from the corners and not less than 3/8 in. from the edges. Fill all joints solid with bonding material. On non-tapered joints such as butt ends, apply a 6 in. wide, 1/16 in. thick coat over the entire joint. For all joints, embed fiberglass mesh tape fully into applied bonding material; ensure that tape is centered over joint. Apply bonding material over fasteners to fully conceal. Remove all excess bonding material and allow to cure.

Exterior Applications

General: All framing should comply with local building code requirements and be designed to provide support with a maximum allowable deflection of L/360 under all intended live (including wind) and dead loads.

Control joints: For exterior installations, consult finish manufacturer for spacing requirements. For exterior tile applications, control joints should be spaced a maximum of every 12 ft. If no recommendation is available, allow a maximum of 16 lineal feet between control joints. A control joint must be installed but not limited to the following locations: where expansion joints occur in the framing or building (discontinue all cross furring members located behind joint); when boards abut dissimilar materials; where framing material changes; at changes of building shape or structural system; at each story separation. Place control joints at corners of window and door openings or follow specifications of architect. Control joint cavity shall not be filled with coating or other materials.

Perma BASE® CEMENT BOARD

PermaBASE® Cement Board

LIMITATIONS

Interior

- Treat joints with alkali-resistant fiberglass mesh tape set in a modified mortar.
- Do not use conventional paper gypsum board tape, joint compound and gypsum board nails or screws.
- Do not treat joints with mesh tape or waterproofing fabrics embedded in liquid [illegible] roofing.
- Do not exceed 16 in. (406 mm) o.c. as maximum wall framing spacing. Must be designed to limit deflection to L/360 under all live and dead loads.
- Steel framing must be minimum 20-gauge (galvanized) (.0312 in. design thickness) or heavier.
- PermaBASE is not a water barrier. Consult local building code for moisture-barrier requirements.
- Do not use with vinyl flooring.
- To install interior direct-applied finishes to PermaBASE, you must embed reinforcing mesh in basecoat. Consult finish manufacturer for additional requirements.
- Do not expose PermaBASE to temperatures over 220°F (105°C).
- Do not use PermaBASE as a nailing base for other finishes.

Exterior

- To install properly, follow the instructions of the finish material manufacturer.
- For conventional Portland cement plaster systems, use a self-furring metal lath over PermaBASE and fasten it to studs.
- Install a code-approved Weather Resistant Barrier (WRB) to protect the cavity. The type and placement will vary per local building codes and/or manufacturer's specifications, installation guidelines and warranties.
- Do not use PermaBASE as a nailing base for other finishes.

Cement Board Stucco Wall System (CBSS)

- Follow finish material manufacturer's instructions for proper installation.
- Treat joints in PermaBASE with mesh tape and basecoat.
- Thin veneer construction can reveal planar irregularities in framing.
- Minor cracking at joints may become visible in finished exterior surface.
- Exterior finishes applied directly to PermaBASE: Reinforcing mesh must be embedded in basecoat (consult exterior finish manufacturer for additional installation requirements).
- Code-Approved Weather Resistant Barrier (WRB) must first be installed to protect the cavity (type and placement will vary per local building codes and/or manufacturer's specifications, installation guidelines and warranties).

Cement Board Masonry Veneer Wall System (CBMV)

- Sheathing selection and installation varies according to type of wall construction.
- Code-approved Weather Resistant Barrier (WRB) must be installed to protect the cavity (type and placement will vary per local building codes and/or manufacturer's specifications, installation guidelines and warranties).
- Treat joints with alkali-resistant fiberglass mesh tape set in a modified mortar.
- Follow mortar manufacturer's instructions for proper installation.

Handling and Project Conditions

- Avoid water exposure during shipping, handling, storage, installation and after installation of cement boards to avoid the formation of mold or mildew.
- Store cement boards off the ground and under cover. Store boards flat. Use sufficient supports extending under the entire length of cement boards to prevent sagging.
- Keep cement boards dry to minimize the potential for mold growth. Take adequate care while transporting, storing, applying and maintaining cement boards.
- Do not apply cement boards with visible signs of moisture damage or mold growth. Do not apply cement boards over other building materials where conditions exist that are favorable to mold growth.

Maintenance Following Application

- Maintain essential elements of sound weather-tight building envelope, including roofing, joint sealants, windows and flashings.
- Take immediate and appropriate remediation measures as soon as water leaks or condensation sources are identified.
- Perform routine cleaning and maintenance operations using methods that prevent moisture saturation of cement boards.
- Maintain final wall finishes to protect the cement board as well as support the structure.

SIZES AND PACKAGING

Thickness, Width and Length	# of Pcs. per Unit
1/2" x 32" x 5' (12.7 mm x 813 mm x 1,524 mm)	50*
1/2" x 32" x 8' (12.7 mm x 813 mm x 2,438 mm)	30

HardieSoffit®

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

EFFECTIVE SEPTEMBER 2013

INSTALLATION REQUIREMENTS - PRIMED & COLORPLUS® PRODUCTS

Visit www.jameshardie.com for the most recent version.

IMPORTANT: FAILURE TO INSTALL AND FINISH THIS PRODUCT IN ACCORDANCE WITH APPLICABLE BUILDING CODES AND JAMES HARDIE WRITTEN APPLICATION INSTRUCTIONS MAY LEAD TO PERSONAL INJURY, AFFECT SYSTEM PERFORMANCE, VIOLATE LOCAL BUILDING CODES, AND VOID THE PRODUCT ONLY WARRANTY. BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

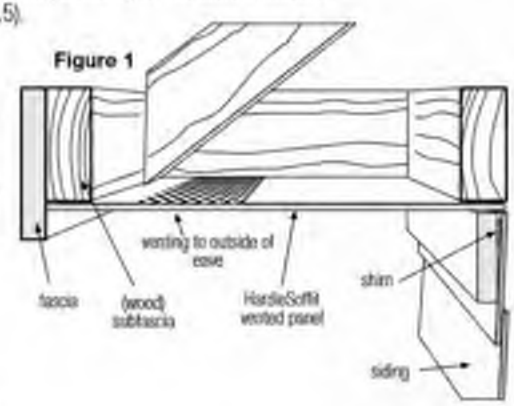
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

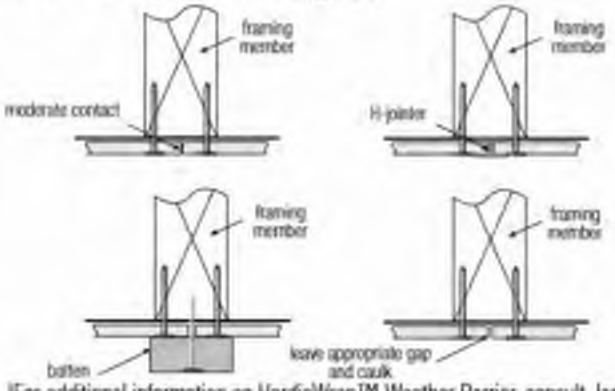


Figure 3

less than or equal to 12" Wide Soffit

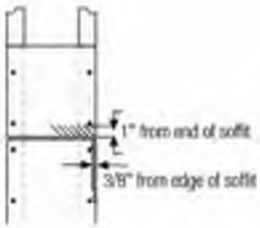

Figure 4

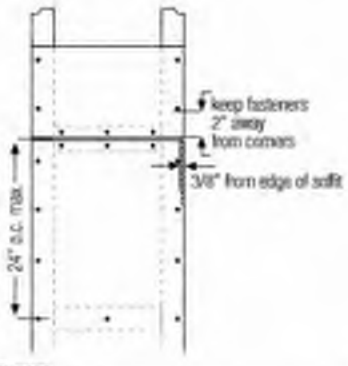
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

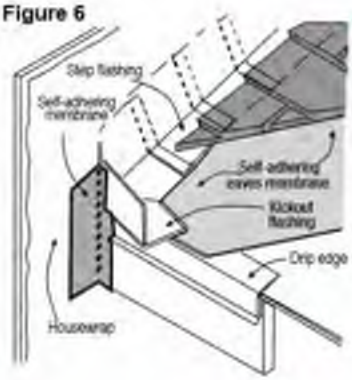
SF1204-P1/3 6/13

EWP-005-A2-JH_BEIGE

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-005-A2-JH_BEIGE

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Fiber cement board soffit, upper roofs
Item Type	Fiber cement board soffit material, non-perforated
Description	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A
Manufacturer	Nichiha
Model	NichiSoffit smooth, non-perforated
Dimensions	1/4" x 48" x 96"
Color	Benjamin Moore "Smoky Ash 986" Gloss
Finish	Sto Quick Gold System for Ceilings and Soffits
Material Composition	Portland cement with fiberglass reinforcing fibers
CSI #	074646 - Fiber Cement Siding
Omniclass #	22-074646 - Fiber Cement Siding
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Fiber-Cement Sheets"
Accessories	Stainless steel perforated vent strip
Thickness	1/4"
Texture/Luster	Smooth
Warranty	50 years

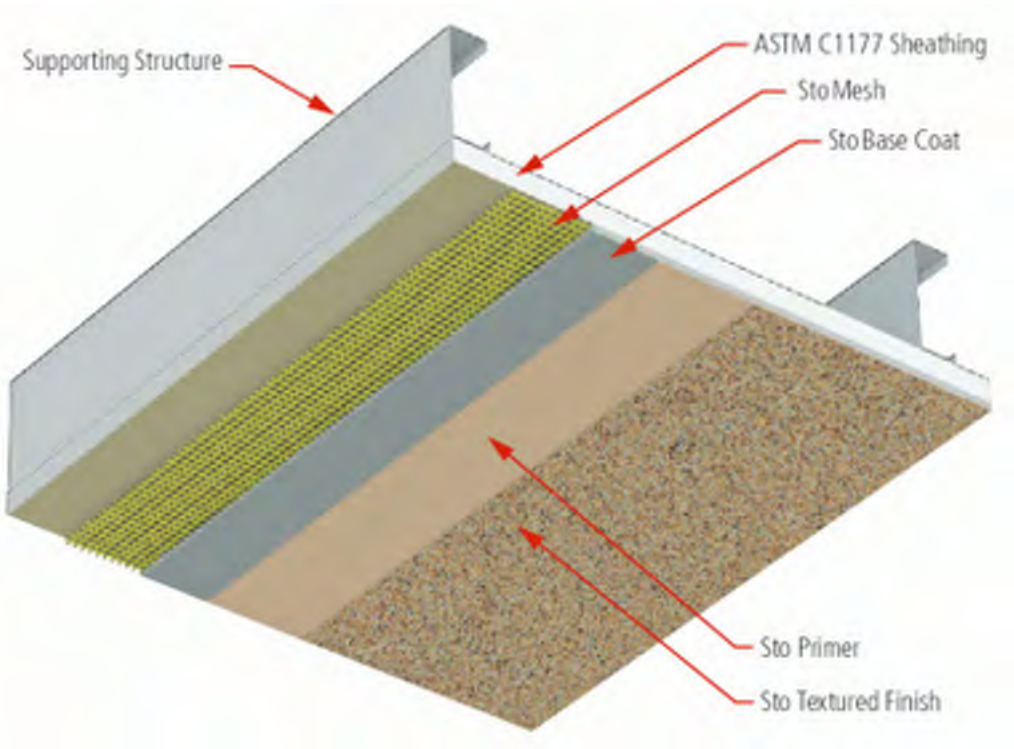
StoQuik® Gold System for Soffits & Ceilings
System Components

Detail No.: 14.00
Date: December 2012



Property of Sto Corp. All Rights Reserved.

Notes:

1. Illustration identifies components of the StoQuik® Gold for Soffits. System to be installed as per Sto®Specification F 601S.

2. Sheathing must comply with ASTM C1177 / C1177M - 08 Standard Specification for Glass Mat Gypsum Substrate for Use as Sheathing.

3. Sheathing is to be installed on a structure sufficient to resist live loads limiting deflection to L/360 normal to the plane of the soffit.

4. Soffit shall be protected from wind blown rain.

5. Soffit shall be designed to prevent accumulation of water behind the sheathing and finish system.

6. StoQuik® Gold for Soffits is not designed to function as an air barrier. The designer should not vent interior conditioned air into the cavity above the soffit.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

www.stocorp.com

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto's instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto's control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO'S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

We're looking forward

At Nichiha the future is bright

Every day more and more people are discovering the beauty and performance of Nichiha fiber cement cladding products. Once you've seen or used a Nichiha product, you'll be looking for ways to use it again.

Your projects come in all shapes, markets and styles ... at Nichiha we make an attractive fiber cement cladding solution for most of them. Our products help you capture the look of wood in considerably less time and at a fraction of the cost. Our large offering of textures and finishes lifts buildings of all kinds to new and unexpected places.

Discover the performance and versatility of NichiPanel

There's no end to what you can do

There's very little a solid building pro can't do with NichiPanel™. Available in three convenient sizes and four unique textures, this product offers numerous design options. It's an obvious choice for covering big areas quickly and economically. But that's just one dimension. NichiPanels are also great for wrapping posts, creating wainscoting, as a ceiling and for many more applications where performance and aesthetics collide head on with budget concerns.

ARCHITECTURAL WALL PANELS

Commercial Full Line Catalog

EWP-001-NI_GREY

WE'RE LOOKING FORWARD.

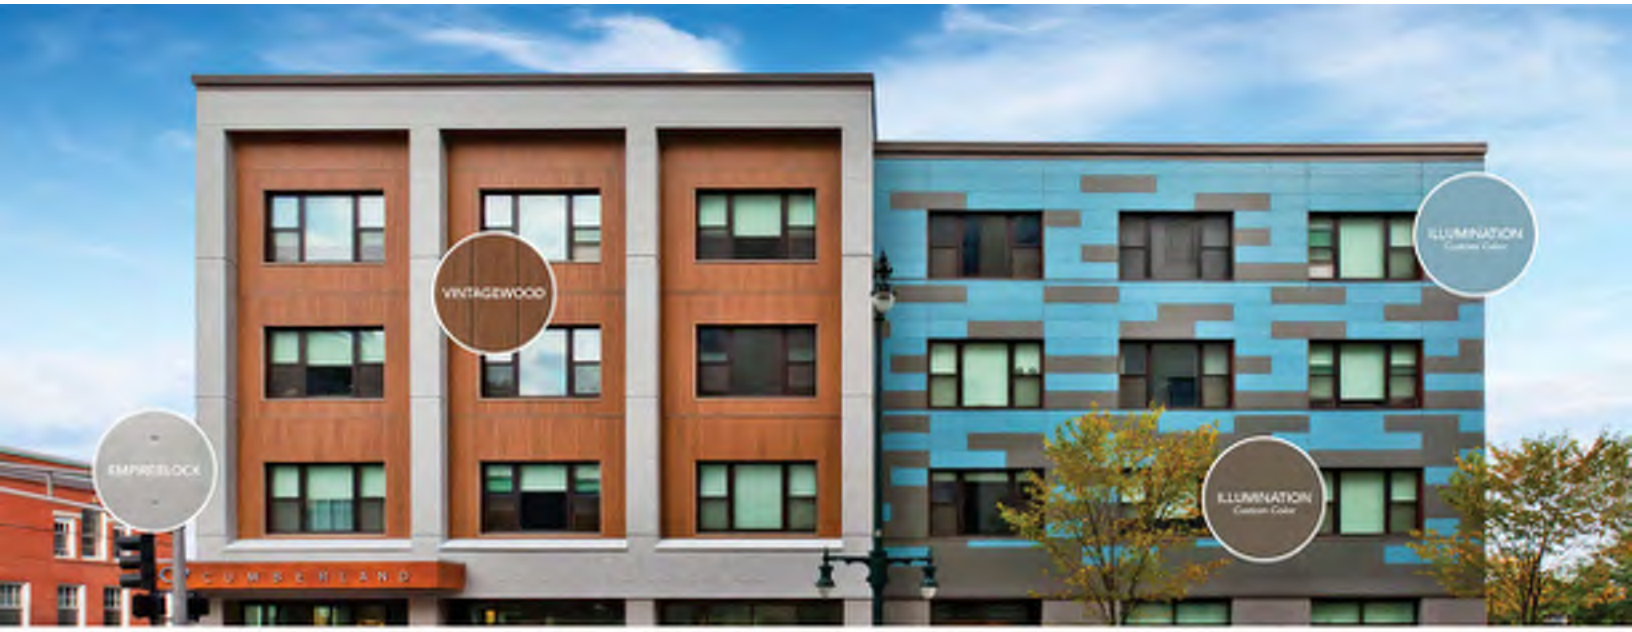
At Nichiha, we think the future is bright.

Your projects come in all shapes, styles and markets. That's why Nichiha is dedicated to helping you build the perfect structure for you, clad in our Architectural Wall Panels.

We combine the aesthetic of your favorite building material with the uncompromising durability of fiber cement, giving you the look you want in considerably less time and for a fraction of the cost. Our expansive collection of textures includes metal, wood, block, stone and brick options in a full range of colors and finishes. Once you've used a Nichiha product, you'll see the difference — and want to use it again and again.

8 | 10 | 12 | 14 | 18 | 20 | 22 | 24 | 28 | 29

EWP-001-NI_GREY



MULTIPLE LOOKS. ONE SOURCE.

Less time managing, more time imagining.

Why settle for one look when you can get multiple textures and finishes from a single manufacturer? With Nichiha Architectural Wall Panels, you can mix and match cladding styles to achieve the varied look you've been searching for. Whether you're looking for metal, stone, wood, concrete or brick, we have it all. Plus, all of our panel styles operate on the same clip installation system — saying goodbye to multiple contractors. You'll be able to move from conceptual to completion with ease, all while saving time and money.

USEFUL TIP

Add the finishing touches to your next project with our Essential Flashing on pages 26.

EWP-001-NI_GREY

COLOR XPRESSIONS

Open your project up to a nearly limitless world of color possibilities.

Nichiha's Color Xpressions system provides a degree of design freedom that most cladding products don't offer. It delivers the strength of fiber cement in virtually any color, making it easier than ever to match your brand's color seamlessly. The three-step process is simple:

1. Choose the exact color you want.
2. Connect with a Nichiha representative who will coordinate the delivery of swatches.
3. Sign off on your color selection.

This premium feature is available for Illumination, Ribbed and TaffBlock panels and has no minimum order required. In addition to offering matching trim pieces, Color Xpressions is backed by a 15-year limited factory-applied finish warranty.

*See Nichiha warranties for detailed information on terms, conditions and limitations.

LOOK FOR THIS ICON

You'll see this icon next to the products available in Color Xpressions: Illumination, Ribbed and TaffBlock.

Get polished sophistication in your color.

Modern appeal. High performance. Cost-effective. The Designer Series, featuring Illumination and Mirrata, is ideal for contemporary design projects. With its satin finish, ease of installation and virtually limitless color palette, Illumination provides significantly more value than traditional aluminum composite and phenolic panels.

Mirrata — the only product of its kind in the fiber cement market — offers a reflective, high gloss finish, perfect for design accents and as an affordable alternative to metal. It's available in Snow, Glacier and Onyx.

ESSENTIAL FLASHING

Create a clean, polished look for your building with the highest level of precision.

COMPRESSION JOINT FLASHING (10')

OVERHANG FLASHING (10') - JOH7288

OVERHANG FLASHING INSIDE CORNER - JOH72880

OVERHANG FLASHING OUTSIDE CORNER - JOH72888

OVERHANG FLASHING CLIP - JOH73585

STARTER FLASHING (10') - F1104768

STARTER FLASHING OUTSIDE CORNER - F1104788

STARTER FLASHING INSIDE CORNER - F1104780

NOTES: EACH COMPONENT OF ESSENTIAL FLASHING IS SOLD SEPARATELY. STARTER AND OVERHANG FLASHING AVAILABLE IN BLACK ONLY.

Nichiha takes accessory protection to the next level with a **removable film layer.** Once installed, simply peel off the film to reveal blemish-free features.

Our starter flashing serves a dual role in ensuring your footprint is installed to perfection and operating as a bug screen to keep annoying pests away.

EWP-001-NI_GREY

INSTALLATION HARDWARE

Easily take your vision from the drawing board to reality.

ULTIMATE CLIP II WITH JOINT TAB ATTACHMENT - JEL778* & JEL788**

Creates a hidden fastening system that all but eliminates face fastening. The joint tab helps support panel lateral stability.

THICKNESS	10MM
PACKAGING (PCS PER BOX)	30

ULTIMATE HORIZONTAL STARTER TRACK (10') - FA700

Ensures a fast, level installation. Its patented drainage channel directs water out and away from the base of the wall.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

ULTIMATE VERTICAL STARTER TRACK (10') - FA710T

Ensures a fast, level installation with 3030 panels. Its patented drainage channel directs water out and away from the base of the wall.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

SINGLE FLANGE SEALANT BACKER (6.5') - FHK1015R

Used for vertical jambs at doors and windows and at inside corners of the building.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	65

DOUBLE FLANGE SEALANT BACKER (10') - FH1015R

Used for vertical expansion joints. Placed at the end of each 3030 panel, and every 30' with 1818 panels and with the preformed outside corner.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

CORRUGATED SHIM (4') - FS1005 & FS1010

Used for face fastening where required (top of building, doors, windows, etc.)

THICKNESS (FS1005)	5MM
THICKNESS (FS1010)	10MM
PACKAGING (LN. FT. PER BOX)	200

KURASTONE™ CLIP - JE720CA

Creates a hidden fastening system that all but eliminates face fastening for Kurastone panels and corners.

THICKNESS	10MM
PACKAGING (PCS PER PACK)	50

CORNER CLIP - JE777C* & JE787C**

Corner clip for the preformed Nichiha fiber cement corners.

THICKNESS	10MM
PACKAGING (PCS PER BOX)	6

CORNERS

Prefinished corners are used in conjunction with horizontal panel installation.

17 7/8"H x 3-1/2" [face]
1818MM H x 88.9MM [face]

**JEL778 and JE777C are compatible with all panels except SandStone and VintageBrick.*
***JEL788 and JE787C are compatible with SandStone and VintageBrick only.*

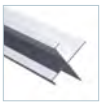
METAL TRIM

With our customized metal trim, your project practically finishes itself.

CORNER KEY

Extrusion used at outside corners instead of a preformed corner. A vertical expansion joint is required 2' to 10' from the corner when using this corner.

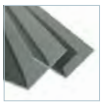
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	3" x 10' (76.2MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



OPEN OUTSIDE CORNER

Extrusion used at outside corners instead of a preformed corner. A vertical expansion joint is required 2' to 12' from the corner when using this corner.

