No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Copyright 2019, Wilsonart LLC

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Description	107	335	350
Thickness	0.045" ± 0.005" (1.14mm ± 0.13mm)	0.028" + 0.001 - 0.004" (0.71mm + 0.03 - 0.10mm)	0.036" ± 0.005" (0.91mm ± 0.13mm)
Weight per square foot	0.322#	0.186#	0.260#

Blistering	**65 seconds**	≥ 40 seconds

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

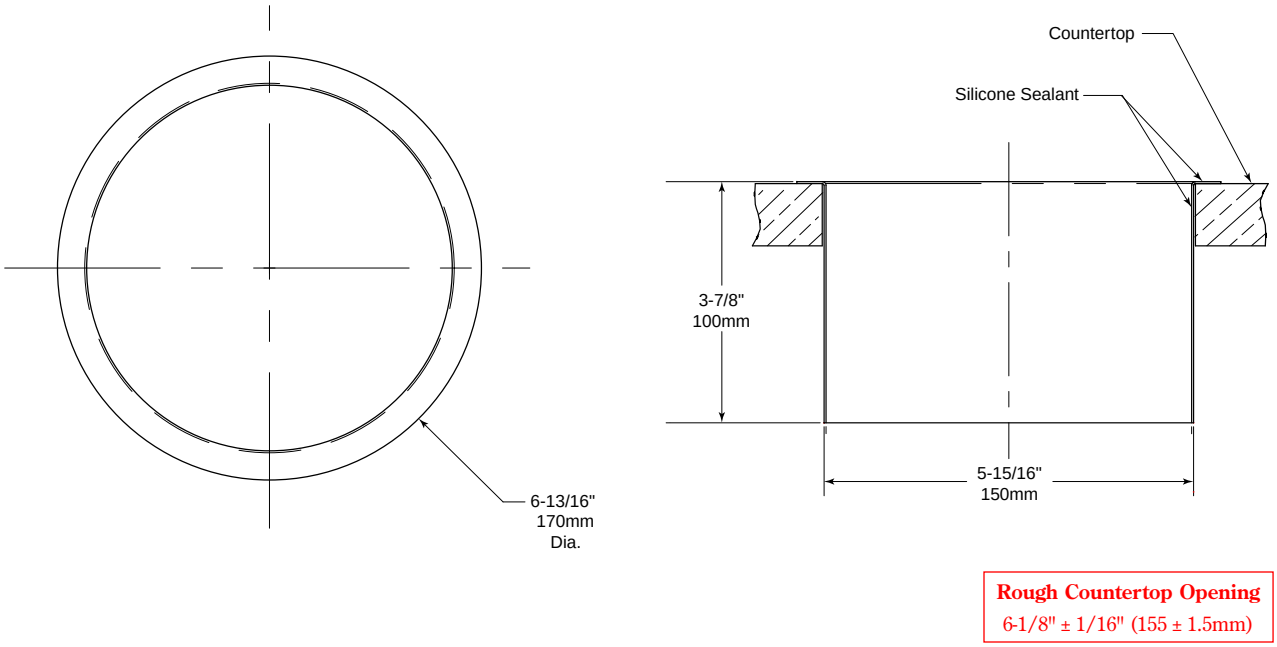
Technical Data

CIRCULAR WASTE CHUTE FOR MOUNTING IN COUNTERTOPS

B-532



Rough Countertop Opening
6-1/8" ± 1/16" (155 ± 1.5mm)

MATERIALS:

Circular Waste Chute — Type-300, 22-gauge (0.8mm) stainless steel. Exposed surfaces have satin finish.

INSTALLATION:

Unit is designed for installation in 6-1/8" ± 1/16" (155 ± 1.5mm) diameter hole in any countertop. To install unit permanently in place, cut hole in countertop. Fill in underside of waste chute lip and around portion of waste chute body which protrudes down into mounting hole with silicone sealant (not furnished). Install unit into countertop hole. Once unit is in place, wipe off any excess glue with a clean rag.

SPECIFICATION:

Circular waste chute for mounting in countertops shall be type-300 stainless steel with 5-7/8" (150mm) inside diameter, flat lip and satin finish on exposed surfaces. Waste chute opening shall provide access to deposit waste into waste receptacle (not furnished) placed under the countertop.

Circular Waste Chute For Mounting In Countertops shall be Model B-532 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

Revised 6/30/15 Printed in U.S.A.

1. Mark a line at least 1/4" [6.4 mm] in from the right side of the cabinet opening and parallel to the cabinet side.
2. Locate a point on this line 1.00" [25.4 mm] back from the desired front of the slide.
3. Using #8 pan or round head screws, mount the cabinet member bracket through the first hole at this point.

   NOTE: For maximum strength, ensure that the hold-in detent spring is installed inside the cabinet.
4. Mount the left hand slide similarly, locating the screw centerline of the cabinet member bracket at least 1/4" [6.4 mm] in from the left side of the opening.
5. Keeping the right and left hand slides parallel, install the remainder of the cabinet member screws.

   NOTE: When using soft materials such as particle board, replace rear cabinet mounting screws with through bolts.
6. With slides extended, center the shelf and drive the screws up through the moving member brackets into the bottom of the shelf.

   NOTE: If the unit is mounted too close to the floor reverse the procedure above and install the moving member screws first.

Slide Ordering Instructions

Complete your slide order for Accuride model 301-2590 by specifying the following:

20 Pair	C	301-2590	-16	D
Total Required Slides				
	Slide Finish			
		Slide Model Number		
			Slide Length	
				Optional Polybag Packaging

Packaging

Distributor (D) Pack: All lengths are packaged 5 pair per box. Polybag includes one pair of slides and mounting screws.

Bulk Pack: Slides only. Left hand slides and right hand slides are packaged in separate boxes.

Lengths 12"–18"	20 each per box
Lengths 20"–28"	10 each per box

Specifications

Slide members and ball retainers: Cold rolled steel
Ball bearings: Carburized steel

RoHS compliant

Recessed Wall-Mount Bottle Filling Station

FEATURES & BENEFITS

QUALITY CONTROL

The Haws bottle filling station is pre-built and fully water and pressure tested to ensure no leaks and proper function for reduced installation time and added peace of mind.

SERVICING & SECURITY

Durable ABS plastic front panel allows simple access to internal components. 30 second time-out prevents unwanted use. Hidden lock and hinges discourages vandals.

ADVANCED FILTRATION

2,500-gallon (9463 L) capacity, electronic lifecycle control filter cartridge will shut off water flow when capacity is reached to ensure fresh, filtered water with every activation. Filter replacement indicator light will flash yellow when filter life is at 10% and will flash red when replacement is necessary. Preparing to replace filter is important when the filter light flashes yellow.

DURABLE FINISH

#4 satin stainless steel back panel can be easily cleaned and maintained while also resisting corrosion.

SENSOR OPERATED

Electric sensor allows for tough-free hygienic operation, eliminating the need for manual activation.

OPTIONS

- ☐ Remote Drinking Fountain Water chiller: Model HCR8, 8 gph (30.3 L) remote water chiller provides instantaneous cooling to meet a continuous demand for chilled water.
- ☐ 2000 Series Mounting Frame: Model MTGFR.HSC, galvanized steel mounting frame with grille for the 2000 series bottle filling stations.

For more information, visit www.hawsco.com or call (888) 640-4297.

SPECIFICATIONS

Model 2000SN Hydration By Haws™ water dispenser is a semi-recessed, wall-mounted wheel chair accessible bottle or cup filling station constructed of durable ABS plastic and 16 gauge, Type 304 Stainless Steel with a satin finish. It features an electric sensor for touch-free hygienic operation and a 30-second timeout preventing unwanted use, laminar flow to prevent splashing, and .5 gpm (1.9 L) flow rate for quick fill-up. 2,500-gallon (9464 L) carbon block filter reduces chlorine (taste and odor) and lead, and removes 99.99% of cysts. The mounting frame is of heavy gauge, galvanized steel. 110 volt, 60Hz, and .1 amp draw when in use. Tailpiece is 1-1/4" (32 mm) O.D. Provision for trap (not included) must be made in or behind wall. Model 2000SN has no logo for a clean, aesthetically pleasing look.

APPLICATIONS

Perfect for either public or private indoor settings, the Hydration By Haws™ bottle filling station is a great fit in areas where aesthetics are important to the overall appeal of the architecture. Specifically, this type of semi-recessed wall mounted bottle filling station is ideal for office buildings, airports, schools, manufacturing facilities and municipalities.Model 2000SN meets the Americans with Disabilities Act when mounted at the correct height. Haws manufactures drinking fountains and electric water coolers to be lead-free by all known definitions including NSF/ANSI Standard 61, Section 9, NSF/ANSI Standards 42 & 53, NSF/ANSI 372 and CSA Standard B483.1. Product is compliant to California Health and Safety Code 116875 (AB 1953), California Proposition 65 and the Federal Safe Drinking Water Act. Model 2000S is certified to the Standard for Water Treatment Appliances (UL979).

DISCLAIMER: Continued product improvements make specifications subject to change without notice. Check www.hawsco.com for the latest product information and updates.

No. 0510000663 (2)

Model 2000S/2000SN
Bottle Filler with Lifecycle Control

NOTE: A Class A ground-fault circuit interrupter (GFCI) shall be installed in the branch-circuit supplying power to this unit.

CAUTION! Prior to making any electrical connections, verify with a voltmeter that power from the service panel is **off.**

SHOULD YOU EXPERIENCE DIFFICULTY WITH THE INSTALLATION OF THIS MODEL, OR REQUIRE REPLACEMENT PARTS, PLEASE CALL:

TECHNICAL SUPPORT:
1-800-766-5612

HOURS OF OPERATION: MON-THURS 7:00a.m. - 4:30p.m PT, FRI 7:00a.m.- 11:00a.m. PT

QUICK START REFERENCE

PARTS LIST: 1 bottle filler, 1 filter cartridge, 1 plastic drain basin, 1 brass waste bend, 1 waste nut, 1 rubber waste washer, 1 hex key, 2 drain basin screws, 2 drain basin screw washers.

RECOMMENDED TOOLS: Phillips screwdrivers, level, slip joint pliers.

REQUIRED PARTS (NOT SUPPLIED): Qty. 6 – 10 #6 sheet metal or wood screws (depending on construction of wall studs), 1/2” screwdriver stop, 3/8” tubing (to be used for water supply inlet), 1-1/4” trap, qty. 3 wire connectors.

PRODUCT INSTALLATION: When installing this product, local, state or federal codes should be adhered to. This unit is certified for indoor use only.

SUPPLY LINE: Minimum recommended line size is 1/2" IPS with 30-90 PSI (2-6 ATM) flowing pressure; supply water is to be cold water supply. Intended for municipal water only.

PLUMBING CONNECTIONS: Inlet is 3/8” O.D. push-in type fitting. Waste bend is 1-1/4” O.D. pipe; an acceptable trap must be used after waste bend.

ELECTRICAL CONNECTIONS: 115VAC, 60HZ, approx. 0.14A. Unit wired directly to incoming line (stripped leads provided).

RATED SERVICE FLOW: 0.5 GPM (2725L/day)
OPERATING TEMPERATURE: 35–100˚F (1.7–37.8˚C)
OPERATING PRESSURE: 30-90 PSI
FILTER CAPACITY: 2500 gallons (9460L) or 1 year
REPLACEMENT FILTER CARTRIDGE: Electronic Lifecycle Control Filter Model 6423

© 2017 Haws® Corporation – All Rights Reserved
HAWS® and other trademarks used in these materials are the exclusive property of Haws Corporation.

INSTALLATION PROCEDURE

WARNING: Make certain power is disconnected before installation to reduce risk of electrical shock.

WARNING: Filter is not intended to withstand operating pressures greater than 100 PSI (6.8 ATM). If inlet pressure is greater than this, filter must be protected with a pressure regulator.

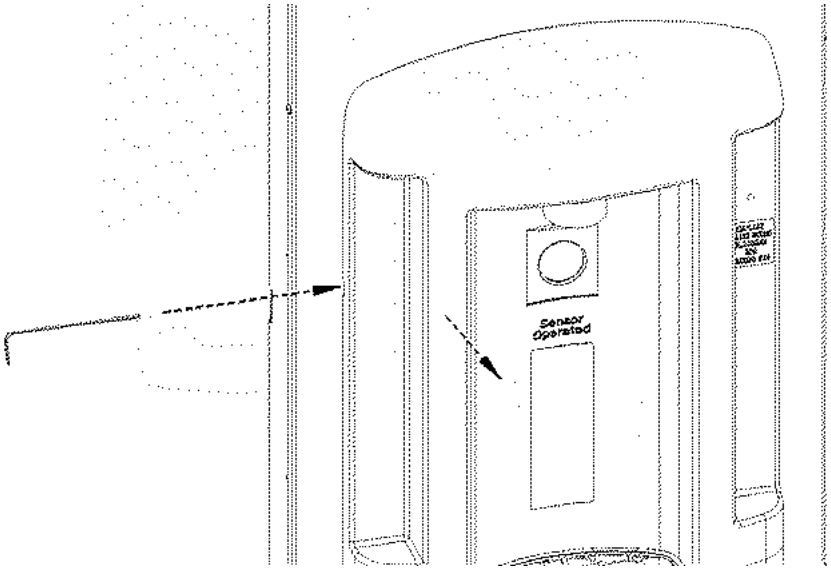
NOTES:

1. **This unit is certified for indoor use only.**
2. **For all plastic push-in type fitting connections, only connect NSF-61 copper or plastic tubing. Stainless steel or glass tubing is not recommended. The following assembly instructions must be followed to ensure a watertight connection:**
   - **a. Cut tubing square and clean.**
   - **b. Mark from end of tube the length of insertion (See table below).**
   - **c. Push tube into the fitting until it bottoms out.**
   - **d. To remove, depress collet and pull tubing out.**

Tube Sizes	O.D. Tolerance	Insertion Depth
1/4”	±.005”	11/16”
3/8”	±.005”	3/4”
1/2”	±.005”	7/8”

3. **Use NSF-61 approved pipe joint sealant on all threaded water connections.**
4. **Do not use with water that is microbiologically unsafe or unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts.**
5. **Use the cardboard inserts from the box to support the unit while preparing for installation by placing unit face down on inserts.**

Step 1: To open the unit, slide the supplied hex key into the notch in the left-hand side of the hinged upper plastic panel and press the key firmly in that same direction. This will disengage the internal spring latch. Simultaneously pull open the hinged panel (see Step 1 Diagram). Take care not to damage the stainless steel panel or the spring latch in this process.

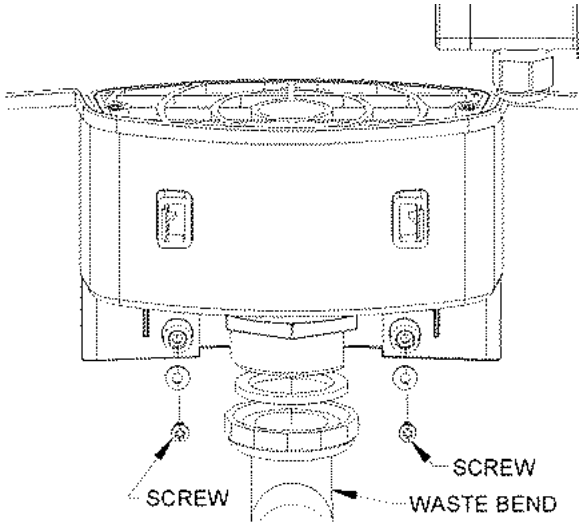


Step 1 Diagram

Step 2: Unscrew the 4 side-mounted panel screws on the outside of the bottle filler using the

supplied hex key, and remove the mounting frame from the bottle filler (see Step 2 Diagram).

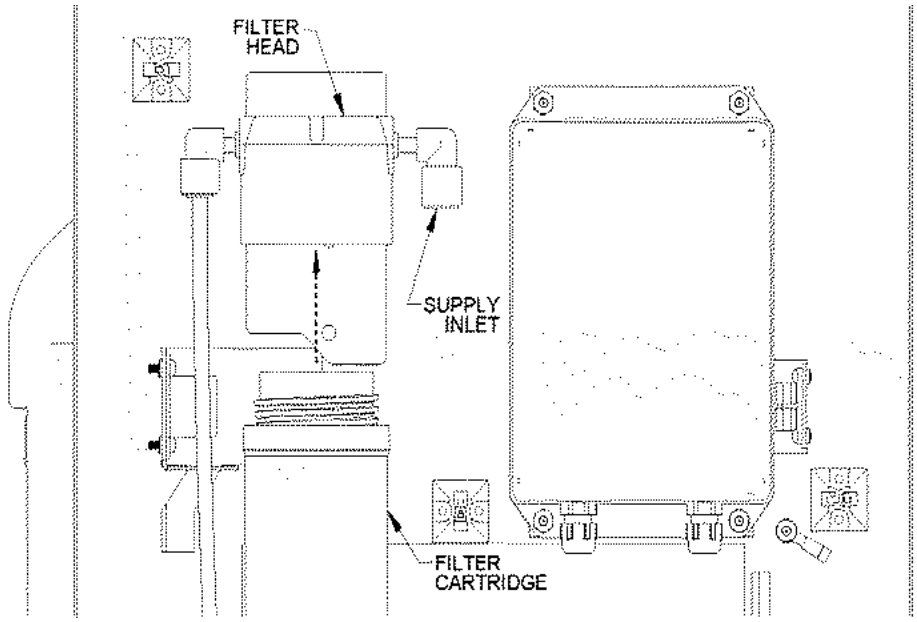
Step 3: Use the 2 washers and the 2 screws supplied to attach drain basin to unit as shown in Step 3 diagram (other components removed for clarity).
Install waste bend with nut and rubber washer as shown (see Step 3 Diagram).



Step 3 Diagram
(Back View)

Step 2 Diagram

Step 4: Firmly screw filter cartridge into filter head (see Step 4 Diagram). NOTE: Bottle filler will work only if a filter cartridge is installed and its wiring is plugged in (see Step 9).

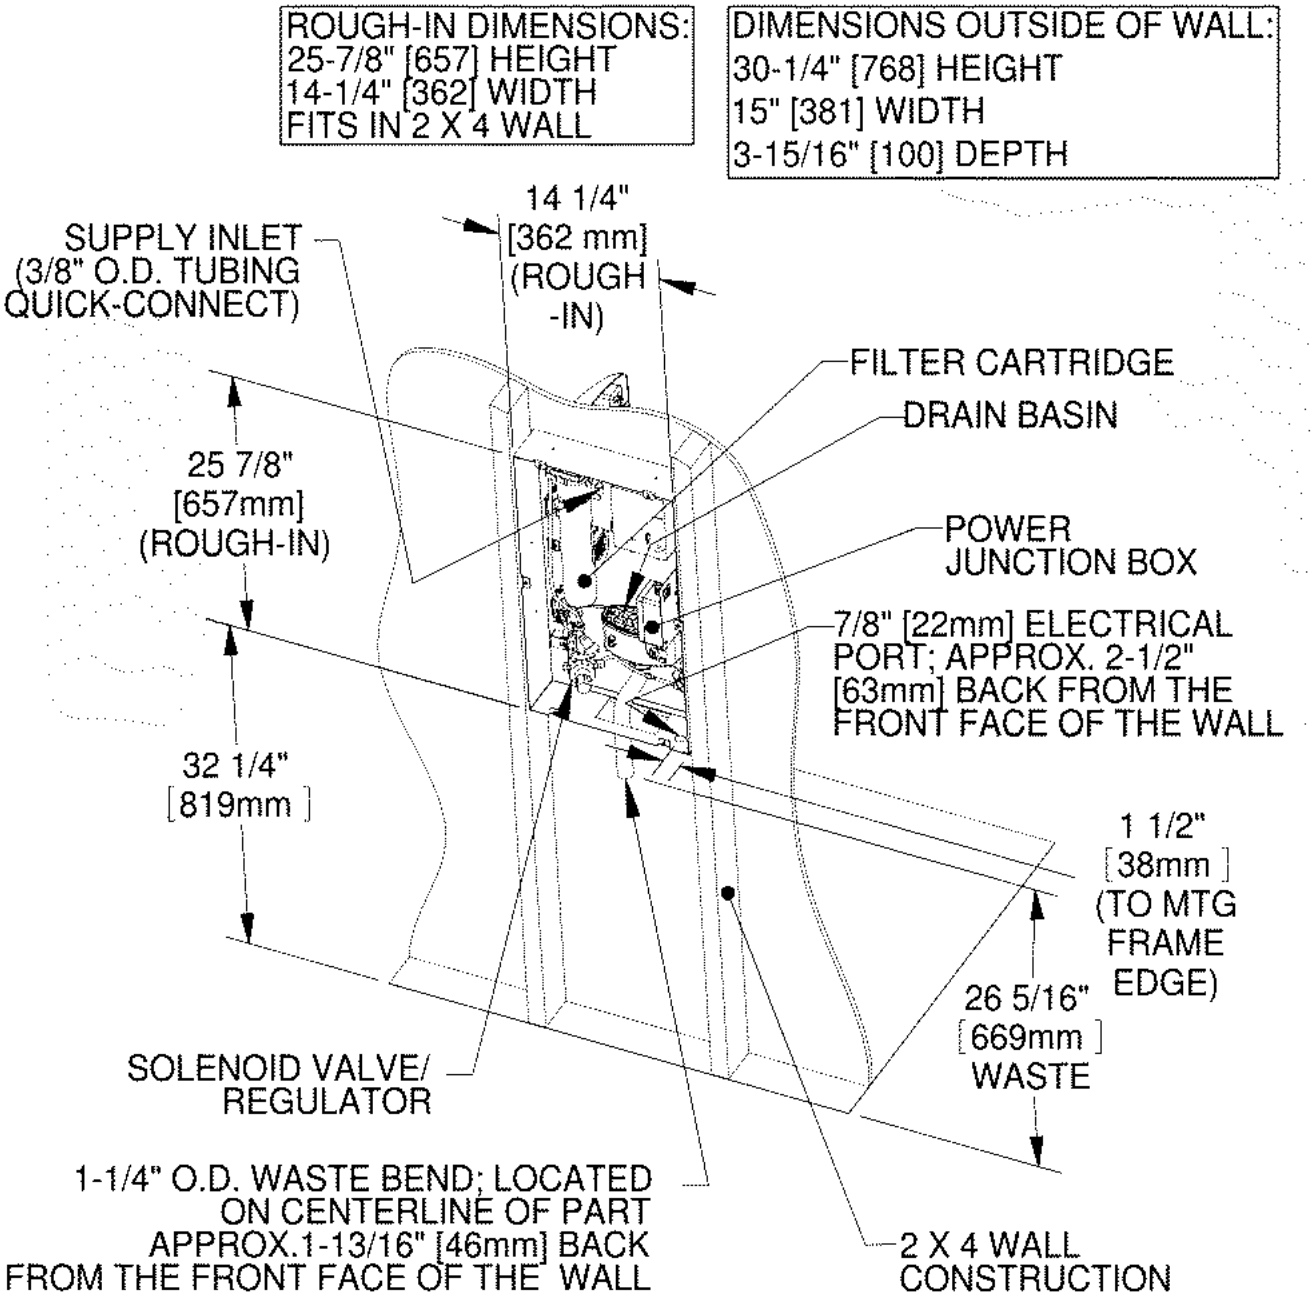


Step 5: Create a wall opening for the unit as shown in Step 5 Diagram – hold rough-in dimensions to within 1/8". The bottle filler is designed to fit between two normally spaced 2 X 4 studs (16" center-to-center).
Install waste line, supply line, and electrical lines in locations shown. The supply line should be brought up through the rectangular waste cutout in the bottom of the unit. Double-check waste, supply, and electrical line locations.
Install a 1/2" IPS supply screwdriver stop (not supplied) into the water supply line where it will be readily accessible.

NOTE: A suitable trap must be used in conjunction with the waste. This trap should be positioned in a location where it can be accessed and removed (it may be helpful to use a wall-mounted access panel).

NOTE: When installing this unit, all pertinent local, state, or federal codes should be adhered to.

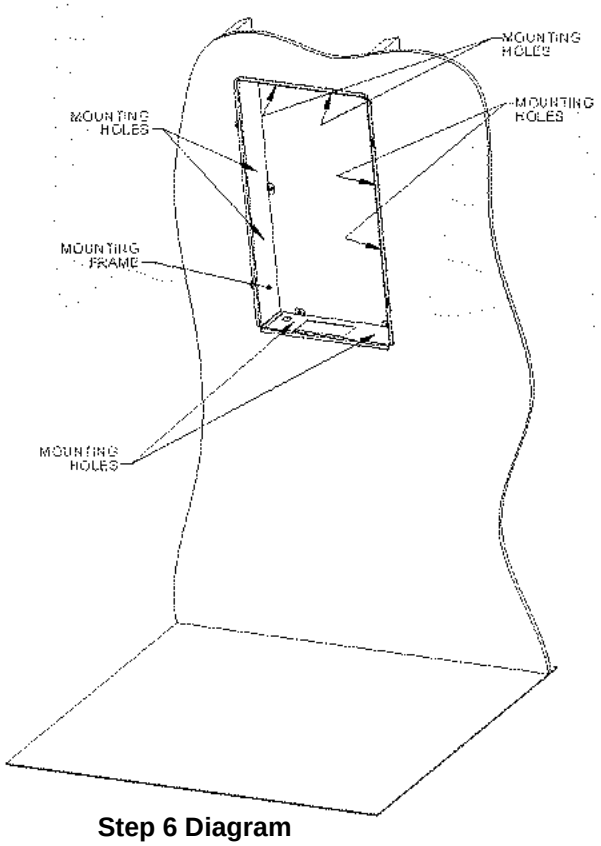
Bottle filler (rear cover removed) viewed from behind wall



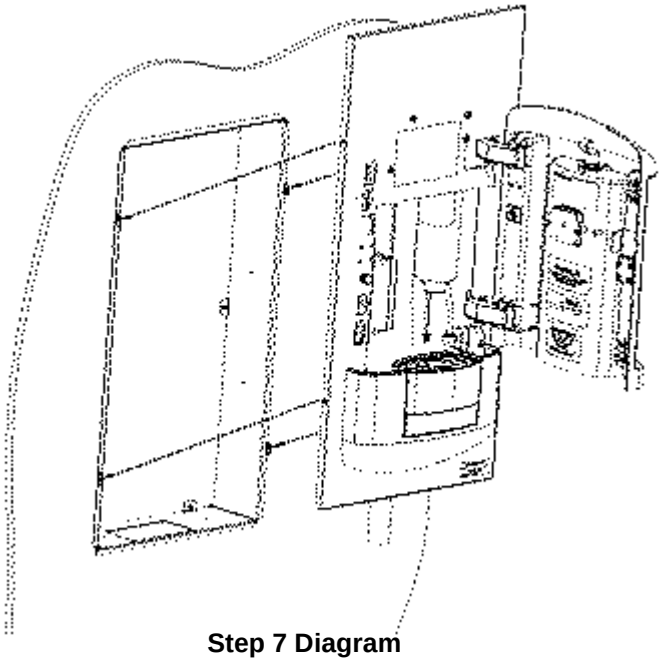
Step 5 Diagram

Step 6: Place the mounting frame into its opening such that it sits flush against the wall. Use some appropriate #6 screws (between 4 & 8 as required; not supplied) to secure the frame into the wall; notice that mounting holes are provided in the top, bottom, and sides of the mounting frame (see Step 6 Diagram).

Use a level to verify that the mounting frame is level horizontally and vertically; this will help to assure proper drainage and water flow that is properly aligned.



Step 6 Diagram

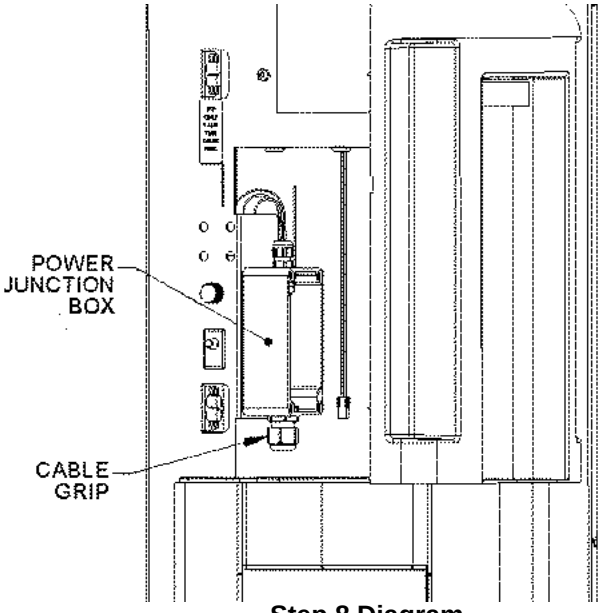


Step 7 Diagram

Step 7 Diagram

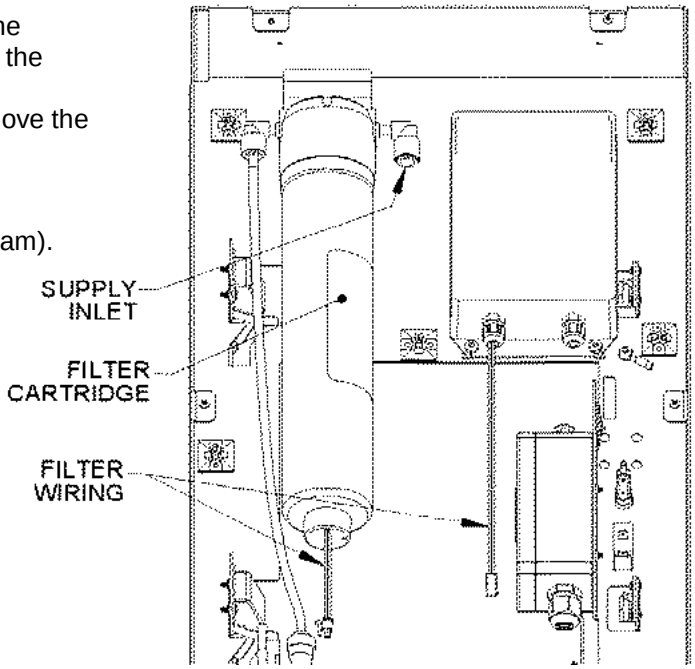
Step 7:
Place the bottle filler onto its mounting frame and make the connection between the bottle filler waste and the plumbed-in waste line.
Secure the bottle filler to the mounting frame using the 4 screws removed in Step 2 (see Step 7 Diagram).

Step 8: Open the power junction box; run supply power wiring through the bottom cable grip. Connect supply power to lead (black), neutral (white), and ground (green) wires inside the box (stripped leads provided) (see Step 8 Diagram). Replace cover.



Step 8 Diagram

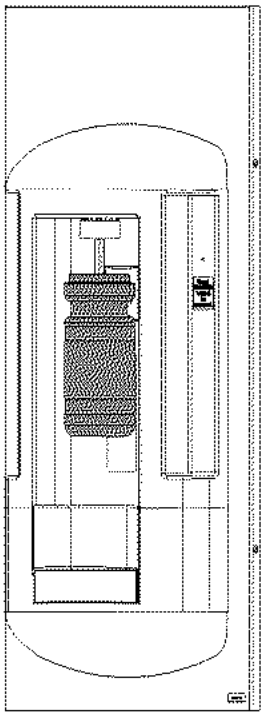
Step 9: Run 3/8" tubing (not supplied) between the screwdriver stop (installed in Step 5) and the bottle filler's supply inlet elbow in the filter head (it may help to temporarily remove the filter cartridge – see Step 9 Diagram). Connect the wiring coming off of the filter cartridge to the wiring coming out of the circuit board enclosure (see Step 9 Diagram).



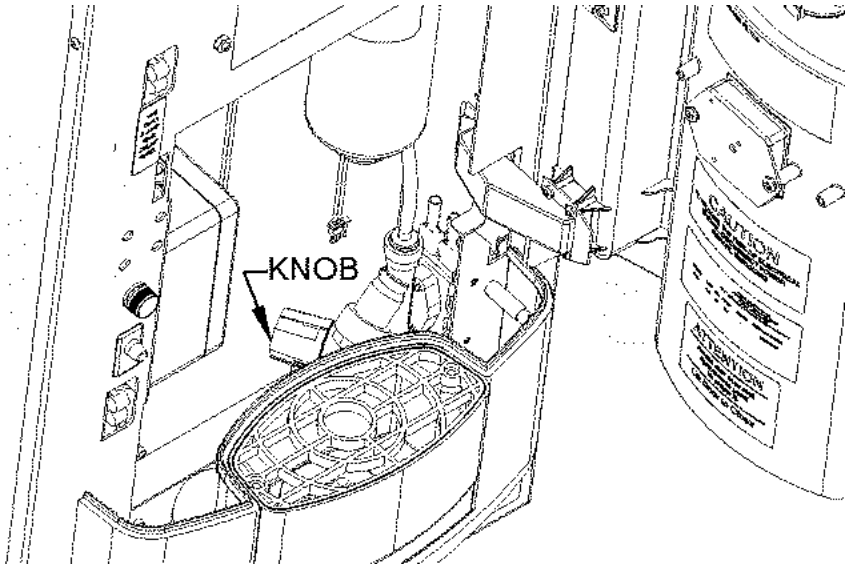
Step 9 Diagram (Back View)

Step 10: Open the screwdriver stop **wide open** and check for leaks. Close the hinged upper panel and provide power to the bottle filler.

Step 11: Activate the bottle filler by placing a bottle or cup in front of the sensor (see Step 11 Diagram A). If water does not dispense, see the Troubleshooting Guide in the Owner's Manual. The pressure regulator may need to be adjusted to better complement the input pressure at the installation site (see Step 11 Diagram B below). To do so, pull out the adjustment knob and rotate as needed (clockwise from the front of the unit decreases flow); push knob in when desired flow is achieved. * Flow rate is factory set to the maximum flow rate for reduced water consumption.



Step 11 Diagram A



Step 11 Diagram B

Step 12: **Approximately five gallons** of water must be run through the system after the unit is installed in order to remove the loose carbon particles from the filter cartridge and any air bubbles from the system (both of these are normal occurrences after a filter change). Check the system for leaks. Place hex key in a secure location.

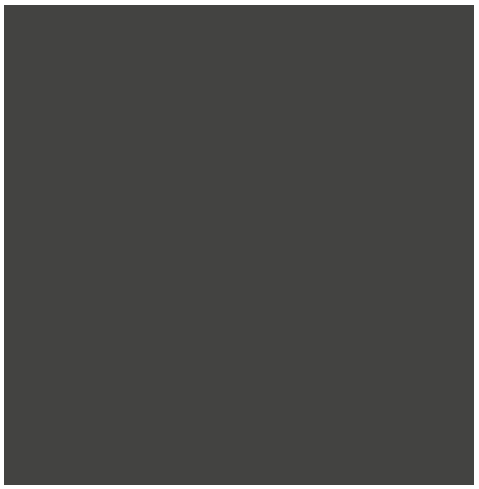
Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:



Item Name	Paint - Wall
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Gypsum Board Wall Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B20 Series)
Color	SW7069 Iron Ore
Finish	Eg-Shel
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	ProMar 200 ZeroVOC Interior Latex (B20W12651)
Finish	Eg-Shel
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.
Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish. All walls to receive Gloss, Enamel Paint, or Murals
to have a Level 5 Gypsum Board Finish.

ProMar® 200 Zero V.O.C.
Interior Latex Eg-Shel

B20-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Eg-Shel is a durable, professional quality, interior vinyl acrylic finish for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350 - 400 sq. ft. per gallon @ 4 mils wet; 1.7 mils dry

Drying Time, @ 77°F, 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 15-20 units @ 85°
5+ units @60°

Tinting with CCE only:

Base:	oz. per gallon	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B20W12651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 42 ± 2%

Weight Solids: 54 ± 2%

Weight per Gallon: 10.82 lbs

Flash Point: N/A

Vehicle Type: Vinyl Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 54.19 grains/(hr ft2 in Hg)

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 08/10/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Interior Latex Eg-Shel

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

HOTW 08/10/2020 B20T02654 31 00
FRC,SP

CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative or visit www.paintdocs.com to obtain the most current version of the PDS and/or an SDS.

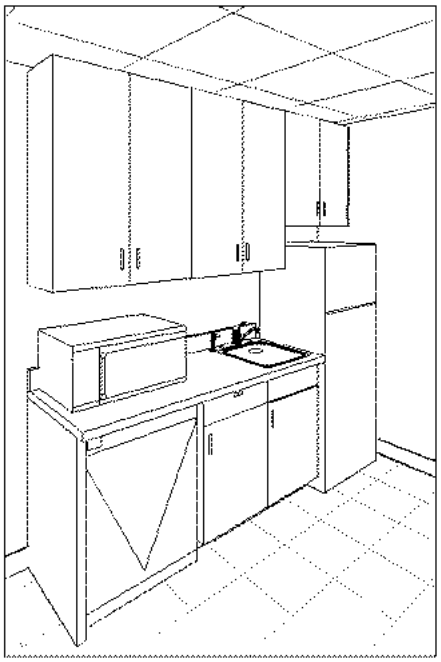
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Employee Breakroom Kitchenette Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of plumbing, cabinets, drawers, shelves, and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries; MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x

8 foot length, to be field cut and fit by the installer.
8. Base Cabinet Units:
a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.
9. Drawers:
a. Provide box-type construction with sub-front and back joined with glued dovetail or rabbeted into sides and secured with glue and mechanical fasteners. Clear coat all exposed surfaces. Match color of sides and bottoms with drawer fronts.
b. Drawer Fronts: 3/4-inch-thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine).
c. Drawer Sides Sub-fronts, and Backs: Not less than 1/2-inch hardwood dovetail construction or 3/4-inch thick Particle Board faced with Thermoset Decorative Overlay (melamine). Provide PVC edge banding to match finish of fronts.
d. Exposed fronts fastened to Sub-fronts with mounting screws from interior of body.
e. Drawer bottom of not less than 1/4-inch thick plywood faced with Thermoset Decorative Panel overlay (melamine), set into rabbets in back, sides, and sub-fronts.
10. Wall Cabinet Units:
a. Tops and Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back rail.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include appliances, plumbing fixtures, lighting, power/data etc.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.

**Test results vary slightly depending on pattern.*
The information contained in this section is based on technical data which Wilsonart LLC believes to be reliable, and is intended for use by persons having knowledge of this technical area at their own discretion.

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Description	107	335	350
Thickness	0.045" ± 0.005" (1.14mm ± 0.13mm)	0.028" + 0.001 - 0.004" (0.71mm + 0.03 - 0.10mm)	0.036" ± 0.005" (0.91mm ± 0.13mm)
Weight per square foot	0.322#	0.186#	0.260#

Formability*	***5/16" face (7.93mm) *3/8" back (9.52mm)**	*9/16" face (14.27mm) *3/4" back (19.05mm)
Blistering	**65 seconds**	≥ 40 seconds

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

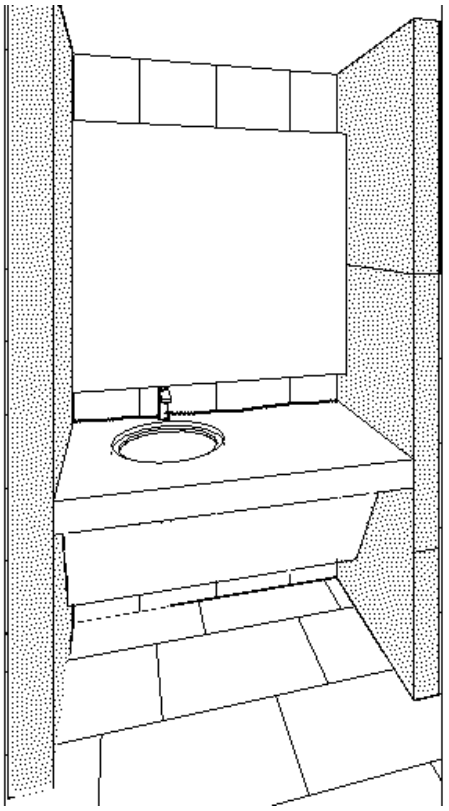
ML-012

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Public Restroom Vanity Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of plumbing, panels, and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries; MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval

	of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). a. Cut out of the back panel to be included to facilitate plumbing connections. Cut out at bottom panel center also to be included for potential plumbing access. Millwork must be constructed to allow this without impacting core structure & strength. 5. Front Panel to have a slight reveal. Panel to be removable, for maintenance purposes. Panel should not be able to be removed or opened by guests. No visible screws. Recommend 4 roller catch and 2 latches. Hardware must be Stainless steel or non-rusting material. 6. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include plumbing fixtures,

toilet accessories, mirrors, lighting, power etc.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Website: www.wilsonart.com

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Administration Workroom Casework
Item Type	Adminstrative Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries, MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual
Millwork Hardware	Refer to Specifications within Building Product

	Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer. 8. Base Cabinet Units: a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued

and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.
9. Wall Cabinet Units:
a. Tops and Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back rail.

616.459.3311 | www.kv.com

3. Product Description

Basic Use: 70/71 Series Wall Standards and 170 Series Adjustable Brackets are manufactured for storage and display applications in retail stores, grocery stores, light warehouses, light industrial, repair garages, maintenance storage, business office storage, and residential storage. 70/71 Series Wall Standards mount to most wall types. 170 Series Adjustable Brackets are fully adjustable in 1" increments.
Recommended screws (1-1/2" long with a #8 body and #6 head) are available in bulk bags (50 per bag) and bulk cartons (6,000 per carton). Screws and anchors are available in display pack cartons (20 bags per carton) and warehouse pack cartons (50 bags per carton).

Composition and Materials:
- 70 (E) Series Standards: 16-gauge galvanized steel
- 71 (ANO) Series Standards: 13-gauge cold-rolled steel
- 170 (E) Series Brackets: 16-gauge galvanized steel
- 170 (ANO) Series Brackets: 14-gauge cold rolled steel

Sizes:
- 70 Series Standards: 5/8" wide x 13/32" deep with 1" slot adjustment
- 71 Series Standards: 5/16" wide x 13/32" deep with 1" slot adjustment

Stock Lengths:
- 70 Series: 24", 36", 48", 72"
- 71 Series: 48", 60", 72", 84", 96"
- 170 (E and ANO) Series Brackets: Used for shelf depths of 8", 10", 12", 14" (some depths not available in some finishes)

Finishes: Zinc (galvanized steel) or Anochrome (electro-plated steel)

4. Technical Data

Applicable Standards: Standards and brackets are tested to meet or exceed the ANSI performance standards as established by BHMA.

These load limits are intended to be used as general guidelines only, and no warranty — expressed or implied — is made by Knape & Vogt.

Results were obtained by laboratory testing in accordance with ANSI/ BHMA A156.9-2003 performance standard. (Load ratings based on brackets being mounted on 16" centers. Wider spacing will result in reduced load capacity.) Actual use conditions will typically result in lower load capacity than laboratory conditions.

Representative testing in a fully configured application is the only way to assure proper performance, durability, and safety. Contact KV for verification testing service of your specific application.

The aforementioned shelf support load limit is intended as a guide only and not as a warranty. Actual load bearing capabilities depend upon the type of cabinet/wall material and use of appropriate shelf standard mounting fasteners, installation technique, shelf standard spacing, shelf size and construction.

Environmental Considerations:

Environment: Excessive humidity, salts, or other chemical agents can corrode the finish and attack metal or plastic components.

Fastening: Inadequate or incorrect fasteners can result in the standards pulling loose and causing damage.

Alignment: Improper standard and bracket alignment can result in a system that is ineffective and unsafe.

5. Installation

For maximum loading capacity, brackets should be mounted directly to wall studs, which are generally found at 16" intervals. (If standards will not be mounted to studs, use appropriate wall anchors).

Use the recommended fasteners (#6 head and #8 body x 1-1/2" screws) in all holes to properly secure the standard. Prior to drilling all holes, check to be sure that the standard is vertically level.

Place the bracket into the standard slots. Using a hammer handle or screwdriver handle, tap lightly near the bracket's base. The bracket will snap into place.

6. Availability and Cost

Availability: Knape & Vogt (KV) products are available from stocking distributors and through KV Representatives worldwide.

Cost: Current pricing is available from area KV Representatives. Please call for the nearest representative at: 800.253.1561.

7. Warranty

Limited Lifetime Warranty: Knape & Vogt offers its standard Limited Lifetime Warranty to the initial purchaser of commercial products. This warranty covers defects in materials and workmanship which occur during normal use, and the remedy is limited to repair or replacement of defective products, at KV's option. Certain types of defects and damage are excluded from warranty coverage, costs and expenses are not covered, and additional restrictions apply. A copy of the Limited Lifetime Warranty, with all warranty details, limitations and disclaimers, is available on the Customer Care Connection location at www.kv.com or from KV Customer Service, 2700 Oak Industrial Drive, Grand Rapids, MI 49505, 800.253.1561.

8. Maintenance

70/71 Series Wall Standards and 170 Series Adjustable Brackets require no maintenance. Inspect for proper fit periodically and adjust when necessary. Replace as required or recommended by application.

9. Technical Services

Knape & Vogt and area representatives can assist with any application. For further information, or for the name of the representative nearest you, please call Knape & Vogt Customer Service: 800.253.1561 or visit our website at: www.kv.com.

10. Filing Systems

Additional product information, data sheets, application sheets, and a full catalog are available upon request from Knape & Vogt.

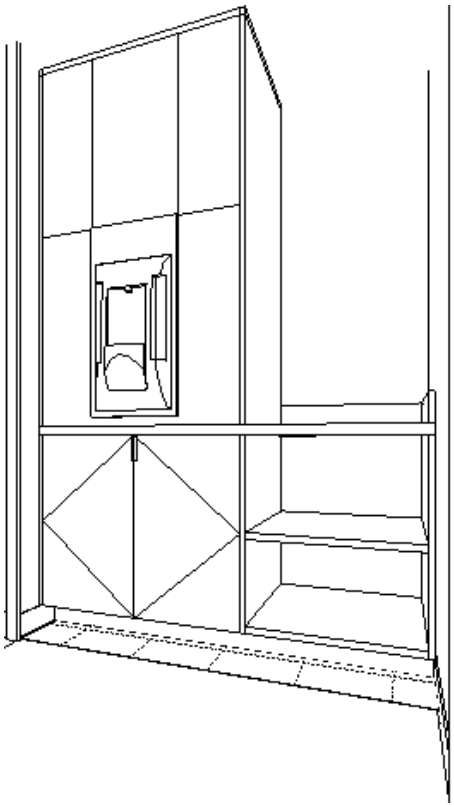
Issue Date: **Aug 30, 2021**
Revision Date:



Item Name	Hydration Station
Item Type	Upper Floor Elevator Lobby Millwork
Description	Plastic Laminate Clad Custom Millwork that houses hydration equipment. Consists of cabinets, shelves and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries; MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Millwork Hardware	Refer to Specifications within Building Product Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at

blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.
8. Base Cabinet Units:
a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.
9. Wall Cabinet Units:
a. Tops and Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back rail.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include hydration equipment, power/data, etc.
Mount pulls vertically.

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

100% Engineered Stone | **Non Porous** | **Easy to Clean** | **Low Maintenance** | **Shock Resistant** | **Stain Resistant** * | **Scratch Resistant** | **Everlasting Sheen** | **Modern Collection of Colors**

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Copyright 2019, Wilsonart LLC

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Description	107	335	350
Thickness	0.045" ± 0.005" (1.14mm ± 0.13mm)	0.028" + 0.001 - 0.004" (0.71mm + 0.03 - 0.10mm)	0.036" ± 0.005" (0.91mm ± 0.13mm)
Weight per square foot	0.322#	0.186#	0.260#

Formability*	***5/16" face (7.93mm) *3/8" back (9.52mm)**	*9/16" face (14.27mm) *3/4" back (19.05mm)
Blistering	**65 seconds**	≥ 40 seconds

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

model 2000SN

Recessed Wall-Mount Bottle Filling Station

FEATURES & BENEFITS

QUALITY CONTROL

The Haws bottle filling station is pre-built and fully water and pressure tested to ensure no leaks and proper function for reduced installation time and added peace of mind.

SERVICING & SECURITY

Durable ABS plastic front panel allows simple access to internal components. 30 second time-out prevents unwanted use. Hidden lock and hinges discourages vandals.

ADVANCED FILTRATION

2,500-gallon (9463 L) capacity, electronic lifecycle control filter cartridge will shut off water flow when capacity is reached to ensure fresh, filtered water with every activation. Filter replacement indicator light will flash yellow when filter life is at 10% and will flash red when replacement is necessary. Preparing to replace filter is important when the filter light flashes yellow.

DURABLE FINISH

#4 satin stainless steel back panel can be easily cleaned and maintained while also resisting corrosion.

SENSOR OPERATED

Electric sensor allows for tough-free hygienic operation, eliminating the need for manual activation.

OPTIONS

- ☐ Remote Drinking Fountain Water chiller: Model HCR8, 8 gph (30.3 L) remote water chiller provides instantaneous cooling to meet a continuous demand for chilled water.
- ☐ 2000 Series Mounting Frame: Model MTGFR.HSC, galvanized steel mounting frame with grille for the 2000 series bottle filling stations.

For more information, visit www.hawsco.com or call (888) 640-4297.

SPECIFICATIONS

Model 2000SN Hydration By Haws™ water dispenser is a semi-recessed, wall-mounted wheel chair accessible bottle or cup filling station constructed of durable ABS plastic and 16 gauge, Type 304 Stainless Steel with a satin finish. It features an electric sensor for touch-free hygienic operation and a 30-second timeout preventing unwanted use, laminar flow to prevent splashing, and .5 gpm (1.9 L) flow rate for quick fill-up. 2,500-gallon (9464 L) carbon block filter reduces chlorine (taste and odor) and lead, and removes 99.99% of cysts. The mounting frame is of heavy gauge, galvanized steel. 110 volt, 60Hz, and .1 amp draw when in use. Tailpiece is 1-1/4" (32 mm) O.D. Provision for trap (not included) must be made in or behind wall. Model 2000SN has no logo for a clean, aesthetically pleasing look.

APPLICATIONS

Perfect for either public or private indoor settings, the Hydration By Haws™ bottle filling station is a great fit in areas where aesthetics are important to the overall appeal of the architecture. Specifically, this type of semi-recessed wall mounted bottle filling station is ideal for office buildings, airports, schools, manufacturing facilities and municipalities.Model 2000SN meets the Americans with Disabilities Act when mounted at the correct height. Haws manufactures drinking fountains and electric water coolers to be lead-free by all known definitions including NSF/ANSI Standard 61, Section 9, NSF/ANSI Standards 42 & 53, NSF/ANSI 372 and CSA Standard B483.1. Product is compliant to California Health and Safety Code 116875 (AB 1953), California Proposition 65 and the Federal Safe Drinking Water Act. Model 2000S is certified to the Standard for Water Treatment Appliances (UL979).

DISCLAIMER: Continued product improvements make specifications subject to change without notice. Check www.hawsco.com for the latest product information and updates.

INSTALLATION GUIDE

◆ website: www.Hawsco.com

No. 0510000663 (2)

Model 2000S/2000SN
Bottle Filler with Lifecycle Control

NOTE: A Class A ground-fault circuit interrupter (GFCI) shall be installed in the branch-circuit supplying power to this unit.

CAUTION! Prior to making any electrical connections, verify with a voltmeter that power from the service panel is **off.**

SHOULD YOU EXPERIENCE DIFFICULTY WITH THE INSTALLATION OF THIS MODEL, OR REQUIRE REPLACEMENT PARTS, PLEASE CALL:

TECHNICAL SUPPORT:
1-800-766-5612

HOURS OF OPERATION: MON-THURS 7:00a.m. - 4:30p.m PT, FRI 7:00a.m.- 11:00a.m. PT

QUICK START REFERENCE

PARTS LIST: 1 bottle filler, 1 filter cartridge, 1 plastic drain basin, 1 brass waste bend, 1 waste nut, 1 rubber waste washer, 1 hex key, 2 drain basin screws, 2 drain basin screw washers.

RECOMMENDED TOOLS: Phillips screwdrivers, level, slip joint pliers.

REQUIRED PARTS (NOT SUPPLIED): Qty. 6 – 10 #6 sheet metal or wood screws (depending on construction of wall studs), 1/2” screwdriver stop, 3/8” tubing (to be used for water supply inlet), 1-1/4” trap, qty. 3 wire connectors.

PRODUCT INSTALLATION: When installing this product, local, state or federal codes should be adhered to. This unit is certified for indoor use only.

SUPPLY LINE: Minimum recommended line size is 1/2" IPS with 30-90 PSI (2-6 ATM) flowing pressure; supply water is to be cold water supply. Intended for municipal water only.

PLUMBING CONNECTIONS: Inlet is 3/8” O.D. push-in type fitting. Waste bend is 1-1/4” O.D. pipe; an acceptable trap must be used after waste bend.

ELECTRICAL CONNECTIONS: 115VAC, 60HZ, approx. 0.14A. Unit wired directly to incoming line (stripped leads provided).

RATED SERVICE FLOW: 0.5 GPM (2725L/day)
OPERATING TEMPERATURE: 35–100˚F (1.7–37.8˚C)
OPERATING PRESSURE: 30-90 PSI
FILTER CAPACITY: 2500 gallons (9460L) or 1 year
REPLACEMENT FILTER CARTRIDGE: Electronic Lifecycle Control Filter Model 6423

© 2017 Haws® Corporation – All Rights Reserved
HAWS® and other trademarks used in these materials are the exclusive property of Haws Corporation.

INSTALLATION PROCEDURE

WARNING: Make certain power is disconnected before installation to reduce risk of electrical shock.

WARNING: Filter is not intended to withstand operating pressures greater than 100 PSI (6.8 ATM). If inlet pressure is greater than this, filter must be protected with a pressure regulator.

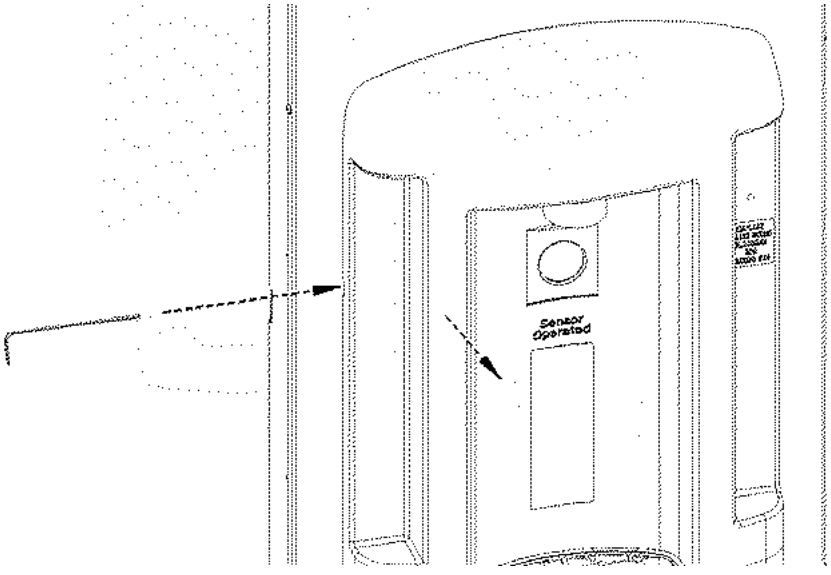
NOTES:

1. **This unit is certified for indoor use only.**
2. **For all plastic push-in type fitting connections, only connect NSF-61 copper or plastic tubing. Stainless steel or glass tubing is not recommended. The following assembly instructions must be followed to ensure a watertight connection:**
   - **a. Cut tubing square and clean.**
   - **b. Mark from end of tube the length of insertion (See table below).**
   - **c. Push tube into the fitting until it bottoms out.**
   - **d. To remove, depress collet and pull tubing out.**

Tube Sizes	O.D. Tolerance	Insertion Depth
1/4”	±.005”	11/16”
3/8”	±.005”	3/4”
1/2”	±.005”	7/8”

3. **Use NSF-61 approved pipe joint sealant on all threaded water connections.**
4. **Do not use with water that is microbiologically unsafe or unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts.**
5. **Use the cardboard inserts from the box to support the unit while preparing for installation by placing unit face down on inserts.**

Step 1: To open the unit, slide the supplied hex key into the notch in the left-hand side of the hinged upper plastic panel and press the key firmly in that same direction. This will disengage the internal spring latch. Simultaneously pull open the hinged panel (see Step 1 Diagram). Take care not to damage the stainless steel panel or the spring latch in this process.

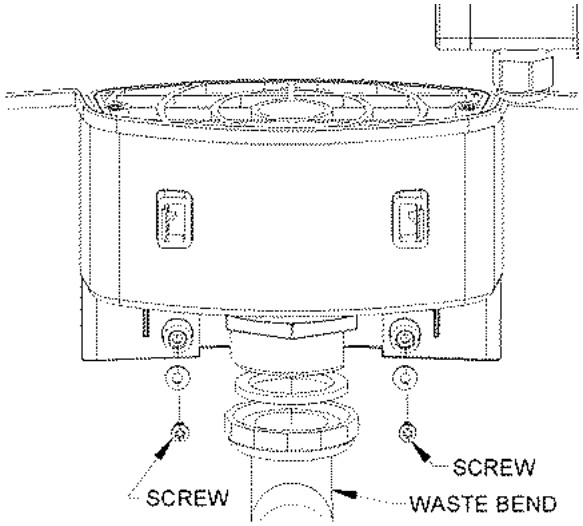


Step 1 Diagram

Step 2: Unscrew the 4 side-mounted panel screws on the outside of the bottle filler using the

supplied hex key, and remove the mounting frame from the bottle filler (see Step 2 Diagram).

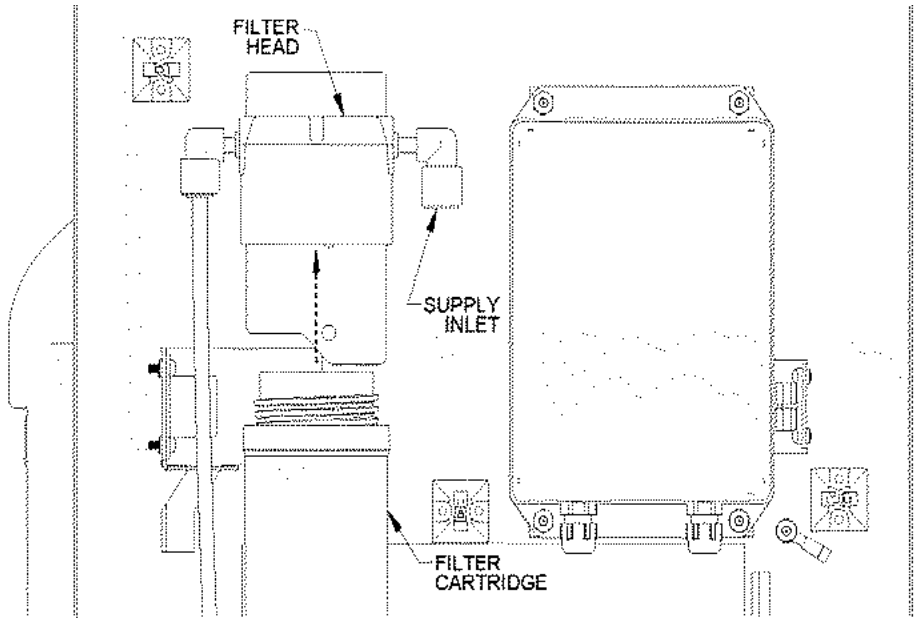
Step 3: Use the 2 washers and the 2 screws supplied to attach drain basin to unit as shown in Step 3 diagram (other components removed for clarity).
Install waste bend with nut and rubber washer as shown (see Step 3 Diagram).



Step 3 Diagram
(Back View)

Step 2 Diagram

Step 4: Firmly screw filter cartridge into filter head (see Step 4 Diagram). NOTE: Bottle filler will work only if a filter cartridge is installed and its wiring is plugged in (see Step 9).

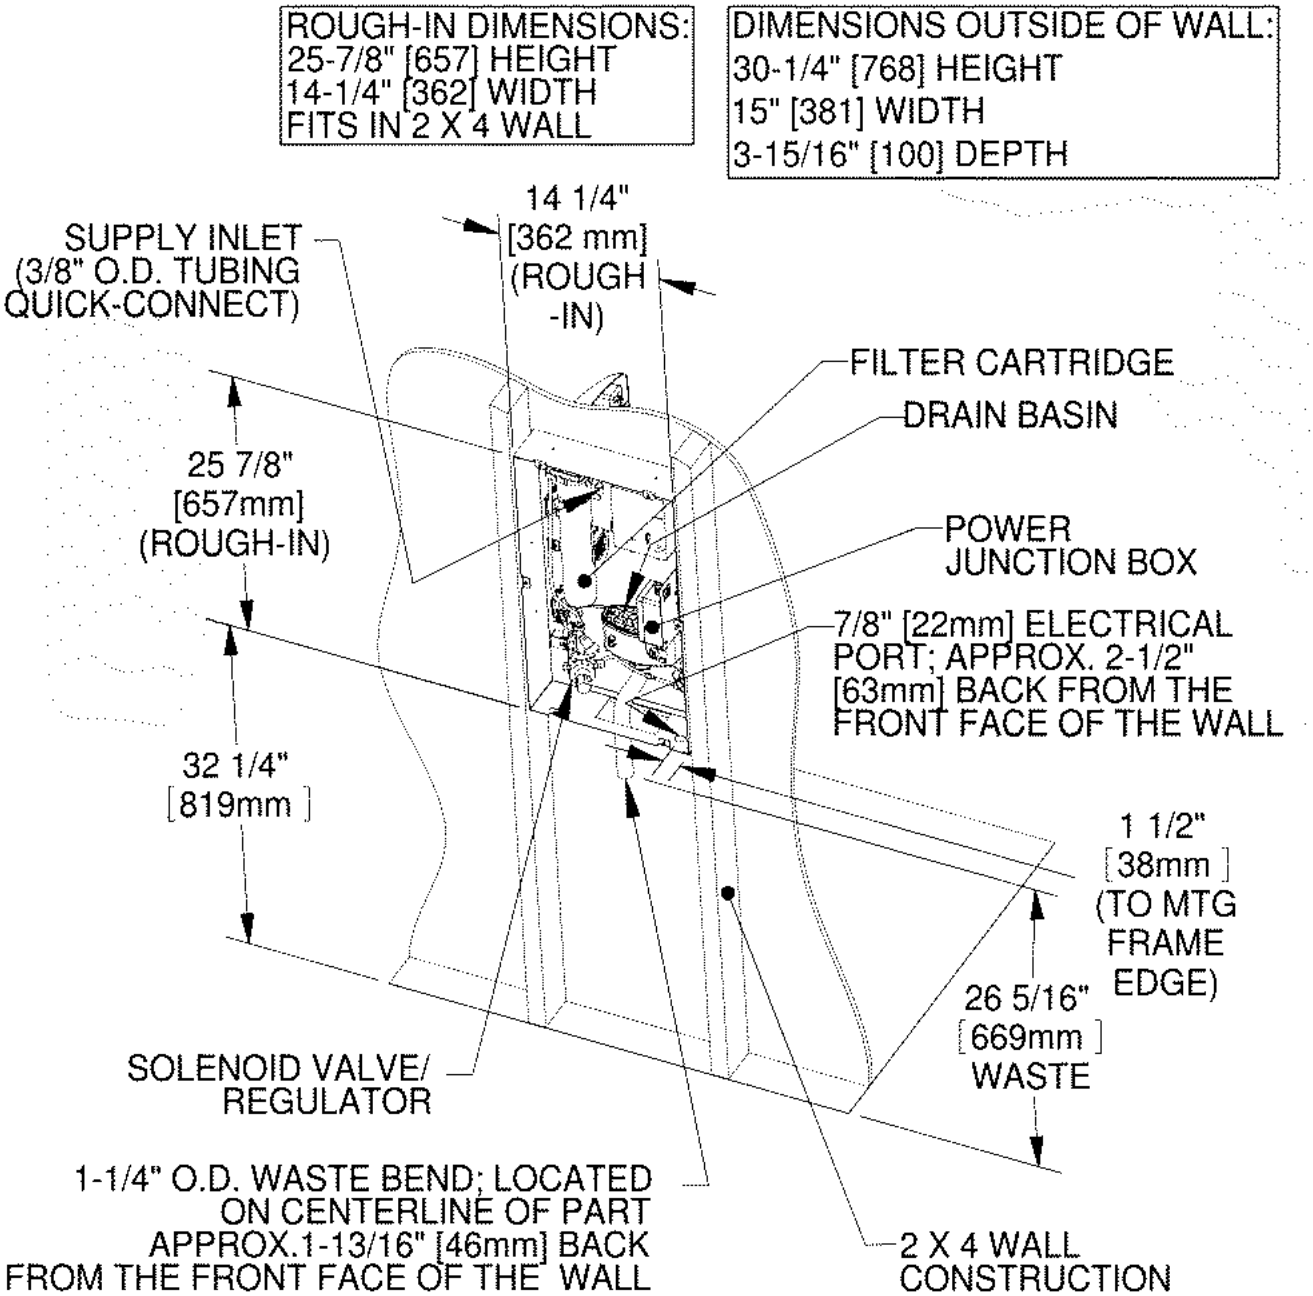


Step 5: Create a wall opening for the unit as shown in Step 5 Diagram – hold rough-in dimensions to within 1/8". The bottle filler is designed to fit between two normally spaced 2 X 4 studs (16" center-to-center).
Install waste line, supply line, and electrical lines in locations shown. The supply line should be brought up through the rectangular waste cutout in the bottom of the unit. Double-check waste, supply, and electrical line locations.
Install a 1/2" IPS supply screwdriver stop (not supplied) into the water supply line where it will be readily accessible.

NOTE: A suitable trap must be used in conjunction with the waste. This trap should be positioned in a location where it can be accessed and removed (it may be helpful to use a wall-mounted access panel).

NOTE: When installing this unit, all pertinent local, state, or federal codes should be adhered to.

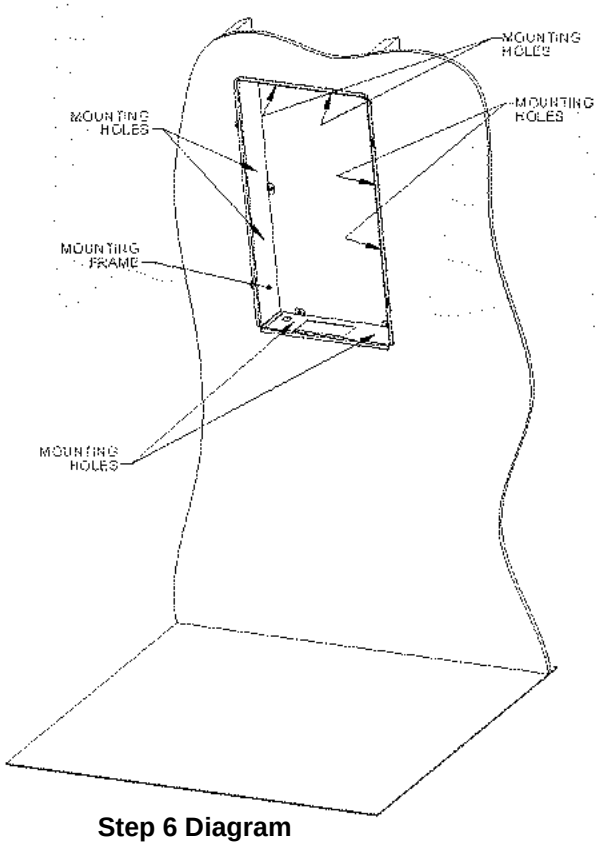
Bottle filler (rear cover removed) viewed from behind wall



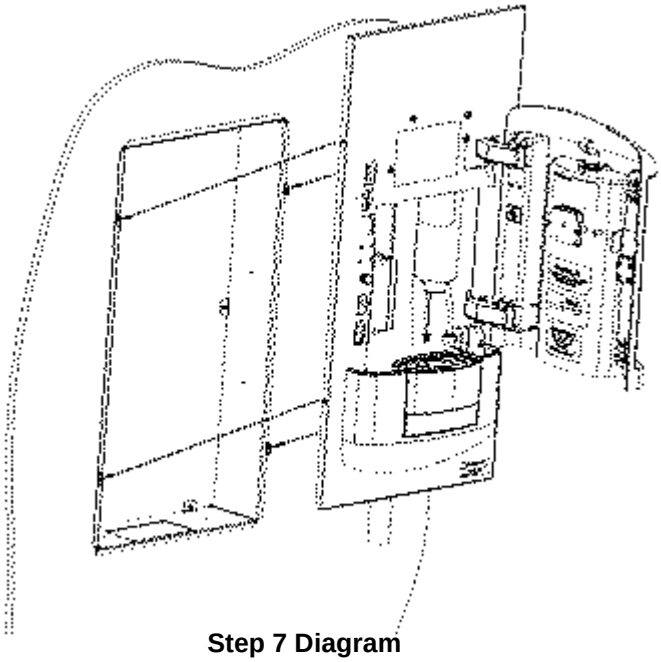
Step 5 Diagram

Step 6: Place the mounting frame into its opening such that it sits flush against the wall. Use some appropriate #6 screws (between 4 & 8 as required; not supplied) to secure the frame into the wall; notice that mounting holes are provided in the top, bottom, and sides of the mounting frame (see Step 6 Diagram).

Use a level to verify that the mounting frame is level horizontally and vertically; this will help to assure proper drainage and water flow that is properly aligned.



Step 6 Diagram

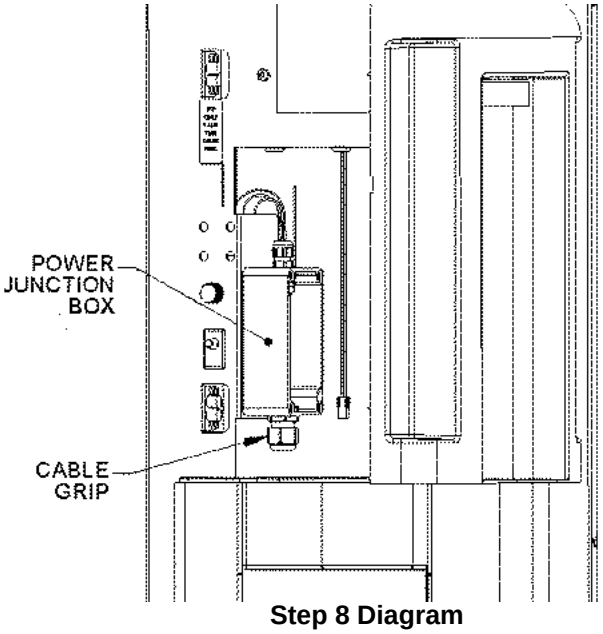


Step 7 Diagram

Step 7 Diagram

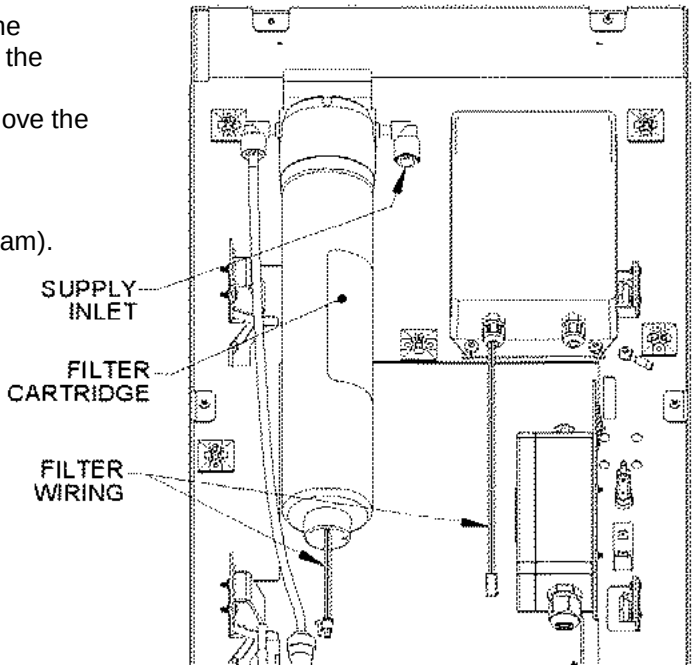
Step 7:
Place the bottle filler onto its mounting frame and make the connection between the bottle filler waste and the plumbed-in waste line.
Secure the bottle filler to the mounting frame using the 4 screws removed in Step 2 (see Step 7 Diagram).

Step 8: Open the power junction box; run supply power wiring through the bottom cable grip. Connect supply power to lead (black), neutral (white), and ground (green) wires inside the box (stripped leads provided) (see Step 8 Diagram). Replace cover.



Step 8 Diagram

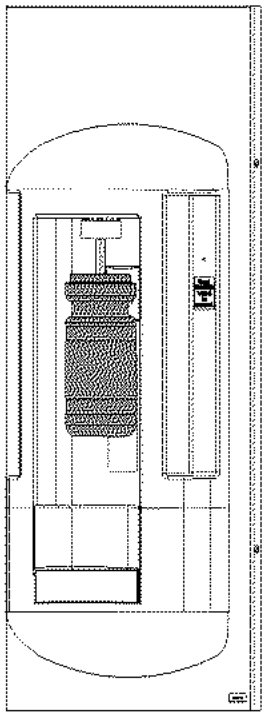
Step 9: Run 3/8" tubing (not supplied) between the screwdriver stop (installed in Step 5) and the bottle filler's supply inlet elbow in the filter head (it may help to temporarily remove the filter cartridge – see Step 9 Diagram). Connect the wiring coming off of the filter cartridge to the wiring coming out of the circuit board enclosure (see Step 9 Diagram).



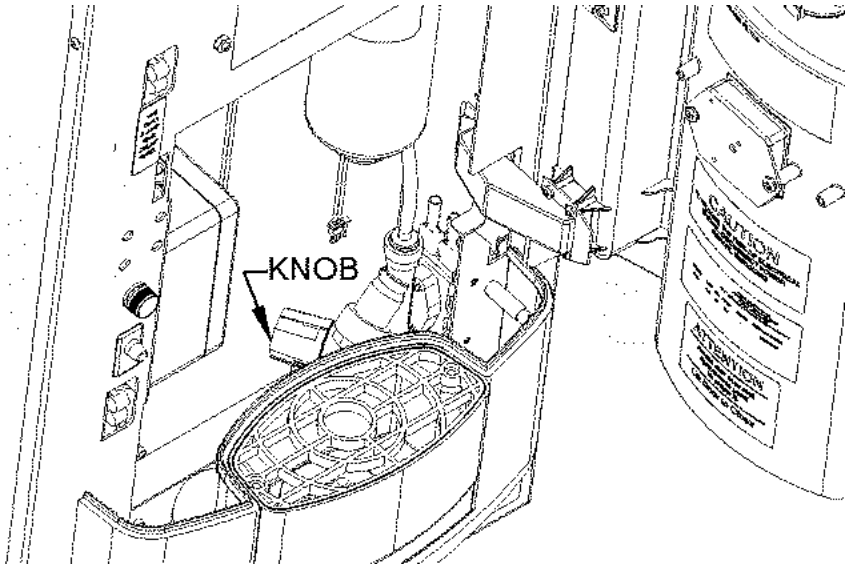
Step 9 Diagram (Back View)

Step 10: Open the screwdriver stop **wide open** and check for leaks. Close the hinged upper panel and provide power to the bottle filler.

Step 11: Activate the bottle filler by placing a bottle or cup in front of the sensor (see Step 11 Diagram A). If water does not dispense, see the Troubleshooting Guide in the Owner's Manual. The pressure regulator may need to be adjusted to better complement the input pressure at the installation site (see Step 11 Diagram B below). To do so, pull out the adjustment knob and rotate as needed (clockwise from the front of the unit decreases flow); push knob in when desired flow is achieved. * Flow rate is factory set to the maximum flow rate for reduced water consumption.



Step 11 Diagram A



Step 11 Diagram B

Step 12: **Approximately five gallons** of water must be run through the system after the unit is installed in order to remove the loose carbon particles from the filter cartridge and any air bubbles from the system (both of these are normal occurrences after a filter change). Check the system for leaks. Place hex key in a secure location.

Product Specifications

Key Features

- UL listed to all relevant standards (UL–916, UL 508A, cULus)
- Supports various ballast/driver types controllable by 0-10V
- Supports four WaveLinx Wired local buses per SCMD4 module
- Supports up to 48 switched outputs (based on selected configuration)
- Heavy duty 20A (@ 40C) relays used on all relay modules
- Capable of providing versatile solutions that include relays outputs, 0-10V outputs, DMX inputs and WaveLinx Wired local bus connections for controls inputs and luminaire level local control
- Capable of mixed load voltages (120/277 VAC 50/60Hz) based on proper spacing and wire insulation.
- Panel systems solutions include both normal and emergency power sources based on proper spacing and wire insulation
- Ethernet connectivity available (based on selected catalog number)
- DMX output available using SCD96 or SCDServer Pro network accessory
- Capable of meeting all latest energy codes (IECC, Title 24, ASHRAE)

Mechanical

Enclosure: NEMA 1, Surface Mount, lockable, Size: See Dimensions

Enclosure Size:

- Small: 14.56” W X 12.22” H X 3.56” D (369.8mm x 310.4mm x 90.4mm)
- Medium: 25.67” W X 25.34” H X 6.06” D (652mm x 643.6mm x 153.9mm)
- Large: 25.73” W X 35.54” H X 6.07” D (653.5mm x 902.7mm x 154.2mm)

Weight:

- Small: 10lbs (4.5 kg)
- Medium: 33lbs (15 kg)
- Large: 59lbs (26.7 kg)

Environment:

- **Operating temperature:** 35°F to 122°F (+2° C to +50° C)
- **Max Storage temperature:** 140°F (+60° C)
- **Relative humidity operating:** +5 to 95% non-condensing
- For indoor use only

Electrical

Supply: 120-277VAC ± 10% 50/60Hz, 5A Max

Maximum Load:

- **Switching Load:** 20A max. per relay, 192A max. total (SCMR1220 Module)
- **0-10V Load:** 50mA per channel (SCMH1200 Module)
- **Local buses:** 250mA per loop/bus (SCMD4 Module)

Protection Internal: 5A Circuit Breaker for incoming power

WaveLinx Wired Network: Use Belden 1502 or 1502P, WaveLinx Wired accessory LCCP or LCCNP or equal

Local Bus Wiring: 18-14AWG(depending on distance)

0-10V Wiring: 18-14AWG (depending on distance)

Standards/Ratings

- cULus Listed - Energy Management Equipment (UL916)
- Meets ASHRAE Standard 90.1 requirements
- Meets IECC 2015 requirements
- Meets CEC Title 24 requirements

Environmental Regulations:

- NEMA 1 Type 1

Warranty

Five year warranty standard

Overview

Cooper Lighting Solutions WaveLinx Wired area controllers are one single lighting control solution for all traditional wired control application needs. Designed to be the most scalable, simple, modular and feature rich, these DIN Rail based lighting area controllers are capable of handling energy management, code compliance, architectural lighting and individual addressable lighting applications, all from a single system.

The Cooper Lighting Solutions WaveLinx Wired IL area controllers are sold as a portfolio of feature rich lighting control panels that come in 11 different base configurations across three different enclosure sizes- small, medium and large. All configurations in medium and large size enclosures have the Ethernet Gateway (EG-2) available as an option. Each configuration and option combination has a unique catalog number (within the IL Series) for ease of ordering and identification.

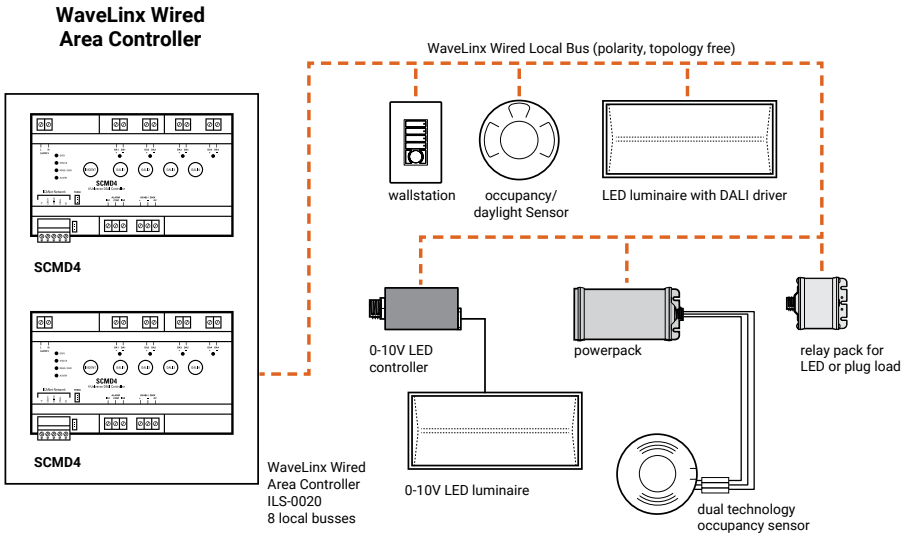
Depending upon the size of the job and the limitations of the electrical closet and/or equipment room spaces, the area controllers can be mixed and matched and networked together. Each area controller configuration is fully networkable via Cooper Lighting Solutions WaveLinx Wired network and commissioned via the Device Editor software package.

The WaveLinx Wired area controller series solution comes compatible with a full complement of Cooper Lighting Solutions existing portfolio of sensors and accessories. These can be configured with any of the IL Series area controller configurations to create a powerful lighting control solution that can perform a variety of functions such as:

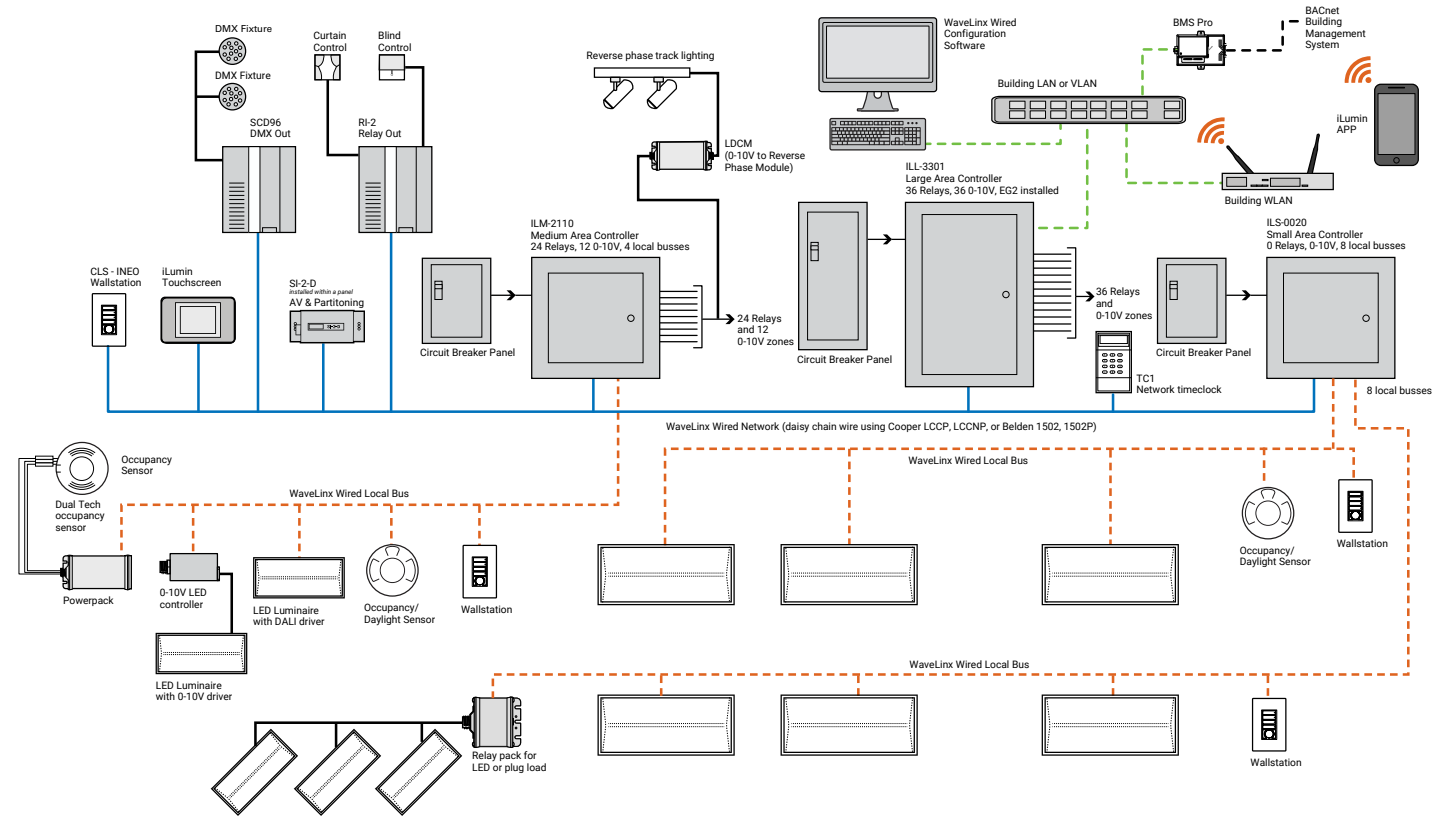
- Occupancy/Vacancy sensing
- Scheduling
- Daylight Harvesting
- Shade Control
- A/V Integration
- Standard/Custom partitioning
- DMX control
- BMS integration and more. Please refer to the design guide and product brochure for more details (see Additional Resources section).

System architecture

Simple WaveLinx Wired system



Complete WaveLinx Wired system



WaveLinx Wired Panel Series

Sample System Topology:

This diagram shows the main components of the WaveLinx Wireless and Wired Connected Lighting system.

The **WaveLinx wireless system** communicates using wireless mesh technology based on the IEEE 802.15.4 standard. A PoE LAN connection for each Wireless Area Controller (WAC) is required for power and data access to the building lighting network.

The **WaveLinx wired system** controls the devices using relay, 0-10V, DALI methods. A CAN connection for each panel is required for data exchange between the panels. To communicate with the Trellix Core, the WaveLinx wired system requires an ethernet gateway. A LAN connection for each ethernet gateway (EG2) is required for data access to the building lighting network.

The Trellix Core, WaveLinx Area Controllers (WAC) and WaveLinx Ethernet Gateways (EG2) communicate with each other over the Ethernet network.

Please refer to the WaveLinx Wireless Network and IT Guidance Technical Guide and WaveLinx Wired Network and IT Guidance Technical Guide for more information.

Product Certification

Part 15/Class A

IC RATED

Product Features

PoE 802.3af

Top Product Features

- **802.3af Power Over Ethernet (PoE)** – Allowing the user to power up to four (4) WaveLinx Area Controller and/or WaveLinx Touchscreen
- **Auto-MDI/MDIX** – Eliminates the need for crossover cables
- **LED indicators** – Allowing user to easily set the status of each port
- **Fan-less design** – Ensuring silent operation of the switch
- **Plug-and-play** – No setup required

Product Specifications

Key Features
- Unmanaged
- Auto-MDI/MDIX
- Fanless
- Plug-and-play

Mechanical
Size: 6.2" W x 4.0" D x 1.1" H (158mm x 101mm x 29mm)
Weight: 1.02 lbs (0.46 kg)
Environment:
- **Operating temperature:** 32°F to 104°F (0°C to 40°C)
- **Storage temperature:** -4°F to 158°F (-20°C to 70°C)
- **Operating/ Storage Humidity:** 90% maximum relative humidity (RH), non-condensing / 95% maximum relative humidity (RH), non-condensing
- For indoor use only

Mounting: Desktop or wall-mountable
Housing: Metal
Connector Type: Metal

Electrical
Power Consumption
- **DC Input/Power In:** 48V, 1.25A
- **Power Consumption (Max and Standby):** 60W/0.28W
- **Heat Dissipation (Max and Standby) (BUT/Hr):** 205.20 BTU/0.96 BTU

Hardware Specifications
LEDs
- **Per Port:** Speed, Link/Activity (Left), Ports 1-4: PoE Power (Right)
- **Per Device:** Power, PoE Max

Performance Specifications
- **Bandwidth (Non-Blocking):** 16 Gbps
- **Packet Buffer Memory (Dynamically shared across only used ports):** 192 KB
- **Jumbo Frame Support:** 9,720 bytes
- **Queue WRR (Weighted Round Robin):** 1:2:4:8
- **Forwarding Rate (using 64-byte packets):** 1,448,000 pps
- **Latency (using 64-byte packets):** < 3.0 µsec
- **MAC Address Table Size:** 4K
- **Auto MDI/MDI-X Cable Detection:** Yes
- **Auto-sensing Half/Full Duplex Switched Ports:** Yes
- **Mean Time Between Failures (MTBF) @ 25° C :** 2,244,211 hours

Quality of Service (QoS)
- **802.1P Based (CoS) Supported:** Yes
- **Honors DSCP (DiffServ) Tags:** No

PoE Configuration
- **802.3af PoE Ports:** Ports 1-4
- **PoE Max Power Per Port:** Up to 15.4W
- **Total PoE Power Budget:** Up to 53W
- **PoE auto-balance:** No

Energy Efficiency
- **Energy Efficient Ethernet (EEE) IEEE 802.3AZ:** Yes
- **Auto Power Down:** Yes
- **Short Cable Detection:** Yes
- **Fan/Fanless:** Fanless

Standards/Ratings
- FCC Part 15/ECES-003
- IC Class A
- IEEE Network Protocols
- IEEE 802.3ab 1000BASE-T Gigabit Ethernet
- IEEE 802.3u 100BASE-TX Fast Ethernet
- IEEE 802.3i 10BASE-T Ethernet
- IEEE 802.3x Flow Control
- IEEE 802.1p Priority QoS (all models)
- IEEE 802.3 CSMA/CD
- 802.3az Energy Efficient Ethernet

Environmental Regulations:

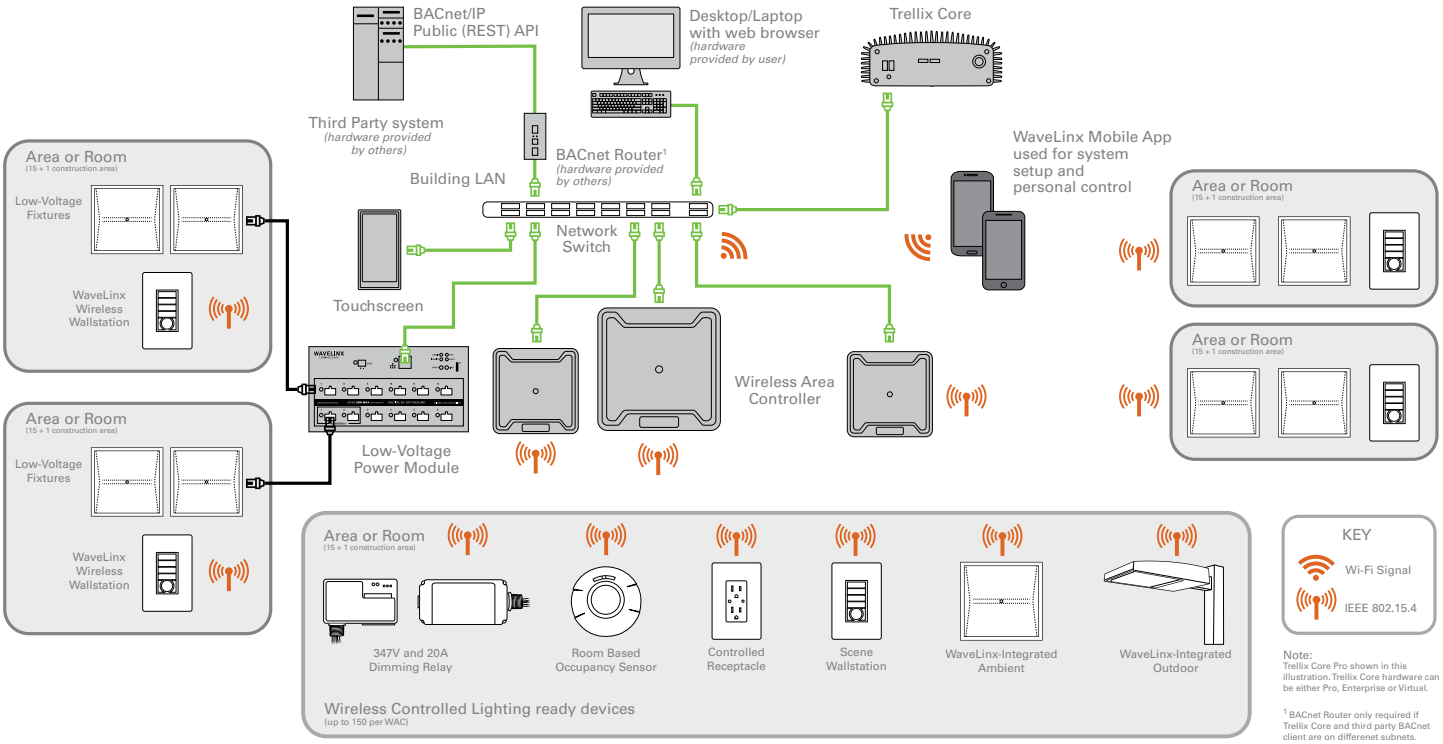
Warranty
Three year warranty

WaveLinx Wireless — Unmanaged Network Switch

System Architecture

This diagram shows the main components of the WaveLinx Wireless Lighting control system. The IP devices, i.e. WaveLinx Area Controllers (WACs), WaveLinx Touchscreen, WaveLinx Low Voltage Power Modules and Trellix Core appliances communicate over a dedicated Local Area Network or Virtual Local Area Controller. The network switch can be provided either by the customer or the GS308P switch can be used to provide network connectivity between devices.

