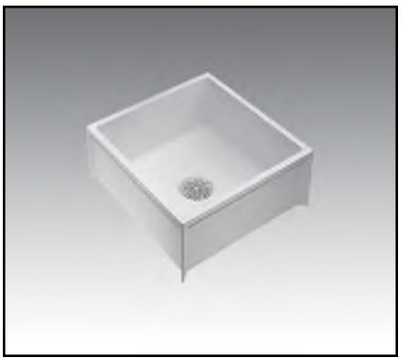
Mop Service Basin — Model 63M

SEE PAGE 2 FOR A LIST OF ACCESSORIES!



Design features:

- **All Mustee basins are one-piece molded from high impact resistant DURASTONE® structural fiberglass (24" x 24")**
- **Integral, molded-in drain for connection to 3" ABS, PVC (Sch. 80) or cast iron**
- **Available drain seals for connection to 2" pipe or 3" soil pipe**
- **Complete range of accessories to meet specific application needs**
- **Colorfast marbleized white finish**
- **Easy to install**

Code Accepted

Mustee Mop Service Basins meet or exceed performance requirements as listed:

- **International Association of Plumbing and Mechanical Officials (IAPMO)® Listed**
- **Warnock Hersey® (Canada) Listed—CSA test standards: Mop Basins - #B45.0**
- **American National Standards Institute (ANSI)-Specification Z 124-2011**
- **American Society of Testing and Materials (ASTM) D 635 E 84 and E 162**
- **CAN/ULC S102-07 Burn and Smoke Test**

Specifications

Model Number	Model	H x W x D	UPC
63M	White	10" x 24" x 24"	6 71031 00189 4

General: Furnish and install as shown on plans, Mop Service Basin model 63M, as manufactured by E.L. Mustee & Sons, Inc. Unit to be one-piece molded fiberglass made with matched metal molds using extreme heat and pressure. Height shall be 10" with not less than 1" wide shoulder. Size 24" x 24". Drain shall be integrally molded, complete with drain seal for installation of 3" ABS, PVC (Sch. #80) and iron pipe. Removable stainless steel strainer. Performance tested to meet or exceed ANSI Z 124-2011 and FHA/HUD UM-73. Weight 45 lbs., cubic feet 4.2. Install in compliance with local codes.

DURAGUARD™ WALL GUARDS

FOR USE WITH MUSTEE MOP SERVICE BASINS

INSTALLATION NOTE: If installing into concrete block or if holes do not fall on support member (i.e. wall stud), the use of wall anchors (not provided) is recommended.

CORNER INSTALLATION

1. Hold panels in place and mark hole locations on wall. Drill 3/32" pilot holes for #10-1"(PN-67.801) screws.
2. Run a bead of silicone sealant (not included) on each wall near the corner and set corner bracket in place. Apply a second bead of sealant to the front of the corner bracket to help prevent leaks. Using the twelve (12) screws provided, secure the panels to the wall. See **FIGURE 1(a & b)**.
3. Apply a bead of silicone sealant around panels to prevent leaks.

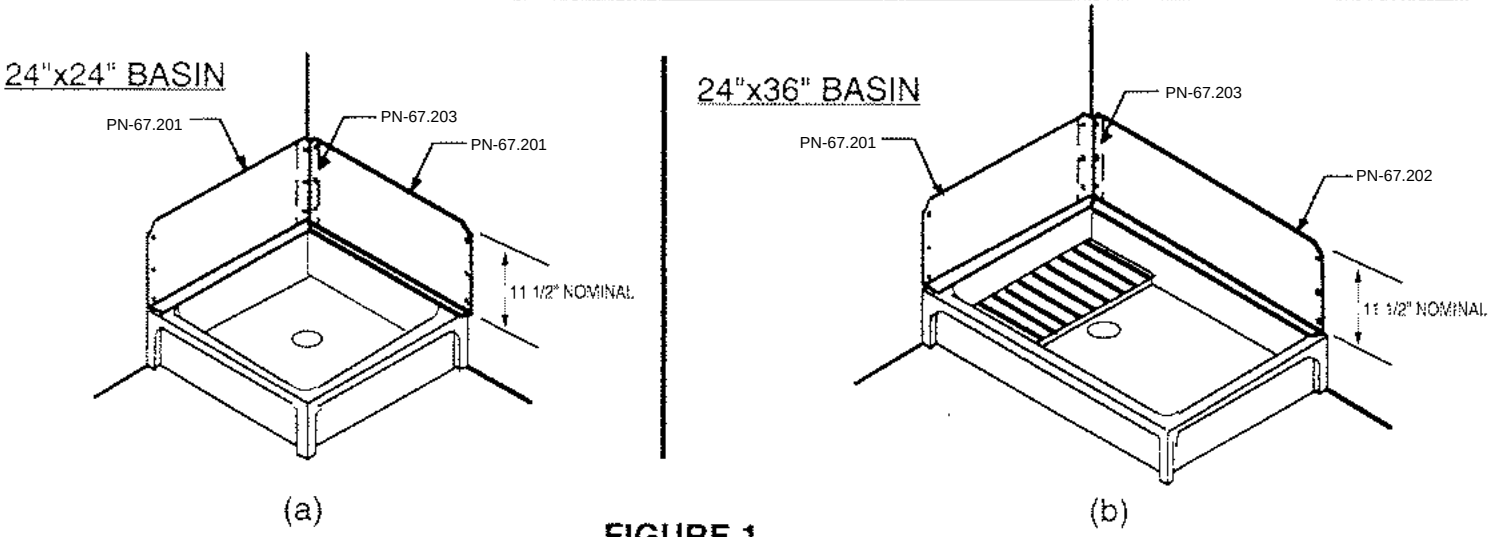

FIGURE 1

NON-CORNER INSTALLATION

1. Hold panel in place and mark hole locations on wall. Drill 3/32" pilot holes for #10-1" (PN-67.801) screws.
2. Using six (6) of the screws provided, secure the panel to the wall. See **FIGURE 2(a, b & c)**.
3. Apply a bead of silicone sealant around panels to prevent leaks.

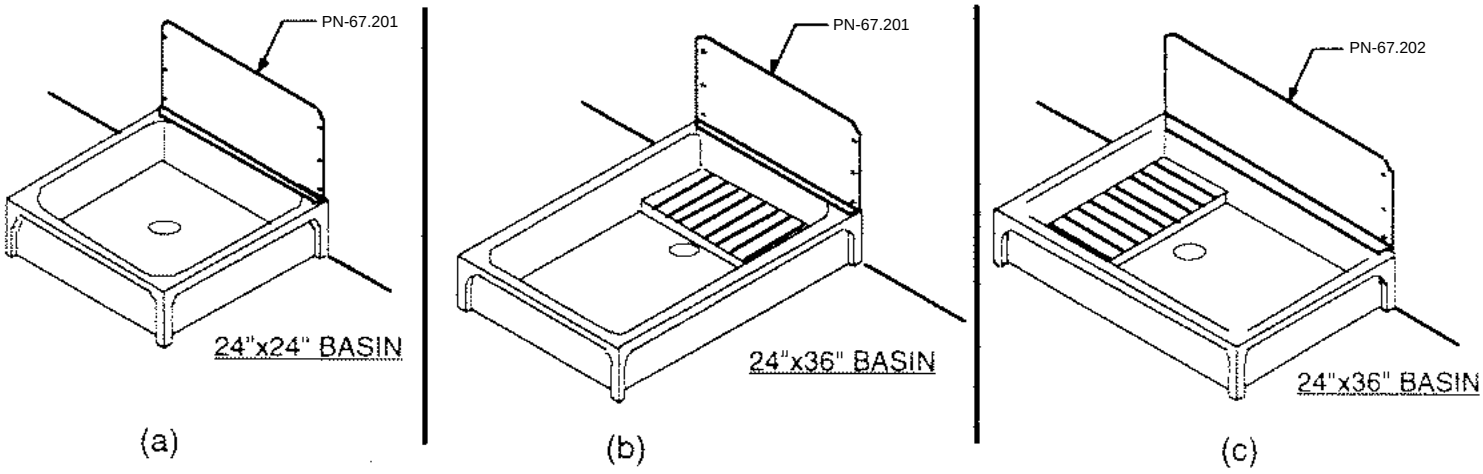

FIGURE 2

E.L. MUSTEE & SONS, INC.
5431 West 164th Street • Brook Park, Ohio 44142

"CLOSET" INSTALLATION

NOTE: A THREE PANEL "CLOSET" INSTALLATION REQUIRES THE USE OF TWO (2) DURAGUARD™ UNITS. REFER TO THE CHART AND FIGURES BELOW TO DETERMINE WHICH UNITS ARE NEEDED!

