- ⚠ **Combustible materials should never be within 24 inches (61 cm) of the back or sides of your Weber® gas barbecue.**
- ⚠ **Do not put a barbecue cover or anything flammable on, or in the storage area under the barbecue.**
- ⚠ **Your Weber® gas barbecue should never be used by children. Accessible parts of the barbecue may be very hot. Keep young children away while it is in use.**
- ⚠ **You should exercise reasonable care when operating your Weber® gas barbecue. It will be hot during cooking or cleaning and should never be left unattended, or moved while in operation.**
- ⚠ **Should the burners go out while in operation, turn all gas valves off. Open the lid and wait five minutes before attempting to relight, using the igniting instructions.**
- ⚠ **Do not use charcoal or lava rock in your Weber® gas barbecue.**
- ⚠ **Never lean over open grill or place hands or fingers on the front edge of the cookbox.**
- ⚠ **Should a grease fire occur, turn off all burners and leave lid closed until fire is out.**
- ⚠ **Do not enlarge valve orifices or burner ports when cleaning the valves or burners.**
- ⚠ **The Weber® gas barbecue should be thoroughly cleaned on a regular basis.**
- ⚠ **Liquid propane gas is not natural gas. The conversion or attempted use of natural gas in a liquid propane unit or liquid propane gas in a natural gas unit is dangerous and will void your warranty.**
- ⚠ **Do not attempt to disconnect any gas fitting while your barbecue is in operation.**
- ⚠ **Use heat-resistant barbecue mitts or gloves when operating barbecue.**
- ⚠ **Keep any electrical supply cord and the fuel supply hose away from any heated surfaces.**
- ⚠ **Combustion byproducts produced when using this product contain chemicals known to the state of California to cause cancer, birth defects, or other reproductive harm.**
- ⚠ **Do not use this barbecue unless all parts are in place. The unit must be properly assembled according to the assembly instructions.**
- ⚠ **Proposition 65 Warning: Handling the brass material on this product exposes you to lead, a chemical known to the state of California to cause cancer, birth defects or other reproductive harm.**
  (Wash hands after handling this product.) ◆

LIQUID PROPANE GAS UNITS ONLY

- ⚠ **Use the pressure regulator and hose assembly that is supplied with your Weber® gas barbecue.**
- ⚠ **Do not attempt to disconnect the gas regulator and hose assembly or any gas fitting while your barbecue is in operation.**
- ⚠ **A dented or rusty liquid propane cylinder may be hazardous and should be checked by your liquid propane supplier. Do not use a liquid propane cylinder with a damaged valve.**
- ⚠ **Although your liquid propane cylinder may appear to be empty, gas may still be present, and the cylinder should be transported and stored accordingly.**
- ⚠ **If you see, smell or hear the hiss of escaping gas from the liquid propane cylinder**
  1. **Move away from liquid propane cylinder.**
  2. **Do not attempt to correct the problem yourself.**
  3. **Call your fire department.** ◆

BUILT-IN CUTOUT DIMENSIONS

"ISLAND" STRUCTURE CONFIGURATION OPTIONS

There are many available options for positioning the major components of your "island" structure. The major components are:

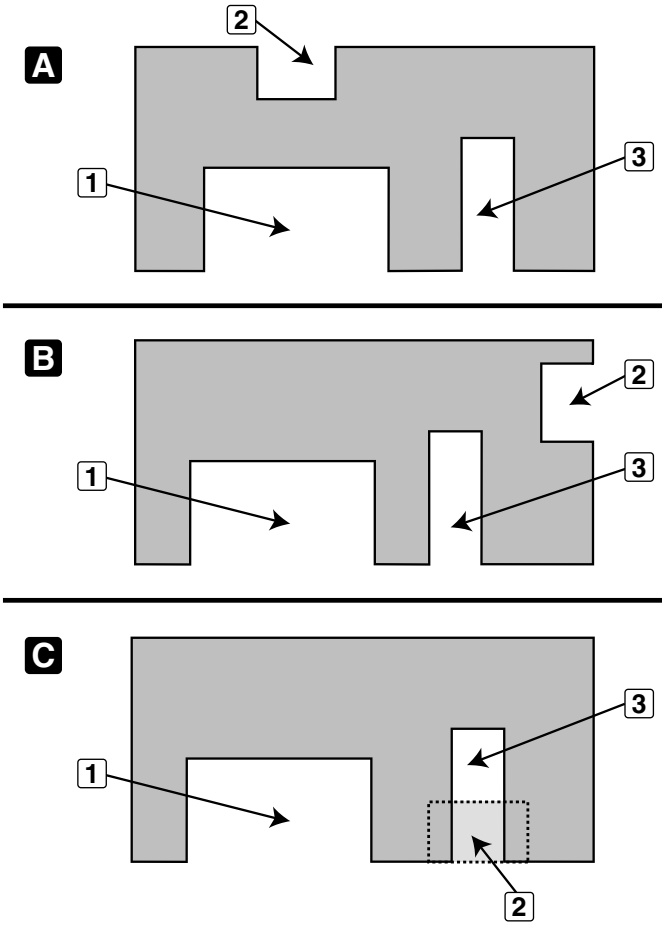
1) The Built-In Grill
2) Gas supply enclosure
3) Optional side burner accessory

The three common options (A, B, C) are illustrated in the " 'Island' Structure Configuration Options" table.

Note: Gas line limitation

The gas supply hose from grill manifold to gas supply bulkhead must not exceed 58" (147 cm). The ⅜" (9.52 mm) side burner accessory hose (not included) must not exceed 58" (147 cm). ◆

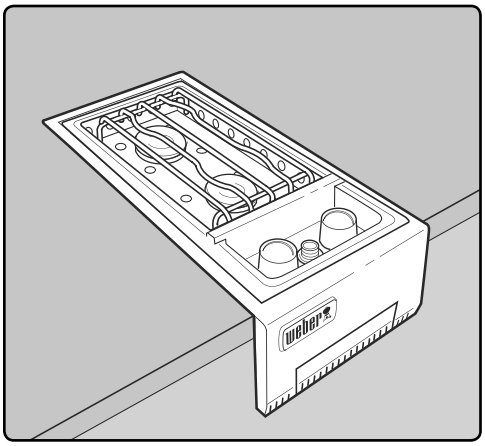
"ISLAND" STRUCTURE CONFIGURATION OPTIONS



1	Summit® Built-In Grill
2	Gas supply
3	Optional side burner accessory

NOTE: IF YOU HAVE PURCHASED A SIDE BURNER

If you have purchased a side burner accessory with your Summit® Gas Grill, Weber® recommends that you read the SUMMIT® BUILT-IN SIDE BURNER INSTALLATION/ OWNER'S GUIDE before designing your "island" structure. ◆



BUILT-IN CUTOUT DIMENSIONS

GENERAL CONSTRUCTION DETAILS

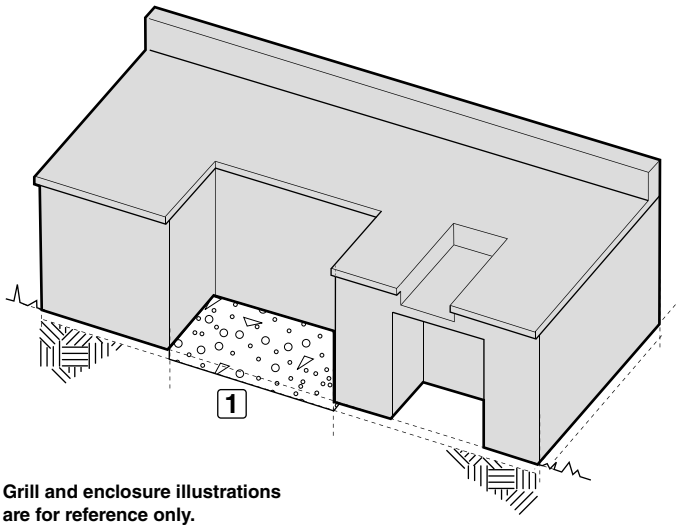
Summit® Built-In Unit and all other accessory units should be on site before construction begins.

For ease of installation, the grill will be pushed on its casters into the built-in structure.

The installation of this grill requires a level floor pad surface **(1)** and countertop surface. The floor pad surface must be constructed from solid materials and must be level and smooth. Proper subgrade materials must be used under the floor pad to prevent materials from settling and heaving.

Rotisserie Outlet

If the supporting structure is going to have an electrical outlet for a rotisserie, it should be on the left side of the structure. ◆



Grill and enclosure illustrations are for reference only.

BUILT-IN CUTOUT GENERAL DIMENSIONS

All dimensions are to finished surfaces.

⚠ **WARNING: All countertop finished surfaces must be constructed of a noncombustible material.** ◆

BUILT-IN CUTOUT GENERAL DIMENSIONS

	460	660	TOLERANCES
1	34" (864 mm)	42" (1067 mm)	±¼" (6 mm)
2	36" (914 mm)	36" (914 mm)	max
3	24 5⁄16" (618 mm)	24 5⁄16" (618 mm)	±¼" (6 mm)

BUILT-IN CUTOUT DIMENSIONS

POSITIONING YOUR GRILL

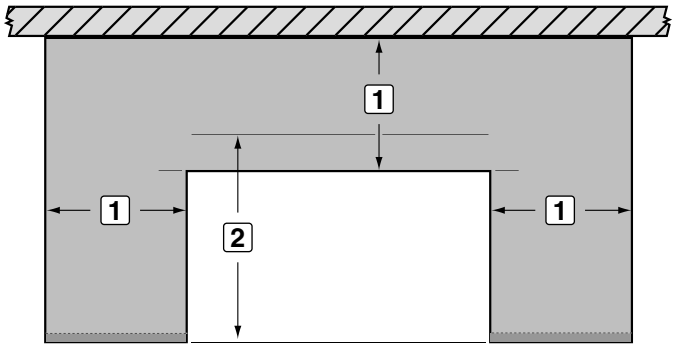
When determining a suitable location for your Summit® Gas Grill installation, give thought to concerns such as exposure to wind, proximity to traffic paths, and keeping any gas supply lines as short as possible. Never locate the Summit® Gas Grill in a garage, breezeway, or shed, under an unprotected overhang, or in any other enclosed area. Position the grill and structure so there is enough room to safely evacuate the area in case of a fire.

CLEARANCE FROM SURFACES OR STRUCTURES

⚠ **WARNING: The structure, "island," countertops, and adjacent work areas for the Built-In Grill installation must be built from noncombustible materials only.**

NOTE: If you have questions on which materials are considered noncombustible, contact your local building materials supplier or fire department. ◆

CLEARANCES - INSTALLATION ADJACENT TO A STRUCTURE



1	24" (610 mm) any surface
2	27" (686 mm) minimum for lid clearance

CLEARANCES - "ISLAND" INSTALLATION

⚠ **ATTENTION: This product has been safety tested and is only certified for use in a specific country. Refer to country designation located on outer carton.**

These parts may be gas carrying or gas burning components. Please contact Weber-Stephen Products LLC, Customer Service Department for genuine Weber-Stephen Products LLC replacement part(s) information.

⚠ **WARNING: Do not attempt to make any repair to gas carrying, gas burning, igniter components or structural components without contacting Weber-Stephen Products LLC, Customer Service Department. Your actions, if you fail to follow this Product Warning, may cause a fire, an explosion, or structural failure resulting in serious personal injury or death as well as damage to property.**

⚠ **ATENCIÓN: A este producto se le han realizado pruebas de seguridad y ha sido certificado para usarse en un país específico. Refiérase al país indicado en la parte externa del cartón de empaque.**

Estas partes pueden ser componentes que transporten gas o lo quemen. Por favor póngase en contacto con el Departamento de Atención al Cliente de Weber-Stephen Products LLC para obtener información sobre las partes de repuesto Weber-Stephen Products LLC genuinas.

⚠ **ADVERTENCIA: No trate de realizar reparación alguna a los componentes que transporten o quemen gas sin antes ponerse en contacto con el Departamento de Atención al Cliente de Weber-Stephen Products LLC. Si no llegase a acatar esta advertencia, sus acciones podrían causar un fuego o una explosión que resulte en lesiones personales serias o la muerte o daños a la propiedad.**

⚠ **ATTENTION : Ce produit a fait l'objet de tests de sécurité et est certifié pour une utilisation dans un pays particulier uniquement. Vérifiez la désignation de pays située sur le carton d'emballage.**

Ces pièces peuvent contenir du gaz ou être des éléments dont la combustion produit du gaz. Veuillez consulter le Service clientèle de Weber-Stephen Products LLC pour des renseignements sur les pièces de rechange originales de Weber-Stephen Products LLC.

⚠ **MISE EN GARDE : Ne tentez pas d'effectuer des réparations sur des éléments contenant du gaz ou sur des éléments dont la combustion produit du gaz sans contacter le service clientèle de Weber-Stephen Products LLC. Si vous ne suivez pas la présente Mise en garde relative au produit, vos actions risquent de provoquer un incendie ou une explosion entraînant des blessures physiques graves voire un décès ainsi que des dégâts matériels.**

Item Name	High-performance coating system
Item Type	Waterborne acrylic epoxy
Description	Waterborne acrylic epoxy coating for exterior hollow metal doors, frames, and handrails
Manufacturer	Sherwin Williams Company
Model	Water-Based Acrolon 100 Polyurethane Series 65 over Macropoxy 646-100 B58 SeriesPrimer.
Dimensions	Primer: 2 mils DFT/ Finish Coat: 3 mils DFT
Color	Color to match exterior window finish
Finish	Semi-gloss
Material Composition	Epoxy resin
CSI #	099600 - High Performance Coatings
Omniclass #	22-099600 - High Performance Coatings
Best Practices	Low-emitting materials
Quality Standards	Master Painters Institute "MPI Architectural Painting Specification Manual"

IMAGE NOT AVAILABLE

SPECIAL INSTRUCTIONS

Surface preparation for shop priming: SSPC-S 6 Commercial Blast.
Surface preparation for field application: SSPC-SP 3 Power Tool Cleaning.
Prior to painting factory-primed doors and frames, sand or abrade existing primer, apply tie coat equal to Great Lakes Laboratories "Clean N' Etch."

Revision Date: Nov 23, 2022

Item Name	Exterior Paint
Item Type	Exterior Metal Paint
Description	Exterior Ferrous Metal Acrylic Gloss Enamel Paint Coating for exterior hollow metal doors, frames, and handrails
Manufacturer	Sherwin Williams
Model	Pro Industrial Acrylic-Gloss (B66-600 Series)
Dimensions	NA
Color	Color to match exterior window finish
Finish	Gloss
Material Composition	Ambient cured, single component 100% acrylic coating
CSI #	09 90 00 Paint
Omniclass #	22-099000 Paint
Best Practices	Formulated without lead, mercury or chromates. Low-VOC less than 50 grams per litre; 0.42 lbs. pergallon
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Notes	Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

SPECIAL INSTRUCTIONS

Steel:
1 coat Pro Industrial Pro-Cryl Primer or Pro Industrial DTM Primer-Finish or Kem Bonds HS or Zinc Clad Primer
1-2 coats Pro Industrial Acrylic

Item Name	Intumescent Coating
Item Type	Intumescent mastic
Description	Intumescent Mastic Fireproofing for Application to Exposed Steel
Manufacturer	Astroflame Ltd.
Model	Astro IWC Paint
Dimensions	Material applied at spreading rate recommended by manufacturer to achieve a total dry film thickness of not less than 0.436-inch
Color	To match Nichiha "White Diamond ED680-CUS"
Finish	Two-component polysiloxane Solvent-Thinned Paint Finish Coat for interior and exterior use
Material Composition	Water-based, Intumescent Fire Resistive Material (IFRM) consisting of polyvinyl acetate resins and inorganic fillers designed for the fire protection of interior structural steel.
CSI #	078123 - Intumescent Fireproofing
Omniclass #	22-078123 Intumescent Fireproofing
Fire/Smoke Rating	ASTM E84, Class A. Flame Spread: 0/ Smoke Developed: 20.
Structural Performance	Abrasion Resistance: ASTM D4060 0.1105 g/ 1,000 cycles/Bond Strength: ASTM D4541 485 psi (3,344 kPa)/ Impact Resistance: ASTM D2794 160 inch-lb (18 Nm) @ 2 mm.
Best Practices	Low VOC
Quality Standards	AWCI Technical Manual 12-B “Standard Practice for the Testing and Inspection of Field Applied Thin-Film Intumescent Fire-Resistive Materials; an Annotated Guide”, Latest Edition.
Accessories	Primer shall be approved by manufacturer and applied in fun accordance with the primer manufacturer's written instructions. Glass- or carbon-fiber fabric of type, weight, and form required to comply with fire-resistance designs indicated; approved and provided by fireproofing manufacturer.
Product Type	Intumescent mastic.
Finish	As installed.
Warranty	2 years

Astroflame IWC Intumescent Paint and SFR Wallcoat

Astroflame IWC intumescent paint and SFR Wallcoat.

- BS476 Part 7: Class 1 surface spread of flame.
- BS476 Part 6: Fire propagation.
- Designated Class 0 in accordance with U.K.
- 1 coat Astroflame IWC intumescent paint for walls and ceilings.
- Use with Astroflame SFR wallcoat.
- For wallpaper & multi-layer painted surfaces.
- Matt and eggshell.
- Class 0 + Bs1 d0 with 1 coat of SFR wallcoat (smoke & flame retardant).
- White + BS & RAL colours.
- Intumescent basecoat for 30/60 minutes protection on plasterboard, cementitious board and concrete.
- Undercoat shades.
- Use with 1 coat of SFR wallcoat to seal.

For certification and compliance with regulations we will supply a FREE of charge Certificate of Supply with each order or project.

Product Description

Astroflame IWC intumescent paint is an intumescent coating for walls and ceilings. Inherently non-combustible surfaces such as plasterboard and brick can become a potential fire hazard due to repeated redecoration with conventional paints.

Different paint types from a variety of manufacturers have generally been used over many years with less than thorough preparation. In a fire thick layers of old paint tend to de-laminate rapidly catching and spreading fire around a building. In extreme cases a lethal “flash- over” fireball effect is created.

The resultant risk to life and property can be greatly reduced at minimum cost using a combination of Astroflame IWC intumescent paint, an insulating “intumescent” barrier coating and SFR wallcoat.

The Astroflame IWC intumescent paint system can help landlords comply the the Fire Safety Order 2005.
Ask us for details.

Available in

25 and 100 square metre for Class O and B s1 d0 for walls and ceilings

25 and 80 square metre for Class O and B s1 d0 for wallpaper

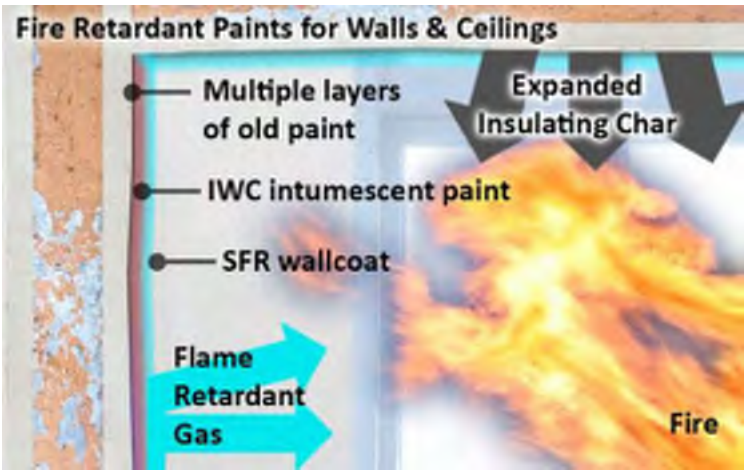
5 kg for 30 + 60 mins

Durable flamespead and smoke protection

Astroflame IWC intumescent paint expands to create an insulating barrier. Astroflame SFR wallcoat emits a safe firedamping vapour to control flamespread. Together they upgrade potentially dangerous 'multi-layer' previously painted walls & ceilings. High quality, wear, wash moderate-scrub resistant decorative finish.

Intumescent and flame retardant fire protection

When exposed to a fire Astroflame IWC intumescent paint releases a flame extinguishing gas which instantly protects the surface. Simultaneously heat activates Astroflame IWC intumescent paint underneath causing it to expand and create a fire protective barrier, insulating old paint films from heat and oxygen.



Finish and colour range

Astroflame IWC intumescent paint is overcoated with the following decorative finishes:

- Finish with SFR wallcoat
- BS4800 and RAL colours
- Matt or Eggshell
- To view the colour chart go to http://www.astroflame.com/intumescent-paint/paint-colour-charts.html

Preparation

Surfaces should be sound and firmly adhering, clean, dry and free of surface contamination. Remove loose, flaking or suspect paint film and adequately abrade existing smooth or hard coatings. Apply by brush, dense short-pile roller or spray. Maintain wet edge during application.

Specification

Achieve BS EN Class B sl dO with

- 1 coat IWC intumescent paint
- 1 coat SFR wallcoat

Application conditions

Min. 5°C, Max RH 75%. surface 3+°C above dew point.
Avoid condensation.

Fire testing

Tested at UKAS Fire Test Laboratory-

- Achieved BS EN Class B s1 d0
- Certified to EN 13501

on Multilayer painted, high-risk Class 4 surfaces

New eu/ bs en fire standard Explained

- BS EN Class B replaces Class O
- Today both Class O and Class B comply for escape routes,
- but Class O is being phased out
- Safe, compliant BS EN standards for smoke & toxic gasses are s1 & s2
- Safe, compliant BS EN standard for flaming droplets is dO
- New compliant standards for escape routes, corridors, stairs,
- lobbies etc are BS EN Class B s1 dO and Class B s2 dO

Quality assurance

All products are manufactured under ISO 9001.

How to Order

Please fill in the online Walls and Ceilings Enquiry Form and your order will be processed within 48hrs along with your preferred delivery requirement.

ISOLATEK® INTERNATIONAL

CAFCO® SprayFilm® WB 3
(Americas)

ISOLATEK® Type WB 3
(Worldwide)

Intumescent Fireproofing

PRODUCT DESCRIPTION

CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 is a water-based, Intumescent Fire Resistive Material (IFRM) consisting of polyvinyl acetate resins and inorganic fillers designed for the fire protection of interior structural steel.

CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 gives architects the ability to design using steel that can be decorative and aesthetically pleasing. It can be top coated to match its surroundings and allows steel to be left exposed to view while providing the fire resistance rating.

PRODUCT ADVANTAGES

- *Water based intumescent coating with low VOC's*
- *Semi smooth architectural finish*
- *Can be finished with a wide variety of topcoat types and colors*
- *Quick, easy application and clean up*
- *Wide range of testing*
- *3-hour rated UL protected floor assembly*
- *Provides up to 4-hour fire resistance ratings in accordance with ANSI/UL 263, ASTM E119, CAN/ULC-S101 and BS 476 Parts 20-21*

PHYSICAL PERFORMANCE

It is important for fire protection materials to be able to withstand abuse. American Society for Testing and Materials (ASTM) test methods are used to evaluate the performance of intumescent materials when subjected to these various physical forces. CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 has been evaluated to meet rigorous industry test standards.

Physical Performance

Characteristic	ASTM Method	Laboratory Tested Performance*	
Abrasion Resistance	D4060	0.1105 g/ 1,000 cycles	
Bond Strength	D4541	485 psi (3,344 kPa)	
Durometer Hardness (Shore D)	D2240	67 Shore D	
Impact Resistance	D2794	160 inch-lb (18 Nm) @ 2 mm	
Surface Burning	E84	Flame Spread 0 Smoke Developed 20	Class A

* Values represent independent laboratory tests under controlled conditions.

Technical Data

Color	White
Density	12.0 lb/gal ±0.5
pH Value	7.5 to 8.5
Application Temperature	Min. 50°F (10°C), Max. 100°F (38°C)

FIRE TEST PERFORMANCE

CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 has been extensively tested for fire resistance and is rated for up to 4 hours for floor assemblies, beams, and columns.

- Classified by UL in accordance with ANSI/UL 263 (ASTM E119)
- Classified by UL in accordance with CAN/ULC-S101 (ASTM E119)
- Tested to BS 476 Parts 20-21

CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 has also been tested for surface burning characteristics in accordance with ASTM E84 and is rated Class A.

Flame Spread .....0 Smoke Developed 20

Type SprayFilm-WB 3 OR Type WB 3 File 16640

CLASSIFIED C UL US

MASTIC COATING
FIRE RESISTANCE CLASSIFICATION SEE UL FIRE RESISTANCE DIRECTORY

CODE COMPLIANCES

CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 satisfies the requirements of the following:

- IBC® - INTERNATIONAL BUILDING CODE®
- City of Los Angeles (LADBS, Category 1 Material)
- NBC - National Building Code of Canada
- ICC-ES, AC23 and AC10 Requirements (UL ER13348-01)

MAJOR SPECIFICATIONS

CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 complies with the requirements of the following specifications:

- MasterSpec®, Section 078123 APPLIED FIREPROOFING (AIA)
- MasterFormat® 2014, Section 07 81 00 Applied Fireproofing (CSC,CSI)
- Unified Facilities Guide Specification, UFGS 07 81 00 Spray-Applied Fireproofing (USACE, NAVFAC, AFCEC, NASA)
- Master Construction Specifications, Number 07 81 00 Applied Fireproofing (VA)
- Code of Federal Regulations, Title 40 Protection of the Environment (EPA)
- PBS-P100, Facilities Standards for the Public Buildings Services (GSA)

APPLICATION

- A compatible primer must be applied to the steel substrate. Refer to the Primers for CAFCO SprayFilm / ISOLATEK Type WB Intumescent Fireproofing Technical Data Sheet.
- CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 can be brushed or sprayed, not rolled and is also available in a trowel grade formulation (CAFCO SprayFilm WB 3 TG / ISOLATEK Type WB 3 TG).
- The applied thickness of CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 will depend upon the specified fire rating and size / shape of the steel member to be protected.
- If desired, a finish coat may be applied in the desired color and finish directly over CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 in accordance with the guidelines noted in our Finish Coat Materials Technical Data Sheet.

Packaging/Storage

Packaging	5.0 U.S. gal (18.9 L) container
Net Contents	5.0 U.S. gal / 58 lbs (18.9 L / 26.3 kg)
Gross Weight (Approx)	61 lbs (27.6 kg)
Shelf Life	12 months in unopened sealed containers, properly stored.
Storage	Storage Temperature 33° F - 100° F (1° C - 38° C) Must protect from freezing and excessive heat. Store in a dry environment.

CAFCO SprayFilm WB 3 / ISOLATEK Type WB 3 Guide Specification

SECTION 078123 - Intumescent Fireproofing

The following is an outline/short language specification. Complete specifications for intumescent fire resistive materials are available on various media upon request.

PART 1 - GENERAL

1.1 Scope

1.1.1 This specification covers labor, materials, equipment, and application necessary for, and incidental to, the complete and proper installation of intumescent fire protection for application to steel structures and supports in accordance with all applicable requirements of contract documents.

1.1.2 This specification shall be supplemented by the applicable requirements of building codes, insurance rating organizations and all other authorities having jurisdiction.

1.2 Section Includes

1.2.1 Intumescent fire protection material.

1.2.2 Topcoat protective decorative finish.

1.3 Related Sections

1.3.1 SECTION 051200 – STRUCTURAL STEEL FRAMING

1.3.2 SECTION 053100 – STEEL DECKING

1.3.3 SECTION 072100 – THERMAL INSULATION

1.3.4 SECTION 078123 – INTUMESCENT FIREPROOFING

1.3.5 SECTION 078443 – JOINT FIRESTOPPING

1.4 References

1.4.1 Underwriters Laboratories (UL) Fire Resistance Directory.

1.4.2 Test Standards

A. UL 263 (ASTM E119) - Fire Tests of Building Construction and Materials.

B. ASTM E84 - Surface Burning Characteristics of Building Materials. Class A Rating Required; Flame Spread Maximum: 0 and Smoke Developed Maximum: 20.

C. ASTM D2240 – Durometer Hardness (Shore D). Minimum: 67 Shore D.

D. ASTM D2794 – Impact Resistance. 160 inch-lb (18 Nm).

E. ASTM D4060 – Abrasion Resistance. Maximum 0.110 grams/1000 cycles.

F. ASTM D4541 – Bond Strength. Minimum: 485 psi. (3344 kPa.)

1.4.3 Steel Structures Painting Council (SSPC) Surface Preparation Standards.

1.4.4 Material manufacturer's current published information including, but not limited to, application guide.

1.4.5 AWCI Technical Manual 12-B "Standard Practice for the Testing and Inspection of Field Applied Thin-Film Intumescent Fire-Resistive Materials; an Annotated Guide", Latest Edition.

1.5 System Description

1.5.1 The intumescent fire protection materials shall be applied at the required thickness to provide the UL fire resistive ratings.

1.6 Submittals

1.6.1 Manufacturer's Data: Submit manufacturer's specifications, including certification as may be required to show material compliance with contract documents.

1.7 Quality Assurance

1.7.1 Manufacturer - Company specializing in manufacturing fire protection products.

1.7.2 The intumescent fire resistive material shall be manufactured under the Follow- Up Service program of UL or ULC and bear the UL and/or ULC label (mark).

1.7.3 Applicator - A firm with expertise in the installation of fire resistive or similar materials. This firm shall be recognized or otherwise approved by fire resistive material supplier.

1.7.4 Product - The product shall be approved by the architect and applicable authorities having jurisdiction.

1.8 **Delivery, Storage and Handling**

1.8.1 Deliver materials to the project in manufacturer's unopened packages, fully identified as to trade name, type and other identifying data. Packaged materials shall bear the appropriate labels, seals and UL label (mark) for fire resistive ratings and shall be stored at temperatures between 33° F - 100° F (1° C - 38° C), in a dry interior location away from direct sunlight. PROTECT FROM FREEZING.

1.9 Project/Site Conditions

1.9.1 When the temperature at the job site is less than 50° F (10° C), a minimum substrate and ambient temperature of 50° F (10° C) shall be maintained prior to, during, and a minimum of 72 hours after application. If necessary for job schedule, the General Contractor shall provide enclosures and heat to maintain proper temperatures and humidity levels in the application areas.

1.9.2 In enclosed areas, ventilation must not be less than 4 complete air exchanges per hour until the material is dry.

1.9.3 Relative humidity shall not exceed 85% throughout the total period of application and drying for the intumescent fire resistive material, and must not exceed 85% throughout the application and drying for the protective decorative topcoat.

1.10 **Sequencing and Scheduling**

1.10.1 Applicator shall cooperate in the coordination and scheduling of fire protection work to avoid delays in job progress.

1.10.2 The installation of piping, ducts, conduit or other suspended equipment shall not commence until the application of the thin-film fire resistive material is complete in that area.

PART 2 - PRODUCTS

2.1 Compatible Metal Primer

2.1.1 Primer shall be approved by manufacturer and applied in full accordance with the primer manufacturer's written instructions.

2.2 Intumescent Fire Protection System

2.2.1 The intumescent fire resistive material shall be CAFCO® SprayFilm® WB 3 / ISOLATEK® Type WB 3 as supplied by Isolatek International or CAFCO / ISOLATEK Industries.

2.2.2 Intumescent fire resistive material shall be applied in accordance with drawings and/or specifications, and shall have been tested in accordance with the procedures of UL 263 or ASTM E119 or CAN/ULC-S101, and reported by Underwriters Laboratories or Underwriters Laboratories of Canada only.

2.3 **Decorative Topcoating**

2.3.1 Topcoat materials shall be as required for color-coding, aesthetics or additional surface protection, and approved by the thin-film fire resistive material manufacturer.

PART 3 - EXECUTION

3.1 Preparation

3.1.1 All surfaces to receive thin-film fire resistive material shall be clean, dry and free of oil, grease, loose mill scale, dirt, dust or other materials which would impair bond of the thin-film fire resistive material to the surface. Any cleaning of the surfaces to receive fire resistive material shall be the responsibility of the General Contractor or steel erector, as outlined in the structural steel section.

3.1.2 Confirm compatibility of surfaces to receive thin-film fire resistive material. Steel surfaces shall be primed with a compatible primer approved by the thin-film fire resistive material manufacturer.

3.1.3 Provide masking, drop cloths or other suitable coverings to prevent overspray onto surfaces not intended to be coated with intumescent coating.

3.2 Application

3.2.1 The thin-film fire resistive material shall be applied at the required dry film thickness per the appropriate UL design number.

3.3 Mock Up

3.3.1 Before proceeding with the work, the applicator shall apply the thin-film fire resistive material to a section witnessed by the architect's or owner's representative. The application shall be subject to their approval and shall be used as a guide for texture and thickness of the finished work.

3.4 Clean Up and Repair

3.4.1 Upon completion of installation, all excess material, overspray and debris shall be cleared and removed from the job site.

3.4.2 All patching of and repair to thin-film fire resistive material, due to damage by other trades, shall be performed under this section and paid for by the trade responsible for the damage. Patching shall be performed by applicators recognized or otherwise approved by the manufacturer.

3.5 **Inspection and Testing**

3.5.1 In addition to continuous Wet Film Thickness checks performed by applicator during application, the installed intumescent material shall be inspected by a qualified independent testing laboratory for thickness in accordance with the AWCI Technical Manual 12-B "Standard Practice For The Testing and Inspection Of Field Applied Thin-Film Intumescent Fire-Resistive Materials; an Annotated Guide", Second Edition, before application of the topcoat.

3.5.2 The results of the above tests shall be made available to all parties at the completion of each area and approved prior to the application of topcoat.

ISOLATEK INTERNATIONAL is registered with the AIA Continuing Education System (AIA/CES)

We support our customers with unsurpassed technical expertise and customer service, complemented by an extensive global network of experienced sales representatives and recognized applicators. For detailed product information or for the name of the sales representative in your area please contact us.

The performance data herein reflect our expectations based on tests conducted in accordance with recognized standard methods under controlled conditions. The applicator, general contractor, property owner and/or user MUST read, understand and follow the directions, specifications and/or recommendations set forth in Isolatek International's publications concerning use and application of these products, and should not rely merely on the information contained in this Technical Data Sheet. Isolatek International is not responsible for property damage, bodily injuries, consequential damages, or losses of any kind that arise from or are related to the applicator's general contractor's, or property owner's failure to follow the recommendations set forth in Isolatek International's publications. The sale of these products shall be subject to the Terms and Conditions set forth in the Company's invoices.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	High-performance coating system
Item Type	Waterborne acrylic epoxy
Description	Waterborne acrylic epoxy coating for exterior metal fabrications (bollards).
Manufacturer	Tnemec Company
Model	H.B. Tneme-Tufcoat Series 113 over Primer Series 901K-97 Tnemec-Zinc.
Color	Safety yellow
Finish	Semi-gloss
Material Composition	Epoxy resin
CSI #	099600 - High Performance Coatings
Omniclass #	22-099600 - High Performance Coatings
Best Practices	Low-emitting materials
Quality Standards	Master Painters Institute "MPI Architectural Painting Specification Manual"
Notes	Surface preparation for shop priming: SSPC-S 6 Commercial Blast. Surface preparation for field application: SSPC-SP 3 Power Tool Cleaning.

Lumark

DESCRIPTION

The patented Lumark Crosstour™ LED Wall Pack Series of luminaries provides an architectural style with super bright, energy efficient LEDs. The low-profile, rugged die-cast aluminum construction, universal back box, stainless steel hardware along with a sealed and gasketed optical compartment make the Crosstour impervious to contaminants. The Crosstour wall luminaire is ideal for wall/surface, inverted mount for façade/canopy illumination, post/bollard, site lighting, floodlight and low level pathway illumination including stairs. Typical applications include building entrances, multi-use facilities, apartment buildings, institutions, schools, stairways and loading docks test.

Catalog #	XTOR2B-W	**Type**	
Project			
Comments		**Date**	1/27/2020
Prepared by	Kathleen Kenny, National Account, 678-447-5208, kathleen.kenny@cooperlighting.com		

SPECIFICATION FEATURES

Construction

Slim, low-profile LED design with rugged one-piece, die-cast aluminum hinged removable door and back box. Matching housing styles incorporate both a small and medium design. The small housing is available in 12W, 18W and 26W. The medium housing is available in the 38W model. Patented secure lock hinge feature allows for safe and easy tool-less electrical connections with the supplied push-in connectors. Back box includes three half-inch, NPT threaded conduit entry points. The universal back box supports both the small and medium forms and mounts to standard 3-1/2" to 4" round and octagonal, 4" square, single gang and masonry junction boxes. Key hole gasket allows for adaptation to junction box or wall. External fin design extracts heat from the fixture surface. One-piece silicone gasket seals door and back box. Minimum 5" wide pole for site lighting application. Not recommended for car wash applications.

Optical

Silicone sealed optical LED chamber incorporates a custom engineered mirrored anodized reflector providing high-efficiency illumination. Optical assembly includes impact-resistant tempered glass and meets IESNA requirements for full cutoff compliance. Available in seven lumen packages; 5000K, 4000K and 3000K CCT.

Electrical

LED driver is mounted to the die-cast housing for optimal heat sinking. LED thermal management system incorporates both conduction and natural convection to transfer heat rapidly away from the LED source. 12W, 18W, 26W and 38W series operate in -40°C to 40°C [-40°F to 104°F]. High ambient 50°C models available. Crosstour luminaires maintain greater than 89% of initial light output after 72,000 hours of operation. Three half-inch NPT threaded conduit entry points allow for thru-branch wiring. Back box is an authorized electrical wiring compartment. Integral LED electronic driver incorporates surge protection. 120-277V 50/60Hz or 347V 60Hz models.

Finish

Crosstour is protected with a Super durable TGIC carbon bronze or summit white polyester powder coat paint. Super durable TGIC powder coat paint finishes withstand extreme climate conditions while providing optimal color and gloss retention of the installed life.

Warranty

Five-year warranty.

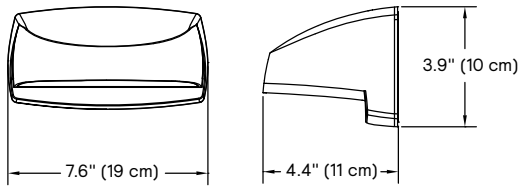
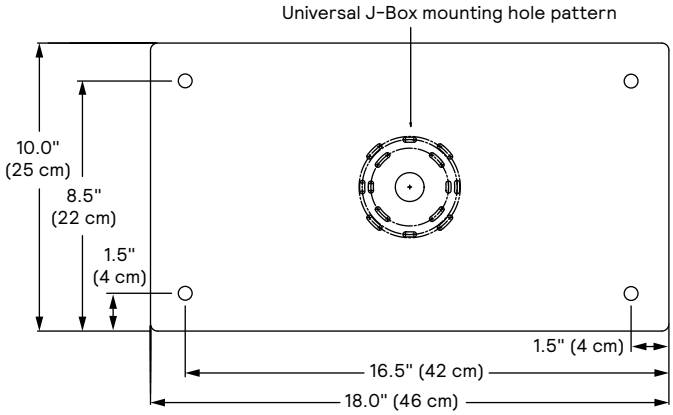
Dimensions



Luminaire weight: 4 lbs (1.8 kg)

Accessory dimensions (ordered separately)

LPWCVRPLT LPW Universal wall cover mounting plate, 0.08" aluminum, bronze textured paint (used to cover larger pre-existing opening or surfaces, field installed). Offers same J-Box pattern as luminaire or may lagged to wall using (4) knockouts.



LED Wattage and Lumen Values

Ordering Code	Total LEDs	LED Current (mA)	Color Temp.	Average System Watts	Type 2		
					Lumen Output	BUG Rating	Efficacy (LPW)
LPW-7-10-NW-G3-2	18	250	4000	9.7	1050	B1-U0-G0	108
LPW-7-10-WW-G3-2	18	250	3000	9.7	1051	B1-U0-G0	108

Values from photometric tests performed in accordance with IESNA LM-79 and are representative of the configurations shown.

Actual performance may vary due to installation and environmental variables, LED and driver tolerances, and field measurement considerations. It is highly recommended to confirm performance with a photometric layout.

NOTE: Some data may be scaled based on tests of similar (but not identical) luminaires. Contact factory for configurations not shown.

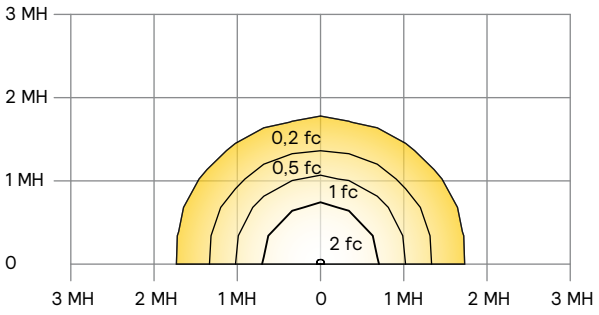
Predicted lumen depreciation data

Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions.L_{70} is the predicted time when LED performance depreciates to 70% of initial lumen output. Calculated per IESNA TM21-11. Published L_{70} hours limited to 6 times actual LED test hours

Ambient Temperature °C	Calculated L_{70} Hours	L_{70} per TM-21	Lumen Maintenance % at 60,000 hrs
up to 40°C	>200,000 hours	>60,000 hours	>92%

Optical distribution

Based on LPW7-10-NW-G3-2 at 10' mounting height



LPW7 10' mounting height			
Mounting height	6 ft	8 ft	10 ft
Multiplier	1.23	1.14	1.00

LPW7 LytePro

LED small wall sconce

General Description

LytePro LED small wall sconce LPW7 combines excellent performance, design and value to meet the needs of the energy and budget conscious. The LPW7 is available for use in downward facing, surface wall mount applications, over recessed j-boxes or where power can be directly fed through back surface, whereby connections splices can be made inside the luminaire housing. Two SKU's are available as in-stock configurations (2-day quick ship).

Housing

Die-cast housing houses both the LED and driver assemblies. Design incorporates an integrated heat sink to maximize thermal performance and reliability. Backplate is corrosion free, composite polycarbonate, with built-in level bubble, offers integral interlocking hook and mount design for easy installation.

Mounting

Easy interlocking hook and mount housing/ backplate design for easy installation. Mounts over 3.5", 4" octagonal j-boxes and single gang switch boxes (mounted horizontally) or can be directly lagged to surface. Ensure proper steps for gasket/sealing luminaire to surface.

IP Rating

Optical compartment is IP65 rated with a frosted acrylic lens sealed with silicone.

LED Board and Array

Provides up to 108 lm/W at the system level. Standard color temp is 4000K or 3000K +/- 130K, minimum 70 CRI.

Electrical

Driver efficiency (>89% standard). 120-277V. Temp range: -40°C (-40°F) to 40°C (104°F). Open/short circuit protection. RoHS compliant.

Listings

Product is cETLus listed suitable for Wet Locations. Suitable for use in ambients from -40°C to 40°C (-40°F to 104°F). DesignLights Consortium® qualified.

Finish

Each luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) textured polyester powdercoat finish.

Warranty

LPW7 luminaires, the LED arrays, and the drivers are all covered by a 5-year limited warranty. See www.signify.com/warranties for details.

A complete luminaire consists of a housing frame, LED module, and reflector (ordered separately)

Mounting Frame	Lumens	Driver Options	Factory Installed Emergency & Connected Lighting Options	Accessories (Order & Install Separately)
HC6 = 6" new construction downlight housing **HC6CP** = 6" new construction housing, Chicago Plenum - CCEA compliant	**05** = 500 lm **07** = 750 lm **10** = 1000 lm **15** = 1500 lm **20** = 2000 lm **25** = 2500 lm **30** = 3000 lm **35** = 3500 lm **40** = 4000 lm **45** = 4500 lm (7) **50** = 5000 lm (7) **55** = 5500 lm (7) **60** = 6000 lm (7)	**D010**=UNV 120-277V, 50/60Hz, 0-10V 1%-100% dimming at 120-277V on 0-10V controls **Canada Option 500-5000 lumens:** **D010347** = 347VAC 50/60Hz 0-10V 1%-100% dimming. For 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000lm models only (1) **Canada Option 5500-6000 lumens:** **D010X347** = step down transformer factory installed (with standard "D010" 120V-277V LED driver). For 5500, 6000lm models only (1)	**REM7** = 7 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **REM14** = 14 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **IEM7** = 7 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **IEM14** = 14 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **BOD7ST** = 7.5 watt Bodine self-test emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **WTA** = Factory WaveLinx Tilemount Sensor Kit (4) **WTK** = Factory WaveLinx Lite Commercial Tilemount Sensor Kit (5)	**HB128APK** = L channel hanger bar, 26", pair (replacement) **RMB22** = Adjustable wood joist mounting bars, pair, extend to 22" long **HSA6** = Slope Adapter for 6" Aperture Housings, Specify Slope (refer to instructions for installing housing and trim) **H347** = 347 to 120V step down transformer, 75VA **H347200** = 347 to 120V step down transformer, 200VA **WTA** = Field WaveLinx Tilemount Sensor Kit (4) **WTK** = Field WaveLinx Lite Commercial Tilemount Sensor Kit (5)
		DLV = Distributed Low Voltage driver 1%-100% dimming. DLV for use with DLVP system only. Refer to DLVP low-voltage power module and DLVP specifications for details. (1)	**REMV7** = 7 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6) **REMV14** = 14 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6) **IEMV7** = 7 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6) **IEMV14** = 14 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6)	
Notes	**Notes** (7) Marked Spacing: Center to Center of Adjacent Luminaires = 36" Center of Luminaire to Building Member = 18" Minimum overhead = 0.5	**Notes** (1) Not available with CP models	**Notes** (1) Not available with CP models (2) Not available with D010347 (347V models) (3) ULus for U.S. only (4) WTA = WaveLinx tile mount sensor kit for daylight dimming, PIR motion sensing, and optional RLTS - Real Time Location Services, use with D010 only (Refer to WaveLinx specifications) (5) WTK = WaveLinx Lite tile mount sensor kit for daylight dimming, PIR motion sensing, use with D010 only (Refer to WaveLinx Lite specifications) (6) Emergency battery backup options are Non-IC only, and rated for a minimum starting temperature of 0°C	**Notes** (4) WTA = WaveLinx tile mount sensor kit for daylight dimming, PIR motion sensing, and optional RLTS - Real Time Location Services, use with D010 only (Refer to WaveLinx specifications) (5) WTK = WaveLinx Lite tile mount sensor kit for daylight dimming, PIR motion sensing, use with D010 only (Refer to WaveLinx Lite specifications)

LED Module	Lumens	CRI/CCT	
HM6 = 6" LED Modules For use with HC6 - HC6CP New Construction housings only	**0525** = 500 - 2500 lumen **3040** = 3000-4000 lumen **4560** = 4500-6000 lumen	**827** = 80CRI, 2700K **830** = 80CRI, 3000K **835** = 80CRI, 3500K **840** = 80CRI, 4000K **850** = 80CRI, 5000K	**927** = 90CRI, 2700K **930** = 90CRI, 3000K **935** = 90CRI, 3500K **940** = 90CRI, 4000K **950** = 90CRI, 5000K
Notes	**Notes**	**Notes**	

Order Information

Reflector | Distribution | Finish | Flange | Accessories

Reflector	Distribution[8]	Finish	Flange	Accessories
61 = 6" conical reflector	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC **RWW** = rotatable wall wash with linear spread lens	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Baffle | Distribution | Finish | Flange | Accessories

Baffle	Distribution[8]	Finish	Flange	Accessories
61 = 6" baffle reflector	**WD** = wide 65° beam angle 1.28 SC (nominal) **RWW** = rotatable wall wash with linear spread lens	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option available with BB	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Reflector | Distribution | Finish | Flange | Integral Emergency

IEM Reflector	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM reflector for integral emergency only	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Baffle | Distribution | Finish | Flange | Integral Emergency

IEM Baffle	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM baffle reflector for integral emergency only	**WD** = wide 65° beam angle 1.28 SC (nominal)	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option with BB	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Reflector | Distribution | Finish | Flange

Reflector	Distribution[8]	Finish	Flange
61PS = 6" non-conductive polymer 'dead front' conical reflector Use with HM6PS0525* LED modules only[9]	**MD** = medium 60° beam angle 1.10 SC (nominal)	**W** = White	**Blank** = White flange standard with W reflector
Notes (9) 61PS is 1000-2000 lumens Non-IC rated. 500 & 750 lumens IC rated. 61PS is not for use over 2000lm in Non-IC or over 750lm in IC.	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**

Product Specifications

Housing Frame
- Boat shaped galvanized steel plaster frame with adjustable plaster lip
- Accommodates 1/2" to 1-1/2" thick ceilings
- Installs in new construction or from below the finished ceiling (non-accessible) for remodeling (with mounting bars removed)
- Provided with two remodel clips to secure the frame to the ceiling

Universal Mounting Bracket
- Adjusts 2" vertically from above and below the ceiling
- Use with the included mounting bars or with 1/2" Electric Metallic Tube (EMT)
- Removable to facilitate remodeling installation from below the finished ceiling

Mounting Bars
- Captive pre-installed No Fuss™ mounting bars lock to T-grid with screwdriver or pliers
- Centering detents allow for consistent positioning of fixtures

LED Module
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 80 or 90 color rendering index (CRI)
- Color accuracy within 3 SDCM provides color consistency and uniformity
- 90 CRI option: R9>50 (refer to chromaticity information for details)
- Available in 2700K, 3000K, 3500K, 4000K and 5000K correlated color temperature (CCT)
- Lumen options include 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumens (nominal)
- Passive thermal management achieves 60,000 hours at 70% lumen maintenance (L70) in insulated ceilings (IC) and non-IC applications
- Integral diffuse lens provides visual shielding
- Integral connector allows quick connection to housing flex

Reflector
- Self-flanged aluminum reflectors available in narrow, medium or wide distribution patterns
- Medium distribution polymer non-conductive matte white reflector may be used to meet local codes for 'dead front' applications (500 & 750 lumen max. in IC and 2000 lumen max. in Non-IC)
- Wall wash reflector features a rotatable linear spread lens for alignment of vertical illumination
- Reflectors attach to LED module with three speed clamps
- Available in multiple painted or plated finishes

Reflector/Module Retention
- Reflector/module assembly is securely retained in the housing with two torsion springs

Driver
- Field-replaceable constant current driver provides low noise operation
- Universal 120-277VAC 50/60Hz input standard
- Continuous, 1% to 100% dimming with 0-10V analog control
- Optional low-voltage DC driver for use with Distributed Low Voltage Power (DLVP) system
- Distributed Low Voltage Power (DLVP) system combines power, lighting and controls with ease of installation (refer to DLVP Design Guide at www.cooperlighting.com for details)

Canada Options
- 347VAC 50/60Hz; 1% dimming on 0 -10V analog control, for 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000 lumen models only
- 347V step down transformer factory installed with the standard "D010" 120V-277V, LED driver on 5500, 6000 lumen models only

Emergency Option
- Provides 90 minutes of standby lighting, meeting most life safety codes for egress lighting
- Available with integral or remote charge indicator and test switch
- Available Self-Test (self-diagnostic) with remote charge indicator and test switch

Connected Lighting System Options
Two WaveLinx connected systems to choose. Summary information provided below, refer to WaveLinx system specifications and application guides for details.

<u>WaveLinx System Tilemount Sensor Kit</u>
- WaveLinx WTA tile mount sensor kit offers daylight dimming, PIR motion sensing, scene and zone configuration, automatic commissioning; and optional RLTS - Real Time Location Services available.

<u>WaveLinx Lite System Tilemount Sensor Kit</u>
- WaveLinx Lite WTK tile mount sensor kit offers daylight dimming and PIR motion sensing, scene and grouping configuration.

<u>WaveLinx Tilemount Kits Application</u>
- The WTA and WTK tilemount kits include a control module mounted on the luminaire junction box via 1/2" knock-out, and a tilemount sensor on 54-inch whip; for ceiling installation by direct-mount spring clips or via mounting bracket in octagon ceiling boxes.
- The WTA and WTK tilemount kits may be ordered as factory installed on the luminaire, or ordered separately as a field installed accessory kit.

Junction Box
- Galvanized steel junction box
- 20 in^3 internal volume excluding voltage barrier
- 25 in^3 internal total volume
- Voltage barrier for 0-10V dimming wires (occupies one 1/2" pry-out space)
- Listed for eight #12 AWG (four in, four out) 90˚C conductors and feed-thru branch wiring
- Three 1/2" and two 3/4" trade size pry-outs available
- Three 4-port push wire nuts for mains voltage with 1-port for fixture connection

Compliance
- cULus Listed to UL 1598 / C22.2 No. 250.0, suitable for damp locations and wet locations in covered ceilings only
- Emergency options provided with UL Listed emergency drivers to UL 924 / C22.2 No. 141, suitable for indoor/damp locations
- IP20 - Above finished ceiling; IP65 - Below finished ceiling
- Non-Insulated ceiling (Non-IC) rated for 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumen models (insulation must be kept 3" from top and sides)
- Insulated ceiling (IC) rated for 500, 750, 1000, 1500, 2000 lumen models and suitable for direct contact with air permeable insulation* (IC models are also suitable for Non-IC installations)
- Non-IC marked spacing required for 4500, 5000, 5500, 6000 lumen models
  - Marked Spacing Center to Center of Adjacent Luminaires = 36"
  - Center of Luminaire to Building Member = 18"
  - Minimum overhead = 0.5"
- Airtight per ASTM-E283-04
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing completed in accordance of IES LM-79-08
- Lumen maintenance projection in accordance of IES LM-80-08 and TM-21-11
- 500, 750, 1,000, 1,500 and 2,000 lumen, 90 CRI, ICAT models may be used to comply with State of California Title 24 residential code, per JA8 certification standards
- May be used to comply with State of California Title 24 non-residential code as a dimmable LED luminaire
- ENERGY STAR® certified, reference certified light fixtures database

*Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013

Warranty
- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

2700K	3000K	3500K	4000K	5000K
0.77	0.84	0.89	0.90	0.90

Multipliers for relative lumen values with other series color temperatures.

Note: Refer to IES files for more product data.

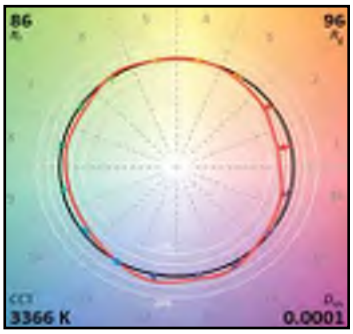
Energy & Performance Data

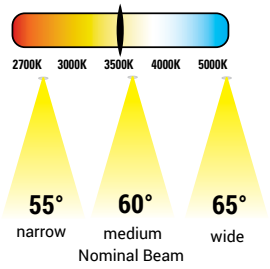
COLOR METRICS - TM-30-15 & CRI/CIE (3500K)

80 CRI Color Metric Summary - 3500K*

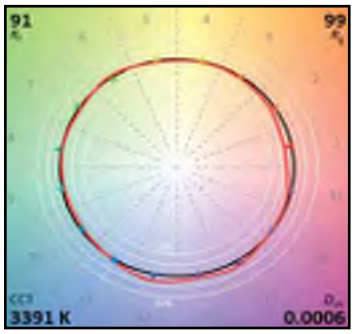


Reference Illuminant — Test Source

TM-30-15	Rf = 86
	Rg = 95.5
CRI/CIE	Ra = 83.8
	R9 = 10.3

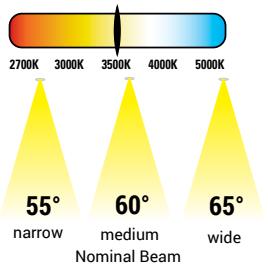


90 CRI Color Metric Summary - 3500K*



Reference Illuminant — Test Source

TM-30-15	Rf = 91.1
	Rg = 99
CRI/CIE	Ra = 92.4
	R9 = 55.1



* Color values are based on 61WDWB reflector, other finishes and field results may vary.

Minimum starting temperature -30°C (-22°F)* (Nominal input 120-277VAC & 100% of rated output power)
Sound Rating: Class A standards

Notes:
* Emergency Battery packs are rated for a minimum starting temperature of 0°C.

Connected Systems

WaveLinx Lite - WTK Tilemount Sensor

- Intuitive Android™ or Apple® iOS® app for basic system code compliant set up and configuration via Bluetooth
- Up to 28 unique areas per project site (WaveLinx Lite Bluetooth network)
- Up to 50 devices for an area, any one of 16 control zones, up to 6 occupancy sets, and custom lighting scenes
- Automatic occupancy or vacancy, sensor sensitivity, daylight dimming, etc. configurable through the app
- Refer to the WaveLinx system specifications for details

Device Security | Manual Dimmer | Occupancy Sensor | Daylighting Control | Manually Switched ON/OFF | Tuning Control | Lumen Maintenance Control | Scenes

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Exterior Recessed Light Fixture
Item Type	Down Light Fixture
Description	Downlight 6" Recessed Emergency Backup - Wet location
Manufacturer	Signify / Lightolier
Model	6RNU-P6RDL10940CCPZ10UIEM6
Dimensions	13"L x 10"W x 5"H (24"L with bar hangers)
CSI #	265600 - Exterior Lighting
Omniclass #	22-265600 - Exterior Lighting
Trim	Comfort Clear
Mount	Recessed
On Dimming System	No
Fixture Input (Max. Watts)	10W
Lamp Type	LED
Lamp Kelvin	4000
Voltage	120/277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1000
Lamp CRI	80+
Finish	Specular Clear
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 100 lm/W Lamp Life/Fixture Life: 50,000 hours

LyteProfile

P6R 6" Round Downlight & Wall Wash

ALY-007-SI

Project:
Location:
Cat.No:
Type:
Qty:
Notes:

LyteProfile downlights and wall washers provide a perfect balance of functionality with glare control. The robust and versatile UniFrame frame-in kit makes changes and updates easy to manage and install. Ideal for use in a variety of applications including open office, institutional, healthcare, and retail.

Standard luminaire = Frame + Engine/Trim + Accessories (optional)

Buy American Act of 1933 (BAA)** Compliant luminaire* = Frame-BAC + Engine/Trim-BAC

* BAA compliance requires that BAC option be selected for each of frame and engine/trim. Frame and engine/trim will be ordered/shipped together (ex: 4RN-BAC-Z4RDL20835WOCDZ10U-BAC). Accessories (optional) are not currently BAA-compliant.

Frame

Standard example: 6RN | BAC example: 6RN-BAC

Series	Aperture	Installation	Options	
6	R	N		
6 Uniframe 6-inch Non-IC	**R** Round	**N** New construction (Non-IC)	**–** Universal 120/277/347V[1] **LC** Chicago Plenum **EM6** Emergency, 6W Self-Test/Self-Diagnostic (not available for BAC)[2]	**3** 347V (for non-0-10v configurations) **RADIO** Integral Interact Pro RF sensor (120/277/347V) (enables wireless connected lighting control)[3] **BAC** Meets the requirements of the Buy American Act of 1933 (BAA)**

						Only compatible with 1000 (10) to 2500 (25) lumen configurations		

Accessories (Not currently BAA-compliant - learn more on page 2)

SBA	Interact Ready System Bridge Accessory with integral occupancy and daylight sensor (compatible with all 0-10V options, see SBA spec sheet)[7]
CAEM6	Field installable Bodine BSL6 6W battery pack with self-test/self-diagnostic for use with new construction frames, 120-277V
7925	6" sloped ceiling adapter (refer to SCA spec sheet for slope options)
AMS	ActiLume multi-sensor (optional accessory for PoE configurations)

1. Universal 120-347V is for 0-10v (Z10) dimming configurations only. For 347V non-Z10 dimming, order 347V (3) frame with (U) light engine/trim.
2. Emergency (EM6) frame is compatible with reflector mounted test switch when light engine is ordered with IEM6 option code (not compatible with 347V or Power over Ethernet configurations).
3. Interact Pro (RADIO) requires above ceiling access.
4. Shower light (SL) in only available with White (WH) reflector finish.
5. Specify standard UNV frame for use with 347V light engines
6. The 347V light engine voltage option is only available with Z10 dimming option. For other dimming protocols order UNV (U) light engine and 347V (3) frame.
7. Requires IRT9015 IR remote and Interact Pro App for commissioning.
8. IEM6 option available on DL style only.

** Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.

IC INSULATION CONTACT · WET LOCATION · c UL us LISTED · RoHS COMPLIANT · ENERGY STAR · interact ready.

P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Features

Optics

- Provides a 60° cutoff (physical and reflected)
- Wide beam distribution for general illumination
- Spun and anodized reflectors available in specular (clear), semi-specular (comfort clear and diffuse finishes. Also available in white and black painted finishes.

Quality of light

- Consult factory for RAL finishes
- Color consistency: 3 SDCM
- 80 CRI minimum

Construction (New Construction)

- Galvanized stamped steal for dry / plaster ceilings.
- Pre-installed telescoping mounting bars (13"-24")
- Frame accommodates C- channel, black iron, and 3/4" EMT for mounting distances greater than 24" between joists.
- Manufactured from 20 gage galvanized steel construction with rolled edge aperture to guide cutting tools for perfect hole cutting.

Max ceiling thickness is 2" (51 mm). Including PoE frame 4.88" (124 mm).

Patented install Mounting frame

- Pre-installed mounting bars allow for fast and tool-less install into T-grid & hat channel ceilings
- Close-cut aperture design eliminates an undesired gap between ceiling material and reflector.
- Simple plug-and-play connection between frame and light engine from below the ceiling allows for:
  - Easy upgrades
  - Technology changes
  - Repairs and troubleshooting

Dimming

- Advance 0-10V 1% dimming
- Lutron Hi-lume EcoSystem H Series 1% dimming
- EldoLED ECOdrive Dali 1% dimming
- EldoLED SOLOdrive 0-10V 0.1% dimming
- EldoLED DMX POWERdrive

Light engine

Quick connect power pack allow for easy installation and replacement from below ceiling with no need for additional wiring. This allows for:

- Frame and ceiling installation to be performed while still finalizing details such as lumen packages, CCT and control type.
- Easy replacement of electronics at end of life with minimal wasted material and labor required.
- Ease and upgradability of technology.
- Lumen Maintenance: L80 at 60,000 hours.
- 347V light engines are 0-10v dimming only and include dedicated 347V driver for use with universal 120/277/347V (U) frames. For 347V and non-0-10v dimming, order (U) light engine and 347V (3) frame (includes step down transformer).

Emergency

Bodine BSL6 6W battery pack with self-test/ diagnostic functionality. Factory or field mounted to frame.

- For trim with integral emergency test switch, order light engine with IEM6 option (ex: P6RDL20835CDZ10UIEM6). DL or SL styles only.
- For remote ceiling mounted test switch, order standard light engine (ex: P6RDL20835CDZ10U). Optional accessory ceiling mounting plate available (CAEM6TSCP) for remote mounted test switch.
- Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

Retrofit

- Easily updates legacy LyteProfile LED downlights to the latest technology. Includes light engine, trim, and driver mounted on cover plate that mounts to previous generations of LyteProfile LED luminaires. Order with R option code at end of light engine/trim catalog number.

Power over Ethernet

Powered via Philips PoE lighting controller: complies with FCC rules per Title 47 part 15 (Class A) for EMI / RFI (conducted & radiated). PoE lighting controller accessible from below ceiling.

Options and Accessories

Sloped ceilings: Compatible with sloped ceiling adapters (see SCA spec sheet).

Field Installed Emergency: Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

CAEM6: Field install EM6 kit with Bodine BSL6 6W battery pack with self-test/self-diagnostic, mounts to new construction frames. Includes remote ceiling plate for test switch. To mount test switch to trim for new construction frame, order light engine with IEM6 option code (e.g. P6RDL20835CDZ10UIEM6).

CAEM6TSCP: Ceiling cover plate for remote mounted EM6 test switch. 1/2" (25mm) hole, 4 3/8" (109mm) x 2 3/4" (69mm) rectangular. Includes two mounting screws.

ENERGY STAR® exceptions

- 500lm configurations
- Black finishes
- PoE drivers

Labels and Listings

- cULus listed for wet locations
- CCEA (frames with *LC suffix)
- ENERGY STAR® certified
- RoHS certified

Warranty

5 year limited warranty

Visit Signify.com/warranties for more information on Signify's standard 5-year limited warranty on complete luminaire systems.

Finishes

Specular clear

Most specular and therefore most efficient finish, delivers maximum photometric performance but can produce a mirror image effect of the interior space.

Comfort clear

Semi-specular finish that softens the light at the source of the reflector and creates a subtle, even luminance from the reflector cone.

Comfort clear diffuse

Slightly diffuse clear finish, which eliminates iridescence and reduces the mirror image effect inherent with a specular finish.

White

Brightest aperture when illuminated and provides the smoothest transition to most ceilings when off (white is only available with a white flange).

Black

Specular finish that provides the lowest aperture brightness possible and reduces source identification in a ceiling significantly (black is only available with a black flange).

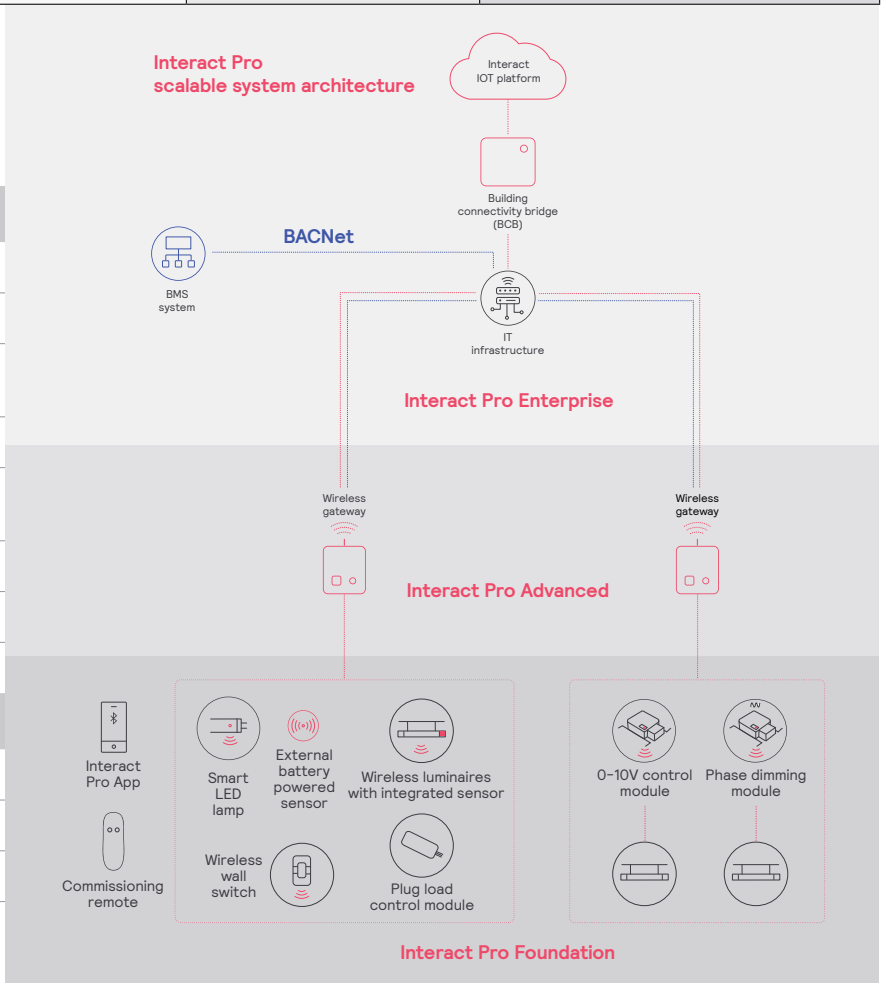
Currently supported maximum system size

To be able to design the lighting system correctly for the customer, it is important to know the prime characteristics of the system, its possibilities and limitations.

System level	
Total number of gateways	Unlimited
Total number of devices	200 per network
• luminaires with integrated sensors	150
• smart TLEDS	150
Total number of ZGP devices (sensors and switches)	50
• sensors	30
• switches	50
• zones and groups	64
Group level	
Recommended number of lights	40 (recommended 25)
Number of ZGP devices	5
Number of scenes	16



P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Wireless Controls Options

Interact Pro scalable sensor (System Bridge Accessory with -CS option):

- CS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
- Compatible with:
  - UID8451/10 wireless dimmer switch
  - SWS200 wireless scene switch
  - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
  - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
  - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
  - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem.

