Issue Date: Aug 30, 2021
Revision Date:

Item Name	Tub Surround
Item Type	Tub Surround
Description	3x12 Herringbone tile pattern panel system for standard tubs.
Manufacturer	International Marble Industries, Inc.
Model	WS-ST-SU-HB3x12
Dimensions	2 Side Panels: 36"x96" each, 2 Back Panels: 44"x96" and 28"x96" (totaling 72"x96"), with 6" Listello
Color	SW7005
Finish	Gloss
CSI #	066113 - Cultured Marble Fabrications
Fire/Smoke Rating	Class A per ASTM e84
Accessories	To Fit 60"x34" TPS Tub
Warranty	10 year limited warranty against manufacturing defects.
Notes	Trimming back and side panels on the inside will cause grout lines to not match up in the corners. Exaggerate off-set grout lines in the corner for the design intent.

SPECIAL INSTRUCTIONS

Shower head and water controls must be centered in panels.

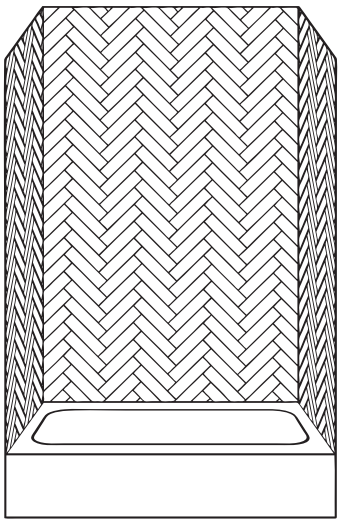
Cast Marble Solutions for Tubs and Showers

3x12 Herringbone Tile Pattern Panel System

WS-ST-SU-HB3x12

For Standard Tubs (TownePlace Suites Shown)

Technical Specifications

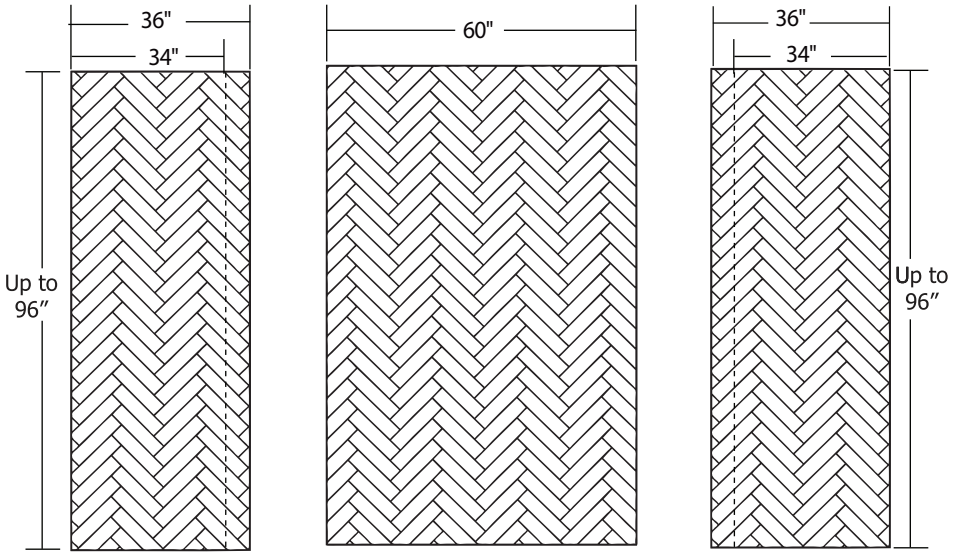


Specifications:

Description: Multi-Piece Sealed Surface Panel System
Standard: ProCast
Color: SW7005 (IMI: WW1127)
Finish: Gloss

Dimensions:

2- Side Panels: 36"x96"
1- Back Panel: 60"x96"
Height: Up to 96"
Thickness: 5/16"
To Fit: 60"x34" TPS Tub



NOTES:

1. Panels MUST extend to the ceiling for tubs and showers. Drawing shows maximum panel dimensions. Cutting must be done on site to fit project requirements.
2. Panels received may be oversized. Trimming to fit site dimensions is necessary. Always trim end panels on the inside, where they meet the back wall.
   Note: Trimming back and side panels on the inside will cause grout lines to not match up in the corners. Exaggerate off-set grout lines in the corner for design intent.
3. WingIts with standoffs to be used only when blocking unavailable, otherwise, use truss head screws and standoffs with blocking for SS-05 installation to ensure adequate stability. Blocking for accessory ledge and footrest required
4. Extremely sanitary, impervious to mold, mildew and bacteria. Panels have appearance of grout without sanitary and moisture issues associated with grout.
5. 10-year limited warranty against manufacturing defects.
6. ProCast - Class A fire rated per ATSM e84 : Fire rated material.
7. Made in the U.S.A.
8. Shower Head and Water Controls must be centered in panels.

TUB AND SHOWER FAUCET TRIM

- Ara® Bath Collection
- Valve Only (T14067)
- Shower Only (T14267)
- Tub/Shower (T14467)

FEATURES:

- Monitor® 14 Series pressure balanced single handle bath mixing valve trim
- Single function H_2Okinetic® Technology shower head

STANDARD SPECIFICATIONS:

- Maintains a balanced pressure of hot and cold water even when a valve is turned on or off elsewhere in the system
- For use with MultiChoice® Universal rough valve body (R10000 Series)
- Temperature only controlled with handle
- Field adjustable means to limit handle rotation into hot water zone
- 120° maximum handle rotation
- All parts replaceable from the front of the valve
- 1.75 gpm @ 80 psi for standard models
- 1.5 gpm @ 80 psi for models with -H_2O designation
- Tub port maximum flow rate 6.0 gpm @ 60 psi with R10000-UNBX
- Shower arm overall horizontal length = 7" (178 mm), including threaded ends
- Red/blue pad print temperature indicators on escutcheon
- Stem extension kit RP77991 can be ordered to allow for an additional 1 3/4" wall thickness. RP77991 ships with chrome escutcheon screws. For special finishes also order RP12630 escutcheon screws in desired finish.

WARRANTY

- Parts and Finish - Lifetime limited warranty; or for commercial purchasers, 10 years for multi-family residential (apartments and condominiums) and 5 years for all other commercial uses, in each case from the date of purchase.
- Electronic Parts and Batteries (if applicable) - 5 years from the date of purchase; or for commercial purchasers, 1 year from the date of purchase. No warranty is provided on batteries.

COMPLIES WITH:

- ASME A112.18.1 / CSA B125.1
  Indicates compliance to ICC/ANSI A117.1 - Valve control only
- EPA WaterSense®

Specifications

RIZON™ POSI-TEMP®
Single-Handle Tub/Shower Trim Kit

Model: T2811 series - valve trim only
T2812 series - shower trim only
T2813 series - tub/shower trim only

Valves: 62300, 2500 series

WaterSense Meets EPA Criteria
Certified by IAPMO R&T
EP Suffix Models Only

FAUCET DESCRIPTION
- Metal construction with various finishes identified by suffix
- Includes showerhead, arm, flange and diverter spout
- Includes Red/Blue indicators

OPERATION
- Lever style handle with temperature indicator on the escutcheon
- Handle operates counterclockwise through a 270˚ arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3.6° F (±2˚ C)

FLOW
- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi
- NH suffix models contain no showerhead

CARTRIDGE
- 1222 cartridge design
- Nonmetallic/nonferrous and stainless steel materials
- Accommodates back to back installations

STANDARDS
- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are IAPMO Green listed and third party certified to WaterSense®
- **ADA** for lever handle

WARRANTY
- Lifetime limited warranty against leaks, drips and finish defects to the original homeowner
- 10 year limited warranty when used in a multifamily installation
- 5 year limited warranty when used in a commercial installation

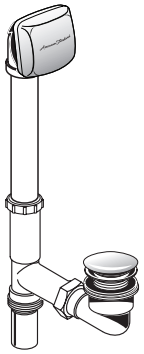
Installation Instructions

DEEP SOAK™ BATH DRAIN

BATH WASTE AND OVERFLOW WITH TOE TAPPER DRAIN PLUG

1640.305.XXX



Note: THIS DRAIN IS INTENDED FOR USE WITH BATH DRAINS ONLY!

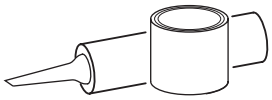
Thank you for selecting American-Standard…the benchmark of fine quality for over 100 years.

To ensure that your installation proceeds smoothly–please read these instructions carefully before you begin.

754096-100 Rev. A

RECOMMENDED TOOLS

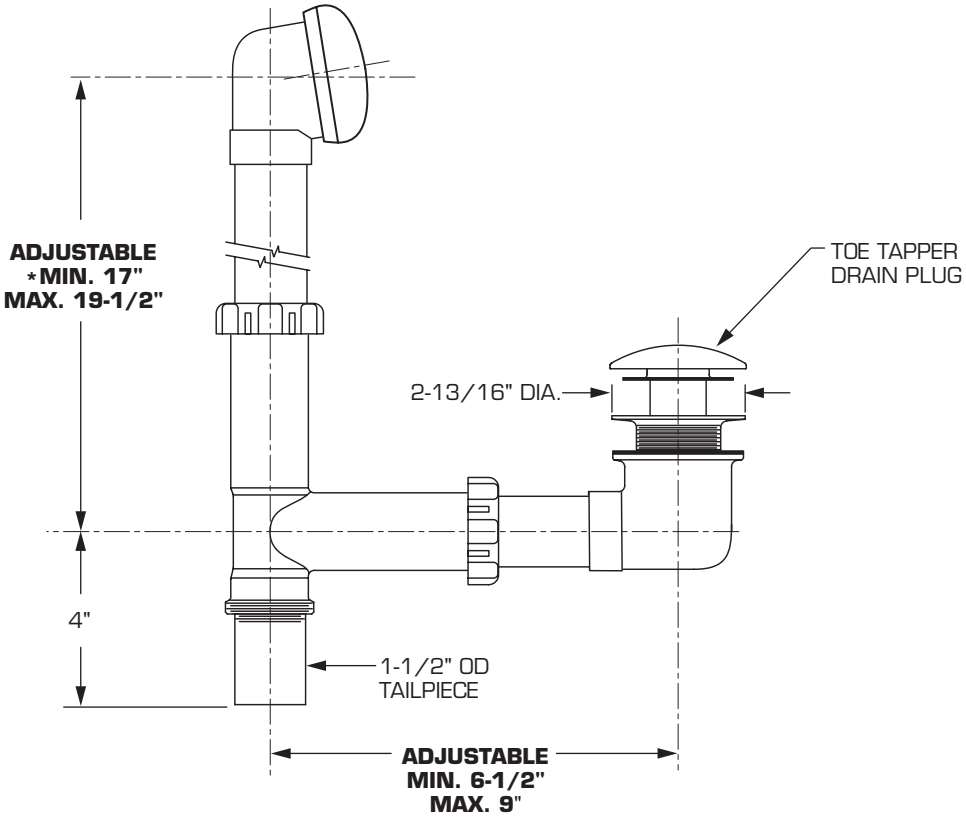
Channel Locks



Plumbers' Putty or Caulking

Phillips Screwdriver

ROUGH-IN DIMENSIONS

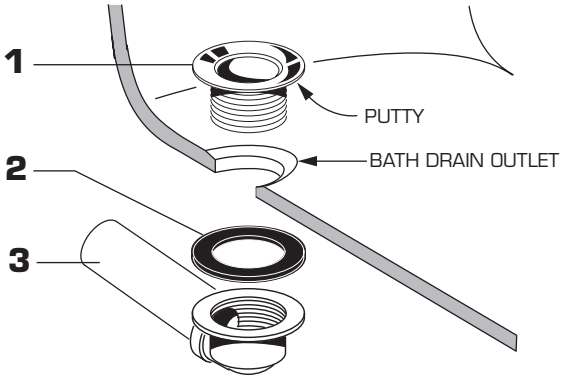


*NOTE: A smaller dimension can be accommodated by cutting pipe.

1 INSTALL DRAIN PLUG AND ELL (STANDARD AND OVER-THE-RIM DRAINS)

- Apply putty to underside of DRAIN PLUG **(1)** and drop into drain outlet.
- Slip RUBBER WASHER **(2)** on from below and thread DRAIN PLUG **(1)** into DRAIN ELL ASSEMBLY **(3)**.

NOTE: TUB IS SHOWN CUT AWAY FOR CLARITY OF INSTALLATION.



2 INSTALL OVERFLOW ASSEMBLY AND DRAIN TEE (STANDARD DRAIN)

- Loosen SLIP JOINT NUT & SEAL **(1)** and install onto OVERFLOW TUBE **(2)**. Install OVERFLOW TUBE ASSEMBLY **(2)** into the appropriate leg of the DRAIN TEE **(3)**. Apply sealant to threads of TAILPIECE **(6)** and thread into DRAIN TEE **(3)**. Install OVERFLOW GASKET **(4)** to OVERFLOW TUBE ASSEMBLY **(2)**. (Adjust OVERFLOW GASKET **(4)** to couture of tub. ***FIG.1.***
- Loosen SLIP JOINT NUT & SEAL **(5)** and install onto DRAIN ELL ASSEMBLY **(6)**. Install DRAIN ELL ASSEMBLY **(6)** into the horizontal leg of the DRAIN TEE **(3)**. ***FIG 2.***

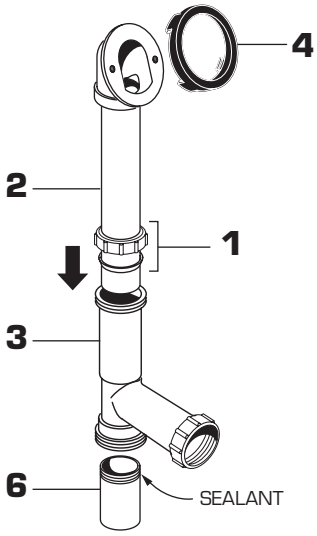


FIG.1

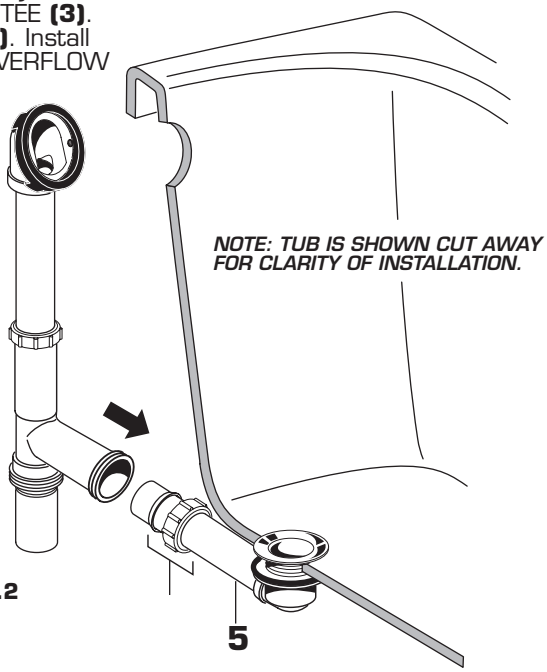

FIG.2

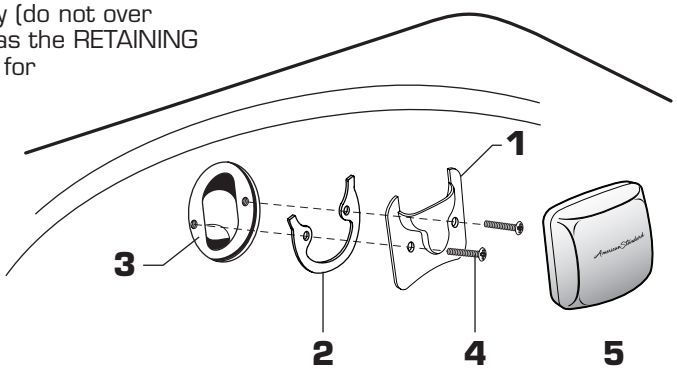
3 SECURE OVERFLOW ASSEMBLY TO TUB (STANDARD DRAIN)

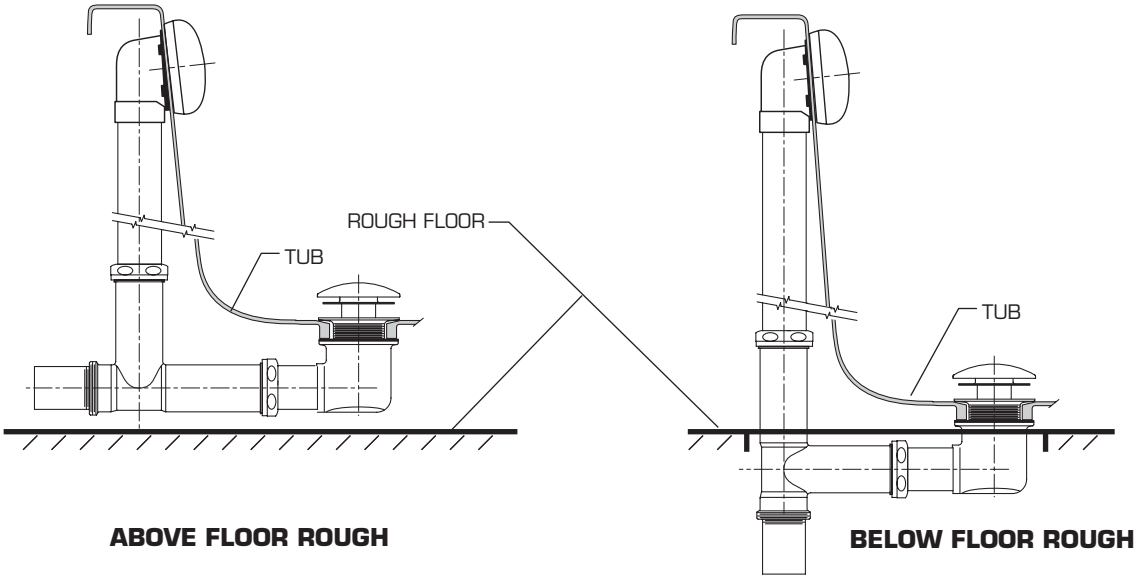
- Align the holes in the RETAINING PLATE **(1)** with those in the GASKET **(2)** and OVERFLOW FLANGE **(3)**. Install SCREWS **(4),** tighten snugly (do not over tighten). The overflow gasket (behind tub wall) will begin to seal as the RETAINING PLATE **(1)** becomes tighter. The overflow gasket can be rotated for desired fit.
- Align the ESCUTCHEON **(5)** with the RETAINING PLATE **(1)** and push onto RETAINING PLATE **(1)** until the ESCUTCHEON **(5)** snaps into place.
- When you are satisfied with the overall fit of the drain, go back and tighten all joints to make a water tight seal.



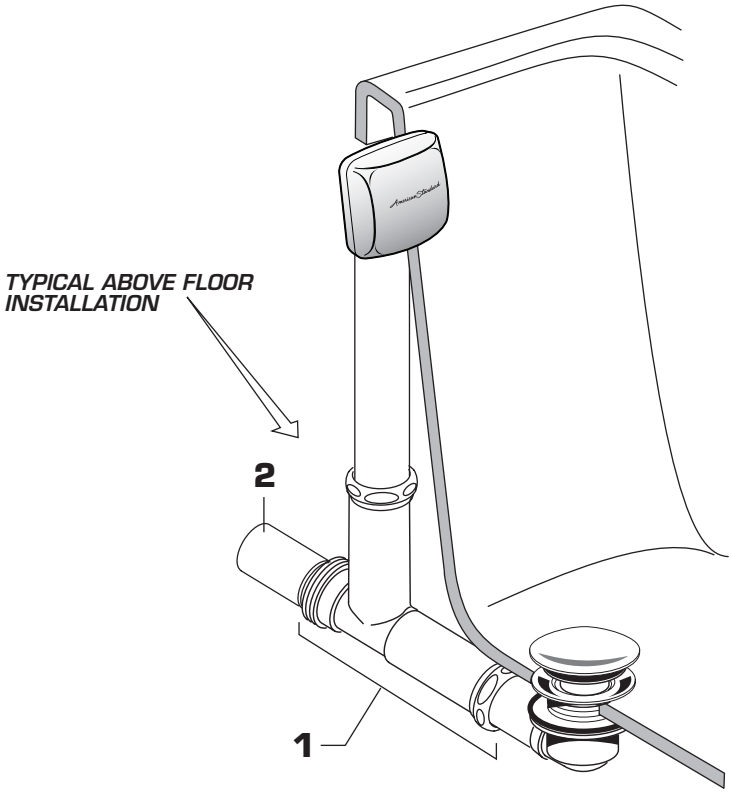
4 ABOVE FLOOR OUTLET INSTALLATION (STANDARD DRAIN)

Note: Waste outlet can be installed either above the floor or below floor. Fig.1.

- For above floor drain outlet, Rotate DRAIN TEE ASSEMBLY **(1)** 90 degrees so TAILPIECE **(2)** faces out the back from tub as shown.



ABOVE FLOOR ROUGH **BELOW FLOOR ROUGH**



NOTE: TUB IS SHOWN CUT AWAY FOR CLARITY OF INSTALLATION.

CARE INSTRUCTIONS:

DO: SIMPLY RINSE THE PRODUCT CLEAN WITH CLEAR WATER.DRY WITH A SOFT COTTON FLANNEL CLOTH.

DO NOT: DO NOT CLEAN THE PRODUCT WITH SOAPS, ACID, POLISH, ABRASIVES, HARSH CLEANERS, OR A CLOTH WITH A COARSE SURFACE.

KOHLER. Faucets

Awaken® G110
Multifunction Showerhead
K-72419-G

Features
- Showerhead features contemporary design.
- Advanced spray engine provides three alternate experiences: wide coverage, intense drenching, and targeted spray.
- Wide-coverage spray produces an encompassing spray for everyday use.
- Intense drenching spray delivers a forceful spray ideal for rinsing soap from hair.
- Targeted spray is a focused stream for targeting sore muscles or use as a utility spray.
- Simple thumb tab allows for a smooth transition between sprays.
- Spray nozzles cover full area of sprayhead.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- 1.75 gpm (gallons per minute) showerhead flow rate.
- 1/2" NPT connection.

Material
- KOHLER finishes resist corrosion and tarnishing.

Installation
- Wall-mount.

Water Conservation & Rebates
- This product can help a building earn Water Efficiency points in LEED® Green Building Rating System.

KOHLER. Faucets

Awaken® B110

Multifunction Showerhead, 1.75 gpm

K-72425-G

Features

- Showerhead features transitional nature-inspired design.
- Advanced spray engine provides three alternate experiences: wide coverage, intense drenching, and targeted spray.
- Wide-coverage spray produces an encompassing spray for everyday use.
- Intense drenching spray delivers a forceful spray ideal for rinsing soap from hair.
- Targeted spray is a focused stream for targeting sore muscles or use as a utility spray.
- Simple thumb tab allows for a smooth transition between sprays.
- Spray nozzles cover full area of sprayhead.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- 1.75 gpm (6.6 lpm) flow rate.
- 1/2" NPT connection.

Material

- KOHLER finishes resist corrosion and tarnishing.

Installation

- Wall-mount.

Water Conservation & Rebates

- This product can help a building earn Water Efficiency points in LEED® Green Building Rating System.

C US

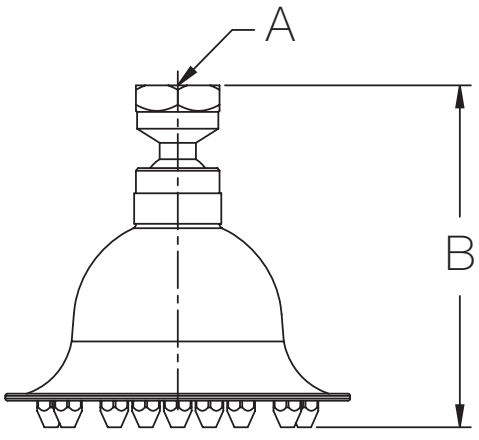
WaterSense Meets EPA Criteria Certified by CSA Group

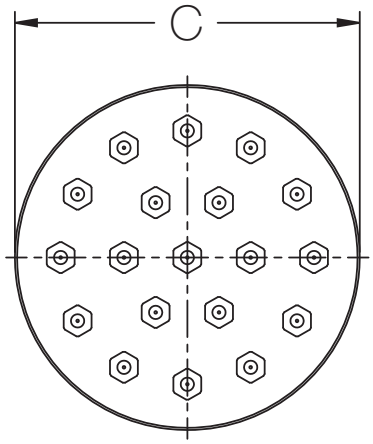
Warranty

Limited Lifetime - to the original end purchaser in consumer installations.
5 Years - for commercial installations.
Refer to www.symmons.com/warranty for complete warranty information.

Dimensions

Measurements	
A	1/2-14 NPT
B	3-7/8", 98 mm
C	Ø 3-7/8", 98 mm

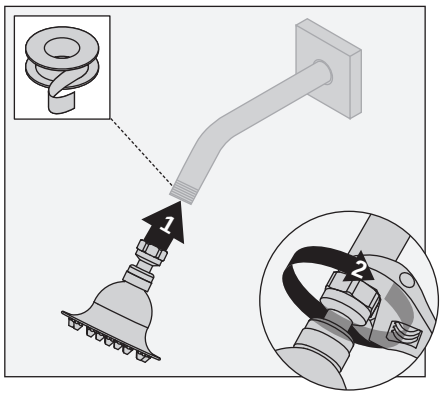




Note: Dimensions subject to change without notice.

Installation

1) Install showerhead to shower arm (not included) turning clockwise to tighten.



Tools Required	
Plumber Tape	

Care and Cleaning

1) Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.

Troubleshooting Chart

Problem	Cause	Solution
Finish is spotting.	Elements in water supply may cause water staining on finish.	Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.
Showerhead is leaking from shower arm when valve is in “on” position.	Coupling connecting showerhead to shower arm is cracked or washer inside coupling is worn.	Inspect coupling and washer and replace showerhead if necessary.

⚠ **WARNING:** This product can expose you to chemicals including lead, which is known to the state of California to cause cancer, birth defects, or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

Multifunction Handshower

K-72415-G

Features

- Handshower features contemporary design.
- Three spray functions and ADA non-positive shut off.
- Wide-coverage spray produces an encompassing spray for everyday use.
- Intense drenching spray delivers a forceful spray ideal for rinsing soap from hair.
- Targeted spray is a focused stream for targeting sore muscles or use as a utility spray.
- Thumb tab allows for a smooth transition between sprays.
- Spray nozzles cover full area of sprayhead.
- Combination of balance, weight, grip, and angle makes this handshower comfortable and easy to use.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- 1.75 gpm (6.6 lpm) flow rate.

Material

- KOHLER finishes resist corrosion and tarnishing.

Installation

- Bracket or slidebar required for wall-mount installation.
- Deck-mount holder required for deck-mount installation.

Water Conservation & Rebates

- This product can help a building earn Water Efficiency points in LEED® Green Building Rating System.

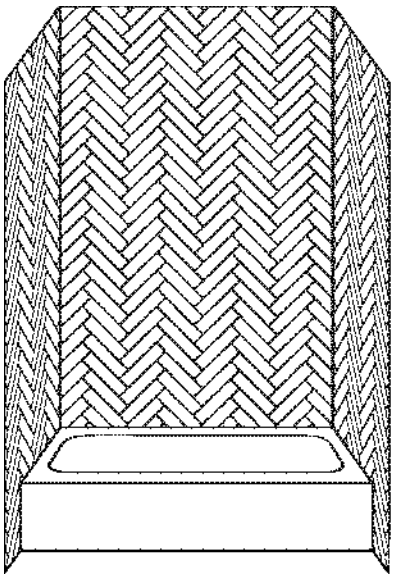
Cast Marble Solutions for Tubs and Showers

3x12 Herringbone Tile Pattern Panel System

WS-ST-SU-HB3x12

For ADA Tub (TownePlace Suites Shown)

Technical Specifications

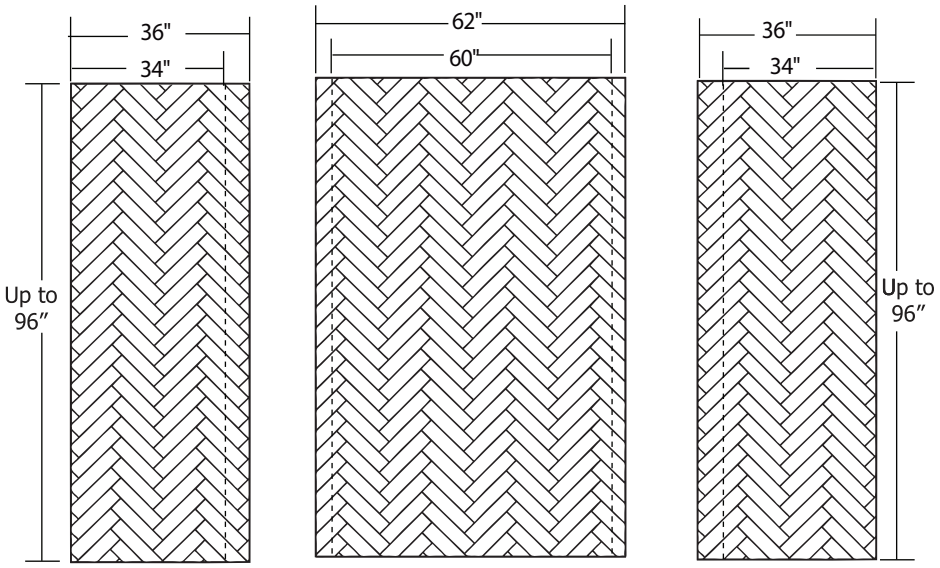


Specifications:

Description: Multi-Piece Sealed Surface Panel System
Standard: ProCast
Color: SW7005 (IMI: WW1127)
Finish: Gloss

Dimensions:

2- Side Panels: 32"x96"
1- Back Panel: 62"x96"
Height: Up to 96"
Thickness: 5/16"
To Fit: 60"x32" TPS Tub



NOTES:

1. Panels MUST extend to the ceiling for tubs and showers. Drawing shows maximum panel dimensions. Cutting must be done on site to fit project requirements.
2. Panels received may be oversized. Trimming to fit site dimensions is necessary. Always trim end panels on the inside, where they meet the back wall.
   Note: Trimming back and side panels on the inside will cause grout lines to not match up in the corners. Exaggerate off-set grout lines in the corner for design intent.
3. WingIts with standoffs to be used only when blocking unavailable, otherwise, use truss head screws and standoffs with blocking for SS-05 installation to ensure adequate stability. Blocking for accessory ledge and footrest required
4. Extremely sanitary, impervious to mold, mildew and bacteria. Panels have appearance of grout without sanitary and moisture issues associated with grout.
5. 10-year limited warranty against manufacturing defects.
6. ProCast - Class A fire rated per ATSM e84 : Fire rated material.
7. Made in the U.S.A.
8. Shower Head and Water Controls must be centered in panels.