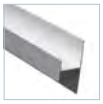
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	2.96" x 10' (75MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



INSIDE CORNER

Used where two Nichiha panels meets in an inside corner; alternative to Single Flange Sealant backer with sealant.

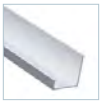
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	3.4" x 10' (86.4MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



H-MOLD

Can be used at the end of 3030 panels instead of the Double Flange Sealant Backer, but not at the preformed outside corners.

DIMENSIONS (NOM. FT. ~ ACTUAL MM)	2" x 10' (50.8MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



J-MOLD

Can be used instead of Single Flange Sealant Backer at vertical jambs for doors and windows, but not at the inside corners of the building.

DIMENSIONS (NOM. FT. ~ ACTUAL MM)	0.375" x 10' (9.5MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50

Our trim gives you options

All of our metal trim is available in four finishes: primed, clear anodized, powder coated, or custom color. For pricing and lead times, view our Price Catalog at nichiha.com/price-catalog.

For popular panels like VintageWood, we've made ordering easier by color matching all of our trim profiles to have in stock for fast delivery.

Thanks to our Color Xpressions system, Nichiha can customize trim to match any color you use on custom color panels.

THE POWER OF POSSIBILITIES AND PARTNERSHIPS

Your creative vision is unique. That's why Nichiha offers you the power of cooperation to help your project move from conception to completion. Our ever-expanding offering of textures and finishes lifts buildings to new and unexpected places, and we want to share them with you. We place a high value on our relationships and are proud to work with our dedicated partners across the country. Join us to discover the power of possibilities and partnerships with Nichiha.

Delivering the Power of
POSSIBILITIES

NICHIHA
fiber cement

ARCHITECTURAL WALL PANELS

Commercial Full Line Catalog

EWP-002-NI_GREY

Add rustic sophistication with RoughSawn and RiftSawn.

Nichiha's Wood Series provides the look of wood without the drawbacks of natural wood cladding, and the array of options continues to grow with the introduction of RiftSawn™. With its earthy appeal and rich texture, RiftSawn and RoughSawn™ add a rustic quality to all types of projects. They showcase the ridges, grooves and textures of natural wood while maintaining a consistent length that is easy to work with. RiftSawn is unique in the Wood Series with its full panel design, which incorporates a darker edge to create the look of a reveal. This provides the appearance of an open joint system with the added performance of a closed joint system.

Like VintageWood, these products also pair well with glass, metal, and block panels. And when it comes to installation, hidden fasteners provide a clean and beautiful look that works for exterior and interior applications. Nichiha gives you the perfect match — the beauty of wood backed by the brawn of fiber cement.

Gain rock solid solutions with
THE MASONRY SERIES

Get the beauty of stone for a fraction of the price.

Nichiha's Masonry Series makes grandeur attainable for every situation. Offering a distinct finish, this series of stone panels is as elegant as it is affordable.

With its subtle color and deep texture, our SandStone™ captures the look of limestone and adds a traditional design aesthetic to any commercial building. Covering approximately 9 square feet per panel, this finish goes up in a fraction of the time required by a crew of masonry contractors. Plus, with three color options, you have even more possibilities for customization — all backed by the power of fiber cement.

ESSENTIAL FLASHING

Create a clean, polished look for your building with the highest level of precision.

COMPRESSION JOINT FLASHING (10')

OVERHANG FLASHING (10') - JOH7288

OVERHANG FLASHING INSIDE CORNER - JOH72880

OVERHANG FLASHING OUTSIDE CORNER - JOH72888

OVERHANG FLASHING CLIP - JOH73585

STARTER FLASHING (10') - F1104768

STARTER FLASHING OUTSIDE CORNER - F1104788

STARTER FLASHING INSIDE CORNER - F1104780

NOTES: SOLD COMPONENTS OF ESSENTIAL FLASHING IS SOLD SEPARATELY. STARTER AND OVERHANG FLASHING AVAILABLE IN BLACK ONLY.

Nichiha takes accessory protection to the next level with a **removable film layer.** Once installed, simply peel off the film to reveal blemish-free fixtures.

Our starter flashing serves a dual role in ensuring your footprint is installed to perfection and operating as a bug screen to keep annoying pests away.

EWP-002-NI_GREY

INSTALLATION HARDWARE

Easily take your vision from the drawing board to reality.

ULTIMATE CLIP II WITH JOINT TAB ATTACHMENT - JEL778* & JEL788**

Creates a hidden fastening system that all but eliminates face fastening. The joint tab helps support panel lateral stability.

THICKNESS	10MM
PACKAGING (PCS PER BOX)	30

ULTIMATE HORIZONTAL STARTER TRACK (10') - FA700

Ensures a fast, level installation. Its patented drainage channel directs water out and away from the base of the wall.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

ULTIMATE VERTICAL STARTER TRACK (10') - FA710T

Ensures a fast, level installation with 3030 panels. Its patented drainage channel directs water out and away from the base of the wall.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

SINGLE FLANGE SEALANT BACKER (6.5') - FHK1015R

Used for vertical jambs at doors and windows and at inside corners of the building.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	65

DOUBLE FLANGE SEALANT BACKER (10') - FH1015R

Used for vertical expansion joints. Placed at the end of each 3030 panel, and every 30' with 1818 panels and with the preformed outside corner.

THICKNESS	10MM
PACKAGING (LN. FT. PER BOX)	100

CORRUGATED SHIM (4') - FS1005 & FS1010

Used for face fastening where required (top of building, doors, windows, etc.)

THICKNESS (FS1005)	5MM
THICKNESS (FS1010)	10MM
PACKAGING (LN. FT. PER BOX)	200

KURASTONE™ CLIP - JE720CA

Creates a hidden fastening system that all but eliminates face fastening for Kurastone panels and corners.

THICKNESS	10MM
PACKAGING (PCS PER PACK)	50

CORNER CLIP - JE777C* & JE787C**

Corner clip for the preformed Nichiha fiber cement corners.

THICKNESS	10MM
PACKAGING (PCS PER BOX)	6

CORNERS

Prefinished corners are used in conjunction with horizontal panel installation.

17 7/8"H x 3-1/2" [face]
1818MM H x 88.9MM [face]

**JEL778 and JE777C are compatible with all panels except SandStone and VintageBrick.*
***JEL788 and JE787C are compatible with SandStone and VintageBrick only.*

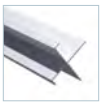
METAL TRIM

With our customized metal trim, your project practically finishes itself.

CORNER KEY

Extrusion used at outside corners instead of a preformed corner. A vertical expansion joint is required 2' to 10' from the corner when using this corner.

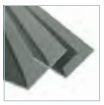
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	3" x 10' (76.2MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



OPEN OUTSIDE CORNER

Extrusion used at outside corners instead of a preformed corner. A vertical expansion joint is required 2' to 12' from the corner when using this corner.

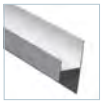
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	2.96" x 10' (75MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



INSIDE CORNER

Used where two Nichiha panels meets in an inside corner; alternative to Single Flange Sealant backer with sealant.

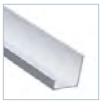
DIMENSIONS (NOM. FT. ~ ACTUAL MM)	3.4" x 10' (86.4MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



H-MOLD

Can be used at the end of 3030 panels instead of the Double Flange Sealant Backer, but not at the preformed outside corners.

DIMENSIONS (NOM. FT. ~ ACTUAL MM)	2" x 10' (50.8MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50



J-MOLD

Can be used instead of Single Flange Sealant Backer at vertical jambs for doors and windows, but not at the inside corners of the building.

DIMENSIONS (NOM. FT. ~ ACTUAL MM)	0.375" x 10' (9.5MM x 3030MM)
PACKAGING (LN. FT. PER TUBE)	50

Our trim gives you options

All of our metal trim is available in four finishes: primed, clear anodized, powder coated, or custom color. For pricing and lead times, view our Price Catalog at nichiha.com/price-catalog.

For popular panels like VintageWood, we've made ordering easier by color matching all of our trim profiles to have in stock for fast delivery.

Thanks to our Color Xpressions system, Nichiha can customize trim to match any color you use on custom color panels.

THE POWER OF POSSIBILITIES AND PARTNERSHIPS

Your creative vision is unique. That's why Nichiha offers you the power of cooperation to help your project move from conception to completion. Our ever-expanding offering of textures and finishes lifts buildings to new and unexpected places, and we want to share them with you. We place a high value on our relationships and are proud to work with our dedicated partners across the country. Join us to discover the power of possibilities and partnerships with Nichiha.

SILICA DUST WARNING: Nichiha products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe Safety Instructions. For further information or questions, please consult the MSDS, your employer, or visit osha.gov/SLTC/silicacrystalline/index.html and cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

Item Name	Metal soffit for Porte Cochere ceiling
Item Type	Metal soffit, pre-manufactured
Description	Extruded decorative aluminum panel
Manufacturer	B&N Industries
Model	Fortina TRA-150MF
Dimensions	176 mm W x 13mm H x manufacturer's standard lengths
Color	Match Nichiha "White Diamond ED680-CUS"
Finish	Baked acrylic coating over aluminum extrusion, followed by application of decorative adhesive film
Material Composition	A 6063 Aluminum alloly, polyolefin resin, ink pigment, polyvinylidene fluoride, methacrylic acid alkyl ester/acrylic acid alkyl ester copolymer
CSI #	057500 - Decorative Formed Metal
Omniclass #	22-057500 Decorative Formed Metal
Best Practices	Recycled content
Thickness	1/4"
Texture/Luster	Smooth
Warranty	2 years

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

INSTALLATION REQUIREMENTS - PRIMED & COLORPLUS® PRODUCTS

IMPORTANT: FAILURE TO INSTALL AND FINISH THIS PRODUCT IN ACCORDANCE WITH APPLICABLE BUILDING CODES AND JAMES HARDIE WRITTEN APPLICATION INSTRUCTIONS MAY LEAD TO PERSONAL INJURY, AFFECT SYSTEM PERFORMANCE, VIOLATE LOCAL BUILDING CODES, AND VOID THE PRODUCT ONLY WARRANTY. BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

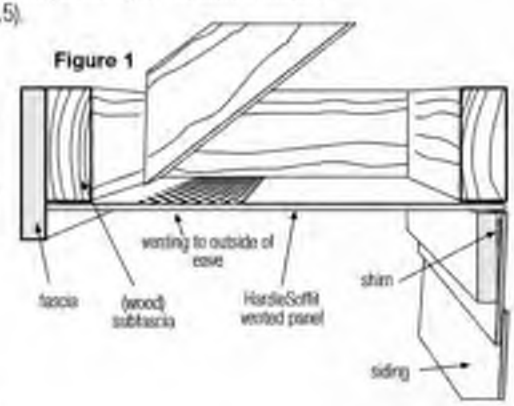
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

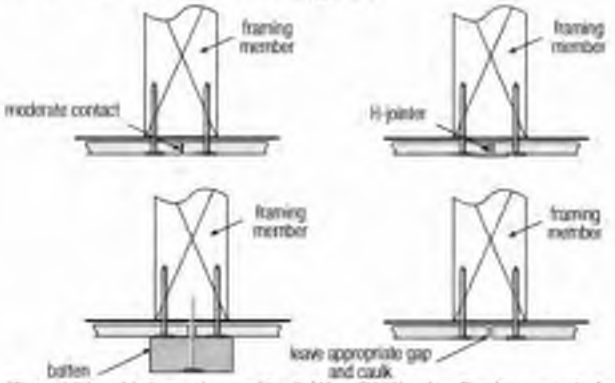


Figure 3

less than or equal to 12" Wide Soffit

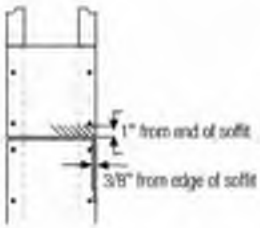

Figure 4

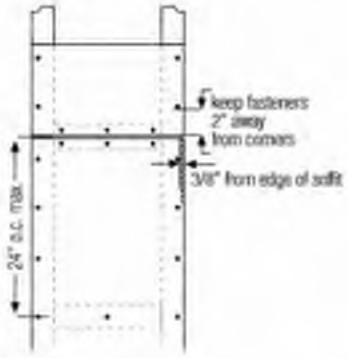
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

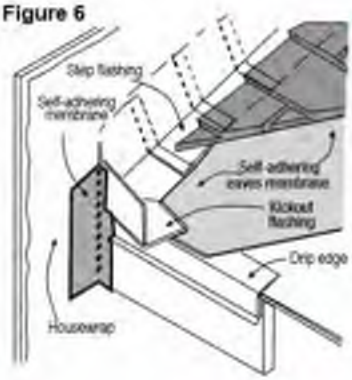
SF1204-P1/3 6/13

EWP-004-A1-JH_GREY

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-004-A1-JH_GREY

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Fiber cement board soffit, lower roofs.
Item Type	Fiber cement board soffit material, perforated for ventilation.
Description	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A.
Manufacturer	Nichiha
Model	NichiSoffit
Dimensions	1/4" x 48" x 96"
Color	White as approved by the Marriott Representative.
Finish	Paint
Material Composition	Portland cement with fiberglass reinforcing fibers.
CSI #	074646 - Fiber Cement Siding
Omniclass #	22-074646 - Fiber Cement Siding
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Fiber-Cement Sheets"
Thickness	1/4"
Texture/Luster	Smooth
Warranty	50 years

We're looking forward

At Nichiha the future is bright

Every day more and more people are discovering the beauty and performance of Nichiha fiber cement cladding products. Once you've seen or used a Nichiha product, you'll be looking for ways to use it again.

Your projects come in all shapes, markets and styles ... at Nichiha we make an attractive fiber cement cladding solution for most of them. Our products help you capture the look of wood in considerably less time and at a fraction of the cost. Our large offering of textures and finishes lifts buildings of all kinds to new and unexpected places.

Discover the performance and versatility of NichiPanel

There's no end to what you can do

There's very little a solid building pro can't do with NichiPanel™. Available in three convenient sizes and four unique textures, this product offers numerous design options. It's an obvious choice for covering big areas quickly and economically. But that's just one dimension. NichiPanels are also great for wrapping posts, creating wainscoting, as a ceiling and for many more applications where performance and aesthetics collide head on with budget concerns.

Punctuate your project with Nichiha

Finish the job with confidence and performance

Our fiber cement trim and soffits provide an attractive, trouble-free solution that's guaranteed to look great for many years to come.

NichiSoffit™ panels are factory primed and sealed assuring a long-lasting, attractive appearance. The panels are available in smooth or in cedar texture and in vented and non-vented styles.

Trimming a home has never been easier than with NichiTrim™ boards. Available in a smooth or cedar texture, NichiTrim boards offer the low maintenance façade homeowners desire. NichiTrim products are factory primed and sealed providing a beautiful and long-lasting appearance.

Performance, Possibilities and Partnerships

Nichiha upholds the highest level of standards for product performance. Our fiber cement siding is built to last. We are confident enough to back our products with some of the strongest warranties in the business. Offering a wide range of design possibilities, Nichiha siding brings all types of unique homes to life. Nichiha also values partnerships and believes our success is directly tied to our dedicated partners. Nichiha is proud to deliver the power of possibilities and partnerships to the residential building community.

Get social with Nichiha. Share your project photos, thoughts, and inspiration with us on social media. We would love to hear from you.

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe the Safety Instructions above. For further information or questions, please consult the MSDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

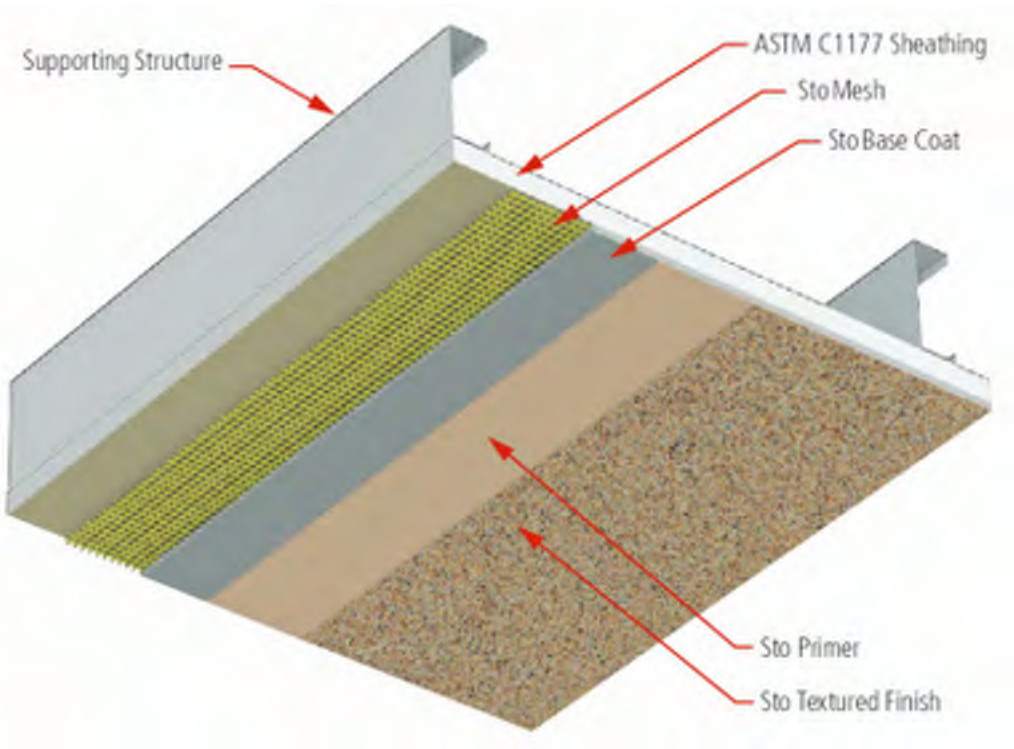
StoQuik® Gold System for Soffits & Ceilings
System Components

Detail No.: 14.00
Date: December 2012



Property of Sto Corp. All Rights Reserved.

Notes:

1. Illustration identifies components of the StoQuik® Gold for Soffits. System to be installed as per Sto®Specification F 601S.

2. Sheathing must comply with ASTM C1177 / C1177M - 08 Standard Specification for Glass Mat Gypsum Substrate for Use as Sheathing.

3. Sheathing is to be installed on a structure sufficient to resist live loads limiting deflection to L/360 normal to the plane of the soffit.

4. Soffit shall be protected from wind blown rain.

5. Soffit shall be designed to prevent accumulation of water behind the sheathing and finish system.

6. StoQuik® Gold for Soffits is not designed to function as an air barrier. The designer should not vent interior conditioned air into the cavity above the soffit.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

www.stocorp.com

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto's instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto's control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO'S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

EWP-004-A2-JH_GREY

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

INSTALLATION REQUIREMENTS - PRIMED & COLORPLUS® PRODUCTS

IMPORTANT: FAILURE TO INSTALL AND FINISH THIS PRODUCT IN ACCORDANCE WITH APPLICABLE BUILDING CODES AND JAMES HARDIE WRITTEN APPLICATION INSTRUCTIONS MAY LEAD TO PERSONAL INJURY, AFFECT SYSTEM PERFORMANCE, VIOLATE LOCAL BUILDING CODES, AND VOID THE PRODUCT ONLY WARRANTY. BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

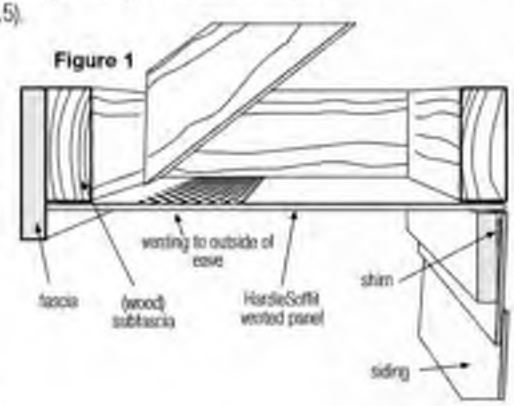
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

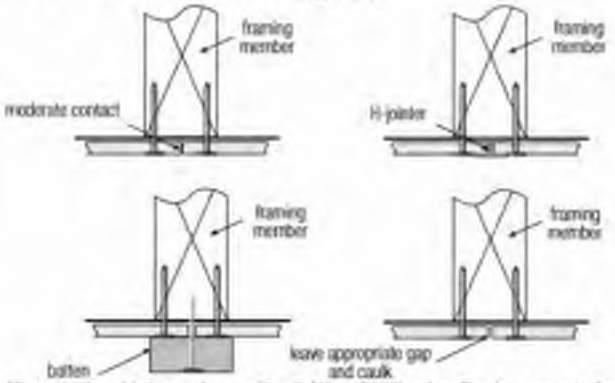


Figure 3

less than or equal to 12" Wide Soffit

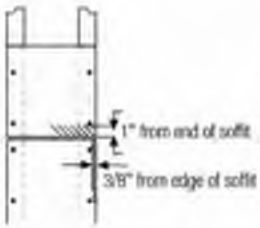

Figure 4

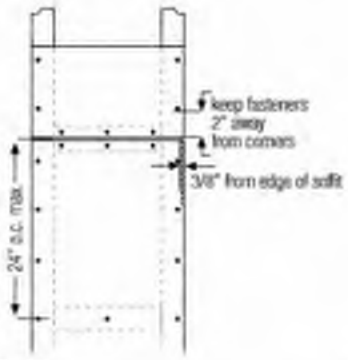
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

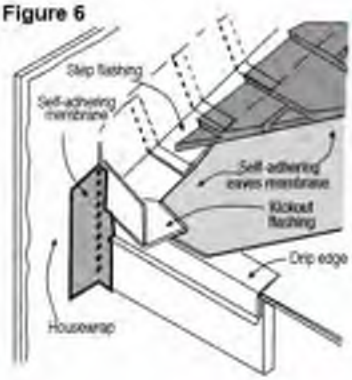
SF1204-P1/3 6/13

EWP-004-A2-JH_GREY

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-004-A2-JH_GREY

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications

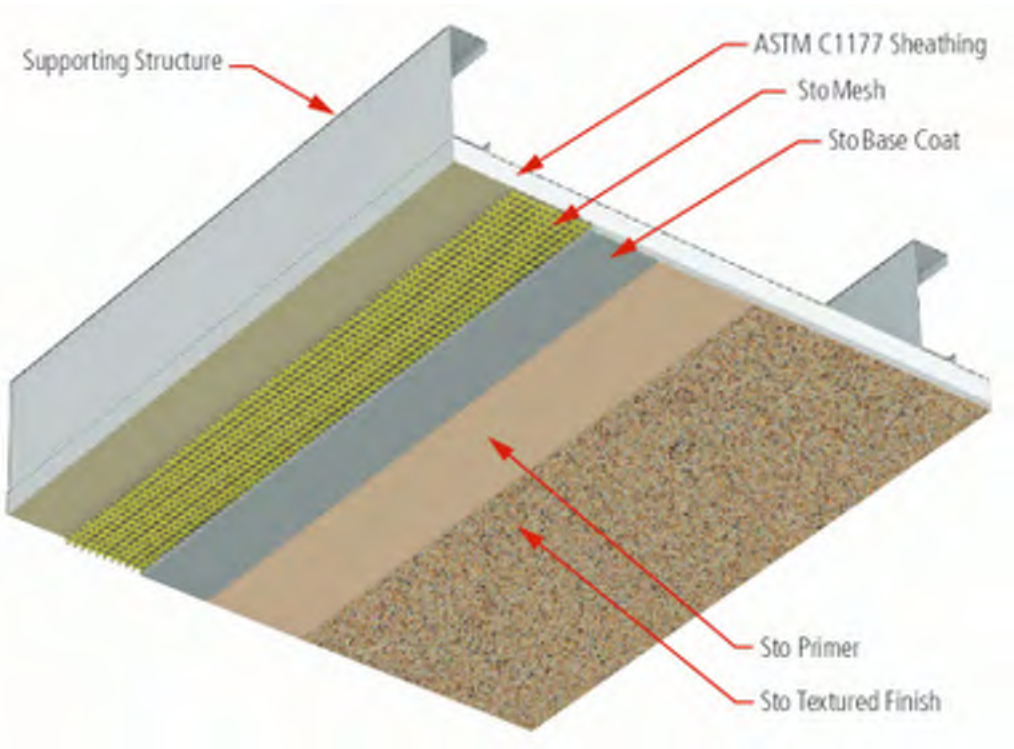
StoQuik® Gold System for Soffits & Ceilings
System Components

Detail No.: 14.00
Date: December 2012



Property of Sto Corp. All Rights Reserved.