Interact Pro Enterprise (System Bridge Accessory with -SB option):

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- SB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Emergency Options (ER100) (System Bridge Accessory with -ER100 option):

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

Radio only sensor (RADIO):

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Wired Controls Options

Interact Office Wired (PoE):

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on Personal Control, Space Management, wayfinding, room/desk reservation and offers open APIs for light control and data exchange.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output.
- Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information on Interact Office Wired, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Interact Office Wired (PoE), Static White:

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible Zigbee Green Power wall dimmer and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on wayfinding, room/desk reservation and offers open APIs
- Requires compatible Interact Office Gateway and internet connectivity for commissioning.
- For more information on Interact Office Wireless, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Exterior Light Fixture
Item Type	Exterior Wall Sconce
Description	Decorative Wet Location Exterior Rated Sconce
Manufacturer	Cooper Lighting/iO
Model	673-16WP-L3-830-BM-UNV-2VTB-PC-BC
Dimensions	16"H x 8 3/8"W x 4"D
Finish	Bronze Metallic
CSI #	265600 - Exterior Lighting
Omniclass #	22-265600 - Exterior Lighting
Dimming Type	0-10V
Trim	N/A
Reflector	N/A
Mount	Wall
On Dimming System	No
Lens/Shade	Matte White Acrylic
Fixture Input (Max. Watts)	19
Lamp Type	LED
Lamp Kelvin	3000K
Voltage	120-277
Delivered Lumens (LED) or Mean Lumens (Non-LED)	2000
Lamp CRI	83+
Finish	Bronze Metallic
Lead Time	Stock to 4 weeks
Warranty	5 Year Warranty
Notes	Efficacy: Lamp Life/Fixture Life: 50,000 hours

DESCRIPTION

673-W and 673-WP Luminous wall sconce features 6 standard finishes, 3 decorative trim bar options and is ADA compliant.

- Wall Luminous Vanity Luminaire
- Painted solid aluminum w/ extruded white acrylic panel
- Universal circular strap for a standard 4" J-box or plaster ring
- UL and CUL approved for interior and damp locations

Catalog #	673-16WP-L3-830-BM-UNV-2VTB-PC-BC	**Type** ALY-036-CL
Project		
Comments		**Date**
Prepared by	Kathleen Kenny, National Accounts PH: 678-447-5208 kathleen.kenny@cooperlighting.com	

SPECIFICATION FEATURES

Material
Painted or plated solid aluminum with a 1/8" matte white extruded acrylic panel, open top and bottom end caps, with acrylic inserts. Luminous top and bottom for LED.

Finishes
ALP (Aluminum Paint)
MW (Matte White)
MB (Matte Black)
GRM (Graphite Metallic)
DP (Dark Platinum)
BM (Bronze Metallic)
CC (Custom Color – Specify)

For Custom Color contact factory for quotation.

LED
16": L3:2000 nominal lumens at max 20W
25": L3:2000 nominal lumens at max 20W
37": L4:3000 nominal lumens at max 29W

Driver
LED system coupled with electronic driver to deliver optimal performance. Electronic drivers are available for 120-277V applications. A 0-10V dimming control is standard on all models. Standard integral class 2 driver 29W max., 0-10V dimming.

Installation
Supplied with a universal circle strap for a standard 4" J-box or round or octagonal plaster ring. Horizontal or vertical mount. Shaper 673-W luminaires are designed for interior installations only. Shaper 673-WP are listed for wet location. Battery must be remote mounted in an interior location at a 5ft max distance.

Compliance
Shaper 673-W is U.L. and C.U.L approved for indoor and damp location. Shaper 673-WP is listed for wet location. ADA compliant, except with proud trim options.

Warranty
5 year limited warranty on LED components.

Lumark

DESCRIPTION

The Night Falcon™ LED floodlight luminaire combines high-efficiency optics, superior thermal management and energy efficiency in a cost-effective solution. The compact, robust design incorporates a separate driver compartment for maximum heat dissipation to insure longevity of both the fixture and the LEDs. The Night Falcon luminaire uses precision engineered optics delivering superior uniformity and excellent illumination to the targeted application. Typical applications include area lighting for security, building facade lighting, accent and signage lighting in both commercial and industrial applications. The Night Falcon luminaire is UL/cUL listed for wet locations and is IP66 rated.

Catalog #	NFFLD-C25-E-UNV-66-T-BZTS2/NFFLD-BZ	**Type**
Project		ALY-037-A1-CL
Comments		**Date**
Prepared by	Kathleen Kenny, National Accounts, PH: 678-447-5208 kathleen.kenny@cooperlighting.com	

SPECIFICATION FEATURES

Construction
Heavy-duty, die-cast aluminum housing, driver compartment and driver housing door. A separate driver compartment and external fins provide optimal thermal management that result in longer LED and driver life.The housing, driver compartment and optical chamber are IP66 rated. Access to the driver for maintenance is achieved with a removable driver door using pan head screws. A one-piece silicone gasket seals the door to the fixture housing. The fixture is 3G vibration rated (ANSI C136.31) to ensure durability in area and site lighting applications. Suitable for mounting within 4' (1.2m) of the ground.

Optics
The LED chamber incorporates a vacuum metalized reflector that provides high-efficiency illumination. Optics are precisely designed to shape the the NEMA 6H x 6V wide distribution and the 3H x 3V spot distribution, maximizing efficiency and application spacing. Clear glass tempered lens with full circumference form-in-place silicone gasket protects the optics from damage. Offered standard in 4000K (+/- 275K) CCT and minimum 70 CRI. Optional 5700K, 5000K and 3000K CCT and minimum 70 CRI are available.

Electrical
LED driver is mounted to the removable die-cast aluminum door for optimal heat sinking and ease of maintenance. 120-277V 50/60Hz, 347V 60Hz or 480V 60Hz operation. Integral 6kV surge is standard.10kV/10kA common- and differential- mode surge protection available as an option. 0-10V dimming driver is available to accommodate controls capability such as dimming and occupancy. Standard NEMA 3-PIN twistlock photocontrol receptacle and NEMA 7-PIN twistlock photocontrol receptacles are available as options. Suitable for ambient temperatures from -40°C to 40°C. Optional 50°C HA (high ambient) available. 92% lumen maintenance greater than 60,000 hours per IESNA TM-21 at 25°C.

Accessories
Heavy-duty steel top and side visors control glare and spill light. 1/8" thick UV stabilized vandal guard shields glass lens from impact when mounted at low levels. Easy to install wire guard features a heavy-gauge welded construction with corrosion resistant polyester powder coat finish to protect glass from projected objects.

Mounting
Mounting options include an integral die-cast aluminum slipfitter that is preset to a tilt of 45°. The knuckle base is supplied with a tooth lock adjustment that can be adjusted in 5° increments to provide flexibility in aiming the fixture from a variety of surfaces. Visual 15° adjustment indicators on the knuckle allow for 180° field rotation of the floodlight assembly. The slipfitter fits standard 2-3/8"-3" O.D. tenon. The trunnion mounting includes a 3/16" polyester powder coated galvanized steel trunnion with a 16/3 SOW cord. The trunnion mount uses an interlocking slide adjustment that is locked into place with a set screw.

Finish
Housing and cast parts finished in five-stage super TGIC polyester powder coat paint, 2.5 mil nominal thickness for superior protection against fade and wear. Standard color is carbon bronze. Additional colors available in summit white, white, grey, bronze, black, dark platinum and graphite metallic. Consult your lighting representitive at Cooper Lighting Solutions for a complete selection of standard colors.

Warranty
Five-year warranty.

CONTROL OPTIONS

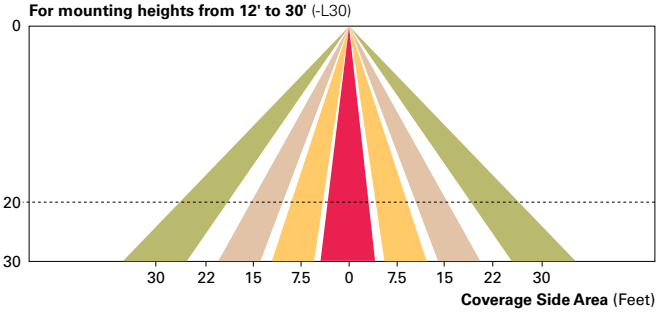
0-10V (D)
This fixture is offered standard with 0-10V dimming driver(s). The DIM option provides 0-10V dimming wire leads for use with a lighting control panel or other control method.

Photocontrol (PER and PER7)
Photocontrol receptacles (PER and PER7) provide a flexible solution to enable “dusk-to-dawn” lighting by sensing light levels. Advanced control systems compatible with NEMA 7-pin standards can be utilized with the PER7 receptacle.

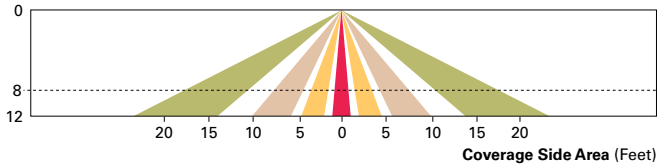
Dimming Occupancy Sensor (MSP/DIM-LXX and MSP-LXX)
These sensors are factory installed in the luminaire housing. When the MSP/DIM-LXX sensor option is selected, the occupancy sensor is connected to a dimming driver and the entire luminaire dims when there is no activity detected. When activity is detected, the luminaire returns to full light output. The MSP/DIM sensor is factory preset to dim down to approximately 50 percent power with a time delay of five minutes. The MSP-LXX sensor is factory preset to turn the luminaire off after five minutes of no activity.

These occupancy sensors includes an integral photocell that can be activated with the ISHH-01 accessory for “dusk-to-dawn” control or daylight harvesting -- the factory preset is OFF. The ISHH-01 is a wireless tool utilized for changing the dimming level, time delay, sensitivity and other parameters. A variety of sensor lens are available to optimize the coverage pattern for mounting heights from 8’-30’.

For mounting heights from 12' to 30' (-L30)



For mounting heights from 8' to 12' (-L12)



WaveLinx Wireless Outdoor Lighting Control Module (WOLC-7P-10A)
The 7-pin wireless outdoor lighting control module enables WaveLinx to control outdoor area, site and flood lighting. WaveLinx controls outdoor lighting using schedules to provide ON, OFF and dimming controls based on astronomic or time schedules based on a 7 day week.

NOTES:
1. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.
2. Standard 4000K CCT and minimum 70 CRI. Consult IES file for actual lumen output.
3. Consult factory for driver surge protection values.
4. Not recommended for use with ungrounded, delta configured systems.
5. Only available in C25 adn C40 light engines.
6. Fits 2-3/8" to 3" O.D. tenon, wire leads run through slipfitter.
7. Extended lead times apply. Use dedicated IES files for 3000K and 5700K when performing layouts. These files are published on the Night Falcon luminaire product page on the website.
8. Must order with dimming driver.
9. Not available with 3H x 3V spot distribution.
10. 0-10V dimming driver required. Integrated sensor option only available in slipfitter mounting.
11. Not available with Photocontrol.
12. Replace XX with color designation. Additional brackets and adaptors available on the poles product page on the website.
13. Not available with tenon mount.
14. Not available with slipfitter mount.
15. Cannot combine TS2 (Top and Side Visor), VS (Vandal Shield), or WG (Wire Guard), limited to one external guard per fixture.
16. Requires 7-pin NEMA twistlock photocontrol receptacle. The WOLC-7 cannot be used in conjunction with additional sensors or controls.

STOCK ORDERING INFORMATION

Footnotes:
1. MTO configurations are assembled in the USA.
2. COB denotes Chip On Board LED platform.
3. Both 4K and 5K options have a minimum 80 CRI.
4. 'F1' for 120, 277, 347V.
5. 'F2' for 208, 240V.
6. 'F3' for 208, 240V Canadian double pull.
7. Specify voltage. 'PCB' not available with '8' universal voltage option.
8. 'DM25' only available 120-277V and dims to 25% for 6 hours.
9. Dynadimmer is suitable for use from -30°C to 40° temperature ambient only.
10. Limited quantities stocked in our Carrollton RDC.
11. Contact factory for availability of large order quantities.
12. All stock products are 'BZ' Textured Dark Bronze, '4K' Neutral White and 'FL' Flood Optics.
13. Stock LPF products ship out of our Carrollton Distribution facility within 2-days of receipt of order.
14. Always consult factory for current inventory levels. Larger quantities may be converted to MTO if necessary.
15. LPF4 is provided in a standard shipper box.

PHILIPS Stonco

LYTEPRO LED LARGE FLOODLIGHT 105W LPF4

Features

- LPF4 flood distribution delivers 9,191 lumens at 105W, with an efficacy of 88 lumens per watt
- LPF4 spot distribution delivers 8,442 lumens at 105W, with an efficacy of 79 lumens per watt
- Effectively replaces equivalent 250W HID at minimum
- 4000K neutral white is standard, 5000K cool white is optional, minimum 80 CRI
- DLC certified optics provide excellent uniformity ideal for general facade, target and landscape illumination
- Fixtures are IP66 rated and suitable for use in ambients from -40°C to 40°C
- Rated system life of 80K hours for the driver and LED (>L_{70}) at ambients up to 30°C
- 5-year limited warranty, see philips.com/warranties for details
- LPF4 stocked in dark bronze, slipfitter and trunnion mount, flood optic, 120-277V and 4000K Neutral White for quick 2-day shipment
- Additional made to order versions available that are assembled in the USA, consult factory for current lead time

Performance Specifications

Beam Specs	Flood (FL)	Spot (SP)
Initial Lumens (4K and 5K)[16]	9,191	8,442
Average Wattage[17]	105W	105W
Lumens/Watt	88	79
NEMA Beam	6H x 6V	3H x 3V
50% beam (horizontal X vertical)	101° x 98°	18° x 17°
10% beam (horizontal X vertical)	127° x 125°	43° x 44°
Max Candela	4,010 cd	38,212 cd

16. Lumen values based on photometric tests performed in compliance with IESNA LM-79.
17. System input wattage may vary based on input voltage, by up to +/- 8%, and based on manufacturer forward voltage, by up to +/- 4%.

LYTEPRO LED LARGE FLOODLIGHT 105W LPF4

Specifications

General Description

The Philips Stonco LytePro LED Large Floodlight 105W LPF4 combines excellent performance, design and value to meet the needs for the energy and budget conscious. The LPF4 is available with slipfitter or trunnion mounting and flood or spot optical distributions suitable for use on a wide range of applications. Two primary SKUs are available in stock for 2-day quick ship while a more comprehensive offering is available made-to-order with multiple offerings that include fusing, photocontrol, Dynadimmer, NW and CW color temps and three standard finishes.

Housing

Die-cast housing houses both the LED and driver assemblies. Design incorporates integrated heatsinking to maximize thermal performance and reliability.

Mounting

The LPF4 is available with slipfitter or trunnion mounting to allow for wide range of aiming and adjustability. Caution: Philips Stonco is not responsible for failure of mounting components supplied by others. Proper care should be exercised in mounting component selection and installation to insure adequate luminaire support, given system weight, vibration potential, exposure to the elements, thermal conditions present in the given application, etc. If luminaires are not properly supported and installed correctly per local codes and requirements, this may result in damage or injury caused by the luminaire, for which Philips Stonco is not responsible.

IP Rating

Entire fixture is rated IP66, including driver and optical assemblies.

LED Board and Array

The LPF4 utilizes four Citizen CLL032 COB (Chip On Board) LEDs. Provides up to 88 lm/W at the system level. Standard color temp is 4000K +/- 250K, with optional 5000K available. Both color temps have a minimum 80 CRI.

LED Thermal Management

Housing design integrates thermal heatsinking between the optical and driver assemblies, allowing for pass-through convective cooling which promotes airflow for improved and maximum heat dissipation. This results in maximized performance and reliability of critical components to ensure long LED system life.

Optical Systems

LPF4 Flood 'FL' is standard with a Flood 'FL' optic that consists of a specular vacuum metalized reflector that provides a very uniform and highly efficient all purpose flood distribution. Optional Spot 'SP' optic consists of a TIR lens to provide a tight spot. Both optics are suitable for use in wide range of applications.

Energy saving benefits and controls

The LPF4 has a system efficacy of 88 lm/W at a system wattage of 105W using the flood distribution. With the spot distribution it has a system efficacy of 79 lm/W at a system wattage of 105W. It provides significant energy savings over traditional HID systems less controls. Optional Dynadimmer controls provides additional maximum energy savings by dimming to 25% low for 6 hours.

Electrical

Driver efficiency (>90% standard). 120-347V available (restrictions apply). Temp range: -40°C (-40°F) to 40°C (104°F). Open/short circuit protection. RoHS compliant. Surge protector standard and is in accordance with IEEE / ANSI C62.41.2 guidelines, with a surge current rating of 10,000 amps (10KVA).

Listings

Product is UL and cUL listed to the UL1598 standard, suitable for Wet Locations. Suitable for use in ambients from -40°C to 40°C (-40°F to 104°F). The LPF4 luminaire with either 4K Neutral White or 5K Cool White LEDs and flood or spot optics is DesignLights Consortium® qualified. Stock SKUs of the LPF family are made in China while all made-to-order configurations are assembled in the USA.

Finish

Each luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) textured polyester powdercoat finish. Standard finish on all stocked LPF luminaires is Textured Dark Bronze. Textured White and Dark Gray are also available as optional colors for made-to-order products.

Warranty

LPF4 luminaires, the LED arrays, and the drivers are all covered by a 5-year limited warranty. See philips.com/warranties for details.

Predicted Lumen Depreciation Data[18]

Ambient Temp. °C	TM-21 Calculated L_{70} hrs[18,19]	Reported L_{70} Per TM-21[19,20]	Lumen Maint. % @60,000 hrs
up to 40°C	269,000 hrs	>48,000 hrs	91.5%

18. Calculated performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions.
19. L_{70} is the predicted time when LED performance depreciates to 70% of initial lumen output.
20. Reported per IESNA TM21-11. Published L_{70} hours limited to 6 times actual LED test hours.

iO LED

DESCRIPTION

The iO LED Line 2.0™ luminaire from Cooper Lighting Solutions is a low voltage linear accent LED luminaire ideal for illuminating both interior and exterior vertical surfaces. The 5°, 10°, 30°, 60° and 90° (both symmetrical and asymmetrical options available) optical distributions can be utilized for accent or general illumination and are designed for tight beam control and to minimize stray light. Line 2.0™ is available in nominal 18", 36", 54" and 72" lengths. The variety of mounting options simplify installation and support a broad range of linear lighting applications.

Catalog #	0.05-03W-840-60-OD-STD-UNV-AN-SM-E-XX	Type
Project		ALY-037-CL
Comments		Date
Prepared by	Kathleen Kenny, National Accounts PH: 678-447-5208 kathleen.kenny@cooperlighting.com	

SPECIFICATION FEATURES

Construction
Line 2.0 is constructed of anodized extruded aluminum body and die cast end caps for a durable housing with UV stabilized acrylic optics.

Electrical
4'-0" 14 AWG, 300 volt rated power cords supplied on one end of the fixture. For details on remote driver distance limitations and run length limits - see pg. 3.

LED Optics
The customized acrylic optics offer very high transmissivity, UV stability and excellent longevity with optical symmetrical distribution options of 5, 10, 30, 60 and 90 degrees. Asymmetrical optic is also available. Please note acrylic optics should not be cleaned with IPA or other harsh chemicals. Acrylic can be safely cleaned with soap and water. IES LM79 format files may be downloaded from www.cooperlighting.com. All products have an 80+ CRI. White light variance between LEDs is equal to or better than 3-step MacAdam binning.

Mounting
Three mounting bracket options include: surface, wall and offset adjustable with lockable aiming. The luminaires can quickly be locked onto the brackets for easy installation. Adjustable mounting allows fixtures to be rotated 45˚ with lockable aiming (see details on page 3). Remote drivers are supplied with NEMA enclosures for power connection. To ensure proper performance, architectural details should allow for ventilation and air flow around the fixture. Ambient temperature surrounding the fixture shall not exceed 122˚F (50˚C).

Finish
Anodized aluminum finish is standard. Custom anodized finishes available upon request.

Compliance
Outdoor fixtures are UL listed for wet locations. Indoor fixtures are UL listed for damp locations. All fixtures are RoHS compliant, and tested per IESNA LM79. LEDs comply with LM80 standards.

Environment
Line 2.0™ is UL rated for wet locations when an OD environment is specified. It is not rated for submersible applications. It should not be mounted in conditions where there is any standing water.

Warranty
Standard five-year limited warranty.

INSTALLATION DETAILS

Max Run Length

96 W Driver	E = End of Driver Location
line 2.0 - 03W	26' (7.92 m)
line 2.0 - 06W	17' (5.18 m)
line 2.0 - 09W	12' (3.66 m)
line 2.0 - 12W	8' (2.44 m)

Max Allowable Remote Driver Distance by Wire Diameter

Wire Diameter	Max Allowable Remote Driver Distance
12 AWG	71'-0" (21.6m)
14 AWG	46'-0" (14.0m)
18 AWG	18'-0" (5.5m)

NOTE: Line 2.0™ from iO Lighting is UL listed for wet locations when OD is specified. It is not rated for submersible applications. Line 2.0 should not be mounted in conditions where the fixture could be exposed to standing water.

Ambient temperature surrounding the fixture shall not exceed 122° F (50°C)

DRIVER DETAILS

Driver Part Number	Description
STD	96W Driver (capable of either Non-Dimming or 0-10V dimming down to 10%) and either NEMA 1 Enclosure (for indoor spec) or NEMA 4 Enclosure (for outdoor spec).
HCD	96W Driver (capable of 0-10V dimming down to 1% with included OTDIM module) and either NEMA 1 Enclosure (for indoor spec) or NEMA 4 Enclosure (for outdoor spec).

Note: See page 3 for driver run length limits

STD DRIVER SPECIFICATIONS

Electrical Specifications	
Input	
Input Voltage (VAC)	120V - 277V (+/-10%)
Frequency Range (Hz)	50 - 60Hz (+/-10%)
Input Current (A)	0.91 @ 120V 0.39 @ 277V
Input Power (W)	111W
THD	< 20%
Power Factor	> 0.95
Inrush Current (Apk)	< 55A
Line Regulation	< 5%
Stand-by Power (W)	< 1.5W
Output	
Output Voltage (VDC)	24V (+/-5%)
Output Current (A)	0.1 - 4.0A
Output Ripple (V)	1V
Efficiency	>85% (Typical)
Load Regulation	<5%
Dimming	
Dimming Control	0 - 10V
Dimming Range	10 - 100%
Dimming Type	PWM
Frequency	250Hz

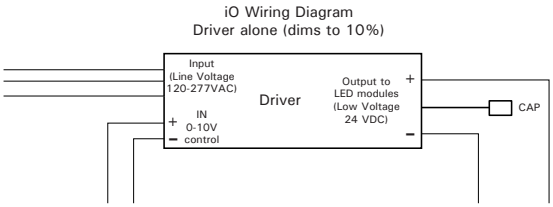
HCD DIMMING MODULE SPECIFICATIONS

Key Dimming Features
Utilizes pulse width modulation (PWM), to control LED performance
Options available for analog or DMX protocols
Dimming range: 0-100%
Short circuit, overload and overheating protection

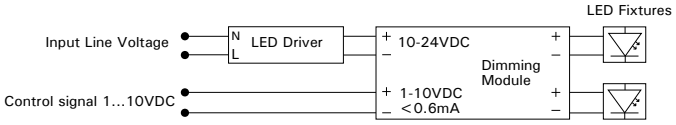
Dimming Module Specifications	
Location:	Dry
Input Voltage:	24v DC
Max Input Current:	5.3A
Control Voltage:	0-10v DC
Frequency:	135 Hz
Ambient Temp:	-20˚C to +50˚C
Weight:	.165 lbs
Power Consumption:	Up to 3W

Details on NEMA enclosure options available in the iO LED Accessories Spec Sheet section of the Cooper Lighting Solutions website

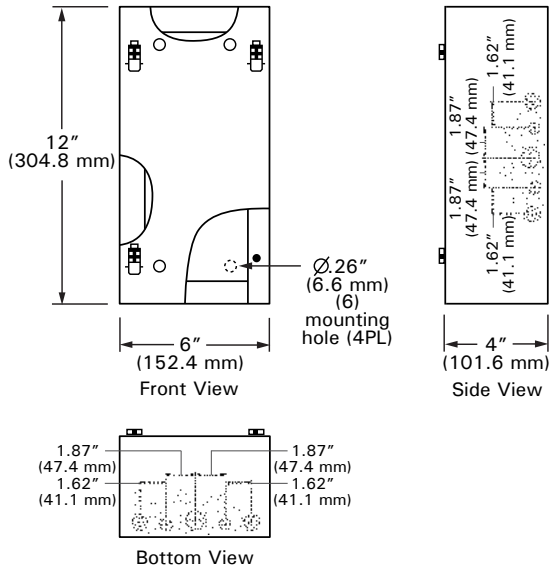
STD DRIVER WIRING



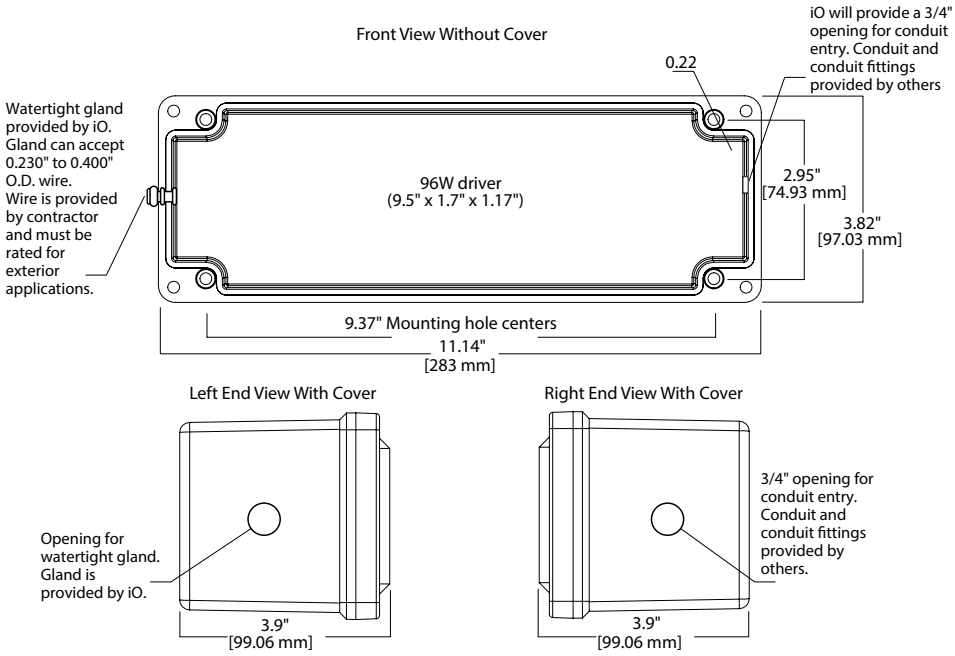
HCD DIMMING MODULE WIRING



NEMA 1 ENCLOSURE DIMENSIONS (for ID specifications)



NEMA 4x ENCLOSURE DIMENSIONS (for OD specifications)



TECHNICAL NOTES

1. Light Level provided in delivered lumens based on IES files for 4000K CCT with 30° optical distribution. See table on page 2 for delivered lumen output of all CCTs.
2. Drivers will be optimized if run length is specified; Discrete fixtures will include 1 driver per fixture. Contact Customer Service to order fixtures only.
3. Contact Cooper Lighting Solutions for custom color availability.
4. See Driver Location diagram on page 3.
5. Specified run lengths will be optimized with 6 ft. fixtures and completed with shorter fixtures to satisfy the run length without the total actual length (rather than total nominal length) going greater than the specified run length.

eW Graze QLX Powercore 5W

5500 K

Low-power linear exterior LED wall grazing fixture with solid white light

Factory-set to consume a maximum of 5 W per foot, eW Graze QLX Powercore 5W supports ASHRAE standards, LEED green building certification, and other power-limited projects. Featuring Powercore technology, fixtures process power directly from line voltage, eliminating the need for external power supplies. Fixtures are available in standard CCTs of 2700 K, 4000 K, and 5500 K, as well as custom CCTs ranging from 3000 K to 6500 K. Multiple fixture lengths and beam angles support a large range of façade or surface illumination applications.

For detailed product information, please refer to the eW Graze Powercore Family Product Guide at www.philipscolorkinetics.com/ls/essentialwhite/ewgrazeqlxpowercore5w/

Item Name	Exterior Light Fixture
Item Type	Exterior Cove Light Fixture
Description	CoviO 2' SNLED Strip with Semi-Frost Lens
Manufacturer	Cooper Lighting/iO
Model	LM-05L-940-120-OD-UNV-SSM-ST-D-2F
Dimensions	1.8"H x 1.7"W x 24"L
Finish	Silver
CSI #	265600 - Exterior Lighting
Omniclass #	22-265600 - Exterior Lighting
Dimming Type	Dimming to 1% (0-10V, 100% - 1%)
Trim	N/A
Reflector	N/A
Mount	Surface
On Dimming System	No
Lens/Shade	Semi-Frost
Fixture Input (Max. Watts)	10
Lamp Type	LED
Lamp Kelvin	4000K
Voltage	120-277
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1254
Lamp CRI	90
Finish	Silver
Lead Time	Stock to 4 weeks
Warranty	5 Year Warranty
Notes	Efficacy: 126.6 Lamp Life/Fixture Life: 50,000 hours

For 277 V systems, selecting 277 will allow for longer run specifications. See pg 4 for run length limits details.

Housing Color | Mounting | Control Options | Length | Accessories

Housing Color	Mounting	Control Options	Length	Accessories
S=Standard Silver	**SM**=Surface Mount	**STD**=0-10V (1%-100%) **ELV**=ELV **TR**=Triac **5LT**=DALI **WL**=WaveLinx wireless	**__F/C**=custom run length in feet **__F/1**=specify nominal run of 1 ft fixtures **__F/2**=specify nominal run of 2 ft fixtures **__F/4**=specify nominal run of 4 ft fixtures **1F**=12" Individual fixture **2F**=24" Individual fixture **4F**=48" Individual fixture	**JHARN01-012**=1ft jumper **JHARN01-036**=3 ft jumper **JHARN01-144**=12ft jumper **LM-IC-STD**=Std Power Harness
Notes Contact Cooper Lighting for custom color availability. Minimum order qty will apply.	**Notes** One mounting bracket/fixture is required. A 15 deg and 30 deg mounting angle plate is included with each bracket.	**Notes** "STD" control specifications include beginning of run power feed and junction box for line voltage connection. One is included for each individual fixture or run specification. All other control specifications include beginning of run control module. See page 6 for details and dimensions.	**Notes** Run specifications will include 1 power feed/run. Individual fixtures will include 1 power feed/fixture. Run specifications will maximize 2F fixtures unless /C, /1 or /4 is specified. Contact customer service for custom run configurations. See page 4 for run lengths limits by output and voltage.	**Notes** Accessories not included in run specifications. Must be ordered separately. Jumper accessory is required for any bend radius > 20°. See page 7 for bend radius limits.

Product Specifications

Construction
- Housing is powder coated, extruded aluminum.
- All housing hardware is stainless steel.
- Clear, UV stabilized polycarbonate injection molded lens with integral silicone gasket.
- Proprietary IP66 exterior-rated, quick connect plugs.
- Self-closing IP66 end cap to simplify installation and eliminate end of run shorting risks.
- Available in 1F (12"), 2F (24") or 4F (48") lengths.

Electrical
- Integral high performance constant current driver.
- Standard 0-10V dimming (1% - 100%).
- Each cove module is configured for a line voltage feed while providing through wiring and quick connects for continuous mounting applications.
- See pg 4 for Run Length Limits.
- See pg 4 for Dimmer compatability chart.

LED Optics
- Fixture equipped with proprietary 90+ CRI LED module available in 2700, 3000, 3500 or 4000K within 3-step MacAdam ellipse.
- Discrete low-powered LED array with clear, injection molded lens delivers light free from striations.
- Luminaires tested per IESNA LM-79.
- LM-80 data utilized in TM-21 lumen maintenance projections:
  L70 > 72,000 hrs
  L90 > 28,000 hrs

Mounting
- Each individual fixture comes with stainless steel mounting brackets designed to align long runs by spanning two fixtures.
- Optional angled mounting base plates to adjust output angle to 15° and 30° included with each bracket.
- 10% extra mountings are included in every order.
- Power harness is required for connection to line voltage.
- STD option includes beginning of run power harness + junction box for line voltage connection.
- Control options include beginning of run power harness + dimming converter + junction box for line voltage connection.
- Run specifications will include 1 power feed/run. Individual fixtures will include 1 power feed/fixture. Run specifications will maximize 4F fixtures unless /1 or /2 is specified. Contact customer service for custom run configurations. See page 4 for run lengths limits by output and voltage.

Finish
- Fixture housing is powder coated aluminum.
- Standard color is silver with black end caps and wiring harness.
- Contact Cooper Lighting for custom color availability (minimum order quantity will apply).

Compliance
- Luminaires are cULus listed for 50° C ambient environments.
- Wet Location Listed.
- IP66 rated.
- 2000 hour salt spray tested.
- RoHS compliant.
- Tested according to IESNA LM-79 (See pg 3).

Environment
- Suited for indoor or outdoor installations.

Control
- 0-10V dimming to 1% is standard.
- Additional dimming protocols including ELV, TRIAC and DALI supported through an added control module at the beginning of the run.
- Wireless control is supported through the Cooper Lighting WaveLinx system.
- See pg 4 for run length limits.

Weight
- 1F = 1 lb.
- 2F = 1.8 lbs.
- 4F = 3.5 lbs.

Warranty
- Five year warranty standard.

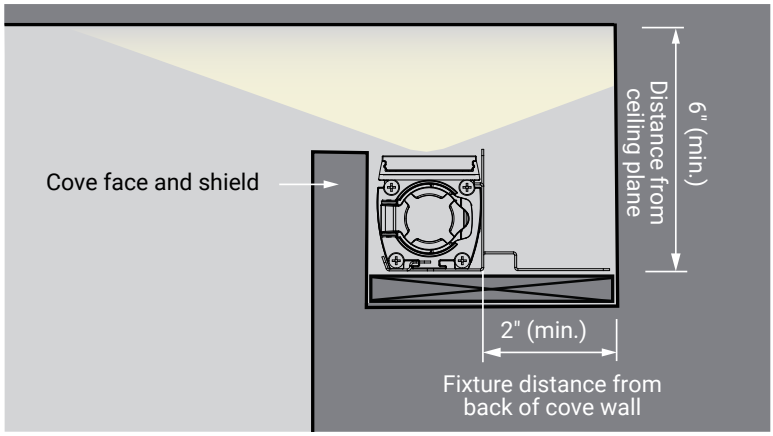
Cove Design Guidelines

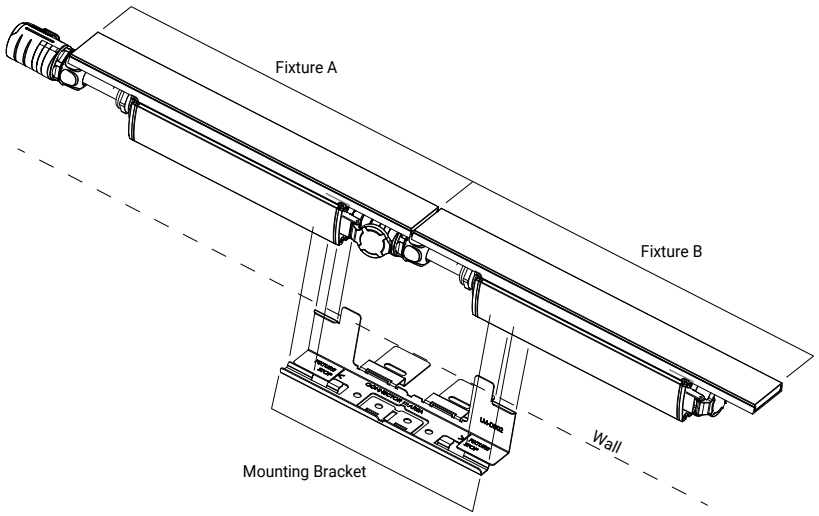
Recommended cove dimensions for optimal light distribution.



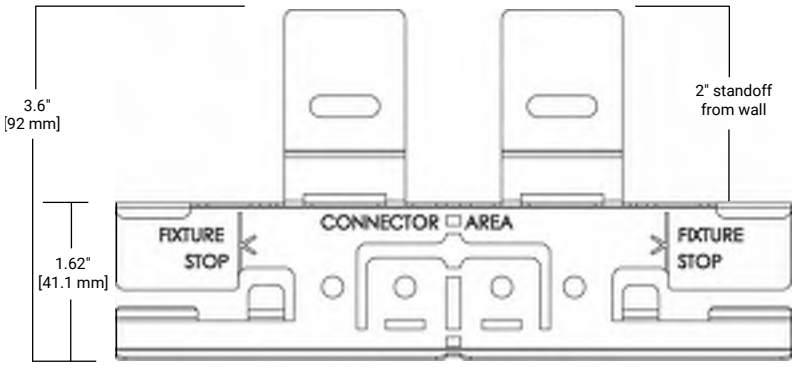
Mounting and Installation

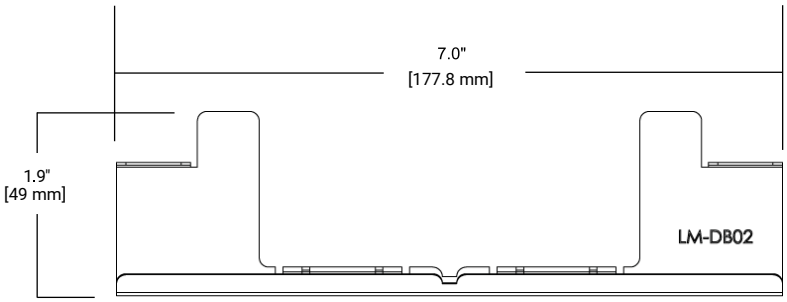
Custom brackets are designed to self-align CoviO fixtures in a linear run. Diagrams at right shows how each bracket spans between two fixture to align the linear run. Bracket can be placed on mounting plate for 15° or 30° aiming. Brackets have incorporated 2" stand-off for optimal cove light distribution. Other mounting considerations:

- Mounting location must have solid floor for mounting bracket attachment
- Matte surface finishes in, above and adjacent to cove will deliver optimal cove light distribution
- Do not pre-install more than 12 brackets before installing fixtures
- Fixtures should be mounted at least 2" from wall for optimal cove light distribution.
- Mounting bracket stand-off can be cut off when using angled mounting plate.
- Bracket can be cut in half for runs, end of run, or curved runs.
- Jumper accessory is required for any bend radius > 20°

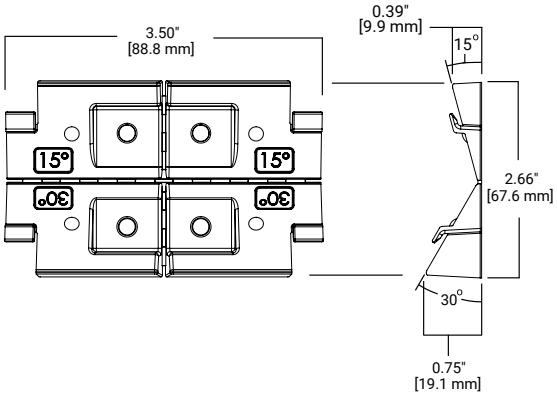


Mounting Bracket Dimensions

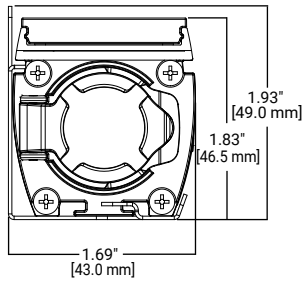




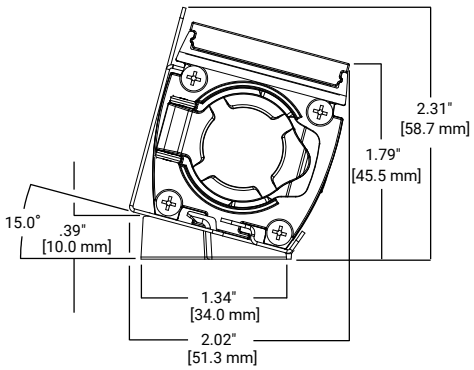
Mounting Plate Dimensions



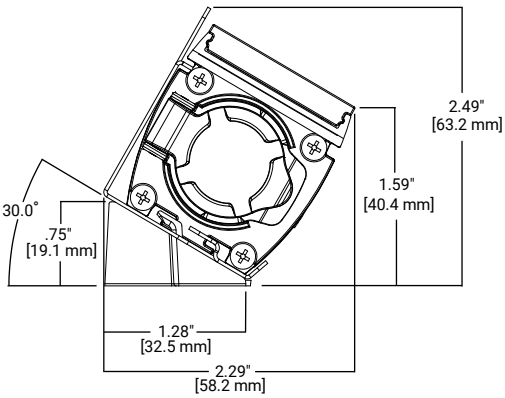
Mounting Plate Angle Dimensions



0° Mount

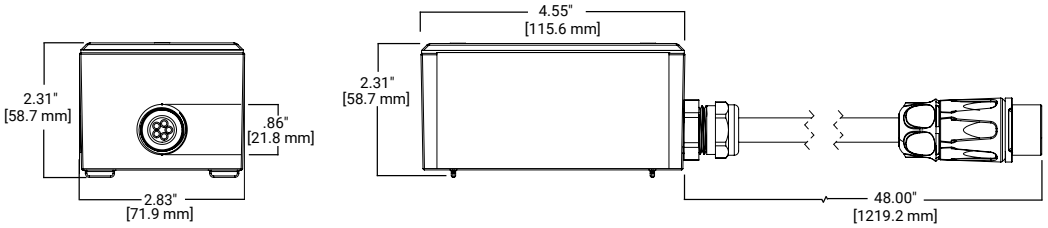


15° Mount

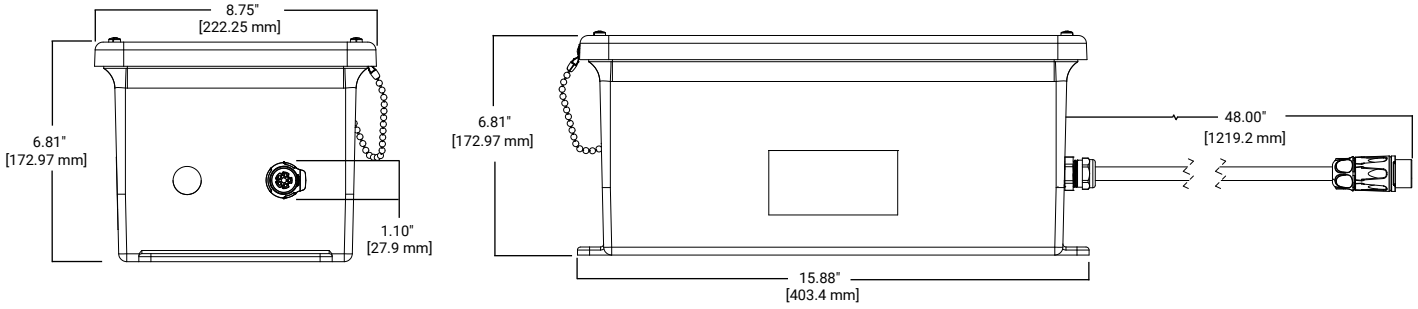


30° Mount

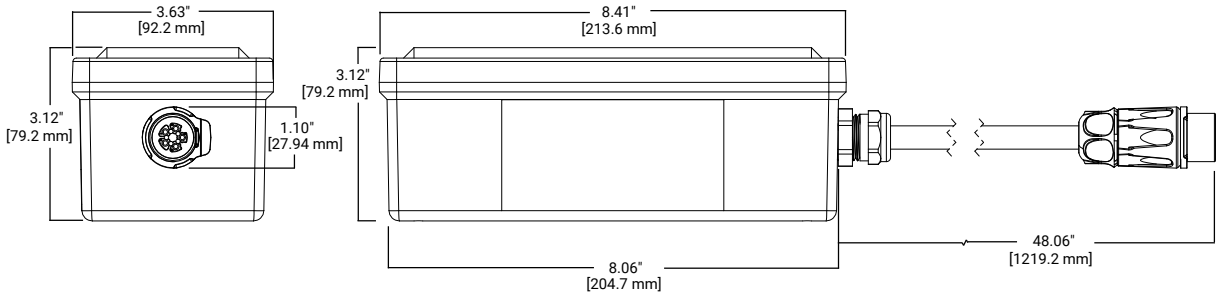
STD - Beginning of Run Power Harness



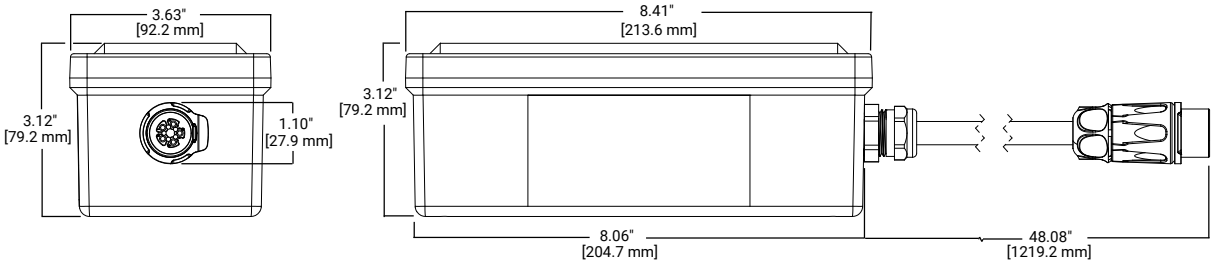
ELV / TR Control Module



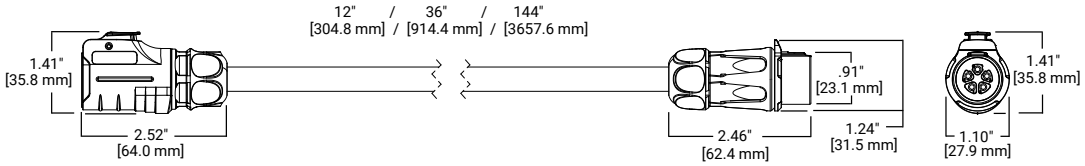
5LT - DALI Control Module



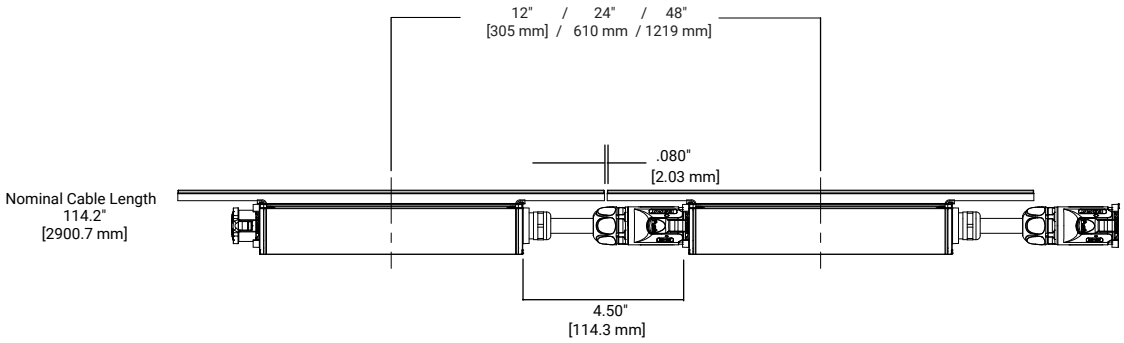
WL - Wavelinx Wireless Control Module



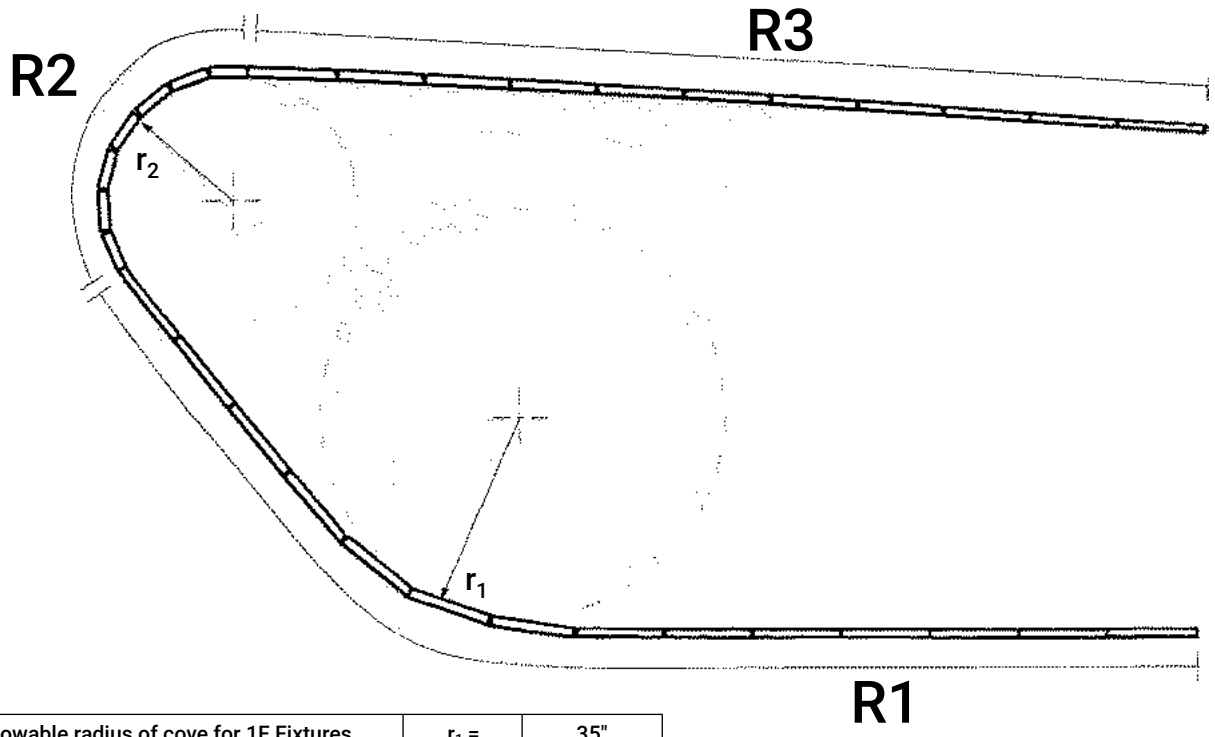
Jumper Harness Accessory



Typical Dimensions for Connected Fixtures



Run Specification Guidelines



Min allowable radius of cove for 1F Fixtures	r_1 =	35"
Min allowable radius of cove for 2F Fixtures	r_2 =	70"
Min allowable radius of cove for 4F Fixtures	r_4 =	140"

Linear Run Specifications

Linear runs can be broken down into segments for easier specifications. Mounting brackets and power feeds are included in any run specifications. Jumper accessory is required of bend radius > 20°. For example, the architectural drawing above would be specified as 3 separate runs:

- R1 would be specified with Length = 45F = 45 ft linear run (22x 2 ft fixtures + 1x 1 ft fixture + power feed)
- R2 would be specified with Length = 7F/1 = 7 ft linear run of 1 ft fixtures (7 x 1 ft fixture + power feed)
- R3 would be specified with Length = 33F = 33 ft linear run (16x 2 ft fixtures + 1x 1 ft fixture + power feed)

Contact customer service for custom run configurations.

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Exterior Light Fixture
Item Type	Exterior Cove Light Fixture
Description	FLUXSTREAM LED Strip with semi-frost lens, damp listed
Manufacturer	Signify / Day Brite
Model	FSS (length) 30L840UNVDIM
Dimensions	3"H x 2.5"W x 2', 3', 4', 8' as required (refer to the Design Guideline Drawings)
Finish	White
CSI #	265600 - Exterior Lighting
Omniclass #	22-265600 - Exterior Lighting
Dimming Type	0-10V
Trim	N/A
Reflector	N/A
Mount	Surface
On Dimming System	Yes
Lens/Shade	Semi-Frost
Fixture Input (Max. Watts)	Based on fixture length selected
Lamp Type	LED
Lamp Kelvin	4000K
Voltage	120-277
Delivered Lumens (LED) or Mean Lumens (Non-LED)	Based on fixture length selected
Lamp CRI	80
Finish	White
Lead Time	Stock to 4 weeks
Warranty	5 Year Warranty
Notes	Efficacy: Lamp Life/Fixture Life: 50,000 hours

1 8' is tandem (2) 4' lenses with single piece 8' body.
2 Nominal delivered lumens at 25°C ambient.
3 Not available in 3' model.
4 XDIM option must be specified with 120V or 277V option only.
5 347V with EMLED only available in 8' models.
6 Not available in 2' or 3' model.
7 Not available in 4' 70L model or 8' 140L model.
8 DALI available up to 80L models only, consult factory for other options.
9 EMLED on 8' models illuminates 4' section in emergency mode.
10 Available with DIM driver option only.
11 Integral controls options dimmable to 5% via wireless wall switch. Non-integral controls configurations are 0-10V dimmable to 1%.
12 Must be installed in conjunction with a UL1008 device.
13 Must be ordered with an integral sensing option.
14 High bay motion detector. Motion sensing zone is extremely limited if used below 15' mounting height.
15 Must order IRT9015 Interact commissioning remote with eachsystem order.
16 EMLED on 8' models illuminates 4' section in emergency mode.
17 Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.
18 Consult Signify to confirm whether specific accessories are BAA-compliant.
19 Must specify PS or PI mode for 347V.

Accessories[18] (order separately)

- **FSSD2L** - 2' Diffuse replacement lens
- **FSSD3L** - 3' Diffuse replacement lens
- **FSSD4L** - 4' Diffuse replacement lens (order two for 8' models)
- **FSSWG4** - 4' wire guard (order two for 8' models)
- **FSTH** - Sliding hanger bracket (set of two)
- **LSXR10** - Low bay PIR motion sensor, 120-277V (not available with PoE)
- **LSXR10ADC** - Low bay PIR motion sensor with photocell and hi/lo trim dimming, 120-277V (not available with PoE)
- **FSSDEK** - Decorative plastic end cap (set of two)

(See last page for details and more options)

SWZCS accessories[18] (order separately)

- **IRT9015** – handheld remote for grouping and configuration(at least one remote required for any SWZCS installation).
- **UID8451/10** – Wireless Dimmer Switch Selector
- **UID8461/10** – Wireless Scene Selector

General notes

Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

PAF (Paint after fabrication) option is required for all products that will be used in a damp or humid location, such as under a canopy or covered parking area.

Not all product variations listed on this page are DLC qualified. To ensure that a specific model is qualified, visit www.designlights.org/search

interact ready.

FSS FluxStream LED strip

2', 3', 4' and 8'

Features

- Compact design for installation in tight spaces.
- Frosted acrylic diffuser provides wide light distribution and superior glare control.
- Diffuser and LED plate snap into place allowing tool-free access to LED boards and driver.
- 2', 3', 4' and 8' tandem lengths available to accommodate many field applications.
- Up to 100,000 hour predicted L70 LED lumen maintenance provides long service life to reduce maintenance costs.
- Can be surface mounted on ceilings or walls, or suspended via chain, pendants or cables.
- Wall mountable - ADA compliant.
- Ideal for cold applications (-20°C).
- Continuous row mounting using standard end caps. No extra parts needed.
- 7/8" knock out provided at each end and on base of luminaire. Note: Center knockout is covered and not useable in 4' version with EMLED option.
- Multiple driver options available with 0-10V as standard.
- Enclosed lens minimizes penetration of dust, insects, and other debris into the LED compartment.
- 8' tandem unit is two 4' optical assemblies with a center mullion on a single full length chassis.
- Integral controls options include sensor mounted in control module extension mounted on fixture end (see dimension drawing).
- Fluxstream luminaires are Designlights Consortium® qualifed. Please see the DLC QPL list for exact catalog numbers www.designlights.org/QPL.
- 5 year manufacturer's limited warranty. Visit signify.com/warranties for complete warranty information.

Finish

- Baked white acrylic matte high reflectance paint finish.
- PAF (Paint after fabrication) option, which is required for all products that will be used in damp or humid locations, such as a canopy or covered parking area, provides extra corrosion resistance.

Shielding

- Contoured frosted acrylic lens.

Electrical

- LED boards and drivers are RoHS (Restriction of Hazardous Substances) compliant. Total system life rated at 50,000 hours. Predicted L70 lifetime based on LED manufacturer's supplied LM-80 data and in-situ laboratory testing.
- Integral emergency driver with EMLED option. To estimate lumen output in emergency mode, multiply emergency pack wattage by efficacy, then by 1.10.
- The GTD/E option is used to bypass wall switches and allow luminaire operation on auxiliary power. Generator transfer requires installation in conjunction with a UL1008 listed device.
- The GTD/SNSR option is used to bypass integrated sensor control in the event of utility power loss. Generator transfer requires installation in conjunction with a UL1008 listed device.

Materials

- Heavy gauge cold rolled steel housing, LED plate, and end caps.

Labels

- cETLus listed.
- Suitable for damp locations.

Performance data

Fixture	Lumens	Wattage	Efficacy
FSS220L	2000lm	17W	123lm/w
FSS330L	3000lm	26W	119lm/w
FSS440L	4000lm	31W	133lm/w

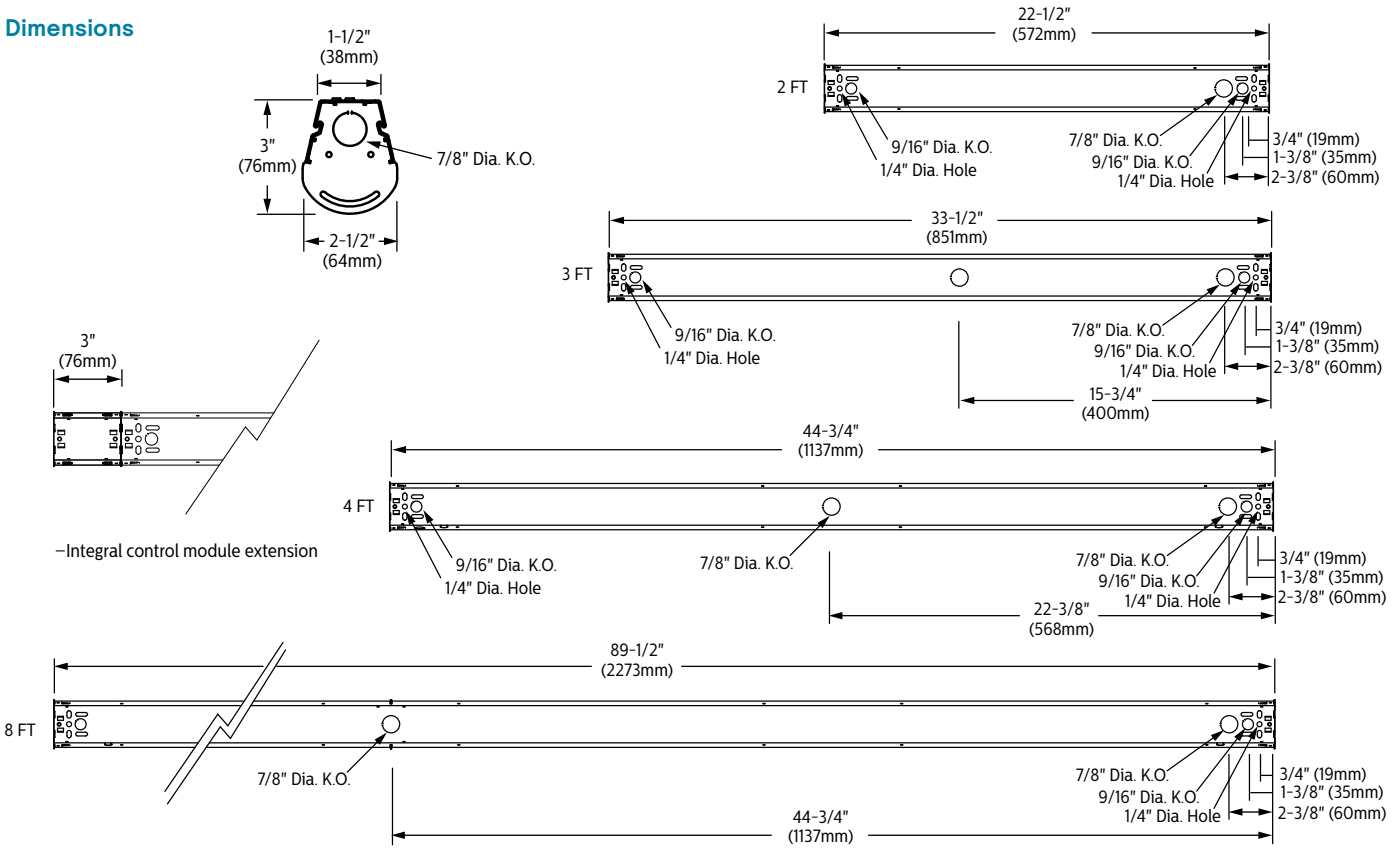
Configuration	Ambient
FSS470L	-20°C to 30°C
FSS8110L	-20°C to 35°C
FSS8140L	-20°C to 25°C
EMLED option	Minimum 0°C
All others	-20°C to 40°C

Dimensions



FSS FluxStream LED strip

2', 3', 4' and 8'

Wireless Controls Options

SpaceWise DT (SWZDT)

- Standalone daylight and occupancy sensing with advanced grouping, wireless mesh networking and dwell time.
- Commissioning via compatible Android phone and Philips Field App
- Dimming via compatible Zigbee wireless wall switch only (see link below for details)
- Register for the commissioning app at http://registration.componentcloud.philips.com/appregistration/
- Integral sensing options may not be combined
- For more information including recommended switches, refer to the following: –

  SWZDT – www.usa.lighting.philips.com/systems/lighting-systems/spacewise

Emergency Options (ER100)

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

FluxStream strip shown with integral sensor

Interact Pro scalable sensor for Foundation, Advanced & Enterprise tiers (SWZCS and an evolution of SpaceWise)

- SWZCS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
  - Compatible with:
    - UID8451/10 wireless dimmer switch
    - SWS200 wireless scene switch
    - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
    - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
    - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
    - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem

Radio only sensor (RADIO)

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Interact Pro scalable sensor bundles for Enterprise tier

- IAOSB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices

Interact Industry (IAI)

- A wireless IoT connected lighting solution for large warehouses, gymnasiums and industrial facilities that require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Combine office and high bay sensors on a single project and for a common dashboard view.
- Compatible Zigbee Green Power wall dimmer.
- Maximize energy savings with integrated sensors and integration with BMS.
- Use Interact Industry software and insights to reduce maintenance cost by remotely configuring and managing the system, creating flexible lighting zones, insights on lamp burn hours etc. Optimize warehouse operations with real time occupancy analytics and minimize potential bottlenecks.
- Requires compatible Interact Gateway and internet connectivity for commissioning.
- For more information on Interact Industry Wireless, visit: www.interact-lighting.com/en-us/what-is-possible/interact-industry

Wired Controls Options

Interact Office Wired (PoE)

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- IAOSB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output. Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices

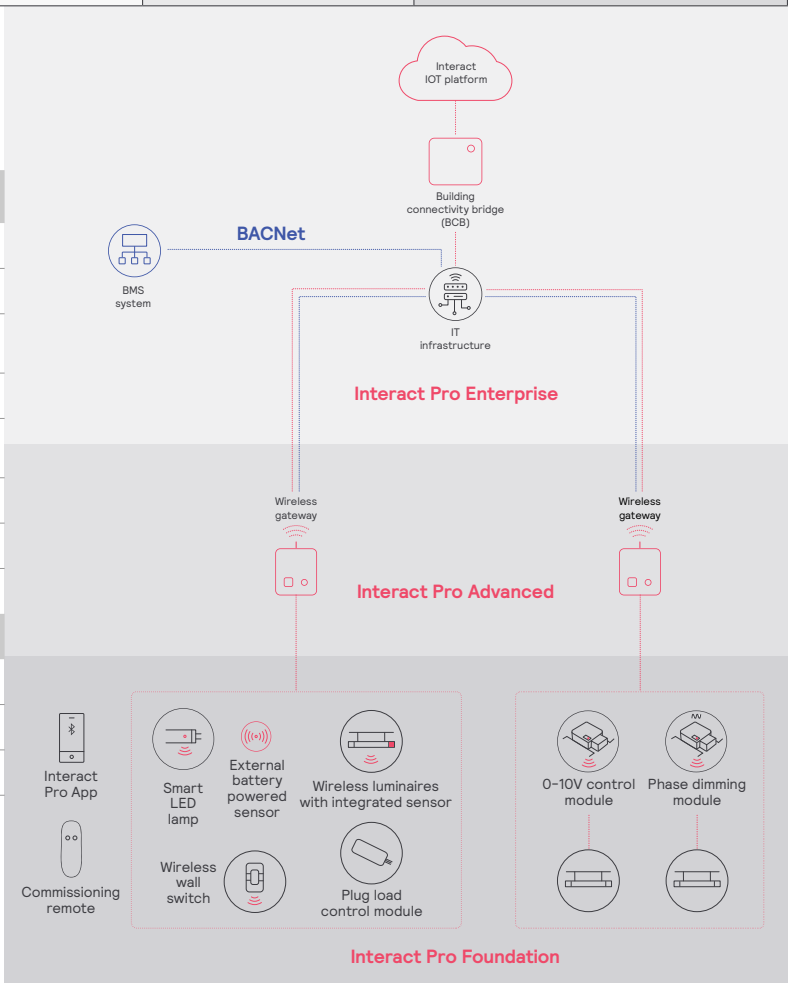
Currently supported maximum system size

To be able to design the lighting system correctly for the customer, it is important to know the prime characteristics of the system, its possibilities and limitations.

System level	
Total number of gateways	Unlimited
Total number of devices	200 per network
• luminaires with integrated sensors	150
• smart TLEDS	150
Total number of ZGP devices (sensors and switches)	50
• sensors	30
• switches	50
• zones and groups	64
Group level	
Recommended number of lights	40 (recommended 25)
Number of ZGP devices	5
Number of scenes	16



FSS FluxStream LED strip

2', 3', 4' and 8'

Photometry

2' FluxStream LED strip, 2000 nominal delivered lumens — LER – 123

Catalog No. FSS220L840-UNV-DIM
Test No. 37164
S/MH 1.2
Lamp Type LED
Lumens 2034
Input Watts 17

Comparative yearly lighting energy cost per 1000 lumens – **$1.95** based on 3000 hrs. and $.08 pwr KWH.

The photometric results were obtained in the Day-Brite laboratory which is NVLAP accredited by the National Institute of Standards and Technology.

Photometric values based on test performed in compliance with LM-79.

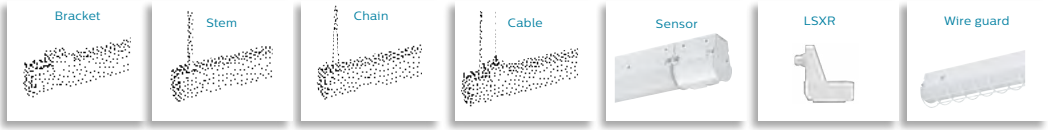
Accessories[19]



Accessory Catalog Code	Description	
FSTH	Sliding hanger bracket (pair)	
SV5F12	12" Stem and canopy kit	White stem and canopy kit, 1/4" trade size (1/2" O.D.) locknuts included. Works with 9/16" k.O. on base of housing.
SV5F18	18" Stem and canopy kit	
SV5F24	24" Stem and canopy kit	
SV5F36	36" Stem and canopy kit	
SV5F48	48" Stem and canopy kit	
FKR-126	Chain hanger set (pair)	Includes two 5' heavy duty link chains with "V" hooks. Attaches to base of housing.
DACHxx	Adjustable cable hanger kit (single)	Works with 1/4" hole on base of housing or FSTH hanger bracket. **xx**=cable length in inches, enter 48" to 180" lengths in 12" increments
DACHxx-1-SC	Adjustable cable hanger kit with white straight 18/3 cord (single)	
DACHxx-1-CC	Adjustable cable hanger kit with white coiled 18/3 cord (single)	
DACHxx-2-SC	Adjustable cable hanger kit with white straight 18/4 cord (single)	
DACHxx-2-CC	Adjustable cable hanger kit with white coiled 18/4 cord (single)	
DACHxx-1D-SC	Adjustable cable hanger kit with white straight 18/5 cord with dimming leads (single)	
LSXR10	Low bay pir motion sensor (120-277v)	
LSXR10ADC	Low bay pir motion sensor with photocell and hi/lo trim dimming (120-277v)	
FSSWG4	4' Wire guard (order two for 8' models)	
FSSD2L	2' Diffuse replacement lens	
FSSD3L	3' Diffuse replacement lens	
FSSD4L	4' Diffuse replacement lens (order two for 8' models)	
FSSDEK	Decorative plastic end cap (set of two)

Revision Date:

Item Name	Exterior Light Fixture
Item Type	Exterior Cove Light Fixture
Description	CoviO 2' SNLED Strip with Semi-Frost Lens
Manufacturer	Cooper Lighting/iO
Model	LM-10L-940-120-OD-UNV-SSM-ST-D-2F
Dimensions	1.8"H x 1.7"W x 24"L
Finish	Silver
CSI #	265600 - Exterior Lighting
Omniclass #	22-265600 - Exterior Lighting
Dimming Type	Dimming to 1% (0-10V, 100% - 1%)
Trim	N/A
Reflector	N/A
Mount	Surface
On Dimming System	Yes
Lens/Shade	Semi-Frost
Fixture Input (Max. Watts)	10
Lamp Type	LED
Lamp Kelvin	4000K
Voltage	120-277
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1180
Lamp CRI	90
Finish	Silver
Lead Time	Stock to 4 weeks
Warranty	5 Year Warranty
Notes	Efficacy: 119.2 Lamp Life/Fixture Life: 50,000 hours

Product Features

powered by fifthlight · WaveLinx · EATON

Top Product Features

- Cove lighting fixture with integral driver
- IP66 rated for exterior wet locations or interior installations
- Up to 1500 lm/ft (3 light level options at 500, 1000 and 1500 lm/ft)
- Up to 300 ft run from a single power drop
- Up to 130 lm/W
- Dimming to 1% (0-10V, 100% - 1%)
- 90+ CRI
- Wavelinx wireless control option

Notes Contact Cooper Lighting for custom color availability. Minimum order qty will apply.	**Notes** One mounting bracket/fixture is required. A 15 deg and 30 deg mounting angle plate is included with each bracket.	**Notes** "STD" control specifications include beginning of run power feed and junction box for line voltage connection. One is included for each individual fixture or run specification. All other control specifications include beginning of run control module. See page 6 for details and dimensions.	**Notes** Run specifications will include 1 power feed/run. Individual fixtures will include 1 power feed/fixture. Run specifications will maximize 2F fixtures unless /C, /1 or /4 is specified. Contact customer service for custom run configurations. See page 4 for run lengths limits by output and voltage.	**Notes** Accessories not included in run specifications. Must be ordered separately. Jumper accessory is required for any bend radius > 20°. See page 7 for bend radius limits.