MOP BASIN SIZE	REFERENCE FIGURE	REQUIRED UNITS
24" x 24"	FIGURE 3(a)	1- PN 67.2424 & 1- PN 67.24C
24" x 36"	FIGURE 3(b) FIGURE 3(c)	1- PN 67.2436 & 1- PN 67.36C 1- PN 67.2424 & 1- PN 67.36C -or- 1- PN 67.2436 & 1- PN 67.24C

1. Hold panels in place and mark hole locations on wall. Drill 3/32" pilot holes for #10-1"(PN-67.801) screws.
2. Run a bead of silicone sealant on each wall near the corners and set corner brackets in place. Apply a second bead of sealant to the front of each corner bracket to help prevent leaks. Using eighteen (18) of the screws provided, secure the panels to the wall. See **FIGURE 3(a,b &c)**.
3. Apply a bead of silicone sealant around panels to prevent leaks.

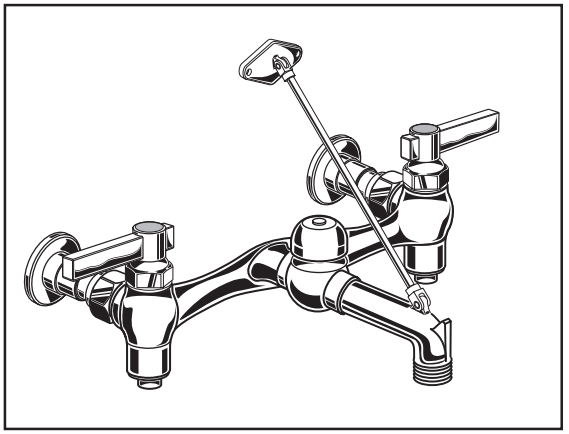
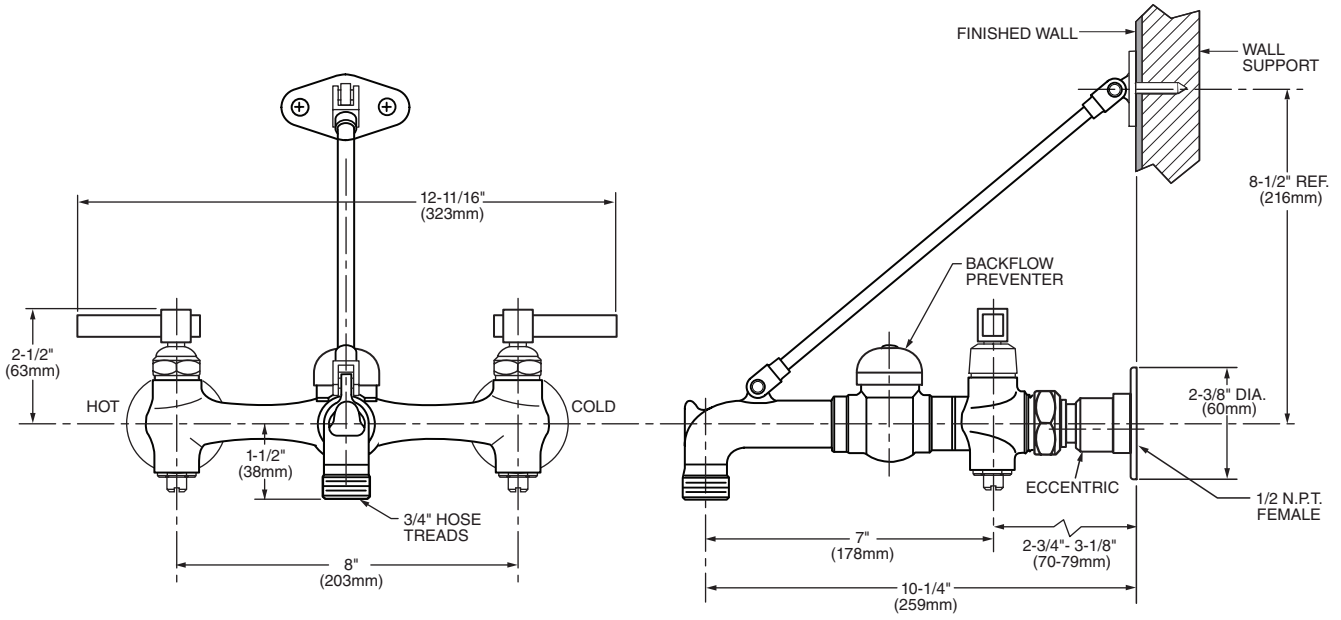
EXPOSED YOKE WALL-MOUNT UTILITY FAUCET

WITH TOP BRACE



MODEL NUMBER:

❑ **8344.212 Exposed Yoke Wall-Mount Utility Faucet**
Top brace. 6" cast brass spout with vacuum breaker. Ceramic disc valves. Integral supply stops. Metal lever handles. Bucket hook. 3/4" threaded hose end. 1/2" NPT female inlets. Rough Chrome (004) finish.



GENERAL DESCRIPTION:

Cast brass body. Metal lever handles with hot and cold indicators. 1/4 turn ceramic disc valve cartridges. Vacuum breaker prevents back flow. Integral supply stops. Spout, top braced to wall, with bucket hook and threaded hose end. 1/2" female inlets adjustable from 7-7/8" to 8-1/8".

CODES AND STANDARDS

These products meet or exceed the following codes and standards:

ASME A112.18.1
CSA B 125
ANSI A117.1

PRODUCT FEATURES:

Cast Brass Construction: Durable - Excellent in high use applications.

Ceramic Disc Valve Cartridges: Assure a lifetime of drip-free performance.

Vacuum Breaker: Prevents back flow.

Integral Supply Stops: Permits easy and convenient access.

Top Brace: Provides additional support.

SUGGESTED SPECIFICATION

Exposed yoke wall-mount utility faucet shall feature a cast brass body with integral supply stops. Cast brass spout with bucket hook, top brace, and vandal-resistant metal lever handles. Shall feature vacuum breaker to prevent back flow. Shall also feature 1/4 turn washerless ceramic disc valve cartridges. Fitting shall be American Standard Model # 8344.212.004.

KOROGARD G815, G815S, G825, & G875
EXTRUDED CORNER GUARD

korogard®
wall protection systems

Korogard Extruded Corner Guards are an economical yet durable option for corner protection. Easily installed, these guards are .078" (1.98mm) thick vinyl with 3/4" (19.1mm), 1-1/2" (38.1mm), or 2-1/2" (63.5mm) wings. The wings are tapered back, providing a finished look to any installation. The G815 is available as G81E, a Korogard ETS product manufactured with a unique blend of high-performance materials.

Korogard Extruded Corner Guards are backed by a limited five-year warranty. All Corner Guards are Class A fire rated and meet national building code standards. All Korogard protective products color-coordinate with a multitude of Koroseal Wallcoverings for a systems approach to wall protection.

For more information on Korogard Corner Guards or the Koroseal Wall Protection System, please call your local Korogard distributor.

SECTION 10 26 00 CORNER GUARDS

PART 1 GENERAL

1.01 SECTION INCLUDES
2-1/2" (63.5mm) x 2-1/2" (63.5mm), 1-1/2" (38.1mm) x 1-1/2" (38.1mm), and 3/4" (19.1mm) x 3/4" (19.1mm) Surface Adhered Extruded Corner Guards.

1.02 SUBMITTALS
A. Submit in accordance with Section 01 33 00—Submittals.
B. Product Data: Submit manufacturer's product data.
C. Samples: Submit for approval 12" (304.8mm) long sample of each color specified.
D. Test Reports: Submit manufacturer's test reports and certification indicating compliance with applicable building code requirements.

1.03 QUALITY ASSURANCE
Comply with NFPA 101® for interior finish materials. Smoke developed less than 450 and flame spread of 25 or less in accordance with ASTM E 84.

1.04 DELIVERY, STORAGE, AND HANDLING
A. Delivery: Deliver materials to site in manufacturer's original, unopened containers and packaging with labels clearly identifying product name and manufacturer.
B. Storage: Store materials in a clean, dry location protected against damage of any kind.