Notes:

1. Illustration identifies components of the StoQuik® Gold for Soffits. System to be installed as per Sto®Specification F 601S.

2. Sheathing must comply with ASTM C1177 / C1177M - 08 Standard Specification for Glass Mat Gypsum Substrate for Use as Sheathing.

3. Sheathing is to be installed on a structure sufficient to resist live loads limiting deflection to L/360 normal to the plane of the soffit.

4. Soffit shall be protected from wind blown rain.

5. Soffit shall be designed to prevent accumulation of water behind the sheathing and finish system.

6. StoQuik® Gold for Soffits is not designed to function as an air barrier. The designer should not vent interior conditioned air into the cavity above the soffit.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto's instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto's control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO'S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

We're looking forward

At Nichiha the future is bright

Every day more and more people are discovering the beauty and performance of Nichiha fiber cement cladding products. Once you've seen or used a Nichiha product, you'll be looking for ways to use it again.

Your projects come in all shapes, markets and styles ... at Nichiha we make an attractive fiber cement cladding solution for most of them. Our products help you capture the look of wood in considerably less time and at a fraction of the cost. Our large offering of textures and finishes lifts buildings of all kinds to new and unexpected places.

Discover the performance and versatility of NichiPanel

There's no end to what you can do

There's very little a solid building pro can't do with NichiPanel™. Available in three convenient sizes and four unique textures, this product offers numerous design options. It's an obvious choice for covering big areas quickly and economically. But that's just one dimension. NichiPanels are also great for wrapping posts, creating wainscoting, as a ceiling and for many more applications where performance and aesthetics collide head on with budget concerns.

Finish the job with confidence and performance

Our fiber cement trim and soffits provide an attractive, trouble-free solution that's guaranteed to look great for many years to come.

NichiSoffit™ panels are factory primed and sealed assuring a long-lasting, attractive appearance. The panels are available in smooth or in cedar texture and in vented and non-vented styles.

Trimming a home has never been easier than with NichiTrim™ boards. Available in a smooth or cedar texture, NichiTrim boards offer the low maintenance façade homeowners desire. NichiTrim products are factory primed and sealed providing a beautiful and long-lasting appearance.

Performance, Possibilities and Partnerships

Nichiha upholds the highest level of standards for product performance. Our fiber cement siding is built to last. We are confident enough to back our products with some of the strongest warranties in the business. Offering a wide range of design possibilities, Nichiha siding brings all types of unique homes to life. Nichiha also values partnerships and believes our success is directly tied to our dedicated partners. Nichiha is proud to deliver the power of possibilities and partnerships to the residential building community.

Get social with Nichiha. Share your project photos, thoughts, and inspiration with us on social media. We would love to hear from you.

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe the Safety Instructions above. For further information or questions, please consult the MSDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

HardieSoffit®

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

INSTALLATION REQUIREMENTS - PRIMED & COLORPLUS® PRODUCTS

IMPORTANT: FAILURE TO INSTALL AND FINISH THIS PRODUCT IN ACCORDANCE WITH APPLICABLE BUILDING CODES AND JAMES HARDIE WRITTEN APPLICATION INSTRUCTIONS MAY LEAD TO PERSONAL INJURY, AFFECT SYSTEM PERFORMANCE, VIOLATE LOCAL BUILDING CODES, AND VOID THE PRODUCT ONLY WARRANTY. BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

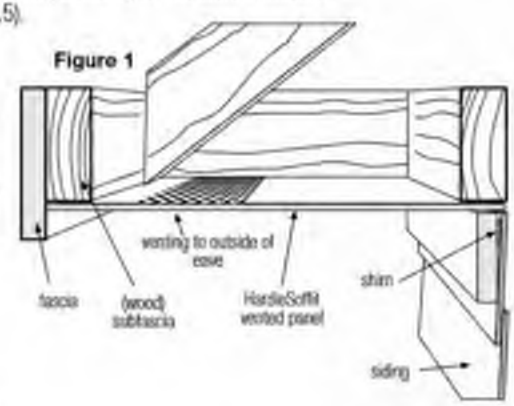
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

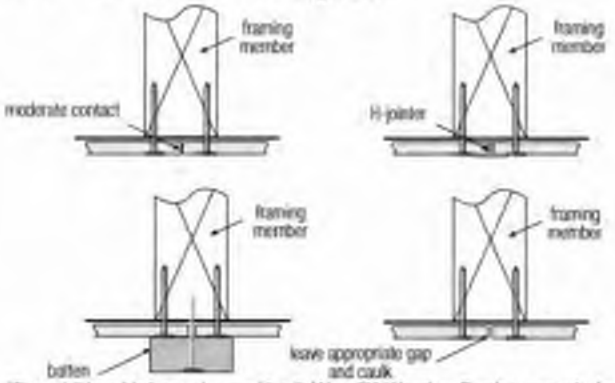


Figure 3

less than or equal to 12" Wide Soffit

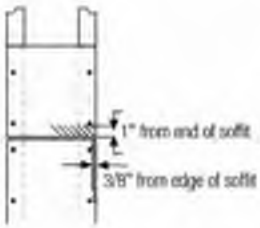

Figure 4

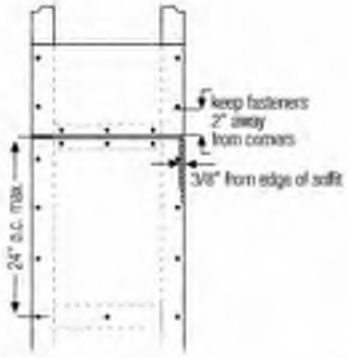
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

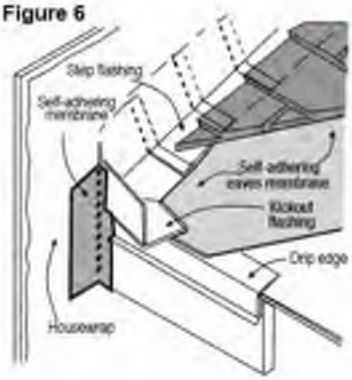
SF1204-P1/3 6/13

EWP-005-A1-JH_GREY

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-005-A1-JH_GREY

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications.

Finish the job with confidence and performance

Our fiber cement trim and soffits provide an attractive, trouble-free solution that's guaranteed to look great for many years to come.

NichiSoffit™ panels are factory primed and sealed assuring a long-lasting, attractive appearance. The panels are available in smooth or in cedar texture and in vented and non-vented styles.

Trimming a home has never been easier than with NichiTrim™ boards. Available in a smooth or cedar texture, NichiTrim boards offer the low maintenance façade homeowners desire. NichiTrim products are factory primed and sealed providing a beautiful and long-lasting appearance.

Performance, Possibilities and Partnerships

Nichiha upholds the highest level of standards for product performance. Our fiber cement siding is built to last. We are confident enough to back our products with some of the strongest warranties in the business. Offering a wide range of design possibilities, Nichiha siding brings all types of unique homes to life. Nichiha also values partnerships and believes our success is directly tied to our dedicated partners. Nichiha is proud to deliver the power of possibilities and partnerships to the residential building community.

Get social with Nichiha. Share your project photos, thoughts, and inspiration with us on social media. We would love to hear from you.

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe the Safety Instructions above. For further information or questions, please consult the MSDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Fiber cement board soffit, upper roofs
Item Type	Fiber cement board soffit material, non-perforated
Description	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A
Manufacturer	James Hardie
Model	Hardie Soffit, non-perforated
Dimensions	1/4" x 48" x 96"
Color	Benjamin Moore "Smoky Ash 986" Gloss
Finish	Sto Quick Gold System for Ceilings and Soffits
Material Composition	Portland cement with fiberglass reinforcing fibers
CSI #	074646 - Fiber Cement Siding
Omniclass #	22-074646 - Fiber Cement Siding
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Fiber-Cement Sheets"
Accessories	Stainless steel perforated vent strip
Thickness	1/4"
Texture/Luster	Smooth
Warranty	50 years

PermaBASE® Cement Board

09 28 00 / NGC

Technical Information
800.NATIONAL • 800.628.4662

DESCRIPTION

PermaBASE® Cement Board is a rigid substrate made of Portland cement, aggregate and glass mesh. It has an exceptionally hard, durable surface that can withstand prolonged exposure to moisture.

Use it as an underlayment or backing surface in a variety of interior and exterior applications, including (but not limited to) tub and shower surrounds, countertops, floors, and for cement board stucco and adhered masonry veneer wall systems.

BASIC USES

Applications

Interior

PermaBASE® Cement Board is a superior underlayment for many interior applications, including kitchen countertops and backsplashes; bathroom shower and tub enclosures, garden and whirlpool tubs, and steamrooms and saunas; flooring for kitchens, bathrooms, entryways, foyers and laundry rooms; walls for bathrooms, accent areas and fireplaces; and special additions, such as swimming pool and whirlpool decks and enclosures.

Exterior

PermaBASE provides an excellent substrate for many exterior applications, including Cement Board Masonry Veneer Wall System (CBMV), Cement Board Stucco System (CBSS), Continuous Insulation (CI), and Exterior Insulation and Finish Systems (EIFS).

PermaBASE allows the combination of exterior finishes on one continuous substrate, providing greater design flexibility. It works well for commercial exteriors, residential exteriors, outdoor kitchens and decks.

Advantages

- EdgeTech® Technology allows for closer fastener application of nails or screws at the edge without crumbling or spinout.
- Use as a substrate for direct-applied finishes, tile, stone and thin brick in exterior applications (as outlined in UL Evaluation Report ER22158-01).
- Use in combustible and non-combustible construction under the IBC and IRC (as outlined in UL Evaluation Report ER22158-01).
- Resists the growth of mold per ASTM D3273 with a score of 10, the best possible score.
- Can be cut using a standard utility knife and straightedge. With the unique PermaBASE core composition, little or no additional labor is needed to clean the edge after a cut.
- Is impact resistant, extremely durable and dimensionally stable. It has excellent overall flexural, compressive and tensile strength characteristics.
- IBC/IRC Compliant. Meets ASTM C1325.
- Is highly moisture resistant, and will not rot, disintegrate or swell when exposed to water.
- Use 1/2 in. (12.7 mm) PermaBASE® in 1-hour and 2-hour rated assemblies (UL Classified).
- Achieves the lowest water-absorption rating of any cement board per ASTM C473, offering better tile bond.
- Achieves GREENGUARD and GREENGUARD Gold Certification. GREENGUARD Certified products are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit: **ul.com/gg**.
- Qualifies as a low-VOC emitting material by meeting California Specification 01350. For more information, visit: **calrecycle.ca.gov/greenbuilding/specs/section01350**.

Heat Shield Applications

- UL approved for heat shield/wall protector per ANSI/UL 1618 and ULC 632.
- Protects combustible walls.
- Reduces required clearance from wall by 40 percent.
- Lightweight and easy to install.

Cement Board Stucco Wall System (CBSS)

- Engineered system that allows a faster installation while providing superior quality control (manufactured product that must comply with ASTM product specifications).
- Provides a 15-year exterior warranty – the industry's best.

Cement Board Masonry Veneer Wall System (CBMV)

- Engineered system that allows a faster installation while providing superior quality control (manufactured product that must comply with ASTM product specifications).
- Approved for use in ASTM C1780, and cement board is cited as an approved substrate for this system by the Masonry Veneer Manufacturers Association (MVMA): Installation Guide and Detailing Options for Compliance with ASTM C1780.
- Easily allows for the inclusion of continuous insulation into the assembly.
- Speed up your schedule – faster, easier and cleaner than traditional metal lath/scratch coat method.

1. Specified values per ASTM C1325, tested in accordance with ASTM C473.
2. Tested in accordance with ASTM E84.
3. Tested in accordance with ASTM C518.
4. Tested in accordance with ASTM E96.
5. Tested in accordance with ASTM D3273.
6. Tested in accordance with ASTM G21.
7. Specified values per ASTM C1325, tested in accordance with ASTM D1037.
8. Specified values per ASTM C1325, tested in accordance with ASTM C947.
9. Tested in accordance with ASTM C473, 24-hour immersion.
10. Per ANSI A118.9 procedure B. Tested in accordance with ASTM C666.
11. Tested in accordance with ASTM D2394.
12. Tested in accordance with ASTM E330.

Perma BASE® CEMENT BOARD

PermaBASE® Cement Board

(Continued from page 1)

INSTALLATION RECOMMENDATIONS

Interior Applications

General: All framing should comply with local building code requirements and be designed to provide support with a maximum allowable deflection of L/360 under all intended loads. Framing members should be spaced a maximum of 16 in. o.c.

Note: Cut or score PermaBASE on printed side of panel. Install tile and tile setting materials in accordance with current ANSI specifications and Tile Council of North America (TCNA) guidelines.

Control joints: For interior installations, allow maximum of 30 lineal feet between control joints. A control joint must be installed, but is not limited to the following locations: where expansion joints occur in the framing or building (discontinue all cross furring members located behind joint); when boards abut dissimilar materials; where framing material changes; at changes of building shape or structural system; at each story separation. Place control joints at corners of window and door openings, or follow specifications of architect. Control joint cavity shall not be filled with coating or other materials.

Walls & Ceilings

Wall framing: Edges of PermaBASE parallel to framing should be continuously supported. Provide additional blocking when necessary to permit proper PermaBASE attachment.

Do not install PermaBASE directly over protrusions from stud plane such as heavy brackets or fastener heads. Studs above a shower floor should be either notched or furred to accommodate the thickness of the waterproof membrane or pan. The surround opening for a tub or precast shower receptor should not be more than 1/4 in. larger than unit to be installed.

Ceiling framing: The deflection of the complete ceiling assembly due to dead load (including insulation, PermaBASE, bonding material and facing material) should not exceed L/360. The dead load applied to the ceiling frame should not exceed 10 psf. Ceiling joist or furring channel should not exceed 16 in. o.c.

(Edges of PermaBASE parallel to framing should be continuously supported.) Provide additional blocking when necessary to permit proper PermaBASE attachment.

PermaBASE Cement Board: Apply PermaBASE with ends and edges closely butted, but not forced, together. Stagger end joints in successive courses. Drive fasteners into field of cement board first, working toward ends and edges. Space fasteners maximum 8 in. o.c. for walls, 6 in. o.c. for ceilings with perimeter fasteners at least 3/8 in. and less than 5/8 in. from ends and edges. Ensure PermaBASE is tight to framing.

Joint reinforcement: Trowel bonding material to completely fill the tapered recessed board joints and gaps between each panel. On non-tapered joints, apply a 6" wide, approx. 1/16" thick, coat of bonding material over entire joint. For all joints, immediately embed 2" alkali-resistant fiberglass mesh tape fully into applied bonding material and allow to cure. Same bonding material should be applied to corners, control joints, trims or other accessories. Feather bonding material over fasteners to fully conceal.

Floors & Counters

Subfloor or Base: For flooring applications with 16 in. o.c. floor joists, 5/8 in. tongue and groove exterior grade plywood or 3/4 in. tongue and groove exterior grade OSB may be used. For 19.2 in. o.c. and 24 in. o.c. floor joists, 3/4 in. tongue and groove exterior grade plywood or OSB must be used. Tile size for floors with 24 in. o.c. floor joists must be 12 in. x 12 in. or larger. The joists and subfloor assembly must meet L/360, as well as the appropriate code tables, for live and dead loads.

Underlayment: Using a 1/4 in. square-notched trowel, apply a setting bed of Latex-Portland Cement mortar or Thin-Set mortar to the subfloor or counter base. Immediately laminate PermaBASE to subfloor or base leaving a 1/8 in. space between boards at all joints and corners. Leave a 1/4 in. gap along walls. Stagger joints so they do not line up with underlying substrate joints. Fasten PermaBASE every 8 in. o.c. throughout board field and around all edges while setting bed mortar is still workable. Around perimeter of each board, locate fasteners 2 in. from the corners and not less than 3/8 in. from the edges. Fill all joints solid with bonding material. On non-tapered joints such as butt ends, apply a 6 in. wide, 1/16 in. thick coat over the entire joint. For all joints, embed fiberglass mesh tape fully into applied bonding material; ensure that tape is centered over joint. Apply bonding material over fasteners to fully conceal. Remove all excess bonding material and allow to cure.

Exterior Applications

General: All framing should comply with local building code requirements and be designed to provide support with a maximum allowable deflection of L/360 under all intended live (including wind) and dead loads.

Control joints: For exterior installations, consult finish manufacturer for spacing requirements. For exterior tile applications, control joints should be spaced a maximum of every 12 ft. If no recommendation is available, allow a maximum of 16 lineal feet between control joints. A control joint must be installed but not limited to the following locations: where expansion joints occur in the framing or building (discontinue all cross furring members located behind joint); when boards abut dissimilar materials; where framing material changes; at changes of building shape or structural system; at each story separation. Place control joints at corners of window and door openings or follow specifications of architect. Control joint cavity shall not be filled with coating or other materials.

Perma BASE® CEMENT BOARD

PermaBASE® Cement Board

LIMITATIONS

Interior

- Treat joints with alkali-resistant fiberglass mesh tape set in a modified mortar.
- Do not use conventional paper gypsum board tape, joint compound and gypsum board nails or screws.
- Do not treat joints with mesh tape or waterproofing fabrics embedded in liquid [illegible] roofing.
- Do not exceed 16 in. (406 mm) o.c. as maximum wall framing spacing. Must be designed to limit deflection to L/360 under all live and dead loads.
- Steel framing must be minimum 20-gauge (galvanized) (.0312 in. design thickness) or heavier.
- PermaBASE is not a water barrier. Consult local building code for moisture-barrier requirements.
- Do not use with vinyl flooring.
- To install interior direct-applied finishes to PermaBASE, you must embed reinforcing mesh in basecoat. Consult finish manufacturer for additional requirements.
- Do not expose PermaBASE to temperatures over 220°F (105°C).
- Do not use PermaBASE as a nailing base for other finishes.

Exterior

- To install properly, follow the instructions of the finish material manufacturer.
- For conventional Portland cement plaster systems, use a self-furring metal lath over PermaBASE and fasten it to studs.
- Install a code-approved Weather Resistant Barrier (WRB) to protect the cavity. The type and placement will vary per local building codes and/or manufacturer's specifications, installation guidelines and warranties.
- Do not use PermaBASE as a nailing base for other finishes.

Cement Board Stucco Wall System (CBSS)

- Follow finish material manufacturer's instructions for proper installation.
- Treat joints in PermaBASE with mesh tape and basecoat.
- Thin veneer construction can reveal planar irregularities in framing.
- Minor cracking at joints may become visible in finished exterior surface.
- Exterior finishes applied directly to PermaBASE: Reinforcing mesh must be embedded in basecoat (consult exterior finish manufacturer for additional installation requirements).
- Code-Approved Weather Resistant Barrier (WRB) must first be installed to protect the cavity (type and placement will vary per local building codes and/or manufacturer's specifications, installation guidelines and warranties).

Cement Board Masonry Veneer Wall System (CBMV)

- Sheathing selection and installation varies according to type of wall construction.
- Code-approved Weather Resistant Barrier (WRB) must be installed to protect the cavity (type and placement will vary per local building codes and/or manufacturer's specifications, installation guidelines and warranties).
- Treat joints with alkali-resistant fiberglass mesh tape set in a modified mortar.
- Follow mortar manufacturer's instructions for proper installation.

Handling and Project Conditions

- Avoid water exposure during shipping, handling, storage, installation and after installation of cement boards to avoid the formation of mold or mildew.
- Store cement boards off the ground and under cover. Store boards flat. Use sufficient supports extending under the entire length of cement boards to prevent sagging.
- Keep cement boards dry to minimize the potential for mold growth. Take adequate care while transporting, storing, applying and maintaining cement boards.
- Do not apply cement boards with visible signs of moisture damage or mold growth. Do not apply cement boards over other building materials where conditions exist that are favorable to mold growth.

Maintenance Following Application

- Maintain essential elements of sound weather-tight building envelope, including roofing, joint sealants, windows and flashings.
- Take immediate and appropriate remediation measures as soon as water leaks or condensation sources are identified.
- Perform routine cleaning and maintenance operations using methods that prevent moisture saturation of cement boards.
- Maintain final wall finishes to protect the cement board as well as support the structure.