Typical CSI Codes: 06 61 13

Herringbone Tile Pattern Panel System

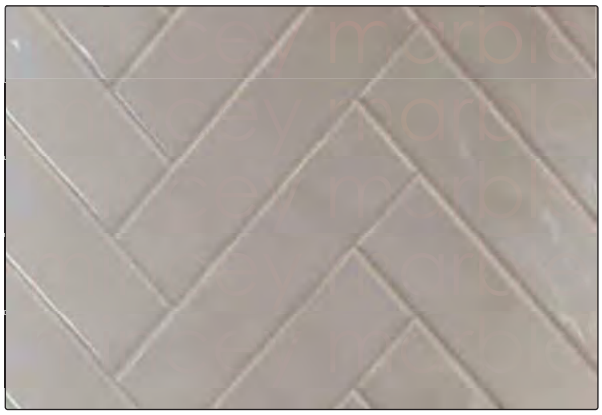
For ADA Tubs - (TownePlace Suites Shown)

TS-RS/Herringbone Wave ADA TB

Information & Specifications
CSI Division 06 61 13

SPECIFICATIONS

Description :	Multi-Piece Sealed Surface Panel System
Standard :	MINCOR™
Series :	Reflections
Color :	See Interior Finish Index for Color (#2250 White - Mincey Color Color Matches SW7005)
Finish :	Gloss
Construction :	Cast Marble



DIMENSIONS *

End Panels :	2 X : 32″
Back Panels :	1 X : 62″
Height :	Up to 96″
Thickness :	5/16″
To Fit :	32″ x 60″ TPS Tub

NOTES

1. Panels MUST extend to the ceiling for tubs and showers. Drawing shows maximum panel dimensions. Cutting must be done on site to fit project requirements.
2. * Panels received will be oversized. Trimming to fit site dimensions is necessary. Always trim end panels on the inside, where they meet the back wall.
3. Extremely sanitary, impervious to mold, mildew, & bacteria. Panels have appearance of grout without sanitary & moisture issues associated with grout.
4. 10-year limited warranty against manufacturing defects.
5. In order to comply with manufacturer's warranty, please refer to manufacturers documents for correct material handling, installation procedures, and care and maintenance instructions.
6. MINCOR™ - Class A fire rated per ASTM e84 : Fire rated material.
7. MAS Certification Green®
8. Made in the U.S.A.
9. WingIts with standoffs to be used only when blocking unavailable otherwise use truss head screws and standoffs with blocking for SS-05 installation to ensure adequate stability. Blocking for accessory ledge and foot rest required.
10. Copyright © 2000 Mincey Marble Manufacturing, Inc.™

TUB AND SHOWER FAUCET TRIM

- Ara® Bath Collection
- Valve Only (T14067)
- Shower Only (T14267)
- Tub/Shower (T14467)

FEATURES:

- Monitor® 14 Series pressure balanced single handle bath mixing valve trim
- Single function H_2Okinetic® Technology shower head

STANDARD SPECIFICATIONS:

- Maintains a balanced pressure of hot and cold water even when a valve is turned on or off elsewhere in the system
- For use with MultiChoice® Universal rough valve body (R10000 Series)
- Temperature only controlled with handle
- Field adjustable means to limit handle rotation into hot water zone
- 120° maximum handle rotation
- All parts replaceable from the front of the valve
- 1.75 gpm @ 80 psi for standard models
- 1.5 gpm @ 80 psi for models with -H_2O designation
- Tub port maximum flow rate 6.0 gpm @ 60 psi with R10000-UNBX
- Shower arm overall horizontal length = 7" (178 mm), including threaded ends
- Red/blue pad print temperature indicators on escutcheon
- Stem extension kit RP77991 can be ordered to allow for an additional 1 3/4" wall thickness. RP77991 ships with chrome escutcheon screws. For special finishes also order RP12630 escutcheon screws in desired finish.

WARRANTY

- Parts and Finish - Lifetime limited warranty; or for commercial purchasers, 10 years for multi-family residential (apartments and condominiums) and 5 years for all other commercial uses, in each case from the date of purchase.
- Electronic Parts and Batteries (if applicable) - 5 years from the date of purchase; or for commercial purchasers, 1 year from the date of purchase. No warranty is provided on batteries.

COMPLIES WITH:

- ASME A112.18.1 / CSA B125.1
  Indicates compliance to ICC/ANSI A117.1 - Valve control only
- EPA WaterSense®

T2812 series - shower trim only
T2813 series - tub/shower trim only

Valves: 62300, 2500 series

WaterSense Meets EPA Criteria Certified by IAPMO R&T
EP Suffix Models Only

FAUCET DESCRIPTION
- Metal construction with various finishes identified by suffix
- Includes showerhead, arm, flange and diverter spout
- Includes Red/Blue indicators

OPERATION
- Lever style handle with temperature indicator on the escutcheon
- Handle operates counterclockwise through a 270˚ arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3.6° F (±2˚ C)

FLOW
- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi
- NH suffix models contain no showerhead

CARTRIDGE
- 1222 cartridge design
- Nonmetallic/nonferrous and stainless steel materials
- Accommodates back to back installations

STANDARDS
- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are IAPMO Green listed and third party certified to WaterSense®
- **ADA** for lever handle

WARRANTY
- Lifetime limited warranty against leaks, drips and finish defects to the original homeowner
- 10 year limited warranty when used in a multifamily installation
- 5 year limited warranty when used in a commercial installation

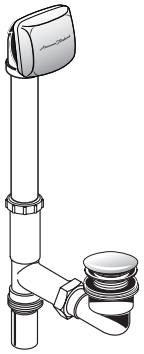
Installation Instructions

DEEP SOAK™ BATH DRAIN

BATH WASTE AND OVERFLOW WITH TOE TAPPER DRAIN PLUG

1640.305.XXX



Note: THIS DRAIN IS INTENDED FOR USE WITH BATH DRAINS ONLY!

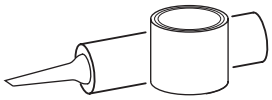
Thank you for selecting American-Standard…the benchmark of fine quality for over 100 years.

To ensure that your installation proceeds smoothly–please read these instructions carefully before you begin.

754096-100 Rev. A

RECOMMENDED TOOLS

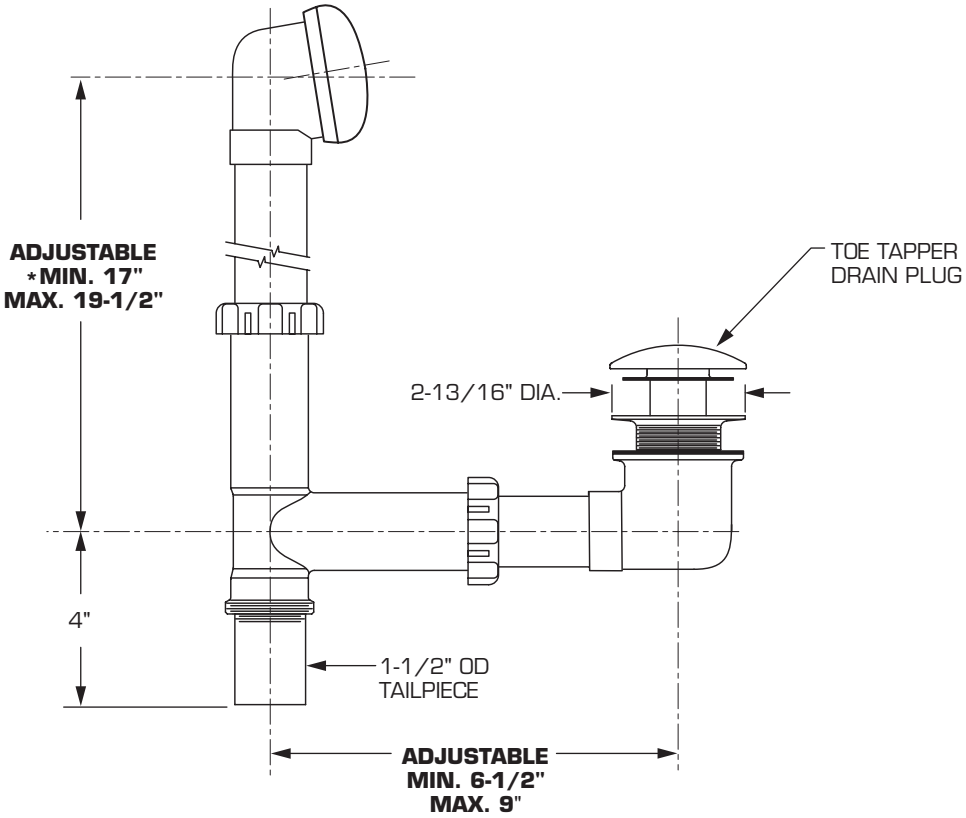
Channel Locks



Plumbers' Putty or Caulking

Phillips Screwdriver

ROUGH-IN DIMENSIONS

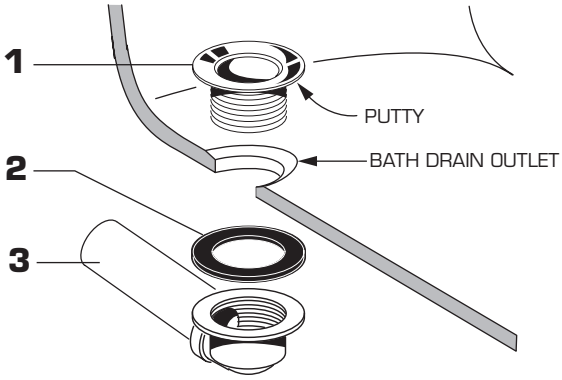


*NOTE: A smaller dimension can be accommodated by cutting pipe.

1 INSTALL DRAIN PLUG AND ELL (STANDARD AND OVER-THE-RIM DRAINS)

- Apply putty to underside of DRAIN PLUG **(1)** and drop into drain outlet.
- Slip RUBBER WASHER **(2)** on from below and thread DRAIN PLUG **(1)** into DRAIN ELL ASSEMBLY **(3)**.

NOTE: TUB IS SHOWN CUT AWAY FOR CLARITY OF INSTALLATION.



2 INSTALL OVERFLOW ASSEMBLY AND DRAIN TEE (STANDARD DRAIN)

- Loosen SLIP JOINT NUT & SEAL **(1)** and install onto OVERFLOW TUBE **(2)**. Install OVERFLOW TUBE ASSEMBLY **(2)** into the appropriate leg of the DRAIN TEE **(3)**. Apply sealant to threads of TAILPIECE **(6)** and thread into DRAIN TEE **(3)**. Install OVERFLOW GASKET **(4)** to OVERFLOW TUBE ASSEMBLY **(2)**. (Adjust OVERFLOW GASKET **(4)** to couture of tub. ***FIG.1.***
- Loosen SLIP JOINT NUT & SEAL **(5)** and install onto DRAIN ELL ASSEMBLY **(6)**. Install DRAIN ELL ASSEMBLY **(6)** into the horizontal leg of the DRAIN TEE **(3)**. ***FIG 2.***

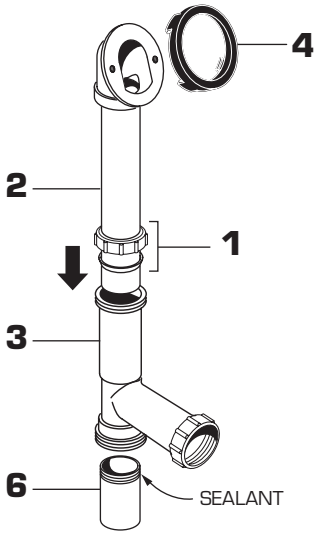


FIG.1

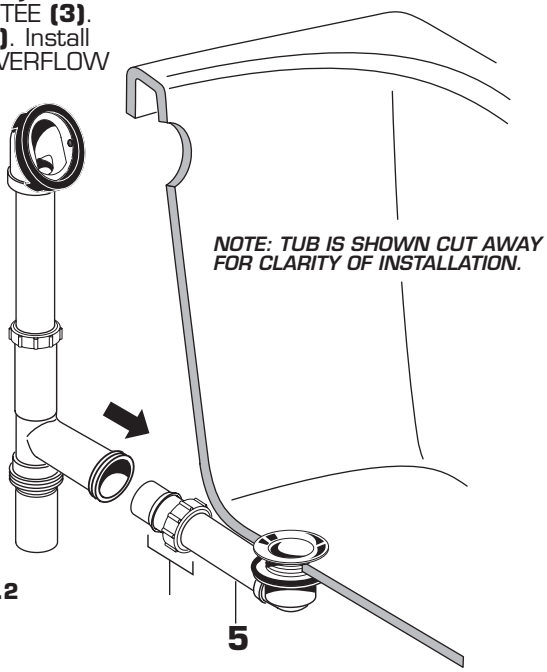

FIG.2

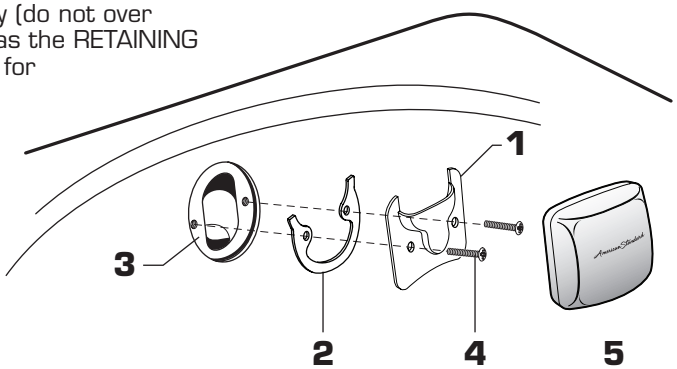
3 SECURE OVERFLOW ASSEMBLY TO TUB (STANDARD DRAIN)

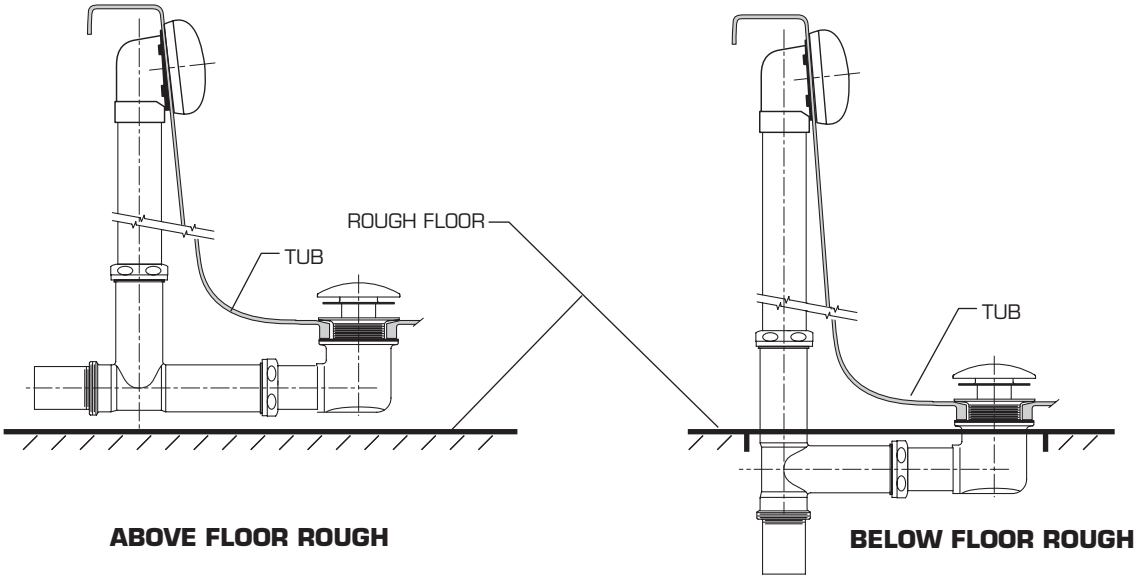
- Align the holes in the RETAINING PLATE **(1)** with those in the GASKET **(2)** and OVERFLOW FLANGE **(3)**. Install SCREWS **(4),** tighten snugly (do not over tighten). The overflow gasket (behind tub wall) will begin to seal as the RETAINING PLATE **(1)** becomes tighter. The overflow gasket can be rotated for desired fit.
- Align the ESCUTCHEON **(5)** with the RETAINING PLATE **(1)** and push onto RETAINING PLATE **(1)** until the ESCUTCHEON **(5)** snaps into place.
- When you are satisfied with the overall fit of the drain, go back and tighten all joints to make a water tight seal.



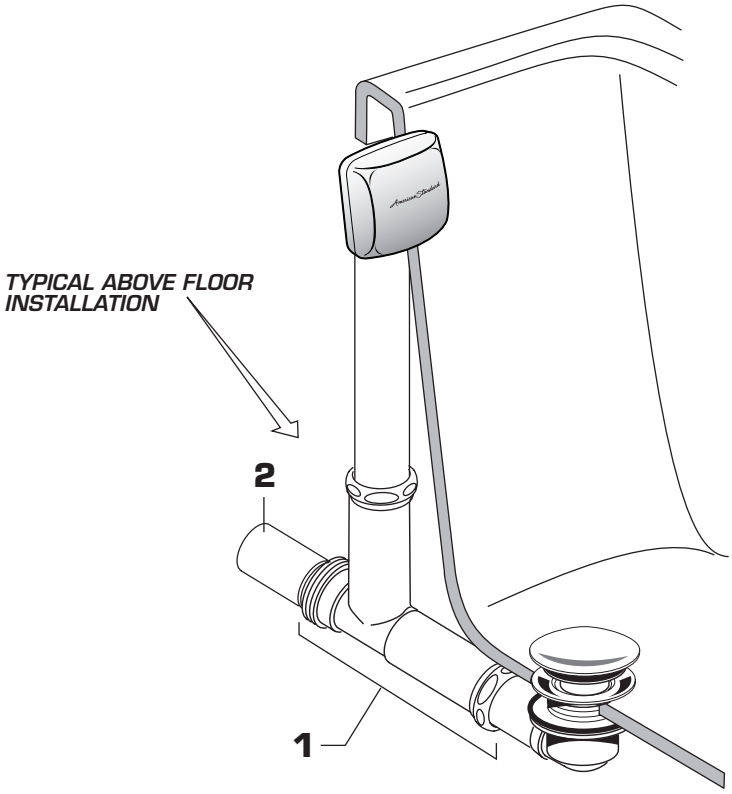
4 ABOVE FLOOR OUTLET INSTALLATION (STANDARD DRAIN)

Note: Waste outlet can be installed either above the floor or below floor. Fig.1.

- For above floor drain outlet, Rotate DRAIN TEE ASSEMBLY **(1)** 90 degrees so TAILPIECE **(2)** faces out the back from tub as shown.



ABOVE FLOOR ROUGH **BELOW FLOOR ROUGH**



NOTE: TUB IS SHOWN CUT AWAY FOR CLARITY OF INSTALLATION.

CARE INSTRUCTIONS:

DO: SIMPLY RINSE THE PRODUCT CLEAN WITH CLEAR WATER.DRY WITH A SOFT COTTON FLANNEL CLOTH.

DO NOT: DO NOT CLEAN THE PRODUCT WITH SOAPS, ACID, POLISH, ABRASIVES, HARSH CLEANERS, OR A CLOTH WITH A COARSE SURFACE.

KOHLER. Faucets

Awaken® G110
Multifunction Showerhead
K-72419-G

Features
- Showerhead features contemporary design.
- Advanced spray engine provides three alternate experiences: wide coverage, intense drenching, and targeted spray.
- Wide-coverage spray produces an encompassing spray for everyday use.
- Intense drenching spray delivers a forceful spray ideal for rinsing soap from hair.
- Targeted spray is a focused stream for targeting sore muscles or use as a utility spray.
- Simple thumb tab allows for a smooth transition between sprays.
- Spray nozzles cover full area of sprayhead.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- 1.75 gpm (gallons per minute) showerhead flow rate.
- 1/2" NPT connection.

Material
- KOHLER finishes resist corrosion and tarnishing.

Installation
- Wall-mount.

Water Conservation & Rebates
- This product can help a building earn Water Efficiency points in LEED® Green Building Rating System.

- WaterSense 1.5 gpm & 2.0 gpm

C US

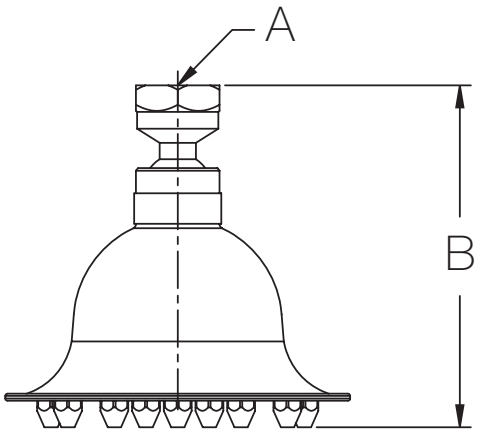
Certified by CSA Group

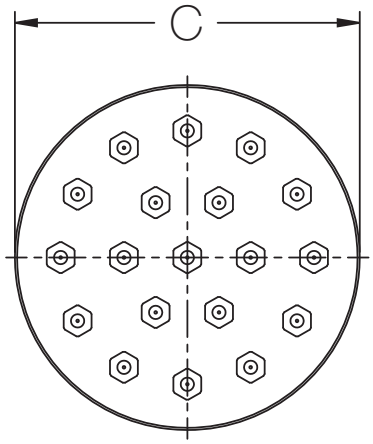
Warranty

Limited Lifetime - to the original end purchaser in consumer installations.
5 Years - for commercial installations.
Refer to www.symmons.com/warranty for complete warranty information.

Dimensions

Measurements	
A	1/2-14 NPT
B	3-7/8", 98 mm
C	Ø 3-7/8", 98 mm

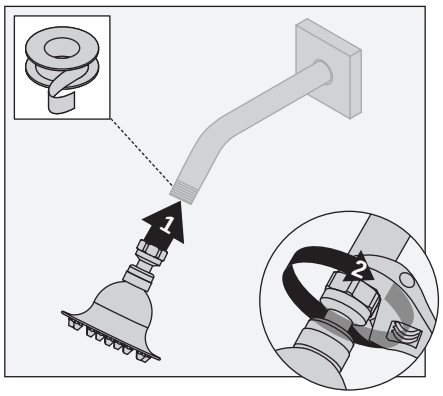




Note: Dimensions subject to change without notice.

Installation

1) Install showerhead to shower arm (not included) turning clockwise to tighten.



Tools Required	
Plumber Tape	

Care and Cleaning

1) Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.

Troubleshooting Chart

Problem	Cause	Solution
Finish is spotting.	Elements in water supply may cause water staining on finish.	Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.
Showerhead is leaking from shower arm when valve is in “on” position.	Coupling connecting showerhead to shower arm is cracked or washer inside coupling is worn.	Inspect coupling and washer and replace showerhead if necessary.

⚠ **WARNING:** This product can expose you to chemicals including lead, which is known to the state of California to cause cancer, birth defects, or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

Cast Marble Solutions for Tubs and Showers

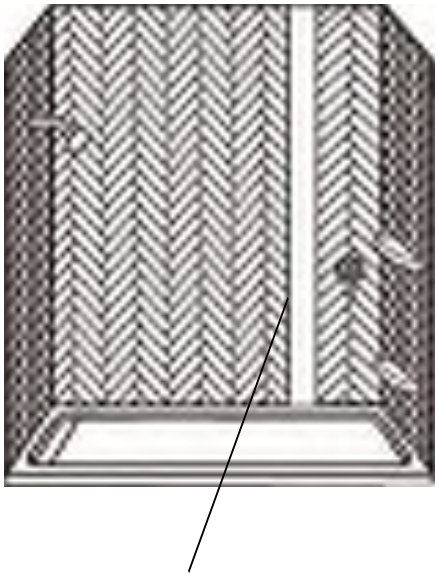
3x12 Herringbone Tile Pattern Panel System

WS-ST-SU-HB3x12

For Standard Showers (TownePlace Suites Shown)

Technical Specifications



Seam Here

Specifications:

Description: Multi-Piece Sealed Surface Panel System
Standard: ProCast
Color: SW7005 (IMI: WW1127)
Finish: Gloss

Dimensions:

2-Side Panels: 36"x96" each
2-Back Panels: 44"x28"x96" (totaling 72"x96")
Height: Up to 96"
Thickness: 5/16"
(6" Listello): 3/8"
To Fit: 72" x 34" TPS Shower

Specified Shower Base:

SB-72x34-4 TD-xH-LC:
72" x 34" Trench Drain Shower Base.
Available with left or right drain location with Satin Nickel Trench Drain Cover.

Specified Accessories:

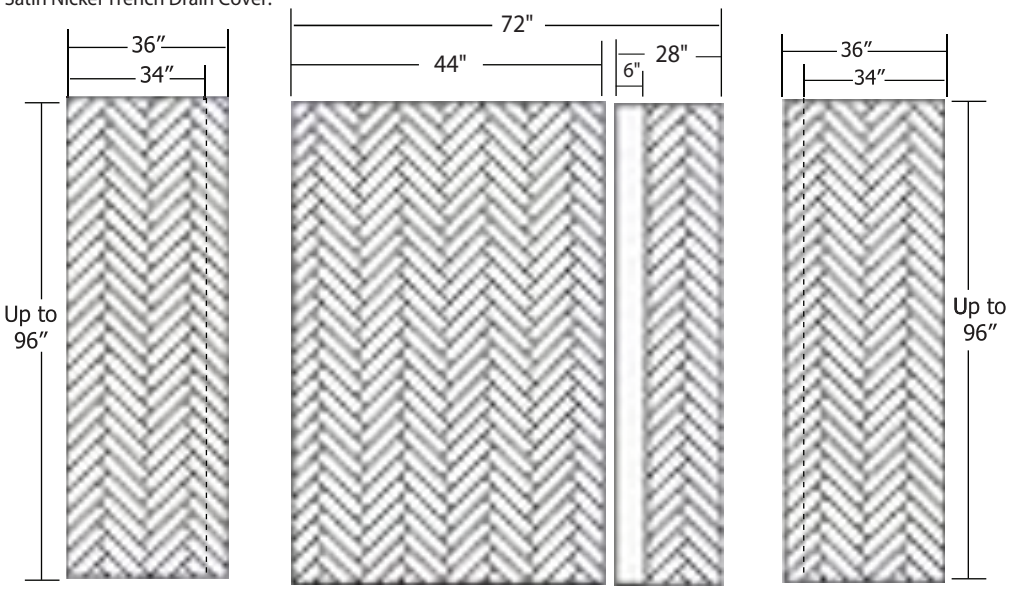
AL-C15:
Curved Wall Mount Accessory Ledge

FR-NS15:
Footrest Non-Slip 15"

Hardware Included:

AL-C15:
2 - 3" Truss Head Screws
Use with standoffs and blocking
2 - Standoffs
Use if blocking and if no blocking
2 - WingIts
For use with standoffs when blocking is unavailable

FR-NS15:
3 - 3" Truss Head Screws
Use with standoffs and blocking
3 - Standoffs
Use if blocking and if no blocking
3 - WingIts
For use with standoffs when blocking is unavailable



NOTES:

1. Panels MUST extend to the ceiling for tubs and showers. Drawing shows maximum panel dimensions. Cutting must be done on site to fit project requirements.
2. Panels received may be oversized. Trimming to fit site dimensions is necessary. Always trim end panels on the inside, where they meet the back wall.
   Note: Trimming back and side panels on the inside will cause grout lines to not match up in the corners. Exaggerate off-set grout lines in the corner for design intent.
3. Back panel is 2 pieces; one 44" panel and one 28" panel with a wavy tiled vertical listello, DO NOT trim straight factory finished edges where the panels will be seamed together, as there is no seam cover.
4. WingIts with standoffs to be used only when blocking unavailable, otherwise, use truss head screws and standoffs with blocking for SS-05 installation to ensure adequate stability. Blocking for accessory ledge and footrest required
5. Extremely sanitary, impervious to mold, mildew and bacteria. Panels have appearance of grout without sanitary and moisture issues associated with grout.
6. 10-year limited warranty against manufacturing defects.
7. ProCast - Class A fire rated per ATSM e84 : Fire rated material.
8. Made in the U.S.A.
9. Shower Head and Water Controls must be centered in panels.

Typical CSI Codes: 06 61 13

TUB AND SHOWER FAUCET TRIM

- Ara® Bath Collection
- Valve Only (T14067)
- Shower Only (T14267)
- Tub/Shower (T14467)

FEATURES:

- Monitor® 14 Series pressure balanced single handle bath mixing valve trim
- Single function H_2Okinetic® Technology shower head

STANDARD SPECIFICATIONS:

- Maintains a balanced pressure of hot and cold water even when a valve is turned on or off elsewhere in the system
- For use with MultiChoice® Universal rough valve body (R10000 Series)
- Temperature only controlled with handle
- Field adjustable means to limit handle rotation into hot water zone
- 120° maximum handle rotation
- All parts replaceable from the front of the valve
- 1.75 gpm @ 80 psi for standard models
- 1.5 gpm @ 80 psi for models with -H_2O designation
- Tub port maximum flow rate 6.0 gpm @ 60 psi with R10000-UNBX
- Shower arm overall horizontal length = 7" (178 mm), including threaded ends
- Red/blue pad print temperature indicators on escutcheon
- Stem extension kit RP77991 can be ordered to allow for an additional 1 3/4" wall thickness. RP77991 ships with chrome escutcheon screws. For special finishes also order RP12630 escutcheon screws in desired finish.

WARRANTY

- Parts and Finish - Lifetime limited warranty; or for commercial purchasers, 10 years for multi-family residential (apartments and condominiums) and 5 years for all other commercial uses, in each case from the date of purchase.
- Electronic Parts and Batteries (if applicable) - 5 years from the date of purchase; or for commercial purchasers, 1 year from the date of purchase. No warranty is provided on batteries.