PART 2 PRODUCTS

2.01 MANUFACTURER
Koroseal Wall Protection Systems,
A Division of koroseal Interior Products, LLC.

2.02 CORNER GUARDS
Koroseal "Korogard" Series G825, G815, G875, and G915: Extruded Corner Guard adhered to substrate corner with glue or tape. Exposed surfaces shall be free of wrinkling, chipping, discoloration, or other imperfections.
1. Dimensions
   a. Leg length: 2-1/2" (63.5mm)—G825; 1-1/2" (38.1mm)—G815 and G915; 3/4" (19.1mm)—G875
   b. Angle: 90°.
2. Profile: High-impact vinyl acrylic extrusion, nominal .078" (1.98mm) thick. Class A fire rating, when tested in accordance with ASTM E 84.
3. Extrusion: Pebble grain finish. Contains EPA registered Micro-Chek antimicrobial agent.
4. Adhesion: Manufacturer recommended contact cement—G825, G815, and G875; Manufacturer applied adhesive-backed tape—G915.

PART 3 EXECUTION

3.01 EXAMINATION
Verify by examination that wall surfaces are acceptable to receive the specified guard systems. Notify the Architect in writing if wall surfaces are not acceptable. Do not begin installation until unacceptable conditions have been corrected.

3.02 INSTALLATION
A. Install Corner Guards to wall securely in accordance with manufacturer's written instructions.
B. Install Corner Guards accurately in location, alignment, and elevation.

ArmorSeal Heavy Duty Floor Coatings

ARMORSEAL® TREAD-PLEX™

100% ACRYLIC WATER BASED FLOOR COATING

B90 SERIES

Revised: August 12, 2019

PRODUCT INFORMATION

8.12

PRODUCT DESCRIPTION

ARMORSEAL TREAD-PLEX is a general purpose, interior/exterior, 100% acrylic, low odor, waterborne floor coating. This dries rapidly to a tough, alkali resistant finish which will withstand hard wear, abrasion, grease, oils, and cleaning equipment.

- One component
- Fast dry
- Slip resistant properties
- Abrasion resistant
- Outstanding application properties
- Water clean up

PRODUCT CHARACTERISTICS

Finish:	Semi-Gloss
Color:	Wide variety of colors available
Volume Solids:	43% ± 2%, may vary by color
Weight Solids:	55% ± 2%, may vary by color
VOC (EPA Method 24):	<100 g/L; .83 lb/gal

Recommended Spreading Rate per coat:

	Minimum	Maximum
Wet mils (microns)	**3.5** (88)	**4.5** (112)
Dry mils (microns)	**1.5** (40)	**2.0** (50)
~Coverage sq ft/gal (m^2/L)	**345** (8.4)	**460** (11.3)
Theoretical coverage **sq ft/gal** (m^2/L) @ 1 mil / 25 microns dft	**688** (16.8)	

NOTE: Brush or roll application may require multiple coats to achieve maximum film thickness and uniformity of appearance.

Drying Schedule @ 4.0 mils wet (100 microns):

	@ 55°F/13°C	@ 77°F/25°C *50% RH*	@ 100°F/38°C
To touch:	45 minutes	30 minutes	10 minutes
To recoat:	6 hours	4 hours	30 minutes
Foot traffic:	18 hours	8 hours	1 hour
Heavy traffic:	24 hours	18 hours	6 hours
To cure:	7 days	7 days	7 days

Drying time is temperature, humidity, and film thickness dependent.

Shelf Life:	24 months, unopened Store indoors at 50°F (10°C) to 100°F (38°C)
Flash Point:	>200°F (93°C), PMCC
Reducer/Clean Up:	Water

RECOMMENDED USES

For use over prepared concrete and wood floors, steps, stairwells, aisleways, or previously painted floor surfaces in sound condition.

- Laboratories
- Light assembly and production areas
- Hospitals
- Industrial/commercial office areas
- Helipads
- Not recommended for areas subject to hot tire pickup
- Meets ADA requirements for Slip Resistance for floors
- Suitable for use in USDA inspected facilities

PERFORMANCE CHARACTERISTICS

Substrate*: Concrete

Surface Preparation*: Clean, dry, sound

System Tested*:

2 cts: ArmorSeal Tread-Plex @ 4.0 mils (100 microns) dft

*unless otherwise noted below

Test Name	Test Method	Results
Abrasion Resistance	ASTM D4060, CS17 wheel, 1000 cycles, 1 kg load	No more than 37 mg loss
Adhesion	ASTM D4541; ASTM D3359	702 psi (ASTM D4541); 5A (ASTM D3359)
Direct Impact Resistance, on steel	ASTM D2794	30 in. lb.
Dry Heat Resistance	ASTM D2485	150°F (66°C), intermittent at 200°F (93°C)
Flexibility	ASTM D522, 180° bend, 1/8" mandrel	Passes
Humidity Resistance	ASTM D4585, 500 hours	Rating 10 per ASTM D714 for blistering
Pencil Hardness	ASTM D3363	F
Scrub Resistance (3 mils dft)	ASTM D2486, Section 8	Passes 1000 cycles minimum
Slip Resistance, Floors	ASTM C1028**, .60 Minimum Static Coefficient of Friction	Passes wet and dry, with and without SharkGrip Additive
Wet Adhesion (one coat @ 2.0 mils dft)	TT-P-1511A, 6000 cycles	Passes

**Test method withdrawn in 2014 without replacement

ArmorSeal Heavy Duty Floor Coatings

ARMORSEAL® TREAD-PLEX™

100% ACRYLIC WATER BASED FLOOR COATING

B90 SERIES

Revised: August 12, 2019

PRODUCT INFORMATION

8.12

RECOMMENDED SYSTEMS

		Dry Film Thickness / ct. Mils	(Microns)
Concrete Floors:			
2 cts.	ArmorSeal Tread-Plex	1.5-2.0	(40-50)
Wood Floors:			
2 cts.	ArmorSeal Tread-Plex	1.5-2.0	(40-50)
Previously Painted Floors in Sound Condition:			
1-2 cts.	ArmorSeal Tread-Plex	1.5-2.0	(40-50)

The systems listed above are representative of the product's use, other systems may be appropriate.

SURFACE PREPARATION

Surface must be clean, dry, and in sound condition. Remove all oil, dust, grease, dirt, loose rust, and other foreign material to ensure adequate adhesion.

Refer to product Application Bulletin for detailed surface preparation information.

Minimum recommended surface preparation:

Concrete Floors: SSPC-SP13/NACE 6, or ICRI No. 310.2R, CSP 1-3

Wood Floors: Clean, smooth, dust free

Do not use hydrocarbon solvents for cleaning

Surface Preparation Standards

	Condition of Surface	ISO 8501-1 BS7079:A1	SSPC	NACE
White Metal		Sa 3	SP 5	1
Near White Metal		Sa 2.5	SP 10	2
Commercial Blast		Sa 2	SP 6	3
Brush-Off Blast		Sa 1	SP 7	4
Hand Tool Cleaning	Rusted	C St 2	SP 2	-
	Pitted & Rusted	D St 2	SP 2	-
Power Tool Cleaning	Rusted	C St 3	SP 3	-
	Pitted & Rusted	D St 3	SP 3	-

TINTING

Do not tint package colors. Pastel and Ultradeep bases tint at 100% strength with EnviroToner, BAC, or CCE. Better performance will be achieved with Envirotoners. Five minutes minimum mixing on a mechanical shaker is required for complete mixing of color.

APPLICATION CONDITIONS

Temperature: 50°F (10°C) minimum, 100°F (38°C) maximum
(air, surface, and material)
At least 5°F (2.8°C) above dew point

Relative humidity: 85% maximum

Refer to product Application Bulletin for detailed application information.

ORDERING INFORMATION

Packaging: 1 gallon (3.78L) and 5 gallon (18.9L) containers

Weight: 10.7 ± 0.2 lb/gal ; 1.3 Kg/L, may vary by color

SAFETY PRECAUTIONS

Refer to the MSDS sheet before use.

Published technical data and instructions are subject to change without notice. Contact your Sherwin-Williams representative for additional technical data and instructions.

WARRANTY

The Sherwin-Williams Company warrants our products to be free of manufacturing defects in accord with applicable Sherwin-Williams quality control procedures. Liability for products proven defective, if any, is limited to replacement of the defective product or the refund of the purchase price paid for the defective product as determined by Sherwin-Williams. NO OTHER WARRANTY OR GUARANTEE OF ANY KIND IS MADE BY SHERWIN-WILLIAMS, EXPRESSED OR IMPLIED, STATUTORY, BY OPERATION OF LAW OR OTHERWISE, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

DISCLAIMER

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative to obtain the most recent Product Data Information and Application Bulletin.