HardieSoffit®

HardieSoffit® Panel Products Description

HARDIESOFFIT® PANELS

HardieSoffit® panels are 8-ft. and 12-ft. long, ¼-in. thick factory-primed fiber-cement panels designed to be used on the underside of eaves as soffit material. HardieSoffit panels are available as vented or non-vented boards. Vented HardieSoffit panels provide 5 sq. in. of net free ventilation per lineal foot of soffit.

James Hardie offers HardieSoffit panels in a range of time-saving pre-cut widths common to rake and eave applications. HardieSoffit panels come in either a smooth finish or Select Cedarmill® textured finish. Check with your local dealer for product availability. HardieSoffit panels can be combined with HardieTrim® Fascia boards used for fascia rakes and frieze applications to complete the eaves detailing.

HardieSoffit panels are also available with ColorPlus® Technology. The ColorPlus® coating is a factory-applied, oven-baked finish available on a variety of James Hardie® siding and trim products. See your local dealer for details and availability of products, colors and accessories.

HARDIESOFFIT® BEADED PORCH PANEL

HardieSoffit Beaded Porch Panel is a decorative fiber cement panel to be used as ceiling on the underside of porches or eaves as exterior panel materials. HardieSoffit beaded porch panel is 1/4-in. thick, 4 ft. wide, 8 ft. in length, and has 2 in. o.c. beads, and comes with PrimePlus® factory primer and sealer. Must be finished with 100% acrylic paint. See your local dealer for details and availability of products, colors and accessories.

BEFORE INSTALLATION, CONFIRM THAT YOU ARE USING THE CORRECT HARDIEZONE INSTRUCTIONS. TO DETERMINE WHICH HARDIEZONE APPLIES TO YOUR LOCATION, VISIT WWW.HARDIEZONE.COM OR CALL 1-866-942-7343 (866 9HARDIE)

STORAGE & HANDLING:

Store flat and keep dry and covered prior to installation. Installing siding wet or saturated may result in shrinkage at butt joints. Carry product on edge. Protect edges and corners from breakage. James Hardie is not responsible for damage caused by improper storage and handling of the product.

⚠ CUTTING INSTRUCTIONS

OUTDOORS
1. Position cutting station so that wind will blow dust away from user and others in working area.
2. Use one of the following methods:
   - a. Best: i. Score and snap; ii. Shears (manual, electric or pneumatic)
   - b. Better: i. Dust reducing circular saw equipped with a HardieBlade® saw blade and HEPA vacuum extraction
   - c. Good: i. Dust reducing circular saw with a HardieBlade saw blade (only use for low to moderate cutting)

INDOORS
1. Cut only using score and snap, or shears (manual, electric or pneumatic).
2. Position cutting station in well-ventilated area

- NEVER use a power saw indoors
- NEVER use a circular saw blade that does not carry the HardieBlade saw blade trademark
- NEVER dry sweep – Use wet suppression or HEPA Vacuum

Important Note: For maximum protection (lowest respirable dust production), James Hardie recommends always using "Best"-level cutting methods where feasible.

NIOSH-approved respirators can be used in conjunction with above cutting practices to further reduce dust exposures. Additional exposure information is available at www.jameshardie.com to help you determine the most appropriate cutting method for your job requirements. If concern still exists about exposure levels or you do not comply with the above practices, you should always consult a qualified industrial hygienist or contact James Hardie for further information.

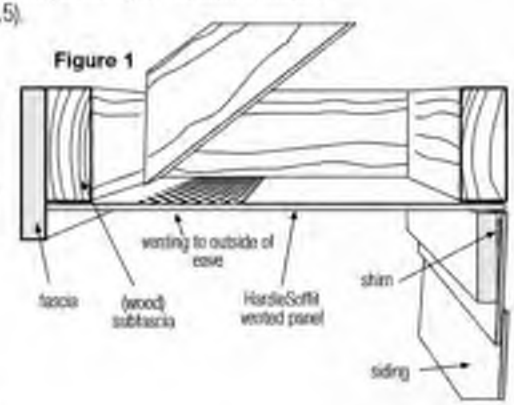
GENERAL REQUIREMENTS:

- HardieSoffit® panels may be installed over either steel or wood framing complying with the local building code. See General Fastening Requirements. Install soffits to nominal 2 x 4 framing members spaced a maximum of 24 inches on center (fig.4).
- All edges must be supported by framing. (figs. 3 & 4)
- Install water barriers and air barriers as required by local building codes. James Hardie will assume no responsibility for moisture infiltration.
- Ensure gutters have end caps. Maintain a minimum 1" gap between end caps and siding & trim (fig.5).
- Install kickout flashing at roof-wall junctions. (fig 6.)
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.

INSTALLATION:

- HardieSoffit panels must be fastened to a solid, nailable substrate such as a wood 2x subfascia.
- Additional framing may be needed to ensure proper fastening.
- Soffits can be installed as shown in figure 1. Position the vent holes toward the outside of the eave for optimal airflow.
- 12" to 24" wide Vented HardieSoffit panels, provide 5.0 square inches of net free ventilation per lineal foot.
- Alternatively vents can be installed into non-vented soffit.
- If necessary, an insect screen can be installed using construction adhesive.
  Note: net free ventilation will be reduced.

Figure 1



Fastener Requirements

- Position fasteners 3/8" from panel edges and no closer than 2" away from corners when using soffit greater than 12" wide (fig. 4) and no closer than 1" away from corners when using soffit that is less than or equal to 12" wide (fig. 3).

Jointing Methods

- Install panels in moderate contact at ends, provide PVC or metal jointers, battens or leave appropriate gap and caulk (fig 2).

Figure 2

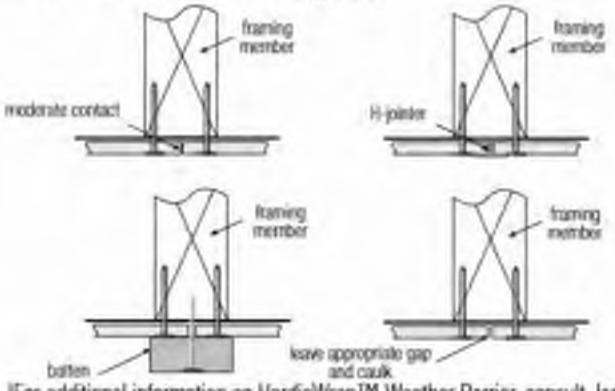


Figure 3

less than or equal to 12" Wide Soffit

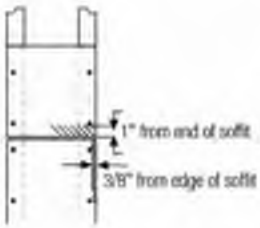

Figure 4

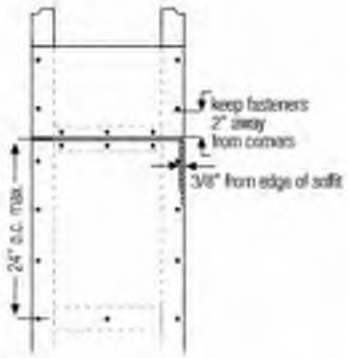
Greater than 12" Wide Soffit



†For additional information on HardieWrap™ Weather Barrier, consult James Hardie at 1-866-4Hardie or www.hardiewrap.com

WARNING: AVOID BREATHING SILICA DUST

James Hardie® products contain respirable crystalline silica, which is known to the State of California to cause cancer and is considered by IARC and NIOSH to be a cause of cancer from some occupational sources. Breathing excessive amounts of respirable silica dust can also cause a disabling and potentially fatal lung disease called silicosis, and has been linked with other diseases. Some studies suggest smoking may increase these risks. During installation or handling: (1) work in outdoor areas with ample ventilation; (2) use fiber cement shears for cutting or, where not feasible, use a HardieBlade saw blade and dust reducing circular saw attached to a HEPA vacuum; (3) warn others in the immediate area; (4) wear a properly fitted, NIOSH-approved dust mask or respirator (e.g. N-95) in accordance with applicable government regulations and manufacturer instructions to further limit respirable silica exposures. During clean-up, use HEPA vacuums or wet cleanup methods - never dry sweep. For further information, refer to our installation instructions and Material Safety Data Sheet available at www.jameshardie.com or by calling 1-800-9HARDIE (1-800-942-7343). FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND INSTALLATION INSTRUCTIONS MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

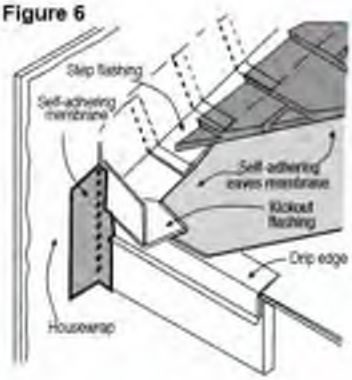
SF1204-P1/3 6/13

EWP-005-A2-JH_GREY

Maintain a minimum 1" gap between gutter end caps and siding & trim.

Figure 5

Figure 6



KICKOUT FLASHING

Because of the volume of water that can pour down a sloped roof, one of the most critical flashing details occurs where a roof intersects a sidewall. The roof must be flashed with step flashing. Where the roof terminates, install a kickout to deflect water away from the siding. It is best to install a self-adhering membrane on the wall before the subfascia and trim boards are nailed in place, and then come back to install the kickout.

Figure 6, Kickout Flashing To prevent water from dumping behind the siding and the end of the roof intersection, install a "kickout" as required by IRC code R905.2.8.3 : "...flashing shall be a min. of 4" high and 4" wide." James Hardie recommends the kickout be angled between 100° - 110° to maximize water deflection

FASTENER REQUIREMENTS

- For wood frame construction a minimum 4d common nails spaced 8" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.
- For conventional 20ga steel frame construction a minimum No. 8-18 x 0.323" HD x 1" long ribbed bugle screws spaced 6" o.c. at panel edges and intermediate framing members spaced up to 24" on center are suitable in most locations*.

*Minimum Basic Wind Speed differs by locality. Where specified levels of wind resistance are required, refer to applicable Building Code Compliance Reports.

Manufacturers of ACQ and CA preservative-treated wood recommend spacer materials or other physical barriers to prevent direct contact of ACQ or CA preservative-treated wood and aluminum products. Fasteners used to attach HardieTrim Tabs to preservative-treated wood shall be of hot dipped zinc-coated galvanized steel or stainless steel and in accordance to 2009 IRC R317.3 or 2009 IBC 2304.9.5."

PNEUMATIC FASTENING

James Hardie products can be hand nailed or fastened with a pneumatic tool. Pneumatic fastening is highly recommended. Set air pressure so that the fastener is driven snug with the surface of the siding. A flush mount attachment on the pneumatic tool is recommended. This will help control the depth the nail is driven. If setting the nail depth proves difficult, choose a setting that under drives the nail. (Drive under driven nails snug with a smooth faced hammer - Does not apply for installation to steel framing).

GENERAL FASTENING REQUIREMENTS

Fasteners must be corrosion resistant, galvanized, or stainless steel. Electro-galvanized are acceptable but may exhibit premature corrosion. James Hardie recommends the use of quality, hot-dipped galvanized nails. James Hardie is not responsible for the corrosion resistance of fasteners. Stainless steel fasteners are recommended when installing James Hardie® products near the ocean, large bodies of water, or in very humid climates..

- Consult product evaluation or listing for correct fasteners type and placement to achieve specified design wind loads.
- NOTE: Published wind loads may not be applicable to all areas where Local Building Codes have specific jurisdiction. Consult James Hardie Technical Services if you are unsure of applicable compliance documentation.
- Drive fasteners perpendicular to siding and framing.
- Fastener heads should fit snug against siding (no air space). (fig. A)
- Do not over-drive nail heads or drive nails at an angle.
- If nail is countersunk, fill hole and add a nail. (fig. B)
- For wood framing, under driven nails should be hit flush to the plank with a hammer (For steel framing, remove and replace nail).
- **Do not use aluminum fasteners, staples, or clipped head nails.**

EWP-005-A2-JH_GREY

CUT EDGE TREATMENT

Caulk, paint or prime all field cut edges. James Hardie touch-up kits are required to touch-up ColorPlus products.

CAULKING

For best results use an Elastomeric Joint Sealant complying with ASTM C920 Grade NS, Class 25 or higher or a Latex Joint Sealant complying with ASTM C834. Caulking/Sealant must be applied in accordance with the caulking/sealant manufacturer's written instructions. **Note: OSI Quad as well as some other caulking manufacturers DO NOT allow tooling.**

PAINTING

DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products. James Hardie products must be painted within 180 days for primed product and 90 days for unprimed. 100% acrylic topcoats are recommended. Do not paint when wet. For application rates refer to paint manufacturers specifications. Back-rolling is recommended if the siding is sprayed.

COLORPLUS® TECHNOLOGY CAULKING, TOUCH-UP & LAMINATE

- Care should be taken when handling and cutting James Hardie ColorPlus products. During installation use a wet soft cloth or soft brush to gently wipe off any residue or construction dust left on the product, then rinse with a garden hose
- Touch up nicks, scrapes and nail heads using the ColorPlus® Technology touch-up applicator. Touch-up should be used sparingly. If large areas require touch-up, replace the damaged area with new HardieSoffit® panel with ColorPlus Technology.
- Laminate sheet must be removed immediately after installation of each course.
- Terminate non-factory cut edges into trim where possible, and caulk. Color matched caulks are available from your ColorPlus dealer.
- Treat all other non-factory cut edges using the ColorPlus Technology edge coaters, available from your ColorPlus® product dealer.

Note: James Hardie does not warrant the usage of third party touch-up or paints used as touch-up on James Hardie ColorPlus products.

Problems with appearance or performance arising from use of third party touch-up paints or paints used as touch-up that are not James Hardie touch-up, will not be covered under the James Hardie ColorPlus Limited Finish Warranty.

PAINTING JAMES HARDIE® PRODUCTS WITH COLORPLUS® TECHNOLOGY

When repainting ColorPlus products, James Hardie recommends the following regarding surface preparation and topcoat application:

- Ensure the surface is clean, dry, and free of any dust, dirt, or mildew
- Repriming is normally not necessary
- 100% acrylic topcoats are recommended
- DO NOT use stain, oil/alkyd base paint, or powder coating on James Hardie® Products.
- Apply finish coat in accordance with paint manufacturers written instructions regarding coverage, application methods, and application temperature
- DO NOT caulk nail heads when using ColorPlus products, refer to the ColorPlus touch-up section

RECOGNITION: HardieSoffit Panel complies with ASTM C1186 in so doing meets the Fiber-Cement Siding code requirements in the 2006 International Building Code® Section 1404.10 and 1405.15, the 2009/12 International Building Code Section 1404.10 and 1405.16 ; and the 2006/09/12 International Residential Code® for One- and Two-Family Dwellings Table R703.4 and section R703.10. HardieSoffit panel is also recognized for application in the following: State of Florida Product Approval FL13265, Dade County, Florida NOA No. 13-0311.07, U.S. Dept. of HUD Materials Release 1263, Texas Department of Insurance Product Evaluation EC-23, City of New York MEA 223-93-M, and California DSA PA-019. These documents should also be consulted for additional information concerning the suitability of this product for specific applications.

Item Name	Fiber cement board soffit, upper roofs
Item Type	Fiber cement board soffit material, non-perforated
Description	Non-combustible fiber cement, exterior grade soffit board complying with ASTM C1186, Grade II, Type A
Manufacturer	Nichiha
Model	NichiSoffit smooth, non-perforated
Dimensions	1/4" x 48" x 96"
Color	Benjamin Moore "Smoky Ash 986" Gloss
Finish	Sto Quick Gold System for Ceilings and Soffits
Material Composition	Portland cement with fiberglass reinforcing fibers
CSI #	074646 - Fiber Cement Siding
Omniclass #	22-074646 - Fiber Cement Siding
Best Practices	Recycled content
Quality Standards	ASTM C1186 "Standard Specification for Flat Fiber-Cement Sheets"
Accessories	Stainless steel perforated vent strip
Thickness	1/4"
Texture/Luster	Smooth
Warranty	50 years

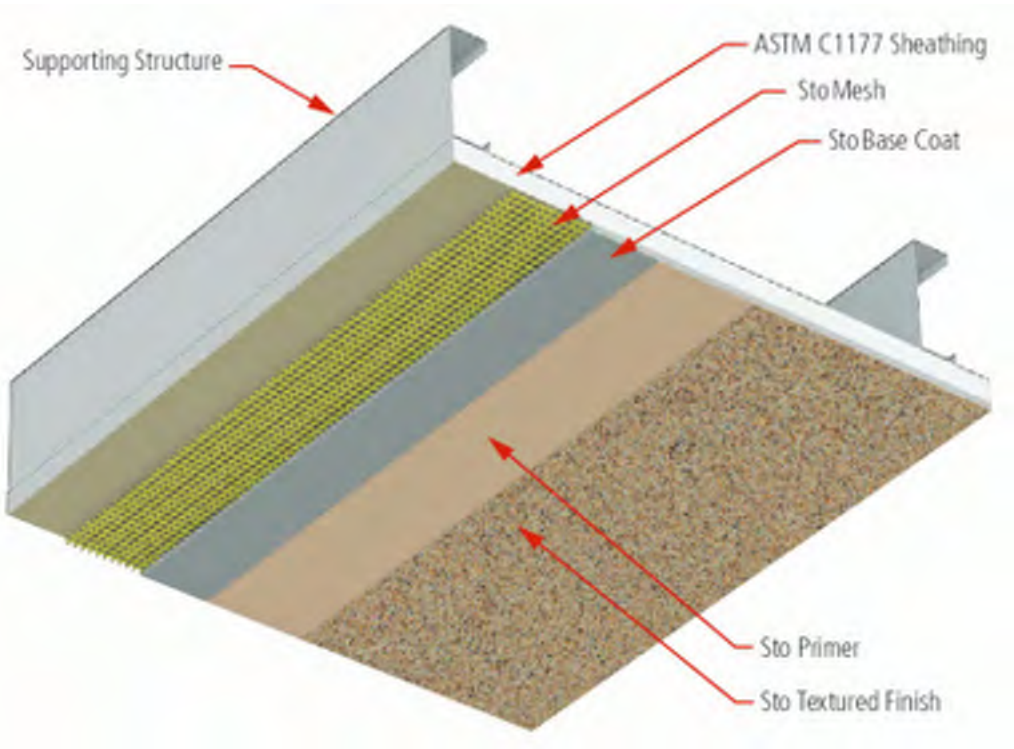
StoQuik® Gold System for Soffits & Ceilings
System Components

Detail No.: 14.00
Date: December 2012



Property of Sto Corp. All Rights Reserved.

Notes:

1. Illustration identifies components of the StoQuik® Gold for Soffits. System to be installed as per Sto®Specification F 601S.

2. Sheathing must comply with ASTM C1177 / C1177M - 08 Standard Specification for Glass Mat Gypsum Substrate for Use as Sheathing.

3. Sheathing is to be installed on a structure sufficient to resist live loads limiting deflection to L/360 normal to the plane of the soffit.

4. Soffit shall be protected from wind blown rain.

5. Soffit shall be designed to prevent accumulation of water behind the sheathing and finish system.

6. StoQuik® Gold for Soffits is not designed to function as an air barrier. The designer should not vent interior conditioned air into the cavity above the soffit.

IMPORTANT: Components not identified as Sto are furnished by other manufacturers and are not necessarily installed by trades who install the Sto products. Refer to project specific contract documents.

www.stocorp.com

ATTENTION

Sto products are intended for use by qualified professional contractors, not consumers, as a component of a larger construction assembly as specified by a qualified design professional, general contractor or builder. They should be installed in accordance with those specifications and Sto's instructions. Sto Corp. disclaims all, and assumes no, liability for on-site inspections, for its products applied improperly, or by unqualified persons or entities, or as part of an improperly designed or constructed building, for the nonperformance of adjacent building components or assemblies, of for other construction activities beyond Sto's control. Improper use of Sto products or use as part of an improperly designed or constructed larger assembly or building may result in serious damage to Sto products, and to the structure of the building or its components.

STO CORP. DISCLAIMS ALL WARRANTIES EXPRESSED OR IMPLIED EXCEPT FOR EXPLICIT LIMITED WRITTEN WARRANTIES ISSUED TO AND ACCEPTED BY BUILDING OWNERS IN ACCORDANCE WITH STO'S WARRANTY PROGRAMS WHICH ARE SUBJECT TO CHANGE FROM TIME TO TIME. For the fullest, most current information on proper application, clean-up, mixing and other specifications and warranties, cautions and disclaimers, please refer to the Sto Corp. website, www.stocorp.com.

We're looking forward

At Nichiha the future is bright

Every day more and more people are discovering the beauty and performance of Nichiha fiber cement cladding products. Once you've seen or used a Nichiha product, you'll be looking for ways to use it again.

Your projects come in all shapes, markets and styles ... at Nichiha we make an attractive fiber cement cladding solution for most of them. Our products help you capture the look of wood in considerably less time and at a fraction of the cost. Our large offering of textures and finishes lifts buildings of all kinds to new and unexpected places.

Discover the performance and versatility of NichiPanel

There's no end to what you can do

There's very little a solid building pro can't do with NichiPanel™. Available in three convenient sizes and four unique textures, this product offers numerous design options. It's an obvious choice for covering big areas quickly and economically. But that's just one dimension. NichiPanels are also great for wrapping posts, creating wainscoting, as a ceiling and for many more applications where performance and aesthetics collide head on with budget concerns.

Punctuate your project with Nichiha

Finish the job with confidence and performance

Our fiber cement trim and soffits provide an attractive, trouble-free solution that's guaranteed to look great for many years to come.

NichiSoffit™ panels are factory primed and sealed assuring a long-lasting, attractive appearance. The panels are available in smooth or in cedar texture and in vented and non-vented styles.

Trimming a home has never been easier than with NichiTrim™ boards. Available in a smooth or cedar texture, NichiTrim boards offer the low maintenance façade homeowners desire. NichiTrim products are factory primed and sealed providing a beautiful and long-lasting appearance.

Performance, Possibilities and Partnerships

Nichiha upholds the highest level of standards for product performance. Our fiber cement siding is built to last. We are confident enough to back our products with some of the strongest warranties in the business. Offering a wide range of design possibilities, Nichiha siding brings all types of unique homes to life. Nichiha also values partnerships and believes our success is directly tied to our dedicated partners. Nichiha is proud to deliver the power of possibilities and partnerships to the residential building community.

Get social with Nichiha. Share your project photos, thoughts, and inspiration with us on social media. We would love to hear from you.