Product Specifications

Construction
- Housing is powder coated, extruded aluminum.
- All housing hardware is stainless steel.
- Clear, UV stabilized polycarbonate injection molded lens with integral silicone gasket.
- Proprietary IP66 exterior-rated, quick connect plugs.
- Self-closing IP66 end cap to simplify installation and eliminate end of run shorting risks.
- Available in 1F (12"), 2F (24") or 4F (48") lengths.

Electrical
- Integral high performance constant current driver.
- Standard 0-10V dimming (1% - 100%).
- Each cove module is configured for a line voltage feed while providing through wiring and quick connects for continuous mounting applications.
- See pg 4 for Run Length Limits.
- See pg 4 for Dimmer compatability chart.

LED Optics
- Fixture equipped with proprietary 90+ CRI LED module available in 2700, 3000, 3500 or 4000K within 3-step MacAdam ellipse.
- Discrete low-powered LED array with clear, injection molded lens delivers light free from striations.
- Luminaires tested per IESNA LM-79.
- LM-80 data utilized in TM-21 lumen maintenance projections:
  L70 > 72,000 hrs
  L90 > 28,000 hrs

Mounting
- Each individual fixture comes with stainless steel mounting brackets designed to align long runs by spanning two fixtures.
- Optional angled mounting base plates to adjust output angle to 15° and 30° included with each bracket.
- 10% extra mountings are included in every order.
- Power harness is required for connection to line voltage.
- STD option includes beginning of run power harness + junction box for line voltage connection.
- Control options include beginning of run power harness + dimming converter + junction box for line voltage connection.
- Run specifications will include 1 power feed/run. Individual fixtures will include 1 power feed/fixture. Run specifications will maximize 4F fixtures unless /1 or /2 is specified. Contact customer service for custom run configurations. See page 4 for run lengths limits by output and voltage.

Finish
- Fixture housing is powder coated aluminum.
- Standard color is silver with black end caps and wiring harness.
- Contact Cooper Lighting for custom color availability (minimum order quantity will apply).

Compliance
- Luminaires are cULus listed for 50° C ambient environments.
- Wet Location Listed.
- IP66 rated.
- 2000 hour salt spray tested.
- RoHS compliant.
- Tested according to IESNA LM-79 (See pg 3).

Environment
- Suited for indoor or outdoor installations.

Control
- 0-10V dimming to 1% is standard.
- Additional dimming protocols including ELV, TRIAC and DALI supported through an added control module at the beginning of the run.
- Wireless control is supported through the Cooper Lighting WaveLinx system.
- See pg 4 for run length limits.

Weight
- 1F = 1 lb.
- 2F = 1.8 lbs.
- 4F = 3.5 lbs.

Warranty
- Five year warranty standard.

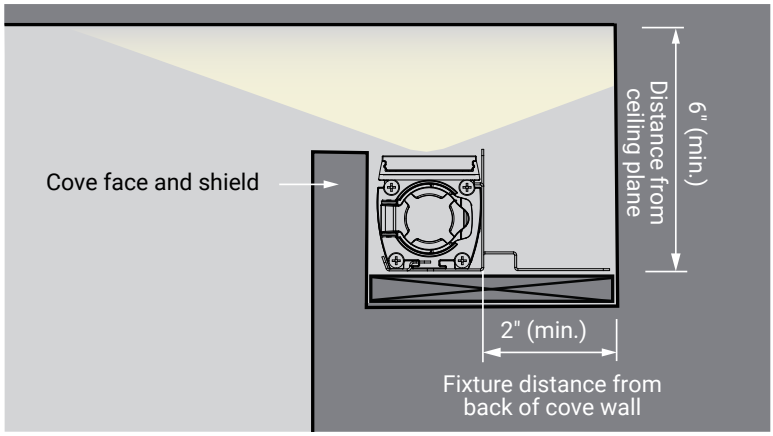
Cove Design Guidelines

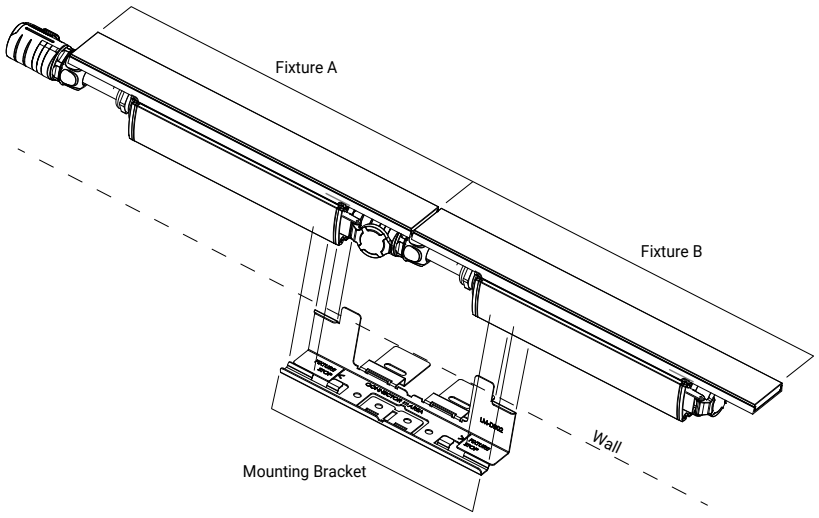
Recommended cove dimensions for optimal light distribution.



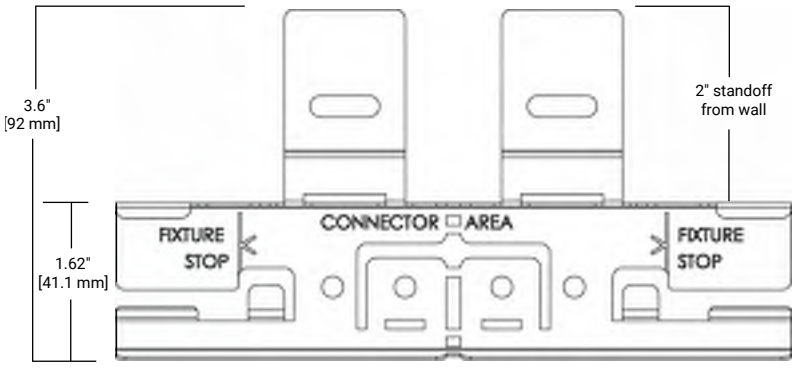
Mounting and Installation

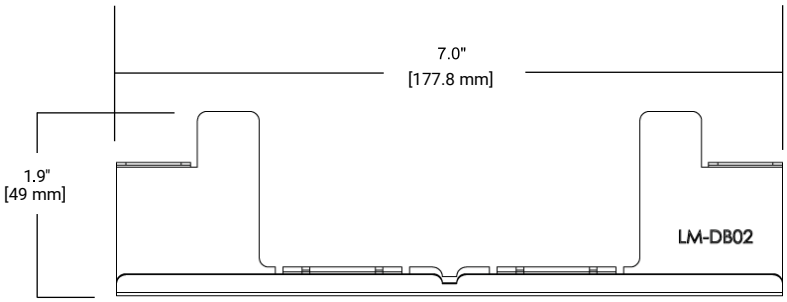
Custom brackets are designed to self-align CoviO fixtures in a linear run. Diagrams at right shows how each bracket spans between two fixture to align the linear run. Bracket can be placed on mounting plate for 15° or 30° aiming. Brackets have incorporated 2" stand-off for optimal cove light distribution.
Other mounting considerations:

- Mounting location must have solid floor for mounting bracket attachment
- Matte surface finishes in, above and adjacent to cove will deliver optimal cove light distribution
- Do not pre-install more than 12 brackets before installing fixtures
- Fixtures should be mounted at least 2" from wall for optimal cove light distribution.
- Mounting bracket stand-off can be cut off when using angled mounting plate.
- Bracket can be cut in half for runs, end of run, or curved runs.
- Jumper accessory is required for any bend radius > 20°

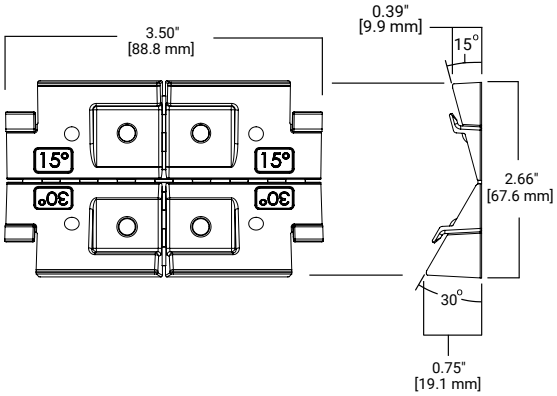


Mounting Bracket Dimensions

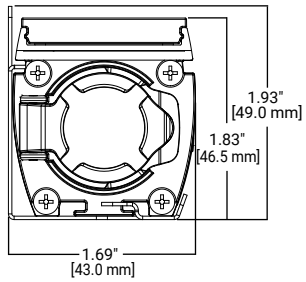




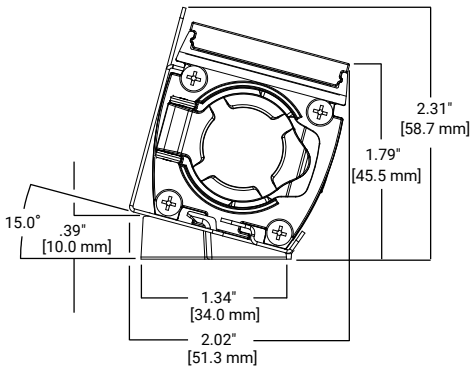
Mounting Plate Dimensions



Mounting Plate Angle Dimensions



0° Mount



15° Mount

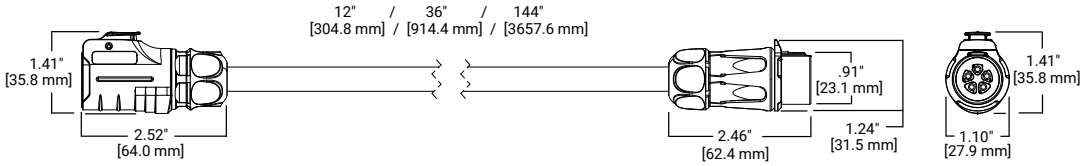
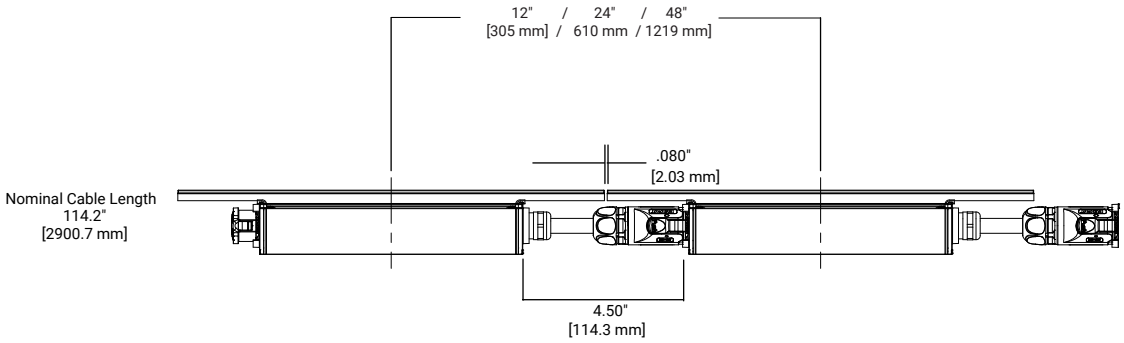
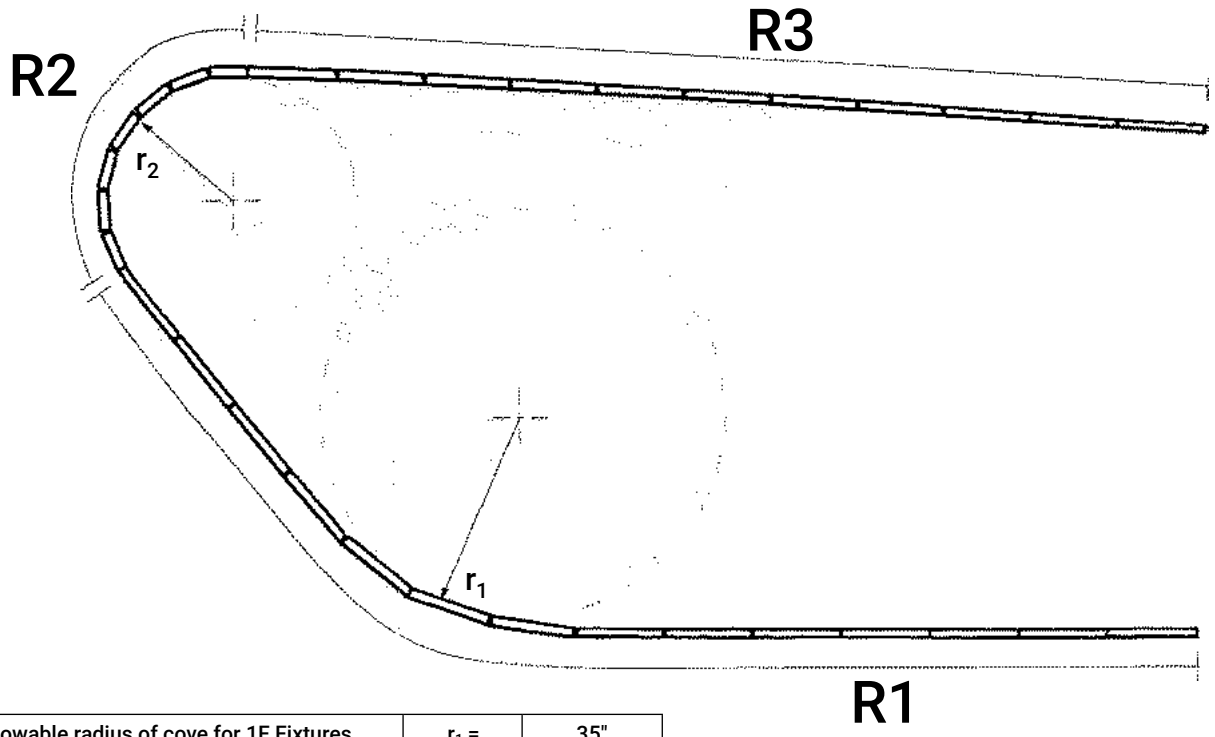
Jumper Harness Accessory



Typical Dimensions for Connected Fixtures



Run Specification Guidelines



Min allowable radius of cove for 1F Fixtures	r_1 =	35"
Min allowable radius of cove for 2F Fixtures	r_2 =	70"
Min allowable radius of cove for 4F Fixtures	r_4 =	140"

Linear Run Specifications

Linear runs can be broken down into segments for easier specifications. Mounting brackets and power feeds are included in any run specifications. Jumper accessory is required of bend radius > 20°. For example, the architectural drawing above would be specified as 3 separate runs:

- R1 would be specified with Length = 45F = 45 ft linear run (22x 2 ft fixtures + 1x 1 ft fixture + power feed)
- R2 would be specified with Length = 7F/1 = 7 ft linear run of 1 ft fixtures (7 x 1 ft fixture + power feed)
- R3 would be specified with Length = 33F = 33 ft linear run (16x 2 ft fixtures + 1x 1 ft fixture + power feed)

Contact customer service for custom run configurations.

	8[16] 8'	**60L** 6000				

1 8' is tandem (2) 4' lenses with single piece 8' body.
2 Nominal delivered lumens at 25°C ambient.
3 Not available in 3' model.
4 XDIM option must be specified with 120V or 277V option only.
5 347V with EMLED only available in 8' models.
6 Not available in 2' or 3' model.
7 Not available in 4' 70L model or 8' 140L model.
8 DALI available up to 80L models only, consult factory for other options.
9 EMLED on 8' models illuminates 4' section in emergency mode.
10 Available with DIM driver option only.
11 Integral controls options dimmable to 5% via wireless wall switch. Non-integral controls configurations are 0-10V dimmable to 1%.
12 Must be installed in conjunction with a UL1008 device.
13 Must be ordered with an integral sensing option.
14 High bay motion detector. Motion sensing zone is extremely limited if used below 15' mounting height.
15 Must order IRT9015 Interact commissioning remote with eachsystem order.
16 EMLED on 8' models illuminates 4' section in emergency mode.
17 Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.
18 Consult Signify to confirm whether specific accessories are BAA-compliant.
19 Must specify PS or PI mode for 347V.

Accessories[18] (order separately)

- **FSSD2L** - 2' Diffuse replacement lens
- **FSSD3L** - 3' Diffuse replacement lens
- **FSSD4L** - 4' Diffuse replacement lens (order two for 8' models)
- **FSSWG4** - 4' wire guard (order two for 8' models)
- **FSTH** - Sliding hanger bracket (set of two)
- **LSXR10** - Low bay PIR motion sensor, 120-277V (not available with PoE)
- **LSXR10ADC** - Low bay PIR motion sensor with photocell and hi/lo trim dimming, 120-277V (not available with PoE)
- **FSSDEK** - Decorative plastic end cap (set of two)

(See last page for details and more options)

SWZCS accessories[18] (order separately)

- **IRT9015** – handheld remote for grouping and configuration(at least one remote required for any SWZCS installation).
- **UID8451/10** – Wireless Dimmer Switch Selector
- **UID8461/10** – Wireless Scene Selector

General notes

Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

PAF (Paint after fabrication) option is required for all products that will be used in a damp or humid location, such as under a canopy or covered parking area.

Not all product variations listed on this page are DLC qualified. To ensure that a specific model is qualified, visit www.designlights.org/search

interact ready.

FSS FluxStream LED strip

2', 3', 4' and 8'

Features

- Compact design for installation in tight spaces.
- Frosted acrylic diffuser provides wide light distribution and superior glare control.
- Diffuser and LED plate snap into place allowing tool-free access to LED boards and driver.
- 2', 3', 4' and 8' tandem lengths available to accommodate many field applications.
- Up to 100,000 hour predicted L70 LED lumen maintenance provides long service life to reduce maintenance costs.
- Can be surface mounted on ceilings or walls, or suspended via chain, pendants or cables.
- Wall mountable - ADA compliant.
- Ideal for cold applications (-20°C).
- Continuous row mounting using standard end caps. No extra parts needed.
- 7/8" knock out provided at each end and on base of luminaire. Note: Center knockout is covered and not useable in 4' version with EMLED option.
- Multiple driver options available with 0-10V as standard.
- Enclosed lens minimizes penetration of dust, insects, and other debris into the LED compartment.
- 8' tandem unit is two 4' optical assemblies with a center mullion on a single full length chassis.
- Integral controls options include sensor mounted in control module extension mounted on fixture end (see dimension drawing).
- Fluxstream luminaires are Designlights Consortium® qualifed. Please see the DLC QPL list for exact catalog numbers www.designlights.org/QPL.
- 5 year manufacturer's limited warranty. Visit signify.com/warranties for complete warranty information.

Finish

- Baked white acrylic matte high reflectance paint finish.
- PAF (Paint after fabrication) option, which is required for all products that will be used in damp or humid locations, such as a canopy or covered parking area, provides extra corrosion resistance.

Shielding

- Contoured frosted acrylic lens.

Electrical

- LED boards and drivers are RoHS (Restriction of Hazardous Substances) compliant. Total system life rated at 50,000 hours. Predicted L70 lifetime based on LED manufacturer's supplied LM-80 data and in-situ laboratory testing.
- Integral emergency driver with EMLED option. To estimate lumen output in emergency mode, multiply emergency pack wattage by efficacy, then by 1.10.
- The GTD/E option is used to bypass wall switches and allow luminaire operation on auxiliary power. Generator transfer requires installation in conjunction with a UL1008 listed device.
- The GTD/SNSR option is used to bypass integrated sensor control in the event of utility power loss. Generator transfer requires installation in conjunction with a UL1008 listed device.

Materials

- Heavy gauge cold rolled steel housing, LED plate, and end caps.

Labels

- cETLus listed.
- Suitable for damp locations.

Performance data

Fixture	Lumens	Wattage	Efficacy
FSS220L	2000lm	17W	123lm/w
FSS330L	3000lm	26W	119lm/w
FSS440L	4000lm	31W	133lm/w

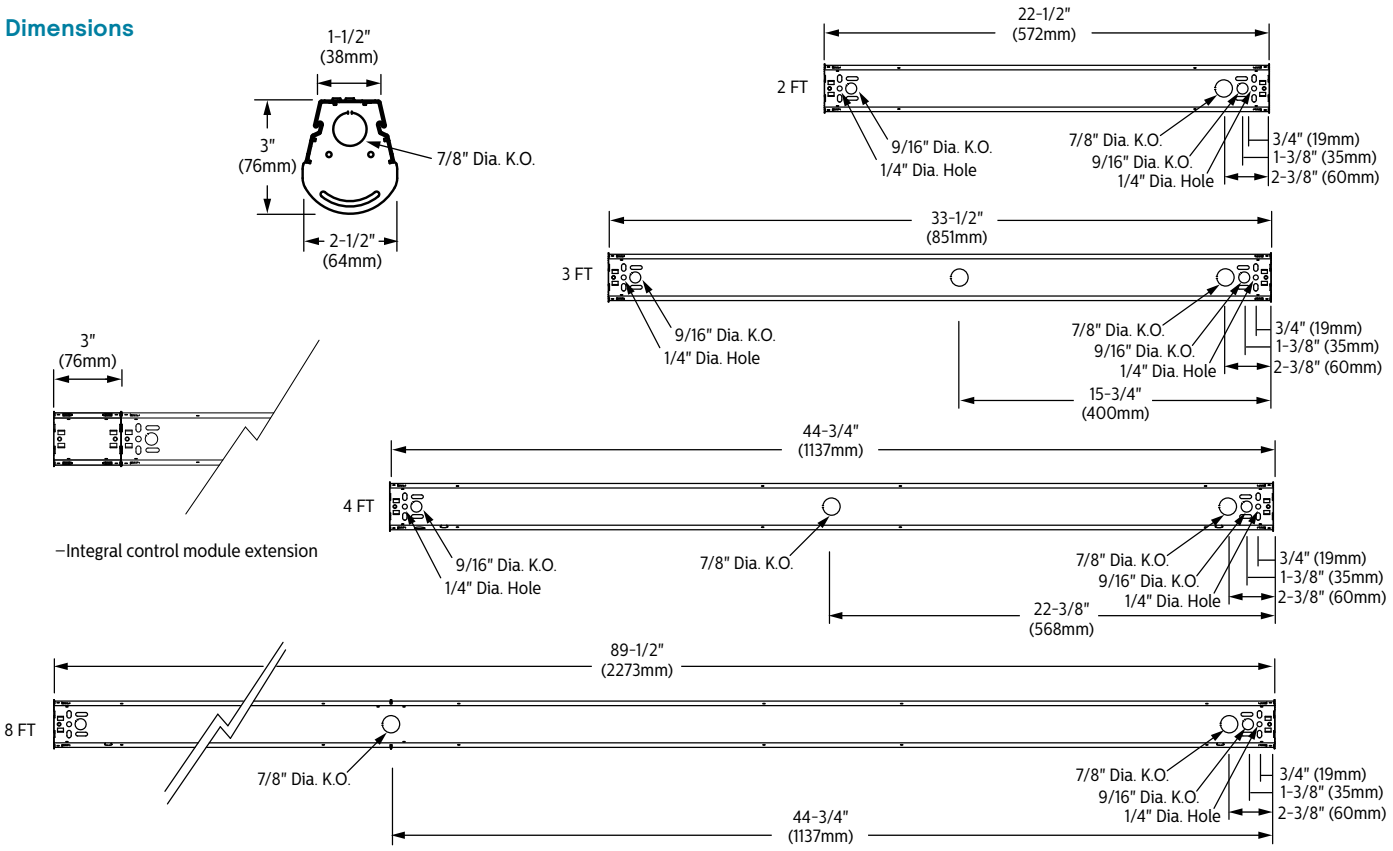
FSS8140L	-20°C to 25°C
EMLED option	Minimum 0°C
All others	-20°C to 40°C

Dimensions



FSS FluxStream LED strip

2', 3', 4' and 8'

Wireless Controls Options

SpaceWise DT (SWZDT)

- Standalone daylight and occupancy sensing with advanced grouping, wireless mesh networking and dwell time.
- Commissioning via compatible Android phone and Philips Field App
- Dimming via compatible Zigbee wireless wall switch only (see link below for details)
- Register for the commissioning app at http://registration.componentcloud.philips.com/appregistration/
- Integral sensing options may not be combined
- For more information including recommended switches, refer to the following: –

  SWZDT – www.usa.lighting.philips.com/systems/lighting-systems/spacewise

Emergency Options (ER100)

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

FluxStream strip shown with integral sensor

Interact Pro scalable sensor for Foundation, Advanced & Enterprise tiers (SWZCS and an evolution of SpaceWise)

- SWZCS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
  - Compatible with:
    - UID8451/10 wireless dimmer switch
    - SWS200 wireless scene switch
    - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
    - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
    - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
    - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem

Radio only sensor (RADIO)

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Interact Pro scalable sensor bundles for Enterprise tier

- IAOSB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices

Interact Industry (IAI)

- A wireless IoT connected lighting solution for large warehouses, gymnasiums and industrial facilities that require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Combine office and high bay sensors on a single project and for a common dashboard view.
- Compatible Zigbee Green Power wall dimmer.
- Maximize energy savings with integrated sensors and integration with BMS.
- Use Interact Industry software and insights to reduce maintenance cost by remotely configuring and managing the system, creating flexible lighting zones, insights on lamp burn hours etc. Optimize warehouse operations with real time occupancy analytics and minimize potential bottlenecks.
- Requires compatible Interact Gateway and internet connectivity for commissioning.
- For more information on Interact Industry Wireless, visit: www.interact-lighting.com/en-us/what-is-possible/interact-industry

Wired Controls Options

Interact Office Wired (PoE)

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- IAOSB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output. Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices

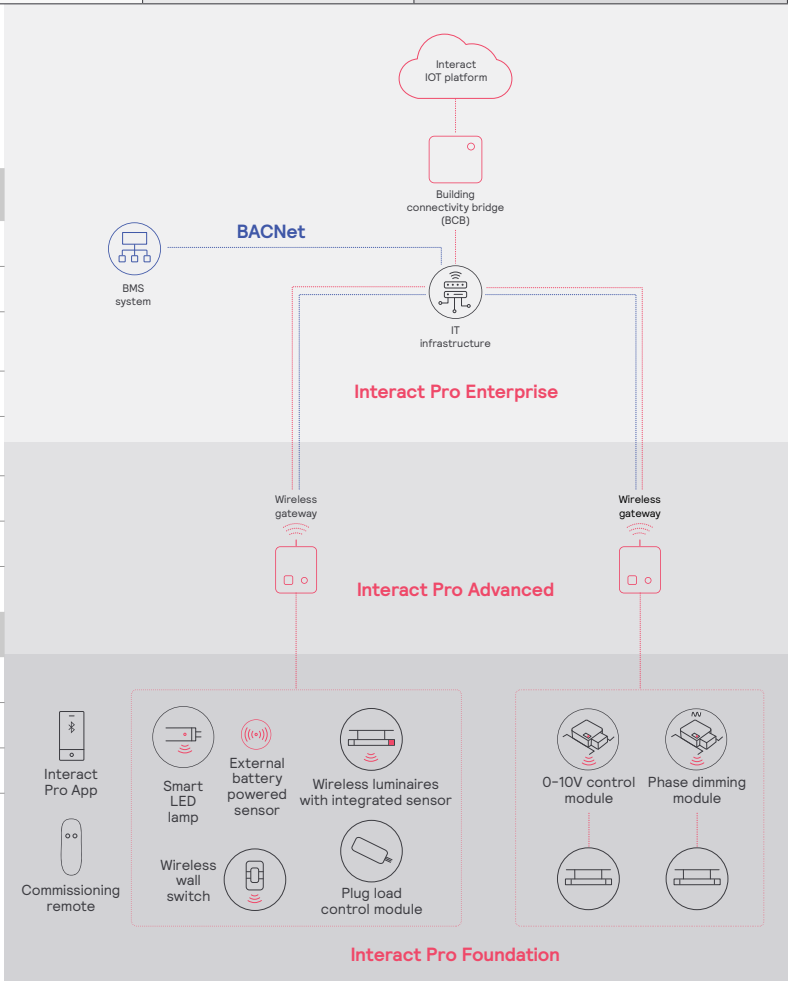
IoT Apps for productivity			✓

Currently supported maximum system size

To be able to design the lighting system correctly for the customer, it is important to know the prime characteristics of the system, its possibilities and limitations.

System level	
Total number of gateways	Unlimited
Total number of devices	200 per network
• luminaires with integrated sensors	150
• smart TLEDS	150
Total number of ZGP devices (sensors and switches)	50
• sensors	30
• switches	50
• zones and groups	64
Group level	
Recommended number of lights	40 (recommended 25)
Number of ZGP devices	5
Number of scenes	16



FSS FluxStream LED strip

2', 3', 4' and 8'

Photometry

2' FluxStream LED strip, 2000 nominal delivered lumens — LER – 123

Catalog No. FSS220L840-UNV-DIM
Test No. 37164
S/MH 1.2
Lamp Type LED
Lumens 2034
Input Watts 17

Comparative yearly lighting energy cost per 1000 lumens – **$1.95** based on 3000 hrs. and $.08 pwr KWH.

The photometric results were obtained in the Day-Brite laboratory which is NVLAP accredited by the National Institute of Standards and Technology.

Photometric values based on test performed in compliance with LM-79.

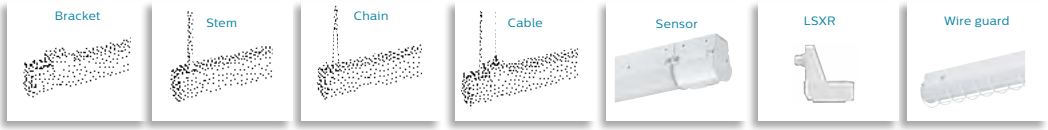
Accessories[19]



Accessory Catalog Code	Description	
FSTH	Sliding hanger bracket (pair)	
SV5F12	12" Stem and canopy kit	White stem and canopy kit, 1/4" trade size (1/2" O.D.) locknuts included. Works with 9/16" k.O. on base of housing.
SV5F18	18" Stem and canopy kit	
SV5F24	24" Stem and canopy kit	
SV5F36	36" Stem and canopy kit	
SV5F48	48" Stem and canopy kit	
FKR-126	Chain hanger set (pair)	Includes two 5' heavy duty link chains with "V" hooks. Attaches to base of housing.
DACHxx	Adjustable cable hanger kit (single)	Works with 1/4" hole on base of housing or FSTH hanger bracket. **xx**=cable length in inches, enter 48" to 180" lengths in 12" increments
DACHxx-1-SC	Adjustable cable hanger kit with white straight 18/3 cord (single)	
DACHxx-1-CC	Adjustable cable hanger kit with white coiled 18/3 cord (single)	
DACHxx-2-SC	Adjustable cable hanger kit with white straight 18/4 cord (single)	
DACHxx-2-CC	Adjustable cable hanger kit with white coiled 18/4 cord (single)	
DACHxx-1D-SC	Adjustable cable hanger kit with white straight 18/5 cord with dimming leads (single)	
LSXR10	Low bay pir motion sensor (120-277v)	
LSXR10ADC	Low bay pir motion sensor with photocell and hi/lo trim dimming (120-277v)	
FSSWG4	4' Wire guard (order two for 8' models)	
FSSD2L	2' Diffuse replacement lens	
FSSD3L	3' Diffuse replacement lens	
FSSD4L	4' Diffuse replacement lens (order two for 8' models)	
FSSDEK	Decorative plastic end cap (set of two)

FEATURES

- ASTM Grade steel base plate with ASTM A366 base cover
- Hand hole assembly 3" x 5" on 5" and 6" pole; and 2" x 4" on 4" pole
- 10'-39' mounting heights
- Drilled or tenon (specify)

DESIGN CONSIDERATIONS

Wind induced vibrations resulting from steady, unidirectional winds and other aerodynamic forces, as well as vibration and coefficient of height factors for non-grounded mounted installations (e.g., installations on bridges or buildings) are not included in this document. The information contained herein is for general guidance only and is not a replacement for professional judgement. Consult with a professional, and local and federal standards, before ordering to ensure product is appropriate for the intended purpose and installation location. Also, please review Cooper Lighting Solutions Light Pole White Paper for risk factors and design considerations. Learn more.

Specifications and dimensions subject to change without notice. Consult your lighting representative at Cooper Lighting Solutions or visit www.cooperlighting.com for available options, accessories and ordering information.

NOTES:

1. Catalog number includes pole with hardware kit. Anchor bolts not included. Before installing, make sure proper anchor bolts and templates are obtained.
2. Tenon size or machining for rectangular arms must be specified. Hand hole position relative to drill location.
3. Shaft size, base square, anchor bolts and projections may vary slightly. All dimensions nominal.
4. EPAs based on shaft properties with wind normal to flat. EPAs calculated using base wind velocity as indicated plus 30% gust factor.

Poles

5" / 6" Straight Square Steel

The Philips Gardco SSS straight steel pole consists of a one-piece square fabricated steel lighting standard. The carbon steel base plate is secured to the shaft with a continuous circumferential weld providing excellent strength and integrity. The poles are finished with an electrostatically applied, thermally cured TGIC polyester powdercoat. All poles include anchor bolts, full base cover, hand hole, ground lug and top cap.

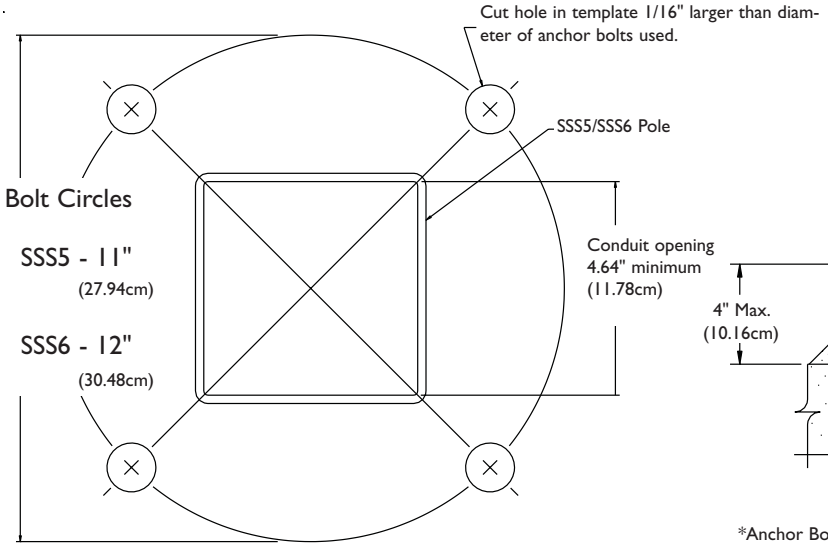
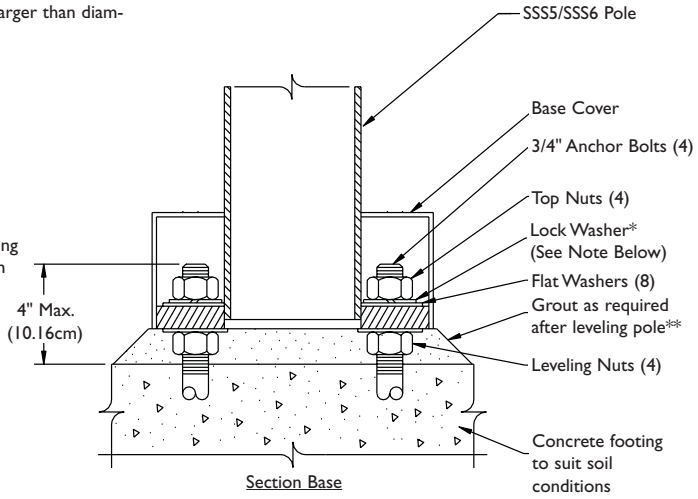
1. **Warning:** Additional wind loading, in terms of EPA, from banners, cameras, floodlights and other accessories attached to the pole, must be added to the luminaire(s) EPA before selecting the pole with the appropriate wind load capability.
2. Factory supplied template must be used when setting anchor bolts. Philips Gardco will not honor any claim for incorrect anchorage placement resulting from failure to use factory supplied templates.

DIMENSIONS



NOTE: Factory supplied template must be used when setting anchor bolts. Philips Gardco will not honor any claim for incorrect anchorage placement from failure to use factory supplied templates.



*Anchor Bolt Lock Washers are not normally required and are not included in standard anchor bolt sets. They are available upon request at additional cost.
**** Grouting should include a drainage slot or tube (by others) to permit water to drain from the base of the pole. Failure to provide drainage may weaken the pole base structure over time and may result in pole base failure, for which Philips Gardco is not responsible.**

PHILIPS
GARDCO

SPECIFICATIONS

POLE SHAFT: The pole shaft is fabricated from a single-piece of 11 ga (.1196") or 7 ga (.1793") commercial carbon steel. The formed steel plate is longitudinally welded providing minimum yield strength of 46 KSI.

ANCHOR BASE: The pole anchor base is fabricated from A-36 structural quality carbon steel with a minimum yield strength of 36 KSI. The base plate telescopes the pole shaft and is circumferentially welded on both top and bottom.

ANCHOR BOLTS: Anchor bolts are fabricated from a commercial quality hot rolled carbon steel bar that meets or exceeds a minimum guaranteed yield strength of 50,000 psi. Bolts have an "L" bend on one end and threaded on the opposite end. Anchor bolts are galvanized a minimum of 12" on the threaded end. Four (4) properly sized bolts, each furnished with two (2) regular hex nuts and two (2) flat washers, are provided per pole, unless otherwise specified.

BASE COVER: A two-piece base cover completely conceals the entire base plate and anchorage.

HAND HOLE: The reinforced hand hole has a nominal rectangular 2" X 4" inside opening in the pole shaft. Included is a cover plate with attachment screws. The hand hole is located 18" above the base and 180° clockwise with respect to the luminaire arm when viewed from the top of the pole for one arm. For two arms the hand hole is located directly under one arm.

POLE TOP CAP: Each pole assembly is provided with a removable pole top cap.

FINISH: Poles are available with a bronze, natural, white or black electrostatically applied, thermally cured TGIC polyester powdercoat finish.

STOCK POLES: Poles provided from stock under the Quick Ship program are drilled for four (4) luminaires at 90° with three (3) hole sets plugged.

GENERAL POLE INFORMATION

DESIGN: The poles as charted are designed to withstand dead loads and predicted dynamic loads developed by variable wind speeds with an additional 30% gust factor under the following conditions:

The charted weights include luminaire(s) and/or mounting bracket(s).

The wind velocities are based on 10 mph increments from 80 mph through 100 mph. Poles to be located in areas of known abnormal conditions may require special consideration. For example: coastal areas, airports and areas of special winds.

Poles are designed for ground mounted applications. Poles mounted on structures (such as buildings and bridges) may also necessitate special consideration requiring Philips Gardco's recommendation.

Height correction factors and drag coefficients are applied to the entire structure. An appropriate safety factor is maintained based on the minimum yield strength of the material incorporated in the pole.

WARNING: This design information is intended as a general guideline only. The customer is solely responsible for proper selection of pole, luminaire, accessory and foundation under the given site conditions and intended usage. The addition of any items to the pole, in addition to the luminaire, will dramatically impact the EPA load on that pole. It is strongly recommended that a qualified professional be consulted to analyze the loads given the user's specific needs to ensure proper selection of the pole, luminaire, accessories, and foundation. Philips Gardco assumes no responsibility for such proper analysis or product selections. **Failure to insure proper site analysis, pole selection, loads and installation can result in pole failure, leading to serious injury or property damage.**

GENERAL INFORMATION: Mounting height is the vertical distance from the base of the lighting pole to the center of the luminaire arm at the point of luminaire attachment.Twin arms as charted are oriented at 180° with respect to each other. For applications of two (2) arms at 90° or other multiple arm applications, consult the factory.

WARRANTY: Philips Gardco poles feature a 1 year limited warranty. See Warranty Information on www.sitelighting.com for complete details and exclusions.

OA/RA1027=NEMA Photocontrol - 480V
FSIR-100=Wireless Configuration Tool for Occupancy Sensor [25]
SWPD4-XX=WaveLinx Sensor, Dimming Motion and Daylight, WAC Programmable, 7' - 15' Mounting [15, 16, 17, 26]
SWPD5-XX=WaveLinx Sensor, Dimming Motion and Daylight, WAC Programmable, 15' - 40' Mounting [15, 16, 17, 26]
WOLC-7P-10A=WaveLinx Outdoor Control Module (7-PIN) [27]

NOTES:

1. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.
2. Customer is responsible for engineering analysis to confirm pole and fixture compatibility for alll applications. Refer to installation instructions IB500002EN and pole white paper WP513001EN for additional support information.
3. Only product configurations with these designated prefixes are built to be compliant with the Buy American Act of 1933 (BAA) or Trade Agreements Act of 1979 (TAA), respectively. Please refer to DOMESTIC PREFERENCES website for more information. Components shipped separately may be separately analyzed under domestic preference requirements.
4. Standard 4000K CCT and 70CRI.
5. 480V not to be used with ungrounded or impedance grounded systems.
6. DuraVolt drivers feature added protection from power quality issues such as loss of neutral, transients and voltage fluctuations. Visit www.signify.com/duravolt for more information.
7. Use dedicated IES files on product website for non-standard CCTs.
8. House Side Shield not suitable with T5 distribution. Not available with PRV-C60 lumen package.
9. Not available with PRV-C60 lumen package. Not available with PRV-P-C25 lumen package.
10. Salt spray tested to over 5,000-hours per ASTM B117 with a scribe rating of 9 per ASTM D1654. Also achieves 7,000-hour rating per ASTM B117 with a scribe rating of 4 per ASTM D1654. Extended lead times may apply.
11. If DuraVolt (DV) is specified, use a photocontrol that matches the input voltage used.
12. Controls system is not available in combination with a photocontrol receptacle (PER or PER7) or another controls system (MS, SPB, ZD, or ZW). Option not available with DuraVolt (DV) voltage option.
13. Utilizes the Wattstopper sensor FSP-211. Sensor color white unless specified otherwise via PDR. To field-configure, order FSIR-100 accessory separately.
14. Utilizes the Wattstopper sensor FSP-3XX series. Sensor color determined by product finish. See Sensor Color Reference Table. Field-configures via mobile application. See Controls section for details.
15. Sensor passive infrared (PIR) may be overly sensitive when operating below -20°C (-4°F).
16. For the device to be field-configurable, requires WAC Gateway components WAC-PoE and WPOE-120 in appropriate quantities. Only compatible with WaveLinx system and software and requires system components to be installed for operation. See website for more Wavelinx application information.
17. Replace XX with sensor color (WH, BZ, or BK).
18. Only available in PRV-XL configurations C75, C100, C125, C150, or C175.
19. Not available with 347V, 480V, DV, or HA options. Consult LumenSafe system product pages for additional details and compatability information.
20. Replace XX with paint color.
21. For BAA or TAA requirements, Accessories sold separately will be separately analyzed under domestic preference requirements. Consult factory for further information.
22. Only for use with PRV and PRV-P.
23. Only for use with PRV. Not available for use with PRV-P or PRV-XL configurations.
24. Must order one per optic/LED when ordering as a field-installable accessory (1, 2, 4, or 6).
25. This tool enables adjustment to Motion Sensor (MS) parameters including high and low modes, sensitivity, time delay, cutoff and more. Consult your lighting representative for more information.
26. Requires 4-PIN twistlock receptacle (ZD or ZW) option.
27. Requires 7-PIN NEMA twistlock photocontrol receptacle (PER7) option. The WOLC-7 cannot be used in conjunction with other controls systems (MS, ZD, ZW or LWR). Operates on 120-347V input voltages.

Product Specifications

Construction

- Single-piece die-cast aluminum housing
- Tethered die-cast aluminum door

Optics

- Dark Sky Approved (3000K CCT and warmer only)
- Precision molded polycarbonate optics

Electrical

- -40°C minimum operating temperature
- 40°C maximum operating temperature
- >.9 power factor
- <20% total harmonic distortion
- Class 1 electronic drivers have expected life of 100,000 hours with <1% failure rate
- 0-10V dimming driver is standard with leads external to the fixture
- Standard MOV surge protective device designed to withstand 10kV of transient line surge

Mounting

- Versatile, patented, standard mount arm accommodates multiple drill patterns ranging from 1-1/2" to 4-7/8" (Type M drilling recommended for new installations)
- A knock-out on the standard mounting arm enables round pole mounting
- Adjustable pole and wall mount arms adjust in 5° increments from 0° to 60°; Downward facing orientation only (Type N drilling required for ADJA mount)
- Adjustable slipfitter arm adjusts in 5° increments from -5° to 85°; Downward facing orientation only
- Adjustable Arms: 1.5G vibration rated
- Prevail and Prevail Petite: 3G vibration rated
- Prevail XL Mast Arm: 3G vibration rated
- Prevail XL Standard Arm: 1.5G vibration rated

Typical Applications

- Parking lots, Walkways, Roadways and Building Areas

Finish

- Five-stage super TGIC polyester powder coat paint, 2.5 mil nominal thickness
- Finish is compliant to 3,000 hour salt spray standard (per ASTM B117)

Shipping Data

- Prevail Petite: 18 lbs. (7.94 kgs.)
- Prevail: 20 lbs. (9.09 kgs.)
- Prevail XL: 45 lbs. (20.41 kgs.)

Warranty

- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Housing Finish	Sensor Color
AP=Grey	Grey
BZ=Bronze	Bronze
BK=Black	Black
DP=Dark Platinum	Grey
GM=Graphite Metallic	Black
WH=White	White

Lumen Multiplier

Ambient Temperature	Lumen Multiplier
10°C	1.02
15°C	1.01
25°C	1.00
40°C	0.99

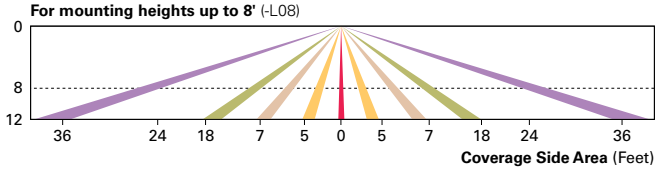
Control Options

0-10V This fixture provides 0-10V dimming wire leads for use with a lighting control panel or other control method.

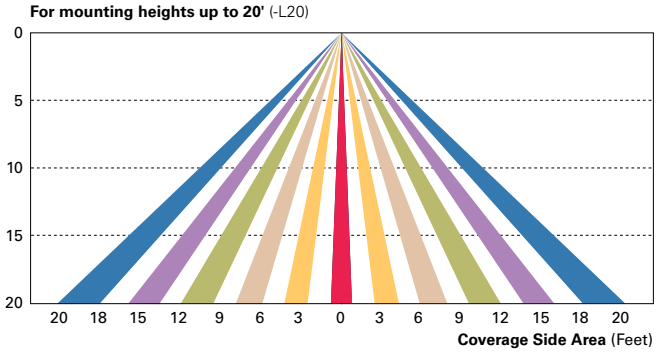
Photocontrol (PER and PER7) Photocontrol receptacles provide a flexible solution to enable "dusk-to-dawn" lighting by sensing light levels. Advanced control systems compatible with NEMA 7-PIN standards can be utilized with the PER7 receptacle.

Dimming Occupancy Sensor (SPB, MS/DIM-LXX and MS-LXX) These sensors are factory installed in the luminaire housing. When the SPB or MS/DIM sensor options are selected, the luminaire will dim down after five minutes of no activity detected. When activity is detected, the luminaire returns to full light output. When a sensor for ON/OFF operation (MS-LXX) is selected, the luminaire will turn off after five minutes of no activity. These occupancy sensors include an integral photocell for "dusk-to-dawn" control or "daylight harvesting." Factory default is enabled for the MS sensors and disabled for the SPB. SPB motion sensors require the Sensor Configuration mobile application by Wattstopper to change factory default dimming level, time delay, sensitivity and other parameters. Available for iOS and Android devices. The SPB sensor is factory preset to dim down to approximately 10% power with a time delay of five minutes.

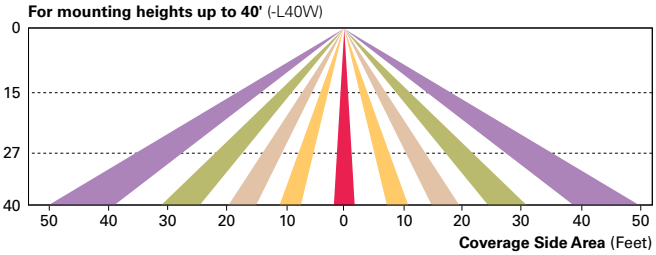
For mounting heights up to 8' (-L08)



For mounting heights up to 20' (-L20)



For mounting heights up to 40' (-L40W)

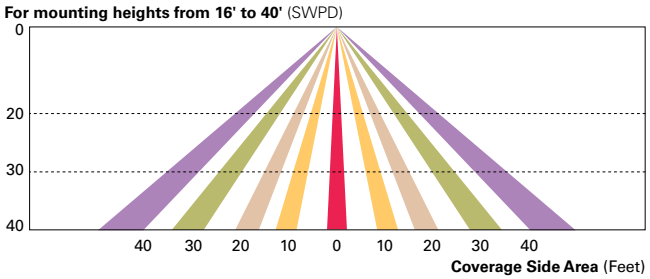


WaveLinx Wireless Control and Monitoring System Available in 7-PIN or 4-PIN configurations, the WaveLinx Outdoor control platform operates on a wireless mesh network based on IEEE 802.15.4 standards enabling wireless control of outdoor lighting. At least one Wireless Area Controller (WAC) is required for full functionality and remote communication (including adjustment of any factory pre-sets).

WaveLinx Outdoor Control Module (WOLC-7P-10A) A photocontrol that enables astronomic or time-based schedules to provide ON, OFF and dimming control of fixtures utilizing a 7-PIN receptacle. The out-of-box functionality is ON at dusk and OFF at dawn.

WaveLinx Wireless Sensor (SWPD4 and SWPD5) These outdoor sensors offer passive infrared (PIR) occupancy sensing and a photocell for closed-loop daylight sensing. These sensors can be factory installed or field-installed via simple, tool-less integration into luminaires equipped with the Zhaga Book 18 compliant 4-PIN receptacle (ZD or ZW). These sensors are factory preset to dim down to approximately 50 percent power after 15 minutes of no activity detected, and the photocell for "dusk-to-dawn" control is default enabled. A variety of sensor lenses are available to optimize the coverage pattern for mounting heights from 7'-40'.

For mounting heights from 16' to 40' (SWPD)



LumenSafe (LD) The LumenSafe integrated network camera is a streamlined, outdoor-ready camera that provides high definition video surveillance. This IP camera solution is optimally designed to integrate into virtually any video management system or security software platform of choice. No additional wiring is needed beyond providing line power to the luminaire. LumenSafe features factory-installed power and networking gear in a variety of networking options allowing security integrators to design the optimal solution for active surveillance.

Item Name	Exterior Light Fixture
Item Type	Exterior Pole Light Fixture
Description	Ecoform Site Head Type IV
Manufacturer	Philips Gardco
Model	ECF-S-48L-900-NW-G2-AR-4- UNV-DD-BZ
Dimensions	24.2"L x 13"W x 2.1"H
Color	Bronze
CSI #	265600 - Exterior Lighting*
Omniclass #	22-265600
Dimming Type	0-10V
Mount	Pole
On Dimming System	No
Fixture Input (Max. Watts)	135
Lamp Type	LED
Lamp Kelvin	4000
Voltage	120/277
Delivered Lumens (LED) or Mean Lumens (Non-LED)	16795
Lamp CRI	70
Lead Time	In stock or 4 weeks lead time
Warranty	Five year limited warranty
Notes	Efficacy: Lamp Life/Fixture Life: 60,000 hrs

EcoForm

ECF-S small

Project:	CFRST
Location:	
Cat.No:	ECF-S-48L-900-NW-G2-AR-4-UNV-DD-BZ
Type:	ALZ-010-PH
Qty:	
Notes:	KEITH GRAHAM KETH.GRAHAM@PHILIPS.COM

The Philips Gardco EcoForm Gen-2 combines economy with performance in an LED area luminaire. Capable of delivering up to 26,400 lumens or more in a compact, low profile LED luminaire, EcoForm offers a new level of customer value. EcoForm features an innovative retrofit arm kit, simplifying site conversions to LED by eliminating the need to drill additional holes in most existing poles. Integral control systems available for further energy savings.

Ordering guide

Predicted Lumen Depreciation Data

Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions.L_{70} is the predicted time when LED performance depreciates to 70% of initial lumen output. Calculated per IESNA TM21-11. Published L_{70} hours limited to 6 times actual LED test hours

Ambient Temperature °C	Driver mA	Calculated L_{70} Hours	L_{70} per TM-21	Lumen Maintenance % at 60,000 hrs
25°C	up to 1200 mA	>100,000 hours	>60,000 hours	>88%

1. Wattage and lumen output may vary due to LED manufacturer forward volt specification and ambient temperature.
   Wattage shown is average for 120V through 277V input. Measured wattage may vary due to variation in input voltage.
2. Lumen values based on photometric tests performed in compliance with IESNA LM-79.
3. Warm white color temperature will result in decreased lumen output.

Luminaire options

DD: 0-10V dimming driver with leads supplied through back of luminaire (for secondary dimming controls by others).

TLRD5: Twist Lock Receptacle with 5 pins enabling dimming, can be used with a twistlock photoelectric cell or a shorting cap. Can also be used with Philips or third party control system. Receptacle located on top of luminaire housing.

TLRD7: Twist Lock Receptacle with 7 pins enabling dimming and additional functionality (by others), can be used with twistlock photoelectric cell or a shorting cap. Can also be used with Philips or third party control system. Receptacle located on top of luminaire housing.

TLRDPC: Receptacle with twistlock photoelectric cell (must specify voltage). Receptacle located on top of luminaire housing.

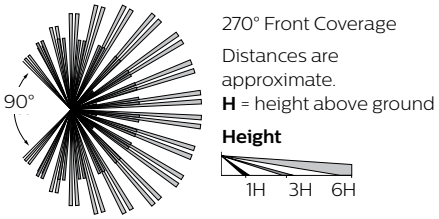
Dynadimmer Automatic Profile Dimming: Automatic dimming profiles (CS50/CM50/CE50) offer safety, median, or economy settings, for shorter or longer duration. Dimming profiles provide flexibility towards energy savings goals while optimizing light levels during specific dark hours. 50% dimming is standard. DA50 offers 50% instantaneous dimming all night (during all dark hours). 75% and 25% dimming is also available if different light levels are required (contact Technical Support for details).

	Dimming		
Profile	Level	Duration	Example
Economy	50%	9 hours	9 PM - 6 AM
Median	50%	8 hours	10 PM - 6 AM
Safety	50%	7 hours	11 PM - 6 AM
Reactive 50	50%	dynamic	all night

IMRI3, IMRI7: Infrared Motion Response Integral. IMRI module is mounted integral on driver door and is available with two different sensor lens types to accommodate various mounting heights and occupancy detection ranges (see charts for approximate detection patterns on page 7). Motion response used in combination of Dynadimmer and SiteWise are not programmable and used to override controllers schedule when motion is detected. When used not combined with any controller, IMRI is set/operates in the following fashion: The motion sensor is set to a constant 50%. When motion is detected by the PIR sensor, the luminaire returns to full power/light output. Dimming on low is factory set to 50% with 5 minute default in "full power" prior to dimming back to low. When no motion is detected for 5 minutes, the motion response system reduces the wattage by 50%, to 50% of the normal constant wattage reducing the light level. IMRI can also be specified with automatic profile dimming for the added benefit of a combined dimming profile with sensor detection, where the PIR sensor will override the dimming profile when occupancy is detected. Passive infrared (PIR) motion sensor.

IMRO: Infrared Motion Response Outboard pole mounted sensor, must be specified with an available automatic profile dimming option. Combines the benefits of both automatic profile dimming and motion response using the Philips DynaDimmer technology. PIR sensor features a pole mounted Wattstopper EW-200-120-W or the EW-200-277-W. One motion sensor per pole is required (order MS-A-120 or MS-A-277 separately). Available in 120 or 277V only, IMRO sensors require single voltage 120V or 277V input (see chart for approximate detection patterns). If motion is detected during the time that the luminaire is operating at profile dimming mode specified, the luminaire returns to 100% power and light output. The luminaire remains on high until no motion is detected for the duration period, after which the luminaire returns back to automatic profile dimming. Duration period is factory set at 15 minutes, and is field adjustable from 5 minutes up to 15 minutes. The area motion detector provides coverage equal to up to 6 times the sensor height above ground, 270° from the front-center of the sensor.

Pole Details: IMRO requires that the pole include an additional hand hole 15 feet above the pole base, normally oriented 180° to the standard hand hole. For Philips Gardco poles, order the pole with the Motion Sensor Mounting (MSM) option which includes the hand hole and a special hand hole cover plate for the sensor with a 1/2" NPT receptacle centered on the hand hole cover plate into which the motion sensor mounts. Once the motion sensor is connected to the hand hole cover plate, then wiring connections are completed in the pole. The plate (complete with motion sensor attached and wired) is then mounted to the hand hole. If poles are supplied by others, the customer is responsible for providing suitable mounting accommodations for the motion sensor in the pole (see Gardco Poles specification sheets for more information).



DCC: Dual Circuit Control permits separate switching of a specific number of LED modules. Available as an option with 2 through 4 modules.

SW: SiteWise option is a fully integrated controller that connects to Philips SiteWise system in order to offer a complete area lighting management system. The communication signal is based on Philips patented central dimming technology. SiteWise delivers it deliver optimal energy savings using your site's existing cabling. No additional wiring required, installation and commissioning are simple. An intuitive, mobile app makes it easy for authorized users to set schedules to meet site specific lighting needs, local regulations, and energy codes.

Wireless systems: Controller radio/sensor module attached to luminaire arm and includes radio, photocell and motion sensor. Available with #2 lens (LLC2) for 8' to 15' mounting height" or #3 lens (LLC3) for 15-25' mounting heights or #4 lens (LLC4) for 25-40' mounting heights. Also available with remote pod accessory where pod is mounted separate from luminaire to pole or wall (see accessories and wireless system information page 5-7).

F1: Fusing Single (for 120, 277 or 347VAC)

F2: Fusing Double (for 208, 240 or 480VAC)

FP1: Fusing Pole Single (pole mounted near handhole, for 120, 277 or 347VAC)

FP2: Fusing Pole Double (pole mounted near handhole, for 208, 240 or 480VAC).

FP3: Fusing Pole Canadian Double Pull (pole mounted near handhole, for 208, 240 or 480VAC)

SP1: Surge Protection, 10kV/5kA, 120-277V or 347-480V

SP2: Surge Protection, 20kV/10kA , 120-277V or 347-480V

HIS: Internal House Side Shield. Injection molded in black finish. Ships installed with 1 per 16 LED module. Also available shipped separately as an accessory for 2-4 LED modules.

FAWS: Field Adjustable Wattage Selector, pre-set to the highest position, can be easily switched in the field to the required position. This reduces total luminaire wattage consumption and reduces the light level – see the FAWS multiplier chart for more details. *Note: It is not recommended to use FAWS with other dimming or controls; if you do, set the switch to position 10 (maximum output) to enable the other dimming or controls. Switching FAWS to any position other than 10 will disable the other dimming or controls.*

Field adjustable wattage (FAWS) multiplier chart

FAWS Position	Typical Delivered Lumens Multiplier	Typical System wattage
1	0.31	0.28
2	0.53	0.50
3	0.62	0.58
4	0.70	0.67
5	0.78	0.75
6	0.83	0.81

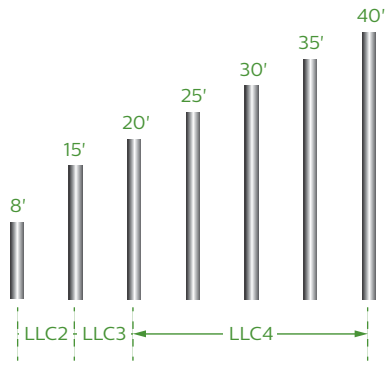
Wireless system – luminaire configuration information

LLC2/LLC3/LLC4 Luminaire Mounted Controller

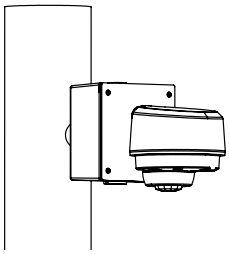
Controller pod attached to luminaire and Includes radio, photocell and motion sensor with #2, #3 or #4 lens for 8-40' mounting heights.

Recommended Sensor by Pole Height



LLCR2/LLCR3/LLCR4 Pole Mounted Controller

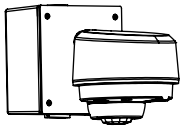
In this configuration, the wireless controller will be mounted to the pole at a fifteen foot mounting height. The number of luminaires on each pole, as well as the specific wattage chosen, will determine how many controllers will be required.



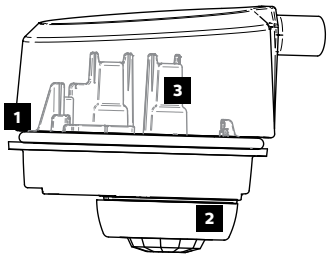
When using the wireless remote accessory option (LLCR-F) in a pole mount application, specify pole option (CL=Coupling Internal Thread, 3/4" size). Confirm required orientation of luminaire and wireless controller. Indicate height above pole base and orientation to hand hole. Recommended min pole height is 18ft, with option (CL) 15ft above pole base. Other heights are possible when choosing the appropriate sensor lens type. See pole specification sheets for more information.

Remote Mount Wireless Controller

Used to extend the communication on site, to extend motion response and add other luminaires that are not pole mounted. Consult factory for more information.



Wireless system sensor



1. Photocell

- Ambient light photocell on every wireless radio that averages the light levels of up to 5 controllers for an accurate reading and optimal light harvesting activity.
- Reports ambient light readings to 1500 Fc.

2. Motion Response

- Detects motion through passive infrared sensing technology with three different lens configurations.
- Motion sensor coverage can be adjusted from a narrow to a wide detection range, which helps reduce false triggers to further increase energy savings.
- Sensing profiles can be updated to adapt to activity levels in the environment, such as occupancy level, wind, and mounting height.

3. Wireless Radio

- 1.8 Watts max (no load draw)
- Operating voltage 120-277 VAC RMS
- Communicates using the ZigBee protocol
- Carries out dimming commands from Gateway
- Reports ambient light readings to 1500 Ft-Cd
- Transmission Systems Operating within the band 2400-2483.5Mhz
- RoHS Compliant

Site & Area

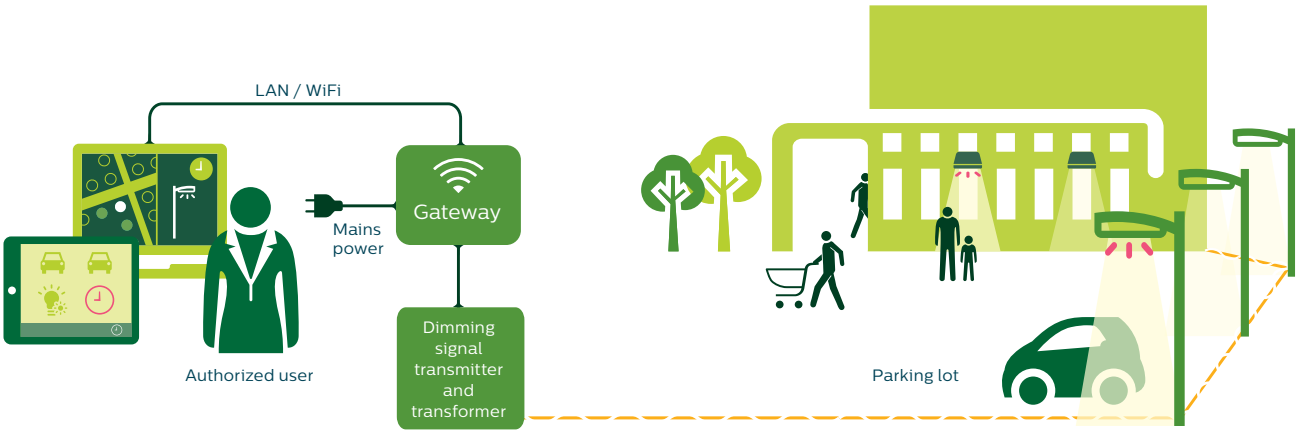
SiteWise system

SiteWise is a complete area lighting management system including a luminaire integrated controller, dimming signal transmitter cabinet, and locally accessible user interface. Installation and commissioning are simple. The cabinet communicates with the Philips luminaires using a patented central dimming technology. The control signal is embedded on the existing electrical line – no new cabling is required. An intuitive, locally accessible interface makes it easy for authorized users to set schedules in order to meet site specific lighting needs, local regulations, and energy codes.

SiteWise system diagram



SiteWise system interface

SiteWise has an intuitive user interface that makes it easy to plan, edit, and implement lighting schedules for your site. Authorized users can access the interface via a local app.

To ensure that only authorized users can access your lighting, SiteWise offers two user types, each with different permissions. An advanced user, or administrator, can set and edit schedules using the ten pre-set scenes, assign those schedules to calendar days, and check system status.

For everyday use, a basic user can manually override a schedule that is currently running but cannot create or edit schedules.

SiteWise system specifications

The SiteWise system includes both luminaires and controls. The controls used for SiteWise are circuit load dependent. Required for a complete installation are the following Philips SiteWise components: user interface, control kit, dimming signal transmitter cabinet, and dimming signal receiver located in the Philips luminaire (**SW** option). Optional luminaire-integrated or external motion sensors may also be specified as required. Within the electrical closet, the control kit and dimming signal transmitter cabinet are installed into the electrical system between the existing breaker panel and the site luminaires. New LED luminaires containing the dimming signal receiver are installed on the site. Once completed, use of the interface allows for scheduling and override capabilities. Wireless access point and tablet should be supplied by others. Complete information on the control system can be found on the SiteWise website at **philips.com/sitewise**

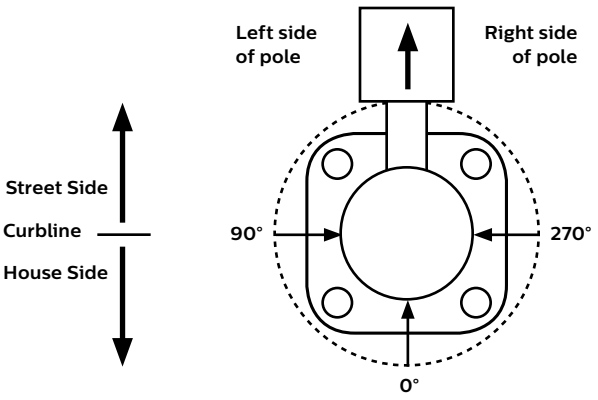
ECF-S EcoForm small

Site & Area

Optical Orientation Information

Standard Optic Position

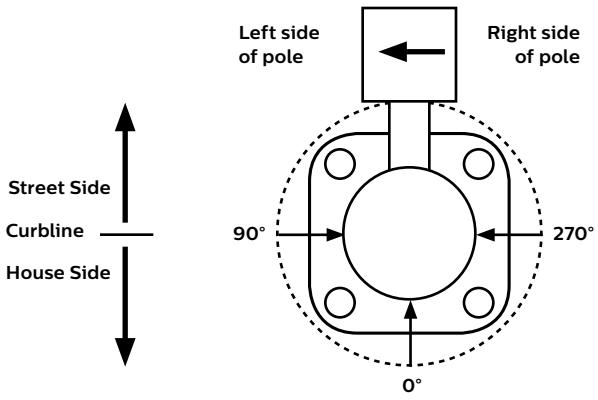
Luminaires ordered with asymmetric optical systems in the standard optic position will have the optical system oriented as shown below:



Note: The hand hole will normally be located on the pole at the 0° point.