View WaveLinx Network and IT Guidance Technical Guide



Installation

Step 1: Install the switch on the rack or a wall. The PoE Switch is usually mounted in an electrical or telecom room
Step 2: Connect equipment to using Category 5 or Category 6 cable with terminated RJ-45 connectors.
Connect PoE devices (WACs or Touchscreens) to ports marked "PoE Ports"
Step 3: Connect power adapter to back of switch and plug adapter into 120V AC outlet
Step 4: Check status lights as shown. AVDC - OAA

iLumin Plus

DESCRIPTION

The touchscreen is a flexible device which provides an intuitive "user friendly" method of interfacing to the iLumin Plus control system. The touchscreen provides virtually a limitless flexibility of system control. It is software based, and buttons can be tailored to suit the precise needs of the user.

		Type
Catalog #	TSE55-B	ALC-030
Project

SPECIFICATION FEATURES

Key Features

- 5.5 inch (140mm) diagonal backlit capacitive LCD touchscreen
- 1280 X 720 pixel resolution
- Color Depth: 16.7M colours, 450 nits brightness
- Ambient Light sensor
- Fits standard single gang backbox (35mm depth)
- All graphics and buttons can be customized
- Password feature to allow different access levels
- Designed and manufactured to ISO9001:2015 standards
- Portrait or landscape mounting and layout

Functionality

- Scene Selection
- Scene programming
- Channel level indicated with bar graphs and percentage
- Scene and channel naming
- Default screen programming
- Photocell / motion sensor interaction
- Ability to import drawings, customer logos and images as background graphics
- Ability to insert soft buttons for activating scenes and / or channels

TSE55-B
5.5" LCD COLOR TOUCHSCREEN

MECHANICAL

Display: High performance HD, IPS 5.5" LCD, 1280 X 720 resolution

Color Depth: 16.7M colors, 450 nits brightness

Climate Range:

- **Temperature:** +2°C to +40°C
- **Humidity:** +5 to 95% non condensing

ELECTRICAL

Supply: PoE 802.3af complaint or via 24-57Vdc power connector on the rear

Power Connection: RJ45

Programming: Eaton's Touchscreen Designer software via Ethernet connection

Diagnostics: network

Memory:

- 1GB DDR3
- 8GB eMMc

iLumin Plus

DESCRIPTION

Eaton's iLumin Plus software includes a set of applications and tools that facilitate the setup, configuration, performance tuning and management of iLumin Plus Area Controllers and their associated devices. Using this Microsoft Windows™ based software, commissioning and facility management personnel can create areas, scenes, schedules and view the status of devices in the iLumin Plus network.

		Type
Catalog #		ALC-030
Project		
Comments		Date
Prepared by		

SPECIFICATION FEATURES

Key Features

- Auto device scan and detection
- Define lighting areas, sense and zones
- Occupancy detection configuration
- Daylight harvesting configuration
- Receptacle control
- Control sequencing
- Time scheduling
- Control panel screen editor
- Partitioning setup
- Demand response settings
- Device monitoring
- Smart Phone configuration
- Personal control setup

ILUMIN PLUS
SOFTWARE

HARDWARE

Recommended minimum hardware:
Operating System: Microsoft Windows 7 or higher
Hard Disk: 320GB HDD, 500MB for applications
Memory: 8GB DRAM minimum
Ports: USB

USER INTERFACE EXAMPLES

Device Editor module: Device configuration and addressing
Scheduler module: Provides enterprise level centralized scheduling tool
Panel Editor module: Enables user graphic screen control of areas and scenes
Daylight Engines: Simple visualization of daylight and occupancy sensor control and time out period

ORDERING INFOMATION

iLumin Plus software is ordered as part of the iLumin Plus system. At least one instance of the iLumin Plus software should be provided for each installed location.

Catalog No.	Description
SOFT-ILP	iLumin Plus software
ILP-SCREENS	Eaton configured visualization screens for the Panel Editor module (does not include floor plan control)

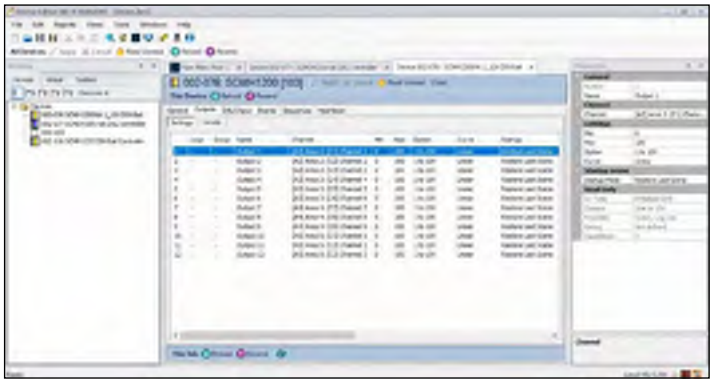
SCREEN EXAMPLES

1. Device Editor screen examples



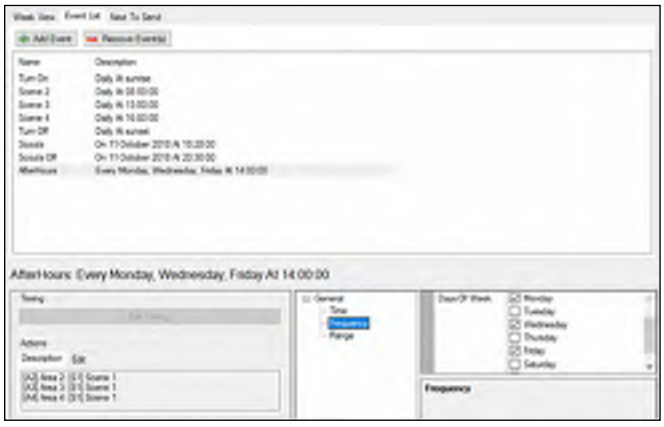
Note:

- Easily define areas, zones and scenes
- Map control outputs to DMX input channels
- See all devices on the lighting control network
- Develop powerful advanced control sequences
- Program basic time schedules

Note:

- Addressing tool provides automatic addressing of devices on the two wire communications bus.
- Easily re-address devices without effecting device programming

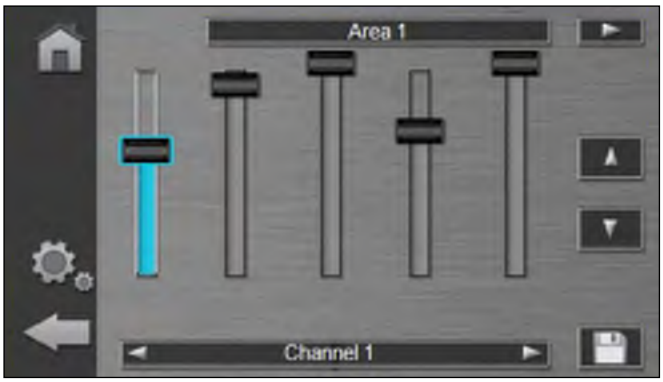
2. Scheduler screen examples



Note:

- Enterprise level scheduling
- Weekly, monthly time schedule views with sun up, sun down time icons
- Seven day scheduling, with holiday and reoccuring schedule events

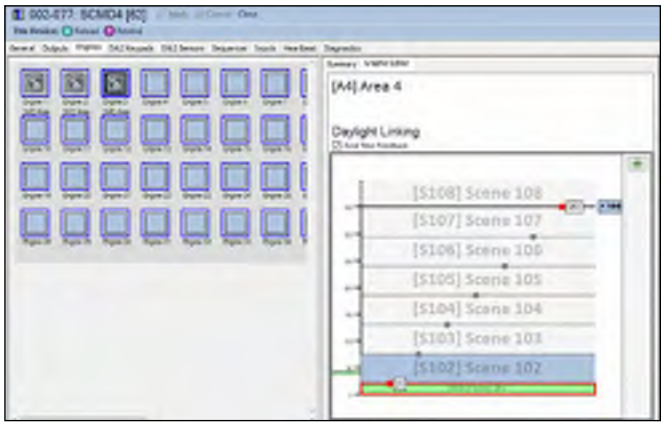
3. Panel Editor screen examples



Note:

- Sample ILP-SCREENS defined by programming technician
- Provides user control via laptop, PC or touchscreen display
- Allows authorized user to modify and save scenes for the system

4. Daylight Engines screen example



Note:

- Multiple engines available per system providing Occupancy and Daylight sensor profiles.
- Visual representation of daylighting light level control
- Visual representation of occupancy sensor activation and time out period.
- Visual method to assign first and second occupancy sensor timeouts

ILUMIN
INTELLIGENT CONTROLS

CLS

Wallstations - Ineo

Features

Electrical

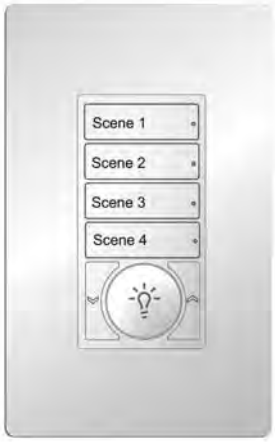
- 12Vdc supply voltage via the network
- iCANnet connection: Screw terminals with two part connectors, able to accept 16AWG (1.5mm^2) stranded or solid wire
- Flash memory for future proof upgradeability
- Variable fade times programmable from 0.1seconds to 60 minutes per button
- Built-in infrared receiver with learnable remote codes.
- Network Communication using iCANnet (CANbus)
- A range of ten standard wall station templates can be selected via the Source Controller for easy configuration
- Using iCANsoft each button can be individually configured to perform a variety of functions
- Tested to withstand 12kV electro-static discharge without damage or memory loss.
- Configuration
    - o Universal module allows for 10 unique button inserts to be added at any time and configured through Source Controller programmer or iCANsoft.

Mechanical

- 4 different styles of button caps that can be used to construct a wide range of derivatives for scene, raise, lower and on / off functionality
- Choice of large or small button caps
- Buttons available with standard or custom engraving
- On/ Off switch (where fitted). A double tap of the On/Off switch overrides the fade time
- Suitable for standard single and multi-gang NEMA wall box with decorator style wallplate
- All plastic construction with a separate decorator style snap-on surround

Environmental Data

- Temperature Range: 32°F to 104°F (0°C to 40°C)
- Humidity: 0% - 95% non-condensing



Overview

Ineo is the specification grade range of wallstations that combine the easiest user interface in the industry with a large circular on/off button, a universal module with up to 10 button configurations, large or small button options, and engraving.

Designed to fit with standard decorator wallplates, Ineo wallstations can be ganged together to meet specific project needs. Individual buttons have backlight indicator lights and strong tactile feedback.

Ineo is the clean, elegant, and simple way to control lighting on your project.

Button functionality

Using iCANsoft each button can be configured to perform the following functions:

- Scene selection
- Scene raise / lower
- Channel raise / lower
- Toggle on / off
- Open / close (for curtains & blinds)
- Raise / lower (motorized screens / blinds)
- Sequence control (16 sequences with up to 128 steps)

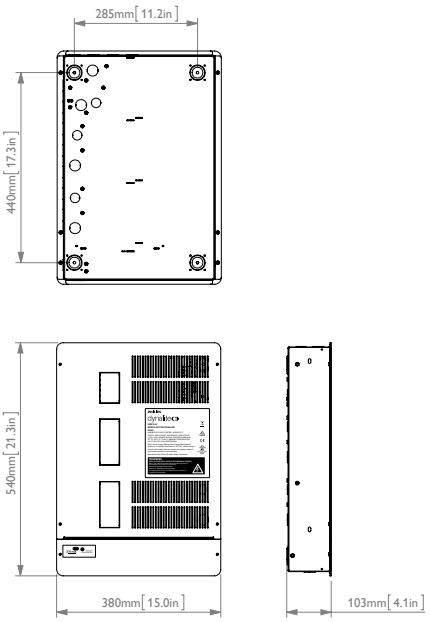
DMC2-UL Multipurpose Modular Controller

Control different load types with one device

The Philips Dynalite DMC2 provides multichannel control via two interchangeable modules. The device is available with a variety of control modules to handle various load types and capacities. This model is suitable for use in UL markets.



- Single controller solution — Control a multitude of load types from one device, suited to any segment requiring indoor lighting or relay control.
- Phase cut dimmer module — Selectable per channel for Leading or Trailing Edge output. Compatible with most dimming loads.
- Driver control module — Suitable for controlling 1-10V, DSI and DALI Broadcast drivers. A built-in relay removes power when channel level is at 0%.
- Relay control module — Suitable for controlling most types of switched loads.
- Flexible mounting solution — Surface or recess mountable enclosure.
- Passive cooling — Fanless design reduces noise, power consumption and maintenance costs.

Signal Dimmers

DDBC516FR

Signal Dimmer Controller

Flexible control of 1-10 V and DALI drivers

The Philips Dynalite DDBC516FR is a five-channel device for controlling DALI drivers. Each control output is selectable to DALI broadcast, DALI addressed, 1-10 V or DSI.

DDBC516FR

Flexible control of 1-10 V and DALI drivers

- **Multiple protocols supported** – Each of the five control outputs supports DALI broadcast (maximum ten DALI loads/channel), DALI addressed (maximum ten DALI loads/channel), 1-10 V (maximum 10 mA sink or source/channel) or DSI (maximum five DSI loads/channel).
- **Built-in energy savings** – Control signals can be programmed to operate in tandem with five internal switched outputs, which will automatically isolate the power circuit when all associated channels are at 0%. This is a useful feature as DALI drivers still draw significant power when lamps are turned off via a DALI command.
- **Integral DALI bus power supply** – Removes the need for an additional external device.
- **Flexible mounting solution** – A DIN-rail mountable device, designed to be installed into the distribution board supplying power to the controlled circuit.
- **Inbuilt diagnostic functionality** – Features lamp and driver failure reporting, driver run time tracking for each driver and the switched output, as well as Device Online/Offline status indication.

Signal Dimmers

DDBC1200

Signal Dimmer Controller

Multi-protocol control solution

The Philips Dynalite DDBC1200 features 12 independent output channels, each selectable to DALI Broadcast, 0-10 V, or DSI control.

DDBC1200

Multi-protocol control solution

- **Multiple protocols supported** – Compatible with a range of fittings and devices including; DSI drivers, DSI electronic low voltage transformers, DALI drivers (broadcast mode only), DALI electronic low voltage transformers (broadcast mode only), 0-10 V drivers, and devices that require 0-10 V analog control signals.
- **LED status indicators** – Instant visual feedback on channel status of all 12 outputs.
- **Flexible mounting solution** – A DIN-rail mountable device, designed to be installed into the distribution board supplying power to the controlled lighting circuit.
- **Inbuilt diagnostic functionality** – Features Device Online/Offline status indication.

Signal Dimmer Controller

Electrical

Supply Type	Single-Phase
Supply Voltage	100-240 VAC
Supply Current	0.5 A
DyNet DC Output Voltage	12 VDC
DyNet DC Output Current	200 mA
IEC Overvoltage Category	III

Control

Serial Ports	1 x RS-485
Supported Protocols	DyNet DMX Rx
DMX Rx Channels	12
Control Channel Outputs	12 (DALI Broadcast, DSI or 0-10 V)
Dry Contact Inputs	1 (AUX)
User Input	1 x service switch 12 x channel override
Indicators	1 x diagnostic LED 12 x channel status LED
Diagnostic Functions	Device online/offline status

Physical

Dimensions (H x W x D)	93 x 215 x 64 mm (3.66 x 8.46 x 2.52 in)
Packed Weight	0.54 kg (1.19 lb)
Construction	Polycarbonate DIN rail enclosure (12 unit)
Serial Ports	2 x RJ12 1 x 6-way pluggable screw terminal
Serial Port Conductor Size	2.5 mm^2 (#12 AWG) (max)
Supply Terminals	3 x screw terminal Line, Neutral, Earth
Supply Terminal Conductor Size	5 mm^2 (#10 AWG) (max)
Control Terminals	12 x 2-way screw terminal DA-, DA+
Control Terminal Conductor Size	5 mm^2 (#10 AWG) (max)

Environment*

Operating Temperature	0° to 40°C ambient (32° to 104°F)
Storage/Transport Temperature	-25° to 70°C ambient (-13° to 158°F)
Relative Humidity	0 to 90% non-condensing
IEC Pollution Degree	II

Compliance

Certification	CE, RCM, UL/cUL, FCC, ICES, UKCA, RoHS

* For indoor installation only

Network Devices

DH2X24

DIN Rail Enclosure

Safe, flexible housing for DIN rail devices

The Philips Dynalite DH2X24 is a wall-mounted enclosure with two 24-unit DIN rails, designed for easy mounting and housing of Dynalite DIN rail products.

The enclosure includes a removable front cover, removable DIN rail plate, and a variety of cabling knockouts along the side, top and bottom for safe and convenient installation.

DH2X24

Safe, flexible housing for DIN rail devices

- **Galvanized steel body** – Extremely durable construction, designed to keep housed devices safe.
- **Passive cooling** – Sufficient ventilation to accommodate any combination of Dynalite DIN rail dimming controllers at up to 70% of their rated loads.
- **Removable DIN rail plate** – Allows you to mount devices outside of the enclosure, or run wiring behind the plate to maintain segregation.
- **Designed to hold up to four 12-unit DIN rail devices** – or any combination of smaller devices, up to 24 units per rail.

Electrical Safety

Maximum Voltage	230/400 VAC max (CE), 300 VAC max (UL).
Maximum Current	125 A

Physical

Dimensions (H x W x D)	410 x 494 x 107 mm (16.14 x 19.45 x 4.21 in)
Packed Weight	6.3 kg (13.89 lb)
Construction	Galvanized steel enclosure Powder-coated front cover
Cable Entry Knockouts*	10 x Ø 28 mm (1.11 in) 4 x Ø 50 mm (1.97 in)

Earth Bar Torque Ratings

#14-10 AWG	2.26 Nm (20 Lb-in)
#8 AWG	2.82 Nm (25 Lb-in)
#6-4 AWG	3.95 Nm (35 Lb-in)
#3-2/0 AWG	5.65 Nm (50 Lb-in)

Compliance

Certification	CE, RCM, UL/cUL, RoHS

* Ø 28.2 mm (1.11 in) knockout is suitable for ¾ inch conduit
Ø 50 mm (1.97 in) knockout is suitable for 1½ inch conduit

Controller De-rating

- Each Philips Dynalite controller housed in the DH2X24 must be de-rated to a maximum of 70% of its rated load.
- The prospective short-circuit current must not exceed 10 kA, unless protected by a current limiting device with a maximum cut-off current of 17 kA.

Sensors

DUS360CR

Multifunction Sensor

Low profile recessed 360° ceiling sensor

The Philips Dynalite DUS360CR is a recess mountable 360 degree multifunction sensor that combines motion detection (PIR), infrared remote control reception (IR) and ambient light level detection (PE) into one device in applications such as offices, lecture theaters and homes.

DUS360CR

Low profile recessed 360° ceiling sensor

- **Motion detection feature** – Detects the presence or absence of motion and adjusts lights accordingly.
- **Segmented click-up bezel** – Surrounds the motion sensor element and enables a portion of the sensing field to be masked. This prevents nuisance detection from adjacent doorways or corridors.
- **Ambient light level regulation** – In applications where it is critical to maintain precise light levels, the PE function reads ambient levels and adjusts artificial light accordingly.
- **Infrared receive capability** – Manually adjust light levels using a hand-held remote control, via the inbuilt IR receive sensor of the DUS360CR.
- **Daylight harvesting mode** – Delivers automatic energy savings.
- **Corridor hold** – Links corridor areas with adjacent rooms so corridor remains lit while occupancy is detected in adjacent rooms.
- **Anti-stumble sensing option** – Helps users move about safely at night without having to find a light switch. (see page 4 for details)
- **Suitable for plenum use** – UL2043 certified for installation in air-handling plenum spaces.

Indicators	1 x red motion LED

Physical

Dimensions (H x W)	41 x 72 mm (1.61 x 2.83 in)
Packed Weight	0.105 kg (0.23 lb)
Construction	Polycarbonate plastic enclosure
Color	RAL9010
Serial Ports	1 x 5-way screw terminal +V, D-, D+, GND, SHLD
Screw Terminal Conductor Size	2.5 mm² (#12 AWG) (max)
Mounting Substrate Thickness	3-25 mm (0.12-0.98 in)

Environment**

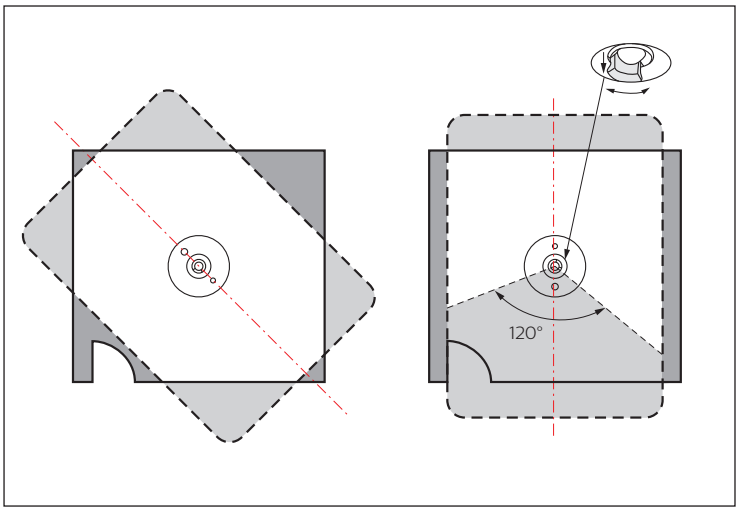
Operating Temperature	0° to 45°C ambient (32° to 113°F)
Storage/Transport Temperature	-25° to 70°C ambient (-13° to 158°F)
Humidity	0 to 90% non-condensing
IEC Pollution Degree	II

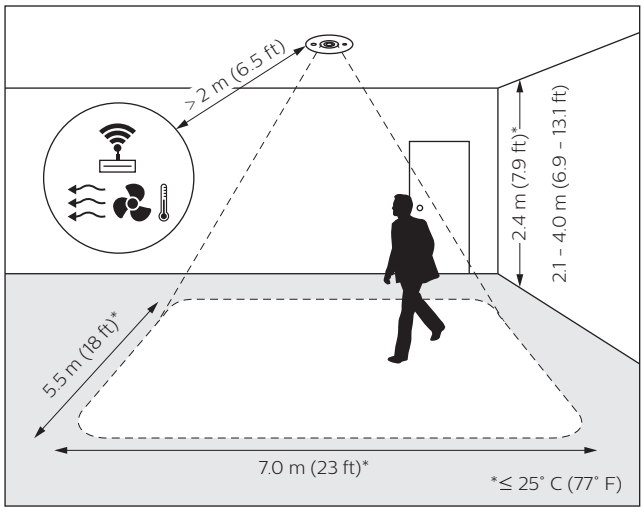
Compliance

Certification	CE, RCM, UL/cUL, FCC, ICES, UKCA, RoHS
IP Rating	IP20

** For Indoor Installation Only

Detection Area





* Typical detection range at ≤ 25°C (77°F). Range is reduced at higher temperatures.

Detection Area with DUS180WR Anti-Stumble Faceplate

Mounted as shown below with the optional DUS180WR faceplate, the DUS360CR provides ground-level bedside motion detection after dark. When a guest leaves the bed at night, selected lighting channels come on at minimum brightness so that they can move about safely without waking other sleepers.

Federal Communications Commission (FCC) Compliance Notice: Radio Frequency Notice – This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. Any modifications not approved by the manufacturer of this device could void the user's authority to operate this device.

This Class B digital apparatus complies with Canadian ICES-003: CAN ICES-3(B)/NMB-3(B). Cet appareil numerique de la classe B est conforme a la norme NMB-003 du Canada: CAN ICES-3(B)/NMB-3(B).

Installation of a home and building automation and control system shall comply with HD 60364-4-41. The temperature limits and current-carrying capacities for the communication wires specified in HD 384.5.523 shall not be exceeded.

Do not connect inputs to mains.

User Interfaces

PDRxE

Revolution Euro

Contemporary two-, four-, or eight-button panel with backlit buttons

The Philips Dynalite Revolution user interface features a sleek, contemporary design and incorporates the latest in field effect technology. Each easy-to-press mechanical button can be customized with text or icons and programmed to perform a wide variety of local and site-wide control functions. The Revolution Euro range is suitable for, but not limited to, European, Middle Eastern, African and Asian markets.

PDRxE

Contemporary two-, four-, or eight-button panel with backlit buttons

- **Field effect technology*** – The user interface detects an approaching user and lights up to encourage interaction.
- **Color backlight** – Customize each button's backlight from an RGB color palette.
- **Supplied as two components** – The Application Module contains buttons, rim, base and mounting plate, which can be mixed and matched to suit décor. The Communication Module (DACM) contains logical and network functions and can be pre-programmed off-site, allowing commissioning to commence prior to finalizing rim and button options.
- **Multiple language and icon labeling** – Button labeling language choices include English, Chinese and Arabic. A library of common icons transcends language barriers, which is particularly useful in hospitality applications.
- **Custom button engraving –** Available on request.
- **Décor-matching options** – Buttons and rims are available in a range of attractive glass-look polycarbonate finishes.
- **64-channel DMX Tx support –** Can be factory-set to DMX instead of DyNet, to communicate directly with DMX fixtures

* The mounting plate must be grounded to avoid field effect false triggering by nearby ungrounded metal objects.

Application Module Ordering Code

The Application Module contains the mounting plate, base, rim, frame, and buttons. The buttons, frame, and rim are available in the range of finishes shown below.

The base contains all the sensors and LED indicators. A metal mounting plate attaches the Revolution panel securely to the wall, ensuring stable, reliable operation.

PDR8xxE-BBB-S

Number of Buttons*	Button Finish	Frame Finish	Rim Finish	Button Labeling
8 = Eight buttons	B = Black	B = Black	B = Black	S = Standard labeling
4 = Four buttons	W = White	W = White	W = White	C = Custom labeling
2 = Two buttons				

* Placeholder 'x' slots reserved for future release of two- and three-gang frames..

Communication Module Ordering Code

The Dynalite Application Communication Module (DACM) is compatible with all interfaces across the Revolution series, and can be ordered, programmed, installed, wired and tested without the Application Module attached.

This allows the commissioning process to begin before the final finish options have been chosen, or during construction, and protects the Application Module from damage until the site is ready for occupancy.

User Interfaces

PDTS

Networked Touchscreen

Advanced building automation and control at your fingertips

Designed as an integral part of the Dynalite system, the PDTS offers intelligent control and direct access to scheduling, scene editing, diagnostics, and local environmental sensing.

Combining Ethernet connectivity, a powerful onboard processor, and contemporary design cues from the Antumbra user interface range, the PDTS is a sleek, functional complement to any project.

PDTS

Advanced building automation and control at your fingertips

- **178 mm capacitive touchscreen –** with high resolution, rich color and wide viewing angle.
- **Proximity sensor –** triggers soft halo light effect to welcome user interaction.
- **Ethernet port –** Provides access for commissioning and file transfers.
- **Internal astronomical timeclock –** enables advanced scheduling of behavior, options, and automated tasks based on time of day or sunrise/sunset.
- **Customizable graphical menus –** seamless control of lighting, curtains/blinds, HVAC, A/V equipment and compatible third-party systems.
- **Built-in environmental sensors –** humidity and temperature can be displayed on standby screen and communicated to third-party systems.
- **Templated commissioning option –** simply load the project XML file for fast configuration, or upload custom web pages from System Builder.
- **Thin profile and easy mounting –** fits industry-standard double wall boxes (EU or US).
- **Secure Access –** Employs HTTPS for secure, encrypted network communication, with support for onboard security certificates.
- **User authentication –** secure login feature available for CGI commands and user functions, with customizable access levels for each user.

Integration Devices

PDEG

Ethernet Gateway

Flexible Ethernet integration

The Philips Dynalite PDEG provides a multipurpose Ethernet connection to a Philips lighting control system. It supports access to the lighting system via a dedicated Philips app as well as providing a web interface delivering access to the inbuilt timeclock and schedule editor functions. It provides bridging functionality between Ethernet backbone and the DyNet fieldbus devices.

PDEG

Flexible Ethernet integration

- **Large storage capacity** – The device stores large project files internally, which apps use to automatically configure their settings. This saves configuration time and ensures accuracy for phone and tablet control.
- **Built-in web server** – Provides control and status via Common Gateway Interface (CGI) protocol. Allows authenticated users to edit and check system settings via the Network Hardware Checker and System Roll Call tools.
- **Secure Access** – Employs HTTPS for secure, encrypted network communication.
- **Network routing** – Routing functionality such as address offset and message filtering and translation
- **Scheduled event management** – Inbuilt timeclock, schedule manager, sunrise/sunset tracking and automatic daylight saving adjustment allow the user to manage operation and task scheduling without advanced technical knowledge.
- **Powerful custom task engine** – Allows users or third-party systems to run macros, such as 'After Hours', 'Shut Down', 'Welcome' and more.
- **Advanced interoperability** – Supports management of Philips Dynalite systems, Philips PoE fittings, and Philips Hue lamps and bridges, on a single system.
- **Third party integration** – Capable of direct communication with specialized hospitality and building automation systems such as VingCard Elsafe, CoolAutomation, Oracle Fidelio, and others.
- **Day Rhythm*** – Supports up to five color temperature curves to simulate the intensity and color temperature of natural daylight over the course of a day. Different curves can be assigned to different seasons or specific days as required.

* Requires a DALI 209 compatible dimming controller.

Multipurpose
Controllers

DDMC802

Multipurpose Modular Controller

Control different load types with one device

The Philips Dynalite DDMC802 provides up to eight configurable output channels, controlled by up to four interchangeable control modules.

A selection of control modules is available for a variety of load types.

DDMC802

Control different load types with one device

- **Single controller solution —** Control a variety of load types from one device.
- **Four module bays —** Accommodates any combination of up to four single modules or two double-size modules.
- **Leading edge phase control dimmer module —** Suitable for use with incandescent lamps and some types of dimmable electronic transformers.
- **Trailing edge phase control dimmer module —** Suitable for use with most types of dimmable electronic transformers.
- **Signal dimmer control module —** Suitable for 1-10 V, DSI and DALI Broadcast control of digital drivers and transformers.
- **Relay control module —** Suitable for controlling most types of switched loads.
- **Fan control module —** 400 VA three-speed fan control.
- **Curtain control module —** Provides control of curtains, blinds and other motorized window treatments.
- **Flexible mounting solution —** A DIN-rail mountable device, designed to be installed into the distribution board supplying power to the controlled circuit.

Relay Controllers

DDRC1220FR-GL

Relay Controller

Robust control of switched loads

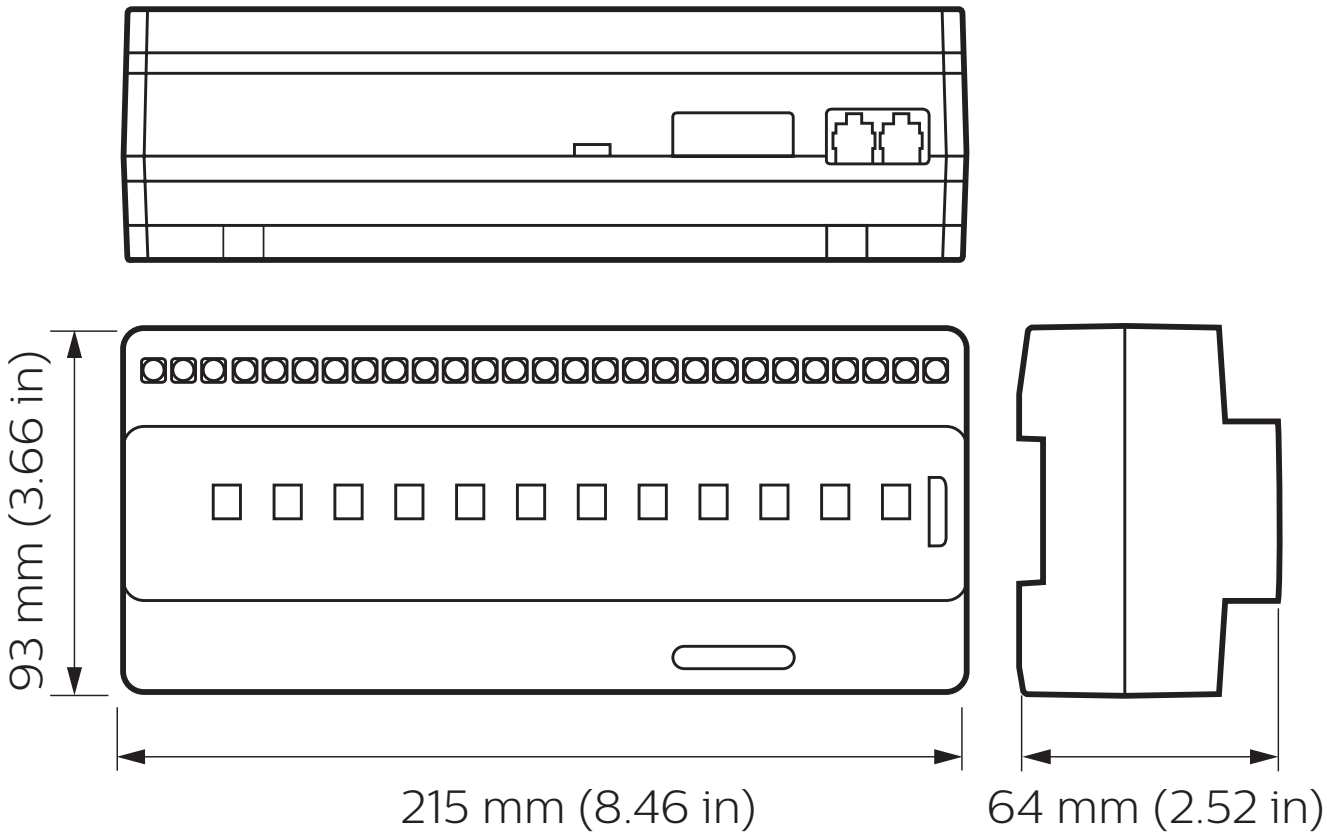
The Philips Dynalite DDRC1220FR-GL provides control of multiple types of switched loads. This general-purpose 12 channel controller supports switched loads of up to 20 A per channel, up to a maximum device load of 180 A.

DDRC1220FR-GL

Robust control of switched loads

- **Feed-through power circuit design** – Electrically equivalent to a 12 pole contactor, with the added advantage of each pole being separately controllable via the DyNet network.
- **Flexible mounting solution** – A DIN-rail mountable device, designed to be installed into the distribution board supplying power to the controlled circuit.
- **Inbuilt diagnostic functionality** – Features circuit run time tracking on each channel and Device Online/Offline status indication.
- **Multiple wiring schemes supported** – Controls single phase and neutral or three phase and neutral (star) wiring configurations.
- **Hardware override** – Service override switch accessible from front panel.

Dimensions



Specifications

Due to continuous improvements and innovations, specifications may change without notice.

DDRC1220FR-GL
Relay Controller

Electrical

Supply Type	Single phase
Suppy Voltage	100-240 VAC
Supply Current	0.25 A
Outputs	12 x SPST feed-through relay with manual override
Output Channel Current	20 A (max)
Maximum Device Load	180 A
Maximum CH-CH Voltage	300 VAC (UL) 400 VAC (CE)
Output Channel Ratings	(See Load Table on Pg 4)
Supported Wiring Schemes	Single Phase and Neutral Three Phase and Neutral (Star)
DyNet DC Output Voltage	12 VDC
DyNet DC Output Current	200 mA (supply for approximately 10 user interfaces)
Overvoltage Category	III

Control

User Interfaces

PAxBPA

AntumbraButton American

Contemporary two-, four-, or six-button panel with light-wash effect

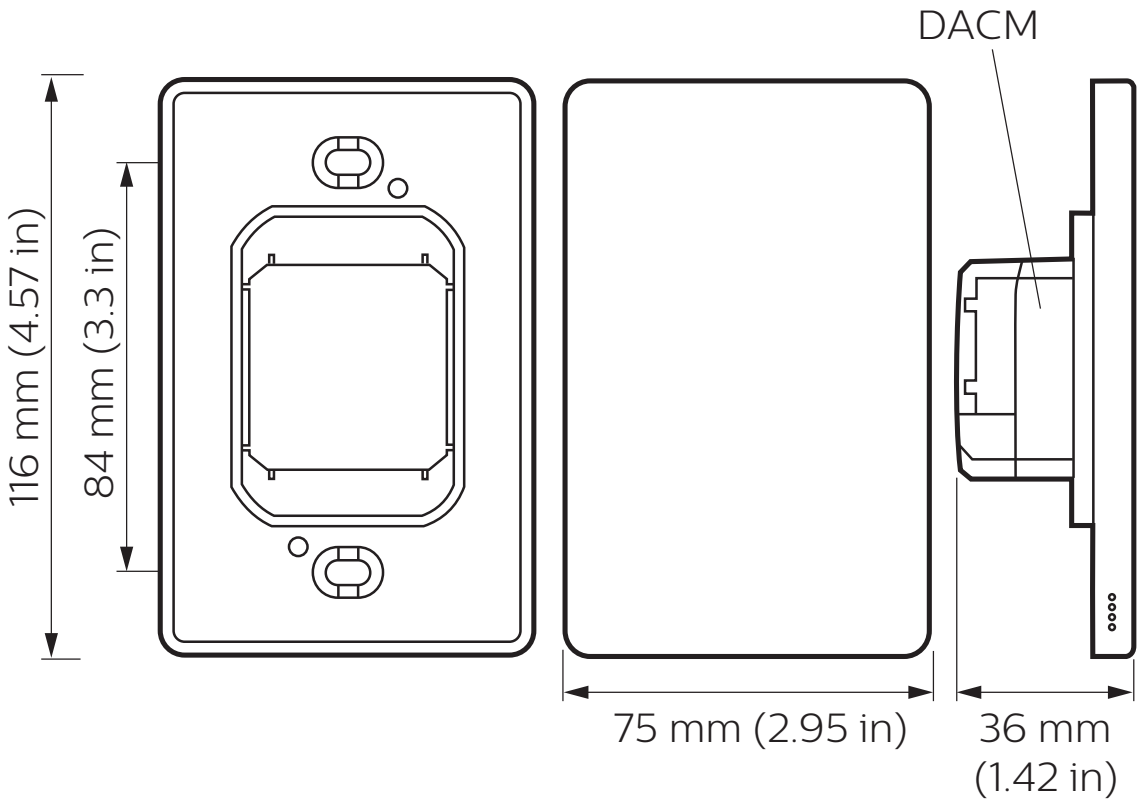
The Philips AntumbraButton user interface features a sleek, contemporary design and incorporates the latest in field effect technology. Each easy-to-press mechanical button can be customized with text or icons and programmed to perform a wide variety of local and site-wide control functions. The PA2BPA, PA4BPA, and PA6BPA ranges are suitable for, but not limited to North American, South American, Australian and New Zealand markets.

PAxBPA

Contemporary two-, four-, or six-button panel with light-wash effect

- **Field effect technology*** – The user interface detects an approaching user and 'wakes up', initiating a wall-wash lighting effect to encourage interaction.
- **Supplied as two components** – The Application Module contains buttons, rim, base and mounting plate, which can be mixed and matched to suit décor. The Communication Module (DACM) contains logical and network functions and can be pre-programmed off-site, allowing commissioning to commence prior to finalizing rim and button options.
- **Hidden sensory inputs** – An internal light sensor measures ambient light and adjusts lightwash effect accordingly. A built-in temperature sensor automatically adjusts air conditioning when integrated into the system.
- **Multiple language and icon labeling** – Button labeling language choices include English, Chinese and Arabic. A library of common icons transcends language barriers, which is particularly useful in hospitality applications.
- **Décor-matching options** – Buttons and rims are available in a range of attractive polycarbonate and metallic finishes.

Dimensions



* The mounting plate must be grounded to avoid field effect false triggering by nearby ungrounded metal objects.

Specifications

Due to continuous improvements and innovations, specifications may change without notice.

Application Module Ordering Code

The Application Module contains the buttons, rim, base and mounting plate. The buttons and rim are available in the range of finishes shown below.

The base contains all the sensors and LED indicators. Sensitive components are enclosed by a rubber envelope to give an IP22 rating, allowing installation in high-condensation environments such as bathrooms.

A metal mounting plate attaches the Antumbra panel securely to the wall, ensuring stable, reliable operation.

Communication Module Ordering Code

The Communication Module is compatible with all interfaces across the Antumbra series, and can be ordered, programmed, installed, wired and tested without the Application Module attached.

This allows the commissioning process to begin before the final finish options have been chosen, or during construction, and protects the Application Module from damage until the site is ready for occupancy.

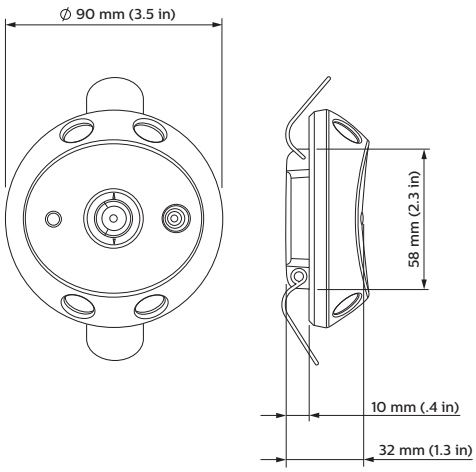
DUS804CS-UP-NA Multifunction Sensor

Surface mount ceiling sensor with ultrasonic capability

The DUS804C-UP-NA is a surface mountable 360 degree multifunction sensor that combines motion detection (PIR and ultrasonic), Infrared remote control reception (IR) and ambient light level detection (PE) into one device in applications such as offices, lecture theaters and homes.



- Motion detection feature — Detection of motion within scanned area triggers a programmed lighting action.
- Ambient light level detection and daylight harvesting — In applications where it is critical to maintain precise light, the PE function reads ambient levels and adjusts artificial light accordingly.
- Infrared receive capability — Manually adjust light levels using a hand-held remote control, via the inbuilt IR receive sensor of the DUS804CS-UP-NA.
- Daylight Harvesting mode — Delivers automatic energy savings.

For detailed product information, please refer to the product information pages at www.philips.com/lightingcontrolsna.

Limited Warranty: Indoor Controls

Signify North America Corporation (“Signify”) warrants to the original purchaser (“Purchaser”) that the Signify branded control products identified on Schedule 1 (“Products”) will be free from defects in material and workmanship which cause the Product to fail to operate in accordance with the performance specifications set forth in documentation published for or provided with the Product (“Specifications”) for the applicable period and subject to the additional terms and conditions set forth on Schedule 1 from (unless otherwise noted on Schedule 1) date of shipment by Signify (“Warranty Period”).

If any Product covered by this limited warranty is returned by Purchaser in accordance with Signify Terms and Conditions of Sale (available at **www.Signify.com/warranties**) within the Warranty Period, and Signify determines to its satisfaction that such Product failed to satisfy this warranty, Signify will, at its option, repair or replace the Product or the defective part thereof, or reimburse Purchaser for the purchase price, subject to the terms and conditions set forth herein. For purposes of clarity, "repair or replace the Product or the defective part thereof" does not include any removal, commissioning, programming, or reinstallation costs or expenses, including, without limitation, any labor costs or expenses, shipping costs to return non-conforming Products or any damages that may occur during the return of Product to Signify. If Signify chooses to replace the Product and is not able to do so because it has been discontinued or is not available, Signify may replace it with a comparable product. Signify reserves the right to use new, reconditioned, refurbished, repaired or remanufactured products or parts in the repair or replacement of any Product covered by this limited warranty.

This limited warranty is subject to these additional conditions:

- The Products have been properly handled, stored, wired, transported, installed, operated and maintained in accordance with the applicable Specifications.
- A Signify representative will have access to the failed Products and the fixtures used to operate them. If the fixture or other parts become suspect, the representative shall have the right to invite other manufacturers’ representatives to evaluate the lighting system components.
- The Product has been purchased directly from an authorized Signify distributor/dealer for use in regions that are within the jurisdiction of the United States or Canada.
- Third party products incorporated into the control system that are not manufactured by Signify are excluded from this warranty, but may be covered by a third party manufacturer. Such third party manufacturer shall be solely responsible for the costs related to any claims associated with any such component.
- If applicable, purchase receipt for the Product is available for inspection by Signify.

Warranty Indoor Controls

This limited warranty does not apply to damage or failure to perform arising as a result of any acts of God or from any abuse, misuse, abnormal use, improper power supply, powers surges or fluctuations, corrosive environments, neglect, exposure or any use or installation in violation of the instructions or restrictions prescribed by Signify or any applicable standard or code, including those contained in the latest National Electrical Code, Standards for Safety of Underwriters Laboratory, Inc. (UL), the American National Standards Institute (ANSI), or, in Canada, the Canadian Standards Association (CSA). No agent, distributor or dealer is authorized to change, modify or extend the terms of this limited warranty on behalf of Signify. THIS LIMITED WARRANTY IS VOID IF THE PRODUCT IS NOT USED FOR THE PURPOSE FOR WHICH IT IS DESIGNED OR IF ANY REPAIRS OR ALTERATIONS ARE MADE BY ANY PERSON NOT AUTHORIZED BY SIGNIFY IN WRITING.

THIS LIMITED WARRANTY IS THE ONLY WARRANTY GIVEN BY SIGNIFY WITH RESPECT TO THE PRODUCTS AND THE SOLE REMEDY FOR ANY AND ALL CLAIMS, IN CONTRACT, IN TORT OR OTHERWISE ARISING FROM THE FAILURE OF PRODUCT AND IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WHICH WARRANTIES ARE HEREBY EXPRESSLY DISCLAIMED. PURCHASER'S EXCLUSIVE REMEDY FOR ANY NONCONFORMITY OR DEFECT IN ANY PRODUCT SHALL BE ONLY AS EXPLICITLY SET FORTH HEREIN. UNDER NO CIRCUMSTANCES SHALL SIGNIFY' AGGREGATE LIABILITY ARISING OUT OF OR IN CONNECTION WITH A DEFECTIVE PRODUCT, IN CONTRACT, TORT OR OTHERWISE, EXCEED THE PURCHASE PRICE OF THE PRODUCT TO WHICH SUCH LIABILITY RELATES. IN NO EVENT SHALL SIGNIFY BE LIABLE FOR SPECIAL, INCIDENTAL, CONSEQUENTIAL, INDIRECT OR COMPENSATORY DAMAGES, INCLUDING, WITHOUT LIMITATION, DAMAGES RESULTING FROM LOSS OF USE, PROFITS, BUSINESS OR GOODWILL EVEN IF SIGNIFY WAS ADVISED OF OR WAS OTHERWISE AWARE OF THE POSSIBILITY OF SUCH DAMAGES.

This limited warranty is effective for the purchases of the Product on or after the effective date set forth herein and is in consideration of and is expressly subject to and conditioned by the terms set forth herein. Signify reserves the right to modify this warranty from time to time and any modifications shall be effective for all orders placed on or after the effective date of such revised warranty.

Product Specifications

Technology

- Passive Infrared (PIR) and Ultrasonic (US)

Mechanical

Size: 1.42" H x 4.5" W (36.068mm x 114.3mm)
Mounting: Mounts directly to ceiling tile, to a 4" square box and round mud ring or to 4" octagon box
Environment:

- **Operating temperature:** 32°F to 104°F (0°C to 40°C)
- **Relative humidity operating:** 20% to 90% non-condensing
- For indoor use only

Housing: Durable, injection molded housing. Polycarbonate resin complies with UL 94V-0

Electrical

Power Requirements:

- Input
  - 10-30 VDC from Greengate Switchpack or Greengate system
  - Maximum current needed is 25mA per sensor
- Output
  - Open collector output to switch up to ten Greengate Switchpacks
  - BAS with Isolated Form C Relay in (-R) model

- Red LED for PIR detection; Green LED for Ultrasonic detection

Controls and Performance

Time delays:

- Self-adjustable, 15 seconds/test (10 minutes Auto), or Selectable 5, 15, 30 minutes, or Zero Time Delay

Coverage:

- 500, 1000, and 2000 sq. ft.

Light sensing level (-R Models):

- 0 to 300 foot candles

Standards/Ratings

- cULus Listed - Energy Management Equipment (UL916)
- FCC Compliant
- RoHS Compliant

Warranty

Five year warranty standard

Overview

The Dual Technology sensor's combination of Ultrasonic and Passive Infrared technologies offers the most complete sensing equipment available today. MicroSet self-adjusting Dual Technology sensors drastically simplify and reduce a contractor's installation and adjustment time period.

The MicroSet self-adjusting technology continuously monitors multiple sub-frequencies in the event that if a continuous Doppler shift occurs, such as those created by airflow from an air duct, the sensor will identify the noise as continuous and then block it out of view at a select sub-frequency. It will continue to monitor other sub-frequencies for human motion. This avoids false-activation, while still maintaining the high level of sensitivity that is necessary for sensing minor motion in a changing environment. Separate concurrent time delays for both Passive Infrared and Ultrasonic technologies avoid false activations or deactivations. In Automatic On Mode, the lights turn ON when a person enters the room. In Manual On Mode (-R model only), the lights are turned ON by activating a momentary switch (model # GMDS-*) that is connected to the sensor. When enabled, the daylighting feature (-R models only) prevents lights from turning ON when the room is adequately illuminated by natural light.

Wiring Diagrams

OAC-DT-2000-R Model

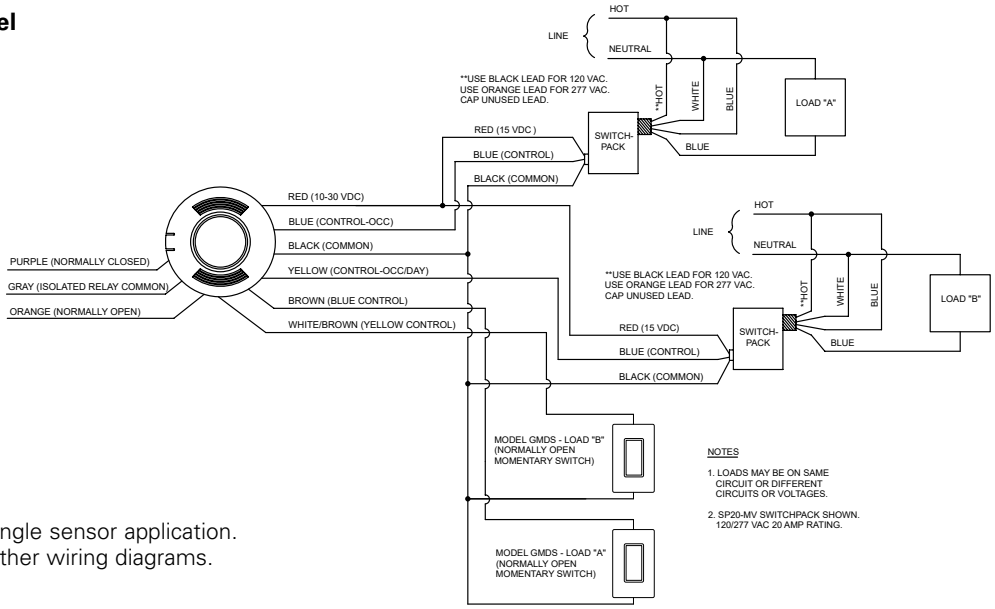
OAC AND VAC MANUAL MODE OPERATION:

1. SWITCHES ARE REQUIRED TO TURN CORRESPONDING LOADS ON.
2. LOADS TURN OFF WHEN SENSOR TIMES OUT OR WITH SWITCHES.
3. IF DAYLIGHT SENSOR IS ENABLED AND LIGHT LEVEL IS ABOVE SETPOINT, SWITCHPACK CONNECTED TO YELLOW LEAD WILL NOT TURN LOAD ON.

OAC AUTOMATIC MODE OPERATION:

1. WHEN SENSOR ACTIVATES, BOTH LOADS TURN ON.
2. SWITCHES CAN BE USED TO TURN LOADS ON OR OFF.
3. IF DAYLIGHT SENSOR IS ENABLED AND LIGHT LEVEL IS ABOVE SETPOINT, SWITCHPACK CONNECTED TO YELLOW LEAD WILL NOT TURN LOAD ON.

RECOMMENDED WIRE:
18-3 AWG STRANDED WIRE SHIELDED OR NON/SHIELDED



*Wiring diagram for single sensor application.

Input/Output Device

Catalog#	Prepared by
Project	Date
Comments	Type

Overview

The Input/Output Device (OCC-RJ45) provides connection of any Greengate low voltage occupancy sensor, or other low voltage maintain closure, to the Room Controller or DLVP power module to define the occupancy state of the space. The OCC-RJ45 also can be used as an output to the HVAC system, third party systems or switchpacks based upon room occupancy status.

Features

- Input/Output integration
- Automatically provide Egress or HVAC integration based on room occupancy junction box
- Allows connection of standard switchpacks

Powering Business Worldwide

Specifications

Electrical Rating	Class 2, LPS
Voltage	24 VDC supplied from Room Controller, DLVP power module or Switchpack
Operating Environment	Temperature: 32°F to 104°F (0°C to 40°C)
	Less than 95%, non-condensing
	For indoor use only
Standards	UL 508 Listed

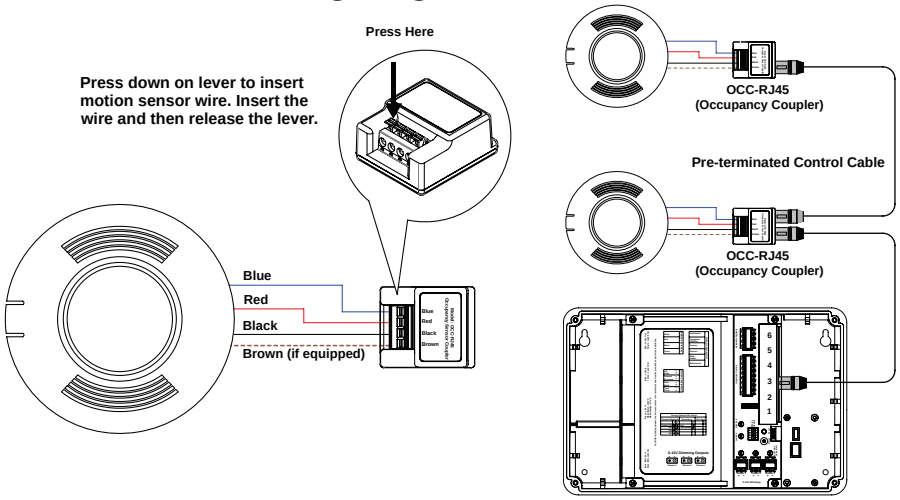
Description/Operation

The Input/Output Device (OCC-RJ45) is ready and works immediately upon power up, providing Occupancy based inputs or outputs out-of-the-box, removing the need for field programming and reducing installation time.

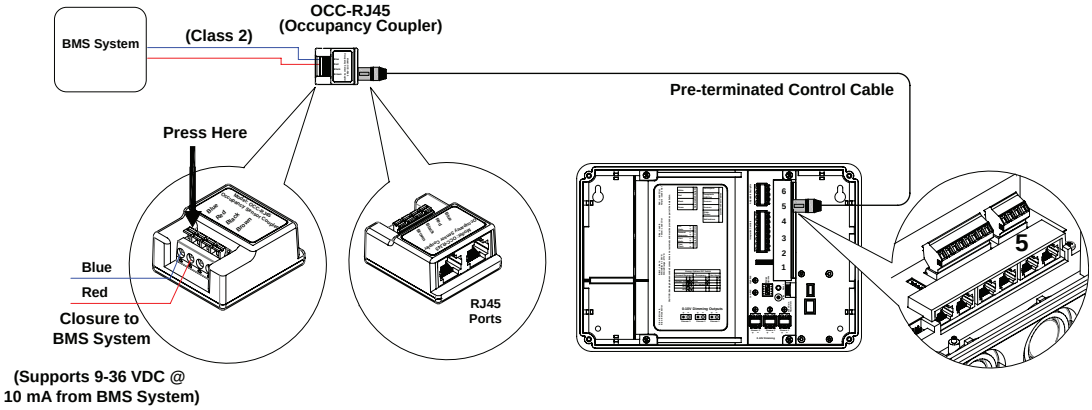
Installation

Low-voltage devices are connected using provided pre-terminated control cables (ordered separately).

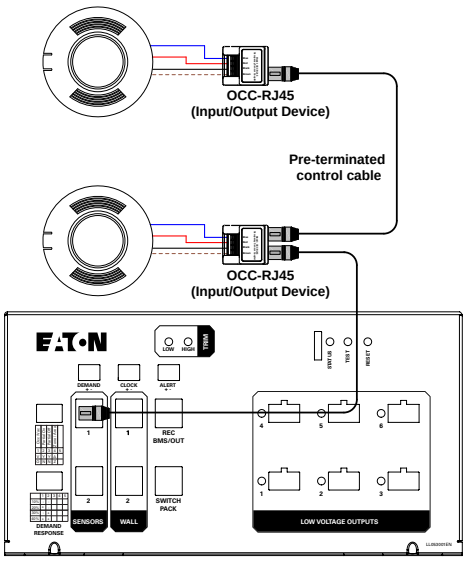
Room Controller Wiring Diagrams



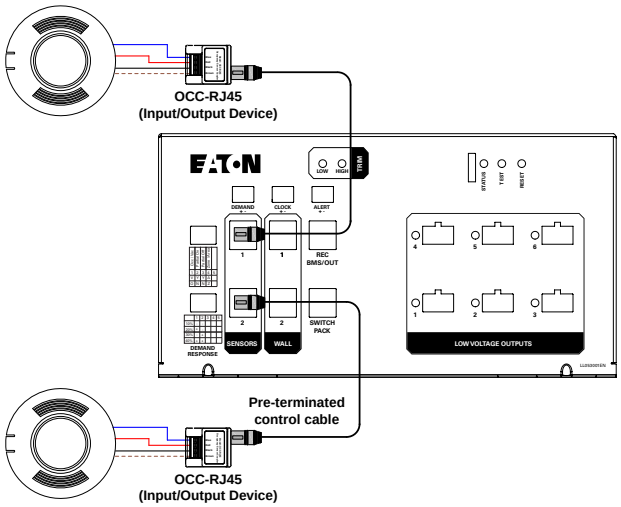
Connect the OCC-RJ45 Coupler to the BMS system. Closure will be made across the Blue and Red wire locations. Connect a pre-terminated control cable between the Receptacle/BMS Out RJ45 port on the Room Controller (port 5) or DLVP power module and to one of the ports on the OCC-RJ45 ports.



DLVP Wiring Diagrams



OR



Connect the OCC-RJ45 Input/Output Device to the BMS system. Closure will be made across the Blue and Red wire locations. Connect a pre-terminated control cable between the REC/BMS/OUT RJ45 port on the Power Module and to one of the ports on the OCC-RJ45 ports.

Overview

The DSRC-FMOIR is an open loop daylight sensor that measures the natural light contribution in order to automatically adjust lighting zones. It is part of the Room Controller and DLVP system and provides three easily distinguished light levels, Low (3-300 lux), High (30-3000 lux) and Direct Sun (300-30000 lux). The sensor range can be adjusted using the IR handheld programmer.

The DSRC-FMOIR is powered by the Room Controller or DLVP power module Class 2 power supply and is pre-configured to automatically adjust the dimming zones based on the natural light contribution. The DSCM-MT mounting bracket allows the daylight sensor to be mounted to a hard ceiling or a light well. The handheld remote programmer simplifies light sensor range setting by using simple language to describe the ranges (Low, High, Direct Sun) in addition to standard foot candle values. Individual zone control buttons allow the lighting levels and dimming curves to be adjusted in the Room Controller unit via the Daylight Sensor using the HHPRG-RC personal remote. Additional information on preset dimming curves and adjustments can be found in the installation instructions for Room Controller.

Low-voltage devices are connected using pre-terminated control cables (ordered separately).

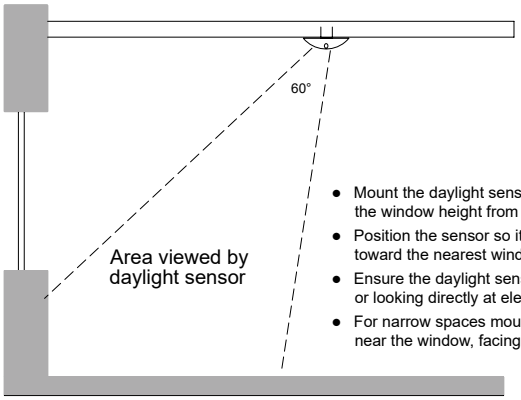
Application

Sidelight Applications



- Mount the daylight sensor one to two times the window height from the window wall.
- Position the sensor so its arrow is pointed toward the nearest window.
- Ensure the daylight sensor is not obstructed or looking directly at electric light.
- For narrow spaces mount the daylight sensor near the window, facing into the space.

Greengate Zone Wallstation

Overview

The zone wallstations are pre-engraved low-voltage switches that operate on 24 VDC power supplied by the Room Controller or DLVP power module. Each wallstation is designed to fit in a standard decorator opening and has two RJ45 ports for local network connections to eliminate wiring errors.

The zone wallstations are pre-terminated control cable (ordered separately) ready and work immediately upon power up. Zone wallstations for office, classroom, patient room, conference room and general areas are available and are fully functional out-of-the-box removing the need for field programming and reducing installation time.

Low-voltage devices are connected using provided pre-terminated control cables (ordered separately).

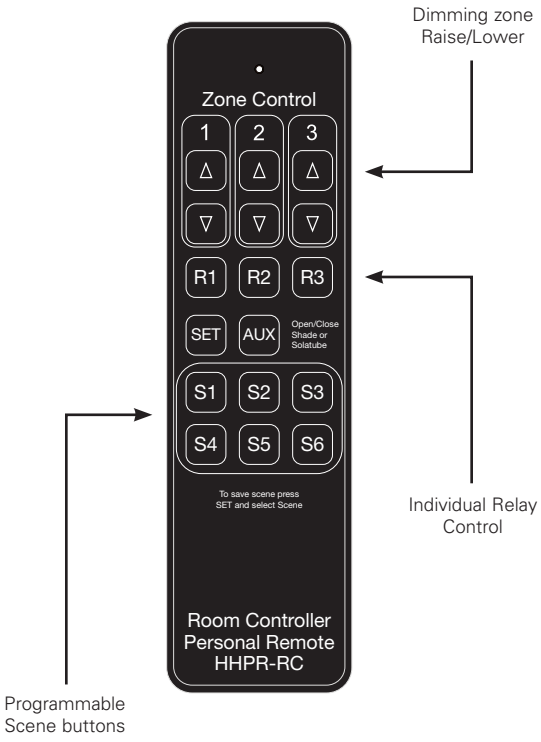
Room Controller Personal Remote

Catalog#	Prepared by
Project	Date
Comments	Type



Overview

The Room Controller Personal Remote is a handheld tool that provides the user the ability to individually control relays, dimmers and scenes. It also allows programmability of the individual scene buttons that can be packaged/configured to create Scene Wallstations.

Each scene button can be programmed with user specified load ON/OFF and dimmer settings. Using the Room Controller Personal Remote (HHPR-RC) and daylight sensor (DSRC-FMOIR) the user can define up to six scenes and save them into the Room Controller to be recalled later from the Scene buttons or the Personal Remote.

Features

- Simple to use personal remote
- Personalize the scene buttons with your ON/OFF and dimming needs
- Program Auto ON Lighting Scene
- Handheld scene control

Powering Business Worldwide

Specifications

Battery	2 AAA (included)
Communication	IR (requires DSRC-FMOIR)

Description/Operation

The Personal Remote can send IR commands to the Room Controller using the Daylight Sensor (DSRC-FMOIR) as an IR receiver.

The Personal Remote contains the following buttons for temporary override of the space lighting.

- Dimmer 1 (Raise/Lower)
- Dimmer 2 (Raise/ Lower)
- Dimmer 3 (Raise/ Lower)
- Relay 1 (Toggle)
- Relay 2 (Toggle)
- Relay 3 (Toggle)
- Auxiliary Output (can be used for Solatube or Shade)
- Scenes 1 – 6
- Set (to store programmed scenes)

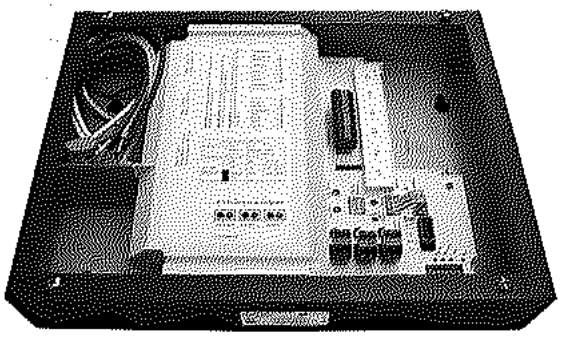
Room Controller

Catalog#	Prepared by
Project	Date
Comments	Type

Model RC3D-PL Shown



Inside View

Overview

The Room Controller includes three relays and up to three 0-10 VDC dimming outputs to control compatible dimmable ballasts. The switching relays and 0-10 VDC outputs are controlled separately, allowing flexibility in wiring and control. The Room Controller is shipped preconfigured to work out-of-the-box when connected to Room Controller devices, allowing quick and easy daylighting controls, occupancy/vacancy sensing and manual switching.

Features

- Click & Go ready, RJ45 connections
- Preconfigured for automatic functionality upon power-up
- Manual or Automatic On, bi-level, tri-level and dimming control strategies
- Integral Demand Response input with four levels of preconfigured energy reduction
- Built in tubular lighting control with preconfigured wallstation controls
- Integral pillow speaker connections for GPCS (RC3DEHC)
- Integral Solatube® connection for classrooms
- Guaranteed compatibility with Cooper Lighting LED and 0-10V fluorescent fixtures
- Ladderless UL 924 Emergency Mode testing (RC3DE & RC3DEHC)

Powering Business Worldwide

Specifications

Size	11 1/2"H x 7 1/2"W x 2 1/4"D
Input/Output Voltage	120/277 VAC, 60Hz
	Maximum 20A combined load per Room Controller
	Ballast load: 20A @ 120/277 VAC (LED)
	Incandescent load: 15A @ 120 VAC
	Motor load: 1HP @ 120 VAC
Emergency Output (RC3DE/ RC3DEHC only) UL 924	LED, Ballast or Incandescent Load: 3A
Class 2 Dimming Output	0-10 VDC, sinks up to 100mA per (40 µA max per circuit leakage to line)
	Each 0-10V output supports up to 50 ballasts/ drivers that draw the standard 2mA each
LED Drivers	Requires isolated LED drivers for optimal performance
Operating Environment	Temperature: 32°F to 104°F (0°C to 40°C)
	For indoor use
Standards	UL Approved UL 508 Listed UL 924 Listed

Description/Operation

The Room Controllers are connected to a 120 VAC or 277 VAC 20 Amp circuit to provide unit power and input power to the individual relays. The wallstations, occupancy/vacancy sensors, daylight sensors and receptacle control devices connect via QuickConnect cables (ordered separately) providing a Class 2 connection. Upon power up the pre-engraved wallstation automatically controls the On/Off relays adjust the dimming outputs. The daylight sensor will immediately adjust the lighting levels based on natural light.

Installation

The line voltage section of the Room Controller provides the installing contractor space to make all line voltage connections and direct conduit access, reducing the need for additional junction boxes, while providing easy access to line voltage circuits. Low voltage devices are connected using Cat5 cables (ordered separately).

UL 924 relay is provided on some units for automatic emergency lighting control. The UL 924 relay automatically tracks with output 1 and can be connected to any of the three 0-10V dimmers. The UL 924 relay automatically closes and disconnects the 0-10V control open loss of normal power providing adequate egress lighting control. Ladderless maintenance testing of the UL 924 relay can be acheived by pressing the ALL OFF button four times.

Sophisticated yet simple energy-efficient lighting solutions

Dynalite Sensors

The Philips Dynalite sensor range combines motion detection, light level detection and IR receive in one unit. Each of these features can be operated at the same time, allowing automation scenarios such as turning on the lights after detecting motion and then dimming the lighting level once the available sunlight has been measured, thereby providing additional energy savings. By combining each of these functions into one device, operational efficiency is improved.Each sensor has an in-built microprocessor, allowing logical functions to control one small room, the floor of a building, or an entire building. All sensors receive their power from the DyNet network, and as they are fully remotely programmable, they can be configured to automate and control a virtually unlimited number of controlled outputs.

Benefits

- Reduces the need for many different types of sensors, thereby preventing ceiling clutter
- Combines motion detection, light level detection and IR receive in one unit, thus improving efficiency

Features

- Sensors are fully remotely programmable
- Built-in microprocessor

Application

- Depends on the lighting system in which the controls are used

0-10V Slide Dimmer Wallstation

Catalog# WBSD-DEC-C5	Prepared by
Project	Date
Comments	Type

California Title 20 Compliant

c UL us LISTED
DIMMERS
6B28

Overview

The 0-10 Volt Slide Dimmer provides full-range classic linear-slide dimming for 0-10V compatible dimmable light sources. These units are ideal for light commercial applications and are compatible with decorator style devices and wallplates. The preset "ON/OFF" switch automatically returns controlled light(s) to a preset level without disturbing the brightness level. The device is designed for both Single-pole (one location) and 3-way (multi-location) applications.

Features

- Preset feature allows user to return to previous light level when turning lights ON
- Integrated full-slide control for easy, precise operation
- Can be wired as Single-pole or 3-way
- Neutral is not required for installation of device
- Adjustable high-level trim setting for optimal lamp compatibility

COOPER Lighting Solutions

Specifications

Switch Type	Single-pole and 3-way
Dimming Control	0-10 VDC: 200mA Sink
	Sink Dimming
Electrical Ratings	**120 VAC:** Max. Load: 10 amps, 1200W, 60 Hz
	277 VAC: Max Load: 6 amps, 1660W, 60 Hz
Light Intensity Control	Full-range, continuously variable dimming
	Adjustable High-level trim setting
Power Failure Memory	Light returns to same level prior to power interruption
Wiring Type	Back & side wiring terminals; 12-14 AWG (Copper wire)
	0-10V wire leads; 16 AWG
Flammability	Meets UL 94 requirements, V2 rated
Temperature	-4°F to 158°F (-20°C to 70°C)

See below for details.
Notes (9) Factory installed with integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. Battery option increases total height by 1 inch. (10) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). Devices are universal voltage (UNV). 347 not available. (11) EL10WSD not available with 347V. (12) UEL10WSD not available with 347V. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility.	**Notes** (13) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A driver only. Must be used with two (2) 10V dimming control channels, 1 color, 1 intensity. May be combined with Wavelinx sensor control systems only.	**Flexible Metal Conduit Options** Flex options available for 0-10V dimming control, DALI dimming control, emergency and night light functions. 72-inch factory-installed and pre-wired to driver, fitted to luminaire housing access plate with 90° enclosed FMC connector. Not all options may be combined and installation ratings vary by type. See online configurator for all flex options. **A3/8-4/18GDIM series notes:** Factory installed dimming option 3/8" flexible metal conduit with 2-#18 power and ground wires and 2-#18 UL-listed jacketed 0-10V +/- control wires. Meets UL 66, 83, 1479, 1569, 1581, 2556. NEC® 250.118, 300.22(C), 392, 396, 330, 501, 502, 503, 530, 504, 505, 518, 520, 530, 645, 72; Federal Specification A-A-59544 (formerly J-C-30B); all applicable OSHA and HUD Requirements. UL Classified 1-, 2-, and 3-hour through penetration with applicable fire stop product (not included). May be surface mounted, fished and/or embedded in plaster. Cable tray and approved raceway rated, install per NEC®; Environmental Air-Handling Space Installation per NEC® 300.22(C).

Notes (14) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A driver only. Must be used with two (2) 10V dimming control channels, 1 color, 1 intensity. May be combined with Wavelinx sensor control systems only. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility. (E) Consult Fifth Light system pages for additional details and compatibility. (F) Consult Marketplace Options - Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com. (G) Not compatible with GTR, ETRD, or integrated sensor options. (H) Available with UNV voltage only.		**Notes** (15) Matching width lens band on other side of sensor band may be supplied for symmetrical appearance. Required for use with sensor and emergency combination. Add "D" to sensor ordering as shown - WAAD, WABD, SDVPD1. (16) WAA sensor to be used with CD or W2A driver. (17) WAB and SVPD1 sensor to be used with CD driver. (18) WLA sensor to be used with LV driver. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) WaveLinx Lite devices are not currently compatible with the WaveLinx Wireless Area Controller. Consult WaveLinx Lite system pages for additional details and compatibility. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.		**Notes** (19) An EQ Grid Clip is recommended for all 9/16" ceiling systems. Four required per fixture. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (D) For use with SVPD sensor only. Consult SVPD series system pages for additional details and compatibility.

Metalux 22CZ2 LED

Product Specifications

Construction
- Die formed of code gauge prime cold rolled steel with full length die-formed stiffeners
- Unibody endplates attached with interlocking tabs and screws
- Hemmed side flanges
- Four auxiliary fixture end suspension points
- Integral Grid-lock feature for endplates for added safety
- Optional earthquake clips available

Integrated Controls
- 0-10V dimming to 1% standard
- WaveLinx wireless fixture for sensor-less wireless control
- WaveLinx wireless sensor compatible for standalone, controlled, connected, and IoT capability
- SVPD sensor compatible for standalone functionality
- Low-voltage sensor and driver compatible for WaveLinx Low-Voltage and DLVP applications
- DALI 2.0, Lutron, and step-dimming available

LED and Light Engine
- LED's available in 3000K, 3500K, 4000K, or 5000K at 80 CRI minimum and 90 CRI minimum
- Color accuracy ≤3-Step MacAdam ellipse (SDCM)
- TM21 life at 60,000 hours up to L90 and calculated L70 exceeds 203,000 hrs.
- Drivers available in 120-277V and 347V
- Tunable white options available with Cooper Lighting Solutions' Vividtune

Emergency Battery Options
- Optional emergency battery available in 7W and 14W
- 90-minute backup period for code compliance
- Laser point test from floor for ease of use on 7W and 14W versions
- EZ Key feature prevents accidental discharge during construction on 7W and 14W versions
- Integral emergency transfer relay options available

Finish
- Multistage, iron phosphate pretreatment
- 90% reflective, matte white enamel finish
- Full fixture housing painted after fabrication

Shielding
- Ribbed acrylic frosted lens standard
- Optional smooth acrylic frosted lens (S)
- Optional metal perforated acrylic lens (RDP)
- Optional High-Efficiency Round Perf Inlay (HRP)

Compliance
- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life tested to TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire

Warranty
- Five-year warranty standard. Optional ten year warranty available.

Shielding

Lumen Adjustment Factors			
S	RDP	HRP	SQR
1.05	0.67	0.80	0.96

Lumen Calculator

CCT Multiplier	80 CRI	90 CRI (1)
3000K	0.965	0.827
3500K	1.000	0.847
4000K	1.019	0.856
5000K	1.019	0.909

Notes: (1) Input wattages for 90 CRI versions may vary. Refer to published IES-format photometry or LM-79 reports for more details.

Example of Lumen Adjustment Calculation

22CZ2-32-UNV-L935-CD1-U at 90CRI at 3500K

Lumen Adjustment Factor = 0.845

Total Light Output =

3,280 lm x 0.845 = 2,772 lm

$$\textit{Efficacy} = \frac{2{,}772\ lm}{26.7W} = 103.8\ lm/W$$

Lumen Maintenance

Version	TM-21 Lumen Maintenance (60,000 hours) (2)	Theoretical L70 (Hours) (3)
Standard	> 85%	> 151,000
High Efficiency	> 90%	> 203,000
Very High Efficiency	> 90%	> 203,000

Notes: (2) Supported by IES TM-21 standards. (3) Theoretical values represent estimations commonly used; however, refer to the IES position on LED Product Lifetime Prediction, IES PS-10-18, that explains proper use of IES TM-21 and LM-80.

The Cruze ST with Integrated Sensor technology provides automatic energy savings without sacrificing performance. The Cruze ST delivers superior lighting with integrated occupancy and daylighting controls.

For standalone and controlled applications, the WaveLinx Lite integral sensor provides out-of-the-box functionality with no gateways required and factory startup is not needed.

When more connectivity is required, the WaveLinx Wireless sensor meets modern code and utility requirements, delivers energy and cost savings, while enabling buildings to become smart buildings.

The WaveLinx Wireless Connected Lighting System combined with Trellix provides an open IoT platform and infrastructure that connects intelligent sensors leveraging the real-estate of the physical light fixture to solve higher complexity problems to deliver actionable insights through the aggregation of valuable data.

VividTune™
color tuning solutions

22 Cruze ST LED with VividTune Tunable White

VividTune tunable white luminaires from Cooper Lighting Solutions deliver high-quality light in a broad range of continuously variable color temperatures and intensities. Create a dynamic environment by adjusting the ambient light warmer or cooler to influence mood, support the task at hand, or create a dramatic ambience. The ability to control correlated color temperature and intensity separately using simple controls is the next evolution of LED lighting for the commercial, educational, healthcare and hospitality space. The unparalleled flexibility and number of available lighting environments enable users to find the right light with tunable white.

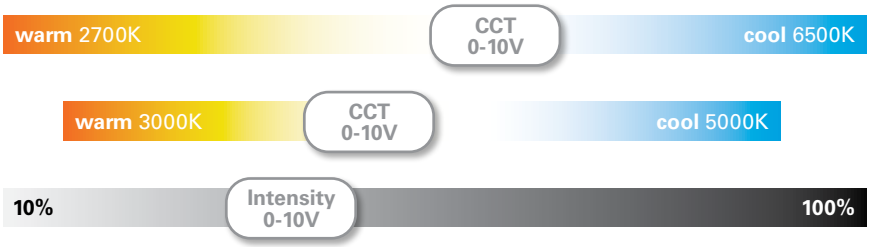
Controlling VividTune Tunable White

VividTune luminaires make tunable white more accessible by using simple and familiar controls. From wall dimmers to wireless controls, VividTune tunable white luminaires are compatible with industry standard 0-10V dimming controls. A single 0-10V dimming input is used to control intensity (brightness) while a second 0-10V dimming input is used to adjust CCT. For suggested control configurations, go to www.cooperlighting.com for tunable white application guides.



Example of Lumen Adjustment Calculation

22CZ2-34HE-UNV-L83050-W2A1-U
at 80 CRI tuned to 3500K

Adjusted Lumen =
published lm x adjusted lm factor

Adjusted Lumen = 3386 x 0.946

Adjusted Lumen = 3202 lm

** Lumen adjustment factors are for reference and may be different for each product selected. Refer to IES files for actual performance data on each.*

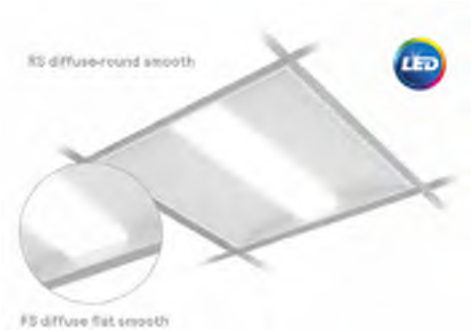
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Recessed Troffer Fixture
Item Type	Recessed Box
Description	2x2 Lensed Center Basket Troffer
Manufacturer	Signify / Day-Brite
Model	FluxGrid gen 2 2x2, 2FGXG38B8352RSUNVDIM
Dimensions	24"L x 24"W x 3.125"H
Finish	White
Global Specification	Y
CSI #	26 51 00 Interior Lighting
Omniclass #	22-265100 Interior Lighting
Part of an Assembly	N
Dimming Type	0-10V Dimming Driver (10%-100% Dimming)
Trim	White
Mount	Recessed ACT
On Dimming System	No
Lens/Shade	Acrylic Frosted
Fixture Input (Max. Watts)	28W
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	3800
Lamp CRI	80+
Finish	White
Warranty	5 years
Notes	Efficacy: 136 lm/W Lamp Life/Fixture Life: 85,000 hrs

1 Integral controls options dimmable to 5% via wireless wall switch. Non-controls options are 0-10v dimmable to 1% for Standard configurations,and to 10% for Base configurations.
2 Specify only with -DIM driver option.
3 CHIC option not provided with air return functionality.
4 Not available with 347V.
5 Option is qualified as Engineered-to-Order (ETO) ready. Lead times and minimum order quantities may vary, please consult factory.
6 Must be installed in conjunction with a UL1008 device.
7 Must be ordered with an integral sensing option.
8 Must order IRT9015 Interact commissioning remote with each system order.
9 XDIM requires 120V or 277V specification
10 Only available in lumen package range from 45L-60L
11 Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.
12 Consult Signify to confirm whether specific accessories are BAA-compliant.

Accessories[12] (order separately)

- **FSF22 –** 2'x2' surface mount field installation kit (field assembled)
- **FMA22 –** 2'x2' "F" mounting frame for NEMA "F" ceiling
- **FSK22 –** 2'x2' surface mount field installation kit (factory welded seams)

SWZCS accessories[10] (order separately)

- **IRT9015 –** handheld remote for grouping and configuration (at least one remote required for any SWZCS installation).
- **UID8451/10 –** Wireless Dimmer Switch Selector
- **UID8461/10 –** Wireless Scene Selector

Not all product variations listed on this page are DLC qualified. To ensure that a specific model is qualified, visit www.designlights.org/search

interact ready.

2FGX FluxGrid gen 2 recessed 2x2

up to 6000 lumens

Application

- 3-1/8" deep low profile configuration provides minimal penetration into the plenum space.
- Acrylic diffusers available in round and flat smooth configurations which provides even illumination with comfortable appeal.
- Standard and base configurations available in multiple lumen packages to suit the needs of various applications.
- Lambertian distribution creates uniform horizontal and vertical illuminance on the work plane and reduces scalloping on the walls.
- CRI 80 minimum color rendering with balanced spectrum.
- LEDs coupled with standard dimming provide prolonged lumen maintenance. Optional integral sensors contribute further to LED lumen maintenance.
- Designed for use with standard Grid (NEMA "G") or Narrow Grid (NEMA "NFG") ceiling T-bars. Drywall or plaster requirements can be accommodated by using an FMA22 "F" mounting frame (sold separately).
- Continuous row mounting is possible with a 1" gap between fixtures accommodated by others.

Enclosure

- Opal acrylic diffuser provides visually comfortable lumenance without compromise to luminaire efficacy.
- Diffuser requires no frames or fasteners and can be easily removed from below.

Construction/Finish

- Uncomplicated design is 3-1/8" deep with minimal material overlap creating several benefits:
  - Less material required
  - Less packaging required
  - Reduced weight for ease of handling and transit
  - Less energy required for construction and assembly
  - More luminaires can be shipped per truck to reduce fuel consumption
- Metal side covers are die formed with a conical shape to enhance light distribution and visual aesthetic.
- Luminaire finish is matte white polyester powder coat for high quality, durable finish.
- T-bar grid clips are integral to the body.
- Air return option provides air flow through architectural forms located at each end of the lens. Air passes through these forms and through the end plates of the luminaire. A cover plate is provided to control air flow through the luminaire, or make it static as required.
- Integral controls options include sensor mounted architectural form at one end of the lens.
- Bodine BSL10LST and BSL6LST options require the emergency battery pack be installed with a top side cover. Access from above.
- To estimate lumen output in emergency mode, multiply emergency pack wattage by efficacy, then by 1.10.

General notes

- All options are factory installed.
- All accessories are field installed.
- Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, pertroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

Electrical

- Integral sensor options for occupancy sensing and/or daylight harvesting are available for additional energy savings with no reduction of life or increase in installation labor.
- Standard configurations provide up to 142 lumens per watt and are available with multiple lumen packages and 3000, 3500, 4000, and 5000K color temperatures.
- Base configuration provides up to 120 lumens per watt and are available in 3800 lumen flux and 3500K and 4000K color temperatures.
- LED boards are accessible from below by removal of the lens.
- LED driver is accessible from below by removal of the lens and integral wireway cover.
- Other driver options including step dimming (SDIM, 100%/40%), DALI, phase dimming (XDIM), and Lutron are available.
- 5 year manufacturer's limited warranty. Visit signify.com/warranties for complete warranty information.
- TM-21 predicted L70 lumen maintenance up to 85,000 hours.
- cETLus listed to UL and CSA standards, suitable for damp locations.

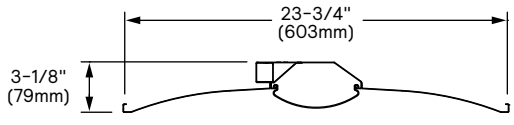
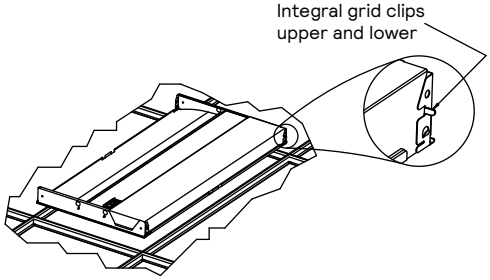
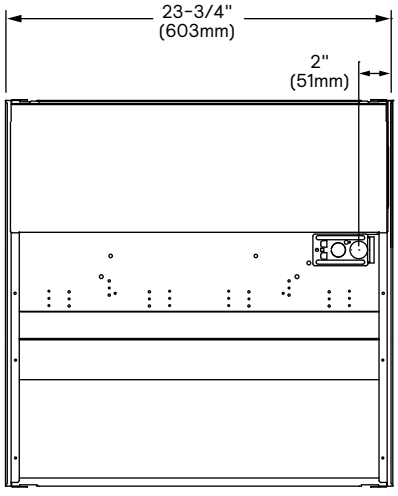
Dimensions







2FGX FluxGrid gen 2 recessed 2x2

up to 6000 lumens

Wireless Controls Options

SpaceWise DT (SWZDT)

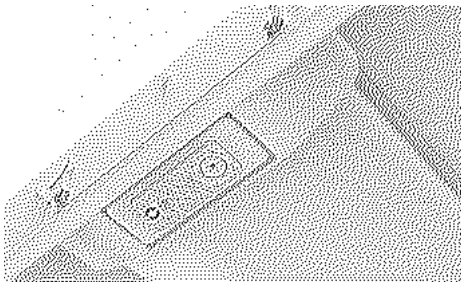
- Standalone daylight and occupancy sensing with advanced grouping, wireless mesh networking and dwell time.
- Commissioning via compatible Android phone and Philips Field App
- Dimming via compatible Zigbee wireless wall switch only (see link below for details)
- Register for the commissioning app at http://registration.componentcloud.philips.com/appregistration/
- Integral sensing options may not be combined
- For more information including recommended switches, refer to the following: –

  SWZDT – www.usa.lighting.philips.com/systems/lighting-systems/spacewise

Emergency Options (ER100)

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

FluxGrid shown with integral sensor



Interact Pro scalable sensor for Foundation, Advanced & Enterprise tiers (SWZCS and an evolution of SpaceWise)

- SWZCS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
  - Compatible with:
    - UID8451/10 wireless dimmer switch
    - SWS200 wireless scene switch
    - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
    - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
    - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
    - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem

Radio only sensor (RADIO)

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Interact Pro scalable sensor bundles for Enterprise tier

- IAOSB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices

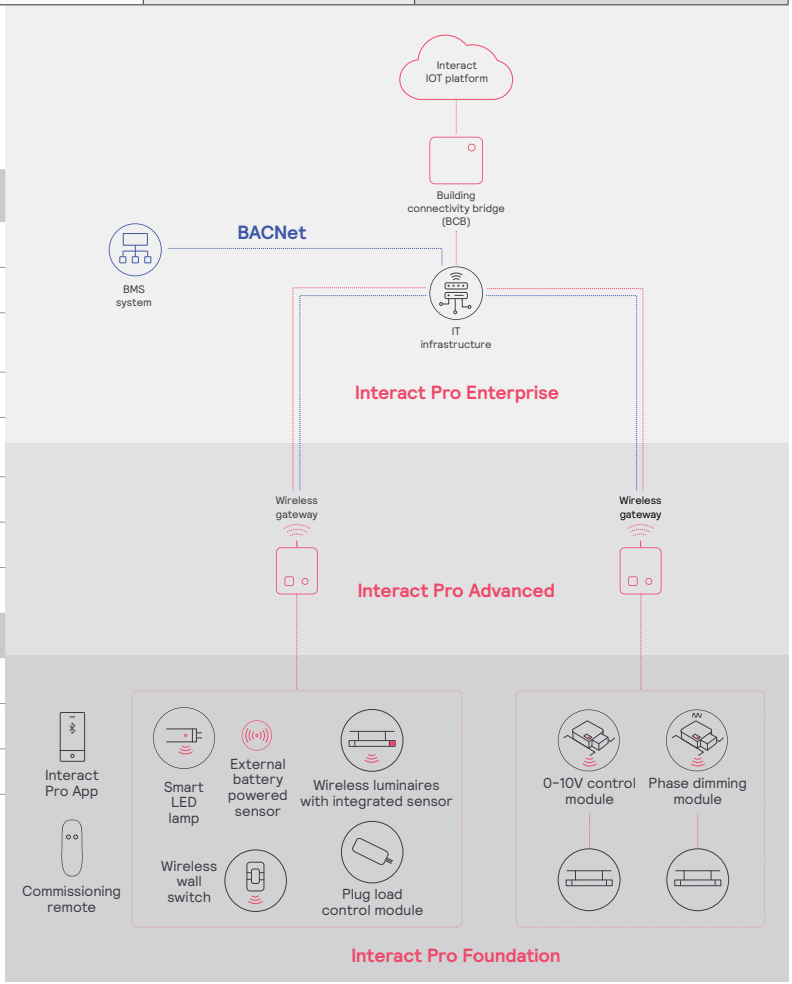
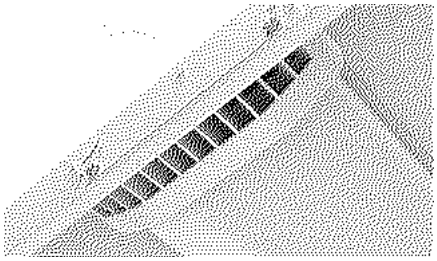
Recommended number of lights	40 (recommended 25)
Number of ZGP devices	5
Number of scenes	16



2FGX FluxGrid gen 2 recessed 2x2

up to 6000 lumens

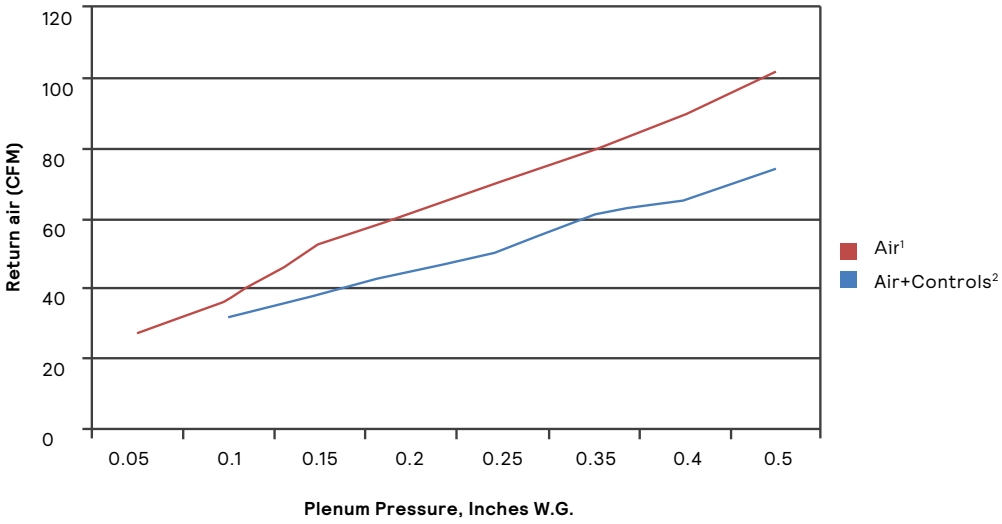
Air return option



Allows air to flow through vents in the architectural forms located at both ends of the lens. Air blades are provided on each end of the luminaire to control air flow to the plenum.