Silica Dust Warning: NICHIHA products may contain some amounts of crystalline silica [a.k.a. sand, silicon dioxide], which is a naturally occurring mineral. The amount will vary from product to product. Inhalation of crystalline silica into the lungs and repeated exposure to silica can cause health disorders, such as silicosis, lung cancer, or death depending upon various factors. To be conservative, Nichiha recommends that whenever cutting, sawing, sanding, sniping or abrading the product, users observe the Safety Instructions above. For further information or questions, please consult the MSDS, your employer, or visit www.osha.gov/SLTC/silicacrystalline/index.html and www.cdc.gov/niosh/topics/silica. The MSDS for Nichiha products are available at www.nichiha.com, at your local Nichiha dealer or through Nichiha directly at 1.866.424.4421. FAILURE TO ADHERE TO OUR WARNINGS, MSDS, AND OTHER INSTRUCTION MAY LEAD TO SERIOUS PERSONAL INJURY OR DEATH.

Extrudeck® series

The gold-standard of extruded aluminum canopies

Extrudeck's® unique "J channel" water capture system makes this a functional yet attractive choice for any building. Its lightweight design provides protection from the elements and its easy hanger capability makes installation a snap. Extrudeck® is available pre-engineered in a wide variety of widths and lengths, a choice of finishing options will highlight your buildings facade.

Features and Benefits:

- Unique built-in drainage system
- Superior durability and lightweight design
- A variety of mounting options:
  hanger rod, cantilever, post mount
- Pre-engineered
- Wide selection of fascia profiles,
  compliments any design
- Modular design and construction
- Weather protection
- Adjustable pitch
- Floating internal structure
- Surprisingly affordable

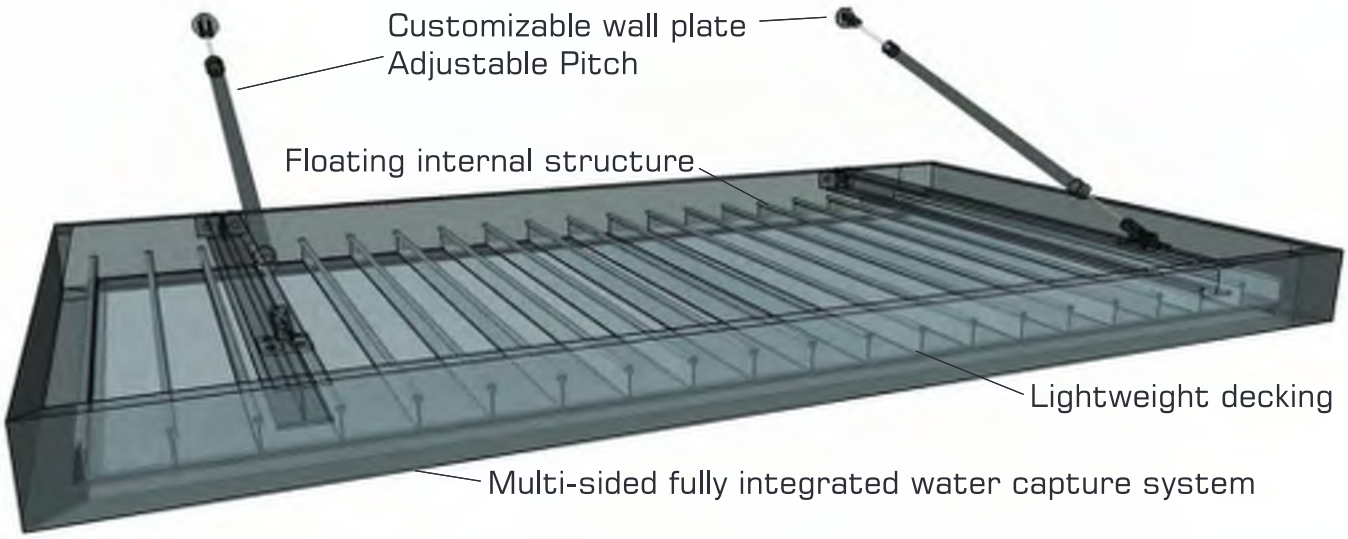
MASA Architectural Canopies Ecoshade® and Extrudeck® systems can help you achieve LEED Credits.

Innovative environmental control through creative design

MASA ARCHITECTURAL CANOPIES

Extrudeck® series

The gold-standard of extruded aluminum canopies



Applications:

Doorways / Windows / Loading Docks / Walkways / Handicap ramps

Technical Data:

- All extrusions meet criteria for ASTM B221 and ASTM B429
- All products are engineered to meet standards of ASCE for design loads
- All channel framing is .125 6063-T5 high strength extruded aluminum

For PDF or AutoCAD Drawings go to: www.architecturalcanopies.com and click on downloads

Finishes:

- Standard finish super-durable Tiger Drylac Series 39 or 49 polyester resin based powder coating.

Other Finishes Available:

- Matthews/ppg Eurothane wet application
- Kynar Liquid Flouropolymer

Full color palettes are also available for download at **www.architecturalcanopies.com**

All finishes are AAMA rated for excellent outdoor durability

Item Name	Exterior Concrete Deck
Item Type	Portland cement concrete
Description	Portland cement concrete pool deck, broom finish, natural gray concrete color.
Manufacturer	Qualified local concrete batch plant
Model	Not applicable
Dimensions	Refer to the Design Guideline Drawings
Color	Natural gray
Finish	Fine broom texture (non-slip broom finish - refr to Marriott Loss Prevention)
Material Composition	ASTM C150 Type 1 portland cement concrete and graded fine aggregates
CSI #	321316 - Decorative Concrete Paving
Omniclass #	22-321316 - Decorative Concrete Paving
Compressive Strength	2500 psi minimum; to be determined by engineer of record
Structural Performance	To be determined by engineer of record
Best Practices	Recycled content in reinforcing materials. Pavement to have a minimum solar reflectance index (SRI) of 0.29.
Quality Standards	ASTM C150 “Standard Specification for Portland Cement“
Accessibility Compliance	ADA and ANSI A117.1
Accessories	Reinforcing Materials as determined by Engineer of Record. Joint Sealants: ASTM C920. Non priming, pourable, self leveling polyurethane. Sealed expansion and contraction joints: Filler of nonbituminous rubber or cork conforming to ASTM D1752. Clear Liquid-Membrane Forming and Sealing Curing Compound: Comply with ASTM C309, Type I, Class A unless other type acceptable to Owner’s Representative. Moisture loss no more than 0.055 gr./sq. cm. when applied at 200 sq. ft./gal.

SPECIAL INSTRUCTIONS

1. After concrete is tamped and floated, one pass shall be made to remove derby wrinkles and water depressions.
2. Provide one pass of a nylon bristled push broom immediately after slab has been troweled.

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Special concrete finish
Item Type	Decorative cementitious topping
Description	Decorative polymer-modified decorative pavement overlay with acrylic topcoat for Outdoor pool deck finish.
Manufacturer	Mortex Materials
Model	Keystone Kool Deck
Dimensions	Application Thickness: 3/16"
Color	To be approved by Marriott
Finish	Acrylic topcoat
Material Composition	Polymer-modified Portland cement with polyvinyl acetate emulsion.
CSI #	03 35 36 Exterior Concrete Pool Deck Finishing
Omniclass #	22-033536-Exterior Concrete Pool Deck Finishing
Compressive Strength	(ASTM C109) 2500 psi at 28 days
Structural Performance	Freeze/Thaw Resistance 70 cycles (ASTM C666); Abrasion Resistance (ASTM C944) 2 kg. Load – Less than 1 gm. (texture 50% flat), 6 kg. Load – Less than 3 gm. (texture 50% flat)
Best Practices	Low-emitting materials
Quality Standards	ASTM C109 Standard Test Method for Compressive Strength of Hydraulic Cement Mortars (Using 2-in. or [50-mm] Cube Specimens); ASTM C666 Standard Test Method for Resistance of Concrete to Rapid Freezing and Thawing; ASTM C944 Standard Test Method for Abrasion Resistance of Concrete or Mortar Surfaces by the Rotating-Cutter Method
Accessories	Expansion Joint Material per manuafacturer, Joint Sealant per manufacturer, Curing Membrane: 6 mil polyethylene sheet meeting the requirements of ASTM C171
Eco-Feature(s) *as per manufacturer	Low-emitting materials
Pattern	To be approved by Marriott
Slip Resistance Index(SRI)	NA
Product	Classic Texture
Warranty	WARRANTY FOR DECORATIVE CONCRETE OVERLAYS A. Manufacture of product and contractor(s) installation of decorative concrete overlays are to hereby warrant that all labor and materials furnished and work performed, guarantee the product will be free from defects due to defective materials or workmanship for one (1) year from our Date of Substantial Completion.

1. Product to be free of defects in material, i.e. bond failure, chipping, flaking, or peeling of the (Contractor) Application for a period of one year when subject to formal use. Due to the inherent movement in concrete, soil and possible lack of structural integrity of these substrate, no guarantee, either expressed or implied, is granted concerning cracks in coating or bond failure adjacent to substrate cracking. Warranty does not include taking responsibility for existing concrete soundness or failures caused by obvious mistreatment, neglect, or improper maintenance.
2. Manufacturer/Contractor to repair or replace any or all of the work which may prove to be defective in materials, together with any adjacent work which requires repair or replacement because of defective materials. This warranty does not include normal wear and tear or repair and replacement of materials which have been abused, neglected or not maintained in accordance with the manufacturer's recommended maintenance procedures and schedules

MORTEX™

Concrete Answers for Better Living®

Kool Deck®

Cool then, still Kool.

Be Sure It's the Original

Kool Deck® concrete topping was invented by Mortex in 1962. It is a beautiful surface for swimming pool decks, walkways, patios and virtually any foot traffic area. Once applied, it generates a colored, textured cement surface that is as strong as the base concrete.

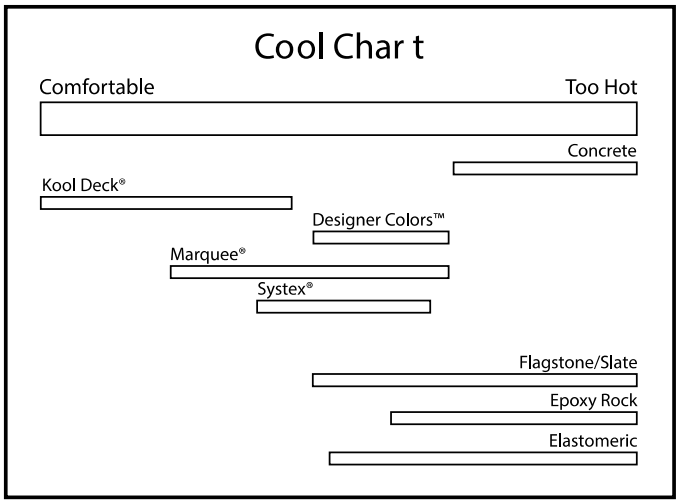
- **Significantly lowers the surface temperature of concrete.**
- **Withstands thermal expansion and contraction better than concrete.**
- **Requires minimal cleaning. Just rinse with water. When necessary, scrub with soap and water to keep the surface looking great.**
- **Proprietary mixture of natural substances and synthetic iron oxide pigments.**
- **Environmentally safe.**
- **Unaffected by normal pool chemicals**

Designer Color COLLECTION™

Colorful Alternatives

Designer Colors are an extension of the Kool Deck color line. Made of the same durable formula as Mortex's classic Kool Deck topping, the Designer Color Collection provides additional colors and a beautiful nonskid surface at the same low cost of the classic Kool Deck colors.

The colors of the Mortex Designer Color line are inspired by nature. This palette is made up of deeper hues, designed to compliment a natural landscaping environment. Even though this color collection is darker, it will be more comfortable than plain concrete in the heat of the summer months.



Six Reasons Why Kool Deck® Concrete Topping is Still The Best

1. Comfort - Even during the hottest summer days, you can walk, sit, sunbathe or play on your Kool Deck surface. It's more comfortable because it stays cooler than plain concrete or other decking surfaces.

2. Durability - The Kool Deck concrete topping is specifically formulated to be far stronger, more durable, and more stain-resistant than other surfaces. It will stand up against even the roughest, most demanding environments such as 100°+ days to freezing nights.

3. Safety - A Kool Deck topping creates a non-skid, textured surface that is designed to help reduce the risk of accidents, even when wet, to give you peace of mind.

4. Beauty - A Kool Deck surface is a beautiful addition to your pool, walkway, patio or entire landscape package. The rich, consistent color and texture make it much more attractive than plain concrete. Its beauty compliments the natural environment and other landscaping techniques.

5. Cost - This is the best - even with its far superior quality, a Kool Deck surface is less expensive than other deck surfacing products. The quality of a Kool Deck surface adds distinction and lasting value to your property.

6. Variety - Kool Deck toppings offer you a striking choice of luxurious, pastel colors...one which is perfect for the environment you want to create.

Kool Deck® Colors

Sedona Tan

Adobe Buff

Aztec Gold

Sand Buff

Rose Pink

Coral Peach

Aqua

Birch Grey

Designer Color Collection™ Colors

Mauve

MORTEX®

Since 1962, Mortex™ has been the contractor's choice for innovative and superior quality products. Mortex revolutionized the swimming pool industry with the introduction of our Keystone Kool Deck product, that literally changed the face of swimming pool decks forever. Since then, Mortex has continued to set the industry standards for product innovation, quality and customer service.

SUNDEK®
You stand on it. We stand behind it.®

Classic Texture

Polymer Modified Cement Overlay with Acrylic Topcoat

PRODUCT DESCRIPTION AND USE

Sundek Classic Texture is a two-component (112 or 113 Premix and 210 Sundek Additive) sprayed and knock down cement application. It is a material capable of obtaining excellent adhesion to dry, properly prepared concrete. Sundek Classic Texture is a cement coating that can be colored (via Sundek Finish Coat) to any of the existing 16 standard colors or to any special one requested by the end user, with the capability to incorporate about any pattern and color effect. The material releases soils easily making it easy to clean and has excellent resistance to a broad range of chemicals. It is a fast drying material and in many cases, areas being coated can be back to service the following day from completion.

Sundek Classic Texture was developed as a pool deck concrete resurfacing product due to it's non skid properties, easy to clean and coolness under foot in hot climate conditions. The large array of patterns and color effects, make it equally ideal for use on driveways, patios, entryways, sidewalks, balconies, etc.

Chemical Composition
112 & 113 Premix: A proprietary blend of Portland cement with various sizes of aggregates, fillers and additional items to enhance performance, hardness, and durability.
210 Sundek Additive: A proprietary blend of polyvinyl acetate emulsion.
Sundek Finish Coat: A proprietary blend of acrylic emulsions with aggregate and pigments.

Colors
Bone White, Oyster White, Franciscan Tan, Indian Wheat, Mission Tan, Kahula, Tea N Cream, Sable, Mojave Sand, Terra Cotta, Brick Red, Tweed Gray, Pewter Gray, Peking Blue, Smoke Gray and Cumberland. Custom colors also available.

Limitations
- Surface must be mechanically prepared and dry.
- Concrete surface to be coated needs to be structurally sound.
- Do not install over soft surfaces such as vinyl or any rubberized coating.
- Do not install over metal or wood.
- Do not install if rain or cold weather is forecasted.
- Slab and ambient temperature above 40° F

TECHNICAL DATA

Physical Properties

Mixing Ratio:
Sundek Additive……..…1.5 quarts
Water……..……3 quarts
Sundek Premix…….45 pounds
VOC Premix & Additive……..< 50 g/l
VOC Select Finish Coat *(varies with color & pigment loading)* ……..< 150 g/l
VOC Premium & Premium Plus Finish Coat……..……...< 100 g/l
Pot Life (77 degrees, 25% R.H.)……...…15 minutes
Pot Life is reduced by increasing humidity and/or temperature.
Dry Times (77ºF, 25% R.H.)

- Dry to Touch..... 1 hour
- Light Traffic.....2 hours
- Vehicle Traffic.....72 hours
- Full Chemical Resistance .72 hours

Performance Properties

Weights lbs/ft @ 3/16” ……1.3 lbs
Thickness (Typical)…….……3/16”
Bond strength (ASTM C297)…….…..469 psi
Accelerated Aging Test (ASTM A756 D & E)…….……no effect
Freeze-Thaw (ASTM C-67)……..…..No Breakage < 1% weight loss
Slip Resistance (S.C.O.F.) (ASTM C-1028)…….... .81 Wet - 1.03 Dry
Abrasion Test (ASTM D-1242)……...…….. .0328 in = 3000 psi Concrete
Absorption Test (ASTM S-570)……...….12.7%
Weatherometer (ASTM G23) 2000 hrs……...……..no effect
Wind Uplift 1-52 Test Procedure @ 190 mph=……...Recover Set/.020 in
Percolation Test (ASTM D-1242) 48”/48hr…….<1%
Impact Resistance Mil D-3134 F……..No Breakage/<.001 in
Fire Resistance (ASTM E108/UBCSTD #32-7/UL790)…….Class A

CHEMICAL AND STAIN RESISTANCE

Heavy duty detergent solution……...……no effect
Ammonia solution – 5%.....no effect
Prestone coolant……...…….no effect
Kerosene……no effect
Soap solution – 1%.....no effect
Diesel fuel……..no effect
Turpentine……..no effect
Gasoline…….no effect
Paint thinner……..……no effect
Tuolene……..no effect
Industrial detergent……no effect
Salt 20% solution……...no effect
Transformer oil……..……superficial darkening
Sulfuric acid – 3%.....superficial bleaching
Sulfuric acid concentrated…….……considerable darkening
Hydraulic fluids……..considerable darkening
Lubricating oil ……..……superficial darkening

GENERAL INFORMATION

Moisture Vapor Emissions/Alkalinity Precautions

All interior concrete floors not poured over an effective moisture vapor retarder are subject to possible moisture vapor transmission and related high levels of alkalinity that may lead to blistering and failure of the coating system. It is the coating applicator's responsibility to conduct calcium chloride and relative humidity probe testing to determine if excessive levels of vapor emissions or alkalinity are present before applying any coatings. These test kits are available from SDP. Sundeck Products USA, Inc. and its sales agents will not be responsible for coating failures due to undetected moisture vapor emissions or related high levels of alkalinity.

Surface Preparation

Etch, grind or shotblast the concrete substrate to achieve an ICRI Concrete Surface Profile (CSP) of 2-3, resembling 80-100 grit sandpaper. If diamond grinding take care not to polish the surface. 25-30 grit diamonds are recommended for grinding prep work. Before application of the basecoat, the surface must be clean and sound. **New concrete must be cured for a minimum of 7 days**

Mixing Instructions

For Base Coat application, mix per each 45 pound bag of Premix, 6 quarts of pre-mixed Sundek Additive (2 parts water, 1 part Additive). Mix for about 2 minutes and then proceed to install. Apply with a squeegee at a coverage rate of 150-200 sf/bag. For rougher surfaces, including exposed aggregate, a second base coat may be required.

For Texture Coat application, mix per each 45 pound bag of Premix, 4-5 quarts of pre-mixed Sundek Additive (2 parts water, 1 part Additive). Mix for about 2 minutes and then proceed to spray using the ¼" opening on the spray hopper to achieve a good stipple at a coverage rate of 150 sf/bag. When is starts to set, knock-down using a trowel to achieve the Classic Texture appearance.

Handling Precautions

Use only with adequate ventilation/or a cartridge type respirator designed to be used for concrete dust. Avoid contact with skin, wear protective gloves. Read Safety Data Sheet before using.

Slip and Fall Precautions

OSHA and the American Disabilities Act (ADA) have now set enforceable standards for slip-resistance on pedestrian surfaces. The current coefficient of friction required by ADA is 0.6 on level surfaces and 0.8 on ramps. Sundeck Products USA, Inc. recommends the use of angular slip-resistant aggregate in all coatings or flooring systems that may be exposed to wet, oily or greasy conditions. It is the contractor and end users' responsibility to provide a flooring system that meets current safety standards. Sundeck Products USA, Inc. or its sales agents will not be responsible for injury incurred in a slip and fall accident.

WARRANTY INFORMATION

Sundeck Products USA, Inc. guarantees that this product is free from manufacturing defects and complies with our published specifications. In the event that the buyer proves that the goods received do not conform to these specifications or were defectively manufactured, the buyer's remedies shall be limited to either the return of the goods and repayment of the purchase price or replacement of the defective material at the option of the seller. SUNDECK PRODUCTS USA, INC. MAKES NO OTHER WARRANTY, EXPRESSED OR IMPLIED, AND ALL WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED. Sundeck Products USA, Inc. shall not be liable for damages caused by application of its products over concrete with excessive moisture vapor transmission or alkalinity. Sundeck Products USA, Inc. shall not be liable for any injury incurred in a slip and fall accident. Manufacturer or seller shall not be liable for prospective profits or consequential damages resulting from the use of this product.