Optic Rotated Left (90°) Optic Position

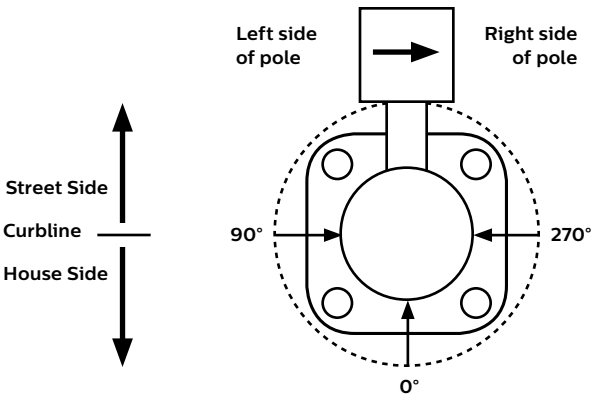
Luminaires ordered with optical systems in the Optic Rotated Left (90°) optic position will have the optical system oriented as shown below (Type 5 and 5W optics are not available with factory set rotatable optics):



Note: The hand hole will normally be located on the pole at the 0° point.

Optic Rotated Right (270°) Optic Position

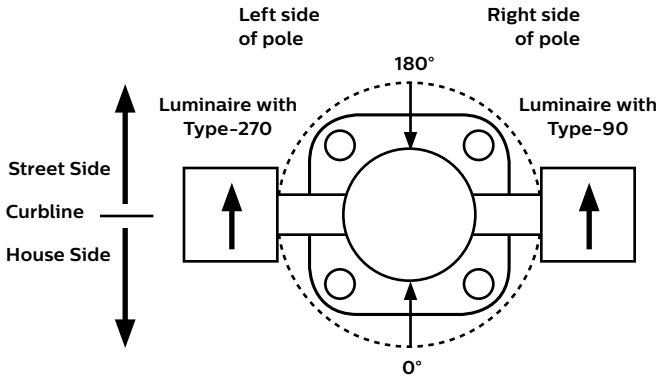
Luminaires ordered with optical systems in the Optic Rotated Right (270°) optic position will have the optical system oriented as shown below (Type 5 and 5W optics are not available with factory set rotatable optics):



Note: The hand hole will normally be located on the pole at the 0° point.

Twin Luminaire Assemblies with Type-90/Type-270 Rotated Optical Systems

Twin luminaire assemblies installed with rotated optical systems are an excellent way to direct light toward the interior of the site (Street Side) without additional equipment. It is important, however, that care be exercised to insure that luminaires are installed in the proper location.



Luminaires with Optic Rotated Right (270°) are installed on the LEFT Side of Pole

Luminaires with Optic Rotated Left (90°) are installed on the RIGHT Side of Pole

Note: The hand hole location will depend on the drilling configuration ordered for the pole.

ECF-S EcoForm small

Site & Area

Specifications

Housing

One piece die cast aluminum housing with integral arm and separate,self retained hinged, one piece die cast door frame.

IP Rating

LED light engine rated IP66. Driver compartment rated to IP65.

Vibration resistance

EcoForm with Standard Arm carries a 3G vibration rating that conforms to standards set forth by ANSI C136.31. Testing includes vibration to 3G acceleration in three axes, all performed on the same luminaire.

Electrical

Driver efficiency (>90% standard). 120-480V available (restrictions apply). Open/short circuit protection. Optional 0-10V dimming to 10% power. RoHS compliant. Surge protector standard. 10KA per ANSI/IEEE C62.41.2.

LED Board and Array

32, 48, or 64 LEDs. Color temperatures: 3000K +/- 125K, 4000K, 5000K +/- 200K. Minimum CRI of 70. Aluminum metal clad board. RoHS compliant.

LED Thermal management

The housing design allows the one piece housing to provide excellent thermal management critical to long LED system life.

Energy saving benefits

System efficacy up to 133lms/W with significant energy savings over Pulse Start Metal Halide luminaires. Optional control options provide added energy savings during unoccupied periods.

SiteWise network system

SiteWise system includes a controller fully integrated in the luminaire that enables the luminaires to communicate with a dimming signal transmitter cabinet located on site using Philips patented central dimming technology. A locally accessible mobile app allows users to access the system and set functionalities such as ON/OFF, dimming levels and scheduling. SiteWise is available with motion response options in order to bring the light back to 100% when motion is detected. Additional functionalities are available such as communication with indoor lighting and connection to BMS systems.

Wireless system

EcoForm luminaires are available with optional wireless controllers ready to be connected to a Limelight system (sold by other). The system allows you to wirelessly manage the entire site, independent lighting groups or individual luminaires while on-site or remotely. Based on a high density mesh network with an easy to use web-based portal, you can conveniently access, monitor and manage your lighting network remotely. Wireless controls can be combined with site and area, pedestrian, and parking garage luminaires as well, for a completely connected outdoor solution.

Optical systems

Type 2, 3, 4, 5, 5W, and AFR distributions available. Internal Shield option mounts to LED optics and is available with Type 2, 3, 4, and AFR distributions to control backlight.

Types 2, 3, 4, and AFR, when specified and used as rotated, are factory set only.

Mounting

Standard luminaire arm mounts to 4" round poles. Square pole adapter included with every luminaire. Round Pole Adapter (RPA) required for 3-3.9" poles.

Retrofit Arm Mount

EcoForm features an innovative retrofit arm kit. When specified with the retrofit arm (RAM) option, EcoForm seamlessly simplifies site conversions to LED by eliminating the need for additional pole drilling on most existing poles. RAM will be boxed separately.

Listings

UL/cUL listed to the UL 1598 standard, suitable for Wet Locations. Suitable for use in ambients from -40° to 40°C (-40° to 104°F). The quality systems of this facility have been registered by UL to the ISO 9001 series standards. Most EcoForm configurations are DesignLights Consortium® qualified. Consult DLC Qualified Products list for more details.

Finish

Each standard color luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) textured polyester powdercoat finish. Standard colors include bronze (BZ), black (BK), white (WH), dark gray (DGY), and medium gray (MGY). Consult factory for specs on optional or custom colors.

Warranty

EcoForm luminaires feature a 5 year limited warranty. Philips Gardco LED luminaires with LED arrays feature a 5 year limited warranty covering the LED arrays. LED Drivers also carry a 5 year limited warranty. Motion sensors are covered by warranty for 5 years by the motion sensor manufacturer.
See **philips.com/luminaires** for complete details and exclusions.

Invue

DESCRIPTION

The Arbor Bollard from Invue brings architectural style to the pedestrian level. The Arbor Bollard can be used along with Arbor post top luminaires to provide a coordinated look sure to enhance any architectural setting. WaveStream™ LED optics present a pixilation free image replacing visible glare, while providing high levels of pavement illumination.

Catalog #	ABB-B2-LED-42-D1-S-DP	**Type**
Project		
Comments		**Date**
Prepared by	Kathleen Kenny National Accounts, PH: 678-447-5208 kathleen.kenny@cooperlighting.com	

SPECIFICATION FEATURES

Construction
Top Housing: Low copper, cast aluminum top maintains strength and precision while providing for: rapid heat dissipation, vandal resistance and superior dayform. Lower Housing: Heavy 0.188" wall seamless extruded aluminum 4" O.D. shaft attaches to base via stainless steel fasteners. BASE: Rugged corrosion resistant extruded aluminum base mounts to foundation with three anchor bolts. Base features a pliable 1/2" thick neoprene leveling pad fitted to the bottom of base allows for sealing against water and dirt ingress regardless of minor deviations in grade of concrete pad.

Optics
General purpose symmetric distribution is available using WaveStream LED optical technology. The optical waveguide is manufactured using precision injection molded acrylic for the ultimate level of glare control and visual comfort. Offered standard in 4000K (+/- 275K) CCT, optional 3000K minimum 80 CRI.

Electrical
LED driver(s) are mounted to electrical tray for easy installation and maintenance for 120-277V 50/60Hz, 347V 60Hz or 480V 60Hz operation. Offered standard with 0-10V dimming driver and Cooper Lighting Solutions' proprietary circuit module designed to withstand 10kV of transient line surge. Luminaire is suitable for ambient temperature applications from -30°C (-22°F) to 40°C (104°F) and IP66 rated against the ingress of dust and water.

Controls
The Arbor Bollard options are designed to be simple and cost-effective ASHRAE and California Title 24 compliant solutions. An integrated dimming and occupancy sensor is a standalone control option available in on/off (MSP) and bi-level dimming (MSP/DIM) operation. An optional handheld remote (ISHH) allows custom programming to suit all needs.

Mounting
Luminaire is mounted to 3 x 1/2" anchor bolts on a 2-3/8" bolt circle to with stand a 600 pound overturn moment. Order anchor bolts and installation template separately (ABAnchor).

Finish
Cooper Lighting Solutions utilizes premium ultra-weatherable TGIC based polyester powder coatings that are specifically formulated to withstand extended outdoor exposure. The powders are formulated exclusively for Cooper Lighting Solutions to serve functionally as well as decorative. Good film appearance combinded with excellent mechanical an exterior exposure qualities display greater than twice as much gloss retention. RAL and custom color matches available. Finish is compliant with ASTM B117 3000hr salt spray standard.

Warranty
Five-year warranty.

Values from photometric tests performed in accordance with IESNA LM-79 and are representative of the configurations shown. Actual performance may vary due to installation and environmental variables, LED and driver tolerances, and field measurement considerations. It is highly recommended to confirm performance with a photometric layout.

NOTE: Some data may be scaled based on tests of similar (but not identical) luminaires. Contact factory for configurations not shown.

For emergency EBP option, publish values are based on initial lumens.

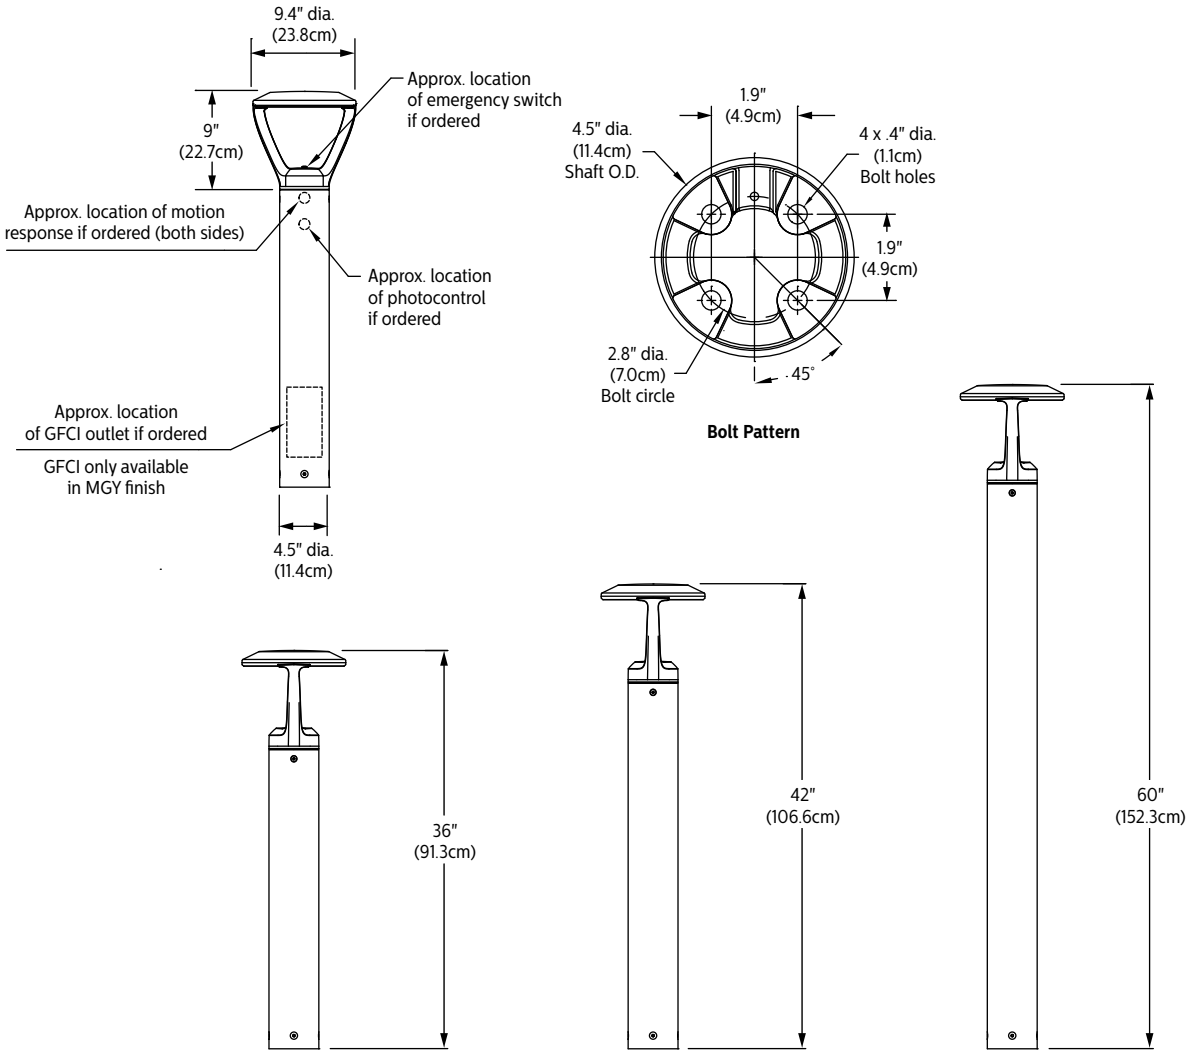
Predicted Lumen Depreciation Data

Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions.L_{70} is the predicted time when LED performance depreciates to 70% of initial lumen output. Calculated per IESNA TM21-11. Published L_{70} hours limited to 6 times actual LED test hours

Ambient Temperature °C	Driver mA	Calculated L_{70} Hours	L_{70} per TM-21	Lumen Maintenance % at 60,000 hrs
25°C	up to 1050mA	>100,000 hours	>60,000 hours	>95%

PBL PureForm LED bollard

Dimensions



PBL PureForm LED bollard

Specifications

Housing

Main body housing and yoke made of low copper cast aluminum alloy for a high resistance to corrosion. Luminaire shaft features a cylindrical extruded aluminum base housing. Bottom section has a casted ring for ease of assembly. It attaches to base assembly with four (4) hex head set screws. Most electrical components are integrated in the shaft of the bollard by design. This allows for the sleek profile, giving the freedom to have a clean minimalist aesthetic design with minimum obstruction to optical performance. Luminaire housing rated to IP65, tested in accordance to Section 9 of IEC 60598-1.

Light engine

Light engine comprises of a 14-LED module made out of aluminum metal clad board fully sealed with optics. Module is RoHS compliant. Color temperatures: 3000K +/- 125K, 4000K, 5000K +/- 200K. Minimum CRI of 70. LED light engine is rated IP66 in accordance to IEC 60598.

Energy saving benefits

System efficacy up to 100 lms/W with significant energy savings over Pulse Start Metal Halide luminaires. Optional control options provide added energy savings during unoccupied periods.

Optical systems

Type 3 and 5 distributions available. Performance tested per LM-79 and TM-15 certifying its photometric performance. Luminaire designed with 0% uplight (U0 per IESNA TM-15).

Mounting

Base assembly consists of a cast aluminum platform. Assembly is secured and leveled to the mounting foundation with four (4) 3/8" X 8" x 1 1/2" (.953 cm x 20.32 cm x 3.81 cm)-16 anchor bolts on a 2 3/4" (6.9 cm) bolt circle.

Control options

0-10V dimming (DD): Access to 0-10V dimming leads supplied through base of luminaire (for secondary dimming controls by others). Cannot be used with other control options.

Field Adjustable Wattage Selector (FAWS): Luminaire equipped with the ability to manually adjust the wattage in the field to reduce total luminaire lumen output and light levels. Comes pre-set to the highest position at the lumen output selected. Use chart below to estimate reduction in lumen output desired. Cannot be used with other control options or motion response.

FAWS Position	Percent of Typical Lumen Output
1	25%
2	50%
3	55%
4	65%
5	75%
6	80%
7	85%
8	90%
9	95%
10	100%

Note: Typical value accuracy +/- 5%

Automatic Profile Dimming (CS/CM): Standard dimming profiles provide flexibility towards energy savings goals while optimizing light levels during specific dark hours. Dimming profiles include two dimming settings including dim to 30% or 50% of the total lumen output. When used in combination with not programmed motion response it overrides the controller's schedule when motion is detected. After 5 minutes with no motion, it will return to the automatic dimming profile schedule.

Automatic dimming profile scheduled with the following settings:

- CS50/CS30: Security for 7 hours night duration (Ex., 11 PM - 6 AM)
- CM50/CM30: Median for 8 hours night duration (Ex., 10 PM - 6 AM)

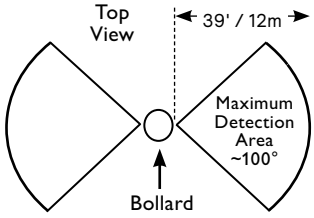
All above profiles are calculated from mid point of the night. Dimming is set for 6 hours after the mid point and 2, or 3 hours before depending of the duration of dimming. Cannot be used with other dimming control options.

Wireless system (LLC): Optional wireless controller integral to luminaire ready to be connected to a Limelight system (sold by others). The system allows you to wirelessly manage the entire site, independent lighting groups or individual luminaires while on-site or remotely. Based on a high-density mesh network with an easy to use web-based portal, you can conveniently access, monitor and manage your lighting network remotely. Wireless controls can be combined with site and area, pedestrian, and parking garage luminaires as well, for a completely connected outdoor solution. Motion response capability can be installed in other luminaires in the mesh or on a remote pod accessory where pod is mounted to pole or wall.

Emergency Battery Pack (EBP): Emergency battery packs included integral to the luminaire, allowing for no field installation of remote emergency equipment. EBP is suitable for use in ambient temperature conditions from 0°C (-32°F) to 40°C (100°F) available on 450mA and up. The system is designed to have a secondary driver with relay to immediately detect AC power loss to power luminaire for a minimum of 90 minutes from the time power is lost. Available with 120-277V, or 'UNV' only.

Motion response options

Infrared Motion Response Integral (BL-IMRI): Motion Response module is mounted integral to luminaire factory pre-programmed to 20% dimming when not ordered with other control options. BL-IMRI is set/operates in the following fashion: When motion is not detected for a 5 -minute period, luminaires automatically dim to 20% power and light, gradually over a 2 -minute period. Once Motion is detected, luminaires immediately ramp to full power and light output until motion is not detected for a 5-minute period.



Electrical

Driver: Driver efficiency (>90% standard). 120-277V available. Bollards with 347V or 480V input require and include a step-down transformer (placed within the bollard shaft) to provide proper input voltage to the LED power supply. Open/short circuit protection. Optional 0-10V dimming to 10% power. RoHS compliant.

Surge protection: Each luminaire is provided as standard with surge protector tested in accordance with ANSI/IEEE C62.45 per ANSI/IEEE C62.41.2 Scenario I Category C High Exposure 10kV/5kA waveforms for Line Ground, Line Neutral and Neutral Ground, and in accordance with U.S. DOE (Department of Energy) MSSLC (Municipal Solid-State Street Lighting Consortium) Model Specification for LED Roadway Luminaires Appendix D Electrical Immunity High Test Level 10kV / 5kA. Optional 20kV is available for additional protection.

Ground Fault Interrupt Outlet (GFCI): Optional Class A Rated White 15-Amp GFCI (Ground Fault Circuit Interrupter) Duplex Outlet provides electrical shock protection and prevents the risk of electrical fire caused by ground fault current. GFCI only available in MGY finish.

PBL PureForm LED bollard

Specifications (cont'd)

Listings

UL 1598 standard, suitable for Wet Locations. Suitable for use in ambients from -40° to 40°C (-40° to 104°F). The quality systems of this facility have been registered by UL to the ISO 9001 series standards. Most PureForm PBL configurations are DesignLights Consortium® qualified. Consult DLC Qualified Products list for more details. CCTs 3000K and warmer are Dark Sky Approved.

Finish

Each standard color luminaire receives a fade and abrasion resistant, electrostatically applied, thermally cured, triglycidal isocyanurate (TGIC) textured polyester powdercoat finish. The surface treatment achieves a minimum of 1000 hours for salt spray resistant finish in accordance with testing performed and per ASTM B117 standard. Standard colors include bronze (BZ), black (BK), white (WH), dark gray (DGY), and medium gray (MGY). Consult factory for specs on optional or custom colors.

Warranty

PureForm luminaires feature a 5-year limited warranty.
See signify.com/warranties for complete details and exclusions.

Buy American Act of 1933 (BAA):

This product is manufactured in one of our US factories and, as of the date of this document, this product was considered a commercially available off-the-shelf (COTS) item meeting the requirements of the BAA. This BAA designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies. Prior to ordering, please visit www.signify.com/baa to view a current list of BAA-compliant products to confirm this product's current compliance.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Exterior Light Fixture
Item Type	Exterior Pole Light Fixture
Description	"UrbanScape" Round Post top luminaire
Manufacturer	Signify/Lumec
Model	MPTC-16W16LED4K-T-LE5- 120-PH8-BRTX
Dimensions	35" H x 17.75" Dia
Color	Bronze
CSI #	265600 - Exterior Lighting
Omniclass #	22-265600 - Exterior Lighting
Dimming Type	0-10V
Mount	Post Top
On Dimming System	No
Lens/Shade	Clear Tempered Glass
Fixture Input (Max. Watts)	20
Lamp Type	LED
Lamp Kelvin	4000
Voltage	120/277
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1691
Finish	Bronze
Lamp CRI	70
Lead Time	In stock or 4 weeks lead time
Warranty	Five year limited warranty
Notes	Efficacy: Lamp Life/Fixture Life: 100,000 hrs

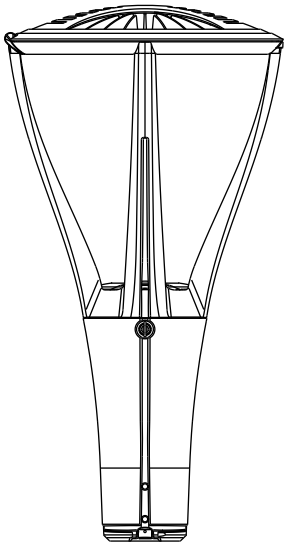
URBANSCAPE LED POST-TOP URBAN LUMINAIRE



PHILIPS LUMEC URBANSCAPE LED POST-TOP URBAN LUMINAIRE

The Philips Lumec UrbanScape LED post-top luminaire features flexible, robust energy-saving solutions for modern-styled urban architectural lighting. With its slightly rounded hood, the post-top model comes with a flat lens to highlight the thinness of the LEDs. The luminaire provides attractive lighting at night, adding appeal to the surroundings and promoting safe use of the environment.

1. Luminaire is always shipped with a dimmable 0-10V driver *(except for 35W32LED4K).*
2. 347V and 480V not available.
3. Not available with HS option.
4. Not available with driver options.
5. Use of photoelectric cell or shorting cap is required to ensure proper illumination.
6. Not available with Motion Response.
7. Luminaire option RCD is required with this accessory.
8. CDMG, CDMGP and DALI are not available with SPC and SPCD.

Specifications

Cage:

In a round shape with 4 arms and a built-in mechanical ring, this cage is a one piece die cast A360 Aluminum alloy 0.100 (2.5mm) minimum thickness, mechanically assembled to the fitter.

Fitter:

Made of die cast A360.1 Aluminum alloy 0.100 (2.5mm) minimum thickness, the fitter is complete with a watertight access door giving access to the driver rated IP66, and a terminal block that accepts (#2 max.) wires from the primary circuit. Comes with an easy self adjusting system with two (2) set screws 3/8 16 UNC for ease of maintenance and installation. Fits on a 4" (102mm) outside diameter by 4" (102mm) long tenon.

Specifications (continued)

Finial:

Decorative cast 356 aluminum, mechanically assembled.

Hood:

Made of die cast A360.1 Aluminum alloy 0.100 (2.5mm) minimum thickness, mechanically assembled to the cast aluminum heat sink.

Access-Mechanism:

A die cast A360.1 Aluminum alloy 0.100 (2.5mm) minimum thickness technical ring with latch and hinge.

Light Engine:

LEDgine is composed of 4 main components: LED lamp / Optical System / Heat Sink / Driver Electrical components are RoHS compliant.

LEx Lens

Flat Lens: Made of soda lime clear tempered glass, mechanically assembled and sealed onto the ring of the access mechanism.

LED Module

LED type Philips Lumileds LUXEON T. Composed of high performance white LEDs. Color temperature of 4000 Kelvin nominal, 70 CRI. Operating lifespan 100,000 hours (see chart for specific lifetime based on mA) based on TM 21 extrapolation to get results after which 50% of LEDs still emits over 70% (L70) of its original lumen output. Use of metal core board ensures greater heat transfer and longer lifespan of the light engine.

Optical System:

Composed of high performance optical polymer refractor lenses to achieve desired distribution optimized to get maximum spacing, target lumens and a superior lighting uniformity. System is rated IP66. Performance shall be tested per LM 63, LM 79 and TM 15 (IESNA) certifying its photometric performance. Street side indicated. Dark Sky compliant with 0% uplight and U0 per IESNA TM 15.

Heat Sink:

Made of cast aluminum optimizing the LEDs efficiency and life. Product does not use any cooling device with moving parts (only passive cooling device).

Driver:

High power factor of 95%. Electronic driver, operating range 50/60 Hz. Auto adjusting universal voltage input from 120 to 277 and 347 to 480 VAC rated for both application line to line or line to neutral, Class I, THD of 20% max. Maximum ambient operating temperature from 40F (40C) to 130F (55C) degrees. Certified in compliance to UL1310 cULus requirement. Dry and damp location. Assembled on a unitized removable tray with Tyco quick disconnect plug resisting to 221F(105C) degrees. Dimmable driver 0-10V.

The current supplying the LEDs will be reduced by the driver if the driver experiences internal overheating as a protection to the LEDs and the electrical components. Output is protected from short circuits, voltage overload and current overload. Automatic recovery after correction. Standard built in driver surge protection of 2.5kV (min).

Surge Protector:

Surge protector tested in accordance with ANSI/IEEE C62.45 per ANSI/IEEE C62.41.2 Scenario I Category C High Exposure 10kV/10kA waveforms for Line Ground, Line Neutral and Neutral Ground, and in accordance with U.S. DOE (Department of Energy) MSSLC (Municipal Solid State Street Lighting Consortium) model specification for LED roadway luminaires electrical immunity requirements for High Test Level 10kV / 10kA.

CLO: Pre-set driver to manage the lumen depreciation by adjusting the power given to the LEDs offering the same lighting intensity during the entire lifespan of the LED module.

AST: Pre-set driver for progressive start-up of the LED module(s) to optimize energy management and enhance visual comfort at start-up.

OTL: Pre-set driver to signal end of life of the LED module(s) for better fixture management.

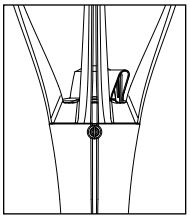
DALI: Pre-set driver compatible with the DALI control system.

Luminaire Options

HS: House Side Shield

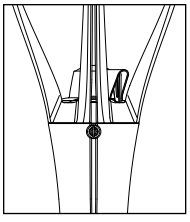
OVR: Dynadimmer override function

PH8: Photoelectric cell, Twist-lock Type complete with receptacle and a decorative cap made of polycarbonate with a plastic lens. Allows a 90 degree rotation. Color of cap is grey.



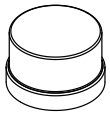
PH8 installed on luminaire

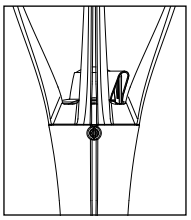
PH8XL: Extended life photoelectric cell, Twist-lock Type complete with receptacle and a decorative cap made of polycarbonate with a plastic lens. Allows a 90 degree rotation. Color of cap is grey.



PH8XL installed on luminaire

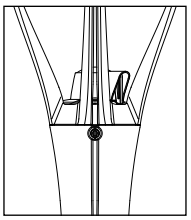
PH9: Shorting cap, Twist-lock Type complete with receptacle.





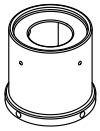
PH9 installed on luminaire

RCD: Receptacle with 5 pins allowing dimming, can be used with a twist-lock Starsense, photoelectric cell or a shorting cap.

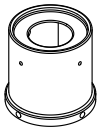


RCD installed on luminaire

TN3: Fitter to fit over a 3" (76 mm) O.D. by 4" (102 mm) long tenon



TN3.5: Fitter to fit over a 3 1/2" (89 mm) O.D. by 4" (102 mm) long tenon

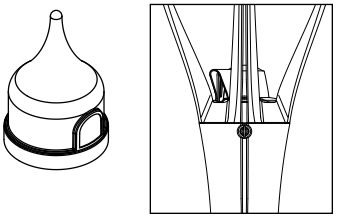


Specifications (continued)

Luminaire Accessories:

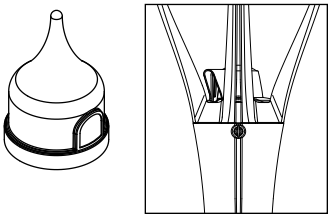
Connected Lighting

SPC: Starsense telemanagement system for monitoring, controlling, metering and diagnosing outdoor lighting networks. Starsense is based on two-way wireless communication using the latest in mesh network technology. This option gives ON/OFF control of the luminaires but does not support dimming. Complete with a decorative cap made of polycarbonate with a plastic lens. Allows a 90 degree rotation. Color of cap is grey.



SPC installed on luminaire

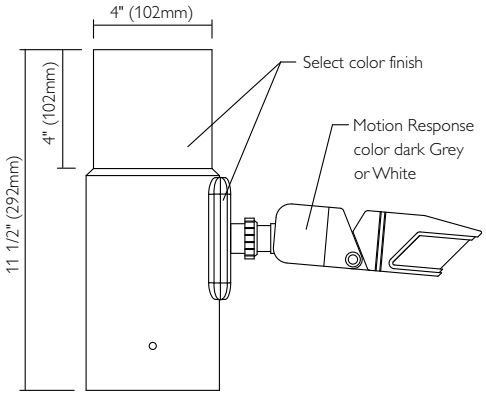
SPCD: Starsense telemanagement system for monitoring, controlling, metering and diagnosing outdoor lighting networks. Starsense is based on two-way wireless communication using the latest in mesh network technology. This option gives ON/OFF and full dimming control of the luminaires. Complete with a decorative cap made of polycarbonate with a plastic lens. Allows a 90 degree rotation. Color of cap is grey.



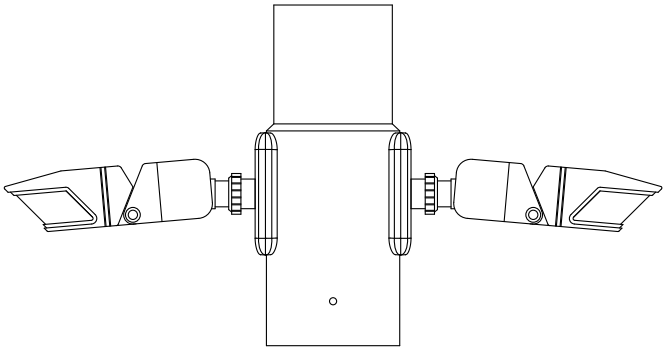
SPCD installed on luminaire

Motion Response

Tenon mount motion response provides 270° coverage on an adjustable knuckle. The coverage equals to up to 6 times the sensor height. It is an option offered jointly with the Dynadimmer OVR option, that can bring the light up to 100% when the motion response is triggered. It is available in a single or double mounting option. Finish options for the motion response device are white or dark gray. Finish options for the tenon must be specified to match the luminaire and pole. The tenon mount is fully rotatable 360°. This option is available for a 4" OD x 4" long tenon. See instruction sheet for time setting functionality (12 second to 16 minute turn off options) and for mounting instructions.



MR4PG1 or MR4PW1



MR4PG2 or MR4PW2

Specifications (continued)

Finish:

Color to be in accordance with the AAMA 2603 standard. Application of polyester powder coat paint (4 mils/100 microns) with ± 1 mils/24 microns of tolerance. The Thermosetting resins provides a discoloration resistant finish in accordance with the ASTM D2244 standard, as well as luster retention in keeping with the ASTM D523 standard and humidity proof in accordance with the ASTM D2247 standard.

The surface treatment achieves a minimum of 2000 hours for salt spray resistant finish in accordance with testing performed and per ASTM B117 standard.

LED products manufacturing standard

The electronic components sensitive to electrostatic discharge (ESD) such as light emitting diodes (LEDs) are assembled in compliance with IEC61340 5 1 and ANSI/ESD S20.20 standards so as to eliminate ESD events that could decrease the useful life of the product.

Quality Control:

Manufactured to ISO 9001 2008 and ISO 14001 2004 International Quality Standards Certification.

Vibration Resistance:

Meets the ANSI C136.31, American National Standard for Roadway Luminaire Vibration specifications for Bridge/overpass applications. (Tested for 3G over 100 000 cycles by an independent lab)

Certifications and Compliance:

CSA, cULus Listed for Canada and USA.
UrbanScape is on the DesignLights Consortium (DLC) Qualified Products List (QPL).

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Exterior Light Fixture
Item Type	Exterior Pole for Light Fixture
Description	One-piece, seamless 4” round (102 mm) tube of extruded aluminum welded to both the top and bottom of a cast-aluminum anchor plate.
Manufacturer	Signify/Lumec
Model	APR4U-8-BRTX-LBC4C
Dimensions	8'H x 4" Dia
Color	Bronze
CSI #	265600 - Exterior Lighting
Omniclass #	22-265600 - Exterior Lighting
Finish	Bronze
Lead Time	In stock or 4 weeks lead time
Warranty	Five year limited warranty

IMAGE NOT AVAILABLE

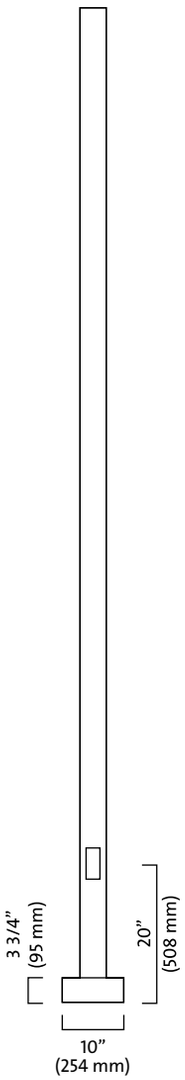
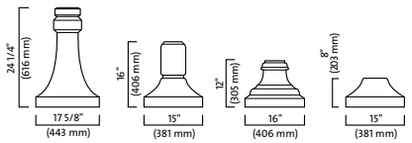
APR4 > ROUND ALUMINUM POLE

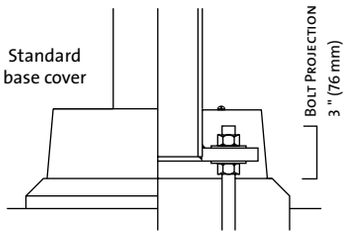


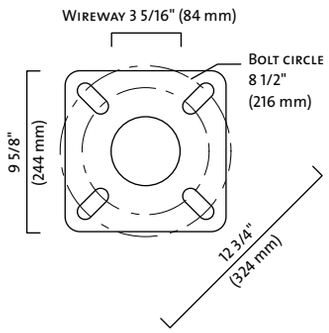
Optional base covers



LBC1 LBC2 LBC3 LBC4C

Base details





Comes with 4 anchor bolts,
8 nuts and 8 washers.
B.C. from: 6 3/4" to 10" (171 to 254 mm)

Specifications:

Pole: made from a one-piece, seamless 4" round (102 mm) tube of extruded aluminum welded to both the top and bottom of a cast-aluminum anchor plate.
A 2" by 4 1/2" (51 by 114 mm) maintenance opening is complete with cover and copper ground lug.
Base cover: square base cover made from two pieces of formed aluminum mechanically fastened to the base with stainless steel hardware.
Finish: See page 142 for Finish details.
Options:

DE:	Pole buried 5' (1524 mm) in the ground (see page 133)
LS:	Provision for loudspeaker outlet (see page 132)
PH7:	Button-type photoelectric cell (specify operating voltage)
PH8:	Quarter-turn type photoelectric cell (specify operating voltage)
DR:	Duplex receptacle (120V line voltage. only)
GFI:	DR with common ground fault interrupter (120V line voltage only)
HB:	Hinged base (16.0 ft./4.8 m max.)
BA:	Banner arm (see page 136)
PS:	Plant support (see page 137)
MPL:	Mid-pole luminaire
	Two-piece round decorative base covers:
LBC1:	Cast-aluminum
LBC2:	Cast-aluminum
LBC3:	Cast-aluminum
LBC4C:	Cast-aluminum

Note: The recommended method for calculating EPA (Effective Projected Area) is in accordance with AASHTO 2001 standards: for three seconds, the pole is tested in wind gusts equivalent to the strongest winds on record over the past 50 years, and with a 50 pound load (22.7 kg) placed at 1 foot (305 mm) above its center.

Revision Date: Nov 23, 2022

Item Name	Swimming pool - Site-constructed, Shotcrete
Item Type	Shotcrete swimming pool
Description	Shotcrete swimming pool with pressure filter system, flow meters, water treatment system, heaters, recirculating pumps, motors, piping, deck drainage system, piping, fittings, lights, accessories, and finishes.
Manufacturer	Paragon Aquatics
Model	Paragon Aquatics
Dimensions	Refer to the Design Guideline Drawings
Finish	Tile and plaster finish
Material Composition	Shotcrete
CSI #	033713 Shotcrete
Omniclass #	22-033713 Shotcrete
Quality Standards	National Sanitary Foundation/American National Standards Institute (NSF/ANSI) Standard 50 - Circulation System Components and Related Materials for Swimming Pools, Spas/Hot TubsNSF/ANSI 50. NSF Approval Rating. Tested to ANSI/NSPI 1; certified by IAPMO.
Accessibility Compliance	ADA and ANSI A117.1
Accessories	Pool depth markings; No Diving sign tile, grab rail, deck plate, escutcheon, and ladder
Warranty	1 year

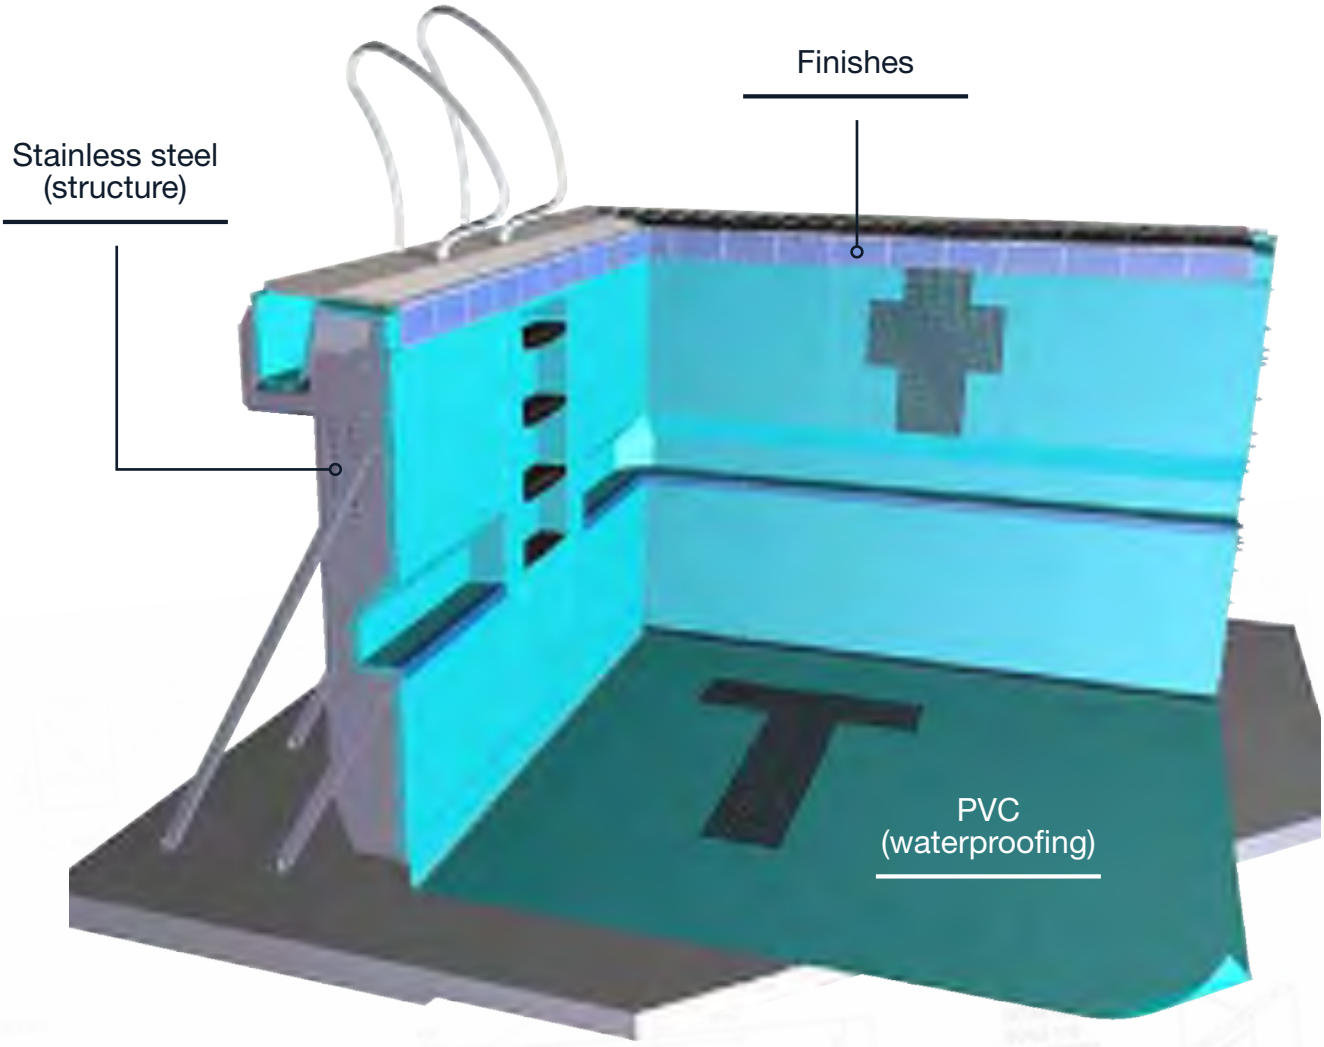
· Temporary pools 46

Smart use **of materials**

Myrtha is the most exclusive and advanced technology in the swimming pool industry. It's patented pre-engineered modular system, based on the use of laminated stainless steel panels and buttress system, enables a Myrtha structure to attain perfect waterproofing. Myrtha Technology provides the ideal solution to the many limitations of traditional reinforced concrete structures and ordinary prefabricated swimming pools.

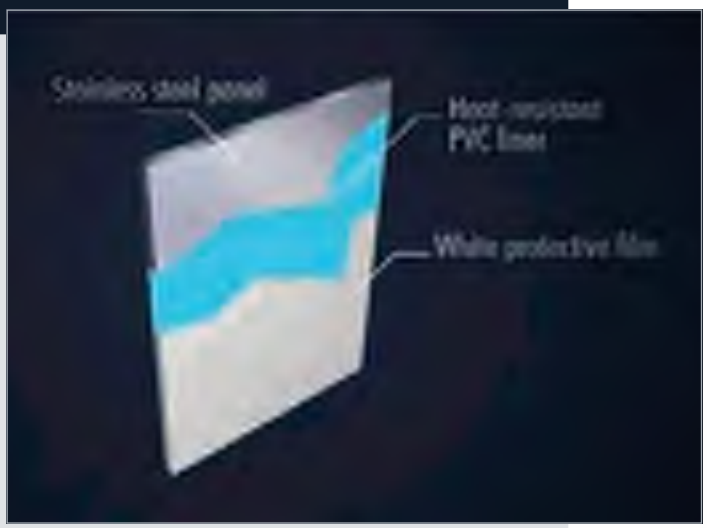


Stainless steel - structure

High quality stainless steel used in a Myrtha pool guarantees extremely long life to the structure regardless of the presence of highly aggressive soils or high water-tables. Myrtha uses exclusively-engineered components bolted together, thereby eliminating the need for welding, which is subject to increased corrosion. The use of stainless steel materials ensures maximum mechanical strength of the panels, buttresses and the other components that form the structure of the swimming pool.

PVC - waterproofing

Perfect waterproofing is ensured by the unique process of bonding PVC to the Myrtha steel panels. A hard PVC membrane is hot-laminated to the steel in the manufacturing process. A reinforced PVC membrane is used on the floor of the pool in order to follow the contours of the concrete sub-surface.

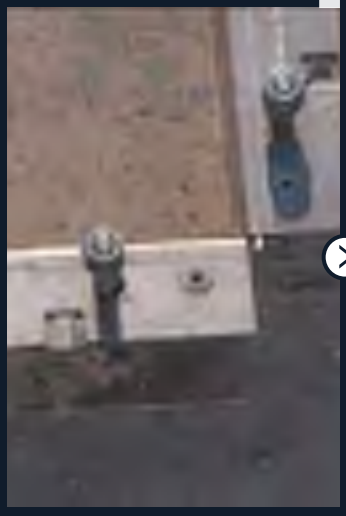


Finishes

For high level aestheric finishes, Myrtha technology uses a wide range of exclusive materials that match with the colours of the PVC.
Myrtha allows the use of special stone and marble finishes to ensure more elegance at the pool project.
This combination of materials and colors allow the client to personalize each and every swimming pool according to their specific needs.

Key components

1



The base frame

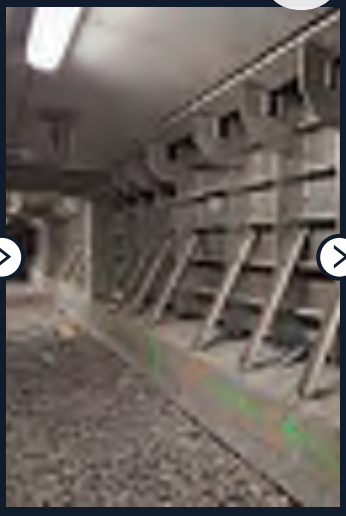
The base frame that outlines the swimming pool is constructed of bolted steel sections that form the supporting structure for the Myrtha wall panels. It is mechanically connected firmly to the concrete footing by the use of chemical anchors. Rigidity is obtained by the use of numerous threaded bars (anchor bolts) which are anchored in the perimeter curb. The threaded anchor bolts also provide micrometric adjustment so that perfect leveling of the structure is achieved.

2

The wall structure

The pool walls are formed by the use of sturdy, prefabricated stainless steel pools panels. They are factory laminated with a permanently welded layer of hard PVC, and are then bolted to the base frame and to each other. Similar to the aviation industry, the use of actual steel welding is avoided, thus there are no potential corrosion points in a Myrtha structure. The exclusive use of stainless steel for the structural components and PVC for waterproofing means that there is minimal risk of corrosion with a high probability of leak-free construction.

3



The support buttresses

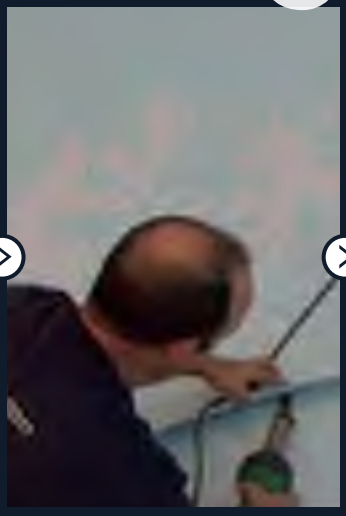
At vertical panel joint (3 feet), sturdy steel buttresses provide rigidity and strength to the structure. Each buttress is anchored to the concrete footing. The structure is both sturdy and elastic and is therefore ideal for installations with difficult ground conditions (e.g. seismic zones, or on unstable soils).

4

The overflow gutter

The Myrtha overflow gutter is made with the same material that is used for the wall panels and comes in a wide range of standard configurations. The gutter can be supplied with a design (“diagonal flow”) which limits the evaporation of chemicals and reduces the noise of the falling water. The patented Myrtha gutter grating has been designed to meet the strictest anti-slip and load requirements and the gutter dropouts can be supplied with silencers which virtually eliminate noise.

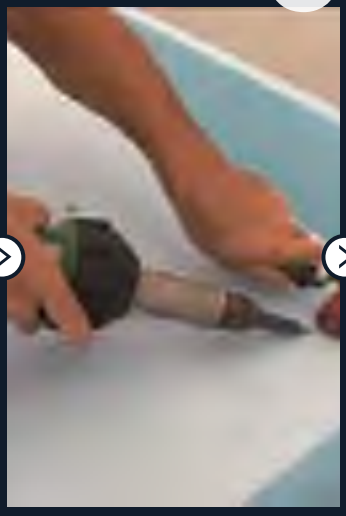
5



Floor reinforced membrane

The standard floor of a Myrtha pool is formed using a concrete slab, which needs only to provide a smooth support surface.
The slab is waterproofed by a reinforced PVC membrane, produced specifically for use with swimming pools and protected with a surface lacquering. Myrtha pools can be built without concrete as the sturdiness of the stainless steel structure is assured through the engineered footings. A special matting has been developed by Myrtha Pools to attain a smooth support surface for the membrane, whilst at the same time allowing subsurface drainage. In any type of Myrtha pool, this floor can be supplied with a user-friendly “Softwalk” floor.

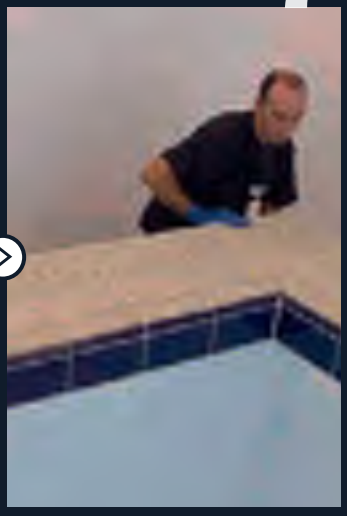
6



Fittings

In order to allow for better waterproofing all joints between the Myrtha sections are welded with a liquid PVC or a reinforced PVC tape. The result joint is extremely resistant, optically uniform to the panel surface and aesthetically pleasant.

7

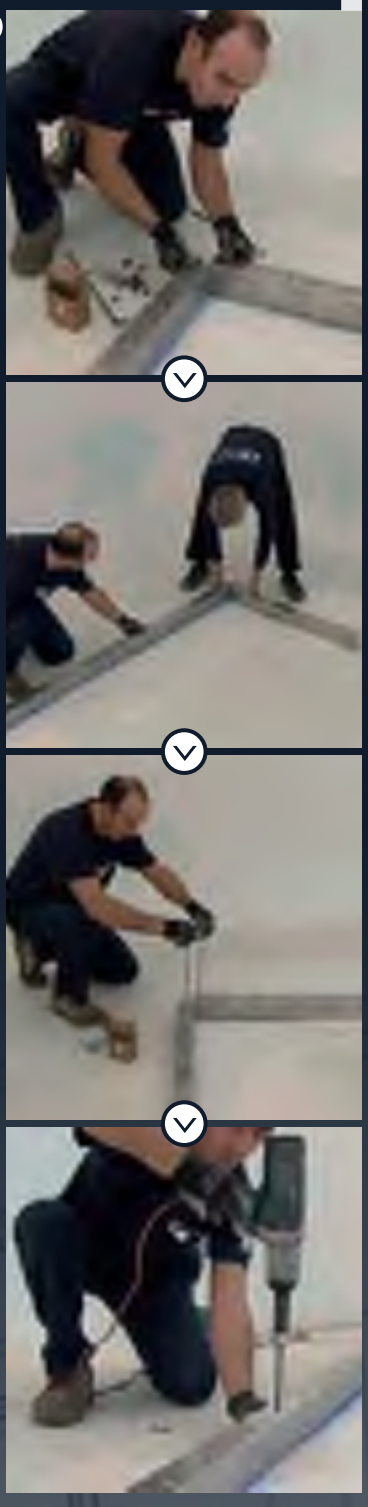


Finishing

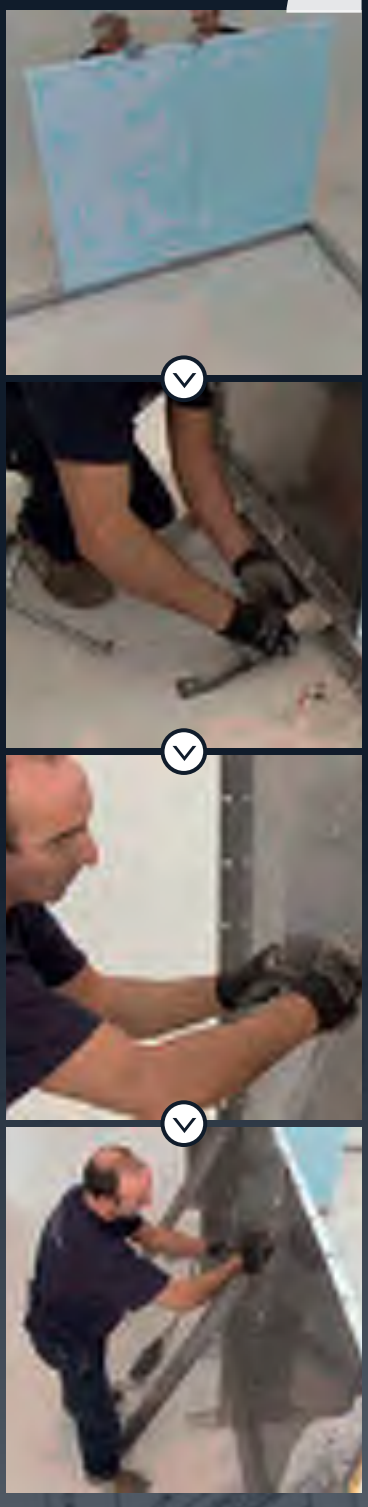
After the pool has been completely sealed and the overflow gutter installed, the ceramic tiles are applied onto the Myrtha surface. Gluing tile on a Myrtha stainless steel surface is much easier and safer that on concrete. As there is no possibility of water seepage from behind the tile, the traditional problem of poor long term adhesion is therefore eliminated.

Installation **phases**

1 Levelling



2 Wall construction



3 Overflow gutter

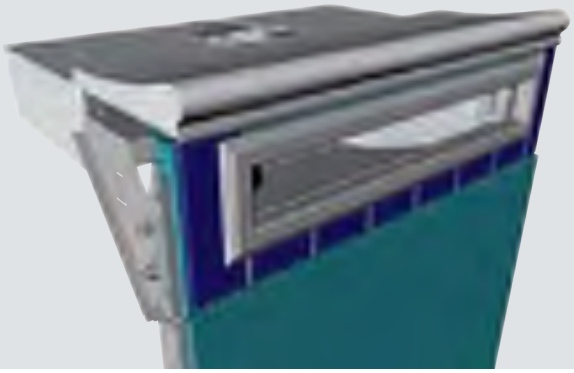
4 Waterproofing

5 Finishes

Models and **applications**

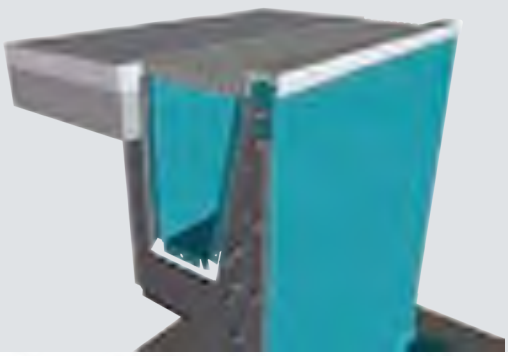
Skimmer

The traditional Skimmer version, which presents the water level lower than the floor level, has a ceramic finishing that enriches the visible part of the pool and helps cleaning operations. This system is ideal for public pools with reduced dimensions.



Overflow Gutter | Classic

Myrtha Classic Overflow is ideal for all the pools that guarantee an excellent water recycle with reduced dimensions and still maintain an aesthetically uniform mirroring surface. It is completed with a simple but pleasant PVC finishing on the highest part of the panel.

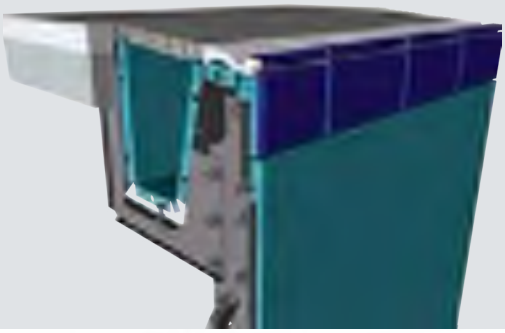


Overflow Gutter | Classic Competition

The Classic structure is ideal for big competition pools, as the PVC copying is flashed with wall panels, either on all the perimeter of the pool or only on the two short sides. This technology is also the most suitable for the renovation of pools that need to meet international regulations.

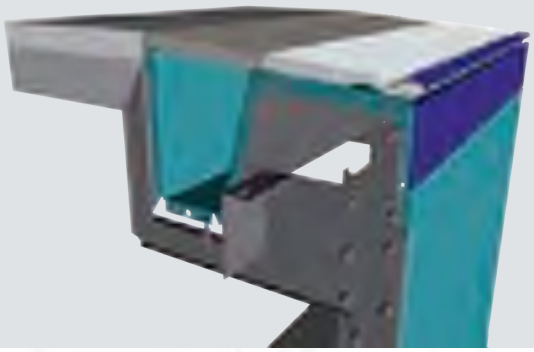
Overflow Gutter | Ceramic / 1

For public pools usually used for training sessions – schools, fitness centres and sports centres in general – Myrtha Ceramic1 is the most used and appreciated technology. Its ceramic tile places the overflow gutter slightly moved from the boarder so that the wave produced by the swimmer is better absorbed and does not reduce the swimmer's pace.



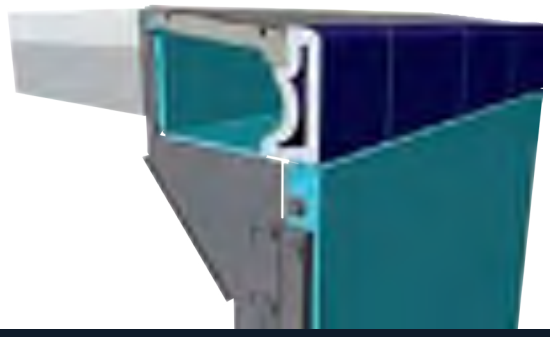
Overflow Gutter | Ceramic / 2

Myrtha Ceramic 2 presents two ceramic tiles that move even further the overflow gutter and guarantee the maximum absorbing coefficient of the wave impact during training lessons or competition events: the most suitable technology for completion implants.



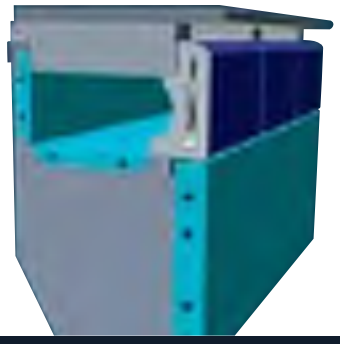
> Overflow Gutter | Structural

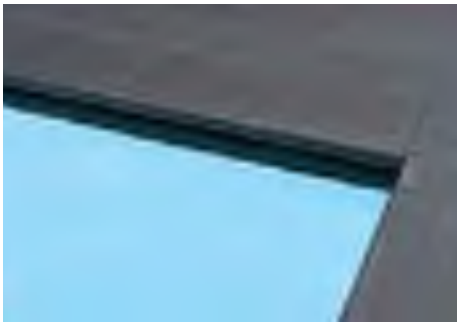
Myrtha Structural Overflow Technology is characterized by a special Klinker ceramic tile that functions as part of the actual structure of the wall panels. This structure guarantees a perfect overflow level while maintaining an attractive finish, in fact it can be considered the ideal technology for public leisure pools with any design.



> Recessed overflow gutter

The brand new overflow gutter finishing solution as an alternative to the standard ABS grid. Special edge elements, specifically designed for swimming pools use, can be placed and fixed to the overflow gutter, perfectly allowing the water flow and providing a smart finishing to the pool. Different materials and surfaces, highly durable and with high tech performance, can be chosen for both the deck and the edge of the pool: marbels, stones, wood and porcelain stonewares, inspired from natural and precious materials.



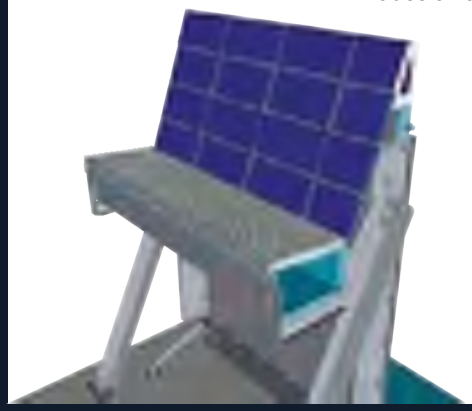


> Vanishing Edge | Ceramic / 1

Ceramic/1 structure can also have a vanishing edge effect that guarantees the best success on hills or particular surroundings. Generally it is utilized on one side of the pool with a ceramic tile that follows the external side of the pool and ends directly in the overflow gutter. This technology can be an elegant and efficient solution for public leisure pools, especially in condominiums or accommodation facilities.

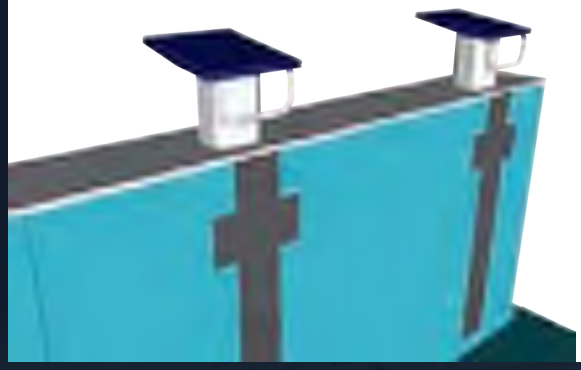
> Vanishing Edge | Structural

The Overflow Structural technology has evolved from the Ceramic1 Vanishing edge technology. Above the Myrtha panels a ceramic tiles functions as part of the structure while still creating a gentle slop that fades away in the gutter.

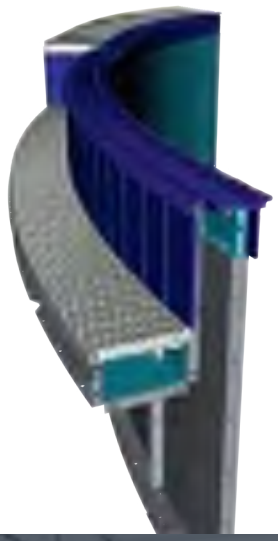


> Headwalls

To comply with F.I.N.A. regulations for competition pools that do not have an overflow structure on all four sides a headwall is required at 30cm above the water level, often completed by ceramic tiles that guarantee simple cleaning and satisfies the eye.



> Combined Technologies

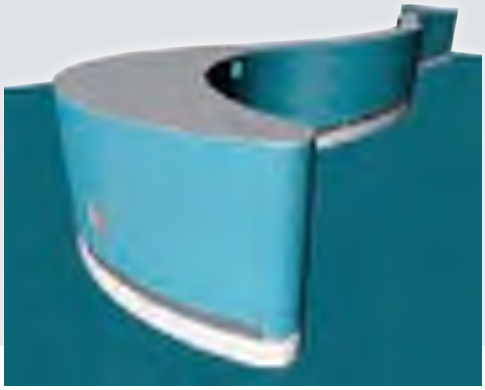


All the technologies described above can be combined to meet design requirements: competition pools combine overflow technologies with headwalls; public and leisure pools combine skimmer systems with one or more vanishing edge or headwall system too. Myrtha Pools can offer the work of a specialized technical staff who continuously search for the best solutions to advise the client according to need and surrounding.

Special **solutions**

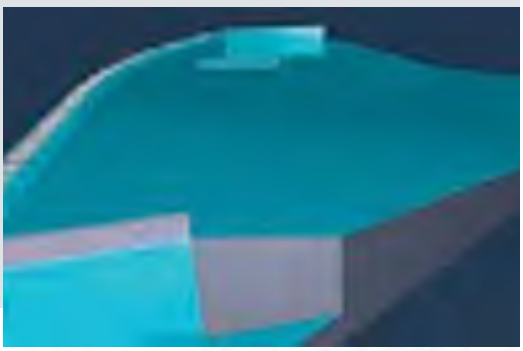
Finger Wall

This solution is an additional structure raised above the level of water that can be used as a dividing wall between different areas of one big pool or as a relax area for swimmers. It is generally covered by ceramic tiles and meets the finishing solutions of the rest of the pool.



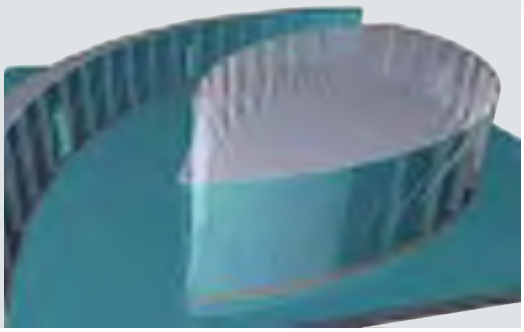
Zero Entry

Otherwise know as “beach entry”, is a walk-in option commonly associated to leisure pools but available for all projects. It integrates an anti-slip surface as well as a “soft floor” underlayment to further enhance the beach effect and provide an added safety aspect created with our Softwalk solution.



Islands and Rivers

From the Crazy River to the Lazy River, amusing or relaxing, fast or slow flow, Myrtha does it all! Rivers and islands can be inserted for aesthetical reasons, for fun or even for the functionality of the structure.



Double level

Double level is often inserted for an aesthetical purpose to allow for a waterfall effect, but it can also be functional for the architecture of the pool or for the surrounding floor.

Water **circulation**

A good pool project shall also take into consideration issues as the high water quality, the physical safety of swimmers, the expected users load and the regolatory requirements.
Myrtha swimming pools are designed basing on these criteria, both considering the needs of public health and easy maintenance of the pool.
Myrtha pools has invested also in this fields of research, by developing specific studies on recirculation systems preliminary analysis, as well as new solutions for water circulation.

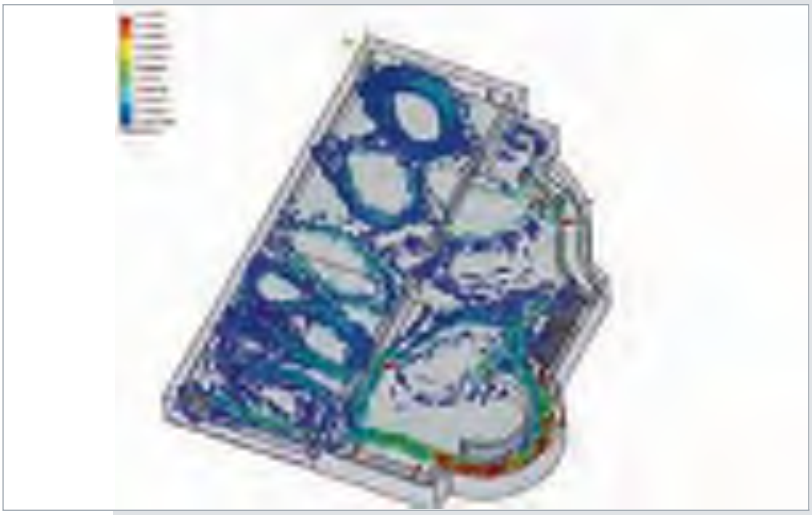
Traditional distribution

Use of inlets on the pool floor allows for an uniform distribution, complying to local regulations.