ArmorSeal Heavy Duty Floor Coatings

ARMORSEAL® TREAD-PLEX™

100% ACRYLIC WATER BASED FLOOR COATING

B90 SERIES

Revised: August 12, 2019

APPLICATION BULLETIN

8.12

SURFACE PREPARATIONS

Surface must be clean, dry, and in sound condition. Remove all oil, dust, grease, dirt, loose rust, and other foreign material to ensure adequate adhesion.

Do not use hydrocarbon solvent for cleaning.

Concrete and Masonry
For surface preparation, refer to SSPC-SP13/NACE 6, or ICRI No. 310.2R, CSP 1-3. Surfaces should be thoroughly clean and dry. Concrete and mortar must be cured at least 28 days @ 75°F (24°C). Remove all loose mortar and foreign material. Surface must be free of laitance, concrete dust, dirt, form release agents, moisture curing membranes, loose cement and hardeners. Fill bug holes, air pockets and other voids with Steel-Seam FT910.

Follow the standard methods listed below when applicable:
ASTM D4258 Standard Practice for Cleaning Concrete.
ASTM D4259 Standard Practice for Abrading Concrete.
ASTM D4260 Standard Practice for Etching Concrete.
ASTM F1869 Standard Test Method for Measuring Moisture Vapor Emission Rate of Concrete.
SSPC-SP 13/Nace 6 Surface Preparation of Concrete.
ICRI No. 310.2R Concrete Surface Preparation.

Wood
Surface must be clean, dry and sound. Remove any oils and dirt from the surface using a degreasing solvent or strong detergent. Sand to remove any loose or deteriorated surface wood and to obtain a proper surface profile. Prime with recommended primer and paint as soon as possible. No painting should be done immediately after a rain or during foggy weather. Knots and pitch streaks must be scraped, sanded and spot primed before full coat of primer is applied. All nail holes or small openings must be properly caulked.

Previously Painted Surfaces
If in sound condition, clean the surface of all foreign material. Smooth, hard or glossy coatings and surfaces should be dulled by abrading the surface. Apply a test area, allowing paint to dry one week before testing adhesion. If adhesion is poor, additional abrasion of the surface and/or removal of the previous coating may be necessary. Retest surface for adhesion. If paint is peeling or badly weathered, clean surface to sound substrate and treat as a new surface as above.

Surface Preparation Standards

	Condition of Surface	ISO 8501-1 BS7079:A1	SSPC	NACE
White Metal		Sa 3	SP 5	1
Near White Metal		Sa 2.5	SP 10	2
Commercial Blast		Sa 2	SP 6	3
Brush-Off Blast		Sa 1	SP 7	4
Hand Tool Cleaning	Rusted	C St 2	SP 2	-
	Pitted & Rusted	D St 2	SP 2	-
Power Tool Cleaning	Rusted	C St 3	SP 3	-
	Pitted & Rusted	D St 3	SP 3	-

APPLICATION CONDITIONS

Temperature:	50°F (10°C) minimum, 100°F (38°C) maximum (air, surface, and material) At least 5°F (2.8°C) above dew point
Relative humidity:	85% maximum

APPLICATION EQUIPMENT

The following is a guide. Changes in pressures and tip sizes may be needed for proper spray characteristics. Always purge spray equipment before use with listed reducer. Any reduction must be compliant with existing VOC regulations and compatible with the existing environmental and application conditions.

Reducer/Clean Up .....Water

Brush
Brush.....Nylon/Polyester
Reduction.....As needed up to 6% by volume

Roller
Cover .....1/4"-3/8" woven with solvent resistant core
Reduction.....As needed up to 6% by volume

If specific application equipment is not listed above, equivalent equipment may be substituted.

B90 SERIES

Revised: August 12, 2019

APPLICATION BULLETIN

8.12

APPLICATION PROCEDURES

Surface preparation must be completed as indicated.

Mixing Instructions: Mix paint thoroughly with low speed power agitation prior to use. Avoid vigorous agitation. Make certain no pigment remains on bottom of can.

Apply paint at the recommended film thickness and spreading rate as indicated below:

Recommended Spreading Rate per coat:

	Minimum	Maximum
Wet mils (microns)	**3.5** (88)	**4.5** (112)
Dry mils (microns)	**1.5** (40)	**2.0** (50)
~Coverage sq ft/gal (m^2/L)	**345** (8.4)	**460** (11.3)
Theoretical coverage **sq ft/gal** (m^2/L) @ 1 mil / 25 microns dft	**688** (16.8)	

NOTE: Brush or roll application may require multiple coats to achieve maximum film thickness and uniformity of appearance.

Drying Schedule @ 4.0 mils wet (100 microns):

	@ 55°F/13°C	@ 77°F/25°C *50% RH*	@ 100°F/38°C
To touch:	45 minutes	30 minutes	10 minutes
To recoat:	6 hours	4 hours	30 minutes
Foot traffic:	18 hours	8 hours	1 hour
Heavy traffic:	24 hours	18 hours	6 hours
To cure:	7 days	7 days	7 days

Drying time is temperature, humidity, and film thickness dependent.

Application of coating above maximum or below minimum recommended spreading rate may adversely affect coating performance.

CLEAN UP INSTRUCTIONS

Clean spills and spatters immediately with soap and warm water. Clean hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with mineral spirits to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using mineral spirits.

DISCLAIMER

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative to obtain the most recent Product Data Information and Application Bulletin.

PERFORMANCE TIPS

During the early stages of drying, the coating is sensitive to rain, dew, high humidity, and moisture condensation. Plan painting schedules to avoid these influences during the first 16-24 hours of curing.

Spreading rates are calculated on volume solids and do not include an application loss factor due to surface profile, roughness or porosity of the surface, skill and technique of the applicator, method of application, various surface irregularities, material lost during mixing, spillage, overthinning, climatic conditions, and excessive film build.

Excessive reduction of material can affect film build, appearance, and adhesion.

This product is not slip resistant where moisture, water, grease, or other liquids may be present.

Anti-slip additives, such as H&C SharkGrip®, may be added to the coating to provide some slip resistance. This product should not be used in place of a non-skid finish.

Refer to Product Information sheet for additional performance characteristics and properties.

SAFETY PRECAUTIONS

Refer to the MSDS sheet before use.

Published technical data and instructions are subject to change without notice. Contact your Sherwin-Williams representative for additional technical data and instructions.

WARRANTY

The Sherwin-Williams Company warrants our products to be free of manufacturing defects in accord with applicable Sherwin-Williams quality control procedures. Liability for products proven defective, if any, is limited to replacement of the defective product or the refund of the purchase price paid for the defective product as determined by Sherwin-Williams. NO OTHER WARRANTY OR GUARANTEE OF ANY KIND IS MADE BY SHERWIN-WILLIAMS, EXPRESSED OR IMPLIED, STATUTORY, BY OPERATION OF LAW OR OTHERWISE, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Item Name	Decorative Metal Fabrications
Item Type	Aluminum Sheet & Tube
Description	1/8" thick aluminum sheet metal and 1" x 1" Aluminum Tube, Powder Coated
Manufacturer	Not Applicable
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Tiger Drylac 049/66230, Color: Brown C33
Finish	Metallic Smooth/Matte; Fluropolymer (PVDF) 70% resin, 2-coat system complying with AAMA 2605
CSI #	057500 - Decorative Formed Metal
Omniclass #	22 - 057500 - Decorative Formed Metal
Quality Standards	Aluminum Plate and Sheet: ASTM B209/B209M, Alloy 6061-T6; Aluminum Extruded Bar and Tubes: ASTM B221, Alloy 6063-T5. Comply with NAAMM "Metal Finishes Manual" for “Architectural and Metal Products” for recommendations relative to application and designations of finishes. for type of use and finish indicated.
Part of an Assembly	N
Notes	Sheet metal directly adhered to substrate per manufacturer's recommended adhesive. Form decorative metal to required shapes and sizes, true to line and level with true curves and accurate angles and surfaces. Finish exposed surfaces to smooth, sharp, well-defined lines and arris.

SPECIAL INSTRUCTIONS

If finished in the field; refer to the Building Product Manual Paint Schedule in the appendix for interior painted metal surfaces.