Return air data

All luminaire sizes



Return air – noise criteria

All luminaire sizes

		CFM							
Mode		27	37	53	62	71	80	90	102
Air[1]	NC (dB)	<15	24	25	29	33	35	38	40

		CFM							
Mode			31	38	45	51	61	65	74
Air+Controls[2]	NC (dB)		<15	19	21	25	28	30	34

1. Air-only option includes air return forms and pattern control blades on both ends of luminaire.
2. Air+Controls includes the air return form and pattern control blade on one end of the luminaire. Control form on the other with matching width.

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Recessed Troffer Fixture
Item Type	Recessed Box
Description	2x2 Recessed Troffer
Manufacturer	Cooper Lighting/Metalux
Model	22GR-LD5-43-F1-UNV-L835- CD1-U
Dimensions	24"L x 24"W x 3.25"H
Finish	White
CSI #	26 51 00
Omniclass #	22-265100
Dimming Type	0-10V
Trim	White
Mount	Recessed ACT
On Dimming System	No
Lens/Shade	Acrylic Prismatic Frosted Lens
Fixture Input (Max. Watts)	40.1W
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4360
Lamp CRI	85+
Finish	White
Warranty	5 Years
Notes	Efficacy: 109; Lamp Life/Fixture Life: 60,000 hrs

SPECIAL INSTRUCTIONS

LINEAR DISCONNECT
Safe and convenient means of disconnecting power

Top Product Features

- Available in 2' x 4', 2' x 2' and 1' x 4'
- Multiple lumen packages up to 18,000 in 2x4 and 9,000 in 2x2
- Up to 140 lm/W for maximum energy savings versus fluorescent troffers
- Correlated Color Temperatures 3000K, 3500K, 4000K and 5000K at 80 and 90 CRI
- Standard 0-10V continuous dimming driver

		Notes (1) An EQ Grid Clip is recommended for all 9/16" ceiling systems.	**Notes** (11) DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details.			**Notes** (9) Nominal lumen output. See table for actual values. (14) White tuning not available with this model. (16) Not compatible with WN driver.	**Notes** (12) A19/156 lens creates holographic effect on the surface of the lens.

(A), (G), (H)
Notes (2) Products also available in non-US voltages and frequencies for international markets. (3) Not available when specifying emergencies, voltage must be specific. (15) 347V is not available with the W2A driver.		**Notes** (4) With integral test switch/indicator/ laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (8) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). GTR2 option includes 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. (C) Consult DLVP system pages for additional details and compatibility.	**Notes** (13) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A.	**Flexible Metal Conduit Options** Flex options available for 0-10V dimming control, DALI dimming control, emergency and night light functions. 72-inch factory-installed and pre-wired to driver, fitted to luminaire housing access plate with 90° enclosed FMC connector. Not all options may be combined and installation ratings vary by type. **A3/8-4/18GDIM series notes:** Factory installed dimming option 3/8" flexible metal conduit with 2-#18 power and ground wires and 2-#18 UL-listed jacketed 0-10V +/- control wires. Meets UL 66, 83, 1479, 1569, 1581, 2556. NEC® 250.118, 300.22(C), 392, 396, 330, 501, 502, 503, 530, 504, 505, 518, 520, 530, 645, 72; Federal Specification A-A-59544 (formerly J-C-30B); all applicable OSHA and HUD Requirements. UL Classified 1-, 2-, and 3-hour through penetration with applicable fire stop product (not included). May be surface mounted, fished and/or embedded in plaster. Cable tray and approved raceway rated, install per NEC®; Environmental Air-Handling Space Installation per NEC® 300.22(C).	**Notes** (7) Step Dim (Bi Level) and DALI only available in 3600 lumen and above. (10) SR driver required for LWIPD1 only. See table for actual values. (13) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) Consult Enlighted system pages for additional details and compatibility. (C) Consult DLVP system pages for additional details and compatibility. (E) Consult Fifth Light system pages for additional details and compatibility. (F) Consult Marketplace Options - Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com. (G) Not compatible with GTR, ETRD, or integrated sensor options. (H) Available with UNV voltage only.

Number of Drivers	Options	Integrated Sensing Systems	Packaging	Accessories
1=1 Driver ~~**2**~~=~~2 Drivers~~	**PAF**=Painted After Fabrication **G1**=Gasket, Door Frame and Housing **G2**=G1 plus Gasket between Lens and Door **G3**=G1 and G2 plus Gasketing on Mounting Surface of Fixture Trims (5), (6)	**SWPD1**=WaveLinx Wireless Integrated Sensor (A) **LWIPD1**=Enlighted Wireless Integrated Sensor (B) **LWTPD1**=Enlighted Wireless Tile-mount Sensor (B) **SLVPD1**=DLVP Low-voltage Integrated Sensor (C) **SVPD1**=0-10V Stand-alone Integrated Sensor (D)	**U**=Unit Pack **PAL**=Job Pack, out of carton **PALC**=Job Pack, in carton	**EQ-CLIP-U**=T-BAR Safety Earthquake Clips (1) **DF-22-W**=2' x 2' Drywall Frame Kit **SK-22-WS**=2' x 2' Shallow Surface Mount Kit **SK-22-WT**=2' x 2' Tall Surface Mount Kit **ISHH-01**=Programming Remote for Integrated Sensor (D) **ISHH-02**=Personal Control Remote for Integrated Sensor (D)
	Notes (5) Gasketing only available with aluminum door frame. (6) Gasketing minimum .125.	**Notes** Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) Consult Enlighted system pages for additional details and compatibility. (C) Consult DLVP system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.		**Notes** (1) An EQ Grid Clip is recommended for all 9/16" ceiling systems. (D) Consult SVPD series system pages for additional details and compatibility.

Metalux 22GR LED

Product Specifications

Construction
- Rigid housing is die formed of code gauge prime cold rolled steel
- Full length die-formed stiffeners and unibody endplate for added strength
- Innovative design provides superior lens brightness, uniformity and visual comfort
- Unibody endplates are securely attached with interlocking tabs and screws
- Four auxiliary fixture end suspension points provided
- Endplates have integral Grid-lock feature for safety and convenience

Controls
- Standard with 0-10V dimming driver (10% standard, 1% optional)
- WaveLinx wireless fixture for sensor-less wireless control
- Options compatible with Cooper Lighting Solutions' Connected Lighting Systems: WaveLinx sensor, Enlighted sensor, SVPD sensor, DLVP sensor and driver, Fifth Light DALI driver
- Other options include step-dimming and 3rd party drivers

Electrical
- Long-Life LED system to deliver optimal performance. TM21 rating up to L88 >60,000 hours.
- Available in 3000K, 3500K, 4000K or 5000K with a minimum of 80 CRI
- Drivers are cULus recognized and available for 120-277V and 347V applications
- Standard dimming is 0-10V to 10% with 1%, step and Fifth Light DALI dimming options available
- Color Tuning options available with Cooper Lighting Solutions' VividTune

Emergency Battery Pack Option
- Optional 120V-277V integral emergency battery pack available in 7-watts, 14-watts
- 90-minute batteries provide constant power to the LED system
- Test switch/indicator button can be tested safely from the ground using a laser pointer
- Emergency/generator transfer options available

Frame/Optical Shielding
- Die formed, flat steel door with frosted #12 pattern acrylic prismatic lens
- Primary stocking skus come standard with robust .095 lens
- Other options available for maximum versatility

Compliance
- UL recognized components
- Indoor luminaires are cULus listed for 25°C ambient environments
- Suitable for direct insulation contact and are damp location listed
- RoHS compliant
- Tested according to IESNA LM-79 and LM-80 procedures

VividTune™
color tuning solutions

22GR LED with VividTune Tunable White

VividTune tunable white luminaires from Cooper Lighting Solutions deliver high-quality light in a broad range of continuously variable color temperatures and intensities. Create a dynamic environment by adjusting the ambient light warmer or cooler to influence mood, support the task at hand, or create a dramatic ambience. The ability to control correlated color temperature and intensity separately using simple controls is the next evolution of LED lighting for the commercial, educational, healthcare and hospitality space. The unparalleled flexibility and number of available lighting environments enable users to find the right light with tunable white.

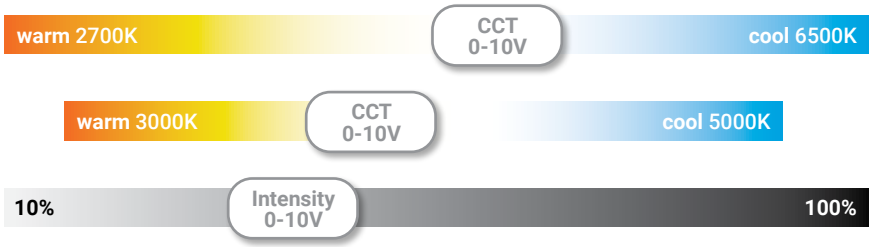
Controlling VividTune Tunable White

VividTune luminaires make tunable white more accessible by using simple and familiar controls. From wall dimmers to wireless controls, VividTune tunable white luminaires are compatible with industry standard 0-10V dimming controls. A single 0-10V dimming input is used to control intensity (brightness) while a second 0-10V dimming input is used to adjust CCT. For suggested control configurations, go to www.cooperlighting.com for tunable white application guides.



Example of Lumen Adjustment Calculation

22GR-LD5-32-F1-UNV-L83050-W2A1-U at 80 CRI tuned to 3500K

Adjusted Lumen = published lm x adjusted lm factor

Adjusted Lumen = 3268 x 0.986

Adjusted Lumen = 3223 lm

** Lumen adjustment factors are for reference and may be different for each product selected. Refer to IES files for actual performance data on each.*

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Troffer Fixture
Item Type	Recessed Box
Description	2x2 Recessed Troffer
Manufacturer	Signify/Day-Brite
Model	2TG 45L 835-2-FS-02F-UNV-DIM
Dimensions	24"L x 24"W x 3"H
CSI #	26 51 00 Interior Lighting
Omniclass #	22-265100 Interior Lighting
Dimming Type	0-10V
Trim	White
Mount	Recesed ACT
On Dimming System	No
Lens/Shade	Acrylic Prismatic Frosted Lens
Fixture Input (Max. Watts)	51.5W
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4551
Lamp CRI	80+
Finish	White
Warranty	5 Years
Notes	Efficacy: 88.3; Lamp Life/Fixture Life: 50,000 hrs

T-Grid LED troffer 2x2

2000, 3000, 3800 or 4500 lumens

Project:

Location:

Cat.No:

Type:

Lamps: Qty:

Notes:

Day-Brite / CFI T-Grid LED troffer is an energy efficient low profile luminaire offering excellent performance for general lighting applications such as offices, schools, healthcare, or retail. Featuring a frosted prismatic lens to enhance visual comfort, the T-Grid LED Troffer utilizes highly reliable and efficient Philips LED platform boards and dimmable driver, enabling market leading efficiency in its category.

Footnotes

1 Emergency pack mounted in enclosure on top of fixture housing. Delivers 1100 nominal lumens in DC mode.

Accessories (order separately)

- **FMA22** – 2'x2' "F" mounting frame for NEMA "F" mounting
- **FKTG822** – Flange conversion kit, 2'x2'

2TG T-Grid LED troffer 2x2

2000, 3000, 3800 or 4500 lumens

Application

- High efficacy long life solid state lighting platform.
- General lighting distribution is excellent for ambient lighting.
- High CRI source provides excellent color rendering.
- LEDs are an excellent source for use with controls since frequent switching does not affect the life of the light source.

Construction/finish

- A quality low-profile troffer with specification features for NEMA “G” grid, NEMA “NFG” narrow face grid, NEMA “GR” grid regressed, or NEMA “F” flange ceiling types.
- 3" nominal housing depth, 3-3/16" maximum depth.
- Smooth rolled edges on all four sides for easy handling.
- Die-formed one piece housing includes stiffening embosses and provides increased rigidity.
- Housing is multi-stage phosphate treated for maximum corrosion
resistance and finish coat is high reflectance baked white enamel.
- Integral baffling system to prevent light leaks.
- 2 sets of integral grid clips (wraparound and fold-out) for maximum mounting flexibility.
- Integral wire hanger holes for independent wire suspension.
- Embosses with holes provided in housing end for screwing to T-bar if desired.
- 7/8" K.O.’s provided in each end cap for through wiring.
- Factory installed access plate in housing top includes 7/8" hole with rolled edge and 7/8" K.O.
- Carton includes integral carrying handle for easy handling.

Electrical

- Standard 0–10V dimming.
- Driver and LED boards are accessible from below. LED boards are individually replaceable if required.
- Five-year luminaire limited warranty including LED boards and driver. Visit www.philips.com/warranties for complete warranty information.
- High efficiency LEDs have 50,000 hour rated life (defined by testing at 70% lumen maintenance (L70)), based on 25˚C ambient operating temperature.
- cETLus listed to UL and CSA standards, suitable for damp location.
- T-Grid LED luminaires are DesignLights Consortium® qualified. Please see the DLC QPL list for exact catalog numbers (http://www.designlights.org/QPL).
- Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

Enclosure

- Full “C” channel door frames for improved lens support and reduced shipping damage.
- Flat steel door frame features smooth rolled edges inside and outside.
- All door frames have mitered corners.
- All door frames use T-hinges and can be hinged and latched from either side.
- Opposable spring loaded latches are standard for easy operation and consistent retention.

Test No.	32631
S/MH	1.2
Source	LED
Lumens/Lamp	3693
Input Watts	43.5

Comparative yearly lighting energy cost per 1000 lumens – **$2.82** based on 3000 hrs. and $.08 pwr KWH. Actual rates and usage may vary.

The photometric results were obtained in the Day-Brite laboratory which is NVLAP accredited by the National Institute of Standards and Technology.

Photometric values based on test performed in compliance with LM-79.

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Recessed Box Fixture
Item Type	Linear Box Light Fixture
Description	2x4 Recessed Troffer
Manufacturer	Cooper/Metalux
Model	24GR-LD5-48-F1-UNV-L835-CD1-U
Dimensions	47 3/4"L x 23 3/4"W x 1 1/4"H
Finish	White
CSI #	265100 - Interior Lighting
Dimming Type	0 - 10V
Trim	White
Reflector	N/A
Mount	Recessed ACT
On Dimming System	No
Lens/Shade	Acrylic Prismatic Frosted Lens
Fixture Input (Max. Watts)	34.9
Lamp Type	LED
Lamp Kelvin	3500K
Voltage	120 / 277
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4799
Lamp CRI	85+
Finish	White
Lead Time	In stock to 4 weeks
Warranty	5 years
Notes	Rated life: 60,000 hours

Top Product Features

- Available in 2' x 4', 2' x 2' and 1' x 4'
- Multiple lumen packages up to 18,000 in 2x4 and 9,000 in 2x2
- Up to 140 lm/W for maximum energy savings versus fluorescent troffers
- Correlated Color Temperatures 3000K, 3500K, 4000K and 5000K at 80 and 90 CRI
- Standard 0-10V continuous dimming driver

		Notes (1) An EQ Grid Clip is recommended for all 9/16" ceiling systems.	**Notes** (13) DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details.			**Notes** (11) Nominal lumen output. See table for actual values. (16) White tuning not available with this model. (18) The maximum lumens on this version with VividTune option will be 8300, see IES files for actual performance values. (20) Not compatible with WN driver.	**Notes** (15) A19/156 lens creates holographic effect on the surface of the lens.

(A), (G), (H)
Notes (2) Products also available in non-US voltages and frequencies for international markets. (3) Not available when specifying emergencies, voltage must be specific. (19) 347V is not available with the W2A driver.		**Notes** (4) With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (10) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). GTR2 option includes 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. (C) Consult DLVP system pages for additional details and compatibility.	**Notes** (17) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A.	**Flexible Metal Conduit Options** Flex options available for 0-10V dimming control, DALI dimming control, emergency and night light functions. 72-inch factory-installed and pre-wired to driver, fitted to luminaire housing access plate with 90° enclosed FMC connector. Not all options may be combined and installation ratings vary by type. **A3/8-4/18GDIM series notes:** Factory installed dimming option 3/8" flexible metal conduit with 2-#18 power and ground wires and 2-#18 UL-listed jacketed 0-10V +/- control wires. Meets UL 66, 83, 1479, 1569, 1581, 2556. NEC® 250.118, 300.22(C), 392, 396, 330, 501, 502, 503, 530, 504, 505, 518, 520, 530, 645, 72; Federal Specification A-A-59544 (formerly J-C-30B); all applicable OSHA and HUD Requirements. UL Classified 1-, 2-, and 3-hour through penetration with applicable fire stop product (not included). May be surface mounted, fished and/or embedded in plaster. Cable tray and approved raceway rated, install per NEC®; Environmental Air-Handling Space Installation per NEC® 300.22(C).	**Notes** (7) Step dimming (bi-level) 1 driver, 4200 - 10000, 2 driver, 12000 and up lumen model. (12) SR driver required for LWIPD1 only. PDR required for 120 lumens and up. (17) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) Consult Enlighted system pages for additional details and compatibility. (C) Consult DLVP system pages for additional details and compatibility. (E) Consult Fifth Light system pages for additional details and compatibility. (F) Consult Marketplace Options - Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com. (G) Not compatible with GTR, ETRD, or integrated sensor options. (H) Available with UNV voltage only.

Number of Drivers	Options	Integrated Sensing Systems	Packaging	Accessories
1=1 Driver **2**=2 Drivers	**PAF**=Painted After Fabrication **G1**=Gasket, Door Frame and Housing **G2**=G1 plus Gasket between Lens and Door **G3**=G1 and G2 plus Gasketing on Mounting Surface of Fixture Trims (5), (6) **XFMR**=Transformer (14)	**SWPD1**=WaveLinx Wireless Integrated Sensor (A) **LWIPD1**=Enlighted Wireless Integrated Sensor (B) **LWTPD1**=Enlighted Wireless Tile-mount Sensor (B) **SLVPD1**=DLVP Low-voltage Integrated Sensor (C) **SVPD1**=0-10V Stand-alone Integrated Sensor (D)	**U**=Unit Pack **PAL**=Job Pack, out of carton **PALC**=Job Pack, in carton	**EQ-CLIP-U**=T-BAR Safety Earthquake Clips (1) **DF-24-W**=2' x 4' Drywall Frame Kit **SK-24-WS**=2' x 4' Shallow Surface Mount Kit **SK-24-WT**=2' x 4' Tall Surface Mount Kit **ISHH-01**=Programming Remote for Integrated Sensor (D) **ISHH-02**=Personal Control Remote for Integrated Sensor (D)
	Notes (5)Gasketing only available with aluminum door frame. (6)Gasketing minimum .125. (14) XMFR required for 15000 lumens and up.	**Notes** Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) Consult Enlighted system pages for additional details and compatibility. (C) Consult DLVP system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.		**Notes** (1) An EQ Grid Clip is recommended for all 9/16" ceiling systems. (D) Consult SVPD series system pages for additional details and compatibility.

Metalux 24GR LED

Product Specifications

Construction
- Rigid housing is die formed of code gauge prime cold rolled steel
- Full length die-formed stiffeners and unibody endplate for added strength
- Innovative design provides superior lens brightness, uniformity and visual comfort
- Unibody endplates are securely attached with interlocking tabs and screws
- Four auxiliary fixture end suspension points provided
- Endplates have integral Grid-lock feature for safety and convenience

Controls
- Standard with 0-10V dimming driver (10% standard, 1% optional)
- WaveLinx wireless fixture for sensor-less wireless control
- Options compatible with Cooper Lighting Solutions' Connected Lighting Systems: WaveLinx sensor, Enlighted sensor, SVPD sensor, DLVP sensor and driver, Fifth Light DALI driver
- Other options include step-dimming and 3rd party drivers

Electrical
- Long-Life LED system to deliver optimal performance. TM21 rating up to L89 >60,000 hours.
- Available in 3000K, 3500K, 4000K or 5000K with a minimum of 80 CRI
- Drivers are cULus recognized and available for 120-277V and 347V applications
- Standard dimming is 0-10V to 10% with 1%, step and Fifth Light DALI dimming options available
- Color Tuning options available with Cooper Lighting Solutions' VividTune

Emergency Battery Pack Option
- Optional 120V-277V integral emergency battery pack available in 7-watts, 14-watts
- 90-minute batteries provide constant power to the LED system
- Test switch/indicator button can be tested safely from the ground using a laser pointer
- Emergency/generator transfer options available

Frame/Optical Shielding
- Die formed, flat steel door with frosted #12 pattern acrylic prismatic lens
- Primary stocking skus come standard with robust .095 lens
- Other options available for maximum versatility

Compliance
- UL recognized components
- Indoor luminaires are cULus listed for 25ºC ambient environments
- Suitable for direct insulation contact and are damp location listed
- RoHS compliant
- Tested according to IESNA LM-79 and LM-80 procedures

VividTune color tuning solutions

24GR LED with VividTune Tunable White

VividTune tunable white luminaires from Cooper Lighting Solutions deliver high-quality light in a broad range of continuously variable color temperatures and intensities. Create a dynamic environment by adjusting the ambient light warmer or cooler to influence mood, support the task at hand, or create a dramatic ambience. The ability to control correlated color temperature and intensity separately using simple controls is the next evolution of LED lighting for the commercial, educational, healthcare and hospitality space. The unparalleled flexibility and number of available lighting environments enable users to find the right light with tunable white.

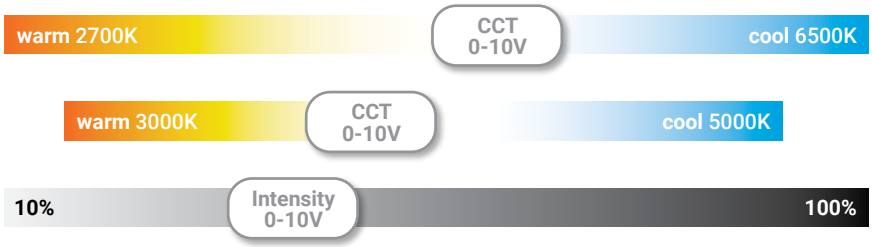
Controlling VividTune Tunable White

VividTune luminaires make tunable white more accessible by using simple and familiar controls. From wall dimmers to wireless controls, VividTune tunable white luminaires are compatible with industry standard 0-10V dimming controls. A single 0-10V dimming input is used to control intensity (brightness) while a second 0-10V dimming input is used to adjust CCT. For suggested control configurations, go to www.cooperlighting.com for tunable white application guides.



Example of Lumen Adjustment Calculation

24GR-LD5-48-F1-UNV-L83050-W2A1-U at 80 CRI tuned to 3500K

Adjusted Lumen = published lm x adjusted lm factor

Adjusted Lumen = 4821 x 1.006

Adjusted Lumen = 4849 lm

** Lumen adjustment factors are for reference and may be different for each product selected. Refer to IES files for actual performance data on each.*

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Troffer Fixture
Item Type	Recessed Box
Description	2x4 Recessed Lensed Troffer with A12 Shielding
Manufacturer	Signify/Day-Brite
Model	2TG 52L 835 4 FS 02 F UNV DIM
Dimensions	24"L x 48"W x 3"H
CSI #	265100 - Interior Lighting
Omniclass #	22-265100 - Interior Lighting
Dimming Type	0-10V
Trim	White
Reflector	White
Mount	Recessed ACT
On Dimming System	No
Lens/Shade	Acrylic Prismatic Frosted Lens
Fixture Input (Max. Watts)	49.3
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	5179
Lamp CRI	80
Finish	White
Warranty	5 Years
Notes	Efficacy: 105; Lamp Life/Fixture Life: 50,000 hrs

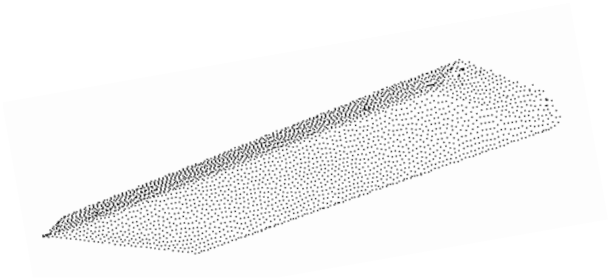
T-Grid LED troffer 2x4

3200, 3800, 4300, 4800, 5400, or 7400 lumens



Project:

Location:

Cat.No:

Type:

Lamps: Qty:

Notes: Lumens called out to match existing spec (5200lm)

Day-Brite / CFI T-Grid LED troffer is an energy efficient low profile luminaire offering excellent performance for general lighting applications such as offices, schools, healthcare, or retail. Featuring a frosted prismatic lens to enhance visual comfort, the T-Grid LED Troffer utilizes highly reliable and efficient Philips LED platform boards and dimmable driver, enabling market leading efficiency in its category.

Footnotes

1 SDIM not available with 74L lumen option
2 Not available for 74L-347V
3 1100 nominal lumens delivered in DC mode

Accessories (order separately)

- **FMA24 –** 2'x4' "F" mounting frame for NEMA "F" mounting
- **FKTG824 –** Flange conversion kit, 2'x4'

2TG T-Grid LED troffer 2x4

3200, 3800, 4300, 4800, 5400, or 7400 lumens

Application

- High efficacy long life solid state lighting platform.
- General lighting distribution is excellent for ambient lighting.
- High CRI source provides excellent color rendering.
- LEDs are an excellent source for use with controls since frequent switching does not affect the life of the light source.

Construction/finish

- A quality low-profile troffer with specification features for NEMA “G” grid, NEMA “NFG” narrow face grid, NEMA “GR” grid regressed, or NEMA “F” flange ceiling types.
- 3" nominal housing depth, 3-3/16" maximum depth.
- Smooth rolled edges on all four sides for easy handling.
- Die-formed one piece housing includes stiffening embosses and provides increased rigidity.
- Housing is multi-stage phosphate treated for maximum corrosion resistance and finish coat is high reflectance baked white enamel.
- Integral baffling system to prevent light leaks.
- 2 sets of integral grid clips (wraparound and fold-out) for maximum mounting flexibility.
- Integral wire hanger holes for independent wire suspension.
- Embosses with holes provided in housing end for screwing to T-bar if desired.
- 7/8" K.O.’s provided in each end cap for through wiring.
- Factory installed access plate in housing top includes 7/8" hole with rolled edge and 7/8" K.O.
- Carton includes integral carrying handle for easy handling.

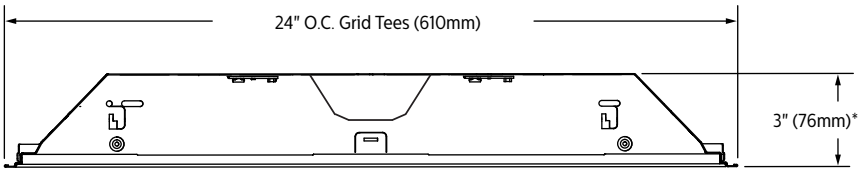
Electrical

- Standard 0–10V dimming.
- Driver and LED boards are accessible from below. LED boards are individually replaceable if required.
- Five-year luminaire limited warranty including LED boards and driver. Visit www.philips.com/warranties for complete warranty information.
- High efficiency LEDs have 50,000 hour rated life (defined by testing at 70% lumen maintenance (L70)), based on 25˚C ambient operating temperature.
- cETLus listed to UL and CSA standards, suitable for damp location.
- T-Grid LED luminaires are DesignLights Consortium® qualified. Please see the DLC QPL list for exact catalog numbers (http://www.designlights.org/QPL).
- Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

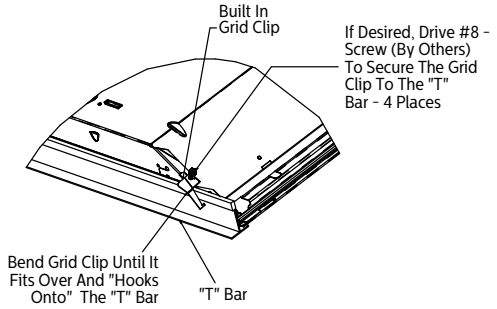
Enclosure

- Full “C” channel door frames for improved lens support and reduced shipping damage.
- Flat steel door frame features smooth rolled edges inside and outside.
- All door frames have mitered corners.
- All door frames use T-hinges and can be hinged and latched from either side.
- Opposable spring loaded latches are standard for easy operation and consistent retention.

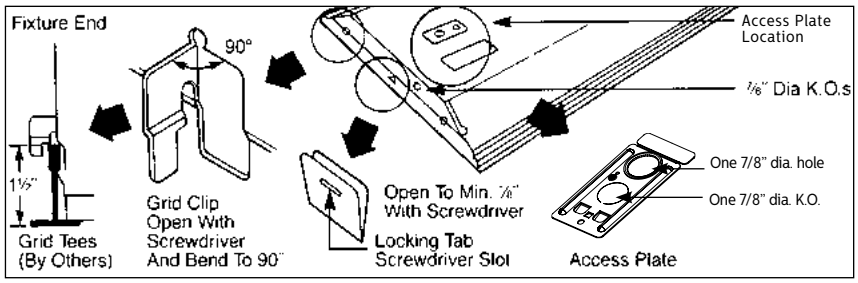
Dimensions



*EMLED option adds 1-3/4" to overall height



Wraparound Grid Clips



Fold-Out Grid Clips

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Troffer Fixture
Item Type	Surface Mounted Troffer Fixture
Description	2' X 2' Frosted Lens Troffer with Surface Mounted Kit
Manufacturer	Cooper Lighting/Metalux
Model	22GR-LD5-43-F1-UNV-L835- CD1-U, SK-22-WS
Dimensions	24 1/16'L x 24"W x 4 15/16"H
Finish	White
CSI #	26 51 00 - Interior Lighting
Omniclass #	22-265100 - Interior Lighting
Dimming Type	0-10V
Trim	White
Mount	Surface Mount Kit
On Dimming System	No
Lens/Shade	Acrylic Prismatic Frosted Lens
Fixture Input (Max. Watts)	40.1W
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4360
Lamp CRI	85+
Finish	White
Warranty	5 Years
Notes	Efficacy: 109.1 Lamp Life/Fixture Life: 60,000 hrs

Top Product Features

- Available in 2' x 4', 2' x 2' and 1' x 4'
- Multiple lumen packages up to 18,000 in 2x4 and 9,000 in 2x2
- Up to 140 lm/W for maximum energy savings versus fluorescent troffers
- Correlated Color Temperatures 3000K, 3500K, 4000K and 5000K at 80 and 90 CRI
- Standard 0-10V continuous dimming driver

Notes (7) Products also available in non-US voltages and frequencies for international markets. (8) Not available when specifying emergencies, voltage must be specific. (9) 347V is not available with the W2A driver. (10) Must specify voltage as 120V or 277V when ordering GTR2 option. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility.		**Notes** (11) With integral test switch/indicator/ laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (12) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). GTR2 option includes 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. (13) Must specify voltage as 120V or 277V when ordering GTR2 option. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility.	**Notes** (14) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A.	**Flexible Metal Conduit Options** Flex options available for 0-10V dimming control, DALI dimming control, emergency and night light functions. 72-inch factory-installed and pre-wired to driver, fitted to luminaire housing access plate with 90° enclosed FMC connector. Not all options may be combined and installation ratings vary by type. **A3/8-4/18GDIM series notes:** Factory installed dimming option 3/8" flexible metal conduit with 2-#18 power and ground wires and 2-#18 UL-listed jacketed 0-10V +/- control wires. Meets UL 66, 83, 1479, 1569, 1581, 2556. NEC® 250.118, 300.22(C), 392, 396, 330, 501, 502, 503, 530, 504, 505, 518, 520, 530, 645, 72; Federal Specification A-A-59544 (formerly J-C-30B); all applicable OSHA and HUD Requirements. UL Classified 1-, 2-, and 3-hour through penetration with applicable fire stop product (not included). May be surface mounted, fished and/or embedded in plaster. Cable tray and approved raceway rated, install per NEC®; Environmental Air-Handling Space Installation per NEC® 300.22(C).	**Notes** (15) Step Dim (Bi Level) and DALI only available in 3600 lumen and above. (16) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility. (E) Consult Fifth Light system pages for additional details and compatibility. (F) Consult Marketplace Options - Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com. (G) Not compatible with GTR, ETRD, or integrated sensor options. (H) Available with UNV voltage only.

	Notes (17) Gasketing only available with aluminum door frame. (18) Gasketing minimum .125.	**Notes** (18) WAA sensor to be used with CD or W2A driver. (19) WAB and SVPD1 sensor to be used with CD driver. (20) WLA sensor to be used with LV driver. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) WaveLinx Lite devices are not currently compatible with the WaveLinx Wireless Area Controller. Consult WaveLinx Lite system pages for additional details and compatibility. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.		**Notes** (19) An EQ Grid Clip is recommended for all 9/16" ceiling systems. (D) For use with SVPD sensor only. Consult SVPD series system pages for additional details and compatibility.

Metalux 22GR LED

Product Specifications

Construction
- Rigid housing is die formed of code gauge prime cold rolled steel
- Full length die-formed stiffeners and unibody endplate for added strength
- Innovative design provides superior lens brightness, uniformity and visual comfort
- Unibody endplates are securely attached with interlocking tabs and screws
- Four auxiliary fixture end suspension points provided
- Endplates have integral Grid-lock feature for safety and convenience

Controls
- Standard with 0-10V dimming driver (10% standard, 1% optional)
- WaveLinx wireless fixture for sensor-less wireless control
- WaveLinx wireless sensor compatible for standalone, controlled, connected, and IoT capability
- SVPD sensor compatible for standalone functionality
- Low-voltage sensor and driver compatible for WaveLinx Low-Voltage and DLVP applications
- DALI 2.0, Lutron, and step-dimming available

Electrical
- TM-21 life at 60,000 hours up to L88 and calculated L70 exceeds 162,000 hrs.
- Available in 3000K, 3500K, 4000K or 5000K with a minimum of 80 CRI
- Color accuracy ≤3-Step MacAdam ellipse (SDCM)
- Drivers available in 120-277V and 347V
- Tunable white options available with Cooper Lighting Solutions' VividTune

Emergency Battery Pack Option
- Optional 120V-277V integral emergency battery pack available in 7-watts, 14-watts
- 90-minute batteries provide constant power to the LED system
- Test switch/indicator button can be tested safely from the ground using a laser pointer
- Emergency/generator transfer options available

Frame/Optical Shielding
- Die formed, flat steel door with frosted #12 pattern acrylic prismatic lens
- Primary stocking skus come standard with robust .095 lens
- Other options available for maximum versatility

Compliance
- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life per TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire

The GRLED with Integrated Sensor technology provides automatic energy savings without sacrificing performance. The GRLED delivers superior lighting with integrated occupancy and daylighting controls.

For standalone and controlled applications, the WaveLinx Lite integral sensor provides out-of-the-box functionality with no gateways required and factory startup is not needed.

When more connectivity is required, the WaveLinx Wireless sensor meets modern code and utility requirements, delivers energy and cost savings, while enabling buildings to become smart buildings.

The WaveLinx Wireless Connected Lighting System combined with Trellix provides an open IoT platform and infrastructure that connects intelligent sensors leveraging the real-estate of the physical light fixture to solve higher complexity problems to deliver actionable insights through the aggregation of valuable data.

VividTune™
color tuning solutions

22GR LED with VividTune Tunable White

VividTune tunable white luminaires from Cooper Lighting Solutions deliver high-quality light in a broad range of continuously variable color temperatures and intensities. Create a dynamic environment by adjusting the ambient light warmer or cooler to influence mood, support the task at hand, or create a dramatic ambience. The ability to control correlated color temperature and intensity separately using simple controls is the next evolution of LED lighting for the commercial, educational, healthcare and hospitality space. The unparalleled flexibility and number of available lighting environments enable users to find the right light with tunable white.

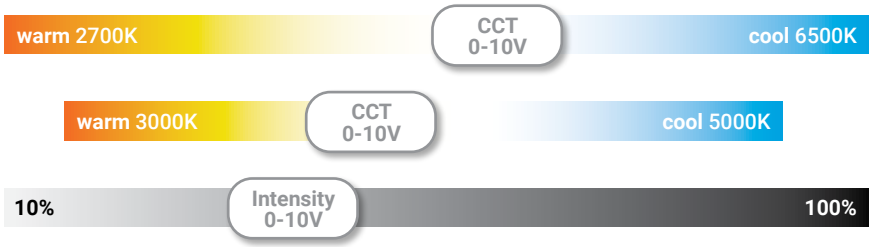
Controlling VividTune Tunable White

VividTune luminaires make tunable white more accessible by using simple and familiar controls. From wall dimmers to wireless controls, VividTune tunable white luminaires are compatible with industry standard 0-10V dimming controls. A single 0-10V dimming input is used to control intensity (brightness) while a second 0-10V dimming input is used to adjust CCT. For suggested control configurations, go to www.cooperlighting.com for tunable white application guides.



Example of Lumen Adjustment Calculation

22GR-LD5-32-F1-UNV-L83050-W2A1-U at 80 CRI tuned to 3500K

Adjusted Lumen = published lm x adjusted lm factor

Adjusted Lumen = 3268 x 0.986

Adjusted Lumen = 3223 lm

** Lumen adjustment factors are for reference and may be different for each product selected. Refer to IES files for actual performance data on each.*

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Troffer Fixture
Item Type	Recessed Box
Description	2' X 2' Recessed Troffer
Manufacturer	Signify/Day-Brite
Model	2TG45L835-2-FS-02F-UNV-DIM
Dimensions	24"L x 24"W x 3"H
Finish	White
CSI #	26 51 00 - Interior Lighting
Omniclass #	22-265100 - Interior Lighting
Dimming Type	0-10V
Trim	White
Mount	Recessed ACT
On Dimming System	No
Lens/Shade	Acrylic Prismatic Frosted Lens
Fixture Input (Max. Watts)	51W
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4551
Lamp CRI	85+
Finish	White
Warranty	5 Years
Notes	Efficacy: 89 Lamp Life/Fixture Life: 50,000 hrs

T-Grid LED troffer 2x2

2000, 3000, 3800 or 4500 lumens

Project:

Location:

Cat.No:

Type:

Lamps: Qty:

Notes:

Day-Brite / CFI T-Grid LED troffer is an energy efficient low profile luminaire offering excellent performance for general lighting applications such as offices, schools, healthcare, or retail. Featuring a frosted prismatic lens to enhance visual comfort, the T-Grid LED Troffer utilizes highly reliable and efficient Philips LED platform boards and dimmable driver, enabling market leading efficiency in its category.

Ordering guide

Example: 2TG30L840-2-FS-02F-UNV-DIM

Footnotes

1 Emergency pack mounted in enclosure on top of fixture housing. Delivers 1100 nominal lumens in DC mode.

Accessories (order separately)

- **FMA22** – 2'x2' "F" mounting frame for NEMA "F" mounting
- **FKTG822** – Flange conversion kit, 2'x2'

2TG T-Grid LED troffer 2x2

2000, 3000, 3800 or 4500 lumens

Application

- High efficacy long life solid state lighting platform.
- General lighting distribution is excellent for ambient lighting.
- High CRI source provides excellent color rendering.
- LEDs are an excellent source for use with controls since frequent switching does not affect the life of the light source.

Construction/finish

- A quality low-profile troffer with specification features for NEMA “G” grid, NEMA “NFG” narrow face grid, NEMA “GR” grid regressed, or NEMA “F” flange ceiling types.
- 3" nominal housing depth, 3-3/16" maximum depth.
- Smooth rolled edges on all four sides for easy handling.
- Die-formed one piece housing includes stiffening embosses and provides increased rigidity.
- Housing is multi-stage phosphate treated for maximum corrosion
resistance and finish coat is high reflectance baked white enamel.
- Integral baffling system to prevent light leaks.
- 2 sets of integral grid clips (wraparound and fold-out) for maximum mounting flexibility.
- Integral wire hanger holes for independent wire suspension.
- Embosses with holes provided in housing end for screwing to T-bar if desired.
- 7/8" K.O.’s provided in each end cap for through wiring.
- Factory installed access plate in housing top includes 7/8" hole with rolled edge and 7/8" K.O.
- Carton includes integral carrying handle for easy handling.

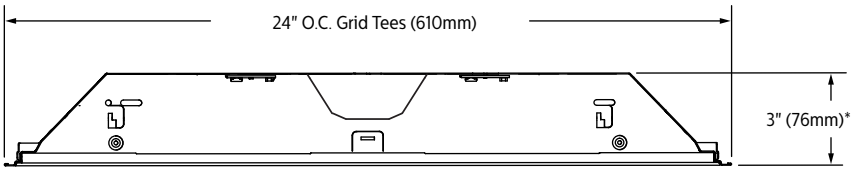
Electrical

- Standard 0–10V dimming.
- Driver and LED boards are accessible from below. LED boards are individually replaceable if required.
- Five-year luminaire limited warranty including LED boards and driver. Visit www.philips.com/warranties for complete warranty information.
- High efficiency LEDs have 50,000 hour rated life (defined by testing at 70% lumen maintenance (L70)), based on 25˚C ambient operating temperature.
- cETLus listed to UL and CSA standards, suitable for damp location.
- T-Grid LED luminaires are DesignLights Consortium® qualified. Please see the DLC QPL list for exact catalog numbers (http://www.designlights.org/QPL).
- Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

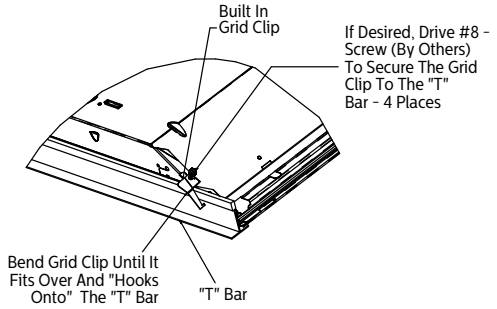
Enclosure

- Full “C” channel door frames for improved lens support and reduced shipping damage.
- Flat steel door frame features smooth rolled edges inside and outside.
- All door frames have mitered corners.
- All door frames use T-hinges and can be hinged and latched from either side.
- Opposable spring loaded latches are standard for easy operation and consistent retention.

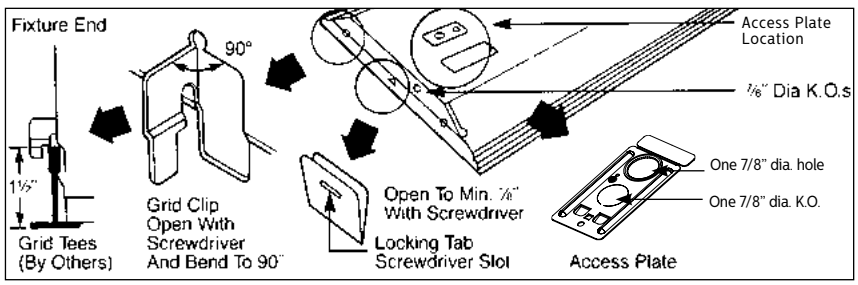
Dimensions



*EMLED option adds 1-3/4" to overall height



Wraparound Grid Clips



Fold-Out Grid Clips

2TG T-Grid LED troffer 2x2

Notes (9) With integral test switch/indicator/laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (10) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). GTR2 option includes 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. (11) Must specify voltage as 120V or 277V when ordering GTR2 option. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility.		**Flexible Metal Conduit Options** Flex options available for 0-10V dimming control, DALI dimming control, emergency and night light functions. 72-inch factory-installed and pre-wired to driver, fitted to luminaire housing access plate with 90° enclosed FMC connector. Not all options may be combined and installation ratings vary by type. **A3/8-4/18GDIM series notes:** Factory installed dimming option 3/8" flexible metal conduit with 2-#18 power and ground wires and 2-#18 UL-listed jacketed 0-10V +/- control wires. Meets UL 66, 83, 1479, 1569, 1581, 2556. NEC® 250.118, 300.22(C), 392, 396, 330, 501, 502, 503, 530, 504, 505, 518, 520, 530, 645, 72; Federal Specification A-A-59544 (formerly J-C-30B); all applicable OSHA and HUD Requirements. UL Classified 1-, 2-, and 3-hour through penetration with applicable fire stop product (not included). May be surface mounted, fished and/or embedded in plaster. Cable tray and approved raceway rated, install per NEC®; Environmental Air-Handling Space Installation per NEC® 300.22(C).	**Notes** (12) 2900 and 3400 lumen packages are not available with Step-Dim driver. (13) 2900 and 3400 lumen packages are not available with 5LTD –Dali option driver. (14) 5LTHD option uses two drivers at 6400 lumens. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (C) Low-voltage System Dimming Driver (0%-100% Dimming). (E) Consult Fifth Light system pages for additional details and compatibility. (F) Consult Marketplace Options – Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com. (G) Not compatible with GTR, ETRD, or integrated sensor options. (H) Available with UNV voltage only.

Notes (15) WAA sensor to be used with CD or W2A driver. (16) WAB and SVPD1 sensor to be used with CD driver. (17) WLA sensor to be used with LV driver. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) WaveLinx Lite devices are not currently compatible with the WaveLinx Wireless Area Controller. Consult WaveLinx Lite system pages for additional details and compatibility. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.	**Notes** (18) Fixtures using factory installed SkyTrim option are not DLC qualified.		**Notes** Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (D) For use with SVPD sensor only. Consult SVPD series system pages for additional details and compatibility.

Metalux 24SR LED 2' x 4'

Product Specifications

Construction
- Shallow 4.75" deep housing extruded aluminum frame
- Injected molded composite end plates
- End plates screws for strength, rigidity and gap eliminations
- End plates accessory grid-lock feature adds safety and convenience
- Four auxiliary fixture end suspension points
- Large access plate for supply connection

Controls
- 0-10V dimming to 1% standard
- WaveLinx wireless fixture for sensor-less wireless control
- WaveLinx wireless sensor compatible for standalone, controlled, connected, and IoT capability
- SVPD sensor compatible for standalone functionality
- Low-voltage sensor and driver compatible for WaveLinx Low-Voltage and DLVP applications
- DALI 2.0, Lutron, and step-dimming available

Electrical
- LED's available in 3000K, 3500K, 4000K or 5000K with a minimum CRI of 80
- Color accuracy ≤3-Step MacAdam ellipse (SDCM)
- Projected life is 100,000 hours at 92% lumen output
- Electronic drivers available for 120-277V applications

Emergency Battery Pack Option
- Optional 120V-277V integral emergency battery pack available in 7W
- 90-minute backup period for code compliance
- Test switch with laser pointer allows safe testing from floor
- Patented EZ Key prevents accidental discharge during construction
- Emergency/generated transfer option available (see ordering information for details)

Driver Access
- Drivers can be accessed via plenum

Finish
- High reflectance baked matte white enamel finish for luminous uniformity

Optics
- Precision formed optical assembly
- Positively retained high optical grade acrylic lenses
- WaveStream LED technology provides a distribution

SkyTrim Accessory
- A luminous decorative accent that can be mounted directly on the light guide of a SkyRidge fixture either at the factory or in the field
- Designed for an array of interior applications
- Ideal for spaces where color is necessary to provide visual cues, emphasize brand identity, directional awareness or simply as an artistic expression

Compliance
- Components are UL recognized
- cULus listed for 25° C ambient indoor environments
- RoHS compliant
- Complies with IESNA LM-79
- LEDs compliant with LM-80 standards
- DesignLights Consortium® Qualified and classified for DLC Standard (refer to www.designlights.org)

Warranty
- Five-year warranty. Optional ten year warranty available.

The SkyRidge with Integrated Sensor technology provides automatic energy savings without sacrificing performance. The SkyRidge delivers superior lighting with integrated occupancy and daylighting controls.

For standalone and controlled applications, the WaveLinx Lite integral sensor provides out-of-the-box functionality with no gateways required and factory startup is not needed.

When more connectivity is required, the WaveLinx Wireless sensor meets modern code and utility requirements, delivers energy and cost savings, while enabling buildings to become smart buildings.

The WaveLinx Wireless Connected Lighting System combined with Trellix provides an open IoT platform and infrastructure that connects intelligent sensors leveraging the real-estate of the physical light fixture to solve higher complexity problems to deliver actionable insights through the aggregation of valuable data.

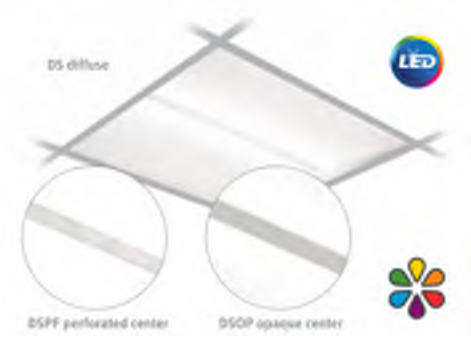
Issue Date: **Aug 30, 2021**
Revision Date:



Item Name	Recessed Troffer Fixture
Item Type	Recessed Box
Description	2x2 Edgelit "FormFlex" Center Blade
Manufacturer	Signify / Day-Brite
Model	FormFlex 2FFXG30L835-2-DSLP-UNV-DIM
Dimensions	24"L x 24"W x 3 5/16"H
Finish	White
CSI #	26 51 00 - Interior Lighting
Omniclass #	22-265100 - Interior Lighting
Dimming Type	0-10V Dimming Driver (1%-100% Dimming)
Trim	White
Mount	Recessed ACT
On Dimming System	Yes
Lens/Shade	High Optical Grade Acrylic Prismatic
Fixture Input (Max. Watts)	26
Lamp Type	LED-I
Lamp Kelvin	3500
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	2950
Lamp CRI	85+
Finish	White
Warranty	5 years
Notes	Efficacy: 113 lm/W Lamp Life / Fixture Life: 100,000 hrs

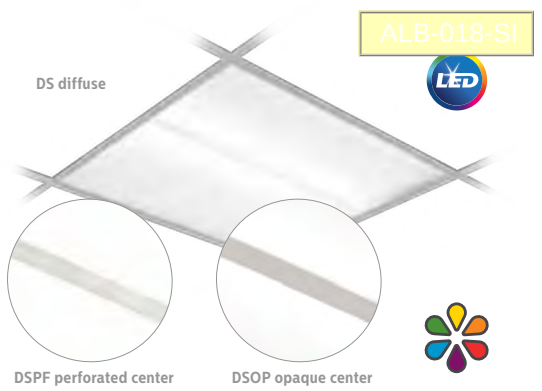
FormFlex 2x2

2FFX up to 4500 lumens

ALB-018-SI



Day-Brite / CFI FormFlex recessed is a fully luminous aperture luminaire offering a diffuse, perforated, opaque, or linear prism center channel accent for unique aesthetic flexibility. FormFlex delivers high performing even illumination and high visual comfort. Its architectural style, coupled with controls options, makes FormFlex an ideal choice for applications such as office, institutional, and healthcare, where energy savings and customized effect are desired.

FormFlex now offers AccuRender technology for the highest color quality at the highest efficacy.

LV Low voltage	**POE** Power over ethernet	**EMPOE** 600lm integral emergency driver and battery pack **IAO** Integral Interact Office daylighting and occupancy sensor, enables wireless connected lighting control **IAOSB** Interact Office advanced wired sensor bundle, integral SC2000 w/IoT capabilities for enterprise scale projects

Footnotes

1 Integral controls options dimmable to 5% via wireless wall switch. Non-controls options are 0-10v dimmable to 1% for Standard configurations,and to 10% for Base configurations.
2 Specify only with -DIM driver option.
3 CHIC option not provided with air return functionality.
4 Not available with 347V.
5 High efficacy option may only be ordered with Standard lumen configurations.
6 Must be installed in conjunction with a UL1008 device.
7 Must be ordered with an integral sensing option.
8 AccuRender is 90CRI with R_9>50.
9 Option is qualified as Engineered-to-Order (ETO) ready. Lead times and minimum order quantities may vary, please consult factory.(DLC Standard efficacy only)
10 Must order IRT9015 Interact commissioning remote with each system order.

Accessories (order separately)

- **FSF422 –** 2'x2' surface mount field installation kit (field assembled)
- **FMA22 –** 2'x2' "F" mounting frame for NEMA "F" ceiling
- **FFXDSPF22L –** 2'x2' FormFlex replacement lens w/white perforated channel
- **FFXDSOP22L –** 2'x2' FormFlex replacement lens w/opaque channel
- **FFXDSLP22L –** 2'x2' FormFlex replacement lens w/linear prism channel

SWZCS accessories (order separately)

- **IRT9015 –** handheld remote for grouping and configuration(at least one remote required for any SWZCS installation).
- **UID8451/10 –** Wireless Dimmer Switch Selector
- **UID8461/10 –** Wireless Scene Selector

Not all product variations listed on this page are DLC qualified. To ensure that a specific model is qualified, visit www.designlights.org/search

interact ready.

2FFX FormFlex recessed 2x2

up to 4500 lumens

Application

- Ideal for modern offices, institutional, retail, and healthcare applications.
- Modern architectural styling to complementany space.
- Full width luminous lens provides smooth brightness and high visual comfort.
- Directs a controlled amount of light to higher angles to eliminate "cave effect" without creating glare.
- Available in standard efficacy and high efficacy (H) configurations up to 130lm/W.
- 80 CRI minimum source provides a balanced spectral power distribution.
- AccuRender 90 CRI source provides preferred color quality.
- Suitable for use with NEMA G (15/16") and NFG (9/16") suspended t-grid ceilings. NEMA F flange ceilings require the FMA22 accessory (ordered separately).
- Lens center channel provides aesthetic options that allow for unique visual elements in the space.

Construction/Finish

- Robust and durable dieformed embossed steel housing and end caps.
- Molded one-piece acrylic diffuser may be removed without tools for access to LED boards and driver(s).
- Unique spring retainers ensure the diffuser is centered in the housing opening at all times.
- T-bar grid clips are built into luminaire end caps for quick and easy installation, no extra parts.

Energy data

Configuration	Nominal CCT/ CRI	Flux (lm)	Input Power (W)	Efficacy (LPW)	DLC
2FFXG38B835	3500K/80	3782	34	111	Standard

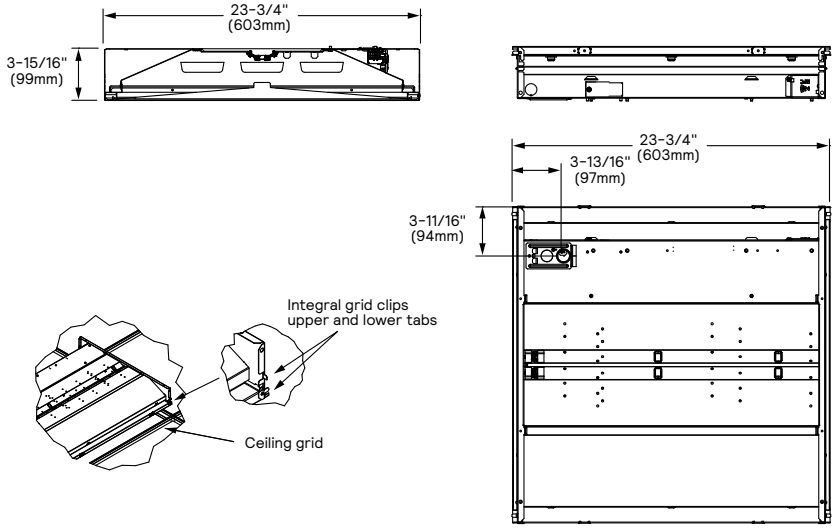
2FFXG38LH840	4000K/80	3897	30	131	Premium
2FFXG45L835	3500K/80	4413	40	110	Standard
2FFXG45L840	4000K/80	4549	40	113	Standard
2FFXG45LH835	3500K/80	4526	36	126	Premium
2FFXG45LH840	4000K/80	4666	36	130	Premium

Dimensions



- Air return functionality is standard for all configurations. See air flow and noise data on page 4.
- Sheetmetal componets are multi-stage phosphate treated for maximum corrosion resistance and finish coat is high reflectance basked white enamel.
- Integral louvers on housing ends allow air from the heated space to return to a pressurized plenum.

Electrical

- Driver and LED board are accessible from below by easy removal of lens.
- Non-controls Base configurations 0-10V dimmable to 10%.
- Non-controls Standard configurations 0-10V dimmable to 1%.
- Standard configurations with controls options dimmable via wireless switches (see below).
- Predicted L70 lumen maintenance up to 87,000 hours at 25°C ambient for all configurations.
- Emergency battery packs accessible from above. To estimate lumen output in emergency mode, multiply emergency pack wattage by luminaire efficacy, then by 1.10.
- The GTD/E option is used to bypass wall switches and allow luminaire operation on auxiliary power. Generator transfer requires installation in conjunction with a UL1008 listed device.
- The GTD/SNSR option is used to bypass integrated sensor control in the event of utility power loss. Generator transfer requires installation in conjunction with a UL1008 listed device.
- Compliance to CAN ICES-005-A/ NEB-005-A and FCC Part 15-A.

Validation

- cETLus listed for use in damp locations
- When ordered with -WL option code, suitable for use in wet locations with covered ceilings
- Rated for direct contact with insulation (IC)
- CCEA Chicago Plenum listed
- FlexForm luminaires are Designlights Consortium® qualified. Please see the DLC QPL list for exact catalog numbers, www.designlights.org/QPL

Environment

- Rated for dry or damp locations in operating ambient temperatures 0-30°C (32-86°F). Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.Not suitable for natatorium environments.

Warranty

- 5 year manufacturer's limited warranty.
  Visit signify.com/warranties for complete warranty information.

2FFX FormFlex recessed 2x2

up to 4500 lumens

Wireless Controls Options

SpaceWise DT (SWZDT)

- Standalone daylight and occupancy sensing with advanced grouping, wireless mesh networking and dwell time.
- Commissioning via compatible Android phone and Philips Field App
- Dimming via compatible Zigbee wireless wall switch only (see link below for details)
- Register for the commissioning app at http://registration.componentcloud.philips.com/appregistration/
- Integral sensing options may not be combined
- For more information including recommended switches, refer to the following: –

  SWZDT – www.usa.lighting.philips.com/systems/lighting-systems/spacewise

Emergency Options (ER100)

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

Interact Pro scalable sensor for Foundation, Advanced & Enterprise tiers (SWZCS and an evolution of SpaceWise)

- SWZCS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
  - Compatible with:
    - UID8451/10 wireless dimmer switch
    - SWS200 wireless scene switch
    - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
    - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
    - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
    - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem

Radio only sensor (RADIO)

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Interact Pro scalable sensor bundles for Enterprise tier

- IAOSB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices

Wired Controls Options

Interact Office Wired (PoE)

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- IAOSB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output. Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices

Description	2' X 2' Recessed Lensed Troffer with A12 Shielding
Manufacturer	Cooper Lighting/Metalux
Model	22GR-LD5-32-FI-UNV-L835- CDI-U
Dimensions	24"L x 24"W x 3.25"H
Finish	White
CSI #	26 51 00 - Interior Lighting
Omniclass #	22-265100 - Interior Lighting
Dimming Type	0-10V
Trim	White
Mount	Recessed ACT
On Dimming System	No
Fixture Input (Max. Watts)	29.9W
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	3268
Lamp CRI	85+
Finish	White
Warranty	5 Years
Notes	Efficacy: 109.1 Lamp Life/Fixture Life: 60,000 hrs

Top Product Features

- Available in 2' x 4', 2' x 2' and 1' x 4'
- Multiple lumen packages up to 18,000 in 2x4 and 9,000 in 2x2
- Up to 140 lm/W for maximum energy savings versus fluorescent troffers
- Correlated Color Temperatures 3000K, 3500K, 4000K and 5000K at 80 and 90 CRI
- Standard 0-10V continuous dimming driver

Notes (7) Products also available in non-US voltages and frequencies for international markets. (8) Not available when specifying emergencies, voltage must be specific. (9) 347V is not available with the W2A driver. (10) Must specify voltage as 120V or 277V when ordering GTR2 option. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility.		**Notes** (11) With integral test switch/indicator/ laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (12) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). GTR2 option includes 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. (13) Must specify voltage as 120V or 277V when ordering GTR2 option. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility.	**Notes** (14) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A.	**Flexible Metal Conduit Options** Flex options available for 0-10V dimming control, DALI dimming control, emergency and night light functions. 72-inch factory-installed and pre-wired to driver, fitted to luminaire housing access plate with 90° enclosed FMC connector. Not all options may be combined and installation ratings vary by type. **A3/8-4/18GDIM series notes:** Factory installed dimming option 3/8" flexible metal conduit with 2-#18 power and ground wires and 2-#18 UL-listed jacketed 0-10V +/- control wires. Meets UL 66, 83, 1479, 1569, 1581, 2556. NEC® 250.118, 300.22(C), 392, 396, 330, 501, 502, 503, 530, 504, 505, 518, 520, 530, 645, 72; Federal Specification A-A-59544 (formerly J-C-30B); all applicable OSHA and HUD Requirements. UL Classified 1-, 2-, and 3-hour through penetration with applicable fire stop product (not included). May be surface mounted, fished and/or embedded in plaster. Cable tray and approved raceway rated, install per NEC®; Environmental Air-Handling Space Installation per NEC® 300.22(C).	**Notes** (15) Step Dim (Bi Level) and DALI only available in 3600 lumen and above. (16) White tuning provides correlated color temperatures (CCT) between 3000K (warm) to 5000K (cool) or 2700K (warm) to 6500K (cool). Must be used in conjunction with W2A. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility. (E) Consult Fifth Light system pages for additional details and compatibility. (F) Consult Marketplace Options - Lutron system pages for additional details and compatibility. Compatible only with driver series shown, and may require two or more drivers. Requires field commissioning to operate or dim. Contact Lutron at www.lutron.com. (G) Not compatible with GTR, ETRD, or integrated sensor options. (H) Available with UNV voltage only.

Number of Drivers	Options	Integrated Sensing Systems	Packaging	Accessories
1=1 Driver ~~**2**=2 Drivers~~	**PAF**=Painted After Fabrication **G1**=Gasket, Door Frame and Housing **G2**=G1 plus Gasket between Lens and Door **G3**=G1 and G2 plus Gasketing on Mounting Surface of Fixture Trims (17), (18)	**[Blank]**=No Sensor **WAA**=WaveLinx Wireless Integrated Sensor (18), (A) **WAB**=WaveLinx Lite Wireless Integrated Sensor (19), (B) **WLA**=Low-voltage Integrated Sensor (20), (C) **SVPD1**=0-10V Stand-alone Integrated Sensor (19), (D)	**U**=Unit Pack ~~**PAL**=Job Pack, out of carton~~ **PALC**=Job Pack, in carton	**EQ-CLIP-U**=T-BAR Safety Earthquake Clips (19) **DF-22W-U**=2' x 2' Drywall Frame Kit **SK-22-WS**=2' x 2' Shallow Surface Mount Kit **SK-22-WT**=2' x 2' Tall Surface Mount Kit **ISHH-01**=Programming Remote for Integrated Sensor (D) **ISHH-02**=Personal Control Remote for Integrated Sensor (D)
	Notes (17) Gasketing only available with aluminum door frame. (18) Gasketing minimum .125.	**Notes** (18) WAA sensor to be used with CD or W2A driver. (19) WAB and SVPD1 sensor to be used with CD driver. (20) WLA sensor to be used with LV driver. Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) WaveLinx Lite devices are not currently compatible with the WaveLinx Wireless Area Controller. Consult WaveLinx Lite system pages for additional details and compatibility. (C) Consult WaveLinx Low-Voltage or DLVP system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.		**Notes** (19) An EQ Grid Clip is recommended for all 9/16" ceiling systems. (D) For use with SVPD sensor only. Consult SVPD series system pages for additional details and compatibility.

Metalux 22GR LED

Product Specifications

Construction
- Rigid housing is die formed of code gauge prime cold rolled steel
- Full length die-formed stiffeners and unibody endplate for added strength
- Innovative design provides superior lens brightness, uniformity and visual comfort
- Unibody endplates are securely attached with interlocking tabs and screws
- Four auxiliary fixture end suspension points provided
- Endplates have integral Grid-lock feature for safety and convenience

Controls
- Standard with 0-10V dimming driver (10% standard, 1% optional)
- WaveLinx wireless fixture for sensor-less wireless control
- WaveLinx wireless sensor compatible for standalone, controlled, connected, and IoT capability
- SVPD sensor compatible for standalone functionality
- Low-voltage sensor and driver compatible for WaveLinx Low-Voltage and DLVP applications
- DALI 2.0, Lutron, and step-dimming available

Electrical
- TM-21 life at 60,000 hours up to L88 and calculated L70 exceeds 162,000 hrs.
- Available in 3000K, 3500K, 4000K or 5000K with a minimum of 80 CRI
- Color accuracy ≤3-Step MacAdam ellipse (SDCM)
- Drivers available in 120-277V and 347V
- Tunable white options available with Cooper Lighting Solutions' VividTune

Emergency Battery Pack Option
- Optional 120V-277V integral emergency battery pack available in 7-watts, 14-watts
- 90-minute batteries provide constant power to the LED system
- Test switch/indicator button can be tested safely from the ground using a laser pointer
- Emergency/generator transfer options available

Frame/Optical Shielding
- Die formed, flat steel door with frosted #12 pattern acrylic prismatic lens
- Primary stocking skus come standard with robust .095 lens
- Other options available for maximum versatility

Compliance
- IC rated for insulation contact
- cULus listed for damp locations
- RoHS compliant
- Tested to IESNA LM-79 and LM-80
- Stated life per TM21 standards
- Can be used for State of California Title 24 high efficacy luminaire

The GRLED with Integrated Sensor technology provides automatic energy savings without sacrificing performance. The GRLED delivers superior lighting with integrated occupancy and daylighting controls.

For standalone and controlled applications, the WaveLinx Lite integral sensor provides out-of-the-box functionality with no gateways required and factory startup is not needed.

When more connectivity is required, the WaveLinx Wireless sensor meets modern code and utility requirements, delivers energy and cost savings, while enabling buildings to become smart buildings.

The WaveLinx Wireless Connected Lighting System combined with Trellix provides an open IoT platform and infrastructure that connects intelligent sensors leveraging the real-estate of the physical light fixture to solve higher complexity problems to deliver actionable insights through the aggregation of valuable data.

VividTune™
color tuning solutions

22GR LED with VividTune Tunable White

VividTune tunable white luminaires from Cooper Lighting Solutions deliver high-quality light in a broad range of continuously variable color temperatures and intensities. Create a dynamic environment by adjusting the ambient light warmer or cooler to influence mood, support the task at hand, or create a dramatic ambience. The ability to control correlated color temperature and intensity separately using simple controls is the next evolution of LED lighting for the commercial, educational, healthcare and hospitality space. The unparalleled flexibility and number of available lighting environments enable users to find the right light with tunable white.

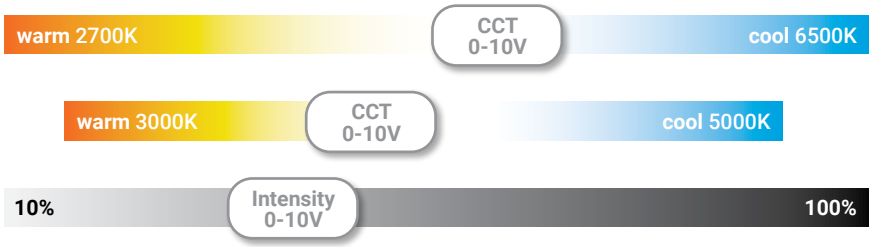
Controlling VividTune Tunable White

VividTune luminaires make tunable white more accessible by using simple and familiar controls. From wall dimmers to wireless controls, VividTune tunable white luminaires are compatible with industry standard 0-10V dimming controls. A single 0-10V dimming input is used to control intensity (brightness) while a second 0-10V dimming input is used to adjust CCT. For suggested control configurations, go to www.cooperlighting.com for tunable white application guides.



Example of Lumen Adjustment Calculation

22GR-LD5-32-F1-UNV-L83050-W2A1-U at 80 CRI tuned to 3500K

Adjusted Lumen = published lm x adjusted lm factor

Adjusted Lumen = 3268 x 0.986

Adjusted Lumen = 3223 lm

** Lumen adjustment factors are for reference and may be different for each product selected. Refer to IES files for actual performance data on each.*

Item Name	Troffer Fixture
Item Type	Recessed Box Troffer Fixture
Description	T-GRID 2' X 2' Recessed Troffer
Manufacturer	Signify / Day-Brite
Model	2TG38L835-2-FS-02F-UNV-DIM
Dimensions	24"L x 24"W x 3"H
Finish	White
CSI #	26 51 00 - Interior Lighting
Omniclass #	22-265100 - Interior Lighting
Dimming Type	0-10V
Trim	White
Mount	Recessed ACT
On Dimming System	No
Lens/Shade	Acrylic Prismatic Frosted Lens
Fixture Input (Max. Watts)	51W
Lamp Type	LED-I
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4551
Lamp CRI	80
Finish	White
Warranty	5 Years
Notes	Efficacy: 89 Lamp Life/Fixture Life: 50,000 hrs

Type:

Lamps: Qty:

Notes:

Day-Brite / CFI T-Grid LED troffer is an energy efficient low profile luminaire offering excellent performance for general lighting applications such as offices, schools, healthcare, or retail. Featuring a frosted prismatic lens to enhance visual comfort, the T-Grid LED Troffer utilizes highly reliable and efficient Philips LED platform boards and dimmable driver, enabling market leading efficiency in its category.

Footnotes

1 Emergency pack mounted in enclosure on top of fixture housing. Delivers 1100 nominal lumens in DC mode.

Accessories (order separately)

- **FMA22** – 2'x2' "F" mounting frame for NEMA "F" mounting
- **FKTG822** – Flange conversion kit, 2'x2'

2TG T-Grid LED troffer 2x2

2000, 3000, 3800 or 4500 lumens

Application

- High efficacy long life solid state lighting platform.
- General lighting distribution is excellent for ambient lighting.
- High CRI source provides excellent color rendering.
- LEDs are an excellent source for use with controls since frequent switching does not affect the life of the light source.

Construction/finish

- A quality low-profile troffer with specification features for NEMA “G” grid, NEMA “NFG” narrow face grid, NEMA “GR” grid regressed, or NEMA “F” flange ceiling types.
- 3" nominal housing depth, 3-3/16" maximum depth.
- Smooth rolled edges on all four sides for easy handling.
- Die-formed one piece housing includes stiffening embosses and provides increased rigidity.
- Housing is multi-stage phosphate treated for maximum corrosion
resistance and finish coat is high reflectance baked white enamel.
- Integral baffling system to prevent light leaks.
- 2 sets of integral grid clips (wraparound and fold-out) for maximum mounting flexibility.
- Integral wire hanger holes for independent wire suspension.
- Embosses with holes provided in housing end for screwing to T-bar if desired.
- 7/8" K.O.’s provided in each end cap for through wiring.
- Factory installed access plate in housing top includes 7/8" hole with rolled edge and 7/8" K.O.
- Carton includes integral carrying handle for easy handling.

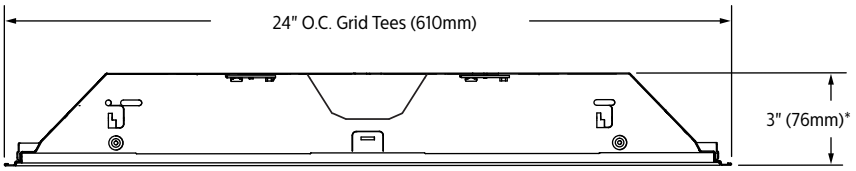
Electrical

- Standard 0–10V dimming.
- Driver and LED boards are accessible from below. LED boards are individually replaceable if required.
- Five-year luminaire limited warranty including LED boards and driver. Visit www.philips.com/warranties for complete warranty information.
- High efficiency LEDs have 50,000 hour rated life (defined by testing at 70% lumen maintenance (L70)), based on 25˚C ambient operating temperature.
- cETLus listed to UL and CSA standards, suitable for damp location.
- T-Grid LED luminaires are DesignLights Consortium® qualified. Please see the DLC QPL list for exact catalog numbers (http://www.designlights.org/QPL).
- Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

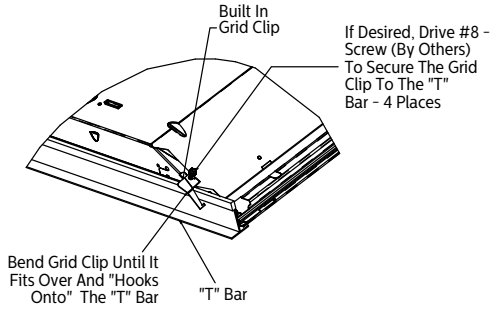
Enclosure

- Full “C” channel door frames for improved lens support and reduced shipping damage.
- Flat steel door frame features smooth rolled edges inside and outside.
- All door frames have mitered corners.
- All door frames use T-hinges and can be hinged and latched from either side.
- Opposable spring loaded latches are standard for easy operation and consistent retention.

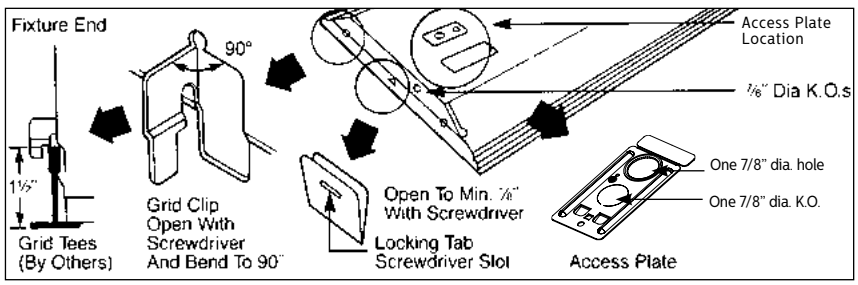
Dimensions



*EMLED option adds 1-3/4" to overall height



Wraparound Grid Clips



Fold-Out Grid Clips

2TG T-Grid LED troffer 2x2

2000, 3000, 3800 or 4500 lumens

Photometry

2x2 T-Grid LED troffer, 2000 nominal delivered lumens — LER – 99

Catalog No.	2TG20L840-2-FS-02F-UNV
Test No.	32630

ALX-002-CL

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Exit/Emergency Fixture
Item Type	Exit
Description	Die Cast Aluminum Emergency Exit light sign with Battery Backup and Self Diagnostics
Manufacturer	Cooper/Surelite
Model	CX71SD
Dimensions	12-5/8"W x 8-1/4"H x 2-1/4"D
CSI #	265100 Interior Lighting
Omniclass #	22-265100 Interior Lighting
Lamp Type	LED/RED
Voltage	UNV 120-277
Mount	Wall/Ceiling Mounting
On Dimming System	No
Lead Time	In Stock or 4 weeks
Warranty	Fixture: 5 year Battery: 7 year pro-rata
Notes	Lamp Kelvin: Red Fixture Input (Max. Watts): 1

Product Specifications

Electrical

- **General Features**
- Field selected red and green sign capability standard on all units (units shipped red, field convert to green with supplied parts)
- Dual Voltage Input 120/277 VAC,60Hz
- **AC Only**
- Optional 2C (Two circuit, FTBR) available in 120/277 VAC in standard and emergency operation
- **Self Powered**
- Sure-Lites EZ Key patented external battery disconnect feature – prevents unnecessary battery drainage, saves on installation time
- Solid-state Voltage Limited Charger
- Brownout Circuit
- Low-Voltage Disconnect
- Test Switch/Power Indicator Light
- Standard 24 hour recharge time (max)
- Self-Diagnostic feature Self-Diagnostics standard for CX7 self-powered series

Housing Construction

- Die cast aluminum housing
- Die cast canopy included (for mounting convenience only
- no electrical components in canopy)
- Universal pattern knockouts on
- rear of single face housing for direct mounting to junction box
- Knockout provided on housing for surface attachment
- Exit can be universally mounted: ceiling, wall or end
- Choice of three finishes: black housing with brushed aluminum face, white housing with white face or black housing with black face
- NFPA 101 compliant knockout chevrons allow quick conversion to directional signs
- Single and double faced signs available, order separately

Code Compliance

- UL 924 Listed
- UL Damp Location (0-40° C)
- Life Safety NFPA 101
- NEC/OSHA
- Most State and Local Codes
- Suitable for Floor Proximity Installation
- UL Listed for 2C (FTBR)

Lamp Data

- AC LED: Red and green LED lamps provide uniform diffused illumination
- DC: Red and green LED DC lamps (Brighter in emergency mode)

Warranty

- Exit – 5 year
- Battery: 7-Year pro-rata

Technical Data

Lamps
- CX Series Exits use energy efficient, long life LED's to provide uniform diffuse illumination of the exit face. These red and green LEDs require no maintenance and consume less than one watt, on average.

Housing Construction
- Die cast aluminum with Brushed Aluminum face and black trim standard. Optional finishes include White and Black. NFPA 101 compliant knockout chevrons for easy conversion to directional sign. Universal pattern knockouts are in the back of the single face housing for direct mounting to junction box. Die cast aluminum alloy canopy included for universal mounting. Canopy is included for mounting convenience only–no electrical components in canopy.

Lens
- Lenses for the CX Series Exits are made from durable, impact resistant polycarbonate. All exit faces are designed with full 3/4" stroke snap-out or snap-in chevron directional indicators to insure maximum visibility and compliance with the latest codes. Units come with red lenses installed and green lenses included for field selectable red or green signs.

Sure-Lites EZ Key External Battery Disconnect (Self Powered Only)
- Patented technology that allows installers to externally control the battery connection. Better than line latching, allows installers to choose when the battery is connected so that it stays fresh longer. Allows battery to be disconnected after installation but before building is occupied, enabling emergency circuit to be shut down for power savings.

Brownout Circuit (Self Powered Only)
- The brownout circuit on Sure-Lites' exits monitors the flow of AC current to the exit and activates the emergency lighting system when a predetermined reduction of AC power occurs. This dip in voltage will cause most ballasted fixtures to extinguish causing loss of normal lighting even though a total power failure has not occurred.

Solid-State Transfer (Self Powered Only)
- The CX Series Exit incorporates solid-state switching which eliminates corroded and pitted contacts or mechanical failures associated with relays. The switching circuit is designed to detect a loss of AC voltage and automatically energizes the lamps using DC power. Upon restoration of AC power, the DC power will be disconnected and the charger will automatically recharge the battery.

Low Voltage Disconnect (Self Powered Only)
- When the battery's terminal voltage falls, the low-voltage circuitry disconnects the lighting load. The disconnect remains in effect until normal utility power is restored, preventing deep battery discharge.

Test Switch/Power Indicator Light (Self Powered Only)
- A test switch located on the side of the exit permits the activation of the emergency circuit for a complete operational systems check. The Power Indicator Light provides visual assurance that the AC power is on.

Sealed Nickel Cadmium Battery (Self Powered Only)
- Sure-Lites sealed nickel cadmium batteries are maintenance-free with a life expectancy of 15 years. The sealed rechargeable nickel cadmium battery offers high discharge rates and stable performance over a wide range of temperatures, from 0-40° C. The specially designed re-sealable vent automatically controls cell pressure, assuring safety and reliability. This battery is best suited for harsh ambient temperatures because the electrolyte is not active in the electrochemical process.

"2C" (AC Only)
- The "2C" Option enables the Exits to operate per the requirements of UL 924 when connected simultaneously to both normal and emergency power circuits (two circuit operation–UL Category FTBR–Emergency Lighting and Power Equipment). The "2C" Option alters the standard Exit such that it complies with and is UL Listed under the FTBR Category. This option should only be used for exits which are intended to be connected simultaneously to normal and emergency power circuits, but cannot support two hot inputs. Only one of the normal or emergency circuits can be powered. If both are powered simultaneously, it will make the Exit inoperable. Both circuits have universal 120/277 VAC standard.

Self Diagnostics Option (Self Powered Only)
- The self-diagnostic unit will automatically perform all tests required by UL924, and NFPA 101. The system indicates the status of the exit at all times using the LED indicator near the test switch on the side of the unit. A 90 minute battery power (emergency mode) simulation test will occur randomly once every 12 months. A 30 second battery power simulation test will occur every 30 days.

Photocell Test Switch
- Allows verification of proper operation of the transfer circuit and emergency lamps with a laser pointer (laser is sold as an accessory). The emergency lamps will test for 30 seconds when activated.

Laser tester

Part Number = LASER

(sold separately)

Warranty
- All Sure-Lites' products are backed by a firm five-year warranty against defects in material and workmanship. Maintenance-free, long-life, sealed nickel cadmium batteries carry a seven-year pro-rata warranty.

SC Series

Cast aluminum exit sign

Project:
Location:
Cat.No:
Type:
Lamps: Qty:
Notes:

Example: SCN1RWICT

SC

Series
SC – Symmetry Series Die Cast LED Exit

Battery
N – Nickel Cadmium
A – AC Only

Face Options
1 – Single
2 – Double
U – Universal Two Faces, Backplate and Canopy

Letter Color
R – Red
G – Green

Stencil Face/Housing Color
W – White Stencil Face, White Housing
B – Black Stencil Face, Black Housing
WA – Brushed Aluminum Face, White Housing
BA – Brushed Aluminum Face, Black Housing
N – Brushed Aluminum Face, Natural Aluminum Housing

Model Designator[1]
IC – Intelli-Charge Diagnostics
ICT – Self-Testing Diagnostics (non-audible, self-powered models only)
ICTA – Audible Self-Testing Diagnostics (self-powered models only)

Options[2]
2CKT1 – 120/120 Two Circuit VAC (AC-only models)
2CKT2 – 277/277 Two Circuit VAC (AC-only models)
BF – Buzzer/Flasher (emergency units only)
BZ – Buzzer (emergency units only)
DC – 12-48 VDC Input (AC only models)
DL – Damp Location Listing 0°C to 40°C
EX – Special Input Transformer (specify voltage & frequency)
FA – Fire Alarm Activated Flasher
FL – Emergency Mode Flasher (emergency units only)
SW – Special Wording/Graphics[3]
TP – Tamperproof Hardware and Bit
VRS – Vandal Resistant Lens with Tamperproof Hardware & Bit

Accessories[4] (Order Separately)

CPKIT12W – Pendant Kit, 12" White, Includes Exit Adapter Plate
CPKIT12B – Pendant Kit, 12" Black, Includes Exit Adapter Plate
ICIR – Intelli-Charge Infra-Red Remote
T15TPTOOL – Tamperproof Screwdriver
PCS1 – Polycarbonate Vandal Shield
WG4 – Wire Guard, Surface Wall Mount
WG10 – Wire Guard, End Mount

Footnotes

1. For self-testing models refer to ICT and ICTA options.
2. Some option combinations may impact UL listing. Consult factory for specifics.
3. Requires 'open-face' design.
4. Consult Signify to confirm whether specific accessories are BAA-compliant.

codes and standards

- UL listed to standard 924
- UL damp location listing optional
- IBC, BOCA, and OSHA illumination standard
- NFPA 70 (National Electric Code)
- NFPA 101 (Life Safety Code)
- NEMA Premium certified
- Certified to the California Energy Commission in accordance with California law

construction

- Two piece die cast aluminum construction with NFPA compliant field selectable chevrons.
- Housing and stencil face castings are available with durable epoxy based powder coat paint or brushed aluminum finishes.
- A positive latching exit stencil face provides secure closure yet is easily accessible for installation, maintenance, and inspection.

installation

- The SC Series is available in single, double, and universal configurations.
- A mounting canopy is supplied to accommodate surface ceiling and end mounting.
- A universal knockout pattern is provided on the backplate for surface wall mounting.

electronics

- 120/277 VAC dual voltage input with surge protection is standard on all models.
- Self powered models feature the Intelli-Charge circuit where the charging system is microprocessor driven with software embedded diagnostic routine and temperature compensation.
- Self powered models include brownout detection, AC lockout, low voltage disconnect, AC Power indicator, charge status indicator, audible user-interface controls, visual LED system fault indicator, and tactile push to test switch.
- Additional equipment safety features include reverse battery polarity detection and protection, and reverse utility power detection and protection.
- All self-powered models include an on-board IR receiver for use with the optional hand-held remote (ICIR).
- Self-testing electronics (optional)
  The diagnostic/charging platform with optional self-testing mode automatically runs a one minute self-test every 30 days and a 30 minute test on the sixth and twelfth month in accordance with
  NFPA 101. A one minute or 90 minute test may be initiated via the push to test switch on the unit or by activating the appropriate test command on the optional IR test device.
- Operating temperature range
  AC only models: -40°F (-40°C) to 104°F (40°C).
  Self-powered models - standard location: 65°F (19°C) to 85°F (30°C).
  Self powered models - damp location: 32°F (0°C) to 104°F (40°C).
- Power consumption
  AC only red: 0.032 A (120VAC), 0.015 A (277VAC), PF = 0.94.
  AC only green: 0.035 A (120 VAC), 0.016 A (277VAC), PF = 0.92
  Self powered red: 0.039 A (120 VAC), 0.018 A (277VAC), PF = 0.94.
  Self powered green: 0.040 A (120VAC), 0.018 A (277VAC), PF = 0.94.

SC Cast aluminum LED exit sign

lamps

- Illumination of the stencil face is accomplished with long lasting, high output Light Emitting Diodes (LEDs).
- Hot spots and striations are eliminated by the internal "light chamber" allowing for even illumination in normal and emergency situations.
- Average legend illumination levels exceed 25fl (79 cd/m^2) during normal and emergency operation.

battery

- Maintenance free sealed nickel cadmium battery
- Provides a minimum of 90 minutes of emergency power.

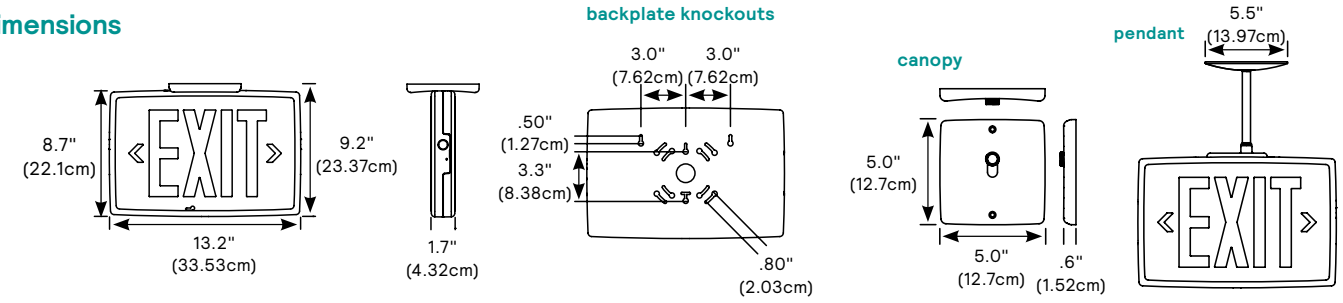
warranty

- Five full year warranty on electronics and unit.

options

- **2CKT1** – Available on AC only configured models to accommodate inputs from a normally on circuit and an AC emergency circuit from a generator or emergency inverter circuit limited to 120 VAC circuits.
- **2CKT2** – Available on AC only configured models to accommodate inputs from a normally on circuit and an AC emergency circuit from a generator or emergency inverter circuit limited to 277 VAC circuits.
- **BF** – This option enables the exit sign to buzz and flash together when the sign is operating under battery power. The buzzer and flashing rate is an approximate 50% duty cycle.
- **BZ** – This option enables the exit sign to buzz when the sign is operating under battery power. The buzzer rate is an approximate 50% duty cycle.
- **DC** – The DC option is reserved for AC only configured models and accommodates wiring to a remote emergency battery unit. The DC input is not polarity sensitive and accepts 12 to 48 VDC from a remote source.
- **DL** – Damp location listed products include various levels of corrosion protection on printed circuit board assemblies and other metallic parts. Environmental testing throughout a range of ambient temperature and 88% relative humidity.
- **EX** – The special input transformer option allows for input voltage and frequencies beyond the standard 120/277 VAC, 60 Hz input.
- **FA** – This option provides a two-wire harness for the electrical connection to the fire control panel. Should the fire panel activate an alarm, the exit sign will flash at a rate of approximately 50% duty cycle.
- **FL** – This option causes the exit sign to flash when the sign is operating under battery power. The flashing rate is approximately a 50% duty cycle.
- **TP** – The tamper proof option provides torx T15 hardware with center pin reject and the bit required to secure and access the equipment for future servicing.
- **ICT** – The self-testing option enables a periodic self-test of the equipment where a test routine is established to perform a one-minute test every thirty days with a 30-minute test performed on the sixth and twelfth month in accordance with NFPA 101. Equipment readiness faults are indicated with a visual LED display.
- **ICTA** – The audible self-testing option enables a periodic self-test of the equipment where a test routine is established to perform a one-minute test every thirty days with a 30-minute test performed on the sixth and twelfth month in accordance with NFPA 101. Equipment readiness faults are indicated with a visual LED display and an audible alarm.
- **BAC** – This option meets the requirements of the Buy American Act of 1933 (BAA).

dimensions



Buy American Act of 1933 (BAA):

This product is manufactured in one of our US factories and, as of the date of this document, this product was considered a commercially available off-the-shelf (COTS) item meeting the requirements of the BAA. This BAA designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies. Prior to ordering, please visit www.signify.com/baa to view a current list of BAA-compliant products to confirm this product's current compliance.

Product Specifications

Electrical

- **General Features**
- Field selected red and green sign capability standard on all units (units shipped red, field convert to green with supplied parts)
- Dual Voltage Input 120/277 VAC,60Hz
- **AC Only**
- Optional 2C (Two circuit, FTBR) available in 120/277 VAC in standard and emergency operation
- **Self Powered**
- Sure-Lites EZ Key patented external battery disconnect feature – prevents unnecessary battery drainage, saves on installation time
- Solid-state Voltage Limited Charger
- Brownout Circuit
- Low-Voltage Disconnect
- Test Switch/Power Indicator Light
- Standard 24 hour recharge time (max)
- Self-Diagnostic feature available as option

Housing Construction

- Die cast aluminum housing
- Die cast canopy included (for mounting convenience only
- no electrical components in canopy)
- Universal pattern knockouts on
- rear of single face housing for direct mounting to junction box
- Knockout provided on housing for surface attachment
- Exit can be universally mounted: ceiling, wall or end
- Choice of three finishes: black housing with brushed aluminum face, white housing with white face or black housing with black face
- NFPA 101 compliant knockout chevrons allow quick conversion to directional signs
- Single and double faced signs available, order separately

Code Compliance

- UL 924 Listed
- UL Damp Location (0-40° C)
- Life Safety NFPA 101
- NEC/OSHA
- Most State and Local Codes
- Suitable for Floor Proximity Installation
- UL Listed for 2C (FTBR)

Lamp Data

- AC LED: Red and green LED lamps provide uniform diffused illumination
- DC: Red and green LED DC lamps (Brighter in emergency mode)

Warranty

- Exit – 5 year
- Battery: 5-Year pro-rata

Technical Data

Lamps
- CX Series Exits use energy efficient, long life LED's to provide uniform diffuse illumination of the exit face. These red and green LEDs require no maintenance and consume less than one watt, on average.

Housing Construction
- Die cast aluminum with Brushed Aluminum face and black trim standard. Optional finishes include White and Black. NFPA 101 compliant knockout chevrons for easy conversion to directional sign. Universal pattern knockouts are in the back of the single face housing for direct mounting to junction box. Die cast aluminum alloy canopy included for universal mounting. Canopy is included for mounting convenience only–no electrical components in canopy.

Lens
- Lenses for the CX Series Exits are made from durable, impact resistant polycarbonate. All exit faces are designed with full 3/4" stroke snap-out or snap-in chevron directional indicators to insure maximum visibility and compliance with the latest codes. Units come with red lenses installed and green lenses included for field selectable red or green signs.

Sure-Lites EZ Key External Battery Disconnect (Self Powered Only)
- Patented technology that allows installers to externally control the battery connection. Better than line latching, allows installers to choose when the battery is connected so that it stays fresh longer. Allows battery to be disconnected after installation but before building is occupied, enabling emergency circuit to be shut down for power savings.

Brownout Circuit (Self Powered Only)
- The brownout circuit on Sure-Lites' exits monitors the flow of AC current to the exit and activates the emergency lighting system when a predetermined reduction of AC power occurs. This dip in voltage will cause most ballasted fixtures to extinguish causing loss of normal lighting even though a total power failure has not occurred.

Solid-State Transfer (Self Powered Only)
- The CX Series Exit incorporates solid-state switching which eliminates corroded and pitted contacts or mechanical failures associated with relays. The switching circuit is designed to detect a loss of AC voltage and automatically energizes the lamps using DC power. Upon restoration of AC power, the DC power will be disconnected and the charger will automatically recharge the battery.

Low Voltage Disconnect (Self Powered Only)
- When the battery's terminal voltage falls, the low-voltage circuitry disconnects the lighting load. The disconnect remains in effect until normal utility power is restored, preventing deep battery discharge.

Test Switch/Power Indicator Light (Self Powered Only)
- A test switch located on the side of the exit permits the activation of the emergency circuit for a complete operational systems check. The Power Indicator Light provides visual assurance that the AC power is on.

Sealed Nickel Cadmium Battery (Self Powered Only)
- Sure-Lites sealed nickel cadmium batteries are maintenance-free with a life expectancy of 15 years. The sealed rechargeable nickel cadmium battery offers high discharge rates and stable performance over a wide range of temperatures, from 0-40° C. The specially designed re-sealable vent automatically controls cell pressure, assuring safety and reliability. This battery is best suited for harsh ambient temperatures because the electrolyte is not active in the electrochemical process.