Strahlenturbulenz

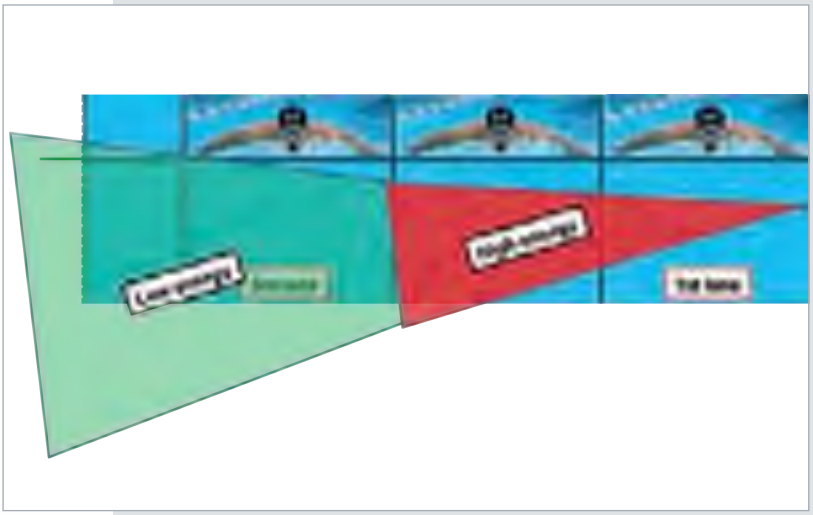
It represents nowadays an evolution of traditional water circulation system and the most efficient solution.
Based on the Venturi effect with controlled turbulence, it reduces risks by avoiding piping in the pool floor.

3D simulations



2D and 3D CFD simulations applied to a pool can provide essential information about the circulation: digital dye test, verification and optimization of circulation, as well as development of special features and accessories.
The picture on the lef shows a digital dye test after 15 minutes for 3 different depths shows erlochrome concentration.

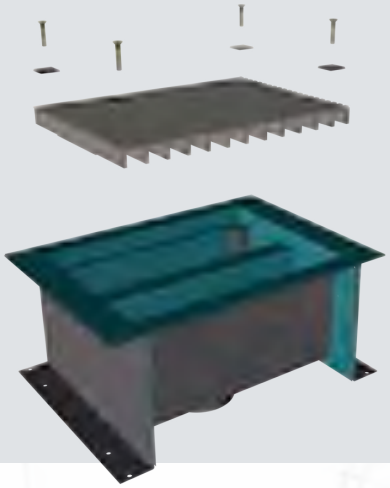
Hydraulic calculations and test



Myrtha Pools started improving CFD in order to exactly perform the calculations required and to simulate the interaction of liquids in a swimming pool.
Basing on the use of special softwares, Myrtha CFD technology can simulate the pool circulation before its construction, providing reliable 3D simulations and digital tests, as well as analysis of the inlet systems and precise calculations of the dropouts and all the overflow system.

Specific Myrtha fittings

Made to ensure a perfect fitting and waterproofing on the Myrtha structure.



Special **systems**

Bulkhead

It separates the pool in different areas, moving along rails installed on the pool deck, thanks to a patented easy movement system. It includes anchors for starting blocks and it can be provided with optionals as footrest step, handrails, floating lane ropes.

Bulkhead flow-through

Flow through bulkhead allows a large amount of the swimmer surge wave to pass through the bulkhead above and below the water further eliminating the rebound wave and turbulence.

Floating movable floor

It allows the depth of the pool to be varied, providing a multifunctional use of the pool. Floating structure anchored to the floor through a system of steel cables.
An actuating mechanism outside the pool allows the cables positioning and the movable floor fixing into the desired placement.

Movable floor with wall movement

This non-floating system is operated by pairs of screw-jacks installed in the pool walls, which allow the upwards and downwards movement of the floor.

Removable headwalls

Provide pools with overflow gutter on four sides with a 30 cm headwall, as per FINA regulations requirement.
It is also an ideal support for timing touch pads, starting blocks and floating lane anchors.

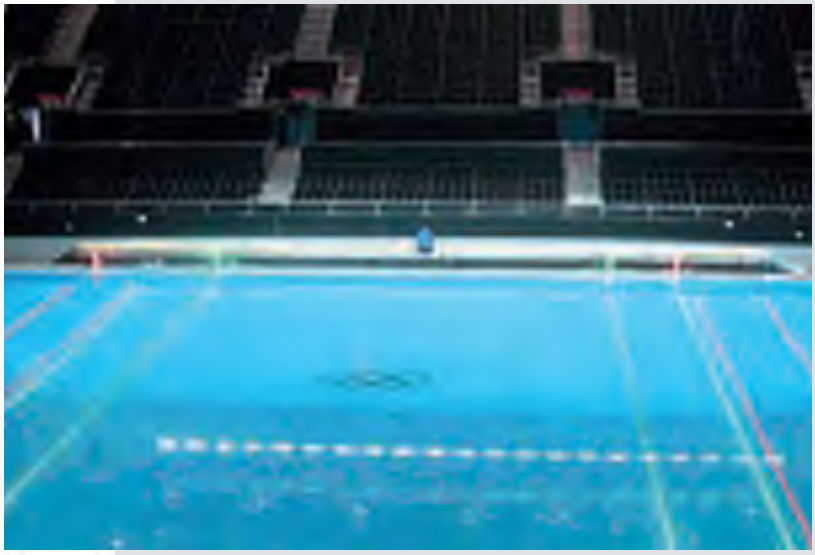
Air safety cushion

It reduces the diver's impact, by producing a uniform mixture of water and air in the area where the diver enters the pool.
Spargers, positioned under the diving board, provide adjustable bubbling volume and intensity.

Virtual Trainer

LED stripes system used to monitor the performances of swimmers during training sessions. The system contains a number of preinstalled training programmes and it can be operated by a wireless system.

Waterpolo Visual System



FINA approved system, based on the use of LED markings, placed in specific areas inside and outside the pool.
It allows athletes, referees, judges and spectators to be updated on the progress of the game.

Hotels and **resort pools**

Grand Hotel Central, Barcelona (Spain)

Myrtha Pools' patented technology guarantees the very best pools for the finest Hotels, Resorts and High Rise facilities around the world. Myrtha Technology is designed to adapt to the challenges of pool construction in varied climates, small spaces and high rise buildings. Myrtha Technology is designed to adapt to the challenges of pool construction in varied climates, small spaces and high rise buildings. Once installed, a Myrtha Pool does not require the expensive maintenance that traditional pools need every few years thus reducing the amount of scarce resources spent on capital expenditures. Aesthetically, Myrtha Pools have a wide range of accessories to fit the unique profile of hotels and resorts.

Federation Tower Hotel, Moscow (Russia)

At the last floor of the Western tower, inside the Grand Hyatt Hotel, Myrtha Pools has installed the refined pool with white lining and mosaic, underwater lights, hydromassage inlets and swim jets to be used by the hotel guests. The dimensions are 22 x 6 x 1.5 meters.

Rome Cavalieri Waldorf Astoria Hotel, Rome (Italy)

In the center of Rome, in an area nestled in the quiet, the Hotel offers a private park in which Myrtha Pools has built an elegant freeform pool and also refurbished the reinforced concrete pool for children.

Embassy Suite Hotel, Honolulu, HI (USA)

A few steps from Waikiki beach, the hotel has spacious sundeck on the 4th floor roof including an impressive freeform Myrtha pool, heated and finished with elegant ceramic tiles.

Hotel Landmark Mandarin Oriental, Hong Kong

Inside one the most outstanding luxury hotels in Far East, Myrtha Pools has built an indoor state-of-the art 20 m lap pool, included in the facilities of the hotel fitness center.

Warranty:

PERFORMANCE REQUIREMENTS

1) Complies with ASTM E331 water penetration test. See Quality Assurance below; 2) NFPA 285 Certified.

SUBMITTALS
(Specifically Requested by Marriott)

1) Product data; 2) Shop drawings; 3) Samples; 4) Mfrs certifications of local code compliance; 5) Closeout: Marriott "Exterior Insulation and Finish Affidavit"; 6) Closeout: Marriott "Exterior Sealant Affidavit"; 7) Closeout: Standard maintenance kit; 9) Closeout: Executed warranty with "Field Observation Reports" attached.

QUALITY ASSURANCE

1) Mock-ups for each color and texture; 2) Installer Qualifications: AWCI EIFSmart certification; 3) Local code-required submittals (e.g. NOA Miami Dade); 4) Third Party Water Vapor Transmission Analysis acceptable to local code authority.

SPECIAL PROJECT CONDITIONS
(Temp/Humidity changes, etc.)

Do not install below 40F. Obtain manufacturer's endorsement to install between 40F and 50F. Provide full weather protection when recommended by manufacturer.

WARRANTY

Non-pro-rated, no dollar limit, labor included. Covers primers, base coats, finish coats, reinforcing mesh, insulation and adhesive, all accessories, trim, flashing, sealants. Failures include: Bond failure (base/finish coats/adhesive); cracking, bulk water intrusion and air leakage, fading exceeding 4 Hunter units (ASTM D1729 and D2244).

INSTALLATION STANDARD

ASTM C1397 and mfr's written instructions applicable to each type of substrate indicated.

Ultra-High-Impact Mesh: Ground level to minimum 8'-0" high, at all corners of doors, windows, columns, and where indicated.

FIELD QUALITY CONTROL TESTING

Manufacturer's required inspections and testing for warranty compliance.

Building code required inspections (Ref. IBC Chapter 14 requirements)

Building Product Manual Paint Schedule

***Note** Edit this Paint Schedule to delete products not required for Project. Some of the products listed have lower VOC values, but use may result in higher cost to Project. Designer should evaluate and select appropriate products based on the Sustainable requirements for the Project. It should be noted that colorants may add to the VOC content of some of the products and the actual final VOC levels vary based on the color. Achieving a true 0 VOC content for the final product may not be realistic. Green Seal Standard GS-11 levels exclude colorant and water added at point of sale at this time.*

PAINT SCHEDULE

DESCRIPTION				MANUFACTURER

TownePlace Suites Generation 5 Food Service and Guest Laundry Equipment Preamble

PREAMBLE

Instruction For Use of Documentation

The total required information provided to design and build a TownePlace Suites by Marriott is contained in the criteria documents identified below which relay standardized public space, guestrooms, guestroom corridors, back of house and building site + exterior. Real Living is the decor package for the Public Space and Guestrooms.

Comprehensive Criteria Documents for TownePlace Suites by Marriott are:

1. Design Standards
2. Design Guideline Drawings
3. Specifications as indicated below:
   - **A. Building Product Manual (BPM)**
     Volume 1 - Building Site + Exterior
     Volume 2 - Public Space
     Volume 3 - Guestroom
     Volume 4 - Food Service & Guest Laundry Equipment
   - **B.** Exterior Signage Specifications
   - **C.** Interior Signage Specifications
   - **D.** Interior Design Specification Manual

Alternate Sources of Information:

1. Change Bulletins
2. Additional Tools

Description Follows:

1. Design Standards provide a written macro view of the overall design elements required for TownePlace Suites by Marriott.
2. The Design Guideline Drawings - provide more specific design direction via drawings to supplement the Design Standards.
3. The Interior Design Specification Manual lists items required that are generally referred to as Furniture, Fixture, & Equipment or FF&E items. These items and the accepted suppliers listed, have been contracted by Marriott and can be supplied through Marriott's procurement division.
4. The Building Product Manual (BPM) lists all the finishes required for the building and the building products that are typically installed and supplied by the General Contractor. This document must be used in conjunction with the drawings for the contractor supplied items as specific dimensions and criteria are referenced in both documents. Because of the high quality of design expected for TownePlace Suites by Marriott, Marriott has specified acceptable suppliers who have worked closely with Marriott on the initial TownePlace Suites Design. All of these documents are integral elements of the complete design and construction information. The project architect is responsible for incorporating all components of the criteria documents in the development of any TownePlace Suites by Marriott Project.

Use of Drawings

Building Product Manual (BPM) mark numbers and Interior Design Specification Manual x-ref numbers are shown on the Design Guideline Drawings as a base number only. Refer to the BPM and Interior Design Specification Manual for mark numbers and x-ref numbers plus a suffix for product and FFE alternates and additional acceptable manufacturers.

** In the BPM **acceptable manufacturers** of same material/product are indicated by a suffix of "XX", the abbreviation of the manufacturer's name. (i.e., PL-101-MO for MOEN or PL-101-KO for Kohler). If there aremultiple manufacturers, and the item looks very similar, and it is only a matter of style, then it is considered avariation of manufacturer and not an alternate and would receive the mfr. suffix.*

** In the BPM **alternate** materials/products/designs are indicated by a suffix of "A1", "A2", "A3", etc. indicating "alternate", following the base number (i.e., PL-101-A1).*

General Compliance Requirements

The Owner's / Franchisee's Consulting Design Professional shall be responsible for verifying and complying with all applicable laws, covenants, codes, ordinances, rules, regulations, restrictions, etc. The Design Professional shall pay close attention to the requirements of the federal accessibility law, Americans with Disability Act (ADA), local and state accessibility regulations, and the applicable fire, life safety requirements. It is also the responsibility of each hotel owner to ensure that all products have been adjusted in dimension, quantity and hand suit the specific site conditions.

GENERAL NOTES

1. All images, photographs, renderings of specified items contained in this specification package area for general design intent and reference only.
2. Refer to the preamble for terms, conditions, abbreviations, definitions, responsibilities, and general guidelines for all specified items.
3. Refer to drawings for exact locations and/or mounting heights of furniture, fixtures, and equipment. In the event of a discrepancy between drawings and specifications, please contact Marriott International immediately for written clarification.
4. Submittal of shop drawings & finish samples to Marriott International for review and written approval is required for any item supplied by a vendor other than the specified source.
5. Design Documentation firm to verify that all flammability requirements are met for property location. The requirements noted within this specification are general and local flammability may be more stringent.
6. Install all products and finishes per manufacturer's recommendations.
7. Final quantity of items to be based on final plans, room quantity, and final matrix.

Plumbing Fixture and Residential Appliances - General Notes

1. All plumbing fixtures and residential appliances to be of contract quality and suitable for commercial use.
2. Site measurements required.

ABBREVIATIONS

General Schedule Abbreviations:

ADA	Americans with Disabilities Act
AFF	Above Finish Floor
ASTM	American Society of Testing Materials
AWI	American Woodworking Institute
CEF	Corridors, Elevators, and Foyers
CF/CI	Contractor Furnished/ Contractor Installed
COM	Customer's Own Material
GC	General Contractor
GR	Guest Room
GRB	Guest Room Bath
LY	Lineal Yard
MF/MI	Manufacturer Furnished/ Manufacturer Installed
N/A	Not Applicable
NFPA	National Fire Protection Association
NY	Narrow Yards
OF/CI	Owner Furnished/ Contractor Installed
OF/MI	Owner Furnished/ Manufacturer Installed
OF/CI	Owner Furnished/ Owner Installed
RFP	Request for Proposal
SF	Square Feet
SY	Square Yard
UL	Underwriters Laboratory

A. Toilet Accessory Abbreviations:

For your use in utilizing the Toilet Accessories within the Building Product Manuals, the following information is supplied:

1. The Assembly is the type of restroom or bathroom. The Assembly is not recognized by a number.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'TA' for Toilet Accessory Commodity. The first character of the 3-character suffix categorizes each toiletaccessory commodity component, then is numbered sequentially.

   100 – Grab Bars
   200 – Toilet Tissue / Facial Tissue
   300 – Glass Shelf / Iron Board Caddy
   400 – Towel Bar / Towel Ring / Robe Hook
   500 – Soap Dish / Shampoo Dispenser / Shower Accessory Ledge / Shower Footrest
   600 – Shower Curtain Rod / Glass Shower (components)
   700 – Shower Seat / Tub Seat
   800 – Public Restroom (Feminine Napkin Dispenser / Paper Towel Dispenser / Receptacle / Soap Dispenser / Seat Cover)
   900 – Miscellaneous

B. Plumbing Fixture Abbreviations:

For your use in utilizing the Plumbing Fixtures within the Building Product Manuals, the following information is supplied:

1. The Assembly No. contains 3 characters or prefix to define the type of assembly. The 2-character suffix is numericallysequential. Example TUB-01.

TUB - Tub	EWS - Eye Wash
WHL - Whirlpool	MOP - Mop Sink
SHR - Shower	CLO - Cleanout
SNK - Sink	FLD - Floor Drain
SVS - Service Sink	FSK - Floor Sink
WCL - Water Closet	LIT - Lint Interceptor
URN - Urinal	HYD - Hydrant
WCR - Water Cooler	RDR - Roof Drain

2. Mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'PL' for Plumbing Commodity. The first character of the 3-character suffix categorizes each plumbing commodity component, then isnumbered sequentially. Example PL-101, PL-102, etc.

100 – Sinks & Mop Sinks
200 – Faucets
300 – Toilets / Urinal / Water Cooler
400 – Shower Heads
500 – Shower Diverters
600 – Shower Surrounds / Shower Pans / Base / Tub
700 – Shower Doors
800 – Fittings
900 – Miscellaneous (Floor Drains, Clean Outs)

C. Door Hardware Abbreviations:

For your use in utilizing the Door Hardware within the Building Product Manuals, the following information is supplied:

1. The Assembly No. or Door Hardware Type No. contains 1 character or prefix "T". The 2-character suffix is numericallysequential. Example T-01.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'DH' for Door Hardware Commodity. The 3-character suffix is numbered sequentially. Example DH-001,DH-002, etc.

D. Carpet or wall coverings will no longer be specified within the Building Product Manuals. Reference the Interior DesignSpecification Manuals.

BPM (Building Product Manual) Number Nomenclature

(Items are numbered with the item prefix and then consecutive numbers starting with 001 - "Mark Number" unless indicated otherwise)

SUPER ADJUSTABLE SUPER ERECTA SHELF®
WIRE SHELVING

Super Adjustable Super Erecta Wire Shelving is the most advanced and innovative wire storage system available. A unique Corner Release System and SiteSelect™ Posts make changing shelf levels fast and easy, without tools! And Super Adjustable Shelving works in conjunction with the entire Super Erecta System of shelves and accessories.

- **Easily Adjustable:** Unique Corner Release and SiteSelect Posts create a total system that offers "Tool-Free," fast adjustment at 1" (25mm) intervals along the entire height of the posts.
- **Easily Assembled:** The Corner Release System and SiteSelect Posts, combined with the original "bottom up" assembly process, creates a complete shelving system in minutes, without tools! SiteSelect Posts with the double-groove visual guide feature, have circular grooves at 1" (25mm) intervals and are numbered at 2" (50mm) intervals. Shelves simply seat into place using the Corner Release.
- **Unique Shelf Design**: The open wire design of these heavy-gauge shelves minimizes dust accumulation and allows a free circulation of air, greater visibility of stored items and greater light penetration. Shelf ribs run front to back allowing you to slide items on and off easily. Shelves can be loaded and unloaded from all sides. This open contruction allows use of maximum storage space of cube.
- **Unique Post Design**: New SiteSelect post design provides a visual guide for positioning and adjusting shelves, saving considerable time during assembly and adjustment. An easy-to-identify double groove, every 8" (203mm), offers a quick way to align all shelves. Bolt leveler on post bottom compensates for uneven surfaces.
- **Fast, Easy Reconfiguration:** Super Adjustable Super Erecta can change as quickly as your needs change. By using various accessories, hundreds of shelving configurations become possible.
- **Choice of Finishes**: Super Adjustable Super Erecta Wire Shelving is available in a variety of finishes: Super Erecta Brite and chrome-plated for dry storage, Metroseal 3™ with antimicrobial product protection, and stainless steel for corrosive environments, and a large array of designer colors (see Catalog Sheet 10.14A).

96 5/8	2454	5 1/2	2.5	**96P		

* Height includes leveling bolt and cap.

** 96P should not be used in units less than 24" (610mm) deep. Consult Metro Engineering for alternate recommendations.

Post lengths to be specified as cut to a round number, ie: 74P cut to 69". . . This will result in an overall post height with adjustment of 69 3/8 to 69 7/8.

Important: When ordering by components remember that for maximum stability, units should be kept as wide and low as possible.

HOT AND COLD

STANDARD FEATURES

- 32 racks per hour – LXeH
- 34 racks per hour – LXeC
- .74 gallons of water per rack
- Hot water or chemical sanitation units available
- Low chemical alert indicators
- Sense-A-Temp™ booster heater capable of 70° rise, provided on LXeH models
- Delime notification with cycle
- Chemical pump “auto-prime”
- Service diagnostics
- Deep drawn stainless steel tank
- Microcomputer, top mounted controls with digital cycle/temperature display
- Revolving upper and lower anti-clogging wash arms
- Revolving upper and lower rinse arms
- Removable stainless steel scrap screen
- Corrosion resistant pump
- Automatic pumped drain
- 17" door opening
- Automatic fill
- Detergent and rinse aid pumps standard (plus sanitizer pump on chemical machine)
- Electric tank heat
- Two dishracks – one peg and one combination type

STANDARD VOLTAGES

NOTICE

Required flowing water pressure to the dishmachine is 15-65 PSIG. If pressures higher than 65 PSIG are present, a pressure regulating valve must be installed in the water line to the dishmachine (by others).

Pressure gauge not required on pumped rinse machines.

Important: The chemical containers should be placed no higher than 10" above floor.

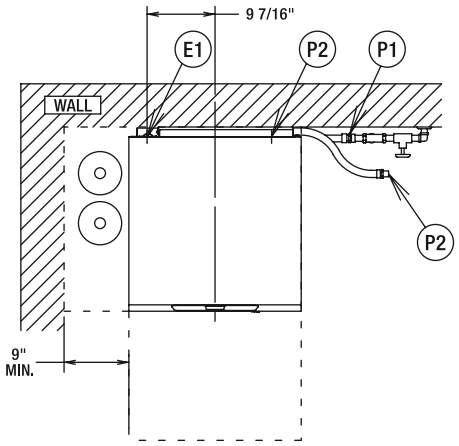
If chemical containers are to be placed in cabinet adjacent to machine, a 1/2" dia. hole is required in the cabinet to run chemical supply line.

Notes:

1. All vertical machine dimensions taken from floor may be increased by 1".
2. Moist air escapes from the door. Use only moisture resistant materials adjacent to dishmachine sides and top.
3. A vent hood is not recommended above the undercounter dishmachine since it does not produce excessive vapors.

Plumbing notes:

1. Water hammer arrestor (meeting ASSE-1010 Standard or equivalent) to be supplied (by others) in common water supply line at service connection.
2. Recommended water hardness to be 3 grains or less for best results.
3. If drain hose is looped above a sink, the loop must not exceed 38" AFF.



CONNECTION INFORMATION
(AFF = ABOVE FINISHED FLOOR)

LEGEND

E1 ELECTRICAL CONNECTION: 1-3/8" DIA. HOLE FOR 1" TRADE SIZE CONDUIT; 4-5/8" AFF.

P1 SINGLE FILL AND RINSE CONNECTION: 3/4" FEMALE GARDEN HOSE FITTING ON 6' LONG HOSE SUPPLIED WITH MACHINE.; 110°F WATER MIN FOR LXeH

P2 DRAIN CONNECTION: 5/8" BARB FITTING WITH 6' LONG HOSE SUPPLIED WITH MACHINE.

LXeC COLD

⚠ WARNING

Do not premix other chemicals and sodium hypochlorite (liquid bleach). Mixing may cause hazardous gas to form.

NOTICE

Required flowing water pressure to the dishmachine is 15-65 PSIG. If pressures higher than 65 PSIG are present, a pressure regulating valve must be installed in the water line to the dishmachine (by others).

Pressure gauge not required on pumped rinse machines.

Important: Chemical containers should be placed no higher than 10" above floor.

If chemical containers are to be placed in cabinet adjacent to machine, a 1/2" dia. hole is required in the cabinet to run chemical supply line.

Use only 6% or 8.4% sodium hypochlorite (liquid bleach) as sanitizing chemical to insure proper operation of dishmachine.

Certain materials including silver plate, aluminum and pewter are attacked by sodium hypochlorite (liquid bleach). See instructional manual.

Notes:

1. All vertical machine dimensions taken from floor may be increased by 1".
2. Moist air escapes from the door. Use only moisture resistant materials adjacent to dishmachine sides and top.
3. A vent hood is not recommended above the undercounter dishmachine since it does not produce excessive vapors.

Plumbing notes:

1. Water hammer arrestor (meeting ASSE-1010 Standard or equivalent) to be supplied (by others) in common water supply line at service connection.

SPECIFICATIONS

DESIGN: Front opening, equipped for installation in either freestanding or undercounter-type operations.

CONSTRUCTION: 300 series stainless steel tank, door and top panel.

PUMP: Centrifugal-type, integral with motor, horizontally mounted. Pump capacity 38 gpm.

MOTOR: Single phase, furnished for all electrical specifications. Factory sealed lubrication. Inherent overload protection with auto reset.

WASH AND RINSE CYCLE: Complete automatic type, controlled by solid-state electronics. Cycle may be interrupted any time by opening door. Cycle continues when door is closed.

- Initial cycle fills wash tank, to be recirculated each wash cycle. Some wash water is drained off before rinse cycle. Rinse cycle refreshes wash water and tank heat.

RINSE PUMP: Powered by a single phase motor, the rinse pump is made of high strength engineered composite material.

RINSE AND SANITATION:

- **LXeH:** Sanitation is accomplished by means of a built-in booster heater designed to raise temperature of water to a minimum of 180°F from an incoming water temperature of 110°F.
- **LXeC:** Sanitation is accomplished by injection of proper amount of sodium hypochlorite solution (liquid bleach) into final rinse water to achieve a minimum of 50PPM sanitizing solution. Injection of sodium hypochlorite is accomplished by a built-in sanitizing chemical pump.

PUMPED DRAIN: Machine automatically drains water through a built-in pump. Maximum 38" drain height permitted.

RACKING: Machines accommodate racks from 10" x 20" to 20" x 20". Also accepts 16" x 18" cafeteria trays.

NOTE: Certain materials, including silver, aluminum and pewter are attacked by Sodium Hypochlorite solution in the chemical sanitizing mode of operation.

SPECIFICATIONS: Listed by Underwriters Laboratories Inc. and NSF International.

SUPER ADJUSTABLE SUPER ERECTA SHELF®
WIRE SHELVING

Super Adjustable Super Erecta Wire Shelving is the most advanced and innovative wire storage system available. A unique Corner Release System and SiteSelect™ Posts make changing shelf levels fast and easy, without tools! And Super Adjustable Shelving works in conjunction with the entire Super Erecta System of shelves and accessories.

- **Easily Adjustable:** Unique Corner Release and SiteSelect Posts create a total system that offers "Tool-Free," fast adjustment at 1" (25mm) intervals along the entire height of the posts.
- **Easily Assembled:** The Corner Release System and SiteSelect Posts, combined with the original "bottom up" assembly process, creates a complete shelving system in minutes, without tools! SiteSelect Posts with the double-groove visual guide feature, have circular grooves at 1" (25mm) intervals and are numbered at 2" (50mm) intervals. Shelves simply seat into place using the Corner Release.
- **Unique Shelf Design**: The open wire design of these heavy-gauge shelves minimizes dust accumulation and allows a free circulation of air, greater visibility of stored items and greater light penetration. Shelf ribs run front to back allowing you to slide items on and off easily. Shelves can be loaded and unloaded from all sides. This open contruction allows use of maximum storage space of cube.
- **Unique Post Design**: New SiteSelect post design provides a visual guide for positioning and adjusting shelves, saving considerable time during assembly and adjustment. An easy-to-identify double groove, every 8" (203mm), offers a quick way to align all shelves. Bolt leveler on post bottom compensates for uneven surfaces.
- **Fast, Easy Reconfiguration:** Super Adjustable Super Erecta can change as quickly as your needs change. By using various accessories, hundreds of shelving configurations become possible.
- **Choice of Finishes**: Super Adjustable Super Erecta Wire Shelving is available in a variety of finishes: Super Erecta Brite and chrome-plated for dry storage, Metroseal 3™ with antimicrobial product protection, and stainless steel for corrosive environments, and a large array of designer colors (see Catalog Sheet 10.14A).

STANDARD FEATURES

DESIGN
- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, exceptional food safety and the best value in today's food service marketplace.

REFRIGERATION SYSTEM
- Factory engineered, self-contained, capillary tube system using environmentally friendly (CFC free) R404A refrigerant.
- Oversized, factory balanced refrigeration system with guided airflow to provide uniform product temperatures.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser; maintains -10°F (-23.3°C) cabinet temperatures. Ideally suited for both frozen foods and ice cream.
- Sealed, cast iron, self-lubricating evaporator fan motor and larger fan blades give True undercounter units a more efficient low velocity, high volume airflow design. This unique design insures faster temperature recovery and shorter run times in the busiest of food service environments.
- Condensing unit access in back of cabinet, slides out for easy maintenance.
- Automatic defrost system time-initiated, time-terminated.

CABINET CONSTRUCTION
- Exterior - stainless steel front, top and cabinet ends. Matching aluminum finished back.
- Interior - attractive, NSF approved, white aluminum liner. 300 series stainless floor with coved corners.
- Insulation - entire cabinet structure and solid door are foamed-in-place using high density, CFC free, polyurethane insulation.
- 5" (127 mm) diameter stem castors - locks provided on front set. 36" (915 mm) work surface height.

DOOR
- Stainless steel exterior with white aluminum liner to match cabinet interior.
- Each door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to insure permanent attachment.
- Positive seal self-closing door with 90° stay open feature. Door swings within cabinet dimensions.
- Magnetic door gasket of one piece construction, removable without tools for ease of cleaning.

SHELVING
- Two (2) adjustable, heavy duty PVC coated wire shelves 23 1/4"L x 16"D (591 mm x 407 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on 1/2" (13 mm) increments.

MODEL FEATURES
- Evaporator is epoxy coated to eliminate the potential of corrosion.
- NSF-7 compliant for open food product.

ELECTRICAL
- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase - 15 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-15R

OPTIONAL FEATURES/ACCESSORIES
Upcharge and lead times may apply.
- ❒ 230 - 240V / 50 Hz.
- ❒ 6" (153 mm) standard legs.
- ❒ 6" (153 mm) seismic/flanged legs.
- ❒ 2 1/2" (64 mm) diameter castors.
- ❒ Basic overshelf.
- ❒ Single utility shelf.
- ❒ Double utility shelf.
- ❒ Stacking collar.
- ❒ 30" (762 mm) deep, 1/2" (13 mm) thick, white polyethylene cutting board. Requires "L" brackets.
- ❒ 30" (762 mm) deep, 1/2" (13 mm) thick, composite cutting board. Requires "L" brackets.
- ❒ Heavy duty, 16 gauge tops.
- ❒ ADA compliant models with 34"(864 mm) work surface height.
- ❒ Low profile models with 31 7/8" (810 mm) work surface height.
- ❒ Remote cabinets (condensing unit supplied by others; system comes standard with 404A expansion valve and requires R404A refrigerant). Consult factory technical service department for BTU information.

Reach-In Solid Door Freezer

T-49F

- Designed using the highest quality materials and components to provide the user with colder product temperatures, lower utility costs, superior food safety and the best value in today's food service marketplace.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser maintains -10°F (-23.3°C). Ideally suited for both frozen foods and ice cream.
- 300 series stainless steel solid doors and front. The very finest stainless for higher tensile strength for fewer dents and scratches.
- Adjustable, heavy duty PVC coated shelves.
- Positive seal self-closing doors. Lifetime guaranteed door hinges and torsion type closure system.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

Bottom mounted units feature:

- "No stoop" lower shelf.
- Storage on top of cabinet.
- Compressor performs in coolest, most grease free area of kitchen.
- Easily accessible condenser coil for cleaning.

T Series:
Reach-In Solid Door Freezer

STANDARD FEATURES

DESIGN
- True's solid door reach-in's are designed with enduring quality that protects your long term investment.
- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, superior food safety and the best value in today's food service marketplace.

REFRIGERATION SYSTEM
- Factory engineered, self-contained, capillary tube system using environmentally friendly (CFC free) R404A refrigerant.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser maintains -10°F (-23.3°C). Ideally suited for both frozen foods and ice cream.
- Sealed, cast iron, self-lubricating evaporator fan motors and larger fan blades give True reach-in's a superior low velocity, high volume airflow design. This unique design insures faster temperature recovery and shorter run times in the busiest of food service environments.
- Bottom mounted condensing unit positioned for easy cleaning. Compressor runs in coolest and most grease free area of the kitchen. Allows for storage area on top of unit.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

CABINET CONSTRUCTION
- Exterior - 300 series stainless steel front grill and shroud. Anodized quality aluminum exterior ends, back and top.
- Interior - attractive, NSF approved, white aluminum liner. 300 series stainless floor with coved corners.
- Insulation - entire cabinet structure and solid doors are foamed-in-place using high density, CFC free, polyurethane insulation.
- Welded, heavy duty galvanized frame rail dipped in rust inhibiting enamel paint for corrosion protection inside and out.
- Frame rail fitted with 4" (102 mm) diameter stem castors - locks provided on front set.

DOORS
- 300 series stainless steel exterior with white aluminum door liners to match cabinet interior. Doors extend full width of cabinet shell. Door locks standard.
- Positive seal self-closing doors. Lifetime guaranteed door hinges and torsion type closure system.
- Lifetime guaranteed recessed door handles. Each door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to insure permanent attachment.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.

SHELVING
- Six (6) adjustable, heavy duty PVC coated wire shelves 24 9/16"L x 22 3/8"D (624 mm x 569 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on 1/2" (13 mm) increments.

LIGHTING
- Incandescent interior lighting - safety shielded. Lights activated by rocker switch mounted above doors.

MODEL FEATURES
- Exterior mounted temperature monitor.
- Evaporator is epoxy coated to eliminate the potential of corrosion.
- Rear airflow guards prevent product from blocking optimal airflow.
- NSF-7 compliant for open food product.

ELECTRICAL
- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase - 20 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-20R

OPTIONAL FEATURES/ACCESSORIES
Upcharge and lead times may apply.
- ❒ 230 - 240V / 50 Hz.
- ❒ 6" (153 mm) standard legs.
- ❒ 6" (153 mm) seismic/flanged legs.
- ❒ Alternate door hinging (factory installed).
- ❒ Additional shelves.
- ❒ Half door bun tray racks. Each holds up to eleven 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).
- ❒ Full door bun tray racks. Each holds up to twenty-two 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).
- ❒ Remote cabinet and/or condensing unit. System comes standard with 404A expansion valve and requires R404A refrigerant.

T-23F

- True's solid door reach-in's are designed with enduring quality that protects your long term investment.
- Designed using the highest quality materials and components to provide the user with colder product temperatures, lower utility costs, superior food safety and the best value in today's food service marketplace.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser maintains -10°F (-23.3°C). Ideally suited for both frozen foods and ice cream.
- 300 series stainless steel solid door and front. The very finest stainless higher tensile strength for fewer dents and scratches.
- Adjustable, heavy duty PVC coated shelves.
- Positive seal self-closing door. Lifetime guaranteed door hinges and torsion type closure system.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

Bottom mounted units feature:

- "No stoop" lower shelf.
- Storage on top of cabinet.
- Compressor performs in coolest, most grease free area of kitchen.
- Easily accessible condenser coil for cleaning.

Reach-In Solid Door Freezer

STANDARD FEATURES

DESIGN
- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, lower utility costs, superior food safety and the best value in today's food service marketplace.

REFRIGERATION SYSTEM
- Factory engineered, self-contained, capillary tube system using environmentally friendly (CFC free) R404A refrigerant.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser maintains -10°F (-23.3°C). Ideally suited for both frozen foods and ice cream.
- Sealed, cast iron, self-lubricating evaporator fan motor and larger fan blades give True reach-in's a superior low velocity, high volume airflow design. This unique design insures faster temperature recovery and shorter run times in the busiest of food service environments.
- Bottom mounted condensing unit positioned for easy cleaning. Compressor runs in coolest and most grease free area of the kitchen. Allows for storage area on top of unit.
- Automatic defrost system time-initiated, temperature-terminated. Saves energy consumption and provides shortest possible defrost cycle.

CABINET CONSTRUCTION
- Exterior - 300 series stainless steel front grill and shroud. Anodized quality aluminum exterior ends and back.
- Interior - attractive, NSF approved, white aluminum liner. 300 series stainless floor with coved corners.
- Insulation - entire cabinet structure and solid door are foamed-in-place using high density, CFC free, polyurethane insulation.
- Welded, heavy duty galvanized frame rail. Dipped in rust inhibiting enamel paint for corrosion protection inside and out.
- Frame rail fitted with 4" (102 mm) diameter stem castors - locks provided on front set.

DOOR
- 300 series stainless steel exterior with white aluminum door liner to match cabinet interior. Door extends full width of cabinet shell. Door lock standard.
- Lifetime guaranteed recessed door handle. Door fitted with 12" (305 mm) long recessed handle that is foamed-in-place with a sheet metal interlock to insure permanent attachment.
- Positive seal self-closing door. Lifetime guaranteed door hinges and torsion type closure system.
- Magnetic door gasket of one piece construction, removable without tools for ease of cleaning.

SHELVING
- Three (3) adjustable, heavy duty PVC coated wire shelves 22 7/8"L x 23 1/4"D (582 mm x 591 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on 1/2" (13 mm) increments.

LIGHTING
- Incandescent interior lighting - safety shielded. Lights activated by rocker switch mounted above door.

MODEL FEATURES
- Exterior mounted temperature monitor.
- Evaporator is epoxy coated to eliminate the potential of corrosion.
- Rear airflow guards prevent product from blocking optimal airflow.
- NSF-7 compliant for open food product.

ELECTRICAL
- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase - 15 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-15R

OPTIONAL FEATURES/ACCESSORIES
Upcharge and lead times may apply.
- ❒ 230 - 240V / 50 Hz.
- ❒ 6" (153 mm) standard legs.
- ❒ 6" (153 mm) seismic/flanged legs.
- ❒ Alternate door hinging (factory installed).
- ❒ Additional shelves.
- ❒ Half door bun tray racks. Each holds up to eleven 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).
- ❒ Full door bun tray rack. Holds up to twenty-two 18"L x 26"D (458 mm x 661 mm) sheet pans (sold separately) (airflow guards need to be removed).
- ❒ Remote cabinet and/or condensing unit. System comes standard with 404A expansion valve and requires R404A refrigerant.

Standard Depth Undercounter Units

TUC-48

Standard Depth Undercounter Units
❒ TUC-27, ❒ TUC-36, ❒ TUC-48, ❒ TUC-60, ❒ TUC-72

True's undercounter refrigeration slides under work counters for space efficiency or provides a functional work surface for easy food preparation.

SPECIFICATIONS / FEATURES

CABINET CONSTRUCTION:
- Stainless steel front, top and ends. Aluminum finished back.
- White, vinyl coated aluminum interior cabinet liner with 300 series stainless steel floor with coved corners. Construction of liner in accordance with NSF standards.
- 5" diameter stem castors (optional 6" adjustable stainless steel legs available).

DOORS:
- Stainless steel exterior with white aluminum interior to match cabinet liner. Doors extend full width of cabinet shell. Door gaskets of one piece construction, and removable for ease in cleaning.
- Doors include 12" long horizontal recessed handle with sheetmetal interlock. Handles foamed-in-place to insure permanent attachment.

INSULATION:
- Entire cabinet structure and doors insulated using foamed-in-place CFC free polyurethane foam.

SHELVING:
- Adjustable vinyl coated wire shelves (2 per door). Shelves capable of supporting up to 250 lbs. (not included in drawered models)
- Full height shelf support pilasters, with double oblong holes on 1/2" centers. Pilasters made of the same material as cabinet interior. Four (4) chrome plated, stainless steel shelf clips to be included for each shelf.

REFRIGERATION SYSTEM:
- Refrigeration system factory balanced using CFC free R134A (refrigerator), R404A (freezer) refrigerant.
- Factory pre-engineered capillary tube system with oversized condenser and evaporator to reduce product pull down time and to consistently maintain 33°F to 38°F (refrigerator), -10°F (freezer) interior cabinet temperature. (non-adjustable capillary tube system superior to problematic expansion valve)
- Evaporator - epoxy coated at the time of manufacture to eliminate the potential of corrosion.

ELECTRICAL CHARACTERISTICS:
- Unit completely pre-wired at factory, and ready for final connection to a 115/60/1 phase - 15 amp dedicated outlet. A cord and plug set to be included.
- A sole use circuit is required.

115/60/1

Standard Features

- Oversized and balanced, environmentally friendly refrigeration system - holds 33°F to 38°F (134A, refrigerator), -10°F (R404A, freezer).
- Stainless steel front, top and sides.
- Interior - NSF approved, white vinyl coated aluminum sides and top, coved corners and 300 series stainless steel floor.
- Aluminum finished back.
- Door swings within cabinet dimensions.
- Work surface 36" high.
- Front breathing.
- Recessed handles on solid door models; glass door models feature triple pane glass and 12" aluminum handles.
- Adjustable vinyl coated wire shelves.
- Epoxy coated evaporator.
- Foamed-in-place high density polyurethane insulation (CFC free).
- 5" diameter castors standard equipment.
- Door/drawer variations available at full drawer list pricing.
- Self-contained system.
- Slide out compressor can be serviced easily and accessed by a single repairman.
- 1 year parts & labor warranty (USA).
- 5 year compressor warranty.

Optional Accessories

Classic Countertop Round Cooker/Warmers

Model: ☐ RCW-7 ☐ RCW-11

PRODUCT: QUANTITY: ITEM#:

Designed Smart.

- Both models have heating elements that evenly distribute heat throughout the unit.
- Thermostatically controlled heat can reach intense temperatures that produce consistant steam heat (212°).
- Units are designed with high wattage systems that generate faster start-ups to the required temperatures.
- RCW-7 has 1000 Watts.
- RCW-11 has 1200 Watts.
- Provided with insulation to protect interior parts and countertops from heat build-up.
- Cooker/Warmers are ideal for thawing frozen soups and holding the thawed soup at NSF-safe serving temperatures.

Built Solid.

Built to Last

- Round Cooker/Warmers are constructed with heavy-duty stainless steel for long life.
- Interior liner made of tough stainless steel.

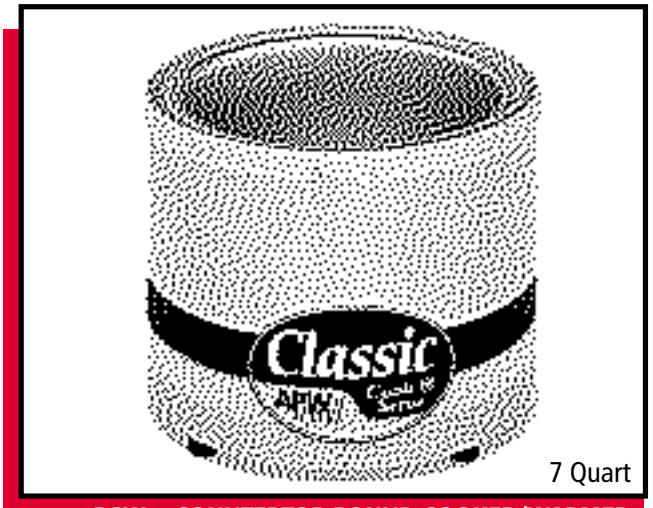
Reliability backed by the Industry's Best Warranty

- This APW Wyott Warming Equipment is backed by a 1-year Parts and Labor warranty, including our "Enhanced Warranty" service that replaces new units with certain product issues through the convenience of direct factory shipments.

- Certified by the following agencies:

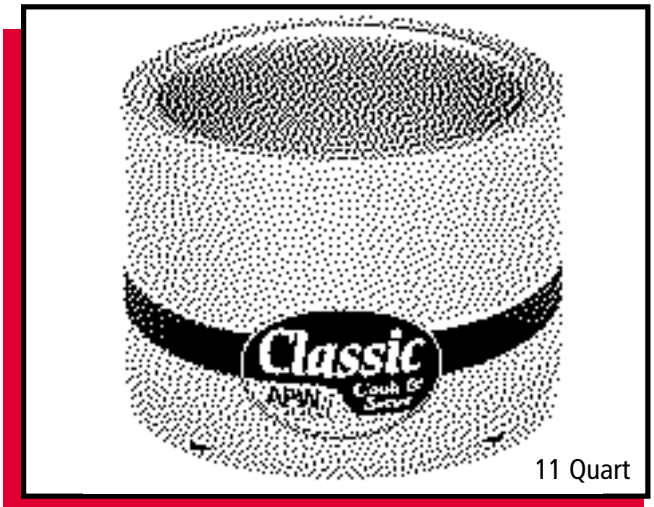
Option:

- Special Packages Includes Inset and Ladle



7 Quart

RCW-7 COUNTERTOP ROUND COOKER/WARMER



11 Quart

RCW-11 COUNTERTOP ROUND COOKER/WARMER

APW Wyott Design Features

- 7 qt. (RCW-7) or 11 qt. (RCW-11) capacity.
- Stainless steel housing with stainless steel liner.
- Thermostatic control.
- Raised liner edge (marine lip) prevents outside condensation.
- Electric low watt density element provides fast, even heat.
- Wet or dry operation.
- Uses standard insets and covers (not included).

See reverse side for product specifications.

MAX INDUCTION™

Countertop, Portable, *Hold-Only* Induction Warmer With Titanium Colored, Stainless Base

SM-651C-T (110 Volt / US)

[EC] Electric Requirements:

Model	Voltage	Phase	Hertz	Watts	Amps	Plug
SM-651C-T	110-120	1	50-60	650	5.4	NEMA 5-15P (6’ Cord)

Key Dimensions & Shipping Information:

Model	Unit Width	Unit Length	Unit Height	Shipping Weight *	Single Unit Shipping Carton *		
					Width	Length	Height
SM-651C-T	12.5”	16”	3-1/8”	13 lbs.	15-1/2”	18”	4-1/2”

* SM-651C-T Two Unit Case Pack: Weight = 29 lbs. (13.1 kg); Length = 22” (559 mm); Width = 19” (483 mm); Height = 16” (406 mm)

Notes & Conditions:

1. Ensure that you have dedicated power wherever you are planning to use your induction warmer. Each warmer draws 5.4 Amps. Up to three units can operate from one single, 20 Amp, dedicated circuit (US Models).
2. For optimum performance, allow 4” (102 mm) rear and side clearance for good air circulation. ***Your induction warmer must have proper ventilation at all times.*** Do not place your induction unit next to any appliance that thows heat; such as a stove, oven or fryer. Actual range temperature may vary due to a number of variables, such as ambient temperature in the immediate surrounding area, content and volume of food being heated or cooked, and whether or not you are using a lid on the serving vessel. Refer to your Operations Manual for steps on how to properly clean and maintain your induction warmer.
3. This induction warmer requires the use of ferrous metal, induction-ready cookware.

Amana Commercial Microwave Model RCS10TS

Model RCS10TS shown

Medium Volume

This category of microwave is ideal for...

Applications:

- Pizza restaurants
- Casual dining
- Clubs
- Deli

Defrost:

- Defrosts most frozen food products

All ACP, Inc. commercial ovens are backed by our Culinary Center. Call us with any question regarding food preparation, menu development and cooking times. 866-426-2621.

Power Output

- 1000 watts of power.
- Five power levels for consistent, delicious results for frozen, refrigerated and fresh foods - from the freezer to table in minutes.

Easy to Use

- Up to 100 programmable menu items simplifies cooking and ensures consistent results.
- Four stage cooking option for easy one-touch cooking.
- Multiple quantity pad calculates the proper cooking times for multiple portions.
- User friendly touch controls are easy to use.
- Time entry option for added flexibility.
- Digital display with countdown timer for simple operation and "at-a-glance" monitoring.
- Braille touch pads are ADA compliant.
- See-through door and lighted interior for monitoring without opening the door.
- 1.2 cubic ft. (34 liter) capacity accommodates a 14" (356 mm) platter, prepackaged foods and single servings.
- Stackable to save valuable counter space.

Easy to Maintain

- Stainless steel exterior and interior for easy cleaning and a professional look.
- Non-removable air filter protects oven components.
- Constructed to withstand the foodservice environment.
- Backed by the ACP, Inc. 24/7 ComServ Support Center, 866-426-2621.
- ETL Listed.

Specifications
Commercial microwave 10 touch pad control panel shall be programmable with the ability to program up to 100 menu items with two multiple portions. Touch pad shall include Braille for ADA compliance. Cooking timer shall be 60 minute, countdown style with a time entry option and an adjustable end of cycle audible signal. There shall be 5 power levels, including defrost and 4 cooking stages. Microwave output shall be 1000 watts distributed by one magnetron with a rotating top antenna to provide superior even heating throughout the cavity. Durable door shall have a tempered glass window and a grab and go handle with a 90°+ opening for easy access. An interior light shall facilitate monitoring without opening the door. The large 1.2 cubic ft. (34 liter) cavity shall accommodate a 14″ (356 mm) platter. Interior ceramic shelf shall be sealed and recessed on oven bottom to reduce plate-to-shelf edge impact. Oven shall have a stainless steel interior and exterior and be stackable to save counter and shelf space. Front air filter shall be permanently affixed to the front of the oven and have a clean filter reminder. Microwave oven shall comply with standards set by the U.S Department of Health and Human Services, UL923 for safety and NSF4 for sanitation.

Turn mild-mannered guests into waffle fanatics.

Guests love freshly baked waffles!

Hot, delicious waffles are ready in just two minutes. A premium breakfast option compared to cold cereals and muffins, waffles generate higher guest satisfaction scores — and more repeat customers.

You'll love the savings!

Save 37¢ per guest per day when you add self-serve waffles to your breakfast bar.

HEARTLAND FOOD PRODUCTS

The pioneer in self-serve waffles.

Self-serve Waffle Program

FOR HOTELS, RESTAURANTS, INSTITUTIONS

Little Bulldog Waffle Baker

Two-minute **continuous** bake time (even during peak breakfast periods). Space-saving design (smallest footprint in the industry). Computer-controlled temperature and bake time. Teflon® coated baking grids.

Dimensions
Width: 10"
Depth: 14 1/2"
Height: 8"
Open: 20"
Weight: 18 lb.

Power requirements:
120 Volts AC
1500 watts – 12.5 amps

Award-winning Waffle Mixes

Add-water mixes available in 2 lb. and 5 lb. sizes to reduce discards. Add-water mixes have 20% greater yield (certified independent research study). Lowest portion cost in the industry.

Mix Flavors and Pack Sizes

Description	Pack	Yield	SKU
Malted Vanilla*	6/5 lb.	195	1001
Complete	15/2 lb.	195	1006
Malted Vanilla	6/5 lb.	216	1004
Add butter	12/2.5 lb.	216	1009
Malted Vanilla	8/3.75 lb.	280	1008
Add eggs & butter			
FlavorKakes!™	6/5 lb.	195	See below
Banana (SKU #5002), Apple Cinnamon (SKU #5003), Blueberry (SKU #5004), Brownie (SKU #5005)			
Sweet Cream Buttermilk Pancake	6/5lb.	195	2001

***Ingredients:** Wheat flour, cornmeal, vegetable oil, sugar, whole egg, leavening, soy flour, malt, nonfat milk, salt, artificial flavor.

Self-serve Waffle Program

Upgraded chrome-plated accessories retain appearance through a lifetime of demanding service. Self-serve display holds 15 pre-measured batter cups for easy use by customers. See-through sneeze guard.

Self-serve Display:
Width: 12 1/2"
Depth: 15 3/4"
Height: 8 1/2"

Mixing and Baking Accessories

Batter takes just minutes to prepare – and only two items to clean up. Add water to *fill line* indicated on mixing pitcher, add one pre-measured package of waffle mix, blend with wire whisk, and fill 12 portion cups. Simple!

Outstanding Customer Service

Heartland's network of independent distributors has a stake in providing the absolute best customer service in the industry.
Give us a call. We'll set you up tomorrow!

QCS1 SERIES
COMPACT CONVEYOR TOASTER

QCS Features/Benefits:

- Patented forced convection system keeps the toaster cool to the touch and extends the life of critical components. The forced convection system increases productivity by re-circulating pre-heated air into toasting chamber.
- Quartz infrared heaters provide faster, more consistent heating than traditional heating elements.
- Compact - requires only 14-¼" of counter space and our patented forced convection system allows the unit to be placed against a wall. Other toasters have louvers requiring additional counter space.
- Highest production of any compact toaster -
  QCS1-350 toasts up to 350 slices per hour
  QCS1-500B toast up to 500 bagel halves per hour
- Easy to use control panel takes the guesswork out of speed control settings.
- Variable speed control for perfect color and texture of bread, bagels, English muffins and more!
- Energy efficient operation with power saver switch that reduces electricity consumption by 75%. And our quartz heaters return to full power in seconds vs. minutes for metal-sheathed elements.
- Extended conveyor belt for easy loading and large warming area for higher production.
- Safe load up area with full width front burn guard and cool to the touch exterior.
- "Smart" crumb tray keeps the bread crumbs from falling under the toaster.
- Heated holding area to keep toast at the perfect temperature.
- Hi-limit switch prevents toaster from overheating protecting critical component parts.
- 24 hours 7 days a week technical support by Holman technicians.
- 120V - plugs in anywhere.

QCS1-350

Applications:

Holman's QCS compact conveyor toaster has been designed and engineered for the budget minded small volume operation. The QCS toaster is compact and versatile requiring minimal counter space and delivers perfect toast, bagels, buns, English muffins, frozen waffles and more for about the price of a pop up toaster.

QCS1-500B

Quality Construction:

Holman designs every toaster to stand up to the most rigorous foodservice demands. Stainless steel construction for long lasting durability. Heavy-duty motor, drive chain and conveyor speed control for superior reliability. Conveyor belt tension system for smooth and quiet operation. High performance Quartz Infrared Heaters for superior toasting performance and reliability. Units are easy to disassemble with one-piece cover for cleaning and service. Toasters are furnished with 1" adjustable legs and 4' cord and a standard NEMA 5-15 plug for plug in installation in a grounded 120V outlet.

Warranty:

Holman's conveyor toasters are covered by a one-year parts and labor warranty.

*When a BUNN is machine rated 120/208-240V, 120/208V or 120/240V, the higher voltage is the supply voltage needed to power the machine. The 120V is there to supply power to some components rated 120V in the machine, but it is not the supply voltage and would not power the machine if the machine is marked with the before mentioned ratings.

Slim Jim® Container

Combine efficiency and ease of handling with the 23 gallon Rubbermaid Slim Jim® Container, now available with optional handles. Positioned high on the container, the large handles are easy to grasp and help give improved leverage and control for lifting and emptying. For smaller volume requirements or where full container lifting weight is a concern, choose the 15.9 gallon Slim Jim® Container. Interchangeable, color-coded Recycling Tops fit both container sizes and help encourage effective waste separation. An innovative linking trolley system can be used to transport multiple Slim Jim® containers in one trip or individually as a dolly.

Make your operation productive and efficient with the Slim Jim® Containers,Tops and Trolley System– the strongest link in your waste separation program!

Containers come in two capacities for versatility to fit your needs.

Linking trolleys detach easily by pushing front toeplate.

Color-coded tops encourage effective separation of recyclable waste: blue top with slot for paper, green and brown tops with holes for bottles and cans, gray and yellow tops for general refuse.

Large handles positioned high on the Slim Jim® container give leverage and control.

Durable, lightweight plastic construction provides long life without the weight, sharp edges and rusting common with some metal containers.

FEATURES:

One piece **Deep Drawn** sink bowl design.

All sink bowls have a large liberal radii with a minimum dimension of 2" and are rectangular in design for increased capacity.

CONSTRUCTION:

All TIG welded.

Welded areas blended to match adjacent surfaces and to a satin finish.

Die formed Countertop Edge with a 3/8" No-Drip offset.

One sheet of stainless steel is used. There are no welded seams other than corners.

MECHANICAL:

Faucet supply is 1/2" IPS male thread hot and cold.

K-59 splash mounted 4" O.C. gooseneck faucet chrome plated furnished with aerator.

K-6 stainless steel basket drain 1-1/2" IPS.

K-26 lever operated drain and built-in overflow with plastic overflow tube and spring clamps.

7-PS-14 P-Trap is 1 1/2" chrome plated.

7-PS-12 Soap Dispenser.

Towel dispenser with hinged towel box. Unit uses standard C-fold towels.

Sink bowl is 10" x 14" x 5".

MATERIAL:

Heavy gauge type 304 series stainless steel.

Wall mounting bracket is Galvanized and of offset design.

All fittings are brass / nickel plated unless otherwise indicated.

Amana Commercial Microwave Model RCS10TS

Model RCS10TS shown

Medium Volume

This category of microwave is ideal for...

Applications:

- Pizza restaurants
- Casual dining
- Clubs
- Deli

Defrost:

- Defrosts most frozen food products

All ACP, Inc. commercial ovens are backed by our Culinary Center. Call us with any question regarding food preparation, menu development and cooking times. 866-426-2621.

Culinary Center ACP

Power Output

- 1000 watts of power.
- Five power levels for consistent, delicious results for frozen, refrigerated and fresh foods - from the freezer to table in minutes.

Easy to Use

- Up to 100 programmable menu items simplifies cooking and ensures consistent results.
- Four stage cooking option for easy one-touch cooking.
- Multiple quantity pad calculates the proper cooking times for multiple portions.
- User friendly touch controls are easy to use.
- Time entry option for added flexibility.
- Digital display with countdown timer for simple operation and "at-a-glance" monitoring.
- Braille touch pads are ADA compliant.
- See-through door and lighted interior for monitoring without opening the door.
- 1.2 cubic ft. (34 liter) capacity accommodates a 14" (356 mm) platter, prepackaged foods and single servings.
- Stackable to save valuable counter space.

Easy to Maintain

- Stainless steel exterior and interior for easy cleaning and a professional look.
- Non-removable air filter protects oven components.
- Constructed to withstand the foodservice environment.
- Backed by the ACP, Inc. 24/7 ComServ Support Center, 866-426-2621.
- ETL Listed.

Specifications
Commercial microwave 10 touch pad control panel shall be programmable with the ability to program up to 100 menu items with two multiple portions. Touch pad shall include Braille for ADA compliance. Cooking timer shall be 60 minute, countdown style with a time entry option and an adjustable end of cycle audible signal. There shall be 5 power levels, including defrost and 4 cooking stages. Microwave output shall be 1000 watts distributed by one magnetron with a rotating top antenna to provide superior even heating throughout the cavity. Durable door shall have a tempered glass window and a grab and go handle with a 90°+ opening for easy access. An interior light shall facilitate monitoring without opening the door. The large 1.2 cubic ft. (34 liter) cavity shall accommodate a 14″ (356 mm) platter. Interior ceramic shelf shall be sealed and recessed on oven bottom to reduce plate-to-shelf edge impact. Oven shall have a stainless steel interior and exterior and be stackable to save counter and shelf space. Front air filter shall be permanently affixed to the front of the oven and have a clean filter reminder. Microwave oven shall comply with standards set by the U.S Department of Health and Human Services, UL923 for safety and NSF4 for sanitation.

Indigo NXT Series iT0500 Ice Machine on D570 Bin

*Ice machine and Bin sold separately

Designed for operators who know that ice is critical to their business, the Indigo NXT Series ice machine's preventative diagnostics continually monitor itself for reliable ice production. Improvements in cleanability and programmability make your ice machine easy to own and less expensive to operate.

- **New levels of Performance** – Showcasing an average of 12% lower energy consumption and a 23% reduction in condenser water usage. This translates into lower cost of ownership over the life of your machine.
- **easyTouch® Display** - New icon based touch screen takes the guess work out of owning and operating an ice machine.
- **Programmable Ice Production –** Now its super easy to program your ice machine to be off at certain times of the day to save money with fluctuating electrical rates. Also programmable by daily ice production volume and night time programming.
- **Easy to Clean Food Zone** – Hinge front door swing out for easy access. Removable water-trough, distribution tube, curtain, water probe and water pump for fast and efficient cleaning. Selected components are made with AlphaSan® antimicrobial.
- **Intelligent Diagnostics** – Provides 24 hour preventative maintenance and diagnostic feedback for trouble free operation.
- **Acoustical Ice Sensing Probe** – Unique patented technology allows for reliable operation in challenging water conditions and environments
- **DuraTech® Exterior** – Provides superior corrosion resistant above stainless steel. Innovative clear-coat resists fingerprints and dirt making it easier to keep clean.
- Available **LuminIce® II Virus and Bacteria Inhibitor** – Controls viruses, bacteria, mold and yeast within the food zone to keep the ice machine clean longer. A new sanitation icon lets you know the operational status.
- **Active Sense** – insures consistent ice harvest in all environmental conditions. This software works in conjunction with the acoustical ice sensing probe improving reliability and performance.

Ice Machine Electric

115/60/1 standard
(208-230/60/1also available)

Minimum circuit ampacity:

Air-cooled: 115v : 11.5, 208-230v : 5.1
Water-cooled: 115v : 10.8

Maximum fuse size:

Air Cooled: 15 amps
Water cooled: 15 amps

Specifications

BTU Per Hour:
3,800 (average),
and 6,000 (peak)

Refrigerant:
R410A CFS - Free
Lowers global warming by 48%

Operating Limits:

- Ambient Temperature Range: 40 to 110 F (4.4 to 43.3 C) Water Temperature Range: 40 to 90 F (4.4 to 32.2 C)
- Potable Water Pressure: Min. 20 psi (137.9 kPA) Max. 80 psi (551.1 kPA)
- Condenser Water Pressure: Min. 20 psi (137.9 kPA) Max. 276 psi (1902.95 kPA)

SPA-312 • SFA-292 Ice Dispensers

Model ☐ SPA-312 ☐ SFA-292 ADA Compliant

SPA 312 Model

Designed for filling both ice buckets and glasses. The touch-less lever activated ice chute means the ice bucket or glass is used to dispense ice, not a hand.

Clearance from grate to bottom of the chute 9.5" (24.13 cm)

Indigo NXT iT0450 Ice Machine
SPA-312 Ice Dispenser
(Ice Machine and Dispenser sold separately)

Indigo NXT iT0450 Ice Machine
SFA-292 Ice & Water Dispenser
(Ice Machine and Dispenser sold separately)

SFA 292 Model

Designed for filling both ice buckets and glasses with a built in Water Valve. The touch-less lever activated ice chute means the ice bucket or glass is used to dispense ice, not a hand.

Clearance from grate to bottom of chute 9.5" (24.13 cm)

Standard Features

- 180 lbs. (82 kgs.) ice storage capacity. Accepts 22" (55.88 cm) or 30" (76.2 cm) wide Manitowoc ice machine.
- Only 30" (76.2 cm) wide, 32" (81.28 cm) deep, and 82" high (208.28 cm).
- The touch-less lever eliminates the need to touch a hand to the machine to dispense ice.
- Efficient built-in agitator assures 100% dispensing Oversized drain pan collects larger quantity of ice overflow.
- DuraTech™ exterior provides superior corrosion resistance. Stainless finish with innovative clear-coat resists fingerprints and dirt.
- With Indigo and Indigo NXT ice machines you can program the ice machines to be off certain hours of the day so that while the hotel guests are sleeping, the ice machine can be too

Warranty

- 5-year parts and 5-year labor coverage on ice machine evaporator.
- 5-year parts and 3-year labor coverage on ice machine compressor.
- 3-year parts-and-labor coverage on all other ice machine and dispenser components.

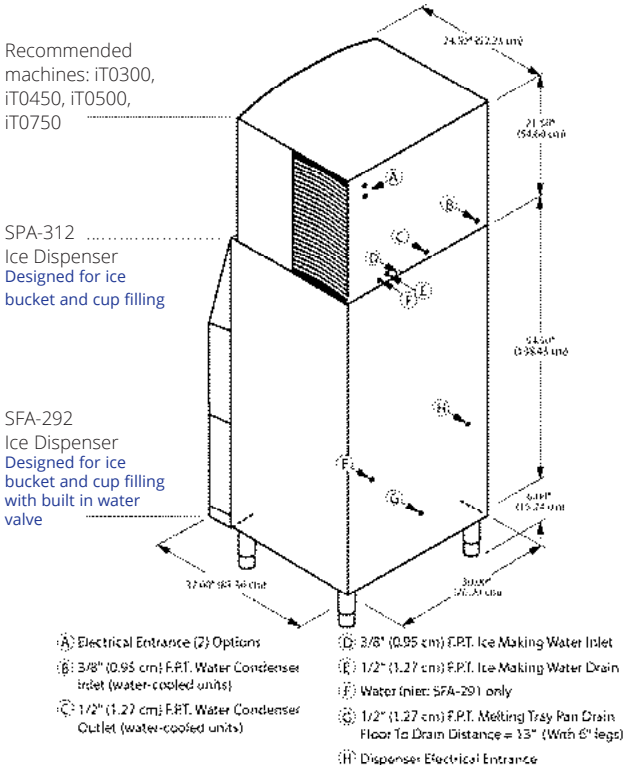
SPA-312 • SFA-292 Ice Dispensers

MANITOWOC®

SPA-312 • SFA-292 Ice Dispensers



Installation Note *- Dispensers have no minimum clearance, when installing an ice machine/dispenser combination follow the clearance requirements for the ice machine being installed.*

Ice Machine Electric

Note: Dispenser will accept single 22" or 30" wide ice machine.* Ice machine ordered separately. Choose Dice or Half Dice cube size. Refer to ice machine specification sheet for electrical and complete AHRI standard ratings.

Dispenser Electric:

SPA 312 & SFA 291 available in 115/60/1, 230/50/1

Maximum Circuit Fuse Size:

15.0 amps. HACR-type circuit breakers can be used in place of fuses.

Dispenser Electrical Connection:

6' power cord, rated 125 VAC, 16-3 conductors with standard 3-prong, straight-blade, ground-type plug (NEMA configuration 5-15P).

Motor:

1.6 amps maximum. Permanently lubricated.

Service Access:

Dispenser door removes easily to access components.

Model Options:

SPA-312 touch-less activated lever only

SPA-292 touch-less activated lever with water valve

*22" wide ice machines on 30" wide dispensers require K-00365 Adapter & K-00348 Baffle.

Glass Door Merchandiser:
Swing Door Refrigerator with Hydrocarbon Refrigerant~True Standard Look Version 01

GDM-12-HC~TSL01

- The world's #1 manufacturer of glass door merchandisers.
- Environmentally friendly R290 hydrocarbon refrigerant. Zero (0) ozone depletion potential (ODP) & three (3) global warming potential.
- Energy efficient, factory balanced, refrigeration system holds 33°F to 38°F (.5°C to 3.3°C).
- Exterior - non-peel or chip black powder coated cold rolled steel; durable and permanent.
- Interior - attractive, NSF approved, white aluminum interior liner with stainless steel floor.
- Self closing door. Positive seal, torsion type closure system.
- "Low-E", double pane thermal insulated glass door assembly with mitered plastic channel frame. The latest in energy efficient technology.
- LED interior lighting provides more even lighting throughout the cabinet. Safety shielded.
- Entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).

Bottom mounted units feature

- "No stoop" lower shelf to maximize product visibility.
- Easily accessible condenser coil for cleaning.

Model:
GDM-12-HC~TSL01

Glass Door Merchandiser:
Swing Door Refrigerator with Hydrocarbon Refrigerant~True Standard Look Version 01

STANDARD FEATURES

DESIGN
- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, and lower utility costs in an attractive merchandiser that brilliantly displays packaged food and beverages.

REFRIGERATION SYSTEM
- Factory engineered, self-contained, capillary tube system using environmentally friendly R290 hydrocarbon refrigerant that has zero (0) ozone depletion potential (ODP), & three (3) global warming potential (GWP).
- High capacity, factory balanced refrigeration system that maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C) for the best in food preservation.
- State of the art, electronically commutated evaporator and condenser fan motors. ECM motors operate at higher peak efficiencies and move a more consistent volume of air which produces less heat, reduces energy consumption and provides greater motor reliability.
- Bottom mounted condensing unit positioned for easy maintenance. "No stoop" lower shelf maximizes visibility by raising merchandised product to higher level.

CABINET CONSTRUCTION
- Exterior - non-peel or chip black powder coated cold rolled steel; durable and permanent.
- Interior - attractive, NSF approved, white aluminum liner with stainless steel floor.
- Insulation - entire cabinet structure is foamed-in-place using a high density, polyurethane insulation that has zero ozone depletion potential (ODP) and zero global warming potential (GWP).
- Welded, heavy duty steel frame rail, black powder coated for corrosion protection.
- Frame rail fitted with leg levelers.
- Door sign decal. Variety of decal options available.

DOOR
- "Low-E", double pane thermal insulated glass door assembly with mitered plastic channel frame. The latest in energy efficient technology.
- Door fitted with 12" (305 mm) long integrated handle.
- Self closing door. Positive seal, torsion type closure system.
- Magnetic door gasket of one piece construction, removable without tools for ease of cleaning.

SHELVING
- Three (3) adjustable, heavy duty PVC coated wire shelves 20⅝"L x 17½"D (524 mm x 445 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on ½" (13 mm) increments.

LIGHTING
- LED interior lighting provides more even lighting throughout the cabinet. Safety shielded.

MODEL FEATURES
- Evaporator is epoxy coated to eliminate the potential of corrosion.
- See our website www.truemfg.com for latest color and sign offerings.
- Convenient clean-out drain built in cabinet floor.
- Listed under NSF/ANSI Standard 7 for the storage and/or display of packaged or bottled product.

ELECTRICAL
- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase, 15 amp dedicated outlet. Cord and plug set included.