TIGER Drylac® Powder Coatings

SERIES 49 - interior and exterior applications

POLYESTER TGIC WEATHER RESISTANT POWDER COATING FOR INTERIOR AND EXTERIOR APPLICATIONS

Typical applications

- residential windows and doors
- lawn mowers and garden equipment
- patio furniture
- automotive accessories
- bicycles and motorcycles
- agricultural machinery
- sporting goods
- internal ship components

Product details

Standard packaging — in original 44 & 55 lb (20 & 25 kg) boxes and 5 lb (2.5 kg) minipack

Specific gravity (ASTM D792) — approximately 1.2-1.8 g/cm^3 depending on pigmentation

Theoretical coverage — at 2.5 mils (60 µm) film thickness: **51.5 ft²/lb (11.1 m²/kg)**. Refer also to "Theoretic Powder Coating Coverage Chart" version 00-1001 (imperial) version 00-1000 (metric)

Storage stability — 12 months at no more than 77 °F (25 °C) avoid direct and extended exposure to heat

Finish

finish	gloss
smooth *glossy*	80-95+*
smooth *semi-gloss*	55-65*
smooth *matte*	15-25*
rough texture *glossy*	visual
rough texture *matte*	visual
fine texture	visual
fluorescent	visual
clear, glitter, candy tones	visual
dormant transparent	visual
holographic	visual
metallic and other special effects	visual

* *Gloss level according to ASTM 523 at 60° angle (doesn't apply to metallic effect powder coatings). The measured gloss level of effect powder coatings can diverge from the details given in this Product Data Sheet. The creation of tolerance samples is recommended.*

Available as stock product in a selection of colors and finishes (see color charts). It can be made to order in non-stock colors (minimum order quantity applies).

Features

- good weather resistance
- good mechanical properties
- good flow
- good coverage
- good storage stability
- available in Out Gassing Forgiving (OGF) formulation
- Underwriter Laboratories recognized component (UL approved)

Underwriters Laboratories Inc., (UL) Recognition.

Pretreatment

The following table reflects the common methods of pre-treatment with regards to various substrates and applications. In selecting the proper type of pretreatment, the suitability of the type of powder coating for a desired application according to the guidelines on this page should be observed.

	Aluminum			Galvanized Steel				Steel		
Degreasing	○			○				○		
1) Chromating	○	○	○	○	○	○	○			
2) Pre-Anodizing	○	○	○							
2) Chrome free	○	○	○	○	○					
Iron Phosphating								○	○	
Zinc Phosphating				○	○	○	○	○	○	○
Blasting								○	○	○
3) Sweeping				○	○	○	○			
	I	E	A	I	E	A	S	I	E	S[4]

Application: I = interior; E = exterior; A = architectural; S = steel

1) according to ASTM B 449
2) according to GSB quality and test regulations. The suitability of this type of pretreatment needs to be established through a boiling water test and subsequent cross-hatch adhesion and adhesive tape removal test
3) only for zinc coated parts >1.8 mils (>45 µm)
4) for a two-coat process/TIGER Shield

Processing

Corona and Tribostatic*

** For Tribostatic powder coatings, confirm before ordering. Suitability of metallic effects for Tribostatic processing must be verified prior to actual application. Please refer to the latest edition of the relevant application guidelines for metallic effect powder coatings.*

Since not all powder coatings are suitable for recycling/reclaim, please verify before ordering.

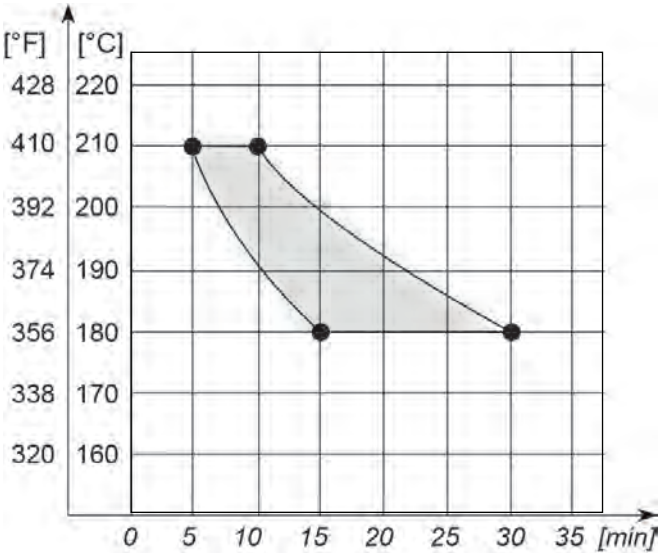
Product data sheet

TIGER Drylac® Powder Coatings

Cure parameters

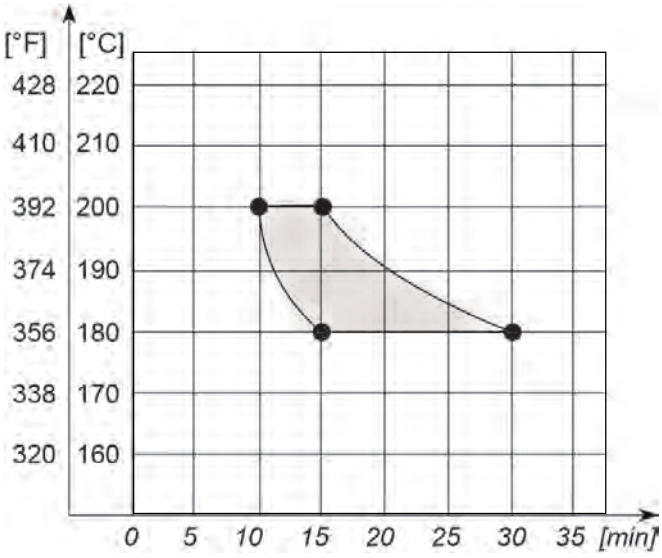
(substrate temperature versus curing time)

smooth *glossy*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
410 °F (210 °C)	5 minutes	10 minutes

smooth *matte*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
392 °F (200 °C)	10 minutes	15 minutes

Cure parameters must be closely observed since mechanical properties will develop before full cross-linking.

Test results

Checked under laboratory conditions on iron phosphated steel test panels Bonderite B-1000 or equivalent. Cure conditions are according to the cure curves. Actual product performance may vary due to product-specific properties such as gloss, color, effect and finish as well as application-related and environmental influences. When used as a two-coat system, the increase in film thickness will result in a decrease of mechanical properties.

test method	test	**Series 49** smooth *glossy*	**Series 49** smooth *semi-gloss*	**Series 49** smooth *matte*
ISO 2360	**recommended film thickness**	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)

ASTM D2247	**determination of resistance to humidity** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering
ASTM B117	**salt spray resistance** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering

Cleaning recommendations: refer to the latest edition of TIGER “Cleaning Recommendations” information sheet, Version 00-1005.

Series 49

TIGER Drylac® Powder Coatings

Please note

For metallic finishes, it is recommended to observe the guidelines published in the latest edition of TIGER Drylac® "Application guidelines for metallic effect powder coatings".

Please consult the manufacturer before applying any 2-coat systems that feature (i) a primer or e-coat as base coat and (ii) a metallic effect powder coating as a top coat.

Top coating with a clear exterior grade powder coating over an interior grade powder coating does not result into a weather resistant coating system.

Post-bending properties of any part must be verified prior to application. Minor cracks in the coated surface may lead to corrosion.

Joint sealants and any other auxiliary products, such as glazing aids, gliding waxes, drilling and cutting lubricants, which come in contact with the coated surface, must be pH-neutral and free of substances that may damage the finish. Therefore, a suitability test at the applicator's end, prior to coating, is highly recommended.

In general, colors in the red, orange and yellow range may require an increased film thickness to achieve full hiding.

Please read and understand the Safety Data Sheet (SDS) before use.

Chemical resistance

The required chemical resistance of a powder coating depends, among other things, on its formulation. Chemical resistance requirements must be considered according to processing conditions and final use of the finished product. This is best established during the product specification process. Agreement between all parties involved must be reached about the requirements for such chemical resistance as well as the test method, which may be performed in accordance with PCI test method #8 "Solvent Cure Test". Furthermore, the test duration and concentration of the test media need to be agreed upon.

Disclaimer

TIGER's verbal and written recommendations for the use of its products are based upon experience and in accordance with current technological standards. These are provided in order to support the buyer or user. They are non-committal and do not create any additional commitments to the purchase agreement. They do not release the buyer from verifying the suitability of TIGER products for the intended application. TIGER warrants that its products are free of flaws and defects to the extent stipulated in the Terms of Delivery and Payment.