"2C" (AC Only)
- The "2C" Option enables the Exits to operate per the requirements of UL 924 when connected simultaneously to both normal and emergency power circuits (two circuit operation–UL Category FTBR–Emergency Lighting and Power Equipment). The "2C" Option alters the standard Exit such that it complies with and is UL Listed under the FTBR Category. This option should only be used for exits which are intended to be connected simultaneously to normal and emergency power circuits. Both circuits have universal 120/277 VAC standard.

Self Diagnostics Option (Self Powered Only)
- The self-diagnostic unit will automatically perform all tests required by UL924, and NFPA 101. The system indicates the status of the exit at all times using the LED indicator near the test switch on the side of the unit. A 90 minute battery power (emergency mode) simulation test will occur randomly once every 12 months. A 30 second battery power simulation test will occur every 30 days.

Photocell Test Switch
- Allows verification of proper operation of the transfer circuit and emergency lamps with a laser pointer (laser is sold as an accessory). The emergency lamps will test for 30 seconds when activated.

Warranty
- All Sure-Lites' products are backed by a firm five-year warranty against defects in material and workmanship. Maintenance-free, long-life, sealed nickel cadmium batteries carry a seven-year pro-rata warranty.

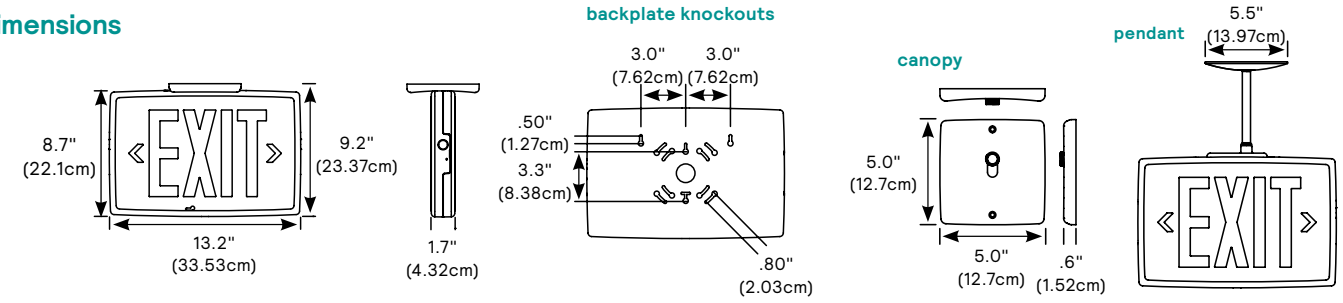
- Five full year warranty on electronics and unit.

options

- **2CKT1** – Available on AC only configured models to accommodate inputs from a normally on circuit and an AC emergency circuit from a generator or emergency inverter circuit limited to 120 VAC circuits.
- **2CKT2** – Available on AC only configured models to accommodate inputs from a normally on circuit and an AC emergency circuit from a generator or emergency inverter circuit limited to 277 VAC circuits.
- **BF** – This option enables the exit sign to buzz and flash together when the sign is operating under battery power. The buzzer and flashing rate is an approximate 50% duty cycle.
- **BZ** – This option enables the exit sign to buzz when the sign is operating under battery power. The buzzer rate is an approximate 50% duty cycle.
- **DC** – The DC option is reserved for AC only configured models and accommodates wiring to a remote emergency battery unit. The DC input is not polarity sensitive and accepts 12 to 48 VDC from a remote source.
- **DL** – Damp location listed products include various levels of corrosion protection on printed circuit board assemblies and other metallic parts. Environmental testing throughout a range of ambient temperature and 88% relative humidity.
- **EX** – The special input transformer option allows for input voltage and frequencies beyond the standard 120/277 VAC, 60 Hz input.
- **FA** – This option provides a two-wire harness for the electrical connection to the fire control panel. Should the fire panel activate an alarm, the exit sign will flash at a rate of approximately 50% duty cycle.
- **FL** – This option causes the exit sign to flash when the sign is operating under battery power. The flashing rate is approximately a 50% duty cycle.
- **TP** – The tamper proof option provides torx T15 hardware with center pin reject and the bit required to secure and access the equipment for future servicing.
- **ICT** – The self-testing option enables a periodic self-test of the equipment where a test routine is established to perform a one-minute test every thirty days with a 30-minute test performed on the sixth and twelfth month in accordance with NFPA 101. Equipment readiness faults are indicated with a visual LED display.
- **ICTA** – The audible self-testing option enables a periodic self-test of the equipment where a test routine is established to perform a one-minute test every thirty days with a 30-minute test performed on the sixth and twelfth month in accordance with NFPA 101. Equipment readiness faults are indicated with a visual LED display and an audible alarm.
- **BAC** – This option meets the requirements of the Buy American Act of 1933 (BAA).

dimensions



Buy American Act of 1933 (BAA):

This product is manufactured in one of our US factories and, as of the date of this document, this product was considered a commercially available off-the-shelf (COTS) item meeting the requirements of the BAA. This BAA designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies. Prior to ordering, please visit www.signify.com/baa to view a current list of BAA-compliant products to confirm this product's current compliance.

Sure-Lites

DESCRIPTION

The Sure-Lites emergency series (SEL) is a UL 924 code compliant LED solution that provides from 25 feet to 60 feet of emergency egress coverage for a minimum of 90 minutes during a power outage. Key features include a polycarbonate housing, long life LED source, a no maintenance nickel cadmium battery, proprietary adjustable accuLED optics, and a labor savings self-diagnostic option that automatically performs required NFPA testing. Remote capable options providing from 4 watts to 10 watts are available which can power the SRP/SRM/SRPA remotes providing maximum design flexibility for both indoor and outdoor applications. The Patented external battery disconnect and easy hang features reduce installation time and cost.

SPECIFICATION FEATURES

ELECTRICAL

- Dual Voltage Input 120/277 VAC, 60Hz
- External Battery Disconnect
- Brownout circuit
- Low-voltage disconnect
- Overload / Short Circuit protection
- 4.8V Battery back-up
- Self-diagnostic option
- Laser test capability (self-diagnostic option)

HOUSING CONSTRUCTION

- Components injection molded, color stable, high impact polycarbonate
- White or black textured finish
- Black only available with self-diagnostic
- EZ Hang feature facilitates fast installation
- Suitable for ceiling, pendant or wall mount applications
- Universal J-box mounting pattern
- Keyhole mounting slots
- Aesthetically designed with thin profile
- Heads available in circular or square shape for SEL25 and SEL50

BATTERY

- Sealed Nickel Cadmium
- Full Recharge Time, 24 hours (max.)
- 0° to 40 °C (32 °F to 104 °F)

WARRANTY

- Five-year warranty
- Prorated five-year battery warranty

CODE COMPLIANCE

- UL924 Listed
- Damp Location
- Life Safety NFPA 101
- NEC/OSHA
- Most State & Local Codes
- California Energy Code

HOW TO SPECIFY

Sure-lites LED emergency light with nickel cadmium battery, external battery disconnect, and adjustable optics.

***The "Rule of Thumb" spacing guidelines are designed to achieve 1 foot-candle average and 0.1 foot-candle minimum with a 40:1 maximum/minimum ratio. The corridor used is 100 feet long, 9 foot ceiling with a 6 foot wide walkway and 3 foot path of egress. The reflectances are 80% ceiling, 50% walls and 20% floors. The fixture mounting height is 7.5 feet. Cooper Lighting Solutions assumes no responsibility for local requirements or specific project variables. This is a guideline to be used as a design aid, not as guarantee of any code compliance.

TECHNICAL DATA

Mechanical Housing
All components are injection molded with a color stable, high impact thermoplastic resin. The surface is textured to improve aesthetic appearance. The housing construction is designed with snap-fit components and reinforcement ribs to provide maximum strength at minimum installation effort. The mounting hole pattern is universal to junction box requirements and is suitable for both wall and ceiling mount applications.

EZ Key – External Power Disconnect
Prevents the battery from cycling during the construction phase and ensures battery is not drained from power cycling.

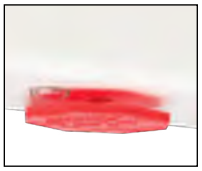
EZ Hang – Mounting Feature
The hands-free EZ Hang feature allows the installer to hang the emergency light face from the back plate in order to easily and efficiently make the power connections.

Self-Diagnostics
The self-diagnostic software will automatically perform all tests required by UL924, and NFPA101and will systematically calibrate itself in the field; thus reducing installation labor and eliminating manual calibration errors. The system indicates the status of the emergency light at all times using the LED indicator. A 90 minute battery power (emergency mode) simulation test will occur once every 12 months. A 30 second battery power simulation test will occur every 30 days.
The Solid-State microprocessor based system has the ability to accurately detect and warn of system failures, plus it incorporates all of the standard electronic features that sets Sure-Lites apart from its competition.

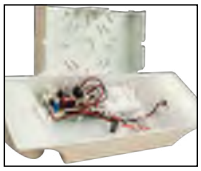
Low-Voltage Disconnect
The low-voltage circuitry disconnects the lighting load to protect the battery after run times in excess of the 90 minute UL limit. The disconnect remains in effect until normal utility power is restored preventing deep battery discharge.

Brownout Circuit
The brownout circuit on the SEL emergency light monitors the flow of AC current to the unit and activates the emergency light heads when a predetermined reduction of AC power occurs.

Warranty
SEL units are backed by a five-year warranty on the fixtures.



EZ Key



EZ Hang

SELF-DIAGNOSTIC TESTING OPERATIONS

The Sure-Lites Self-Diagnostics is continuously monitoring your emergency fixture, and will signal any failure through the 3 color indicator LED.

Initial Operation:
When the unit is first powered up it will go into a 24 hour fast charge and the indicator LED will pulse green. Once the unit has fully charged it will perform a self calibration. After self calibration, the LED will change to steady green indicating the unit is fully charged and float charging the battery to maintain readiness.

Automatic Testing:
The unit will perform a battery capacity, lamp/LED, and charge circuit test every 30 days for 30 seconds. During this time, the indicator LED will change to a steady yellow. It will perform a full battery capacity (90 minute) test once per year. During this time, the indicator LED will change to a blinking yellow.

Manual Testing:
- 10 Second "Installation" test – Press and release the test button once during fast charge (blinking green) to initiate a 10 second quick test. The sign will switch to emergency mode for 10 seconds allowing the installer to verify proper installation of the unit, and the LED indicator will turn solid yellow.
- 30 Second Test - Press and release the test button once during float charge (steady green). The indicator LED will turn steady yellow to indicate the unit is performing a 30 second test of the batteries and lamps/LEDs.
- 90 Minute Test - Press and release the test button a second time during a 30 second test (steady yellow) to change to a 90 minute test. During this test, the LED indicator will change to blinking yellow, and the circuit will perform a full battery capacity, charge circuit, and LED test.
- Canceling Test – Press and release the test button during the 90 minute test (flashing yellow) to return the fixture to its original state (fast charge or float charge)

Laser Test:
The SEL SD products are equipped with a Laser Test function that allows the unit to be manually tested without the need to physically press the test button. Shining a laser pointer in the hole marked "LASER TEST" on the bottom of the unit has the same effect as a press and release of the test button.

Clearing Failure Codes:
- A battery failure (LED two blink red) can be cleared by replacing the battery. Disconnecting the battery and AC power, or performing a full 90 minute discharge will reset the error code, however, it will return if the battery is faulty
- Charge Circuit (LED three blink red) and lamp/LED failure (LED four blink red) will clear when the unit successfully passes a manual or automatic 30 second test.

Sure-Lites

SELF-DIAGNOSTIC TESTING OPERATIONS

Indicators:
- LED Off - No power to unit, emergency mode.
- LED Steady Green - Unit is fully charged and is float charging the battery to maintain readiness.
- LED Green Pulse - Unit is in a 24 hour fast charge of the battery.
- LED Two Blink Red - Battery has failed a capacity test, or the battery is disconnected. See “Clearing Failure Codes” above.
- LED Three Blink Red - Battery charge circuit has failed. See “Clearing Failure Codes” above.
- LED Four Blink Red - Lamps have burned out, or on an EXIT/Combo, 50% or more of the LEDs have failed. See “Clearing Failure Codes” above.
- LED Steady Yellow - 30 second test or 10 second quick test (Fast Charge only).
- LED Blinking Yellow - 90 minute test.

Maintenance:
None required. Replace the batteries as needed according to ambient conditions. However, we recommend that the equipment be tested regularly in accordance with local codes.

Lamps: Qty:

Notes:

The Chloride Compac emergency units were designed to complement the Compac exit/emergency family in looks and reliability. They allow for immediate and safe egress in low light situations and work in harmony within commercial and light industrial applications. The CLU2 two lamp head model can be adjusted to provide the optimum amount of illumination. The CLU3's center lamp head is stationary while the two side lamps can be adjusted for the perfect left and right angles. These units come standard with self-diagnostic/self-test features to assure that they are ready at any time.

Ordering guide

Example: CLU2NWTD

Series		Battery		Color		Options[1]	
		N					
CLU2	Compac LED emergency unit, 2 lamps	N	Nickel Metal Hydride battery	W	White finish	2R[2]	Remote capability
				B	Black finish	TD[3]	Time delay
						LX[4]	Laser testing
						LH[5]	Less lamp heads
						LS[6]	Less Self-test feature
CLU3	Compac LED emergency unit, 3 lamps	N	Nickel Metal Hydride battery	W	White finish	1R[7]	Remote capability
				B	Black finish	TD[3]	Time delay
						LX[4]	Laser testing

1. Optional features cannot be combined with other optional features
2. **CLU2** feeds 2 single or 1 dual LED remote unit
3. 15 minute delay
4. Performs a manual test up to 40ft from unit, See **RLT** accessory for laser tester
5. Available in white finish housing only, feeds 4 single or 2 dual LED remote lamp heads
6. Contains self-diagnostic electronics but does not perform the automatic monthly test. Available in white finish housing only
7. **CLU3** unit with the 1R option feeds 1 LED remote lamp head

Accessories (order separately)

- **WG5** - Wire guard (for CLC exit/unit combos mounted flat against the wall)
- **RLT** - Remote Laser Tester

CLU2/CLU3 Compac emergency unit

Codes and standards

- NFPA 70 (National Electric Code)
- NFPA 101 (Life Safety Code)
- ETL listed to Standard 924
- UL Listed for damp locations

Construction

- Wall or ceiling mounted
- UL 94 V-0.5VA Flame rated, UV stable thermoplastic housing
- Provisions for surface mounted conduit to top of wall mounted unit
- Back plate keyhole slots are easily removable knockouts for securing to single gang boxes, 3" J-boxes and 4" J-boxes

Installation

- Designed for wall or ceiling mount with a universal J-box pattern on back plate
- Surface conduit entry on top of housing in center of backplate
- **CLUx** unit mounts single gang boxes, 3" J-boxes and 4" J-boxes

Electronics

- 120/277VAC, 50-60Hz dual voltage selectable input
- Surge protected, solid state circuitry
- Charging systems are complete with low voltage disconnect (prevents deep discharge of battery), battery lockout (prevents discharge of battery during installation), and brownout protection

Power consumption

- **CLU2** 120V=0.036/277V=0.030
- **CLU3** 120V=0.055/277V=0.040

Lamps

- **CLU2** unit contains two - 2.2W adjustable LED lamp heads longlife LED lamp source head (5000K)
- **CLU3** unit contains three - 2.2W LED lamp heads longlife LED lamp source head (5000K) (two adjustable, one fixed)

Battery

- Maintenance-free sealed 7.2v Nickel Metal Hydride battery
- Manual test switch and LED light indicator
- Supplies emergency illumination for a minimum of 90 minutes
- Batteries have an approximated service life of 6 to 8 years at a operating temperature range of 10°C to 40°C (50°F to 104°F)

Remote capability

- **CLU2** emergency unit provides enough remote capability to supply DC power to 2 (**CLR1W**) LED remote lamps heads or 1 (**CLR2W**) dual LED remote lamp head.
- **CLU3** provides enough remote capability to feed one **CLR1W** LED remote lamp head.

Listings

- California Energy Commission, Title 20 compliant (Battery Charger)

Warranty

- Five year full warranty on unit.

Self-diagnostics/Self-test

The **CLU2/3** units contain self-diagnostic/self-test electronics as a standard feature. An automatic self-test is performed every month for 3 minutes, and a 30 minute self-test every six months. A manual test may also be performed at anytime by pressing the manual test button.

Manual testing:

Test button	Length of test
1 press	30 seconds
2 presses	3 minutes
3 presses	30 minutes
4 presses	90 minutes

Self-Diagnostic Red status indicator:

Indicator	Status
One blink	Battery is not connected
Two blinks	Battery voltage has dropped below acceptable value
Three blinks	Charger board circuit fault
Four blinks	Transfer fault
Five blinks	Lamp fault
Six blinks	Remote lamp head fault
Seven blinks	EXIT Led strip fault

The Self-diagnostic/self-test electronics meets the requirements of the National Electric Code and/or the National Fire Protection Association.

Product Specifications

Electrical

- **General Features**
- Field selected red and green sign capability standard on all units (units shipped red, field convert to green with supplied parts)
- Dual Voltage Input 120/277 VAC,60Hz
- **AC Only**
- Optional 2C (Two circuit, FTBR) available in 120/277 VAC in standard and emergency operation
- **Self Powered**
- Sure-Lites EZ Key patented external battery disconnect feature – prevents unnecessary battery drainage, saves on installation time
- Solid-state Voltage Limited Charger
- Brownout Circuit
- Low-Voltage Disconnect
- Test Switch/Power Indicator Light
- Standard 24 hour recharge time (max)
- Self-Diagnostic feature available as option

Housing Construction

- Die cast aluminum housing
- Die cast canopy included (for mounting convenience only
- no electrical components in canopy)
- Universal pattern knockouts on
- rear of single face housing for direct mounting to junction box
- Knockout provided on housing for surface attachment
- Exit can be universally mounted: ceiling, wall or end
- Choice of three finishes: black housing with brushed aluminum face, white housing with white face or black housing with black face
- NFPA 101 compliant knockout chevrons allow quick conversion to directional signs
- Single and double faced signs available, order separately

Code Compliance

- UL 924 Listed
- UL Damp Location (0-40° C)
- Life Safety NFPA 101
- NEC/OSHA
- Most State and Local Codes
- Suitable for Floor Proximity Installation
- UL Listed for 2C (FTBR)

Lamp Data

- AC LED: Red and green LED lamps provide uniform diffused illumination
- DC: Red and green LED DC lamps (Brighter in emergency mode)

Warranty

- Exit – 5 year
- Battery: 5-Year pro-rata

Technical Data

Lamps
- CX Series Exits use energy efficient, long life LED's to provide uniform diffuse illumination of the exit face. These red and green LEDs require no maintenance and consume less than one watt, on average.

Housing Construction
- Die cast aluminum with Brushed Aluminum face and black trim standard. Optional finishes include White and Black. NFPA 101 compliant knockout chevrons for easy conversion to directional sign. Universal pattern knockouts are in the back of the single face housing for direct mounting to junction box. Die cast aluminum alloy canopy included for universal mounting. Canopy is included for mounting convenience only–no electrical components in canopy.

Lens
- Lenses for the CX Series Exits are made from durable, impact resistant polycarbonate. All exit faces are designed with full 3/4" stroke snap-out or snap-in chevron directional indicators to insure maximum visibility and compliance with the latest codes. Units come with red lenses installed and green lenses included for field selectable red or green signs.

Sure-Lites EZ Key External Battery Disconnect (Self Powered Only)
- Patented technology that allows installers to externally control the battery connection. Better than line latching, allows installers to choose when the battery is connected so that it stays fresh longer. Allows battery to be disconnected after installation but before building is occupied, enabling emergency circuit to be shut down for power savings.

Brownout Circuit (Self Powered Only)
- The brownout circuit on Sure-Lites' exits monitors the flow of AC current to the exit and activates the emergency lighting system when a predetermined reduction of AC power occurs. This dip in voltage will cause most ballasted fixtures to extinguish causing loss of normal lighting even though a total power failure has not occurred.

Solid-State Transfer (Self Powered Only)
- The CX Series Exit incorporates solid-state switching which eliminates corroded and pitted contacts or mechanical failures associated with relays. The switching circuit is designed to detect a loss of AC voltage and automatically energizes the lamps using DC power. Upon restoration of AC power, the DC power will be disconnected and the charger will automatically recharge the battery.

Low Voltage Disconnect (Self Powered Only)
- When the battery's terminal voltage falls, the low-voltage circuitry disconnects the lighting load. The disconnect remains in effect until normal utility power is restored, preventing deep battery discharge.

Test Switch/Power Indicator Light (Self Powered Only)
- A test switch located on the side of the exit permits the activation of the emergency circuit for a complete operational systems check. The Power Indicator Light provides visual assurance that the AC power is on.

Sealed Nickel Cadmium Battery (Self Powered Only)
- Sure-Lites sealed nickel cadmium batteries are maintenance-free with a life expectancy of 15 years. The sealed rechargeable nickel cadmium battery offers high discharge rates and stable performance over a wide range of temperatures, from 0-40° C. The specially designed re-sealable vent automatically controls cell pressure, assuring safety and reliability. This battery is best suited for harsh ambient temperatures because the electrolyte is not active in the electrochemical process.

"2C" (AC Only)
- The "2C" Option enables the Exits to operate per the requirements of UL 924 when connected simultaneously to both normal and emergency power circuits (two circuit operation–UL Category FTBR–Emergency Lighting and Power Equipment). The "2C" Option alters the standard Exit such that it complies with and is UL Listed under the FTBR Category. This option should only be used for exits which are intended to be connected simultaneously to normal and emergency power circuits. Both circuits have universal 120/277 VAC standard.

Self Diagnostics Option (Self Powered Only)
- The self-diagnostic unit will automatically perform all tests required by UL924, and NFPA 101. The system indicates the status of the exit at all times using the LED indicator near the test switch on the side of the unit. A 90 minute battery power (emergency mode) simulation test will occur randomly once every 12 months. A 30 second battery power simulation test will occur every 30 days.

Photocell Test Switch
- Allows verification of proper operation of the transfer circuit and emergency lamps with a laser pointer (laser is sold as an accessory). The emergency lamps will test for 30 seconds when activated.

Warranty
- All Sure-Lites' products are backed by a firm five-year warranty against defects in material and workmanship. Maintenance-free, long-life, sealed nickel cadmium batteries carry a seven-year pro-rata warranty.

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	Recessed Direct Mount 4" downlight with matte white reflector and flange, diffuse lens. Wet Location.
Manufacturer	Cooper/Halo
Model	ML4DM10LSFL9FS1E-TL40R2GMW
Dimensions	4.25" dia
Finish	White
Lamp Type	LED
Trim	Round Lensed Pinhole
Lamp Kelvin	3000K
Reflector	NFL - 25° Narrow Flood
Voltage	120
Mount	Recessed
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1000
Finish	Matte White Flange Black Lens Frame
Lens/Shade	Clear diffuser
Lamp CRI	90+
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 83.7 Lamp Life/Fixture Life: 50,000 Fixture Input (Max. Watts): 9.4

Product Certification

Refer to ENERGY STAR® Certified Products List.
Can be used to comply with California Title 24 High Efficacy requirements.
Certified to California Appliance Efficiency Database under JA8.

Product Features

Top Product Features

- Field selectable 2700, 3000, 3500, 4000 or 5000K CCT, 90 CRI minimum
- Optional full spectrum color, 95 CRI minimum
- Optional warm dimming, field selectable 2700 – 1800 or 3000 – 1800K CCT ranges
- Field selectable 600, 800 or 1000 lumens
- Field interchangeable 25°, 40°, 55° or wall wash distribution patterns, ships with 40 degree installed
- Installs from below, does not require a recessed housing or junction box
- Remote driver / junction box
- 120V LE/TE phase cut or 120-277V 0-10V dimming to 5% with select controls

Order Information

SAMPLE ORDER NUMBER: **ML4DM10LSFL9FS1E - TL41RMW**

A complete luminaire consists of a fixture fitting + trim, order separately.

Fixture Fitting

Catalog Number	Description
ML4DM10LSFL9FS1E	4" Canless, Lumen Select(600/800/1000lms), 5CCT selectable, 90CRI, 40° optic, 120V, LE/TE 5% Dim
ML4DM10LSFL9FSE010	4" Canless, Lumen Select(600/800/1000lms), 5CCT selectable, 90CRI, 40° optic, 120-277V 0-10V 5% Dim
ML4DM08LSFL95FS1E	4" Canless, Lumen Select(400/600/800lms), 5CCT selectable, 95CRI, 40° optic, 120V LE/TE 5% Dim
ML4DM06FLD2W1E	4" Canless, 600lms, Selectable D2W, 90CRI, 40° optic 120V LE/TE 5% Dim

Accessories

Accessories
TIR4D25NFL = 25° narrow flood optic **TIR4D40FL** = 40° flood optic **TIR4D55WFL** = 55° wide flood optic **TIR4D25AWW** = 25° narrow flood asymmetric wall wash optic **TIR45MH12PK** = replacement media holder, package of 12 **L100 Series** = 2.0" lens and filters, see spec sheet **HL4RSMF** = 4" Mounting Frame (Round or Square)

Trims / Shielding / Flange Finish

Trims	Shielding	Flange Finish
TL40R = 3-1/2" conical reflector [8]	**2G** = Diffuse lens	**MW** = Matte white reflector and flange
TL41R = 2" round pinhole **TL42S** = 2" square pinhole	None	**MW**=Matte white flange **MB**=Matte black flange **BN**=Brushed nickel flange **ORB**=Oil rubbed bronze flange **GB**=German bronze flange **BCu**=Brushed copper flange
TL43R = 2" round lens pinhole **TL44S** = 2" square lens pinhole	**2G** = Diffuse lens	**MWWB** = Matte white flange, white lens frame **MWBB** = Matte white flange, black lens frame **MBBB** = Matte black flange, black lens frame **BNBB** = Brushed nickel flange, black lens frame **ORBBB** = Oil rubbed bronze flange, black lens frame **GBBB** = German bronze flange, black lens frame **BCuBB** = Brushed copper, black lens frame
TL45R = 2" round lens wall wash **TL46S** = 2" square lens wall wash	**6G** = Linear spread lens	**MWWB** = Matte white flange, white lens frame **MWBB** = Matte white flange, black lens frame
Notes (8) TL40R trim provides 1.15" lens regression to ML4 fixture.	**Notes**	**Notes**

Product Specifications

Housing
- Die cast aluminum housing provides passive thermal cooling achieving L70 at 50,000 hours in IC and non-IC applications
- Retention springs holds housing securely in 3/8" to 1-1/2" thick ceilings, can be removed for service or replacement
- Not suitable for 2x4 framing

Optional Mounting Frame
- Pre-galvanized steel mounting frame locates fixture fittings during electrical rough-in and provides cutout guidance for drywall contractor
- Provides attachment of remote driver / junction box

LED Array
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 90 CRI minimum, R9 greater than 50 and color accuracy within 3 SDCM at end points and 4 SDCM in the middle providing color accuracy and uniformity

VividTune
- Field selectable 2700, 3000, 3500, 4000 or 5000K CCT, factory set at 3000K CCT
- Optional full spectrum color, 95 CRI minimum with R1-R15 values ranging from 92 to 100, excellent TM-30 metrics; Rf ranging from 96-98 and Rg >98
- Field selectable 600, 800 and 1000 lumens

VividTune
- D2W™ dim-to-warm option shifts color temperature from 3000 to 1800 K CCT or 2700 to 1800 K CCT as fixture dims mimicking the black body dimming response of halogen or incandescent lamps

Trims
- Field interchangeable trims are available in 3-1/2" aperture conical and 2-inch round or square pinhole apertures
- Available in a broad range of painted or plated finishes, can be painted in the field to match any décor
- Magnetic attachment holds trim tightly to ceiling and minimizes light leaks
- Conical trim provides 1.15" lens regression to ML4 fixture.

Primary Optic
- Precision molded TIR optic organizes source flux into useful beams without stray lumens in the field
- Low glare, UGR < 17
- Two-piece construction with matte black mounting ring and polarized turn and lock mounting aligns optic to source and minimizes backlight in the housing
- Meets ENERGY STAR® color angular uniformity requirements, color deviation is typically less than 0.004 u' v'
- Available in narrow flood, flood, wide flood and asymmetric wall wash distributions, ships with flood optic factory installed, order alternate distributions or replacements separately

Media
- Integral media holder accepts (2) lens or louver 2" diameter 3.0mm thick color filters, lens or louvers
- Order media separately

Driver
- Integral 120V 60 Hz constant current driver provides noise free operation
- Continuous, flicker-free dimming from 100% to 5% with select leading or trailing edge 120V phase cut control
- Optional UNV 120-277V 50/60 Hz driver with 0 -10V analog dimming from 100% to 5%

Remote Driver / Junction Box
- Pre-galvanized steel driver/junction box with captive hinged junction box cover
- Listed for six #12 AWG 90° C splice conductors, two in, two out plus ground
- Two 1⁄2" conduit pry-outs
- Two Slide-N-Side™ non-metallic (NM) wire traps allow wiring outside the box
- Accepts NM cable types: 14-2, 14-3, 12-2, 12-3 (U.S.) and 14-2, 14-3, 12-2 (Canadian)
- Three 4-port push wire nuts with clear caps for quick and reliable mains voltage connections
- Integral mounting holes facilitate direct mounting to building structure or mounting frame

Compliance
- UL Certified US and Canada
- Damp and wet location listed, covered ceilings only and IP65, below the ceiling only with lens trims
- Airtight per ASTM-E283
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions per FCC 47CFR Part 15 consumer limits
- Contains no mercury or lead and RoHS compliant
- Photometric testing in accordance with IES LM-79-08
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11
- ENERGY STAR® certified, reference Certified Light Fixtures database
- Can be used for State of California Title 24 high efficacy LED compliance under JA8, reference Modernized Appliance Efficiency Database System (MAEDBS) for 2019 JA8 High Efficacy Lighting

Warranty
- Five-year limited warranty, consult
- website for details www.cooperlighting.com

Downlighting

LyteCaster LED 5"

L5 Downlights & Adjustables

ALR-029-SI

LyteCaster LED Downlights are ideal general purpose downlighting solution, providing comfortable, quality light. Available in new construction and remodeler frame with interchangeable light engine that is offered in two lumen packages. The downlight is wet location listed and comes in 3 standard option.

Location:
Cat.No:
Type:
Qty:
Notes:

Complete unit = Housing + Downlight or Adjustable Light Engine + Trim (order each separately)

Housing

example: L5R15AE1VB

Series	Lumens	Installation (all with AirSeal IC)	Dimming	Version
L5R		**A**	**Z10U**	**VB**
L5R LyteCaster 5" (for round and square configurations)	**10** 1000lm **15** 1500lm	**A** New Construction w/ Screws **AN** New Construction w/ Nails	**E1** Phase Control (ELV/TRIAC 120V) **Z10U** 0-10V (Universal 120-277V)	**VB** Version B
	10 1000lm **15** 1500lm	**R** Remodeler		

Downlight Light Engine

example: L5R15930VB

Series	Lumens	CRI/CCT	Finishes	Version
L5R		**930**		**VB**
L5R LyteCaster 5" round downlight (compatible with square trims)	**10** 1000lm **15** 1500lm	**927** 90 CRI / 2700K **930** 90 CRI / 3000K **935** 90 CRI / 3500K **940** 90 CRI / 4000K **950** 90 CRI / 5000K	**–** Specified with Trim below	**VB** Version B

Adjustable Light Engine

example: L5R15930WVB

Series	Lumens	CRI/CCT	Finishes	Version
L5RA				**VB**
L5RA Lytecaster 5" round adjustable (trim is integrated)	**10** 1000lm **15** 1500lm	**927** 90 CRI / 2700K **930** 90 CRI / 3000K **935** 90 CRI / 3500K **940** 90 CRI / 4000K **950** 90 CRI / 5000K	**W** White Reflector / White Flange (integral to light engine for adjustable, do not specify Trim seperately)	**VB** Version B

Trim (for downlights only)

example: L5RDW

Series	Style/Finish/Flange
L5R	**DD**
L5R LyteCaster 5" round downlight **L5S** LyteCaster 5" square downlight	**DD** Open Downlight / Clear Diffuse / White Flange **DW** Open Downlight / White Finish / White Flange **BW** Baffle Downlight / White Finish / White Flange

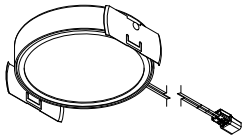
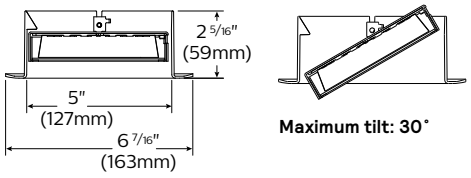
Light engine



Adjustable light engine/trim



Features

Housing: UL listed for direct contact with thermal insulation. Airseal® housing minimizes air leakage to less than 2 CFM at 1.57PSF (or 75PA), which complies with the International Energy Conservation Code, and Washington State Energy Code (Section 502.4). This reduces heat loss and condensation in ceiling.

Housing (new construction): .026" galvanized steel. Access door for inspection of junction box.

Housing (remodeler): .032" aluminum. Integral retaining spring secures housing to ceilings up to 2" thick. Removable for access to junction box and ceiling plenum. 5½" maximum for use in 2"x6" joist construction and shallow plenum applications.

Junction Box (new construction): 2½"x5⅜"x2" (27 cu. in) .032" galvanized steel. UL listed 90°C supply conductors. Rated for branch circuit wiring supplying connected luminaires (daisy chaining).

Junction Box (remodeler): 2½"x2½"x4⅛" (29 cu in.) .031" galvanized steel. UL listed for 90°C supply conductors. Rated for branch circuit wiring supplying connected luminaires.

Retaining clips: Permits fast and easy installation of light engine/trim.

Lower frame and top cover: .026" galvanized steel. Accommodates ceilings up to 1" (25mm) thick. Deep integral lip is ⅜" (9.5mm) with four notches at 90° apart to simplify alignment. Locks into position along length of mounting bars with locking screws.

Driver – ELV /Triac: 120V, 50/60Hz. RoHS compliant, Class 2 power supply. Complies with FCC rules per Title 47 Part 15 (Class B) for EMI/RFI (conducted & radiated). Class A sound rating.

Driver – 0-10V: 120/277V, 50/60Hz. RoHS compliant, Class 2 power supply. Complies with FCC rules per Title 47 Part 15 (Class A) for EMI/RFI (conducted & radiated). Class A sound rating.

Mounting bars: .059" galvanized steel. Bars pivot for easy attachment and wire-in below ceiling line. Bars extend to accommodate 16" (406mm) to 24" (610mm) O.C. joist spacing. Bars can accommodate 12" (305mm) O.C. joist spacing after a slight field modification (see Instruction sheet). Features integral self tapping phillips/square drive screws for secure attachment to wood or metal construction. Also available with integral nails. Attaches to T-bar ceilings without the need of accessories. Bars installed on shortest dimension of frame,but can be easily repositioned 90° from original position.

Ceiling cutout: 5½" (140mm).

ENERGY STAR®

Product family has ENERGY STAR® certification in all configurations.

Dimming Compatibility

See LED-DIM Specification Sheet.

Electrical

Lifetime: Expected lifetime 50,000 hours and backed by a 5-year warranty. (see Signify.com/warranties for details)

Labels

- cULus Listed Type I.C., frames are suitable for damp location and wet listed for use in covered ceilings.
- Trims are cULus suitable for damp location.
- Complies with Air Leakage.
- ENERGY STAR® certified.

L5R & L6S LyteCaster LED 5"

Round & Square downlights and Round adjustables (1000lm & 1500lm)

Light Engine

Components

1. **Retaining clips:** 29 gauge Stainless Steel, allows tool-less installation of light engine to trim.
2. **Engine housing:** (0.05") thick powder coated aluminum provides integrated thermal management allowing for a low profile at less than 3-1/2" tall.
3. **LED board:** High efficiency mid-flux LED's.
4. **Mixing chamber:** 98% reflective, highly diffuse film.
5. **Diffusion lens:** (0.06") thick acrylic opal lens provides an even source of illumination.
6. **Retaining ring:** (0.04") thick powder coated aluminum, secures module components.
7. **Reflector:** 30% glass reinforced injection molded polycarbonate is durable and provides a 70° cutoff to the source.

1. Correlated Color Temperature within specs as defined in ANSI_NEMA_ANSLG C78.377-2008: Specifications for the Chromaticity of Solid State Lighting Products.
2. Wattage controlled to within +/– 5%.

Note: Tested using absolute photometry as specified in LM79: IESNA Approved Method for the Electrical and Photometric Measurements of Solid-State Lighting Products.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	6" Aperture Down Light
Manufacturer	Cooper/Halo
Model	HC615D010-HM0525930-61MDH
Dimensions	7.75" dia trim flange, 4.6"H
Finish	Semi-specular clear
CSI #	265100 - Interior Lighting
Omniclass #	22 - 265100 - Interior Lighting
Lamp Type	LED
Dimming Type	0-10V analog 1%-100% dimming
Trim	Polished flange standard with Haze (H) reflectors
Lamp Kelvin	3000K
Reflector	Haze
Voltage	120-277V
Mount	Recessed
On Dimming System	Yes
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1235
Finish	Semi-specular clear (H)
Lamp CRI	90
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 102.3 lm/W Lamp Life/Fixture Life: 50,000 hours Fixture Input (Max. Watts): 13.7

Product Features

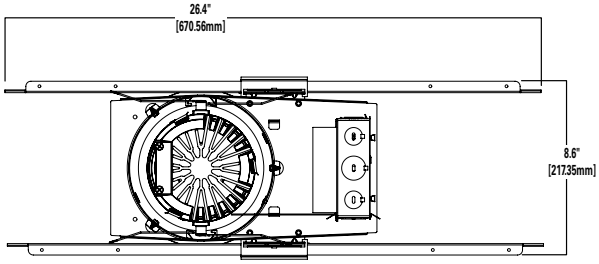
WaveLinx

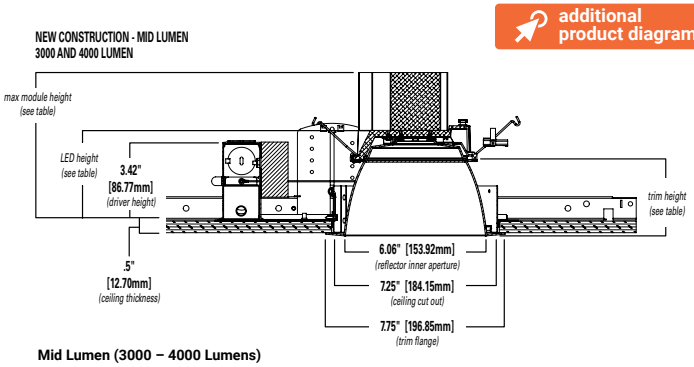
Top Product Features

- New construction/remodel series; 500 to 6,000 lumens
- Narrow, Medium and Wide distributions; Wall wash with rotatable linear spread lens
- 2700K, 3000K, 3500K, 4000K, 5000K CCT; 80 or 90 CRI
- Universal voltage 120V-277V; Standard 0-10V driver dims to 1%
- Mounting frame converts to remodel that installs from below the ceiling

Dimensional and Mounting Details

additional product diagrams





Mid Lumen (3000 – 4000 Lumens)

Distribution	Max. Module Height	Trim Height	LED Height
Narrow	6.6"	3.4"	3.8"
Medium	6.7"	3.5"	3.9"
Wide	6.5"	3.3"	3.7"
Baffle	6.5"	3.3"	3.7"

Order Information

Sample Number: HC620D010REM7 – HM60525835 - 61MDC

A complete luminaire consists of a housing frame, LED module, and reflector (ordered separately)

Mounting Frame	Lumens	Driver Options	Factory Installed Emergency & Connected Lighting Options	Accessories (Order & Install Separately)
HC6 = 6" new construction downlight housing **HC6CP** = 6" new construction housing, Chicago Plenum - CCEA compliant	**05** = 500 lm **07** = 750 lm **10** = 1000 lm **15** = 1500 lm **20** = 2000 lm **25** = 2500 lm **30** = 3000 lm **35** = 3500 lm **40** = 4000 lm **45** = 4500 lm (7) **50** = 5000 lm (7) **55** = 5500 lm (7) **60** = 6000 lm (7)	**D010**=UNV 120-277V, 50/60Hz, 0-10V 1%-100% dimming at 120-277V on 0-10V controls **Canada Option 500-5000 lumens:** **D010347** = 347VAC 50/60Hz 0-10V 1%-100% dimming. For 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000lm models only (1) **Canada Option 5500-6000 lumens:** **D010X347** = step down transformer factory installed (with standard "D010" 120V-277V LED driver). For 5500, 6000lm models only (1)	**REM7** = 7 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **REM14** = 14 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **IEM7** = 7 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **IEM14** = 14 watt emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **BOD7ST** = 7.5 watt Bodine self-test emergency battery pack with remote test / indicator light, use with D010 only (1) (2) (6) **WTA** = Factory WaveLinx Tilemount Sensor Kit (4) **WTK** = Factory WaveLinx Lite Commercial Tilemount Sensor Kit (5)	**HB128APK** = L channel hanger bar, 26", pair (replacement) **RMB22** = Adjustable wood joist mounting bars, pair, extend to 22" long **HSA6** = Slope Adapter for 6" Aperture Housings, Specify Slope (refer to instructions for installing housing and trim) **H347** = 347 to 120V step down transformer, 75VA **H347200** = 347 to 120V step down transformer, 200VA **WTA** = Field WaveLinx Tilemount Sensor Kit (4) **WTK** = Field WaveLinx Lite Commercial Tilemount Sensor Kit (5)
		DLV = Distributed Low Voltage driver 1%-100% dimming. DLV for use with DLVP system only. Refer to DLVP low-voltage power module and DLVP specifications for details. (1)	**REMV7** = 7 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6) **REMV14** = 14 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6) **IEMV7** = 7 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6) **IEMV14** = 14 watt emergency battery pack with remote test / indicator light, use with DLV only (1) (2) (3) (6)	
Notes	**Notes** (7) Marked Spacing: Center to Center of Adjacent Luminaires = 36" Center of Luminaire to Building Member = 18" Minimum overhead = 0.5	**Notes** (1) Not available with CP models	**Notes** (1) Not available with CP models (2) Not available with D010347 (347V models) (3) ULus for U.S. only (4) WTA = WaveLinx tile mount sensor kit for daylight dimming, PIR motion sensing, and optional RLTS - Real Time Location Services, use with D010 only (Refer to WaveLinx specifications) (5) WTK = WaveLinx Lite tile mount sensor kit for daylight dimming, PIR motion sensing, use with D010 only (Refer to WaveLinx Lite specifications) (6) Emergency battery backup options are Non-IC only, and rated for a minimum starting temperature of 0°C	**Notes** (4) WTA = WaveLinx tile mount sensor kit for daylight dimming, PIR motion sensing, and optional RLTS - Real Time Location Services, use with D010 only (Refer to WaveLinx specifications) (5) WTK = WaveLinx Lite tile mount sensor kit for daylight dimming, PIR motion sensing, use with D010 only (Refer to WaveLinx Lite specifications)

LED Module	Lumens	CRI/CCT	
HM6 = 6" LED Modules For use with HC6 - HC6CP New Construction housings only	**0525** = 500 - 2500 lumen **3040** = 3000-4000 lumen **4560** = 4500-6000 lumen	**827** = 80CRI, 2700K **830** = 80CRI, 3000K **835** = 80CRI, 3500K **840** = 80CRI, 4000K **850** = 80CRI, 5000K	**927** = 90CRI, 2700K **930** = 90CRI, 3000K **935** = 90CRI, 3500K **940** = 90CRI, 4000K **950** = 90CRI, 5000K
Notes	**Notes**	**Notes**	

Order Information

Reflector | Distribution | Finish | Flange | Accessories

Reflector	Distribution[8]	Finish	Flange	Accessories
61 = 6" conical reflector	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC **RWW** = rotatable wall wash with linear spread lens	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Baffle | Distribution | Finish | Flange | Accessories

Baffle	Distribution[8]	Finish	Flange	Accessories
61 = 6" baffle reflector	**WD** = wide 65° beam angle 1.28 SC (nominal) **RWW** = rotatable wall wash with linear spread lens	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option available with BB	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Reflector | Distribution | Finish | Flange | Integral Emergency

IEM Reflector	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM reflector for integral emergency only	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Baffle | Distribution | Finish | Flange | Integral Emergency

IEM Baffle	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM baffle reflector for integral emergency only	**WD** = wide 65° beam angle 1.28 SC (nominal)	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option with BB	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Reflector | Distribution | Finish | Flange

Reflector	Distribution[8]	Finish	Flange
61PS = 6" non-conductive polymer 'dead front' conical reflector Use with HM6PS0525* LED modules only[9]	**MD** = medium 60° beam angle 1.10 SC (nominal)	**W** = White	**Blank** = White flange standard with W reflector
Notes (9) 61PS is 1000-2000 lumens Non-IC rated. 500 & 750 lumens IC rated. 61PS is not for use over 2000lm in Non-IC or over 750lm in IC.	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**

Product Specifications

Housing Frame
- Boat shaped galvanized steel plaster frame with adjustable plaster lip
- Accommodates 1/2" to 1-1/2" thick ceilings
- Installs in new construction or from below the finished ceiling (non-accessible) for remodeling (with mounting bars removed)
- Provided with two remodel clips to secure the frame to the ceiling

Universal Mounting Bracket
- Adjusts 2" vertically from above and below the ceiling
- Use with the included mounting bars or with 1/2" Electric Metallic Tube (EMT)
- Removable to facilitate remodeling installation from below the finished ceiling

Mounting Bars
- Captive pre-installed No Fuss™ mounting bars lock to T-grid with screwdriver or pliers
- Centering detents allow for consistent positioning of fixtures

LED Module
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 80 or 90 color rendering index (CRI)
- Color accuracy within 3 SDCM provides color consistency and uniformity
- 90 CRI option: R9>50 (refer to chromaticity information for details)
- Available in 2700K, 3000K, 3500K, 4000K and 5000K correlated color temperature (CCT)
- Lumen options include 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumens (nominal)
- Passive thermal management achieves 60,000 hours at 70% lumen maintenance (L70) in insulated ceilings (IC) and non-IC applications
- Integral diffuse lens provides visual shielding
- Integral connector allows quick connection to housing flex

Reflector
- Self-flanged aluminum reflectors available in narrow, medium or wide distribution patterns
- Medium distribution polymer non-conductive matte white reflector may be used to meet local codes for 'dead front' applications (500 & 750 lumen max. in IC and 2000 lumen max. in Non-IC)
- Wall wash reflector features a rotatable linear spread lens for alignment of vertical illumination
- Reflectors attach to LED module with three speed clamps
- Available in multiple painted or plated finishes

Reflector/Module Retention
- Reflector/module assembly is securely retained in the housing with two torsion springs

Driver
- Field-replaceable constant current driver provides low noise operation
- Universal 120-277VAC 50/60Hz input standard
- Continuous, 1% to 100% dimming with 0-10V analog control
- Optional low-voltage DC driver for use with Distributed Low Voltage Power (DLVP) system
- Distributed Low Voltage Power (DLVP) system combines power, lighting and controls with ease of installation (refer to DLVP Design Guide at www.cooperlighting.com for details)

Canada Options
- 347VAC 50/60Hz; 1% dimming on 0 -10V analog control, for 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000 lumen models only
- 347V step down transformer factory installed with the standard "D010" 120V-277V, LED driver on 5500, 6000 lumen models only

Emergency Option
- Provides 90 minutes of standby lighting, meeting most life safety codes for egress lighting
- Available with integral or remote charge indicator and test switch
- Available Self-Test (self-diagnostic) with remote charge indicator and test switch

Connected Lighting System Options
Two WaveLinx connected systems to choose. Summary information provided below, refer to WaveLinx system specifications and application guides for details.

<u>WaveLinx System Tilemount Sensor Kit</u>
- WaveLinx WTA tile mount sensor kit offers daylight dimming, PIR motion sensing, scene and zone configuration, automatic commissioning; and optional RLTS - Real Time Location Services available.

<u>WaveLinx Lite System Tilemount Sensor Kit</u>
- WaveLinx Lite WTK tile mount sensor kit offers daylight dimming and PIR motion sensing, scene and grouping configuration.

<u>WaveLinx Tilemount Kits Application</u>
- The WTA and WTK tilemount kits include a control module mounted on the luminaire junction box via 1/2" knock-out, and a tilemount sensor on 54-inch whip; for ceiling installation by direct-mount spring clips or via mounting bracket in octagon ceiling boxes.
- The WTA and WTK tilemount kits may be ordered as factory installed on the luminaire, or ordered separately as a field installed accessory kit.

Junction Box
- Galvanized steel junction box
- 20 in^3 internal volume excluding voltage barrier
- 25 in^3 internal total volume
- Voltage barrier for 0-10V dimming wires (occupies one 1/2" pry-out space)
- Listed for eight #12 AWG (four in, four out) 90˚C conductors and feed-thru branch wiring
- Three 1/2" and two 3/4" trade size pry-outs available
- Three 4-port push wire nuts for mains voltage with 1-port for fixture connection

Compliance
- cULus Listed to UL 1598 / C22.2 No. 250.0, suitable for damp locations and wet locations in covered ceilings only
- Emergency options provided with UL Listed emergency drivers to UL 924 / C22.2 No. 141, suitable for indoor/damp locations
- IP20 - Above finished ceiling; IP65 - Below finished ceiling
- Non-Insulated ceiling (Non-IC) rated for 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumen models (insulation must be kept 3" from top and sides)
- Insulated ceiling (IC) rated for 500, 750, 1000, 1500, 2000 lumen models and suitable for direct contact with air permeable insulation* (IC models are also suitable for Non-IC installations)
- Non-IC marked spacing required for 4500, 5000, 5500, 6000 lumen models
  - Marked Spacing Center to Center of Adjacent Luminaires = 36"
  - Center of Luminaire to Building Member = 18"
  - Minimum overhead = 0.5"
- Airtight per ASTM-E283-04
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing completed in accordance of IES LM-79-08
- Lumen maintenance projection in accordance of IES LM-80-08 and TM-21-11
- 500, 750, 1,000, 1,500 and 2,000 lumen, 90 CRI, ICAT models may be used to comply with State of California Title 24 residential code, per JA8 certification standards
- May be used to comply with State of California Title 24 non-residential code as a dimmable LED luminaire
- ENERGY STAR® certified, reference certified light fixtures database

*Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013

Warranty
- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Minimum starting temperature -30°C (-22°F)* (Nominal input 120-277VAC & 100% of rated output power)
Sound Rating: Class A standards

Notes:
* Emergency Battery packs are rated for a minimum starting temperature of 0°C.

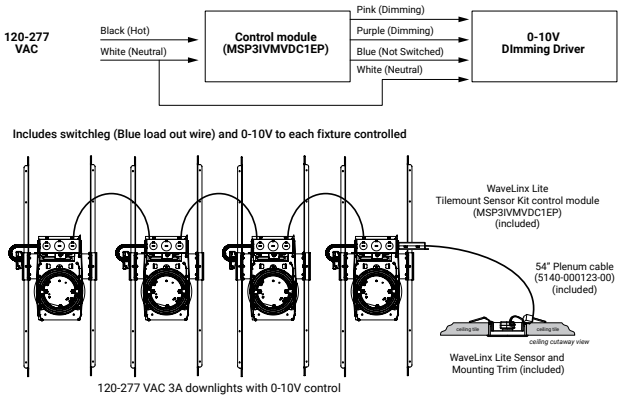
Connected Systems

WaveLinx Lite - WTK Tilemount Sensor

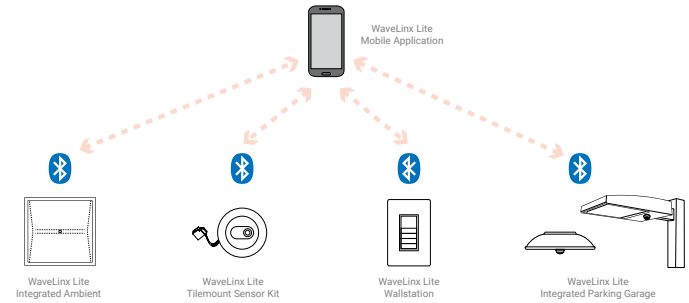
- Intuitive Android™ or Apple® iOS® app for basic system code compliant set up and configuration via Bluetooth
- Up to 28 unique areas per project site (WaveLinx Lite Bluetooth network)
- Up to 50 devices for an area, any one of 16 control zones, up to 6 occupancy sets, and custom lighting scenes
- Automatic occupancy or vacancy, sensor sensitivity, daylight dimming, etc. configurable through the app
- Refer to the WaveLinx system specifications for details

Device Security | Manual Dimmer | Occupancy Sensor | Daylighting Control | Manually Switched ON/OFF | Tuning Control | Lumen Maintenance Control | Scenes

WaveLinx Lite WTK Tilemount Wiring Diagram



WaveLinx Lite Bluetooth Enabled System



WaveLinx – WTA Tilemount Sensor

- WaveLinx functionality configures zones and customizes settings from one secure mobile app
- Automatic code commissioning that meets the strictest codes
- Fixtures and sensors integrate with Wireless Area Controller, Wall Stations, and Control Devices
- Stand-Alone Offices or Entire Building Network Installations

Downlights with tilemount sensor wireless communication
Highly efficient LED fixtures

Wireless Area Controller
Provides centralized coordination of multiple area control options

Wireless Wall Station/Receptacle
Provides customized wireless control of each area

Mobile Applications
Provides personalized, local control from a tablet or smartphone

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	6" Aperture Emergency Down Light
Manufacturer	Cooper/Halo
Model	HC615D010IEM7-HM0525930-61MDHIEM
Dimensions	7.755" W x 13"L x 4.6"H
Finish	Haze
CSI #	265100 Interior Lighting
Omniclass #	22 - 265100 Interior Lighting
Lamp Type	LED
Trim	Haze Trim and Flange
Lamp Kelvin	3000K
Reflector	Clear
Voltage	120-277V
Mount	Recessed
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1452
Finish	Clear
Lamp CRI	90+
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 102.3 Lamp Life/Fixture Life: 50000 Fixture Input (Max. Watts): 13.7

Product Certification

ENERGY STAR · Efficiency Standards T24 Can be used to comply with California Title 24 Non-Residential · FC · RoHS COMPLIANT · UL CERTIFIED

Product Features

WaveLinx

Top Product Features

- New construction/remodel series; 500 to 6,000 lumens
- Narrow, Medium and Wide distributions; Wall wash with rotatable linear spread lens
- 2700K, 3000K, 3500K, 4000K, 5000K CCT; 80 or 90 CRI
- Universal voltage 120V-277V; Standard 0-10V driver dims to 1%
- Mounting frame converts to remodel that installs from below the ceiling

Order Information

Reflector | Distribution | Finish | Flange | Accessories

Reflector	Distribution[8]	Finish	Flange	Accessories
61 = 6" conical reflector	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC **RWW** = rotatable wall wash with linear spread lens	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Baffle | Distribution | Finish | Flange | Accessories

Baffle	Distribution[8]	Finish	Flange	Accessories
61 = 6" baffle reflector	**WD** = wide 65° beam angle 1.28 SC (nominal) **RWW** = rotatable wall wash with linear spread lens	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option available with BB	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Reflector | Distribution | Finish | Flange | Integral Emergency

IEM Reflector	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM reflector for integral emergency only	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Baffle | Distribution | Finish | Flange | Integral Emergency

IEM Baffle	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM baffle reflector for integral emergency only	**WD** = wide 65° beam angle 1.28 SC (nominal)	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option with BB	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Reflector | Distribution | Finish | Flange

Reflector	Distribution[8]	Finish	Flange
61PS = 6" non-conductive polymer 'dead front' conical reflector Use with HM6PS0525* LED modules only[9]	**MD** = medium 60° beam angle 1.10 SC (nominal)	**W** = White	**Blank** = White flange standard with W reflector
Notes (9) 61PS is 1000-2000 lumens Non-IC rated. 500 & 750 lumens IC rated. 61PS is not for use over 2000lm in Non-IC or over 750lm in IC.	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**

Product Specifications

Housing Frame
- Boat shaped galvanized steel plaster frame with adjustable plaster lip
- Accommodates 1/2" to 1-1/2" thick ceilings
- Installs in new construction or from below the finished ceiling (non-accessible) for remodeling (with mounting bars removed)
- Provided with two remodel clips to secure the frame to the ceiling

Universal Mounting Bracket
- Adjusts 2" vertically from above and below the ceiling
- Use with the included mounting bars or with 1/2" Electric Metallic Tube (EMT)
- Removable to facilitate remodeling installation from below the finished ceiling

Mounting Bars
- Captive pre-installed No Fuss™ mounting bars lock to T-grid with screwdriver or pliers
- Centering detents allow for consistent positioning of fixtures

LED Module
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 80 or 90 color rendering index (CRI)
- Color accuracy within 3 SDCM provides color consistency and uniformity
- 90 CRI option: R9>50 (refer to chromaticity information for details)
- Available in 2700K, 3000K, 3500K, 4000K and 5000K correlated color temperature (CCT)
- Lumen options include 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumens (nominal)
- Passive thermal management achieves 60,000 hours at 70% lumen maintenance (L70) in insulated ceilings (IC) and non-IC applications
- Integral diffuse lens provides visual shielding
- Integral connector allows quick connection to housing flex

Reflector
- Self-flanged aluminum reflectors available in narrow, medium or wide distribution patterns
- Medium distribution polymer non-conductive matte white reflector may be used to meet local codes for 'dead front' applications (500 & 750 lumen max. in IC and 2000 lumen max. in Non-IC)
- Wall wash reflector features a rotatable linear spread lens for alignment of vertical illumination
- Reflectors attach to LED module with three speed clamps
- Available in multiple painted or plated finishes

Reflector/Module Retention
- Reflector/module assembly is securely retained in the housing with two torsion springs

Driver
- Field-replaceable constant current driver provides low noise operation
- Universal 120-277VAC 50/60Hz input standard
- Continuous, 1% to 100% dimming with 0-10V analog control
- Optional low-voltage DC driver for use with Distributed Low Voltage Power (DLVP) system
- Distributed Low Voltage Power (DLVP) system combines power, lighting and controls with ease of installation (refer to DLVP Design Guide at www.cooperlighting.com for details)

Canada Options
- 347VAC 50/60Hz; 1% dimming on 0 -10V analog control, for 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000 lumen models only
- 347V step down transformer factory installed with the standard "D010" 120V-277V, LED driver on 5500, 6000 lumen models only

Emergency Option
- Provides 90 minutes of standby lighting, meeting most life safety codes for egress lighting
- Available with integral or remote charge indicator and test switch
- Available Self-Test (self-diagnostic) with remote charge indicator and test switch

Connected Lighting System Options
Two WaveLinx connected systems to choose. Summary information provided below, refer to WaveLinx system specifications and application guides for details.

<u>WaveLinx System Tilemount Sensor Kit</u>
- WaveLinx WTA tile mount sensor kit offers daylight dimming, PIR motion sensing, scene and zone configuration, automatic commissioning; and optional RLTS - Real Time Location Services available.

<u>WaveLinx Lite System Tilemount Sensor Kit</u>
- WaveLinx Lite WTK tile mount sensor kit offers daylight dimming and PIR motion sensing, scene and grouping configuration.

<u>WaveLinx Tilemount Kits Application</u>
- The WTA and WTK tilemount kits include a control module mounted on the luminaire junction box via 1/2" knock-out, and a tilemount sensor on 54-inch whip; for ceiling installation by direct-mount spring clips or via mounting bracket in octagon ceiling boxes.
- The WTA and WTK tilemount kits may be ordered as factory installed on the luminaire, or ordered separately as a field installed accessory kit.

Junction Box
- Galvanized steel junction box
- 20 in^3 internal volume excluding voltage barrier
- 25 in^3 internal total volume
- Voltage barrier for 0-10V dimming wires (occupies one 1/2" pry-out space)
- Listed for eight #12 AWG (four in, four out) 90˚C conductors and feed-thru branch wiring
- Three 1/2" and two 3/4" trade size pry-outs available
- Three 4-port push wire nuts for mains voltage with 1-port for fixture connection

Compliance
- cULus Listed to UL 1598 / C22.2 No. 250.0, suitable for damp locations and wet locations in covered ceilings only
- Emergency options provided with UL Listed emergency drivers to UL 924 / C22.2 No. 141, suitable for indoor/damp locations
- IP20 - Above finished ceiling; IP65 - Below finished ceiling
- Non-Insulated ceiling (Non-IC) rated for 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumen models (insulation must be kept 3" from top and sides)
- Insulated ceiling (IC) rated for 500, 750, 1000, 1500, 2000 lumen models and suitable for direct contact with air permeable insulation* (IC models are also suitable for Non-IC installations)
- Non-IC marked spacing required for 4500, 5000, 5500, 6000 lumen models
  - Marked Spacing Center to Center of Adjacent Luminaires = 36"
  - Center of Luminaire to Building Member = 18"
  - Minimum overhead = 0.5"
- Airtight per ASTM-E283-04
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing completed in accordance of IES LM-79-08
- Lumen maintenance projection in accordance of IES LM-80-08 and TM-21-11
- 500, 750, 1,000, 1,500 and 2,000 lumen, 90 CRI, ICAT models may be used to comply with State of California Title 24 residential code, per JA8 certification standards
- May be used to comply with State of California Title 24 non-residential code as a dimmable LED luminaire
- ENERGY STAR® certified, reference certified light fixtures database

*Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013

Warranty
- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Surface Mount Fixture
Item Type	Surface Mount Downlight
Description	Downlight 8" Aperture - Surface Mount
Manufacturer	Cooper/Halo
Model	PR8S15D010MW-PR8M12WDMW- 3000K
Dimensions	3.5" H x 11-11/16"W
Finish	White
Lamp Type	LED
Trim	White
Lamp Kelvin	3000K
Voltage	120-277V
Mount	Surface Mount
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1591
Finish	White
Lens/Shade	Clear
Lamp CRI	82+
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 96.9 Lamp Life/Fixture Life: 50000 Fixture Input (Max. Watts): 15

SPECIAL INSTRUCTIONS

Block and plank installations surface mount to Jbox. Use at ceilings 10' high and below.

DESCRIPTION

Surface 8-inch shallow lens LED medium and wide distribution downlight is available in multiple lumen combinations. Choose between 3000K, 3500K and 4000K CCT in the field with seleCCTable™ technology. Suitable for commercial new construction or renovation work. Coordinated recessed versions are also available. Use for general area lighting where high efficiency and long life are required.

Catalog #	PR8S15D010MW-PR8M12WDMW-3000K	Type

SPECIFICATION FEATURES

Mechanical
Housing

- One piece spun aluminum surface mount housing is available in powder coat matte white and matte black and painted metallic silver finishes.
- May be used for new construction or renovation work.

Mounting

- Provided with mounting pattern for direct installation to 3-1/4"and 4" octagonal or 4" square junction box.

LED Module

- Self–flanged aluminum housing maximizes thermal performance.
- LED array uses a plurality of mid-power surface mount LED packages delivering high flux and excellent efficiency.
- Switch selectable 3000K, 3500K or 4000K CCT reduces ordering complexity and provides flexibility in the field.
- Color point accuracy within 3 SDCM and 80 CRI minimum provides color quality and uniformity.
- Passive thermal management achieves L70 at 50,000 hours.
- Integral connector allows quick connection during installation.

LED Module – Lens Optics

- Medium and wide beam interchangeable polymer lens pre-installed in LED module
- Optional field installed wall wash kit offers 360° rotation, allowing the housing to be installed in any orientation

Retention

- Module retained with two torsion springs holding the LED module tight to the housing.

Electrical
Driver

- Integral UNV 120 - 277V 50/60 Hz constant current driver provides noise free operation.
- Continuous, dimming from 100% to 1% using 0 -10V analog control.

Compliance

- cULus Listed/Classified, wet location labeled for covered ceilings.
- IP55 rated
- EMI/RFI emissions per FCC 47CFR Part 18 non-consumer limits.
- Contains no mercury or lead and RoHS compliant.
- Photometric testing in accordance with IES LM-79-08 and TM-30-15.
- Lumen maintenance projections in accordance with IES LM-80-08 and TM-21-11.
- Can be used to comply with California Title 24 Non-Residential Lighting Controls requirements as a LED Luminaire.
- ENERGY STAR® Certified. See energystar.gov website for current information.

Warranty

- Limited 5-year warranty, see website for details. www.cooperlighting.com/legal

ORDERING INFORMATION

CYLINDER SAMPLE NUMBER: PR8S40D010MW
A complete luminaire consists of a cylinder and LED module, order separately.

Frame	Lumens	Driver	Finish
PR8S = 8" aperture LED downlight surface mount cylinder	**10** = 1,000 lumens (nominal) **15** = 1,500 lumens (nominal) **20** = 2,000 lumens (nominal) **30** = 3,000 lumens (nominal) **40** = 4,000 lumens (nominal)	**D010** = 120-277V 50/60Hz, 0-10V 100% to 1% dimming	**MW** = Matte White **MB** = Matte Black **MMS** = Matte Metallic Silver

MODULE SAMPLE NUMBER: PR8M34MDMW
A complete luminaire consists of a frame and LED module, order separately.

LED Module	Shielding	Flange Finish
PR8M12 = Downlight LED module for PR8 series, provides 1000, 1500 or 2000 lumens (nominal) depending on connected frame type **PR8M34** = Downlight LED module for PR8 series, provides 3000 or 4000 lumens (nominal) depending on connected frame type	**MD** = Medium distribution plastic lens **WD** = Wide distribution plastic lens	**MW** = Matte White **MB** = Matte Black **MMS** = Matte Metallic Silver

Accessories
PR8WW = Field Installed wall wash optic for PR8M12 and PR834 modules **PR8MD** = Replacement 8" medium distribution lens for PR8M12 and PR8M34 modules **PR8WD** = Replacement 8" wide distribution lens for PR8M12 and PR8M34 modules

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Surface Mount Fixture
Item Type	Surface Mount Direct/Indirect Light
Description	Surface Mount stairwell light with integrated sensor
Manufacturer	Cooper/Metalux
Model	4SWLED-LD4-48HL-LWUNV- L835-CD2-SVPD1 Order (1) ISHH-01 Per project for onsite configuration. 100% on occupancy, 50% unoccupied or to program to meet local code requirements.
Dimensions	4-1/2"W x 52"L x 4-11/16"H
Finish	White
Lamp Type	LED
Trim	White
Lamp Kelvin	3500K
Reflector	Frosted Lens with Wide Distribution
Voltage	120-277V
Mount	Surface Mount
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4800
Finish	White
Lens/Shade	Frost
Lamp CRI	80+
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 105.9 Lamp Life/Fixture Life: 50000 Fixture Input (Max. Watts): 43.3

	Notes (9) DesignLights Consortium® Qualified and classified for both DLC Standard and DLC Premium, refer to www.designlights.org for details.	**Notes** (1) Nominal lumen output see table for performance values. (2) 2 ft. model. (3) Integral options only available in 4ft model.		**Notes** (8) 347V option – 60HL and above uses two drivers. (19) 347V listing in DLC is for standard 347V ONLY driver. No DLC listing for UNC.	**Notes** (3) Integral options only available in 4ft model. (4) With integral test switch/indicator/ laser test. For approximate delivered lumens multiply the lumens per watt of the desired fixture by the wattage of the emergency battery pack (100 lm/W x 7=700 lumens). IES-format photometry for luminaire under emergency operation available. (7) Integral EL battery pack is rated for 35°C. (11) Used to bypass local control during outage. Must be used in conjunction with UL 1008 device (provided by others). GTR2 option includes 2 relays on fixtures with dimming drivers. ETRD option only requires one relay when used on a dimming fixture. Must specify voltage as 120V or 277V when ordering these devices.

CCT | Driver Type | Number of Drivers | Integrated Sensing Systems | Packaging

CCT	Driver Type	Number of Drivers	Integrated Sensing Systems	Packaging

	Notes (12) SR driver compatible with LWI option only.	**Notes** (8) 347V option – 60HL and above uses two drivers.	**Notes** (5) For mounting heights up to 30 ft. (6) For mounting heights up to 12 ft. (10) For wall mount applications. (12) SR driver compatible with LWI option only. (14) Integral sensor works with CD and HCD driver and is factory prewired to the driver for stand-alone control. (15) LWT compatible with CD and HCD drivers only. (16) LWT sensor is external to luminaire, cable factory wired. (17)SW compatible with CD and HCD drivers only. (18) SW option must be used in conjunction with a Cooper Lighting Solutions control system. For complete Cooper Lighting Solutions wireless system solutions, visit www.cooperlighting.com Integrated options must be used in conjunction with the associated system and may not be compatible with other options or accessories. Please refer to the following: (A) Consult WaveLinx system pages for additional details and compatibility. (B) Consult LumaWatt Pro system pages for additional details and compatibility. (D) Consult SVPD series system pages for additional details and compatibility.

Metalux SWLED

Product Specifications

Construction
- Die formed cold rolled steel housing
- Decorative white opaque injection molded end plates
- Reflector/channel wireway cover secured by fasteners for easy access
- Numerous channel KO's for easy installation

Controls
- 0-10V dimming to 1% standard
- WaveLinx sensor compatible for IoT capability
- LumaWatt Pro sensor compatible for IoT capability
- SVPD sensor compatible for out of the box functionality
- DLVP sensor and driver compatible for low voltage applications
- DALI 2.0, Lutron, and stepdimming available

Electrical
- Long-life LED system with electrical driver for optimal performance
- Available in 3500K, 4000K, or 5000K with minimum 80 CRI
- TM21 rating up to L91> 60,000hours

Emergency Battery Pack Option
- Optional 120V-277V integral battery pack in 7w or 14w options
- 90 minute backup period
- Test swtich/indicator button with laser pointer testing feature for ground testing
- EZ Key system prevents accidental discharge during construction
- Emergency/Generator transfer options available

Finish
- High reflective post painted finish (PAF)
- Treated in multistage iron phosphate pretreatment

Shielding
- Three lens options available: LC (clear), LN (semi-frost with narrow distribution), and LW (full frost with wide distribution)
- Lens is held in place by removable injection molded white end caps

Installation
- Surface mount (www woo ceiling)
- Suspended mount

Compliance
- cULus listed for up to 40C ambient environments
- Damp location listed for ceiling and wall mounting
- Comply with IESNA LM-79 and LM-80 testing standards
- Suitable for use in clothes closets
- Recommended for use in stairwells when installed to NEC 410.16 spacing requirements
- Can be used for State of California Title 24 high
- efficacy luminare
- DesignLights Consortium Qualified and classified for both DLC Standard and DLC Premium

Control Systems

- WaveLinx
- DLVP
- LumaWatt Pro
- iLumin Plus
- VividTune

The SWLED with Integrated Sensor technology provides automatic energy savings without sacrificing performance. Traditionally, these types of energy savings required coordination between the luminaire and a lighting control system. The SWLED delivers superior lighting with integrated occupancy and daylighting controls.

Capture the benefits of traditional lighting controls, without complicated coverage planning or special wiring. Ideal for new construction or retrofit, the SWLED delivers automatic ON to an energy saving light level, while ensuring lighting is turned OFF when the space is unoccupied.

The integral daylight sensor reduces the need for special daylight zone planning. Each luminaire will automatically adjust the light level based on reflected light beneath the sensor in a closed loop method.

The integral sensor can be offered in both standalone (SVPD1) and networked (SWPD1, LWIPD1, and SLVPD1) for application versatility.

We make connections work

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	6" Aperture Down Light
Manufacturer	Signify/Lightolier
Model	LyteProfile 6RNU/ P6R DL15 930 CC P Z10 U
Dimensions	7.25" dia trim flange, 4.6"H
Finish	Comfort Clear
CSI #	265100 - Interior Lighting
Omniclass #	22 - 265100 - Interior Lighting
Lamp Type	LED
Dimming Type	0-10V analog 1%-100% dimming
Trim	Aperture Matching
Lamp Kelvin	3000K
Reflector	Comfort Clear
Voltage	120-277V
Mount	Recessed
On Dimming System	Yes
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1600
Finish	Comfort Clear
Lamp CRI	90
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 107.5 lm/W Lamp Life/Fixture Life: 50,000 hours Fixture Input (Max. Watts): 15

Downlighting

LyteProfile

P6R 6" Round Downlight & Wall Wash

ALR-030-SI

Project:
Location:
Cat.No:
Type:
Qty:
Notes:

LyteProfile downlights and wall washers provide a perfect balance of functionality with glare control. The robust and versatile UniFrame frame-in kit makes changes and updates easy to manage and install. Ideal for use in a variety of applications including open office, institutional, healthcare, and retail.

Standard luminaire = Frame + Engine/Trim + Accessories (optional)

Buy American Act of 1933 (BAA)** Compliant luminaire* = Frame-BAC + Engine/Trim-BAC

* BAA compliance requires that BAC option be selected for each of frame and engine/trim. Frame and engine/trim will be ordered/shipped together (ex: 4RN-BAC-Z4RDL20835WOCDZ10U-BAC). Accessories (optional) are not currently BAA-compliant.

Frame

Standard example: 6RN | BAC example: 6RN-BAC

Accessories (Not currently BAA-compliant - learn more on page 2)

SBA	Interact Ready System Bridge Accessory with integral occupancy and daylight sensor (compatible with all 0-10V options, see SBA spec sheet)[7]
CAEM6	Field installable Bodine BSL6 6W battery pack with self-test/self-diagnostic for use with new construction frames, 120-277V
7925	6" sloped ceiling adapter (refer to SCA spec sheet for slope options)
AMS	ActiLume multi-sensor (optional accessory for PoE configurations)

1. Universal 120-347V is for 0-10v (Z10) dimming configurations only. For 347V non-Z10 dimming, order 347V (3) frame with (U) light engine/trim.
2. Emergency (EM6) frame is compatible with reflector mounted test switch when light engine is ordered with IEM6 option code (not compatible with 347V or Power over Ethernet configurations).
3. Interact Pro (RADIO) requires above ceiling access.
4. Shower light (SL) in only available with White (WH) reflector finish.
5. Specify standard UNV frame for use with 347V light engines
6. The 347V light engine voltage option is only available with Z10 dimming option. For other dimming protocols order UNV (U) light engine and 347V (3) frame.
7. Requires IRT9015 IR remote and Interact Pro App for commissioning.
8. IEM6 option available on DL style only.

** Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.

P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Features

Optics

- Provides a 60° cutoff (physical and reflected)
- Wide beam distribution for general illumination
- Spun and anodized reflectors available in specular (clear), semi-specular (comfort clear and diffuse finishes. Also available in white and black painted finishes.

Quality of light

- Consult factory for RAL finishes
- Color consistency: 3 SDCM
- 80 CRI minimum

Construction (New Construction)

- Galvanized stamped steal for dry / plaster ceilings.
- Pre-installed telescoping mounting bars (13"-24")
- Frame accommodates C- channel, black iron, and 3/4" EMT for mounting distances greater than 24" between joists.
- Manufactured from 20 gage galvanized steel construction with rolled edge aperture to guide cutting tools for perfect hole cutting.

Max ceiling thickness is 2" (51 mm). Including PoE frame 4.88" (124 mm).

Patented install Mounting frame

- Pre-installed mounting bars allow for fast and tool-less install into T-grid & hat channel ceilings
- Close-cut aperture design eliminates an undesired gap between ceiling material and reflector.
- Simple plug-and-play connection between frame and light engine from below the ceiling allows for:
  - Easy upgrades
  - Technology changes
  - Repairs and troubleshooting

Dimming

- Advance 0-10V 1% dimming
- Lutron Hi-lume EcoSystem H Series 1% dimming
- EldoLED ECOdrive Dali 1% dimming
- EldoLED SOLOdrive 0-10V 0.1% dimming
- EldoLED DMX POWERdrive

Light engine

Quick connect power pack allow for easy installation and replacement from below ceiling with no need for additional wiring. This allows for:

- Frame and ceiling installation to be performed while still finalizing details such as lumen packages, CCT and control type.
- Easy replacement of electronics at end of life with minimal wasted material and labor required.
- Ease and upgradability of technology.
- Lumen Maintenance: L80 at 60,000 hours.
- 347V light engines are 0-10v dimming only and include dedicated 347V driver for use with universal 120/277/347V (U) frames. For 347V and non-0-10v dimming, order (U) light engine and 347V (3) frame (includes step down transformer).

Emergency

Bodine BSL6 6W battery pack with self-test/ diagnostic functionality. Factory or field mounted to frame.

- For trim with integral emergency test switch, order light engine with IEM6 option (ex: P6RDL20835CDZ10UIEM6). DL or SL styles only.
- For remote ceiling mounted test switch, order standard light engine (ex: P6RDL20835CDZ10U). Optional accessory ceiling mounting plate available (CAEM6TSCP) for remote mounted test switch.
- Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

Retrofit

- Easily updates legacy LyteProfile LED downlights to the latest technology. Includes light engine, trim, and driver mounted on cover plate that mounts to previous generations of LyteProfile LED luminaires. Order with R option code at end of light engine/trim catalog number.

Power over Ethernet

Powered via Philips PoE lighting controller: complies with FCC rules per Title 47 part 15 (Class A) for EMI / RFI (conducted & radiated). PoE lighting controller accessible from below ceiling.

Options and Accessories

Sloped ceilings: Compatible with sloped ceiling adapters (see SCA spec sheet).

Field Installed Emergency: Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

CAEM6: Field install EM6 kit with Bodine BSL6 6W battery pack with self-test/self-diagnostic, mounts to new construction frames. Includes remote ceiling plate for test switch. To mount test switch to trim for new construction frame, order light engine with IEM6 option code (e.g. P6RDL20835CDZ10UIEM6).

CAEM6TSCP: Ceiling cover plate for remote mounted EM6 test switch. 1/2" (25mm) hole, 4 3/8" (109mm) x 2 3/4" (69mm) rectangular. Includes two mounting screws.

ENERGY STAR® exceptions

- 500lm configurations
- Black finishes
- PoE drivers

Labels and Listings

- ENERGY STAR® certified
- RoHS certified

Warranty

5 year limited warranty

Visit Signify.com/warranties for more information on Signify's standard 5-year limited warranty on complete luminaire systems.

Finishes

Specular clear

Most specular and therefore most efficient finish, delivers maximum photometric performance but can produce a mirror image effect of the interior space.

Comfort clear

Semi-specular finish that softens the light at the source of the reflector and creates a subtle, even luminance from the reflector cone.

Comfort clear diffuse

Slightly diffuse clear finish, which eliminates iridescence and reduces the mirror image effect inherent with a specular finish.

White

Brightest aperture when illuminated and provides the smoothest transition to most ceilings when off (white is only available with a white flange).

Black

Specular finish that provides the lowest aperture brightness possible and reduces source identification in a ceiling significantly (black is only available with a black flange).

Round Downlight & Lensed Wall Wash

Wireless Controls Options

Interact Pro scalable sensor (System Bridge Accessory with -CS option):

- CS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
- Compatible with:
  - UID8451/10 wireless dimmer switch
  - SWS200 wireless scene switch
  - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
  - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
  - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
  - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem.

Interact Pro Enterprise (System Bridge Accessory with -SB option):

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- SB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Emergency Options (ER100) (System Bridge Accessory with -ER100 option):

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

Radio only sensor (RADIO):

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Wired Controls Options

Interact Office Wired (PoE):

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on Personal Control, Space Management, wayfinding, room/desk reservation and offers open APIs for light control and data exchange.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output.
- Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information on Interact Office Wired, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Interact Office Wired (PoE), Static White:

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible Zigbee Green Power wall dimmer and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on wayfinding, room/desk reservation and offers open APIs
- Requires compatible Interact Office Gateway and internet connectivity for commissioning.
- For more information on Interact Office Wireless, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	6" Aperture Emergency Downlight
Manufacturer	Signify/Lightolier
Model	LyteProfile 6RN / P6R DL 20 930 CC P Z10 IEM6
Dimensions	10.5" W x 12.4"L x 7.3"H
Finish	Clear
CSI #	265100 - Interior Lighting
Omniclass #	22 - 265100 - Interior Lighting
Lamp Type	LED
Trim	Clear Matching
Lamp Kelvin	3000K
Reflector	Clear
Voltage	120-277V
Mount	Recessed
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1500
Finish	Clear
Lamp CRI	80+
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 107.5 Lamp Life/Fixture Life: 50,000 hours Fixture Input (Max. Watts): 15

LyteProfile

P6R 6" Round Downlight & Wall Wash

ALR-030-SI-A1

Project:
Location:
Cat.No:
Type:
Qty:
Notes:

LyteProfile downlights and wall washers provide a perfect balance of functionality with glare control. The robust and versatile UniFrame frame-in kit makes changes and updates easy to manage and install. Ideal for use in a variety of applications including open office, institutional, healthcare, and retail.

Standard luminaire = Frame + Engine/Trim + Accessories (optional)

Buy American Act of 1933 (BAA)** Compliant luminaire* = Frame-BAC + Engine/Trim-BAC

* BAA compliance requires that BAC option be selected for each of frame and engine/trim. Frame and engine/trim will be ordered/shipped together (ex: 4RN-BAC-Z4RDL20835WOCDZ10U-BAC). Accessories (optional) are not currently BAA-compliant.

Frame

Standard example: 6RN | BAC example: 6RN-BAC

						Only compatible with 1000 (10) to 2500 (25) lumen configurations		

Accessories (Not currently BAA-compliant - learn more on page 2)

SBA	Interact Ready System Bridge Accessory with integral occupancy and daylight sensor (compatible with all 0-10V options, see SBA spec sheet)[7]
CAEM6	Field installable Bodine BSL6 6W battery pack with self-test/self-diagnostic for use with new construction frames, 120-277V
7925	6" sloped ceiling adapter (refer to SCA spec sheet for slope options)
AMS	ActiLume multi-sensor (optional accessory for PoE configurations)

1. Universal 120-347V is for 0-10v (Z10) dimming configurations only. For 347V non-Z10 dimming, order 347V (3) frame with (U) light engine/trim.
2. Emergency (EM6) frame is compatible with reflector mounted test switch when light engine is ordered with IEM6 option code (not compatible with 347V or Power over Ethernet configurations).
3. Interact Pro (RADIO) requires above ceiling access.
4. Shower light (SL) in only available with White (WH) reflector finish.
5. Specify standard UNV frame for use with 347V light engines
6. The 347V light engine voltage option is only available with Z10 dimming option. For other dimming protocols order UNV (U) light engine and 347V (3) frame.
7. Requires IRT9015 IR remote and Interact Pro App for commissioning.
8. IEM6 option available on DL style only.

** Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.

P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Features

Optics

- Provides a 60° cutoff (physical and reflected)
- Wide beam distribution for general illumination
- Spun and anodized reflectors available in specular (clear), semi-specular (comfort clear and diffuse finishes. Also available in white and black painted finishes.

Quality of light

- Consult factory for RAL finishes
- Color consistency: 3 SDCM
- 80 CRI minimum

Construction (New Construction)

- Galvanized stamped steal for dry / plaster ceilings.
- Pre-installed telescoping mounting bars (13"-24")
- Frame accommodates C- channel, black iron, and 3/4" EMT for mounting distances greater than 24" between joists.
- Manufactured from 20 gage galvanized steel construction with rolled edge aperture to guide cutting tools for perfect hole cutting.

Max ceiling thickness is 2" (51 mm). Including PoE frame 4.88" (124 mm).

Patented install Mounting frame

- Pre-installed mounting bars allow for fast and tool-less install into T-grid & hat channel ceilings
- Close-cut aperture design eliminates an undesired gap between ceiling material and reflector.
- Simple plug-and-play connection between frame and light engine from below the ceiling allows for:
  - Easy upgrades
  - Technology changes
  - Repairs and troubleshooting

Dimming

- Advance 0-10V 1% dimming
- Lutron Hi-lume EcoSystem H Series 1% dimming
- EldoLED ECOdrive Dali 1% dimming
- EldoLED SOLOdrive 0-10V 0.1% dimming
- EldoLED DMX POWERdrive

Light engine

Quick connect power pack allow for easy installation and replacement from below ceiling with no need for additional wiring. This allows for:

- Frame and ceiling installation to be performed while still finalizing details such as lumen packages, CCT and control type.
- Easy replacement of electronics at end of life with minimal wasted material and labor required.
- Ease and upgradability of technology.
- Lumen Maintenance: L80 at 60,000 hours.
- 347V light engines are 0-10v dimming only and include dedicated 347V driver for use with universal 120/277/347V (U) frames. For 347V and non-0-10v dimming, order (U) light engine and 347V (3) frame (includes step down transformer).

Emergency

Bodine BSL6 6W battery pack with self-test/ diagnostic functionality. Factory or field mounted to frame.

- For trim with integral emergency test switch, order light engine with IEM6 option (ex: P6RDL20835CDZ10UIEM6). DL or SL styles only.
- For remote ceiling mounted test switch, order standard light engine (ex: P6RDL20835CDZ10U). Optional accessory ceiling mounting plate available (CAEM6TSCP) for remote mounted test switch.
- Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

Retrofit

- Easily updates legacy LyteProfile LED downlights to the latest technology. Includes light engine, trim, and driver mounted on cover plate that mounts to previous generations of LyteProfile LED luminaires. Order with R option code at end of light engine/trim catalog number.

Power over Ethernet

Powered via Philips PoE lighting controller: complies with FCC rules per Title 47 part 15 (Class A) for EMI / RFI (conducted & radiated). PoE lighting controller accessible from below ceiling.

Options and Accessories

Sloped ceilings: Compatible with sloped ceiling adapters (see SCA spec sheet).

Field Installed Emergency: Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

CAEM6: Field install EM6 kit with Bodine BSL6 6W battery pack with self-test/self-diagnostic, mounts to new construction frames. Includes remote ceiling plate for test switch. To mount test switch to trim for new construction frame, order light engine with IEM6 option code (e.g. P6RDL20835CDZ10UIEM6).

CAEM6TSCP: Ceiling cover plate for remote mounted EM6 test switch. 1/2" (25mm) hole, 4 3/8" (109mm) x 2 3/4" (69mm) rectangular. Includes two mounting screws.

ENERGY STAR® exceptions

- 500lm configurations
- Black finishes
- PoE drivers

Labels and Listings

- cULus listed for wet locations
- CCEA (frames with *LC suffix)
- ENERGY STAR® certified
- RoHS certified

Warranty

5 year limited warranty

Visit Signify.com/warranties for more information on Signify's standard 5-year limited warranty on complete luminaire systems.

Finishes

Specular clear

Most specular and therefore most efficient finish, delivers maximum photometric performance but can produce a mirror image effect of the interior space.

Comfort clear

Semi-specular finish that softens the light at the source of the reflector and creates a subtle, even luminance from the reflector cone.

Comfort clear diffuse

Slightly diffuse clear finish, which eliminates iridescence and reduces the mirror image effect inherent with a specular finish.

White

Brightest aperture when illuminated and provides the smoothest transition to most ceilings when off (white is only available with a white flange).

Black

Specular finish that provides the lowest aperture brightness possible and reduces source identification in a ceiling significantly (black is only available with a black flange).

P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Wireless Controls Options

Interact Pro scalable sensor (System Bridge Accessory with -CS option):

- CS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
- Compatible with:
  - UID8451/10 wireless dimmer switch
  - SWS200 wireless scene switch
  - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
  - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
  - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
  - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem.

Interact Pro Enterprise (System Bridge Accessory with -SB option):

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- SB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Emergency Options (ER100) (System Bridge Accessory with -ER100 option):

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

Radio only sensor (RADIO):

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Wired Controls Options

Interact Office Wired (PoE):

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on Personal Control, Space Management, wayfinding, room/desk reservation and offers open APIs for light control and data exchange.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output.
- Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information on Interact Office Wired, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Interact Office Wired (PoE), Static White:

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible Zigbee Green Power wall dimmer and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on wayfinding, room/desk reservation and offers open APIs
- Requires compatible Interact Office Gateway and internet connectivity for commissioning.
- For more information on Interact Office Wireless, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Surface Mount Fixture
Item Type	Surface Mount Downlight
Description	Downlight 7" Aperture - Surface Mount
Manufacturer	Signify/Lightolier
Model	SlimSurface LED S7R 9 30K 10
Dimensions	5/8"H x 7" W
Finish	White
CSI #	265100 - Interior Lighting
Omniclass #	22- 265100 - Interior Lighting
Lamp Type	LED
Trim	White
Lamp Kelvin	3000K
Voltage	120-277V
Mount	Surface Mount
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1081
Finish	White
Lens/Shade	Clear
Lamp CRI	90
Lead Time	In stock or 4 weeks
Warranty	Five year limited warranty
Notes	Efficacy: 80lpw Lamp Life/Fixture Life: 50,000 Hours Fixture Input (Max. Watts): 13.5

SPECIAL INSTRUCTIONS

Block and plank installations surface mount to Jbox. Use at ceilings 10' high and below.

Downlighting

SlimSurface LED

S5R, S7R & S10R Round 5", 7" and 10" Apertures

ALR-030-SI-A2

SlimSurface is a 5/8" thick LED surface mounted luminaire with the appearance of a recessed downlight. Easy to install into most standard j-boxes, the SlimSurface round apertures are available as a 5" 650lm, 7" 1000lm and 10" 2200lm fixture.

1. Configurations using 90 CRI are only available with 2700K & 3000K CCT.
2. IMPORTANT: SlimSurface LED 10" round installs into 4-11/16" J-box (not wet location listed).

Features

1. **Flange:** One piece plastic flange. Injection molded white, applied aluminum or black.
2. **Lens:** High transmittance lens allowing for smooth, comfortable light pattern.
3. **Power supply:** Integral class 2 driver. Factory wired electronic LED driver (see Electrical section for specifications)
4. **LED Strip:** Utilizes LEDs.
5. Lifetime: Expected lifetime 50,000 hours and backed by a 5-year warranty*
6. **Compliance:** Non-conductive fixture for shower light application (not applicable to metal trim model).

Dimming

Intended for ELV/Triac (120V) or 0-10V dimming (120V-277V) based on the configuration. Min 90°C supply conductors.

Electrical

Electronic power supply: RoHS compliant. Class 2 power unit. Unit tolerates sustained open and short circuit output conditions without damage.

Labels

cULus listed. ENERGY STAR® certified. All models are damp location rated for walls or ceilings. The 5" & 7" are suitable for ceiling mount wet locations when installed per instructions.

ENERGY STAR

S5R, S7R & S10R SlimSurface LED

Round 5", 7" and 10" Apertures

Compatibility (10" Round)

Install into 4-11/16" J-box:

4 11/16" square (metal)

Compatible with S10R only

Compatibility (5" & 7" Round)

Installs into standard J-box applications for 5" & 7" models:

3½" round (plastic)

4" square (plastic)

Not compatible with S5R

4" octagonal (metal)

4" square (metal)

Not compatible with S5R

Fire rated J-box

Fire rated classification is per the ceiling and junction box ratings.