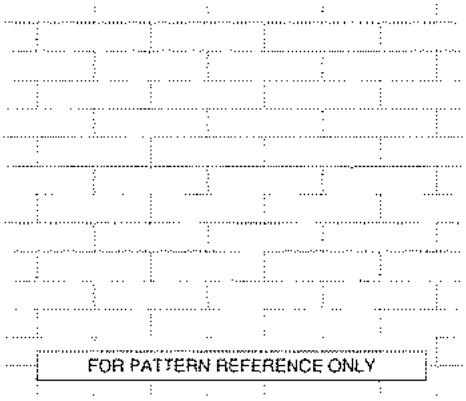
Revision Date:

Item Name	Decorative Unit Paving
Item Type	Precast concrete pavers
Description	Precast concrete unit pavers with integral coloring.
Manufacturer	Hanover Architectural Products
Model	N/A
Dimensions	4" W x 8" L x 3-1/2" deep
Color	To be approved by Marriott.
Finish	To be approved by Marriott.
Material Composition	ASTM C150 Portland cement and graded aggregates.
CSI #	321413 - Precast Concrete Unit Paving
Omniclass #	22-321413 - Precast Concrete Unit Paving
Classification	SX, Type I
Compressive Strength	Min 7500 psi/ 8500 psi average.
Best Practices	Local/Regional source
Quality Standards	ASTM C902 Standard Specification for Pedestrian and Light Traffic Paving Brick
Accessories	Geotextile fabric and edge restraints.
Eco-Feature(s) *as per manufacturer	To be verified
Pattern	To be approved by Marriott.
Slip Resistance Index(SRI)	Must have 0.33 installed or 0.28 after three years
Product	Permeable
Lead Time	To be verified



SPECIAL INSTRUCTIONS

The base course shall be spread in layers which when compacted will not exceed 4" to a depth as shown on Drawings; ensure a minimum 95% of ASTM D1557. Sand laying course shall be spread evenly over the area to be paved and screeded to a level that will produce the required 1" thickness when the paving stones have been placed and vibrated.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Low-slope roofing system
Item Type	Single-ply
Description	EPDM Membrane Roofing, fully adhered installation
Manufacturer	Carlisle Syntec Systems
Model	"Sure-Seal Adhered Roofing System"
Dimensions	0.060" (60 mils) thickness
Color	White on Black (Laminated)
Material Composition	Ethylene-propylene-diene monomer sheet
CSI #	07 53 23 Ethylene-Propylene-Diene-Monomer Roofing
Omniclass #	22-07 53 23 Ethylene-Propylene-Diene-Monomer Roofing
Classification	ASTM D4637 Type I (Non-reinforced)
Fire/Smoke Rating	UL Class A
Quality Standards	ASTM D4637 "Standard Specification for EPDM Sheet Used in Single-Ply Roofing Membrane"; "The NRCA Roofing Manual: Membrane Roofing Systems"; Factory Mutual Global resources (Refer to Secondary Sheet)
Accessories	Base flashing: 0.060" EPDM sheet; Walkway pads: 0.30" x 30-inches x 30-inches; Adhesives and sealants: As standard with manufacturer.
Product	"Sure-Seal Adhered Roofing System"
Warranty	Manufacturer: 20 years No Dollar Limit; includes metal counterflashing, copings, and roof edge systems (Refer to Section 07 62 00 - Sheet Metal Flashing and Trim) Installer: 2 years. Include wind speed rider appropriate for basic wind speed and peak gust speed in project jurisdiction.
Notes	Lap sealant or pre-formed seam tape (Manufacturer's option) Product Data Web Link: https://tinyurl.com/bdftkey7

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Low-slope roofing system
Item Type	Single-ply
Description	EPDM Membrane Roofing, fully adhered installation
Manufacturer	Roofing Products International, Inc.
Model	Royal Edge Fully-Adhered System
Dimensions	0.060" (60 mils) thickness
Color	Black
Material Composition	Ethylene-propylene-diene monomer sheet
CSI #	07 53 23 Ethylene-Propylene-Diene-Monomer Roofing
Omniclass #	22-07 53 23 Ethylene-Propylene-Diene-Monomer Roofing
Classification	ASTM D4637 Type I (Non-reinforced)
Fire/Smoke Rating	UL Class A
Quality Standards	ASTM D4637 "Standard Specification for EPDM Sheet Used in Single-Ply Roofing Membrane"; "The NRCA Roofing Manual: Membrane Roofing Systems"; Factory Mutual Global resources (Refer to Secondary Sheet)
Accessories	Base flashing: 0.060" EPDM sheet; Walkway pads: 0.30" x 30-inches x 30-inches; Adhesives and sealants: As standard with manufacturer.
Product	Royal Edge Fully-Adhered System
Warranty	Manufacturer: 20 years No Dollar Limit; includes metal counterflashing, copings, and roof edge systems (Refer to Section 07 62 00 - Sheet Metal Flashing and Trim) Installer: 2 years. Include wind speed rider appropriate for basic wind speed and peak gust speed in project jurisdiction.
Notes	Lap sealant or pre-formed seam tape (Manufacturer's option) Product Data Web Link: https://www.rpiroyaledge.com/royaledge.cfm

SPECIAL INSTRUCTIONS

Black membranes are not to be installed on Entrance Canopies or Porte Cocheres.

OMG TerminEdge™ & TerminEdge AR for single-ply.

FASCIA SYSTEM

FASCIA SYSTEM

PRODUCT DATA SPECIFICATIONS

PRODUCT DESCRIPTION

OMG's two-piece snap-on fascia for single-ply applications. TerminEdge and TerminEdge AR Fascia provide superior protection from wind and water penetration.

FEATURES & BENEFITS

- Formed galvanized steel retainer or a formed aluminum retainer with self-locating, pre-punched and slotted holes reduces installation time.
- Sizes range from 3.75- to 13-inches.
- ANSI/SPRI/FM-4435 ES-1 Tested and Certified.
- Warranted in wind conditions up to 155 mph and comes with a 25-year, Category 5 Wind Warranty.

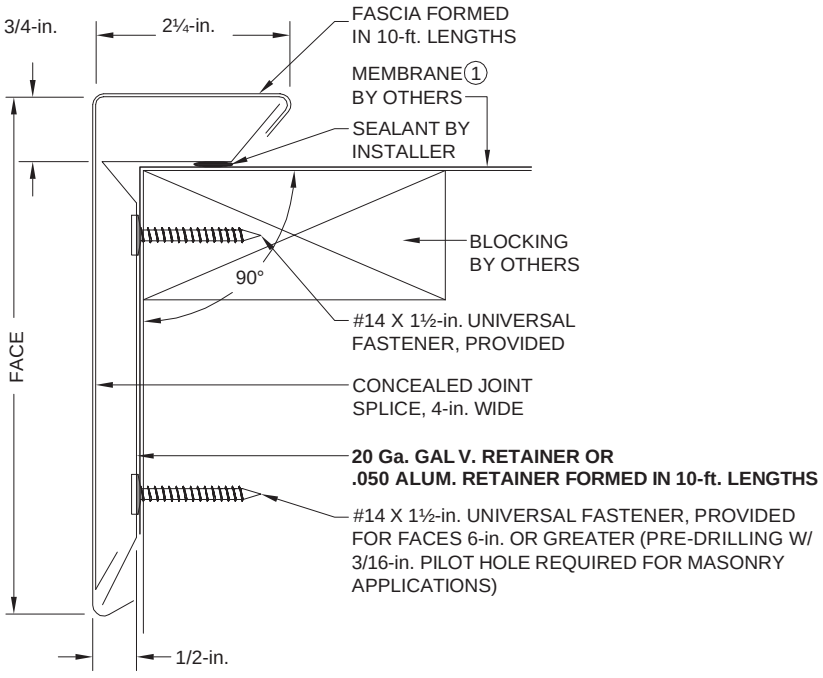
CATEGORY 5 WARRANTY

FM APPROVED

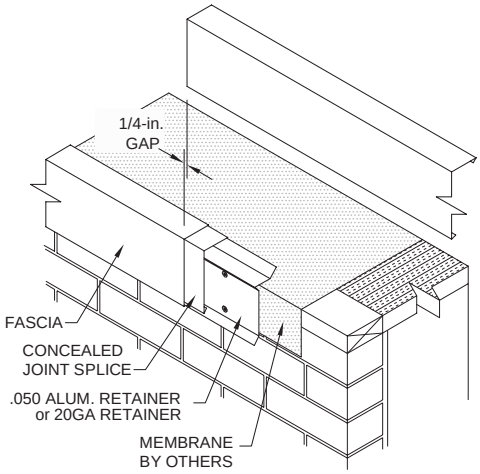
Standard Fascia Sizes	Face Height	Gauge	Nailers* Covered
TE 375	3.75-in.	All sizes available in prefinished 22 & 24 gauge galvanized steel; .050-in., .063-in. aluminum; 22 gauge Stainless Steel	1
TE 525	5.25-in.		2
TE 675	6.75-in.		3
TE 825	8.25-in.		4
TE 1125	11.25-in.		6

Custom Sizes are available from 3.75- to 13-in.

***Nominal 2-in. x 6-in. nailer actual dimension is 1.5-in. tall**



① Coordinate installation with membrane manufacturer.



OMG EdgeSystems

OMG TerminEdge™ FASCIA SYSTEM & OMG TerminEdge AR FASCIA SYSTEM for single-ply.

INSTALLATION PROCEDURE

SPECIFICATIONS *(short form)*

TerminEdge fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes.

TerminEdge fascia cap shall be formed metal with a galvanized steel retainer.

TerminEdge AR fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes. The fascia cap shall be formed metal with a .050 aluminum retainer.

The roof edge shall be TerminEdge (insert model number). Fascia and retainer will be in 10-ft. (3.04 m) lengths.

DESCRIPTION

TerminEdge is a two-part assembly with a rigid formed retainer, and a decorative snap-on fascia cover for single-ply roofs. The fascia cap is available in aluminum, .040-in. (1 mm), .050-in. (1.25 mm) or .063-in. (1.60 mm) or 22 ga. and 24 ga. Kynar 500® coated galvanized steel and with concealed splice plates. Retainer will be 20 gauge galvanized steel or .050 aluminum with self-locating pre-punched slotted holes for fasteners at 12-in. (304.8 mm) on center in 10-ft. (3.04 m) standard lengths.

INSTALLATION PROCEDURES

This is a general outline. Refer to our full installation guide for details.

Preparation:

The roof edge must be level and wood nailers must be straight.

Install the roofing membrane according to the roofing membrane manufacturer's instructions. The edge of the membrane should extend over the face of the building approximately 3-in. (76.2 mm) and be secured by the retainer section or as required by the membrane manufacturer.Before the retainer is installed, apply a continuous bead of the roof manufacturer's sealant to the bottom side of the retainer. Secure the retainer using OMG's #14 Universal Fasteners (for wood, metal and concrete. Locate the fasteners in the pre-punched slotted holes. Unless otherwise specified, fasteners should be located every 12-in. (304.8 mm).

Locate the fasteners in the pre-punched holes as required. Install concealed joint splices between each fascia section. Hook the joint splice from the top and allow it to hang down and rest on the face of the retainer. Do not hook the splice plate under the retainer. Install fascia by hooking the back flange over the top of the retainer. Snap the fascia on by pushing down firmly on the leading edge until bottom snaps over the drip edge of the retainer. Leave a 1/4-in. gap at each joint for thermal movement. Coordinate with membrane manufacturer before starting installation.

FINISHES

- Natural mill aluminum
- Pre-coat Kynar 500 — from the manufacturer's standard color chart
- Post-coat Kynar 500 — industry standard two coat colors
- Non-standard Kynar 500 — colors requiring multiple coatings or protective clear coats
- Anodized aluminum – clear, bronze and black

GUARANTEE

A. Manufacturer's Standard Warranty: Warranted materials shall be free of defects in material and workmanship for five years after shipment. If, after inspection, the manufacturer agrees that materials are defective, the manufacturer shall at their option repair or replace them. For decorative finish warranty, consult manufacturer.

B. Special 25-Year Category 5 Warranty: Manufacturer shall guarantee that a standard size roof edge system, when installed per manufacturer's instructions, will not blow off, leak, or cause membrane failure, even in wind conditions up to 155 mph, or the manufacturer shall replace or repair its materials.

CATEGORY 5 WARRANTY

C. Decorative Finish Warranty *(consult Manufacturer).*

QUALITY ASSURANCE

The fascia product shall be listed in the current Factory Mutual Research Corporation Approval Guide approved by ANSI/SPRI/FM 4435/ES-1 SPRI Test Method RE-2 Pull-Off test for fascia. Fascia shall be certified by the manufacturer to design pressures as indicated in current edition of Wind Resistance Standard for Edge Systems Used with Low Slope Roofing Systems.

TECHNICAL SERVICES

Shop drawings are available from the factory. Product samples, detail sheets, color chips and color charts are ready for your submittal package. Long form specifications and CAD details are available on our website. For personal assistance with questions or submittals, contact your local OMG representative.

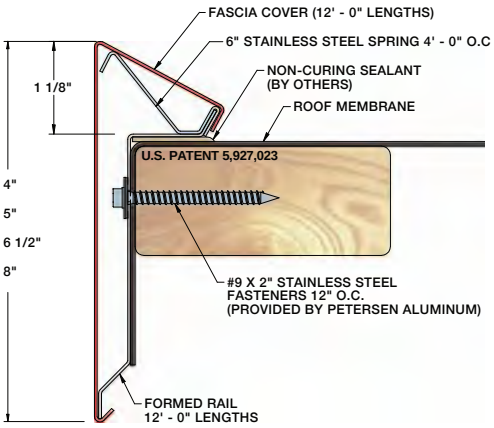
PAC SNAP EDGE FASCIA

FULLY ADHERED OR MECHANICALLY ATTACHED SINGLE-PLY VERSION

SIZES

Face Heights	Nailer Coverage
4″	1 Nailers
5″	2 Nailers
6½″	3 Nailers
8″	4 Nailers



PRODUCT FEATURES

- Quick lead times to keep projects on schedule
- Economically priced and easy to install
- Pre-punched, slotted holes for precise fastener placement
- Wide variety of colors and finishes
- Convenient 12′ lengths
- Reusable and recyclable material
- Efficient design eliminates need for stripping in/heat welding
- Factory fabricated miters and scuppers available
- All fasteners are included

MATERIALS

- 37 Stocked PAC-CLAD Finishes (24 gauge steel)
- 20 Stocked PAC-CLAD Finishes (.040 aluminum)
- 29 Stocked PAC-CLAD Finishes (.050 aluminum)
- 6 Stocked PAC-CLAD Finishes (.063 aluminum)
- Mill Finish Aluminum (.040, .050 & .063 aluminum)
- Clear and Colored Anodized (.040, .050 & .063 aluminum)

ACCESSORIES

- Miters (90 Degrees and Non-90 Degrees)
- Scuppers (Downspout, Spillout and Overflow)
- Drainage Components

TESTING

- ANSI/SPRI/FM 4435 ES-1 Standard to comply with the International Building Code
- Factory Mutual approved

WARRANTY

A 5-Year Workmanship Warranty is available. It covers replacement or repair of products that are defective in material or workmanship.

Press-Loc Gravel Stop, 4 1/2" Profile: Press-Loc is designed to accommodate the rigid performance criteria of today's advanced roofing systems. It doesn't matter if your room membrane is E.P.D.M., Thermoplastic, Modified Bitumen, or a Built-up Roof, Press-Loc fits them all. Press-Loc allows you to install your metal edging to be flashed in accordance with your membrane manufacturer's specifications. The Secure Bar profile fully encapsulates your membrane ensuring a watertight and leakproof edge. Press-Loc's unique and simple design make installation fast and economical, while giving you a leak-proof gravel stop edge that is extremely resistant to wind uplift.

OMG TerminEdge™ & TerminEdge AR for single-ply.

FASCIA SYSTEM

PRODUCT DATA SPECIFICATIONS

PRODUCT DESCRIPTION

OMG's two-piece snap-on fascia for single-ply applications. TerminEdge and TerminEdge AR Fascia provide superior protection from wind and water penetration.

FEATURES & BENEFITS

- Formed galvanized steel retainer or a formed aluminum retainer with self-locating, pre-punched and slotted holes reduces installation time.
- Sizes range from 3.75- to 13-inches.
- ANSI/SPRI/FM-4435 ES-1 Tested and Certified.
- Warranted in wind conditions up to 155 mph and comes with a 25-year, Category 5 Wind Warranty.

CATEGORY 5 WARRANTY

FM APPROVED

Standard Fascia Sizes	Face Height	Gauge	Nailers* Covered

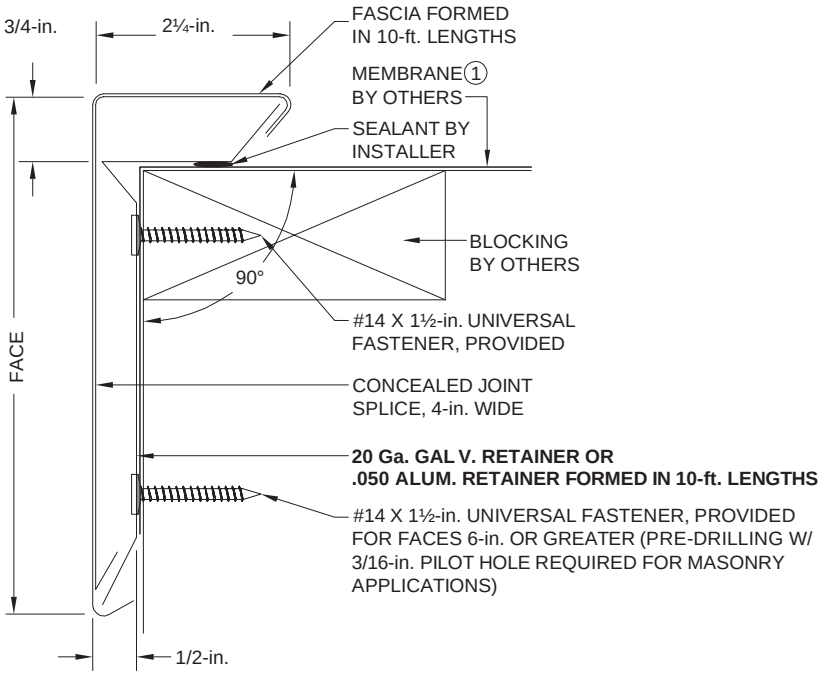
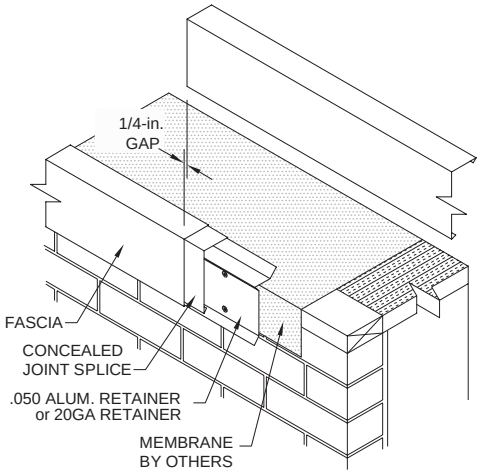
TE 1125	11.25-in.		6

Custom Sizes are available from 3.75- to 13-in.

***Nominal 2-in. x 6-in. nailer actual dimension is 1.5-in. tall**



① Coordinate installation with membrane manufacturer.



OMG EdgeSystems

OMG TerminEdge™ FASCIA SYSTEM & OMG TerminEdge AR FASCIA SYSTEM for single-ply.

INSTALLATION PROCEDURE

SPECIFICATIONS *(short form)*

TerminEdge fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes.

TerminEdge fascia cap shall be formed metal with a galvanized steel retainer.

TerminEdge AR fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes. The fascia cap shall be formed metal with a .050 aluminum retainer.

The roof edge shall be TerminEdge (insert model number). Fascia and retainer will be in 10-ft. (3.04 m) lengths.

DESCRIPTION

TerminEdge is a two-part assembly with a rigid formed retainer, and a decorative snap-on fascia cover for single-ply roofs. The fascia cap is available in aluminum, .040-in. (1 mm), .050-in. (1.25 mm) or .063-in. (1.60 mm) or 22 ga. and 24 ga. Kynar 500® coated galvanized steel and with concealed splice plates. Retainer will be 20 gauge galvanized steel or .050 aluminum with self-locating pre-punched slotted holes for fasteners at 12-in. (304.8 mm) on center in 10-ft. (3.04 m) standard lengths.

INSTALLATION PROCEDURES

This is a general outline. Refer to our full installation guide for details.

Preparation:

The roof edge must be level and wood nailers must be straight.

Install the roofing membrane according to the roofing membrane manufacturer's instructions. The edge of the membrane should extend over the face of the building approximately 3-in. (76.2 mm) and be secured by the retainer section or as required by the membrane manufacturer.Before the retainer is installed, apply a continuous bead of the roof manufacturer's sealant to the bottom side of the retainer. Secure the retainer using OMG's #14 Universal Fasteners (for wood, metal and concrete. Locate the fasteners in the pre-punched slotted holes. Unless otherwise specified, fasteners should be located every 12-in. (304.8 mm).

Locate the fasteners in the pre-punched holes as required. Install concealed joint splices between each fascia section. Hook the joint splice from the top and allow it to hang down and rest on the face of the retainer. Do not hook the splice plate under the retainer. Install fascia by hooking the back flange over the top of the retainer. Snap the fascia on by pushing down firmly on the leading edge until bottom snaps over the drip edge of the retainer. Leave a 1/4-in. gap at each joint for thermal movement. Coordinate with membrane manufacturer before starting installation.

FINISHES

- Natural mill aluminum
- Pre-coat Kynar 500 — from the manufacturer's standard color chart
- Post-coat Kynar 500 — industry standard two coat colors
- Non-standard Kynar 500 — colors requiring multiple coatings or protective clear coats
- Anodized aluminum – clear, bronze and black

GUARANTEE

A. Manufacturer's Standard Warranty: Warranted materials shall be free of defects in material and workmanship for five years after shipment. If, after inspection, the manufacturer agrees that materials are defective, the manufacturer shall at their option repair or replace them. For decorative finish warranty, consult manufacturer.

B. Special 25-Year Category 5 Warranty: Manufacturer shall guarantee that a standard size roof edge system, when installed per manufacturer's instructions, will not blow off, leak, or cause membrane failure, even in wind conditions up to 155 mph, or the manufacturer shall replace or repair its materials.

CATEGORY 5 WARRANTY

C. Decorative Finish Warranty *(consult Manufacturer).*

QUALITY ASSURANCE

The fascia product shall be listed in the current Factory Mutual Research Corporation Approval Guide approved by ANSI/SPRI/FM 4435/ES-1 SPRI Test Method RE-2 Pull-Off test for fascia. Fascia shall be certified by the manufacturer to design pressures as indicated in current edition of Wind Resistance Standard for Edge Systems Used with Low Slope Roofing Systems.

TECHNICAL SERVICES

Shop drawings are available from the factory. Product samples, detail sheets, color chips and color charts are ready for your submittal package. Long form specifications and CAD details are available on our website. For personal assistance with questions or submittals, contact your local OMG representative.