As part of TIGER product information program, each Product Data Sheet is updated periodically. The latest version shall prevail. It is recommended to always check for the latest editions on TIGER's website download area www.tiger-coatings.com to make sure you have the most current version of this Product Data Sheet. The information on TIGER's Product Data Sheets are subject to change without notification.

This Product Data Sheet supersedes and replaces all previous Product Data Sheet versions and notes to customers published in relation to this product and is only intended to provide a general overview on the product.

Latest versions of Technical Information Sheets and Terms of Delivery and Payment are downloadable from www.tiger-coatings.com and form an integral part of this Product Data Sheet.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Paint - Ceiling
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Ceiling & Soffit Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B30 Series)
Dimensions	N/A
Color	SW7005 Pure White
Finish	Flat
CSI #	09 90 00 - Painting
Omniclass #	22 - 09 90 00
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates. 0 g/L VOC (US EPA)| GREENGUARD Gold Certified| LEED v4 VOC & Emissions Compliant, Materials Ingredient Declaration available.
Product Type	ProMar 200 ZeroVOC Interior Latex (B30W12651)
Finish	Flat
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to med weight wall covering) are to have a level 4 Gypsum Board Finish.
All walls to receive Gloss, enamel paint, or Murals to have a Level 5 Gypsum Board Finish.

ProMar® 200 Zero V.O.C.
Interior Latex Flat

B30-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Flat is a durable, professional quality, interior vinyl acrylic finish for use on walls and ceilings of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350-400 sq. ft. per gallon @ 4 mils wet; 1.4 mils dry

Drying Time, @ 77°F, 50% RH:

Touch: 1 Hour
Recoat: 4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 1.5-3.5 units @ 85°

Tinting with CCE only:

Base:	oz/gal:	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B30W12651
(may vary by color)

V.O.C. (less exempt solvents):

less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids:	34 ± 2%
Weight Solids:	52 ± 2%
Weight per Gallon:	11.45 lbs
Flash Point:	N/A
Vehicle Type:	Vinyl Acrylic
Shelf Life:	36 months unopened

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 09/04/2019, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon/polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Interior Latex Flat

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised. Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

FRC,SP

CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Solo®

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Paint - Wall
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Gypsum Board Wall Paint
Manufacturer	Sherwin Williams
Model	ProMar 200 ZeroVOC Interior Latex (B30 Series)
Dimensions	N/A
Color	SW7649 Silverplate
Finish	Eg-Shell
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Zero VOCs meets the most stringent VOC requirements. GREENGUARD Environmental Institute (GEI) and other green guidelines and regulations. ProMar 200 Zero VOC Flat meets MPI 53 and 143.
Product Type	ProMar 200 ZeroVOC Interior Latex (B30W12651)
Finish	Eg-Shel
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish. All walls to receive Gloss, Enamel Paint, or Murals
to have a Level 5 Gypsum Board Finish.

ProMar® 200 Zero V.O.C.
Interior Latex Eg-Shel

B20-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Eg-Shel is a durable, professional quality, interior vinyl acrylic finish for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350 - 400 sq. ft. per gallon @ 4 mils wet; 1.7 mils dry

Drying Time, @ 77°F, 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 15-20 units @ 85°
5+ units @60°

Tinting with CCE only:

Base:	oz. per gallon	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B20W12651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 42 ± 2%

Weight Solids: 54 ± 2%

Weight per Gallon: 10.82 lbs

Flash Point: N/A

Vehicle Type: Vinyl Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 54.19 grains/(hr ft2 in Hg)

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 08/10/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

B20-2600 Series

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Eg-Shel is a durable, professional quality, interior vinyl acrylic finish for use on walls, ceilings, and trim of primed plaster, wallboard, wood, masonry, and primed metal.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350 - 400 sq. ft. per gallon @ 4 mils wet; 1.7 mils dry

Drying Time, @ 77°F, 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 15-20 units @ 85°
5+ units @60°

Tinting with CCE only:

Base:	oz. per gallon	Strength:
High Ref White	0-6	SherColor
Extra White	0-7	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor
Real Red	0-12	SherColor
Bright Yellow	0-12	SherColor
Dover White		do not tint

Extra White B20W12651
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 42 ± 2%

Weight Solids: 54 ± 2%

Weight per Gallon: 10.82 lbs

Flash Point: N/A

Vehicle Type: Vinyl Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 54.19 grains/(hr ft2 in Hg)

Anti-microbial
This product contains agents which inhibit the growth of mold and mildew on the surface of this paint film.

COMPLIANCE

As of 08/10/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	Yes
MIR-Product Lens Certified	Yes
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Interior Latex Eg-Shel

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

HOTW 08/10/2020 B20T02654 31 00
FRC,SP

CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Paint - Wall
Item Type	Pre-Catalyzed Water-based Acrylic Epoxy
Description	Interior Wall Paint at Indoor Pool
Manufacturer	Benjamin Moore
Model	Pre-Catalyzed Waterborne Epoxy (V341)
Color	Moonshine OC-56
Finish	Semi-Gloss
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Comply with Green Seal GS-11 and MPI Architectural Painting Specification Manual
Eco-Feature(s) *as per manufacturer	Low VOC paint meets MPI #151
Product Type	Pre-Catalyzed Waterborne Epoxy (V341)
Finish	Semi-Gloss
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish. All walls to receive Paint (or light to med weight wall covering) are to have a level 4 Gypsum Board Finish. All walls to receive Gloss, enamel paint, or Murals to have a Level 5 Gypsum Board Finish.

COROTECH HIGH PERFORMANCE

PRE-CATALYZED
WATERBORNE EPOXY SEMI-GLOSS
V341

Features

- Pre-catalyzed, waterborne acrylic epoxy
- Single pack – no catalyst
- Tints to all colors
- Excellent for retail, commercial, healthcare, schools and more
- Low VOC and water cleanup

General Description

This unique product provides epoxy toughness in a ready-to-use waterborne formula for walls, ceilings and trim. Low VOC and water cleanup make this product ideal for use in occupied areas. The cured film is scrubbable, resists water and common cleaning chemicals, and stands up to abrasion and marring. Excellent adhesion to many surfaces, including existing paint, drywall, primed masonry and primed metal.

Recommended For

Properly Prepared and/or Primed Steel, Iron, Concrete, Non-Ferrous Metals, Wood & Drywall. Corotech® V341 Pre-Catalyzed Waterborne Epoxy is designed for interior use in food and beverage processing, chemical processing, transportation, warehouses, industrial refurbishment, healthcare, schools, large commercial structures and other areas where a high performance epoxy is needed, which concerns that accompany conventional solvent thinned epoxies.

Limitations

- Do not apply if material, substrate or ambient temperature is below 50 °F (10 °C). The relative humidity should be below 90%.
- Not recommended for floors or for use in immersion service.
- Interior Use Only

	– Max.	95 °F

Volatile Organic Compounds (VOC)

71 Grams/Liter 0.59 Lbs./Gallon

◊ Reported values are for White. Contact retailer for values of other bases or colors.

Pre-Catalyzed Waterborne Epoxy Semi-Gloss V341

Surface Preparation

All surfaces must be sound, dry, clean and free of oil, grease, dirt, mildew, mill scale, form release agents, curing compounds, loose and flaking paint and other surface contaminants. Clean with Corotech® V600 Oil & Grease Emulsifier or V610 Citrus Based Cleaner. Remove all loose and peeling paint by wire brushing, scraping or sanding. Fill holes and cracks and sand smooth. Dull glossy surfaces by sanding. Moderate to heavily rusted surfaces must be thoroughly cleaned and properly primed.

NEW SURFACES: Concrete and Masonry: All vertical masonry surfaces must be allowed to cure a minimum of 30 days before painting. Acid etch or abrasive blast all slick, glazed concrete or concrete with laitance. For acid etching, follow all manufacturer's directions and safety instructions. We recommend Corotech® V620 Concrete Etch. Rinse thoroughly and allow to dry. Prime with one coat of Insl-x® Aqua Lock® Plus Primer Sealer.