Note: A 2 1/8" deep octagon junction box is recommended for through circuit wiring applications.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	Downlight recessed
Manufacturer	Cooper Lighting/Halo Commercial
Model	HC620D010-HM0525930-61MDH
Dimensions	13"L x 7.5"W x 7"H
Lamp Type	LED
Dimming Type	0-10V
Trim	Haze
Lamp Kelvin	3000K
Voltage	120-277V
Mount	Ceiling Recessed
On Dimming System	Yes
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1749
Lamp CRI	90+
Warranty	Five year limited warranty
Notes	Efficacy:89.9 Lamp Life/Fixture Life: 50,000 Fixture Input (Max. Watts): 14.2W

Product Certification

ENERGY STAR · Efficiency Standards T24 Can be used to comply with California Title 24 Non-Residential · FC · RoHS COMPLIANT · UL CERTIFIED

Product Features

WaveLinx

Top Product Features

- New construction/remodel series; 500 to 6,000 lumens
- Narrow, Medium and Wide distributions; Wall wash with rotatable linear spread lens
- 2700K, 3000K, 3500K, 4000K, 5000K CCT; 80 or 90 CRI
- Universal voltage 120V-277V; Standard 0-10V driver dims to 1%
- Mounting frame converts to remodel that installs from below the ceiling

Order Information

Reflector | Distribution | Finish | Flange | Accessories

Reflector	Distribution[8]	Finish	Flange	Accessories
61 = 6" conical reflector	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC **RWW** = rotatable wall wash with linear spread lens	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Baffle | Distribution | Finish | Flange | Accessories

Baffle	Distribution[8]	Finish	Flange	Accessories
61 = 6" baffle reflector	**WD** = wide 65° beam angle 1.28 SC (nominal) **RWW** = rotatable wall wash with linear spread lens	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option available with BB	**61RWWPK** = Replacement part kit - wall wash lens insert - for use with 61RWW* only.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Reflector | Distribution | Finish | Flange | Integral Emergency

IEM Reflector	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM reflector for integral emergency only	**ND** = narrow 55° beam angle 0.97 SC **MD** = medium 60° beam angle 1.10 SC **WD** = wide 65° beam angle 1.28 SC	**C** = Specular clear **H** = Semi-specular clear **W** = White	**Blank** = Polished flange standard with C & H reflectors **Blank** = White flange standard with W reflector **WF** = White flange option available with C & H reflectors	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

IEM Baffle | Distribution | Finish | Flange | Integral Emergency

IEM Baffle	Distribution[8]	Finish	Flange	Integral Emergency
61 = 6" IEM baffle reflector for integral emergency only	**WD** = wide 65° beam angle 1.28 SC (nominal)	**BB** = Black baffle **WB** = White baffle	**Blank** = White flange standard with BB, & WB **BF** = Black flange option with BB	**IEM** = Reflector for use with integral emergency housings only. Provides access hole for integral emergency test switch.
Notes	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**	**Notes**

Reflector | Distribution | Finish | Flange

Reflector	Distribution[8]	Finish	Flange
61PS = 6" non-conductive polymer 'dead front' conical reflector Use with HM6PS0525* LED modules only[9]	**MD** = medium 60° beam angle 1.10 SC (nominal)	**W** = White	**Blank** = White flange standard with W reflector
Notes (9) 61PS is 1000-2000 lumens Non-IC rated. 500 & 750 lumens IC rated. 61PS is not for use over 2000lm in Non-IC or over 750lm in IC.	**Notes** (8) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**

Product Specifications

Housing Frame
- Boat shaped galvanized steel plaster frame with adjustable plaster lip
- Accommodates 1/2" to 1-1/2" thick ceilings
- Installs in new construction or from below the finished ceiling (non-accessible) for remodeling (with mounting bars removed)
- Provided with two remodel clips to secure the frame to the ceiling

Universal Mounting Bracket
- Adjusts 2" vertically from above and below the ceiling
- Use with the included mounting bars or with 1/2" Electric Metallic Tube (EMT)
- Removable to facilitate remodeling installation from below the finished ceiling

Mounting Bars
- Captive pre-installed No Fuss™ mounting bars lock to T-grid with screwdriver or pliers
- Centering detents allow for consistent positioning of fixtures

LED Module
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 80 or 90 color rendering index (CRI)
- Color accuracy within 3 SDCM provides color consistency and uniformity
- 90 CRI option: R9>50 (refer to chromaticity information for details)
- Available in 2700K, 3000K, 3500K, 4000K and 5000K correlated color temperature (CCT)
- Lumen options include 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumens (nominal)
- Passive thermal management achieves 60,000 hours at 70% lumen maintenance (L70) in insulated ceilings (IC) and non-IC applications
- Integral diffuse lens provides visual shielding
- Integral connector allows quick connection to housing flex

Reflector
- Self-flanged aluminum reflectors available in narrow, medium or wide distribution patterns
- Medium distribution polymer non-conductive matte white reflector may be used to meet local codes for 'dead front' applications (500 & 750 lumen max. in IC and 2000 lumen max. in Non-IC)
- Wall wash reflector features a rotatable linear spread lens for alignment of vertical illumination
- Reflectors attach to LED module with three speed clamps
- Available in multiple painted or plated finishes

Reflector/Module Retention
- Reflector/module assembly is securely retained in the housing with two torsion springs

Driver
- Field-replaceable constant current driver provides low noise operation
- Universal 120-277VAC 50/60Hz input standard
- Continuous, 1% to 100% dimming with 0-10V analog control
- Optional low-voltage DC driver for use with Distributed Low Voltage Power (DLVP) system
- Distributed Low Voltage Power (DLVP) system combines power, lighting and controls with ease of installation (refer to DLVP Design Guide at www.cooperlighting.com for details)

Canada Options
- 347VAC 50/60Hz; 1% dimming on 0 -10V analog control, for 500, 750, 1000, 1500, 2000, 2500, 3000, 3500, 4000, 4500, 5000 lumen models only
- 347V step down transformer factory installed with the standard "D010" 120V-277V, LED driver on 5500, 6000 lumen models only

Emergency Option
- Provides 90 minutes of standby lighting, meeting most life safety codes for egress lighting
- Available with integral or remote charge indicator and test switch
- Available Self-Test (self-diagnostic) with remote charge indicator and test switch

Connected Lighting System Options
Two WaveLinx connected systems to choose. Summary information provided below, refer to WaveLinx system specifications and application guides for details.

<u>WaveLinx System Tilemount Sensor Kit</u>
- WaveLinx WTA tile mount sensor kit offers daylight dimming, PIR motion sensing, scene and zone configuration, automatic commissioning; and optional RLTS - Real Time Location Services available.

<u>WaveLinx Lite System Tilemount Sensor Kit</u>
- WaveLinx Lite WTK tile mount sensor kit offers daylight dimming and PIR motion sensing, scene and grouping configuration.

<u>WaveLinx Tilemount Kits Application</u>
- The WTA and WTK tilemount kits include a control module mounted on the luminaire junction box via 1/2" knock-out, and a tilemount sensor on 54-inch whip; for ceiling installation by direct-mount spring clips or via mounting bracket in octagon ceiling boxes.
- The WTA and WTK tilemount kits may be ordered as factory installed on the luminaire, or ordered separately as a field installed accessory kit.

Junction Box
- Galvanized steel junction box
- 20 in^3 internal volume excluding voltage barrier
- 25 in^3 internal total volume
- Voltage barrier for 0-10V dimming wires (occupies one 1/2" pry-out space)
- Listed for eight #12 AWG (four in, four out) 90˚C conductors and feed-thru branch wiring
- Three 1/2" and two 3/4" trade size pry-outs available
- Three 4-port push wire nuts for mains voltage with 1-port for fixture connection

Compliance
- cULus Listed to UL 1598 / C22.2 No. 250.0, suitable for damp locations and wet locations in covered ceilings only
- Emergency options provided with UL Listed emergency drivers to UL 924 / C22.2 No. 141, suitable for indoor/damp locations
- IP20 - Above finished ceiling; IP65 - Below finished ceiling
- Non-Insulated ceiling (Non-IC) rated for 2500, 3000, 3500, 4000, 4500, 5000, 5500, 6000 lumen models (insulation must be kept 3" from top and sides)
- Insulated ceiling (IC) rated for 500, 750, 1000, 1500, 2000 lumen models and suitable for direct contact with air permeable insulation* (IC models are also suitable for Non-IC installations)
- Non-IC marked spacing required for 4500, 5000, 5500, 6000 lumen models
  - Marked Spacing Center to Center of Adjacent Luminaires = 36"
  - Center of Luminaire to Building Member = 18"
  - Minimum overhead = 0.5"
- Airtight per ASTM-E283-04
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing completed in accordance of IES LM-79-08
- Lumen maintenance projection in accordance of IES LM-80-08 and TM-21-11
- 500, 750, 1,000, 1,500 and 2,000 lumen, 90 CRI, ICAT models may be used to comply with State of California Title 24 residential code, per JA8 certification standards
- May be used to comply with State of California Title 24 non-residential code as a dimmable LED luminaire
- ENERGY STAR® certified, reference certified light fixtures database

*Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013

Warranty
- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Dimensions	13"L x 7.5"W x 7"H
CSI #	265100 Interior Lighting
Omniclass #	22-265100 Interior Lighting
Lamp Type	LED
Dimming Type	0-10V
Trim	Haze
Lamp Kelvin	3000K
Reflector	White
Voltage	120-277V
Mount	Ceiling Recessed
On Dimming System	Yes
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1629
Lamp CRI	90+
Warranty	Five year limited warranty
Notes	Efficacy: 107 lm/W Lamp Life/Fixture Life: 50,000 Hours Fixture Input (Max. Watts): 15W

LyteProfile

P6R 6" Round Downlight & Wall Wash

ALR-043-SI

Project:
Location:
Cat.No:
Type:
Qty:
Notes:

LyteProfile downlights and wall washers provide a perfect balance of functionality with glare control. The robust and versatile UniFrame frame-in kit makes changes and updates easy to manage and install. Ideal for use in a variety of applications including open office, institutional, healthcare, and retail.

Standard luminaire = Frame + Engine/Trim + Accessories (optional)

Buy American Act of 1933 (BAA)** Compliant luminaire* = Frame-BAC + Engine/Trim-BAC

* BAA compliance requires that BAC option be selected for each of frame and engine/trim.
Frame and engine/trim will be ordered/shipped together (ex: 4RN-BAC-Z4RDL20835WOCDZ10U-BAC).
Accessories (optional) are not currently BAA-compliant.

Frame

Standard example: 6RN | BAC example: 6RN-BAC

Series	Aperture	Installation	Options	
6	R	N		
6 Uniframe 6-inch Non-IC	**R** Round	**N** New construction (Non-IC)	– Universal 120/277/347V[1] **LC** Chicago Plenum **EM6** Emergency, 6W Self-Test/Self-Diagnostic (not available for BAC)[2]	**3** 347V (for non-0-10v configurations) **RADIO** Integral Interact Pro RF sensor (120/277/347V) (enables wireless connected lighting control)[3] **BAC** Meets the requirements of the Buy American Act of 1933 (BAA)**
		R Remodeler (Non-IC)	– Universal 120/277/347V[1]	**3** 347V (for non-Z10 configurations)
		A AirSeal (IC)	– Universal 120/277/347V[1]	**BAC** Meets the requirements of the Buy American Act of 1933 (BAA)**

Light Engine / Trim

Standard example: P6RDL20835CDZ10U | BAC example: P6RDL20835CDZ10U-BAC

						Only compatible with 1000 (10) to 2500 (25) lumen configurations		

Accessories (Not currently BAA-compliant - learn more on page 2)

SBA	Interact Ready System Bridge Accessory with integral occupancy and daylight sensor (compatible with all 0-10V options, see SBA spec sheet)[7]
CAEM6	Field installable Bodine BSL6 6W battery pack with self-test/self-diagnostic for use with new construction frames, 120-277V
7925	6" sloped ceiling adapter (refer to SCA spec sheet for slope options)
AMS	ActiLume multi-sensor (optional accessory for PoE configurations)

1. Universal 120-347V is for 0-10v (Z10) dimming configurations only. For 347V non-Z10 dimming, order 347V (3) frame with (U) light engine/trim.
2. Emergency (EM6) frame is compatible with reflector mounted test switch when light engine is ordered with IEM6 option code (not compatible with 347V or Power over Ethernet configurations).
3. Interact Pro (RADIO) requires above ceiling access.
4. Shower light (SL) in only available with White (WH) reflector finish.
5. Specify standard UNV frame for use with 347V light engines
6. The 347V light engine voltage option is only available with Z10 dimming option. For other dimming protocols order UNV (U) light engine and 347V (3) frame.
7. Requires IRT9015 IR remote and Interact Pro App for commissioning.
8. IEM6 option available on DL style only.

** Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.

P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Features

Optics

- Provides a 60° cutoff (physical and reflected)
- Wide beam distribution for general illumination
- Spun and anodized reflectors available in specular (clear), semi-specular (comfort clear and diffuse finishes. Also available in white and black painted finishes.

Quality of light

- Consult factory for RAL finishes
- Color consistency: 3 SDCM
- 80 CRI minimum

Construction (New Construction)

- Galvanized stamped steal for dry / plaster ceilings.
- Pre-installed telescoping mounting bars (13"-24")
- Frame accommodates C- channel, black iron, and 3/4" EMT for mounting distances greater than 24" between joists.
- Manufactured from 20 gage galvanized steel construction with rolled edge aperture to guide cutting tools for perfect hole cutting.

Max ceiling thickness is 2" (51 mm). Including PoE frame 4.88" (124 mm).

Patented install Mounting frame

- Pre-installed mounting bars allow for fast and tool-less install into T-grid & hat channel ceilings
- Close-cut aperture design eliminates an undesired gap between ceiling material and reflector.
- Simple plug-and-play connection between frame and light engine from below the ceiling allows for:
  - Easy upgrades
  - Technology changes
  - Repairs and troubleshooting

Dimming

- Advance 0-10V 1% dimming
- Lutron Hi-lume EcoSystem H Series 1% dimming
- EldoLED ECOdrive Dali 1% dimming
- EldoLED SOLOdrive 0-10V 0.1% dimming
- EldoLED DMX POWERdrive

Light engine

Quick connect power pack allow for easy installation and replacement from below ceiling with no need for additional wiring. This allows for:

- Frame and ceiling installation to be performed while still finalizing details such as lumen packages, CCT and control type.
- Easy replacement of electronics at end of life with minimal wasted material and labor required.
- Ease and upgradability of technology.
- Lumen Maintenance: L80 at 60,000 hours.
- 347V light engines are 0-10v dimming only and include dedicated 347V driver for use with universal 120/277/347V (U) frames. For 347V and non-0-10v dimming, order (U) light engine and 347V (3) frame (includes step down transformer).

Emergency

Bodine BSL6 6W battery pack with self-test/ diagnostic functionality. Factory or field mounted to frame.

- For trim with integral emergency test switch, order light engine with IEM6 option (ex: P6RDL20835CDZ10UIEM6). DL or SL styles only.
- For remote ceiling mounted test switch, order standard light engine (ex: P6RDL20835CDZ10U). Optional accessory ceiling mounting plate available (CAEM6TSCP) for remote mounted test switch.
- Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

Retrofit

- Easily updates legacy LyteProfile LED downlights to the latest technology. Includes light engine, trim, and driver mounted on cover plate that mounts to previous generations of LyteProfile LED luminaires. Order with R option code at end of light engine/trim catalog number.

Power over Ethernet

Powered via Philips PoE lighting controller: complies with FCC rules per Title 47 part 15 (Class A) for EMI / RFI (conducted & radiated). PoE lighting controller accessible from below ceiling.

Options and Accessories

Sloped ceilings: Compatible with sloped ceiling adapters (see SCA spec sheet).

Field Installed Emergency: Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

CAEM6: Field install EM6 kit with Bodine BSL6 6W battery pack with self-test/self-diagnostic, mounts to new construction frames. Includes remote ceiling plate for test switch. To mount test switch to trim for new construction frame, order light engine with IEM6 option code (e.g. P6RDL20835CDZ10UIEM6).

CAEM6TSCP: Ceiling cover plate for remote mounted EM6 test switch. 1/2" (25mm) hole, 4 3/8" (109mm) x 2 3/4" (69mm) rectangular. Includes two mounting screws.

ENERGY STAR® exceptions

- 500lm configurations
- Black finishes
- PoE drivers

Labels and Listings

- cULus listed for wet locations
- CCEA (frames with *LC suffix)
- ENERGY STAR® certified
- RoHS certified

Warranty

5 year limited warranty

Visit Signify.com/warranties for more information on Signify's standard 5-year limited warranty on complete luminaire systems.

Finishes

Specular clear

Most specular and therefore most efficient finish, delivers maximum photometric performance but can produce a mirror image effect of the interior space.

Comfort clear

Semi-specular finish that softens the light at the source of the reflector and creates a subtle, even luminance from the reflector cone.

Comfort clear diffuse

Slightly diffuse clear finish, which eliminates iridescence and reduces the mirror image effect inherent with a specular finish.

White

Brightest aperture when illuminated and provides the smoothest transition to most ceilings when off (white is only available with a white flange).

Black

Specular finish that provides the lowest aperture brightness possible and reduces source identification in a ceiling significantly (black is only available with a black flange).

P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Wireless Controls Options

Interact Pro scalable sensor (System Bridge Accessory with -CS option):

- CS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
- Compatible with:
  - UID8451/10 wireless dimmer switch
  - SWS200 wireless scene switch
  - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
  - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
  - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
  - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem.

Interact Pro Enterprise (System Bridge Accessory with -SB option):

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- SB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Emergency Options (ER100) (System Bridge Accessory with -ER100 option):

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

Radio only sensor (RADIO):

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Wired Controls Options

Interact Office Wired (PoE):

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on Personal Control, Space Management, wayfinding, room/desk reservation and offers open APIs for light control and data exchange.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output.
- Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information on Interact Office Wired, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Interact Office Wired (PoE), Static White:

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible Zigbee Green Power wall dimmer and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on wayfinding, room/desk reservation and offers open APIs
- Requires compatible Interact Office Gateway and internet connectivity for commissioning.
- For more information on Interact Office Wireless, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

HALO

Description

The H550ICAT is a dedicated LED new construction housing to be used with compatible Halo LED modules and trims. The H550ICAT is designed for insulated ceilings and can be in direct contact with ceiling insulation*. This Air-Tite housing design restricts airflow between conditioned spaces and unconditioned areas. The H550ICAT connector system provides high efficacy code compliance when used with a compatible Halo LED lighting systems.

Catalog #	H550ICAT/ML5609930/595WW	Type
Project		ALR-50-CL
Comments		Date
Prepared by	Kathleen Kenny National Accounts Ph/Cell: 678-447-5208 Kathleen.kenny@cooperlighting.com	

Specification Features

Housing
- Single wall aluminum housing
- Designed for insulated ceilings in direct contact with insulation* (May also be installed in non-insulated ceilings)
- Overspray protector included

Plaster Frame
- Galvanized steel die-formed construction
- Housing adjusts in plaster frame to accommodate up to 1-3/8" ceiling thickness
- Plaster frame features include:
  - Patented regressed locking screw positioned for securing hanger bars from below the ceiling
  - Cutouts for easily crimping hanger bars in position
  - Air-Tite™ aperture gasket is pre-installed
  - Halo identity embossed on plaster frame

Got Nail!™ Bar Hanger Bracket
Bar Hanger Features include:
- Pre-installed nail easily installs installs in regular lumber, engineered lumber and laminated beams
- Safety and guidance system prevents snagging, ensures smooth straight nail penetration and allows bar hangers to be easily removed if necessary
- Automatic leveling flange aligns the housing and lets you hold the housing in place with one hand while driving nails
- Five additional mounting points
- Mounting point on top for hanger wire connection
- Integral T-bar clips snaps onto T-bars - no additional clips required

q-Channel bars with Pass-N-Thru™
- q-Channel bars feature an unique inverted "q" interlocking channel for rigidity and stability
- Pass-N-Thru™ feature allows bars to cross-over for tool-less shortening in tight spaces less than 12" without removing from the plaster frame. Push bars together and flex at score hole break points
- Housing can be positioned at any point within 24" joist span
- Bar hangers may be repositioned 90° on the frame

Slide-N-Side™ Junction Box
Junction box features include:
- Slide-N-Side™ connectors allow non-metallic sheathed cable for both U.S. and Canada to be installed without tools and without removing knockouts
  - Allows wiring connections to be made outside the junction box
  - Simply insert the cable directly into the trap after connections are made
  - accommodates the following standard non-metallic sheathed cable types: (US) #14/2 , #14/3, #12/2, #12/3 (Canada) #14/2, #14/3, #12/2
- Positioned to accommodate straight conduit runs
- Seven 1/2" trade size conduit knockouts with true pry-out slots
- cULus Listed 26 in3 box volume
- Listed for through branch (8) No. 12 AWG branch circuit 90° C conductors through the box

Quick Connect™
- Three 4-port push-in "Quick Connect" wire nuts included in junction box
- Speed installation and increase reliability
- No additional wire nuts required
- Simply strip and insert supply wires

LED Module Connection
- Halo LED modules install with a plug-in 120V/277V rated line voltage wiring connector (UL and CSA Listed luminaire disconnect)
- This non-screw base connection preserves the high efficacy rating and prevents use of low efficacy sources (see LED module specifications)
- LED connection is rated for 120V and 277V input. Installer must verify LED module voltage is compatible with the applicable voltage input. If uncertain, consult a qualified electrician.

Compliance
- cULus Listed 1598 luminaire
- cULus Listed for feed through
- cULus Listed for damp location
- cULus Listed for wet location, covered ceiling, with select trims
- cULus Listed for direct contact with insulation and combustible material*
- Air-Tite code compliant. Certified under ASTM E283; not exceeding 2.0 cfm (0.944 L/s) air leakage rate tested at a 1.57 psf (75 Pa) pressure differential.
- Rated for 20W maximum
- Use with designated HALO LED systems for ENERGY STAR® certification
- Can be used for State of California Title 24 high efficacy compliance with Title 20 Certified when used with designted Halo LED modules and trims
- Can be used for International Energy Conservation Code (IECC) high efficacy compliance with designated Halo LED modules and trims
- Refer to LED Product specification sheets online for additional compliance information
- RoHS compliant

*Not to be used in direct contact with spray foam insulation (Consult NEMA LSD57-2013)

Can be used for IECC International Energy Conservation Code High Efficacy Compliance

T24 Can be used to comply with California Title 24 High Efficacy requirements

T20 Certified to California Title 20 Appliance Database

RoHS Compliant

ML5609840= 5"/6" LED Retrofit Downlight Light Module, 900 lumen, 80CRI, 4000K

900 Series / 90 CRI
ML5609927= 5"/6" LED Retrofit Downlight Light Module, 900 lumen, 90CRI, 2700K
ML5609930= 5"/6" LED Retrofit Downlight Light Module, 900 lumen, 90CRI, 3000K
ML5609935= 5"/6" LED Retrofit Downlight Light Module, 900 lumen, 90CRI, 3500K
ML5609940= 5"/6" LED Retrofit Downlight Light Module, 900 lumen, 90CRI, 4000K

1200 Series / 80 CRI
ML5612827= 5"/6" LED Light Module, 1200 lumen, 80CRI, 2700K
ML5612830= 5"/6" LED Light Module, 1200 lumen, 80CRI, 3000K
ML5612835= 5"/6" LED Light Module, 1200 lumen, 80CRI, 3500K
ML5612840= 5"/6" LED Light Module, 1200 lumen, 80CRI, 4000K

1200 Series / 90 CRI
ML5612927= 5"/6" LED Light Module, 1200 lumen, 90CRI, 2700K
ML5612930= 5"/6" LED Light Module, 1200 lumen, 90CRI, 3000K
ML5612935= 5"/6" LED Light Module, 1200 lumen, 90CRI, 3500K
ML5612940= 5"/6" LED Light Module, 1200 lumen, 90CRI, 4000K

ML56 LED 5" Trims

590 Series - 5" LED Trims
591WB=5" LED Trim, Polymer "Dead-Front", Shallow White Baffle & Flange – Shallow and Standard housings (For use with 600 Series LED Light Modules only)

Reflectors
592SC=5" LED Trim, Specular Reflector & White Flange
592H=5" LED Trim, Haze Reflector & White Flange
592W=5" LED Trim, White Reflector & Flange

Baffles
593WB=5" LED Trim, White Micro-Step Baffle & Flange
593BB=5" LED Trim, Black Micro-Step Baffle & White Flange
593SNB=5" LED Trim, Satin Nickel Micro-Step Baffle & Flange
593TBZB=5" LED Trim, Tuscan Bronze Micro-Step Baffle & Flange

Semi-Regressed Eyeballs
594WB=5" LED Directional Trim, White Eyeball, Baffle & Flange – Shallow and Standard Housings
594SNB=5" LED Directional Trim, Satin Nickel Eyeball, Baffle & Flange – Shallow and Standard Housings
594TBZB=5" LED Directional Trim, Tuscan Bronze Eyeball, Baffle & Flange – Shallow and Standard Housings

Wall Wash
595WW=5" LED Trim, Wall Wash - Specular Reflector, Repositionable Specular Kick Reflector, White Flange

Shallow Baffle
596WB=5" LED Trim, White Shallow Baffle & Flange – Shallow and Standard Housings

ML56 System Accessories

TRM590WH= 5" LED Oversize Trim Ring for use with ML56LED 59* series trims, White 6.3" I.D., 7.5" O.D. Ring slips over LED trim. Inset design allows 5" trim to fit into oversize ring for an even trim surface

WW595SC= 5" Wall wash insert - Kick reflector for 595WW (1-included with trim) double or corner wall wash

ML56 Beam Forming Optic / Media

1200 Series Accessories***
BFR56NFL=Beam forming reflector kit, narrow flood, 25°nominal
BFR56MH=Media holder, accepts one 3.45" lens. Requires BFR56NFL & L345SF, order separately.
L345SF=3.45" diameter soft focus lens. Requires BFR56NFL & BFR56MH, order separately.

***Beam forming optics/media not recmmended for use with ML5612D2W930 LED module.

Ordering Information

The H550ICAT housing may also be used with Halo LED Modules and Surface LED Series.
LED Modules:

HALO

Description

The Halo ML56 LED Downlighting System is a series of modular LED Modules for use with designated 5" or 6" ML56 LED trims in new construction, remodel and retrofit installation. Compatible with Halo 5" H550 and 6" H750, H2750 Series LED housings. And in retrofit of existing housings the ML56 Series fits 5" or 6" Halo and others. ML56 Modules are offered in 600 Series, 900 Series, and 1200 Series, 90CRI, and four color temperatures 2700K, 3000K, 3500K, 4000K. ML56 Modules are universal voltage 120V – 277V and dimmable at 120V. The ML56 lens provides uniform diffuse illumination standard.

Catalog #	H550ICAT/ML5609930/595WW	Type
Project		ALR-050-CL
Comments		Date
Prepared by	Kathleen Kenny National Accounts Ph/Cell: 678-447-5208 Kathleen.kenny@cooperlighting.com	

Specification Features

Mechanical

Light Module
- Module includes LED package, LED driver, heat sink, and lens
- Durable die-cast aluminum construction.
- Heat sink designed to conduct heat away from the LED keeping the junction temperatures below specified maximums, including insulated ceiling environments

Lens
- Impact-resistant polycarbonate
- Convex form for lamp-like appearance
- High lumen transmission
- Diffusing for even illumination

Mounting
- Modules attach to reflector and baffle trims via locking tabs, and attach to eyeballs via keyed twist-to-lock mating bosses
- The complete module and trim assembly installs into housings with precision formed torsion springs located on the trim
- Friction Blade mounting is an alternate option using the accessory 6" Friction Blade Kit model ML56CLIP (order separately). Friction blades provide alternative to torsion springs for retrofit in 6" housings without torsion mounting tabs. ML56CLIP is compatible with 6" baffle and reflector trims only (691, 692, 693, 695, 696 series). For eyeball trim (694 series) use ML7RAB retrofit adapter band.

Housing Compatibility

A complete ML56 system includes a LED Module, LED trim, and a compatible housing (new construction, remodel, or existing retrofit). Housing compatibility in the ML56 System is determined by the ML56 trim dimensions. ML56 trims are available in 5" and 6" aperture (5" = 59xx series and 6" = 69xx series trims). Refer to Housing – Trim Section in this document.

LED
- 900 Series = 900 design lumens typical.
- Delivered lumens vary depending upon 5" or 6", color temperature, and trim finish.
- Color Temperature options: 2700K, 3000K, 3500K, 4000K
- CRI: 90, R9>50
- L70 at 50,000 hours, projected in accordance with IES TM-21
- LED is a chip on board design consisting of a multiple LED package to create one virtual light source for a productive "cone of light"

Color Specification & Quality Standards
- A tight chromaticity specification to ensures LED color uniformity, sustainable Color Rendering Index (CRI) and Correlated Color Temperature (CCT) over the useful life of the LED
- LED color uniformity of 3 SDCM exceeds ENERGY STAR® color standards per ANSI C78.377- 2008.
- High color performance with 90CRI minimum, and R9 greater than 50.
- Every Halo LED Module is quality tested and performance measured, and then serialized in a permanent record to register lumens, wattage, CRI and CCT.
- Halo LED serialized testing and measurement process ensures color and lumen consistency on a per-unit basis, and validates long-term product consistency over time
- Halo ML56 LED Modules include lumen, CRI, and CCT designations in the model number Example: **ML5609930**
  56 = 5" / 6" aperture series
  09 = 900 lumen series
  9 = >90 CRI
  30 = 3000K nominal CCT

Electrical Power Connections
- LED connector is a non-screw base luminaire disconnect offering easy installation with the matching Halo 5" H550 series and 6" H750 and H2750 series housings (housing selected depends upon LED trim 5" or 6").
- LED Connector meets high-efficacy luminaire requirement for a non-screw base, and where required.
- The included E26 medium screw-base

  Edison adapter* provides easy retrofit of incandescent housings (see Housing Section).

Ground Connection

Separate grounding cable included on the module for attachment to the housing during installation.

LED Driver
- Driver is universal voltage 120V-277V, and may be controlled from a switch in this range of main inputs (switchable at 120V, 220V, 230V, 240V, and 277V)
- Driver is dimmable at 120V operation when connected to a compatible dimmer.
- Driver is a high efficiency, electronic power supply providing DC power to the LED.
- Driver meets FCC EMI/RFI Consumer Level limits on 120V main inputs, and is compliant for use in residential and commercial installations.
- Driver features high power factor, low THD, and has integral thermal protection in the event of over temperature or internal failure.
- Driver is replaceable, if replacement should be required.

Dimming

Designed for dimming capability to nominal 5% in normal operation with standard 120V Leading Edge (LE) and Trailing Edge (TE) phase control dimmers (Consult dimmer manufacturer for dimmer compatibility and details. Note, some dimmers require a neutral in the wallbox.)

Warranty

Cooper Lighting Solutions provides a (5) five year limited warranty on the Halo ML56 LED Module.

LED Module in New or Retrofit Existing Construction – Housings other than Halo
- If used in recessed housings other than Halo the Cooper Lighting Solutions 5-year limited warranty applies to the LED Module and Trim only.
- As with any electrical installation, a qualified electrician must ensure compatibility of use with a particular housing; this includes all applicable national and local electrical and building codes. Installer is responsible to properly and securely retain the LED Module and LED Trim in the housing at time of installation.

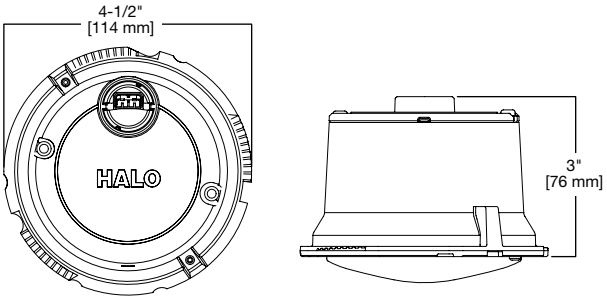
Compliance

- cULus listed 1598 Luminaire (Halo housings)
- UL Classified when used in retrofit (refer to housing section)
- cULus listed for damp locations
- cULus Wet location listed with baffle and reflector trims only
- Airtight certified per ASTM E283 (not exceeding 2.0 CFM under 57 Pascals pressure difference)
- IP66 ingress protection rated with baffle and reflector trims only
- RoHS compliant
- May be used in IC (insulated ceiling) housings in direct contact with insulation* and combustible material
- Can be used for California Title 24 compliance
- Can be used for International Energy Conservation Code (IECC) high efficiency luminaire compliance.
- Can be used for Washington State Energy Code compliance
- ENERGY STAR® certified luminaire - consult ENERGY STAR® Certified product list
- EMI/RFI per FCC 47CFR Part 15 Class B Consumer limits (commercial and residential compliant)
- Photometric testing in accordance with IES LM-79
- Lumen maintenance projections in accordance with IES LM-80 and TM-21
- CE Mark - "Conformité Européene" conformity with the Council of European Communities Directives, meeting internationally recognized compliance when used with Halo H550, H750, and H2750 Series LED housings only

* Not for use with housings in direct contact with spray foam insulation.

Refer to ENERGY STAR® Qualified Products List.
Can be used to comply with California Title 24 High Efficacy requirements.

Dimensions



Ordering Information

Sample Number: **ML5609930 593WB**
Order LED Module and trim separately.
A complete system also includes a compatible housing (new construction, remodel, or existing retrofit). Housing aperture size in the ML56 System is determined by the ML56 trim dimensions.
ML56 trims are available in 5" and 6" aperture (5" = 59xx series and 6" = 69xx series trims). Refer to Housing Section in this document.

694SNB=6" LED directional trim, satin nickel eyeball, baffle & flange – shallow and standard housings
694TBZB=6" LED directional trim, tuscan bronze eyeball, baffle & flange – shallow and standard housings
695WW=6" LED trim, wall wash - specular reflector, repositionable specular kick reflector, white flange
696WB=6" LED trim, white shallow baffle & flange – for use with shallow and standard housings

ML56 System Accessories

ML56CLIP=Friction clip mounting kit - For retrofitting non-torsion spring housings, 6" clips*
WW595SC=5" Wall wash insert - kick reflector for 595WW (1-included with trim) double or corner wall wash**
WW695SC=6" Wall wash insert - kick reflector for 695WW (1-included with trim) double or corner wall wash**
TRM590WH=5" LED oversize trim ring for use with 59* series trims, white 6.3" I.D., 7.5" O.D. Ring slips over LED trim. Inset design allows 5" trim to fit into oversize ring for an even trim surface
TRM690WH=6" LED oversize trim ring for use with 69* series trims, white 6.9" I.D., 9.5" O.D. Ring slips over LED trim. Inset design allows 6" trim to fit into oversize ring for an even trim surface

*ML56CLIP is compatible with 6" baffle and reflector trims only (691, 692, 693, 695, 696 series).
For eyeball trim (694 series) use ML7RAB retrofit adapter band.

**Wall wash trims 595WW and 695WW feature an exclusive repositionable kick reflector for fine-tuning adjustment of the wall wash effect. The WW595SC and WW695SC are repositionable kick reflectors sold separately for addition to the wall wash trim when a double or corner wall wash is needed, or for replacement of original kick reflector included with the trim.

Notes: 1. California product only.

Housing – Trim Compatibility

Housing compatibility in the ML56 System is determined by the ML56 trim dimensions. ML56 trims are available in 5" and 6" aperture (5" = 59xx series and 6" = 69xx series trims). Refer to ML56 TRIMS in this document. (Note "X" in the trim model number denotes finish code.)

Housing – Compatibility

The ML56 LED module - trim combination is cULus Listed or UL Classified for use with any 5" or 6" diameter recessed housing constructed of steel or aluminum with an internal volume that exceeds 115 in^3 in addition to those noted below.

Halo and All-Pro UL Listed Compatibility

6" Trims: 691X, 692X, 693X, 694X, 695X, 696X
(Note shallow housings for use with 691X, 694X, 696X trims only)

HALO - Incandescent E26 Screwbase Housings

Brand	Housing Type	Catalog Number	Description
Halo	**Standard Housings**	H7ICAT	6" Insulated Ceiling, Air-Tite New Construction Housing
		H7RICAT	6" Insulated Ceiling, Air-Tite Remodel Housing
		H7ICT	6" Insulated Ceiling, New Construction Housing
		H7RICT	6" Insulated Ceiling, Remodel Housing
		H7ICATNB	6" Insulated Ceiling, Air-Tite New Construction Housing, No Socket Bracket
		H7ICTNB	6" Insulated Ceiling, New Construction Housing, No Socket Bracket
		H7T	6" Non-IC, New Construction Housing
		H7RT	6" Non-IC, Remodel Housing
		H7TNB	6" Non-IC, New Construction Housing, No Socket Bracket
		H7TCP	6" Non-IC, Chicago Plenum, New Construction/Remodel Housing
		H7UICAT	6" Insulated Ceiling, Universal, Air-Tite, New Construction Housing
		E7ICAT	6" Insulated Ceiling, Air-Tite New Construction Housing
		E7RICAT	6" Insulated Ceiling, Air-Tite Remodel Housing
		E7ICATNB	6" Insulated Ceiling, Air-Tite New Construction Housing, No Socket Bracket
		E7TAT	6" Non-IC, Air-Tite New Construction Housing
		E7RTAT	6" Non-IC, Air-Tite Remodel Housing
		E7TATNB	6" Non-IC, Air-Tite New Construction Housing, No Socket Bracket
Halo	**Shallow Housings**	H27ICAT	6" Shallow, Insulated Ceiling, Air-Tite New Construction (use with 691X, 694X, 696X trims only)
		H27RICAT	6" Shallow, Insulated Ceiling, Air-Tite Remodel Housing (use with 691X, 694X, 696X trims only)
		H27T	6" Shallow, Non-IC, New Construction Housing (use with 691X, 694X, 696X trims only)
		H27RT	6" Shallow, Non-IC, Remodel Housing (use with 691X, 694X, 696X trims only)
		E27ICAT	6" Shallow, Insulated Ceiling, Air-Tite New Construction (use with 691X, 694X, 696X trims only)
		E27RICAT	6" Shallow, Insulated Ceiling, Air-Tite Remodel Housing (use with 691X, 694X, 696X trims only)
		E27TAT	6" Shallow, Non-IC, Air-Tite New Construction Housing (use with 691X, 694X, 696X trims only)
		E27RTAT	6" Shallow, Non-IC, Air-Tite Remodel Housing (use with 691X, 694X, 696X trims only)

Halo LED Retrofit Enclosures

Brand	Type	Catalog Number	Description
Halo	**Retrofit**	ML7BXRFK	6" Retrofit Enclosure, Non-IC, BX Whip
		ML7E26RFK	6" Retrofit Enclosure, Non-IC, E26 Screw base Interface

Housing Compatibility - Continued

5" Trims: 591X, 592X, 593X, 594X, 595X, 596X
(Note shallow housings for use with 591X, 594X, 596X trims only)

HALO - LED Housings with LED Luminaire Connector - High-Efficacy Compliant

Brand	Housing Type	Catalog Number	Description
Halo	**Standard Housings**	H550ICAT	5" LED, Insulated Ceiling, Air-Tite, New Construction Housing
		H550RICAT	5" LED, Insulated Ceiling, Air-Tite, Remodel Housing
		E550ICAT	5" LED, Insulated Ceiling, Air-Tite, New Construction Housing
		E550RICAT	5" LED, Insulated Ceiling, Air-Tite, Remodel Housing

HALO - Incandescent E26 Screwbase Housings

Brand	Housing Type	Catalog Number	Description
Halo	**Standard Housings**	H5ICAT	5" Insulated Ceiling, Air-Tite New Construction Housing
		H5RICAT	5" Insulated Ceiling, Air-Tite Remodel Housing
		H5ICATNB	5" Insulated Ceiling, Air-Tite New Construction Housing, No Socket Bracket
		H5T	5" Non-IC, New Construction Housing
		H5RT	5" Non-IC, Remodel Housing
		H5TNB	5" Non-IC, New Construction Housing, No Socket Bracket
		H5TM	5" Non-IC, New Construction Housing (Canada)
Halo	**Shallow Housings**	H25ICAT	5" Shallow, Insulated Ceiling, Air-Tite New Construction (use with 591X, 594X, 596X trims only)
		H25RICAT	5" Shallow, Insulated Ceiling, Air-Tite Remodel (use with 591X, 594X, 596X trims only)
		H25ICATNB	5" Shallow, Insulated Ceiling, Air-Tite New Construction, No Socket Bracket (use with 591X, 594X, 596X trims only)

Housings - UL Classified for Retrofit Compatibility

6" Trims: 691X, 692X, 693X, 694X, 695X, 696X
(Note shallow housings for use with 691X, 694X, 696X trims only)

Brand	Housing Type	Description
Juno	**Standard Housings**	IC22, IC22R, IC22W, IC22S, IC23, IC23W, TC2, TC2R, IC2
	Shallow Housings	IC21, IC21R (use with 691X, 694X, 696X trims only)
Capri	**Standard Housings**	CR1, PR1, QL1
	Shallow Housings	R9ASIC/PS9RM (use with 691X, 694X, 696X trims only)
Elco		HL7ICA (EL7ICA)
Lithonia	**Standard Housings**	LC6, L7X
	Shallow Housings	L7XP (use with 691X, 694X, 696X trims only)
Thomas		PS1
Commercial Electric		C7ICA, H3
Progress	**Standard Housing**	P87-AT †*
	Shallow Housing	P86TG (use with 691X, 694X, 696X trims only)
Lightolier		1104ICS †*, 1104ICR †*

† Requires replacement of torsion springs with Friction Clips. Order Friction Clip Kit separately: ML56CLIP
* ML56CLIP is compatible with only baffle and reflector trims

5" Trims: 591X, 596X

Brand	Housing Type	Catalog Number
Juno	**Standard Housings**	IC20, IC25S, IC25W, TC20

Code Descriptions:

ES = ENERGY STAR® Certified Luminaire

T24 = Can be used to comply with California Title 24 High Efficacy requirements. Certified to California Title 20 Appliance Efficiency Database.

IECC = International Energy Conservation Code "High Efficacy"

WSEC = Washington State Energy Code - "High Efficacy" Luminaire

HALO

DESCRIPTION

595 Series LED Trims – 5-Inch Aperture Wall Wash – is an integral element in the Halo ML56 LED Downlighting System. ML56 LED System is a series of modular LED Light Modules for use with dedicated 5" or 6" ML56 LED trims. The ML56 LED trims in 5" and 6" aperture sizes are designed to fit Halo, All-Pro and others 5" or 6" recessed housings. The ML56 system is suitable for new construction, remodel or retrofit installation.

Catalog #	H550ICAT/ML5609930/595WW	Type
Project		ALR-050-CL
Comments		Date
Prepared by	Kathleen Kenny National Accounts Ph/Cell: 678-447-5208 Kathleen.kenny@cooperlighting.com	

SPECIFICATION FEATURES

595WW LED trim is a 5-inch aperture wall wash downlight offered with a Specular Clear primary downlight reflector, and the Halo exclusive Repositionable Kick Reflector. The specular clear "kick" reflector provides the wall wash optical element. The Repositionable Kick Reflector allows fine-tuning adjustment of the wall wash effect and easy cleaning of the trim. The accessory/spare WW595SC Repositionable Kick Reflector is sold separately for use when double wall wash is needed, or for replacement of original kick reflector included with the trim. 595 Series wall wash features matte white finish flange.

The precision spun aluminum primary reflector provides excellent downlight performance, and the kick reflector offers superb wall washing. The 595 wall wash trim may be used in most standard height 5-inch aperture recessed housings; Halo, All-Pro, and more (refer to ML56 LED Light Module specifications for details).

- Specular reflector and Specular "kick" reflector insert
- Repositionable Kick reflector allows wall wash adjustment
- Optional, accessory "Kick" reflector for double or corner wall wash
- Wet location shower listed with ML56 LED Light Modules
- Torsion springs pull trim and light module tight to ceiling
- For use in standard housings
- ML56 downlight trims and modules make any housing AIR-TITE™ (ASTM E283)

Compatible with ML56 LED System of LED Downlight Light Modules

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	Lytecaster LED 5" DOWNLIGHT RECESSED, wall wash adjustable
Manufacturer	Signify-Lightolier
Model	L5RAZ10UVA / L5R10930WVA
Dimensions	11.625"Lx8"Wx3. 375"H
Lamp Type	LED
Trim	White
Lamp Kelvin	3000K
Voltage	120-277V
Mount	Recessed
On Dimming System	Yes
Delivered Lumens (LED) or Mean Lumens (Non-LED)	845
Lamp CRI	90
Warranty	Five year limited warranty
Notes	Efficacy:102.6 Lamp Life/Fixture Life: 50,000 Fixture Input (Max. Watts): 13W

Downlighting

LyteCaster LED 5"

L5 Downlights & Adjustables

ALR-050-SI

LyteCaster LED Downlights are ideal general purpose downlighting solution, providing comfortable, quality light. Available in new construction and remodeler frame with interchangeable light engine that is offered in two lumen packages. The downlight is wet location listed and comes in 3 standard option.

Trim (for downlights only)

example: L5RDW

Series	Style/Finish/Flange
L5R LyteCaster 5" round downlight **L5S** LyteCaster 5" square downlight	**DD** Open Downlight / Clear Diffuse / White Flange **DW** Open Downlight / White Finish / White Flange **BW** Baffle Downlight / White Finish / White Flange

L5R & L6S LyteCaster LED 5"

Round & Square downlights and Round adjustables (1000lm & 1500lm)

Features

1. **Housing:** UL listed for direct contact with thermal insulation. Airseal® housing minimizes air leakage to less than 2 CFM at 1.57PSF (or 75PA), which complies with the International Energy Conservation Code, and Washington State Energy Code (Section 502.4). This reduces heat loss and condensation in ceiling.
2. **Housing (new construction):** .026" galvanized steel. Access door for inspection of junction box.
3. **Housing (remodeler):** .032" aluminum. Integral retaining spring secures housing to ceilings up to 2" thick. Removable for access to junction box and ceiling plenum. 5½" maximum for use in 2"x6" joist construction and shallow plenum applications.
4. **Junction Box (new construction):** 2½"x5⅜"x2" (27 cu. in) .032" galvanized steel. UL listed 90°C supply conductors. Rated for branch circuit wiring supplying connected luminaires (daisy chaining).
5. **Junction Box (remodeler):** 2½"x2½"x4⅞" (29 cu in.) .031" galvanized steel. UL listed for 90°C supply conductors. Rated for branch circuit wiring supplying connected luminaires.
6. **Retaining clips:** Permits fast and easy installation of light engine/trim.
7. **Lower frame and top cover:** .026" galvanized steel. Accommodates ceilings up to 1" (25mm) thick. Deep integral lip is ⅜" (9.5mm) with four notches at 90° apart to simplify alignment. Locks into position along length of mounting bars with locking screws.
8. **Driver – ELV /Triac:** 120V, 50/60Hz. RoHS compliant, Class 2 power supply. Complies with FCC rules per Title 47 Part 15 (Class B) for EMI/RFI (conducted & radiated). Class A sound rating.
9. **Driver – 0–10V:** 120/277V, 50/60Hz. RoHS compliant, Class 2 power supply. Complies with FCC rules per Title 47 Part 15 (Class A) for EMI/RFI (conducted & radiated). Class A sound rating.
10. **Mounting bars:** .059" galvanized steel. Bars pivot for easy attachment and wire-in below ceiling line. Bars extend to accommodate 16" (406mm) to 24" (610mm) O.C. joist spacing. Bars can accommodate 12" (305mm) O.C. joist spacing after a slight field modification (see Instruction sheet). Features integral self tapping phillips/square drive screws for secure attachment to wood or metal construction. Also available with integral nails. Attaches to T-bar ceilings without the need of accessories. Bars installed on shortest dimension of frame,but can be easily repositioned 90° from original position.
11. **Ceiling cutout:** 5½" (140mm).

Dimming Compatibility

SR1200ZTUNV	Philips Sunrise
IPE04, IP7	Leviton Illumatech
6615-P	Leviton Decora
DVLEV-303P	Lutron Diva
DVTV, DVSCTV	Lutron Diva
S-603P	Lutron Skylark
NFTV, NTSTO-DV	Lutron Nova
QSGRJ-XP, QSGRJ-XE	Lutron Grafix Eye Qs
QSGR-XF	Lutron Grafix Eye Qs

See LED-DIM Specification Sheet for more.

Electronic dimming driver

Class 2 electronic LED Driver with less than 1 second start up.

RoHS compliant, suitable for damp locations. 120v 50/06Hz

>.9 power factor. Sound rating

Class "A" (<24dB). Complies with FCC

CFR title 47 part 15 Class B for EMI/RFI

Dimmable withstandard electronic low voltage (ELV) & Triac dimmers

Dims to less than or equal to 10% of relative high output.

ENERGY STAR®

0-10v (Z10) dimming is Energy Star qualified. Electronic low voltage (E) dimming is not Energy Star qualified.

Labels

cULus Listed Type I.C., frames are suitable for damp location and wet listed for use in covered ceilings.

Trims are cULus suitable for damp location.

Complies with Air Leakage.

ENERGY STAR® certified.

5 year limited warranty

Electrical specifications

Lifetime: Expected lifetime 50,000 hours and backed by a 5-year warranty. (see Signify.com/warranties for details)

AccuRender Technology (CRI 90+)

The right light brings colors to life. Our new AccuRender technology helps ensure colors are rendered more accurately and consistently, while doing so as efficiently as CRI 80 products.

Standard CRI 80

Good color rendering and high efficacy

Standard CRI 90

Better color rendering and low efficacy

AccuRender

Best color rendering, color preference and high efficacy

Enjoy design flexibility

Full range of products and options:

- Available soon in across Lightolier portfolio for application flexibility
- Multiple color temperatures (CCTs) and lumen packages offered

Promote savings

High efficacy, with no penalty:

- Energy efficacy compares well to conventional 80 CRI
- Up to 25% more energy savings vs competitor 90 CRI[1]
- Helps meet Title 24 requirements

Show your true colors

High color rendering:

- True to life colors to help energize your environment and render better flesh tones critical for healthcare hospitality and retail applications.
- R_a up to 94 CRI
  R_9 up to 67 CRI
  G_a up to 99 CRI
  C_9 up to 94 CRI
- R_f up to 92 TM-30
  $R_{f,h1}$ up to 91 TM-30
  R_9 up to 100 TM-30
  $R_{cs,h1}$ up to -5% TM-30

Achieve color balance

Best in class color consistency:

- Promote aesthetic harmony in your space with ≤ 2 SDCM

L5R & L6S LyteCaster LED 5"

Round & Square downlights and Round adjustables (1000lm & 1500lm)

Light Engine

Components

1. **Retaining clips:** 29 gauge Stainless Steel, allows tool-less installation of light engine to trim.
2. **Engine housing:** (0.05") thick powder coated aluminum provides integrated thermal management allowing for a low profile at less than 3-1/2" tall.
3. **LED board:** High efficiency mid-flux LED's.
4. **Mixing chamber:** 98% reflective, highly diffuse film.
5. **Diffusion lens:** (0.06") thick acrylic opal lens provides an even source of illumination.
6. **Retaining ring:** (0.04") thick powder coated aluminum, secures module components.
7. **Reflector:** 30% glass reinforced injection molded polycarbonate is durable and provides a 70° cutoff to the source.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	6" Downlight
Manufacturer	Cooper Lighting/Halo Commercial
Model	HC610D010-HM612930-61MDH
Dimensions	13"L x 7.5"W x 7"H
CSI #	265000 - Lighting Fixture
Omniclass #	22-265000 Lighting Fixture
Lamp Type	LED
Dimming Type	0-10V
Trim	White
Lamp Kelvin	3000K
Voltage	120-277V
Mount	Ceiling Recessed
On Dimming System	Yes
Delivered Lumens (LED) or Mean Lumens (Non-LED)	910
Lens/Shade	Semi-Specular Clear
Lamp CRI	90+
Warranty	Five year limited warranty
Notes	Efficacy: 38.0 Lamp Life/Fixture Life: 50,000 Fixture Input (Max. Watts): 9.9W

Product Features

Top Product Features

- New construction/remodel series; 1,000 to 4,000 lumens
- Narrow, Medium and Wide distributions; Wall wash with rotatable linear spread lens
- 2700K, 3000K, 3500K and 4000K CCT; 80 or 90 CRI
- Universal voltage 120V-277V; Standard 0-10V driver dims to 1%
- Two retrofit kits install from below ceiling for LED upgrades

Dimensional and Mounting Details

Reflector | Distribution | Finish | Flange

Reflector	Distribution[3]	Finish	Flange
61PS = 6" non-conductive polymer 'dead front' conical reflector[4]	**MD** = medium 60° beam angle 1.10 SC (nominal)	**W** = White	**Blank** = White flange standard with W reflector
Notes (4) 61PS reflector is for Non-IC environment only, and up to 3000 lumens only.	**Notes** (3) Values are nominal, with specular clear reflector, other finishes and field results may vary.	**Notes**	**Notes**

Product Specifications

Housing Frame
- Boat shaped galvanized steel plaster frame with adjustable plaster lip
- Accommodates 1/2" to 1-1/2" thick ceilings
- Installs in new construction or from below the finished ceiling (non-accessible) for remodeling (with mounting bars removed)
- Provided with two remodel clips to secure the frame to the ceiling

Universal Mounting Bracket
- Adjusts 2" vertically from above and below the ceiling
- Use with the included mounting bars or with 1/2" Electric Metallic Tube (EMT)
- Removable to facilitate remodeling installation from below the finished ceiling

Mounting Bars
- Captive pre-installed No Fuss™ mounting bars lock to T-grid with screwdriver or pliers
- Centering detents allow for consistent positioning of fixtures

LED Module
- Proximity phosphors over chip on board LEDs provide a uniform source with high efficiency and no pixilation
- Available in 80 or 90 color rendering index (CRI)
- Color accuracy within 3 SDCM provides color consistency and uniformity
- 90 CRI option: R9>50 (refer to chromaticity information for details)
- Available in 2700K, 3000K, 3500K and 4000K correlated color temperature (CCT)
- Lumen options include 1,000, 1,500, 2,000, 3,000 and 4,000 lumens (nominal)
- Passive thermal management achieves 60,000 hours at 70% lumen maintenance (L70) in insulated ceilings (IC) and non-IC applications
- Integral diffuse lens provides visual shielding
- Integral connector allows quick connection to housing flex

Reflector
- Self-flanged aluminum reflectors available in narrow, medium or wide distribution patterns
- Medium distribution polymer non-conductive matte white reflector may be used to meet local codes for 'dead front' applications (Non-IC, 3,000 lumens max.)
- Wall wash reflector features a rotatable linear spread lens for alignment of vertical illumination
- Reflectors attach to LED module with three speed clamps
- Available in multiple painted or plated finishes

Reflector/Module Retention
- Reflector/module assembly is securely retained in the housing with two torsion springs

Driver
- Field-replaceable constant current driver provides low noise operation
- Universal 120-277VAC 50/60Hz input standard
- 347VAC 50/60Hz input option (Canada only)
- Continuous, 1% to 100% dimming with 0-10V analog control
- Optional low-voltage DC driver for use with Distributed Low Voltage Power (DLVP) system
- Distributed Low Voltage Power (DLVP) system combines power, lighting and controls with ease of installation (refer to DLVP Design Guide at www.cooperlighting.com for details)

Emergency Option
- Provides 90 minutes of standby lighting, meeting most life safety codes for egress lighting
- Available with integral or remote charge indicator and test switch
- Available Self-Test (self-diagnostic) with remote charge indicator and test switch

Connected Lighting System Options
Two WaveLinx connected systems to choose. Summary information provided below, refer to WaveLinx system specifications and application guides for details.

<u>WaveLinx Wireless System Tilemount Sensor Kit</u>
- WaveLinx Wireless WTA tile mount sensor kit offers daylight dimming, PIR motion sensing, scene and zone configuration, automatic commissioning; and optional RLTS - Real Time Location Services available.

<u>WaveLinx Lite System Tilemount Sensor Kit</u>
- WaveLinx Lite WTK tile mount sensor kit offers daylight dimming and PIR motion sensing, scene and grouping configuration.

<u>WaveLinx Tilemount Kits Application</u>
- The WTA and WTK tilemount kits include a control module mounted on the luminaire junction box via 1/2" knock-out, and a tilemount sensor on 54-inch whip; for ceiling installation by direct-mount spring clips or via mounting bracket in octagon ceiling boxes.
- The WTA and WTK tilemount kits may be ordered as factory installed on the luminaire, or ordered separately as a field installed accessory kit.

Junction Box
- Galvanized steel junction box
- 20 in^3 internal volume excluding voltage barrier
- 25 in^3 internal total volume
- Voltage barrier for 0-10V dimming wires (occupies one 1/2" pry-out space)
- Listed for eight #12 AWG (four in, four out) 90˚C conductors and feed-thru branch wiring
- Three 1/2" and two 3/4" trade size pry-outs available
- Three 4-port push wire nuts for mains voltage with 1-port for fixture connection

Compliance
- cULus damp and wet location listed in protected ceilings
- IP20 - Above finished ceiling; IP65 - Below finished ceiling
- Non-Insulated ceiling (Non-IC) rated for 3,000 and 4,000 lumen models (insulation must be kept 3" from top and sides)
- Insulated ceiling (IC) rated for 1,000, 1,500 and 2,000 lumen models and suitable for direct contact with air permeable insulation* (IC models are also suitable for Non-IC installations)
- Airtight per ASTM-E283-04
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- EMI/RFI emissions FCC CFR Title 47 Part 15 Class A at 120/277V
- Contains no mercury or lead and RoHS compliant
- Photometric testing completed in accordance of IES LM-79-08
- Lumen maintenance projection in accordance of IES LM-80-08 and TM-21-11
- 1,000, 1,500 and 2,000 lumen, 90 CRI, ICAT models may be used to comply with State of California Title 24 residential code, per JA8 certification standards
- May be used to comply with State of California Title 24 non-residential code as a dimmable LED luminaire
- ENERGY STAR® certified, reference certified light fixtures database

*Not for use in direct contact with spray foam insulation, consult NEMA LSD57-2013

Warranty
- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Connected Systems

WaveLinx Lite - WTK Tilemount Sensor

- Intuitive Android™ or Apple® iOS® app for basic system code compliant set up and configuration via Bluetooth
- Up to 28 unique areas per project site (WaveLinx Lite Bluetooth network)
- Up to 50 devices for an area, any one of 16 control zones, up to 6 occupancy sets, and custom lighting scenes
- Automatic occupancy or vacancy, sensor sensitivity, daylight dimming, etc. configurable through the app
- Refer to the WaveLinx system specifications for details

Device Security | Manual Dimmer | Occupancy Sensor | Daylighting Control | Manually Switched ON/OFF | Tuning Control | Lumen Maintenance Control | Scenes

Revision Date:

Item Name	Recessed Fixture
Item Type	Recessed Downlight
Description	LyteProfile LED 6" Downlight
Manufacturer	Signify / Lightolier
Model	6RN / P6RDL10830CCPZ10U
Dimensions	12.875"Lx7.5Wx4.5"H
CSI #	265000 - Lighting Fixture
Omniclass #	22-265000 Lighting Fixture
Lamp Type	LED
Dimming Type	0-10V
Trim	White
Lamp Kelvin	3000K
Reflector	Comfort Clear
Voltage	120-277V
Mount	Ceiling Recessed
On Dimming System	Yes
Delivered Lumens (LED) or Mean Lumens (Non-LED)	953
Lens/Shade	Semi-Specular Clear
Lamp CRI	90
Warranty	Five year limited warranty
Notes	Efficacy: 99.3 Lamp Life/Fixture Life: 50,000 Fixture Input (Max. Watts): 10.2W

LyteProfile

P6R 6" Round Downlight & Wall Wash

ALR-072-SI

Project:
Location:
Cat.No:
Type:
Qty:
Notes:

LyteProfile downlights and wall washers provide a perfect balance of functionality with glare control. The robust and versatile UniFrame frame-in kit makes changes and updates easy to manage and install. Ideal for use in a variety of applications including open office, institutional, healthcare, and retail.

Standard luminaire = Frame + Engine/Trim + Accessories (optional)

Buy American Act of 1933 (BAA)** Compliant luminaire* = Frame-BAC + Engine/Trim-BAC

* BAA compliance requires that BAC option be selected for each of frame and engine/trim. Frame and engine/trim will be ordered/shipped together (ex: 4RN-BAC-Z4RDL20835WOCDZ10U-BAC). Accessories (optional) are not currently BAA-compliant.

Frame

Standard example: 6RN | BAC example: 6RN-BAC

Accessories (Not currently BAA-compliant - learn more on page 2)

SBA	Interact Ready System Bridge Accessory with integral occupancy and daylight sensor (compatible with all 0-10V options, see SBA spec sheet)[7]
CAEM6	Field installable Bodine BSL6 6W battery pack with self-test/self-diagnostic for use with new construction frames, 120-277V
7925	6" sloped ceiling adapter (refer to SCA spec sheet for slope options)
AMS	ActiLume multi-sensor (optional accessory for PoE configurations)

1. Universal 120-347V is for 0-10v (Z10) dimming configurations only. For 347V non-Z10 dimming, order 347V (3) frame with (U) light engine/trim.
2. Emergency (EM6) frame is compatible with reflector mounted test switch when light engine is ordered with IEM6 option code (not compatible with 347V or Power over Ethernet configurations).
3. Interact Pro (RADIO) requires above ceiling access.
4. Shower light (SL) in only available with White (WH) reflector finish.
5. Specify standard UNV frame for use with 347V light engines
6. The 347V light engine voltage option is only available with Z10 dimming option. For other dimming protocols order UNV (U) light engine and 347V (3) frame.
7. Requires IRT9015 IR remote and Interact Pro App for commissioning.
8. IEM6 option available on DL style only.

** Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.

P6R LyteProfile 6"

Round Downlight & Lensed Wall Wash

Features

Optics

- Provides a 60° cutoff (physical and reflected)
- Wide beam distribution for general illumination
- Spun and anodized reflectors available in specular (clear), semi-specular (comfort clear and diffuse finishes. Also available in white and black painted finishes.

Quality of light

- Consult factory for RAL finishes
- Color consistency: 3 SDCM
- 80 CRI minimum

Construction (New Construction)

- Galvanized stamped steal for dry / plaster ceilings.
- Pre-installed telescoping mounting bars (13"-24")
- Frame accommodates C- channel, black iron, and 3/4" EMT for mounting distances greater than 24" between joists.
- Manufactured from 20 gage galvanized steel construction with rolled edge aperture to guide cutting tools for perfect hole cutting.

Max ceiling thickness is 2" (51 mm). Including PoE frame 4.88" (124 mm).

Patented install Mounting frame

- Pre-installed mounting bars allow for fast and tool-less install into T-grid & hat channel ceilings
- Close-cut aperture design eliminates an undesired gap between ceiling material and reflector.
- Simple plug-and-play connection between frame and light engine from below the ceiling allows for:
  - Easy upgrades
  - Technology changes
  - Repairs and troubleshooting

Dimming

- Advance 0-10V 1% dimming
- Lutron Hi-lume EcoSystem H Series 1% dimming
- EldoLED ECOdrive Dali 1% dimming
- EldoLED SOLOdrive 0-10V 0.1% dimming
- EldoLED DMX POWERdrive

Light engine

Quick connect power pack allow for easy installation and replacement from below ceiling with no need for additional wiring. This allows for:

- Frame and ceiling installation to be performed while still finalizing details such as lumen packages, CCT and control type.
- Easy replacement of electronics at end of life with minimal wasted material and labor required.
- Ease and upgradability of technology.
- Lumen Maintenance: L80 at 60,000 hours.
- 347V light engines are 0-10v dimming only and include dedicated 347V driver for use with universal 120/277/347V (U) frames. For 347V and non-0-10v dimming, order (U) light engine and 347V (3) frame (includes step down transformer).

Emergency

Bodine BSL6 6W battery pack with self-test/ diagnostic functionality. Factory or field mounted to frame.

- For trim with integral emergency test switch, order light engine with IEM6 option (ex: P6RDL20835CDZ10UIEM6). DL or SL styles only.
- For remote ceiling mounted test switch, order standard light engine (ex: P6RDL20835CDZ10U). Optional accessory ceiling mounting plate available (CAEM6TSCP) for remote mounted test switch.
- Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

Retrofit

- Easily updates legacy LyteProfile LED downlights to the latest technology. Includes light engine, trim, and driver mounted on cover plate that mounts to previous generations of LyteProfile LED luminaires. Order with R option code at end of light engine/trim catalog number.

Power over Ethernet

Powered via Philips PoE lighting controller: complies with FCC rules per Title 47 part 15 (Class A) for EMI / RFI (conducted & radiated). PoE lighting controller accessible from below ceiling.

Options and Accessories

Sloped ceilings: Compatible with sloped ceiling adapters (see SCA spec sheet).

Field Installed Emergency: Refer to Calculite-LyteProfile-EasyLyte Emergency Battery Pack specification sheet for more details.

CAEM6: Field install EM6 kit with Bodine BSL6 6W battery pack with self-test/self-diagnostic, mounts to new construction frames. Includes remote ceiling plate for test switch. To mount test switch to trim for new construction frame, order light engine with IEM6 option code (e.g. P6RDL20835CDZ10UIEM6).

CAEM6TSCP: Ceiling cover plate for remote mounted EM6 test switch. 1/2" (25mm) hole, 4 3/8" (109mm) x 2 3/4" (69mm) rectangular. Includes two mounting screws.

ENERGY STAR® exceptions

- 500lm configurations
- Black finishes
- PoE drivers

Labels and Listings

- cULus listed for wet locations
- CCEA (frames with *LC suffix)
- ENERGY STAR® certified
- RoHS certified

Warranty

5 year limited warranty

Visit Signify.com/warranties for more information on Signify's standard 5-year limited warranty on complete luminaire systems.

Finishes

Specular clear

Most specular and therefore most efficient finish, delivers maximum photometric performance but can produce a mirror image effect of the interior space.

Comfort clear

Semi-specular finish that softens the light at the source of the reflector and creates a subtle, even luminance from the reflector cone.

Comfort clear diffuse

Slightly diffuse clear finish, which eliminates iridescence and reduces the mirror image effect inherent with a specular finish.

White

Brightest aperture when illuminated and provides the smoothest transition to most ceilings when off (white is only available with a white flange).

Black

Specular finish that provides the lowest aperture brightness possible and reduces source identification in a ceiling significantly (black is only available with a black flange).

Round Downlight & Lensed Wall Wash

Wireless Controls Options

Interact Pro scalable sensor (System Bridge Accessory with -CS option):

- CS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & BlueTooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
- Compatible with:
  - UID8451/10 wireless dimmer switch
  - SWS200 wireless scene switch
  - Battery powered IP42 presence sensor OCC sensor IA CM WH 10/1
  - Battery powered IP42 presence & daylight sensor OCC-DL sensor IA CM IP42 WH
  - Battery powered IP65 presence sensor OCC sensor IA CM IP65 WH
  - Battery powered IP65 presence & daylight sensor OCC-DL sensor IA CM IP65 WH
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem.

Interact Pro Enterprise (System Bridge Accessory with -SB option):

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1) and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- SB option in addition to occupancy and daylight sensing supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Requires compatible Gateway and internet connectivity for commissioning.
- For more information, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Emergency Options (ER100) (System Bridge Accessory with -ER100 option):

- Power Sensing (Factory default) – Recommended UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output
- Power Interruption Detection (Field option) – Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output

Radio only sensor (RADIO):

- Integral RADIO only sensor simply enables wireless mesh connectivity to the luminaire without any occupancy or daylight sensing.
- Ideal for applications where sensing functionality is managed by other Interact devices and the luminaire only needs to have wireless connectivity.

Wired Controls Options

Interact Office Wired (PoE):

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on Personal Control, Space Management, wayfinding, room/desk reservation and offers open APIs for light control and data exchange.
- PoE lighting controller is accessible from below.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- Optional integral emergency controller and battery pack provides 600lm nominal output.
- Test switch and indicator light mounted on side of chassis on one end.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of 20C to 30C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information on Interact Office Wired, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Interact Office Wired (PoE), Static White:

- A wireless IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- View all your projects under one dashboard and easily compare insights from multiple projects in one view.
- Compatible Zigbee Green Power wall dimmer and wireless Occupancy or Daylight & Occupancy sensors available.
- Use Interact Office software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Supports advanced IoT Apps on wayfinding, room/desk reservation and offers open APIs
- Requires compatible Interact Office Gateway and internet connectivity for commissioning.
- For more information on Interact Office Wireless, visit: www.interact-lighting.com/office or www.usa.lighting.philips.com/systems/system-areas/offices.

Item Name	Interior Sconce Light Fixture
Item Type	Jelly Jar Sconce
Description	Die Cast aluminum jelly jar sconce with cage. Heat and shock resistant optical chamber. Lamps supplied with fixture.
Manufacturer	Signify / Stonco
Model	RoughLyte LED VWXL14NW-G18 VGC100
Dimensions	4.3"W x 11.4"H
Finish	Die Cast Aluminum with Clear Glass Globe
CSI #	265100 Interior Lighting
Omniclass #	22-265100 Interior Lighting
Lamp Type	LED
Lamp Kelvin	4000K
Voltage	120-277V
Mount	Wall
On Dimming System	No
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1390
Lens/Shade	Clear Glass Globe
Lamp CRI	70
Finish	Die Cast aluminum, powder coat white
Warranty	5-year limited
Notes	Lamp Life: 50,000 Efficacy: 102 LPW Wattage: 14

Notes:

End your search for durable lighting that will really last, choose Stonco RoughLyte LED, available in 14W and providing up to 1390 lumens. Applications include wall and ceiling mounted exterior surfaces and Roughlyte LED fixtures guard against moisture and debris (for globe down mounting only).

Ordering guide

Example: VCXL-14-NW-G1-8

Luminaire	Wattage	Generation	Voltage
	14	NW-G1	8
VCXL Ceiling 4" box mounted **VWXL** Wall 4" box mounted	**14** 14W	**NW-G1** Neutral White, 4000K, 70CRI, Generation 1	**8** 120-277VAC

Specifications

Housing

Die-cast aluminum back plate and heat sink sealed with a thermal shock-resistant frosted glass globe and a die cast guard secured with stainless steel hardware.

Electrical

Constant current driver with efficiency >85% at full load. Available in 120-277V. IP65 compliant driver. RoHS compliant.

LED Board and Array

1 CoB (chip on board) LED. Color temperature 4000K. Minimum CRI of 70.

Mounting

Built in junction box with 5" mounting flanges and 1/2" NPT for threaded conduit on the sides.

Energy Saving Benefits

System efficacy up to 102lms/W with significant energy savings over incandescent luminaires.

Listings

UL/cUL listed to the UL 1598 standard, suitable for Wet Locations. Suitable for use in ambient from -30° to 40°C (-22° to 104°F).

Product is DesignLights Consortium® qualified for the wall mount version.

Finish

Shot blasted aluminum finish (As casted appearance)

Limited Warranty

Luminaires are covered by a 5-year limited warranty. See philips.com/warranties for details.

LED Wattage and Lumen Values

Ordering Codes	Total LEDs	Drive Current (mA)	Color Temp.(K)	Average System Wattage[1]	Type VS		
					Lumen Output[1,2]	Bug Rating	Efficacy (LPW)
VC/VWXL14-NW-G1-8	1	350	4000	14	1390	B1-U3-G1	102

1. Wattage and lumen output may vary by due to LED manufacturer forward volt specification and ambient temperature. Wattage shown is average for 120V through 277V input. Measured wattage may vary due to variation in input voltage.
2. Lumen values based on photometric tests performed in compliance with IESNA LM-79.

Predicted Lumen Depreciation Data

Predicted performance derived from LED manufacturer's data and engineering design estimates, based on IESNA LM-80 methodology. Actual experience may vary due to field application conditions. L70 is the predicted time when LED performance depreciates to 70% of initial lumen output.

Calculated per IESNA TM21-11. Published L70 hours limited to 6 times actual LED test hours.

Ordering Codes	Ambient Temperature °C	System Current	L_{70} per TM21[1,2]	Lumen Maintenance @ 60,000hrs
VC/VWXL14-NW-G1	25C	350mA	>54,000	86%

1. L70 is the predicted time when LED performance depreciates to 70% of initial lumen output.
2. Calculated per IESNA TM 21-11. Published L70 hours limited to 6 times actual LED test hours.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Strip Light
Item Type	Surface Mounted Wrap Strip Light
Description	4' - "WNLED" Surface Mounted
Manufacturer	Cooper Ligthing/Metalux
Model	4WNLED-LD4-40SL-F-UNV-L835-CD1-U
Dimensions	7-5/8"W x 48"L x 2-1/2"H
CSI #	22-265100 - Interior Lighting
Omniclass #	265100 - Interior Lighting
Dimming Type	0-10V
Mount	Surface Mount
On Dimming System	Yes
Lens/Shade	Frost Acrlic Lens
Fixture Input (Max. Watts)	36
Lamp Type	LED
Lamp Kelvin	3500K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	4062
Finish	White
Lamp CRI	85+
Warranty	Five Year Warranty
Notes	Efficacy: 125.1 Lamp Life/Fixture Life: 60,000 Hrs

Product Specifications

Construction
- Housing consists of die formed cold rolled steel
- Ends formed with the housing for strength and provisions for continuous row aligners.
- Steel end plates with 7/8" KO and light-seal embossment
- Driver cover can be removed without tools

Controls
- WNLED has a standard 0-10V continuous dimming driver. Works with most 0-10V control/dimmer.
- Combine with energy saving products like occupancy sensors, daylighting controls and lighting relay panels to maximize energy savings
- Dimming range is 10% to 100% ; varies by control device

Electrical
- LED's available in 3000K, 3500K, 4000K and 5000K with a min. 80 CRI
- Projected life at 70% lumen maintenance is nearly 150,000 hours with TM21 rating up to L88 > 60,000 hours
- Electronic drivers are 0-10V dimming at 120-277V, 347V, and 480V applications

Emergency Battery Pack Option
- Optional 120V-277V integral emergency battery pack at 7 or 14-watts
- The 90-minute batteries provide constant power to the LED system, ensuring code compliance
- The patented EZ Key prevents accidental discharge of the battery during installation

Finish
- Multistage iron phosphate pretreatment ensures maximum bonding and rust inhibitor
- High reflective paint after fabrication, baked white enamel finish is standard

Channel/Wireway Cover
- Die formed heavy gauge steel
- Tight fit for ease of maintenance

Shielding
- Acrylic, high performance, frost blend
- Sides have internal linear prisms and bottom has pyramidal prisms for brightness control

Installation
- Fixture may be surface, pendant, or stem mounted.
- See accessories below for ordering information

Compliance
- Indoor luminaires are cULus listed for 25°C ambient environments, damp location listed, RoHS compliant, and LED modules comply with IESNA LM-79 and LM-80 standards
- DesignLights Consortium® Qualified and classified for DLC Standard, refer to www.designlights.org for details
- Suitable for use in clothes closets when installed in accordance with the NEC 410.16 spacing requirements
- Can be used for State of California Title 24 high efficacy luminaire

Footnotes

1 8' tandem units are double nominal lumens shown. Available in 50L (10,000lm) and 70L (14,000lm) flux packages
2 Nominal total delivered lumens
3 SDIM option not available on 50L and 70L flux options
4 Non-Dim driver option available only on the 2' 3000lm OWL230L.
5 EMLED option not available for 347V 5000lm, 7000lm, 8' 10,000lm and 8' 14,000lm, and 2' models
6 Failure to properly select the "BAC" suffix could result in you receiving product that is not BAA compliant product with no recourse for an RMA or refund. This BAC designation hereunder does not address (i) the applicability of, or availability of a waiver under, the Trade Agreements Act, or (ii) the "Buy America" domestic content requirements imposed on states, localities, and other non-federal entities as a condition of receiving funds administered by the Department of Transportation or other federal agencies.
7 Consult Signify to confirm whether specific accessories are BAA-compliant.

Accessories[7] (order separately)

- **CS-400 –** Rigid Canopy
- **CS-500 –** 42° Top Swivel Canopy
- **CS-12 –** 12" Stem
- **CS-18 –** 18" Stem
- **CS-24 –** 24" Stem
- **CS-30 –** 30" Stem
- **CS-36 –** 36" Stem
- **CS-48 –** 48" Stem
- **MD360 –** 120/277V field installed occupancy sensor
- **MD360-347 –** 347V field installed occupancy sensor

Stems 3/8" Trade Size (5/8" O.D.).
Will Work with 1/2" trade size K.O.'s.
Locknuts included.

Replacement Lenses

- **2'** OWLED824
- **4'** OWLED848
- **8'** OWLED848 (2/fixture)

OWL LED wraparound

2', 4', or 8', 3000, 4000, 5000, or 7000 lumens

Features

- Tapered shape provides appearance of reduced depth.
- Durable 100% frost acrylic lens shields LEDs from direct view.
- Unique 2' 4000lm configuration can displace a 4' 2x28W T5 fluorescent with 50% smaller carbon footprint.
- 8' tandem 10,000lm (50L) and 14,000lm (70L) units ideal for larger applications.
- Long life LEDs provide 50,000 hours (L70)[1] maintenance free system life.
- Ceiling or suspended mounting.
- Snap in LED pan and driver support is tool free for ease of installation.
- Continuous row mountable.
- 5000lm version capable of providing similar light levels to a 2-light 32W T8 strip while using 15% less energy.[2]
- Continuous 0-10v and 100/40 step dimming options available.
- Minimum operating temperature of -20°C.
- Enclosed lens minimizes penetration of dust, insects and other debris into the lamp compartment.
- Fully enclosed wiring and LED diodes.
- 5 year manufacturer's limited warranty.[1,3]
- DLC listed.[4]

Finish

- Housing and end plates are multi-stage phosphate treated for maximum corrosion resistance and finish coat is high reflectance baked white enamel.

Shielding

- Pattern 12 prismatic acrylic diffuser is specially designed to provide peak performance while minimizing pixilated glare.

Electrical

- LED boards and drivers are RoHS (Restriction of Hazardous Substances) compliant.
- High power factor solid state driver available with non-dimming, 0-10V dimming, and 100/40 step dimming options.
- Total system life rated at 50,000 hours.
- Maximum ambient temperature of 25°C.
- Suitable for cold locations – minimum ambient temperature of -20°C.

Materials

- Heavy gauge cold rolled steel housing, end plates, and LED pan.

Labels

- cETLus listed.
- Suitable for damp locations.
- Many luminaire components, such as reflectors, refractors, lenses, sockets, lampholders, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur based chemicals, petroleum based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility.

Footnotes:

1. Based on 25°C ambient operating temperature.
2. OWL450L840 input power is 53W vs a 2-light F32T8 HPF ballast at 277V drawing 62W.
3. Visit www.signify.com/warranties for complete warranty information.
4. OWL luminaires are Desiglights Consortium® qualified. Please see the DLC QPL list for exact catalog numbers (http://www.designlights.org/QPL).

Item Name	Strip Light
Item Type	Rebal Bar
Description	DynaCove Interior SO" normal power linear cove light. 4' lengths to be strung together for total length. 1' lengths specified if needed. Beam Angle 120 deg
Manufacturer	Philips/Colorkenetics
Model	Cove Light: DCD.142.DABE & DCD.142.AABE Start Cable: CA-CAF-03050 Link Cable for 1': CA-CAL-00305 Link Cable for 5': CA-CAL-00150
Dimensions	48"L x 1.5"W x 3.1"H; 12" L x 1.5"W x 3.1"H
Color	White
CSI #	22-265100
Omniclass #	265100
Mount	Surface mounted in ceiling cove
On Dimming System	Yes
Fixture Input (Max. Watts)	4' - 12W
Lamp Type	LED
Lamp Kelvin	3000K
Voltage	200-300
Delivered Lumens (LED) or Mean Lumens (Non-LED)	574 per lf
Finish	White
Lamp CRI	85
Warranty	Five Year Warranty
Notes	Efficacy (lm/W): 54 @ 4’ Lamp Life/Fixture Life: 50,000 hrs

DynaCove Interior SO

The **DynaCove Interior SO** is a high power, white LED, indoor linear cove fixture. Available in 1' and 4' sections, it offers smooth linear dimming with ELV and 100-1% with most commercially available TRIAC dimmers . Featuring class-leading output, robust housing, and several color temperature options, it is the perfect choice for any cove, millwork, or signage application.

SPECIFICATIONS

Color Temperature	2,700K, 3000K, 3500K, 4000K
Beam Angle	120º
Max Fixture Runs	50' (15m) @ 120V / 100' (30m) @ 240V+
Power Consumption	12w (1') / 48w (4'), Optional 5W per foot ASHRAE Compliant
Total Lumens	590 (1') @ 2700K / 2295 (4') @ 3000k
Efficacy (lm/W)	54 @ 4', 3000K
CRI	85 @ 3000K
Lumen Maintenace	70% @ 50,000 Hours
Finish	Anodized Brushed Aluminum
Housing	Aluminum; Frosted Polycarbonate Lens
Operating Temperature	-4°F to 113°F (-20°C to 45°C)
Operating Voltage	90-135VAC / 200-300VAC
Dimming	TRIAC or ELV
Fixture Connectors	Integral, 3 Pin Male & Female Connector
Rating	IP 20, Dry Location
Warranty	5 Years
Weight	1' 0.7 lbs (0.3 kg) 4' 2.6 lbs (1.2 kg)
Dimensions	W 1.5" x H 2.0" x L 12"/ 48" (39 mm x 52 mm x 305 mm / 1,220 mm)

HALO

DESCRIPTION

Ideal for task, accent, office, cove, and utility, under and above cabinet lighting display, the Halo Undercabinet low-profile design delivers maximum energy savings with easy installation. Each fixture is equipped with a seleCCTable switch that allows users to customize color temperature of 2700K, 3000K and 4000K in 90 CRI. Fixtures are available in 9", 18", 24", 36" and 48" lengths with Matte White and Matte Black finishes. Each unit has an integrated on-off switch and offers smooth dimming down to 5% using standard dimmers**. Multiple wiring options make installation a simple task.

SPECIFICATION FEATURES

Even Light Distribution
Specialized optical system consisting of tightly clustered proximity phosphor LEDs, advanced optical chamber coatings and lens materials resulting in soft illumination with high efficiency. These fixtures are ideal for task lighting.

Color Temperature
3 position external SeleCCTable color temperature switch allows users to choose between 2700K, 3000K, and 4000K and adjust per their lighting needs.

Wiring Flexibility
Use any combination of three different wiring methods:Bring flexible conduit or Romex directly to the 120V fixture. Conduit connector and romex strain relief hardware is included with each fixture. Otherwise users can utilize the available splice box and plug in connectors (sold separately) and to link additional fixtures to the circuit (See instructions sheets for more detail).* Link any combination of fixtures up to 450W total load using connectors.

Durable Low Profile Housing
Extruded aluminum housing and color matched end caps with a sleek over all height less than 1".

Mounting
Each unit is secured directly to the mounting surface with two integral fasteners keeping installation costs and efforts low. Can be mounted in horizontal and vertical orientations.

Optional Accessories
Optional splice box has a connection port on each side to allow for runs in either or both directions. Includes Romex/ 1/2" conduit connector. Various connector cable options and lengths provide flexibility of mounting location.

Finish Options
Fixtures and accessories are available in both White (P) and Matte Black (MB) finishes.

Electronic Driver & Dimming
Electronic driver provides flicker free light output and noise free operation. Designed for continuous dimming (ELV or TRIAC) down to 5% with compatible dimmers.**

Compliance & Certifications
- cULus listed
- Can be used to meet IECC, ASHRAE commercial and residential standards
- FCC Class B residential
- Damp location listed
- ENERGY STAR® certified
- Title 24
- Closet-Rated

Factory Defaults
The fixtures are factory pre-set to 3000K.

Warranty
Five-year limited warranty, consult website for details.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Strip Light
Item Type	Low Profile Undercabinet
Description	2' Undercabinet Strip w/Switch (connecting accessories available for connecting fixtures, see spec sheet)
Manufacturer	Signify/Daybrite
Model	LINCS100E L28 930 MB DIM
Dimensions	28.16" L x 4.37" W x 1.16" H
Finish	Matte Black
CSI #	265000 - Lighting Fixtures
Omniclass #	22-265000 Lighting Fixtures
Dimming Type	Standard Incandescent Dimmer
Trim	Black
Reflector	None
Mount	Surface/Undercabinet
On Dimming System	No
Lens/Shade	Acrylic
Lamp Type	LED
Lamp Kelvin	3000K
Voltage	120V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	660
Finish	Matte Black
Lamp CRI	90
Lead Time	In stock to 4 weeks
Warranty	Five year warranty
Notes	Efficacy: 110 Lamp Life/Fixture Life: 50,000 hrs

Linear

LINCS LED undercabinet

10", 19", or 28" lengths

Project:

Location:

Cat.No:

Type:

Lamps: Qty:

Notes:

Day-Brite / CFI LINCS LED undercabinets enable flexibility to suit the needs of many applications including office, healthcare, educational, and residential. The state of the art LED system provides high resolution lighting with excellent color rendering for high visual acuity on the task plane. The modular design allows field application of control options and continuous connectivity for ease of configuration and installation. LINCS LED is an ideal choice where high performing undercabinet lighting is specified.

Ordering guide

Example: LINCS100EL28935UNVWHGDIM

Family	Length	Color	Voltage	Finish	Driver	Options
LINCS100E	L28	930	UNV	MB	DIM	
LINCS100E LINCS LED Energy Star	**L10** 10" **L19** 19" **L28** 28"	**930** 3000K, 90 CRI **935** 3500K, 90 CRI	**UNV** Universal Voltage 120-277V **120** 120V **277** 277V	**WHG** White Glossy **MB** Matte Black **SA** Satin Aluminum **SWH** Antimicrobial White	**DIM** Trailing edge phase dimming (ELV)	**CSJT3**[1,2] SJT cord set hard-wired into back of fixture. UL listed as a portable fixture for use in office workstations (120V only) **OSC**[3,4] Integral occupancy sensor control for UNV linking **OSHL**[3,4] Integral occupancy sensor control for UNV, hard wired **RSW**[4,5] Rocker switch (on/off) for linked input power, controls only this fixture **RSLL**[4,5] Rocker switch for hard linked input power, controls fixtures in the linked circuit **RSH**[4,5] Rocker switch for hard wired input power, controls only this fixture **RSHL**[4,5] Rocker swtich for hard wired input power, controls fixtures in linked circuit **SBF** Slow blow fuse

Accessories (order separately)

Specify Qty. of Connectors Needed

QTY:	**LINCS1001**[6]	Wiring module
QTY:	**LINCS1001RSW**[6]	Wiring module with rocker switch
QTY:	**LINCS1002CO**[2,6]	Wiring module with duplex outlet
QTY:	**LINCS100PC3W**	3' Straight power cord, white
QTY:	**LINCS100PC6W**	6' Straight power cord, white
QTY:	**LINCS100ICSW**	6" Straight interconnect cord, white

Note: Power cords plug into left end of the luminaires.

Notes

1. LINCS fixtures with CSJT3 option can not be modularly connected.
2. 120V only.
3. OSC is not available with LINCS100EL10.
4. See controls table page 3.
5. Specify 120V or 277V only.
6. Specify voltage and finish for these accessories. Include voltage and finish codes from catalog matrix after "1" or "2", i.e. LINCS1001120WHGRSW.

LINCS100E LINCS LED undercabinet

10", 19", or 28" lengths

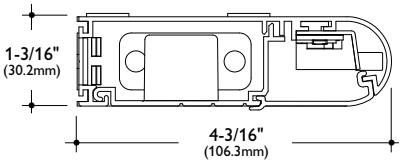
Features

- Miniature 1" deep profile
- Modular design with accommodating accessories for ease of installation and flexibility in the field.
- Optional wiring module with master on/off switch, duplex convenience outlet, or occupancy sensor
- Extruded aluminum design is durable, lightweight and corrosion resistant
- Available in a white, black, satin aluminum, or anitmicrobial white

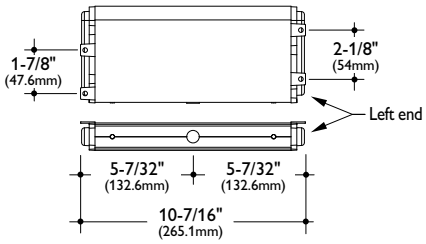
Specifications

- **Construction:** .060" extruded aluminum housing with injection molded polycarbonate endcaps and covers.
- **Reflector and Lens:** Acrylic textured lens to minimize lamp image on task surface.
- **Finish:** LINCS is available in either a white or black polyester powder-coat paint finish. In addition, LINCS can be selected with an anodized satin aluminum finish. Standard white painted and antimicrobial finishes have matching white end caps. Black endcaps are provided with the black painted or satin aluminum finishes.
- **Lamps:** LINCS is supplied with high efficiency LEDs with a color temperature of 3000K or 3500K and 90 CRI. 70% of initial illumination at 50,000 hours at 25˚C ambient. The LED board is field replaceable.
- **Listings:** cETLus Listed for direct-wire or portable installations. Damp rated. Energy Star® certified.
- **Electrical:** Luminaires are supplied with an integral, electronic Class "A" LED driver for 120V to 277V applications. Optional passive infrared occupancy sensor control (OSC) available.
- **Installation:** LINCS include male and female grounded connectors on each end to allow power conductivity with linking connector cord accessories. A UL recognized 3/8" flexible metal conduit/non-metallic sheathed wiring connector is supplied with the luminaire for direct-wiring into knockout in the back of the housing or through adapter plate at the left end. LINCS100-L19 and LINCS100-L28 models have a wiring access panel with a knockout to allow quick wiring of the first luminaire without opening the wireway cover. For portable installations, the LINCS100PC power cord plugs directly into the left end of the luminaire. It is not recommended that LINCS be plugged into a GFCI receptacle.
- **Warranty:** All luminaire components (except for the LED board and driver) are warranted against defects during the life of the original installation. The LED board and driver are warranted for 5 years from date of manufacture. Visit www.philips.com/warranties for complete warranty information.

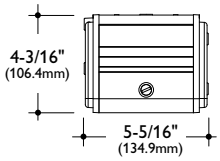
Dimensional Data



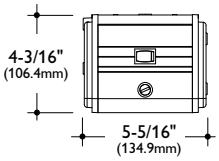
LINCS100L10



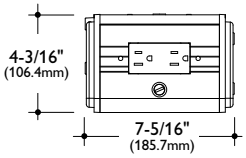
LINCS1001



LINCS1001RSW



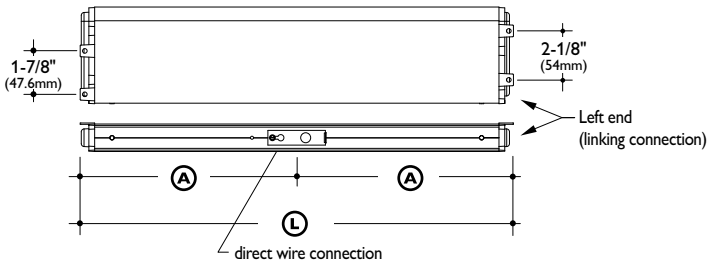
LINCS1002CO



Installation Notes:

- (1) End-plate supplied to allow direct wiring into left end
- When row mounting, allow 1" at end of a run connection of last fixture
- When using power cord, allow 3" at start of run
- Subract 7/16" for each end-cover removed in row mount applications.

LINCS100L19 and LINCS100L28



DIMENSION	L	A
LINCS100L19	19-1/4" (489.0mm)	9-5/8" (244.5mm)
LINCS100L28	28-1/16" (712.8mm)	14-1/32" (356.4mm)

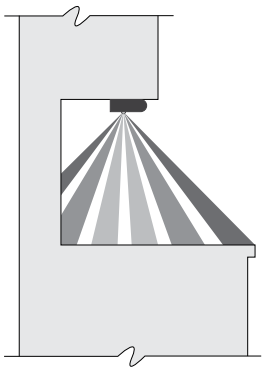
LINCS100E LINCS LED undercabinet

10", 19", or 28" lengths

Controls

				Control		
Option Code	**Description**	**Voltage**	**Wiring Type**	**Single Fixture**	**All In Circuit**	**Linked Thru Power**
OSC (standard)	Integral Occ Sensor - Linked Input Power, Linked Control	UNV	Linked		X	X
OSHL	Integral Occ Sensor - Hard Wired Power, Linked Control	UNV	Hard Wired		X	X
RSW (standard)	Rocker Switch - Linked Input Power	120V or 277V	Linked	X		X
RSLL	Rocker Switch - Linked Input Power, Linked Control	120V or 277V	Linked		X	X
RSH	Rocker Switch - Hard Wired Power	120V or 277V	Hard Wired	X		X
RSHL	Rocker Switch - Hard Wired Power, Linked Control	120V or 277V	Hard Wired		X	X

Wiring Type Describes whether power is linked to the left side of the fixture, or direct wired to the back of the fixture.
Control - Single Fixture The integrated device controls only this single fixture.
Control - All in Circuit The integrated device controls this fixture and all adjacent fixtures (i.e. the thru power is controlled from this fixture).
Linked Thru Power Power is linked to adjacent fixtures via the LINCS connectors.



Integral occupancy sensor control (OSC)

The OSC has a passive infrared occupancy (PIR) that has a field-adjustable time delay that that can be set for 30 sec., 10 min., 20 min., or 30 min. Connect building power to the LINCS luminaire with the OSC. All additional luminaires interconnected to that luminaire will be controlled by the single OSC.

HALO

DESCRIPTION

Ideal for task, accent, office, cove, and utility, under and above cabinet lighting display, the Halo Undercabinet low-profile design delivers maximum energy savings with easy installation. Each fixture is equipped with a seleCCTable switch that allows users to customize color temperature of 2700K, 3000K and 4000K in 90 CRI. Fixtures are available in 9", 18", 24", 36" and 48" lengths with Matte White and Matte Black finishes. Each unit has an integrated on-off switch and offers smooth dimming down to 5% using standard dimmers**. Multiple wiring options make installation a simple task.

SPECIFICATION FEATURES

Even Light Distribution
Specialized optical system consisting of tightly clustered proximity phosphor LEDs, advanced optical chamber coatings and lens materials resulting in soft illumination with high efficiency. These fixtures are ideal for task lighting.

Color Temperature
3 position external SeleCCTable color temperature switch allows users to choose between 2700K, 3000K, and 4000K and adjust per their lighting needs.

Wiring Flexibility
Use any combination of three different wiring methods:Bring flexible conduit or Romex directly to the 120V fixture. Conduit connector and romex strain relief hardware is included with each fixture. Otherwise users can utilize the available splice box and plug in connectors (sold separately) and to link additional fixtures to the circuit (See instructions sheets for more detail).* Link any combination of fixtures up to 450W total load using connectors.

Durable Low Profile Housing
Extruded aluminum housing and color matched end caps with a sleek over all height less than 1".