115/60/1
NEMA-5-15R

OPTIONAL FEATURES/ACCESSORIES
Upcharge and lead times may apply.
- ❑ White exterior.
- ❑ Stainless steel exterior.
- ❑ Black aluminum interior liner with black shelving.
- ❑ Stainless steel interior liner.
- ❑ 2½" (64 mm) diameter castors.
- ❑ Red wine thermostat.
- ❑ White wine thermostat.
- ❑ Chocolate thermostat.
- ❑ Barrel Locks located in grill assembly (requires one per door)
- ❑ Additional shelves.
- ❑ TrueFlex gravity feed organizers.
- ❑ Pricing strips.

STANDARD FEATURES

DESIGN
- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, and lower utility costs in an attractive merchandiser that brilliantly displays packaged food and beverages.

REFRIGERATION SYSTEM
- Factory engineered, self-contained, capillary tube system using environmentally friendly (CFC free) 134A refrigerant.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser; maintains cabinet temperatures of 33°F to 38°F (.5°C to 3.3°C).
- Sealed, cast iron, self-lubricating evaporator fan motor and larger fan blade gives True merchandisers a superior low velocity, high volume airflow design. This unique design insures faster temperature pull down of warm product, colder holding temperatures and faster recovery in high use situations.

CABINET CONSTRUCTION
- Exterior - non-peel or chip white laminated vinyl; durable and permanent.
- Interior - attractive, NSF approved, white aluminum liner. 300 series stainless floor.
- Insulation - entire cabinet structure is foamed-in-place using high density, CFC free, polyurethane insulation.
- Cabinet fitted with 2½" (64 mm) legs.
- Door sign decal. Variety of decal options available.

DOOR
- "Low-E", double pane thermal glass door assembly with extruded aluminum frame. The latest in energy efficient technology.
- Door fitted with 15" (381 mm) extruded aluminum handle.
- Self closing door. Positive seal, torsion type closure system.
- Magnetic door gasket of one piece construction, removable without tools for ease of cleaning.

SHELVING
- 2½ adjustable, heavy duty PVC coated wire shelves; two 19 11/16"L x 18"D (501 mm x 458 mm) and one (1) 19 11/16"L x 16½"D (501 mm x 420 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on ½" (13 mm) increments.

LIGHTING
- Safety shielded fluorescent interior lighting.
- Cabinet lighting utilizes electronic ballast and T-8 bulbs for brighter illumination, longer bulb life and increased energy efficiency.

MODEL FEATURES
- Evaporator is epoxy coated to eliminate the potential of corrosion.
- See our website www.truemfg.com for latest color and sign offerings.
- Listed under NSF-7 for the storage and/or display of packaged or bottled product.

ELECTRICAL
- Unit completely pre-wired at factory and ready for final connection to a 115/60/1 phase - 15 amp dedicated outlet. Cord and plug set included.

115/60/1

STANDARD FEATURES

DESIGN
- True's glass door freezers are designed with enduring quality that protects your long term investment.
- True's commitment to using the highest quality materials and oversized refrigeration systems provides the user with colder product temperatures, and lower utility costs in an attractive merchandiser that brilliantly displays frozen food and ice cream.

REFRIGERATION SYSTEM
- Factory engineered, self-contained, capillary tube system using environmentally friendly (CFC free) R404A refrigerant.
- Extra large evaporator coil balanced with higher horsepower compressor and large condenser; maintains -10°F (-23.3°C).
- Sealed, cast iron, self-lubricating evaporator fan motor(s) and larger fan blades give True merchandisers a more efficient low velocity, high volume airflow design. This unique design ensures colder standard temperatures and faster recovery in high use situations.
- Automatic defrost system time-initiated, time-terminated.

CABINET CONSTRUCTION
- Exterior - non-peel or chip white laminated vinyl; durable and permanent.
- Interior - attractive, NSF approved, white aluminum liner with 300 series stainless steel floor.
- Insulation - entire cabinet structure is foamed-in-place using high density, CFC free, polyurethane insulation.
- Cabinet fitted with 2½" (64 mm) legs.
- Back-lit door sign decal. Variety of decal options available.

DOOR
- Triple pane thermal insulated glass door assembly with mitered plastic channel frame.
- Door fitted with 12" (305 mm) long extruded handle.
- Self closing door. Positive seal, torsion type closure system.
- Magnetic door gaskets of one piece construction, removable without tools for ease of cleaning.

SHELVING
- Three (3) adjustable, heavy duty PVC coated wire shelves. Two (2) top shelf dimensions are 19⅝"L x 17"D (501 mm x 432 mm). One (1) bottom shelf dimension is 19⅝"L x 9½"D (501 mm x 235 mm). Four (4) chrome plated shelf clips included per shelf.
- Shelf support pilasters made of same material as cabinet interior; shelves are adjustable on ½" (13 mm) increments.

LIGHTING
- Safety shielded fluorescent interior lighting.
- Cabinet lighting utilizes electronic ballast and T-8 bulbs for brighter illumination, longer bulb life and increased energy efficiency.

MODEL FEATURES
- Evaporator is epoxy coated to eliminate the potential of corrosion.

SPEED QUEEN® MULTI-HOUSING LAUNDRY SOLUTIONS

Top Load Washer

Quantum® Gold Pro

Prep for Card | Coin Drop Installed

Built for Reliable Performance

Speed Queen's two-speed top load washer, defined by its simplicity and its performance, provides everything you need to get the job done – and nothing you don't. Speed Queen's top load washer combines heavy-duty construction with reliable operation proven to stand the test of time. Speed Queen® washers provide maximum energy efficiency and long-lasting performance.

- Touch pad control with sound annunciator
- 27 cycle selections
- Extract speed of 710 RPM spins clothes out drier
- Integrated meter case
- Advanced suspension system
- Easy-to-read digital display
- Cycle programming flexibility
- Multi-level vend pricing
- Individual cycle modifier keys
- Durable stainless steel tub standard
- 3.19 cu. ft. (90.3 liters) wash capacity
- Large capacity meter case standard
- Wash Alert™ capability

Quantum® Gold Pro Control

The Quantum® Gold Pro control delivers a truly premium experience to residents. From intuitive soft touch buttons that walk them through cycle options to multiple actuations (coin, card, mobile) for payment flexibility, this control gives residents the wash and dry options they want, and the revenue potential managers desire.

Rear Control Single Dryer

Coin Slide

Built for Reliable Performance

Speed Queen's Coin Slide single load dryer combines heavy-duty construction with reliable operation proven to stand the test of time. They're designed with less moving parts for one reason: so you'll face fewer maintenance problems and less wear and tear down the road. Our cabinet design maintains the perfect balance of heat, airflow and tumble action for optimal performance and efficiency. The equipment provides an advantage on such issues as energy conservation, equipment breakdowns and vandalism.

- Industry's largest door opening 2.06 sq. ft. (1914 cm²)
- Door is reversible for installation flexibility
- High efficiency exhaust blower with superior airflow 220 cfm (105 liters/sec)
- 100% serviceable from the front
- Space-saving narrow cabinet 26.875" (683 mm)
- Upfront lint filter easy to clean and secured
- Durable galvanized steel cylinder

Coin Slide Control

Coin Slide control offers heavy-duty operation, is easy to use and offers the basic features needed for optimal coin-vended laundry room operations.

Speed Queen
The Proven Performer in Laundry

SPEED QUEEN® MULTI-HOUSING LAUNDRY SOLUTIONS

Rear Control Single Dryer

Coin Slide

Built for Reliable Performance

Speed Queen's Coin Slide single load dryer combines heavy-duty construction with reliable operation proven to stand the test of time. They're designed with less moving parts for one reason: so you'll face fewer maintenance problems and less wear and tear down the road. Our cabinet design maintains the perfect balance of heat, airflow and tumble action for optimal performance and efficiency. The equipment provides an advantage on such issues as energy conservation, equipment breakdowns and vandalism.

- Industry's largest door opening 2.06 sq. ft. (1914 cm²)
- Door is reversible for installation flexibility
- High efficiency exhaust blower with superior airflow 220 cfm (105 liters/sec)
- 100% serviceable from the front
- Space-saving narrow cabinet 26.875" (683 mm)
- Upfront lint filter easy to clean and secured
- Durable galvanized steel cylinder

Coin Slide Control

Coin Slide control offers heavy-duty operation, is easy to use and offers the basic features needed for optimal coin-vended laundry room operations.

SPEED QUEEN® ON-PREMISES LAUNDRY SOLUTIONS

Front Control Front Load Washer

LFNE5BSP115TW01

Front Load Washers

Designed to be everything you never thought a washing machine could be, the revolutionary Speed Queen® front load washers feature an unprecedented amount of cutting-edge innovations to help you improve performance and minimize costs.

- Revolutionary balancing technology redistributes unbalanced load for uninterrupted wash cycles.
- Increase spin speed extracts 440 G-Force to maximize moisture removal and lower drying times.
- 20% increase in capacity with improved water usage to decrease operating costs.
- Redesigned 4-compartment soap dispenser for simplified use and cleaning.

Electronic Homestyle Control

Speed Queen® washers with Electronic Homestyle controls are designed for durability and are easy to operate with intuitive selection buttons and cycle status indicator lights. This control option features a time-remaining display, six preset cycle buttons, cycle adjustability for temperature, load size and soil levels along with additional cycle enhancer options for a pre-wash or second rinse cycle.

Receptacles and Switches

Ref	ID	Description
EL-001-LM	Switch	Rocker style light switches
EL-002-LM	Wiring Devices	Receptacle and Wallplate/Faceplate for outlets, Decora
EL-003-LE	Wiring Devices	adorne Series Dual USB Plus-Size Outlet Combo, Tamper Resistant

Integrated Automation

Ref	ID	Description
IA-001-A1-HW	Integrated Automation Control	Master Light Switch and HVAC Unit controlled by Passive Infrared Motion Sensor Thermostat - Option #1
IA-001-A2-HW	Integrated Automation Control	Thermostat can be connectable to the HVAC unit wirelessly via RF signals. This can be an advantage for renovation projects by eliminating the need for hard-wiring between equipment - Option #2 Model e529 Thermostat an Upgrade Option to Model e528. This Thermostat is for use with an RF connection to HVAC Unit, and is also is connectable to the Upgrade Option for the Central Interface (CI) Server Application wirelessly via RF signals.
IA-001-A3-HW	Integrated Automation Control	Central Interface (CI) Server Application - Option #3 A central interface server application and remote room monitoring/communications. This upgrade option can provide an interface to the Property Management System (Fosse and others), and includes features such as: - Remote room monitoring and control capabilities. - Alarm reports for malfunctioning equipment. - Instant control of temperature setback parameters and other system settings, - Efficient information presentation to staff and management including real-time room status information, as well as room and property energy trends.
IA-001-AA	Integrated Automation Control	Standard Base System Requirements (Master Light Switch). To meet electrical code for switching off code required guestroom light fixtures (permanently wired light fixtures and switched receptacles, not in bathroom) at guest departure.
IA-001-HW	Integrated Automation Control	Standard Base System Requirements (Master Light Switch). To meet electrical code for switching off code required guestroom light fixtures (permanently wired light fixtures and switched receptacles, not in

CGR-001-KS	Corner Guard	Rigid Vinyl Corner Guard, 90 Degrees

Grout

Ref	ID	Description
GR-001-LA	Grout	High Performance Epoxy Grout
GR-004-LA	Grout	High Performance Epoxy Grout, Sanded
GR-005-LA	Grout	High Performance Epoxy Grout, Sanded
GR-007-LA	Grout	High Performance Epoxy Grout

Paint - Ceiling

Ref	ID	Description
PTC-001-SW	Paint - Ceiling	Interior Ceiling & Soffit Paint
PTC-002-SW	Paint - Ceiling	Interior Ceiling & Soffit Paint
PTC-003-SW	Paint - Ceiling	Interior Ceiling & Soffit Paint
PTC-004-SW	Paint - Ceiling	Interior Ceiling & Soffit Paint
PTC-005-SW	Paint - Ceiling	Interior Ceiling & Soffit Paint

Paint - Wall

Ref	ID	Description
PTW-001-SW	Paint - Wall	Interior Gypsum Board Wall Paint
PTW-002-SW	Paint - Wall	Interior Gypsum Board Wall Paint
PTW-003-SW	Paint - Wall	Interior Gypsum Board Wall Paint
PTW-007-SW	Paint - Wall	Interior Gypsum Board Wall Paint
PTW-008-SW	Paint - Wall	Interior Gypsum Board Wall Paint
PTW-009-SW	Paint - Wall	Interior Gypsum Board Wall Paint
PTW-010-SW	Paint - Wall	Interior Gypsum Board Wall Paint
PTW-017-SW	Primer - Wall	Interior Gypsum Board Wall Primer
TXF-001-USG	Textured Finish	Unaggregated texture coating applied by spary, brush or roller.

Resilient Base

Ref	ID	Description
RB-002-SHI	Resilient Base	Straight vinyl wall base

Stone

Ref	ID	Description
CT-001-BS	Simulated Stone	Engineered Quartz Countertop with eased edge
CT-001-DA	Simulated Stone	Engineered Quartz Countertop with eased edge
CT-001-DST	Simulated Stone	Engineered Quartz Countertop with eased edge
CT-001-JG	Simulated Stone	Engineered Quartz Countertop with eased edge
CT-001-MG	Simulated Stone	Engineered Quartz Countertop with eased edge
CT-001-WIL	Simulated Stone	Engineered Quartz Countertop with eased edge

Thresholds

Ref	ID	Description
TH-001-A1-BS	Threshold	Marble Threshold
TH-001-JG	Threshold	Marble Threshold
TH-002-SCH	Threshold	Sloped tile flooring transition
TH-003-BU	Threshold	Standard "T" edge threshold with metal track and pins

Tile - Base

Ref	ID	Description
TB-001	Tile Base	Guestrooms Accessible Baths Roll-In Shower

Tile - Floor

Ref	ID	Description
TF-001-CT	Tile Floor	Mosaic Tile (Alternate to Cast Polymer Roll-In Shower Base)
TF-001-DA	Tile Floor	Mosaic Tile (Alternate to Cast Polymer Roll-In Shower Base)
TF-001-DST	Tile Floor	Mosaic Tile (Alternate to Cast Polymer Roll-In Shower Base)
TF-004-A1-CT	Tile Floor	Porcelain Plank Floor Tile, Running Bond Pattern
TF-004-A1-DA	Tile Floor	Porcelain Plank Floor Tile, Running Bond Pattern
TF-004-A1-DST	Tile Floor	Porcelain Plank Floor Tile, Running Bond Pattern
TF-004-A1-TC	Tile Floor	Plank Floor Tile

Tile - Wall

Ref	ID	Description
TW-001-CT	Wall Tile	Glazed Porcelain Backsplash Tile
TW-001-DA	Wall TIle	Glazed Porcelain Backsplash Tile
TW-001-DST	Wall Tile	Ceramic Backsplash Wall Tile
TW-005	Porcelain Tile	Guestroom Baths Accessible Roll-In Shower Surround

Transitions Strips

Ref	ID	Description
TS-001-SCH	Transition Strip	Metal Edge Trim
TS-002-SCH	Transition Strip	Finishing edge-protection profile, metal tile trim.

Trim

Ref	ID	Description

Wood Finish

Ref	ID	Description

Wood Trim

Ref	ID	Description
WTR-001-MT	Wood Trim	Ultralight Round Edge MDF Casing

Laminate

Ref	ID	Description
LA-002-WIL	Plastic Laminate	General purpose laminate product
LA-003-WIL	Plastic Laminate	General purpose laminate product
LA-006-WIL	Plastic Laminate	Thermally Fused Melamine

Underlayment

Ref	ID	Description
UL-002-LA	Tile Underlayment	High performance, pliable, light weight peel and stick membrane underlayment system that minimizes impact noises and the transmission of cracks
UL-003-LA	Tile Underlayment	Premium quality, high yielding, fast-drying, fiber reinforced, cement-based underlayment for skim-coating, smoothing and leveling floor substrates
UL-004-LA	Tile Underlayment	Lightweight one-step, polymer fortified, Large and Heavy Tile mortar for interior and exterior installation for walls and floors

TownePlace Suites Generation 5 Guestroom Preamble

PREAMBLE

Instruction For Use of Documentation

The total required information provided to design and build a TownePlace Suites by Marriott is contained in the criteria documents identified below which relay standardized public space, guestrooms, guestroom corridors, back of house and building site + exterior. Real Living is the decor package for the Public Space and Guestrooms.

Comprehensive Criteria Documents for TownePlace Suites by Marriott are:

1. Design Standards
2. Design Guideline Drawings
3. Specifications as indicated below:
   - **A. Building Product Manual (BPM)**
     Volume 1 - Building Site + Exterior
     Volume 2 - Public Space
     Volume 3 - Guestroom
     Volume 4 - Food Service & Guest Laundry Equipment
   - **B.** Exterior Signage Specifications
   - **C.** Interior Signage Specifications
   - **D.** Interior Design Specification Manual

Alternate Sources of Information:

1. Change Bulletins
2. Additional Tools

Description Follows:

1. Design Standards provide a written macro view of the overall design elements required for TownePlace Suites by Marriott.
2. The Design Guideline Drawings - provide more specific design direction via drawings to supplement the Design Standards.
3. The Interior Design Specification Manual lists items required that are generally referred to as Furniture, Fixture, & Equipment or FF&E items. These items and the accepted suppliers listed, have been contracted by Marriott and can be supplied through Marriott's procurement division.
4. The Building Product Manual (BPM) lists all the finishes required for the building and the building products that are typically installed and supplied by the General Contractor. This document must be used in conjunction with the drawings for the contractor supplied items as specific dimensions and criteria are referenced in both documents. Because of the high quality of design expected for TownePlace Suites by Marriott, Marriott has specified acceptable suppliers who have worked closely with Marriott on the initial TownePlace Suites Design. All of these documents are integral elements of the complete design and construction information. The project architect is responsible for incorporating all components of the criteria documents in the development of any TownePlace Suites by Marriott Project.

Use of Drawings

Building Product Manual (BPM) mark numbers and Interior Design Specification Manual x-ref numbers are shown on the Design Guideline Drawings as a base number only. Refer to the BPM and Interior Design Specification Manual for mark numbers and x-ref numbers plus a suffix for product and FFE alternates and additional acceptable manufacturers.

** In the BPM **acceptable manufacturers** of same material/product are indicated by a suffix of "XX", the abbreviation of the manufacturer's name. (i.e., PL-101-MO for MOEN or PL-101-KO for Kohler). If there aremultiple manufacturers, and the item looks very similar, and it is only a matter of style, then it is considered avariation of manufacturer and not an alternate and would receive the mfr. suffix.*

** In the BPM **alternate** materials/products/designs are indicated by a suffix of "A1", "A2", "A3", etc. indicating "alternate", following the base number (i.e., PL-101-A1).*

General Compliance Requirements

The Owner's / Franchisee's Consulting Design Professional shall be responsible for verifying and complying with all applicable laws, covenants, codes, ordinances, rules, regulations, restrictions, etc. The Design Professional shall pay close attention to the requirements of the federal accessibility law, Americans with Disability Act (ADA), local and state accessibility regulations, and the applicable fire, life safety requirements. It is also the responsibility of each hotel owner to ensure that all products have been adjusted in dimension, quantity and hand suit the specific site conditions.

GENERAL NOTES

1. All images, photographs, renderings of specified items contained in this specification package area for general design intent and reference only.
2. Refer to the preamble for terms, conditions, abbreviations, definitions, responsibilities, and general guidelines for all specified items.
3. Refer to drawings for exact locations and/or mounting heights of furniture, fixtures, and equipment. In the event of a discrepancy between drawings and specifications, please contact Marriott International immediately for written clarification.
4. Submittal of shop drawings & finish samples to Marriott International for review and written approval is required for any item supplied by a vendor other than the specified source.
5. Design Documentation firm to verify that all flammability requirements are met for property location. The requirements noted within this specification are general and local flammability may be more stringent.
6. Install all products and finishes per manufacturer's recommendations.
7. Final quantity of items to be based on final plans, room quantity, and final matrix.

Plumbing Fixture and Residential Appliances - General Notes

1. All plumbing fixtures and residential appliances to be of contract quality and suitable for commercial use.
2. Site measurements required.

ABBREVIATIONS

General Schedule Abbreviations:

ADA	Americans with Disabilities Act
AFF	Above Finish Floor
ASTM	American Society of Testing Materials
AWI	American Woodworking Institute
CEF	Corridors, Elevators, and Foyers
CF/CI	Contractor Furnished/ Contractor Installed
COM	Customer's Own Material
GC	General Contractor
GR	Guest Room
GRB	Guest Room Bath
LY	Lineal Yard
MF/MI	Manufacturer Furnished/ Manufacturer
N/A	Installed Not Applicable
NFPA	National Fire Protection Association
NY	Narrow Yards
OF/CI	Owner Furnished/ Contractor Installed
OF/MI	Owner Furnished/ Manufacturer Installed
OF/CI	Owner Furnished/ Owner Installed
RFP	Request for Proposal
SF	Square Feet
SY	Square Yard
UL	Underwriters Laboratory

A. Toilet Accessory Abbreviations:

For your use in utilizing the Toilet Accessories within the Building Product Manuals, the following information is supplied:

1. The Assembly is the type of restroom or bathroom. The Assembly is not recognized by a number.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'TA' for Toilet Accessory Commodity. The first character of the 3-character suffix categorizes each toiletaccessory commodity component, then is numbered sequentially.

   100 – Grab Bars
   200 – Toilet Tissue / Facial Tissue
   300 – Glass Shelf / Iron Board Caddy
   400 – Towel Bar / Towel Ring / Robe Hook
   500 – Soap Dish / Shampoo Dispenser / Shower Accessory Ledge / Shower Footrest
   600 – Shower Curtain Rod / Glass Shower (components)
   700 – Shower Seat / Tub Seat
   800 – Public Restroom (Feminine Napkin Dispenser / Paper Towel Dispenser / Receptacle / Soap Dispenser / Seat Cover)
   900 – Miscellaneous

B. Plumbing Fixture Abbreviations:

For your use in utilizing the Plumbing Fixtures within the Building Product Manuals, the following information is supplied:

1. The Assembly No. contains 3 characters or prefix to define the type of assembly. The 2-character suffix is numericallysequential. Example TUB-01.

TUB - Tub	EWS - Eye Wash
WHL - Whirlpool	MOP - Mop Sink
SHR - Shower	CLO - Cleanout
SNK - Sink	FLD - Floor Drain
SVS - Service Sink	FSK - Floor Sink
WCL - Water Closet	LIT - Lint Interceptor
URN - Urinal	HYD - Hydrant
WCR - Water Cooler	RDR - Roof Drain

2. Mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'PL' for Plumbing Commodity. The first character of the 3-character suffix categorizes each plumbing commodity component, then isnumbered sequentially. Example PL-101, PL-102, etc.

100 – Sinks & Mop Sinks
200 – Faucets
300 – Toilets / Urinal / Water Cooler
400 – Shower Heads
500 – Shower Diverters
600 – Shower Surrounds / Shower Pans / Base / Tub
700 – Shower Doors
800 – Fittings
900 – Miscellaneous (Floor Drains, Clean Outs)

C. Door Hardware Abbreviations:

For your use in utilizing the Door Hardware within the Building Product Manuals, the following information is supplied:

1. The Assembly No. or Door Hardware Type No. contains 1 character or prefix "T". The 2-character suffix is numericallysequential. Example T-01.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'DH' for Door Hardware Commodity. The 3-character suffix is numbered sequentially. Example DH-001,DH-002, etc.

D. Carpet or wall coverings will no longer be specified within the Building Product Manuals. Reference the Interior DesignSpecification Manuals.

BPM (Building Product Manual) Number Nomenclature

(Items are numbered with the item prefix and then consecutive numbers starting with 001 - "Mark Number" unless indicated otherwise)

Openings	Door	DFR-XXX
	Door Frames	DF-XXX
	Door Hardware	DH-XXX
Equipment	Residential Appliances	RA-XXX
	Food Service Equipment	EQF-XXX
	Laundry Equipment	EQD-XXX

Revision Date: **Nov 23, 2022**

Notes

Frames shall be formed with double return backbends to prevent cutting into drywall surface. Frames shall be knocked down, designed to be securely installed in the rough opening after wallboard is applied. Mitered corners shall be reinforced with a wedge lock corner clip to provide a firm interlock of jambs to head. Each jamb shall have an adjustable anchor located 4" from the top of the door opening to hold frame in rigid alignment. Frames shall have a welded in base anchor attaching plate in each jamb for field installation of loose base anchors or frames shall have two (2) dimpled holes in each jamb for anchoring base of frame with screws.

SPECIAL INSTRUCTIONS

Clearances: 1/8" at jambs and heads; 3/4" at bottom; 1/4" at meeting edges of pairs of doors.
Interior Guestroom Door Frames: Continuously welded corners; or Hollow Metal Drywall "Knock-Down" Type door frames; or Prefinished Frames (Timely or Rediframe).

ADVANCE Trillium® RFID Lock

Model 10104334P1
Model 10104335P1

Onity's ADVANCE Trillium lock features a stylish new look in a two-piece modular design, with a low-profile reader designed for today's modern aesthetics.

Advanced Credential Security

Trillium RFID locks include the option to use MIFARE Plus technology, an enhanced credential security for RFID cards.

Easy Upgrade Path

The ADVANCE Trillium lock provides an easy upgrade path where Onity ADVANCE series locks currently are installed – no new door cuts or repainting are required when installing new locks. Properties with Onity ADVANCE locks can update to ADVANCE Trillium locks by installing a new reader, control board, and optional rosette cover. For upgrades from Onity HT locks to ADVANCE Trillium locks, Onity offers standard or custom cover plates.

Optional DirectKey™ Technology

Trillium locks are available with a DirectKey module, enabling a proven mobile key solution. With a hotel-provided smartphone app, guests can securely download their assigned key for easy access to their assigned room and other access-controlled areas.

Features

- Compatible with Onity HT22 and HT24 electronic locking systems
- Supports MIFARE Classic®, MIFARE Plus®, MIFARE Ultralight®, and MIFARE Ultralight C cards
- Reading technology: contactless RFID (ISO14443A, NFC)
- DirectKey-ready: Optional on-board DirectKey module provides secure wireless communication of credentials from a user's smartphone to a locking device via Bluetooth® Smart communications.
- Multiple opening devices available: keycards, wristbands, keychains, etc.
- Average battery life: approximately 2 years
- Non-volatile memory: records last 500 openings including date, time and card used
- Programmable to customer needs (meeting rooms, offices, housekeeping, etc.)
- LEDs indicate lock status including a low battery
- Corrosion-treated for normal atmospheric conditions
- NXP CRYPTO1 or AES-128 card encryption
- Available in multiple standard hardware finishes.

Specifications

- Temperature Tolerance Ranges:
  Alkaline batteries: 0º F / 130º F (-18º C / 55º C)
  For non-fire rated doors only, lithium batteries: -40º F / 167º F (-40º C / 75º C)
- Humidity: up to 95% non-condensing
- Power supply: 4 alkaline 1.5-volt AA batteries
- Not for outside use

VingCard Signature RFID
Electronic Lock

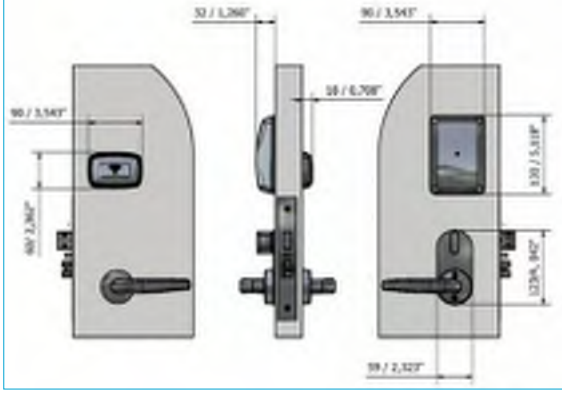
With Signature RFID you are provided with a stylish and modern lock that appeals to the modern environment. Signature RFID is less on the door while more in terms of functionality for you and your users.

FEATURES

: EPD (Environmental Product Declaration) certified
: Supports the latest RFID technology
: Supports Mobile Access
: Online compatible
: Easy upgrade from Signature Magstripe or Combo
: Fire listed for use on fire doors (UL, BS, EN)
: Case hardened full 1-inch (ANSI) throw deadbolt
: Panic release function – the deadbolt and latch are automatically retracted by inside handle for easy regress in emergency situations
: Stainless steel parts for mechanical strength, corrosion resistance and attractive appearance
: Optional high security mechanical override cylinder
: Detailed audit trail: 3000 events in offline mode (Vostio and Visionline version 1.24 and above) and unlimited number of events in online mode
: RFID Specifications:
- 13,56MHz technology
- Compatible with the following standards:
  - ISO 14443 A (MIFARE including Desfire)
  - ISO 14443 B
  - ISO 15693

DIMENSIONS

Standard and with built-in BLE



BLE upgrade. BLE as separate board.

NOTES:

Material

Self-Adhesive Synthetic Rubber Polymer: Siloxane

- Excellent Flexibility and Memory
- Flame Resistant
- Moisture Resistant
- Temperature Range -100°F to 500°F, Remains Flexible at Extreme Temperatures
- Excellent Resistance to Ozone, UV and Aging
- Recommended for Areas Using FM200 or Halon Fire Suppression Systems
- BHMA Certified to ANSI/BHMA A156.22 Performance Tests for Heat, Cold and Air Infiltration
- Modified Acrylic Pressure Sensitive Adhesive Protected by Release Liner
- Provides High Initial Adhesion and Long Term Holding Power for Permanent Mounting in Exterior or Interior Locations
- Resistant to Aging, Weathering, UV Radiation, Water, Detergent, Alcohol and the Influence of Chemicals
- End Use Temperature Range of Adhesive, Long Term Exposure -30°F Up To 250°F
- Shelf Life of Adhesive Prior to Installation is One Year When Stored at 75°F and 50% Relative Humidity or Less
- Meets Requirements of RoHS Directive
- ½" Wide x ¼" Tall
- Available in 17', 20', 21'*, 25' and 300' Rolls
  *Clear Not Available in 21'

Color
5050B Brown

ADVANCE Trillium® RFID Lock

Model 10104334P1
Model 10104335P1

Onity's ADVANCE Trillium lock features a stylish new look in a two-piece modular design, with a low-profile reader designed for today's modern aesthetics.

Advanced Credential Security

Trillium RFID locks include the option to use MIFARE Plus technology, an enhanced credential security for RFID cards.

Easy Upgrade Path

The ADVANCE Trillium lock provides an easy upgrade path where Onity ADVANCE series locks currently are installed – no new door cuts or repainting are required when installing new locks. Properties with Onity ADVANCE locks can update to ADVANCE Trillium locks by installing a new reader, control board, and optional rosette cover. For upgrades from Onity HT locks to ADVANCE Trillium locks, Onity offers standard or custom cover plates.

Optional DirectKey™ Technology

Trillium locks are available with a DirectKey module, enabling a proven mobile key solution. With a hotel-provided smartphone app, guests can securely download their assigned key for easy access to their assigned room and other access-controlled areas.

Features

- Compatible with Onity HT22 and HT24 electronic locking systems
- Supports MIFARE Classic®, MIFARE Plus®, MIFARE Ultralight®, and MIFARE Ultralight C cards
- Reading technology: contactless RFID (ISO14443A, NFC)
- DirectKey-ready: Optional on-board DirectKey module provides secure wireless communication of credentials from a user's smartphone to a locking device via Bluetooth® Smart communications.
- Multiple opening devices available: keycards, wristbands, keychains, etc.
- Average battery life: approximately 2 years
- Non-volatile memory: records last 500 openings including date, time and card used
- Programmable to customer needs (meeting rooms, offices, housekeeping, etc.)
- LEDs indicate lock status including a low battery
- Corrosion-treated for normal atmospheric conditions
- NXP CRYPTO1 or AES-128 card encryption
- Available in multiple standard hardware finishes.

Specifications

- Temperature Tolerance Ranges:
  Alkaline batteries: 0º F / 130º F (-18º C / 55º C)
  For non-fire rated doors only, lithium batteries: -40º F / 167º F (-40º C / 75º C)
- Humidity: up to 95% non-condensing
- Power supply: 4 alkaline 1.5-volt AA batteries
- Not for outside use

VingCard Signature RFID
Electronic Lock

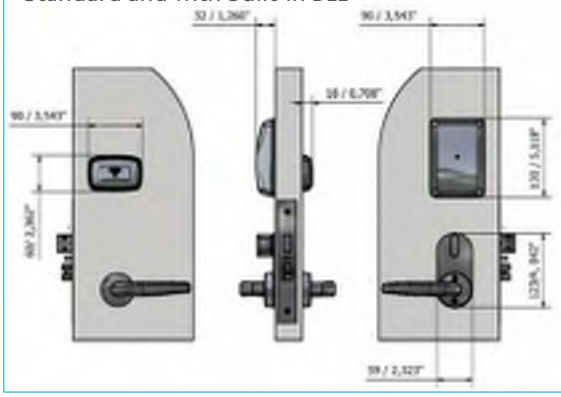
With Signature RFID you are provided with a stylish and modern lock that appeals to the modern environment. Signature RFID is less on the door while more in terms of functionality for you and your users.

FEATURES

: EPD (Environmental Product Declaration) certified
: Supports the latest RFID technology
: Supports Mobile Access
: Online compatible
: Easy upgrade from Signature Magstripe or Combo
: Fire listed for use on fire doors (UL, BS, EN)
: Case hardened full 1-inch (ANSI) throw deadbolt
: Panic release function – the deadbolt and latch are automatically retracted by inside handle for easy regress in emergency situations
: Stainless steel parts for mechanical strength, corrosion resistance and attractive appearance
: Optional high security mechanical override cylinder
: Detailed audit trail: 3000 events in offline mode (Vostio and Visionline version 1.24 and above) and unlimited number of events in online mode
: RFID Specifications:
- 13,56MHz technology
- Compatible with the following standards:
  - ISO 14443 A (MIFARE including Desfire)
  - ISO 14443 B
  - ISO 15693

DIMENSIONS

Standard and with built-in BLE



BLE upgrade. BLE as separate board.

NOTES:

Material

Self-Adhesive Synthetic Rubber Polymer: Siloxane

- Excellent Flexibility and Memory
- Flame Resistant
- Moisture Resistant
- Temperature Range -100°F to 500°F, Remains Flexible at Extreme Temperatures
- Excellent Resistance to Ozone, UV and Aging
- Recommended for Areas Using FM200 or Halon Fire Suppression Systems
- BHMA Certified to ANSI/BHMA A156.22 Performance Tests for Heat, Cold and Air Infiltration
- Modified Acrylic Pressure Sensitive Adhesive Protected by Release Liner
- Provides High Initial Adhesion and Long Term Holding Power for Permanent Mounting in Exterior or Interior Locations
- Resistant to Aging, Weathering, UV Radiation, Water, Detergent, Alcohol and the Influence of Chemicals
- End Use Temperature Range of Adhesive, Long Term Exposure -30°F Up To 250°F
- Shelf Life of Adhesive Prior to Installation is One Year When Stored at 75°F and 50% Relative Humidity or Less
- Meets Requirements of RoHS Directive
- ½" Wide x ¼" Tall
- Available in 17', 20', 21'*, 25' and 300' Rolls
  *Clear Not Available in 21'

Color
5050B Brown

STC 33
STC 44 - two rows

Edge Sealing System - Category "G" for 20 minute rated category B wood doors perimeter application up to:

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Item Name	Door Guard
Item Type	Door Guard, Paddle-type
Description	Metal door guard, surface-mounted
Manufacturer	Pemko (Assa Abloy)
Model	PDLAA
Dimensions	1-1/2" x 2-3/16"
Finish	US26D/US15
Material Composition	Zinc
CSI #	08 71 00 - Door Hardware
Omniclass #	22-08 71 00 - Door Hardware
Fire/Smoke Rating	For use with UL Classified fire doors for use with hollow metal steel composite type fire doors rated up to and including 3 hrs. Wood composite type fire doors rated up to and including 1 1/2 hrs and 20 minutes without hose stream.
Operation	Manual
Best Practices	Recycled content
Quality Standards	ANSI/BHMA A156.6 Architectural Door Trim
Accessibility Compliance	ADA and ANSI A117.1
Warranty	2 years

Securitron® M62 Magnalock®

1,200 lbs holding force direct mounted Magnalock

The ultimate in Magnalock versatility for indoor/outdoor higher security.

The Securitron M62 is a strong, easy-to-maintain solution for interior, perimeter and exterior access control. With unsurpassed durability, the Securitron M62 will last long after most buildings wear out. Flexible mounting options support applications for hollow metal, concrete filled metal, wood, or glass with aluminum frames, and Herculite doors. Options include single and double door configurations, or specialty applications such as gates and fences.

NOTE: Securitron M62FG-SASM in Specialty Lock section. See page #153.

Features

Standard Features

- PoE friendly
- Sustainability documentation
- Efficient, low power usage
- Automatic dual-voltage —no field adjustment required
- Fully sealed for weatherproof operations
- Size optimized for use with door closers
- Rust resistant—all ferrous metal surfaces plated for durability
- Instant release circuit —no residual magnetism
- Noise suppression with built-in MOV
- 10 ft [3.05m] of jacketed, stranded conductor cable
- Ultra-secure collapsing blind nuts mount to door frame for strength and reliability
- MagnaCare® lifetime replacement, no-fault, no questions asked warranty

Optional Features

- **F** Face drilled
- **G** Gate conduit
- **B** Patented BondSTAT magnetic bond sensor
- **D** Integrated Door Position Switch (DPS)
- **SS** Split Strike
- **SASM** Shock Absorbing Strike Mount for Gates
- **OS** Offset Strike

Securitron® BPS 12/24-1 Dual Voltage Linear Power Supply

Linear power for sensitive electronics

The Securitron BPS series of power supplies delivers linear technology recommended by most manufacturers of sensitive electronic access control and security components.

Safe for use with readers, electric strikes, and maglocks, these units interface to fire alarm systems and provide battery backup. The Securitron BPS-12/24-1 is UL Class 2 listed.

Features

Standard Features

- Dual voltage, field selectable 12 or 24 VDC via clearly marked toggle switch
- Supplies 1 full amp continuous current output, even while charging back-up batteries
- Linear regulated power supply provides the cleanest power available
- UL Class 2 power limited output
- SPDT AC monitoring output allows for remote monitoring of the power supply's 110 VAC input
- External LED indicator (AC and DC) easily determines power status
- UL Listed, low-current fire alarm disconnect requires only a minimum size fire alarm relay and wire gauge
- Polyswitch 2 A breaker allows for large short duration inrush current if batteries are installed (approx. 20 A for 1 second)
- Line voltage and DC fuses
- Sealed lead acid or gel battery charging capability (battery sold separately)
- MagnaCare® lifetime replacement, no-fault, no questions asked warranty

Specifications

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

65G05 Shown

A standard duty key-in-lever lock designed to exceed the requirements of ANSI A156.2, Series 4000 and Grade 2.

Specifications

For Doors	1-3/8" (35mm) to 1-3/4" (44mm) only
Backset	2-3/4" (70mm) standard 2-3/8" (60mm) optional (20- option)
Cylindrical Housing	Steel zinc dichromate finish
Front	Wrought brass and stainless steel 2-1/4" (57mm) x 1-1/8" (29mm)
Strike	800 Curved Lip, Brass or Stainless Steel Standard 808 ANSI Curved Lip available (28- option) 505 Full Lip strike available (14- option)
Hand	Universal, non-handed
Latch	Brass 1/2" (13mm) throw
Keys	Two, nickel silver
Cylinder	Brass, 6- pin, LA keyway standard
Finishes	3, 4, 10, 10B, 10BE, 26, 26D
Door Prep	ANSI A115.2 (161) Modified
Minimum Stile	4-1/2" (114mm)

Certification Compliance

ANSI/BHMA	Meets ANSI A156.2 Series 4000 — Grade 2
UL	UL listed to U.S.A. and Canadian safety standards Listed for 3 Hour Doors
Positive Pressure	Meets ANSI/UL 10C, Positive Pressure Fire Test of Door Assemblies
ADA	All levers conform to ADA requirement for barrier-free accessibility
California Code	Levers conform to California Administrative Code Title 19 and 24
Hurricane Code	All individual components of a total door opening are required to comply with each code. Refer to the SARGENT Website (www.sargentlock.com) for specific code compliance listings for both the lock hardware and other door components

Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

Windstorm Certifications

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

Windstorm Certifications: Florida Building Codes & UL Listings

SARGENT Manufacturing's products meet building codes that require hurricane, windstorm and FEMA certifications, including some of the most stringent building codes as specified in the Florida Building Code, Miami Dade Code and the International Building Code. Listed below are certifications and standards met by the 6500 lock.

Florida Building Code: FL2998
UL Certification Directory: ZHEM.R21744 – Latching Hardware

ANSI/SDI-BHMA A250.13	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies"
ANSI/ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
(TAS) 201	"Impact Test Procedures"*
(TAS) 202	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
(TAS) 203	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* Published in the "Florida Building Code"

UL Certification Directory: ZHLL.R21744 – Products for Use in Windstorm-rated Assemblies
Certifications to meet assembly requirements are done in conjunction with doors from ASSA ABLOY Group companies CECO DOOR and CURRIES.

ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
AAMA/WDMA/CSA 101/I.S.2/A440	"Standard/Specification for Windows, Doors, and Unit Skylights"
FEMA Publication 320	"Taking Shelter From the Storm: Building a Safe Room for Your Home or Small Business", investigated with respect to impact and pressure requirements only.
FEMA Publication 361	"Design and Construction Guidance for Community Safe Rooms", investigated with respect to impact and pressure requirements only.
ICC 500	"ICC/NSSA Standard for the Design and Construction of Storm Shelters", investigated with respect to impact and pressure testing. Minimum missile impact speeds vary with the design wind speed desired for a particular product. The information below correlates design wind speed to the minimum missile speeds as discussed in Table 305.1.1 of ICC 500.

Functions

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

04 Storeroom or Closet

65C04
- Deadlocking latch
- Latch by lever inside or key outside
- Outside lever rigid at all times
- ANSI/BHMA F86

05 Entrance or Office

65C05
- Deadlocking latch
- Latch by either lever unless outside lever is locked by push/turn button in inside lever
- Push button released by key outside or lever inside
- Turn button must be released manually
- Key retracts latch when outside lever is locked
- ANSI/BHMA F109

15 Passage

65U15
- Latch by either lever
- ANSI/BHMA F75

37 Classroom

65G37
- Deadlocking latch
- Latch by either lever unless outside lever is locked by key
- Key in outside lever locks or unlocks outside lever
- Inside lever always operative
- ANSI/BHMA F84

65 Privacy/Bathroom

65U65
- Latch by either lever unless outside lever is locked by push button in inside lever
- Turning inside lever or closing door releases button
- Emergency button in outside lever unlocks, with use of a blade screwdriver outside lever and releases inside button
- Bathroom key supplied only when ordered separately
- ANSI/BHMA F76

15-3 Exit or Communicating
(Special Order)

65G15-3
- Deadlocking latch
- Blank rose outside
- Latch by lever inside
- Minimum clearance of 1-1/2" (38mm) between double doors

93 Single Lever Pull

65U93
- For wood or custom hollow metal doors
- Lever and rose attached by three surface applied screws

94 Double Lever Pull

65U94
- For wood or custom hollow metal doors
- Lever and rose both sides through-bolted and three surface applied screws each side

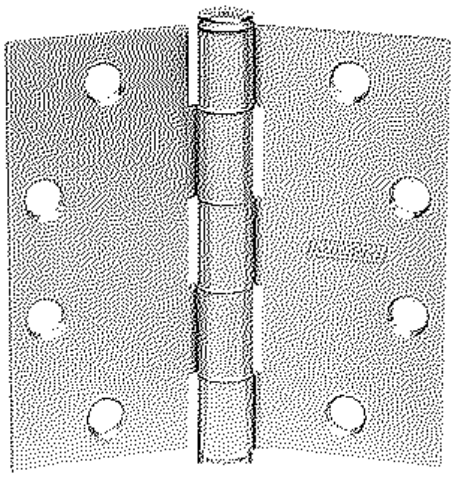
Item Name	Plain bearing hinge
Item Type	Plain bearing hinge for wood doors
Description	MacPro Five Knuckle Standard Weight Series Door Hinge
Manufacturer	ASSA ABLOY/McKinney
Model	T2714/3.5 x 3.5
Dimensions	3-1/2" x 3-1/2"
Color	Satin nickel
Finish	US15
Material Composition	Carbon steel
CSI #	087100 - Door Hardware
Omniclass #	22-087100 - Door Hardware
Quality Standards	Conform to ANSI/BHMA 156.1, 156.7
Part of an Assembly	N
Knuckle	Five
Weight	Standard
Lead Time	5-10 Business Days
Warranty	1 year limited warranty



SPECIAL INSTRUCTIONS

Quantity of hinges per door leaf shall be provided to conform to the following:
Doors up to 60" in height (2 hinges)
Doors up to 60" to 89" in height (3 hinges)
Doors 90" and over in height (1 hinge every 3" in height)

Backset	2-3/4" (70mm) standard 2-3/8" (60mm) optional (20- option)
Cylindrical Housing	Steel zinc dichromate finish
Front	Wrought brass and stainless steel 2-1/4" (57mm) x 1-1/8" (29mm)
Strike	800 Curved Lip, Brass or Stainless Steel Standard 808 ANSI Curved Lip available (28- option) 505 Full Lip strike available (14- option)
Hand	Universal, non-handed
Latch	Brass 1/2" (13mm) throw
Keys	Two, nickel silver
Cylinder	Brass, 6- pin, LA keyway standard
Finishes	3, 4, 10, 10B, 10BE, 26, 26D
Door Prep	ANSI A115.2 (161) Modified
Minimum Stile	4-1/2" (114mm)

Certification Compliance

ANSI/BHMA	Meets ANSI A156.2 Series 4000 — Grade 2
UL	UL listed to U.S.A. and Canadian safety standards Listed for 3 Hour Doors
Positive Pressure	Meets ANSI/UL 10C, Positive Pressure Fire Test of Door Assemblies
ADA	All levers conform to ADA requirement for barrier-free accessibility
California Code	Levers conform to California Administrative Code Title 19 and 24
Hurricane Code	All individual components of a total door opening are required to comply with each code. Refer to the SARGENT Website (www.sargentlock.com) for specific code compliance listings for both the lock hardware and other door components

Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

Windstorm Certifications

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

Windstorm Certifications: Florida Building Codes & UL Listings

SARGENT Manufacturing's products meet building codes that require hurricane, windstorm and FEMA certifications, including some of the most stringent building codes as specified in the Florida Building Code, Miami Dade Code and the International Building Code. Listed below are certifications and standards met by the 6500 lock.

Florida Building Code: FL2998
UL Certification Directory: ZHEM.R21744 – Latching Hardware

ANSI/SDI-BHMA A250.13	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies"
ANSI/ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
(TAS) 201	"Impact Test Procedures"*
(TAS) 202	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
(TAS) 203	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* Published in the "Florida Building Code"

UL Certification Directory: ZHLL.R21744 – Products for Use in Windstorm-rated Assemblies
Certifications to meet assembly requirements are done in conjunction with doors from ASSA ABLOY Group companies CECO DOOR and CURRIES.

ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
AAMA/WDMA/CSA 101/I.S.2/A440	"Standard/Specification for Windows, Doors, and Unit Skylights"
FEMA Publication 320	"Taking Shelter From the Storm: Building a Safe Room for Your Home or Small Business", investigated with respect to impact and pressure requirements only.
FEMA Publication 361	"Design and Construction Guidance for Community Safe Rooms", investigated with respect to impact and pressure requirements only.
ICC 500	"ICC/NSSA Standard for the Design and Construction of Storm Shelters", investigated with respect to impact and pressure testing. Minimum missile impact speeds vary with the design wind speed desired for a particular product. The information below correlates design wind speed to the minimum missile speeds as discussed in Table 305.1.1 of ICC 500.

Functions

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

04 Storeroom or Closet

65C04
- Deadlocking latch
- Latch by lever inside or key outside
- Outside lever rigid at all times
- ANSI/BHMA F86

05 Entrance or Office

65C05
- Deadlocking latch
- Latch by either lever unless outside lever is locked by push/turn button in inside lever
- Push button released by key outside or lever inside
- Turn button must be released manually
- Key retracts latch when outside lever is locked
- ANSI/BHMA F109

15 Passage

65U15
- Latch by either lever
- ANSI/BHMA F75

37 Classroom

65G37
- Deadlocking latch
- Latch by either lever unless outside lever is locked by key
- Key in outside lever locks or unlocks outside lever
- Inside lever always operative
- ANSI/BHMA F84

65 Privacy/Bathroom

65U65
- Latch by either lever unless outside lever is locked by push button in inside lever
- Turning inside lever or closing door releases button
- Emergency button in outside lever unlocks, with use of a blade screwdriver outside lever and releases inside button
- Bathroom key supplied only when ordered separately
- ANSI/BHMA F76

15-3 Exit or Communicating
(Special Order)

65G15-3
- Deadlocking latch
- Blank rose outside
- Latch by lever inside
- Minimum clearance of 1-1/2" (38mm) between double doors

93 Single Lever Pull

65U93
- For wood or custom hollow metal doors
- Lever and rose attached by three surface applied screws

94 Double Lever Pull

65U94
- For wood or custom hollow metal doors
- Lever and rose both sides through-bolted and three surface applied screws each side

0.7 cu. ft. Countertop Microwave with Electronic Touch Controls

Color Black

Product Description

Sleek electronic touch controls allow for easy navigation through multiple cooking modes and options, while the smooth surface makes cleanup simple. With 0.7 cu. ft. of capacity in this Whirlpool® countertop microwave, there's enough room for your everyday dishes without taking up valuable counter space. Plus, the control lock feature helps you avoid unintended use or other changes to your cooking settings by disabling the control panel with the touch of a button.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Range Hood
Item Type	Range Hood
Description	Two or Three-Speed; Non-Ducted Range Hood with Charcoal Filter; 2850 RPM, 190 CFM, Incandescent Task Light.
Manufacturer	Broan-NuTone LLC
Model	412404
Dimensions	24" x 18-1/2" x 6"
Color	Stainless Steel
CSI #	113100 - Residential Appliances
Omniclass #	22-113100 Residential Appliances
Quality Standards	NFPA 70, Article 100; UL and NEMA Compliance
Part of an Assembly	N
Energy Star	No
Electrical Connection	120V; 2.0A
Warranty	Parts Warranty - Limited 1-year entire appliance Labor Warranty - Limited 1-year entire appliance

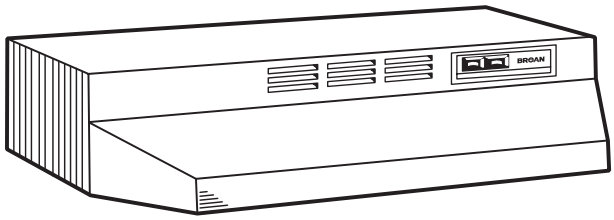
BROAN

SPECIFICATION SHEET

41000 SERIES TWO-SPEED NON-DUCTED RANGE HOOD

Model 413004 - Stainless Steel



Broan's most economical non-ducted hood with filtration of airborne cooking contaminants.

FEATURES

- Rocker-type fan and light switches
- Polymeric blade and light lens (accepts up to 75W bulb)
- Non-ducted filter – effective non-ducted filtration system removes smoke and odors
- Mitered sides and hemmed bottom for safety and good looks
- Contemporary styling in White, Almond, Black and Stainless Steel
- Available in 24", 30", 36", and 42" widths
- Special Order Size: 21"

SPECIFICATIONS

VOLTS	AMPS	RPM
120	2.0	2850

TYPICAL SPECIFICATION

Range hood shall be Broan Model 413004.

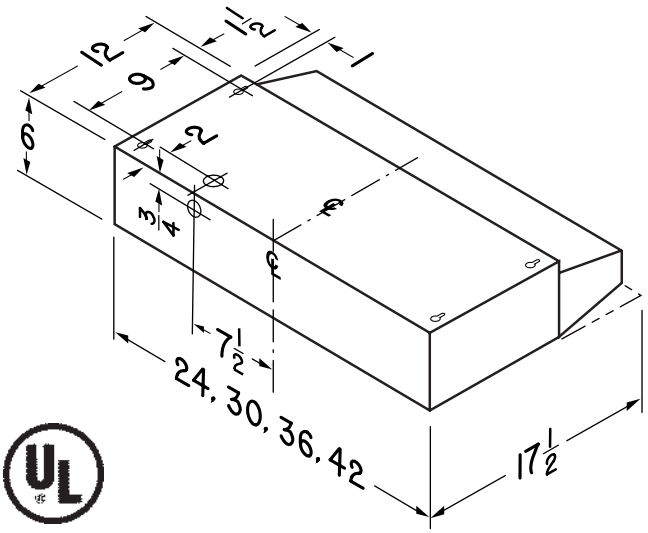
Unit shall be non-ducted and have a non-ducted filter.

Motor to be permanently lubricated. RPM not to exceed 2850.

Unit shall have a two-speed fan switch and separate light switch.

Sides shall be mitered and bottom edge hemmed – with no sharp edges.

Unit shall be U.L. listed.



Broan-NuTone LLC, 926 West State Street, Hartford, Wisconsin 53027 (1-800-637-1453)

Integrated Automation

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Integrated Automation Control
Item Type	Integrated Automation Control of Guestroom Equipment
Description	Master Light Switch and HVAC Unit controlled by Passive Infrared Motion Sensor Thermostat - Option #1
Manufacturer	INNCOM by Honeywell
Model	Smart programmable thermostat with integral passive infrared motion sensor (INNCOM #e528) with Magnetic Door Switch Model #S241
CSI #	255110 Integrated Automation Control of Guestroom Equipment
Omniclass #	22-255110
Notes	Function: To meet electrical code for switching off designated guestroom light fixtures (permanently wired light fixtures and switched receptacles, not in bathroom) at guest departure, and in addition, providing HVAC energy reduction and cost savings to Owner. Upon vacancy, the room temperature set point would be automatically adjusted +/- 4 deg F and the lighting relay would be de-energized. This option can produce a reduction of 30% - 35% in guestroom energy use and a typical payback of 1 – 1.5 years based on the marginal cost for the system. System uses a smart programmable thermostat with integral passive infrared motion sensor (INNCOM #e528), a two piece magnetic reed switch (INNCOM #S241) installed at the entry door and a third party 20A lighting relay (i.e. A. Zettler 24A Relay) mounted in the ceiling cavity. Four of the INNCOM #e528's five outputs would be wired to control the room HVAC unit (i.e. PTAC, VTAC, or WSHP) - heat, cool, fan low, fan high - and the fifth output would be wired to control the lighting relay coil. This design eliminates requirement for a physical Master off switch at entry by utilizing PIR (Passive Infrared) motion based technology to automatically enable/disable both hardwired light circuits and room HVAC units. Note: Verify with local code officials having jurisdiction if the Occupancy sensor will be allowed to be considered a Master Light Switch. • Guest enters - Door opens - System statuses room as occupied (Magnetic reed switch (INNCOM #S241)) talks to thermostat (INNCOM #e528) which relays to HVAC unit (i.e. PTAC, VTAC, or WSHP) and Master lighting relay. Master lighting relay energizes, providing power to all required lighting circuits. Thermostat sets HVAC back to the guest selected temperature, or if a new check-in to a pre-programmed check in temperature (guest has control of room temperature within these limits).

• Guest leaves - door opens - system re-evaluates room status due to door switch being triggered. If the passive infrared motion sensor in the thermostat detects motion within designated time, there is no change and the room continues to be statused as occupied, if the motion detector does not detect motion, room is statused as unoccupied. Once statused as unoccupied, power is terminated to code required lighting circuits (lights off) and the thermostat changes into unoccupied state (allows HVAC to float +/- additional 4 deg F beyond the 1 deg standard float). Door magnetic reed switch is the trigger to re-evaluate the logic in the room. The passive infrared motion sensor in the thermostat then confirms occupancy or non-occupancy based on motion detected within programmed time frame. If no motion is detected after 25 minutes (programmable), the room will power down.
Operations Note: This system is installed with default settings that will need to be reviewed by the property as follows:
- Thermostat Occupancy Sensor default time to determine occupancy is 25 minutes.
- Thermostat default time to determine unrented status is 10 hours. This is programmable by the Property.
- Thermostat “Rented Occupied” default temperature range is 65 deg F to 80 deg F. This is programmable by the Property.
- Thermostat “Unrented Unoccupied” default temperature range is 62 deg F to 80 deg F. This is programmable by the Property.

HVAC Controls:
1. HVAC Type: The control strategy will be dependent on the type of HVAC equipment that is being proposed. The control equipment shall be compatible with the HVAC equipment with 4 relay control specified for Project. The following control strategies shall be applied:
a. Packaged Terminal Air Conditioners (PTAC): The System shall control one PTAC in each room. The System shall directly control a 1 or 2-speed, low-voltage interface. The System will also control the compressor and associated heating equipment. INNCOM by Honeywell shall provide the PTAC Vendor with the necessary control card or connectors to be installed at point of manufacture or in the rooms. In case of existing PTAC’s, the same equipment can be installed in-place by trained personnel. The System shall provide automatic switchover from heating to cooling operation at each room.
b. Vertical Terminal Air Conditioners (VTAC): The System shall control one VTAC in each room. The

System shall directly control a 1 or 2-speed, low-voltage interface. The System will also control the compressor and associated heating equipment. INNCOM by Honeywell will provide the VTAC Vendor with the necessary card or connectors to be installed at point of manufacture or in the rooms. In case of existing VTAC's, the same equipment can be installed in place by trained personnel. The System shall provide automatic switchover from heating to cooling operation at each room.

c. Water Source Heat Pumps (WSHP): The System shall control one WSHP in each room. The System shall directly control a 1 or 2-speed, low-voltage interface. The System will also control the compressor and associated heating equipment. INNCOM by Honeywell shall provide the WSHP Vendor with the necessary control card or connectors to be installed at point of manufacture or in the rooms. In case of existing WSHP's, the same equipment can be installed in-place by trained personnel. The System shall provide automatic switchover from heating to cooling operation at each room.

2. HVAC Control Strategies: Provision shall be made to prevent the system from switching repeatedly from cooling to heating and back while attempting to maintain a constant target temperature. The System's temperature-control performance shall meet the requirements defined below for proportional valves. The System's humidity-refresh performance shall meet the requirements defined below.

a. Temperature Control: The System in the room shall employ a PID algorithm to minimize fan speed and valve changes and to reduce servo-loop error. Such error, measured as the temperature difference between the set target temperature and the measured room temperature, shall not exceed 1.0o C under steady-state conditions and will automatically compensate for changes in the heat/cooling load of the room. The temperature control algorithm shall be capable of using the full resources of the FCU to maintain target temperature. Proportional-only algorithms that set the fan speed in proportion to the error shall not be accepted (as they cause a temperature control error that increases with the fan speed).

b. Humidity Refresh: The System in the room shall be capable of maintaining a maximum level of humidity. The refresh cycle will activate in unoccupied rooms only.

1) Humidity Refresh Cycle: The room air conditioning shall be activated on a pre-defined duty cycle to remove excess humidity. The System shall monitor, via central sensors or individual room sensors, the air temperature and relative humidity.

When the relative humidity exceeds a preset threshold, the room AC shall be activated if the AC has been shut down for a period of time that exceeds a programmable time value (for example, if the AC has not run for the last one hour).

c. Fan Speed Control: Fan speed shall be selected automatically by the System to match the heat gain/loss in the room. Fixed-fan operation shall also be available to the guest. Fan speeds shall be field-programmable to allow limiting fan speeds to a desired range of speeds. Fan operation shall be configurable to provide for “Continuous Fan” or “Automatic Fan.” Continuous Fan means that the fan shall run even when the target temperature has been satisfied. Automatic Fan means that the fan shall run only on active heating or cooling call.

d. Multiple HVAC Zone Rooms (Suites): The System shall be capable of supporting multi-zone rooms, where the rooms are not separated by a door, yet each room has multiple HVAC units. The System shall be able to link the thermostats in these rooms so that they track. This prevents having one room call for heat while the other is calling for cooling.

e. Temperature History: The System shall have the capability to store the temperature, valve, and fan states for each room for at least three months, with all changes being reported.

f. Energy Conservation:

1) The System shall provide optimized energy conservation measures with minimum inconvenience to the guest. At least four setback strategies shall be employed: two when a room is un-rented (either occupied by staff or unoccupied), and two more when a room is rented (either occupied or unoccupied).

2) The System shall determine room occupancy automatically. The System shall keep the room status as occupied even while the guest is asleep.

3) Setback values and related parameters shall be independently adjustable for rented and un-rented modes.

g. Digital Thermostat: The unit shall be modular in construction so that each of the modules can be added at a later time if not installed initially.

1) Acceptable Product: “e4 Smart Digital Thermostat Model #e528 with Integral Passive Infrared (PIR) Motion Sensor”; INNCOM by Honeywell

2) The System shall include a wall-mounted, illuminated digital thermostat. The thermostat will be able to display current room temperature, target temperature, and outside temperature in degrees F and degrees C, as well as the humidity level.

3) The thermostat shall be easy to operate, and shall allow changing the target temperature in steps

of 1 degree F or 0.5 degree C. Clear indication shall be provided when the HVAC has been turned off.
4) The thermostat shall have the capacity to work with a built-in Passive Infrared (PIR) motion sensor OR a remote Passive Infrared (PIR) motion sensor OR combinations of both.
5) The thermostat shall be capable of directly controlling HVAC units operating on voltages ranging from 12VDC to 277VAC without the requirement of secondary control relays for the higher voltage applications. The thermostat shall also be available in a battery operated version to facilitate installation where the provision of power may not be practical.
6) The thermostat shall be connectable to the System via a 2-conductor, low-voltage cable. The thermostat shall also have the capability of connecting to the HVAC equipment wirelessly via RF signals.
7) The thermostat shall be capable of controlling HVAC units wirelessly using RF (Zigbee) technology.
3. Occupancy Detection: The System shall combine inputs from the door-position switch and from a PIR motion detector to determine whether the room is occupied at any time. Activation of any switch on the digital thermostat or any light switch that is controlled by the System while the entry door is closed shall place the room in the occupied mode

SPECIAL INSTRUCTIONS

Coordinate with Door Hardware.
This is an option to the Standard Base System Requirements (Master Light Switch).

THE POWER OF **CONNECTED**

Hospitality

S241

Magnetic Door Switches

The S241 Magnetic Door Switch is a sensor used to monitor the open and closed status of a door. A magnet mounted into the door connects the S241 reed switch contacts when the door is closed, signaling room occupancy status.

S241 Resessed Door Switch

OVERVIEW

The INNCOM S241 is used to monitor a guestroom entry door as part of Honeywell's INNCOM standalone energy management system or the Integrated Room Automation System. The heart of this system is one of Honeywell's INNCOM Smart Digital Thermostats.

When the thermostat receives information of a change in the position of the entry door (open or closed), it considers the event in combination with information from its passive infrared motion sensor to determine whether the room is occupied or unoccupied.

S241 Door Switch for
Sliders and Balcony Doors

S241 Door Switch
1/4" Dia., Wire leads

FEATURES & BENEFITS

Monitors open/close status of the door

May be integrated with the INNCOM Room Automation System over Deep Mesh

RF Wireless or S5Bus Communication

Transfers information to other devices such as HVAC and lighting controls

S241 Magnetic Door Switches

APPLICATION AND INSTALLATION

The S241M is a normally open reed magnet switch. Electrically, the contacts are closed when the reed switch is in close proximity to a suitable magnet. The drawing below illustrates the recommended mounting method for the switch in a hotel guestroom environment. The location of the contact was selected so that the switch will detect a door that is resting against the frame but is not latched. Placing the S241M closer to the hinge of the door will provide a "door closed" indication with increasingly open angle.

Note that the S241M has a "lip" that protrudes below the frame of the door. The spacing between the door and the frame must be able to accommodate this lip (which is about 0.060" thick).

The switch and the mating magnet may also be installed horizontally near the top, as show in the drawing as option B.

For installation in a wooden door/frame, the depth of the hole in the frame should be 2 inches and the depth of the hole in the door should be 1 inch.

SPECIFICATIONS	
DIMENSIONS	3/4" diameter
MAXIMUM SWITCHING CURRENT	.500 A
MOUNTING	S241 Recessed Door Switch is recessed into door and door frame S241 Balcony and Sliders switch are magnetic contacts with screw terminals
MAXIMUM SWITCHING VOLTAGE	100VDC/VAC
MAXIMUM INITIAL CONTACT RESISTANCE	0.100 ohms
MAGNETIC CONTACT	12-22 lead gap insteel: 0.5" (13mm)
APPROVALS	UL Listed 0508C 64Z2

MODEL	DESCRIPTION	PART NUMBER

E-Series

Smart Digital Thermostats E528 & E529

The E-Series is a hub for room automation. It is capable of controlling virtually any fan coil unit, heat pump or packaged terminal air conditioner found in rooms. It includes an easy to read illuminated liquid crystal display and five built-in relays.

E528 Smart Digital Thermostat with flat PIR and the patented ecoMODE button

OVERVIEW

The E-Series can be equipped with an on-board radio frequency (RF) transceiver, a passive infrared occupancy sensor (PIR), humidity sensor, outside temperature display, and the patented ecoMODE® green button.

The E-Series can be used to integrate the room to the property for central control and monitoring, to integrate controls within the guestroom, or as a stand alone thermostat.

As the key node in an Energy Management System (EMS), it receives inputs from the PIR motion detector and the wired or wireless door switches to determine guestroom occupancy. When the room is occupied but the occupant is not present, the temperature may range up or down within a programmable setback band from the selected temperature. This results in energy savings with no impact on an occupant's comfort.

E529 Battery Powered Smart Digital Thermostat

FEATURES & BENEFITS

- Precision DDC temperature control
- Advanced energy management
- Optional ecoMODE®

- On-board PIR optional
- RF Wireless Communication
- Oversized framing plate for use in US applications

- Customer programmable
- Low voltage
- Low installation costs
- Optional Battery Powered

- May be integrated with the INNCOM Room Automation System over the Deep Mesh Network with INNCOM's INNcontrol 3 software

- Multi-point lamp control
- Balcony Door Monitoring
- Minibar & safe monitoring
- Smoke detector monitoring

E528 & E529 Smart Digital Thermostats

APPLICATIONS

When connected to Honeywell's centrally controlled system, additional energy savings are achieved by using a broader set-back band, when the room is unoccupied for a certain length of time. It can also apply wider temperature set-back bands when the room is in hibernation off-season or extended away periods.

The INNCOM E-Series wireless transceiver allows it to seamlessly add lighting, drapery, and amenity controls through usage of the INNCOM's EVORA, and MODEVA wall switches. In addition, it can also receive inputs from other points in the room such as a balcony door, minibar or smoke detector and transmit their status to the central server.

ADDITIONAL OPTIONS

Available with or without the Honeywell logo

Available with or without a Humidity Sensor

Available with or without Auxiliary Communications.

THE POWER OF **CONNECTED**

Item Name	Integrated Automation Control
Item Type	Integrated Automation Control of Guestroom Equipment
Description	Thermostat can be connectable to the HVAC unit wirelessly via RF signals. This can be an advantage for renovation projects by eliminating the need for hard-wiring between equipment - Option #2 Model e529 Thermostat an Upgrade Option to Model e528. This Thermostat is for use with an RF connection to HVAC Unit, and is also is connectable to the Upgrade Option for the Central Interface (CI) Server Application wirelessly via RF signals.
Manufacturer	INNCOM by Honeywell
Model	Thermostat INNCOM #e529-RF
CSI #	255110 Integrated Automation Control of Guestroom Equipment
Omniclass #	22-255110
Notes	1. HVAC Type: The control strategy will be dependent on the type of HVAC equipment that is being proposed. The control equipment shall be compatible with the HVAC equipment with 4 relay control specified for Project. The following control strategies shall be applied: a. Packaged Terminal Air Conditioners (PTAC): The System shall control one PTAC in each room. The System shall directly control a 1 or 2-speed, low-voltage interface. The System will also control the compressor and associated heating equipment. INNCOM by Honeywell shall provide the PTAC Vendor with the necessary control card or connectors to be installed at point of manufacture or in the rooms. In case of existing PTAC's, the same equipment can be installed in-place by trained personnel. The System shall provide automatic switchover from heating to cooling operation at each room. b. Vertical Terminal Air Conditioners (VTAC): The System shall control one VTAC in each room. The System shall directly control a 1 or 2-speed, low-voltage interface. The System will also control the compressor and associated heating equipment. INNCOM by Honeywell will provide the VTAC Vendor with the necessary card or connectors to be installed at point of manufacture or in the rooms. In case of existing VTAC's, the same equipment can be installed in place by trained personnel. The System shall provide automatic switchover from heating to cooling operation at each room. c. Water Source Heat Pumps (WSHP): The System shall control one WSHP in each room. The System shall directly control a 1 or 2-speed, low-voltage interface. The System will also control the compressor and associated heating equipment.