Steel and Ferrous Metals: The use of Corotech® V110 Acrylic Metal Primer or V175 Waterborne Bonding Primer is recommended. All primers provide maximum performance over near white metal blasted surfaces (SSPCSP 10). There are however, situations and cost considerations that may prevent this type of surface preparation from being done. Corotech® Industrial Coatings have been designed to provide protection over less than ideal surfaces. The recommended standard is a commercial blast (SSPC-SP 6). The steel profile after the blast should be 1-2 mils and be jagged in nature. Surfaces must be free of grit dust. The coating should be applied as soon as possible after the blast in order to prevent flash rusting or surface contamination. Hand tool cleaning (SSPC-SP 2) or power tool cleaning (SSPC-SP 3) can be used if blasting is not possible. In areas where adequate surface preparation is not possible the use of V155 100% Solid Epoxy Pre-Primer is recommended. In highly corrosive areas where additional rust inhibitive qualities are required, prime with one coat of V170 Organic Zinc-Rich Primer prior to applying epoxy coatings.

Galvanized and Non-Ferrous Metals: Remove all oils from surface with Corotech® V600 Oil & Grease emulsifier. Solvent clean all surfaces [SSPC-SP 1]. Apply one coat of Corotech® V110 Acrylic Metal Primer or V175 Waterborne Bonding Primer.

Wood: Sand surfaces. Primer with Insl-x® Prime Lock Plus Alkyd Primer or Aqua Lock® Plus Acrylic Primer Sealer.

Drywall: Insure drywall is dust & chalk free. Prime with an acrylic drywall primer.

Previously Painted Surfaces: Can be applied over most existing industrial finishes in good condition.

WARNING! If you scrape, sand, or remove old paint, you may release lead dust. LEAD IS TOXIC. EXPOSURE TO LEAD DUST CAN CAUSE SERIOUS ILLNESS, SUCH AS BRAIN DAMAGE, ESPECIALLY IN CHILDREN. PREGNANT WOMEN SHOULD ALSO AVOID EXPOSURE. Wear a NIOSH approved respirator to control lead exposure. Clean up carefully with a HEPA vacuum and a wet mop. Before you start, find out how to protect yourself and your family by contacting the National Lead Informational Hotline at 1-800-424-LEAD or log on to www.epa.gov/lead .

Application

Airless Spray (Preferred Method): Tip range between .015 and .019. Total fluid output pressure at tip should not be less than 2400 psi.

Air Spray (Pressure Pot): DeVilbis MBC or JGA gun, with 704 or 765 air cap and Fluid Tip E.

Brush: Synthetic Bristle only. / **Roller:** Synthetic Cover. 3/8" – 3/4" nap.

NOTE: Do not allow material to remain in hoses, gun or spray equipment. Thoroughly flush all equipment with warm water. No reduction is necessary. Do not apply if material, substrate or ambient temperature is below 50 °F (10 °C). Relative humidity should be below 90%.

CHEMICAL RESISTANCE GUIDE (NON-IMMERSION) *	
Hot Water	Excellent
Fresh Water	Excellent

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

HOTW 07/28/2020 A76W00051 25 03 FRC,SP

CLEANUP INFORMATION

Clean spills, spatters, hands and tools immediately after use with soap and warm water. After cleaning, flush spray equipment with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Paint - Wood
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Wood Millwork Paint
Manufacturer	Sherwin Williams
Model	Solo 100% Acrylic Interior-Exterior (A76 Series)
Color	SW9170 Acier
Finish	Semi-gloss
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	Solo 100% Acrylic Interior-Exterior (A76W00051)
Finish	Semi-gloss
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish.
All walls to receive Gloss, Enamel Paint, or Murals to have a Level 5 Gypsum Board Finish.

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

A76-Series

CHARACTERISTICS

Solo 100% Acrylic Interior-Exterior creates a scrubbable finish that is resistant to burnishing, wearing, and blocking. **Solo** is excellent choice for specifications where 100% acrylic interior finishes are required. It is designed for use on doors, trim, walls, & shutters. **Solo** can be applied to surfaces with a pH up to 13.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350-400 sq. ft. per gallon @ 4 mils wet; 1.5 mils dry

Drying Time, @ 77°F (25°C), 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 35-45 units @ 60°

Tinting with CCE only:

Base:	oz. per gallon:	Strength:
Extra White	0-6	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor

Extra White A76W00051
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 38 ± 2%

Weight Solids: 50 ± 2%

Weight per Gallon: 10.16 lbs (4.61 kg)

Flash Point: NA

Vehicle Type: 100% Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 52.42 grains/(hr ft^2 in Hg)

Mildew Resistant
This coating contains agents which inhibit the growth of mildew on the surface of this coating film.

COMPLIANCE

As of 07/28/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	No
MIR-Manufacturer Inventory	No
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F (10°C). No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 1/4 to 1/2 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.015-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

SPECIFICATIONS

Apply 2 topcoats of Solo directly over existing properly prepared, interior or exterior coatings, or new interior bare drywall, plaster (cured with a pH of less than 13), masonry (cured with a pH of less than 13) and non-bleeding wood.

Interior

Drywall: Self-prime using 2 coats of Solo
or
1 coat ProMar 200 Zero V.O.C. Primer
2 coats Solo

Plaster: Self-prime using 2 coats of Solo
or
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Wood: Self-prime using 2 coats of Solo
or
1 coat Premium Wall and Wood Primer
2 coats Solo

Interior and Exterior

Aluminum, Galvanized & Steel:(if needed)
1 coat All Surface Enamel Latex Primer
2 coats Solo

Block:
1 coat ConFlex Block Filler
2 coats Solo

Masonry, Cement, Stucco:
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Exterior

Wood, Composition Board:
1 coat Exterior Oil-Based Wood Primer
or
1 coat Exterior Latex Wood Primer
2 coats Solo

Plywood:
1 coat Exterior Latex Wood Primer
2 coats Solo

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

continued on back

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

APPLICATION

Apply at temperatures above 50°F.
No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 3/8 to 3/4 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

Priming and application of two coats at the recommended film thickness can help where hiding of a previous coating or application to new drywall is a factor.

Using the same method of application and batch to touch up with as that originally used will help improve touch up.

When original application was by spray, preconditioning of touch up paint by running it through the spray tip will help touch up appearance.

SPECIFICATIONS

Block:
1 coat ConFlex Block Filler*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Drywall:
1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats ProMar 200 Zero V.O.C. Interior Latex

Masonry:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Plaster:
1 coat Loxon Concrete & Masonry Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

Wood:
1 coat Premium Wall & Wood Primer*
2 coats ProMar 200 Zero V.O.C. Interior Latex

*These primers contain less than 50 grams per litre V.O.C.

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

ProMar® 200 Zero V.O.C.
Interior Latex Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall:

Fill cracks and holes with patching paste/ spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Plaster:

Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

Wood:

Sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth.

CAUTIONS

For interior use only.
Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

ProMar® 200
Zero V.O.C. Interior Latex Primer

B28W02600 White

CHARACTERISTICS

ProMar 200 Zero V.O.C. Interior Latex Primer is a professional quality, interior vinyl acrylic primer.

This primer has been designed for use with the **ProMar Series Interior Latex topcoats** providing a complete system.

For use on these interior surfaces:

- Wood
- Drywall
- Plaster
- Masonry
- Primed Metal
- Previously painted surfaces

Color: White

For best topcoat color development, use the recommended "P"-shade primer. Check color before use.

Coverage: 400 sq.ft.per gallon @ 4.0 mils wet; 1.0 mils dry

Drying and recoat times are temperature, humidity, and film thickness dependent

Drying Time, @ 77°F, 50% RH:

Touch: 1 hour
Recoat: 4 hour

Finish: 0-5 units @85°

Tinting: Requires ColorCast Ecotoner for tinting.

For best topcoat color development, use the recommended "P"-shade primer. If desired, up to 4 oz per gallon of ColorCast Ecotoner can be used to approximate the topcoat color. Check color before use.

White B28W02600

V.O.C. (less exempt solvents):
less than 50 grams per litre; .42 lbs. per gallon
As per 40 CFR 59.406

APPLICATION

No reduction necessary.

Apply at temperatures above 50°F.

Brush:
Use a nylon-polyester brush

Roller:
Use a nap synthetic cover,

For specific brushes and rollers, please refer to our Brush and Roller Guide on sherwin-williams.com

Spray—Airless:

Pressure	2000 p.s.i.
Tip	.017-.021 inch

APPLICATION TIPS

When spot priming on some surfaces, a non-uniform appearance of the final coat may result, due to differences in holdout between primed and unprimed areas. To avoid this, prime the entire surface rather than spot priming.

For optimal performance, this primer must be topcoated with a latex, alkyd-oil, water based epoxy, or solvent based epoxy coating on architectural applications.