COMPLIES WITH:

- ASME A112.18.1 / CSA B125.1
  Indicates compliance to ICC/ANSI A117.1 - Valve control only
- EPA WaterSense®

RIZON™ POSI-TEMP® Single-Handle Tub/Shower Trim Kit

Model: T2811 series - valve trim only
T2812 series - shower trim only
T2813 series - tub/shower trim only

Valves: 62300, 2500 series

EP Suffix Models Only

FAUCET DESCRIPTION
- Metal construction with various finishes identified by suffix
- Includes showerhead, arm, flange and diverter spout
- Includes Red/Blue indicators

OPERATION
- Lever style handle with temperature indicator on the escutcheon
- Handle operates counterclockwise through a 270˚ arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3.6° F (±2˚ C)

FLOW
- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi

CARTRIDGE
- 1222 cartridge design
- Nonmetallic/nonferrous and stainless steel materials
- Accommodates back to back installations

STANDARDS
- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are IAPMO Green listed and third party certified to WaterSense®
- **ADA** for lever handle

WARRANTY
- Lifetime limited warranty against leaks, drips and finish defects to the original consumer purchaser
- 5 year warranty if used in commercial installations

KOHLER. Faucets

Awaken® G110
Multifunction Showerhead
K-72419-G

Features
- Showerhead features contemporary design.
- Advanced spray engine provides three alternate experiences: wide coverage, intense drenching, and targeted spray.
- Wide-coverage spray produces an encompassing spray for everyday use.
- Intense drenching spray delivers a forceful spray ideal for rinsing soap from hair.
- Targeted spray is a focused stream for targeting sore muscles or use as a utility spray.
- Simple thumb tab allows for a smooth transition between sprays.
- Spray nozzles cover full area of sprayhead.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- 1.75 gpm (gallons per minute) showerhead flow rate.
- 1/2" NPT connection.

Material
- KOHLER finishes resist corrosion and tarnishing.

Installation
- Wall-mount.

Water Conservation & Rebates
- This product can help a building earn Water Efficiency points in LEED® Green Building Rating System.

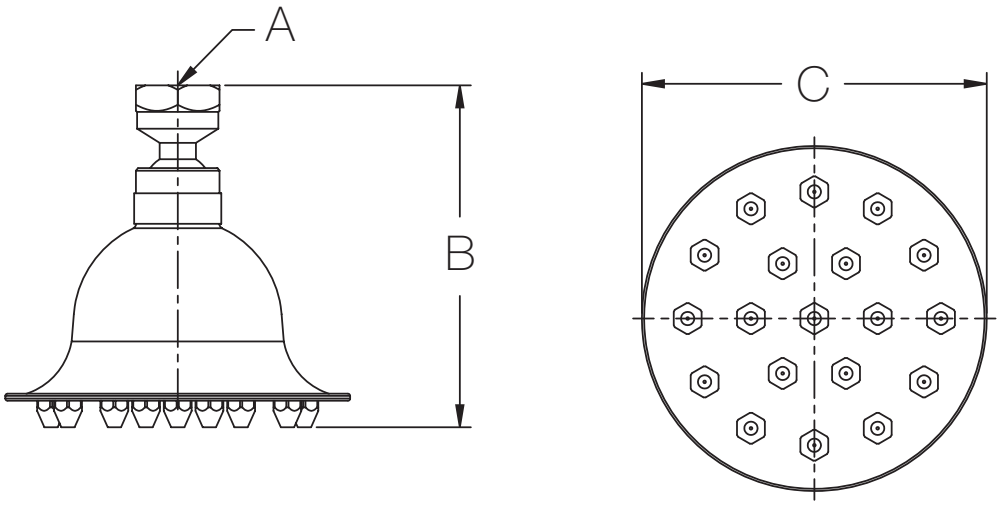
Warranty

Limited Lifetime - to the original end purchaser in consumer installations.
5 Years - for commercial installations.
Refer to www.symmons.com/warranty for complete warranty information.

Dimensions

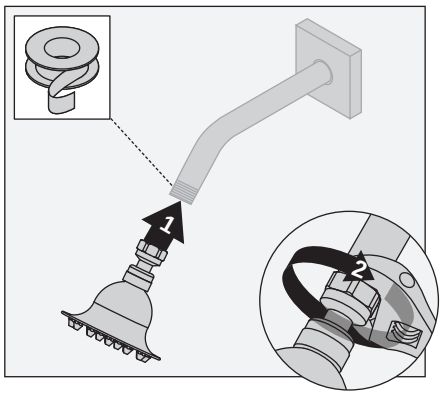
Measurements	
A	1/2-14 NPT
B	3-7/8", 98 mm
C	Ø 3-7/8", 98 mm



Note: Dimensions subject to change without notice.

Installation

1) Install showerhead to shower arm (not included) turning clockwise to tighten.



Tools Required	
Plumber Tape	

Care and Cleaning

1) Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.

Troubleshooting Chart

Problem	Cause	Solution
Finish is spotting.	Elements in water supply may cause water staining on finish.	Clean finished trim area with a soft cloth using mild soap and water or a non-abrasive cleaner and then quickly rinse with water.
Showerhead is leaking from shower arm when valve is in “on” position.	Coupling connecting showerhead to shower arm is cracked or washer inside coupling is worn.	Inspect coupling and washer and replace showerhead if necessary.

⚠ **WARNING:** This product can expose you to chemicals including lead, which is known to the state of California to cause cancer, birth defects, or other reproductive harm. For more information, go to www.P65Warnings.ca.gov.

Awaken® G110

Multifunction Handshower

K-72415-G

Features

- Handshower features contemporary design.
- Three spray functions and ADA non-positive shut off.
- Wide-coverage spray produces an encompassing spray for everyday use.
- Intense drenching spray delivers a forceful spray ideal for rinsing soap from hair.
- Targeted spray is a focused stream for targeting sore muscles or use as a utility spray.
- Thumb tab allows for a smooth transition between sprays.
- Spray nozzles cover full area of sprayhead.
- Combination of balance, weight, grip, and angle makes this handshower comfortable and easy to use.
- MasterClean™ sprayface features an easy-to-clean surface that withstands mineral buildup.
- 1.75 gpm (6.6 lpm) flow rate.

Material

- KOHLER finishes resist corrosion and tarnishing.

Installation

- Bracket or slidebar required for wall-mount installation.
- Deck-mount holder required for deck-mount installation.

Water Conservation & Rebates

- This product can help a building earn Water Efficiency points in LEED® Green Building Rating System.

Pitch™
transfer valve trim
K-T97091-4

Features
- Single handle controls flow to outlets.
- Includes faceplate with ADA-compliant metal lever handle.
- When used with K-728 series MasterShower® transfer valves, handle controls flow to two or three outlets individually or any two outlets at a time.
- When used with K-737 series MasterShower® diverter valves, handle controls flow to two or three outlets individually (only one outlet at a time).
- 360 degree handle rotation with three-outlet operation.
- 120 degree handle rotation with two-outlet operation.
- Coordinates with Hint™ bathroom sink faucets and bath faucets.

Material
- Premium material construction with metal handle ensures reliability and durability.
- KOHLER finishes resist corrosion and tarnishing.

Installation
- Trim only; requires K-728-K MasterShower® 2- or 3-way transfer valve or K-737-K MasterShower® 2- or 3-way diverter valve (sold separately).
- Patented K-joint installation technology ensures consistent trim appearance, regardless of variability in valve rough-in.

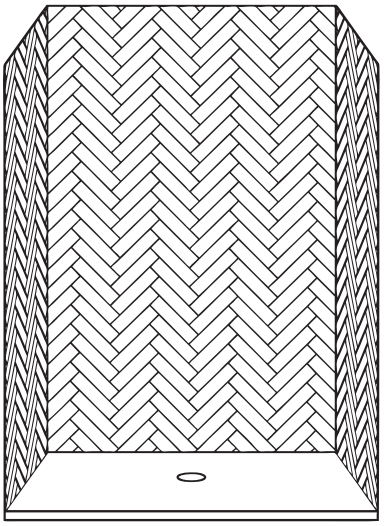
Cast Marble Solutions for Tubs and Showers

3x12 Herringbone Tile Pattern Panel System

WS-ST-SU-HB3x12

For Roll-In Shower (TownePlace Suites Shown)

Technical Specifications



Specifications:

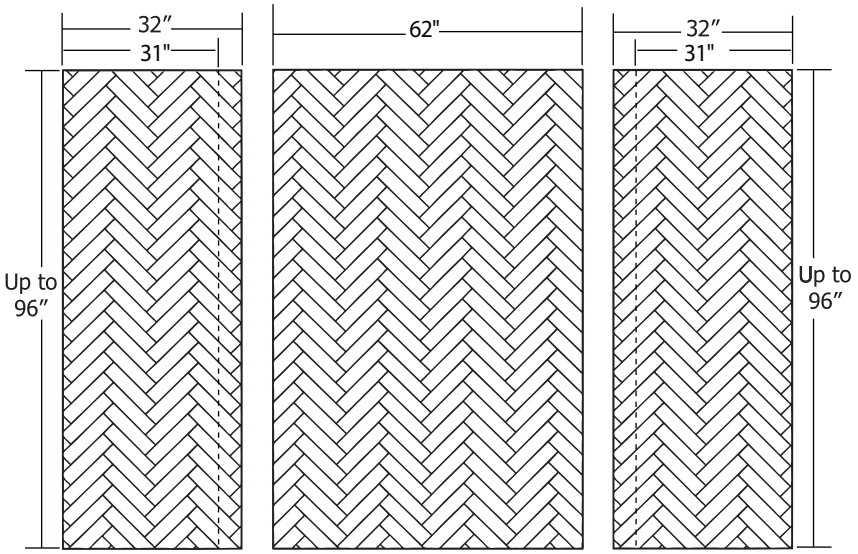
Description: Multi-Piece Sealed Surface Panel System
Standard: ProCast
Color: SW7005 (IMI: WW1127)
Finish: Gloss

Dimensions:

2- Side Panels: 32″x96"
1-Back Panel: 62"x96"
Height: Up to 96″
Thickness: 5/16″
To Fit: 62″ x 31″ Roll-In TPS Shower

Specified Roll-In Shower:

SB-RI-ADA-LC:
ADA Compliant Roll-In Shower Base
Available with center drain location



NOTES:

1. Panels MUST extend to the ceiling for tubs and showers. Drawing shows maximum panel dimensions. Cutting must be done on site to fit project requirements.
2. Panels received may be oversized. Trimming to fit site dimensions is necessary. Always trim end panels on the inside, where they meet the back wall.
   Note: Trimming back and side panels on the inside will cause grout lines to not match up in the corners. Exaggerate off-set grout lines in the corner for design intent.
3. WingIts with standoffs to be used only when blocking unavailable, otherwise, use truss head screws and standoffs with blocking for SS-05 installation to ensure adequate stability. Blocking for accessory ledge and footrest required
4. Extremely sanitary, impervious to mold, mildew and bacteria. Panels have appearance of grout without sanitary and moisture issues associated with grout.
5. 10-year limited warranty against manufacturing defects.
6. ProCast - Class A fire rated per ATSM e84 : Fire rated material.
7. Made in the U.S.A.
8. Shower Head and Water Controls must be centered in panels.

RIZON™ POSI-TEMP® Single-Handle Tub/Shower Trim Kit

Model: T2811 series - valve trim only
T2812 series - shower trim only
T2813 series - tub/shower trim only

Valves: 62300, 2500 series

EP Suffix Models Only

FAUCET DESCRIPTION
- Metal construction with various finishes identified by suffix
- Includes showerhead, arm, flange and diverter spout
- Includes Red/Blue indicators

OPERATION
- Lever style handle with temperature indicator on the escutcheon
- Handle operates counterclockwise through a 270˚ arc with off at 6 o'clock and maximum hot at the 9 o'clock position. Shut off in clockwise direction
- Adjustable temperature limit stop to control maximum hot water temperature
- Pressure balancing mechanism maintains selected discharge temperature to ± 3.6° F (±2˚ C)

FLOW
- Showerhead is limited to 2.5 gpm (9.5 L/min) at 80 psi
- EP suffix models are limited to 1.75 gpm (6.6 L/min) at 80 psi

CARTRIDGE
- 1222 cartridge design
- Nonmetallic/nonferrous and stainless steel materials
- Accommodates back to back installations

STANDARDS
- Third party certified to meet ASME A112.18.1/CSA B125.1 and all applicable requirements referenced therein
- EP suffix models are IAPMO Green listed and third party certified to WaterSense®
- **ADA** for lever handle

WARRANTY
- Lifetime limited warranty against leaks, drips and finish defects to the original consumer purchaser
- 5 year warranty if used in commercial installations

SPECIFICATIONS

Gourmet® Undermount Single Bowl Sink
Models ELU1316 and ELUH1316

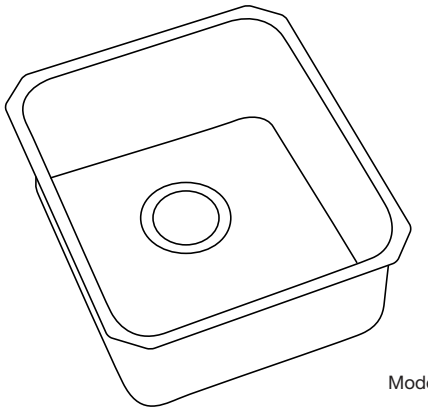
GENERAL
Highest quality sink formed of #18 (1.2mm) gauge, type 304 (18-8) nickel bearing stainless steel. Undermount.

DESIGN FEATURES
Bowl Depth: 7-7/8" (200mm).
Coved Corners: 1-3/4" (44mm) vertical and horizontal radius.
Finish: Exposed surfaces are hand blended to a lustrous satin finish.
Underside: Fully protected by heavy duty Sound Guard® undercoating to prevent condensation and dampen sound.

OTHER
Drain Opening: 3-1/2" (89mm).
Note: All Elkay undermount sinks are designed to affix to the underside of any solid surface countertop.
These sinks comply with ASME A112.19.3 and CSA B45.4-02.

These sinks are listed by the International Association of Plumbing and Mechanical Officials as meeting the requirements of the Uniform Plumbing Code.

OPTIONAL ACCESSORIES
Bottom Grid: LKWOBG1316SS.
Cutting Boards: CB1613, CB1713, CBR1316, CBS1316 (ELUH model only).
Drain: LK99
Rinsing Basket: LKWRB1316SS.
Utensil Caddy for Rinsing Basket: LKWERBSS.

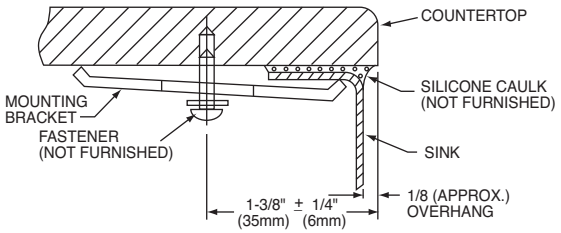


Model ELU1316

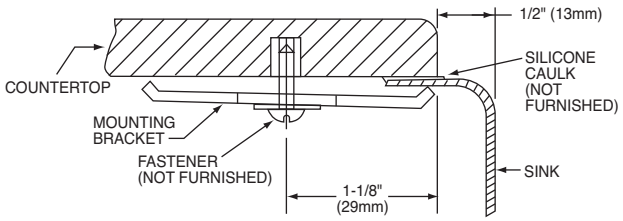
Installation Profile of ELU and ELUH Single Bowl Models

The template provided with each ELU/ELUH sink provides the only type of installation recommended by Elkay.

1/8" (3mm) Overhang (ELU Sink)



1/2" (13mm) Reveal (ELUH Sink)



SEE OTHER SIDE FOR PRODUCT DIMENSIONS.

In keeping with our policy of continuing product improvement, Elkay reserves the right to change product specifications without notice. Please visit elkayusa.com for most current version of Elkay product specification sheets.

This specification describes an Elkay product with design, quality and functional benefits to the user. When making a comparison of other producers' offerings, be certain these features are not overlooked.

ELKAY®
SPECIFICATIONS

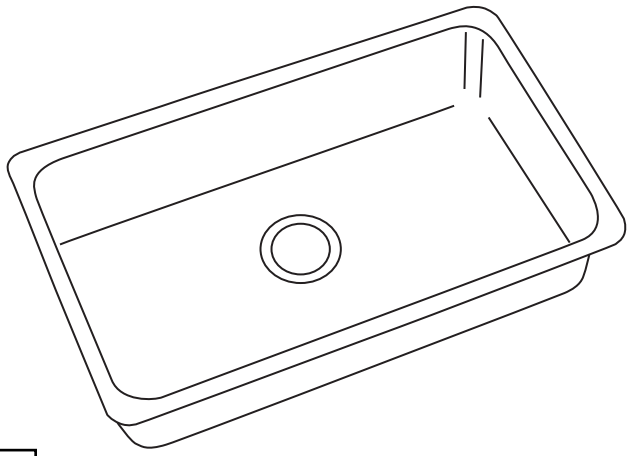
Lustertone® Undermount Single Bowl Sink
Model ELUHAD Series – A.D.A. Compliant



GENERAL
Highest quality sink formed of #18 (1.2mm) gauge, type 304 (18-8) nickel bearing stainless steel.

DESIGN FEATURES
ELUHAD Bowl Depth: 4-1/2" (114mm), 5" (127mm) or 5-1/2" (140mm).

Finish: Exposed surfaces are hand blended to a lustrous high-lighted satin finish with a highlighted inside top bowl radius.

Underside: Underside of sink is fully protected by heavy duty Sound Guard™ undercoating to prevent condensation and deaden sound.

OTHER
Drain Opening: 3-1/2" (89mm) center rear location.

NOTE: All Elkay undermount sinks are designed to attach to the underside of any solid surface countertop.

KOHLER®

Wellworth®

two-piece elongated 1.28 gpf toilet

K-3998

Features

- Two-piece toilet.
- Elongated bowl offers added room and comfort.
- 1.28 (4.8 lpf)
- 2-1/8" (54 mm) fully-glazed trapway.
- Standard left-hand trip lever included.
- Combination consists of the K-4467 tank and the K-4198 bowl.
- Coordinates with other products in the Wellworth collection.

Technology

- Single-flush gravity uses the force of gravity and a precision-engineered tank, bowl, and trapway to create a strong siphon during flushing.
- KOHLERs canister flush valve harnesses the natural force of gravity and optimizes flushing performance.
- Class Five® flushing technology offers virtually plug-free performance and rinsing power for a clean bowl.

Installation

- Standard 12" (305 mm) rough-in.
- Three-bolt installation.
- Seat and supply line not included.

Water Conservation & Rebates

- Eligible for consumer rebates in some municipalities.

Recommended Products/Accessories

K-4636 Cachet® Quiet-Close™ Elongated Toilet Seat

KOHLER®

Cimarron® Comfort Height®

two-piece elongated 1.28 gpf toilet

K-3609

Features

- Two-piece toilet.
- Elongated bowl offers added room and comfort.
- Comfort Height® feature offers chair-height seating that makes sitting down and standing up easier for most adults.
- 1.28 (4.8 lpf)
- Includes Polished Chrome left-hand trip lever.
- Combination consists of the K-4309 bowl and the K-4421 tank.
- Coordinates with other products in the Cimarron collection.

Technology

- Single-flush gravity uses the force of gravity and a precision-engineered tank, bowl, and trapway to create a strong siphon during flushing.
- AquaPiston® canister allows water to flow into the bowl from all sides (360 degrees), increasing the power and effectiveness of the flush.
- Durable canister design has 90% less exposed seal material than a 3" flapper for leak-free performance.
- Light-touch canister flush requires a lower actuation force than a flapper.
- AquaPiston® canister flush valve optimizes flush performance and resists warping and deterioration.

Installation

- Standard 12" (305 mm) rough-in.
- DryLock® System saves installation time and helps prevent water leakage.
- Seat and supply line not included.

Water Conservation & Rebates

- Eligible for consumer rebates in some municipalities.

KOHLER®

Cimarron® Comfort Height®

two-piece elongated 1.28 gpf toilet

K-3609

Features

- Two-piece toilet.
- Elongated bowl offers added room and comfort.
- Comfort Height® feature offers chair-height seating that makes sitting down and standing up easier for most adults.
- 1.28 (4.8 lpf)
- Includes Polished Chrome left-hand trip lever.
- Combination consists of the K-4309 bowl and the K-4421 tank.
- Coordinates with other products in the Cimarron collection.

Technology

- Single-flush gravity uses the force of gravity and a precision-engineered tank, bowl, and trapway to create a strong siphon during flushing.
- AquaPiston® canister allows water to flow into the bowl from all sides (360 degrees), increasing the power and effectiveness of the flush.
- Durable canister design has 90% less exposed seal material than a 3" flapper for leak-free performance.
- Light-touch canister flush requires a lower actuation force than a flapper.
- AquaPiston® canister flush valve optimizes flush performance and resists warping and deterioration.

Installation

- Standard 12" (305 mm) rough-in.
- DryLock® System saves installation time and helps prevent water leakage.
- Seat and supply line not included.

Water Conservation & Rebates

- Eligible for consumer rebates in some municipalities.

KOROGARD G815, G815S, G825, & G875
EXTRUDED CORNER GUARD

korogard®
wall protection systems

Korogard Extruded Corner Guards are an economical yet durable option for corner protection. Easily installed, these guards are .078" (1.98mm) thick vinyl with 3/4" (19.1mm), 1-1/2" (38.1mm), or 2-1/2" (63.5mm) wings. The wings are tapered back, providing a finished look to any installation. The G815 is available as G81E, a Korogard ETS product manufactured with a unique blend of high-performance materials.

Korogard Extruded Corner Guards are backed by a limited five-year warranty. All Corner Guards are Class A fire rated and meet national building code standards. All Korogard protective products color-coordinate with a multitude of Koroseal Wallcoverings for a systems approach to wall protection.

For more information on Korogard Corner Guards or the Koroseal Wall Protection System, please call your local Korogard distributor.

SECTION 10 26 00 CORNER GUARDS

PART 1 GENERAL

1.01 SECTION INCLUDES
2-1/2" (63.5mm) x 2-1/2" (63.5mm), 1-1/2" (38.1mm) x 1-1/2" (38.1mm), and 3/4" (19.1mm) x 3/4" (19.1mm) Surface Adhered Extruded Corner Guards.

1.02 SUBMITTALS
A. Submit in accordance with Section 01 33 00—Submittals.
B. Product Data: Submit manufacturer's product data.
C. Samples: Submit for approval 12" (304.8mm) long sample of each color specified.
D. Test Reports: Submit manufacturer's test reports and certification indicating compliance with applicable building code requirements.

1.03 QUALITY ASSURANCE
Comply with NFPA 101® for interior finish materials. Smoke developed less than 450 and flame spread of 25 or less in accordance with ASTM E 84.

1.04 DELIVERY, STORAGE, AND HANDLING
A. Delivery: Deliver materials to site in manufacturer's original, unopened containers and packaging with labels clearly identifying product name and manufacturer.
B. Storage: Store materials in a clean, dry location protected against damage of any kind.

PART 2 PRODUCTS

2.01 MANUFACTURER
Koroseal Wall Protection Systems,
A Division of koroseal Interior Products, LLC.

2.02 CORNER GUARDS
Koroseal "Korogard" Series G825, G815, G875, and G915: Extruded Corner Guard adhered to substrate corner with glue or tape. Exposed surfaces shall be free of wrinkling, chipping, discoloration, or other imperfections.
1. Dimensions
   a. Leg length: 2-1/2" (63.5mm)—G825; 1-1/2" (38.1mm)—G815 and G915; 3/4" (19.1mm)—G875
   b. Angle: 90°.
2. Profile: High-impact vinyl acrylic extrusion, nominal .078" (1.98mm) thick. Class A fire rating, when tested in accordance with ASTM E 84.
3. Extrusion: Pebble grain finish. Contains EPA registered Micro-Chek antimicrobial agent.
4. Adhesion: Manufacturer recommended contact cement—G825, G815, and G875; Manufacturer applied adhesive-backed tape—G915.

PART 3 EXECUTION

3.01 EXAMINATION
Verify by examination that wall surfaces are acceptable to receive the specified guard systems. Notify the Architect in writing if wall surfaces are not acceptable. Do not begin installation until unacceptable conditions have been corrected.

3.02 INSTALLATION
A. Install Corner Guards to wall securely in accordance with manufacturer's written instructions.
B. Install Corner Guards accurately in location, alignment, and elevation.

SPECTRALOCK® PRO Grout†

DS-685.0-0217

Globally Proven Construction Solutions

1. PRODUCT NAME

SPECTRALOCK® PRO Grout†

2. MANUFACTURER

LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 235
Toll Free: 1.800.243.4788, ext. 235
Fax: +1.203.393.1684
Internet: **www.laticrete.com**

3. PRODUCT DESCRIPTION

SPECTRALOCK PRO Grout† is a patented, high performance epoxy grout that offers color uniformity, durability and stain resistance with extraordinary ease of use.

Uses

- Ceramic tile, glass tile and stone applications, residential and commercial
- Interior and exterior
- Floors and walls
- Ideal for re-grouting applications
- Swimming pools, fountains and other wet area applications

Advantages

- Meets performance requirements of ANSI A118.3
- 80 minutes working time at 70°F (21°C)
- Equipped with anti-microbial technology
- Ideal for installations at wide temperature ranges
- Uniform color—no blotchiness or shading
- Easy to maintain, cleanable to the original color
- Stain resistant
- Tough, durable, and crack resistant
- Outperforms cement based grout
- Non-sag formula for walls and floors
- High fashion with Dazzle component
- Can be used for grout joints from 1/16-1/2”

Packaging

Unit Size	Yield	Parts A & B	Part C Color Powder
Mini	0.2 US gal (0.7 L)	A: 0.32 lb (0.14 kg) B: 0.32 lb (0.14 kg)	C: 2.25 lb (1.0 kg)
Full	0.8 US gal (3.0 L)	A: 1.28 lb (0.6 kg) B: 1.28 lb (0.6 kg)	C: 9.0 lb (4.0 kg)
Commercial	3.2 US gal (12.0 L)	A: 4 x 1.28 lb (0.6 kg) B: 4 x 1.28 lb (0.6 kg	C: 4 x 9.0 lb (4.0 kg)

Approximate Coverage

Refer to Coverage Chart located on DS 254.3 APD.
Actual coverage will vary depending on job site conditions, actual tile size and installed grout joint size. Add 10% for waste, spillage and clean-up, and another 10%–15% when grouting unglazed quarry tile. Expanded coverage tables at **www.laticrete.com/coverage.**

Shelf Life

Factory sealed containers of this product are guaranteed to be of first quality for the time listed below if stored at temperatures greater than 32°F (0°C) and less than 95°F (35°C).
Part A & B Liquids – two (2) years
Part C Powder – no limit*

* High humidity will reduce the shelf life of bagged product.

Limitations

- Not for use in areas subjected to harsh chemicals, or areas exposed to aggressive cleaning regimens (e.g. steam cleaning). Not for use on floor and base areas in veterinary clinics, kennels, or in applications exposed to high concentrations of food and mineral acids or areas exposed to high temperatures. For these areas LATICRETE recommends using grout that meets ANSI A118.5 such as SPECTRALOCK 2000 IG†.
- Epoxy grout for ceramic tile and stone is not a replacement for a waterproofing membrane. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane (see Section 10 FILING SYSTEMS).
- SPECTRALOCK PRO Grout† should not be used on floors and base in the food preparation or cleaning area of commercial and industrial kitchen applications.

Cautions

- DO NOT add water or any other material to the mixture, or re-temper with water. This will have an adverse effect on the product and void all warranties.
- Protect finished work from traffic until fully cured.
- SPECTRALOCK® PRO Grout† liquid components might irritate eyes and skin. Avoid contact with eyes and/or prolonged contact with skin.
- Wear protective gear (gloves, long sleeve shirt, and safety glasses) when applying. Flush thoroughly with water in case of initial contact.
- DO NOT ingest internally. Silica sand may cause cancer or serious lung problems. Avoid breathing dust. Wear a respirator or dust mask. See MSDS for more information.
- Because propane gas heaters will cause epoxy grouts to yellow, refrain from using such heaters or properly vent all exhaust.
- Keep out of reach of children.
- Protect from freezing.
- Light colors may darken and dark colors may fade slightly from direct UV exposure in exterior applications. Consult with LATICRETE Technical Services for specific exterior recommendations.
- SPECTRALOCK DAZZLE™ (Glow) not for use in submerged installations.
- Maximum stain resistance is achieved in seven days at 70°F (21°C). Protect from exposure to acids (such as mustard, salad dressing, etc.) and strong cleaners during this period. Protect grout from dirt, construction debris, and contamination for 7 days @ 70°F (21°C).
- SPECTRALOCK PRO Grout† is a sanded grout. Use of sanded grouts in joints <1/8" (3 mm) will result in a coarser surface compared to surfaces in wider joints.
- SPECTRALOCK DAZZLE (Glow) might discolor from strong alkali cleaners and acids. Use a neutral pH solution of soap and water when cleaning SPECTRALOCK PRO Grout† mixed with SPECTRALOCK DAZZLE (Glow).
- Some soft polished marble or delicate glazed or glass tile might be scratched by SECTRALOCK PRO Grout† during installation. Apply a small test area to determine results before grouting entire installation.
- In steam rooms or submerged applications, allow SPECTRALOCK PRO Grout† to cure for 10 days at 70°F (21°C) days before use of area and filing with water. See TDS 192 for more information on these applications.
- SPECTRALOCK PRO Grout† is resistant to staining when exposed to most household products and cleaners (e.g. ketchup). However, long term exposure to any material without proper cleaning and maintenance will increase the probability of stains.
- Epoxy Resins may affect the color of white or porous stones (such as White Carrara, Thassos White, Royal Danby etc.)
- Test stones for compatability with water and cleaning additive mixture.
- Conduct a test area to determine compatibility with metal or steel tile.

4. TECHNICAL DATA

VOC/LEED Product Information

This product has been certified for Low Chemical Emissions (ULCOM/GG UL2818) under the UL GREENGUARD Certification Program for Chemical Emissions for Building Materials, Finishes and Furnishings (UL 2818 Standard) by UL Environment.

Total VOC Content is 0.00026 lb/gal (0.031 g/l).

Applicable Standard

ANSI A118.3 tested with 1244 Bright White

Physical Properties

Test/Test Method	Description	Results
ANSI A118.3 E5.1	Water Cleanability	Water Cleanable at 80 minutes
ANSI A118.3 E5.2	Initial Set Service Strength	> 2 hours < 24 hours
ANSI A118.3 E5.3	Shrinkage	< 0.25%
ANSI A118.3 E5.4	Vertical Joint Sag	Pass
ANSI A118.3 E5.5	Quarry/Quarry Bond Strength	1,000 psi (tile failure) 6.9 MPa
ANSI A118.3 E5.6	Compressive Strength	3,500 psi (7 days) 24 MPa
ANSI A118.3 E5.7	Tensile Strength	1,100 psi (7 days) 7.6 MPa
ANSI A118.3 E5.8	Thermal Shock	510 psi 3.5 MPa

Chemical Resistance** Chart

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

See DS 685.5, How To Install SPECTRALOCK® PRO Grout†, for detailed installation instructions. This document is available online at www.laticrete.com and is included in all Part AB units.