Mounting
Each unit is secured directly to the mounting surface with two integral fasteners keeping installation costs and efforts low. Can be mounted in horizontal and vertical orientations.

Optional Accessories
Optional splice box has a connection port on each side to allow for runs in either or both directions. Includes Romex/ 1/2" conduit connector. Various connector cable options and lengths provide flexibility of mounting location.

Finish Options
Fixtures and accessories are available in both White (P) and Matte Black (MB) finishes.

Electronic Driver & Dimming
Electronic driver provides flicker free light output and noise free operation. Designed for continuous dimming (ELV or TRIAC) down to 5% with compatible dimmers.**

Compliance & Certifications
- cULus listed
- Can be used to meet IECC, ASHRAE commercial and residential standards
- FCC Class B residential
- Damp location listed
- ENERGY STAR® certified
- Title 24
- Closet-Rated

Factory Defaults
The fixtures are factory pre-set to 3000K.

Warranty
Five-year limited warranty, consult website for details.

-1=Single Circuit **-S**=Secondary Circuit	**E**=Emergency Circuit **B1**=Surelite 7W 120-277V EM battery pack (EL7W) **B2**=Surelite 14W 120-277V EM battery pack (EL14W) **T**=UL924 EPC Emergency Bypass Relay	**-U**=Universal (120V-277V) **-1**=120V **-2**=277V **-3**=347V	**DD**=Standard 0-10V Dimming (1%-100%) **5L**=Fifth Light DALI (5%-100%) **L5**=Lutron 5 Series (LDE5-Series) 5%-100% EcoSys **LH**=Lutron HiLume (LDE1 series) 1%-100% EcoSys **W2A**=White Tuning, 0-10V Dimming (VividTune only)	**-F**=Satin White Diffuser **-D**=Satin Drop diffuser **-A**=Asymmetric Diffuser
Notes Secondary circuit similar to A/B switching. Price adder applies for "S" configuration.	**Notes** Battery available on fixture ≥ 4ft in length. B1-B2 and T options not compatible with 347V. Standard battery 4ft battery section located in the beginning of the fixture, but can be relocated using the linear product configurator. When configured with secondary circuit, battery test switch will be located in a plate on the direct side of the fixture.	**Notes** 347V only available with DD driver option.	**Notes** DD driver is standard. For non-dimming applications, the driver will default to full brightness if no connection is made to the capped dimming wires in the field.	**Notes** All lensing options are snap-in lenses.

Notes Additional lead-time may apply. Not available with 347V option.	**Notes** Contact factory for C and R options. W/S/B are standard.	**Notes** DD driver must be selected. Please refer to page 5 for additional detail required to specify integrated sensors. Integral option not available with regressed or drop lensing.

Neo-Ray 3" LED Surface Direct

Product Specifications

Construction
- Available in Flush and Regressed Housing
- Precision cut housing extruded from 6063 aluminum
- Precision cut & welded end-caps ensure a robust and clean construction
- Nominal 2' -12' illuminated sections used in individual fixtures and 2'-8' illuminated sections used in continuous runs

Finish
- Electrostatically applied polyester powder coat paint

LED Module
- Modular LED tray assembly comprising reflector and light engine with quick disconnect wire-harness for ease of installation and maintenance over the life of the luminaire

Light Engine
- Offered with two next generation Neo-Ray light engines delivering industry leading efficacy and long-life
- LED's are available in 2700K, 3000K, 3500K, 4000K or 5000K
- CRI options of either ≥80CRI or ≥90CRI (Lumen output will be affected - please refer to the lumen adjustment factor table)

LED Drivers
- LED system coupled with electrical driver
- Traditional electronic drivers are available for 120-277V and 347V applications

Controls and Integrated Sensors
- Equipped standard with a 0-10V continuous dimming driver. Compatible with most standard dimming devices
- Additional control types are available (DALI & Lutron) at an additional cost
- WaveLinx and Enlighted wireless sensors as well as stand-alone sensors available

Mounting
- Surface

Lengths
- Available in any length (2ft min) with a resolution of 1 foot. Max section length of 12ft (8ft max used on continuous runs and available for individual fixtures)
- Additional fixture lengths are available please consult factory. All lengths are nominal and do not include end caps.

Corners and Transition Pieces
- Corners and other transition pieces are fully luminous
- Constructed using precision mitered housing and lens components
- Extrusions are welded to ensure a precise and robust assembly
- Standard 90° horizontal corners as well as custom corners are available
- Consult online linear configurator or the factory for precise corner locations and for ordering
- Alternative transition pieces such as T's, Y's, X's, etc. are also available Ø

Direct Snap-In lensing Options
- Satin Flush - Flush, high diffusion glare-free lens
- Satin Drop - 1" Drop, high diffusion glare-free lens
- Asymmetric - Flush, low-glare Asymmetric lens
- Flush options ship with our patent-pending underlens solution, the proud lens ships with an injection molded end cap to eliminate light leak

Reflectors
- Precision formed cold-rolled steel reflectors with high reflectivity
- Ultra high reflectivity used with High Performance light engine

Lumen Maintenance
- 90% (L90) of initial light output at 61,000+ hrs
- 70% (L70) of initial light output at 237,000+ hrs
- Derived from TM-21 standard @25°C for worst case operating conditions

Custom Lumen Output
- Custom lumen output expressed option in Lumens per foot (e.g. -725D for 725 Lms/ft down). Refer to additional detail on page 4.

Electrical
- Dimming provided as standard
- Dimming wires capped with wire-nuts for non-dimming applications
- Optional battery backup options provided
- Default battery location is internal to fixture
- Default emergency section is 4ft in length and located at the beginning of the fixture unless designated elsewhere
- Estimated lumen output = battery wattage * min efficacy (see performance table)
- The EPC option will bypass local controls and dimming upon loss of normal power. This option is required when the fixture has both integrated sensors and emergency circuiting

Integrated Sensors
- Please reference page 5 for details

Weight
- 3.6 lbs per foot

Approvals
- cULus - listed for damp locations
- Meets NYC requirements
- Meets CCEC requirements
- Tested to IESNA LM-79 and LM-80
- Can be used for State of California Title 24 high efficacy luminaire
- DesignLights Consortium® Qualified and classified for DLC Standard and DLC Premium, refer to www.designlights.org for details and listed configurations.

Warranty
- Five year warranty standard.

Photometric Overview and Performance Data

Direct Performance Per Linear Foot at 3500K/80CRI

Nominal Output	Standard		High Performance		VividTune	
lms/ft	W/ft	lm/W	W/ft	lm/W	W/ft	lm/W
340	2.9	124	2.9	126	3	120
560	4.8	125	4.4	130	4.9	121
775	6.7	122	6.1	131	6.7	119
1000	8.8	120	8.1	128	8.9	116
1165	10.6	115	9.7	123	10.7	112

LUMEN ADJUSTMENT CALCULATIONS

Example 1 - Adjusted Lumen Output
Nominal Lumen Output selected = 1025 lms/ft (based on standard of 3500K/80CRI)
Lumen Adjustment Factor = 0.801 (2700K/90CRI desired)

Adjusted Lumen Output = Nominal Lumen Output x Lumen Adjustment Factor
Adjusted Lumen Output = 1025 lms/ft x 0.801 = 821 lms/ft

Example 2 - Custom Lumen Output based on Required Lumens Per Foot
Total light output (4ft) requirement of 2800 lms, desired CCT and CRI of 4000K/80CRI

Total required lumens per foot @ 4000K= 2800 lms / 4 ft = 700 lms/ft
Lumen Adjustment Factor = 1.018 (Requirement based on 4000K / 80CRI)

Total required lumens per foot @ 3500K / 80CRI = 700 lms/ft ÷ 1.018 = 688 lms/ft

Estimated efficacy = 121 LPW (find nearest value using table above)
Estimated power consumption = 688 lms/ft ÷ 121 lm/W = 5.69 W/ft

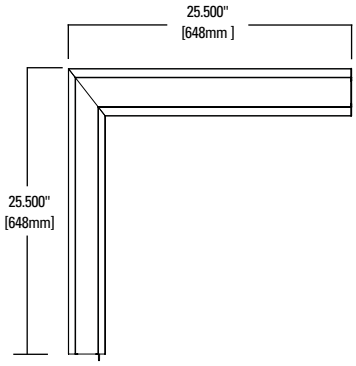
Custom Lumen Output

Total Light Output Range (lms/ft)

CCT	Lumen Adj Factors		Direct Output Range	
	80CRI	90CRI	80CRI	90CRI
2700K	N/A	0.792	N/A	269-923
3000K	0.943	0.815	321-1099	277-949
3500K	1.000	0.861	340-1165	293-1003
4000K	1.010	0.892	343-1177	303-1039
5000K	1.010	0.892	343-1177	303-1039

If your requirement is expressed in power consumption (W/ft) rather than light output, you can use the power to lumen output curves to convert power consumption to light output for specification. Efficacy for custom lumen outputs can be estimated using lumen output curves or with the use of our online custom lumen output tool.

Corner Transitions



Integrated Sensor Details and Placement

Sensor Type	Wireless	Sensor Integration	Sensor Mounting	Ordering Code
WaveLinx Pro	Yes	Integral to Fixture	Mounted in solid cover	WAA
WaveLinx Lite	Yes	Integral to Fixture	Mounted in solid cover	WAB
Enlighted	Yes	Integral to Fixture	Mounted in illuminated lens	LWIPD1
Stand-Alone SVPD1	No	Integral to Fixture	Mounted in solid cover	SVPD1

Optional standalone and wireless connected integrated sensors require use of the DD (0-10V) driver. WaveLinx and Enlighted sensors require additional system hardware (not provided) for full functionality.

Standard sensor layout is shown below. Please refer to sensor coverage pattern diagrams to ensure proper coverage for the application. Standard configurations are available in both individual fixtures and in continuous runs. Default spacing is based on the maximum fixture length of 12ft and can be changed to 8ft sensor spacing for additional coverage by selecting the 8ft max fixture length option when ordering.

For additional information integrated sensors and connected lighting, please visit Cooper Lighting Solutions's Connected Lighting Website.

VividTune™
color tuning solutions

Define 3 Pendant LED with VividTune Tunable White

VividTune tunable white luminaires deliver high-quality light in a broad range of continuously variable color temperatures and intensities. Create a dynamic environment by adjusting the ambient light warmer or cooler to influence mood, support the task at hand, or create a dramatic ambience. The ability to control correlated color temperature and intensity separately using simple controls is the next evolution of LED lighting for the commercial, educational, healthcare and hospitality space. The unparalleled flexibility and number of available lighting environments enable users to find the right light with tunable white.

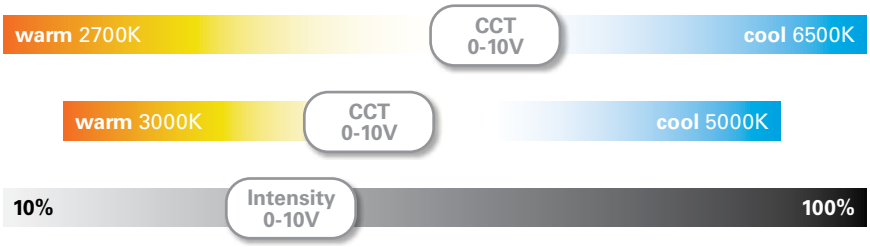
Controlling VividTune Tunable White

VividTune luminaires make tunable white more accessible by using simple and familiar controls. From wall dimmers to wireless controls, VividTune tunable white luminaires are compatible with industry standard 0-10V dimming controls. A single 0-10V dimming input is used to control intensity (brightness) while a second 0-10V dimming input is used to adjust CCT. For suggested control configurations, go to www.cooperlightingsolutions.com for tunable white application guides.



Example of Lumen Adjustment Calculation

S123DS-V1000D83050-X-UW2A-F-W
at 80 CRI tuned to 3500K

Adjusted Lumen =
published lm x adjusted lm factor

Adjusted Lumen = 4000 x 0.946

Adjusted Lumen = 3784 lm

** Lumen adjustment factors are for reference and may be different for each product selected. Refer to IES files for actual performance data on each.*

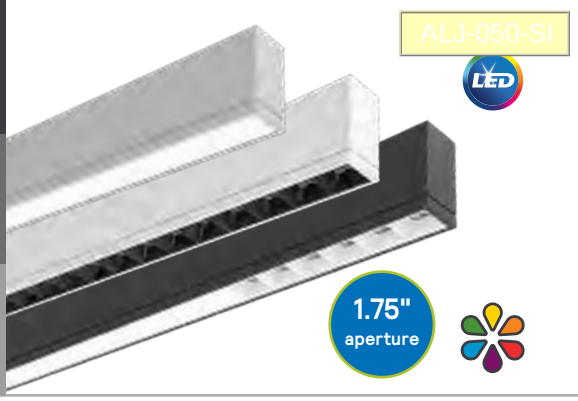
TruGroove

Surface micro (lens)



ALJ-050-SI

TruGroove surface micro (lens) drives performance beyond the edge. Innovative optics deliver exceptional uniformity and wide row spacing from a 1.75" aperture continuous line of light. Unique Quad Optic louver cells offer a wide range of options from graze to stack to asymmetric wall wash exceeding the demands of the most challenging spaces.

TruGroove surface micro includes AccuRender technology for the highest color quality at the highest efficacy

2ft x 2ft	25.1" [636mm]	23.80" ±0.2" [604 ±5mm]

Flat corners are 2ft x 2ft and can be used to create surface patterns.
Flat corners are 90°, contact Ledalite for custom angles and intersections.

TruGroove surface micro (lens)

Specifications

Optical System

Direct hemisphere: Light emitted from a linear array of downward-facing LEDs is laterally redirected using optical microstructures embedded in a layer of MesoOptics DX film to generate an optimal batwing distribution and a uniform continuum of light. The available Flush Silk lens is a value-oriented option that provides a lambertian distribution while maintaining a uniform continuum of light.

Additionally, Ledalite's unique Quad Optic Louver Cell provides 6 tailored optical distributions with reduced glare.

Housing

Post painted precision aluminum extrusion.

Endcaps

Diecast flat aluminum endcaps with integral groove to match housing.

Finish

High quality powder coated, available in standard Matte White, Black, Titanium Silver or Graphite Grey. TruGroove can also be specified in any custom color upon request for a one-time setup charge. Optional sensors (such as Interact Pro) available in white only.

Mounting

Surface: Fixture is mounted flush to surface using hidden brackets that attach to existing structure, variable between 0.6"-1.7" from end or joint.

Joints

Self-aligning joining system with hands-free pre-joining wire access.

Weight

Maximum 3.8/ft (surface mount), 10lb (2ft x 2ft surface mounted corner).

Electrical

Fixtures are factory pre-wired to section ends with quick-wire connectors and tested for all circuits and backup battery packs. LED boards and drivers are easily field replaceable with access from below the ceiling.

Standard Drivers

Advance Xitanium 0-10V, 1% Dimming.
Advance Xitanium DALI, 5% Dimming.
Advance Xitanium Sensor Ready, 1% Dimming.
PoE Lighting Controller (for PoE tunable white).
Lutron EcoSystem LDE1, 1% Dimming with Soft-On and Fade-to-Black.
Class 2 rated output. Consult Ledalite for other available drivers.

Standard Battery Packs

Bodine Battery Pack, 90 min, 10W, Class 2 rated output.
Lumen output = 10W x luminaire efficacy x 1.1. Typical output ~1200lm.

PoE Battery Pack, 90 min, 6W, Class 2 rated output.

Lumen output = 6W x luminaire efficacy. Typical output ~650lm.

Lumen Maintenance

LEDs have been tested by the manufacturer in accordance with IESNA LM-80-15. At an ambient temperature of 25°C, the LED lumen maintenance expectation according to IES TM-21-11 is:
L_{80} (10k) > 60,000 hours (Reported methodology).

Source Color

LEDs rated for color rendering of:
CRI $R_a \geq 90$, $R_9 \geq 50$, $G_a \geq 97$, $C_g \geq 90$
IES TM-30-18 : $R_f \geq 90$, $R_{f,h1} \geq 89$, $R_g \geq 99$, $R_{cs,h1} \geq -5\%$

SPD and TM-30-18 reports available upon request

Fixture to fixture color accuracy within:
2 SDCM for Static White luminaires
3 SDCM for Tunable White luminaires

Approvals

Certified to UL, IES & CSA Standards.

Select TruGroove micro configurations contribute toward satisfying features L03, L04, L06, L07 and L08 under the WELL v2 Building Standard®.

Environment

Rated for dry or damp locations in operating ambient temperatures of 0-25°C (32-77°F).

Many luminaire components, such as reflectors, refractors, lenses, and LEDs are made from various types of plastics which can be adversely affected by airborne contaminants. If sulfur-based chemicals, petroleum-based products, cleaning solutions, or other contaminants are expected in the intended area of use, consult factory for compatibility. Damage caused by sulfur, chlorine, petroleum-based solution or other contaminants are not covered under warranty. Not suitable for natatorium environments.

Warranty

Five-year luminaire limited warranty including LED boards and driver:
www.signify.com/warranties

QuickShip

10-day QuickShip available for most configurations upon request. More information available at:
www.signify.com/en-us/brands/ledalite/quickship

TruGroove surface micro (lens)

Wireless Controls Options

Interact Pro scalable sensor for Foundation, Advanced & Enterprise tiers (CS an evolution of SpaceWise):

- CS is a connected sensor with integral occupancy and daylight sensing and supports wireless mesh connectivity.
- The sensor works in the Foundation mode (similar to SpaceWise) when configured without a gateway or in an Interact Pro Advanced or Enterprise mode if a compatible gateway is used.
- Interact Pro includes an App, a portal and a broad portfolio of wireless luminaires, lamps and retrofit kits all working on the same system.
- Startup is implemented via Interact Pro App (Android or iPhone) & Bluetooth connectivity. The App provides flexibility to choose between a gateway or non gateway mode for setup.
- Setup with the gateway requires wired internet access to the gateway. It is possible to add a gateway at a later point.
- Prepare project configuration steps remotely and use IRT9015 remote onsite to identify and group devices together.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1).
- For more information on Interact Pro visit: www.interact-lighting.com/interactproscalablesystem

Emergency Options (R):

- Power Sensing (Factory default) – Recommended
- UL924 option requires unswitched power sense line, absence of voltage on the normal circuit triggers luminaire to 100% output.
- Power Interruption Detection (Field option)
- Detects AC power interruption >30ms triggers 90 minute emergency mode with luminaire at 100% output.

Interact Pro scalable sensor bundles for Enterprise tier (SB):

- SB option, in addition to occupancy and daylight sensing, supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Compatible with UID8451/10 wireless dimmer switch, SWS200 wireless scene switch, wireless Occ sensor (OCC SENSOR IA CM IP42 WH 10/1) and wireless Day/Occ sensor (OCC MULTI SENSOR IA CM WH 10/1).
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Requires compatible Gateway and internet connectivity for commissioning. For more information, visit: www.interact-lighting.com/office

Wired Controls Options

Interact Office Wired PoE (IO & SB):

- PoE based IoT connected lighting solution for large enterprises that span across multiple floors, buildings and require multiple gateways.
- Use Interact software and insights to increase building efficiency, achieve building wide integration and optimize space through occupancy analytics.
- Integral sensor option for occupancy sensing (PIR) and/or daylight harvesting available for additional energy savings.
- SB option, in addition to occupancy and daylight sensing, supports advanced IoT capabilities such as people estimation analysis, desk level temperature & humidity sensing, noise classification, and BLE beacon.
- Optional integral emergency controller and battery pack provides backup lighting in the case of a power outage. Test switch and indicator light mounted on the chassis.
- Emergency battery has a 3 month pre-installed shelf life, and must be stored and installed in environments of -20°C to 30°C (-4F to 86F) ambient, and 45-85% relative humidity.
- For more information on Interact Office Wired visit: www.interact-lighting.com/office

Note: Signify Interact Office Luminaires are not sold individually and are only compatible with Signify's Interact Office control system & software. The system requires a compatible back-end IT infrastructure for normal operations, please consult your Signify representative for additional information.

Tunable White:

- Tunable White is available in Interact Office Wired PoE luminaires. Other control options for Tunable White with DALI (DT6 or DT8), 0-10V, Lutron T Series or DMX control are available via an Engineered-to-Order (ETO) request.
- Signify tunable white solutions are designed to help maximize the influence of lighting on your daily life.
- Dynamic behaviors via scheduled lighting recipes mimicking daylight patterns or supporting biorhythms.
- Scene setting via lighting pre-sets based on various combinations of lighting color temperature and intensity.

1. 4ft Luminaire photometry has been conducted in accordance with IES LM-79-08. IES files can be downloaded by clicking the links in the table above, or online at ledalite.com. Luminaires with finishes other than standard white may result in a drop in flux and efficacy.
2. Unified Glare Ratio (UGR) is calculated in accordance with CIE 117-1995. Reference conditions of 4Hx8Hx1H and reflectances of 70/50/20% have been applied using the procedure described in CIE 190-2010.

Footnotes from page 1 ordering guide

1. Nominal values within a range. Not all lumen packages are available with all configurations. Consult photometry data for CRI, color temp, lumens & distribution of chosen configuration.
2. Not all wiring types are available with all configurations. Consult Ledalite for a complete list of available options.
3. 347V not available with Battery Pack, GTD, DALI, Lutron EcoSystem or Sensor Ready drivers or Interact Pro options. Battery packs available in modules > 4ft (lumen package limits may apply, check with Ledalite)
4. Interact Pro & Interact Office Wired (PoE) options require separate controls hardware by Signify.
5. Tunable White is available in Interact Office Wired PoE luminaires. Please enquire about options for Tunable White with DALI (DT6 or DT8), 0–10V, Lutron T Series or DMX control (extended lead times may apply).
6. Auxiliary Wiring not available with Interact Pro or Interact Office Wired (PoE) luminaires. Aux sections are wired to one fixture end only.
7. Flat corners are 90°. No asymmetric lens optics in corners. Please inquire about options for custom angles and intersections (extended lead times may apply).
8. Tunable White not available with Louver Cell optics.
9. Sensors are only available in white, but can be combined with any luminaire finish.
10. Luminaires are pre-wired to both ends with quick wire connectors at one end for standard circuit & battery pack trigger wire (if applicable). Each circuit has its own neutral conductor. All circuits are clearly labelled at each end.
11. Thru Wire options can provide either one additional set of (4) power and dimming wires (Black/White/Purple/Grey or Pink) or one additional battery pack trigger wire (Orange) through a selected module, please consult factory for other Thru Wire options.
12. This option is available on request. Other options not shown here may also be possible via a custom request. Extended lead times and minimum order quantities may apply, please consult factory.
13. UL924 listed sensor bypass relay is factory installed between driver & sensor. Must be ordered in same module as integral sensing option. Must be installed in conjunction with a UL1008 device.
14. Must order IRT9015 Interact commissioning remote with each system order.
15. Combination modules with Louver Cells and a Flush lens may be specified for modules ≥ 4ft by using the "Louver Cell Length" and "Louver Cell Position" options.

Note: Due to continuing product improvements, Ledalite reserves the right to change the specifications without notice.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Cove Light
Item Type	Cove Graze Light
Description	CoviO Graze wall washing and grazing lighting fixture with integral driver
Manufacturer	Cooper Lighting/iO
Model	GRZ-05L-930-30x60-ID-UNV-S-ADJ-STD-7F/1
Dimensions	7'L x 1.66"W x 2.43"H
Finish	Standard Silver
Material Composition	Aluminum Housing
CSI #	265000 - Lighting Fixtures
Omniclass #	22-265000 Lighting Fixtures
Dimming Type	0-10V
Mount	Adjustable Mount
On Dimming System	Yes
Fixture Input (Max. Watts)	TBD
Lamp Type	LED-I
Lamp Kelvin	3000K
Voltage	120-277V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	TBD
Finish	White
Lamp CRI	90+
Notes	Fixture Life: 28,000 hrs Efficacy: TBD

Product Features

Connected Systems · WaveLinx · wet location · powered by fifthlight

Top Product Features

- Wall washing and grazing lighting fixture with integral driver
- 9x optical distribution options
- Dimming to 1% (0-10V, 100% - 1%)
- 90+ CRI, 4 CCT options
- 1.5 step MacAdam ellipse binning for maximum color consistency
- Up to 1500 lm/ft (3 light level options at 500, 1000 and 1500 lm/ft)
- Up to 300 ft run from a single power drop

Order Information

SAMPLE ORDER NUMBER: **GRZ-10L-935-10x10-OD-277-S-SM-STD-50F**

Series	Lumen Package	LED CRI & CCT Standard CRI	Optical Distribution	Environment	Voltage
GRZ=CoviO Grazer LED	**05L**=500 lumens/ft (5 W/ft) **10L**=1000 lumens/ft (10 W/ft) **15L**=1500 lumens/ft (15 W/ft)	**927**=90 CRI, 2700K CCT **930**=90 CRI, 3000K CCT **935**=90 CRI, 3500K CCT **940**=90 CRI, 4000K CCT	**10x10=**10 deg x 10 deg **10x10FR=**10 deg x 10 deg, half frosted **10x30=**10 deg x 30 deg **10x60=**10 deg x 60 deg **17x30=**17 deg x 30 deg **17x90=**17 deg x 90 deg **30x60=**30 deg x 60 deg **50x60=**50 deg x 60 deg **ASYMx40=**Asymmetric x 40 deg	**ID**=Indoor **OD**=Outdoor	**UNV**=120-277V **277**=277V
Notes Architectural LED wall grazing and washing luminaire from iO LED.	**Notes** Nominal source lumens for 12" section. Delivered lumens by optical distribution coming soon.	**Notes** 90 CRI standard. 1.5-step MacAdam Ellipse standard.	**Notes** See page 3 for more details on optics	**Notes**	**Notes** For run specifications, 120V will be the default. For 277 V systems, selecting 277 will allow for longer run specifications. See pg 4 for details.

Housing Color	Mounting	Control Options	Length	Accessories
S=Standard Silver	**SM**=Surface Mount **ADJ**=Adjustable Mount	**STD**=0-10V (1%-100%) **ELV**=ELV **TR**=Triac **5LT**=DALI **WL**=WaveLinx wireless	___**F**=specify nominal run length in feet ___**F/1**=specify nominal run of 1ft fixtures ___**F/2**=specify nominal run of 2ft fixtures **1F**=12" Individual fixture **2F**=24" Individual fixture **4F**=48" Individual fixture	see pg X for accessories. Accessories must be ordered separately.
Notes Contact Cooper Lighting Soultions for custom color availability. Minimum order qty will apply.	**Notes** One mounting bracket/fixture is required. A 15 deg and 30 deg mounting angle plate is included with each bracket.	**Notes** "STD" control specifications include beginning of run power feed and junction box for line voltage connection. One is included for each individual fixture or run specification. All other control specifications include beginning of run control module. See page 6 for details and dimensions.	**Notes** Run specifications will include 1 power feed/run. Individual fixtures will include 1 power feed/fixture. Run specifications will maximize 2F fixtures unless /1 is specified. Contact customer service for custom run configurations.	**Notes**

Note: GRZ meets BAA requirements

Product Specifications

Construction

- Housing is powder coated, extruded aluminum
- All housing hardware is stainless steel
- Clear, UV stabilized polycarbonate injection molded lens with integral silicone gasket
- Proprietary IP66 exterior-rated, quick connect plugs
- Self-closing IP66 end cap to simplify installation and eliminate end of run shorting risks.
- Available in 1F (12"), 2F (24") or 4F (48") length.
- Weight: 1F=XX, 2F=XX or 4F=XX

Electrical

- Integral high performance constant current driver
- Standard 0-10V dimming (1% - 100%)
- Each fixture is configured for a line voltage feed while providing through wiring and quick connects for continuous mounting applications
- See pg 4 for Run Length Limits
- See pg 4 for Dimmer compatability chart

LED Optics

- Fixture equipped with proprietary 90+ CRI LED module available in 2700, 3000, 3500 or 4000K
- All LED CCTs within 1.5-step MacAdam ellipse
- Discrete high-powered LED array designed for best in class color over angle to provide clean illumination without undesirable color bands.
- 9 bi-directional optical control (perpendicular x parallel) options give designers maximum capability to deliver the perfect wash or graze for any installation. See pg 3 for more optical distribution details.
- 10x10 FR option includes integral frost on 1/3 of optic face to improve the appearance of tight installations where optimal spacing is not available with minimal impact to optical distribution, lumen output and CBCP.
- Luminaires tested per IESNA LM-79
- Color over Angle to be updated
- LM-80 data utilized in TM-21 lumen maintenance projections:
  L70 > 72,000 hrs
  L90 > 28,000 hrs

Mounting

- Surface mount bracket is stainless steel and is designed to align long runs by spanning two fixtures (includes optional angled mounting base plates to adjust output angle to 15° and 30°) and can be mounted in any direction (surface, ceiling or vertically).
- Adjustable mounting bracket is extruced, anodized aluminum. The adjustable bracket allows for +/- 60 deg aiming and can be mounted in any direction (surface, ceiling or vertically). Adjustable mounting bracket include a set screw to secure aiming. Additional brackets can be added for increased security.
- Power harness is required for connection to line voltage
- STD option includes beginning of run power harness + junction box for line voltage connection
- Control options include beginning of run power harness + dimming converter + junction box for line voltage connection
- Run specifications will include 1 power feed/run.
- Individual fixtures will include 1 power feed/fixture.
- Run specifications will maximize 4F fixtures unless /1 or /2 is specified.
- Contact customer service for custom run configurations.
- See page 4 for run lengths limits by output and voltage.

Finish

- Fixture housing is powder coated aluminum
- Standard color is silver with black end caps and wiring harness
- Contact Cooper Lighting Solutions for custom color availability (minimum order quantity will apply)

Compliance

- Luminaires are cULus listed for -40° to 50° C ambient environments
- Wet Location Listed
- IP66 rated
- 500 hour salt spray tested
- RoHS compliant
- Tested according to IESNA LM-79
- Meets Buy American standards

Environment

- Suited for indoor or outdoor installations
- Rated for operating temerature range of -40C to 50C

Control

- 0-10V dimming to 1% is standard
- Additional dimming protocols including ELV, TRIAC and DALI supported through an added control module at the beginning of the run
- Wireless control is supported through the Cooper Lighting Solutions WaveLinx system
- See pg 4 for run length limits

Warranty

- Five year warranty standard.

Mounting And Installation Notes

All CoviO mounts can be used in any orientation.

- ADJ mount requirements are
  - 1x ADJ mount for 1F and 2F fixtures
  - 2x ADJ mount for 4F fixtures.
- 2mm allen wrench must be used to secure aiming angle.
- additional mounts can be ordered for increased mounting and aiming security.
- SM brackets are designed to self-align CoviO fixtures in a linear run. See installation instructions for additional details.
- bracket stand-off can be removed for tight installations.
- Bracket can be cut in half for runs, end of run or curved runs.
- Jumper accessory is required for any bend radius > 20 deg (see pg 13 for details on jumper accessories)
- see pg 14 for additional run radius details

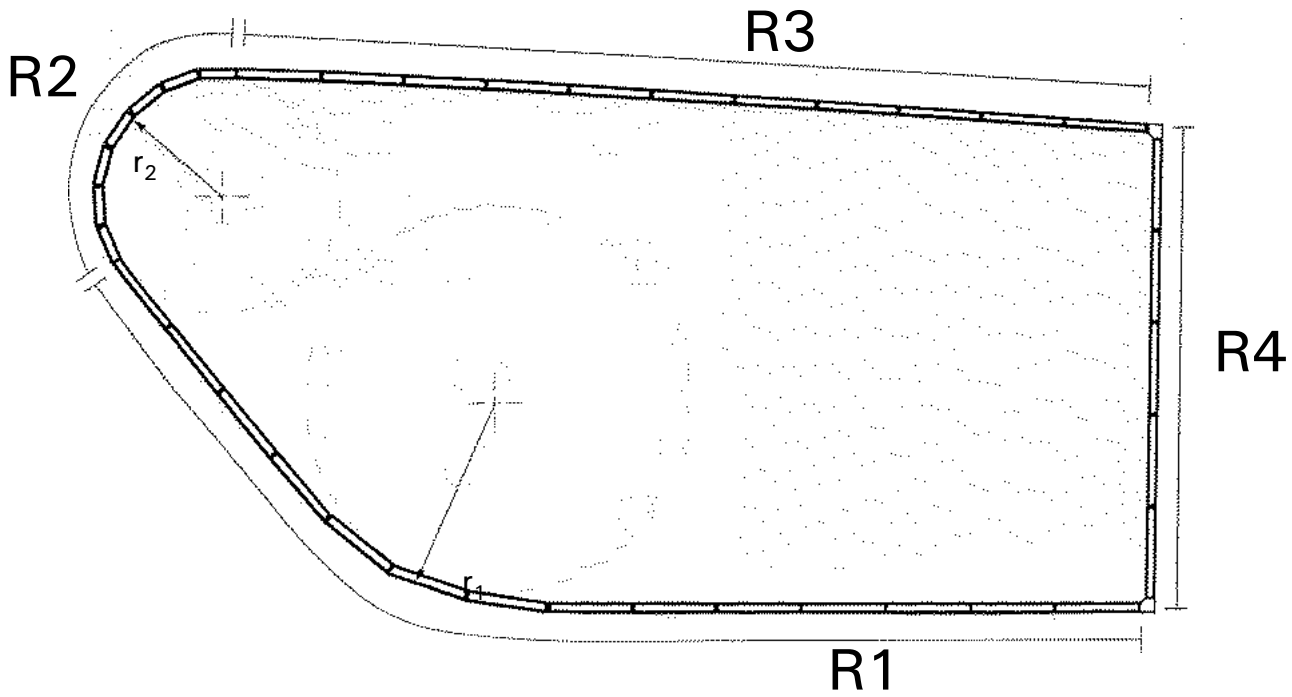
Run Specification Guidelines



Min allowable radius of cove for 1F Fixtures	r_2 =	35"
Min allowable radius of cove for 2F Fixtures	r_1 =	70"

Linear Run Specifications

Linear runs can be broken down into segments for easier specifications. Mounting brackets and power feeds are included in any run specifications. Jumper accessory is required of bend radius > 20°. For example, the architectural drawing above would be specified as 3 separate runs:

- R1 would be speficied with Length = 45F = 45 ft linear run (22x 2 ft fixtures + 1x 1 ft fixture + power feed)
- R2 would be speficied with Length = 7F/1 = 7 ft linear run of 1 ft fixtures (7 x 1 ft fixture + power feed)
- R3 would be speficied with Length = 33F = 33 ft linear run (16x 2 ft fixtures + 1x 1 ft fixture + power feed)
- R4 jumpers are required for angles > 20°.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Cove Light
Item Type	Cove Light
Description	Linear 7'
Manufacturer	Signify/Ledalite
Model	TC08L83050WN077DE
Dimensions	5"W x48"L x 1.78"H
Finish	Silver
CSI #	265000 - Lighting Fixtures
Omniclass #	22-265000 Lighting Fixtures
Dimming Type	0-10V
Trim	Silver
Reflector	Clear
Mount	Surface Mount
On Dimming System	Yes
Lens/Shade	120 degrees
Fixture Input (Max. Watts)	TBD
Lamp Type	LED
Lamp Kelvin	3000K
Voltage	120V
Delivered Lumens (LED) or Mean Lumens (Non-LED)	1250/lf (5000lm 4')
Finish	Silver
Lamp CRI	90+
Warranty	Five year warranty
Notes	Efficacy: 131 Lamp Life/Fixture Life: 80,000 Hrs

TruGroove

cove

ALJ-054-SI

TruGroove cove offers a highly controlled asymmetric light throw, evenly lighting the space and ceiling, not the wall and pocket. This creates a smoothly illuminated low-glare environment with a "quiet" ceiling, free of striations. By adjusting installation angles you can determine your distribution, and multiple lumen-package choices help you direct the right amount of light within your space.

Footnotes:

1. Nominal values within a range. Consult photometry data for CRI, color temp, lumens & distribution of chosen configuration.
2. Not all wiring types are available with all configurations. Battery Packs are available in the 4, 5, 6, and 8ft module sizes. Consult Ledalite for a complete list of available options.
3. CRI90 / 3500K option not available with the 6000lm/4ft lumen package.
4. The Advance DALI Driver is not available with the 1000lm/4ft and 1500lm/4ft lumen packages, and the 2ft and 2.5ft module sizes.

TruGroove cove

Optical system

The optical system contains arrays of LEDs edge lighting a low profile light guide panel, using total internal reflection to homogenize the sources. The microstructure surface of the light guide optimizes light extraction to create a controlled yet efficacious indirect asymmetric distribution.

Construction

- Housing: 20 Gauge CRS
- Luminaire Weight: Maximum 2.9lbs/ft
- High quality satin coat finish

Standard drivers

- Advance Xitanium 0-10V, 1-100%.
- Advance Xitanium DALI, 5-100%
- Lutron EcoSystem LDE1, 1-100% with Soft-on, Fade-to-Black
- Constant Current Class 2 rated output.
- Consult Ledalite for other available drivers.
- Power Factor: >0.90
- Total Harmonic Distortion: <20%

Standard battery pack

Bodine, 90 min, 10W, Class 2 rated output.

Battery Pack lumen output = 10W x luminaire efficacy x 1.1.

Typical output: 1300lm.

Lumen maintenance

LEDs have been tested by the manufacturer in accordance with IESNA LM-80-08. At an ambient temperature of 25°C, the LED lumen maintenance expectation according to IES TM-21-11 is:
L_{80} (10k) >84,000 hours (reported methodology).

Source color

LEDs rated for color rending CRI >80, R9 >0 and fixture to fixture color accuracy within 2 SDCM. Available 90 CRI option is rated for CRI >90, and R9 >50.

Mounting

Product can be mounting horizontally or vertically to focus the light throw in the correct orientation for the space. Fasteners supplied by others.

Validation

Luminaires are certified for safety to UL1598 and CSA C22.2 No.250.0 and comply with EMC regulations: FCC Part 15 and IECS-005 Issue 5.

Environment

Rated for dry or damp locations in operating ambient temperatures 0-30°C (32-104°F). Certain luminaire components may be adversely affected by contaminants. Damage caused by sulfur, chlorine, petroleum based solutions or other contaminants are not covered under warranty. Not suitable for natatorium environments.

Warranty

Five-year luminaire limited warranty including LED boards.

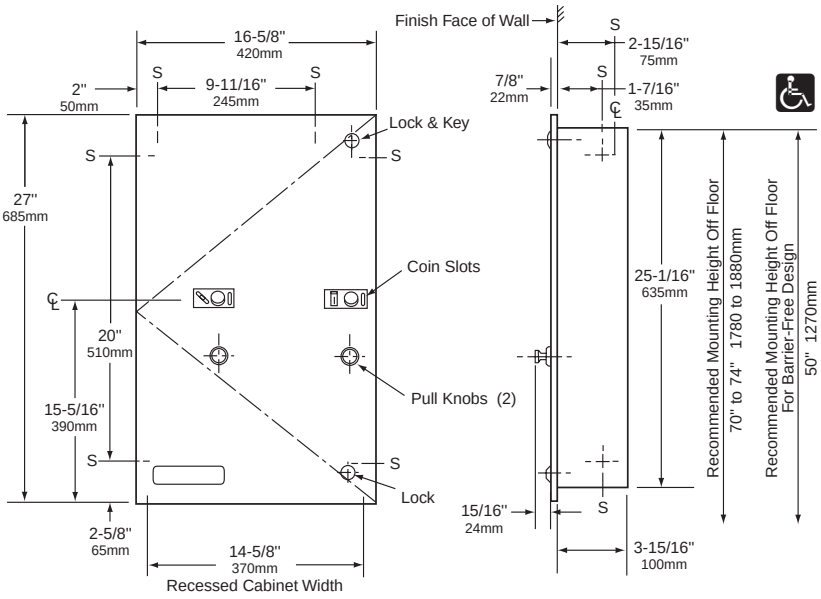
RECESSED NAPKIN/TAMPON VENDORS

B-3500 SERIES

Specify Model Required:

- ❑ Model B-3500C Free no-coin operation
- ❑ Model B-3500 25 25¢ single-coin operation
- ❑ Model B-3500X2 50 50¢ double-coin operation

Patented



Rough Wall Opening
15-1/8" (385mm) wide
25-1/2" (650mm) high
4" (102mm) minimum recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel. All-welded construction.

Door — 18-8 S, type-304, 18-gauge (1.2mm) stainless steel with satin finish. 7/8" (22mm) 90° return edges for maximum rigidity. Secured to cabinet with a concealed, full-length stainless steel piano-hinge. Equipped with a stainless steel cable door-swing limiter and two tumbler locks keyed like other Bobrick washroom accessories. Door has no brand-name advertising for products dispensed. Can be replaced in the field. International graphic symbols identify product dispensed and coin denomination.

Coin Mechanisms (2) — Impact-resistant ABS with satin-finish aluminum pull knobs. Coin mechanisms can be converted in the field to any standard coin denomination without having to purchase new coin mechanisms (no-coin, single-coin, or double-coin operation). Each coin box is equipped with a tumbler lock that opens with different key than furnished for door locks. Coinage is designated by symbols on metal plate, which can be changed only from inside the door.

Designer's Note: If change of coin denomination is desired after installation, order Bobrick Coin Plate Replacement Kit for the desired coinage.

OPERATION:

After coin is inserted in dispensing mechanism of patron's choice, pulling appropriate handle dispenses boxed sanitary napkin or tampon tube. Pull knobs operate with one hand, without tight grasping, pinching, or twisting of the wrist, and with less than 5 pounds of force (22.2 N) to comply with barrier-free accessibility guidelines (including ADAAG in U.S.A.). Coin slot of each dispensing mechanism is identified by an international graphic symbol. Capacity: 31 sanitary napkins and 22 tampons. Coin slots are blocked when supply is depleted. Cable door-swing limiter prevents damage to washroom accessories and walls. Vendor dispenses sanitary napkin packages measuring 3" x 1" x 4-1/4" (76 x 25 x 108mm) and tampon packages measuring 5-1/8" long x 11/16" diameter (130 x 17mm).

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

Revised 5/06 Printed in U.S.A.
© 2006 by Bobrick Washroom Equipment, Inc.

INSTALLATION:

Provide framed rough wall opening 15-1/8" wide x 25-1/2" high (385 x 650mm). Minimum recessed depth required to finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between flange and finish face of wall. Mount unit with shims between framing and cabinet at all points indicated by an *S,* then secure unit with #8 x 1-1/4" (M4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed sanitary napkin/tampon vendor shall combine two dispensing mechanisms in one cabinet to provide sanitary napkins or tampons at user's option. Dispensing mechanisms shall be pre-set at factory for_____ (insert one: Free, 25¢, or 50¢) operation, but shall be convertible in the field to allow the change of coin denomination without purchasing new mechanisms or removing unit from wall. Door shall be furnished with metal plates indicating specified coin denomination. Unit shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be 18 gauge (1.2mm); have 7/8" (22mm) 90° return edges; be secured to cabinet with a concealed, full-length stainless steel piano-hinge; and equipped with a stainless steel cable door-swing limiter and two tumbler locks keyed like other Bobrick washroom accessories. Pull knobs shall be operable with one hand and with less than 5 pounds of force (22.2 N) to comply with barrier-free accessibility guidelines (including ADAAG in U.S.A.). Each coin box shall be equipped with a tumbler lock that is keyed differently than door locks. Unit shall not carry brand-name advertising. Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Sanitary Napkin/Tampon Vendor shall be Model _____ (insert model number) of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

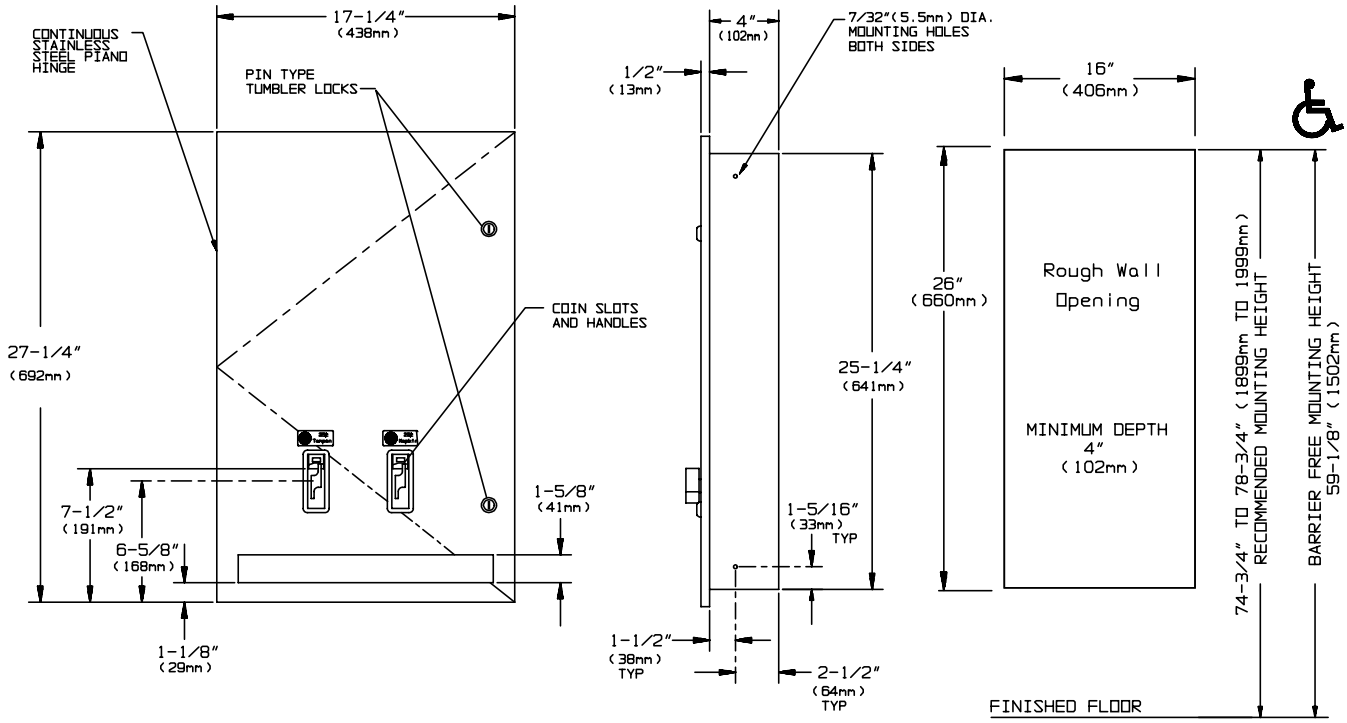
RECESSED DUAL SANITARY NAPKIN / TAMPON DISPENSER (PAGE 1 OF 2)



SPECIFICATION

Sanitary Napkin / Tampon vendor shall dispense 15 napkins and 23 tampons of specified sizes and shall have cabinet fabricated of alloy 18-8 stainless steel, type 304, 18 gauge; all exposed surfaces shall have № 4 satin finish and be protected during shipment with a PVC film easily removable after installation. Door shall be fabricated of 18 gauge same grade stainless steel and shall be attached to cabinet with a full length 3/16″ dia. (5mm) stainless steel multi-staked piano hinge and shall be held closed with two (2) tumbler locks keyed alike to other ASI Washroom Equipment. Internal coin-box shall be keyed differently than door locks. Dispensing mechanisms shall be fastener mounted internally to provide ability to change mechanisms for coinage denomination. Structural assembly of body and door components shall be of welded construction and have no exposed fasteners or welded seams. Weights for each feed track shall be supplied. Factory installed coin operation denomination shall be_____ (please fill in 25¢ or 50¢ or FREE) and add denomination as suffix to model № (ie: 04684-25).

Sanitary Napkin / Tampon Vendor shall be Model №04684-xx as manufactured by American Specialties, Inc., 441 Saw Mill River Road, Yonkers, New York 10701-4913

INSTALLATION

Unit is mounted in wall recess using №10 self-tapping screws (by others). Note that coin slot is 6-7/8" (175mm) above bottom edge of rough wall opening.

Rough Wall Opening required is……. 16"W x 26"H x 4"D minimum (406mm x 660mm x 102mm).

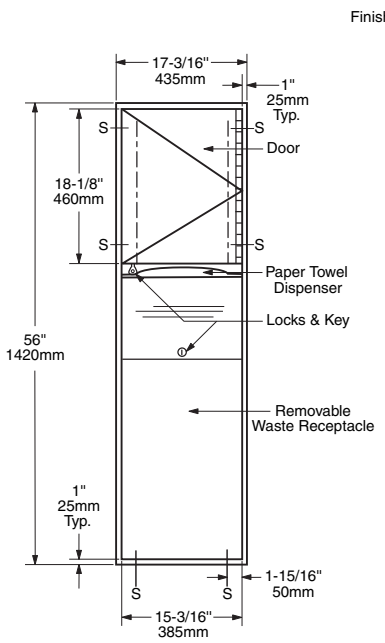
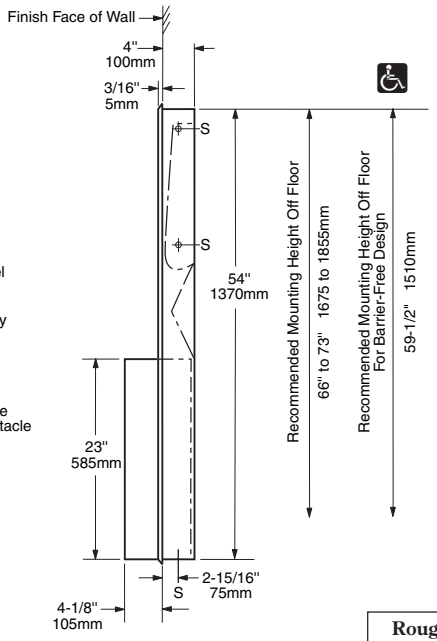
Technical Data

RECESSED CONVERTIBLE PAPER TOWEL DISPENSER AND WASTE RECEPTACLE

B-3944

Patent Pending





Rough Wall Opening

16" (405mm) wide
54-3/4" (1390mm) high
4" (102mm) minimum
recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, heavy-gauge stainless steel. All-welded construction. Exposed surfaces have satin finish.

Flange — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Drawn and beveled, one-piece, seamless construction.

Door — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Double-pan-back construction. Secured to cabinet with a full-length stainless steel piano-hinge. Equipped with a semi-concealed tumbler lock keyed like other Bobrick washroom accessories.

Paper Towel Dispenser — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Rounded towel tray has hemmed opening to dispense paper towels without tearing. Capacity: 600 C-fold or 800 multifold paper towels.

Waste Receptacle — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Front and sides of bottom and all top edges are hemmed for safe handling. Secured to cabinet with a tumbler lock keyed like other Bobrick washroom accessories. Equipped with interior hooks for optional vinyl liner. Capacity: 12 gal. (45.5 L).

OPERATION:

Paper towel dispenser accommodates C-fold or multifold paper towels without adjustment or use of adapters. To empty waste receptacle, unlock with key provided. Liner cannot be removed unless waste receptacle is unlocked from cabinet. Reusable vinyl liners are available as an optional accessory: order Bobrick Part No. 3944-12. This unit is field convertible to a Universal Roll Towel Dispenser by ordering Bobrick Part No. 3961-50 (Touch-Free Universal Roll Towel Dispenser Module). The waste capacity can be increased by ordering Bobrick part No. 368-60 (18-Gallon Waste Receptacle Module).

INSTALLATION:

Provide framed rough wall opening 16" wide x 54-3/4" high (405 x 1390mm). Minimum recessed depth required to finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between flange and finish face of wall. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an *S*, then secure unit with #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed convertible paper towel dispenser and waste receptacle shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Flange shall be drawn and beveled, one-piece, seamless construction. Door shall be secured to cabinet with a full-length stainless steel piano-hinge and equipped with a semi-concealed tumbler lock keyed like other Bobrick washroom accessories. Paper towel dispenser shall dispense 600 C-fold or 800 multifold paper towels. Removable waste receptacle shall be secured to cabinet with a tumbler lock, have front and side edges of bottom and all top edges hemmed for safe handling, and shall have a minimum capacity of 12 gal. (45.5 L). Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Convertible Paper Towel Dispenser And Waste Receptacle shall be Model B-3944 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

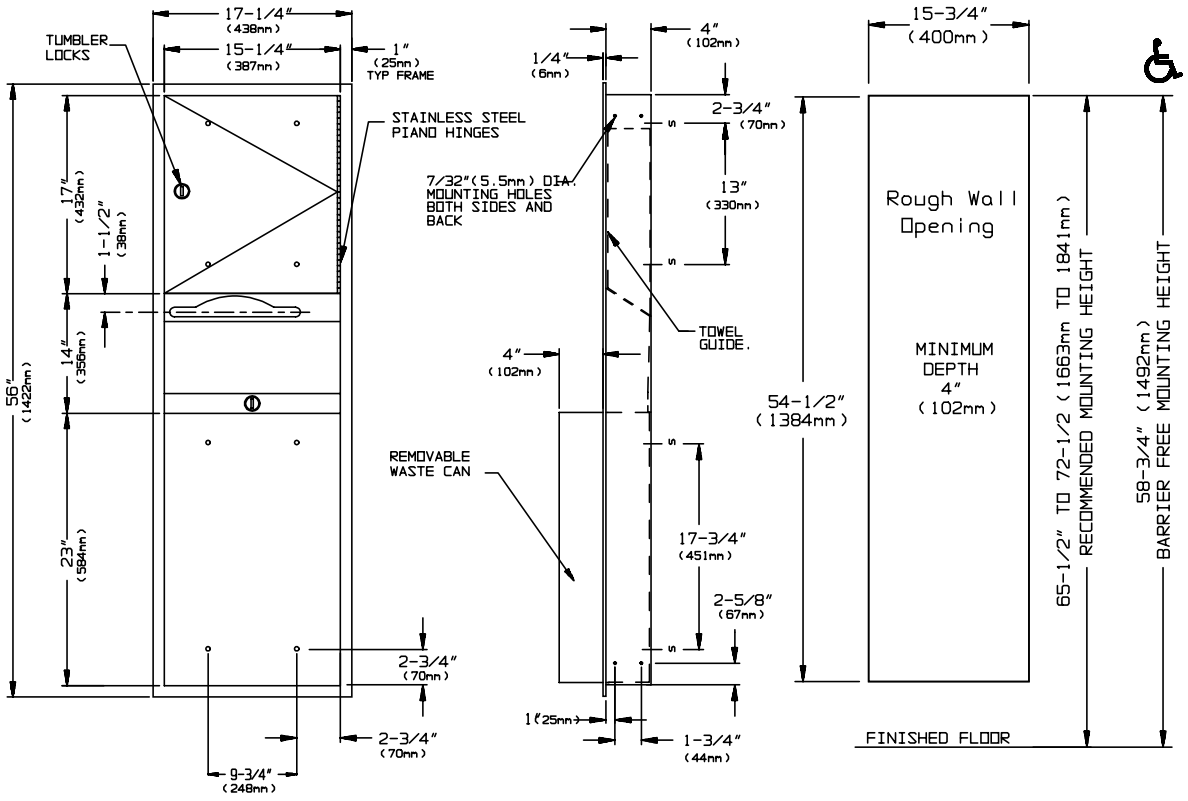
RECESSED PAPER TOWEL DISPENSER AND WASTE RECEPTACLE



SPECIFICATION

Paper Towel Dispenser and Waste Receptacle shall hold and dispense 800 standard multi-fold or 600 standard C-fold paper towels and shall have a waste capacity of 12 gal (46litres). Towel dispenser, door, frame, waste container and cabinet shall be fabricated of alloy 18-8 stainless steel, type 304, 22 gauge All exposed surfaces shall be № 4 satin finish and be protected during shipment with a PVC film easily removable after installation. Towel dispensing slot shall have a fully hemmed-in rolled edge for snag-free dispensing and user safety. Door shall be fabricated in double-pan construction with fiberboard filler and shall be attached to cabinet at side with a full length 3/16"dia. stainless steel multi-staked piano hinge and be held closed with a tumbler lock keyed alike to other ASI washroom equipment. Waste container shall have hemmed edges for safety and shall be retained by a tumbler lock keyed alike to other ASI washroom equipment. Face trim shall be 1" (25.4mm) wide formed from one piece with no mitres, welding or open seams and have 1/4" (6.35mm) square return to wall. Structural assembly of all components shall be of welded construction. Cabinet shall have no exposed fastening devices or spot welded seams.

Paper Towel Dispenser and Waste Receptacle shall be Model № 0469 as manufactured by American Specialties, Inc., 441 Saw Mill River Road, Yonkers, New York 10701-4913

INSTALLATION

Unit is mounted in wall recess using four (4) № 10 self tapping screws (by others) through concealed mounting holes provided. Note that top of rough wall opening is 3/4" (19mm) below top of unit.

Rough Wall Opening required is…….15-3/4"W. x 54-1/2"H. x 4"D. minimum (400mm x 1384mm x 102mm)

OPERATION

Towels are self-feeding until supply is depleted. Waste container is emptied manually on cycle determined by maintenance needs. Locked compartment prevents unauthorized access.

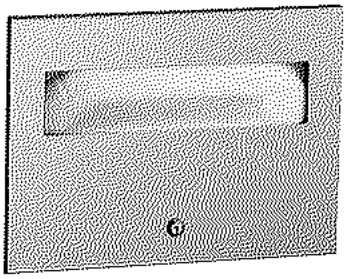
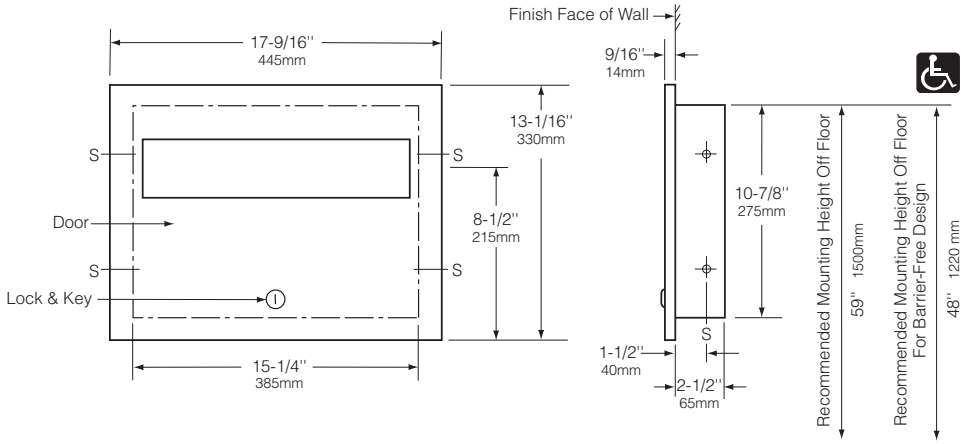
RECESSED TOILET-SEAT-COVER DISPENSER

B-3013





Rough Wall Opening
15-5/8" (395mm) wide
11-1/4" (285mm) high
2-3/4" (70mm) minimum
recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, heavy-gauge stainless steel. All-welded construction.

Door — 18-8 S, type-304, 18-gauge (1.2mm) stainless steel with satin finish. 9/16" (14mm) 90° return for maximum rigidity. Secured to cabinet with a concealed, full-length stainless steel piano-hinge. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

OPERATION:

Dispenses single- or half-fold paper toilet seat covers. To fill dispenser, door unlocks with key provided. Capacity: 500 toilet seat covers.

INSTALLATION:

Provide framed rough wall opening 15-5/8" wide x 11-1/4" high (395 x 285mm). Minimum recessed depth required from finish face of wall is 2-3/4" (70mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits in wall. Mount cabinet with shims between framing and cabinet at all points indicated by an *S,* then secure unit with four #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed toilet-seat-cover dispenser shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be 18 gauge (1.2mm); have 9/16" (14mm) 90° return edges; be secured to cabinet with a concealed, full-length stainless steel piano-hinge; and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Dispenser shall have a minimum capacity of 500 paper toilet seat covers. Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Toilet-Seat-Cover Dispenser shall be Model B-3013 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

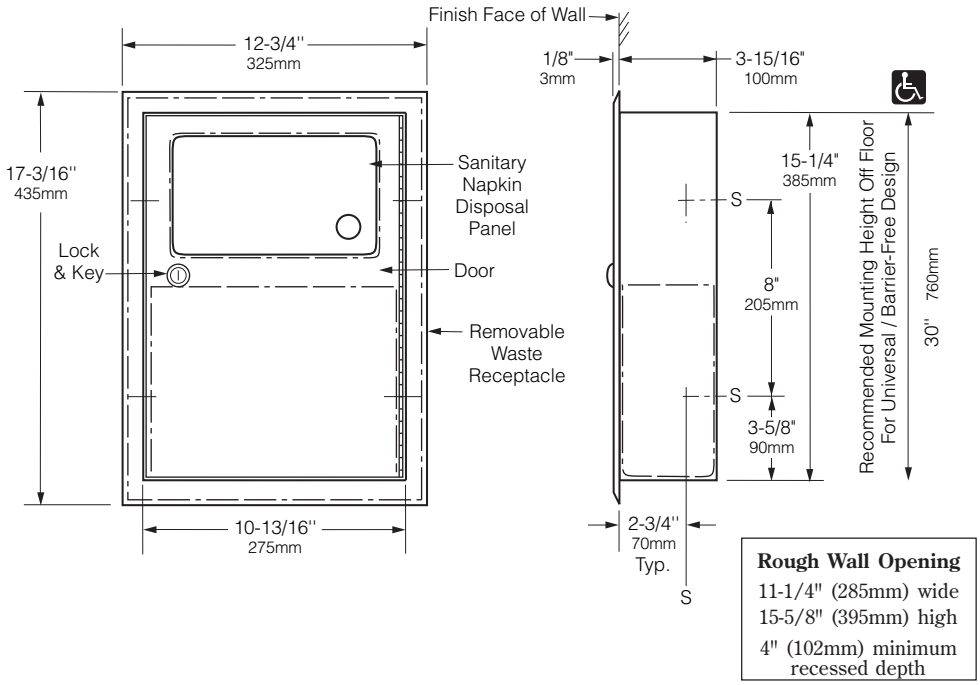
RECESSED SANITARY NAPKIN DISPOSAL

B-353



Rough Wall Opening
11-1/4" (285mm) wide
15-5/8" (395mm) high
4" (102mm) minimum recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, heavy-gauge stainless steel. All-welded construction. Exposed surfaces have satin finish.

Flange — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Drawn and beveled, one-piece, seamless construction.

Door — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Secured to cabinet with a full-length stainless steel piano-hinge. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

Disposal Panel — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Bottom edge hemmed for safety. Secured to door with a spring-loaded, full-length stainless steel piano-hinge. Equipped with an international graphic symbol identifying sanitary napkin disposal.

Waste Receptacle — Leak-proof, rigid molded polyethylene. Removable for servicing. Capacity: 1.2 gal. (4.6 L).

OPERATION:

Unit is equipped with a self-closing panel covering disposal opening. Napkin disposal is emptied by opening door with furnished key and removing waste receptacle. Disposable paper liners for the receptacle are available as an optional accessory: order Bobrick Part No. 353-12.

INSTALLATION:

Provide framed rough wall opening 11-1/4" wide x 15-5/8" high (285 x 395mm). Minimum recessed depth required from finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an *S*, then secure unit with four #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed sanitary napkin disposal shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be secured to cabinet with a full-length stainless steel piano-hinge and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Unit shall have a self-closing panel covering disposal opening. Panel shall have bottom edge hemmed for safety, be secured to door with a spring-loaded, full-length stainless steel piano-hinge, and equipped with an international graphic symbol identifying sanitary napkin disposal. Unit shall be furnished with a removable, leak-proof molded polyethylene receptacle. Receptacle shall have a capacity of 1.2 gal. (4.6 L). Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Sanitary Napkin Disposal shall be Model B-353 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

RECESSED SANITARY NAPKIN DISPOSAL

SPECIFICATION

Recessed Sanitary Napkin Disposal shall hold 1.5gal (5.7 liters) of dry solids. Upper door, waste container and cabinet frame shall be fabricated of alloy 18-8 stainless steel, type 304, 22 gauge. Structural assembly of body and door components shall be of welded construction. Upper door shall be hung on cabinet with a stainless steel spring hinge and have the international waste symbol on face. All exposed surfaces shall have a № 4 satin finish and be protected during shipment with a PVC film that shall be easily removable after installation. Face trim shall be of one piece construction 1" (25.4mm) wide with no welded miters and shall have square 1/4" (6.35mm) return to wall..

Recessed Sanitary Napkin Disposal shall be Model № 0473 as manufactured by American Specialties, Inc., 441 Saw Mill River Road, Yonkers, New York 10701-4913

INSTALLATION

Unit is mounted in wall recess using № 10 self tapping screws (by others) through concealed mounting holes provided. Note that top of rough wall opening is 3/4" (19mm) below top of unit.

Rough Wall Opening required is……..11-1/4" W x 15-3/4" H x 4" D. minimum (286mm x 400mm x 102mm)

OPERATION

Users push door to deposit waste material. Door is self-closing. Unit is emptied by removing can and removing disposable waxed waste paper bag which is furnished by others. Waste container is held in place by a "Z" clip retainer to prevent inadvertent dumping of contents. Safety-edged finger grip provides convenient grip for service.

All Other Size Mirrors

Designer's Notes:

1. Special-order sizes available on request.
2. Maximum size mirror available, 72" x 60" (183 x 152cm); minimum size, 12" x 12" (30 x 30cm).
3. All Bobrick framed mirrors are manufactured to overall width and height dimensions. EXAMPLE: A 24" x 36" (61 x 91cm) mirror will be furnished 24" x 36" (61 x 91cm) outside-of-frame to outside-of-frame.
4. To specify special sizes use Series Number followed by width then height in inches. EXAMPLE: B-165 2024.
5. Bobrick framed mirrors are manufactured to a tolerance 1/8" (3.2mm).
6. For sufficient space to lift mirror onto wall hanger(s), provide 3-1/4" (85mm) minimum clearance above center line of mounting screw holes.
7. Provide 1" (25mm) minimum clearance at bottom of mirror for engaging locking screws and 1" (25mm) clearance on each side.

MATERIALS:

Frame — Type-430 stainless steel, 1/2" x 1/2" x 3/8" (13 x 13 x 9.5mm) channel with 1/4" (6mm) return at rear with bright polished finish. One piece frame with 90 degree mitered corners. Galvanized steel back has integral horizontal hanging brackets near the top for hanging the mirror and near the bottom to prevent the bottom of the mirror from pulling away from the wall. Locking devices secure mirror to concealed wall hanger. In Screw Locking Design (see figure 2), concealed Philips-head locking screws securely fasten mirror to wall hanger.

Mirror — No. 1 quality, 1/4" (6mm) select float glass: selected for silvering, electrolytically copper-plated by the galvanic process, and guaranteed for 10 years against silver spoilage. Corners are protected by friction-absorbing filler strips; back is protected by full-size, shock-absorbing, water-resistant, nonabrasive, 3/16" (5mm) thick polyethylene padding.

Concealed Wall Hanger — 20-gauge (0.9mm) galvanized steel. Incorporates lower support member, forming rigid rectangle, which engages lower backplate louvers to keep bottom of mirror against wall.

continued . . .

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

Rev. 5/06 R/B Printed in U.S.A.
© 2006 by Bobrick Washroom Equipment, Inc.

INSTALLATION:

Mount wall hanger on wall with screws (furnished by manufacturer) at points indicated by an *S*. For plaster or dry wall construction, provide backing to comply with local building codes, then secure wall hanger with screws furnished. When providing a concealed backing, allow backing to cover minimum range of mounting hole locations shown on drawing. For other wall surfaces, provide fiber plugs or expansion shields for use with screws furnished, or provide 1/8" (3mm) toggle bolts or expansion bolts. Hang mirror on wall hanger with all four backplate louvers engaged behind horizontal wall hanger members. Hang mirror on wall hanger with all four backplate louvers engaged behind horizontal wall hanger members. To do this, mirror must be centered in front of the wall hanger horizontally, pressed flat against the wall approximately 1" (25mm) above final position and then lowered into final position.

Snap Locking Design — Locking devices automatically secure mirror to concealed wall hanger when it is lowered into final position. Locking devices may be unlocked by inserting two flat blade screwdrivers behind each side of mirror near the bottom or under the bottom of the mirror and pulling mirror bottom forward and then up (see figure 3).

Screw Locking Design — Lock mirror to wall hanger by tightening Phillips-head locking screws that are concealed in the bottom of frame at points indicated by a *T*. Mirror may be unlocked from wall hanger by loosening locking screws and lifting mirror off of concealed wall hanger (see figure 4).

SNAP LOCKING DESIGN
(Front View)

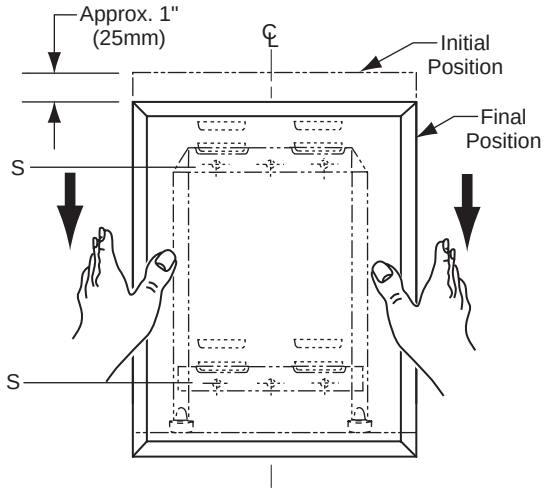

Figure: 3

SCREW LOCKING DESIGN
(Front View)

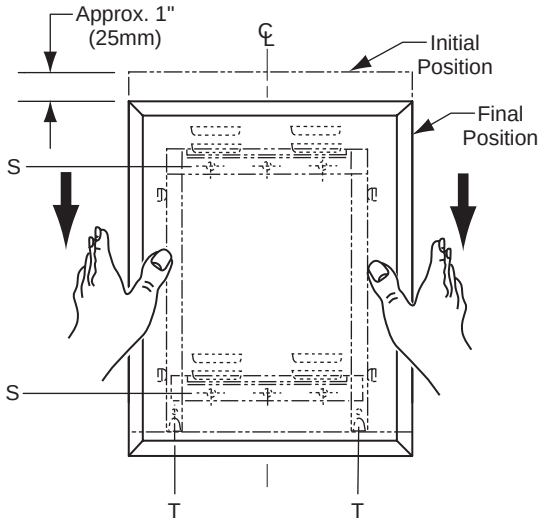

Figure: 4

SPECIFICATION:

Mirror shall have a one-piece type-430 stainless steel channel frame, 1/2" x 1/2" x 3/8" (13 x 13 x 9.5mm), with 90° mitered corners; all exposed surfaces shall have bright polished finish. Select float glass mirror shall be guaranteed for 10 years against silver spoilage. Corners shall be protected by friction-absorbing filler strips and the back shall be protected by full-size, shock-absorbing, water-resistant, nonabrasive, 3/16" (5mm) thick polyethylene padding. Galvanized steel back shall have integral horizontal hanging brackets located at top and bottom for mounting on concealed rectangular wall hanger to prevent the mirror from pulling away from the wall. Locking devices secure mirror to concealed wall hanger. Mirror shall be removable from the wall.

Framed Mirror shall be Model B-165 _____ (insert width and height) of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

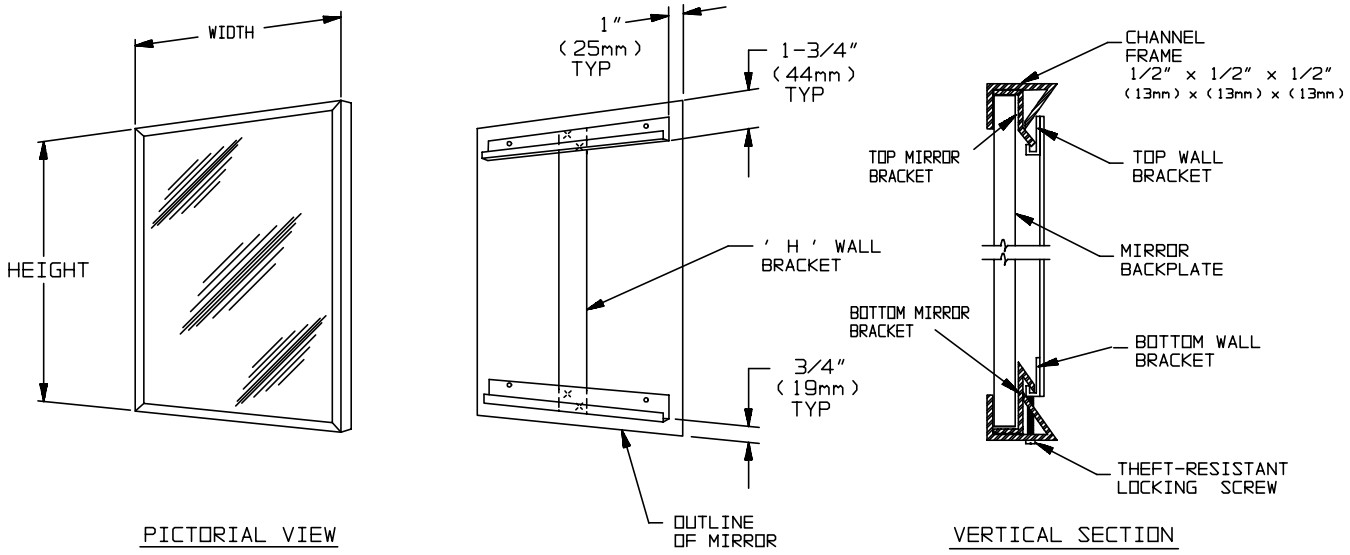
CHANNEL FRAME MIRROR



SPECIFICATION

Channel Frame Mirror shall have frame fabricated of alloy 18-8 stainless steel, type 304, 20 gauge with mitered corners. Mirror glazing shall be _____(insert glazing option) and shall be warranted for 15 years against silver spoilage. All edges of mirror shall be protected by friction and chafe absorbing fillers. Back of mirror shall be protected by full size shock-absorbing water-resistant filler and full size one piece 20 gauge corrosion protected steel. Top and bottom wall mounting brackets shall be spot welded into "H" hanger. Mirror shall be secured to lower bracket with a locking screw. Finish of unit shall be protected from marring by easily removed self adhesive polyvinyl (PVC) film.

Channel Frame Mirror shall be Model № 0620-___(insert glazing option) ___ (note size, W x H) as manufactured by American Specialties, Inc., 441 Saw Mill River Road, Yonkers, New York 10701-4913

MATERIALS

Frame: Alloy 18-8 stainless steel, type 304, 20 gauge (.036 in. <.91mm> thick) . Roll-formed one piece construction. Exposed surfaces shall have № 4 satin finish. Edges and corners are burr free.

Glass: Standard glazing is № 1 quality, 1/4″ inch (6.4mm) thick plate/float, silver coated and hermetically sealed with a uniform copper plating, and warranted against silver spoilage for 15 years. Mirrors meet Federal Spec DD-M-411C, ASTM C-1036-91.

Filler: Expanded polyethylene microcell foam sheet material, abrasion resistant and shock absorbing, water resistant, 1/8″ inch (3.2mm) total layer thickness.

FABRICATION NOTE FOR SPECIFICATION

Mirrors larger than 21sq. Ft. (1.95m^2) are fabricated in two (2) or more sections to provide installation and handling ease.

INSTALLATION

Install "H" wall brackets level and plumb per diagram location using **ONLY** № 10 Pan Head screws (by others). Hang mirror on brackets and tighten locking screw at bottom (note: this screw should be started prior to hanging mirror on wall brackets). For compliance with ADA Accessibility Guidelines, bottom edge of reflecting surface should be no higher than 40"(1016mm) above finished floor.

GLAZING OPTIONS

Units are supplied with 1/4" thick plate glass. Other glazing options are available. For a complete description of any other available glazing, see the **MIRROR GLAZING OPTIONS** chart.

Accessory Specialties AMERICAN DISPENSER **Desert Ray Products** WATROUS, INC.

- Functionality
- Durability
- No lines for dirt to collect (maintenance free)

MECHANICAL DATA

Height: 2" (5.1cm)
Width: xx" (See product part number for width). Complete length of Grab Bar is usable surface.
Diameter: 1.25" (3.2cm)

PRODUCT COMPOSITION

Entire product is 18/8 (304) stainless steel. Solid caps and pins are HeliArc welded to 18 gauge tube.

MODALITY

Use: Wall Installation. **Load Capability:** 800 lbs. (362.9kg) when properly installed.

INSTALLATION

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and **must be installed into adequate structural blocking** or with WingIts® Grab Bar Fasteners (GBWME40).

CERTIFICATIONS

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars meet or exceed the applicable requirements of all building codes, ADA criteria, and 2010 ADAAG and 2009 ANSI standards.

RECOMMENDED INTEGRATION

For hollow wall construction, it is recommended that WingIts® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for applications.

**Grab Bars include center support.*

Stainless steel screws are included to install into adequate structural blocking.

Contemporary design combines with a fully HeliArc welded construction, resulting in a Grab Bar with:

- Unparalleled strength
- Beauty
- Functionality
- Durability
- No lines for dirt to collect (maintenance free)

MECHANICAL DATA

Height: 2" (5.1cm)
Width: xx" (See product part number for width). Complete length of Grab Bar is usable surface.
Diameter: 1.25" (3.2cm)

PRODUCT COMPOSITION

Entire product is 18/8 (304) stainless steel. Solid caps and pins are HeliArc welded to 18 gauge tube.

MODALITY

Use: Wall Installation. **Load Capability:** 800 lbs. (362.9kg) when properly installed.

INSTALLATION

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars are designed to hold live loads and **must be installed into adequate structural blocking** or with WingIts® Grab Bar Fasteners (GBWME40).

CERTIFICATIONS

WingIts® INFINITE Elegance™ Structural Stainless Steel Grab Bars meet or exceed the applicable requirements of all building codes, ADA criteria, and 2010 ADAAG and 2009 ANSI standards.

RECOMMENDED INTEGRATION

For hollow wall construction, it is recommended that WingIts® Grab Bar Fasteners (GBWME40) are used with this product. See Fastener instructions for applications.

Technical Data

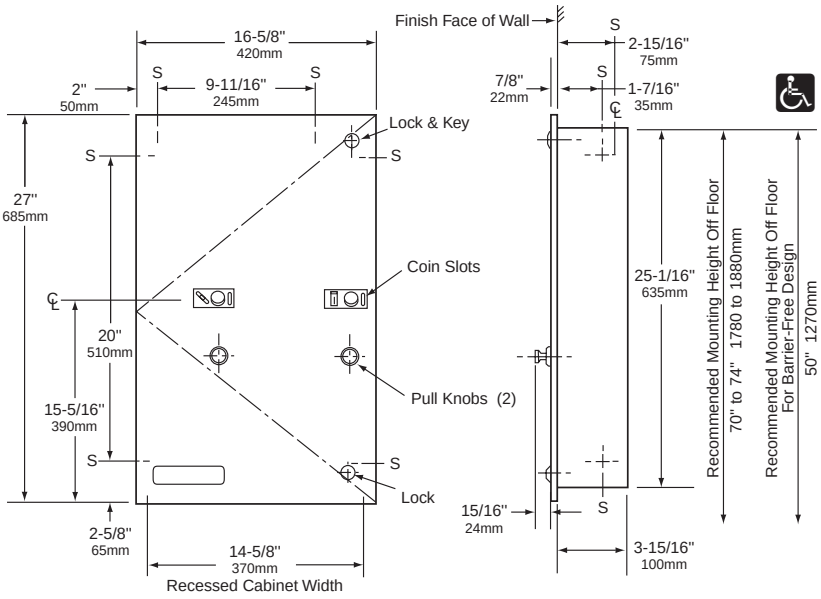
RECESSED NAPKIN/TAMPON VENDORS

B-3500 SERIES

Specify Model Required:

- ❑ Model B-3500C Free no-coin operation
- ❑ Model B-3500 25 25¢ single-coin operation
- ❑ Model B-3500X2 50 50¢ double-coin operation

Patented



Rough Wall Opening
15-1/8" (385mm) wide
25-1/2" (650mm) high
4" (102mm) minimum recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel. All-welded construction.

Door — 18-8 S, type-304, 18-gauge (1.2mm) stainless steel with satin finish. 7/8" (22mm) 90° return edges for maximum rigidity. Secured to cabinet with a concealed, full-length stainless steel piano-hinge. Equipped with a stainless steel cable door-swing limiter and two tumbler locks keyed like other Bobrick washroom accessories. Door has no brand-name advertising for products dispensed. Can be replaced in the field. International graphic symbols identify product dispensed and coin denomination.

Coin Mechanisms (2) — Impact-resistant ABS with satin-finish aluminum pull knobs. Coin mechanisms can be converted in the field to any standard coin denomination without having to purchase new coin mechanisms (no-coin, single-coin, or double-coin operation). Each coin box is equipped with a tumbler lock that opens with different key than furnished for door locks. Coinage is designated by symbols on metal plate, which can be changed only from inside the door.

Designer's Note: If change of coin denomination is desired after installation, order Bobrick Coin Plate Replacement Kit for the desired coinage.

OPERATION:

After coin is inserted in dispensing mechanism of patron's choice, pulling appropriate handle dispenses boxed sanitary napkin or tampon tube. Pull knobs operate with one hand, without tight grasping, pinching, or twisting of the wrist, and with less than 5 pounds of force (22.2 N) to comply with barrier-free accessibility guidelines (including ADAAG in U.S.A.). Coin slot of each dispensing mechanism is identified by an international graphic symbol. Capacity: 31 sanitary napkins and 22 tampons. Coin slots are blocked when supply is depleted. Cable door-swing limiter prevents damage to washroom accessories and walls. Vendor dispenses sanitary napkin packages measuring 3" x 1" x 4-1/4" (76 x 25 x 108mm) and tampon packages measuring 5-1/8" long x 11/16" diameter (130 x 17mm).

continued . . .

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

Revised 5/06 Printed in U.S.A.
© 2006 by Bobrick Washroom Equipment, Inc.

INSTALLATION:

Provide framed rough wall opening 15-1/8" wide x 25-1/2" high (385 x 650mm). Minimum recessed depth required to finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between flange and finish face of wall. Mount unit with shims between framing and cabinet at all points indicated by an *S,* then secure unit with #8 x 1-1/4" (M4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed sanitary napkin/tampon vendor shall combine two dispensing mechanisms in one cabinet to provide sanitary napkins or tampons at user's option. Dispensing mechanisms shall be pre-set at factory for_____ (insert one: Free, 25¢, or 50¢) operation, but shall be convertible in the field to allow the change of coin denomination without purchasing new mechanisms or removing unit from wall. Door shall be furnished with metal plates indicating specified coin denomination. Unit shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be 18 gauge (1.2mm); have 7/8" (22mm) 90° return edges; be secured to cabinet with a concealed, full-length stainless steel piano-hinge; and equipped with a stainless steel cable door-swing limiter and two tumbler locks keyed like other Bobrick washroom accessories. Pull knobs shall be operable with one hand and with less than 5 pounds of force (22.2 N) to comply with barrier-free accessibility guidelines (including ADAAG in U.S.A.). Each coin box shall be equipped with a tumbler lock that is keyed differently than door locks. Unit shall not carry brand-name advertising. Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Sanitary Napkin/Tampon Vendor shall be Model _____ (insert model number) of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

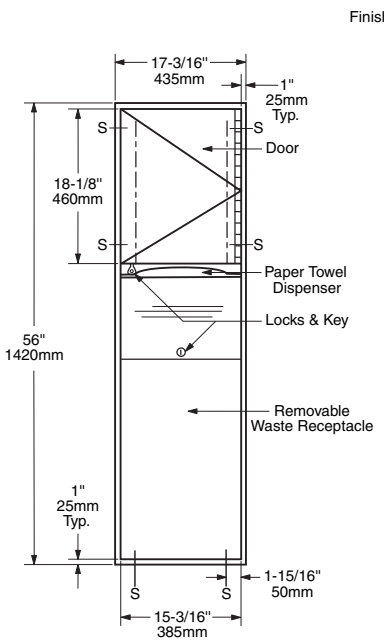
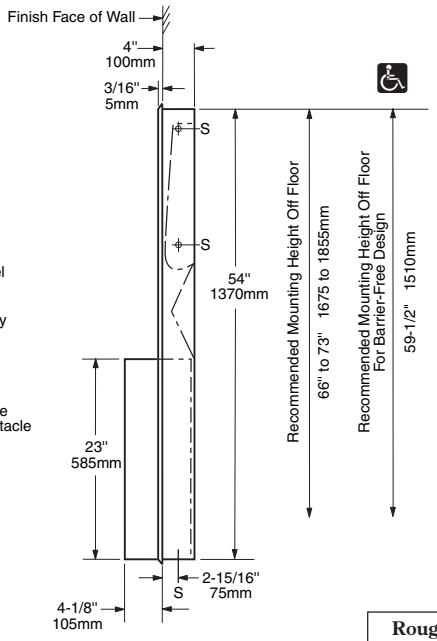
Technical Data

RECESSED CONVERTIBLE PAPER TOWEL DISPENSER AND WASTE RECEPTACLE

B-3944

Patent Pending





Rough Wall Opening

16" (405mm) wide
54-3/4" (1390mm) high
4" (102mm) minimum
recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, heavy-gauge stainless steel. All-welded construction. Exposed surfaces have satin finish.

Flange — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Drawn and beveled, one-piece, seamless construction.

Door — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Double-pan-back construction. Secured to cabinet with a full-length stainless steel piano-hinge. Equipped with a semi-concealed tumbler lock keyed like other Bobrick washroom accessories.

Paper Towel Dispenser — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Rounded towel tray has hemmed opening to dispense paper towels without tearing. Capacity: 600 C-fold or 800 multifold paper towels.

Waste Receptacle — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Front and sides of bottom and all top edges are hemmed for safe handling. Secured to cabinet with a tumbler lock keyed like other Bobrick washroom accessories. Equipped with interior hooks for optional vinyl liner. Capacity: 12 gal. (45.5 L).

OPERATION:

Paper towel dispenser accommodates C-fold or multifold paper towels without adjustment or use of adapters. To empty waste receptacle, unlock with key provided. Liner cannot be removed unless waste receptacle is unlocked from cabinet. Reusable vinyl liners are available as an optional accessory: order Bobrick Part No. 3944-12. This unit is field convertible to a Universal Roll Towel Dispenser by ordering Bobrick Part No. 3961-50 (Touch-Free Universal Roll Towel Dispenser Module). The waste capacity can be increased by ordering Bobrick part No. 368-60 (18-Gallon Waste Receptacle Module).

INSTALLATION:

Provide framed rough wall opening 16" wide x 54-3/4" high (405 x 1390mm). Minimum recessed depth required to finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. If unit projects above top of wainscot, provide aluminum channel or other filler to eliminate gap between flange and finish face of wall. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an *S*, then secure unit with #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed convertible paper towel dispenser and waste receptacle shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Flange shall be drawn and beveled, one-piece, seamless construction. Door shall be secured to cabinet with a full-length stainless steel piano-hinge and equipped with a semi-concealed tumbler lock keyed like other Bobrick washroom accessories. Paper towel dispenser shall dispense 600 C-fold or 800 multifold paper towels. Removable waste receptacle shall be secured to cabinet with a tumbler lock, have front and side edges of bottom and all top edges hemmed for safe handling, and shall have a minimum capacity of 12 gal. (45.5 L). Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Convertible Paper Towel Dispenser And Waste Receptacle shall be Model B-3944 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

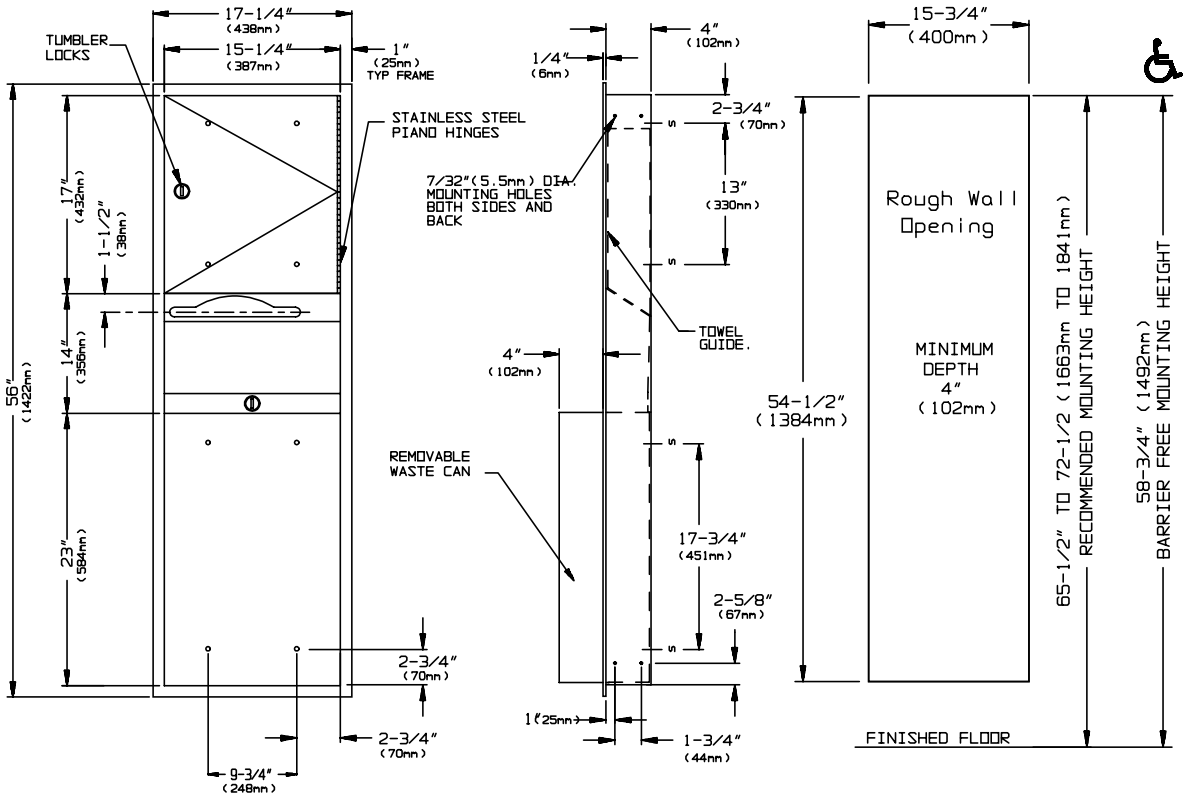
RECESSED PAPER TOWEL DISPENSER AND WASTE RECEPTACLE



SPECIFICATION

Paper Towel Dispenser and Waste Receptacle shall hold and dispense 800 standard multi-fold or 600 standard C-fold paper towels and shall have a waste capacity of 12 gal (46litres). Towel dispenser, door, frame, waste container and cabinet shall be fabricated of alloy 18-8 stainless steel, type 304, 22 gauge All exposed surfaces shall be № 4 satin finish and be protected during shipment with a PVC film easily removable after installation. Towel dispensing slot shall have a fully hemmed-in rolled edge for snag-free dispensing and user safety. Door shall be fabricated in double-pan construction with fiberboard filler and shall be attached to cabinet at side with a full length 3/16"dia. stainless steel multi-staked piano hinge and be held closed with a tumbler lock keyed alike to other ASI washroom equipment. Waste container shall have hemmed edges for safety and shall be retained by a tumbler lock keyed alike to other ASI washroom equipment. Face trim shall be 1" (25.4mm) wide formed from one piece with no mitres, welding or open seams and have 1/4" (6.35mm) square return to wall. Structural assembly of all components shall be of welded construction. Cabinet shall have no exposed fastening devices or spot welded seams.

Paper Towel Dispenser and Waste Receptacle shall be Model № 0469 as manufactured by American Specialties, Inc., 441 Saw Mill River Road, Yonkers, New York 10701-4913

INSTALLATION

Unit is mounted in wall recess using four (4) № 10 self tapping screws (by others) through concealed mounting holes provided.
Note that top of rough wall opening is 3/4" (19mm) below top of unit.

Rough Wall Opening required is…….15-3/4"W. x 54-1/2"H. x 4"D. minimum (400mm x 1384mm x 102mm)

OPERATION

Towels are self-feeding until supply is depleted. Waste container is emptied manually on cycle determined by maintenance needs. Locked compartment prevents unauthorized access.