INNCOM by Honeywell shall provide the WSHP Vendor with the necessary control card or connectors to be installed at point of manufacture or in the rooms. In case of existing WSHP's, the same equipment can be installed in-place by trained personnel. The System shall provide automatic switchover from heating to cooling operation at each room.

2. HVAC Control Strategies: Provision shall be made to prevent the system from switching repeatedly from cooling to heating and back while attempting to maintain a constant target temperature. The System's temperature-control performance shall meet the requirements defined below for proportional valves. The System's humidity-refresh performance shall meet the requirements defined below.

a. Temperature Control: The System in the room shall employ a PID algorithm to minimize fan speed and valve changes and to reduce servo-loop error. Such error, measured as the temperature difference between the set target temperature and the measured room temperature, shall not exceed 1.0o C under steady-state conditions and will automatically compensate for changes in the heat/cooling load of the room. The temperature control algorithm shall be capable of using the full resources of the FCU to maintain target temperature. Proportional-only algorithms that set the fan speed in proportion to the error shall not be accepted (as they cause a temperature control error that increases with the fan speed).

b. Humidity Refresh: The System in the room shall be capable of maintaining a maximum level of humidity. The refresh cycle will activate in unoccupied rooms only.

1) Humidity Refresh Cycle: The room air conditioning shall be activated on a pre-defined duty cycle to remove excess humidity. The System shall monitor, via central sensors or individual room sensors, the air temperature and relative humidity. When the relative humidity exceeds a preset threshold, the room AC shall be activated if the AC has been shut down for a period of time that exceeds a programmable time value (for example, if the AC has not run for the last one hour).

2) The System shall determine room occupancy automatically. The System shall keep the room status as occupied even while the guest is asleep.
3) Setback values and related parameters shall be independently adjustable for rented and un-rented modes.
h. Digital Thermostat: The unit shall be modular in construction so that each of the modules can be added at a later time if not installed initially.
1) Acceptable Product: “e4 Smart Digital Thermostat Model #e529 with Integral Passive Infrared (PIR) Motion Sensor”; INNCOM by Honeywell
2) The System shall include a wall-mounted, illuminated digital thermostat. The thermostat will be able to display current room temperature, target temperature, and outside temperature in degrees F and degrees C, as well as the humidity level.
3) The thermostat shall be easy to operate, and shall allow changing the target temperature in steps of 1 degree F or 0.5 degree C. Clear indication shall be provided when the HVAC has been turned off.
4) The thermostat shall have the capacity to work with a built-in Passive Infrared (PIR) motion sensor OR a remote Passive Infrared (PIR) motion sensor OR combinations of both.
5) The thermostat shall be capable of controlling HVAC units operating on voltages ranging from 12VDC to 277VAC with the pairing of secondary control relays. The thermostat shall be battery operated to facilitate installation where the provision of power may not be practical.
6) The thermostat shall have the capability of connecting to the HVAC equipment wirelessly via RF signals.

7) The thermostat shall be capable of controlling HVAC units wirelessly using RF technology.
3. Occupancy Detection: The System shall combine inputs from the door-position switch and from a PIR motion detector to determine whether the room is occupied at any time. Activation of any switch on the digital thermostat or any light switch that is controlled by the System while the entry door is closed shall place the room in the occupied mode.

SPECIAL INSTRUCTIONS

Coordinate with Door Hardware.
This is an option to the Standard Base System Requirements (Master Light Switch).

Honeywell
THE POWER OF **CONNECTED**

Hospitality

E-Series

Smart Digital Thermostats E528 & E529

The E-Series is a hub for room automation. It is capable of controlling virtually any fan coil unit, heat pump or packaged terminal air conditioner found in rooms. It includes an easy to read illuminated liquid crystal display and five built-in relays.

E528 Smart Digital Thermostat with flat PIR and the patented ecoMODE button

OVERVIEW

The E-Series can be equipped with an on-board radio frequency (RF) transceiver, a passive infrared occupancy sensor (PIR), humidity sensor, outside temperature display, and the patented ecoMODE® green button.

The E-Series can be used to integrate the room to the property for central control and monitoring, to integrate controls within the guestroom, or as a stand alone thermostat.

As the key node in an Energy Management System (EMS), it receives inputs from the PIR motion detector and the wired or wireless door switches to determine guestroom occupancy. When the room is occupied but the occupant is not present, the temperature may range up or down within a programmable setback band from the selected temperature. This results in energy savings with no impact on an occupant's comfort.

E529 Battery Powered Smart Digital Thermostat

FEATURES & BENEFITS

- Precision DDC temperature control
- Advanced energy management
- Optional ecoMODE®

- On-board PIR optional
- RF Wireless Communication
- Oversized framing plate for use in US applications

- Customer programmable
- Low voltage
- Low installation costs
- Optional Battery Powered

- May be integrated with the INNCOM Room Automation System over the Deep Mesh Network with INNCOM's INNcontrol 3 software

- Multi-point lamp control
- Balcony Door Monitoring
- Minibar & safe monitoring
- Smoke detector monitoring

E528 & E529 Smart Digital Thermostats

APPLICATIONS

When connected to Honeywell's centrally controlled system, additional energy savings are achieved by using a broader set-back band, when the room is unoccupied for a certain length of time. It can also apply wider temperature set-back bands when the room is in hibernation off-season or extended away periods.

The INNCOM E-Series wireless transceiver allows it to seamlessly add lighting, drapery, and amenity controls through usage of the INNCOM's EVORA, and MODEVA wall switches. In addition, it can also receive inputs from other points in the room such as a balcony door, minibar or smoke detector and transmit their status to the central server.

ADDITIONAL OPTIONS

Available with or without the Honeywell logo

Available with or without a Humidity Sensor

Available with or without Auxiliary Communications.
The following are offered: RF, IR5, RS485

CONFIGURATIONS

Blank

Standard PIR

Standard PIR & ecoMODE Button

ecoMODE Button

Flat PIR

Flat PIR and ecoMODE Button

SPECIFICATIONS	
DIMENSIONS	4.7" W x 4.7" H x 1.2" D (119 mm x 119 mm x 30 mm)
POWER REQUIREMENTS	24 VAC at 50/60 Hz, 24 VDC nominal, 2.4 VA (e528-3xx/7xx and e528-4xx) 100 to 277 VAC at 50/60 Hz, 2.4 VA (e528-8xx)
MOUNTING	Standard Double Gang Junction Box (4x4)
OPERATING RANGE	41°F to 149°F (5°C to 65°C)
TEMPERATURE	± 1°F 60°F to 85°F (± 0.5°C 15°C to 30°C)
APPROVALS	L listed #873, CAN/CSA C22.2 No. 24-93 File #E202540/Part 15 of the FCC Rules
STANDARD COLOR OPTIONS	White & Black
THERMOSTAT MEASURMENT RANGE	33 to 99 degrees F (1 to 37 degrees C)
OUTDOOR AIR TEMPERATURE DISPLAY	0 to 99 degrees F (-18 to 37 degrees C)
DISPLAY RESOLUTION	Whole degree F, 0.5 degree C (0.1 degree F in test mode)
STANDARD DEADBAND	2 degrees F (1 degree C) between heating and cooling
C/F DEGREES DISPLAY	Toggle Button on front of display
AMBIENT OPERATING	41 to 149 degrees F (5 to 65 degrees C), 0-95% RH noncondensing
AMBIENT STORAGE	33 to 149 degrees F (1 to 65 degrees C)
RF DATA RATE	250kbps
OPTIONAL POWER SUPPLIES	No Power Supply 120-277VAC 265-277VAC 50/60Hz w/3.6FLA high fan relay (600 Series) 50/60Hz w/2.2FLA high fan relay (800 Series) 24VAC 50/60Hz (900 Series) Four AA Batteries (E529 Only)
INDOOR RANGE	70ft - 100ft+
FREQUENCY BAND	2.4GHz
PROTOCOL	802.15.4
FREQUENCY CHANNELS	11-26

Honeywell
THE POWER OF **CONNECTED**

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Integrated Automation Control
Item Type	Integrated Automation Control of Guestroom Equipment
Description	Central Interface (CI) Server Application - Option #3 A central interface server application and remote room monitoring/communications. This upgrade option can provide an interface to the Property Management System (Fosse and others), and includes features such as: - Remote room monitoring and control capabilities. - Alarm reports for malfunctioning equipment. - Instant control of temperature setback parameters and other system settings, - Efficient information presentation to staff and management including real-time room status information, as well as room and property energy trends.
Manufacturer	INNCOM by Honeywell
Model	INNcontrol™3
CSI #	255110 Integrated Automation Control of Guestroom Equipment
Omniclass #	22-255110
Notes	1. Each guestroom system or sub-system will communicate in real time with a central server running INNcontrol™3 application software. The software shall provide a comprehensive list of room status information and alarms and shall also interface with other systems in the hotel, including the PMS and the Maintenance Management System (MMS). a. PMS Interface: The software shall interface with the PMS computer through a serial link or TCP/IP. The PMS will provide the INNcontrol™3 software with current sale status of the guestrooms (rented/un-rented and check-in/checkout). This information shall be transferred from the INNcontrol™3 software to the room within five seconds, and will be used to determine the operation of the HVAC, lights, and other loads in the room. The INNcontrol™3 server shall also be linked and interfaced with the EDL server. b. Management Display: The INNcontrol™3 application, or terminals connected to the INNcontrol™3 server, shall provide access to management to view and control such parameters as room temperature, room target temperature, HVAC operation, light control, and other conditions and statuses. In general, the INNcontrol™3 application shall provide access to any function of the room control system that is available to the guest in the room. The System shall be capable of interfacing with the Hotel Ethernet System via an RS 485 or TCP/IP interface.

c. 3D Real-Time Display: The INNcontrol™3 application, or terminals connected to the INNcontrol™ 3 server, shall be able to provide a 3D view of real-time information such as door openings, guest interactions with room automation devices, and other events. The display shall display the property as an accurate representation of the property and the rooms shall be displayed in colors that represent the status of various devices in the rooms. The color display shall also show in gradients of color the aging of guest service requests and equipment alarms.
d. Remote Access/Diagnostics: The application shall provide full support of a remote terminal connected via TCP/IP, to the server. The server software architecture shall be of a client/server structure. The remote terminals shall be PCs operating under MS Windows XPor later. The application shall be capable of running complete diagnostics of the System from a remote service center via dial-up phone lines or TCP/IP.
e. Alarm Outputs: The application software shall be programmable to route alarm conditions to a file, hard disk, third-party interface, or the PMS.
f. The user shall have the option of not logging on, which will allow View (read-only) use of the software, or logging on, which will allow Control functions based on the logon identification.
g. The software shall open to a pre-determined default language. It shall also be possible to choose another language available from the list.
h. The INNcontrol™3 application, or terminals connected to the INNcontrol™3 server, shall provide access to management to view and control such parameters as room temperature, room target temperature, HVAC operation, light control, and other conditions and statuses. In general, the INNcontrol™3 application shall provide access to any function of the room control system that is available to the guest in the room. The System shall be capable of interfacing with the Hotel Ethernet System via TCP/IP interface is opened is the ‘Quick View’ screen. Each guestroom selected for Quick View display shall be represented by a block on the screen. The block shall be numbered to correspond to the actual room number. The resulting menu shall allow the display of Butler calls, Valet requests, Pick-Up-Tray requests, Privacy/Service indications, SOS indications, and possibly one or two other requests if desired by the property—for example, cab request.
i. All service requests shall be displayed at once on the Quick View screen. The color coding shall allow easy recognition of each type of call.
j. The software shall display Housekeeping Calls to show a list of rooms requesting the indicated service.

Other types of information shall also be optionally shown in the communication area, including clean/dirty room status, notifications, and issues to be handled by the front desk.

k. The software shall allow for the display of guest preferences including ADA/hearing impaired rooms, Sabbath rooms, or ecoMODE® rooms.

1) ADA/hearing impaired rooms shall be set up such that the entry light flashes 10 times when the doorbell outside the room is pressed. An INNCOM P564 doorbell kit and EVORA entry light switch are required for this function

2) Sabbath rooms are set up such that all automatic functions that would be triggered by guests are suspended and the HVAC does not respond to occupancy information.

l. The software shall offer a Dynamic Suite Linking option and it shall display rooms that are linked as suites. The linked rooms shall be color-coded, and the type of link (common door or connecting door) shall be shown displayed in the room blocks.

m. The software shall be able to display as a minimum the following room conditions:

1) Rented – Shows which rooms are currently rented.

2) Occupancy – Shows which rooms are currently occupied, either by guests or staff.

3) Rented + Occupancy – Shows which rooms are rented and occupied.

4) Clean Status – Shows which rooms have been cleaned and which need cleaning. This option also shows “supervisor required” and “out-of-order.”

5) Dirty Rooms – Shows which rooms need cleaning. The color coding will indicate the rented and occupancy status for these rooms.

6) Supervisor Visit Requested – Shows which rooms have been cleaned and are ready for review by a supervisor.

7) Out of Order – Shows which rooms are out of order for any reason (such as equipment needing repair).

8) Telephone Usage: Shows which rooms have telephones currently in use.

9) Safe and Orphaned Valuables: Shows which rooms have a locked safe and which rooms have “orphaned” (left behind) valuables in the safe.

10) Minibar Used: Shows which rooms need replenishment for the minibar.

11) Measured Room Temperature – Shows the temperature of each room on the block grid.

12) Target Room Temperature – Shows the desired room temperature for each room on the block grid.

13) AC Mode – Shows the operational status of the air conditioning system for all rooms on the block grid.

14) Measured, Target and AC Mode – Shows all the above on the block grid.
15) Measured Humidity – Shows the humidity for each room on the block grid.
16) HVAC Equipment Operation – Shows heating, cooling, and fan operation for each room on the block grid.
17) Second Stage Operation – Shows forced, ready, active, and normal status for each room on the block grid.
18) Peak Demand/Load Shedding/Fire – Shows high, medium, low, and normal for peak demand/load shedding, and shows HVAC response to fire.
19) Open Doors or Windows: Shows which rooms have open doors or windows.
20) ETM: Shows rooms that have no energy management devices currently operating.
21) VIP/Lowered Energy Management (LEM): Indicates room thermostat is not being controlled by the system.
22) De-Humidification – Shows all rooms on the block grid that are being dehumidified.
23) De-Icing – Shows all rooms on the block grid that are being de-iced.
24) HVAC Trouble – Shows all rooms on the block grid with active HVAC alarms.
25) Equipment Type – Shows the HVAC equipment type for all rooms on the block grid.

n. The software shall display diagnostic information for guestroom devices.

o. The software shall have Navigation Tree Displays. The rows of icons allow the user to display property views in the navigation area below the icon bars by clicking on the icon. A room can be selected from the Navigation Tree for display of its statuses. In the Floor View and Network View displays, a plus (+) or minus (-) sign will appear before each room. A plus sign indicates that more information can be displayed by clicking on it.

p. The default icon in the navigation area shall be the Floor View, which shall display a list of hotel floors. Double clicking on a floor shall display a list of rooms on the floor.

q. The software shall have a Network View icon to display the guestrooms organized according to their network connectivity status.

r. The software shall be able to display a graph of the HVAC trend for each room. The display shall show the room's temperature band as a yellow block. The HVAC trend line shall be color-keyed: black (the HVAC is not currently heating or cooling), red (the HVAC is heating), or blue (the HVAC is cooling).

s. The software shall be able to generate reports that show outstanding guest requests at the time of

report generation. The report shall be able to be generated in a printable notepad format with the time of day of the report generation shown at the top of the report. The report can be saved and/or printed, making it convenient for staff to carry as a reminder of outstanding requests.

t. The software shall be able to receive and set guest requests from other INNCOM devices in the property. Whatever the source of the setting, a guest request shall be displayed on every INNcontrol™3 screen that has the particular room selected for view. For example, a guest may press a switch in the guestroom to request MUR service. The request will appear on INNcontrol™3.

D. Room Communications, Monitoring and Control:

1. Throughput: The INNcontrol™3 application server and the network that links it to the rooms shall be able to handle a minimum of five transactions per second per 500 rooms. A transaction is defined as the sending of a command or data to a room from the INNcontrol™3 server and the receipt of acknowledgment of the proper execution of such command back at the INNcontrol™3 server. The System and its network shall guarantee a response within five seconds when accessing any room component remotely. Such response shall not be conditional on any other activities that take place at that time anywhere else in the System.

2. Network Integrity: The communication in the System shall comply with ISO/OSI standards. The network shall be secure from insertion of commands from external stations. Errors in communications shall be detected and corrected automatically. The addition and removal of stations shall be captured and reported as an alarm by the INNcontrol™3 server.

a. Networking Capabilities: The System shall be capable of communicating from the INNcontrol™3 server to the guestroom devices using a single shielded or unshielded twisted pair of wires, Cat3 or better.

b. Networking Capabilities: The System shall be capable of communicating from the INNcontrol™3 server to the guestroom devices using a dedicated hybrid RS-485/Ethernet network or a shared Ethernet network, running on Cat 6 or fiber.

E. Field Programmability:

1. Parameter Changes: All room-related parameters, such as target temperature upon check-in, setback temperatures, and the like, shall reside in non-volatile memory in each room and shall be available for programming from the INNcontrol™3 server as well as the in-room thermostat. The server shall be able to access rooms on an individual basis, in groups, or in total (i.e., the entire property at one

time).
2. Program Changes: The application program residing in the room controller shall be modifiable through the INNcontrol™3 server computer without the need to visit the room. The program stored in each room shall not be affected by the temporary loss of power, regardless of the duration of the power outage.
3. Power Fail Recovery: After a power outage, the System throughout the hotel shall start up automatically and will be fully operational within five minutes after restoration of power. In the rooms, all loads controlled by the System will be returned to their previous states, including target temperature, selected fan speed operation, and lights, regardless of the duration of the power outage.
4. Noise Restriction: All system components shall be installed in such a manner as to eliminate audible noise to the guest when the System operates while the guest is asleep.
5. Code Compliance: Components installed by the Vendor and wiring/installation performed by the Vendor shall comply with the applicable standards and electrical codes.

F. Wiring: All field wiring to the System shall be made through plug-in connectors to facilitate service and diagnostics. The Vendor shall provide as-run wiring diagrams for room wiring [and network wiring].

SPECIAL INSTRUCTIONS

Coordinate with Door Hardware.
This is an option to the Standard Base System Requirements (Master Light Switch).

“ecoMODE” is an Upgrade Option to provide the hotel guest the ability to opt-in to a host of environmentally friendly programs predetermined by the property. In the simplest ecoMODE system, pressing the green button will trigger an enhanced energy savings setback as well as illuminate a green LED to indicate the guest’s sustainability program participation to the staff. Contact Manufacturer for assistance and coordinate with Owner. eco-Mode rooms are activated when the guest presses the Green Button on the thermostat or eco-Mode programmed switches, thus enrolling in the property’s environmental sustainability programs.

Honeywell
THE POWER OF CONNECTED

Hospitality

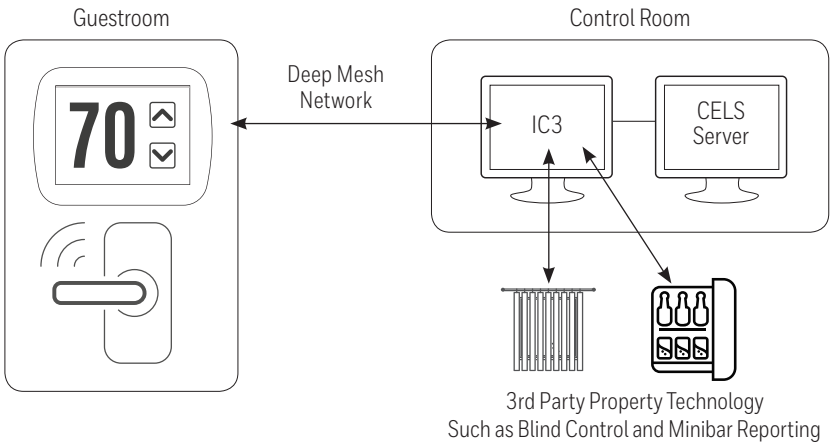
INNCOM INNcontrol™ 3

INN*control* 3

Efficient Central Control

The Honeywell INNCOM INNControl3 (IC3) system is a powerful, client / server application that provides central control and monitoring of INNCOM integrated room automation systems. IC3 gives your property managers a versatile tool to implement more sophisticated strategies for energy-cost control and improve staff efficiency while creating a superior experience for your guests.

Integrated IC3 Implementation



The INNCOM Deep Mesh Network is a reliable, redundant, secure network that supports all major hospitality vendors who leverage networking, yet requires less wiring, hardware, and maintenance than other such networked hospitality solutions.

EXPAND YOUR ENERGY SAVINGS

Once your hotel implements a fully integrated INNControl 3 system, you gain the ability to automate much more granular energy-management strategies. For example, when your rooms are managed on a simple "occupied" / "unoccupied" model, you can only safely let temperatures drift a few degrees while guests are out.

Conversely, with INNControl 3 automation, you can establish additional gradations of status, such as "hibernate" and "unrented," during which the room temperature can safely drift 8–10 degrees, driving additional savings without sacrificing your guest experience. The IC3 system also collects data that will enable you to quantify your energy savings.

IMPROVE YOUR EFFICIENCY

Data collected from your INNCOM systems can be used for much more than quantifying your overall energy savings – you can also generate detailed analyses for each room on your property. From a central computer, the IC3 system gives you the option to use a three-dimensional rendering of your property as part of your real-time display of information.

You can rotate and navigate this display to show any side of the building, as well as individual floors of the property, accessing a wide variety of details about occupants and rooms as well as the performance of assets such as HVAC equipment.

These insights help ensure that your housekeeping operations are efficient and responsive without being disruptive. Likewise, when a repair is needed, the system generates a maintenance alert so your staff can quickly repair the equipment or else prevent the room from being rented if it poses any risk of a poor guest experience.

Create a Superior Guest Experience

Your guests' experience is a key factor in their decision to plan return stays or recommend your accommodations to others. While it sounds simple, a comfortable room, an uninterrupted stay, and the ability to fully focus on their visit are a guest's reasonable minimum expectations – yet this can be hard to deliver.

With IC3 integration, you have the insights and automation you need to reliably deliver that experience and more. Further IC3 integration with your other hospitality vendors – such as minibars, central lock systems, lighting, drapes, and in-room entertainment – can create a highly customized and memorable experience for your guests.

Features

Real-time monitoring of HVAC equipment; reports of malfunctioning units.

Can monitor humidity levels in each room and reports rooms exceeding acceptable threshold.

Monitors room network connection and reports non-communicating rooms.

Reports low battery level in room devices and rooms that show constant occupancy.

Reports property-centric events such as domestic hot water and utility company demand events.

Reports lost Wide Area Network (WAN) connections and property management interface connections.

Tracks and reports equipment run-time vs. baseline of rooms running without energy-management control.

Benefits

Helps minimize revenue loss from rooms out of service due to HVAC problems.

Helps prevent lost rental revenue with audit trail of rooms that are occupied for extended periods without being rented.

Ensures peak performance and operation and helps avoid catastrophic equipment damage such as frozen compressors.

Automatic monitoring and reporting of alarms and events optimizes the investment made in a room automation system by ensuring peak performance.

Improved maintenance scheduling, prolonging equipment life and avoiding premature failures.

Easily displays energy savings month-by-month.

Honeywell
THE POWER OF **CONNECTED**

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Integrated Automation Control
Item Type	Integrated Automation Control of Guestroom Equipment
Description	Standard Base System Requirements (Master Light Switch). To meet electrical code for switching off code required guestroom light fixtures (permanently wired light fixtures and switched receptacles, not in bathroom) at guest departure.
Manufacturer	Assa Abloy Hospitality
Model	Energy Control Unit with Ving Card Flex RF Communication
CSI #	255110 Integrated Automation Control of Guestroom Equipment
Omniclass #	22-255110
Notes	1. System Description: a. The switch by the entry door shall be able to act as a master light switch to turn off all designated light fixtures and switched outlets when activated by the guest. 1) The total load cannot exceed 500 watts at 120 VAC. b. All wired lighting circuits shall be fed through the master light switch relay contacts. c. The single-button switch shall be programmed for a toggle function, meaning that each press of the button would toggle the internal relay and supply or cut power to the connected circuits. d. The button would be labeled as “Master Off” to indicate to the guest its intended use. Programming it as a toggle assures that the guest can turn the lights back on should they unintentionally turn them off. A blue LED indicator light is turned off when switch is off. e. The Magnetic Door Switch provides a trigger input to the master light switch. Upon entry to the room, if the master light switch relay is off, the door switch shall trigger it to the “on” state, automatically supplying power to all connected lighting switches in the room. If the master light switch is already on, then no change of state is to occur. f. Upon exiting the master light switch provides a method for the guest to press a single button to turn off power to all connected lighting circuits. If the guest does not press the switch, the connected loads shall remain on.

IMAGE NOT AVAILABLE

Energy Control Unit

The intelligent choice to save money

ASSA ABLOY Global Solutions offers a complete range of in-room Energy Control Units, the perfect combination to provide in-room comfort to your guests and saving energy and money when the guests are not in their room.

Compatible with the same VingCard room keycard, and intelligent to differentiate guest keycards and staff keycards. Thus, limiting the use of air conditioning and other electrical equipment in the room only to your guests and not to your hotel staff.

FEATURES

: Disconnects electrical equipment and air conditioning when guests are outside the room, thus saving money.

: Courtesy timer for guests when removing the keycard from the Energy Control Unit.

: Simple installation.

: It only works with hotel specific keycards[1].

1. Only for Intelligent Magnetic Stripe and Intelligent RFID.

TECHNICAL DATA

	STANDARD	INTELLIGENT MAGNETIC STRIPE	INTELLIGENT RFID
Descriptions:	Mechanical temporized energy saver.	Only operates with hotel specific magnetic striped keycards.	Only operates with hotel specific RFID keycards.

VingCard Flex
Electronic Lock

With VingCard Flex you are provided with a robust RFID lock that is specially developed for upgrading properties from Timelox and mechanical tubular locks to the newest RFID lock hardware platform without drilling the door. VingCard Flex is fully compatible with the latest solutions for Mobile Access and RF online communication.

FEATURES

: EPD (Environmental Product Declaration) certified
: Supports the latest RFID technology.
: Mobile Access (BLE) functionality included in reader (optional).
: Online compatible.
: Detailed audit trail: 2000 events in offline mode and unlimited events in online mode (stored in local server).
: Easy upgrade from Timelox S-serie without drilling.
: Compatible with a selection of tubular latches.
: Fire listed for use on fire doors (UL, EN).
: Flip-up (raise inside handle in upright position) for activating deadbolt.
: Panic release function – the deadbolt and latch are automatically retracted by inside handle for easy regress in emergency situations.
: Stainless steel parts for mechanical strength, corrosion resistance and nice appearance.
: Optional high security mechanical override cylinder.
: RFID Specifications:
- 13,56MHz technology
- Compatible with the following standards:
  - ISO 14443 A (MIFARE including Desfire)
  - ISO 14443 B
  - ISO 15693

Battery location	Inside the room
Material	Escutcheons and handles: Stainless steel, quality SUS304 Plastic covers: Polycarbonate
Metal finishes	Satin Chrome (Stainless steel), Satin Brass (Stainless steel with PVD)
Standard plastic color	Black RAL 9005
Handle options in standard range	Straight and Return (special handle with extra return that is ½ inch from the door)
Emergency opening options	Electronic emergency opening with service unit and optional mechanical cylinder inside the escutcheon with access from the bottom
User interface	3 colored LED display (green, red, yellow) plus Blue color and acoustic beeper if reader with built-in BLE is selected.
Locking mechanism	Electro-mechanical locking mech inside the escutcheon
Door thickness	30 - 100 mm / 1,18 - 3,94 Inches
System software compatibility	Visionline and Vostio
Online compatibility	Wireless (based on ZigBee protocol) in Visionline
Storage temperature	0-70 °C / 32-158 °F: non-condensing environment
Tested operating temperature	Tested from -25 °C to 70 °C (-13 °F to 158 °F), according to IEC 60068-2.
Certifications	EPD (Environmental Product Declaration) Certified With DIN Lock case: B30/EI30 fire approval according to EN1634-1. UL45 min with Timelox E9050 lock case
Compatible lock cases	In general, all lock cases used on old Timelox S-series: - Timelox DIN - ASSA 524 - E9050 (ANSI) - E9025 (EURO)
Compatible tubular latches	Lockwood 530 series: available in 60mm, 70mm and 127mm backset 60mm Backset, SC 530-12SC 93-11847-46374-5 70mm Backset, SC 530-222SC 93-11847-46477-3 127mm Backset, SC 530-225SC 93-11847-46315-8 Yale 280N, 280RN and 280DN

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Item Name	Integrated Automation Control
Item Type	Integrated Automation Control of Guestroom Equipment
Description	Standard Base System Requirements (Master Light Switch). To meet electrical code for switching off code required guestroom light fixtures (permanently wired light fixtures and switched receptacles, not in bathroom) at guest departure.
Manufacturer	INNCOM by Honeywell
Model	S-Series Switch Model EVORA with Magnetic Door Switch Model #S241
CSI #	255110 Integrated Automation Control of Guestroom Equipment
Omniclass #	22-255110 Integrated Automation Control of Guestroom Equipment
Notes	Function: The system uses a programmable smart switch (INNCOM EVORA) located at the guestroom entry and a two-piece magnetic reed switch (INNCOM #S241) installed in the entry door. Upon exiting the INNCOM EVORA provides a method for the guest to press a single button to turn off power to all connected lighting circuits. If the guest does not press the switch, the connected loads remain on. The next time the door opens, all of the connected light circuits are automatically turned back on triggered by the magnetic reed switch (INNCOM #S241). • Guest enters - Door opens – designated “Welcome” light fixture is automatically triggered on as well as the power turned on to the code required guestroom light fixtures and switched receptacles by the Magnetic Reed Switch (INNCOMM #S241). • Guest leaves - guest voluntarily presses wall button labeled “Master Off” (Smart Switch) and code required guestroom light fixtures and switched receptacles are turned off. The smart switch is (INNCOM EVORA) is programmed to ignore the Magnetic Reed Switch (INNCOMM #S241) for one (1) minute after the door is opened, thereby allowing the door to be opened for guest to leave after pushing the “Master Off” switch. • The Single Button Smart Switch (INNCOM EVORA) is programmed for a toggle function - meaning each press would toggle the internal relay and supply or cut power to the connected circuits. Even though the switch is labeled “Master Off”, it would turn all connected circuits back on again if pressed again (assuming the guest presses it in error the first time). • The Magnetic Reed Switch (INNCOM #S241) installed in the entry door provides a trigger input to the Single Button Smart Switch (INNCOM EVORA)

upon activation. If the INNCOM EVORA relay is OFF, the door switch triggers it to the ON state, automatically supplying power to the connected circuits. If the INNCOM EVORA is already ON, then no change would occur.

- The designated “Welcome” light which turns on when the door opens, depends on the light switch state of each circuit. If the light switch is on when “Master Off” was pressed, then the light will turn on when the door opens, if it was off, it will remain off. Operations Note: This system allows for a pre-determined “Welcome” light fixture, as designated by Marriott and as shown on Drawings, to be on upon guest entering the room. The “Welcome” light fixture must be a subset of the code required light fixtures connected to the Master Light Switch. By directing Housekeeping Staff to turn the switch for the designated light to the “ON” position, and then turning the Master Light Switch to the “OFF” position, the Magnetic Reed Switch located at the door will turn the designated light on when the guest enters the room.
- All code required wired lighting circuits are to be fed through the Smart Switch (INNCOM EVORA) relay contacts. The total load cannot exceed 500 watts at 120 VAC.

SPECIAL INSTRUCTIONS

Coordinate with Door Hardware.
Upgrade Options: Specified Separately
Option #1 - Master Light Switch and HVAC Unit controlled by Passive Infrared Motion Sensor Thermostat
Option #2 - Thermostat upgrade to Option 1: Thermostat INNCOM #e529-RF
Option #3 - Centrally-controlled energy management system
Option #4 - RF communication from the door lock to the Single button smart switch (INNCOM EVORA) or thermostat (INNCOM #e528) in lieu of the magnetic reed switch (INNCOM #S241).

Overview and General Concepts

The EVORA family of switches offers an elegantly designed, easy to use, feature-rich user interface and control system providing a state-of-the-art guestroom automation experience. EVORA allows guest control of multiple lighting loads, temperature, drapes, and guest annunciation from multiple switch locations in the guestroom. EVORA offers different user interface modules and multiple different Load Assemblies that include wired and wireless RF communications, dimmers, and programmable controls designed to operate within INNCOM's Integrated Room Automation System. The EVORA system brings all guestroom control features into a sleekly designed traditional keypad user interface.

Figure 1. EVORA Switch

Application

EVORA was developed to extend INNCOM switch capabilities beyond those offered in the well-established S-Series (S217 and S5XX) product families and the innovative MODEVA series. The EVORA series uses a modular, cross functional hardware platform that allows each of the three most typical products (multifunctional switch, nightlight, and doorbell) to share features in both hardware and software that were previously available only as uniquely designed sub-assemblies in the legacy S-Series products.

EVORA has at its core the same Load Assembly (WBI) architecture used by INNCOM's MODEVA line. The Load Assembly is available in six configurations—Relay Actuator, TRIAC dimmer, FET dimmer, Master Contactor, power supply, and a Low Voltage adapter (LVA)—that provide the mechanical platform and load bearing capability for the EVORA system. The EVORA series differs from MODEVA in several ways. It uses a standard dimension mounting bracket, for instance, allowing EVORAs to be ganged with other products (similar to the S-Series). EVORA products come factory assembled.

Features

- All Load Assembly–based applications, including the nightlight and P564 doorbell, have radio and S5bus communications capabilities
- Up to 7 key configurations with up to 5 position key pad for programmable control of any IRAS feature
- Nightlight configuration with 2 key positions
- Doorbell configuration with 2 key positions
- Optional multifunction key for up to 10 grouped features per device
- Backlight illuminated keys and text
- TRIAC dimmer
- FET dimmer
- Relay actuator
- Master contactor application
- 12VDC power supply
- Low-voltage adapter for load center applications
- 2.4Ghz 802.15.4 wireless RF network communications
- S5bus wired network communications
- Digital input for door switch contact / integration with the INNCOM energy management system (EMS)
- Software programmable for any CBL feature

Categories of Load Assembly Load Switching

- TRIAC dimmer provides dimming control of resistive light loads, such as incandescent and halogen, and inductive loads, such as Magnetic Low Voltage transformers (MLV). The TRIAC dimmer can dim 100–120VAC loads up to 650W (see Note 1 below).
- FET dimmer dims capacitive loads such as dimmable CFLs, LEDs, and Electronic Low Voltage transformers (ELV). It can also dim resistive loads such as incandescent and halogen lights. The FET dimmer is designed to dim 100–120VAC up to 350W (see Note 2 below).
- Relay power supply switches capacitive, inductive, resistive, and general purpose loads up to 500W.
- Master contactor controls 30A relay at 120–240VAC.
- 200mA power supply used for applications where EVORA must be line powered but does not require load dimming or switching.

- Low-voltage adapter allows the EVORA products to run in a +12VDC powered device that does not actuate a load. This is very similar to the legacy S5XX product.

NOTE 1: The TRIAC dimmer can be used in multi-gang applications at 650W if ganged with a Relay actuator. If used in a multi gang installation with another TRIAC or MOSFET dimmer, the maximum output is 400W.

NOTE 2: The MOSFET dimmer can be used in multi-gang applications at 350W if ganged with a Relay actuator. If used in a multi-gang installation with another MOSFET or a TRIAC dimmer, the maximum output is 250W.

Load Assembly Parallel Power Supplies

The WBI actuators operate in parallel to supply a higher load capacity on the +12VDC rail than that achievable by a single actuator. The total output power of the actuators in parallel is based on the voltage specifications at maximum load versus the output current at maximum load and nominal recovery time after a foldback condition occurs. This design can aggregate up to 6 actuators into a system that permits up to a combined 990mA (~1A) +12VDC output. See **Class 2 Output** table below.

Additional Load Assembly Technical Features

- Air-gap relay required (for dimmers meeting UL 508). Where solid state dimmers are used, disengages the load from the line power in the event that a failed actuator causes a short or a closed circuit (as with a FET dimmer), a possible electric shock risk during routine maintenance or lamp replacement.
- Additional overload detection circuit for FET dimmer that senses a catastrophic overload / short and shuts down the dimmer to protect the solid state circuitry.
- Dimming linearization curve may be set by application engineer to calibrate the duty cycle of a Pulse Width Modulated signal driving the various lamp types that could be used.
- Self contained actuator that can be used without the user interface. This is useful during installation (with EVORA) and in repair to isolate symptoms related specifically to the actuator.

Load Assembly Installation

Locate the fuse panel and remove fuses or ensure the breaker is in the OFF position before installing the Load Assembly.

1. Pull the class-2 wires for Ground (Brown), +12VDC (Red) and S5bus (Orange) and digital inputs into the wall box (See Wiring Diagrams). Make the connections using a dolphin DC-1000P Super B connector or equivalent type connector to the S5bus or digital input harnesses and connect them to the appropriate header on the Load Assembly.

2. Prepare the line voltage wiring by stripping back the insulation 16mm (5/8th inch).
3. Connect the Green (Earth) Cable attached to the Load Assembly Strap to Earth.
4. Wire the Load Assembly as described in the Wiring Diagrams. Depending on gang assembly using the appropriate 10, 12, 14, 16, or 18 AWG wire nut.
5. Push all wires back into the wall box and fasten the control to the wall box using the supplied mounting screws. Be sure not to pinch or disconnect any of the wires.
6. Ensure the intended load(s) are connected to the circuit.
7. Replace the fuses in the fuse panel or move the breaker to ON before continuing.

Note: EVORA self test may require that an I/O map is configured. The following steps are general guidance only. Installers should refer to the property-specific install and commissioning documents for further guidance.

8. Allow the EVORA switch to power up. To verify power, observe whether indicator light or backlight illuminate or blink.
9. Testing EVORA depends on the specific software configuration.
10. The EVORA User Interface will display start up behavior (refer to the property-specific installation and commissioning guide(s) and then enter a self test mode for the first 20 seconds of operation.

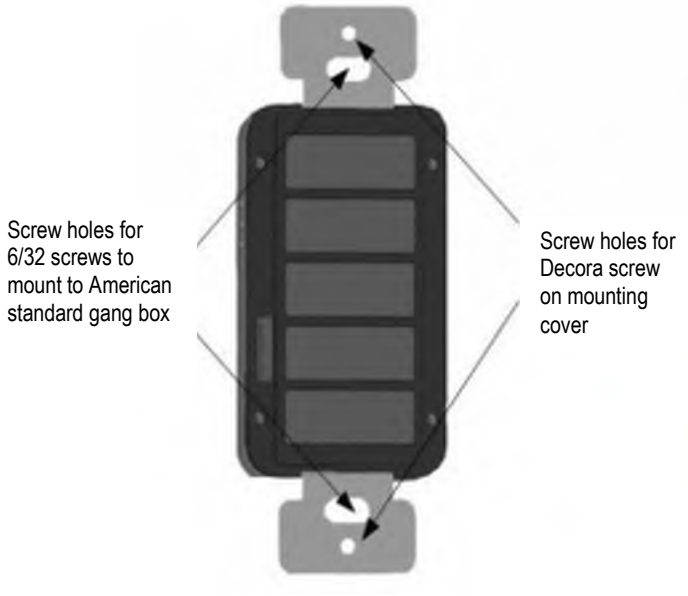

Figure 2. Mounting Screw Holes

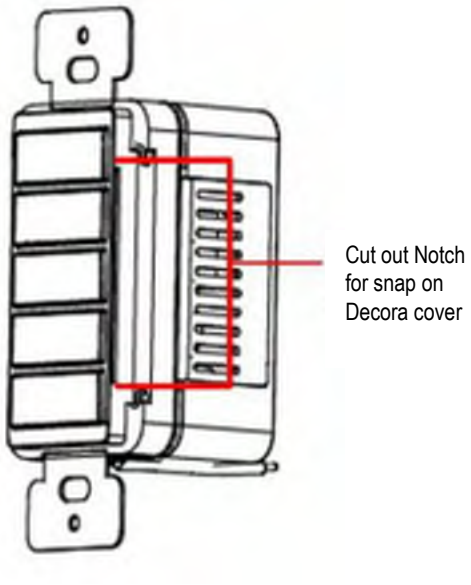

Figure 3. Decora Notch

The EVORA and Load Assembly is supplied with two 1¼" 6/32 screws, two 3-pin S5bus harnesses and a two-pin pig-tail harness for the digital input.

Wiring Diagrams

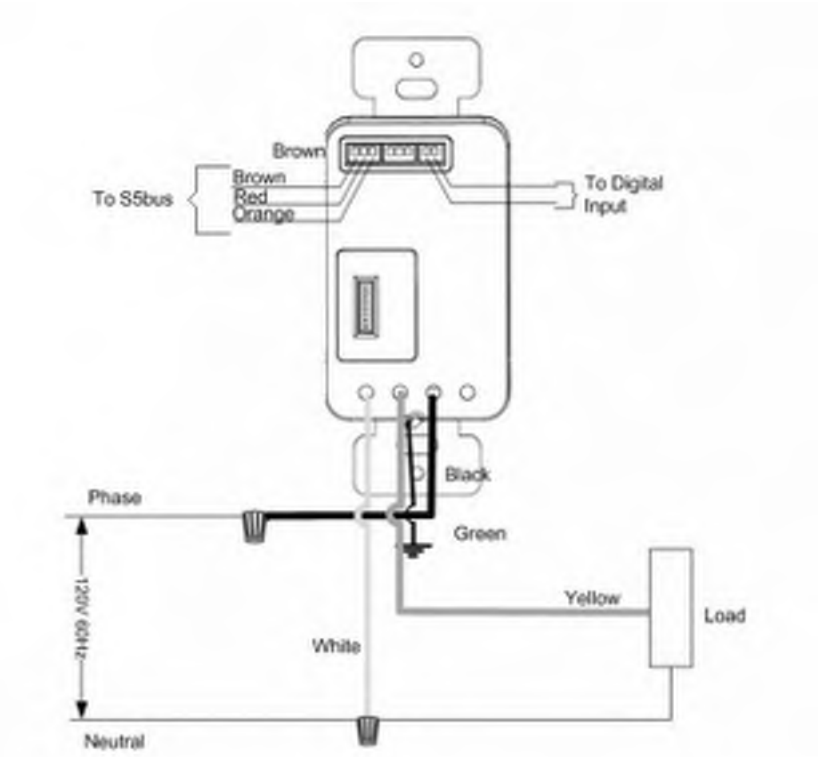

Figure 4. EVORA WBI Single Wiring

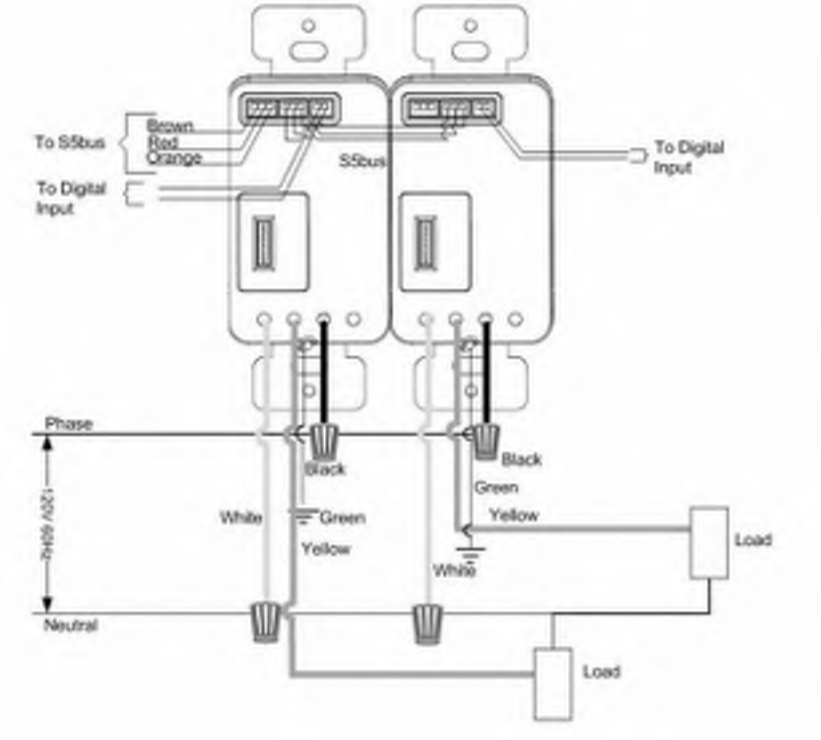

Figure 5. EVORA WBI Double Wiring

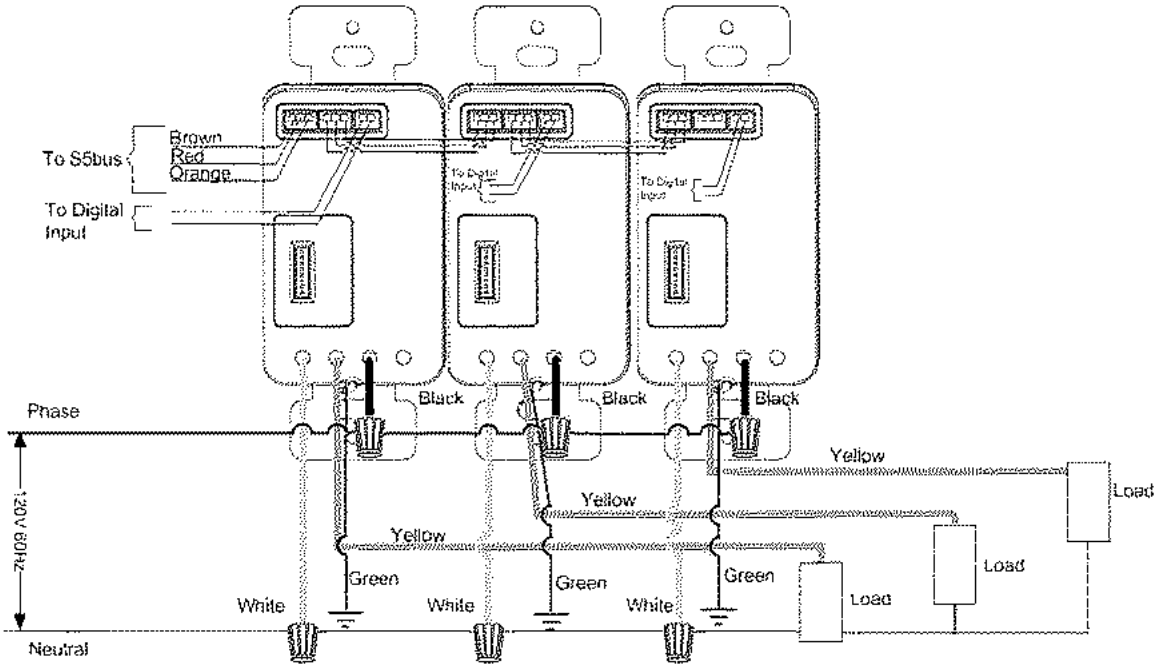

Figure 6. EVORA WBI Triple Wiring

In double and triple configurations, refer to the wiring diagram for S5bus and digital input connections. Daisy chaining is required **only** if all EVORA units need to be on the same S5bus or a parallel power design is needed for higher load capacity (See **Class 2 Output** table below).

Master Contactor

Use for master contactor applications up to 30A. This assembly requires an external +12VDC source. The base unit (without EVORA logic board) consumes 80m.

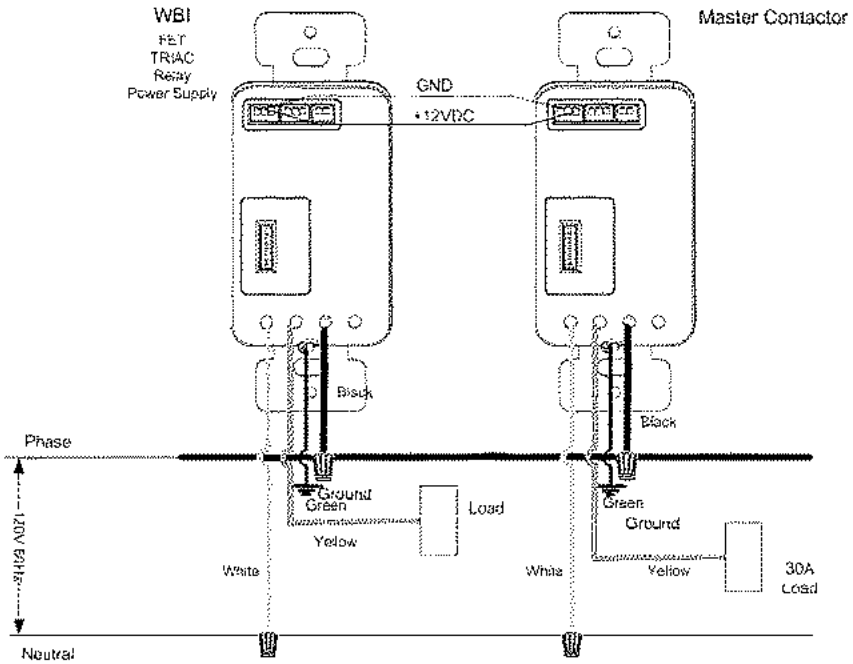

Figure 7. EVORA WBI Master Contactor Wiring

WBI Power Supply

Use for applications where EVORA must be line powered but does not require load dimming or switching. 200mA DC output.

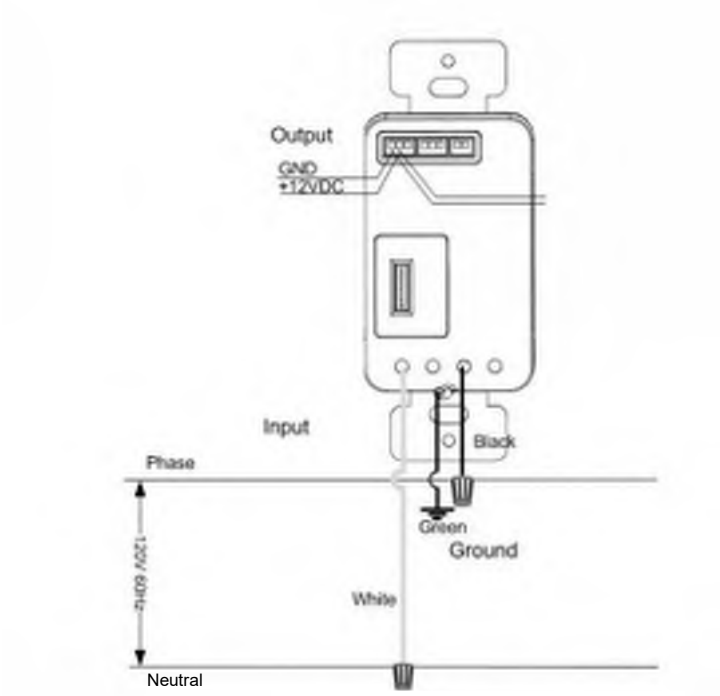

Figure 8. EVORA WBI Power Supply Wiring

Low Voltage Adapter

The EVORA can be equipped with the Low Voltage Adapter (LVA). This allows the EVORA to act as a remote, +12VDC powered device only. Power consumption is 2mA.

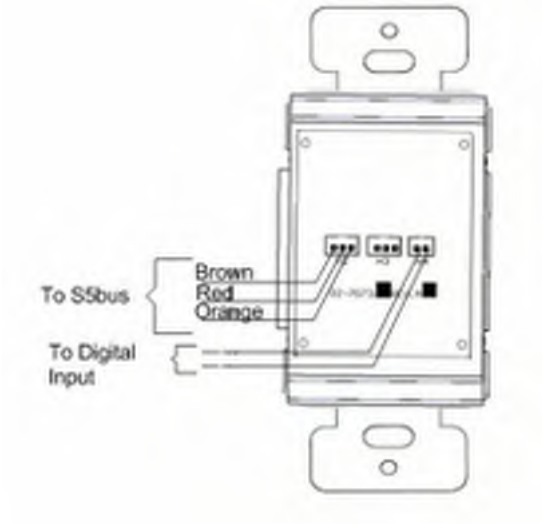

Figure 9. EVORA WBI Low Voltage Adapter Wiring

Technical Specifications

User Interface	Tactile Input
Maximum # of inputs	1-7 Tactile Keys
Alternate User Interface	Keypad—traditional mechanical switches
Communications	Wired S5bus 2.4Ghz RF
Input Power	12VDC, up to 250mA*
Audio	8 ohm, 0.5W speaker for doorbell chime
Micro Controller	16Mhz, 32-bit ARM based MCU
Dimensions	3/4" W x 1 3/4" D x4" H (including brackets) 45 mm W x 45 mm D x 100 mm H (including brackets)

FCC ID: GTC202111TXR

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

IC: 1609A-201217TXR

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Load Specifications

Single Gang Installation

The following table provides the load ratings at absolute maximum based on the load type in a single gang wall box.

Actuator	Ratings			
	Voltage	**Frequency**	**Power / Amperes**	**Load Type**
SMPS 03-0753	120-240 Vac	50/60Hz	200mA	+12DC Output Only
Relay Actuator 03-7050	120-240 Vac	50/60Hz	4.1A	Resistive
	120-240 Vac	50/60Hz	4.1A	General Purpose
	120-240 Vac	50/60Hz	500W	Incandescent / Halogen
	120-240 Vac	50/60Hz	250VA	ELV / MLV
	120-240 Vac	50/60Hz	250W	CFL / LED
	120-240 Vac	50/60Hz	1/10HP	Motor
Triac Actuator 03-7051	120 Vac	60Hz	2.9A	Resistive
	120 Vac	60Hz	650W*	Incandescent / Halogen
	120 Vac	60Hz	250VA	MLV
	120 Vac	60Hz	250W	Motor
MOSFET Actuator 03-7052	120 Vac	60Hz	2.9A	Resistive
	120 Vac	60Hz	350W**	Incandescent / Halogen
	120 Vac	60Hz	250VA	ELV / MLV / Electronic Ballast
	120 Vac	60Hz	250W	CFL / LED
Master Contactor 030310	120 Vac	60Hz	30A	Resistive
	120 Vac	60Hz	30A	General Purpose
	120 Vac	60Hz	960W	Incandescent / Halogen
	120 Vac	60Hz	600VA	ELV / MLV / Electronic Ballast
	120 Vac	60Hz	600W	CFL / LED

ELV: Electronic Low Voltage Transformer MLV: Magnetic Low Voltage Transformer

Minimum Load for TRIAC Actuator: 10W

Important Note: Many Electronic / Magnetic Low Voltage Transformers require a minimum load. Please consult manufacturers' requirements before using with WBI Actuator.

***NOTE 1**: The TRIAC dimmer can be used in multi-gang applications at 650W if ganged with a Relay actuator. If used in a multi-gang installation with another TRIAC or MOSFET dimmer, the maximum output is 400W.

****NOTE 2**: The MOSFET dimmer can be used in multi-gang applications at 350W if ganged with a Relay actuator. If used in a multi-gang installation with another MOSFET or a TRIAC dimmer, the maximum output is 250W.

Class-2 Output

The Load Assembly has been designed to provide +12VDC power to devices connected to the S5bus. The Load Assemblies can operate in parallel to supply a higher total load capacity than that achievable by a single Load Assembly. However, the total output is derated as per the table below for accommodating the stability of the power supply circuitry. The total available output power must be shared with the EVORA User Interface. Refer to the following table for Class-2 Output ratings.

Number of Load Assemblies	Nominal Voltage	Voltage at Maximum Load	Output Rating
1	+12VDC	+11.0VDC	200mA
2	+12VDC	+11.0VDC	400mA
3	+12VDC	+11.1VDC	600mA
4	+12VDC	+11.1VDC	700mA
5	+12VDC	+11.2VDC	800mA
6	+12VDC	+11.2VDC	900mA

Operating Conditions

Table Header	Table Header
Storage	68-176 degrees F; 20–80 degrees C, non-condensing
Operating	50-122 degrees F; 10–50 degrees C, non-condensing

Document Revision History

REVISION	DATE ISSUED	REASON FOR CHANGE	
0.1	10-Mar-2012	First Draft	
0.2	15-Mar-2012	Incorporated R&D review comments	
0.3	22-Mar-2012	Updated drawings and load assembly text	
1.0	23-Mar-2012	Incorporated Marketing comments and released	
1.01	29-Jun-2012	Incorporated new load assemblies, order guide, IC statement	
2.0	07-Sept-2012	Incorporated FCC statement changes and republish	
2.1	28-Sept-2012	Added Master Contactor Load Spec, verified Class 2 output

THE POWER OF **CONNECTED**

Hospitality

S241

Magnetic Door Switches

The S241 Magnetic Door Switch is a sensor used to monitor the open and closed status of a door. A magnet mounted into the door connects the S241 reed switch contacts when the door is closed, signaling room occupancy status.

S241 Resessed Door Switch

S241 Door Switch for
Sliders and Balcony Doors

S241 Door Switch
1/4" Dia., Wire leads

OVERVIEW

The INNCOM S241 is used to monitor a guestroom entry door as part of Honeywell's INNCOM standalone energy management system or the Integrated Room Automation System. The heart of this system is one of Honeywell's INNCOM Smart Digital Thermostats.

When the thermostat receives information of a change in the position of the entry door (open or closed), it considers the event in combination with information from its passive infrared motion sensor to determine whether the room is occupied or unoccupied.

FEATURES & BENEFITS

Monitors open/close status of the door

May be integrated with the INNCOM Room Automation System over Deep Mesh

RF Wireless or S5Bus Communication

Transfers information to other devices such as HVAC and lighting controls

S241 Magnetic Door Switches

APPLICATION AND INSTALLATION

The S241M is a normally open reed magnet switch. Electrically, the contacts are closed when the reed switch is in close proximity to a suitable magnet. The drawing below illustrates the recommended mounting method for the switch in a hotel guestroom environment. The location of the contact was selected so that the switch will detect a door that is resting against the frame but is not latched. Placing the S241M closer to the hinge of the door will provide a "door closed" indication with increasingly open angle.

Note that the S241M has a "lip" that protrudes below the frame of the door. The spacing between the door and the frame must be able to accommodate this lip (which is about 0.060" thick).

The switch and the mating magnet may also be installed horizontally near the top, as show in the drawing as option B.

For installation in a wooden door/frame, the depth of the hole in the frame should be 2 inches and the depth of the hole in the door should be 1 inch.

SPECIFICATIONS	
DIMENSIONS	3/4" diameter
MAXIMUM SWITCHING CURRENT	.500 A
MOUNTING	S241 Recessed Door Switch is recessed into door and door frame S241 Balcony and Sliders switch are magnetic contacts with screw terminals
MAXIMUM SWITCHING VOLTAGE	100VDC/VAC
MAXIMUM INITIAL CONTACT RESISTANCE	0.100 ohms
MAGNETIC CONTACT	12-22 lead gap insteel: 0.5" (13mm)
APPROVALS	UL Listed 0508C 64Z2

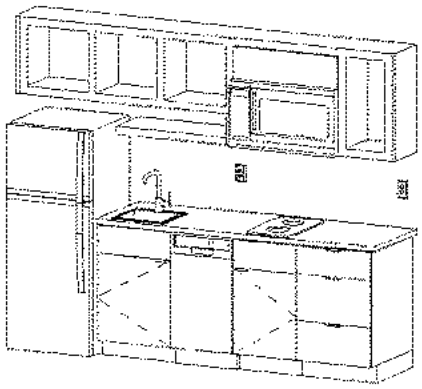
Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Millwork
Item Type	Guestroom Kitchenette Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, drawers and countertops.
Manufacturer	MGroup; J Suss Industries, Inc.; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Refer to Notes
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content. Wood panel products and ADHESIVES must meet California Air Resources Board (CARB certified) for low/no formaldehyde emissions.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Accessories	Door Stop Silencers: Apply door stop silencers (bumpers) at top and bottom on rear side of doors and drawers. Drawer Slides – Kitchen: Drawers in kitchen to have Side mount, self-closing, 75 lb. load capacity, epoxy coated glides with nylon rollers or Side mount, self-closing, 75 lb. load capacity, zinc coated metal ball bearing glides. Optional: Slides with soft-close feature; Metabox (or equal) system with drawer slide built into metal side rail; Glides with full extension
Part of an Assembly	N

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. General Design for Guestroom Millwork: a. Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay, slab style door and drawer. b. Grain on doors and drawers is horizontal except when door is taller than 48". Grain on trim, end panels, and fillers is to run horizontally. c. Interior finish (non-exposed) to be Wilsonart Light Gray 1500-60 is thermofused melamine with PVC edge band, unless noted otherwise in drawings. d. Exterior Finish is standard thermofused melamine with PVC edge band, unless noted otherwise in drawings. e. Applied trim shall be flush with front surface of door/drawer. 2. Panel Material: a. 3/4” thick minimum thermofused melamine finish over medium density fiberboard (MDF) or Industrial hardboard (particle board) unless otherwise stated. Where Industrial Hardboard (particle board) is used must meet ANSI A208.1, matt-formed particle board, Grade 1-M-2 with minimum density of 45 pcf, internal bond of 60 psi, and minimum screw hold capacity of 225 lb on faces and 200 lb on edges. Where MDF is used must meet ANSI A208.2, Grade 130. Where tempered hardboard (High Density Fiberboard) is used must meet ANSI A135.4, class 1, tempered. 3. Cabinet Box Construction a. Frameless cabinet box. b. All joints fastened with mortise and tenon, or glued-and doweled, or one-way plastic dowel, or screwed and glued. All fasteners to be hidden. No metal cam & dowel fasteners are to be used. c. All exposed cabinet surfaces shall be finished to match cabinet exterior, doors, and drawers. Finish applied to all surfaces to assure moisture resistance and humidity balance. 4. Cabinet Sides, Top, Bottom & Back: a. Optional: non-exposed back panel not less than 1/4" tempered hardboard or MDF with thermofused melamine finish, used in conjunction with hanging rails not less than 1/2” x 3" plywood, or not less than

3/4" x 3" thermofused melamine.
b. Apply PVC edge material to all edges, including bottom edge of side panel, to protect substrate against water absorption. Edge banding to be PVC 1mm or thicker, color/pattern to match exterior (where exposed) or to match interior (non-exposed). PVC edgeband to be thermally fused/glued, edges to be cut flush and trimmed/buffed to remove sharp edges and glue residue.
5. Doors, Drawer-fronts, and Aprons:
a. Full overlay slab-style, with PVC edgebanding applied to all edges.
b. Front and edges to match cabinet exterior, back surface (non-exposed) to match cabinet interior.
c. Door and drawer fronts to be routed to accommodate pulls so pulls are flush with top of door and drawer edge.
6. Shelves: (Excluding open shelves)
a. Adjustable shelves within cabinets finish are thermofused melamine, to match cabinet interior, with PVC edge band applied to all edges.
b. Shelf supports to be adjustable approximately every 1-1/4".
c. Shelf supports to be "seismic" style designed to prevent shelves from tipping or sliding out of cabinets. Shelf supports may be metal or plastic. If plastic, shelf supports should be clear or color to match cabinet interior.
d. Base Cabinet Shelves to be half-depth or 3/4 depth.
7. Fillers and end panels:
a. Supply fillers oversized to be cut to fit by installer
8. Drawer construction:
b. Sub-front and back joined to sides with glued dovetail when constructed of solid wood, or glued and doweled, or mechanical dowel, or rabbeted into side and secured with glue and mechanical fasteners.
c. Exposed fronts fastened to sub-fronts with adjustable drawer-front mounting system or with mounting screws from interior of body.
d. Bottom: Not less than 1/2” or 3/8" thermofused melamine on MDF or Industrial hardboard. Drawer box sides and front/back to be grooved to accept bottom panel, bottom panel to be fully inserted into groove to create permanent attachment.
e. Option: drawer sides by “Metabox Drawer System” (or equal) are acceptable.
9. Base Cabinet:
a. Cabinet top stretchers attached horizontally to top of cabinet-side at front and rear to keep cabinet square.
b. At sink cabinet or cooktop cabinet front cabinet top stretcher to be mounted vertically to avoid impediment with sink or cooktop appliance.

c. Option:
1) Provide 3/4" Thermofused Melamine Corner Blocks glued and fastened in each of four top corners to maintain cabinet square and rigid.
2) Or provide Plastic Corner Blocks at four top corners fastened to side panel and front/rear cabinet components
d. Base cabinet toe space & kick board to be integrated with side panels, capturing toe kick between side panels.
e. Side panels to be notched for integral toe space with side panels extended to floor for continuous support. Finish bottom, side, and top edge of side panels with PVC edgebanding to prevent water absorption.
f. Option: Provide mechanical waterproof leg (plastic or metal) attached to bottom of cabinet, toe kick boards attached via clip system from Hafele (or equal).
g. Provide toe board cover not less than 1/4" tempered hardboard or MDF with thermofused melamine face and side surface to match cabinet doors. Apply after installation to achieve a continuous toe board cover; minimize seams.
10. Cleats:
a. Provide raw wood cleats as 3/4" x 1-1/2" x 8 feet, to be cut and attached by installer at blind corners and appliance openings as required to support countertops.
11. Open Shelf Upper Cabinet:
a. Construction of open shelf cabinet to be "double-walled" with inner and outer side panel, and with upper and lower surface for bottom, top, and middle self.
b. Bottom of open shelf cabinet and floating shelf to be positioned to align with bottom of microwave oven or range hood (where it occurs).
c. Face trim to be applied to front surface of double-walled shelves and side panels such that face trim completely covers front edges of sides, top, bottom, and shelves. Face trim to be flush with trim surrounding adjacent wall cabinets.
d. Grain on side, top, bottom, and shelf panels to run lengthwise. Back panel finish to be thermofused melamine to match color of kitchen wall.
e. Shelves are to have bottoms the same thickness as the face.
f. Upper cabinets to be mounted in sections and fully supported the length of the cabinets. All mounting hardware to be concealed (hidden).
g. Provide fillers at both ends for open shelf upper cabinets.
h. Provide wire management for puck lights and undercabinet lighting to capture all wires and assure

no wires are visible at top of cubbies from across the room; refer to the design guideline drawings.
12. Lighting: Refer to lighting specifications and design guideline drawings.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include appliances, lighting, power/data etc.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Revision Date:

Item Name	Millwork
Item Type	Guestroom Kitchenette Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, drawers and countertops.
Manufacturer	MGroup; J Suss Industries, Inc.; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Refer to Notes
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content. Wood panel products and ADHESIVES must meet California Air Resources Board (CARB certified) for low/no formaldehyde emissions.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Accessories	Door Stop Silencers: Apply door stop silencers (bumpers) at top and bottom on rear side of doors and drawers. Drawer Slides – Kitchen: Drawers in kitchen to have Side mount, self-closing, 75 lb. load capacity, epoxy coated glides with nylon rollers or Side mount, self-closing, 75 lb. load capacity, zinc coated metal ball bearing glides. Optional: Slides with soft-close feature; Metabox (or equal) system with drawer slide built into metal side rail; Glides with full extension
Part of an Assembly	N

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. General Design for Guestroom Millwork: a. Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay, slab style door and drawer. b. Grain on doors and drawers is horizontal except when door is taller than 48". Grain on trim, end panels, and fillers is to run horizontally. c. Interior finish (non-exposed) to be Wilsonart Light Gray 1500-60 is thermofused melamine with PVC edge band, unless noted otherwise in drawings. d. Exterior Finish is standard thermofused melamine with PVC edge band, unless noted otherwise in drawings. e. Applied trim shall be flush with front surface of door/drawer. 2. Panel Material: a. 3/4” thick minimum thermofused melamine finish over medium density fiberboard (MDF) or Industrial hardboard (particle board) unless otherwise stated. Where Industrial Hardboard (particle board) is used must meet ANSI A208.1, matt-formed particle board, Grade 1-M-2 with minimum density of 45 pcf, internal bond of 60 psi, and minimum screw hold capacity of 225 lb on faces and 200 lb on edges. Where MDF is used must meet ANSI A208.2, Grade 130. Where tempered hardboard (High Density Fiberboard) is used must meet ANSI A135.4, class 1, tempered. 3. Cabinet Box Construction a. Frameless cabinet box. b. All joints fastened with mortise and tenon, or glued-and doweled, or one-way plastic dowel, or screwed and glued. All fasteners to be hidden. No metal cam & dowel fasteners are to be used. c. All exposed cabinet surfaces shall be finished to match cabinet exterior, doors, and drawers. Finish applied to all surfaces to assure moisture resistance and humidity balance. 4. Cabinet Sides, Top, Bottom & Back: a. Optional: non-exposed back panel not less than 1/4" tempered hardboard or MDF with thermofused melamine finish, used in conjunction with hanging rails not less than 1/2” x 3" plywood, or not less than

3/4" x 3" thermofused melamine.
b. Apply PVC edge material to all edges, including bottom edge of side panel, to protect substrate against water absorption. Edge banding to be PVC 1mm or thicker, color/pattern to match exterior (where exposed) or to match interior (non-exposed). PVC edgeband to be thermally fused/glued, edges to be cut flush and trimmed/buffed to remove sharp edges and glue residue.
5. Doors, Drawer-fronts, and Aprons:
a. Full overlay slab-style, with PVC edgebanding applied to all edges.
b. Front and edges to match cabinet exterior, back surface (non-exposed) to match cabinet interior.
c. Door and drawer fronts to be routed to accommodate pulls so pulls are flush with top of door and drawer edge.
6. Shelves: (Excluding open shelves)
a. Adjustable shelves within cabinets finish are thermofused melamine, to match cabinet interior, with PVC edge band applied to all edges.
b. Shelf supports to be adjustable approximately every 1-1/4".
c. Shelf supports to be "seismic" style designed to prevent shelves from tipping or sliding out of cabinets. Shelf supports may be metal or plastic. If plastic, shelf supports should be clear or color to match cabinet interior.
d. Base Cabinet Shelves to be half-depth or 3/4 depth.
7. Fillers and end panels:
a. Supply fillers oversized to be cut to fit by installer
8. Drawer construction:
b. Sub-front and back joined to sides with glued dovetail when constructed of solid wood, or glued and doweled, or mechanical dowel, or rabbeted into side and secured with glue and mechanical fasteners.
c. Exposed fronts fastened to sub-fronts with adjustable drawer-front mounting system or with mounting screws from interior of body.
d. Bottom: Not less than 1/2” or 3/8" thermofused melamine on MDF or Industrial hardboard. Drawer box sides and front/back to be grooved to accept bottom panel, bottom panel to be fully inserted into groove to create permanent attachment.
e. Option: drawer sides by “Metabox Drawer System” (or equal) are acceptable.
9. Base Cabinet:
a. Cabinet top stretchers attached horizontally to top of cabinet-side at front and rear to keep cabinet square.
b. At sink cabinet or cooktop cabinet front cabinet top stretcher to be mounted vertically to avoid impediment with sink or cooktop appliance.

c. Option:
1) Provide 3/4" Thermofused Melamine Corner Blocks glued and fastened in each of four top corners to maintain cabinet square and rigid.
2) Or provide Plastic Corner Blocks at four top corners fastened to side panel and front/rear cabinet components
d. Base cabinet toe space & kick board to be integrated with side panels, capturing toe kick between side panels.
e. Side panels to be notched for integral toe space with side panels extended to floor for continuous support. Finish bottom, side, and top edge of side panels with PVC edgebanding to prevent water absorption.
f. Option: Provide mechanical waterproof leg (plastic or metal) attached to bottom of cabinet, toe kick boards attached via clip system from Hafele (or equal).
g. Provide toe board cover not less than 1/4" tempered hardboard or MDF with thermofused melamine face and side surface to match cabinet doors. Apply after installation to achieve a continuous toe board cover; minimize seams.
10. Cleats:
a. Provide raw wood cleats as 3/4" x 1-1/2" x 8 feet, to be cut and attached by installer at blind corners and appliance openings as required to support countertops.
11. Open Shelf Upper Cabinet:
a. Construction of open shelf cabinet to be "double-walled" with inner and outer side panel, and with upper and lower surface for bottom, top, and middle self.
b. Bottom of open shelf cabinet and floating shelf to be positioned to align with bottom of microwave oven or range hood (where it occurs).
c. Face trim to be applied to front surface of double-walled shelves and side panels such that face trim completely covers front edges of sides, top, bottom, and shelves. Face trim to be flush with trim surrounding adjacent wall cabinets.
d. Grain on side, top, bottom, and shelf panels to run lengthwise. Back panel finish to be thermofused melamine to match color of kitchen wall.
e. Shelves are to have bottoms the same thickness as the face.
f. Upper cabinets to be mounted in sections and fully supported the length of the cabinets. All mounting hardware to be concealed (hidden).
g. Provide fillers at both ends for open shelf upper cabinets.
h. Provide wire management for puck lights and undercabinet lighting to capture all wires and assure

no wires are visible at top of cubbies from across the room; refer to the design guideline drawings.
12. Lighting: Refer to lighting specifications and design guideline drawings.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include appliances, lighting, power/data etc.