6. AVAILABILITY AND COST

Availability
LATICRETE® and LATAPOXY® materials are available worldwide.

For Distributor Information, Call:
Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010
For on-line Distributor information, visit LATICRETE at **www.laticrete.com.**

Cost
Contact a LATICRETE Distributor in your area.

7. WARRANTY

See 10. FILING SYSTEM
DS 230.13: LATICRETE Product Warranty
A component of:
DS 025.0: LATICRETE 25 Year System Warranty (United States and Canada)
DS 230.99: LATICRETE Lifetime System Warranty

8. MAINTENANCE

LATICRETE recommends using STONETECH® surface products to protect, clean and enhance stone, masonry, tile and grout surfaces. Protect surfaces from common stains by using a STONETECH sealer such as STONETECH BulletProof® Sealer. Routine maintenance should follow with STONETECH Revitalizer® Cleaner and Protector or a neutral pH cleaner such as STONETECH Stone & Tile Cleaners. For tough or difficult to remove soil use STONETECH KlenzAll™ Cleaner, a nylon scrubbing pad or a long handled stiff bristle brush. For additional information, please refer to the Grout Guide, TDS 400 and TDS 113 Cement Grout Care & Maintenance for more information.

9. TECHNICAL SERVICES

Technical Assistance
Information is available by calling the LATICRETE Technical Service Hotline:

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Paint - Ceiling
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Ceiling & Soffit Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B30 Series)
Dimensions	N/A
Color	SW7005 Pure White
Finish	Flat
CSI #	09 90 00 - Painting
Omniclass #	22 - 09 90 00
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates. 0 g/L VOC (US EPA)| GREENGUARD Gold Certified| LEED v4 VOC & Emissions Compliant, Materials Ingredient Declaration available.
Product Type	ProMar 200 ZeroVOC Interior Latex (B30W12651)
Finish	Flat
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to med weight wall covering) are to have a level 4 Gypsum Board Finish.
All walls to receive Gloss, enamel paint, or Murals to have a Level 5 Gypsum Board Finish.

ProMar® 200 Zero V.O.C.
Interior Latex Flat

B30-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Flat is a durable, professional quality, interior vinyl acrylic finish for use on walls and ceilings of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350-400 sq. ft. per gallon @ 4 mils wet; 1.4 mils dry

Drying Time, @ 77°F, 50% RH:

Touch: 1 Hour
Recoat: 4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 1.5-3.5 units @ 85°

Tinting with CCE only:

Base:	oz/gal:	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B30W12651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids:	34 ± 2%
Weight Solids:	52 ± 2%
Weight per Gallon:	11.45 lbs
Flash Point:	N/A
Vehicle Type:	Vinyl Acrylic
Shelf Life:	36 months unopened

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 09/04/2019, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon/polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Interior Latex Flat

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

HOTW 09/04/2019 B30W02653 26 00
FRC,SP

CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative or visit www.paintdocs.com to obtain the most current version of the PDS and/or an SDS.

Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

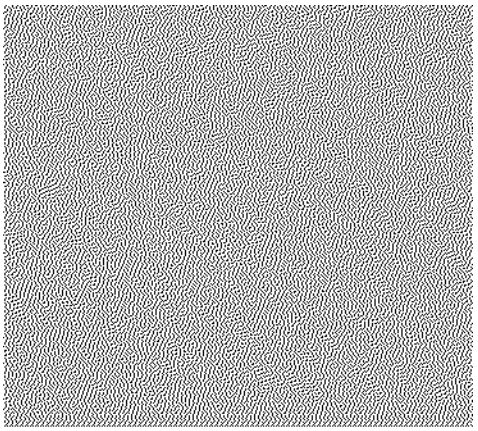
Issue Date: **Aug 30, 2021**
Revision Date:



Item Name	Paint - Ceiling
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Ceiling & Soffit Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B30 Series)
Dimensions	N/A
Color	SW6381 Anjou Pear
Finish	Flat
CSI #	09 90 00 - Painting
Omniclass #	22 - 09 90 00
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates. 0 g/L VOC (US EPA)| GREENGUARD Gold Certified| LEED v4 VOC & Emissions Compliant, Materials Ingredient Declaration available.
Product Type	ProMar 200 ZeroVOC Interior Latex (B30W12651)
Finish	Flat
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to med weight wall covering) are to have a level 4 Gypsum Board Finish.
All walls to receive Gloss, enamel paint, or Murals to have a Level 5 Gypsum Board Finish.

ProMar® 200 Zero V.O.C.
Interior Latex Flat

B30-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Flat is a durable, professional quality, interior vinyl acrylic finish for use on walls and ceilings of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350-400 sq. ft. per gallon @ 4 mils wet; 1.4 mils dry

Drying Time, @ 77°F, 50% RH:

Touch: 1 Hour
Recoat: 4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 1.5-3.5 units @ 85°

Tinting with CCE only:

Base:	oz/gal:	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B30W12651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 34 ± 2%
Weight Solids: 52 ± 2%
Weight per Gallon: 11.45 lbs
Flash Point: N/A
Vehicle Type: Vinyl Acrylic
Shelf Life: 36 months unopened

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 09/04/2019, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon/polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Interior Latex Flat

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

Revision Date:

Item Name	Paint - Wall
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Gypsum Board Wall Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B20 Series)
Color	SW70005 Pure White
Finish	Eg-Shel
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	ProMar 200 ZeroVOC Interior Latex (B20W12651)
Finish	Eg-Shel
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.
Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish. All walls to receive Gloss, Enamel Paint, or Murals
to have a Level 5 Gypsum Board Finish.

ProMar® 200 Zero V.O.C.
Interior Latex Eg-Shel

B20-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Eg-Shel is a durable, professional quality, interior vinyl acrylic finish for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350 - 400 sq. ft. per gallon @ 4 mils wet; 1.7 mils dry

Drying Time, @ 77°F, 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 15-20 units @ 85°
5+ units @60°

Tinting with CCE only:

Base:	oz. per gallon	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B20W12651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 42 ± 2%

Weight Solids: 54 ± 2%

Weight per Gallon: 10.82 lbs

Flash Point: N/A

Vehicle Type: Vinyl Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 54.19 grains/(hr ft2 in Hg)

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 08/10/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Interior Latex Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

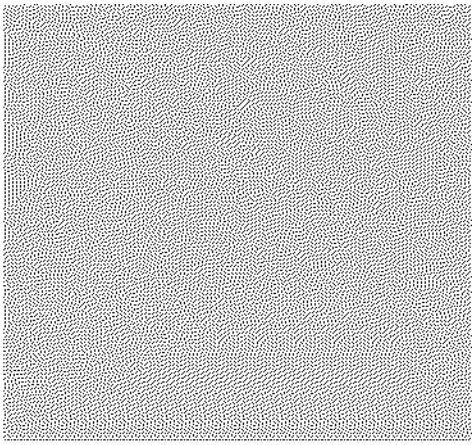
Issue Date: **Aug 30, 2021**
Revision Date:



Item Name	Paint - Wall
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Gypsum Board Wall Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B31 Series)
Dimensions	N/A
Color	SW7015 Repose Gray
Finish	Semi-gloss
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	ProMar 200 ZeroVOC Interior Latex (B31W02651)
Finish	Semi-gloss
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

ProMar® 200 Zero V.O.C.
Interior Latex Semi-Gloss

B31-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Semi-Gloss is a durable, professional quality, interior vinyl acrylic finish for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350 - 400 sq.ft. per gallon @ 4 mils wet; 1.5 mils dry

Drying Time, @ 77°F, 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 25-35 units @ 60°

Tinting with CCE only:

Base:	oz. per gallon	Strength:
High Ref White	0-7	SherColor
Extra White	0-6	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B31W02651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 38 ± 2%

Weight Solids: 50 ± 2%

Weight per Gallon: 10.30 lbs

Flash Point: N/A

Vehicle Type: Vinyl Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 85.75 grains/(hr ft2 in Hg)

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 08/10/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 &v 4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

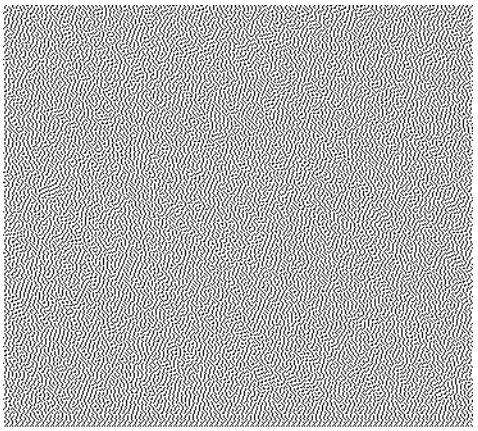
Revision Date:



Item Name	Paint - Wall
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Gypsum Board Wall Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B20 Series)
Color	SW6621 Emotional
Finish	Eg-Shel
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	ProMar 200 ZeroVOC Interior Latex (B20W12651)
Finish	Eg-Shel
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.
Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish. All walls to receive Gloss, Enamel Paint, or Murals
to have a Level 5 Gypsum Board Finish.

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Eg-Shel is a durable, professional quality, interior vinyl acrylic finish for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350 - 400 sq. ft. per gallon @ 4 mils wet; 1.7 mils dry

Drying Time, @ 77°F, 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 15-20 units @ 85°
5+ units @60°

Tinting with CCE only:

Base:	oz. per gallon	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B20W12651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 42 ± 2%

Weight Solids: 54 ± 2%

Weight per Gallon: 10.82 lbs

Flash Point: N/A

Vehicle Type: Vinyl Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 54.19 grains/(hr ft2 in Hg)

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 08/10/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes

ProMar® 200
Zero V.O.C. Interior Latex Primer

B28W02600 White

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Primer is a professional quality, interior vinyl acrylic primer.

This primer has been designed for use with the **ProMar Series Interior Latex topcoats** providing a complete system.

For use on these interior surfaces:

- Wood
- Drywall
- Plaster
- Masonry
- Primed Metal
- Previously painted surfaces

Color: White

For best topcoat color development, use the recommended "P"-shade primer. Check color before use.

Coverage: 400 sq.ft.per gallon @ 4.0 mils wet; 1.0 mils dry

Drying and recoat times are temperature, humidity, and film thickness dependent

Drying Time, @ 77°F, 50% RH:

Touch: 1 hour
Recoat: 4 hour

Finish: 0-5 units @85°

Tinting: Requires ColorCast Ecotoner for tinting.

For best topcoat color development, use the recommended "P"-shade primer. If desired, up to 4 oz per gallon of ColorCast Ecotoner can be used to approximate the topcoat color. Check color before use.

White B28W02600

V.O.C. (less exempt solvents):
less than 50 grams per litre; .42 lbs. per gallon

Spray—Airless:

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

When spot priming on some surfaces, a non-uniform appearance of the final coat may result, due to differences in holdout between primed and unprimed areas. To avoid this, prime the entire surface rather than spot priming.

For optimal performance, this primer must be topcoated with a latex, alkyd-oil, water based epoxy, or solvent based epoxy coating on architectural applications.

SPECIFICATIONS

Drywall:

1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats Of appropriate finishes

Previously Painted:

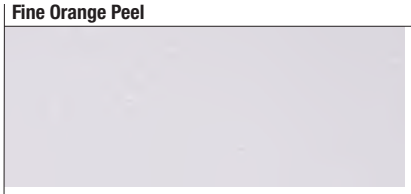
Sheetrock® Wall and Ceiling Texture

Tuf-Tex®

Diverse light-texture finishes with good durability

- For interior wall and ceiling surfaces
- Conceals minor defects
- Unaggregated formulation
- Spray, brush or roller application

Fine Orange Peel	Stipple
	


Spatter	**Spatter/Knockdown**

Description

SHEETROCK® brand TUF-TEX® wall and ceiling texture is an unaggregated texture coating designed for application over most properly prepared interior surfaces. Produces a variety of texture patterns from bold spatter/knock-down to light orange peel. Dries to a hard, white finish. Helps conceal minor substrate defects. Not intended as a final coating—should be overpainted when dry. Not washable unpainted. TUF-TEX wall and ceiling texture mixes easily in cold water with only simple mixing equipment needed. This low-cost application is designed for machine or hand application.

Limitations

1. Application below grade or in high-humidity areas is not recommended.
2. Heavy water-based textures may result in sagging of gypsum board ceilings under these conditions: high humidity, improper ventilation, and/or board application to framing, and insufficient board thickness for span between supports. When using water-based textures, refer to the following table:

Board Thickness		Application Method (Long edge relative to frame)	Maximum Frame Spacing O. C.	
inch	mm		inches	mm
3/8	9.5	Not recommended	—	—
1/2	12.7	Perpendicular only	16*	406
5/8	15.9	Perpendicular only	24	610

Note: Double layer laminated. 3/4″ or greater total thickness—24″ o.c.

*If 1/2″ SHEETROCK® interior gypsum ceiling board is specified, maximum frame spacing is 24″ o.c.

Installation

Surface Preparation

Substrate must be sound, dry, clean, and free of oil, grease, mildew, efflorescence, and other foreign materials and/or contaminants. Product, air, and surface temperatures must be maintained at a minimum of 55 °F (13 °C) throughout the finishing process when using joint compound, primer, and texture products.

New Drywall Treat joints and nailheads with an appropriate USG joint treatment system.

New Concrete/Plaster Age at least 60 days before texturing. Remove form oils and efflorescence and grind down form lines. Fill cracks and holes, and level concrete surfaces with SHEETROCK® DURABOND® setting-type or EASY SAND™ lightweight setting-type joint compound or COVER COAT® compound and let dry.

TXF-001-USG

Substrate Priming

Application of a prime coat is necessary to equalize surface porosity. After prepared surfaces have thoroughly dried, apply a prime coat of SHEETROCK® First Coat flat latex paint or a good quality interior latex flat wall paint with high solids content. Prime coat should be applied undiluted and allowed to dry before decorating.

Mixing

Use a clean mixing vessel equipped with a variable speed power agitator. Depending on desired texture pattern, start with up to 3.75 gal. (14.195 L) water per 50 lb. (22.68 kg) bag. Using drinkable water and clean mixing equipment, slowly add dry powder texture to the water in a mixing vessel and mix to a heavy but lump-free consistency. Allow to soak for at least 15 minutes—longer in cold water. Remix until mixture has a wet, smooth and creamy appearance. Adjust to desired spray consistency by adding small amounts of water to the wet mix (up to 3/4 gal. additional water for bold patterns, or up to 1.8 gal. additional water for light patterns). Total water should not exceed 4.6 gal. (17.413 L) per 50 lb. (22.68 kg) bag. DO NOT overthin, as poor adhesion, lack of hide or texture variation may result. If additional hardness and bond are desired, add up to 1 gal. of SHEETROCK First Coat. (Note: Substitute volume of additives for equal volume of mixing water.) DO NOT intermix with any materials other than those recommended by USG.

Application

Using professional equipment, apply by machine or hand to create the desired effect. Application rates will vary depending on the texture pattern of choice. Generally, the application rate will vary from 20 ft.^{2}/lb. (4.1 m^2/kg) for bold patterns to 40 ft.^{2}/lb. (8.2 m^2/kg) for fine patterns. Maintain 55 °F (13 °C) minimum air and surface temperature during application and until surface is dry. Avoid drafts while applying product, but provide ventilation after application to aid drying. DO NOT use unvented gas or oil heaters. May be painted after overnight drying. Unpainted surface is NOT washable or scrubbable.

Product Data

Color Soft-tone white. Should be overpainted. Not washable or scrubbable unpainted.
Dilution (water) 4.68–6 gal. per 50 lb. bag.
Density (dry bulk) 43.0–48.0 lb. per ft.^{3} (689-769 kg per m^3).
pH 7–9.
Tinting Not recommended. Should be overpainted.
Drying Time At 72 °F, 50% relative humidity, dries to the touch in 1-2 hours. Let dry at least 24 hours before overpainting.
Coverage Will vary. Generally, the application rate is approx. up to 20 ft.^{2}/lb. for bold patterns, up to 40 ft.^{2}/lb. for fine patterns.
Storage Close opened bags as tightly as possible and store in a dry place.
Shelf Life 6-12 mos. under protected storage conditions.
Packaging 50 lb. (22.68 kg) bags.

Product Information
See usg.com for the most up-to-date product information.
Warning
Dust or mist may cause irritation to eyes, skin, nose, throat and upper respiratory tract. Avoid irritation by reducing exposure to dust and mist. Use in a well-ventilated area or provide sufficient local ventilation. If dusty or misty, wear a NIOSH/MSHA-approved dust or mist respirator. Wear eye protection. If eye contact occurs, flush thoroughly with water for 15 minutes. If irritation persists, call physician. Wash with soap and water after use. Do not ingest. If ingested, call physician. Prolonged and repeated breathing of respirable mica dust may cause lung disease (pneumoconiosis). Product safety information: (800) 507-8899 or usg.com. KEEP OUT OF REACH OF CHILDREN.

Item Name	Resilient Base
Item Type	Resilient Base
Description	Straight vinyl wall base
Manufacturer	Shaw Industries, Inc.
Model	Accessories 149VS Angle Profile
Dimensions	4.5" H. x 1/4" Gauge
Color	White 00100
Finish	UV-Cured High Performance Urethane
Material Composition	TPR Thermoplastic Rubber
CSI #	095600 - Resilient Flooring
Omniclass #	22-096500
Accessories	Manufacturer's recommended adhesive
Part of an Assembly	N
Product Number	149VS Angle Profile White 00100
Lengths	4.5" x 96", in 8' Lengths
Warranty	1 Year Commercial Limited Warranty
Notes	Installation: Direct Glue

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Belstone
Model	Dodi
Dimensions	Refer to Design Guideline Drawings
Color	Demitasse
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Notes	Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Schluter® Systems

PROFILE OF INNOVATION

FLOOR PROFILES

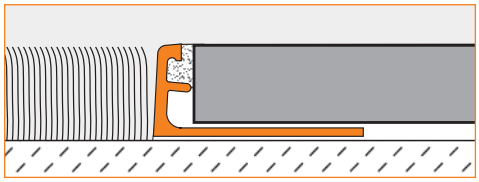
INNOVATIVE SOLUTIONS FOR CERAMIC AND STONE TILE

FINISHING, EDGE PROTECTION, AND TRANSITIONS

Because ceramic and stone tiles are inherently brittle, their exposed edges can chip and crack if left unprotected. Transitions between floor surfaces and at thresholds are particularly vulnerable to damage. Schluter-Systems offers a variety of profiles to provide edge protection and transitioning at thresholds and between adjacent surfaces, resulting in durable, maintenance-free tiled coverings. The profiles can be grouped into two categories: transitions between same-height surfaces and transitions between different-height surfaces

Application and Function

Same-height Transitions



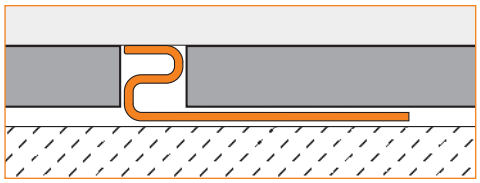
1.1 Schluter®-SCHIENE is designed to provide edging for tile coverings. Typical applications include edge protection where tile is bordered by carpet, at expansion joints, or as a decorative edging for stairs. SCHIENE is available in stainless steel, solid brass, aluminum, and anodized aluminum. The profile features a trapezoid- perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and an 87° sloped vertical wall section that transfers point loads to the substrate and surface covering while protecting tile edges from damage. SCHIENE, in solid brass, aluminum, and anodized aluminum, features a 5° sloped top flange and fillet at the anchoring leg/vertical section interface to enhance edge protection by reducing stresses on the tile, and, in sizes greater than 1/4" *(6 mm)*, features an

1.1 Schluter®-SCHIENE

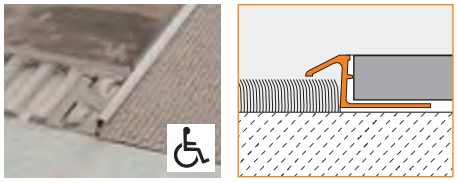
1.6 Schluter®-DECO

1.3 Schluter®-RENO-T

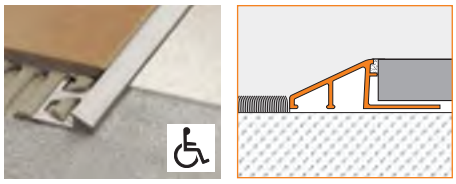
integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of SCHIENE, in all materials, is available with a special radius perforation “R” so that the profile can be used to form curves.



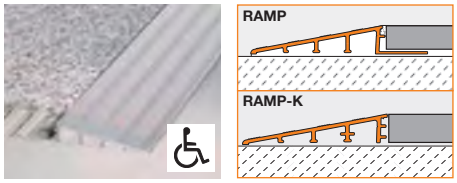
1.6 Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings, such as wood or carpet. The profile is available in stainless steel, solid brass, chrome-plated



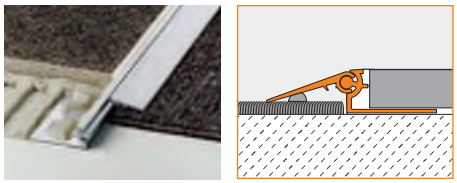
1.4 Schluter®-RENO-TK



1.2 Schluter®-RENO-U

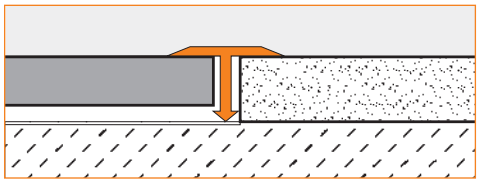


1.8 Schluter®-RENO-RAMP/-K



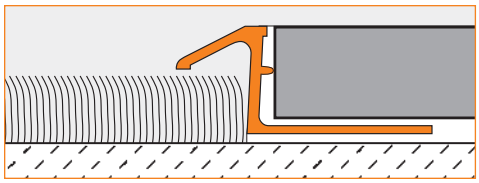
1.7 Schluter®-RENO-V

solid brass, and anodized aluminum. DECO features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a 1/4" *(6 mm)*-wide visible surface that meets the high aesthetic requirements of showrooms, lobbies, galleries, exhibition booths, etc. The anchoring leg of DECO, in solid brass, chrome-plated solid brass, and anodized aluminum, is available with a special radius perforation “R” so that the profile can be used to form curves. DECO in chrome-plated brass requires a relatively large bending radius.

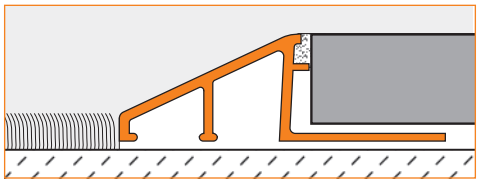


1.3 Schluter®-RENO-T is designed to provide transitions between existing same-height, hard-surface floor coverings (e.g., ceramic tile or natural stone, parquet flooring, concrete pavers, laminate, etc.), primarily in retrofit applications. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-T is installed within the existing joint cavity and overlaps adjoining surface materials, thus preventing edges from becoming damaged when subjected to mechanical stress. RENO-T, in brass and anodized aluminum size 9/14, is flexible in the lateral direction and can be used in curved applications.

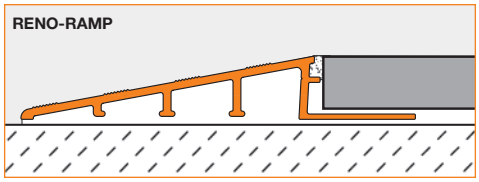
Different-height Transitions

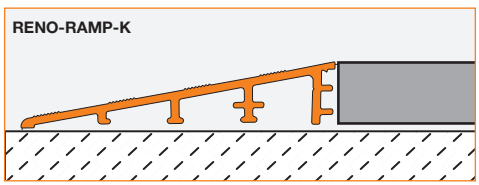


1.4 Schluter®-RENO-TK is designed to provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-TK features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface to eliminate trip hazards and protect tile edges. The 1/4" *(6 mm)* channel beneath the sloped flange of the profile hides and protects the cut edge of lower adjoining surface coverings. All sizes of the RENO-TK are compliant with the Americans with Disabilities Act (ADA). RENO-TK, in anodized aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of RENO-TK, in solid brass and anodized aluminum, sizes 60 to 100, is available with a special radius perforation "R" so that the profile can be used to form curves.

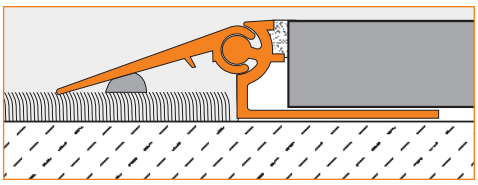


1.2 Schluter®-RENO-U is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-U features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface (approximately 25°) that eliminates trip hazards and protects tile edges. The leading edge of the profile abuts the lower surface covering, typically VCT. RENO-U, in aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. In installations where the leading edge abuts a lower surface covering, all sizes of RENO-U, except the 3/4" *(20 mm)* and 11/16" *(17.5 mm)*, are compliant with the Americans with Disabilities Act (ADA). In installations where the leading edge rests on top of the lower floor covering (e.g., finished concrete), the 3/4" *(20 mm)*, 11/16" *(17.5 mm)*, and 9/16" *(15 mm)* sizes are not ADA-compliant.
Note: When using Schluter® uncoupling membranes with RENO-U profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.





1.8 Schluter®-RENO-RAMP is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete, particularly in commercial applications where wheel carts are used (e.g., bakeries, hospitals, etc.). The profile is available in anodized aluminum. RENO-RAMP features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped transition surface that terminates at the height of the tile edge. The profile protects tile edges and provides a sloped surface to eliminate trip hazards and allow easy access for wheel carts. RENO-RAMP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.
Note: When using Schluter® uncoupling membranes with RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
Schluter®-RENO-RAMP-K is a variant of the profile without an anchoring leg. RENO-RAMP-K is installed adjacent to existing floor coverings, e.g., retrofitting between existing floor coverings and bare concrete without having to disturb the existing flooring. All sizes of RENO-RAMP, except sizes 9/16" *(15 mm)* and 3/4" *(20 mm)*, are compliant with the Americans with Disabilities Act (ADA).



1.7 Schluter®-RENO-V is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations. The profile is available in anodized aluminum. RENO-V features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a movable transition arm that allows the profile to adjust to the height of the adjacent floor covering via a ball-and-socket joint. The profile protects tile edges and provides a sloped surface to eliminate trip hazards. RENO-V features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. RENO-V is also suitable for heavy-duty applications (e.g., entrances to garages or loading docks). In such cases, the adjustable arm is backfilled with mortar.

Material Properties and Areas of Application

Schluter edge-protection and transition profiles are resistant to most chemicals encountered in tiled environments. In special cases,

the suitability of a proposed type of profile must be verified based on the anticipated chemical, mechanical, and/or other stresses. Exceptions and special considerations are listed below:

Stainless steel profiles are roll-formed, resulting in a slightly different contour from those made of extruded brass or aluminum. Stainless steel can sustain high mechanical stresses and is particularly well suited for applications requiring resistance against chemicals and acids; for example in the food industry, breweries, dairies, commercial kitchens, and hospitals, as well as in residential applications. Typically, the profiles are formed using stainless steel 304 (1.4301 = V2A). For more severe chemical exposure, such as de-icing salts and chemicals used in swimming pools, we recommend the use of stainless steel 316 L (1.4404 = V4A), which offers even higher corrosion resistance than the 304. Even stainless steel cannot withstand all chemical exposures, such as hydrochloric acid, hydrofluoric acid or certain chlorine, chloride, and brine concentrations. Both stainless steel 304 and stainless steel 316 L are approved for use in exterior applications. Stainless steel 304 is not as corrosion resistant as 316 L; however, profiles in stainless steel 304 are acceptable for exterior use as long as the intended area is not susceptible to de-icing salts, chlorine, or saltwater.

Chrome-plated solid brass is ideal for matching chrome fixtures. Surfaces must be protected against abrasion or scratching.

Solid brass can sustain high mechanical stresses, as well as most chemicals commonly encountered in tiled environments. Solid brass that is exposed to air will oxidize, resulting in a natural patina. If exposed to moisture or aggressive substances, heavy oxidation and spotting may occur.

Aluminum profiles must be tested to verify their suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline. Since aluminum is sensitive to alkaline substances, exposure to the alkali (depending on the concentration and duration of exposure) may result in corrosion (aluminum hydroxide formation). Therefore, it is important to remove mortar or grout residue from visible surfaces. In addition, ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water.

Anodized aluminum profiles feature an anodized layer that retains a uniform appearance during normal use, but is not color-stable in exterior applications. The surface is susceptible to scratching and wear and may be damaged by grout or setting material. Therefore, these materials must be removed immediately. Otherwise, the description regarding aluminum applies.

Due to variations in raw materials and manufacturing, the exact color, shade, and/or texture of individual profiles may vary. The customer must inspect the products upon delivery and notify Schluter in writing of any physical damage to the products or nonconformity with the purchase order or invoice.

Cutting Profiles

Observe all safety instructions and standards as directed by the cutting tool manufacturer, including protective eyewear, hearing protection, and gloves.

Always measure carefully and dry fit the profiles, corners, and connectors to ensure proper fit and alignment prior to setting tile.

Aluminum profiles may be cut using any of the following options:

- **Hacksaw** with a bimetal blade and the highest teeth per inch (TPI) available.
- **Variable-speed angle grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Chop saw or miter saw** with a non-ferrous blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Stainless steel profiles may be cut using any of the following options:

- **Variable-speed angle grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Band saw** with a metal cutting blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Brass profiles may be cut using any of the following options:

- **Hacksaw** with a bimetal blade and the highest teeth per inch (TPI) available.
- **Chop saw or miter saw** with a non-ferrous blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Installation

SCHIENE, JOLLY, DECO, RENO-TK, RENO-U, RENO-RAMP, and RENO-V

1. Select the profile according to tile thickness and format.

   Note: When using Schluter® uncoupling membranes with RENO-U and RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.