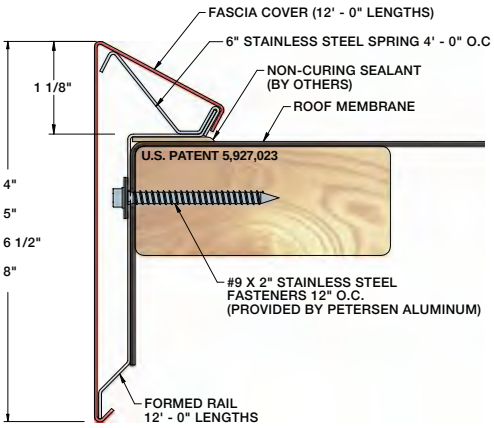
PAC SNAP EDGE FASCIA

FULLY ADHERED OR MECHANICALLY ATTACHED SINGLE-PLY VERSION

SIZES

Face Heights	Nailer Coverage
4″	1 Nailers
5″	2 Nailers
6½″	3 Nailers
8″	4 Nailers



PRODUCT FEATURES

- Quick lead times to keep projects on schedule
- Economically priced and easy to install
- Pre-punched, slotted holes for precise fastener placement
- Wide variety of colors and finishes
- Convenient 12′ lengths
- Reusable and recyclable material
- Efficient design eliminates need for stripping in/heat welding
- Factory fabricated miters and scuppers available
- All fasteners are included

MATERIALS

- 37 Stocked PAC-CLAD Finishes (24 gauge steel)
- 20 Stocked PAC-CLAD Finishes (.040 aluminum)
- 29 Stocked PAC-CLAD Finishes (.050 aluminum)
- 6 Stocked PAC-CLAD Finishes (.063 aluminum)
- Mill Finish Aluminum (.040, .050 & .063 aluminum)
- Clear and Colored Anodized (.040, .050 & .063 aluminum)

ACCESSORIES

- Miters (90 Degrees and Non-90 Degrees)
- Scuppers (Downspout, Spillout and Overflow)
- Drainage Components

TESTING

- ANSI/SPRI/FM 4435 ES-1 Standard to comply with the International Building Code
- Factory Mutual approved

WARRANTY

A 5-Year Workmanship Warranty is available. It covers replacement or repair of products that are defective in material or workmanship.

Press-Loc Gravel Stop, 4 1/2" Profile: Press-Loc is designed to accommodate the rigid performance criteria of today's advanced roofing systems. It doesn't matter if your room membrane is E.P.D.M., Thermoplastic, Modified Bitumen, or a Built-up Roof, Press-Loc fits them all. Press-Loc allows you to install your metal edging to be flashed in accordance with your membrane manufacturer's specifications. The Secure Bar profile fully encapsulates your membrane ensuring a watertight and leakproof edge. Press-Loc's unique and simple design make installation fast and economical, while giving you a leak-proof gravel stop edge that is extremely resistant to wind uplift.

OMG TerminEdge™ & TerminEdge AR for single-ply.

FASCIA SYSTEM

FASCIA SYSTEM

PRODUCT DATA SPECIFICATIONS

PRODUCT DESCRIPTION

OMG's two-piece snap-on fascia for single-ply applications. TerminEdge and TerminEdge AR Fascia provide superior protection from wind and water penetration.

FEATURES & BENEFITS

- Formed galvanized steel retainer or a formed aluminum retainer with self-locating, pre-punched and slotted holes reduces installation time.
- Sizes range from 3.75- to 13-inches.
- ANSI/SPRI/FM-4435 ES-1 Tested and Certified.
- Warranted in wind conditions up to 155 mph and comes with a 25-year, Category 5 Wind Warranty.

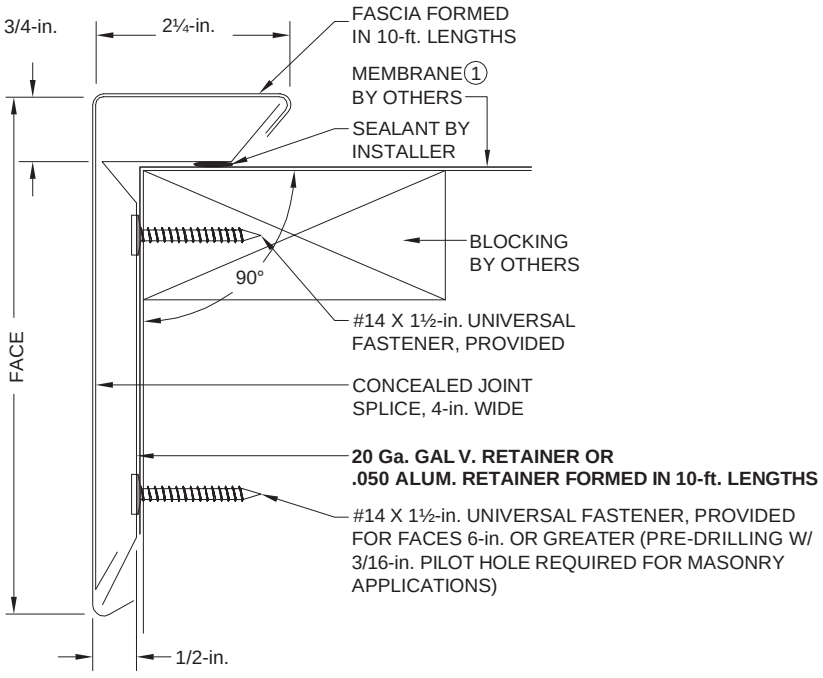
CATEGORY 5 WARRANTY

FM APPROVED

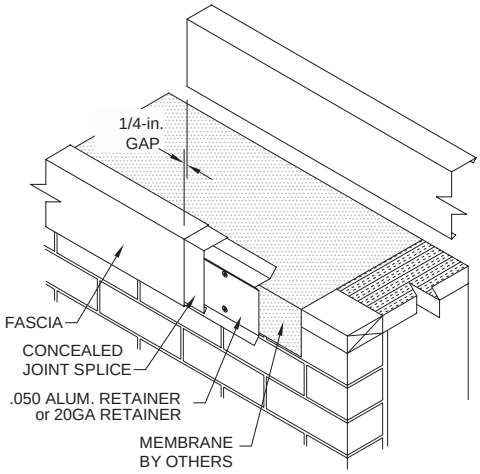
Standard Fascia Sizes	Face Height	Gauge	Nailers* Covered
TE 375	3.75-in.	All sizes available in prefinished 22 & 24 gauge galvanized steel; .050-in., .063-in. aluminum; 22 gauge Stainless Steel	1
TE 525	5.25-in.		2
TE 675	6.75-in.		3
TE 825	8.25-in.		4
TE 1125	11.25-in.		6

Custom Sizes are available from 3.75- to 13-in.

***Nominal 2-in. x 6-in. nailer actual dimension is 1.5-in. tall**



① Coordinate installation with membrane manufacturer.



OMG EdgeSystems

OMG TerminEdge™ FASCIA SYSTEM & OMG TerminEdge AR FASCIA SYSTEM for single-ply.

INSTALLATION PROCEDURE

SPECIFICATIONS *(short form)*

TerminEdge fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes.

TerminEdge fascia cap shall be formed metal with a galvanized steel retainer.

TerminEdge AR fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes. The fascia cap shall be formed metal with a .050 aluminum retainer.

The roof edge shall be TerminEdge (insert model number). Fascia and retainer will be in 10-ft. (3.04 m) lengths.

DESCRIPTION

TerminEdge is a two-part assembly with a rigid formed retainer, and a decorative snap-on fascia cover for single-ply roofs. The fascia cap is available in aluminum, .040-in. (1 mm), .050-in. (1.25 mm) or .063-in. (1.60 mm) or 22 ga. and 24 ga. Kynar 500® coated galvanized steel and with concealed splice plates. Retainer will be 20 gauge galvanized steel or .050 aluminum with self-locating pre-punched slotted holes for fasteners at 12-in. (304.8 mm) on center in 10-ft. (3.04 m) standard lengths.

INSTALLATION PROCEDURES

This is a general outline. Refer to our full installation guide for details.

Preparation:

The roof edge must be level and wood nailers must be straight.

Install the roofing membrane according to the roofing membrane manufacturer's instructions. The edge of the membrane should extend over the face of the building approximately 3-in. (76.2 mm) and be secured by the retainer section or as required by the membrane manufacturer.Before the retainer is installed, apply a continuous bead of the roof manufacturer's sealant to the bottom side of the retainer. Secure the retainer using OMG's #14 Universal Fasteners (for wood, metal and concrete. Locate the fasteners in the pre-punched slotted holes. Unless otherwise specified, fasteners should be located every 12-in. (304.8 mm).

Locate the fasteners in the pre-punched holes as required. Install concealed joint splices between each fascia section. Hook the joint splice from the top and allow it to hang down and rest on the face of the retainer. Do not hook the splice plate under the retainer. Install fascia by hooking the back flange over the top of the retainer. Snap the fascia on by pushing down firmly on the leading edge until bottom snaps over the drip edge of the retainer. Leave a 1/4-in. gap at each joint for thermal movement. Coordinate with membrane manufacturer before starting installation.

FINISHES

- Natural mill aluminum
- Pre-coat Kynar 500 — from the manufacturer's standard color chart
- Post-coat Kynar 500 — industry standard two coat colors
- Non-standard Kynar 500 — colors requiring multiple coatings or protective clear coats
- Anodized aluminum – clear, bronze and black

GUARANTEE

A. Manufacturer's Standard Warranty: Warranted materials shall be free of defects in material and workmanship for five years after shipment. If, after inspection, the manufacturer agrees that materials are defective, the manufacturer shall at their option repair or replace them. For decorative finish warranty, consult manufacturer.

B. Special 25-Year Category 5 Warranty: Manufacturer shall guarantee that a standard size roof edge system, when installed per manufacturer's instructions, will not blow off, leak, or cause membrane failure, even in wind conditions up to 155 mph, or the manufacturer shall replace or repair its materials.

CATEGORY 5 WARRANTY

C. Decorative Finish Warranty *(consult Manufacturer).*

QUALITY ASSURANCE

The fascia product shall be listed in the current Factory Mutual Research Corporation Approval Guide approved by ANSI/SPRI/FM 4435/ES-1 SPRI Test Method RE-2 Pull-Off test for fascia. Fascia shall be certified by the manufacturer to design pressures as indicated in current edition of Wind Resistance Standard for Edge Systems Used with Low Slope Roofing Systems.

TECHNICAL SERVICES

Shop drawings are available from the factory. Product samples, detail sheets, color chips and color charts are ready for your submittal package. Long form specifications and CAD details are available on our website. For personal assistance with questions or submittals, contact your local OMG representative.

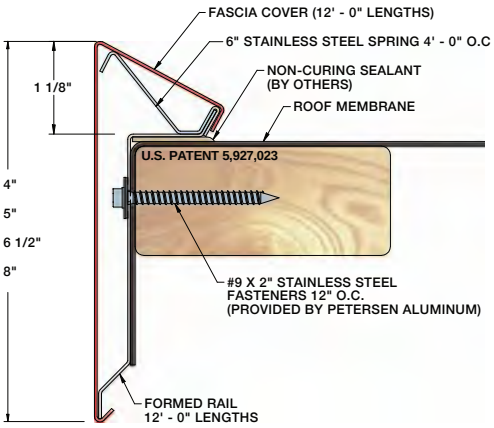
PAC SNAP EDGE FASCIA

FULLY ADHERED OR MECHANICALLY ATTACHED SINGLE-PLY VERSION

SIZES

Face Heights	Nailer Coverage
4″	1 Nailers
5″	2 Nailers
6½″	3 Nailers
8″	4 Nailers



PRODUCT FEATURES

- Quick lead times to keep projects on schedule
- Economically priced and easy to install
- Pre-punched, slotted holes for precise fastener placement
- Wide variety of colors and finishes
- Convenient 12′ lengths
- Reusable and recyclable material
- Efficient design eliminates need for stripping in/heat welding
- Factory fabricated miters and scuppers available
- All fasteners are included

MATERIALS

- 37 Stocked PAC-CLAD Finishes (24 gauge steel)
- 20 Stocked PAC-CLAD Finishes (.040 aluminum)
- 29 Stocked PAC-CLAD Finishes (.050 aluminum)
- 6 Stocked PAC-CLAD Finishes (.063 aluminum)
- Mill Finish Aluminum (.040, .050 & .063 aluminum)
- Clear and Colored Anodized (.040, .050 & .063 aluminum)

ACCESSORIES

- Miters (90 Degrees and Non-90 Degrees)
- Scuppers (Downspout, Spillout and Overflow)
- Drainage Components

TESTING

- ANSI/SPRI/FM 4435 ES-1 Standard to comply with the International Building Code
- Factory Mutual approved

WARRANTY

A 5-Year Workmanship Warranty is available. It covers replacement or repair of products that are defective in material or workmanship.

Press-Loc Gravel Stop, 4 1/2" Profile: Press-Loc is designed to accommodate the rigid performance criteria of today's advanced roofing systems. It doesn't matter if your room membrane is E.P.D.M., Thermoplastic, Modified Bitumen, or a Built-up Roof, Press-Loc fits them all. Press-Loc allows you to install your metal edging to be flashed in accordance with your membrane manufacturer's specifications. The Secure Bar profile fully encapsulates your membrane ensuring a watertight and leakproof edge. Press-Loc's unique and simple design make installation fast and economical, while giving you a leak-proof gravel stop edge that is extremely resistant to wind uplift.

OMG TerminEdge™ FASCIA SYSTEM & OMG TerminEdge AR FASCIA SYSTEM for single-ply.

PRODUCT DATA SPECIFICATIONS

PRODUCT DESCRIPTION

OMG's two-piece snap-on fascia for single-ply applications. TerminEdge and TerminEdge AR Fascia provide superior protection from wind and water penetration.

FEATURES & BENEFITS

- Formed galvanized steel retainer or a formed aluminum retainer with self-locating, pre-punched and slotted holes reduces installation time.
- Sizes range from 3.75- to 13-inches.
- ANSI/SPRI/FM-4435 ES-1 Tested and Certified.
- Warranted in wind conditions up to 155 mph and comes with a 25-year, Category 5 Wind Warranty.

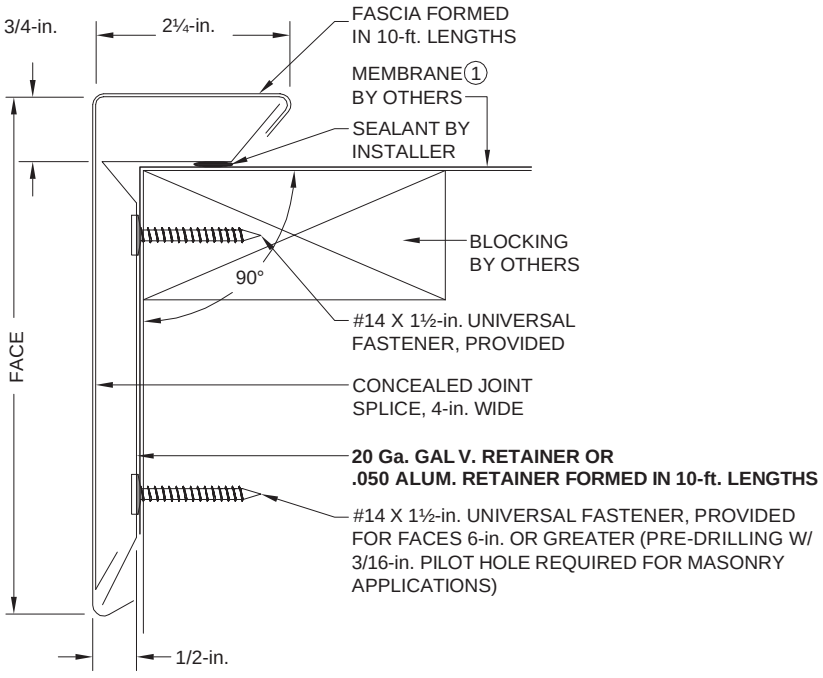
CATEGORY 5 WARRANTY

FM APPROVED

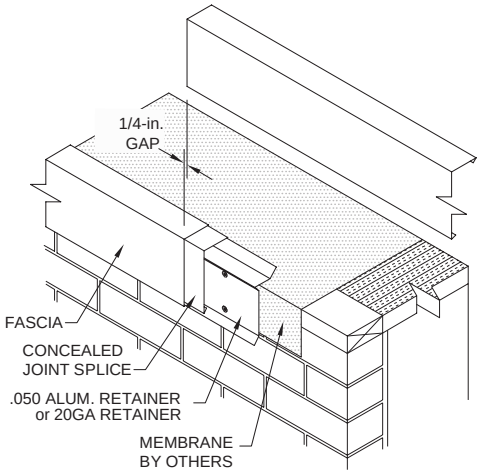
Standard Fascia Sizes	Face Height	Gauge	Nailers* Covered
TE 375	3.75-in.	All sizes available in prefinished 22 & 24 gauge galvanized steel; .050-in., .063-in. aluminum; 22 gauge Stainless Steel	1
TE 525	5.25-in.		2
TE 675	6.75-in.		3
TE 825	8.25-in.		4
TE 1125	11.25-in.		6

Custom Sizes are available from 3.75- to 13-in.

***Nominal 2-in. x 6-in. nailer actual dimension is 1.5-in. tall**



① Coordinate installation with membrane manufacturer.



OMG EdgeSystems

OMG TerminEdge™ FASCIA SYSTEM & OMG TerminEdge AR FASCIA SYSTEM for single-ply.

INSTALLATION PROCEDURE

SPECIFICATIONS *(short form)*

TerminEdge fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes.

TerminEdge fascia cap shall be formed metal with a galvanized steel retainer.

TerminEdge AR fascia is a low profile roof edge for fully adhered or mechanically attached single-ply roof membranes. The fascia cap shall be formed metal with a .050 aluminum retainer.

The roof edge shall be TerminEdge (insert model number). Fascia and retainer will be in 10-ft. (3.04 m) lengths.

DESCRIPTION

TerminEdge is a two-part assembly with a rigid formed retainer, and a decorative snap-on fascia cover for single-ply roofs. The fascia cap is available in aluminum, .040-in. (1 mm), .050-in. (1.25 mm) or .063-in. (1.60 mm) or 22 ga. and 24 ga. Kynar 500® coated galvanized steel and with concealed splice plates. Retainer will be 20 gauge galvanized steel or .050 aluminum with self-locating pre-punched slotted holes for fasteners at 12-in. (304.8 mm) on center in 10-ft. (3.04 m) standard lengths.

INSTALLATION PROCEDURES

This is a general outline. Refer to our full installation guide for details.

Preparation:

The roof edge must be level and wood nailers must be straight.

Install the roofing membrane according to the roofing membrane manufacturer's instructions. The edge of the membrane should extend over the face of the building approximately 3-in. (76.2 mm) and be secured by the retainer section or as required by the membrane manufacturer.Before the retainer is installed, apply a continuous bead of the roof manufacturer's sealant to the bottom side of the retainer. Secure the retainer using OMG's #14 Universal Fasteners (for wood, metal and concrete. Locate the fasteners in the pre-punched slotted holes. Unless otherwise specified, fasteners should be located every 12-in. (304.8 mm).

Locate the fasteners in the pre-punched holes as required. Install concealed joint splices between each fascia section. Hook the joint splice from the top and allow it to hang down and rest on the face of the retainer. Do not hook the splice plate under the retainer. Install fascia by hooking the back flange over the top of the retainer. Snap the fascia on by pushing down firmly on the leading edge until bottom snaps over the drip edge of the retainer. Leave a 1/4-in. gap at each joint for thermal movement. Coordinate with membrane manufacturer before starting installation.

FINISHES

- Natural mill aluminum
- Pre-coat Kynar 500 — from the manufacturer's standard color chart
- Post-coat Kynar 500 — industry standard two coat colors
- Non-standard Kynar 500 — colors requiring multiple coatings or protective clear coats
- Anodized aluminum – clear, bronze and black

GUARANTEE

A. Manufacturer's Standard Warranty: Warranted materials shall be free of defects in material and workmanship for five years after shipment. If, after inspection, the manufacturer agrees that materials are defective, the manufacturer shall at their option repair or replace them. For decorative finish warranty, consult manufacturer.

B. Special 25-Year Category 5 Warranty: Manufacturer shall guarantee that a standard size roof edge system, when installed per manufacturer's instructions, will not blow off, leak, or cause membrane failure, even in wind conditions up to 155 mph, or the manufacturer shall replace or repair its materials.

CATEGORY 5 WARRANTY

C. Decorative Finish Warranty *(consult Manufacturer).*

QUALITY ASSURANCE

The fascia product shall be listed in the current Factory Mutual Research Corporation Approval Guide approved by ANSI/SPRI/FM 4435/ES-1 SPRI Test Method RE-2 Pull-Off test for fascia. Fascia shall be certified by the manufacturer to design pressures as indicated in current edition of Wind Resistance Standard for Edge Systems Used with Low Slope Roofing Systems.

TECHNICAL SERVICES

Shop drawings are available from the factory. Product samples, detail sheets, color chips and color charts are ready for your submittal package. Long form specifications and CAD details are available on our website. For personal assistance with questions or submittals, contact your local OMG representative.

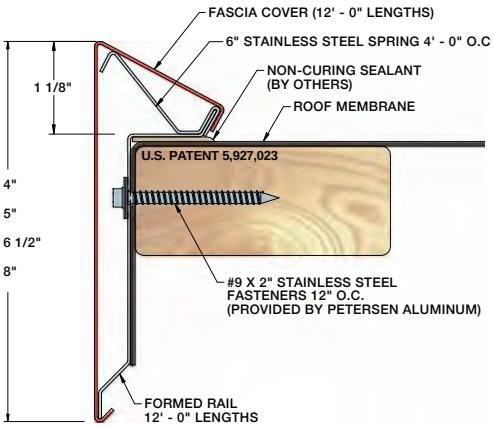
PAC SNAP EDGE FASCIA

FULLY ADHERED OR MECHANICALLY ATTACHED SINGLE-PLY VERSION

SIZES

Face Heights	Nailer Coverage
4″	1 Nailers
5″	2 Nailers
6½″	3 Nailers
8″	4 Nailers



PRODUCT FEATURES

- Quick lead times to keep projects on schedule
- Economically priced and easy to install
- Pre-punched, slotted holes for precise fastener placement
- Wide variety of colors and finishes
- Convenient 12′ lengths
- Reusable and recyclable material
- Efficient design eliminates need for stripping in/heat welding
- Factory fabricated miters and scuppers available
- All fasteners are included

MATERIALS

- 37 Stocked PAC-CLAD Finishes (24 gauge steel)
- 20 Stocked PAC-CLAD Finishes (.040 aluminum)
- 29 Stocked PAC-CLAD Finishes (.050 aluminum)
- 6 Stocked PAC-CLAD Finishes (.063 aluminum)
- Mill Finish Aluminum (.040, .050 & .063 aluminum)
- Clear and Colored Anodized (.040, .050 & .063 aluminum)

ACCESSORIES

- Miters (90 Degrees and Non-90 Degrees)
- Scuppers (Downspout, Spillout and Overflow)
- Drainage Components

TESTING

- ANSI/SPRI/FM 4435 ES-1 Standard to comply with the International Building Code
- Factory Mutual approved

WARRANTY

A 5-Year Workmanship Warranty is available. It covers replacement or repair of products that are defective in material or workmanship.