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

FROM NATURE CHIC – TO CITY SLEEK

With the ONE Quartz Surfaces® assortment, we've brought together the beauty of quartz and modern technology to create new and exciting possibilities. ONE Quartz Surfaces® gives you more design choices for your next project. The low maintenance and durability of ONE Quartz Surfaces® countertops make it perfect for any application, commercial or residential. Functional yet chic, that's what ONE Quartz Surfaces® is all about.

AVAILABLE IN:

Within these unique series, you'll have more selection than ever before.

- Marble Look
- Stone Look
- Concrete Look
- Monochromatic Look

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Mgroup
Model	UltraCera
Dimensions	2cm
Color	Kachine Peak - 3007
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Notes	Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Wilsonart International, Inc.
Model	Q4007
Dimensions	3/4" Thick
Color	Duomo
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Fire/Smoke Rating	ASTM E84 Class 1 (NFPA Class A) FS-25 or less.
Structural Performance	Mohs Hardness Scale: 6 to 6.5. Density: Not less than 2 g/cm3 when tested per ASTM C97.
Thermal Performance	Thermal shock: Pass 5 cycles, tested per ASTM C484.
Best Practices	UL Greenguard certified
Quality Standards	NSF/ANSI 51 Certified. Stain resistance: Passes ANSI Z124.6. Water absorption: Maximum 0.04 percent, tested per ASTM C97. Chemical resistance: Not Affected when tested per ASTM C650.
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	N
Thickness	3/4"
Finish	Polished
Warranty	One (1) year minimum warranty against defects in materials and workmanship. Commercial Lifetime warranty
Notes	Refer to drawings for edge profile. Website: www.wilsonart.com

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Physical Properties

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Revision Date:

Item Name	Millwork
Item Type	Guestroom Kitchenette Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, drawers and countertops.
Manufacturer	MGroup; J Suss Industries, Inc.; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Refer to Notes
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content. Wood panel products and ADHESIVES must meet California Air Resources Board (CARB certified) for low/no formaldehyde emissions.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Accessories	Door Stop Silencers: Apply door stop silencers (bumpers) at top and bottom on rear side of doors and drawers. Drawer Slides – Kitchen: Drawers in kitchen to have Side mount, self-closing, 75 lb. load capacity, epoxy coated glides with nylon rollers or Side mount, self-closing, 75 lb. load capacity, zinc coated metal ball bearing glides. Optional: Slides with soft-close feature; Metabox (or equal) system with drawer slide built into metal side rail; Glides with full extension
Part of an Assembly	N

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. General Design for Guestroom Millwork: a. Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay, slab style door and drawer. b. Grain on doors and drawers is horizontal except when door is taller than 48". Grain on trim, end panels, and fillers is to run horizontally. c. Interior finish (non-exposed) to be Wilsonart Light Gray 1500-60 is thermofused melamine with PVC edge band, unless noted otherwise in drawings. d. Exterior Finish is standard thermofused melamine with PVC edge band, unless noted otherwise in drawings. e. Applied trim shall be flush with front surface of door/drawer. 2. Panel Material: a. 3/4” thick minimum thermofused melamine finish over medium density fiberboard (MDF) or Industrial hardboard (particle board) unless otherwise stated. Where Industrial Hardboard (particle board) is used must meet ANSI A208.1, matt-formed particle board, Grade 1-M-2 with minimum density of 45 pcf, internal bond of 60 psi, and minimum screw hold capacity of 225 lb on faces and 200 lb on edges. Where MDF is used must meet ANSI A208.2, Grade 130. Where tempered hardboard (High Density Fiberboard) is used must meet ANSI A135.4, class 1, tempered. 3. Cabinet Box Construction a. Frameless cabinet box. b. All joints fastened with mortise and tenon, or glued-and doweled, or one-way plastic dowel, or screwed and glued. All fasteners to be hidden. No metal cam & dowel fasteners are to be used. c. All exposed cabinet surfaces shall be finished to match cabinet exterior, doors, and drawers. Finish applied to all surfaces to assure moisture resistance and humidity balance. 4. Cabinet Sides, Top, Bottom & Back: a. Optional: non-exposed back panel not less than 1/4" tempered hardboard or MDF with thermofused melamine finish, used in conjunction with hanging rails not less than 1/2” x 3" plywood, or not less than

3/4" x 3" thermofused melamine.
b. Apply PVC edge material to all edges, including bottom edge of side panel, to protect substrate against water absorption. Edge banding to be PVC 1mm or thicker, color/pattern to match exterior (where exposed) or to match interior (non-exposed). PVC edgeband to be thermally fused/glued, edges to be cut flush and trimmed/buffed to remove sharp edges and glue residue.
5. Doors, Drawer-fronts, and Aprons:
a. Full overlay slab-style, with PVC edgebanding applied to all edges.
b. Front and edges to match cabinet exterior, back surface (non-exposed) to match cabinet interior.
c. Door and drawer fronts to be routed to accommodate pulls so pulls are flush with top of door and drawer edge.
6. Shelves: (Excluding open shelves)
a. Adjustable shelves within cabinets finish are thermofused melamine, to match cabinet interior, with PVC edge band applied to all edges.
b. Shelf supports to be adjustable approximately every 1-1/4".
c. Shelf supports to be "seismic" style designed to prevent shelves from tipping or sliding out of cabinets. Shelf supports may be metal or plastic. If plastic, shelf supports should be clear or color to match cabinet interior.
d. Base Cabinet Shelves to be half-depth or 3/4 depth.
7. Fillers and end panels:
a. Supply fillers oversized to be cut to fit by installer
8. Drawer construction:
b. Sub-front and back joined to sides with glued dovetail when constructed of solid wood, or glued and doweled, or mechanical dowel, or rabbeted into side and secured with glue and mechanical fasteners.
c. Exposed fronts fastened to sub-fronts with adjustable drawer-front mounting system or with mounting screws from interior of body.
d. Bottom: Not less than 1/2” or 3/8" thermofused melamine on MDF or Industrial hardboard. Drawer box sides and front/back to be grooved to accept bottom panel, bottom panel to be fully inserted into groove to create permanent attachment.
e. Option: drawer sides by “Metabox Drawer System” (or equal) are acceptable.
9. Base Cabinet:
a. Cabinet top stretchers attached horizontally to top of cabinet-side at front and rear to keep cabinet square.
b. At sink cabinet or cooktop cabinet front cabinet top stretcher to be mounted vertically to avoid impediment with sink or cooktop appliance.

c. Option:
1) Provide 3/4" Thermofused Melamine Corner Blocks glued and fastened in each of four top corners to maintain cabinet square and rigid.
2) Or provide Plastic Corner Blocks at four top corners fastened to side panel and front/rear cabinet components
d. Base cabinet toe space & kick board to be integrated with side panels, capturing toe kick between side panels.
e. Side panels to be notched for integral toe space with side panels extended to floor for continuous support. Finish bottom, side, and top edge of side panels with PVC edgebanding to prevent water absorption.
f. Option: Provide mechanical waterproof leg (plastic or metal) attached to bottom of cabinet, toe kick boards attached via clip system from Hafele (or equal).
g. Provide toe board cover not less than 1/4" tempered hardboard or MDF with thermofused melamine face and side surface to match cabinet doors. Apply after installation to achieve a continuous toe board cover; minimize seams.
10. Cleats:
a. Provide raw wood cleats as 3/4" x 1-1/2" x 8 feet, to be cut and attached by installer at blind corners and appliance openings as required to support countertops.
11. Accessible Sink:
a. Follow Accessibility guidelines for clearance requirements for frontal wheelchair approach to sink.
b. Provide cleat or other semi-permanent attachment method for sink access panel such that panel does not easily open but can be accessed by facilities engineer as needed.
c. Grain to be horizontal on access panel
12. Open Shelf Upper Cabinet:
a. Construction of open shelf cabinet to be "double-walled" with inner and outer side panel, and with upper and lower surface for bottom, top, and middle self.
b. Bottom of open shelf cabinet and floating shelf to be positioned to align with bottom of microwave oven or range hood (where it occurs).
c. Face trim to be applied to front surface of double-walled shelves and side panels such that face trim completely covers front edges of sides, top, bottom, and shelves. Face trim to be flush with trim surrounding adjacent wall cabinets.
d. Grain on side, top, bottom, and shelf panels to run lengthwise. Back panel finish to be thermofused melamine to match color of kitchen wall.
e. Shelves are to have bottoms the same thickness

as the face.
f. Upper cabinets to be mounted in sections and fully supported the length of the cabinets. All mounting hardware to be concealed (hidden).
g. Provide fillers at both ends for open shelf upper cabinets.
h. Provide wire management for puck lights and undercabinet lighting to capture all wires and assure no wires are visible at top of cubbies from across the room; refer to the design guideline drawings.
13. Lighting: Refer to lighting specifications and design guideline drawings.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include appliances, lighting, power/data etc.
Floating Shelf is pre-manufactured; reference specification.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2'-0" apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Physical Properties

Test Description	**Typical Results**	**Test**
Flexural Strength (psi)	>6,000	ASTM D 790
	31 - 75	EN14617-2
Thermal Expansion Coefficient	16 x 10^{-6} - 20.8 x 10^{-6*}	EN14617-11
Impact Resistance	3.4 – 7.35	EN14617-9
Stain Resistance	No Effect	EN14617-10
High Temperature Heat Resistance	No Effect to Slight Effect	ISO 4586
Chemical Resistance (acids and bases)	C4	EN14617-10
Abrasion Resistance	>100	ASTM C501
	23.6 – 27.5	EN14617-4

Copyright 2020, Wilsonart LLC

Density (g/cm^3)	>2.1	ASTM C97
Compressive Strength (One Axis – Dry) (psi)	>20,000	ASTM C170
Moisture Absorption	<0.03	ASTM C97
	<0.03	EN14617-1
Freeze and Thaw Resistance	0.999	EN14617-5
Fire Behavior	Class 1/A Rating	ASTM E 84

**Test results vary slightly depending on pattern.*

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded

Item Name	Millwork
Item Type	Guestroom Kitchenette Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, drawers and countertops.
Manufacturer	MGroup; J Suss Industries, Inc.; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Refer to Notes
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content. Wood panel products and ADHESIVES must meet California Air Resources Board (CARB certified) for low/no formaldehyde emissions.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Accessories	Door Stop Silencers: Apply door stop silencers (bumpers) at top and bottom on rear side of doors and drawers. Drawer Slides – Kitchen: Drawers in kitchen to have Side mount, self-closing, 75 lb. load capacity, epoxy coated glides with nylon rollers or Side mount, self-closing, 75 lb. load capacity, zinc coated metal ball bearing glides. Optional: Slides with soft-close feature; Metabox (or equal) system with drawer slide built into metal side rail; Glides with full extension
Part of an Assembly	N

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. General Design for Guestroom Millwork: a. Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay, slab style door and drawer. b. Grain on doors and drawers is horizontal except when door is taller than 48". Grain on trim, end panels, and fillers is to run horizontally. c. Interior finish (non-exposed) to be Wilsonart Light Gray 1500-60 is thermofused melamine with PVC edge band, unless noted otherwise in drawings. d. Exterior Finish is standard thermofused melamine with PVC edge band, unless noted otherwise in drawings. e. Applied trim shall be flush with front surface of door/drawer. 2. Panel Material: a. 3/4” thick minimum thermofused melamine finish over medium density fiberboard (MDF) or Industrial hardboard (particle board) unless otherwise stated. Where Industrial Hardboard (particle board) is used must meet ANSI A208.1, matt-formed particle board, Grade 1-M-2 with minimum density of 45 pcf, internal bond of 60 psi, and minimum screw hold capacity of 225 lb on faces and 200 lb on edges. Where MDF is used must meet ANSI A208.2, Grade 130. Where tempered hardboard (High Density Fiberboard) is used must meet ANSI A135.4, class 1, tempered. 3. Cabinet Box Construction a. Frameless cabinet box. b. All joints fastened with mortise and tenon, or glued-and doweled, or one-way plastic dowel, or screwed and glued. All fasteners to be hidden. No metal cam & dowel fasteners are to be used. c. All exposed cabinet surfaces shall be finished to match cabinet exterior, doors, and drawers. Finish applied to all surfaces to assure moisture resistance and humidity balance. 4. Cabinet Sides, Top, Bottom & Back: a. Optional: non-exposed back panel not less than 1/4" tempered hardboard or MDF with thermofused melamine finish, used in conjunction with hanging rails not less than 1/2” x 3" plywood, or not less than

3/4" x 3" thermofused melamine.
b. Apply PVC edge material to all edges, including bottom edge of side panel, to protect substrate against water absorption. Edge banding to be PVC 1mm or thicker, color/pattern to match exterior (where exposed) or to match interior (non-exposed). PVC edgeband to be thermally fused/glued, edges to be cut flush and trimmed/buffed to remove sharp edges and glue residue.
5. Doors, Drawer-fronts, and Aprons:
a. Full overlay slab-style, with PVC edgebanding applied to all edges.
b. Front and edges to match cabinet exterior, back surface (non-exposed) to match cabinet interior.
c. Door and drawer fronts to be routed to accommodate pulls so pulls are flush with top of door and drawer edge.
6. Shelves: (Excluding open shelves)
a. Adjustable shelves within cabinets finish are thermofused melamine, to match cabinet interior, with PVC edge band applied to all edges.
b. Shelf supports to be adjustable approximately every 1-1/4".
c. Shelf supports to be "seismic" style designed to prevent shelves from tipping or sliding out of cabinets. Shelf supports may be metal or plastic. If plastic, shelf supports should be clear or color to match cabinet interior.
d. Base Cabinet Shelves to be half-depth or 3/4 depth.
7. Fillers and end panels:
a. Supply fillers oversized to be cut to fit by installer
8. Drawer construction:
b. Sub-front and back joined to sides with glued dovetail when constructed of solid wood, or glued and doweled, or mechanical dowel, or rabbeted into side and secured with glue and mechanical fasteners.
c. Exposed fronts fastened to sub-fronts with adjustable drawer-front mounting system or with mounting screws from interior of body.
d. Bottom: Not less than 1/2” or 3/8" thermofused melamine on MDF or Industrial hardboard. Drawer box sides and front/back to be grooved to accept bottom panel, bottom panel to be fully inserted into groove to create permanent attachment.
e. Option: drawer sides by “Metabox Drawer System” (or equal) are acceptable.
9. Base Cabinet:
a. Cabinet top stretchers attached horizontally to top of cabinet-side at front and rear to keep cabinet square.
b. At sink cabinet or cooktop cabinet front cabinet top stretcher to be mounted vertically to avoid impediment with sink or cooktop appliance.

c. Option:
1) Provide 3/4" Thermofused Melamine Corner Blocks glued and fastened in each of four top corners to maintain cabinet square and rigid.
2) Or provide Plastic Corner Blocks at four top corners fastened to side panel and front/rear cabinet components
d. Base cabinet toe space & kick board to be integrated with side panels, capturing toe kick between side panels.
e. Side panels to be notched for integral toe space with side panels extended to floor for continuous support. Finish bottom, side, and top edge of side panels with PVC edgebanding to prevent water absorption.
f. Option: Provide mechanical waterproof leg (plastic or metal) attached to bottom of cabinet, toe kick boards attached via clip system from Hafele (or equal).
g. Provide toe board cover not less than 1/4" tempered hardboard or MDF with thermofused melamine face and side surface to match cabinet doors. Apply after installation to achieve a continuous toe board cover; minimize seams.
10. Cleats:
a. Provide raw wood cleats as 3/4" x 1-1/2" x 8 feet, to be cut and attached by installer at blind corners and appliance openings as required to support countertops.
11. Accessible Sink:
a. Follow Accessibility guidelines for clearance requirements for frontal wheelchair approach to sink.
b. Provide cleat or other semi-permanent attachment method for sink access panel such that panel does not easily open but can be accessed by facilities engineer as needed.
c. Grain to be horizontal on access panel
12. Open Shelf Upper Cabinet:
a. Construction of open shelf cabinet to be "double-walled" with inner and outer side panel, and with upper and lower surface for bottom, top, and middle self.
b. Bottom of open shelf cabinet and floating shelf to be positioned to align with bottom of microwave oven or range hood (where it occurs).
c. Face trim to be applied to front surface of double-walled shelves and side panels such that face trim completely covers front edges of sides, top, bottom, and shelves. Face trim to be flush with trim surrounding adjacent wall cabinets.
d. Grain on side, top, bottom, and shelf panels to run lengthwise. Back panel finish to be thermofused melamine to match color of kitchen wall.
e. Shelves are to have bottoms the same thickness

as the face.
f. Upper cabinets to be mounted in sections and fully supported the length of the cabinets. All mounting hardware to be concealed (hidden).
g. Provide fillers at both ends for open shelf upper cabinets.
h. Provide wire management for puck lights and undercabinet lighting to capture all wires and assure no wires are visible at top of cubbies from across the room; refer to the design guideline drawings.
13. Lighting: Refer to lighting specifications and design guideline drawings.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include appliances, lighting, power/data etc.
Floating Shelf is pre-manufactured; reference specification.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Millwork
Item Type	Guestroom Vanity Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, drawers and countertops.
Manufacturer	MGroup; J Suss Industries, Inc.; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Refer to Notes
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content. Wood panel products and ADHESIVES must meet California Air Resources Board (CARB certified) for low/no formaldehyde emissions.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Accessories	Door Stop Silencers: Apply door stop silencers (bumpers) at top and bottom on rear side of doors and drawers.
Part of an Assembly	N
Design & Construction	All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. General Design for Guestroom Millwork: a. Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay, slab style door and drawer. b. Grain on doors and drawers is horizontal except when door is taller than 48". Grain on trim, end panels, and fillers is to run horizontally. c. Interior finish (non-exposed) to be Wilsonart Light Gray 1500-60 is thermofused melamine with PVC edge band, unless noted otherwise in drawings. d. Exterior Finish is standard thermofused melamine with PVC edge band, unless noted otherwise in drawings. e. Applied trim shall be flush with front surface of door/drawer. 2. Vanity General Construction: a. Provide standard HPL or thermofused melamine vanity with two drawers and to accommodate the specified sink identified in the drawings and building product manual. b. Provide thermofused melamine to match HPL finish specified. Marriott approval of finish match required. c. Non-Accessible vanity is also listed as an FF&E item in the Interior Design Specification Manual. Contractor to assure vanity is not ordered twice. 3. Access Panel at Sink: a. Provide cleat or other semi-permanent attachment method for sink access panel such that panel does not easily open but can be accessed by facilities engineer as needed. b. Grain to be horizontal on access panel. 4. Exposed Cubbie: a. Finish exposed cubbie below drawers and sink panel to match exterior. 5. Lower Shelf: a. Thermofused melamine shelf on not less than 3/4" Industrial Hardboard or MDF, with edge build-up to appear 1-1/4" thick, with PVC edge band applied to all edges. b. Machine shelf to fit over cross members in welded steel leg structure such that shelf is firmly suspended, cross members are hidden, and shelf edges are flush with exterior of 1-1/4" steel tube legs. c. Shelf finish to match exterior of vanity cabinet. Grain to run length of shelf. 6. Steel Leg Structure: a. Constructed of welded 1-1/4" square stainless-steel tubing with brushed finish. Steel to be either

18/8 (18% chromium, 8% nickel) or series 304 (also 18/8%).
b. All welds ground smooth and brushed to provide continuous smooth finish at all surfaces.
c. Provide attachable 1/2" x 1/2" cross members at mid-section of metal base to support lower shelf. Machine steel leg structure to receive attachable cross members.
d. Drill steel leg structure at least (8) places to provide for attachment via screws to underside of Vanity upper cabinet box.
e. Provide stainless steel leg levelers in base of each leg.
7. At locations of toilet paper holder attachment, millwork contractor to provide additional blocking (1-1/4" thick minimum) for long-term durability.
8. Vanity Access Panel: Hinge of drawer side. Adjustable tension clip (set at approximately 15 lbs) on other side. Assure door does not easily open when towel bar is pulled.
a. Option: Semi-permanent cleat system.
9. Vanity Installation:
a. Attach upper vanity structure to welded stainless steel leg structure.
b. Attach filler to side of cabinet adjacent door trim such that drawers will not conflict with door casing.
c. Level vanity as required to assure countertop is level and vanity does not teeter.
d. Fasten vanity cabinet securely to wall screwing through back panel and/or hanging strips into studs, blocking, or other secure structural member in wall.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include plumbing, power/data etc.
Project coordination required to ensure that properties order the same manufacturer vanity and plumbing package as the rest of the bathroom fixtures to avoid a mismatch of styles and finishes.
Project coordination required to determine if vanity will be ordered as FF&E or millwork to avoid duplication in quantities of plumbing fixtures when the FF&E vanity is selected. Make sure vanity plumbing fixtures do not get ordered from the plumbing package.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.

Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Physical Properties

Test Description	**Typical Results**	**Test**
Flexural Strength (psi)	>6,000	ASTM D 790
	31 - 75	EN14617-2
Thermal Expansion Coefficient	16 x 10^{-6} - 20.8 x 10^{-6*}	EN14617-11
Impact Resistance	3.4 – 7.35	EN14617-9
Stain Resistance	No Effect	EN14617-10
High Temperature Heat Resistance	No Effect to Slight Effect	ISO 4586
Chemical Resistance (acids and bases)	C4	EN14617-10
Abrasion Resistance	>100	ASTM C501
	23.6 – 27.5	EN14617-4

Copyright 2020, Wilsonart LLC

Density (g/cm^3)	>2.1	ASTM C97
Compressive Strength (One Axis – Dry) (psi)	>20,000	ASTM C170
Moisture Absorption	<0.03	ASTM C97
	<0.03	EN14617-1
Freeze and Thaw Resistance	0.999	EN14617-5
Fire Behavior	Class 1/A Rating	ASTM E 84

**Test results vary slightly depending on pattern.*
The information contained in this section is based on technical data which Wilsonart LLC believes to be reliable, and is intended for use by persons having knowledge of this technical area at their own discretion.

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

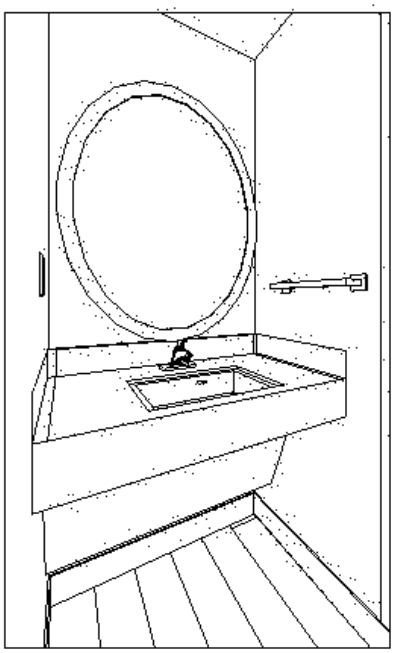
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Millwork
Item Type	Guestroom Accessible Vanity Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, drawers and countertops.
Manufacturer	MGroup; J Suss Industries, Inc.; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Refer to Notes
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content. Wood panel products and ADHESIVES must meet California Air Resources Board (CARB certified) for low/no formaldehyde emissions.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Finish Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD

ML-020

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Notes

1. Vanity General Construction:
a. Provide standard HPL or thermofused melamine vanity with two drawers and to accommodate the specified sink identified in the drawings and building product manual.
b. Provide thermofused melamine to match HPL finish specified. Marriott approval of finish match required.
c. Accessible vanity is also listed as an FF&E item in the Interior Design Specification Manual. Contractor to assure vanity is not ordered twice.
d. Interior finish (non-exposed) to be Wilsonart Light Gray 1500-60 is thermofused melamine with PVC edge band, unless noted otherwise in drawings.
2. Access Panel at Sink:
a. Provide cleat or other semi-permanent attachment method for sink access panel such that panel does not easily open but can be accessed by facilities engineer as needed.
b. Grain to be horizontal on access panel.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include plumbing, power/data etc. Project coordination required to ensure that properties order the same manufacturer vanity and plumbing package as the rest of the bathroom fixtures to avoid a mismatch of styles and finishes.
Project coordination required to determine if vanity will be ordered as FF&E or millwork to avoid duplication in quantities of plumbing fixtures when the FF&E vanity is selected. Make sure vanity plumbing fixtures do not get ordered from the plumbing package.

Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2'-0" apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Physical Properties

Test Description	**Typical Results**	**Test**
Flexural Strength (psi)	>6,000	ASTM D 790
	31 - 75	EN14617-2
Thermal Expansion Coefficient	16 x 10^{-6} - 20.8 x 10^{-6*}	EN14617-11
Impact Resistance	3.4 – 7.35	EN14617-9
Stain Resistance	No Effect	EN14617-10
High Temperature Heat Resistance	No Effect to Slight Effect	ISO 4586
Chemical Resistance (acids and bases)	C4	EN14617-10
Abrasion Resistance	>100	ASTM C501
	23.6 – 27.5	EN14617-4

Copyright 2020, Wilsonart LLC

Density (g/cm^3)	>2.1	ASTM C97
Compressive Strength (One Axis – Dry) (psi)	>20,000	ASTM C170
Moisture Absorption	<0.03	ASTM C97
	<0.03	EN14617-1
Freeze and Thaw Resistance	0.999	EN14617-5
Fire Behavior	Class 1/A Rating	ASTM E 84

**Test results vary slightly depending on pattern.*

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	Recessed Direct Mount 4" downlight with matte white reflector and flange, diffuse lens. Wet Location.
Manufacturer	Cooper/Halo
Model	ML4DM10LSFL9FS1E-TL40R2GMW
Dimensions	6-3/4" W x 9-7/8"L x 6-3/4"H
Finish	White
CSI #	265100 Interior Lighting
Omniclass #	22-265100 Interior Lighting
Lamp Type	LED
Trim	White
Lamp Kelvin	3000K
Reflector	White
Voltage	120
Mount	Recessed
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1000
Finish	White
Lamp CRI	90
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 83.7 Lamp Life/Fixture Life: 50,000 Fixture Input (Max. Watts): 9.4

Product Certification

Refer to ENERGY STAR® Certified Products List.
Can be used to comply with California Title 24 High Efficacy requirements.
Certified to California Appliance Efficiency Database under JA8.

Product Features

Top Product Features

- Field selectable 2700, 3000, 3500, 4000 or 5000K CCT, 90 CRI minimum
- Optional full spectrum color, 95 CRI minimum
- Optional warm dimming, field selectable 2700 – 1800 or 3000 – 1800K CCT ranges
- Field selectable 600, 800 or 1000 lumens
- Field interchangeable 25°, 40°, 55° or wall wash distribution patterns, ships with 40 degree installed
- Installs from below, does not require a recessed housing or junction box
- Remote driver / junction box
- 120V LE/TE phase cut or 120-277V 0-10V dimming to 5% with select controls

Order Information

SAMPLE ORDER NUMBER: **ML4DM10LSFL9FS1E - TL41RMW**

A complete luminaire consists of a fixture fitting + trim, order separately.

Fixture Fitting

Catalog Number	Description
ML4DM10LSFL9FS1E	4" Canless, Lumen Select(600/800/1000lms), 5CCT selectable, 90CRI, 40° optic, 120V, LE/TE 5% Dim
ML4DM10LSFL9FSE010	4" Canless, Lumen Select(600/800/1000lms), 5CCT selectable, 90CRI, 40° optic, 120-277V 0-10V 5% Dim
ML4DM08LSFL95FS1E	4" Canless, Lumen Select(400/600/800lms), 5CCT selectable, 95CRI, 40° optic, 120V LE/TE 5% Dim
ML4DM06FLD2W1E	4" Canless, 600lms, Selectable D2W, 90CRI, 40° optic 120V LE/TE 5% Dim

Accessories

Accessories
TIR4D25NFL = 25° narrow flood optic **TIR4D40FL** = 40° flood optic **TIR4D55WFL** = 55° wide flood optic **TIR4D25AWW** = 25° narrow flood asymmetric wall wash optic **TIR45MH12PK** = replacement media holder, package of 12 **L100 Series** = 2.0" lens and filters, see spec sheet **HL4RSMF** = 4" Mounting Frame (Round or Square)

Trims / Shielding / Flange Finish

Trims	Shielding	Flange Finish
TL40R = 3-1/2" conical reflector [8]	**2G** = Diffuse lens	**MW** = Matte white reflector and flange
TL41R = 2" round pinhole **TL42S** = 2" square pinhole	None	**MW**=Matte white flange **MB**=Matte black flange **BN**=Brushed nickel flange **ORB**=Oil rubbed bronze flange **GB**=German bronze flange **BCu**=Brushed copper flange
TL43R = 2" round lens pinhole **TL44S** = 2" square lens pinhole	**2G** = Diffuse lens	**MWWB** = Matte white flange, white lens frame **MWBB** = Matte white flange, black lens frame **MBBB** = Matte black flange, black lens frame **BNBB** = Brushed nickel flange, black lens frame **ORBBB** = Oil rubbed bronze flange, black lens frame **GBBB** = German bronze flange, black lens frame **BCuBB** = Brushed copper, black lens frame
TL45R = 2" round lens wall wash **TL46S** = 2" square lens wall wash	**6G** = Linear spread lens	**MWWB** = Matte white flange, white lens frame **MWBB** = Matte white flange, black lens frame
Notes (8) TL40R trim provides 1.15" lens regression to ML4 fixture.	**Notes**	**Notes**

Product Specifications

Housing
- Die cast aluminum housing provides passive thermal cooling achieving L70 at 50,000 hours in IC and non-IC applications
- Retention springs holds housing securely in 3/8" to 1-1/2" thick ceilings, can be removed for service or replacement
- Not suitable for 2x4 framing

Optional Mounting Frame
- Pre-galvanized steel mounting frame locates fixture fittings during electrical rough-in and provides cutout guidance for drywall contractor
- Provides attachment of remote driver / junction box

LED Array
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM at end points and 4 SDCM in the middle providing color accuracy and uniformity

VividTune
- Field selectable 2700, 3000, 3500, 4000 or 5000K CCT, factory set at 3000K CCT
- Optional full spectrum color, 95 CRI minimum with R1-R15 values ranging from 92 to 100, excellent TM-30 metrics; Rf ranging from 96-98 and Rg >98
- Field selectable 600, 800 and 1000 lumens

VividTune
- D2W™ dim-to-warm option shifts color temperature from 3000 to 1800 K CCT or 2700 to 1800 K CCT as fixture dims mimicking the black body dimming response of halogen or incandescent lamps

Trims
- Field interchangeable trims are available in 3-1/2" aperture conical and 2-inch round or square pinhole apertures
- Available in a broad range of painted or plated finishes, can be painted in the field to match any décor
- Magnetic attachment holds trim tightly to ceiling and minimizes light leaks
- Conical trim provides 1.15" lens regression to ML4 fixture.

Primary Optic
- Precision molded TIR optic organizes source flux into useful beams without stray lumens in the field
- Low glare, UGR < 17
- Two-piece construction with matte black mounting ring and polarized turn and lock mounting aligns optic to source and minimizes backlight in the housing
- Meets ENERGY STAR® color angular uniformity requirements, color deviation is typically less than 0.004 u' v'
- Available in narrow flood, flood, wide flood and asymmetric wall wash distributions, ships with flood optic factory installed, order alternate distributions or replacements separately

Media
- Integral media holder accepts (2) lens or louver 2" diameter 3.0mm thick color filters, lens or louvers
- Order media separately

Driver
- Integral 120V 60 Hz constant current driver provides noise free operation
- Continuous, flicker-free dimming from 100% to 5% with select leading or trailing edge 120V phase cut control
- Optional UNV 120-277V 50/60 Hz driver with 0 -10V analog dimming from 100% to 5%

Remote Driver / Junction Box
- Pre-galvanized steel driver/junction box with captive hinged junction box cover
- Listed for six #12 AWG 90° C splice conductors, two in, two out plus ground
- Two 1⁄2" conduit pry-outs
- Two Slide-N-Side™ non-metallic (NM) wire traps allow wiring outside the box
- Accepts NM cable types: 14-2, 14-3, 12-2, 12-3 (U.S.) and 14-2, 14-3, 12-2 (Canadian)
- Three 4-port push wire nuts with clear caps for quick and reliable mains voltage connections
- Integral mounting holes facilitate direct mounting to building structure or mounting frame

Compliance
- UL Certified US and Canada
- Damp and wet location listed, covered ceilings only and IP65, below the ceiling only with lens trims
- Airtight per ASTM-E283
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions per FCC 47CFR Part 15 consumer limits
- Contains no mercury or lead and RoHS compliant
- Photometric testing in accordance with IES LM-79-08
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11
- ENERGY STAR® certified, reference Certified Light Fixtures database
- Can be used for State of California Title 24 high efficacy LED compliance under JA8, reference Modernized Appliance Efficiency Database System (MAEDBS) for 2019 JA8 High Efficacy Lighting

Warranty
- Five-year limited warranty, consult
- website for details www.cooperlighting.com

Item Name	Occupancy Sensor
Item Type	Occupancy Sensor
Description	MIcroset PIR Line Voltage Ceiling Sensor with Time Delay and Sensitivity, optional build-in light level sensor, optional BAS/HVAC isolated relay. Uses ultrasonic and passive infrared technology.
Manufacturer	Cooper/Greengate
Model	OAC-P-0500-MV
Dimensions	4.5"W DIAM X 1.42" H
Finish	White Poly Resin
Quality Standards	NEMA WD 7 - 2011 Occupancy Motion Sensors Standard
Mount	Ceiling
On Dimming System	No
Finish	White Poly Resin

Order Information

SAMPLE ORDER NUMBER: **OAC-P-0500-MV, OAC-P-1500-MV, OAC-P-1500-DMV**

Catalog Number	Maximum Room Size	Field of View	Features
OAC-P-0500-MV	500 sq. ft.	360°	w/ Daylight Sensor
OAC-P-1500-MV	1,500 sq. ft.	360°	w/ Daylight Sensor
OAC-P-1500-DMV	1,500 sq. ft.	360°	Dual Relay w/Daylight Sensor

Product Specifications

Technology

- Passive Infrared (PIR)

Mechanical

Size: 1.42" H x 4.5" W (36.068mm x 114.3mm)
Mounting: Mounts directly to ceiling tile, to a 4" square box and round mud ring or to 4" octagon box
Environment:

- **Operating temperature:** 32°F to 104°F (0°C to 40°C)
- **Relative humidity operating:** 20% to 90% non-condensing
- For indoor use only

Housing: Durable, injection molded housing. Polycarbonate resin complies with UL 94V-0

Electrical

Power Requirements: 120 to 347 VAC, 50/60 Hz- Neutral Required

- **120 VAC**
  - Incandescent/Tungsten - 0 to 800W, 50/60 Hz
  - Fluorescent/Ballast - 0 to 1200W, 50/60 Hz
  - Electronic Ballast (LED) 3A
  - Motor Load: ¼ HP @ 125 VAC
- **230 VAC**
  - Fluorescent/Ballast - 0 to 1200W, 50/60 Hz
  - Electronic Ballast (LED) 3A
- **277 VAC**
  - Fluorescent/Ballast - 0 to 2700W, 50/60 Hz
  - Electronic Ballast (LED) 3A
- **347 VAC**
  - Fluorescent/Ballast - 0 to 1500W, 50/60 Hz
  - Electronic Ballast (LED) 3A

Hardware Specifications

LED Indicators:

- Red LED for PIR detection

Controls and Performance

Time delays:

- Self-adjustable, 15 seconds/test (10 minutes Auto), or Selectable 5, 15, 30 minutes

Coverage:

- 500 & 1500 sq. ft.

Light sensing level:

- 0 to 300 foot candles

Standards/Ratings

- cULus Listed - Energy Management Equipment (UL916)
- FCC Compliant
- RoHS Compliant

Warranty

Five year warranty standard

Overview

The MicroSet Passive Infrared Line Voltage Occupancy Sensing Ceiling Sensor is a motion sensing lighting control that is used for energy savings and convenience. The sensor is available in both single and dual load control.

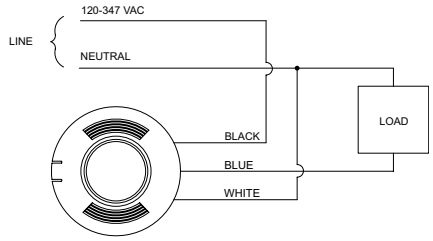
The sensor is designed to detect motion from a heat-emitting source (such as a person entering a room) within its field-of-view and automatically switch lights ON. These sensors have multi-segmented lenses. For units to sense motion, the person must cross between two segments. The distance between segments increases the farther you are from the sensor, so motion has to be larger the farther you are from the unit. PIR sensors are considered line-of-sight sensors, meaning that the sensor must be able to have a direct line-of-sight to the person making the motion. The sensor includes self-adaptive technology that continuously self-adjusts sensitivity and time delay in real-time, maximizing the potential energy savings that are available in the particular application. The MicroSet Passive Infrared Line Voltage Ceiling Sensor has an ambient light level sensor. When enabled, the daylighting feature prevents lights from turning ON when the room is adequately illuminated by natural light.

Wiring Diagrams

Single Relay

AUTOMATIC MODE OPERATION:

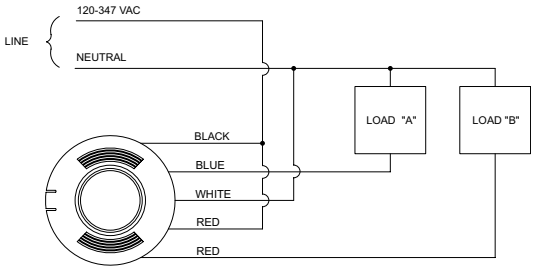
1. WHEN SENSOR ACTIVATES LOAD TURNS ON.
2. LOAD TURNS OFF WHEN SENSOR TIMES OUT.



Dual Relay

AUTOMATIC MODE OPERATION:

1. WHEN SENSOR ACTIVATES, BOTH LOADS TURN ON.
2. LOADS TURN OFF WHEN SENSOR TIMES OUT.



RED LEADS ARE NON-POLARITY SENSITIVE.

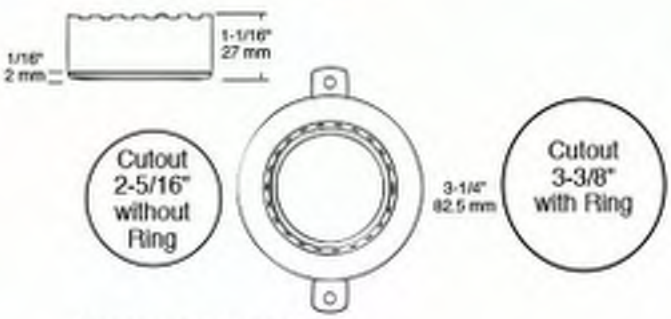
FC-492-BK & FC-493-BK - Dimmable 2 watt LED Puck Lights

Recessed LED Puck Light

Furnlite LED Puck lights provide an even warm light. These LED lights provide adequate illumination for any work surface or display, all while consuming less energy than their halogen equivalent. They provide task or accent illumination for indoor applications.



FEATURES

- Furnlite LED Puck Light- 2 watt, remains cool to the touch during operation
- Single or double leads
- The LEDs are rated for approximately 10,000 hours
- The opal glass shield provides for even lighting
- Warm white color
- Up to 8 pucks may be linked together (in-line)

Accessories Needed:
FC-508 Three Stage Touch Dimmer / Driver
or FC-511 Full Range Rotary Dimmer
Additional switches and transformers are available

These LED lights can be surface mounted or recessed. Surface mounting is achieved with the included mounting ring and recessed mounting with the pressure clips provided on the puck light. (with ring off)

Optional Accessories:
For Connecting FC-492-BK and FC-493-BK

FC-498-6 - 6" Cord
FC-498-12 - 12" Cord
FC-498-24 - 24" Cord

**Grab Bars include center support.*

Stainless steel screws are included to install into adequate structural blocking.

Contemporary design combines with a fully HeliArc welded construction, resulting in a Grab Bar with:

- Unparalleled strength
- Beauty
- Functionality
- Durability
- No lines for dirt to collect (maintenance free)

MECHANICAL DATA

Height: 2" (5.1cm)
Width: xx" (See product part number for width). Complete length of Grab Bar is usable surface.
Diameter: 1.25" (3.2cm)

PRODUCT COMPOSITION

Entire product is 18/8 (304) stainless steel. Solid caps and pins are HeliArc welded to 18 gauge tube.

MODALITY

Use: Wall Installation. **Load Capability:** 800 lbs. (362.9kg) when properly installed.

INSTALLATION

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and **must be installed into adequate structural blocking** or with WingIts® Grab Bar Fasteners (GBWME40).

CERTIFICATIONS

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars meet or exceed the applicable requirements of all building codes, ADA criteria, and 2010 ADAAG and 2009 ANSI standards.

RECOMMENDED INTEGRATION

For hollow wall construction, it is recommended that WingIts® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for applications.

- Certification: SGCC or equal

B. Installation Requirements : Follow manufacturer's instructions.
- Blocking: 2x4 or 14 gauge steel strapping required.
- Inspect glass prior to install for chips, scratches, uniform cuts, etc.
- Store glass in safe, weather protected area.
- Verify plumb and true openings prior to installation.
- Ensure hardware does not directly come in contact with glass. Verify required gaskets, bumpers, etc are provided and installed.
- Ensure additional glass units are available to accommodate for breakage. Use only manufacturer's glass.

C. Design :
- Minimize towel bars on glass
- Avoid vertical bars with horizontal bars on moving doors.
- Ensure rubber gaskets and bumpers are integrated into the design
- Ensure door does not swing into other elements or bath accessories.

D. Training : A trained installer is required. Training can be completed by one of the following:
- Hands on training by the manufacturer
- Manufacturer coordinates / installs model room with installer
- Watch training videos by manufacturer

E. Manufacturers : Manufacturers shall conform to the performance criteria listed in these standards.

F. Door Hardware : Select hardware for long-term durability, appearance, low maintenance, operational efficiency and security dependability. Incorporate soft closing mechanisms and install bumpers per manufacturer recommendations.

In order to comply with manufacturer's warranty, please refer to manufacturer's document's for correct material handling, installation procedures, and care and maintenance instructions. Any hardware supplied must be used and in accordance with manufacturer's documents to maintain limited 5-year warranty.

Stainless steel screws are included to install into adequate structural blocking.

Contemporary design combines with a fully HeliArc welded construction, resulting in a Grab Bar with:

- Unparalleled strength
- Beauty
- Functionality
- Durability
- No lines for dirt to collect (maintenance free)

MECHANICAL DATA

Height: 2" (5.1cm)
Width: xx" (See product part number for width). Complete length of Grab Bar is usable surface.
Diameter: 1.25" (3.2cm)

PRODUCT COMPOSITION

Entire product is 18/8 (304) stainless steel. Solid caps and pins are HeliArc welded to 18 gauge tube.

MODALITY

Use: Wall Installation. **Load Capability:** 800 lbs. (362.9kg) when properly installed.

INSTALLATION

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and **must be installed into adequate structural blocking** or with WingIts® Grab Bar Fasteners (GBWME40).

CERTIFICATIONS

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars meet or exceed the applicable requirements of all building codes, ADA criteria, and 2010 ADAAG and 2009 ANSI standards.

RECOMMENDED INTEGRATION

For hollow wall construction, it is recommended that WingIts® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for applications.

FIXED OVAL CURVED SHOWER ROD

CONTEMPORARY TRANSITIONAL STYLING

sales@preferredbathinc.com
www.preferredbathinc.com
(336) 904-6248

SAG FREE STAINLESS STEEL CURVED SHOWER ROD

PART NUMBERS	FINISH
113-5BP	BRIGHT POLISHED
113-5BN	BRUSHED NICKEL

- STAINLESS STEEL OVAL CURVED SHOWER ROD WITH SIX INCH BOW - 1
- STAINLESS STEEL MOUNTING SCREWS - 4
- STAINLESS STEEL SET SCREWS - 2
- ZINC DIE-CAST WALL BRACKETS AND ROD RECEIVERS - 2

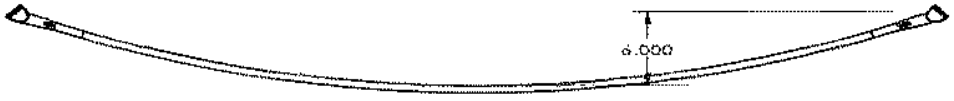
STRONG T-PLUG DESIGN

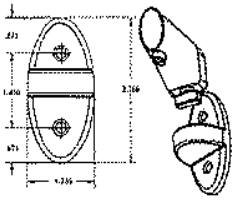
- SAG FREE CURVED OVAL SHOWER ROD
- EASY ONE PERSON INSTALLATION

MAY BE CUT DOWN TO FIT ANY SIZE OPENING

- TOTAL INSTALLED LENGTH OF CURVED SHOWER ROD IS 60 INCHES
- TOTAL BOW OF CURVED SHOWER ROD IS 6 INCHES

To cut the shower rod down please follow these instructions: Measure the total opening of the shower/ tub enclosure and subtract that number from 60 inches. The remaining number is what will need to be cut from the shower rod. Example: 58 inch opening minus 60 inches leaves 2 inches to cut. It is best to cut equal amounts off both ends, this insures a proper fit.





INSTALLATION:

Screw the wall brackets onto the wall first. Be sure to measure and level each wall bracket. Once complete attach the bar receivers to the wall brackets via the patented T-Plug and insert the shower rod approximately 2 inches in one mounted bar receiver, then rotate the shower rod towards the second empty bar receiver mounted on the adjacent wall. When the shower rod and the empty bar receiver line up slide the shower rod approximately 1 inch into the second mounted bar receiver. Use the provided set screws to lock everything in place.

WOOD BLOCKING IS THE PREFERRED METHOD OF INSTALLATION

Limited Warranty:
Preferred Bath Accessories Inc. warrants to the purchaser that the product will be free from defects in material and workmanship. If the product does not comply with this warranty, Preferred Bath Accessories Inc. will repair or replace the product or, at Preferred Bath Accessories Inc's. option, refund the purchase price. WINGITS®

INFINITE Elegance™

Stainless Steel 24" Slide Bar Assembly Grab Bar and Hand Shower Holder Combo

Model:

WIE

Part Numbers:

WIESBA24PS Polished Finish

WIESBA24SN Satin Finish

COMBO UNIT CONSISTS OF THE FOLLOWING:
(1) 24" Grab Bar
(1) Hand Shower Holder

Contemporary design and PATENTED BridgeBind™ Technology results in a Grab Bar with:

- Unparalleled strength
- Sleek modern appearance
- No lines for dirt to collect - maintenance free
- Grab Bar and removable Hand Shower Holder are ADA Compliant

BridgeBind™ Technology is the result of drilling a hole completely through stainless steel tubing, inserting a solid stainless steel pin and HeliArc welding the pin to the far point of the tube; solidifying the pin and tube into one piece. Creating the ultimate structural bond.

MECHANICAL DATA
Length: 1 Grab Bar at 24" (61cm) **Diameter:** 1.25" (3.2cm)
PRODUCT COMPOSITION
Grab Bar is 18/8 (304) Stainless Steel, Hand Shower Holder is Acrylonitrile butadiene styrene (thermoplastic).
MODALITY
Use: Wall installation. **Load Capability:** 800 lbs (362.9kg).
INSTALLATION
WINGITS® INFINITE Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and must be installed into adequate structural blocking or with WINGITS® Grab Bar Fasteners (GBWME40).
CERTIFICATIONS
WINGITS® INFINITE Elegance™ Structural Stainless Steel Grab Bars meet or exceed applicable requirements of all building codes, ADA Criteria, and 2010 ACAAGard 2009 ANSI standards.
RECOMMENDED INTEGRATION
For Hollow wall construction, it is recommended that WINGITS® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for application.

(336) 904-6248

STAINLESS STEEL STRAIGHT OVAL SHOWER ROD

PART NUMBERS	FINISH
113-5BP-SR	BRIGHT POLISHED
113-5BN-SR	BRUSHED NICKEL

- STAINLESS STEEL OVAL STRAIGHT SHOWER ROD - 1
- STAINLESS STEEL MOUNTING SCREWS - 4
- STAINLESS STEEL SET SCREWS - 2
- ZINC DIE-CAST WALL BRACKETS AND ROD RECEIVERS - 2

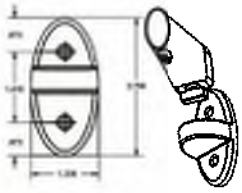
STRONG T-PLUG DESIGN

- STRONG DESIGN
- EASY ONE PERSON INSTALLATION

MAY BE CUT DOWN TO FIT ANY SIZE OPENING

- TOTAL INSTALLED LENGTH OF THE STRAIGHT SHOWER ROD IS 60 INCHES

To cut the shower rod down please follow these instructions: Measure the total opening of the shower/tub enclosure and subtract that number from 60 inches, the remaining number is what will need to be cut from the shower rod. Example: 58 inch opening minus 60 inches leaves 2 inches to cut. It is best to cut equal amounts off both ends, this insures a proper fit.



INSTALLATION:

Screw the wall brackets onto the wall first. Be sure to measure and level each wall bracket. Once complete attach the bar receivers to the wall brackets via the patented T-Plug and insert the shower rod approximately 2 inches into one of the mounted bar receivers. Slide the shower rod towards the second empty bar receiver mounted on the adjacent wall and insert approximately 1 inch. Use the provided set screws to lock everything in place.

WOOD BLOCKING IS THE PREFERRED METHOD OF INSTALLATION

Limited Warranty:
Preferred Bath Accessories Inc. warrants to the purchaser that the product will be free from defects in material and workmanship. If the product does not comply with this warranty, Preferred Bath Accessories Inc. will repair or replace the product or, at Preferred Bath Accessories Inc's. option, refund the purchase price. CARE AND CLEANING:

When cleaning wipe the fixture down with a damp soft cloth to prevent any mineral build-up. Do not use any abrasive cleaning products, aggressive chemical cleaning products, abrasive cleaning pads, or harsh/abrasive polishes on this fixture. This will damage the finish and the smooth comfortable seating surface of the product. The use of such products will void the warranty.

Do not allow any personal hygiene products such as soap, shampoo, conditioner to stay on the fixture for any extended period of time. If this should occur please rinse off with water or wipe off with a damp cloth. The potential build up that occurs from these products can cause premature wear and may also diminish the beauty and durability of its finish.

INSTALLATION:

Use provided mounting template to mark the proper hole placement. Use provided stainless steel mounting screws and mount to wall. Once mounted install nylon decorative cover flanges.

WOOD BLOCKING IS REQUIRED FOR COMMERCIAL APPLICATION AND SHOULD GENEROUSLY EXTEND PAST THE HEIGHT AND WIDTH OF THE PRODUCT

Limited Warranty:

Preferred Bath Accessories Inc. warrants to the purchaser that the product will be free from defects in material and workmanship. If the product does not comply with this warranty, Preferred Bath Accessories Inc. will repair or replace the product or, at Preferred Bath Accessories Inc's. option, refund the purchase price. The limited warranty period is for the lifetime of the product. - MOUNTING TEMPLATE - 1
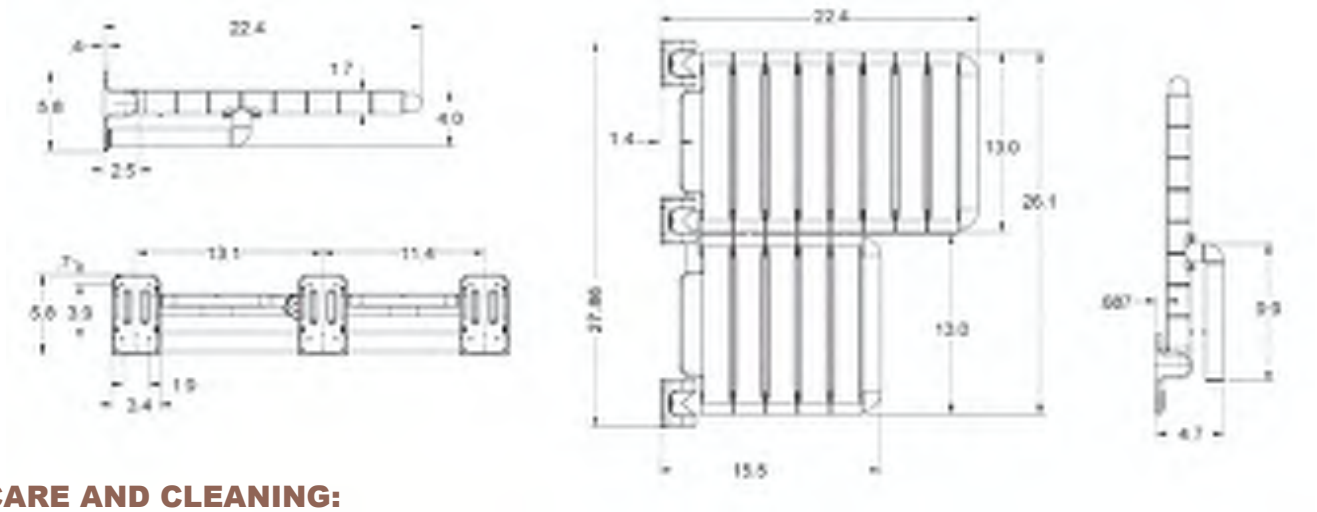
- STAINLESS STEEL MOUNTING SCREWS - 12
- MULTIPLE COLORS AVAILABLE



CARE AND CLEANING:

When cleaning wipe the fixture down with a damp soft cloth to prevent any mineral build-up. Do not use any abrasive cleaning products, aggressive chemical cleaning products, abrasive cleaning pads, or harsh/abrasive polishes on this fixture. This will damage the finish and the smooth comfortable seating surface of the product. The use of such products will void the warranty.

Do not allow any personal hygiene products such as soap, shampoo, conditioner to stay on the fixture for any extended period of time. If this should occur please rinse off with water or wipe off with a damp cloth. The potential build up that occurs from these products can cause premature wear and may also diminish the beauty and durability of its finish.

INSTALLATION:

Use provided mounting template to mark the proper hole placement. Use provided stainless steel mounting screws and mount to wall. Once mounted install nylon decorative cover flanges.

WOOD BLOCKING IS REQUIRED FOR COMMERCIAL APPLICATION AND SHOULD GENEROUSLY EXTEND PAST THE HEIGHT AND WIDTH OF THE PRODUCT

Limited Warranty:

Preferred Bath Accessories Inc. warrants to the purchaser that the product will be free from defects in material and workmanship. If the product does not comply with this warranty, Preferred Bath Accessories Inc. will repair or replace the product or, at Preferred Bath Accessories Inc's. option, refund the purchase price. The limited warranty period is for the lifetime of the product. Limitations on the Warranty: The warranty does not cover, normal wear and tear, product abuse, neglect, improper installation or maintenance. Purchaser Requirements: If this product does not meet Preferred Bath Accessories Inc's. warranty, return the product (postage prepaid) to the place of purchase with proof of purchase and a written claim briefly describing the defect. You may be required to provide other information or evidence of the defect.

WINGITS® INFINITE Elegance™

Stainless Steel 24" Slide Bar Assembly Grab Bar and Hand Shower Holder Combo

Model:
WIE

Part Numbers:

WIESBA24PS	WIESBA24SN
Polished Finish	Satin Finish

COMBO UNIT CONSISTS OF THE FOLLOWING:
(1) 24" Grab Bar
(1) Hand Shower Holder

Contemporary design and PATENTED BridgeBind™ Technology results in a Grab Bar with:

- Unparalleled strength
- Sleek modern appearance
- No lines for dirt to collect - maintenance free
- Grab Bar and removable Hand Shower Holder are ADA Compliant

BridgeBind™ Technology is the result of drilling a hole completely through stainless steel tubing, inserting a solid stainless steel pin and HeliArc welding the pin to the far point of the tube; solidifying the pin and tube into one piece. Creating the ultimate structural bond.

MECHANICAL DATA
Length: 1 Grab Bar at 24" (61cm) **Diameter:** 1.25" (3.2cm)
PRODUCT COMPOSITION
Grab Bar is 18/8 (304) Stainless Steel, Hand Shower Holder is Acrylonitrile butadiene styrene (thermoplastic).
MODALITY
Use: Wall installation. **Load Capability:** 800 lbs (362.9kg).
INSTALLATION
WINGITS® INFINITE Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and must be installed into adequate structural blocking or with WINGITS® Grab Bar Fasteners (GBWME40).
CERTIFICATIONS
WINGITS® INFINITE Elegance™ Structural Stainless Steel Grab Bars meet or exceed applicable requirements of all building codes, ADA Criteria, and 2010 ACAAGard 2009 ANSI standards.
RECOMMENDED INTEGRATION
For Hollow wall construction, it is recommended that WINGITS® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for application.

FIXED OVAL CURVED SHOWER ROD

CONTEMPORARY TRANSITIONAL STYLING

sales@preferredbathinc.com
www.preferredbathinc.com
(336) 904-6248

SAG FREE STAINLESS STEEL CURVED SHOWER ROD

PART NUMBERS	FINISH
113-5BP	BRIGHT POLISHED
113-5BN	BRUSHED NICKEL

- STAINLESS STEEL OVAL CURVED SHOWER ROD WITH SIX INCH BOW - 1
- STAINLESS STEEL MOUNTING SCREWS - 4
- STAINLESS STEEL SET SCREWS - 2
- ZINC DIE-CAST WALL BRACKETS AND ROD RECEIVERS - 2

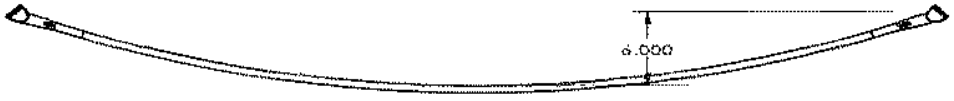
STRONG T-PLUG DESIGN

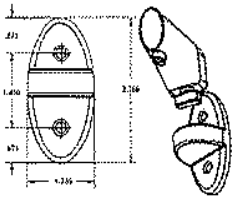
- SAG FREE CURVED OVAL SHOWER ROD
- EASY ONE PERSON INSTALLATION

MAY BE CUT DOWN TO FIT ANY SIZE OPENING

- TOTAL INSTALLED LENGTH OF CURVED SHOWER ROD IS 60 INCHES
- TOTAL BOW OF CURVED SHOWER ROD IS 6 INCHES

To cut the shower rod down please follow these instructions: Measure the total opening of the shower/ tub enclosure and subtract that number from 60 inches. The remaining number is what will need to be cut from the shower rod. Example: 58 inch opening minus 60 inches leaves 2 inches to cut. It is best to cut equal amounts off both ends, this insures a proper fit.





INSTALLATION:

Screw the wall brackets onto the wall first. Be sure to measure and level each wall bracket. Once complete attach the bar receivers to the wall brackets via the patented T-Plug and insert the shower rod approximately 2 inches in one mounted bar receiver, then rotate the shower rod towards the second empty bar receiver mounted on the adjacent wall. When the shower rod and the empty bar receiver line up slide the shower rod approximately 1 inch into the second mounted bar receiver. Use the provided set screws to lock everything in place.

WOOD BLOCKING IS THE PREFERRED METHOD OF INSTALLATION

Limited Warranty:
Preferred Bath Accessories Inc. warrants to the purchaser that the product will be free from defects in material and workmanship. If the product does not comply with this warranty, Preferred Bath Accessories Inc. will repair or replace the product or, at Preferred Bath Accessories Inc's. option, refund the purchase price. CARE AND CLEANING:

When cleaning wipe the fixture down with a damp soft cloth to prevent any mineral build-up. Do not use any abrasive cleaning products, aggressive chemical cleaning products, abrasive cleaning pads, or harsh/abrasive polishes on this fixture. This will damage the finish and the smooth comfortable seating surface of the product. The use of such products will void the warranty.

Do not allow any personal hygiene products such as soap, shampoo, conditioner to stay on the fixture for any extended period of time. If this should occur please rinse off with water or wipe off with a damp cloth. The potential build up that occurs from these products can cause premature wear and may also diminish the beauty and durability of its finish.

INSTALLATION:

Use provided mounting template to mark the proper hole placement. Use provided stainless steel mounting screws and mount to wall. Once mounted install nylon decorative cover flanges.

WOOD BLOCKING IS REQUIRED FOR COMMERCIAL APPLICATION AND SHOULD GENEROUSLY EXTEND PAST THE HEIGHT AND WIDTH OF THE PRODUCT

Limited Warranty:

Preferred Bath Accessories Inc. warrants to the purchaser that the product will be free from defects in material and workmanship. If the product does not comply with this warranty, Preferred Bath Accessories Inc. will repair or replace the product or, at Preferred Bath Accessories Inc's. option, refund the purchase price. The limited warranty period is for the lifetime of the product. Limitations on the Warranty: The warranty does not cover, normal wear and tear, product abuse, neglect, improper installation or maintenance. Purchaser Requirements: If this product does not meet Preferred Bath Accessories Inc's. warranty, return the product (postage prepaid) to the place of purchase with proof of purchase and a written claim briefly describing the defect. You may be required to provide other information or evidence of the defect.

Awaken® G110
Multifunction Showerhead
K-72419-G

Features
- Showerhead features contemporary design.
- Advanced spray engine provides three alternate experiences: wide coverage, intense drenching, and targeted spray.
- Wide-coverage spray produces an encompassing spray for everyday use.
- Intense drenching spray delivers a forceful spray ideal for rinsing soap from hair.
- Targeted spray is a focused stream for targeting sore muscles or use as a utility spray.
- Simple thumb tab allows for a smooth transition between sprays.
- Spray nozzles cover full area of sprayhead.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- 1.75 gpm (gallons per minute) showerhead flow rate.
- 1/2" NPT connection.

Material
- KOHLER finishes resist corrosion and tarnishing.

Installation
- Wall-mount.

Water Conservation & Rebates
- This product can help a building earn Water Efficiency points in LEED® Green Building Rating System.

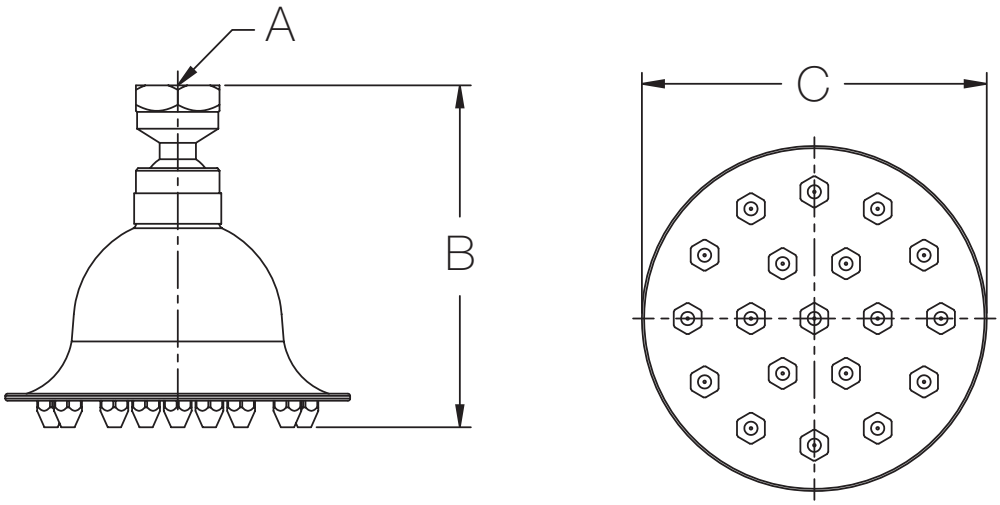
Dimensions

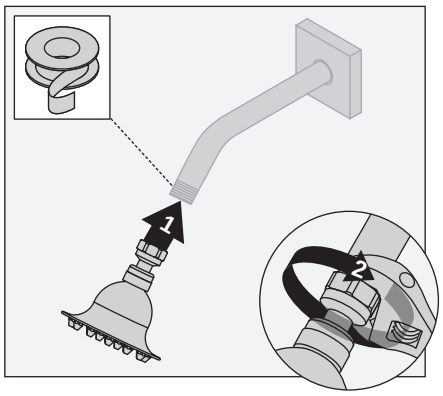
Measurements	
A	1/2-14 NPT
B	3-7/8", 98 mm
C	Ø 3-7/8", 98 mm



Note: Dimensions subject to change without notice.

Installation

1) Install showerhead to shower arm (not included) turning clockwise to tighten.



Tools Required	
Plumber Tape	

Care and Cleaning

1) Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.

Troubleshooting Chart

Problem	Cause	Solution
Finish is spotting.	Elements in water supply may cause water staining on finish.	Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.
Showerhead is leaking from shower arm when valve is in “on” position.	Coupling connecting showerhead to shower arm is cracked or washer inside coupling is worn.	Inspect coupling and washer and replace showerhead if necessary.

⚠ **WARNING:** This product can expose you to chemicals including lead, which is known to the state of California to cause cancer, birth defects, or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.