   For RENO-U and RENO-RAMP, fill the cavity beneath the sloped section of the profile with thin-set mortar. Follow this step when RENO-V is used in heavy-duty applications, as well.
3. Press the perforated anchoring leg of the profile into the mortar and align.
4. Trowel additional thin-set mortar over the perforated anchoring leg to ensure full coverage and support of the tile edges.
5. Solidly embed the tiles so that the tiled surface is flush with the top of the profile; the profile should not be higher than the tiled surface, but rather up to approx. 1/32" *(1 mm)* lower.
6. Set the tile to the integrated joint spacer, which ensures a uniform joint of 1/16" - 1/8" *(1.5 - 3 mm)*. For DECO and stainless steel profiles, leave a space of approximately 1/16" - 1/8" *(1.5 - 3 mm).*
7. Fill the joint completely with grout or setting material.
8. Remove grout or mortar residue from the visible surface of the profile.

RENO-RAMP-K

1. Fill the cavity beneath the sloped section of the profile with thin-set mortar.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.
3. Press the profile into the mortar and abut to the adjacent floor covering. The profile should not be higher than the adjacent

floor covering, but rather up to approx. 1/32" *(1 mm)* lower.
4. Fill the joint completely with grout or setting material.
5. Work with materials and tools that will not scratch or damage sensitive surfaces. Setting materials must be removed immediately.

RENO-T

1. Select the profile according to joint width, to ensure proper support of the lateral crosspiece.
2. The joint cavity must be at least 3/8" *(9 mm)* deep and free of debris. Substances that inhibit adhesion must be removed from the sides of the joint.
3. Fill the joint with elastomeric sealant such as Schluter®-KERDI-FIX or similar. Then insert the vertical leg of RENO-T in the joint so that the lateral crosspiece rests completely on the edges of the surface coverings.
4. Remove any excess sealant with a suitable cleaner.

Maintenance

Schluter® edge-protection and transition profiles require no special maintenance or care and are resistant to mold and fungi. Clean profiles periodically using pH neutral cleaning agents.

Stainless steel surfaces exposed to the environment or aggressive substances should be cleaned periodically using a pH neutral cleaner. Regular cleaning maintains the neat appearance of stainless steel and reduces the risk of corrosion. All cleaning agents must be free of hydrochloric acid, hydrofluoric acid, and chlorides. Stainless steel surfaces develop a sheen when treated with a chrome-polishing agent.

Oxidation films on exposed **solid brass** or **aluminum** can be removed by using a conventional polishing agent, but the film will form again.

In the case of **anodized aluminum**, **color-coated aluminum,** and **chrome-plated solid brass**, do not use abrasive cleaning agents.

Schluter® Systems Floor Profiles 5-Year Limited Warranty

LIMITED WARRANTY COVERAGE: Subject to the conditions and limitations as stated in this **Schluter® Systems Floor Profiles 5-Year Limited Warranty** (the "**Limited Warranty**"), Schluter Systems warrants that its Schluter®-SCHIENE, Schluter®-JOLLY, Schluter®-RENO-TK, Schluter®-DECO, Schluter®-RENO-U, Schluter®-RENO-T, Schluter®-RENO-RAMP, Schluter®-RENO-RAMP-K, and Schluter®-RENO-V (collectively, the "**Products**") will be free from manufacturing defects and will perform as described in the Schluter Systems Floor Profiles Technical Data Sheet (collectively, the "**Written Materials**"[1]) for a period of five (5) years from the date of purchase when installed and used in accordance with the terms and conditions of the Written Materials and industry standard guidelines that are not in conflict with the Written Materials in effect at the time of installation.

For the purposes of this Limited Warranty, "**Owner**" is defined as the original end user of the property in which the Products are installed; and "**Tile Assembly**" is defined to include the Products, non-reusable flooring surfaces, and applicable setting and grouting materials.

This Limited Warranty is only applicable to installations in the United States of America and Canada. Schluter Systems is not responsible or liable under any circumstances for determining the suitability of the Products for the Owner's intended purpose. It is the responsibility of the Owner to consult with an experienced and professional installer to ensure the suitability of the Products, subfloor/substrate and all building materials in the installation and that the Written Materials are followed properly.

RESOLUTION: If the Products are installed and used in accordance with the terms and conditions as described hereinabove and such Products are proven defective within the applicable warranty term, the Owner's exclusive remedy and the sole obligation of Schluter Systems, at its election, shall be to (a) reinstall or replace the failed portion of the Tile Assembly or (b) pay an amount not to exceed the original square foot cost of the installation of the Tile Assembly verified to be defective. Due to conditions beyond the control of Schluter Systems (e.g., color and shade availability, discontinuation, normal wear and tear), Schluter Systems cannot guarantee or warrant an exact match to the specific tile, stone, or other flooring materials used in the original installation. In such event, substantially similar materials may be substituted.

EXCLUSIONS FROM COVERAGE: This Limited Warranty excludes and in no event shall Schluter Systems have any liability for any indirect, special, incidental, punitive, exemplary, or consequential damages, including lost profits, arising out of or otherwise connected to the failure of the Products or Tile Assembly, regardless of any strict liability or active or passive negligence of Schluter Systems, and regardless of legal theory, whether in contract, tort, extra-contractual or other. This Limited Warranty further excludes any loss or damage arising out of or otherwise connected to: acts of war, terrorism, fire, explosion, natural disaster, acts of God, any failure to comply with the Written Materials, inadequate subfloor/substrate, improper preparation or other failure of subfloor/substrate, faulty or negligent penetration of the Products or subfloor/substrate, intentional acts of destruction, structural failure, misuse of or failure to maintain the Products, normal wear and tear, scratches, dents, corrosion or discoloration (whether caused by excessive heat, chemical cleaning products, abrasive agents or otherwise), efflorescence and shading which are a natural occurrence with cementitious materials and are not considered a defective condition for the purposes of this Limited Warranty, variations of texture, color or shade from those on product samples, packaging materials or other marketing materials, or other causes unrelated to the Products (e.g. floor covering failure, excess point loading, overvoltage). This Limited Warranty excludes exterior applications and applications utilizing glass tile or other non-approved floor coverings, unless specifically approved in writing on a case by case basis by the Schluter Systems Technical Services Director.

This Limited Warranty is conditioned and will be considered null and void and Schluter Systems will have the right to refuse any claims if: (a) the Products have been improperly stored or installed, or (b) the Products are subject to abusive or abnormal use, lack of maintenance, or used in a manner other than that for which the Products were designed or in any way contrary to the Written Materials.

DISCLAIMER: There are no warranties beyond this expressed warranty as stated herein. To the extent permitted by law, all other warranties, representations or conditions, expressed or implied, are hereby disclaimed and excluded, including but not limited to the implied warranties of **MERCHANTABILITY** or **FITNESS FOR A PARTICULAR PURPOSE** (as limited to such purposes as described in the Written Materials) or arising from a course of dealing, usage of trade or otherwise by law. ANY IMPLIED WARRANTIES ARISING BY OPERATION OF LAW ARE LIMITED IN DURATION TO THE TERM OF THIS LIMITED WARRANTY. NO REPRESENTATION, PROMISE, AFFIRMATION OR STATEMENT BY ANY EMPLOYEE OR AGENT OF SCHLUTER SYSTEMS WILL BE ENFORCEABLE AGAINST SCHLUTER SYSTEMS UNLESS IT IS SPECIFICALLY INCLUDED IN THIS LIMITED WARRANTY OR AUTHORIZED IN WRITING BY THE SCHLUTER SYSTEMS TECHNICAL SERVICES DIRECTOR. This Limited Warranty is given in lieu of any other warranty, whether expressed or implied. The remedies contained herein are the only remedies available for breach of this Limited Warranty. This Limited Warranty extends only to the Owner and is not transferable or assignable unless authorized by written agreement and signed by the Schluter Systems Technical Services Director or otherwise prohibited by specific state or provincial law. This Limited Warranty gives you specific legal rights; some states and provinces do not allow disclaimers or other restrictions of implied warranties; some of the above disclaimers may not apply to you. **No changes or modifications of any terms or conditions of this Limited Warranty are permitted unless duly authorized in writing by the Schluter Systems Technical Services Director.** This Limited Warranty shall supersede and replace any and all prior oral or written warranties, agreements, or other representations made by or on behalf of Schluter Systems relative to the Products or the application of the Products and shall apply to any installation occurring on or after April 8, 2019. If the Products are used in conjunction with other Schluter products, a different Schluter warranty may apply. For the most current information and materials regarding Schluter Systems warranties and programs, please visit https://www.schluter.com/schluter-us/en_US/downloadfiles.

MAKING A CLAIM: To make a claim under this Limited Warranty, the Owner must provide Schluter Systems[2] with written notice within thirty (30) days of any alleged defect in the Products covered by this Limited Warranty, together with date and proof of purchase of such Products and/or all of its components and name and address of all installers and all invoices related to the original installation, failing which this Limited Warranty shall have no legal effect[3]. Schluter Systems reserves the right at its election and as a condition of this Limited Warranty to inspect the alleged failed and/or defective Products.

All U.S. Claims shall be sent to:

Schluter Systems L.P.
Attn: Warranty Claims Dept.
194 Pleasant Ridge Road
Plattsburgh, NY 12901-5841

All Canadian Claims shall be sent to:

Schluter Systems (Canada), Inc.
Attn: Warranty Claims Dept.
21100 chemin Ste-Marie
Ste-Anne-de-Bellevue, QC H9X 3Y8

[1] If there are any conflicting terms between any Written Materials, the most recently updated document shall be deemed to control.

[2] This Limited Warranty is limited to sales of the Products made in and intended for use in the United States and Canada. For the purposes of this Limited Warranty, Schluter Systems L.P. shall offer warranty coverage to Owners located in the United States, and Schluter Systems (Canada) Inc. shall offer warranty coverage to Owners located in Canada.

[3] In the event that Owner fails to provide such required invoices relating to the original installation, Schluter Systems shall pay Owner an amount equal to the average, reasonable costs of a comparable installation. If the parties fail to agree on such amount, such dispute shall promptly, and in the first instance, be submitted: (a) if a U.S. claim, to arbitration in Clinton County, New York, in accordance with the rules of the American Arbitration Association, or (b) if a Canadian claim, in the Province of Quebec, Canada, in accordance with the ADRIC Arbitration Rules. Any outcome of such arbitration proceeding shall be final and binding upon the parties hereto.

Finishing Accessories

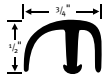
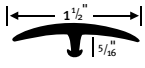
Joining Moldings – Carpet/Resilient

370 End Cap T
Butts up against edge of 1/2" material to lesser-gauge material. Uses 970, 980, or 990 track only.
Packing: 20-12' secs., 240 lin. ft. per carton

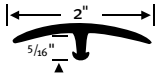


710 Carpet to Resilient Transition
Transitions 5/16" glue-down carpet to 1/8" resilient.
Packing: 10-12' secs., 120 lin. ft. per carton

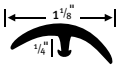
930 Snap-Down T
Snap-in T molding. Joins 1/4" or 5/16" material on each side. Uses 970, 980, or 990 track only.
Packing: 20-12' secs., 240 lin. ft. per carton



935 Super 2" T
Snap-in T molding. Joins 1/4" or 5/16" material on each side. Uses 970, 980, and 990 track only.
Packing: 20-12' secs., 240 lin. ft. per carton



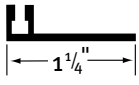
940 Standard Edge T
Joins 1/4" to lesser-gauge. 1 1/8" wide; 1/4" leg. Uses 970, 980, or 990 track only.
Packing: 20-12' secs., 240 lin. ft. per carton



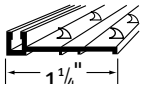
970 Single Flange Vinyl Track
For 1/4" and 1/2" leg T portions. Use with 360, 365, 930, 935 & 940 T's.
Packing: 20-12' secs., 240 lin. ft. per carton

975 Vinyl Track Extender
Adds height up to 5/8" on Snap-in T molding for ceramic, wood, and laminates. Use with 970 track for 360, 365, 930, 935, and 940 T's.
Packing: 20-12' secs., 240 lin. ft. per carton

980 Pinless Metal Track
Designed to install T moldings 360, 365, 930, 935 and 940. Aluminum.
Packing: 48-12' secs., 576 lin. ft. per carton

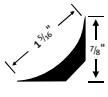


990 Metal Track with pins
Designed to install T moldings 360, 365, 930, 935 and 940. Aluminum.
Packing: 48-12' secs., 576 lin. ft. per carton

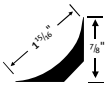


Cove Supports

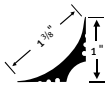
070 Cove Stick (Flexible)
Quarter-round. Supports sheet goods for coving. Forms 1" radius at 90° installation. **Color: 401 White only.**
Packing: 5-20' coils, 100 lin. ft. per carton



075 Cove Stick (Semi-Rigid)
Quarter round. Supports sheet goods for coving. Forms 1" radius at 90° installation. **Color: 400 Natural only.**
Packing: 100-5' secs., 500 lin. ft. per carton



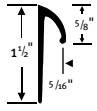
725 Merstick
Coving support for sheet vinyl. Replaces wood cove. Forms 1" radius at 90° installation. **Color: 400 Natural only.**
Packing: 100-5' secs., 500 lin. ft. per carton



Edge Finishing Moldings

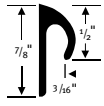
Available in the 36 Accord Colors

022 Carpet Cove Cap
Semi-rigid capping. For 1/4" and 5/16" coved carpet; one-man installation.
Packing: 20-12' secs., 240 lin. ft. per carton

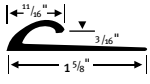


040 Round Cap 1/8"
Cap for coved sheet goods. 1/8" gauge; round top.
Packing: 50-12' secs., 600 lin. ft. per carton

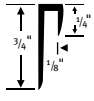
225 Flex Cove Cap
Cap for 3/16" coved/glue-down carpet.
Packing: 20-12' secs., 240 lin. ft. per carton



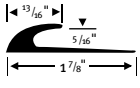
230 Mono Edge
Flexible capping. For 1/4" coved/glue-down carpet or grass; one-man installation.
Packing: 20-12' secs., 240 lin. ft. per carton



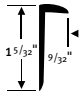
390 Square Cap 1/8"
Cap for 1/8" coved sheet vinyl.
Packing: 50-12' secs., 600 lin. ft. per carton



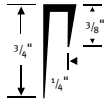
400 Custom Edge
Bevel-edge reducer. For 5/16" carpet; deep undercut
Packing: 25-12' secs., 300 lin. ft. per carton



430 Mercap 9/32"
Cap for coved carpet, paneling, and ceramics. 9/32" inside dimension.
Packing: 50-12' secs., 600 lin. ft. per carton



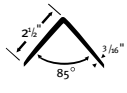
450 Square Cap 1/4"
Square cap for coved carpets and wood panels.
Packing: 40-12' secs., 480 lin. ft. per carton



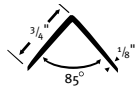
Corner Guards

Available in the 36 Accord Colors

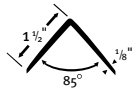
691 Flexible Corner Guard 2 1/2"
Corner protector. 2 1/2" returns; 3/16" thick; tapered ends.
Packing: 6-54" secs., 27 lin. ft. per carton and 6-108" secs., 54 lin. ft. per carton



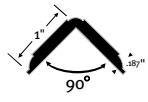
693 Flexible Corner Guard 3/4"
Corner protector. 3/4" returns; 1/8" thick; tapered ends.
Packing: 20-54" secs., 90 lin. ft. per carton and 20-108" secs., 180 lin. ft. per carton



695 Flexible Corner Guard 1 1/2"
Corner protector. 1 1/2" returns; 1/8" thick; tapered ends.
Packing: 20-54" secs., 90 lin. ft. per carton and 20-108" secs., 180 lin. ft. per carton



696 Profiles Corner Guard 1"
Designed to complement Mannington Edge Effects.
Packing: 20-96" secs., 160 lin. ft. per carton



Finishing Accessories

THE EQUALIZER

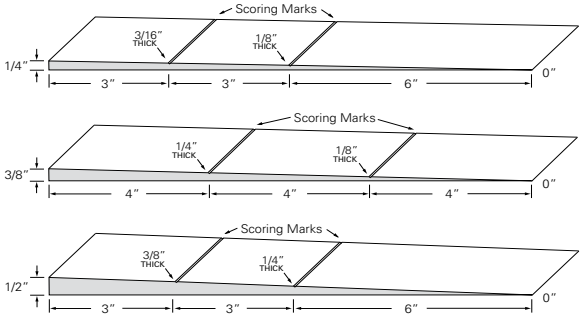
Subfloor Transition System

190, 191, 192 Transitions

190: Butts to reduce from 1/4″ to 0″ in a 12″ wide span. Can be cut at scoreline to reducer height as indicated. Packing: 10-4′ secs., 40 lin. ft. per carton

191: Butts to reduce from 3/8″ to 0″ in a 12″ wide span. Can be cut at scoreline to reducer height as indicated. Packing: 5-4′ secs., 20 lin. ft. per carton

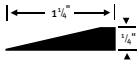
192: Butts to reduce from 1/2″ to 0″ in a 12″ wide span. Can be cut at scoreline to reducer height as indicated. Packing: 5-4′ secs., 20 lin. ft. per carton



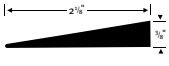
Reducers

Available in the 36 Accord Colors

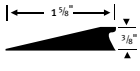
140 Carpet Reducer 1/4″
Reduces 1/4″ flooring to 0″. 1 1/4″ transition.
Packing: 15-20′ coils, 300 lin. ft. per carton



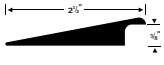
144 Butt-to Reducer 3/8″
Edge reducer for ⅜″ material in a 2 ⅛″ width for wheeled traffic.
Packing: 2-50′ coils, 100 lin. ft. per carton



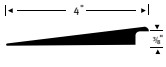
146 Universal Reducer 3/8″
Reduces 3/8″ materials to 0″. 1 ⅝″ transition.
Packing: 10-12′ secs., 120 lin. ft. per carton



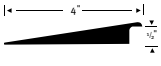
147 Overlap Reducer 3/8″
Reducer overlaps ⅜″ Multi-Purpose resilient flooring or carpet. 2 ½″ transition.
Packing: 10-12′ secs., 120 lin. ft. per carton



148 Material to Substrate Reducer
Reduces 3/8″ materials to substrate surface in a 4″ wide span.
Packing: 10-12′ secs., 120 lin. ft. per carton



149 Material to Substrate Reducer
Reduces 1/2″ materials to substrate surface in a 4″ wide span.
Packing: 5-12′ secs., 60 lin. ft. per carton



Reducers continued

160 Universal Reducer
Edge reducer for 1/2″ materials. 2″ transition.
Packing: 10-12′ secs., 120 lin. ft. per carton

165 Carpet to Resilient Reducer 1/4″
Reduces ¼″ to ⅛″ resilient in a 2 ½″ wide span for wheeled traffic.
Packing: 10-12′ secs., 120 lin. ft. per carton

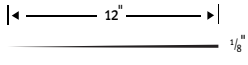
170 Carpet Transitional Reducer
9/32″ reducer with 2 1/2″ transition.
Packing: 10-12′ coils, 120 lin. ft. per carton

174 Wedge Shape Reducer 1/8″
Adjoins 1/8″. Reduces to 0″ over a 4″ run. Can be used as reducer or as subfloor transition in place of trowelable underlayment.
Packing: 1-100′ coil, 100 lin. ft. per carton

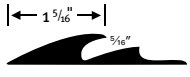
175 Carpet Ramp
1/4″ reducer with 4″ transition. For heavy rolling traffic.
Packing: 10-12′ secs., 120 lin. ft. per carton

176 Laminate to Substrate Reducer
Reduces 5/8″ laminate to substrate surface in a 4″ wide span.
Packing: 6-12′ secs., 72 lin. ft. per carton

189 Wide Reducer
Butts to reduce from 1/8″ to 0″ in a 12″ wide span.
Packing: 20-4′ secs., 80 lin. ft. per carton



200 Royal Commercial Reducer
Transition reducer. 5/16″ undercut for use with tackless or double-stick installations.
Packing: 10-12′ secs., 120 lin. ft. per carton



630 Tile Reducer 1/16″
Butts to reduce gauge of resilient to 0″. 1″ x 36″ x 1/16″.
Packing: 50-3′ secs., or 2-100′ coils

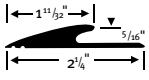
632 Tile Reducer 3/32″
Butts to reduce gauge of resilient to 0″. 1″ x 36″ x 3/32″.
Packing: 50-3′ secs., or 2-100′ coils

Finishing Accessories

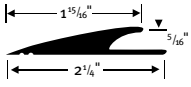
Reducers continued

633 Tile Reducer 1/8"
Butts to reduce gauge of resilient to 0".
1" x 36" x 1/8".
Packing: 50-3 secs., or 2-100' coils

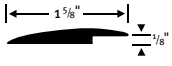
700 Imperial Reducer 5/16"
1 11/32" transition reducer. For glue-down carpet; 5/16" undercut. Can be trimmed to butt to tile.
Packing: 20-12' secs., 240 lin. ft. per carton



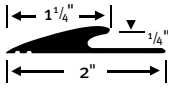
705 Super Imperial Reducer
1 15/16" heavy duty transition reducer. For glue-down carpet; 5/16" undercut. Can be trimmed to butt to tile.
Packing: 10-12' secs., 120 lin. ft. per carton



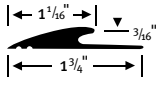
733 (Self-Stick) & 735 (Dry Back) Underslung Reducer
Binder-Bar edging for 1/16" - 1/8" resilient floors. With self-stick or dry back.
Packing: 22-3' secs., 66 lin. ft. self-stick; 2-35' coils, 70 lin. ft. dry back per carton



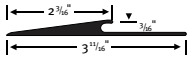
800 Imperial Reducer 1/4"
1 1/4" transition reducer. For glue-down carpet; 1/4" undercut. Can be trimmed to butt to resilient tile.
Packing: 20-12' secs., 240 lin. ft. per carton



900 Imperial Reducer 3/16"
1 1/16" transition reducer. For glue-down carpet; 3/16" undercut. Can be trimmed to butt to resilient tile.
Packing: 20-12' secs., 240 lin. ft. per carton



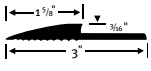
901 Superior Imperial Reducer 3/16"
2 3/16" transition reducer. For glue-down carpet; 3/16" undercut.
Packing: 1-50' coil, 50 lin. ft. per carton



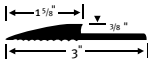
Mat Edge Moldings

Available in the 36 Accord Colors

420 Mat Edging
Flexible vinyl for protecting edges of floor mats. 3/16" butt edge. 1 5/8" transition.
Packing: 2-50' secs., 100 lin. ft. per carton.
Minimums may apply.



425 Mat Edging
Flexible vinyl for protecting edges of floor mats. 3/8" butt edge. 1 5/8" transition.
Packing: 2-50' secs., 100 lin. ft. per carton.
Minimums may apply.

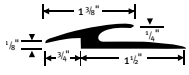


Joining Moldings – Carpet/Resilient

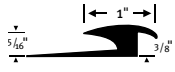
Available in the 36 Accord Colors

150 Tile-Carpet Joiner
One-piece molding. Joins 1/4" carpet to 1/8" tile.
Packing: 25-12' secs., 300 lin. ft. per carton

152 Carpet to Resilient Transition
Transitions 1/4" or 5/16" glue-down carpet to 1/16" to 1/8" resilient.
Packing: 20-12' secs., 240 lin. ft. per carton

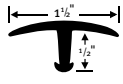


153 Cerco Bar 3/8"
One-piece molding for joining 5/16" carpet to 3/8" ceramic materials.
Packing: 10-12' secs., 120 lin. ft. per carton

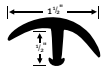


166 Sheet Vinyl Transition
One piece molding used to join 1/16" thick tile or sheet flooring material.
Packing: 10-12' secs., 120 lin. ft. per carton

360 Cerco T
Snap-in T molding. Joins 1/2" material. Uses 970, 980, or 990 track only.
Packing: 20-12' secs., 240 lin. ft. per carton



365 Cerco Edge T
Joins 1/2" material to lesser-gauge material. Uses 970, 980, or 990 track only.
Packing: 20-12' secs., 240 lin. ft. per carton

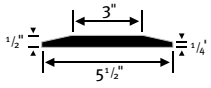


Finishing Accessories

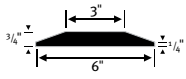
Thresholds

Available in the 36 Accord Colors

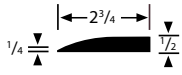
684 Full Saddle
5 1/2" wide door threshold adjoins 1/4". 1/2" to 1/4" taper in height. Multi-Purpose flooring, carpet, or ceramic.
Packing: 6-3' secs., 18 lin. ft. per carton



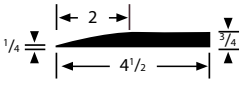
686 Full Saddle
6" wide door threshold adjoins 1/4" Multi-Purpose flooring or carpet. 3/4" to 1/4" taper in height.
Packing: 4-3' secs., 12 lin. ft. per carton



294 Half Saddle
2 3/4" wide door threshold adjoins 1/2" Multi-Purpose flooring or carpet.
Packing: 12-3' secs., 36 lin. ft. per carton



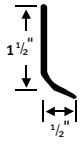
296 Half Saddle
4.5" wide door threshold adjoins 3/4" Multi-Purpose flooring or carpet.
Packing: 4-3' secs., 12 lin. ft. per carton



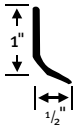
Tub Moldings – Coves

Available in the 36 Accord Colors

060 Tub Molding Self-Stick
High Gloss cove for bathtub, counter, and shelves; 1 1/2" height. **Colors: 401 White and 403 Almond only.**
Packing: 24-5' secs., 120 lin. ft. per carton



605 Tub Molding Self-Stick
High Gloss cove for bathtub, counter, and shelves; 1" height. Colors: **401 White and 403 Almond only.**
Packing: 24-5' secs., 120 lin. ft. per carton



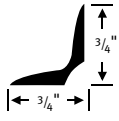
Miscellaneous

Available in the 36 Accord Colors

642 Feature Strip 3/32"
Accent strip for custom inlaid floors; 3/32" gauge. 1" x 36" x 3/32".
Packing: 50-3' secs., 150 lin. ft. per carton

643 Feature Strip 1/8"
Accent strip for custom inlaid floors; 1/8" gauge. 1" x 36" x 1/8".
Packing: 50-3' secs., 150 lin. ft. per carton

655 Utility Molding 3/4"
Finish molding for inside any right angle. **Colors: 401 White and 403 Almond only.**
Packing: 25-5' secs., 125 lin. ft. per carton



645 Quarter Round
1/2" quarter round with adhesive.
Packing: 20-12' secs., 240 lin. ft. per carton

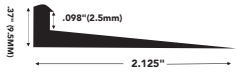
650 Chair Rail
Resilient chair rail
Packing: 5-12' secs., 60 lin. ft. per carton

FUSION® TRANSITION STRIP

Compact Mixed Flooring Reducer

Available in the 36 Accord Colors

720 Fusion® Transition Strip 2.5mm
Compact mixed flooring reducer provides transitions from 2.5 mm to 9.5 mm.
Colors: 720-117 (Platinum) and Accord Colors
Packing: 25 pieces of 12 ft. secs., 300 lin. ft. per carton



721 Fusion® Transition Strip 3.5mm
Compact mixed flooring reducer provides transitions from 3.5 mm to 9.5 mm.
Colors: 720-117 (Platinum) and Accord Colors
Packing: 25 pieces of 12 ft. secs., 300 lin. ft. per carton

FLOOR

SADDLE BROOK™

GLAZED PORCELAIN with REVEAL IMAGING®

daltile®

IMAGINE WHAT'S POSSIBLE

Above and cover photos feature Saddle Brook™ Farmhouse 6 x 36 on the floor.

The Beautiful Look of Hardwood without Compromise

Let the warmth and timeless look of hardwood flow through the entire home with Saddle Brook glazed porcelain tile. An authentic hardwood visual is combined with four natural wood tones to give a realistic look on a durable, scratch-resistant surface.

- AUTHENTIC APPEAL
  - Timeless design and a warm color palette are combined for an authentic look
  - Reveal Imaging® technology creates an incredibly authentic visual by combining rich color with a wide variation of natural wood patterns
  - Popular plank size with coordinating trim
- RICHNESS OF WOOD WITHOUT THE WORRY
  - High moisture resistance, which is ideal to bring a wood look to areas such as bathrooms and kitchens
  - Ease of maintenance and high durability of glazed porcelain

SIZES

		Thickness	Sq. Ft./ Carton	Pieces/ Carton
	6 x 36 Floor Tile (5-7/8" x 35-7/16") (15.00 cm x 90.00 cm)	5/16"	13.05	9

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	✓
Wet & Level – Interior Floor	≥ 0.42	✓
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

A DCOF value of ≥ 0.42 is the standard for tiles specified for level interior spaces expected to be walked upon when wet, as stated in ANSI A137.1-2012, Section 9.6. For more information about DCOF and the DCOF AcuTest™, visit daltile.com/DCOF.

APPLICATION NOTES:

Suitable for exterior applications in freezing and non-freezing climates, when proper installation methods are followed.

TRIM

	Type	Number	Size	Pieces/ Carton
	Bullnose	S-43H9	3 x 18	16

Floor bullnose trim is intended to coordinate with floor tile in the standard 90-degree installation position.

INSTALLATION

Grout Joint Recommendation	Shade Variation
3/16" (Overlap should not exceed 33% when installing tile with a length 15" or greater in a staggered brick-joint pattern.)	High (V3)

PERFORMANCE CHARACTERISTICS

	ASTM#	Result
Water Absorption	C373	< 0.5%
Breaking Strength	C648	> 275 lbs
Scratch Hardness	MOHS	8.0
Chemical Resistance	C650	Resistant
Abrasion Resistance	C1027	3

For additional information on test results, visit us at: daltile.com/information/TestResults.

NOTES

Since there are variations in all fired ceramic and natural products, tile and trim supplied for your particular installation may not match samples. Final confirmation should be made from actual tiles and trim prior to installation. Manufactured in accordance with ANSI A137.1 standards.

Not for use on ramps. Water, oil, grease, improper drainage and certain footwear can create slippery conditions. Floor applications expected to be exposed to these conditions require extra caution in product selection.

For additional information refer to "Factors to Consider" at: daltile.com/Factors.

Special consideration needs to be given when installing tiles greater than 15 inches. Please refer to daltile.com/LargeTiles for more information.

Use of a latex modified thin-set is recommended for installation. For more information, visit daltile.com.

Saddle Brook XT™ with StepWise™ technology is also available for exterior floor applications. For more information, visit daltile.com/SaddleBrookXT.