Press-Loc Gravel Stop, 4 1/2" Profile: Press-Loc is designed to accommodate the rigid performance criteria of today's advanced roofing systems. It doesn't matter if your room membrane is E.P.D.M., Thermoplastic, Modified Bitumen, or a Built-up Roof, Press-Loc fits them all. Press-Loc allows you to install your metal edging to be flashed in accordance with your membrane manufacturer's specifications. The Secure Bar profile fully encapsulates your membrane ensuring a watertight and leakproof edge. Press-Loc's unique and simple design make installation fast and economical, while giving you a leak-proof gravel stop edge that is extremely resistant to wind uplift.

Item Type	Decorative metal
Description	Tubular aluminum fence and gates.
Manufacturer	C. R. Laurence (CRL)
Model	Match Sterling Dula basis of design
Dimensions	Refer to the Design Guideline Drawings
Color	Dark Bronze
Finish	Fluropolymer (PVDF) 70% resin, 2-coat system complying with AAMA 2605.
Material Composition	Aluminum with the lesser of minimum yield strength divided by 1.65 or minimum ultimate tensile strength divided by 1.95.
CSI #	323119 - Decorative Metal Fences and Gates
Omniclass #	22-323119 - Decorative Metal Fences and Gates
Structural Performance	Handrails &Top Rails of Guards: Uniform load of 50 lbf/ ft. (0.73 kN/m) applied in any direction. Concentrated load of 200 lbf (0.89 kN) applied in any direction. Infill of Guards: Concentrated load of 50 lbf (0.22 kN) applied horizontally on an area of 1 sq. ft. (0.093 sq. m).
Thermal Performance	Allow for thermal movements from ambient and surface temperature changes acting on exterior railings. Temperature Change Range: 120 deg F (67 deg C), ambient; 180 deg F (100 deg C), material surfaces.
Best Practices	Minimum 80 percent recycled content of aluminum.
Quality Standards	Aluminum Association (AA): "Aluminum Design Manual: Specifications for Aluminum Structures"/ ASTM E935 Standard Test Methods for Performance of Permanent Metal Railing Systems and Rails for Buildings
Accessibility Compliance	Assure compliance of gates and openings with ADA requirements.
Accessories	Spring hinges: “2060-R Series”; Stanley Hardware (800-337-4393). Exit Device: Saflok QUANTUM RFID X BLE (LESS DEAD BOLT) X TROY X F18-R. Refer to Door Hardware.
Gate Door Hardware	Refer to Accessories above.
Glass Assembly	NA
Opening Size	Refer to the Design Guideline Drawings
Warranty	5 years

SPECIAL INSTRUCTIONS

At railing/gate lock/panic bar, provide the following:
Provide 1/4" thickness clear Lexan panels, or 1/4" aluminum wire mesh with selvaged edges, trim with aluminum C-

channel.
Paint channel or mesh to match fence color.
Extend Lexan 20" below panic bar and 20" above panic bar or to top of fence if less than 20".
Extend mesh/lexan 20" to each side of panic bar to prevent access to paint bar from opposite side.
Provide clear Lexan with non-scratch coating, at locations noted on the Drawings.

Best Practices	Minimum 80 percent recycled content of aluminum.
Quality Standards	Aluminum Association (AA): "Aluminum Design Manual: Specifications for Aluminum Structures"/ ASTM E935 Standard Test Methods for Performance of Permanent Metal Railing Systems and Rails for Buildings
Accessibility Compliance	Assure compliance of gates and openings with ADA requirements.
Accessories	Spring hinges: “2060-R Series”; Stanley Hardware (800-337-4393). Exit Device: Saflok QUANTUM RFID X BLE (LESS DEAD BOLT) X TROY X F18-R. Refer to Door Hardware.
Gate Door Hardware	Refer to Accessories above
Glass Assembly	NA
Opening Size	Refer to Design Guideline Drawings
Warranty	5 years

IMAGE NOT AVAILABLE

SPECIAL INSTRUCTIONS

At railing/gate lock/panic bar, provide the following:
Provide 1/4" thickness clear Lexan panels, or 1/4" aluminum wire mesh with selvaged edges, trim with aluminum C-

channel.
Paint channel or mesh to match fence color.
Extend Lexan 20" below panic bar and 20" above panic bar or to top of fence if less than 20".
Extend mesh/lexan 20" to each side of panic bar to prevent access to paint bar from opposite side.
Provide clear Lexan with non-scratch coating, at locations noted on the Drawings.

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Item Name	Fences and Gates
Item Type	Wood Fences and Steel Framed Gates
Description	Wood Fence and Gates at Trash Enclosure
Manufacturer	NA
Model	NA
Dimensions	Refer to Design Guideline Drawings
Color	To be approved by Marriott
Finish	Penetrating exterior stain, refer to Building Product Manual Paint Schedule in Appendix
Material Composition	Western Red Cedar; WRCLA
CSI #	323129 - Wood Fences and Gates
Omniclass #	22-323129 - Wood Fences and Gates
Grade	WRCLA Boards and trim shall be Standard and Better Grade, surfaced one side and two edges - S1S2E. 2 x 4 horizontal supports shall be Rough Sawn, Custom Knotty Grade.
Quality Standards	WRCLA Grading Standards; ASTM A36 “Standard Specification for Carbon Structural Steel”; ASTM A500 "Standard Specification for Cold-Formed Welded and Seamless Carbon Steel Structural Tubing in Rounds and Shapes"; AWS D1.1 "Structural Welding Code - Steel"
Accessories	Refer to Notes below
Gate Door Hardware	Refer to Notes
Glass Assembly	NA
Gate Assembly	Refer to Notes
Finish	Stain
Opening Size	Refer to Design Guideline Drawings
Notes	Gate Materials: Wood Gate Hardware: Stanley Hardware (800-337-4393) a. Hinges: #SC908BP, 1 1/2 pair per leaf. b. Slide Bolt: #SP1271, Slide Bolt, 1 each. c. Cane Bolt: #CD1009, 1 per leaf. Steel Framed Gate Materials: 1. Steel tubes: ASTM A500 2. Angles: ASTM A36 3. Plates: ASTM A36 4. Bolts, Nuts, Screws, Clips and Washers: AISI 300 series stainless steel. Exposed screws shall be Phillip's flat head, countersunk unless noted otherwise. 5. Bolts for Field Connections Only: Provide washers under heads and nuts bearing on wood. Draw nuts tight and nick threads of permanent

IMAGE NOT AVAILABLE

connections. Use beveled washers where bearing is on sloped surfaces.
6. Welding: As permitted by AWS Code D1.1.
7. Steel Framed Gate Hardware: Stanley Hardware (800-337-4393)
a. Hinges: Ball bearing, galvanized, 1 1/2 pair per leaf.
b. Latch: Industrial double drive latch assembly with locking device.
c. Cane Bolt: #CD1009, 1 per leaf.

Item Name	Exterior Fence
Item Type	Metal fence
Description	Metal post and rail fence fabricated with extruded aluminum rails posts and balusters.
Manufacturer	B & N Industries
Model	Fortina
Dimensions	Posts and balusters (TLKS-3010): 100 mm W x 30 mm D x Lengths indicated ; Top & Bottom Rails (TLKS-5015)
Color	Match Nichiha "White Diamond ED680-CUS."
Finish	Polymer film laminated to surface of aluminum
Material Composition	ASTM B221 Aluminum extrusions, alloy 6063, with decorative film laminated to surface.
CSI #	323119 - Decorative Metal Fences and Gates
Omniclass #	22-323119 - Decorative Metal Fence and Gates
Best Practices	Recycled content of aluminum.
Quality Standards	ASTM B221 Standard Specification for Aluminum and Aluminum-Alloy Extruded Bars, Rods, Wire, Profiles, and Tubes

Item Name	Wood trellis at Lower Roof
Item Type	Wood trellis
Description	Wood trellis with field-applied paint finish.
Manufacturer	Qualified local fabricator/carpenter
Model	Not applicable
Dimensions	As indicated on Design Guideline Drawings
Color	Match Nichiha White Diamond ED680-CUS
Finish	Acrylic Solid Stain
Material Composition	Two-layers of medium-density overlay (MDO) laminated and mechanically fastened and overlaid on all exposed sides and ends with plain-sliced white oak wood veneer.
CSI #	062000 - Finish Carpentry
Omniclass #	22-062000 - Finish Carpentry
Fire/Smoke Rating	Use Fire Treated Lumber where required by AHJ and Building Code
Best Practices	Low-emitting materials (MDO)
Quality Standards	ANSI/AF&PA NDS-2005: "National Design Specification (NDS) for Wood Construction".
Notes	Paint Specification: Refer to Building Product Manual Paint Schedule in Appendix Sherwin Williams WoodScapes House Stain Exterior Acrylic Solid Color (A15 Series) Benjamin Moore Arborcoat Solid Deck & Siding Stain (640) Glidden Professional Wood Pride Professional Finishes High Build 100% Acrylic Exterior Solid Color Stain (2601) PPG Architectural Finishes Flood FLD820 Solid Color Acrylic Stain

SPECIAL INSTRUCTIONS

Prime knots with oil based primer, refer to Building Product Manual Paint Schedule in Appendix for acceptable products and manufacturers.

Item Name	Countertop Exterior
Item Type	Ultracompact surfacing countertop
Description	Ultracompact surfacing sheet for countertops and other applications
Manufacturer	Cosentino
Model	Dekton
Dimensions	Thickness indicated on drawings x 320 cm x 144 cm
Color	Makai (Tech Collection)
Finish	Matte
Material Composition	Thermally-fused (Sintered) silicoaluminates, amorphous silica, crystalline silica, zircon, and inorganic pigments
CSI #	123663 - Ultracompact Surfacing Countertops
Omniclass #	22-123663 - Ultracompact Surfacing Countertops
Compressive Strength	34,409 PSI (Dry)
Best Practices	Low-emitting materials
Quality Standards	ANSI / NSF (National Sanitation Foundation) 51 "Food Equipment Materials"
Thickness	Refer to Design Guideline Drawings
Panel Size	320 cm x 144 cm
Warranty	25 years

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Countertop Exterior
Item Type	Ultracompact surfacing countertop
Description	Ultracompact surfacing sheet for countertops and other applications
Manufacturer	Cosentino
Model	Dekton
Dimensions	Thickness indicated on drawings x 320 cm x 144 cm
Color	Trillium (Tech Collection)
Finish	Matte
Material Composition	Thermally-fused (Sintered) silicoaluminates, amorphous silica, crystalline silica, zircon, and inorganic pigments
CSI #	123663 - Ultracompact Surfacing Countertops
Omniclass #	22-123663 - Ultracompact Surfacing Countertops
Compressive Strength	34,409 PSI (Dry)
Best Practices	Low-emitting materials
Quality Standards	ANSI / NSF (National Sanitation Foundation) 51 "Food Equipment Materials"
Thickness	Refer to Design Guideline Drawings
Panel Size	320 cm x 144 cm
Warranty	25 years

Item Name	Countertop Exterior
Item Type	Ultracompact surfacing
Description	Ultracompact surfacing sheet for applications indicated
Manufacturer	Cosentino
Model	Dekton
Dimensions	Thickness indicated on drawings x 320 cm x 144 cm
Color	Kadum (Tech Collection)
Finish	Matte
Material Composition	Thermally-fused (Sintered) silicoaluminates, amorphous silica, crystalline silica, zircon, and inorganic pigments
CSI #	123663 - Ultracompact Surfacing Countertops
Omniclass #	22-123663 - Ultracompact Surfacing Countertops
Compressive Strength	34,409 PSI (Dry)
Best Practices	Low-emitting materials
Quality Standards	ANSI / NSF (National Sanitation Foundation) 51 "Food Equipment Materials"
Thickness	Refer to Design Guideline Drawings
Panel Size	320 cm x 144 cm
Warranty	25 years

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Gas Fire Pit
Item Type	Gas Fire Pit Insert
Description	UL Certified, Square Flat Fire Pit Insert Kit complete with #304 stainless steel pan and burner, with pilot assembly and whistle-free flex line in location shown on Design Guideline Drawings.
Manufacturer	Hearth Products Control Co
Model	18FSSEI-SQ
Dimensions	Pan: 18-inch x 18-inch; 12" Burner
CSI #	103100 - Manufactured Fireplaces
Omniclass #	22-103100 Manufactured Fireplaces
Quality Standards	UL Listed
Accessories	Provide Square Fire Pit Insert Kit complete with stainless steel ring, burner pan, and electronic ignition control and box in location shown on Drawings.
Product	Square Flat Inserts 18FSSEI-SQ
Warranty	Stainless Steel Fire Burners: Hassle Free Lifetime Electronic Components and Gas Valves: 1 year Pilot Assembly: 1 year Stainless Steel Components: 1 year
Notes	BTU: 65,000 (100,000 BTU maximum allowed by Marriott International)

SPECIAL INSTRUCTIONS

Warning Plaques: Warning plaques, located on top of stone at locations as shown on Drawings, with text as follows oriented to be read from adjoining walking surfaces:
a. "NOTICE: DO NOT LEAVE CHILDREN UNATTENDED."
b. Refer to Interior Signage Specifications for warning plaques.

Emergency Flame Shut-Off Switch: Weatherproof maintained contact red mushroom head push button switch with cover labeled "EMERGENCY SHUTOFF," suitable for wiring in series in low-voltage gas control circuit.
a. Cutler-Hammer Div. Eaton Industries, HT800 Series two-position maintained push-pull button, Catalog HT8CBRB, mounted in recessed weathertight enclosure.
b. Refer to Interior Signage Specifications for sign adjacent to Emergency Shutoff Switch.

36FSSEI-SQ	250K	36	30	72
42FSSEI-SQ	400K	42	36	80

Notes:
1. PROPER VENTING
   - ENCLOSURES: Recommend 4 each 18 sq.in. vents on opposing sides (Minimum 2 each 18 sq.in. vents).
   - BOWLS (Copper, concrete or metal) - Bowl to be raised above mounting surface minimum of 3/4" gap; Bowl to have a minimum of 6" diameter hole in bottom
2. GAS SUPPLY - FOR USE WITH FIXED PIPING SYSTEMS ONLY - NOT FOR USE WITH SMALL TANKS.
   - Natural Gas: Operating Supply Pressure: Minimum: 6.0" W.C.; Maximum: 7.0" W.C.
   - LP Gas: Operating Supply Pressure: Minimum: 10.0" W.C.; Maximum: 11.0" W.C.

IMPORTANT: Ensure any flex line that may be used from the permanent main fuel supply to the product is rated to the stated max btu of the product and certified to ANSI Z21.75*CSA 6.27.

5. MODIFCATION OF PRODUCT WILL VOID ANY CERTIFICATION AND WARRANTY.
6. FOLLOW ALL MANUFACTURER INSTALLATION INSTRUCTIONS AND LOCAL CODES.
7. ALL DIMENSIONS ARE CONSIDERED TRUE AND REFLECT MANUFACTURER'S SPECIFICATIONS AS OF THE REVISION DATE.
8. DO NOT SCALE DRAWING.
9. THESE DRAWINGS ARE FOR SIZING AND PLANNING PURPOSES. ALL INFORMATION CONTAINED HEREIN WAS CURRENT AT THE TIME OF DEVELOPMENT. THE MANUFACTURER'S RESPONSIBLE FOR THE ACCURACY OF THE DRAWING.
10. CONTRACTOR'S NOTE: FOR PRODUCT AND COMPANY INFORMATION VISIT www.CADdetails.com/info REFERENCE NUMBER 771-047.

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Countertop Exterior
Item Type	Ultracompact surfacing countertop
Description	Ultracompact surfacing sheet for countertops and other applications
Manufacturer	Cosentino
Model	Dekton
Dimensions	Thickness indicated on drawings x 320 cm x 144 cm
Color	Makai (Tech Collection)
Finish	Matte
Material Composition	Thermally-fused (Sintered) silicoaluminates, amorphous silica, crystalline silica, zircon, and inorganic pigments
CSI #	123663 - Ultracompact Surfacing Countertops
Omniclass #	22-123663 - Ultracompact Surfacing Countertops
Compressive Strength	34,409 PSI (Dry)
Best Practices	Low-emitting materials
Quality Standards	ANSI / NSF (National Sanitation Foundation) 51 "Food Equipment Materials"
Thickness	Refer to Design Guideline Drawings
Panel Size	320 cm x 144 cm
Warranty	25 years

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Countertop Exterior
Item Type	Ultracompact surfacing countertop
Description	Ultracompact surfacing sheet for countertops and other applications
Manufacturer	Cosentino
Model	Dekton
Dimensions	Thickness indicated on drawings x 320 cm x 144 cm
Color	Trillium (Tech Collection)
Finish	Matte
Material Composition	Thermally-fused (Sintered) silicoaluminates, amorphous silica, crystalline silica, zircon, and inorganic pigments
CSI #	123663 - Ultracompact Surfacing Countertops
Omniclass #	22-123663 - Ultracompact Surfacing Countertops
Compressive Strength	34,409 PSI (Dry)
Best Practices	Low-emitting materials
Quality Standards	ANSI / NSF (National Sanitation Foundation) 51 "Food Equipment Materials"
Thickness	Refer to Design Guideline Drawings
Panel Size	320 cm x 144 cm
Warranty	25 years

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Countertop Exterior
Item Type	Ultracompact surfacing
Description	Ultracompact surfacing sheet for applications indicated
Manufacturer	Cosentino
Model	Dekton
Dimensions	Thickness indicated on drawings x 320 cm x 144 cm
Color	Kadum (Tech Collection)
Finish	Matte
Material Composition	Thermally-fused (Sintered) silicoaluminates, amorphous silica, crystalline silica, zircon, and inorganic pigments
CSI #	123663 - Ultracompact Surfacing Countertops
Omniclass #	22-123663 - Ultracompact Surfacing Countertops
Compressive Strength	34,409 PSI (Dry)
Best Practices	Low-emitting materials
Quality Standards	ANSI / NSF (National Sanitation Foundation) 51 "Food Equipment Materials"
Thickness	Refer to Design Guideline Drawings
Panel Size	320 cm x 144 cm
Warranty	25 years

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Barbeque
Item Type	Barbeque Built In
Description	Commercial Type Grill. Six stainless steel grill burners, 60,000 BTUH input. Push-button electronic ignition. 769 Sq. In. Total Cooking Area.
Manufacturer	Weber-Steven Products
Model	S-660
Dimensions	43”W x 31”D x 51:H (Lid Open) / Cutout 42”W x 24”D x 36”H; 34" Grill Height to meet accessibility requirements
Color	Stainless Steel
CSI #	113100 - Residential Appliances
Omniclass #	22-113100 Residential Appliances
Fire/Smoke Rating	Not Applicable
Acoustical Performance	Not Applicable
Compressive Strength	Not Applicable
Structural Performance	Not Applicable
Thermal Performance	Not Applicable
Quality Standards	NFPA 70, Article 100; UL and NEMA Compliance
Part of an Assembly	N
Electrical Connection	120V grounded plug for Rotisserie motor.
Warranty	Parts Warranty - Limited 1-year entire appliance Labor Warranty - Limited 1-year entire appliance
Notes	Castors to be removed from unit. ½” ID Natural Gas Service Line. Provide an insulated jacket when installing grill in combustible material.

SPECIAL INSTRUCTIONS

Refer to attached Weber Order Form and Weber MiniBook for ordering.

FULL SPECS

COOKING SYSTEM

Stainless steel burners: 6

9 mm diameter stainless steel rod cooking grates

Stainless steel Flavorizer® bars

Main burners: BTU-per-hour input: 60,000

Sear Station® burner: BTU-per-hour input: 10,600

Smoker burner: BTU-per-hour input: 6,800

Rear-mounted infrared rotisserie burner: BTU-per-hour input: 10,600

Snap-Jet™ individual burner ignition system

COOKING AREA

Primary cooking area (square inches): 624

Warming rack area (square inches): 145

Total cooking area (square inches): 769

FEATURES

Grill Out® handle light(s): 2

Lighted control knobs

Owner's guide and grilling guide

Limited warranty

Island not included

FUEL

Natural gas

-- OR --

Liquid propane (20-lb LP tank sold separately)

*Please check with your retailer to ensure you purchase the correct model you are looking for (Natural gas or LP). Due to the complexity of the technology, gas train components, and the level of disassembly that would have to be performed, we are not allowing conversions or offering kits. This decision was made in the interest of safety. *Not all models are available in LP or NG.*

YOU MUST READ THIS OWNER'S GUIDE BEFORE OPERATING YOUR GAS GRILL.

⚠ DANGER

If you smell gas:
1. **Shut off gas to the appliance.**
2. **Extinguish any open flames.**
3. **Open lid.**
4. **If odor continues, keep away from the appliance and immediately call your gas supplier or your fire department.**

Leaking gas may cause a fire or explosion which can cause serious bodily injury, death, or damage to property.

⚠ WARNING:

1. **Do not store or use gasoline or other flammable liquids or vapors in the vicinity of this or any other appliance.**
2. **An LP cylinder not connected for use shall not be stored in the vicinity of this or any other appliance.**

⚠ WARNING: Follow all leak-check procedures carefully in this manual prior to barbecue operation. Do this even if the barbecue was dealer-assembled.

NOTICE TO INSTALLER: These instructions must be left with the owner and the owner should keep them for future use.

THIS GAS APPLIANCE IS DESIGNED FOR OUTDOOR USE ONLY.

⚠ WARNING: Do not ignite this appliance without first reading the BURNER IGNITION sections of this manual.

56584 08/01/13 NG
US - ENGLISH

WARNINGS

⚠ DANGER

Failure to follow the Dangers, Warnings and Cautions contained in this Owner's Manual may result in serious bodily injury or death, or in a fire or an explosion causing damage to property.

⚠ WARNINGS

- ⚠ **Do not store a spare or disconnected liquid propane cylinder under or near this barbecue.**
- ⚠ **Improper assembly may be dangerous. Please follow the assembly instructions carefully.**
- ⚠ **After a period of storage, and/or nonuse, the Weber® gas barbecue should be checked for gas leaks and burner obstructions before use. See instructions in this manual for correct procedures.**
- ⚠ **Do not operate the Weber® gas barbecue if there is a gas leak present.**
- ⚠ **Do not use a flame to check for gas leaks.**