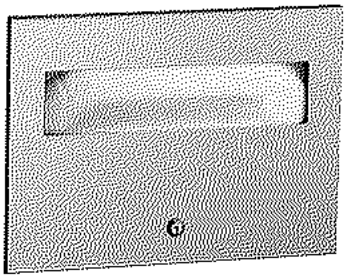
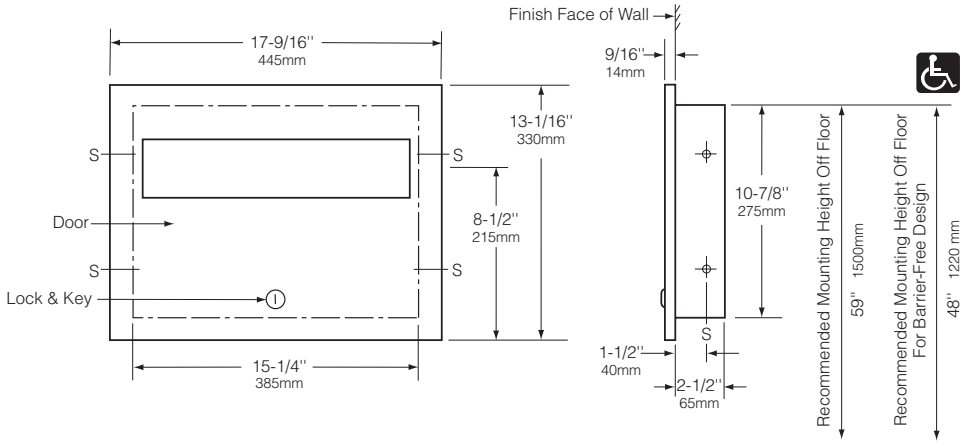
RECESSED TOILET-SEAT-COVER DISPENSER

B-3013





Rough Wall Opening
15-5/8" (395mm) wide
11-1/4" (285mm) high
2-3/4" (70mm) minimum
recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, heavy-gauge stainless steel. All-welded construction.

Door — 18-8 S, type-304, 18-gauge (1.2mm) stainless steel with satin finish. 9/16" (14mm) 90° return for maximum rigidity. Secured to cabinet with a concealed, full-length stainless steel piano-hinge. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

OPERATION:

Dispenses single- or half-fold paper toilet seat covers. To fill dispenser, door unlocks with key provided. Capacity: 500 toilet seat covers.

INSTALLATION:

Provide framed rough wall opening 15-5/8" wide x 11-1/4" high (395 x 285mm). Minimum recessed depth required from finish face of wall is 2-3/4" (70mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits in wall. Mount cabinet with shims between framing and cabinet at all points indicated by an *S,* then secure unit with four #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed toilet-seat-cover dispenser shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be 18 gauge (1.2mm); have 9/16" (14mm) 90° return edges; be secured to cabinet with a concealed, full-length stainless steel piano-hinge; and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Dispenser shall have a minimum capacity of 500 paper toilet seat covers. Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Toilet-Seat-Cover Dispenser shall be Model B-3013 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

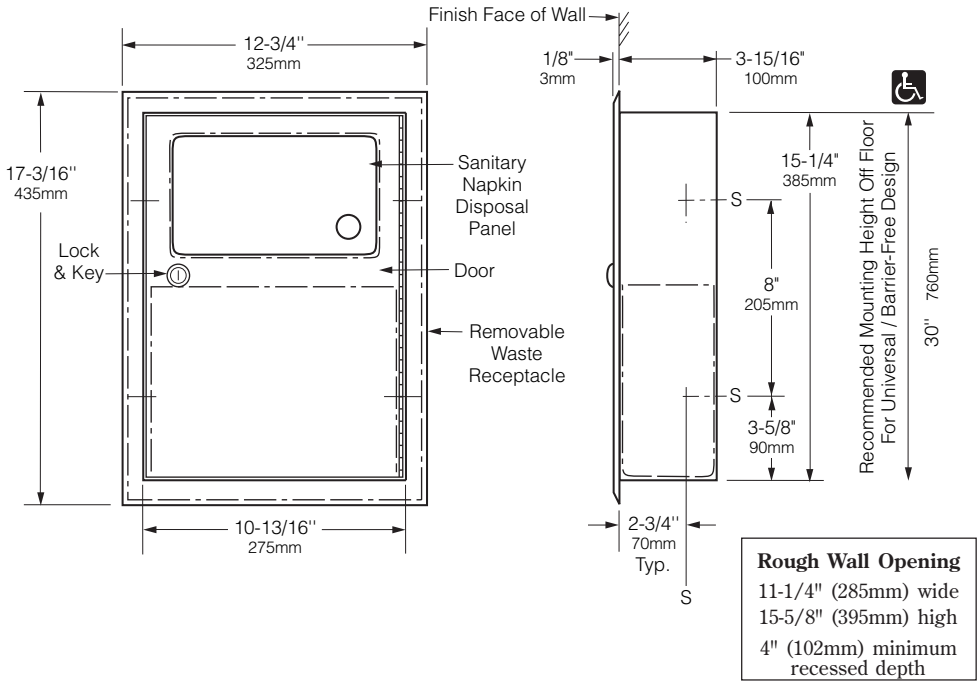
RECESSED SANITARY NAPKIN DISPOSAL

B-353



Rough Wall Opening
11-1/4" (285mm) wide
15-5/8" (395mm) high
4" (102mm) minimum recessed depth

MATERIALS:

Cabinet — 18-8 S, type-304, heavy-gauge stainless steel. All-welded construction. Exposed surfaces have satin finish.

Flange — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Drawn and beveled, one-piece, seamless construction.

Door — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Secured to cabinet with a full-length stainless steel piano-hinge. Equipped with a tumbler lock keyed like other Bobrick washroom accessories.

Disposal Panel — 18-8 S, type-304, 22-gauge (0.8mm) stainless steel with satin finish. Bottom edge hemmed for safety. Secured to door with a spring-loaded, full-length stainless steel piano-hinge. Equipped with an international graphic symbol identifying sanitary napkin disposal.

Waste Receptacle — Leak-proof, rigid molded polyethylene. Removable for servicing. Capacity: 1.2 gal. (4.6 L).

OPERATION:

Unit is equipped with a self-closing panel covering disposal opening. Napkin disposal is emptied by opening door with furnished key and removing waste receptacle. Disposable paper liners for the receptacle are available as an optional accessory: order Bobrick Part No. 353-12.

INSTALLATION:

Provide framed rough wall opening 11-1/4" wide x 15-5/8" high (285 x 395mm). Minimum recessed depth required from finish face of wall is 4" (102mm). Allow clearance for construction features that may protrude into rough wall opening from opposite wall. Coordinate with mechanical engineer to avoid pipes, vents, and conduits. Mount unit in wall opening with shims between framing and cabinet at all points indicated by an *S*, then secure unit with four #8 x 1-1/4" (4.2 x 32mm) sheet-metal screws (not furnished).

SPECIFICATION:

Recessed sanitary napkin disposal shall be type-304 stainless steel with all-welded construction; exposed surfaces shall have satin finish. Door shall be secured to cabinet with a full-length stainless steel piano-hinge and equipped with a tumbler lock keyed like other Bobrick washroom accessories. Unit shall have a self-closing panel covering disposal opening. Panel shall have bottom edge hemmed for safety, be secured to door with a spring-loaded, full-length stainless steel piano-hinge, and equipped with an international graphic symbol identifying sanitary napkin disposal. Unit shall be furnished with a removable, leak-proof molded polyethylene receptacle. Receptacle shall have a capacity of 1.2 gal. (4.6 L). Manufacturer's service and parts manual shall be provided to the building owner/manager upon completion of project.

Recessed Sanitary Napkin Disposal shall be Model B-353 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough, Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

RECESSED SANITARY NAPKIN DISPOSAL

SPECIFICATION

Recessed Sanitary Napkin Disposal shall hold 1.5gal (5.7 liters) of dry solids. Upper door, waste container and cabinet frame shall be fabricated of alloy 18-8 stainless steel, type 304, 22 gauge. Structural assembly of body and door components shall be of welded construction. Upper door shall be hung on cabinet with a stainless steel spring hinge and have the international waste symbol on face. All exposed surfaces shall have a № 4 satin finish and be protected during shipment with a PVC film that shall be easily removable after installation. Face trim shall be of one piece construction 1" (25.4mm) wide with no welded miters and shall have square 1/4" (6.35mm) return to wall..

Recessed Sanitary Napkin Disposal shall be Model № 0473 as manufactured by American Specialties, Inc., 441 Saw Mill River Road, Yonkers, New York 10701-4913

INSTALLATION

Unit is mounted in wall recess using № 10 self tapping screws (by others) through concealed mounting holes provided. Note that top of rough wall opening is 3/4" (19mm) below top of unit.

Rough Wall Opening required is……..11-1/4" W x 15-3/4" H x 4" D. minimum (286mm x 400mm x 102mm)

OPERATION

Users push door to deposit waste material. Door is self-closing. Unit is emptied by removing can and removing disposable waxed waste paper bag which is furnished by others. Waste container is held in place by a "Z" clip retainer to prevent inadvertent dumping of contents. Safety-edged finger grip provides convenient grip for service.

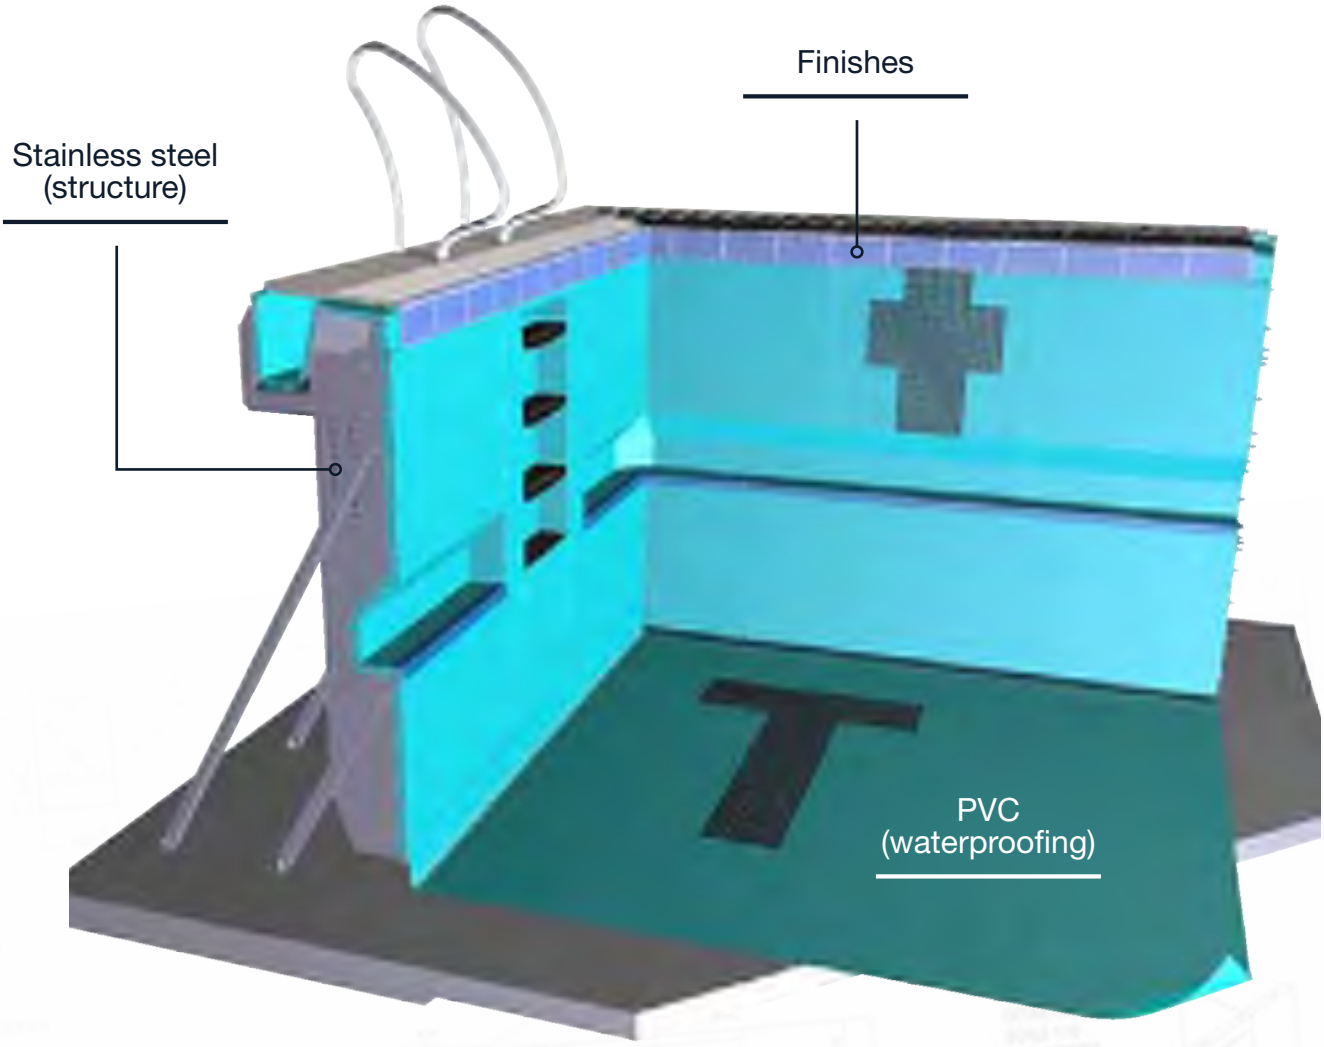
Smart use **of materials**

Myrtha is the most exclusive and advanced technology in the swimming pool industry. It's patented pre-engineered modular system, based on the use of laminated stainless steel panels and buttress system, enables a Myrtha structure to attain perfect waterproofing. Myrtha Technology provides the ideal solution to the many limitations of traditional reinforced concrete structures and ordinary prefabricated swimming pools.

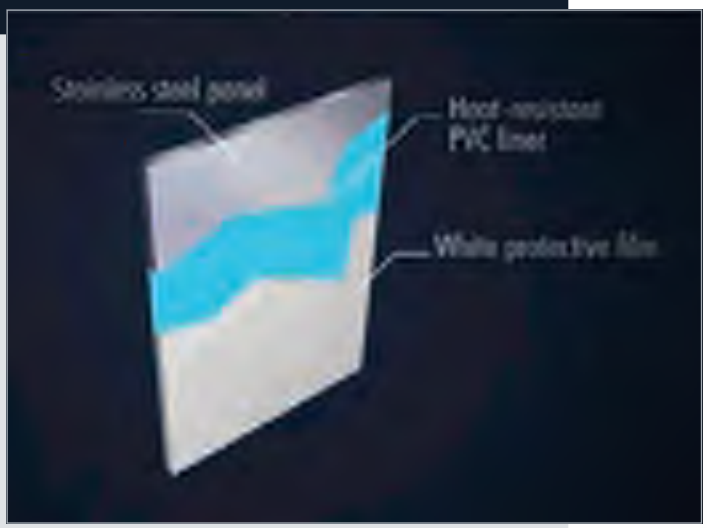


Stainless steel - structure

High quality stainless steel used in a Myrtha pool guarantees extremely long life to the structure regardless of the presence of highly aggressive soils or high water-tables. Myrtha uses exclusively-engineered components bolted together, thereby eliminating the need for welding, which is subject to increased corrosion. The use of stainless steel materials ensures maximum mechanical strength of the panels, buttresses and the other components that form the structure of the swimming pool.

PVC - waterproofing

Perfect waterproofing is ensured by the unique process of bonding PVC to the Myrtha steel panels. A hard PVC membrane is hot-laminated to the steel in the manufacturing process. A reinforced PVC membrane is used on the floor of the pool in order to follow the contours of the concrete sub-surface.

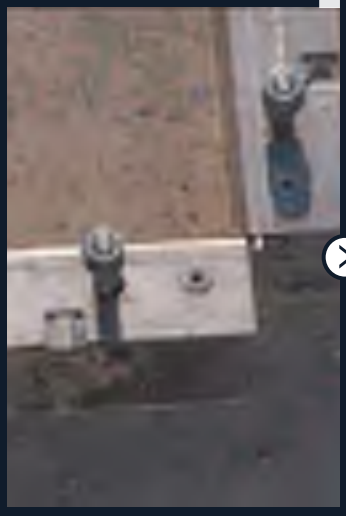


Finishes

For high level aestheric finishes, Myrtha technology uses a wide range of exclusive materials that match with the colours of the PVC.
Myrtha allows the use of special stone and marble finishes to ensure more elegance at the pool project.
This combination of materials and colors allow the client to personalize each and every swimming pool according to their specific needs.

Key components

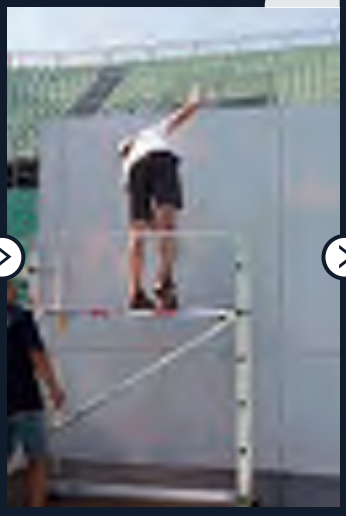
1



The base frame

The base frame that outlines the swimming pool is constructed of bolted steel sections that form the supporting structure for the Myrtha wall panels. It is mechanically connected firmly to the concrete footing by the use of chemical anchors. Rigidity is obtained by the use of numerous threaded bars (anchor bolts) which are anchored in the perimeter curb. The threaded anchor bolts also provide micrometric adjustment so that perfect leveling of the structure is achieved.

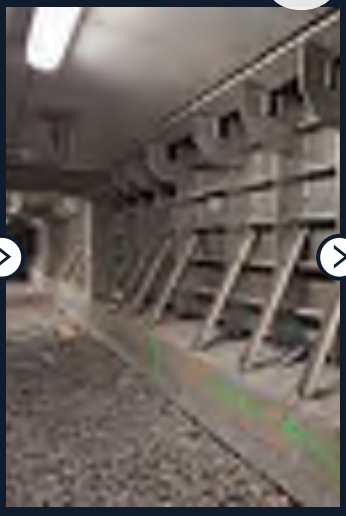
2



The wall structure

The pool walls are formed by the use of sturdy, prefabricated stainless steel pools panels. They are factory laminated with a permanently welded layer of hard PVC, and are then bolted to the base frame and to each other. Similar to the aviation industry, the use of actual steel welding is avoided, thus there are no potential corrosion points in a Myrtha structure. The exclusive use of stainless steel for the structural components and PVC for waterproofing means that there is minimal risk of corrosion with a high probability of leak-free construction.

3



The support buttresses

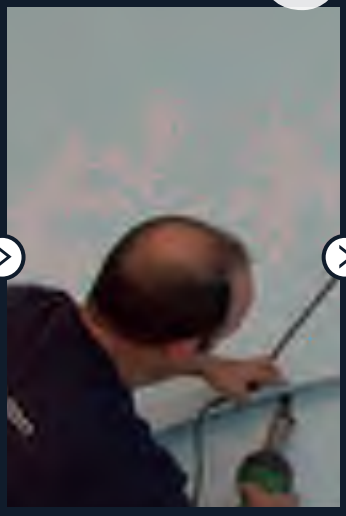
At vertical panel joint (3 feet), sturdy steel buttresses provide rigidity and strength to the structure. Each buttress is anchored to the concrete footing. The structure is both sturdy and elastic and is therefore ideal for installations with difficult ground conditions (e.g. seismic zones, or on unstable soils).

4

The overflow gutter

The Myrtha overflow gutter is made with the same material that is used for the wall panels and comes in a wide range of standard configurations. The gutter can be supplied with a design (“diagonal flow”) which limits the evaporation of chemicals and reduces the noise of the falling water. The patented Myrtha gutter grating has been designed to meet the strictest anti-slip and load requirements and the gutter dropouts can be supplied with silencers which virtually eliminate noise.

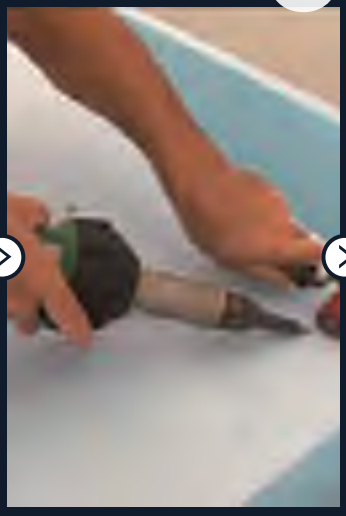
5



Floor reinforced membrane

The standard floor of a Myrtha pool is formed using a concrete slab, which needs only to provide a smooth support surface.
The slab is waterproofed by a reinforced PVC membrane, produced specifically for use with swimming pools and protected with a surface lacquering. Myrtha pools can be built without concrete as the sturdiness of the stainless steel structure is assured through the engineered footings. A special matting has been developed by Myrtha Pools to attain a smooth support surface for the membrane, whilst at the same time allowing subsurface drainage. In any type of Myrtha pool, this floor can be supplied with a user-friendly “Softwalk” floor.

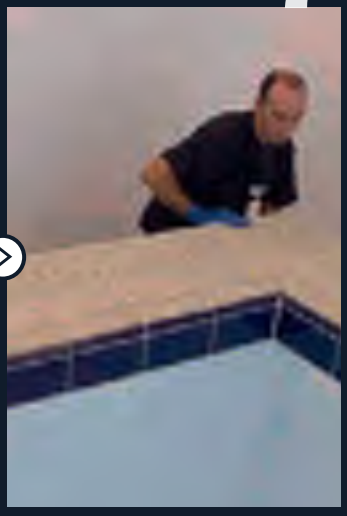
6



Fittings

In order to allow for better waterproofing all joints between the Myrtha sections are welded with a liquid PVC or a reinforced PVC tape. The result joint is extremely resistant, optically uniform to the panel surface and aesthetically pleasant.

7

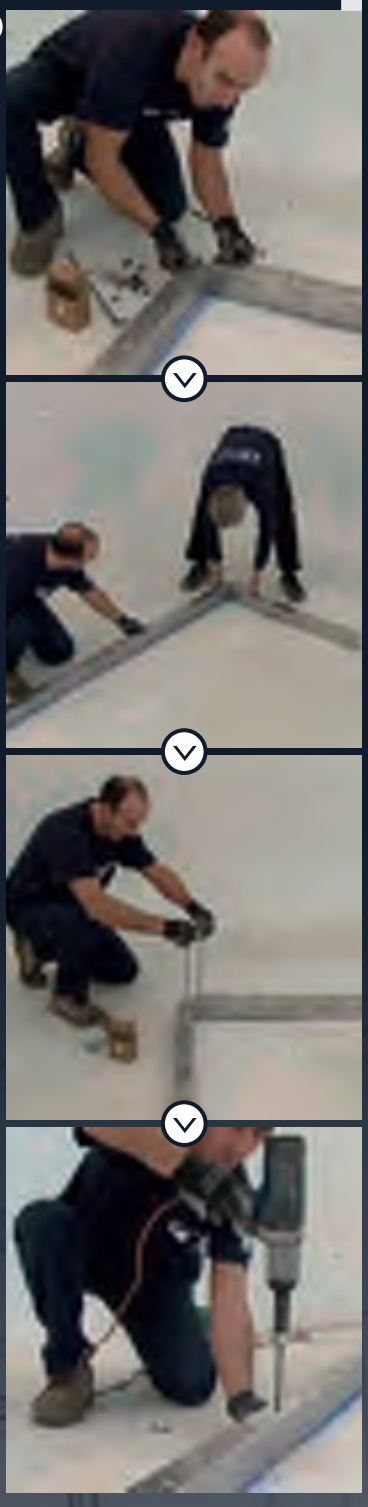


Finishing

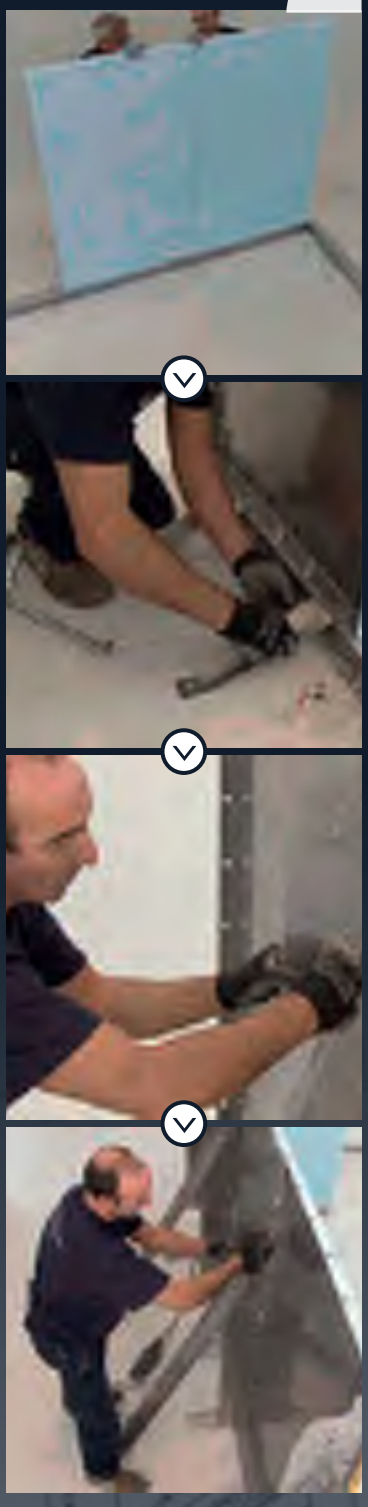
After the pool has been completely sealed and the overflow gutter installed, the ceramic tiles are applied onto the Myrtha surface. Gluing tile on a Myrtha stainless steel surface is much easier and safer that on concrete. As there is no possibility of water seepage from behind the tile, the traditional problem of poor long term adhesion is therefore eliminated.

Installation **phases**

1 Levelling



2 Wall construction



3 Overflow gutter

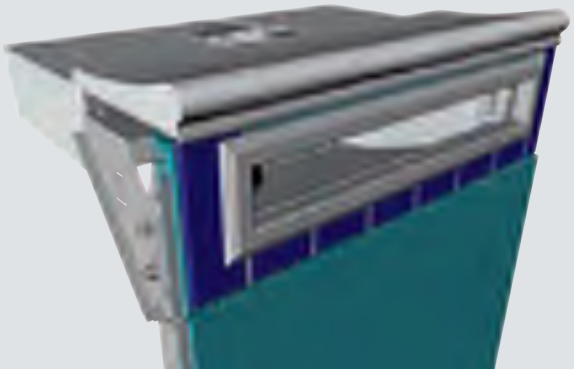
4 Waterproofing

5 Finishes

Models and **applications**

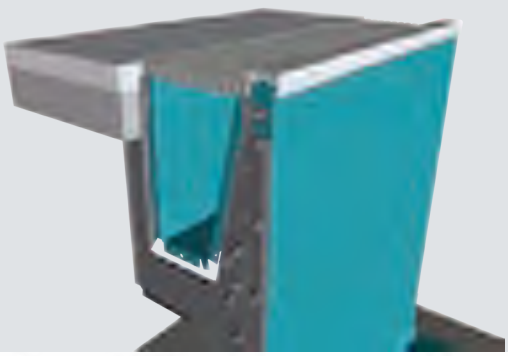
Skimmer

The traditional Skimmer version, which presents the water level lower than the floor level, has a ceramic finishing that enriches the visible part of the pool and helps cleaning operations. This system is ideal for public pools with reduced dimensions.



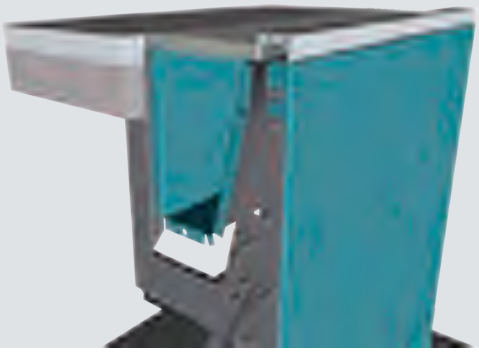
Overflow Gutter | Classic

Myrtha Classic Overflow is ideal for all the pools that guarantee an excellent water recycle with reduced dimensions and still maintain an aesthetically uniform mirroring surface. It is completed with a simple but pleasant PVC finishing on the highest part of the panel.



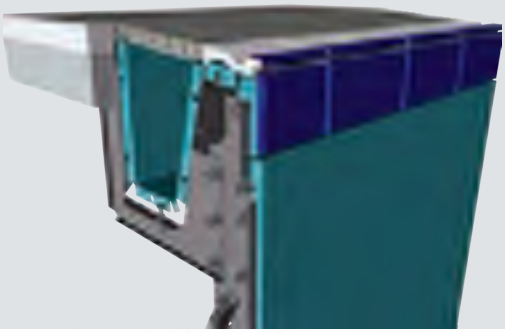
Overflow Gutter | Classic Competition

The Classic structure is ideal for big competition pools, as the PVC copying is flashed with wall panels, either on all the perimeter of the pool or only on the two short sides. This technology is also the most suitable for the renovation of pools that need to meet international regulations.



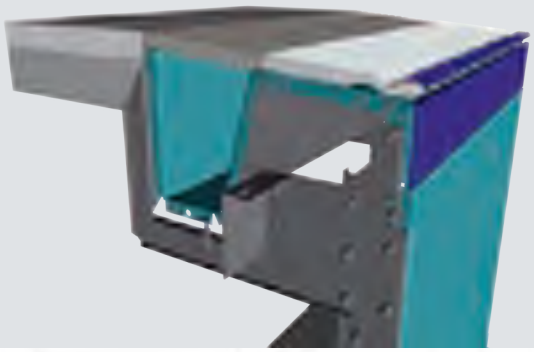
Overflow Gutter | Ceramic / 1

For public pools usually used for training sessions – schools, fitness centres and sports centres in general – Myrtha Ceramic1 is the most used and appreciated technology. Its ceramic tile places the overflow gutter slightly moved from the boarder so that the wave produced by the swimmer is better absorbed and does not reduce the swimmer's pace.



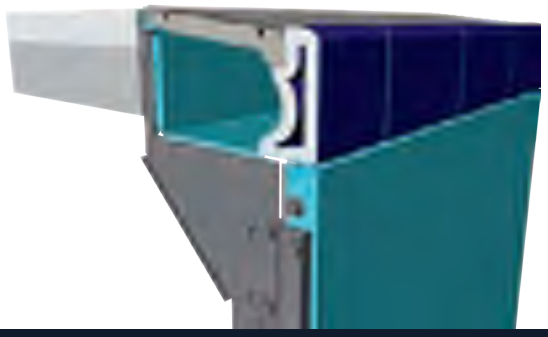
Overflow Gutter | Ceramic / 2

Myrtha Ceramic 2 presents two ceramic tiles that move even further the overflow gutter and guarantee the maximum absorbing coefficient of the wave impact during training lessons or competition events: the most suitable technology for completion implants.



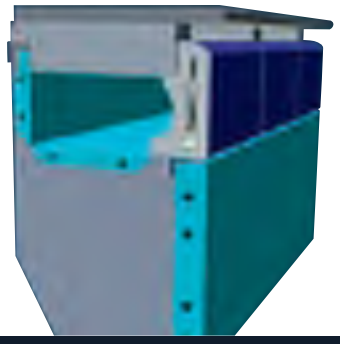
> Overflow Gutter | Structural

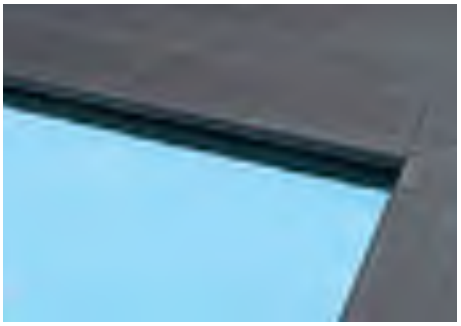
Myrtha Structural Overflow Technology is characterized by a special Klinker ceramic tile that functions as part of the actual structure of the wall panels. This structure guarantees a perfect overflow level while maintaining an attractive finish, in fact it can be considered the ideal technology for public leisure pools with any design.



> Recessed overflow gutter

The brand new overflow gutter finishing solution as an alternative to the standard ABS grid. Special edge elements, specifically designed for swimming pools use, can be placed and fixed to the overflow gutter, perfectly allowing the water flow and providing a smart finishing to the pool. Different materials and surfaces, highly durable and with high tech performance, can be chosen for both the deck and the edge of the pool: marbels, stones, wood and porcelain stonewares, inspired from natural and precious materials.



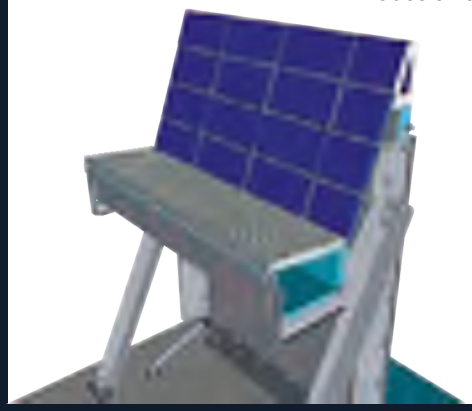


> Vanishing Edge | Ceramic / 1

Ceramic/1 structure can also have a vanishing edge effect that guarantees the best success on hills or particular surroundings. Generally it is utilized on one side of the pool with a ceramic tile that follows the external side of the pool and ends directly in the overflow gutter. This technology can be an elegant and efficient solution for public leisure pools, especially in condominiums or accommodation facilities.

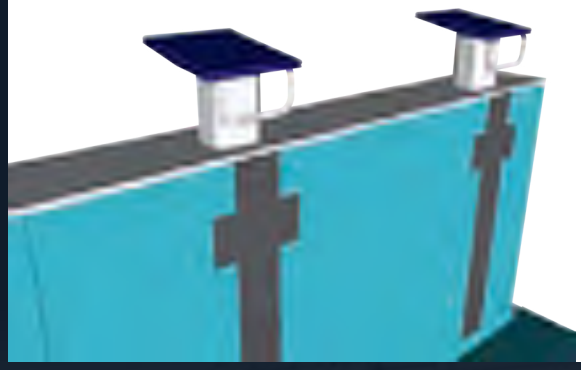
> Vanishing Edge | Structural

The Overflow Structural technology has evolved from the Ceramic1 Vanishing edge technology. Above the Myrtha panels a ceramic tiles functions as part of the structure while still creating a gentle slop that fades away in the gutter.

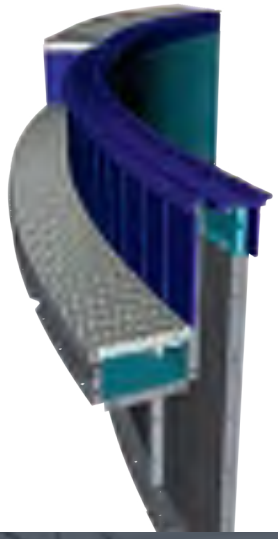


> Headwalls

To comply with F.I.N.A. regulations for competition pools that do not have an overflow structure on all four sides a headwall is required at 30cm above the water level, often completed by ceramic tiles that guarantee simple cleaning and satisfies the eye.



> Combined Technologies

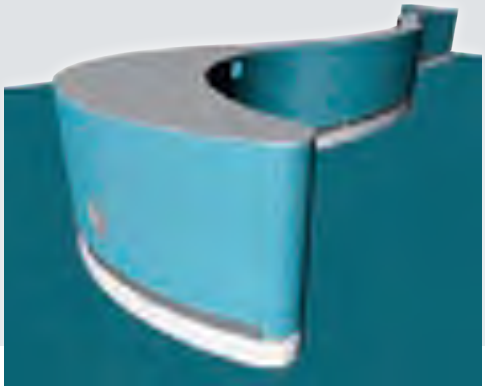


All the technologies described above can be combined to meet design requirements: competition pools combine overflow technologies with headwalls; public and leisure pools combine skimmer systems with one or more vanishing edge or headwall system too. Myrtha Pools can offer the work of a specialized technical staff who continuously search for the best solutions to advise the client according to need and surrounding.

Special **solutions**

Finger Wall

This solution is an additional structure raised above the level of water that can be used as a dividing wall between different areas of one big pool or as a relax area for swimmers. It is generally covered by ceramic tiles and meets the finishing solutions of the rest of the pool.

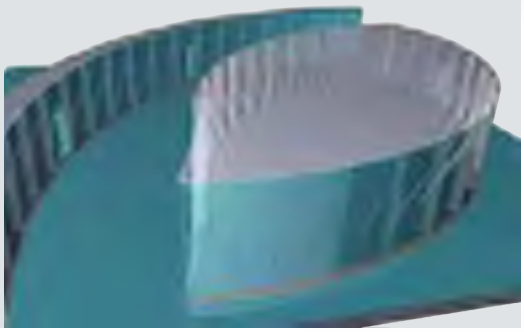


Zero Entry

Otherwise know as “beach entry”, is a walk-in option commonly associated to leisure pools but available for all projects. It integrates an anti-slip surface as well as a “soft floor” underlayment to further enhance the beach effect and provide an added safety aspect created with our Softwalk solution.

Islands and Rivers

From the Crazy River to the Lazy River, amusing or relaxing, fast or slow flow, Myrtha does it all! Rivers and islands can be inserted for aesthetical reasons, for fun or even for the functionality of the structure.



Double level

Double level is often inserted for an aesthetical purpose to allow for a waterfall effect, but it can also be functional for the architecture of the pool or for the surrounding floor.

Water **circulation**

A good pool project shall also take into consideration issues as the high water quality, the physical safety of swimmers, the expected users load and the regolatory requirements.
Myrtha swimming pools are designed basing on these criteria, both considering the needs of public health and easy maintenance of the pool.
Myrtha pools has invested also in this fields of research, by developing specific studies on recirculation systems preliminary analysis, as well as new solutions for water circulation.

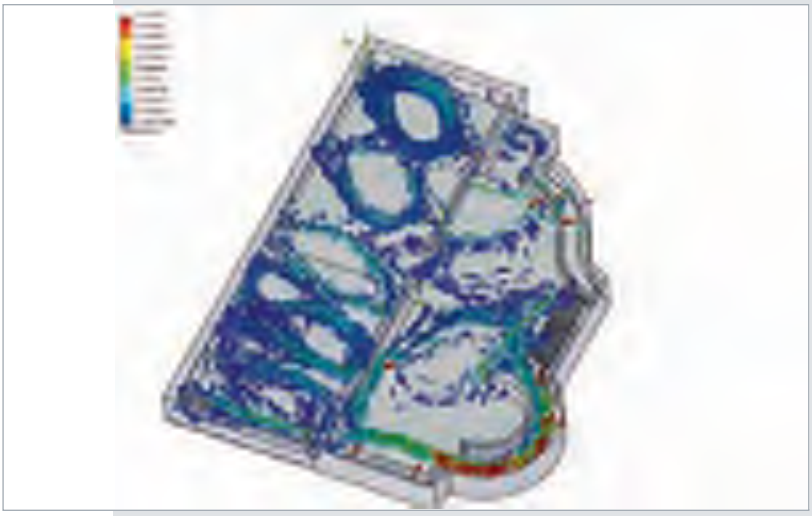
Traditional distribution

Use of inlets on the pool floor allows for an uniform distribution, complying to local regulations.

Strahlenturbulenz

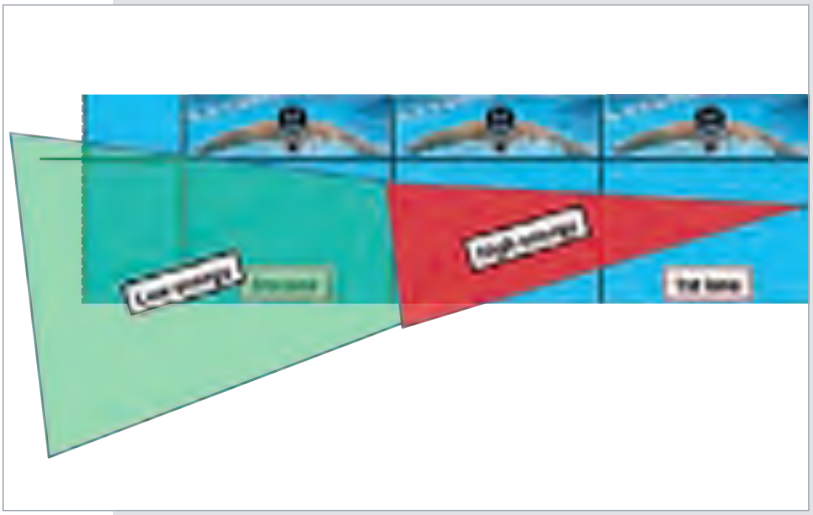
It represents nowadays an evolution of traditional water circulation system and the most efficient solution.
Based on the Venturi effect with controlled turbulence, it reduces risks by avoiding piping in the pool floor.

3D simulations



2D and 3D CFD simulations applied to a pool can provide essential information about the circulation: digital dye test, verification and optimization of circulation, as well as development of special features and accessories.
The picture on the lef shows a digital dye test after 15 minutes for 3 different depths shows erlochrome concentration.

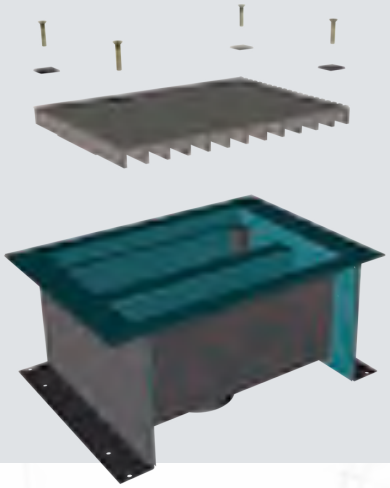
Hydraulic calculations and test



Myrtha Pools started improving CFD in order to exactly perform the calculations required and to simulate the interaction of liquids in a swimming pool.
Basing on the use of special softwares, Myrtha CFD technology can simulate the pool circulation before its construction, providing reliable 3D simulations and digital tests, as well as analysis of the inlet systems and precise calculations of the dropouts and all the overflow system.

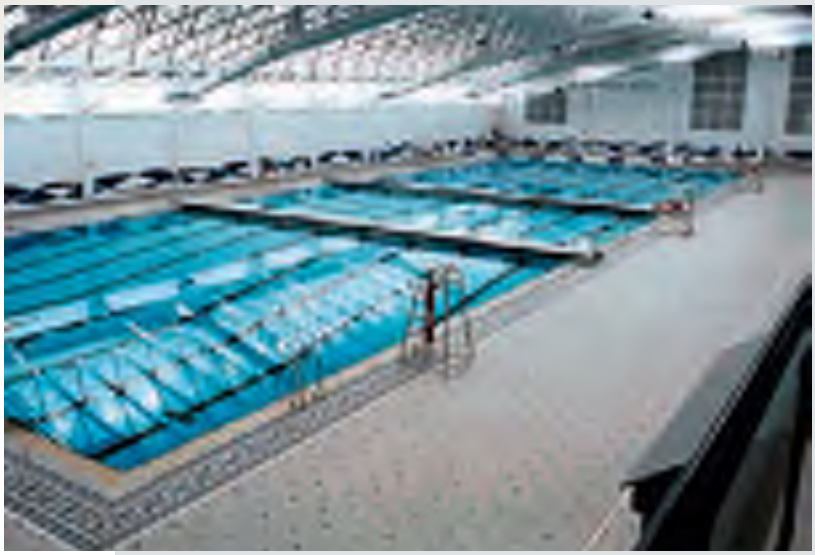
Specific Myrtha fittings

Made to ensure a perfect fitting and waterproofing on the Myrtha structure.



Special **systems**

Bulkhead



It separates the pool in different areas, moving along rails installed on the pool deck, thanks to a patented easy movement system. It includes anchors for starting blocks and it can be provided with optionals as footrest step, handrails, floating lane ropes.

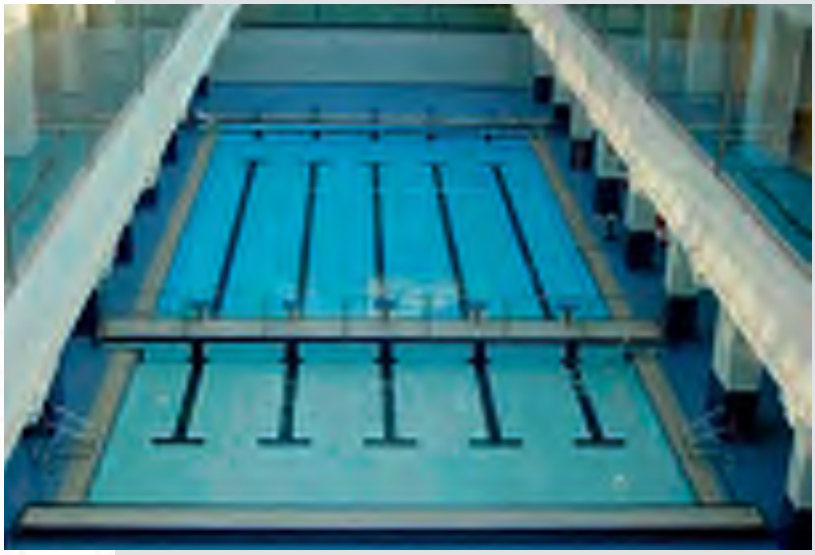
Bulkhead flow-through

Flow through bulkhead allows a large amount of the swimmer surge wave to pass through the bulkhead above and below the water further eliminating the rebound wave and turbulence.

Floating movable floor

It allows the depth of the pool to be varied, providing a multifunctional use of the pool. Floating structure anchored to the floor through a system of steel cables.
An actuating mechanism outside the pool allows the cables positioning and the movable floor fixing into the desired placement.

Movable floor with wall movement



This non-floating system is operated by pairs of screw-jacks installed in the pool walls, which allow the upwards and downwards movement of the floor.

Removable headwalls

Provide pools with overflow gutter on four sides with a 30 cm headwall, as per FINA regulations requirement.
It is also an ideal support for timing touch pads, starting blocks and floating lane anchors.

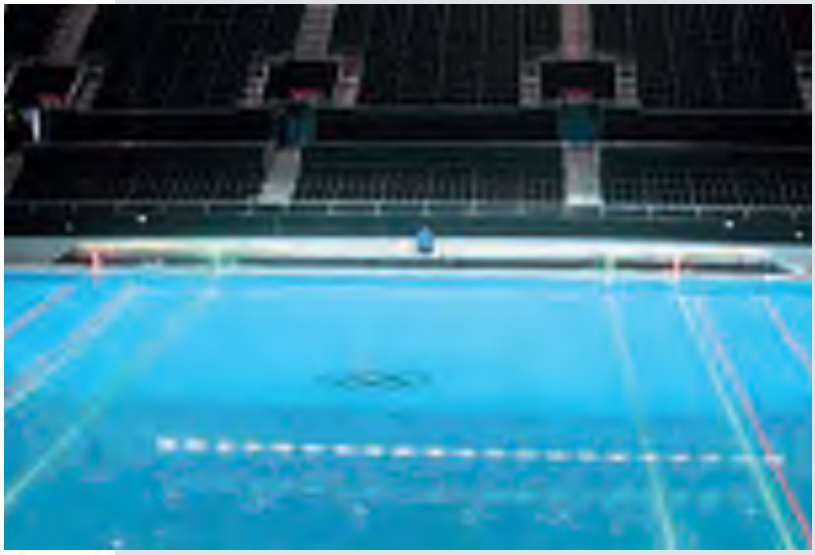
Air safety cushion

It reduces the diver's impact, by producing a uniform mixture of water and air in the area where the diver enters the pool.
Spargers, positioned under the diving board, provide adjustable bubbling volume and intensity.

Virtual Trainer

LED stripes system used to monitor the performances of swimmers during training sessions. The system contains a number of preinstalled training programmes and it can be operated by a wireless system.

Waterpolo Visual System



FINA approved system, based on the use of LED markings, placed in specific areas inside and outside the pool.
It allows athletes, referees, judges and spectators to be updated on the progress of the game.

Hotels and **resort pools**

Grand Hotel Central, Barcelona (Spain)

Myrtha Pools' patented technology guarantees the very best pools for the finest Hotels, Resorts and High Rise facilities around the world. Myrtha Technology is designed to adapt to the challenges of pool construction in varied climates, small spaces and high rise buildings. Myrtha Technology is designed to adapt to the challenges of pool construction in varied climates, small spaces and high rise buildings. Once installed, a Myrtha Pool does not require the expensive maintenance that traditional pools need every few years thus reducing the amount of scarce resources spent on capital expenditures. Aesthetically, Myrtha Pools have a wide range of accessories to fit the unique profile of hotels and resorts.

Federation Tower Hotel, Moscow (Russia)

At the last floor of the Western tower, inside the Grand Hyatt Hotel, Myrtha Pools has installed the refined pool with white lining and mosaic, underwater lights, hydromassage inlets and swim jets to be used by the hotel guests. The dimensions are 22 x 6 x 1.5 meters.

Rome Cavalieri Waldorf Astoria Hotel, Rome (Italy)

In the center of Rome, in an area nestled in the quiet, the Hotel offers a private park in which Myrtha Pools has built an elegant freeform pool and also refurbished the reinforced concrete pool for children.

Embassy Suite Hotel, Honolulu, HI (USA)

A few steps from Waikiki beach, the hotel has spacious sundeck on the 4th floor roof including an impressive freeform Myrtha pool, heated and finished with elegant ceramic tiles.

Hotel Landmark Mandarin Oriental, Hong Kong

Inside one the most outstanding luxury hotels in Far East, Myrtha Pools has built an indoor state-of-the art 20 m lap pool, included in the facilities of the hotel fitness center.

KOHLER. Faucets

Honesty®

Single Handle Lavatory Faucet

K-99760-4

Features

- Single lever handle allows for both volume and temperature control.
- KOHLER ceramic disc valves exceed industry longevity standards for a lifetime of durable performance.
- Temperature memory allows faucet to be turned on and off at the temperature set during prior usage.
- 1.2 gal/min (4.5 l/min) maximum flow rate [max at 60 psi (4.14 bar)].
- Includes metal pop-up drain with 1-1/4" tailpiece.
- 4-3/16" spout reach
- Red/blue indexing on handle
- Coordinates with Honesty faucets, accessories, and showering components to complete your bathroom.

Material

- Premium Metal Construction.
- KOHLER finishes resist corrosion and tarnishing.

Installation

- For single-hole installation.
- Pre-attached flexible supply lines simplify installation.

Installed component/s: Flexible supply hoses.

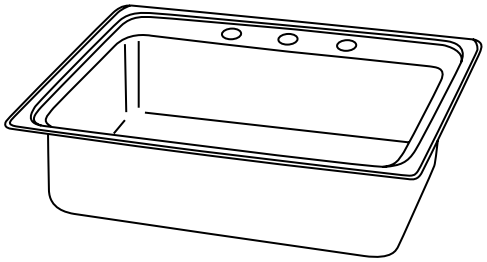
SPECIFICATIONS

Lustertone® Single Bowl Sink
Models LR, LRQ, LRS and LRSQ Series



Model LR(Q)22193

GENERAL
Highest quality sink seamlessly formed of #18 gauge, type 304 (18-8) nickel bearing stainless steel. Self-rimming.

DESIGN FEATURES
LR(Q) Bowl Depth: 8" (LR[Q]2521), 7-1/2" (LR[Q]1919), 7-5/8" (all others).

Coved Corners: 1-3/4" vertical and horizontal radius.

Bowl and Faucet Deck Recess: 3/16" below outside edge of sink.

Finish: Exposed surfaces are hand blended to a lustrous high-lighted satin finish.

Underside: Fully undercoated to dampen sound and prevent condensation. LR(Q)2521 is fully protected by heavy duty Sound Guard® undercoating.

OTHER
Drain Opening: 3-1/2".

NOTE: Unless otherwise specified, models with one, two, three or OS4 faucet hole option are furnished with 3 faucet holes as shown; models with choice of one, two, three, four or five faucet hole option are furnished with 4 faucet holes standard.

Design features:

- **High strength, one piece molded construction**
- **Produced with Mustee's proprietary structural thermoplastic resins and innovative cellular molding process creating extreme strength & durability**
- **Includes Twin-Drain Waste connector which joins drain assemblies to assure rapid and uniform waste water discharge…includes washers, slip nuts and stoppers.**
- **Divider wall between tubs is recessed one inch, permitting water to overflow from one tub to other, prevents water spilling onto floor.**
- **Large, self-draining back shelf with retainer curb that prohibits water run-off except into tub.**
- **19 Gallon capacity per tub, extra deep 13" tubs with smooth surfaces**
- **Connects to standard 1½" P or S trap**
- **Accommodates single or dual-handle faucets. 4" or 8" centers**
- **Floor model includes heavy gauge steel legs with adjustable levelers**
- **Wall model includes wall mounting bracket, side supports and mounting hardware for securing tub to concrete or stud wall**
- **Mold and mildew-resistant components**
- **Easy to assemble and install**
- **Color-fast white finish**

Code Accepted:

UTILATUB® and UTILATWIN® Laundry/Utility Tubs meet or exceed performance requirements as listed:

- **International Association of Plumbing and Mechanical Officials (IAPMO)® Listed**
- **Warnock Hersey® (Canada) Listed—CSA test standards: Laundry Tray - #B45.0 and #B45.5; Drain - #B125**
- **American National Standards Institute (ANSI)—Specification Z 124-2011**

KOHLER®

Wellcomme™ Ultra

Elongated Floor Mount, Flushometer Bowl

K-96053

Features

- Elongated, Standard height bowl.
- 1-1/2" top spud.
- 10" x 7" water surface size.
- 2-1/8" glazed trapway.
- Also available with antimicrobial finish K-96053-SS.

Material

- Vitreous china.

Technology

- Designed to outperform competitors in bowl cleanliness and plug resistance.
- Maximum waste removal.
- Engineered for toilet seat cover removal.
- Excellent bowl rinse.
- Engineered to flush effectively in buildings with low supply pressure and flow*.
- Maximum drain line carry at all flush volumes per ASME Standard.

Installation

- 26-3/8" L x 14-7/8" W x 15-1/4" H
- 10" or 12" rough-in
- Replaces Wellcomme K-4350 and Wellworth K-4406. Height and footprint may vary.

Water Conservation & Rebates

- 1.1 to 1.6 gpf flush range (1.1, 1.28 and 1.6 gpf).
- WaterSense compliant when used with a 1.1 or 1.28 gpf WaterSense flushometer.

Optional Accessories

K-4731-C Commercial Heavy-duty Toilet Seat
K-4731-CA Commercial Heavy-duty Toilet Seat

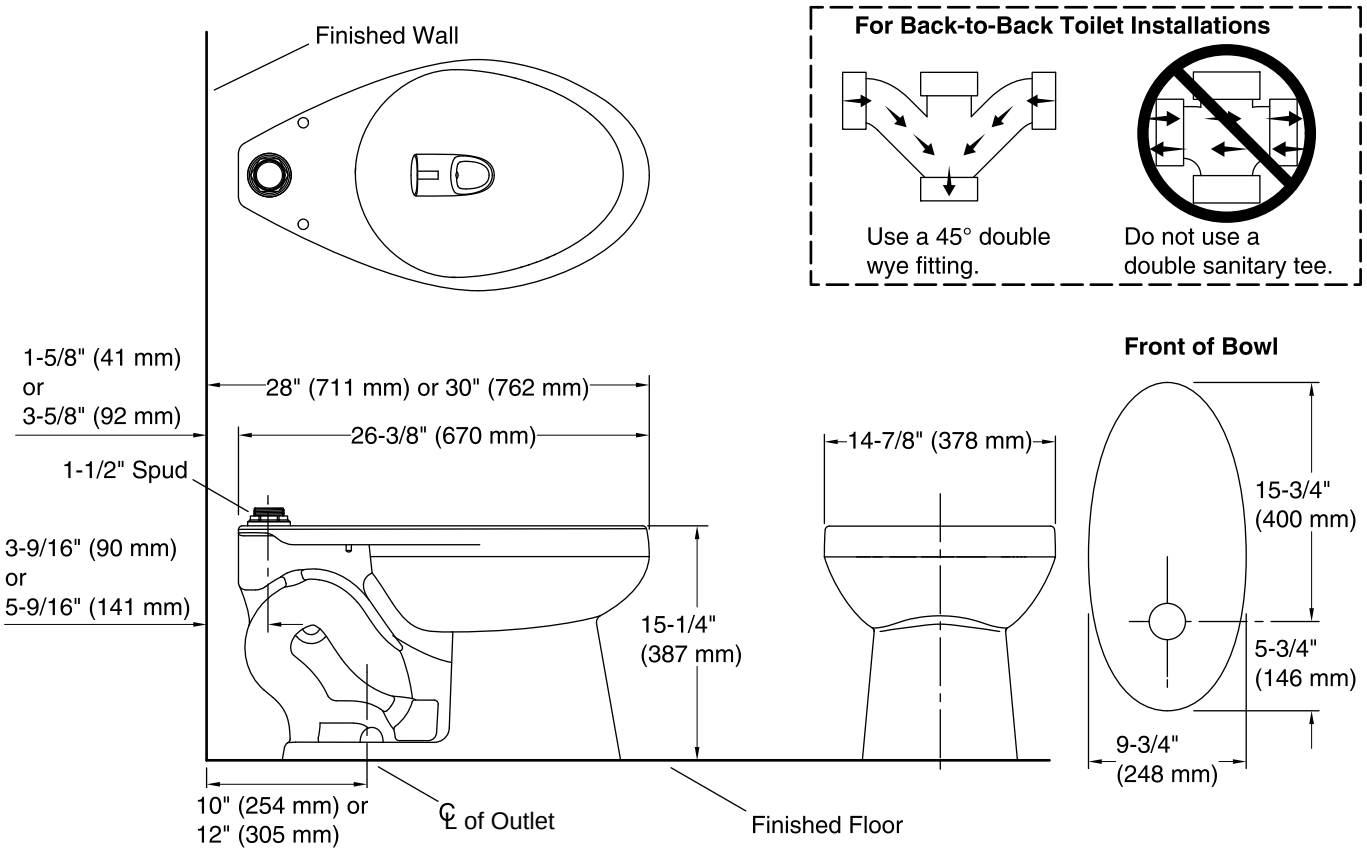
KOHLER®

Wellcomme™ Ultra

Elongated Floor Mount, Flushometer Bowl

K-96053



Technical Information

All product dimensions are nominal.

Toilet type:	Flushometer, Floor-mount
Waste Outlet:	Floor
Bowl shape:	Elongated front
Flush type:	Flushometer valve siphon
Spud size:	1-1/2", Inlet, Top
Trap passageway:	2-1/8" (54 mm)
Water Consumption	
Full:	1.1 gpf (4.3 lpf) or 1.28 gpf (4.8 lpf) or 1.6 gpf (6 lpf)
Water surface size:	10" x 7" (254 mm x 178 mm)
Rim to water surface:	6" (152 mm)
Rough-in:	10" or 12" (254 or 305 mm)
Seat-mounting holes:	5-1/2" (140 mm)

Fixture Supply Requirements

Min static pressure:	35 psi (241.3 kPa)
Max static pressure:	80 psi (551.6 kPa)
Min flowing pressure:	25 psi (172.4 kPa)
Min flow rate:	25 gpm (94.6 lpm)

Notes

Install this product according to the installation instructions.

For back-to-back toilet installations: Use only a 45° double wye fitting.

If Fixture Supply Pressure is below 35 psi static, then fixture must be paired with a valve rated at 1.28 gpf or greater.

Requires flushometer valve to match desired water consumption 1.1 gpf (4.3 lpf) or 1.28 gpf (4.8 lpf) or 1.6 gpf (6 lpf).

Style That Works Better

MADERA™ FloWise® 15" HEIGHT ELONGATED FLUSHOMETER TOILET

VITREOUS CHINA LESS EVERCLEAN®

MADERA™ FloWise® 15" HEIGHT ELONGATED LESS EVERCLEAN®

- Floor mount flushometer valve toilet
- Vitreous china
- High Efficiency, Low Consumption. Operates in the range of 1.1 gpf to 1.6 gpf (4.2 Lpf to 6.0 Lpf)
- Meets definition of HET (High Efficiency Toilet) when used with a high efficiency flush valve (1.28 gpf or 1.6 / 1.1 gpf dual flush)
- Fully glazed 2-1/8" trapway
- Elongated bowl
- 10" or 12" roughing-in
- 15" rim height
- Condensation channel
- Powerful direct-fed siphon jet action
- 10" x 12" water surface area
- 1-1/2" inlet spud
- 2 bolt caps
- 100% factory flush tested

❏ **2234.001** Elongated bowl only, top spud

❏ **2623.001** Elongated bowl only, top spud with slotted rim for bedpan holding (White only)

❏ **2624.001** Elongated bowl only, back spud

System MaP* Score:

- 1,000 grams of miso @ 1.6 gpf or 1.28 gpf when used with an American Standard flush valve

* Maximum Performance (MaP) testing performed by IAPMO R&T Lab. MaP Report conducted by Veritec Consulting, Inc. and Koeller and Company.

Component Parts:

❏ **047007-0070A** Inlet Spud (furnished with bowl)

❏ **481310-100** Bolt caps with retainers (furnished with bowl)

Nominal Dimensions:
718 x 356 x 381mm
(28-1/4" x 14" x 15")

Fixture only, less seat and flush valve

Recommended working pressure–between 25 psi at valve when flushing and 80 psi static

Compliance Certifications -
Meets or Exceeds the Following Specifications:

- ASME A112.19.2-2008 / CSA B45.1-08 for Vitreous China Fixtures

Flush Valves

Exposed Flush Valves-Manual Operation

Model No: 81T201

COMPLIES WITH:

- CSA certified.
- Complies to ASSE 1037
- IAPMO listed
- ADA compliant and meets Handicapped Accessibility Standard ASME 117.1 of less than 5 lbs operating force
- (Contact Delta Representative for State and/or Local Approvals)

SPECIFICATION:

- Quiet action, Teck® exposed diaphragm flush valve
- polished chrome plated finish
- vandal resistant cover screw
- metal "non hold open" ADA Compliant oscillating handle
- vacuum breaker
- renewable seat
- *Chloramine resistant diaphragm attached to guide with forged metal retainer.
- spud flange and concealed spud nut
- For Water Closets with 1-1/2" top spud
- maximum 292mm(11 1/2") from centerline of valve inlet to top of water closet, except -1 trap seal models which are maximum 11 3/4"
- 1" FIP/Copper sweat inlet adaptor for angle check stop with protecting cap
- adjustable 121mm (4.75”) plus or minus 11mm (7/16”) inlet/valve outlet centers
- external water conserving flush volume adjustment unless -6 variation selected which is Not Field Adjustable
- Cover tube and wall flange
- 6 Litre(1.6 US Gal.)Factory set Flush - Field Adjustable

OPERATION:

- Not Available

Delta reserves the right (1) to make changes to specifications and materials, and (2) to change or discontinue models, both without notice or obligation. Dimensions are for reference. Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

Delta Faucet Company - 55 East 111th St. - Indianapolis, Indiana, USA 46280 - (317) 848-1812
Delta Faucet Canada - 395 Matheson Blvd E - Mississauga, Ontario, Canada L4Z 2H2 - (905) 712-3030

Model No: 81T201

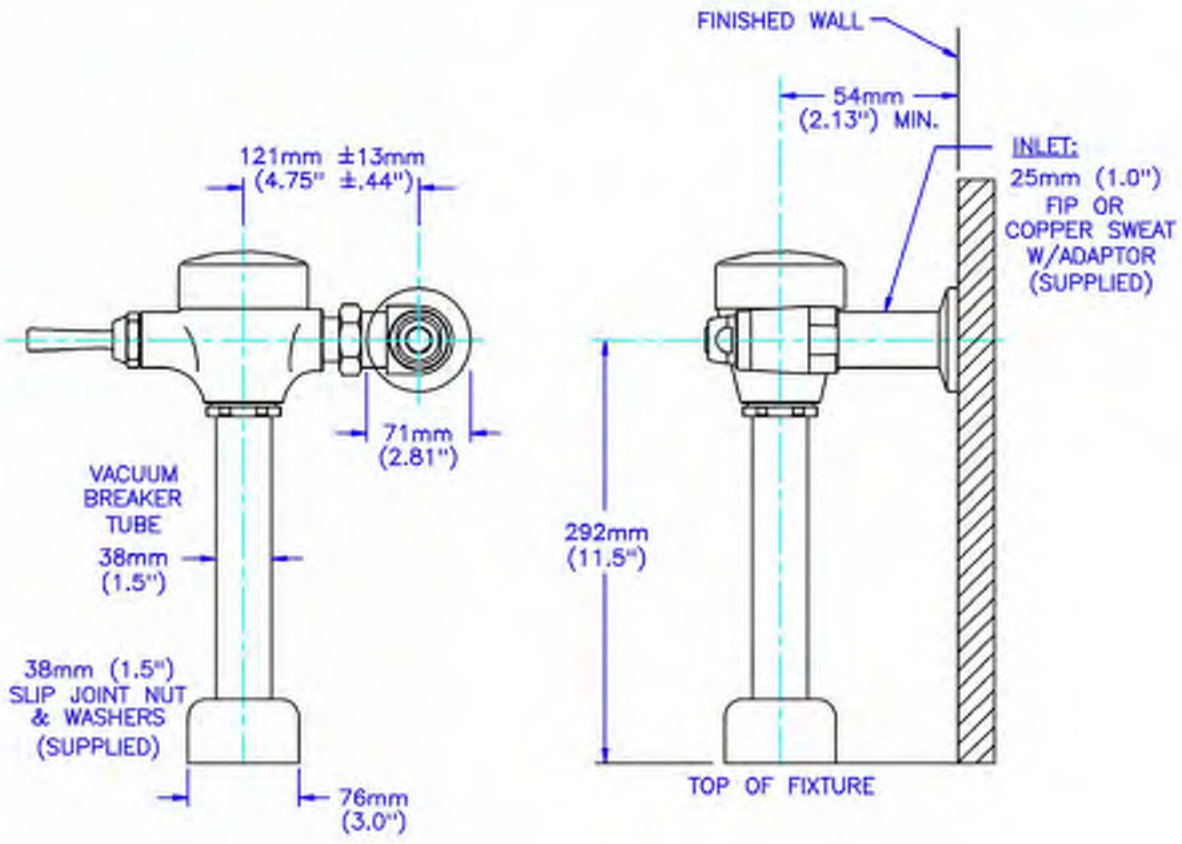
- FACTORY SET FOR 6.0 LITRE (1.6 US GAL.) FLUSH AT 60 PSI
- FIELD ADJUSTABLE FLUSH FROM 4.8L TO 25L (1.27 TO 6.6 US GAL.)

THE RECOMMENDED FLUSH VALVE OPERATING PRESSURE RANGE IS BETWEEN 35 & 65 PSI. PRESSURES OVER 75PSI LEAD TO AN INCREASE IN NOISE, WATER COULD SPLASH OUT OF THE FIXTURE MORE EASILY, AND THE LIFE OF ANY PLUMBING VALVE MAY BE SHORTENED.

FOR PRESSURES OVER 75PSI, A PRESSURE REDUCING VALVE IS RECOMMENDED.

FLUSH VALVES DO NOT PROVIDE A WATER SUPPLY; THEY ARE MERELY AUTOMATICALLY TIMED SELF-CLOSING VALVES. THE INLET SUPPLY PIPING IS THE WATER RESERVOIR THAT MUST SUPPLY SUFFICIENT WATER VOLUME IN A SHORT PERIOD OF TIME TO PROPERLY FLUSH THE FIXTURE.

WE STRONGLY RECOMMEND THAT PIPING CALCULATIONS BE DONE FOE ALL INSTALLATIONS TO INSURE PROPER WATER SUPPLY SIZES. CALL TECHNICAL SERVICE FOR DETAILS.



Delta reserves the right (1) to make changes to specifications and materials, and (2) to change or discontinue models, both without notice or obligation. Dimensions are for reference. Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

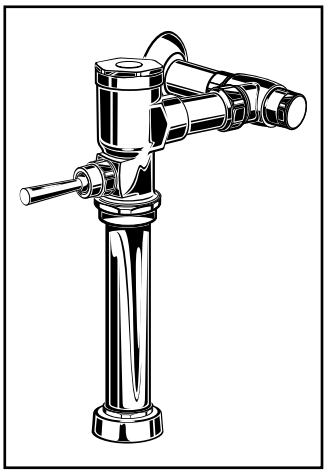
American Standard Inc

Model: Manual Toilet Flush Valve
Model Number: 6047.161.020

Color/Finish: Polished Chrome

American Standard
Style That Works Better

MANUAL TOILET FLUSH VALVE
1.6 GPF



GENERAL DESCRIPTION:
Manual Piston-Type Water Closet Flush Valve for floor-mounted or wall-hung 1-1/2" top spud bowls.

INCLUDES:
- 1" I.P.S. angle stop with back-flow prevention and vandal-resistant cap
- Sweat solder kit including cover tube and wall flange
- High back pressure vacuum breaker with down tube
- Spud coupling & flange for 1-1/2" top spud

PRODUCT FEATURES:
- Self-cleaning brass piston with integral wiper spring prevents clogging and reduces maintenance
- Piston operation delivers superior flush accuracy and repeatability
- Piston valve remains closed and does not need to be reset after loss of water pressure
- Non-hold open handle
- Positive seal ensures leak-free performance
- No external volume adjustment
- Durable chrome-plated cast brass construction is ideal for commercial applications
- Chloramine-resistant EPDM seals
- Adjustable tailpiece for rough-in flexibility
- Can be installed left or right handed
- ADA complaint

MODEL NUMBER:

- ❑ **6047.161.002** Flush Valve for 11-1/2" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6047.162.002** Flush Valve for 27" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6047.565.002** Retrofit for existing flush valves, 1.6 gpf. Replaces industry standard manual & electronic flush valves. Does not include vacuum breaker assembly, angle stop & sweat solder kit.

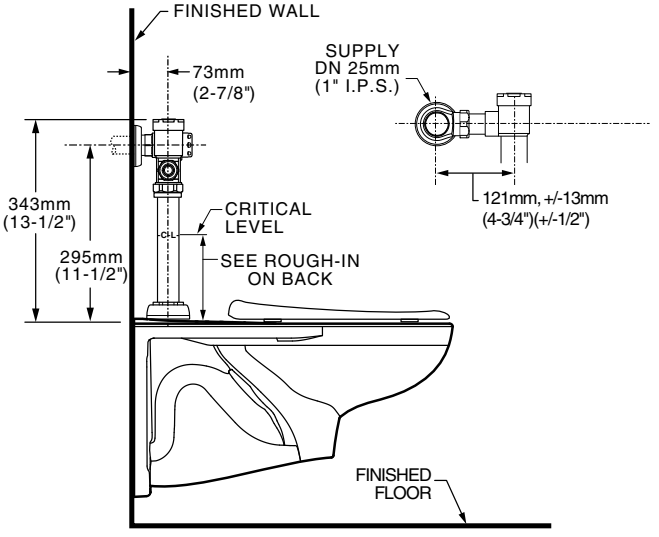
OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 25 psi (flowing)-80 psi (static)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

FLOW REQUIREMENT:
25gpm (94.6 L/min.)

ACCESSORIES:
- Cast wall flanges (3/4", 1" & 1-1/2")
- Solid ring pipe supports (2-1/2" & 6" C-E)
- Split ring pipe supports (2-1/2" & 6" C-E)

TYPICAL WATER CLOSET INSTALLATION:
AFWALL™ TOILET SHOWN



RECOMMENDED SPECIFICATION:
Manual toilet flush valve shall feature self-cleaning brass piston valve with integral wiper spring in bypass orifice to prevent clogging. Valve remains closed and does not need to be reset after loss of water pressure. Includes cast brass valve body and cover with chrome finish and vandal resistant stop cap. Includes sweat solder kit with wall flange and cover tube. Angle stop with back-flow protection and vacuum breaker included. 1.6 gpf / 6.0 Lpf Flush valve shall be American Standard Model # 6065.16_.002.

Model: Selectronic Toilet Flush Valve 1.60 GPF
Model Number: 6065.161.020

Color/Finish: Polished Chrome

American Standard
Style That Works Better

SELECTRONIC™ TOILET FLUSH VALVE
BATTERY POWERED, SENSOR OPERATED, 1.6 GPF

GENERAL DESCRIPTION:
Exposed, Battery Powered, Sensor Operated Selectronic™ Water Closet Flush Valve for floor-mounted or wall-hung 1-1/2" top spud bowls.

Inlet includes 1" I.P.S. angle stop with back-flow protection, vandal-resistant cap, sweat solder kit, cover tube and wall flange.

Outlet includes 1-1/2" vacuum breaker with adjustable tailpiece, spud coupling and flange.

PRODUCT FEATURES:
- Electronic flush valve with Selectronic® proximity system for hygienic "Hands Free" operation
- Self-cleaning piston with integral wiper spring helps prevent clogging and reduces maintenance
- Piston operation delivers superior flush accuracy and repeatability
- Positive seal ensures leak-free performance
- Fully Mechanical Manual Override - allows valve to flush during a power failure
- Fail-Safe Operation - valve automatically closes, and does not need to be reset, on loss of power or water pressure
- Adjustable Sanitary Flush - valve automatically flushes after 24 hours of non-use to clean fixture & maintain trap seal
- Sensor & electronic controls are fully enclosed and water resistant
- Range can be adjusted manually or with optional remote control
- Chemical resistant EPDM seals are unaffected by chloramines
- Factory-installed CR-P2 lithium battery
- No external volume adjustment
- Adjustable tailpiece
- Can be installed left or right-handed
- ADA Compliant

MODEL NUMBER:

- ❑ **6065.161.002** Flush Valve for 11-1/2" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6065.162.002** Flush Valve for 27" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6065.565.002** Retrofit for Existing Flush Valves, 1.6 gpf. Replaces industry standard manual and electronic valves. Does not include the vacuum breaker assembly, angle stop or sweat solder kit.

OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 25 psi (flowing)-80 psi (static)

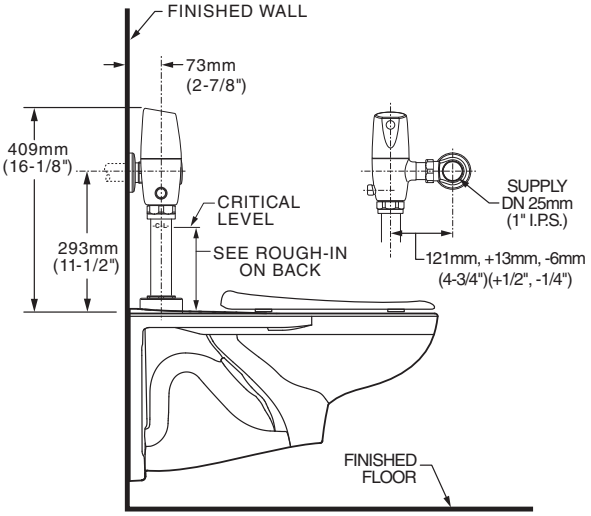
FLOW REQUIREMENT:
25gpm (94.6 L/min.)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

BATTERY LIFE:
200,000 cycles (4 years @ 4000 cycles per month)

ACCESSORIES:
- Cast wall flanges (1" & 1-1/2")
- Solid ring pipe supports (2-1/2" & 6" C-E)
- Split ring pipe supports (2-1/2" & 6" C-E)

TYPICAL WATER CLOSET INSTALLATION:
AFWALL™ TOILET SHOWN



MEETS THE AMERICANS WITH DISABILITIES ACT GUIDELINES AND ANSI A117.1 REQUIREMENTS FOR ACCESSIBLE AND USABLE BUILDING FACILITIES-CHECK LOCAL CODES

RECOMMENDED SPECIFICATION:
Electronic proximity infrared sensor activated toilet flush valve shall feature self-cleaning piston valve with integral wiper spring in refill orifice to prevent clogging. Includes a fully mechanical manual over-ride that can provide a complete flush without battery power. Includes cast brass valve body and metal cover with chrome finish, vandal resistant stop cap and lithium battery. Angle stop with back-flow protection and vacuum breaker included. 1.6 gpf / 6.0 Lpf. Flush valve shall be American Standard Model # 6065.16_.002, 6065.565.002.

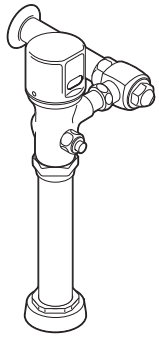
Specifications



1-1/2 " Battery Powered Exposed Style Closet Flush Valve

Model: 8310

PRODUCT DESCRIPTION
- Brass construction w/chrome plated finish
- 1" IPS supply
- 1-1/2" top spud

OPERATION
- Adjustable sensor eyes
- Battery powered (4) standard AA (included)
- Average battery life 250,000 cycles
- Self-diagnostic electronics
- Piston flushing mechanism
- Self cleaning filter system
- Low battery indicator light

FLOW
- Operating pressures 10 to 125 psi
- 1.6 gpf (gallons per flush)
- 24 hour sentinel flush
- Manual override button

VALVE
- 1" IPS angle stop (vandal resistant)
- Adjustable installation (left or right connection)

STANDARDS
- Third party certified by IAPMO and CSA to meet ASME A112.19.2M and all applicable requirements referenced therein and complies with requirements of ASSE 1037
- **ADA**

WARRANTY
- Warranted for 5 years against material or manufacture defects.

Flush Valves

Exposed Flush Valves-Manual Operation

Model No: 81T201

COMPLIES WITH:

- CSA certified.
- Complies to ASSE 1037
- IAPMO listed
- ADA compliant and meets Handicapped Accessibility Standard ASME 117.1 of less than 5 lbs operating force
- (Contact Delta Representative for State and/or Local Approvals)

SPECIFICATION:

- Quiet action, Teck® exposed diaphragm flush valve
- polished chrome plated finish
- vandal resistant cover screw
- metal "non hold open" ADA Compliant oscillating handle
- vacuum breaker
- renewable seat
- *Chloramine resistant diaphragm attached to guide with forged metal retainer.
- spud flange and concealed spud nut
- For Water Closets with 1-1/2" top spud
- maximum 292mm(11 1/2") from centerline of valve inlet to top of water closet, except -1 trap seal models which are maximum 11 3/4"
- 1" FIP/Copper sweat inlet adaptor for angle check stop with protecting cap
- adjustable 121mm (4.75”) plus or minus 11mm (7/16”) inlet/valve outlet centers
- external water conserving flush volume adjustment unless -6 variation selected which is Not Field Adjustable
- Cover tube and wall flange
- 6 Litre(1.6 US Gal.)Factory set Flush - Field Adjustable

OPERATION:

- Not Available

(Dimensional drawing on following page)

Delta reserves the right (1) to make changes to specifications and materials, and (2) to change or discontinue models, both without notice or obligation. Dimensions are for reference. Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

Delta Faucet Company - 55 East 111th St. - Indianapolis, Indiana, USA 46280 - (317) 848-1812
Delta Faucet Canada - 395 Matheson Blvd E - Mississauga, Ontario, Canada L4Z 2H2 - (905) 712-3030

Model No: 81T201

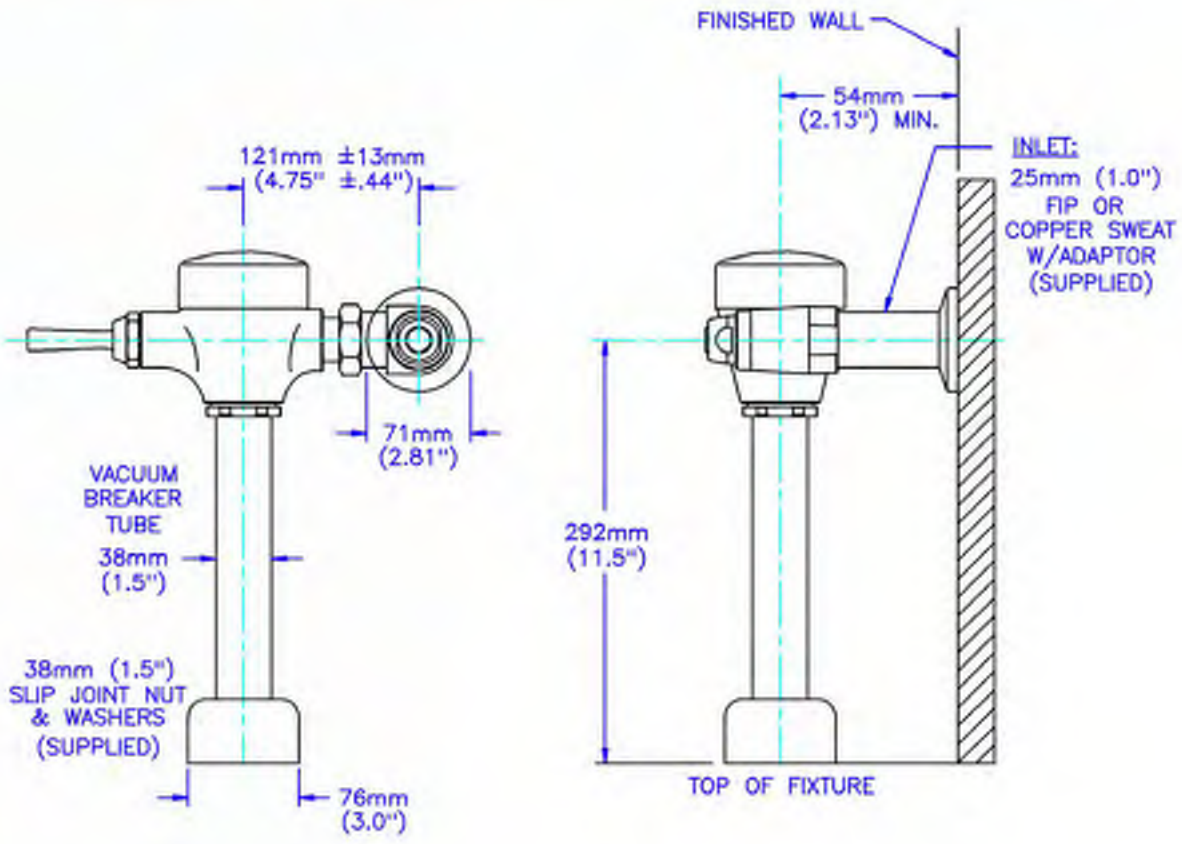
- FACTORY SET FOR 6.0 LITRE (1.6 US GAL.) FLUSH AT 60 PSI
- FIELD ADJUSTABLE FLUSH FROM 4.8L TO 25L (1.27 TO 6.6 US GAL.)

THE RECOMMENDED FLUSH VALVE OPERATING PRESSURE RANGE IS BETWEEN 35 & 65 PSI. PRESSURES OVER 75PSI LEAD TO AN INCREASE IN NOISE, WATER COULD SPLASH OUT OF THE FIXTURE MORE EASILY, AND THE LIFE OF ANY PLUMBING VALVE MAY BE SHORTENED.

FOR PRESSURES OVER 75PSI, A PRESSURE REDUCING VALVE IS RECOMMENDED.

FLUSH VALVES DO NOT PROVIDE A WATER SUPPLY; THEY ARE MERELY AUTOMATICALLY TIMED SELF-CLOSING VALVES. THE INLET SUPPLY PIPING IS THE WATER RESERVOIR THAT MUST SUPPLY SUFFICIENT WATER VOLUME IN A SHORT PERIOD OF TIME TO PROPERLY FLUSH THE FIXTURE.

WE STRONGLY RECOMMEND THAT PIPING CALCULATIONS BE DONE FOE ALL INSTALLATIONS TO INSURE PROPER WATER SUPPLY SIZES. CALL TECHNICAL SERVICE FOR DETAILS.



Delta reserves the right (1) to make changes to specifications and materials, and (2) to change or discontinue models, both without notice or obligation. Dimensions are for reference. Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

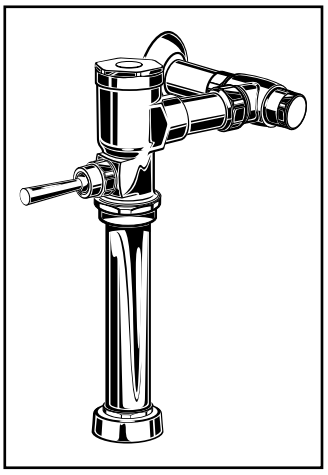
Model: Manual Toilet Flush Valve
Model Number: 6047.161.020

Color/Finish: Polished Chrome

American Standard
Style That Works Better

MANUAL TOILET FLUSH VALVE
1.6 GPF



GENERAL DESCRIPTION:
Manual Piston-Type Water Closet Flush Valve for floor-mounted or wall-hung 1-1/2" top spud bowls.

INCLUDES:
- 1" I.P.S. angle stop with back-flow prevention and vandal-resistant cap
- Sweat solder kit including cover tube and wall flange
- High back pressure vacuum breaker with down tube
- Spud coupling & flange for 1-1/2" top spud

PRODUCT FEATURES:
- Self-cleaning brass piston with integral wiper spring prevents clogging and reduces maintenance
- Piston operation delivers superior flush accuracy and repeatability
- Piston valve remains closed and does not need to be reset after loss of water pressure
- Non-hold open handle
- Positive seal ensures leak-free performance
- No external volume adjustment
- Durable chrome-plated cast brass construction is ideal for commercial applications
- Chloramine-resistant EPDM seals
- Adjustable tailpiece for rough-in flexibility
- Can be installed left or right handed
- ADA complaint

MODEL NUMBER:

- ❑ **6047.161.002** Flush Valve for 11-1/2" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6047.162.002** Flush Valve for 27" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6047.565.002** Retrofit for existing flush valves, 1.6 gpf. Replaces industry standard manual & electronic flush valves. Does not include vacuum breaker assembly, angle stop & sweat solder kit.

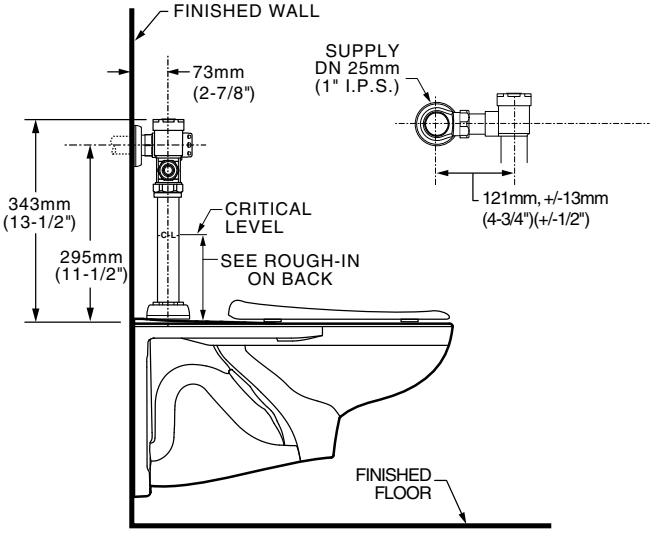
OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 25 psi (flowing)-80 psi (static)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

FLOW REQUIREMENT:
25gpm (94.6 L/min.)

ACCESSORIES:
- Cast wall flanges (3/4", 1" & 1-1/2")
- Solid ring pipe supports (2-1/2" & 6" C-E)
- Split ring pipe supports (2-1/2" & 6" C-E)

TYPICAL WATER CLOSET INSTALLATION:
AFWALL™ TOILET SHOWN



RECOMMENDED SPECIFICATION:
Manual toilet flush valve shall feature self-cleaning brass piston valve with integral wiper spring in bypass orifice to prevent clogging. Valve remains closed and does not need to be reset after loss of water pressure. Includes cast brass valve body and cover with chrome finish and vandal resistant stop cap. Includes sweat solder kit with wall flange and cover tube. Angle stop with back-flow protection and vacuum breaker included. 1.6 gpf / 6.0 Lpf Flush valve shall be American Standard Model # 6065.16_.002.

DELTA

❑ **81T201BTA**
– Exposed Battery Operated
1-1/2" Top Inlet Closet Fixture

- Polished chrome plated vandal resistant metal cover with top mounted sensor operated H_2OPTICS™ electronics
- Right or left-hand supply installation
- ADA compliant, automatic operation battery powered infrared sensor
- Scratch resistant replaceable lens window
- Four (4) size AA alkaline batteries factory installed with valve in sleep mode for easy installation
- Hinged battery housing for easy maintenance
- Low battery flashing light (5000 flushes remaining) with battery strength indicator
- Infrared sensor range adjustment of 610mm-1067mm (24" - 42"), factory set at 34" (±2")
- Optional dual flush setting capability factory set to OFF (dual flush recommended for 6 litre (1.6 US gal) models only)
- Optional 24 hour automatic flush factory set to OFF, 3 second flush delay
- Set-up sensor range adjustment indicator lights
- 6 VDC input, 8 second arming delay
- Electronic operated non-hold-open **metal** manual override button with 5 second lockout
- Quiet action, TECK® exposed diaphragm flush valve
- Chloramine resistant diaphragm
- Forged brass diaphragm retainer
- Renewable seat
- Polished chrome plated finish
- **External water conserving flush adjustment,** factory set at 60 PSI to 6 litre (1.6 US gal.) (except -48 and -6 models)
- **1" FIP/Copper sweat inlet adaptor,** angle check stop with protecting cap
- Adjustable 121mm (4-3/4") plus or minus 11mm (7/16") inlet/valve outlet centers
- Vacuum breaker
- Cover tube, stainless steel wall flange, spud flange, concealed spud nut, and 292mm (11-1/2") outlet tube.

Style That Works Better

SELECTRONIC™ TOILET FLUSH VALVE
BATTERY POWERED, SENSOR OPERATED, 1.6 GPF

GENERAL DESCRIPTION:
Exposed, Battery Powered, Sensor Operated Selectronic™ Water Closet Flush Valve for floor-mounted or wall-hung 1-1/2" top spud bowls.

Inlet includes 1" I.P.S. angle stop with back-flow protection, vandal-resistant cap, sweat solder kit, cover tube and wall flange.

Outlet includes 1-1/2" vacuum breaker with adjustable tailpiece, spud coupling and flange.

PRODUCT FEATURES:
- Electronic flush valve with Selectronic® proximity system for hygienic "Hands Free" operation
- Self-cleaning piston with integral wiper spring helps prevent clogging and reduces maintenance
- Piston operation delivers superior flush accuracy and repeatability
- Positive seal ensures leak-free performance
- Fully Mechanical Manual Override - allows valve to flush during a power failure
- Fail-Safe Operation - valve automatically closes, and does not need to be reset, on loss of power or water pressure
- Adjustable Sanitary Flush - valve automatically flushes after 24 hours of non-use to clean fixture & maintain trap seal
- Sensor & electronic controls are fully enclosed and water resistant
- Range can be adjusted manually or with optional remote control
- Chemical resistant EPDM seals are unaffected by chloramines
- Factory-installed CR-P2 lithium battery
- No external volume adjustment
- Adjustable tailpiece
- Can be installed left or right-handed
- ADA Compliant

MODEL NUMBER:

- ❑ **6065.161.002** Flush Valve for 11-1/2" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6065.162.002** Flush Valve for 27" Supply C\L to top of bowl, 1.6 gpf
- ❑ **6065.565.002** Retrofit for Existing Flush Valves, 1.6 gpf. Replaces industry standard manual and electronic valves. Does not include the vacuum breaker assembly, angle stop or sweat solder kit.

OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 25 psi (flowing)-80 psi (static)

FLOW REQUIREMENT:
25gpm (94.6 L/min.)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

BATTERY LIFE:
200,000 cycles (4 years @ 4000 cycles per month)

ACCESSORIES:
- Cast wall flanges (1" & 1-1/2")
- Solid ring pipe supports (2-1/2" & 6" C-E)
- Split ring pipe supports (2-1/2" & 6" C-E)

Kohler Company

Model: Exposed Wave Flush Valve 1.28GPF
Model Number: K-10673

Color/Finish: Refer to Plumbing Fixture Matrix

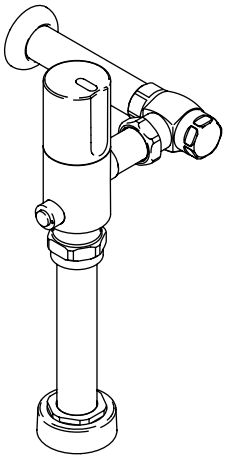
KOHLER® FAUCETS

Features

- *Brass construction*
- *Fixture-mount design*
- *Includes a 9 V lithium battery*
- *Intended for toilet installations with 1-1/2″ spud coupling connection*
- *Electronic infrared sensor with WAVE technology for accurate activation*
- *Retrofit models require a control stop and vacuum breaker*
- *1.28 gpf (4.8 lpf) flush flow rate for low water consumption [-10673]*
- *1.6 gpf (6 lpf) flush flow rate [K-10674 and K-10677]*

EXPOSED WAVE FLUSH VALVE
K-10673
ALSO K-10674, K-10677

ADA



Codes/Standards Applicable

Specified model meets or exceeds the following:

- *ASSE 1037*
- *CSA B64*
- *ADA*
- *FCC 47, Part 15*
- *EN 55022*
- *ASME A112.18.1/CSA B125.1*
- *ICES-003, Class B*
- *ICC/ANSI A117.1*

Colors/Finishes

- CP: Polished Chrome

Specified Model:

Model	Description	Colors/Finishes
K-10673	Exposed WAVE flush valve – 1.28 gpf (4.8 lpf)	❑ CP
K-10674	Exposed WAVE flush valve – 1.6 gpf (6 lpf)	❑ CP
K-10677	Exposed WAVE flush valve retrofit – 1.6 gpf (6 lpf)	❑ CP

PRODUCT SPECIFICATION

Electronic flush valve shall be made of brass construction. Valve shall feature electronic infrared sensor with WAVE technology for accurate activation. Valve shall be of a fixture-mount design. Product is intended for toilet installations with a 1-1/2″ spud coupling connection, and retrofit models require a control stop and vacuum breaker. Valve shall have a 1.28 gpf (4.8 lpf) flow rate for low water consumption [K-10673] or 1.6 gpf (6 lpf) flow rate [K-10674 and K-10677]. Valve includes a 9 V lithium battery. Product shall be Kohler Model K-_____-CP.