IMAGINE WHAT'S POSSIBLE™

TW-001-DA

WALL

ARTIGIANO™

GLAZED CERAMIC

Enjoy the Charm of Handcrafted Style

Inspired by the homes of southern Europe, Artigiano brings artisan appeal into any room. Its glossy, hand-painted appearance and irregular edges add to its rich, old-world look. Offered in seven earthy, neutral colors and two linear sizes, this resurgent design adds subtle charm to wall designs.

- ARTISAN APPEAL
  - Captures the warmth and charm of old-world Europe
  - Hand-painted look and irregular edges reflect the beauty and tradition of handmade tile
  - Enjoy a handcrafted, artisan look
- CREATE SUBTLE FEATURE WALLS
  - Offered in two linear sizes, ideal for creating backsplashes: 3" x 6" and 3" x 12"
  - Neutral, earthy color palette easily coordinates with virtually any room design

Cover and above photos feature Riviera Pompeii and Italian Alps 3 x 6 wall tile.

SIZES

			Thickness	Sq. Ft./ Carton	Pieces/ Carton
	3 x 12 Wall Tile	(2-15/16" x 11-3/4") (7.50 cm x 30.00 cm)	5/16"	5.28	22
	3 x 6 Wall Tile	(2-15/16" x 5-7/8") (7.50 cm x 15.00 cm)	5/16"	5.28	44

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	
Pool Linings	N/A	

APPLICATION NOTES:

Suitable for exterior applications in non-freezing climates, when proper installation methods are followed.

TRIM

	Type	Number	Size	Pieces/ Carton
	Bullnose	S-4369 (6" Side)	3 x 6	44

INSTALLATION

Grout Joint Recommendation	Shade Variation
1/8"	Low (V1)

PERFORMANCE CHARACTERISTICS

	ASTM#	Result
Water Absorption	C373	< 20.0%
Breaking Strength	C648	120-230 lbs
Scratch Hardness	MOHS	4.0-6.0
Chemical Resistance	C650	Resistant

For additional information on test results, visit us at: daltile.com/information/TestResults.

NOTES

Since there are variations in all fired ceramic and natural products, tile and trim supplied for your particular installation may not match samples. Final confirmation should be made from actual tiles and trim prior to installation. Manufactured in accordance with ANSI A137.1 standards.

For additional information refer to "Factors to Consider" at: daltile.com/Factors.

Schluter® Systems

PROFILE OF INNOVATION

FLOOR PROFILES

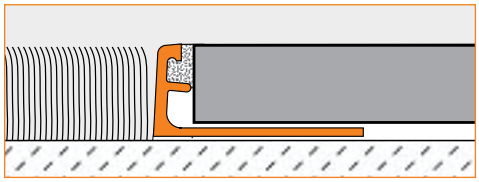
INNOVATIVE SOLUTIONS FOR CERAMIC AND STONE TILE

FINISHING, EDGE PROTECTION, AND TRANSITIONS

Because ceramic and stone tiles are inherently brittle, their exposed edges can chip and crack if left unprotected. Transitions between floor surfaces and at thresholds are particularly vulnerable to damage. Schluter-Systems offers a variety of profiles to provide edge protection and transitioning at thresholds and between adjacent surfaces, resulting in durable, maintenance-free tiled coverings. The profiles can be grouped into two categories: transitions between same-height surfaces and transitions between different-height surfaces

Application and Function

Same-height Transitions



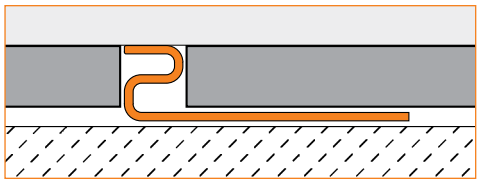
1.1 Schluter®-SCHIENE is designed to provide edging for tile coverings. Typical applications include edge protection where tile is bordered by carpet, at expansion joints, or as a decorative edging for stairs. SCHIENE is available in stainless steel, solid brass, aluminum, and anodized aluminum. The profile features a trapezoid- perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and an 87° sloped vertical wall section that transfers point loads to the substrate and surface covering while protecting tile edges from damage. SCHIENE, in solid brass, aluminum, and anodized aluminum, features a 5° sloped top flange and fillet at the anchoring leg/vertical section interface to enhance edge protection by reducing stresses on the tile, and, in sizes greater than 1/4" *(6 mm)*, features an

1.1 Schluter®-SCHIENE

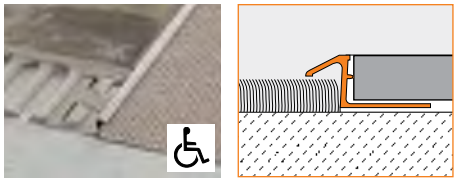
1.6 Schluter®-DECO

1.3 Schluter®-RENO-T

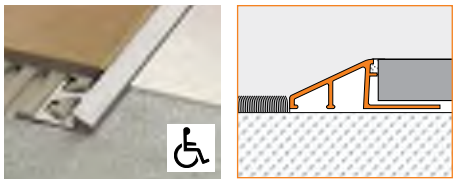
integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of SCHIENE, in all materials, is available with a special radius perforation “R” so that the profile can be used to form curves.



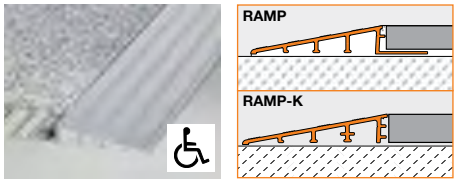
1.6 Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings, such as wood or carpet. The profile is available in stainless steel, solid brass, chrome-plated



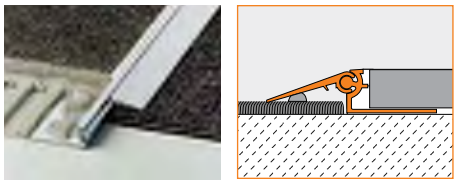
1.4 Schluter®-RENO-TK



1.2 Schluter®-RENO-U

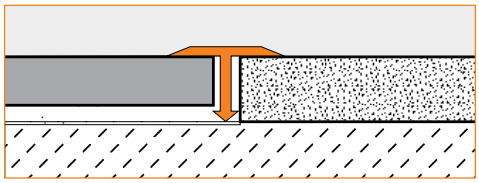


1.8 Schluter®-RENO-RAMP/-K



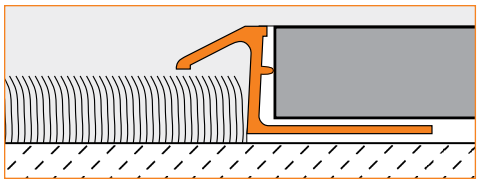
1.7 Schluter®-RENO-V

solid brass, and anodized aluminum. DECO features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a 1/4" *(6 mm)*-wide visible surface that meets the high aesthetic requirements of showrooms, lobbies, galleries, exhibition booths, etc. The anchoring leg of DECO, in solid brass, chrome-plated solid brass, and anodized aluminum, is available with a special radius perforation “R” so that the profile can be used to form curves. DECO in chrome-plated brass requires a relatively large bending radius.

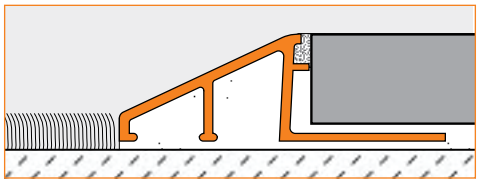


1.3 Schluter®-RENO-T is designed to provide transitions between existing same-height, hard-surface floor coverings (e.g., ceramic tile or natural stone, parquet flooring, concrete pavers, laminate, etc.), primarily in retrofit applications. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-T is installed within the existing joint cavity and overlaps adjoining surface materials, thus preventing edges from becoming damaged when subjected to mechanical stress. RENO-T, in brass and anodized aluminum size 9/14, is flexible in the lateral direction and can be used in curved applications.

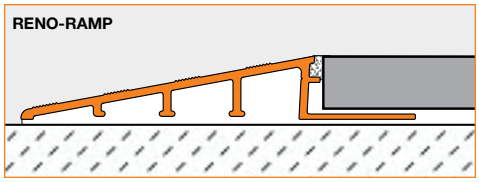
Different-height Transitions

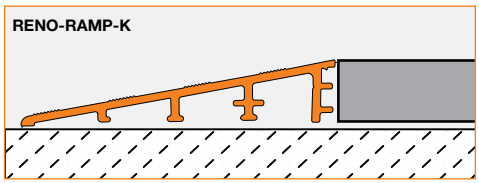


1.4 Schluter®-RENO-TK is designed to provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-TK features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface to eliminate trip hazards and protect tile edges. The 1/4" *(6 mm)* channel beneath the sloped flange of the profile hides and protects the cut edge of lower adjoining surface coverings. All sizes of the RENO-TK are compliant with the Americans with Disabilities Act (ADA). RENO-TK, in anodized aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of RENO-TK, in solid brass and anodized aluminum, sizes 60 to 100, is available with a special radius perforation "R" so that the profile can be used to form curves.

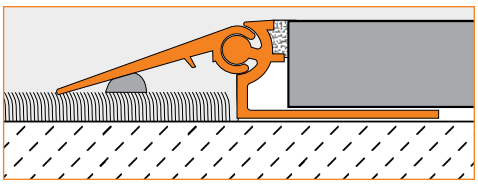


1.2 Schluter®-RENO-U is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-U features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface (approximately 25°) that eliminates trip hazards and protects tile edges. The leading edge of the profile abuts the lower surface covering, typically VCT. RENO-U, in aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. In installations where the leading edge abuts a lower surface covering, all sizes of RENO-U, except the 3/4" *(20 mm)* and 11/16" *(17.5 mm)*, are compliant with the Americans with Disabilities Act (ADA). In installations where the leading edge rests on top of the lower floor covering (e.g., finished concrete), the 3/4" *(20 mm)*, 11/16" *(17.5 mm)*, and 9/16" *(15 mm)* sizes are not ADA-compliant.
Note: When using Schluter® uncoupling membranes with RENO-U profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.





1.8 Schluter®-RENO-RAMP is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete, particularly in commercial applications where wheel carts are used (e.g., bakeries, hospitals, etc.). The profile is available in anodized aluminum. RENO-RAMP features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped transition surface that terminates at the height of the tile edge. The profile protects tile edges and provides a sloped surface to eliminate trip hazards and allow easy access for wheel carts. RENO-RAMP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.
Note: When using Schluter® uncoupling membranes with RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
Schluter®-RENO-RAMP-K is a variant of the profile without an anchoring leg. RENO-RAMP-K is installed adjacent to existing floor coverings, e.g., retrofitting between existing floor coverings and bare concrete without having to disturb the existing flooring. All sizes of RENO-RAMP, except sizes 9/16" *(15 mm)* and 3/4" *(20 mm)*, are compliant with the Americans with Disabilities Act (ADA).



1.7 Schluter®-RENO-V is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations. The profile is available in anodized aluminum. RENO-V features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a movable transition arm that allows the profile to adjust to the height of the adjacent floor covering via a ball-and-socket joint. The profile protects tile edges and provides a sloped surface to eliminate trip hazards. RENO-V features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. RENO-V is also suitable for heavy-duty applications (e.g., entrances to garages or loading docks). In such cases, the adjustable arm is backfilled with mortar.

Material Properties and Areas of Application

Schluter edge-protection and transition profiles are resistant to most chemicals encountered in tiled environments. In special cases, the suitability of a proposed type of profile must be verified based on the anticipated chemical, mechanical, and/or other stresses. Exceptions and special considerations are listed below:

Stainless steel profiles are roll-formed, resulting in a slightly different contour from those made of extruded brass or aluminum. Stainless steel can sustain high mechanical stresses and is particularly well suited for applications requiring resistance against chemicals and acids; for example in the food industry, breweries, dairies, commercial kitchens, and hospitals, as well as in residential applications. Typically, the profiles are formed using stainless steel 304 (1.4301 = V2A). For more severe chemical exposure, such as de-icing salts and chemicals used in swimming pools, we recommend the use of stainless steel 316 L (1.4404 = V4A), which offers even higher corrosion resistance than the 304. Even stainless steel cannot withstand all chemical exposures, such as hydrochloric acid, hydrofluoric acid or certain chlorine, chloride, and brine concentrations.

Chrome-plated solid brass is ideal for matching chrome fixtures. Surfaces must be protected against abrasion or scratching.

Solid brass can sustain high mechanical stresses, as well as most chemicals commonly encountered in tiled environments. Solid brass that is exposed to air will oxidize, resulting in a natural patina. If exposed to moisture or aggressive substances, heavy oxidation and spotting may occur.

Aluminum profiles must be tested to verify their suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline. Since aluminum is sensitive to alkaline substances, exposure to the alkali (depending on the concentration and duration of exposure) may result in corrosion (aluminum hydroxide formation). Therefore, it is important to remove mortar or grout residue from visible surfaces. In addition, ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water.

Anodized aluminum profiles feature an anodized layer that retains a uniform appearance during normal use, but is not color-stable in exterior applications. The surface is susceptible to scratching and wear and may be damaged by grout or setting material. Therefore, these materials must be removed immediately. Otherwise, the description regarding aluminum applies.

Cutting Profiles

Observe all safety instructions and standards as directed by the cutting tool manufacturer, including protective eyewear, hearing protection, and gloves.

Always measure carefully and dry fit the profiles, corners, and connectors to ensure proper fit and alignment prior to setting tile.

Aluminum profiles may be cut using any of the following options:

- **Hacksaw** with a bimetal blade and the highest teeth per inch (TPI) available.
- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Chop saw or Miter Saw** with a non-ferrous blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Stainless steel profiles may be cut using any of the following options:

- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Band Saw** with a metal cutting blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Installation

SCHIENE, JOLLY, DECO, RENO-TK, RENO-U, RENO-RAMP, and RENO-V

1. Select the profile according to tile thickness and format.

   Note: When using Schluter® uncoupling membranes with RENO-U and RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.

   For RENO-U and RENO-RAMP, fill the cavity beneath the sloped section of the profile with thin-set mortar. Follow this step when RENO-V is used in heavy-duty applications, as well.
3. Press the perforated anchoring leg of the profile into the mortar and align.
4. Trowel additional thin-set mortar over the perforated anchoring leg to ensure full coverage and support of the tile edges.
5. Solidly embed the tiles so that the tiled surface is flush with the top of the profile; the profile should not be higher than the tiled surface, but rather up to approx. 1/32" *(1 mm)* lower.
6. Set the tile to the integrated joint spacer, which ensures a uniform joint of 1/16" - 1/8" *(1.5 - 3 mm)*. For DECO and stainless steel profiles, leave a space of approximately 1/16" - 1/8" *(1.5 - 3 mm).*
7. Fill the joint completely with grout or setting material.
8. Remove grout or mortar residue from the visible surface of the profile.

RENO-RAMP-K

1. Fill the cavity beneath the sloped section of the profile with thin-set mortar.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.
3. Press the profile into the mortar and abut to the adjacent floor covering. The profile should not be higher than the adjacent floor covering, but rather up to approx. 1/32" *(1 mm)* lower.
4. Fill the joint completely with grout or setting material.
5. Work with materials and tools that will not scratch or damage sensitive surfaces. Setting materials must be removed immediately.

RENO-T

1. Select the profile according to joint width, to ensure proper support of the lateral crosspiece.
2. The joint cavity must be at least 3/8" *(9 mm)* deep and free of debris. Substances that inhibit adhesion must be removed from the sides of the joint.

3. Fill the joint with elastomeric sealant such as Schluter®-KERDI-FIX or similar. Then insert the vertical leg of RENO-T in the joint so that the lateral crosspiece rests completely on the edges of the surface coverings.
4. Remove any excess sealant with a suitable cleaner.

Maintenance

Schluter edge-protection and transition profiles require no special maintenance or care and are resistant to mold and fungi. Clean profiles periodically using neutral cleaning agents.

Stainless steel surfaces exposed to the environment or aggressive substances should be cleaned periodically using a mild household cleaner. Regular cleaning maintains the neat appearance of stainless steel and reduces the risk of corrosion. All cleaning agents must be free of hydrochloric acid, hydrofluoric acid, and chlorides. Stainless steel surfaces develop a sheen when treated with a chrome-polishing agent.

Oxidation films on exposed **solid brass** or **aluminum** can be removed by using a conventional polishing agent, but will form again.

In the case of **anodized aluminum**, **color-coated aluminum,** and **chrome-plated solid brass**, do not use abrasive cleaning agents.

Schluter® Systems Floor Profiles 5-Year Limited Warranty

LIMITED WARRANTY COVERAGE: Subject to the conditions and limitations as stated in this **Schluter® Systems Floor Profiles 5-Year Limited Warranty** (the "**Limited Warranty**"), Schluter Systems warrants that its Schluter®-SCHIENE, Schluter®-JOLLY, Schluter®-RENO-TK, Schluter®-DECO, Schluter®-RENO-U, Schluter®-RENO-T, Schluter®-RENO-RAMP, Schluter®-RENO-RAMP-K, and Schluter®-RENO-V (collectively, the "**Products**") will be free from manufacturing defects and will perform as described in the Schluter Systems Floor Profiles Technical Data Sheet (collectively, the "**Written Materials**"[1]) for a period of five (5) years from the date of purchase when installed and used in accordance with the terms and conditions of the Written Materials and industry standard guidelines that are not in conflict with the Written Materials in effect at the time of installation.

For the purposes of this Limited Warranty, "**Owner**" is defined as the original end user of the property in which the Products are installed; and "**Tile Assembly**" is defined to include the Products, non-reusable flooring surfaces, and applicable setting and grouting materials.

This Limited Warranty is only applicable to installations in the United States of America and Canada. Schluter Systems is not responsible or liable under any circumstances for determining the suitability of the Products for the Owner's intended purpose. It is the responsibility of the Owner to consult with an experienced and professional installer to ensure the suitability of the Products, subfloor/substrate and all building materials in the installation and that the Written Materials are followed properly.

RESOLUTION: If the Products are installed and used in accordance with the terms and conditions as described hereinabove and such Products are proven defective within the applicable warranty term, the Owner's exclusive remedy and the sole obligation of Schluter Systems, at its election, shall be to (a) reinstall or replace the failed portion of the Tile Assembly or (b) pay an amount not to exceed the original square foot cost of the installation of the Tile Assembly verified to be defective. Due to conditions beyond the control of Schluter Systems (e.g., color and shade availability, discontinuation, normal wear and tear), Schluter Systems cannot guarantee or warrant an exact match to the specific tile, stone, or other flooring materials used in the original installation. In such event, substantially similar materials may be substituted.

EXCLUSIONS FROM COVERAGE: This Limited Warranty excludes and in no event shall Schluter Systems have any liability for any indirect, special, incidental, punitive, exemplary, or consequential damages, including lost profits, arising out of or otherwise connected to the failure of the Products or Tile Assembly, regardless of any strict liability or active or passive negligence of Schluter Systems, and regardless of legal theory, whether in contract, tort, extra-contractual or other. This Limited Warranty further excludes any loss or damage arising out of or otherwise connected to: acts of war, terrorism, fire, explosion, natural disaster, acts of God, any failure to comply with the Written Materials, inadequate subfloor/substrate, improper preparation or other failure of subfloor/substrate, faulty or negligent penetration of the Products or subfloor/substrate, intentional acts of destruction, structural failure, misuse of or failure to maintain the Products, normal wear and tear, scratches, dents, corrosion or discoloration (whether caused by excessive heat, chemical cleaning products, abrasive agents or otherwise), efflorescence and shading which are a natural occurrence with cementitious materials and are not considered a defective condition for the purposes of this Limited Warranty, variations of texture, color or shade from those on product samples, packaging materials or other marketing materials, or other causes unrelated to the Products (e.g. floor covering failure, excess point loading, overvoltage). This Limited Warranty excludes exterior applications and applications utilizing glass tile or other non-approved floor coverings, unless specifically approved in writing on a case by case basis by the Schluter Systems Technical Services Director.

This Limited Warranty is conditioned and will be considered null and void and Schluter Systems will have the right to refuse any claims if: (a) the Products have been improperly stored or installed, or (b) the Products are subject to abusive or abnormal use, lack of maintenance, or used in a manner other than that for which the Products were designed or in any way contrary to the Written Materials.

DISCLAIMER: There are no warranties beyond this expressed warranty as stated herein. To the extent permitted by law, all other warranties, representations or conditions, expressed or implied, are hereby disclaimed and excluded, including but not limited to the implied warranties of **MERCHANTABILITY** or **FITNESS FOR A PARTICULAR PURPOSE** (as limited to such purposes as described in the Written Materials) or arising from a course of dealing, usage of trade or otherwise by law. ANY IMPLIED WARRANTIES ARISING BY OPERATION OF LAW ARE LIMITED IN DURATION TO THE TERM OF THIS LIMITED WARRANTY. NO REPRESENTATION, PROMISE, AFFIRMATION OR STATEMENT BY ANY EMPLOYEE OR AGENT OF SCHLUTER SYSTEMS WILL BE ENFORCEABLE AGAINST SCHLUTER SYSTEMS UNLESS IT IS SPECIFICALLY INCLUDED IN THIS LIMITED WARRANTY OR AUTHORIZED IN WRITING BY THE SCHLUTER SYSTEMS TECHNICAL SERVICES DIRECTOR. This Limited Warranty is given in lieu of any other warranty, whether expressed or implied. The remedies contained herein are the only remedies available for breach of this Limited Warranty. This Limited Warranty extends only to the Owner and is not transferable or assignable unless authorized by written agreement and signed by the Schluter Systems Technical Services Director or otherwise prohibited by specific state or provincial law. This Limited Warranty gives you specific legal rights; some states and provinces do not allow disclaimers or other restrictions of implied warranties; some of the above disclaimers may not apply to you. **No changes or modifications of any terms or conditions of this Limited Warranty are permitted unless duly authorized in writing by the Schluter Systems Technical Services Director.** This Limited Warranty shall supersede and replace any and all prior oral or written warranties, agreements, or other representations made by or on behalf of Schluter Systems relative to the Products or the application of the Products and shall apply to any installation occurring on or after April 8, 2019. If the Products are used in conjunction with other Schluter products, a different Schluter warranty may apply. For the most current information and materials regarding Schluter Systems warranties and programs, please visit https://www.schluter.com/schluter-us/en_US/downloadfiles.

MAKING A CLAIM: To make a claim under this Limited Warranty, the Owner must provide Schluter Systems[2] with written notice within thirty (30) days of any alleged defect in the Products covered by this Limited Warranty, together with date and proof of purchase of such Products and/or all of its components and name and address of all installers and all invoices related to the original installation, failing which this Limited Warranty shall have no legal effect[3]. Schluter Systems reserves the right at its election and as a condition of this Limited Warranty to inspect the alleged failed and/or defective Products.

All U.S. Claims shall be sent to:

Schluter Systems L.P.
Attn: Warranty Claims Dept.
194 Pleasant Ridge Road
Plattsburgh, NY 12901-5841

All Canadian Claims shall be sent to:

Schluter Systems (Canada), Inc.
Attn: Warranty Claims Dept.
21100 chemin Ste-Marie
Ste-Anne-de-Bellevue, QC H9X 3Y8

[1] If there are any conflicting terms between any Written Materials, the most recently updated document shall be deemed to control.

[2] This Limited Warranty is limited to sales of the Products made in and intended for use in the United States and Canada. For the purposes of this Limited Warranty, Schluter Systems L.P. shall offer warranty coverage to Owners located in the United States, and Schluter Systems (Canada) Inc. shall offer warranty coverage to Owners located in Canada.

[3] In the event that Owner fails to provide such required invoices relating to the original installation, Schluter Systems shall pay Owner an amount equal to the average, reasonable costs of a comparable installation. If the parties fail to agree on such amount, such dispute shall promptly, and in the first instance, be submitted: (a) if a U.S. claim, to arbitration in Clinton County, New York, in accordance with the rules of the American Arbitration Association, or (b) if a Canadian claim, in the Province of Quebec, Canada, in accordance with the ADRIC Arbitration Rules. Any outcome of such arbitration proceeding shall be final and binding upon the parties hereto.

Schluter Systems L.P. • 194 Pleasant Ridge Road, Plattsburgh, NY 12901-5841 • Tel.: 800-472-4588 • Fax: 800-477-9783
Schluter Systems (Canada) Inc. • 21100 chemin Ste-Marie, Ste-Anne-de-Bellevue, QC H9X 3Y8 • Tel.: 800-667-8746 • Fax: 877-667-2410

TownePlace Suites New Build Guestroom Building

TS-002-SCH

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Transition Strip
Item Type	Metal Edge Trim
Description	Finishing edge-protection profile, metal tile trim.
Manufacturer	Schluter Systems
Model	Jolly
Dimensions	Coordinate with tile thickness
Finish	Satin Nickel Anodized
CSI #	093000 - Tiling
Omniclass #	22-093013 - Tiling
Part of an Assembly	N
Lead Time	To be verified
Warranty	Warranted to be free from manufacturing defects for a period of 5 years from the date of the purchase order

Schluter® Systems

PROFILE OF INNOVATION

FLOOR PROFILES

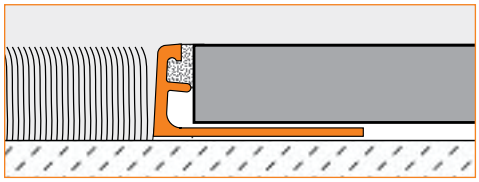
INNOVATIVE SOLUTIONS FOR CERAMIC AND STONE TILE

FINISHING, EDGE PROTECTION, AND TRANSITIONS

Because ceramic and stone tiles are inherently brittle, their exposed edges can chip and crack if left unprotected. Transitions between floor surfaces and at thresholds are particularly vulnerable to damage. Schluter-Systems offers a variety of profiles to provide edge protection and transitioning at thresholds and between adjacent surfaces, resulting in durable, maintenance-free tiled coverings. The profiles can be grouped into two categories: transitions between same-height surfaces and transitions between different-height surfaces

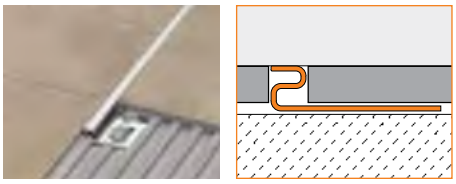
Application and Function

Same-height Transitions

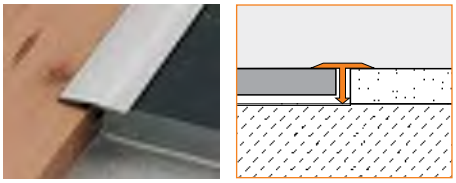


1.1 Schluter®-SCHIENE is designed to provide edging for tile coverings. Typical applications include edge protection where tile is bordered by carpet, at expansion joints, or as a decorative edging for stairs. SCHIENE is available in stainless steel, solid brass, aluminum, and anodized aluminum. The profile features a trapezoid- perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and an 87° sloped vertical wall section that transfers point loads to the substrate and surface covering while protecting tile edges from damage. SCHIENE, in solid brass, aluminum, and anodized aluminum, features a 5° sloped top flange and fillet at the anchoring leg/vertical section interface to enhance edge protection by reducing stresses on the tile, and, in sizes greater than 1/4" *(6 mm)*, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of SCHIENE, in all materials, is available with a special radius perforation "R" so that the profile can be used to form curves.

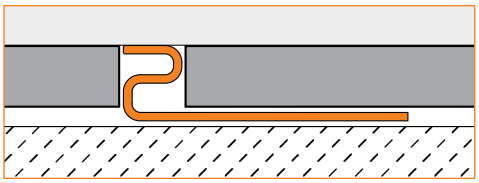
1.1 Schluter®-SCHIENE



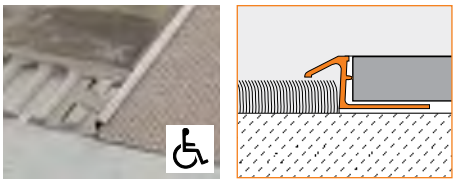
1.6 Schluter®-DECO



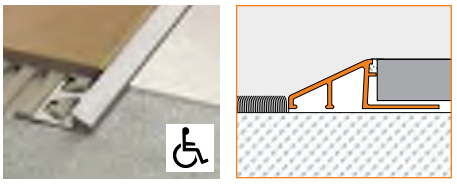
1.3 Schluter®-RENO-T



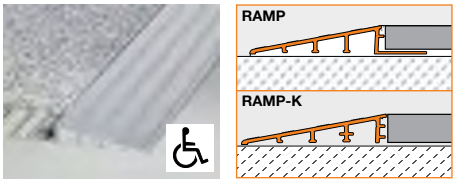
1.6 Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings, such as wood or carpet. The profile is available in stainless steel, solid brass, chrome-plated solid brass, and anodized aluminum. DECO features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a 1/4" *(6 mm)*-wide visible surface that meets the high aesthetic requirements of showrooms, lobbies, galleries, exhibition booths, etc. The anchoring leg of DECO, in solid brass, chrome-plated solid brass, and anodized aluminum, is available with a special radius perforation "R" so that the profile can be used to form curves. DECO in chrome-plated brass requires a relatively large bending radius.



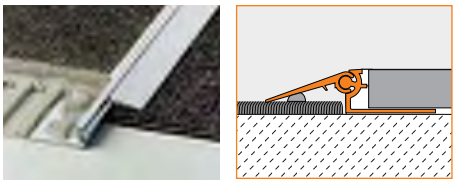
1.4 Schluter®-RENO-TK



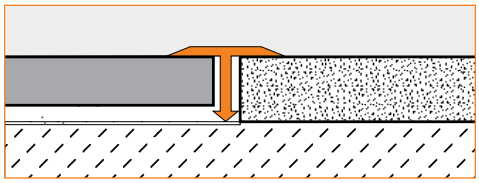
1.2 Schluter®-RENO-U



1.8 Schluter®-RENO-RAMP/-K

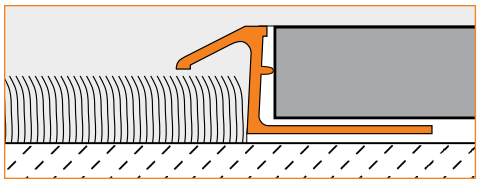


1.7 Schluter®-RENO-V

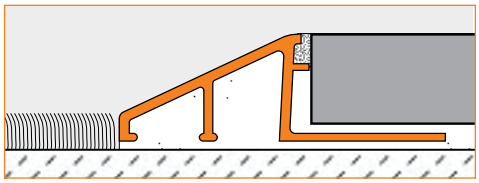


1.3 Schluter®-RENO-T is designed to provide transitions between existing same-height, hard-surface floor coverings (e.g., ceramic tile or natural stone, parquet flooring, concrete pavers, laminate, etc.), primarily in retrofit applications. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-T is installed within the existing joint cavity and overlaps adjoining surface materials, thus preventing edges from becoming damaged when subjected to mechanical stress. RENO-T, in brass and anodized aluminum size 9/14, is flexible in the lateral direction and can be used in curved applications.

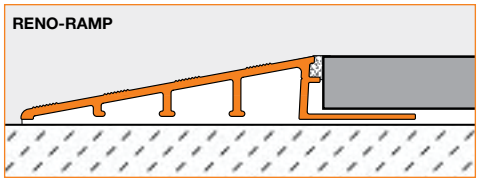
Different-height Transitions

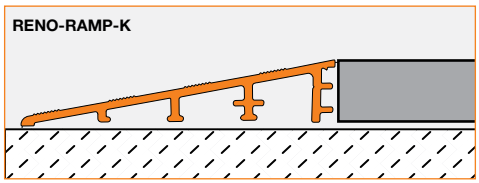


1.4 Schluter®-RENO-TK is designed to provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-TK features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface to eliminate trip hazards and protect tile edges. The 1/4" *(6 mm)* channel beneath the sloped flange of the profile hides and protects the cut edge of lower adjoining surface coverings. All sizes of the RENO-TK are compliant with the Americans with Disabilities Act (ADA). RENO-TK, in anodized aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of RENO-TK, in solid brass and anodized aluminum, sizes 60 to 100, is available with a special radius perforation "R" so that the profile can be used to form curves.

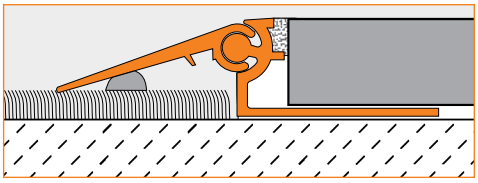


1.2 Schluter®-RENO-U is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-U features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface (approximately 25°) that eliminates trip hazards and protects tile edges. The leading edge of the profile abuts the lower surface covering, typically VCT. RENO-U, in aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. In installations where the leading edge abuts a lower surface covering, all sizes of RENO-U, except the 3/4" *(20 mm)* and 11/16" *(17.5 mm)*, are compliant with the Americans with Disabilities Act (ADA). In installations where the leading edge rests on top of the lower floor covering (e.g., finished concrete), the 3/4" *(20 mm)*, 11/16" *(17.5 mm)*, and 9/16" *(15 mm)* sizes are not ADA-compliant.
Note: When using Schluter® uncoupling membranes with RENO-U profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.





1.8 Schluter®-RENO-RAMP is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete, particularly in commercial applications where wheel carts are used (e.g., bakeries, hospitals, etc.). The profile is available in anodized aluminum. RENO-RAMP features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped transition surface that terminates at the height of the tile edge. The profile protects tile edges and provides a sloped surface to eliminate trip hazards and allow easy access for wheel carts. RENO-RAMP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.
Note: When using Schluter® uncoupling membranes with RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
Schluter®-RENO-RAMP-K is a variant of the profile without an anchoring leg. RENO-RAMP-K is installed adjacent to existing floor coverings, e.g., retrofitting between existing floor coverings and bare concrete without having to disturb the existing flooring. All sizes of RENO-RAMP, except sizes 9/16" *(15 mm)* and 3/4" *(20 mm)*, are compliant with the Americans with Disabilities Act (ADA).



1.7 Schluter®-RENO-V is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations. The profile is available in anodized aluminum. RENO-V features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a movable transition arm that allows the profile to adjust to the height of the adjacent floor covering via a ball-and-socket joint. The profile protects tile edges and provides a sloped surface to eliminate trip hazards. RENO-V features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. RENO-V is also suitable for heavy-duty applications (e.g., entrances to garages or loading docks). In such cases, the adjustable arm is backfilled with mortar.

Material Properties and Areas of Application

Schluter edge-protection and transition profiles are resistant to most chemicals encountered in tiled environments. In special cases, the suitability of a proposed type of profile must be verified based on the anticipated chemical, mechanical, and/or other stresses. Exceptions and special considerations are listed below:

Stainless steel profiles are roll-formed, resulting in a slightly different contour from those made of extruded brass or aluminum. Stainless steel can sustain high mechanical stresses and is particularly well suited for applications requiring resistance against chemicals and acids; for example in the food industry, breweries, dairies, commercial kitchens, and hospitals, as well as in residential applications. Typically, the profiles are formed using stainless steel 304 (1.4301 = V2A). For more severe chemical exposure, such as de-icing salts and chemicals used in swimming pools, we recommend the use of stainless steel 316 L (1.4404 = V4A), which offers even higher corrosion resistance than the 304. Even stainless steel cannot withstand all chemical exposures, such as hydrochloric acid, hydrofluoric acid or certain chlorine, chloride, and brine concentrations.

Chrome-plated solid brass is ideal for matching chrome fixtures. Surfaces must be protected against abrasion or scratching.

Solid brass can sustain high mechanical stresses, as well as most chemicals commonly encountered in tiled environments. Solid brass that is exposed to air will oxidize, resulting in a natural patina. If exposed to moisture or aggressive substances, heavy oxidation and spotting may occur.

Aluminum profiles must be tested to verify their suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline. Since aluminum is sensitive to alkaline substances, exposure to the alkali (depending on the concentration and duration of exposure) may result in corrosion (aluminum hydroxide formation). Therefore, it is important to remove mortar or grout residue from visible surfaces. In addition, ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water.

Anodized aluminum profiles feature an anodized layer that retains a uniform appearance during normal use, but is not color-stable in exterior applications. The surface is susceptible to scratching and wear and may be damaged by grout or setting material. Therefore, these materials must be removed immediately. Otherwise, the description regarding aluminum applies.

Cutting Profiles

Observe all safety instructions and standards as directed by the cutting tool manufacturer, including protective eyewear, hearing protection, and gloves.

Always measure carefully and dry fit the profiles, corners, and connectors to ensure proper fit and alignment prior to setting tile.

Aluminum profiles may be cut using any of the following options:

- **Hacksaw** with a bimetal blade and the highest teeth per inch (TPI) available.
- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Chop saw or Miter Saw** with a non-ferrous blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Stainless steel profiles may be cut using any of the following options:

- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Band Saw** with a metal cutting blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Installation

SCHIENE, JOLLY, DECO, RENO-TK, RENO-U, RENO-RAMP, and RENO-V

1. Select the profile according to tile thickness and format.

   Note: When using Schluter® uncoupling membranes with RENO-U and RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.

   For RENO-U and RENO-RAMP, fill the cavity beneath the sloped section of the profile with thin-set mortar. Follow this step when RENO-V is used in heavy-duty applications, as well.
3. Press the perforated anchoring leg of the profile into the mortar and align.
4. Trowel additional thin-set mortar over the perforated anchoring leg to ensure full coverage and support of the tile edges.
5. Solidly embed the tiles so that the tiled surface is flush with the top of the profile; the profile should not be higher than the tiled surface, but rather up to approx. 1/32" *(1 mm)* lower.
6. Set the tile to the integrated joint spacer, which ensures a uniform joint of 1/16" - 1/8" *(1.5 - 3 mm)*. For DECO and stainless steel profiles, leave a space of approximately 1/16" - 1/8" *(1.5 - 3 mm).*
7. Fill the joint completely with grout or setting material.
8. Remove grout or mortar residue from the visible surface of the profile.

RENO-RAMP-K

1. Fill the cavity beneath the sloped section of the profile with thin-set mortar.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.
3. Press the profile into the mortar and abut to the adjacent floor covering. The profile should not be higher than the adjacent floor covering, but rather up to approx. 1/32" *(1 mm)* lower.
4. Fill the joint completely with grout or setting material.
5. Work with materials and tools that will not scratch or damage sensitive surfaces. Setting materials must be removed immediately.

RENO-T

1. Select the profile according to joint width, to ensure proper support of the lateral crosspiece.
2. The joint cavity must be at least 3/8" *(9 mm)* deep and free of debris. Substances that inhibit adhesion must be removed from the sides of the joint.

3. Fill the joint with elastomeric sealant such as Schluter®-KERDI-FIX or similar. Then insert the vertical leg of RENO-T in the joint so that the lateral crosspiece rests completely on the edges of the surface coverings.
4. Remove any excess sealant with a suitable cleaner.

Maintenance

Schluter edge-protection and transition profiles require no special maintenance or care and are resistant to mold and fungi. Clean profiles periodically using neutral cleaning agents.

Stainless steel surfaces exposed to the environment or aggressive substances should be cleaned periodically using a mild household cleaner. Regular cleaning maintains the neat appearance of stainless steel and reduces the risk of corrosion. All cleaning agents must be free of hydrochloric acid, hydrofluoric acid, and chlorides. Stainless steel surfaces develop a sheen when treated with a chrome-polishing agent.

Oxidation films on exposed **solid brass** or **aluminum** can be removed by using a conventional polishing agent, but will form again.

In the case of **anodized aluminum**, **color-coated aluminum,** and **chrome-plated solid brass**, do not use abrasive cleaning agents.

Schluter® Systems Floor Profiles 5-Year Limited Warranty

LIMITED WARRANTY COVERAGE: Subject to the conditions and limitations as stated in this **Schluter® Systems Floor Profiles 5-Year Limited Warranty** (the "**Limited Warranty**"), Schluter Systems warrants that its Schluter®-SCHIENE, Schluter®-JOLLY, Schluter®-RENO-TK, Schluter®-DECO, Schluter®-RENO-U, Schluter®-RENO-T, Schluter®-RENO-RAMP, Schluter®-RENO-RAMP-K, and Schluter®-RENO-V (collectively, the "**Products**") will be free from manufacturing defects and will perform as described in the Schluter Systems Floor Profiles Technical Data Sheet (collectively, the "**Written Materials**"[1]) for a period of five (5) years from the date of purchase when installed and used in accordance with the terms and conditions of the Written Materials and industry standard guidelines that are not in conflict with the Written Materials in effect at the time of installation.

For the purposes of this Limited Warranty, "**Owner**" is defined as the original end user of the property in which the Products are installed; and "**Tile Assembly**" is defined to include the Products, non-reusable flooring surfaces, and applicable setting and grouting materials.

This Limited Warranty is only applicable to installations in the United States of America and Canada. Schluter Systems is not responsible or liable under any circumstances for determining the suitability of the Products for the Owner's intended purpose. It is the responsibility of the Owner to consult with an experienced and professional installer to ensure the suitability of the Products, subfloor/substrate and all building materials in the installation and that the Written Materials are followed properly.

RESOLUTION: If the Products are installed and used in accordance with the terms and conditions as described hereinabove and such Products are proven defective within the applicable warranty term, the Owner's exclusive remedy and the sole obligation of Schluter Systems, at its election, shall be to (a) reinstall or replace the failed portion of the Tile Assembly or (b) pay an amount not to exceed the original square foot cost of the installation of the Tile Assembly verified to be defective. Due to conditions beyond the control of Schluter Systems (e.g., color and shade availability, discontinuation, normal wear and tear), Schluter Systems cannot guarantee or warrant an exact match to the specific tile, stone, or other flooring materials used in the original installation. In such event, substantially similar materials may be substituted.

EXCLUSIONS FROM COVERAGE: This Limited Warranty excludes and in no event shall Schluter Systems have any liability for any indirect, special, incidental, punitive, exemplary, or consequential damages, including lost profits, arising out of or otherwise connected to the failure of the Products or Tile Assembly, regardless of any strict liability or active or passive negligence of Schluter Systems, and regardless of legal theory, whether in contract, tort, extra-contractual or other. This Limited Warranty further excludes any loss or damage arising out of or otherwise connected to: acts of war, terrorism, fire, explosion, natural disaster, acts of God, any failure to comply with the Written Materials, inadequate subfloor/substrate, improper preparation or other failure of subfloor/substrate, faulty or negligent penetration of the Products or subfloor/substrate, intentional acts of destruction, structural failure, misuse of or failure to maintain the Products, normal wear and tear, scratches, dents, corrosion or discoloration (whether caused by excessive heat, chemical cleaning products, abrasive agents or otherwise), efflorescence and shading which are a natural occurrence with cementitious materials and are not considered a defective condition for the purposes of this Limited Warranty, variations of texture, color or shade from those on product samples, packaging materials or other marketing materials, or other causes unrelated to the Products (e.g. floor covering failure, excess point loading, overvoltage). This Limited Warranty excludes exterior applications and applications utilizing glass tile or other non-approved floor coverings, unless specifically approved in writing on a case by case basis by the Schluter Systems Technical Services Director.

This Limited Warranty is conditioned and will be considered null and void and Schluter Systems will have the right to refuse any claims if: (a) the Products have been improperly stored or installed, or (b) the Products are subject to abusive or abnormal use, lack of maintenance, or used in a manner other than that for which the Products were designed or in any way contrary to the Written Materials.

DISCLAIMER: There are no warranties beyond this expressed warranty as stated herein. To the extent permitted by law, all other warranties, representations or conditions, expressed or implied, are hereby disclaimed and excluded, including but not limited to the implied warranties of **MERCHANTABILITY** or **FITNESS FOR A PARTICULAR PURPOSE** (as limited to such purposes as described in the Written Materials) or arising from a course of dealing, usage of trade or otherwise by law. ANY IMPLIED WARRANTIES ARISING BY OPERATION OF LAW ARE LIMITED IN DURATION TO THE TERM OF THIS LIMITED WARRANTY. NO REPRESENTATION, PROMISE, AFFIRMATION OR STATEMENT BY ANY EMPLOYEE OR AGENT OF SCHLUTER SYSTEMS WILL BE ENFORCEABLE AGAINST SCHLUTER SYSTEMS UNLESS IT IS SPECIFICALLY INCLUDED IN THIS LIMITED WARRANTY OR AUTHORIZED IN WRITING BY THE SCHLUTER SYSTEMS TECHNICAL SERVICES DIRECTOR. This Limited Warranty is given in lieu of any other warranty, whether expressed or implied. The remedies contained herein are the only remedies available for breach of this Limited Warranty. This Limited Warranty extends only to the Owner and is not transferable or assignable unless authorized by written agreement and signed by the Schluter Systems Technical Services Director or otherwise prohibited by specific state or provincial law. This Limited Warranty gives you specific legal rights; some states and provinces do not allow disclaimers or other restrictions of implied warranties; some of the above disclaimers may not apply to you. **No changes or modifications of any terms or conditions of this Limited Warranty are permitted unless duly authorized in writing by the Schluter Systems Technical Services Director.** This Limited Warranty shall supersede and replace any and all prior oral or written warranties, agreements, or other representations made by or on behalf of Schluter Systems relative to the Products or the application of the Products and shall apply to any installation occurring on or after April 8, 2019. If the Products are used in conjunction with other Schluter products, a different Schluter warranty may apply. For the most current information and materials regarding Schluter Systems warranties and programs, please visit https://www.schluter.com/schluter-us/en_US/downloadfiles.

MAKING A CLAIM: To make a claim under this Limited Warranty, the Owner must provide Schluter Systems[2] with written notice within thirty (30) days of any alleged defect in the Products covered by this Limited Warranty, together with date and proof of purchase of such Products and/or all of its components and name and address of all installers and all invoices related to the original installation, failing which this Limited Warranty shall have no legal effect[3]. Schluter Systems reserves the right at its election and as a condition of this Limited Warranty to inspect the alleged failed and/or defective Products.

All U.S. Claims shall be sent to:

Schluter Systems L.P.
Attn: Warranty Claims Dept.
194 Pleasant Ridge Road
Plattsburgh, NY 12901-5841

All Canadian Claims shall be sent to:

Schluter Systems (Canada), Inc.
Attn: Warranty Claims Dept.
21100 chemin Ste-Marie
Ste-Anne-de-Bellevue, QC H9X 3Y8

[1] If there are any conflicting terms between any Written Materials, the most recently updated document shall be deemed to control.

[2] This Limited Warranty is limited to sales of the Products made in and intended for use in the United States and Canada. For the purposes of this Limited Warranty, Schluter Systems L.P. shall offer warranty coverage to Owners located in the United States, and Schluter Systems (Canada) Inc. shall offer warranty coverage to Owners located in Canada.

[3] In the event that Owner fails to provide such required invoices relating to the original installation, Schluter Systems shall pay Owner an amount equal to the average, reasonable costs of a comparable installation. If the parties fail to agree on such amount, such dispute shall promptly, and in the first instance, be submitted: (a) if a U.S. claim, to arbitration in Clinton County, New York, in accordance with the rules of the American Arbitration Association, or (b) if a Canadian claim, in the Province of Quebec, Canada, in accordance with the ADRIC Arbitration Rules. Any outcome of such arbitration proceeding shall be final and binding upon the parties hereto.

Schluter Systems L.P. • 194 Pleasant Ridge Road, Plattsburgh, NY 12901-5841 • Tel.: 800-472-4588 • Fax: 800-477-9783

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

A76-Series

CHARACTERISTICS

Solo 100% Acrylic Interior-Exterior creates a scrubbable finish that is resistant to burnishing, wearing, and blocking. **Solo** is excellent choice for specifications where 100% acrylic interior finishes are required. It is designed for use on doors, trim, walls, & shutters. **Solo** can be applied to surfaces with a pH up to 13.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350-400 sq. ft. per gallon @ 4 mils wet; 1.5 mils dry

Drying Time, @ 77°F (25°C), 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 35-45 units @ 60°

Tinting with CCE only:

Base:	oz. per gallon:	Strength:
Extra White	0-6	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor

Extra White A76W00051
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 38 ± 2%

Weight Solids: 50 ± 2%

Weight per Gallon: 10.16 lbs (4.61 kg)

Flash Point: NA

Vehicle Type: 100% Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 52.42 grains/(hr ft^2 in Hg)

Mildew Resistant
This coating contains agents which inhibit the growth of mildew on the surface of this coating film.

COMPLIANCE

As of 07/28/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	No
MIR-Manufacturer Inventory	No
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F (10°C). No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 1/4 to 1/2 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.015-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

SPECIFICATIONS

Apply 2 topcoats of Solo directly over existing properly prepared, interior or exterior coatings, or new interior bare drywall, plaster (cured with a pH of less than 13), masonry (cured with a pH of less than 13) and non-bleeding wood.

Interior

Drywall: Self-prime using 2 coats of Solo
or
1 coat ProMar 200 Zero V.O.C. Primer
2 coats Solo

Plaster: Self-prime using 2 coats of Solo
or
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Wood: Self-prime using 2 coats of Solo
or
1 coat Premium Wall and Wood Primer
2 coats Solo

Interior and Exterior

Aluminum, Galvanized & Steel:(if needed)
1 coat All Surface Enamel Latex Primer
2 coats Solo

Block:
1 coat ConFlex Block Filler
2 coats Solo

Masonry, Cement, Stucco:
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Exterior

Wood, Composition Board:
1 coat Exterior Oil-Based Wood Primer
or
1 coat Exterior Latex Wood Primer
2 coats Solo

Plywood:
1 coat Exterior Latex Wood Primer
2 coats Solo

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

continued on back

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

HOTW 07/28/2020 A76W00051 25 03 FRC,SP

CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative or visit www.paintdocs.com to obtain the most current version of the PDS and/or an SDS.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Revision 1

Real Living Decor Package

Issue Date: Nov 23, 2022
Revision Date:

Item Name	Tile Underlayment
Item Type	Crack Suppression Membrane
Description	High performance, pliable, light weight peel and stick membrane underlayment system that minimizes impact noises and the transmission of cracks
Manufacturer	Laticrete International
Model	Fracture Ban 90 (90 mils)
Dimensions	2.3mm thick; 39.25 in. x 30.6 ft Roll
Material Composition	Rubberized membrane
CSI #	09 30 00 Tiling
Omniclass #	22 - 093000 Tiling
Acoustical Performance	Airborne Sound ASTM E90
Structural Performance	ANSI A118.12, ANSI A118.13
Best Practices	Contains Recycled Content
Quality Standards	Impact Insulation Class (IIC) ASTM E2179
Accessories	Primer: As required by the membrane manufacturer.
Thickness	2.3mm
Sound Reduction	IIC = 50; STC = 57
Roll Length	30.6 ft (100 ft² coverage, 24 rolls per pallet)
Product	Fracture Ban 90 (90 mils)
Width	39.25 in.
Warranty	DS 025.0: 25 Year System Warranty DS 230.05: 5 Year System Warranty DS 230.10: 10 Year System Warranty DS 230.13: 1 Year Product Warranty
Notes	1. Product that complies with ANSI A118.12 and is recommended by the manufacturer for the application indicated. Include reinforcement and accessories recommended by manufacturer. 2. Provide self-bonding elastomeric membrane capable of heavy-duty service per ASTM C627. Liquid-applied products will not be allowed.

FRACTURE BAN™

DS-155-0621

Globally Proven Construction Solutions

1. PRODUCT NAME
FRACTURE BAN™

2. MANUFACTURER
LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 1235
Toll Free: 1.800.243.4788, ext. 1235
Fax: +1.203.393.1684
Website: laticrete.com

3. PRODUCT DESCRIPTION
A high performance, pliable, light weight peel and stick membrane designed for use under thin-bed adhesives for ceramic tile, stone and other hard surface installations. This reinforced high strength membrane performs as an anti-fracture and an acoustical underlayment system that eliminates the transmission of stresses from the substrate while dampening the transmission of impact and air borne noise through the floor to the room below. The unique design of this peel and stick membrane allows for usage in both commercial and residential settings where a quick dependable turnaround is required.

Uses
- Residential and commercial
- Retail, malls and stores
- Offices, hotel/motel, hospitals
- Apartment and condo buildings

Advantages
- Provides anti-fracture/sound reduction in one convenient easy to install product
- For installation requiring a quick dependable turnaround
- Hot-applied polymer modified asphaltic adhesive coated on a 100% polyester non-woven with a 60# release liner paper
- Has a white non-woven surface for easy chalk line identification
- Provides a water resistive barrier
- Prevents in plane cracks up to 3/8” (9.5 mm)

Suitable Substrates
- Cement Mortar Bed
- Exterior Glue Plywood (Interior Only)
- Oriented Strand Board (OSB)
- Precast Floor Panels
- Gypsum Underlayments
- Radiant Heated Floors
- Ceramic Tile
- Terrazzo
- Stone
- Self-Leveling and Patching Compounds
- Backer Board
- Existing VAT
- VCT and Vinyl Floors
- Concrete

Packaging
One roll of FRACTURE BAN 40 is 40 mils (1 mm) thick 39.25 in. x 69 ft (1 m x 21 m) or 225 ft² (21 m²). 24 rolls per pallet.

One roll of FRACTURE BAN 90 is 90 mils thick (2.3 mm) 39.25 in. x 30.6 ft (1 m x 9.33 m) or 100 ft² (9.3 m²). 24 rolls per pallet.

FRACTURE BAN Primer
4x1 Gal (4x3.8L) Carton, 48 per pallet
5 Gal (18.9 L) plastic pail, 28 per pallet
245 Gal (927.4 L) heavy-duty intermediate bulk container (IBC)

Approximate Coverage
- One roll of FRACTURE BAN 40 covers 225 ft² (20.9 m²)
- One roll of FRACTURE BAN 90 covers 100 ft² (9.3 m²)

FRACTURE BAN Primer is a concentrate and must be diluted with clean potable water at a 1:1 (primer:water) ratio. Mix/stir concentrate thoroughly prior to and after diluting.

Shelf Life

Factory sealed containers of this product are guaranteed to be of first quality for one (1) year if stored at temperatures >32°F (0°C) and <110°f (43°c).>

Limitations

- FRACTURE BAN™ is not intended for use as a waterproofing membrane. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane (see Section 10 FILING SYSTEMS).
- FRACTURE BAN can only be used in wet areas with NXT® Epoxy Primer
- Do not install moisture-sensitive tile or stone with water based setting materials on top of FRACTURE BAN peel & stick membranes. Also, dimensionally weak natural stone tile that normally would not be categorized as moisture sensitive; such as travertine, limestone, marble and agglomerates can exhibit doming, cupping or curing when wet-set using medium-bed mortar methods of installation over impervious sheet membranes such as FRACTURE BAN. For this reason, areas requiring more than 3/8” (10 mm) buildup require the use of a NXT™ self-leveling underlayment’s or cured 3701 Fortified Mortar application before installation of FRACTURE BAN. When installing natural stone, always do a mockup area of the proposed installation and allow materials to reach full cure to ensure achieving the desired effect.
- Not recommended for use on concrete floors where hydrostatic head pressure exists or moisture vapor transmission in excess of 5 lbs. per 1000 ft² per 24hrs (283?g/s• m^2) as determined by calcium chloride kit test ASTM F1869 is present or 75% RH when tested per ASTM F2170. If the moisture vapor transmission is greater than 5 lbs. per 1000 ft² per 24hrs (283?g/s• m^2) then first coat the concrete floor using NXT Vapor Reduction Coating according to Data Sheet DS 507.0 then proceed with the FRACTURE BAN Primer and FRACTURE BAN membrane application.
- Not recommended for use where horizontal floor movement is greater than 1/4" (6.4 mm). Existing cracks larger than 3/16" (4.8 mm) should be prepared with proper backing material prior to installation of membrane
- Not recommended to cover joints or cracks larger than 3/8" (9.5 mm)
- Not recommended for use where vertical floor movement is present
- For installations over plywood subfloors, please refer to TCNA Method F125A. For expansion joints, reference TCNA Method EJ171
- Must be covered with ceramic tile, stone, or other hard finish. Use protection board for temporary cover prior to finishing horizontal surfaces.
- Do not use solvent based sealants or sealers where contact with membrane may occur
- Do not install when surface temperature is below 40°F (4°C), when ambient temperature is expected to be below 50°F (10°C) during placement or before material takes final set or when temperature will be above 90°F (32°C).
- Do not allow FRACTURE BAN Primer to freeze.
- Do not install FRACTURE BAN or FRACTURE BAN Primer over particleboard, chipboard, hardboard (Masonite), Luan panels, asbestos, interior glue plywood, gypsum-based patching materials, asphalt, coal tar, or lightweight insulating concrete or any other dimensionally unstable materials.
- If FRACTURE BAN is going to be used on an exterior application, FRACTURE BAN Primer must be replaced with NXT® Vapor Reduction Coating and used along with FRACTURE BAN 40 only. Apply the NXT® Vapor Reduction Coating according to DS 507 and then install the FRACTURE BAN 40 directly to the surface primed with the NXT® Vapor Reduction Coating.
- If FRACTURE BAN is going to be used on an exterior application, FRACTURE BAN Primer must be replaced with VAPOR BAN™ Primer ER and used along with FRACTURE BAN 40 only. Apply the VAPOR BAN™ Primer ER according to DS 35222 and then install the FRACTURE BAN 40 directly to the surface primed with the VAPOR BAN™ Primer ER .
- Note: Surfaces must be structurally sound, stable and rigid enough to support ceramic/stone tile, thin brick and similar finishes. Substrate deflection under all live, dead and impact loads, including concentrated loads, must not exceed L/360 for thin bed ceramic tile/brick installations or L/480 for thin bed stone installations where L=span length.

Cautions

- Consult SDS for safety information.
- During cold weather, protect finished work from traffic until fully cured.
- Read and understand the Product Data Sheet and Safety Data Sheet.
- Perform a mock-up to ensure product will perform as required.
- Check www.laticrete.com for any technical bulletins or updated information about the product and its application.
- FRACTURE BAN Primer causes serious eye irritation. In case of eye contact, wash immediately with water.
- Wear gloves and protective goggles.
- When spraying FRACTURE BAN Primer, avoid breathing the fine mist and use a NIOSH approved respirator.
- Contact LATICRETE Technical Services for more information or to answer questions regarding installation.
- Not for submerged applications.
- Keep FRACTURE BAN Primer out of reach of children.

- When treating cracks in a concrete floor or going over saw cut joints install the FRACTURE BAN must be applied a minimum of 3 times the width of the tile being installed. The tile installed over the crack cannot be in contact with the concrete. Follow TCNA Method F125 for the treatment of hairline cracks, shrinkage cracks, and saw cut or control joints. A LATICRETE polymer fortified thin-set should be used to feather the edge of the membrane at least 12" (305 mm) from the edge in order to eliminate any abrupt changes in surface height.

4. TECHNICAL DATA

Applicable Standard

- ANSI A118.12, ANSI A118.13, ASTM C627, ASTM E2179, ASTM E492, ASTM E90

Physical Properties

Standard	Description	Requirement	Test Result	
			40 mil	90 mil
ASTM C627	Robinson Floor Test	Cycles 1 - 14	Extra Heavy	Heavy
ASTM E2179	IIC Rating	Calculate	42	50
ASTM E2179	ΔIIC	›10	14	18
ASTM E90	Airborne Sound	Calculate	54	57

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

•

Surface Preparation

All substrates must be structurally sound, clean and free of dirt, oil, grease, paint, laitance, efflorescence, concrete sealers or curing compounds. Make rough or uneven concrete smooth to a wood float or better finish with a underlayment. Do not level with asphalt based products. Maximum deviation in plane must not exceed 1/4" in 10 ft (6 mm in 3 m) with no more than 1/16" in 1 ft (1.5 mm in 0.3 m) variation between high spots. Refer to Technical Data Sheet 152 “Bonding Ceramic Tile, Stone or Brick Over Wood Floors” (refer to section 10, FILING SYSTEMS).

For concrete floor construction:

To remove any bond-inhibiting materials, clean the surface by mechanically grinding to obtain an International Concrete Repair Institute (ICRI) concrete surface profile (CSP) #2. If the concrete requires further grinding to clean the surface causing a higher CSP, smooth the surface using a slurry bond coat of 254 Platinum or a NXT™ patching or self leveling underlayment.

For wood floor construction:

1. Installer must verify that deflection under all live, dead and impact loads of interior plywood floors does not exceed industry standards of L/360 for ceramic tile and brick or L/480 for stone installations where L=span length.

2. Minimum construction for interior plywood floors.

SUBFLOOR: 5/8" (15 mm) thick exterior glue plywood, either plain with all sheet edges blocked or tongue and groove, over bridged joists spaced 16" (400 mm) o.c. maximum; fasten plywood 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. along intermediate supports with 8d ring-shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3 mm) between sheet ends and 1/4" (6 mm) between sheets edges; all sheet ends must be supported by a framing member; glue sheets to joists with construction adhesive.