USA/Canada: 1-800-4KOHLER

Available Colors:

- White Only
- Other: Refer to Price Book for additional colors/ finishes

Warranty:

- Limited Lifetime on Vitreous China, refer to the website for more details.

HIGH EFFICIENCY TOILET HET

NOTES: All dimensions are in inches and millimeter. Illustrations may not be drawn to scale.

*This measurement may vary. Use flush valve manufacturer's recommended rough-in.

RECOMMENDED STATIC WATER PRESSURE FOR PLUMBING FIXTURES IS 20 - 80 PSI STATIC PER ANSI STANDARDS A112.19.2M APPENDIX B.

IMPORTANT:
Dimensions of fixtures are nominal and may vary within the range of tolerances established by ASME standard A 112.19.2

THIS FIXTURE QUALIFIES ACCORDING TO ASME TEST PROCEDURES AS EITHER A LOW CONSUMPTION WATER CLOSET WITH AN AVERAGE CONSUMPTION OF 1.6 gpf (6.0 Lpf) OR LESS, OR AS A HIGH EFFICIENCY WATER CLOSET WITH AN AVERAGE CONSUMPTION OF 1.28 gpf (4.8 Lpf) OR LESS. WATER CLOSET CONSUMPTION IS DETERMINED BY THE FLUSHOMETER

Highcliff™ Ultra

Elongated, Floor Mount, Flushometer Bowl

K-96057

Features

- Elongated bowl, ADA compliant.
- 1-1/2" top spud.
- 2-1/8" glazed trapway.
- 10" x 7" water surface size
- Also available with antimicrobial finish K-96057-SS.

Material

- Vitreous china.

Technology

- Designed to outperform competitors in bowl cleanliness and plug resistance.
- Maximum waste removal.
- Improved toilet seat cover removal.
- Excellent bowl rinse.
- Engineered to flush effectively in buildings with low supply pressure and flow. Tested to 25 psi and 19 gpm.
- Maximum drain line carry at all flush volumes per ASME Standard.
- Reduced splashing.

Installation

- 26-3/8" L x 14-5/8" W x 16-7/8" H
- 10" or 12" rough-in
- Replaces Highcrest K-4302, Highcliff K-4368 and Highline K-4405.

Water Conservation & Rebates

- 1.1 to 1.6 gpf flush range (1.1, 1.28 and 1.6 gpf).
- WaterSense compliant when used with a 1.1 or 1.28 gpf WaterSense flushometer.

Optional Accessories

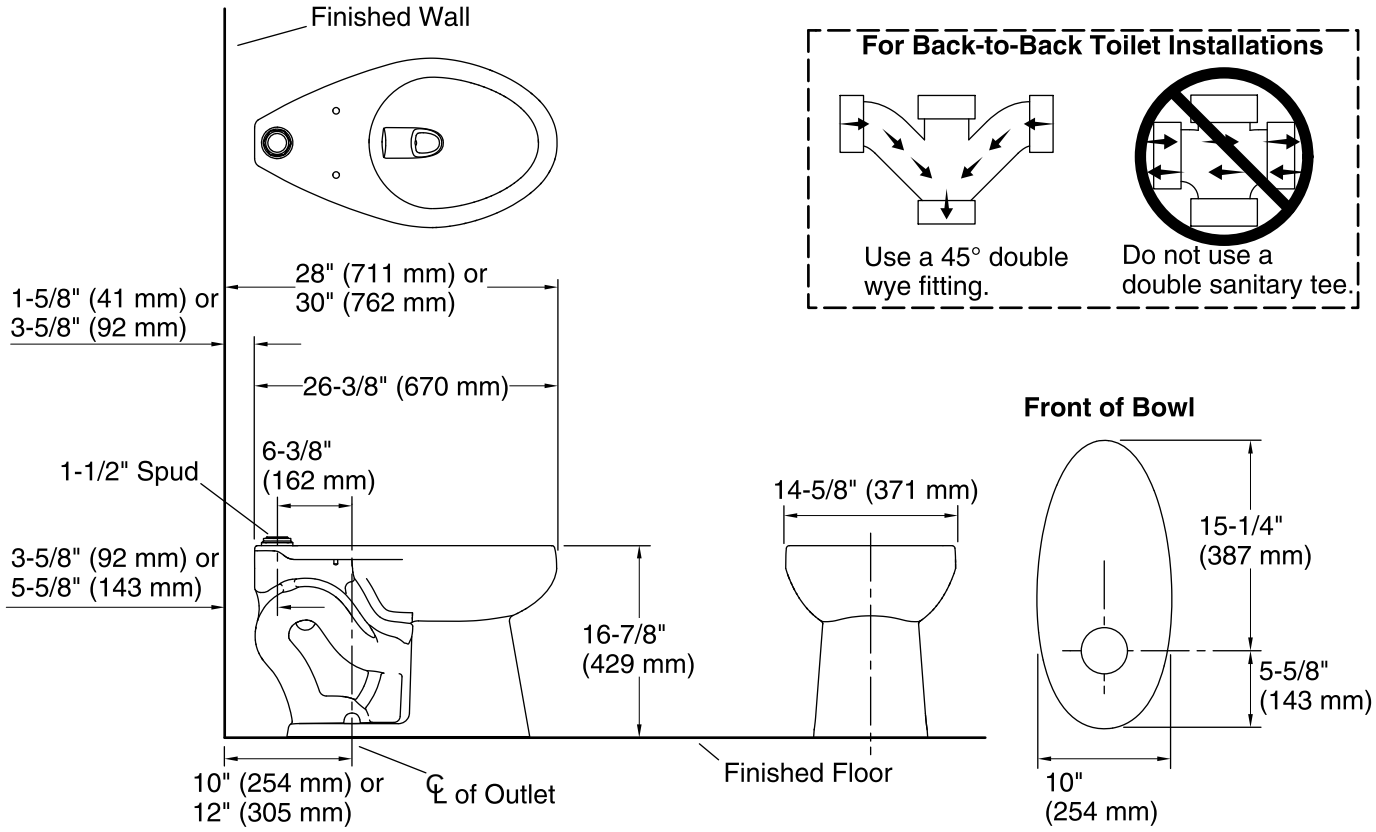
KOHLER®

Highcliff™ Ultra

Elongated, Floor Mount, Flushometer Bowl

K-96057



Technical Information

All product dimensions are nominal.

Toilet type:	Flushometer, Floor-mount
Waste Outlet:	Floor
Bowl shape:	Elongated front
Flush type:	Flushometer valve siphon
Spud size:	1-1/2", Inlet, Top
Trap passageway:	2-1/8" (54 mm)
Water Consumption	
Full:	1.1 gpf (4.3 lpf) or 1.28 gpf (4.8 lpf) or 1.6 gpf (6 lpf)
Water surface size:	10" x 7" (254 mm x 178 mm)
Rim to water surface:	6" (152 mm)
Rough-in:	10" or 12" (254 or 305 mm)
Seat-mounting holes:	5-1/2" (140 mm)

Fixture Supply Requirements

Min static pressure:	35 psi (241.3 kPa)
Max static pressure:	80 psi (551.6 kPa)
Min flowing pressure:	25 psi (172.4 kPa)
Min flow rate:	25 gpm (94.6 lpm)

Notes

Install this product according to the installation instructions.

For back-to-back toilet installations: Use only a 45° double wye fitting.

Requires flushometer valve to match desired water consumption 1.1 gpf (4.3 lpf) or 1.28 gpf (4.8 lpf) or 1.6 gpf (6 lpf).

ADA, OBC, CSA B651 compliant when installed to the specific requirements of these regulations.

Plumbing Codes require elongated toilets and elongated, open-front toilet seats in public bathrooms.

Accessibility standards require controls to be located on the open side of the toilet.

MADERA™ FloWise® 16-1/2" HEIGHT ELONGATED LESS EVERCLEAN®

- Floor mount flushometer valve toilet
- Vitreous china
- High Efficiency, Low Consumption. Operates in the range of 1.1 gpf to 1.6 gpf (4.2 Lpf to 6.0 Lpf)
- Meets definition of HET (High Efficiency Toilet) when used with a high efficiency flush valve (1.28 gpf or 1.6 / 1.1 gpf dual flush)
- Fully glazed 2-1/8" trapway
- Elongated bowl
- 10" or 12" roughing-in
- 16-1/2" rim height for accessible application
- Condensation channel
- Powerful direct-fed siphon jet action
- 10" x 12" water surface area
- 1-1/2" inlet spud
- 2 bolt caps
- 100% factory flush tested

❑ **3043.001** Elongated bowl only, top spud
❑ **3248.001** Elongated bowl only, top spud with slotted rim for bedpan holding (White only)
❑ **3249.001** Elongated bowl only, back spud

System MaP* Score:
- 1,000 grams of miso @ 1.6 gpf or 1.28 gpf when used with an American Standard flush valve

* Maximum Performance (MaP) testing performed by IAPMO R&T Lab. MaP Report conducted by Veritec Consulting, Inc. and Koeller and Company.

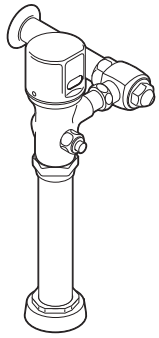
Specifications



1-1/2 " Battery Powered Exposed Style Closet Flush Valve

Model: 8311

PRODUCT DESCRIPTION
- Brass construction w/chrome plated finish
- 1" IPS supply
- 1-1/2" top spud

OPERATION
- Adjustable sensor eyes
- Battery powered (4) standard AA (included)
- Average battery life 250,000 cycles
- Self-diagnostic electronics
- Piston flushing mechanism
- Self cleaning filter system
- Low battery indicator light

FLOW
- Operating pressures 10 to 125 psi
- 1.28 gpf/4.8Lpf (gallons per flush)
- 24 hour sentinel flush
- Manual override button

VALVE
- 1" IPS angle stop (vandal resistant)
- Adjustable installation (left or right connection)

STANDARDS
- Third party certified by IAPMO and CSA to meet ASME A112.19.2M and all applicable requirements referenced therein and complies with requirements of ASSE 1037
- **ADA**

WARRANTY
- Warranted for 5 years against material or manufacture defects.

Technical Information

Fixture:	
Configuration	3/4″ top spud
Gallons per flush	1 gal* (3.78 L)
Spud inlet size	3/4″
* Designed to flush with one gallon (3.78 L) of water when installed with a water saving flush valve.	

Included components:	
3/4″ inlet spud	18376
2″ outlet spud	18766
Hanger (2 required)	64512

Installation Notes

Install this product according to the installation guide.

Refer to manufacturer's instructions and local codes for flush valve requirements.

WASHBROOK® FloWise® UNIVERSAL URINAL

- Vitreous china
- Ultra High Efficiency, Low Consumption. Operates in the range of 0.125gpf to 1.0gpf (0.5 Lpf to 3.8 Lpf)
- Flushing rim
- Elongated 14" rim from finished wall
- Washout flush action
- Extended sides for privacy
- 3/4" inlet spud
- Outlet connection threaded 2" inside (NPTF)
- 2 wall hangers
- Fixture only
- Strainer included
- Meets ASME flush requirements at 0.125 to 1.0 gpf

❏ **6590.001** Universal Top spud
❏ **6515.001** Universal Back spud

Nominal Dimensions:
360 x 480 x 664mm
(14-1/8" x 18-7/8" x 26-1/8")

Recommended working pressure – between 20 psi at valve when flushing and 80 psi static

Compliance Certifications -
Meets or Exceeds the Following Specifications:
- ASME A112.19.2-2008/CSA B45.1-08 for Vitreous China Fixtures

Flush Valves

Exposed Flush Valves-Manual Operation

Model No: 81T231

COMPLIES WITH:

- CSA certified.
- Complies to ASSE 1037
- IAPMO listed
- ADA compliant and meets Handicapped Accessibility Standard ASME 117.1 of less than 5 lbs operating force
- (Contact Delta Representative for State and/or Local Approvals)

SPECIFICATION:

- Quiet action, Teck® exposed diaphragm flush valve
- polished chrome plated finish
- vandal resistant cover screw
- metal "non hold open" ADA Compliant oscillating handle
- vacuum breaker
- renewable seat
- *Chloramine resistant diaphragm attached to guide with forged metal retainer.
- spud flange and concealed spud nut
- For flushing urinals with 3/4" top spud
- maximum 330mm(13") from centerline of valve inlet to top of urinal
- external water conserving flush volume adjustment
- 1" FIP/3/4" Copper sweat inlet adaptor for angle check stop with protecting cap
- adjustable 121mm (4.75”) plus or minus 11mm (7/16”) inlet/valve outlet centers
- Cover tube and wall flange
- 2.7 Litre (0.70 US GAL.) Factory Set Flush at 60 psi- FIELD ADJUSTABLE from 0.47 to 3.78 Litre Flush (1/8 to 1.0 US GAL.)

OPERATION:

- Not Available

(Dimensional drawing on following page)

Delta reserves the right (1) to make changes to specifications and materials, and (2) to change or discontinue models, both without notice or obligation. Dimensions are for reference. Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

Delta Faucet Company - 55 East 111th St. - Indianapolis, Indiana, USA 46280 - (317) 848-1812
Delta Faucet Canada - 395 Matheson Blvd E - Mississauga, Ontario, Canada L4Z 2H2 - (905) 712-3030

Model No: 81T231

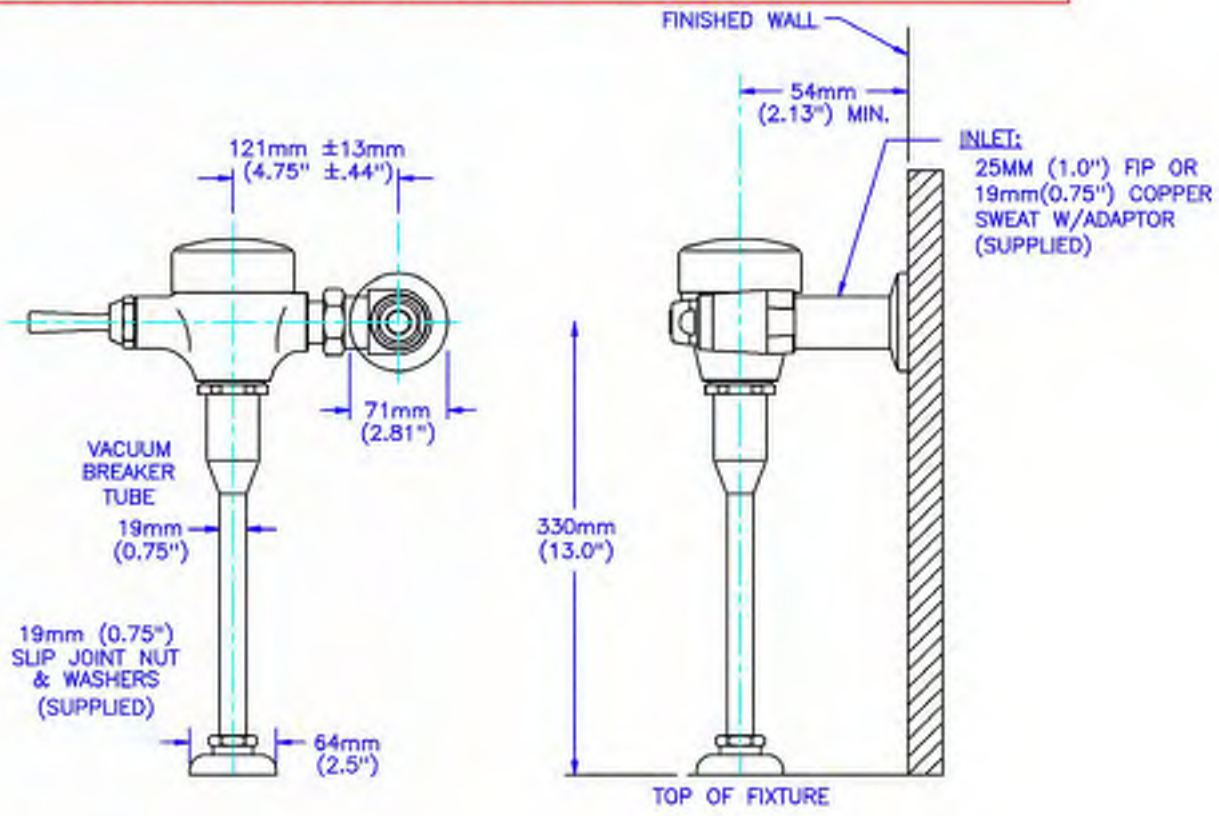
– FACTORY SET FOR 2.7 LITRE (0.7 US GAL.) FLUSH AT 60 PSI
– FIELD ADJUSTABLE FLUSH FROM .47L TO 3.78L (1/8 TO 1.0 US GAL.)

THE RECOMMENDED FLUSH VALVE OPERATING PRESSURE RANGE IS BETWEEN 35 & 65 PSI. PRESSURES OVER 75PSI LEAD TO AN INCREASE IN NOISE, WATER COULD SPLASH OUT OF THE FIXTURE MORE EASILY, AND THE LIFE OF ANY PLUMBING VALVE MAY BE SHORTENED.

FOR PRESSURES OVER 75PSI, A PRESSURE REDUCING VALVE IS RECOMMENDED.

FLUSH VALVES DO NOT PROVIDE A WATER SUPPLY; THEY ARE MERELY AUTOMATICALLY TIMED SELF-CLOSING VALVES. THE INLET SUPPLY PIPING IS THE WATER RESERVOIR THAT MUST SUPPLY SUFFICIENT WATER VOLUME IN A SHORT PERIOD OF TIME TO PROPERLY FLUSH THE FIXTURE.

WE STRONGLY RECOMMEND THAT PIPING CALCULATIONS BE DONE FOE ALL INSTALLATIONS TO INSURE PROPER WATER SUPPLY SIZES. CALL TECHNICAL SERVICE FOR DETAILS.



Delta reserves the right (1) to make changes to specifications and materials, and (2) to change or discontinue models, both without notice or obligation. Dimensions are for reference. Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

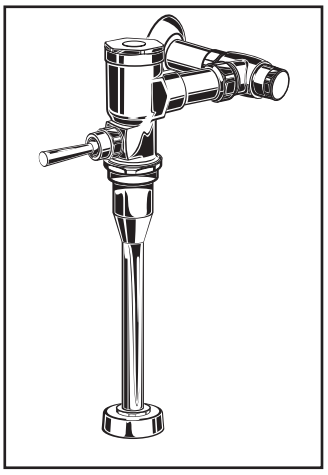
Style That Works Better

MANUAL URINAL FLUSH VALVE
1.0 GPF



GENERAL DESCRIPTION:
Manual Piston-Type Urinal Flush Valve for 3/4" top spud urinals.

INCLUDES:
- 3/4" I.P.S. angle stop with back-flow prevention and vandal-resistant cap
- Sweat solder kit including cover tube and wall flange
- High back pressure vacuum breaker with down tube
- Spud coupling & flange for 3/4" top spud

PRODUCT FEATURES:
- Self-cleaning brass piston with integral wiper spring prevents clogging and reduces maintenance
- Piston operation delivers superior flush accuracy and repeatability
- Piston valve remains closed and does not need to be reset after loss of water pressure
- Non-hold open handle
- Positive seal ensures leak-free performance
- No external volume adjustment
- Durable chrome-plated cast brass construction is ideal for commercial applications
- Chloramine-resistant EPDM seals
- Adjustable tailpiece for rough-in flexibility
- Can be installed left or right handed
- ADA complaint

MODEL NUMBER:

❑ **6045.101.002** Flush Valve for 3/4" top spud urinals, 1.0 gpf

❑ **6045.510.002** Retrofit for existing flush valves, 1.0 gpf. Replaces industry standard manual & electronic flush valves. Does not include vacuum breaker assembly, angle stop & sweat solder kit.

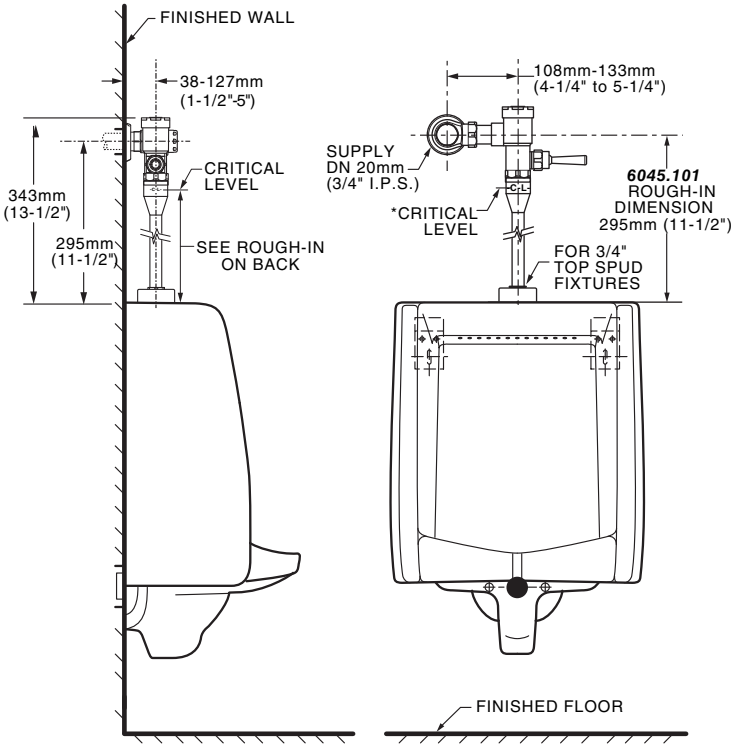
OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 20 psi (flowing)-80 psi (static)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

FLOW REQUIREMENT:
10gpm (37.9 L/min.)

ACCESSORIES:
- Cast wall flanges (3/4")

TYPICAL URINAL INSTALLATION:
WASHBROOK URINAL SHOWN



RECOMMENDED SPECIFICATION:
Manual urinal flush valve shall feature self-cleaning brass piston valve with integral wiper spring in bypass orifice to prevent clogging. Valve remains closed and does not need to be reset after loss of water pressure. Includes cast brass valve body and cover with chrome finish and vandal resistant stop cap. Includes sweat solder kit with wall flange and cover tube. Angle stop with back-flow protection and vacuum breaker included. 1.0 gpf / 3.8 Lpf Flush valve shall be American Standard Model # 6045.101.002.

American Standard
Style That Works Better

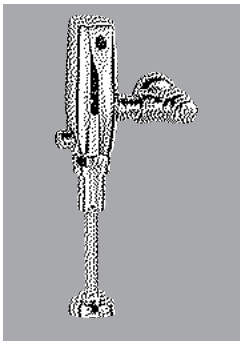
SELECTRONIC™ URINAL FLUSH VALVE
BATTERY POWERED, SENSOR OPERATED, 1.0 GPF



MODEL NUMBER:

- ❑ **6063.101.002** Flush Valve for 3/4" top spud urinals, 1.0 gpf.
- ❑ **6063.510.002** Retrofit for Existing Flush Valves, 1.0 gpf. Replaces industry standard manual and electronic valves. Does not include the vacuum breaker assembly, angle stop or sweat solder kit.

GENERAL DESCRIPTION:
Exposed, Battery Powered, Sensor Operated Selectronic™ Urinal Flush Valve for 3/4" top spud urinals.
Inlet includes 3/4" I.P.S. angle stop with back-flow protection, vandal-resistant cap, sweat solder kit, cover tube and wall flange.
Outlet includes 3/4" vacuum breaker with adjustable tailpiece, spud coupling and flange.

PRODUCT FEATURES:
- Exclusive Pressure Compensation feature allows the flush valve to deliver a constant flush volume regardless of water pressure.
- Flush Valve can not be adjusted to deliver more or less water, ensuring water savings & performance.
- Electronic flush valve with Selectronic™ proximity system for "Hands Free" operation.
- Self-Cleaning Piston with integral wiper spring prevents clogging and reduces maintenance.
- Piston operation delivers superior flush accuracy and repeatability.
- Fully Mechanical Manual Override Button can operate for an unlimited time without power.
- Valve remains closed and does not need to be reset after loss of power or water pressure.
- Sanitary Flush: Valve automatically flushes after 24 hours of non-use to clean fixture & maintain trap seal.
- Stadium Feature: Valve automatically switches to water savings mode during periods of high usage.
- Sensor & electronic controls are fully encloses and water resistant.
- Range can be adjusted manually or with optional remote control.
- Chemical resistant EPDM seals are unaffected by chloramines & other chemicals.
- Adjustable tailpiece.
- Factory-installed CR-P2 lithium battery included.
- No external volume adjustment.
- Can be installed left or right handed.

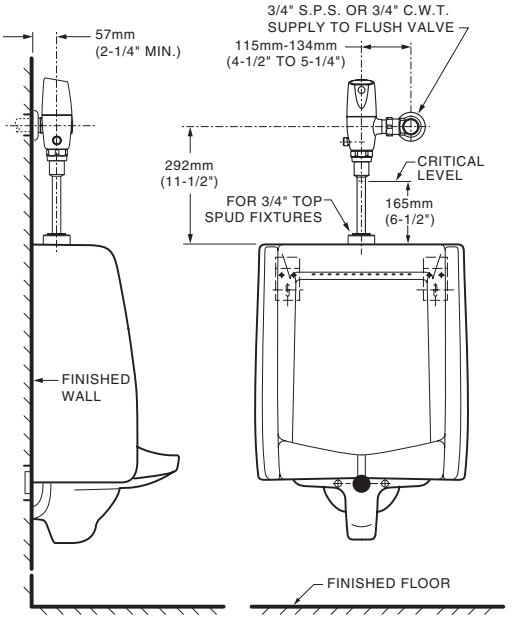
OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 20 psi (Flowing)-80 psi (static)

FLOW REQUIREMENT:
10gpm (37.9 L/min.)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

BATTERY LIFE:
200,000 cycles (4 years @ 4000 cycles per month)

ACCESSORIES:
- Cast wall flange (3/4")



RECOMMENDED SPECIFICATION:
Electronic proximity infrared sensor activated urinal flush valve shall feature self-cleaning piston valve with integral wiper spring in refill orifice to prevent clogging. Includes cast brass valve body and metal cover with chrome finish, vandal resistant stop cap and lithium battery. Angle stop with back-flow protection and vacuum breaker included. 1.0 gpf / 3.8 Lpf Flush valve shall be American Standard Model # 6063.101.002, 6063.510.002.

Flush Valves

Exposed Flush Valves-Manual Operation

Model No: 81T231

COMPLIES WITH:

- CSA certified.
- Complies to ASSE 1037
- IAPMO listed
- ADA compliant and meets Handicapped Accessibility Standard ASME 117.1 of less than 5 lbs operating force
- (Contact Delta Representative for State and/or Local Approvals)

SPECIFICATION:

- Quiet action, Teck® exposed diaphragm flush valve
- polished chrome plated finish
- vandal resistant cover screw
- metal "non hold open" ADA Compliant oscillating handle
- vacuum breaker
- renewable seat
- *Chloramine resistant diaphragm attached to guide with forged metal retainer.
- spud flange and concealed spud nut
- For flushing urinals with 3/4" top spud
- maximum 330mm(13") from centerline of valve inlet to top of urinal
- external water conserving flush volume adjustment
- 1" FIP/3/4" Copper sweat inlet adaptor for angle check stop with protecting cap
- adjustable 121mm (4.75”) plus or minus 11mm (7/16”) inlet/valve outlet centers
- Cover tube and wall flange
- 2.7 Litre (0.70 US GAL.) Factory Set Flush at 60 psi- FIELD ADJUSTABLE from 0.47 to 3.78 Litre Flush (1/8 to 1.0 US GAL.)

OPERATION:

Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

Delta Faucet Company - 55 East 111th St. - Indianapolis, Indiana, USA 46280 - (317) 848-1812
Delta Faucet Canada - 395 Matheson Blvd E - Mississauga, Ontario, Canada L4Z 2H2 - (905) 712-3030

Model No: 81T231

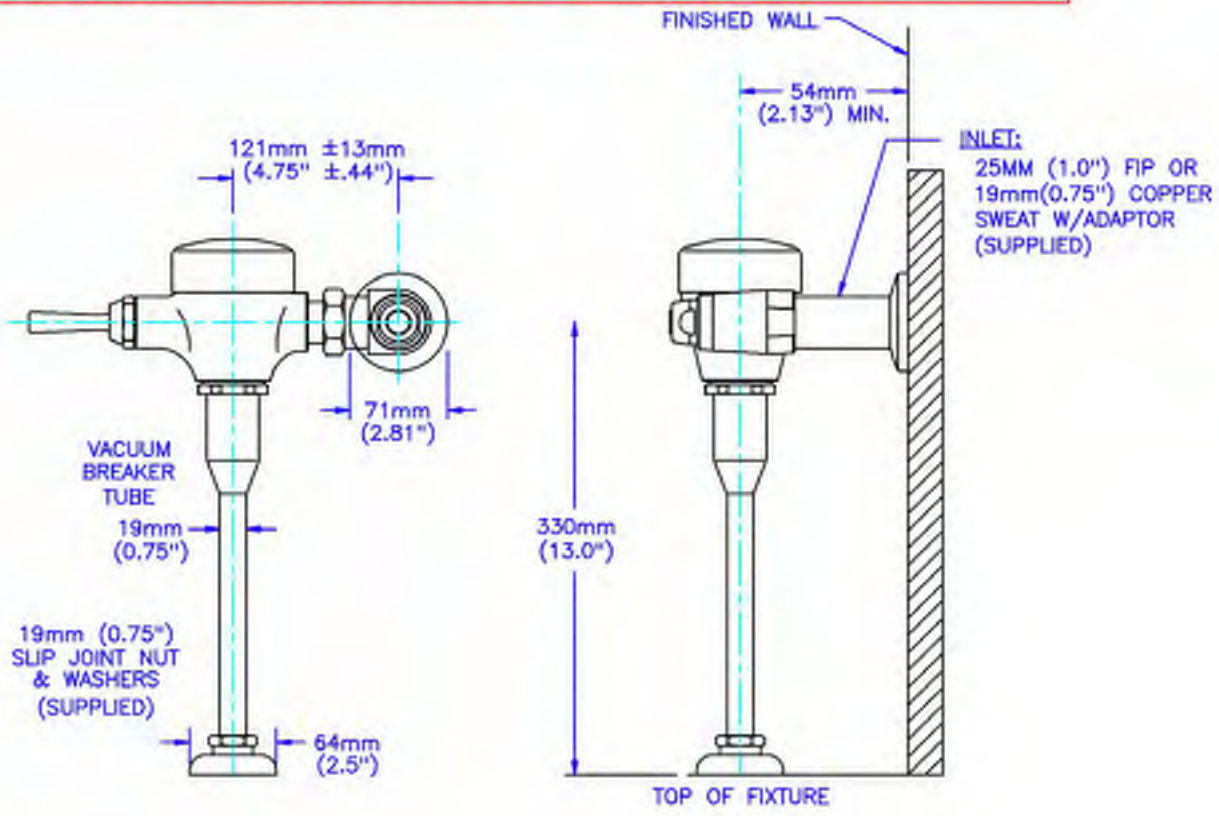
– FACTORY SET FOR 2.7 LITRE (0.7 US GAL.) FLUSH AT 60 PSI
– FIELD ADJUSTABLE FLUSH FROM .47L TO 3.78L (1/8 TO 1.0 US GAL.)

THE RECOMMENDED FLUSH VALVE OPERATING PRESSURE RANGE IS BETWEEN 35 & 65 PSI. PRESSURES OVER 75PSI LEAD TO AN INCREASE IN NOISE, WATER COULD SPLASH OUT OF THE FIXTURE MORE EASILY, AND THE LIFE OF ANY PLUMBING VALVE MAY BE SHORTENED.

FOR PRESSURES OVER 75PSI, A PRESSURE REDUCING VALVE IS RECOMMENDED.

FLUSH VALVES DO NOT PROVIDE A WATER SUPPLY; THEY ARE MERELY AUTOMATICALLY TIMED SELF-CLOSING VALVES. THE INLET SUPPLY PIPING IS THE WATER RESERVOIR THAT MUST SUPPLY SUFFICIENT WATER VOLUME IN A SHORT PERIOD OF TIME TO PROPERLY FLUSH THE FIXTURE.

WE STRONGLY RECOMMEND THAT PIPING CALCULATIONS BE DONE FOE ALL INSTALLATIONS TO INSURE PROPER WATER SUPPLY SIZES. CALL TECHNICAL SERVICE FOR DETAILS.



Delta reserves the right (1) to make changes to specifications and materials, and (2) to change or discontinue models, both without notice or obligation. Dimensions are for reference. Measurement may vary plus or minus 6mm(0.25"). Mounting locations are suggested only. Check with local codes for requirements in your area.

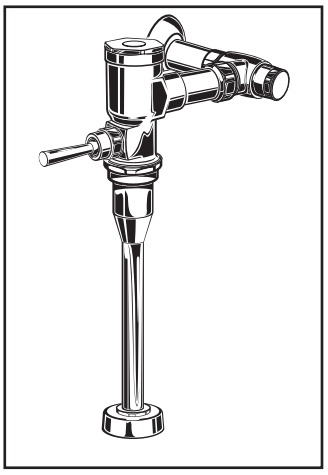
American Standard
Style That Works Better

MANUAL URINAL FLUSH VALVE
1.0 GPF



GENERAL DESCRIPTION:
Manual Piston-Type Urinal Flush Valve for 3/4" top spud urinals.

INCLUDES:
- 3/4" I.P.S. angle stop with back-flow prevention and vandal-resistant cap
- Sweat solder kit including cover tube and wall flange
- High back pressure vacuum breaker with down tube
- Spud coupling & flange for 3/4" top spud

PRODUCT FEATURES:
- Self-cleaning brass piston with integral wiper spring prevents clogging and reduces maintenance
- Piston operation delivers superior flush accuracy and repeatability
- Piston valve remains closed and does not need to be reset after loss of water pressure
- Non-hold open handle
- Positive seal ensures leak-free performance
- No external volume adjustment
- Durable chrome-plated cast brass construction is ideal for commercial applications
- Chloramine-resistant EPDM seals
- Adjustable tailpiece for rough-in flexibility
- Can be installed left or right handed
- ADA complaint

MODEL NUMBER:

❑ **6045.101.002** Flush Valve for 3/4" top spud urinals, 1.0 gpf

❑ **6045.510.002** Retrofit for existing flush valves, 1.0 gpf. Replaces industry standard manual & electronic flush valves. Does not include vacuum breaker assembly, angle stop & sweat solder kit.

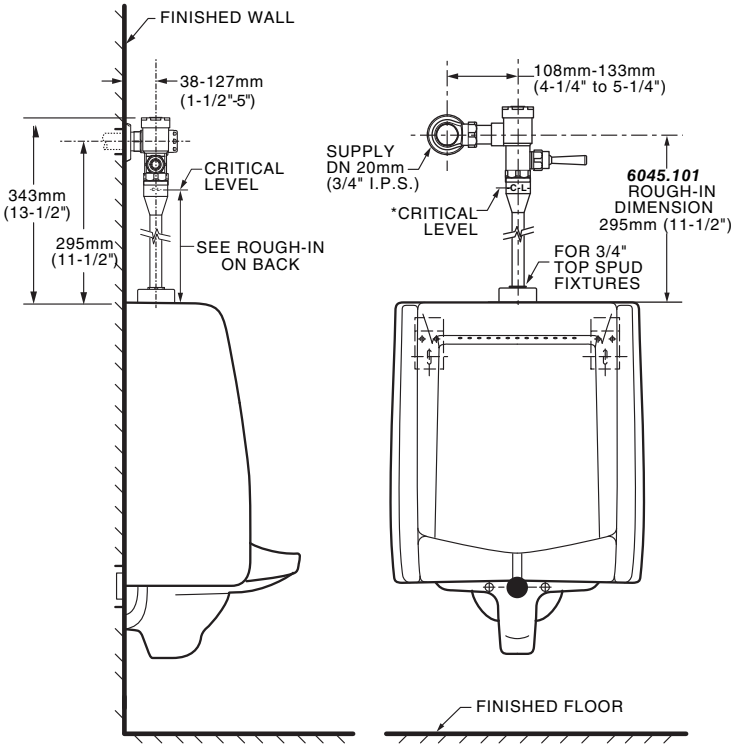
OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 20 psi (flowing)-80 psi (static)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

FLOW REQUIREMENT:
10gpm (37.9 L/min.)

ACCESSORIES:
- Cast wall flanges (3/4")

TYPICAL URINAL INSTALLATION:
WASHBROOK URINAL SHOWN



RECOMMENDED SPECIFICATION:
Manual urinal flush valve shall feature self-cleaning brass piston valve with integral wiper spring in bypass orifice to prevent clogging. Valve remains closed and does not need to be reset after loss of water pressure. Includes cast brass valve body and cover with chrome finish and vandal resistant stop cap. Includes sweat solder kit with wall flange and cover tube. Angle stop with back-flow protection and vacuum breaker included. 1.0 gpf / 3.8 Lpf Flush valve shall be American Standard Model # 6045.101.002.

TECK® COMMERCIAL

DELTA

❑ **81T231BTA**
– Exposed Battery Operated
3/4" Top Inlet Urinal Fixture

- Polished chrome plated vandal resistant metal cover with top mounted sensor operated H_2OPTICS™ electronics
- Right or left-hand supply installation
- ADA compliant, automatic operation battery powered infrared sensor
- Scratch resistant replaceable lens window
- Four (4) size AA alkaline batteries factory installed with valve in sleep mode for easy installation
- Hinged battery housing for easy maintenance
- Low battery flashing light (5000 flushes remaining) with battery strength indicator
- Infrared sensor range adjustment of 457mm-914mm (18" - 36"), factory set at 28" (±2")
- Optional 24 hour automatic flush factory set to ON
- Set-up sensor range adjustment indicator lights
- 6 VDC input, 8 second arming delay
- Electronic operated non-hold-open **metal** manual override button with 5 second lockout
- Quiet action, TECK® exposed diaphragm flush valve
- Chloramine resistant diaphragm
- Forged brass diaphragm retainer
- Renewable seat
- Polished chrome plated finish
- **External water conserving flush adjustment,** factory set at 60 PSI to 1.9 litre (.50 US gal.)
- **1" FIP / 3/4" copper sweat inlet adaptor,** angle check stop with protecting cap
- Adjustable 121mm (4-3/4") plus or minus 11mm (7/16") inlet/valve outlet centers
- Vacuum breaker
- Cover tube, stainless steel wall flange, spud flange, spud nut, and 330mm (13") outlet tube.

❑ **81T231BTA-38**
Same as 81T231BTA, but set at 60 PSI to 3.8 litre (1.0 US gal), **Not Field Adjustable**

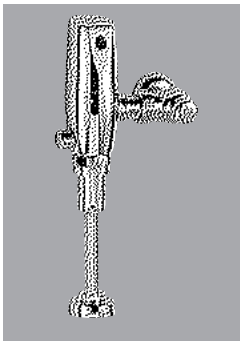
American Standard
Style That Works Better

SELECTRONIC™ URINAL FLUSH VALVE
BATTERY POWERED, SENSOR OPERATED, 1.0 GPF



MODEL NUMBER:

- ❑ **6063.101.002** Flush Valve for 3/4" top spud urinals, 1.0 gpf.
- ❑ **6063.510.002** Retrofit for Existing Flush Valves, 1.0 gpf. Replaces industry standard manual and electronic valves. Does not include the vacuum breaker assembly, angle stop or sweat solder kit.

GENERAL DESCRIPTION:
Exposed, Battery Powered, Sensor Operated Selectronic™ Urinal Flush Valve for 3/4" top spud urinals.
Inlet includes 3/4" I.P.S. angle stop with back-flow protection, vandal-resistant cap, sweat solder kit, cover tube and wall flange.
Outlet includes 3/4" vacuum breaker with adjustable tailpiece, spud coupling and flange.

PRODUCT FEATURES:
- Exclusive Pressure Compensation feature allows the flush valve to deliver a constant flush volume regardless of water pressure.
- Flush Valve can not be adjusted to deliver more or less water, ensuring water savings & performance.
- Electronic flush valve with Selectronic™ proximity system for "Hands Free" operation.
- Self-Cleaning Piston with integral wiper spring prevents clogging and reduces maintenance.
- Piston operation delivers superior flush accuracy and repeatability.
- Fully Mechanical Manual Override Button can operate for an unlimited time without power.
- Valve remains closed and does not need to be reset after loss of power or water pressure.
- Sanitary Flush: Valve automatically flushes after 24 hours of non-use to clean fixture & maintain trap seal.
- Stadium Feature: Valve automatically switches to water savings mode during periods of high usage.
- Sensor & electronic controls are fully encloses and water resistant.
- Range can be adjusted manually or with optional remote control.
- Chemical resistant EPDM seals are unaffected by chloramines & other chemicals.
- Adjustable tailpiece.
- Factory-installed CR-P2 lithium battery included.
- No external volume adjustment.
- Can be installed left or right handed.

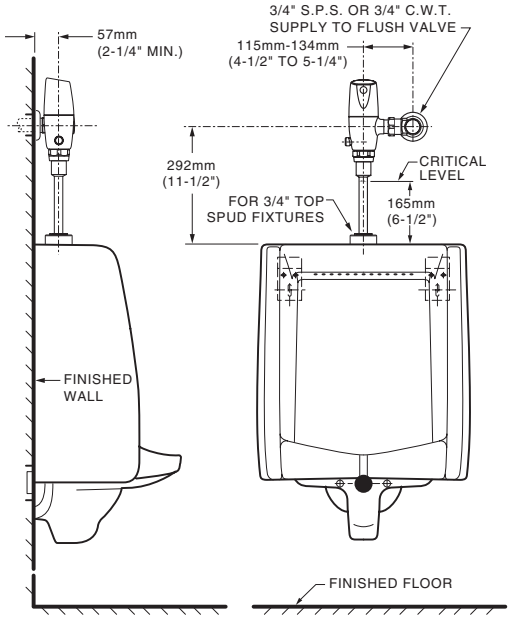
OPERATING PRESSURE:
Overall Range: 20-125 psi**
Recommended: 20 psi (Flowing)-80 psi (static)

FLOW REQUIREMENT:
10gpm (37.9 L/min.)

** Water pressure over 80 psi is not recommended for most plumbing fixtures.

BATTERY LIFE:
200,000 cycles (4 years @ 4000 cycles per month)

ACCESSORIES:
- Cast wall flange (3/4")



RECOMMENDED SPECIFICATION:
Electronic proximity infrared sensor activated urinal flush valve shall feature self-cleaning piston valve with integral wiper spring in refill orifice to prevent clogging. Includes cast brass valve body and metal cover with chrome finish, vandal resistant stop cap and lithium battery. Angle stop with back-flow protection and vacuum breaker included. 1.0 gpf / 3.8 Lpf Flush valve shall be American Standard Model # 6063.101.002, 6063.510.002.

PRODUCT DESCRIPTION
- Brass construction w/chrome plated finish
- 3/4" IPS supply
- 3/4" top spud

OPERATION
- Adjustable sensor eyes
- Battery powered (4) standard AA (included)
- Average battery life 250,000 cycles
- Self-diagnostic electronics
- Piston flushing mechanism
- Self cleaning filter system
- Low battery indicator light

FLOW
- Operating pressures 10 to 125 psi
- 0.5 gpf/1.9Lpf (gallons per flush)
- 24 hour sentinel flush
- Manual override button

VALVES
- 3/4" IPS angle stop (vandal resistant)
- Adjustable installation (left or right connection)

STANDARDS
- Third party certified by IAPMO and CSA to meet Watersense®, ASME A112.19.2M and all applicable requirements referenced therein and complies with requirements of ASSE 1037
- **ADA**

WARRANTY
- Warranted for 5 years against material or manufacture defects.

ELKAY®

SPECIFICATIONS

No Lead Single Station Soft Sides® Water Cooler Wall Mount – Barrier-Free Access Model ERFPM8K

GENERAL

Single station barrier-free stainless steel water cooler has recessed in-the-wall refrigeration system and stainless steel grill. All stainless steel polished to a satin finish.

Fountain has contoured basin to minimize splashing. Flexi-Guard® safety bubbler and easy to operate, fully functional, vandal-resistant front push button. Patented* valve and in-line flow regulators provides constant stream from 20 to 105 psi. Vandal-resistant bottom cover plate included.

Energy efficient refrigeration system utilizes a combination tank continuous-tube type evaporator, refrigerant drier, and capillary tube.

THIS WATER COOLER COMPLIES WITH THE REQUIREMENTS OF A.D.A. (AMERICANS WITH DISABILITIES ACT) WHEN PROPERLY INSTALLED.

NO LEAD DESIGN

THIS WATER COOLER COMPLIES WITH THE LEAD-FREE DEFINITION IN THE SAFE DRINKING WATER ACT OF 1986 AND LEAD CONTAMINATION CONTROL ACT OF 1988.

Elkay Water Coolers are manufactured with a waterway system utilizing copper components and completely lead-free material. These waterways have no lead because all lead materials, such as leaded brass, have been removed. All joints are brazed using silver solder only. No lead solder is permitted. A strainer with an easily cleanable screen is provided to allow trapping and convenient removal of waterborne particulate of 140 microns and larger prior to their entry into the water cooler.

This water cooler is certified to **NSF/ANSI 61**.

CAPACITIES CHART

Model Number	Base Rate	**GPH of 50°F Drinking Water Room Temperature °F 70°F	80°F	90°F	Rated Watts	Full Load Amps	Glass† Filler Option	Ship. Wt. Lbs.
ERFPM8K	7.5	9.3	8.3	7.5	370	4.0	Yes	83

**Based on 80°F inlet water temperature.

†Glass filler available at extra cost. Requires factory preparation to receive glass filler. Order Model ERFPM8FK. Glass filler LK1110 or LK1114 sold separately.

Rated watts shown are based on operational (run) time, in compliance with A.R.I. Standard 1010 conditions. Specific applications will determine the actual watts consumed per hour. Watts consumed will be based on number of people served per hour (usage), ambient temperatures, and inlet water temperature.

COOLING SYSTEM

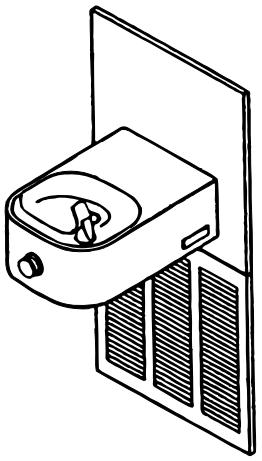
Motor Compressor: Hermetically sealed, reciprocating type, 115V, 60 Hz or 230V, 50 Hz (International Model) single phase. Sealed in lifetime oil supply.

Condenser: Fan cooled, copper tube with aluminum fins. Fan motor is permanently lubricated.

Cooling Unit: Combination tube-tank type. Self cleansing. Tube portion is continuous coil of copper tubing. Tank is stainless steel. Fully insulated with EPS foam which meets Underwriters Laboratories Inc. requirements for self extinguishing material.

Temperature Control: Enclosed adjustable thermostat is factory preset. Requires no adjustment other than for altitude requirements.

Refrigerant Control: Refrigerant HFC-134a is controlled by accurately calibrated capillary tube for positively trouble-free performance.



Model ERFPM8K

CONSTRUCTION

Fountain Body: #18 gauge, type 304 nickel bearing stainless steel polished to a lustrous satin finish with high shined outer edge. Contoured basin offers large strike area to minimize splashing. Fully functional front push button is easy to operate.

Exclusive Flexi-Guard® Safety Bubbler*: Innovative design utilizes a pliable polyester elastomer to prevent accidental mouth injuries. Flexes on impact, then returns to original position. Strong. Abrasion-resistant. Anti-sweat. **Optional Vandal-Resistant Bubbler** available at extra cost. Heavy duty, one-piece construction, chrome plated brass. **Order Model Number ERFPVR8K.** Bubbler meets UL requirements and all sanitary codes and are keyed in location to prevent rotation.

Front Panel Grill: Made of type 304 stainless steel, polished to a uniform Elkay satin finish. Removable louvered ventilating grill encloses refrigeration unit and plumbing.

Wall Mounting Frame: MF100 frame furnished with each unit. Frame allows flush mounting to finished wall.

Drain: LK464 drain and trap assembly included.

5 YEAR LIMITED WARRANTY on the refrigeration system of the unit. Electrical components and water system are warranted for 12 months from date of installation. Sample Certificate available on request.

Elkay Pressure-Type Water Coolers are designed to operate on 20 psi to 105 psi supply line pressure. If inlet pressure is above 105 psi, a pressure regulator must be installed in the supply line. Any damage caused by reason of connecting this product to supply line pressures lower than 20 psi or higher than 105 psi is not covered by the warranty.

STANDARDS

c UL us Elkay Electric Air Cooled Water Coolers meet the requirements of NSF/ANSI 61. Unit complies with A.R.I. Standard 1010.

* Patent #4,481,971

In keeping with our policy of continuing product improvement, Elkay reserves the right to change product specifications without notice.

This specification describes an Elkay product with design, quality and functional benefits to the user. When making a comparison of other producers' offerings, be certain these features are not overlooked.

No Lead Single Station Soft Sides® Water Cooler Wall Mount – Barrier-Free Access Model ERFPM8K

ELKAY®

ROUGH-IN DIMENSIONS

IMPORTANT!

INSTALLER PLEASE NOTE:

The grounding of electrical equipment such as telephone, computers, etc., to water lines is a common procedure. This grounding may be in the building or may occur away from the building. This grounding can cause electrical feedback into a water cooler, creating an electrolysis which causes a metallic taste or an increase in the metal content of the water. This condition is avoidable by using the proper materials as indicated below.

The drain fittings which are provided by the installer should also be plastic to electrically isolate the cooler from the building plumbing system.

ERFPM8K MOUNTING FRAME INSTRUCTIONS

1. **Cut a square rectangular wall opening** 18-3/4" (476mm) W x 37-3/4" (959mm) H and 4-1/2" (114mm) above the floor line. These dimensions are required to obtain proper rim and bubbler heights for compliance with ANSI standard A117.1. (See Figure 2)
2. **Reinforce the wall opening** on all sides so that it will adequately support the water fountain. This reinforcement must support up to 150 lbs static load and provide a means for securing the frame assembly in place.

   NOTE: Building construction must allow for adequate air flow on both sides and top of remote chiller unit. Minimum of 4" (102mm) is required. (See Figures 1 & 2)
3. **Install plumbing and electrical rough-ins.** See Figure 1 for location of the supply water inlet to chiller and for the location of the waste water outlet. A junction box for a (3) wire, 10 amp branch circuit is provided on the inside of the chiller. (Standard 120 Volts, 60 Hz and single phase) See Figure 2 for the electrical inlet location.
4. **Remove frame and related hardware** from packaging. Release the two shelf rods by cutting cable ties. Install the frame squarely in wall opening with frame upright edges flush with the finished wall face. (See Figure 2) Place shelf inside frame and line up the (2) holes on each. Insert loose ends of rods into holes on sides of shelf panel. Using appropriately sized wood screws (not provided), fasten the shelf and frame to bottom of wall opening. (See Figure 2) Secure the frame sides and top to the wall using (10) 5/16" x 2 " lag bolts or screws (not provided).

   NOTE: Be sure that frame is squared in location. Do not use less than the required screw quantity and size.

Halsey Taylor®
Satisfying Thirsts Since 1912

Contour™ Series

MODEL HRFER-Q

Barrier-Free Cooler

This water cooler is certified to **NSF/ANSI 61.**

GENERAL
Modular, electric refrigerated, wall-mounted water cooler designed to be easily accessible to physically challenged individuals. When properly installed, unit meets state and federal requirements as defined by the Americans with Disabilities Act. Unit is certified to ANSI/NSF 61 and meets requirements of the Safe Drinking Water Act. Unit provides 50° F water at 80° F inlet water and 90° F ambient.

FOUNTAIN
Face-mounted, one-piece, non-corrosive stainless steel cooler top, number 300 series with satin finish, contour-formed basin with softly rounded corners and edges.

BUBBLER
Exclusive one-piece, chrome-plated two-stream mound-building bubbler with non-removable anti-squirt feature and integral hood insures a satisfying drink of water.

PUSHBUTTON ACTUATION MECHANISM
Self-closing, vandal-resistant pushbutton does not require grasping or twisting.

AUTOMATIC STREAM HEIGHT REGULATOR
Self-closing assembly is located inside unit to prevent tampering. Unit resists corrosion and liming. A constant stream height is automatically maintained under line pressures that vary from 20 to 105 psi.

INLET STRAINER
Easily cleaned in-line strainer screen traps particles of 140 microns or larger before they enter the waterway.

REFRIGERATION SYSTEM
Hermetically sealed, positive start compressor with lifetime lubrication and built-in overload protection, efficient capillary sizing, large capacity dryer-strainer, and self-lubricated fan cools copper/aluminum condenser. System uses R134A refrigerant. Protected by Halsey Taylor's Limited 5 Year Warranty.

MOUNTING FRAME
Mounting frame is manufactured of corrosion resistant, galvanized steel. Open construction designed for ease of installation. Mounting frame can be shipped in advance for rough-in installation.

PANELS
Constructed of stainless steel, number 300 series with satin finish. Removable lower panel provides access to plumbing and refrigeration system. Panels overlap wall opening 1/2".

SUGGESTED SPECIFICATIONS
Shall deliver 7.5 GPH of 50° F water at 90° F ambient and 80° F inlet water. Fountain shall include pushbutton valve on front, contour-formed basin to eliminate splashing and standing water, and rounded corners and edges. Bubbler shall be chrome plated, two-stream, mound- building type. Cooling unit shall have a high efficiency positive start compressor using R134A, with pressurized counterflow cooling evaporator/chiller. Cooler shall comply with ANSI 117:1 and ADA for visual and motion disabilites. The manufacturer shall certify the unit to meet the requirements of ANSI/NSF 61, and the Safe Drinking Water Act. Unit complies with ARI Standard 1010.

NOTE: Continued product improvement makes specifications subject to change without notice. See Halsey Taylor website for most current spec sheet.

Standard finish is Stainless Steel

Optional Finishes (extra cost)

WALL OPENING
IMPORTANT: It is necessary to create a wall opening 18 3/4" W x 37 3/4" H and 4 1/2" above the floor line.

MOUNTING INSTRUCTIONS
Refer to rough-in for location of plumbing and electrical sources. The support frame is to be installed first. The shelf for the water chiller should be assembled to the wall frame, and then place chiller into position. Hang upper fountain panel to hanger on frame. Fountain is to be attached to panel and wall frame. Water service line, waste line and electrical is assembled as required. The bottom panel is attached last, after a final check for leaks and correct functions of fountains and chiller. (For details see the installation instructions.)

OPERATING PRESSURES:
Supply water - 105 psi maximum

ELECTRICAL DATA
Junction box for a (3) wire 10 AMP branch circuit. Standard 120 volt, 60 HZ, single phase.

H1109.8

Barrier-Free Wall Mounted Electric Drinking Fountain

FEATURES & BENEFITS

Push Button
With its patented (Pat.# 6,981,692) push-button valve assembly which allows for front access stream adjustment as well as cartridge and strainer access, this fountain offers the ultimate in ease of maintenance.

Integrated Trap
Spacious fountain design allows for the trap to be internally mounted which allows for easy access, and aids and reduces the installation process.

Construction
18 gauge Type 304 Stainless Steel construction with vandal-resistant bottom plates provides a long lasting unit with added peace of mind.

Quality Control
Fountain is pre-built and fully water and pressure tested to ensure no leaks and proper function for reduced installation time and added peace of mind.

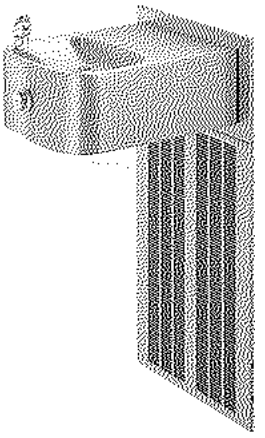
Bubbler Head
Polished chrome-plated brass bubbler head features an integral basin shank for added strength, and is equipped with a shielded, anti-squirt orifice that provides a steady sanitary source of water.

Back Panel
Stainless steel back panel helps to protect the wall from inadvertent splashing, and its decorative satin finish increases location visibility and completes the fountains attractive appearance.

Finish
Beautiful #4 satin stainless steel finish basin can be easily cleaned and maintained while also resisting corrosion.

OPTIONS

- ☐ Bubbler Head: Model 5725 EnviroGard™ bubbler is a polished chrome-plated solid brass bubbler head with stainless steel water activated pop up canopy. (Pat.# 7,025,282)
- ☐ Filter: Model 6426, 12" x 2", in-line lead removal element that reduces lead from incoming water supply.



SPECIFICATIONS

Model H1109.8 electric wall mounted barrier-free drinking fountain shall include an 18 gauge Type 304 Stainless Steel satin finish basin, push-button operated valve with front-accessible cartridge and flow adjustment, polished chrome-plated brass vandal-resistant bubbler head, polished chrome-plated brass vandal-resistant waste strainer, vandal-resistant bottom plate, stainless steel satin finish back panel and louvered intrusion-proof grill, and 1-1/4" IPS trap. The R-134a refrigeration system is hermetically sealed and delivers a minimum of 8 gph (30.3 lph) of water at 50°F (10°C) cooled from 80°F (26.7°C) inlet water at 90°F (32.2°C) ambient. 115 Volts, 60Hz, rated watts: 370, full load amps: 5.

APPLICATIONS

Perfect for either public or private settings, our stainless steel electric drinking fountains are a great fit in indoor environments. This series is precisely mounted, making it a nice addition to any surrounding. Specifically, this type fountain may be placed in settings such as: schools, office buildings, shopping malls, and other indoor environments where there is a demand for a chilled water source and/or wheel chair access.

Model meets all current Federal Regulations for the disabled including those in the Americans with Disabilities Act. Electric water coolers are not recommended or designed for outdoor applications or enclosed pool areas (chlorine). These conditions may void warranty. Haws manufactures drinking fountains, electric water coolers and electric drinking fountains to be lead-free by all known definitions including ANSI/NSF Standard 61, Section 9, California Proposition 65, and the Federal Safe Drinking Water Act. Haws electric water coolers comply with ARI Standard 1010 and ANSI A117.1, and be listed by Underwriter Laboratories to U.S. and Canadian standards.

Water Coolers

M8SBEE shown

BARRIER-FREE MODULAR
M8SBEE, M8SBPM

Models
M8SBEE produces a light beam that is reflected off the user to automatically start water flowing If user does not move away within 30 seconds, water shuts off automatically.

M8SBPM operates when the mechanical push button is depressed. Water continues to flow as long as the button is depressed.

When these coolers are properly installed, they allow your facility to comply with ADA requirements.

Standard Features
> Waterways are Lead-Free in Materials & Construction
> Stainless Steel Surfaces
> Heavy-gauge galvanized steel wall mounting frame
> High efficiency cooling tank and coil
> Refrigerant R-134a
> Limited 5-Year Warranty

Finishes
> Standard Finish: Stainless Steel
> Optional Finish at extra cost: Regency Bronze

Installation
> Prior to roughing-in, consult local, state and federal codes for proper mounting height.
> Wall mounting frame is furnished for easy installation

Components in this fountain are lead free as defined by the Safe Drinking Water Act Amendments of 1986, and the Lead Contamination Control Act of 1988.

Limited 5-Year Warranty (Continental limits of the United States and Canada): Five years on the sealed refrigeration system and most component parts. Detailed warranty certificate enclosed with each water cooler; sample available upon request.

Export Warranty: One year on sealed refrigeration system and most components parts. Four-year replacement contract on sealed refrigeration system. Detailed warranty certificate enclosed with each drinking fountain; sample copy available upon request.

Drinking water coolers shall comply with ANSI A117.1-1992 and ADA frontal approach requirements. Cooling unit RLF8 for Model M8SBEE and M8SBPM complies with all known Plumbing Codes. Listed by Underwriters' Laboratories to U.S. and Canadian standards.

SUGGESTED SPECIFICATION*

Pressure drinking water cooler shall deliver at least 8.0 GPH (30.3 LPH) water at 50°F (10°C) cooled from 80°F (26°C) inlet water at 90°F (32.2°C) ambient. Front mounted push pad requiring less than 5 pounds of force to activate or front facing infrared sensor shall initiate water flow through a chromium plated hooded bubbler having a non-squirt feature. Bubbler shall operate between 20 and 120 psig and have an adjustable stream regulator to control water flow. Stainless steel fountain shall have removable drain strainer. Wall panels shall be stainless steel. Chiller system shall use R-134a refrigerant, system shall be hermetically sealed and refrigerant flow shall be capillary tube controlled. An adjustable thermostat having an off position shall control refrigeration system. Mounting frame shall be provided for installation. Potable water system components shall comply with Safe Drinking Water Act Amendments, the 1988 Lead Contamination Control Act and shall be Certified to ANSI/NSF 61, section 9 . Drinking water coolers shall comply with ANSI A117.1-1992 and ADA frontal approach requirements. Chiller shall be Listed by Underwriters Laboratories Inc. to U.S. and Canadian standards. Drinking water cooler shall be Sunroc model **DRF-3601 & DRF-3601HF.**

DRF-3601HF	8.0 (30.3)	8.0 (30.3)	No	No	4.8	340	No	Yes

*Capacities are at industry standard rating conditions of 50˚ F (10˚ C) outlet water, 80˚ F (26.7˚ C) inlet water and 90˚ F (32.2˚ C) ambient air.

Model covered by this specification complies with all known Plumbing Codes. Listed by Underwriter's laboratories to U.S. and Canadian standards.

Components in this cooler are lead free as defined by the Safe Drinking Water Act Amendments of 1986, and the Lead Contamination Control Act of 1988. Drinking water fountain is certified to ANSI/NSF 61.

Five Year Limited Warranty: (Continental United States and Canada only) Five years on sealed refrigeration system and most components parts.
Export Warranty: One year on sealed refrigeration system and most components parts. Four year replacement contract on sealed refrigeration system. Detailed warranty certificate enclosed with each drinking fountain; sample copy available upon request
Detailed warranty certificate enclosed with each drinking fountain; sample copy available upon request.

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Hydration Station
Item Type	Electric sensor water dispenser
Description	Touch-free electric sensor water dispenser With carbon block filter with lifecycle control. 3-15/16"D x 15"W x 30-1/4"H / Semi-Recessed
Manufacturer	Haws
Model	2000SN - Bottle Filler with Lifecycle Control
Dimensions	Refer to attachment
Material Composition	Stainless Steel & ABS plastic
Global Specification	Y
CSI #	221000 - Plumbing Piping*
Omniclass #	22-221000
Quality Standards	Meets NSF/ANSI Standard 61, Section 9, NSF/ANSI Standards 42 & 53, NSF/ANSI 372 and CSA Standard B483.1.
Part of an Assembly	N

Recessed Wall-Mount Bottle Filling Station

FEATURES & BENEFITS

QUALITY CONTROL

The Haws bottle filling station is pre-built and fully water and pressure tested to ensure no leaks and proper function for reduced installation time and added peace of mind.

SERVICING & SECURITY

Durable ABS plastic front panel allows simple access to internal components. 30 second time-out prevents unwanted use. Hidden lock and hinges discourages vandals.

ADVANCED FILTRATION

2,500-gallon (9463 L) capacity, electronic lifecycle control filter cartridge will shut off water flow when capacity is reached to ensure fresh, filtered water with every activation. Filter replacement indicator light will flash yellow when filter life is at 10% and will flash red when replacement is necessary. Preparing to replace filter is important when the filter light flashes yellow.

DURABLE FINISH

#4 satin stainless steel back panel can be easily cleaned and maintained while also resisting corrosion.

SENSOR OPERATED

Electric sensor allows for tough-free hygienic operation, eliminating the need for manual activation.

OPTIONS

- ☐ Remote Drinking Fountain Water chiller: Model HCR8, 8 gph (30.3 L) remote water chiller provides instantaneous cooling to meet a continuous demand for chilled water.
- ☐ 2000 Series Mounting Frame: Model MTGFR.HSC, galvanized steel mounting frame with grille for the 2000 series bottle filling stations.

For more information, visit www.hawsco.com or call (888) 640-4297.

SPECIFICATIONS

Model 2000SN Hydration By Haws™ water dispenser is a semi-recessed, wall-mounted wheel chair accessible bottle or cup filling station constructed of durable ABS plastic and 16 gauge, Type 304 Stainless Steel with a satin finish. It features an electric sensor for touch-free hygienic operation and a 30-second timeout preventing unwanted use, laminar flow to prevent splashing, and .5 gpm (1.9 L) flow rate for quick fill-up. 2,500-gallon (9464 L) carbon block filter reduces chlorine (taste and odor) and lead, and removes 99.99% of cysts. The mounting frame is of heavy gauge, galvanized steel. 110 volt, 60Hz, and .1 amp draw when in use. Tailpiece is 1-1/4" (32 mm) O.D. Provision for trap (not included) must be made in or behind wall. Model 2000SN has no logo for a clean, aesthetically pleasing look.

APPLICATIONS

Perfect for either public or private indoor settings, the Hydration By Haws™ bottle filling station is a great fit in areas where aesthetics are important to the overall appeal of the architecture. Specifically, this type of semi-recessed wall mounted bottle filling station is ideal for office buildings, airports, schools, manufacturing facilities and municipalities.Model 2000SN meets the Americans with Disabilities Act when mounted at the correct height. Haws manufactures drinking fountains and electric water coolers to be lead-free by all known definitions including NSF/ANSI Standard 61, Section 9, NSF/ANSI Standards 42 & 53, NSF/ANSI 372 and CSA Standard B483.1. Product is compliant to California Health and Safety Code 116875 (AB 1953), California Proposition 65 and the Federal Safe Drinking Water Act. Model 2000S is certified to the Standard for Water Treatment Appliances (UL979).

DISCLAIMER: Continued product improvements make specifications subject to change without notice. Check www.hawsco.com for the latest product information and updates.

INSTALLATION GUIDE

◆ website: www.Hawsco.com

No. 0510000663 (2)

Model 2000S/2000SN
Bottle Filler with Lifecycle Control

NOTE: A Class A ground-fault circuit interrupter (GFCI) shall be installed in the branch-circuit supplying power to this unit.

CAUTION! Prior to making any electrical connections, verify with a voltmeter that power from the service panel is **off.**

SHOULD YOU EXPERIENCE DIFFICULTY WITH THE INSTALLATION OF THIS MODEL, OR REQUIRE REPLACEMENT PARTS, PLEASE CALL:

TECHNICAL SUPPORT:
1-800-766-5612

HOURS OF OPERATION: MON-THURS 7:00a.m. - 4:30p.m PT, FRI 7:00a.m.- 11:00a.m. PT

QUICK START REFERENCE

PARTS LIST: 1 bottle filler, 1 filter cartridge, 1 plastic drain basin, 1 brass waste bend, 1 waste nut, 1 rubber waste washer, 1 hex key, 2 drain basin screws, 2 drain basin screw washers.

RECOMMENDED TOOLS: Phillips screwdrivers, level, slip joint pliers.

REQUIRED PARTS (NOT SUPPLIED): Qty. 6 – 10 #6 sheet metal or wood screws (depending on construction of wall studs), 1/2” screwdriver stop, 3/8” tubing (to be used for water supply inlet), 1-1/4” trap, qty. 3 wire connectors.

PRODUCT INSTALLATION: When installing this product, local, state or federal codes should be adhered to. This unit is certified for indoor use only.

SUPPLY LINE: Minimum recommended line size is 1/2" IPS with 30-90 PSI (2-6 ATM) flowing pressure; supply water is to be cold water supply. Intended for municipal water only.

PLUMBING CONNECTIONS: Inlet is 3/8” O.D. push-in type fitting. Waste bend is 1-1/4” O.D. pipe; an acceptable trap must be used after waste bend.

ELECTRICAL CONNECTIONS: 115VAC, 60HZ, approx. 0.14A. Unit wired directly to incoming line (stripped leads provided).

RATED SERVICE FLOW: 0.5 GPM (2725L/day)
OPERATING TEMPERATURE: 35–100˚F (1.7–37.8˚C)
OPERATING PRESSURE: 30-90 PSI
FILTER CAPACITY: 2500 gallons (9460L) or 1 year
REPLACEMENT FILTER CARTRIDGE: Electronic Lifecycle Control Filter Model 6423

INSTALLATION PROCEDURE

WARNING: Make certain power is disconnected before installation to reduce risk of electrical shock.

WARNING: Filter is not intended to withstand operating pressures greater than 100 PSI (6.8 ATM). If inlet pressure is greater than this, filter must be protected with a pressure regulator.

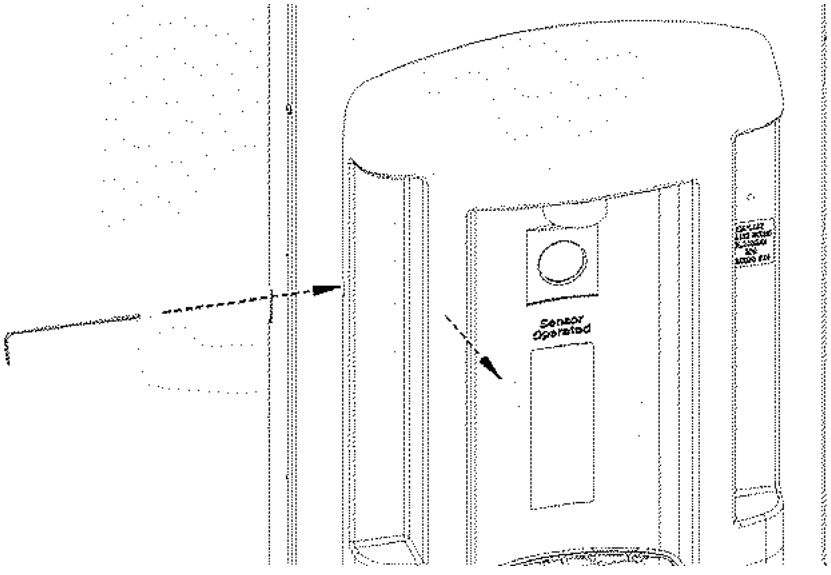
NOTES:

1. **This unit is certified for indoor use only.**
2. **For all plastic push-in type fitting connections, only connect NSF-61 copper or plastic tubing. Stainless steel or glass tubing is not recommended. The following assembly instructions must be followed to ensure a watertight connection:**
   - **a. Cut tubing square and clean.**
   - **b. Mark from end of tube the length of insertion (See table below).**
   - **c. Push tube into the fitting until it bottoms out.**
   - **d. To remove, depress collet and pull tubing out.**

Tube Sizes	O.D. Tolerance	Insertion Depth
1/4”	±.005”	11/16”
3/8”	±.005”	3/4”
1/2”	±.005”	7/8”

3. **Use NSF-61 approved pipe joint sealant on all threaded water connections.**
4. **Do not use with water that is microbiologically unsafe or unknown quality without adequate disinfection before or after the system. Systems certified for cyst reduction may be used on disinfected waters that may contain filterable cysts.**
5. **Use the cardboard inserts from the box to support the unit while preparing for installation by placing unit face down on inserts.**

Step 1: To open the unit, slide the supplied hex key into the notch in the left-hand side of the hinged upper plastic panel and press the key firmly in that same direction. This will disengage the internal spring latch. Simultaneously pull open the hinged panel (see Step 1 Diagram). Take care not to damage the stainless steel panel or the spring latch in this process.

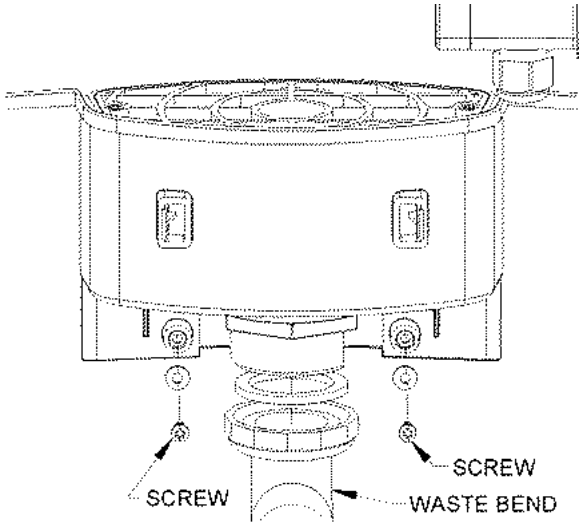


Step 1 Diagram

Step 2: Unscrew the 4 side-mounted panel screws on the outside of the bottle filler using the

supplied hex key, and remove the mounting frame from the bottle filler (see Step 2 Diagram).

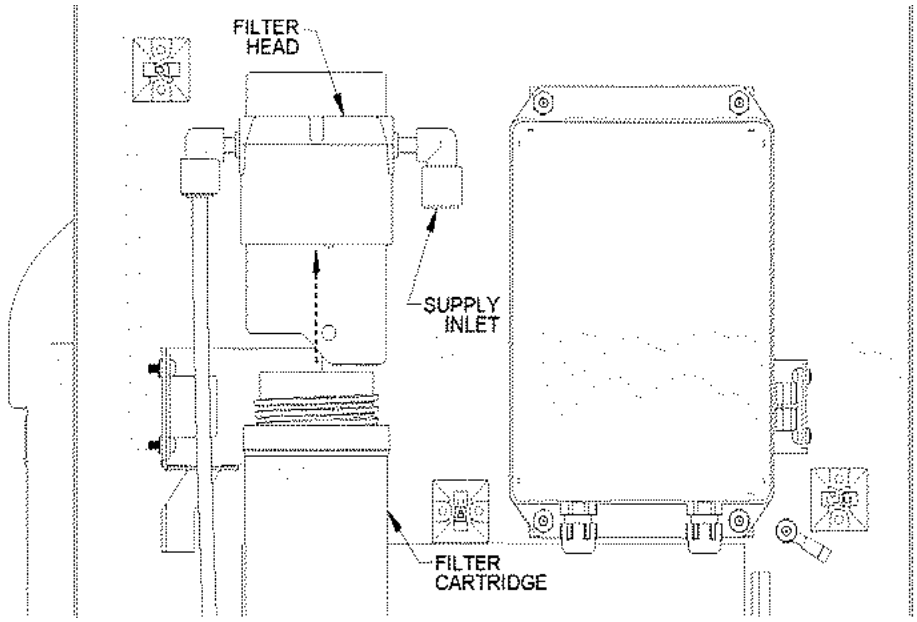
Step 3: Use the 2 washers and the 2 screws supplied to attach drain basin to unit as shown in Step 3 diagram (other components removed for clarity).
Install waste bend with nut and rubber washer as shown (see Step 3 Diagram).



Step 3 Diagram
(Back View)

Step 2 Diagram

Step 4: Firmly screw filter cartridge into filter head (see Step 4 Diagram). NOTE: Bottle filler will work only if a filter cartridge is installed and its wiring is plugged in (see Step 9).

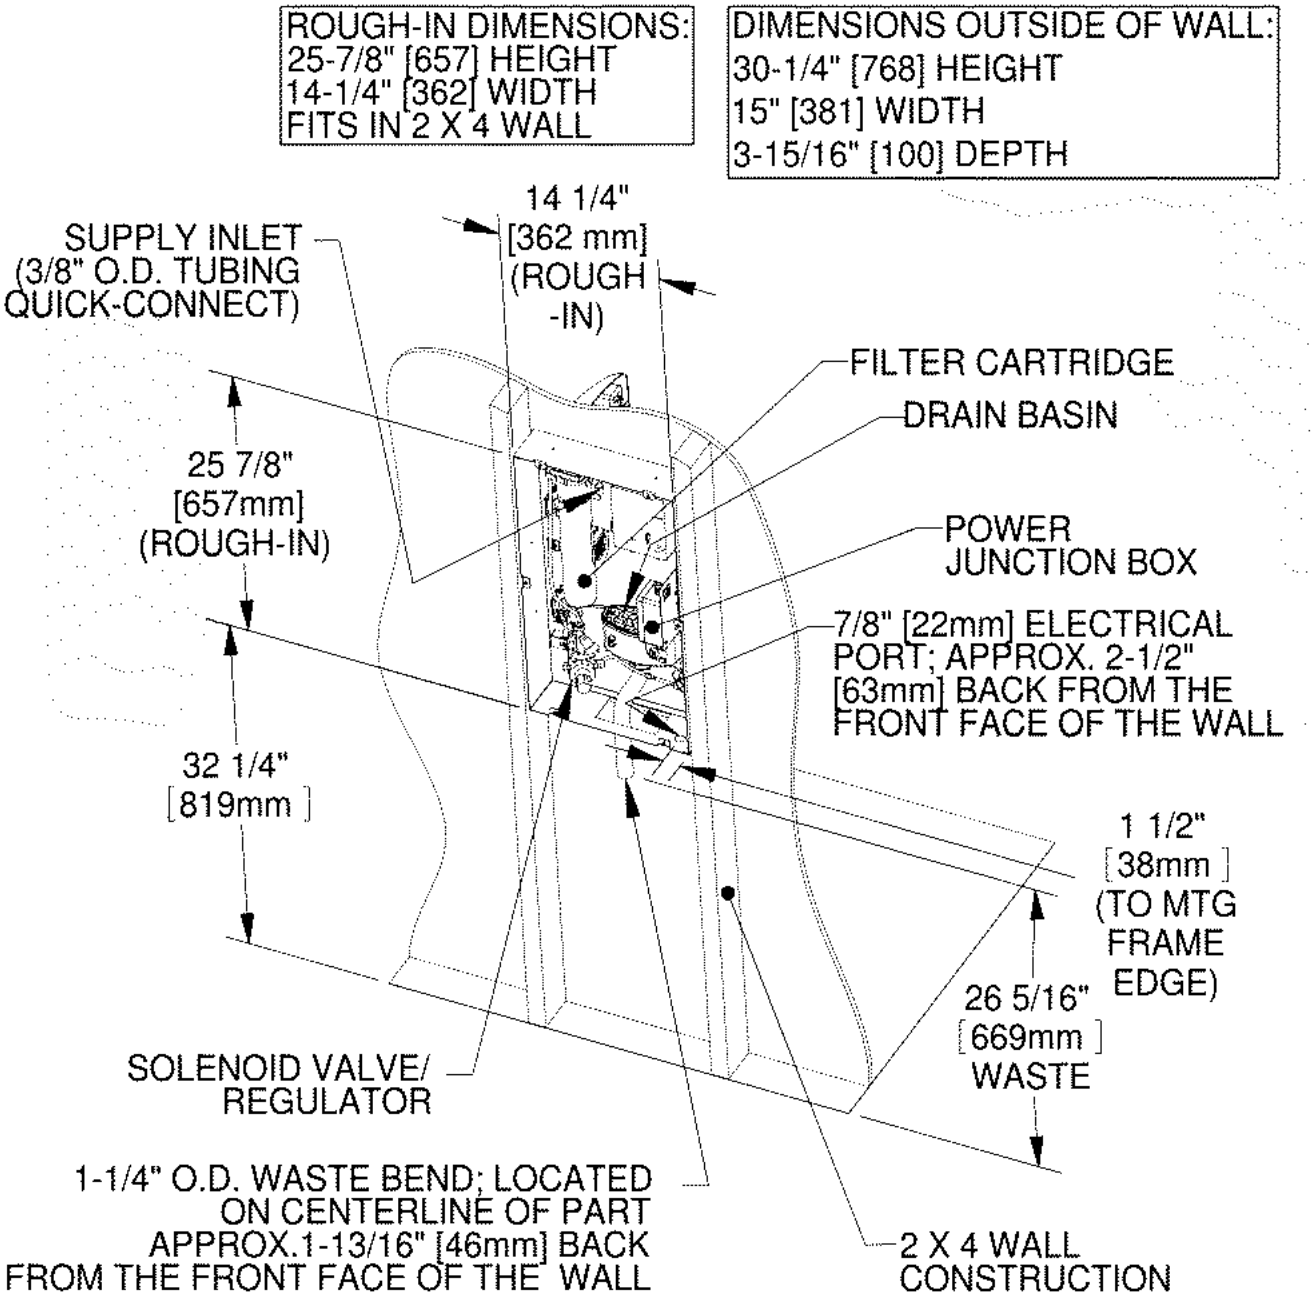


Step 5: Create a wall opening for the unit as shown in Step 5 Diagram – hold rough-in dimensions to within 1/8". The bottle filler is designed to fit between two normally spaced 2 X 4 studs (16" center-to-center).
Install waste line, supply line, and electrical lines in locations shown. The supply line should be brought up through the rectangular waste cutout in the bottom of the unit. Double-check waste, supply, and electrical line locations.
Install a 1/2" IPS supply screwdriver stop (not supplied) into the water supply line where it will be readily accessible.

NOTE: A suitable trap must be used in conjunction with the waste. This trap should be positioned in a location where it can be accessed and removed (it may be helpful to use a wall-mounted access panel).

NOTE: When installing this unit, all pertinent local, state, or federal codes should be adhered to.

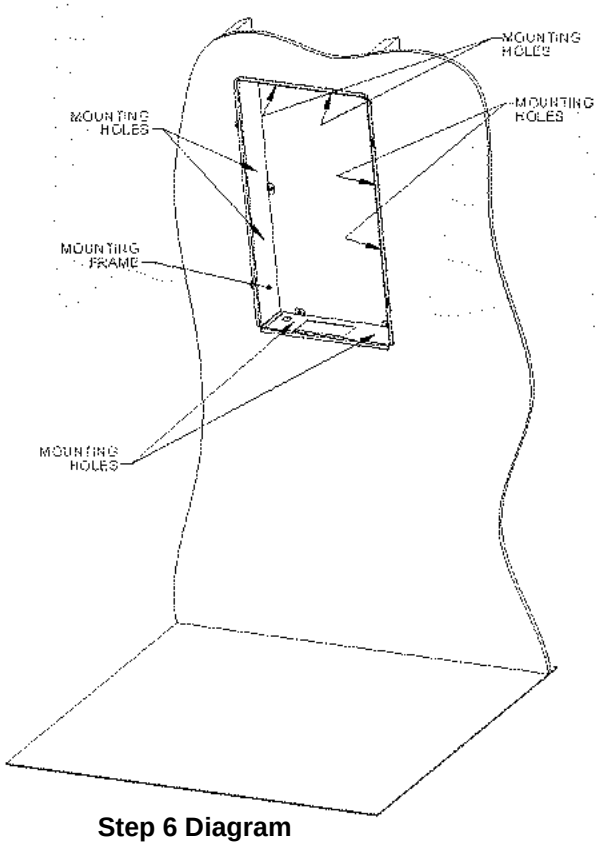
Bottle filler (rear cover removed) viewed from behind wall



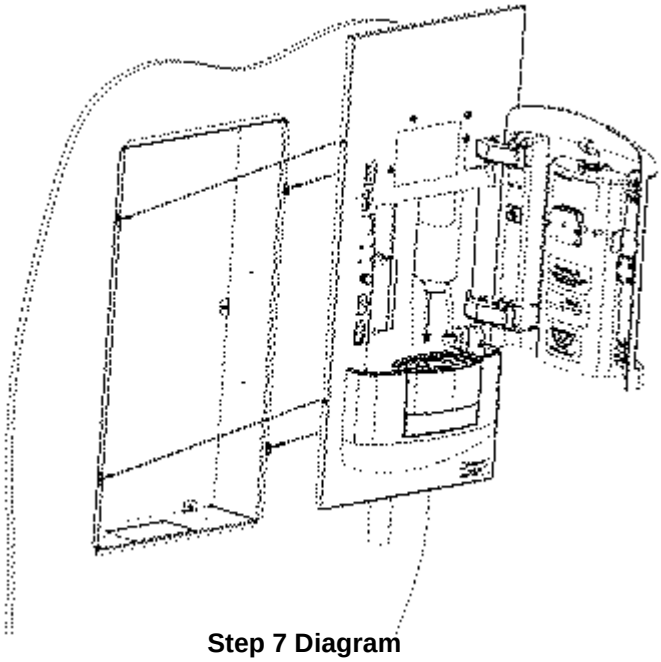
Step 5 Diagram

Step 6: Place the mounting frame into its opening such that it sits flush against the wall. Use some appropriate #6 screws (between 4 & 8 as required; not supplied) to secure the frame into the wall; notice that mounting holes are provided in the top, bottom, and sides of the mounting frame (see Step 6 Diagram).

Use a level to verify that the mounting frame is level horizontally and vertically; this will help to assure proper drainage and water flow that is properly aligned.



Step 6 Diagram

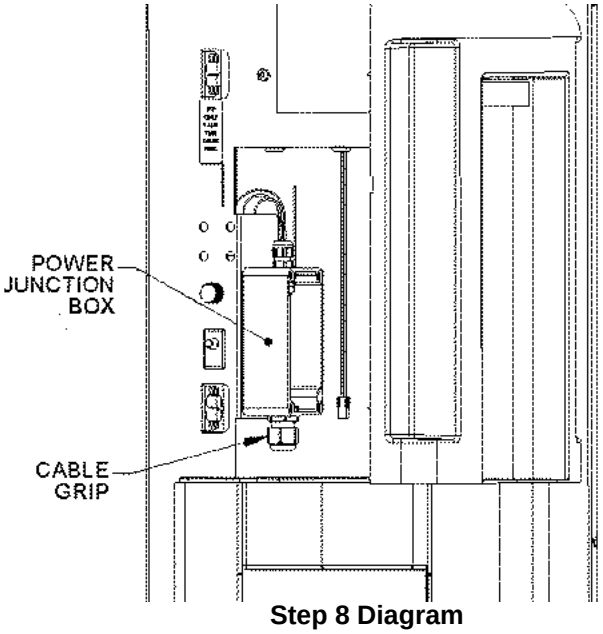


Step 7 Diagram

Step 7 Diagram

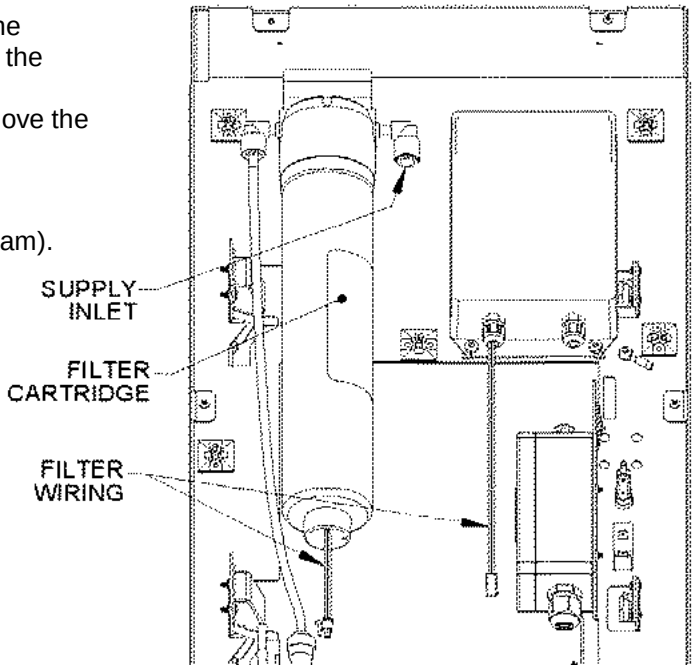
Step 7:
Place the bottle filler onto its mounting frame and make the connection between the bottle filler waste and the plumbed-in waste line.
Secure the bottle filler to the mounting frame using the 4 screws removed in Step 2 (see Step 7 Diagram).

Step 8: Open the power junction box; run supply power wiring through the bottom cable grip. Connect supply power to lead (black), neutral (white), and ground (green) wires inside the box (stripped leads provided) (see Step 8 Diagram). Replace cover.



Step 8 Diagram

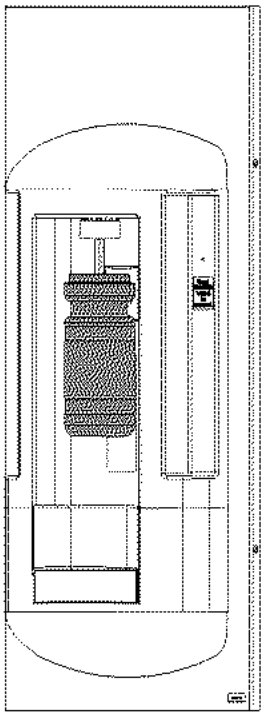
Step 9: Run 3/8” tubing (not supplied) between the screwdriver stop (installed in Step 5) and the bottle filler’s supply inlet elbow in the filter head (it may help to temporarily remove the filter cartridge – see Step 9 Diagram). Connect the wiring coming off of the filter cartridge to the wiring coming out of the circuit board enclosure (see Step 9 Diagram).



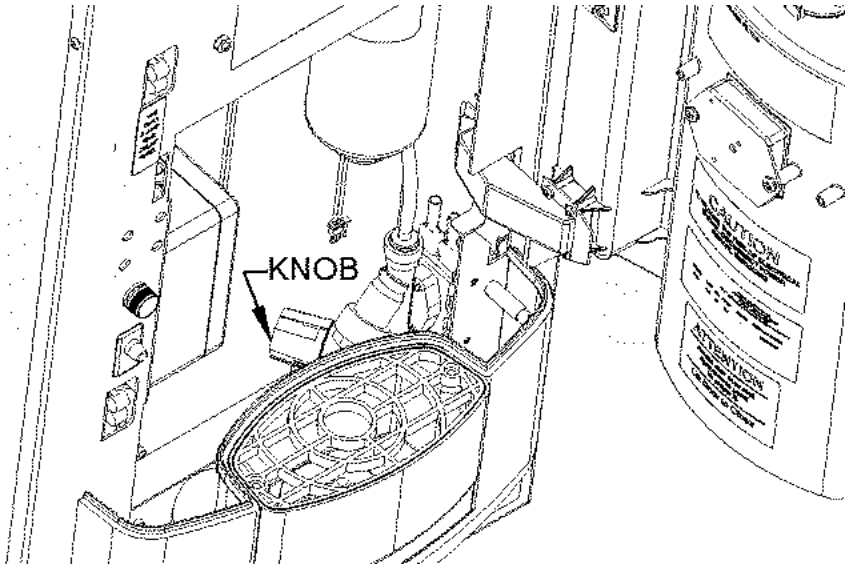
Step 9 Diagram (Back View)

Step 10: Open the screwdriver stop **wide open** and check for leaks. Close the hinged upper panel and provide power to the bottle filler.

Step 11: Activate the bottle filler by placing a bottle or cup in front of the sensor (see Step 11 Diagram A). If water does not dispense, see the Troubleshooting Guide in the Owner’s Manual. The pressure regulator may need to be adjusted to better complement the input pressure at the installation site (see Step 11 Diagram B below). To do so, pull out the adjustment knob and rotate as needed (clockwise from the front of the unit decreases flow); push knob in when desired flow is achieved. * Flow rate is factory set to the maximum flow rate for reduced water consumption.



Step 11 Diagram A



Step 11 Diagram B

Step 12: **Approximately five gallons** of water must be run through the system after the unit is installed in order to remove the loose carbon particles from the filter cartridge and any air bubbles from the system (both of these are normal occurrences after a filter change). Check the system for leaks. Place hex key in a secure location.

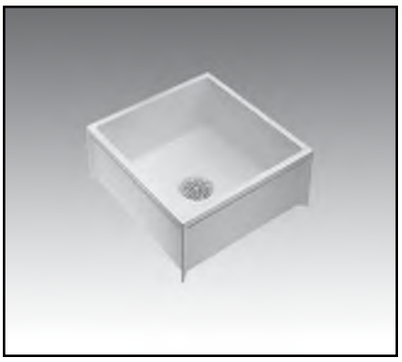
Mop Service Basin — Model 63M

SEE PAGE 2 FOR A LIST OF ACCESSORIES!



Design features:

- **All Mustee basins are one-piece molded from high impact resistant DURASTONE® structural fiberglass (24" x 24")**
- **Integral, molded-in drain for connection to 3" ABS, PVC (Sch. 80) or cast iron**
- **Available drain seals for connection to 2" pipe or 3" soil pipe**
- **Complete range of accessories to meet specific application needs**
- **Colorfast marbleized white finish**
- **Easy to install**

Code Accepted

Mustee Mop Service Basins meet or exceed performance requirements as listed:

- **International Association of Plumbing and Mechanical Officials (IAPMO)® Listed**
- **Warnock Hersey® (Canada) Listed—CSA test standards: Mop Basins - #B45.0**
- **American National Standards Institute (ANSI)-Specification Z 124-2011**
- **American Society of Testing and Materials (ASTM) D 635 E 84 and E 162**