UNDERLAYMENT: 5/8" (15 mm) thick exterior glue plywood fastened 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. in the panel field (both directions) with 8d ring-shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3 mm) to 1/4" (6 mm) between sheets and 1/4" (6 mm) between sheet edges and any abutting surfaces; offset underlayment joists from joints in subfloor and stagger joints between sheet ends; glue underlayment to subfloor with construction adhesive. Refer to Technical Data Sheet 152 “Requirements for Direct Bonding of Ceramic or Stone Tiles Over Wood Floors” for complete details.

Application

1. Install FRACTURE BAN™ to a clean properly prepared and primed floor as described in the FRACTURE BAN Primer Data Sheet.

2. Measure the area and cut membrane length 6” to 8” (152-203 mm) longer than needed to allow for a trimmed fit.
3. Lay the pre-cut membrane directly on subfloor with release liner side down.
4. Pull release paper off membrane while hand-smoothing ridges and air pockets to ensure a good bond with 100% contact with subfloor. Once release paper is pulled from membrane an immediate bond will form. It may be extremely difficult to pull membrane from floor once bonded.
5. Trim excess material as needed at walls, corners or termination areas.
6. Apply the next roll in the same fashion as the first roll insuring that the each roll butts up to the previous roll without any gaps.
7. Do not overlap the edges in order to provide a flat surface for subsequent wear surface installation.
8. To ensure a good bond between the FRACTURE BAN and the primed floor, roll the surface with a 75-100 lb. (34-45 kg) floor roller after each section of FRACTURE BAN is installed.
9. Install tile using the appropriate LATICRETE® polymer fortified thin-set.

Perimeter Isolation Strip

When using FRACTURE BAN as an acoustical underlayment it is essential that all walls and building elements are isolated from the floor. The use of acoustical ceiling panels in the space below would provide additional sound control.

Exterior Applications

When applying the NXT® Vapor Reduction Coating according to DS-507 and then install the FRACTURE BAN 40 directly to the surface primed with the NXT® Vapor Reduction Coating. When applying the VAPOR BAN™ Primer ER according to DS-35222 and then install the FRACTURE BAN 40 directly to the surface primed with the VAPOR BAN™ Primer ER. *Note: It is recommended to install a perimeter isolation strip before placing and trimming FRACTURE BAN Membrane. Attach the perimeter isolation strip to the perimeter wall of the entire subfloor, as well as around the perimeter of any protrusions, in order to isolate or break the vibration transmission path between the floor and the wall. Temporarily fasten perimeter isolation strip in place with masking, duct, or carpet tape. The perimeter isolation strip can then be removed after the tiles have set firm. The joints can then be filled with an appropriate acoustical sealant.*

All surfaces must be primed prior to the installation of FRACTURE BAN. FRACTURE BAN Primer is a concentrate and must be diluted with clean potable water prior to application. Always stir or shake FRACTURE BAN Primer concentrate prior to diluting. Water must always be carefully measured in order to ensure proper dilution is achieved. Use a mixing paddle to thoroughly combine primer and water. FRACTURE BAN Primer can be broom, roller, mop, or spray applied. Substrate temperature must be a minimum 40°F (4°C) during primer application and throughout drying time. Additionally, air temperature must be maintained between 50–90°F (10–32°C) during primer application and throughout drying time. The primed surface must also be protected from weather, water and direct sunlight.

6. AVAILABILITY AND COST

Availability

LATICRETE materials are available worldwide.

For Distributor Information, Call:

Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010

For on-line distributor information, visit LATICRETE at **laticrete.com**

Cost

Contact a LATICRETE Distributor in your area.

7. WARRANTY

See 10. FILING SYSTEM:

- DS 025.0: 25 Year System Warranty
- DS 230.05: 5 Year System Warranty
- DS 230.10: 10 Year System Warranty
- DS 230.13: 1 Year Product Warranty

8. MAINTENANCE

Non-finish LATICRETE and LATAPOXY installation materials require no maintenance but installation performance and durability may depend on properly maintaining products supplied by other manufacturers.

9. TECHNICAL SERVICES

Technical Assistance

Information is available by calling the LATICRETE Technical Service Hotline:

Toll Free: 1.800.243.4788, ext. 1235
Telephone: +1.203.393.0010, ext. 1235
Fax: +1.203.393.1948

UL-003-LA

Revision 1

Real Living Decor Package

Issue Date: Nov 23, 2022
Revision Date:

Item Name	Tile Underlayment
Item Type	Floor Leveling Compound
Description	Premium quality, high yielding, fast-drying, fiber reinforced, cement-based underlayment for skim-coating, smoothing and leveling floor substrates
Manufacturer	Laticrete International
Model	Skim Lite
Dimensions	Not Applicable
Material Composition	Cement-Based, fiber reinforced, with high polymer content
CSI #	09 30 00 Tiling
Omniclass #	22 - 093000 Tiling
Compressive Strength	ASTM C109 1800 to 2100 psi (12.4 to 14.8 MPa)
Structural Performance	Flexural Strength (ASTM C1708) - 900 to 1000 psi (6.2 to 6.9 MPa); Tensile Strength (ASTM C1585) - 300 to 400 psi (2.1 to 2.8 MPa)
Warranty	DS 230.13: 1 Year Product Warranty
Notes	1. For areas up to 4 square feet only: a. Feather finish, use to smooth ridges, fill cracks, gouges and joints. b. Trowelable underlayment patch for thickness up to ½ inch without aggregate; up to 1-inch with aggregate. Can be feather edged. 2. Maximum variation in surface of leveling coat shall not exceed 1/8" in 8'-0" from required plane. 3. Leveling coat shall be cured at least 24 hours before tile is applied. 4. Surface to which leveling coat is to be applied shall be free of any coatings, oil, and wax.

SKIM LITE

DS-506-0721

Globally Proven Construction Solutions

1. PRODUCT NAME
SKIM LITE

2. MANUFACTURER
LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 1235
Toll Free: 1.800.243.4788, ext. 1235
Fax: +1.203.393.1684
Website: laticrete.com

3. PRODUCT DESCRIPTION
Skim Lite is a premium quality, high yielding, fast-drying, fiber reinforced, cement-based underlayment designed for skim-coating, smoothing and leveling prior to the application of floor coverings. Skim Lite offers the customer light weight properties while maintaining strong surface, being rated for caster wheel use. With installer safety in mind, this product contains no respirable crystalline silica levels that exceed the OSHA action level*.

Uses
- Repairs

Advantages
- Rapid setting formula
- Ready for finished flooring in as soon as 20 minutes
- Fiber Reinforced
- High polymer content
- Apply from skim depth to 1” (25 mm)
- Contains no respirable crystalline silica levels that exceed the OSHA action level*
- Caster Wheel Safe
- 40% lighter weight formula
- Fantastic workability and consistent results
- High coverage rate
- Direct replacement for NXT Skim, SUPERCAP SkimCoat, DRYTEK Skimcoat
- Can be applied over Gypsum based substrates

* OSHA action level set forth in OSHA’s Respirable Crystalline Silica (RCS) standard for construction, 29 CFR 1926.1153, as tested by an independent laboratory to be below the OSHA action level for respirable crystalline silica - see laticrete.com/silica

Suitable Substrates
- Cement Backer Board
- Cement Mortar Bed
- Cement Terrazzo
- Ceramic Tile and Stone
- Concrete
- Non-Cushioned Sheet Vinyl
- Vinyl Tile
- Exterior Glue Plywood (Interior Only)
- Gypsum Underlayments
- Oriented Strand Board (OSB) (Interior Only)

Packaging
8 lb. bag / 96 per pallet / individually packaged
Part: 0918-0008-21

Approximate Coverage

Substrate	Coverage at a feather-edge/skim
Smooth Profile (Underlay., Plywood, etc.)	380 SQ FT* (35.3 M^2)
Rough Profile (Concrete, OSB, etc.)	190 SQ FT* (17.6 M^2)

*Calculated coverage indicated is approximate. Coverage will vary depending on the texture of the surface and/or the thickness the material is applied at.

Shelf Life
Factory sealed containers of this product are guaranteed to be of first quality for one (1) year if stored off the ground in a dry area.

Limitations
- For interior use only.
- Do not install LATICRETE® SKIM LITE over particleboard, chipboard, hardboard (Masonite®), Luan panels, asbestos, asphalt, coal tar, or lightweight insulating concrete or any other dimensionally unstable materials.
- Do not install when surface temperature is below 40°F (4°C) or above 90°F (32°C).
- Do not install over painted surfaces.
- Do not exceed recommended mixing ratio as indicated in mixing instructions. Over watering will weaken product properties.
- Do not apply SKIM LITE over waterproofing or crack isolation membranes.
- Adhesives/mastics, mortars and grouts for ceramic tile, pavers, brick and stone are not replacements for waterproofing membranes. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane on top of the dry SKIM LITE.
- Not for use in submerged applications.
- During cold weather, protect finished work from traffic until fully cured.
- Always refer to finished floor manufacturer's recommendations regarding installation instructions, restrictions, moisture conditions and compatibility.
- Always test performance suitability and compatibility of finished floor systems prior to their application. Sample surfaces should be installed as a field test so as to be representative of entire surface and tested for intended use.

Cautions
- Read and understand the Product Data Sheet and Safety Data Sheet.
- Check www.laticrete.com for any technical bulletins or updated information about the product and its application.
- Contact your local LATICRETE Technical Sales Representative with any questions.
- Consult SDS for more safety information.
- Contains portland cement. Causes severe skin burns and serious eye damage. May cause an allergic skin reaction. Wear protective clothing, gloves and eye protection. In case of contact, flush thoroughly with water.
- Do not take internally.
- Keep out of reach of children.

4. TECHNICAL DATA

Physical Properties

Technical Data	Results
Set Time	15 to 20 minutes*
Compressive Strength (ASTM C109)	1800 to 2100 psi (12.4 to 14.8 MPa)
Flexural Strength (ASTM C1708)	900 to 1000 psi (6.2 to 6.9 MPa)
Tensile Strength (ASTM C1585)	300 to 400 psi (2.1 to 2.8 MPa)

*Drying time is a function of jobsite temperature and other conditions such as humidity and/or installation thickness. Low substrate temperatures and/or high ambient humidity will extend the drying time.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Preparing surface for Concrete Substrate
- Clean substrate to eliminate dust, dirt, oil, grease, paint or any contaminants which may inhibit bonding. Do not use chemicals to clean substrate. Remove any loose particles and vacuum.

- Test surface bond strength of substrate. If minimum 100 psi (0.7 MPa) bond strength is not achieved or the substrate is contaminated, remove contaminants by mechanical means. Retest surface.
- Inspect for contraction joints, construction joints, and cracks in the substrate which may be subject to movement after installation of LATICRETE® SKIM LITE. These must be maintained as joints in the new surface.
- Maintain substrate temperature between 40°F (4°C) and 90°F (32°C) during application and air temperature between 50–90°F (10–32°C) during drying. Provide adequate ventilation to ensure uniform drying.
- For very absorptive concrete, apply a fine mist of water on top of the prepared concrete using a pump garden type sprayer, just prior to SKIM LITE application. Concrete should readily absorb water. Broom out excess standing water. Do not apply SKIM LITE where there is standing water on top of the concrete. If water beads or does not absorb within 60 seconds, additional surface prep is needed.

Preparing for poured Gypsum Underlayment

- Tensile strength of the gypsum underlayment must be at least 100 psi (0.7 MPa), tested in accordance with ASTM C1583.
- Any loose or damaged poured gypsum underlayment will have to be repaired.
- All dirt, oil, paint, laitance, efflorescence, sealers, curing compounds, dust, construction debris, and any other bond breaking contaminants must be removed by diamond grinding or shot blasting.
- Use of chemicals to remove contaminants is prohibited. Use of sweeping compound is not recommended as they may contain oil which will act as a bond breaker.
- Water drop test is recommended to determine if concrete is absorptive prior to application. Refer to DS-502_NXT Primer product data sheet for water drop test instruction. If the water drop test yields a non-suction/non-absorptive result the surface must be prepared by diamond grinding or shot blasting.
- Surface temperature must be 50–90°F (10–32°C) during application and for 24 hours after installation. In all cases, the surface temperature of the prepared concrete slab must be warm enough to avoid condensation on the surface of the concrete.

Embossing Non-Cushioned Vinyl Floors and VCT

Completely remove any wax or other coatings. Roughen smooth surfaces. Wash and rinse thoroughly with clean water. Allow to dry.

Preparing Ceramic Tile or Terrazzo

Ensure tiles are well bonded to the substrate. Mechanically abrade with a carborundum disk. Wash and rinse thoroughly with clean water. Allow to dry.

Preparing Non-Water Soluble Cutback Adhesive

Scrape non-water soluble cutback adhesive residue from the floor and remove excess material. Ensure remaining adhesive residue is completely dry.

Mixing

Mix 2.0 qts. (1.9 L) of clean cool water per 8 lb. (3.6 kg) bag of LATICRETE® SKIM LITE. Add product to water and mix for 3 minutes with a heavy duty drill (650 rpm) to obtain a lump free mix.

Note:

- **Material can be re-mixed to extend pot-life but do NOT add more water when re-mixing.**
- **A Helix Paint Mixer is not preferred.**

Mixing with NXT EMBOSSING ADMIX (for embossing non-cushioned vinyl and VCT flooring)

Mix 2.4 qts. (2.3 L) of NXT EMBOSSING ADMIX per 8 lb. (3.6 kg) bag of NXT SKIM. Add SKIM LITE to NXT EMBOSSING ADMIX and mix for 3 minutes with a heavy duty drill (650 rpm) to obtain a lump free mix.

Note:

- **Material can be re-mixed to extend pot-life but do NOT add more water when re-mixing.**
- **A Helix Paint Mixer is not preferred.**

Application

Apply blended material to substrate with trowel at a thickness from feather-edge to 1" (25 mm) for all surfaces. After initial set of material (approx. 10–15 min.), remove all overlap marks, seams and inconsistencies by scraping with a steel trowel. Key in but do not over trowel. Material can be walked on after 15 to 20 minutes at 70°F (21°C) or higher, depending on thickness.

Flooring Installation

Finished floor goods may be installed as soon as 20 minutes after application, subject to thickness, drying conditions and type of flooring materials. Always refer to finished floor manufacturer's recommendations regarding installation instructions, restrictions, moisture conditions and compatibility. Always test performance suitability and compatibility of finished floor systems prior to their application. Sample surfaces should be installed as a field test so as to be representative of entire surface and tested for intended use.

6. AVAILABILITY AND COST

Availability

LATICRETE materials are available worldwide.

For Distributor Information, Call:

Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010

For on-line distributor information, visit LATICRETE at **laticrete.com**

Cost
Contact a LATICRETE Distributor in your area.

7. WARRANTY
See 10. FILING SYSTEM:
- DS 230.13: 1 Year Product Warranty

8. MAINTENANCE
Non-finish LATICRETE and LATAPOXY installation materials require no maintenance but installation performance and durability may depend on properly maintaining products supplied by other manufacturers.

9. TECHNICAL SERVICES

Revision 1

Real Living Decor Package

Issue Date: Nov 23, 2022
Revision Date:

Item Name	Tile Underlayment
Item Type	Mortar
Description	Lightweight one-step, polymer fortified, Large and Heavy Tile mortar for interior and exterior installation for walls and floors
Manufacturer	Laticrete International
Model	MultiMax Lite
Dimensions	Not Applicable
Material Composition	Cement-Based, fiber reinforced, with high polymer content
CSI #	09 30 00 Tiling
Omniclass #	22 - 093000 Tiling
Structural Performance	ANSI A118.15 HET, A118.4 and A118.11; ISO 13007-1
Quality Standards	ASTM C627 Extra Heavy (TCNA)
Warranty	DS 025.0: 25 Year System Warranty DS 230.13: 1 Year Product Warranty DS 230.15APD: LATICRETE 15 Year Tile & Stone System Warranty DS 230.99: LATICRETE Lifetime System Warranty (United States and Canada)

Website: laticrete.com

3. PRODUCT DESCRIPTION
The ultimate, lightweight one-step, polymer fortified, Large and Heavy Tile mortar for interior and exterior installation of ceramic tile, porcelain tile, glass tile, stone, quarry tile, pavers and brick. MULTIMAX LITE features maximum non-sag performance on walls and maximum buildup of up to ¾" (19 mm) without shrinkage on floors. MULTIMAX LITE "contains no respirable crystalline silica levels that exceed the OSHA action level* and has a smooth, lightweight, easy-to-trowel consistency and a long open time for ease of installation. The robust formula is fiber-reinforced for maximum strength and durability, exceeding ANSI A118.15 requirements. MULTIMAX LITE utilizes LATICRETE HYDROMATIC CURE CHEMISTRY™. This technology accelerates the hydration process to rapidly consume the water in the system, allowing the material to cure in a predictable manner. MULTIMAX LITE is a LATICRETE functional equivalent to 255 MULTIMAX and exceeds its performance criteria.
Equipped with Microban Anti-Microbial Protection

* OSHA action level set forth in OSHA's Respirable Crystalline Silica (RCS) standard for construction, 29 CFR 1926.1153, as tested by an independent laboratory to be below the OSHA action level for respirable crystalline silica - see www.laticrete.com/silica

Uses
- For wall installations of ceramic tile, porcelain tile, glass tile and stone.
- Can be used as a Large and Heavy Tile mortar for flooring installations.
- Ideal for showers, bathrooms and areas where mastic is used.

Advantages
- Lightweight- 25 lb (11.3 kg) bag has coverage of 50 lb (22.7 kg) traditional mortar
- Equipped with anti-microbial technology to protect the treated article.
- Incredible non-sag performance even with heavy tile.
- 40 Minute Open Time
- Smooth creamy
- Exceeds ISO 13007-C2TES1P1 classificatiobn
- lightweight formula.
- Submerged applications
- Exceeds ANSI A118.15 HET, A118.4 and A118.11
- ASTM C627 Extra Heavy (TCNA)
- High shear bond strength.
- Bonds to most substrates
- 25 Year System Warranty**.
- Excellent Large and Heavy Tile performance
- 3/4" (19 mm) thick without shrinkage
- One mortar for Large and Heavy Tile
- walls and thin-bed installations
- Fiber-reinforced for maximum strength and performance
- Ideal for Gauged Porcelain Tile and Gauged Porcelain Tile Panels

Suitable Substrates
- Brick Masonry
- Cement Backer Board
- Cement Plaster/Render
- Cement Terrazzo
- Concrete
- Concrete Block

- Concrete Masonry
- Existing Ceramic Tile and Stone
- Gypsum Plaster
- HYDRO BAN Board
- Mortar Bed
- Properly Prepared Vinyl Or Other Resilient Tile
- STRATA_MAT
- Exterior Glue Plywood (Interior Only)
- Gypsum Wallboard
- Plastic Laminate

Approximate Coverage

	ft^2	m^2
Wall Application 4.9 qts (4.6L) of water		
1/4" x 3/8" (6 mm x 9 mm) notched trowel	50-60	4.6 - 5.5
Large and Heavy Tile Application 5.1 qts (4.8 L) of Water		
1/2" x 1/2" (12 mm x 12 mm) notched trowel	40 - 50	3.7 - 4.6
Thin Bed Applications—5.3 qts (5 L) of Water		
1/4" x 1/4" (6 mm x 6 mm) notched trowel	85 - 95	7.9 - 8.8
1/4" x 3/8" (6 mm x 9 mm) notched trowel	60 - 70	5.5 - 6.5

Shelf Life
Advanced plastic bag provides two (2) year shelf life. (non-rapid versions only) ***High humidity will reduce the shelf life of bagged product.

Limitations
- Not for use directly over particle board, luan, Masonite® or hardwood floors.
- For veneer installations using this product, consult local building code requirements regarding limitations and installation system specifications.
- Adhesives/mastics, mortars and grouts for ceramic tile, pavers, brick and stone are not replacements for waterproofing membranes. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane (see Section 10 FILING SYSTEM).
- Suitable for use with glass tile only when used as a thin bed adhesive. Maximum adhesive mortar thickness not to exceed 3/16" (4.7mm). Follow glass tile manufacturers installation instructions.

Cautions
- Consult SDS for safety information.
- Some marbles and other natural stone have low flexural strength and might not be suitable for installation over wood floors.
- Use LATAPOXY® 300 Adhesive for installing green marble or water sensitive stone and agglomerates, and resin backed tiles and stones.
- During cold weather, protect finished work from traffic until fully cured.
- For white and light-colored stones, use MULTIMAX LITE (white).

4. TECHNICAL DATA

MICROBAN

Silica Dust

Applicable Standard
- ANSI A118.15
- ANSI A118.11
- ANSI A118.4
- ISO 13007-1

Data Sheets are subject to change without notice. For latest revision, visit laticrete.com.

Physical Properties

Test	Test Method	Results
28 day Cure 20 cycle Freeze/Thaw Quarry Tile Shear Strength	ANSI A118.15 7.3.3	400-500 psi (2.7 - 3.4 MPa)
30 minute Open Time	ANSI A118.15 5.3.5	100-125 psi (0.7 - 0.8 MPa)
28 day Quarry Tile Shear Strength	ANSI A118.15 7.3.2	400-500 psi (2.7 - 3.4 MPa)
14 day cure 14 day Heat Age Porcelain Tile Shear Strength	ANSI A118.15 7.2.7	500-600 psi (3.4 - 4.1 MPa)
28 day Cure 20 Cycle Freeze/Thaw Porcelain Tile Shear Strength	ANSI A118.15 7.2.6	425-475 psi (2.9 - 3.2 MPa)
7 day Cure 7 day Water Immersion Shear Strength	ANSI A118.15 7.1.3	325-425 psi (2.2 - 2.9 MPa)
7 day Porcelain Tile Shear Strength	ANSI A118.15 7.2.3	500-600 psi (3.4 - 4.1 MPa)
1 day Porcelain Tile Shear strength	ANSI A118.15 7.2.2	225-275 psi (1.5 - 1.8 MPa)
14 day Cure 14 Day Heat Cure wall tile shear strength	ANSI A118.15 7.1.4	550-600 psi (3.7 - 4.1 MPa)
7 Day Wall Tile Shear Strength	ANSI A118.15 7.1.2	525 -575 psi (3.6 - 3.9 MPa)
7 day Water Immersion Shear Strength, Porcelain Mosaic Tile	ANSI A118.15 7.2.4	350-450 psi (2.41-3.10 MPa)
28 day Shear Bond, Porcelain Mosaic Tile	ANSI A118.15 7.2.5	500-600 psi (3.45-4.14 MPa)
28 day Shear Bond, Quarry Tile/Plywood	ANSI A118.11 4.1.1.2	180-250 psi (1.24-1.72 MPa)
Sag on Wall	ANSI A118.15.6.0	0 in. (0 mm)
28 day Cure Tensile Adhesive Strength	ISO 13007-4.4 4.2	1.5-2.0 Mpa
7 day Cure 21 day Water Immersion Tensile Adhesive Strength	ISO 13007-4.4 4.3	1.0-1.5 Mpa
14 day Cure 14 Day Heat Age Tensile Adhesive Strength	ISO 13007-4.4 4.4	1.5-2.0 MPa
7 day Cure 21 Day Water Immersion 25 Freeze/Thaw Cycle Tensile Adhesive Strength	ISO 13007-4.4 4.5	1.0-1.5 Mpa
Transverse Deformation	ISO 13007-4.4 4.5	3.0-3.5

Working Properties

Property Name	Property Value
Open Time @ 70° F (21°C)	**40 Minutes**
Pot Life @ 70° F (21°C)	**4 hours**
Time To Traffic	**24 hours**

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Surface Preparation

All surfaces should be between 40°F (4°C) and 90°F (32°C) and structurally sound, clean and free of all dirt, oil, grease, paint, concrete sealers or curing compounds. Rough or uneven concrete surfaces should be made smooth with a LATICRETE latex fortified underlayment or leveling mortar to provide a proper finish. Dry, dusty concrete slabs or masonry should be dampened and excess water swept off. Installation may be made on a damp surface. All slabs must be plumb and true to within 1/4" (6 mm) in 10 ft (3 m).

Note: MULTIMAX Lite does not require a minimum cure time for concrete slabs. Expansion joints shall be provided through the tile work from all construction or expansion joints in the substrate. Follow ANSI specification A108.01–3.7 "Requirements For Movement Joints: Preparations by Other Trades" or TCNA detail EJ-171 "Movement Joints—Vertical & Horizontal". Do not cover expansion joints with mortar.

1. Installer must verify that deflection under all live, dead and impact loads of interior plywood floors does not exceed industry standards of L/360 for ceramic tile and brick or L/480 for stone installations where L=span length.
2. Minimum construction for interior plywood floors. **SUBFLOOR**: 5/8" (15 mm) thick exterior glue plywood, either plain with all sheet edges blocked or tongue and groove, over bridged joints spaced 16" (400 mm) o.c. maximum; fasten plywood 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. along intermediate supports

with 8d ring-shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3 mm) between sheet ends and 1/4" (6 mm) between sheet edges at the perimeter; all sheet ends must be supported by a framing member; glue sheets to joints with construction adhesive.
UNDERLAYMENT: 5/8" (15 mm) thick exterior glue plywood fastened 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. in the panel field (both directions) with 8d ring shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3mm) to 1/4" (6 mm) between sheets and 1/4" (6 mm) between sheet edges and any abutting surfaces; offset underlayment joints from joints in subfloor and stagger joints between sheet ends; glue underlayment to subfloor with construction adhesive. Refer to Technical Data Sheet 152 “Bonding Ceramic Tile, Stone or Brick Over Wood Floors”.
Mixing: For walls and Large Heavy Tile applications: Place clean, potable water into a clean pail. Use approximately 4.8-5.0 qts (4.5-4.7 L) of water for 25 lbs (11.3 kg) of powder. (To mix smaller quantities use 3.7 parts powder to 1 part water.) **For Thin Bed applications:** Use approximately 5.2–5.4 qts (4.9-5.1 L) of water for 25 lbs (11.3kg) of powder. (To mix smaller quantities use 3.4 parts powder to 1 part water.) Slowly add MULTIMAX LITE. Mix with a mixer to a smooth, trowelable consistency. Allow mortar to slake for 5 minutes. Remix without adding any more water or powder. During use, stir occasionally to keep mix fluffy. DO NOT temper with water.

Mixing with PERMACOLOR® Select Color Kits (MULTIMAX LITE white only) Requires 2 PERMACOLOR® Select Color Kits. (Each Color Kit contains 2 individual color packets, use all 4 color packets) Place water in a clean mixing container. Remove color packets from the cardboard container as well as the protective plastic sleeve. The internal bag is a water dispersible packet – when using the 25 lbs. (11.3 kg) bag of MULTIMAX LITE, drop all color packs directly in to water in clean mixing container. Mix with a drill mixer until pigment is dispersed evenly in container and the dispersible packet is no longer visible. Add MULTIMAX LITE and mix as directed above. Please note that additional water may be necessary when using PERMACOLOR Select color Kits.

Application: Walls: Key materials into substrate thoroughly. Comb on additional mortar with the notche side, use 1/4" x 3/8" (6 mm x 9 mm) notched trowel. Back butter all tile and stone 8" x 8" (200 mm x 200 mm) or larger to provide full bedding of the veneer. **Large Heavy Tile**: Key the mortar to the substrate with the flat side of the trowel. Press firmly to work into the surface. Comb on additional mortar with the notched side. Use 1/2" x 1/2" (12 mm x 12 mm) or 3/4" (18 mm) half loop trowel. Grouting: Grout installation after a minimum of 24 hours curing time at 70°F (21°C). Grout with PERMACOLOR® Select, PERMACOLOR®Λ Grout, SPECTRALOCK® PRO Premium Grout†, SPECTRALOCK PRO Grout†, 1500 Sanded Grout or 1600 Unsanded Grout gauged with 1776 Grout Enhancer or with water. Cleaning Clean tools with water.

6. AVAILABILITY AND COST

Availability
LATICRETE materials are available worldwide.

For Distributor Information, Call:
Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010
For on-line distributor information, visit LATICRETE at **laticrete.com**

Cost
Contact a LATICRETE Distributor in your area.

7. WARRANTY

See 10. FILING SYSTEM:
- DS 025.0: 25 Year System Warranty
- DS 230.13: 1 Year Product Warranty
- DS 230.15APD: LATICRETE 15 Year Tile & Stone System Warranty
- DS 230.99: LATICRETE Lifetime System Warranty (United States and Canada)

8. MAINTENANCE

LATICRETE and LATAPOXY grouts require routine cleaning with a neutral pH soap and water. All other LATICRETE and LATAPOXY materials require no maintenance but installation performance and durability may depend on properly maintaining products supplied by other manufacturers.

9. TECHNICAL SERVICES

Building Product Manual Paint Schedule

***Note** Edit this Paint Schedule to delete products not required for Project. Some of the products listed have lower VOC values, but use may result in higher cost to Project. Designer should evaluate and select appropriate products based on the Sustainable requirements for the Project. It should be noted that colorants may add to the VOC content of some of the products and the actual final VOC levels vary based on the color. Achieving a true 0 VOC content for the final product may not be realistic. Green Seal Standard GS-11 levels exclude colorant and water added at point of sale at this time.*

Surface	Vehicle and Luster	Max VOC Content [2] (g/L)	No. of Coats	Products	Dry Mil Thickness (Per Coat)	GS-11 [1] (Y or N)	VOC [2] (g/L)	Products	Dry Mil Thickness (Per Coat)	Max VOC Content [2]		Products	Dry Mil Thickness (Per Coat)	GS-11 [1] (Y or N)	VOC [2] (g/L)	Products	Dry Mil Thickness (Per Coat)	GS-11 [1] (Y or N)	VOC [2] (g/L)
25. Guestroom Ceilings & Stairwells (Residence Inn and TownePlace Suites only)	Visible Light Catalyzing, Odor Neutralizing Acrylic		Latex primer plus 2 finish coats2	Climasan 81260	1.7-1.9		<5	Harmony B05W1051 Flat (Ceilings) B09W1051 Eggshell	1.70	<50g/l									

Note 1. Paints, coatings and primers meet or exceed the VOC and chemical component limits of Green Seal Standard GS-11 (2010) requirements.

Note 2. VOC content when calculated according to 40 CFR 59, Subpart D (EPA Method 24). Clear wood finishes, floor coatings, stains, and shellacs do not exceed the VOC limits of the South Coast Air Quality Management District (SCAQMD) Rule 1113, Architectural Coatings (in effect January 1, 2004). VOC Levels shown are unthinned without colorants, actual levels may vary based on colors used.

Note: 3. Revisions from last version are shown in **BOLD**.