SPECIFICATIONS

Drywall:

1 coat ProMar 200 Zero V.O.C. Latex Primer
2 coats Of appropriate finishes

Previously Painted:

1 coat ProMar 200 Zero V.O.C. Latex Primer
1-2 coats Of appropriate finishes

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer-sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Caulking - Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Drywall - Fill cracks and nail holes with patching paste-spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement, Block - All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Plaster - Bare plaster must be cured and hard. Textured, soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with clear water and allow to dry.

SURFACE PREPARATION

Mildew - Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

CAUTIONS

For interior use only.

Protect from freezing.

Non-photochemically reactive.

Not for use under wallpaper.

Before using, carefully read **CAUTIONS on label**

CRYSTALLINE SILICA: Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Adequate ventilation required when sanding or abrading the dried film. If adequate ventilation cannot be provided wear an approved particulate respirator (**NIOSH** approved). Follow respirator manufacturer's directions for respirator use. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG TERM OVEREXPOSURE.** Abrading or sanding of the dry film may release crystalline silica which has been shown to cause lung damage and cancer under long term exposure. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

All Surface Enamel

Interior-Exterior Latex Primer

A41W01210 White

CHARACTERISTICS

All Surface Enamel Primer is designed for use on interior and exterior, Iron and Steel, Aluminum, Galvanizing. This high quality primer provides corrosion resistant, flash rust resistance and is fast drying.

This quality coating system provides excellent resistance to weather and sunlight. The exceptional durability allows it to be used on doors, trim, and windows.

Color: White

Coverage: 350-400 sq .ft. per gallon @ 4 mils wet; 1.5 mils dry

Drying Time, @ 77°F, 50% RH:

Touch: 1 Hour
Recoat: 4 Hours
Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: Flat

Tinting with CCE:

Base	oz. per gallon	Strength
White	0-2	SherColor

Primer White A41W01210
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 38 ± 2%
Weight Solids: 51 ± 2%
Weight per Gallon: 10.35 lbs
Flash Point: N.A.
Vehicle Type: Acrylic
Shelf Life: 36 months unopened

COMPLIANCE

As of 03/09/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	No
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	No
MIR-Product Lens Certified	No
MPI®	No

APPLICATION

Apply at temperatures above 50°F, No reduction needed.

Brush:

Use a nylon-polyester

Roller:

Use a 3/8 inch woven cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide.

Spray—Airless

Pressure 2000 p.s.i.
Tip (fine finish) .015-.019 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

SPECIFICATIONS

Aluminum

1 coat All Surface Enamel Latex Primer
2 coats All Surface Latex Enamel

Galvanized Steel

1 coat All Surface Enamel Latex Primer
2 coats All Surface Latex Enamel

Iron and Steel

1 coat All Surface Enamel Latex Primer
2 coats All Surface Latex Enamel

Other acceptable topcoats include architectural water based acrylic coatings

All Surface Enamel

Interior-Exterior Latex Primer

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum & Galvanizing: Wash to remove any oil, grease, or other surface contamination using a water based cleaner-degreaser. Remove all corrosion with sandpaper, wire brush or other abrading method. Prime the area the same day as cleaned. Self priming.

Caulking: Exterior gaps between windows, doors, trim, and other through-wall openings; and interior gaps between walls, ceilings, crown moldings, and other trim can be filled with the appropriate caulk after priming the surface.

Iron, Steel: Rust and mill scale must be removed using sandpaper, wire brush or other abrading method. Bare steel must be primed the same day as cleaned.

SURFACE PREPARATION

Mildew: Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach-water solution.

Previously Painted Surfaces: If in sound condition, clean the surface of all foreign material. Smooth, hard or glossy coatings and surfaces should be dulled by abrading the surface. Apply a test area, allowing paint to dry one week before testing adhesion. If adhesion is poor, additional abrasion of the surface and/or removal of the previous coating may be necessary. Retest surface for adhesion. If paint is peeling or badly weathered, clean surface to sound substrate and treat as a new surface as above.

CAUTIONS

Protect from freezing.

Not for use on roofs, floors, or decks.

Do not use colorants formulated for interior use only on exterior surfaces.

Before using, carefully read CAUTIONS on label.

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

HOTW 03/09/2020 A41W01210 04 38

CLEANUP INFORMATION

Clean spills and spatters immediately with soap and warm water. Clean hands and tools immediately after use with soap and warm water. Flush spray equipment after cleaning with compliant cleanup solvent to prevent rusting of the equipment. Follow manufacturer's safety recommendations when using solvents.

The information and recommendations set forth in this Product Data Sheet are based upon tests conducted by or on behalf of The Sherwin-Williams Company. Such information and recommendations set forth herein are subject to change and pertain to the product offered at the time of publication. Consult your Sherwin-Williams representative or visit www.paintdocs.com to obtain the most current version of the PDS and/or an SDS.

Item Name	Paint - Wood
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Wood Millwork Paint
Manufacturer	Sherwin Williams
Model	Solo 100% Acrylic Interior-Exterior (A76 Series)
Color	SW7005 Pure White
Finish	Semi-gloss
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	Solo 100% Acrylic Interior-Exterior (A76W00051)
Finish	Semi-gloss
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish.
All walls to receive Gloss, Enamel Paint, or Murals to have a Level 5 Gypsum Board Finish.

APPLICATION

Apply at temperatures above 50°F (10°C). No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 1/4 to 1/2 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.015-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

SPECIFICATIONS

Apply 2 topcoats of Solo directly over existing properly prepared, interior or exterior coatings, or new interior bare drywall, plaster (cured with a pH of less than 13), masonry (cured with a pH of less than 13) and non-bleeding wood.

Interior

Drywall: Self-prime using 2 coats of Solo
or
1 coat ProMar 200 Zero V.O.C. Primer
2 coats Solo

Plaster: Self-prime using 2 coats of Solo
or
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Wood: Self-prime using 2 coats of Solo
or
1 coat Premium Wall and Wood Primer
2 coats Solo

Interior and Exterior

Aluminum, Galvanized & Steel:(if needed)
1 coat All Surface Enamel Latex Primer
2 coats Solo

Block:
1 coat ConFlex Block Filler
2 coats Solo

Masonry, Cement, Stucco:
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Exterior

Wood, Composition Board:
1 coat Exterior Oil-Based Wood Primer
or
1 coat Exterior Latex Wood Primer
2 coats Solo

Plywood:
1 coat Exterior Latex Wood Primer
2 coats Solo

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

PRODUCT SHEET - UNDERLAYMENT

QUIET CUSHION

QUIET CUSHION 4MM	size (roll)
	6´-7˝ x 34´-5˝ 6´-7˝ x 68´-10˝

Product Description: PVC underlayment for sound absorption. Sold in half roll or full roll sizes.

Product Features: Provides sound absorption and added cushion for various applications, including:

- Rooms and Corridors in Multi-Level Buildings
- Sport and Fitness Areas
- Spas
- Workstations
- Restaurants and Lounges

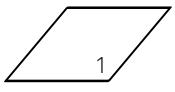
Product Specifications:

- Weight: 0.45 lbs./sq. ft.
- Thickness: 4 mm
- Roll Width: 6´-7˝
- Half Roll Length: 34´-5˝
- Full Roll Length: 68´-10˝
- Sound Reduction: approximately 16dB

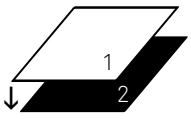
For roll or tile orders exceeding 4,000 sq. ft., Acoustic Backing is available at an additional material cost of $1.50 per sq. ft.

Acoustic Backing is incorporated during the manufacturing process and adhered to the top weave layer of Bolon materials. Quiet Cushion is an additional layer placed underneath Bolon material with standard backing, typically resulting in higher installation costs.

Acoustic Backing vs. Quiet Cushion



1 - Bolon with Acoustic Backing



1 - Bolon with standard backing
2 - Quiet Cushion underlayment

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Stair Nosing
Item Type	Stair Nosing
Description	Stair nosing for use with LVT floor
Manufacturer	Schluter Systems
Model	TREP-SE-S-B
Dimensions	2 1/8" Wide
Color	Black
CSI #	096500 - Resilient Flooring
Omniclass #	22-096500
Quality Standards	ASTM E648 Standard Test Method for Critical Radiant Flux of Floor-Covering Systems Using a Radiant Heat Energy Source; ASTM F2169 Standard Specification for Resilient Stair Treads
Accessibility Compliance	Complies with ASNI A117.1 for visually-contrasting nosing color
Part of an Assembly	N

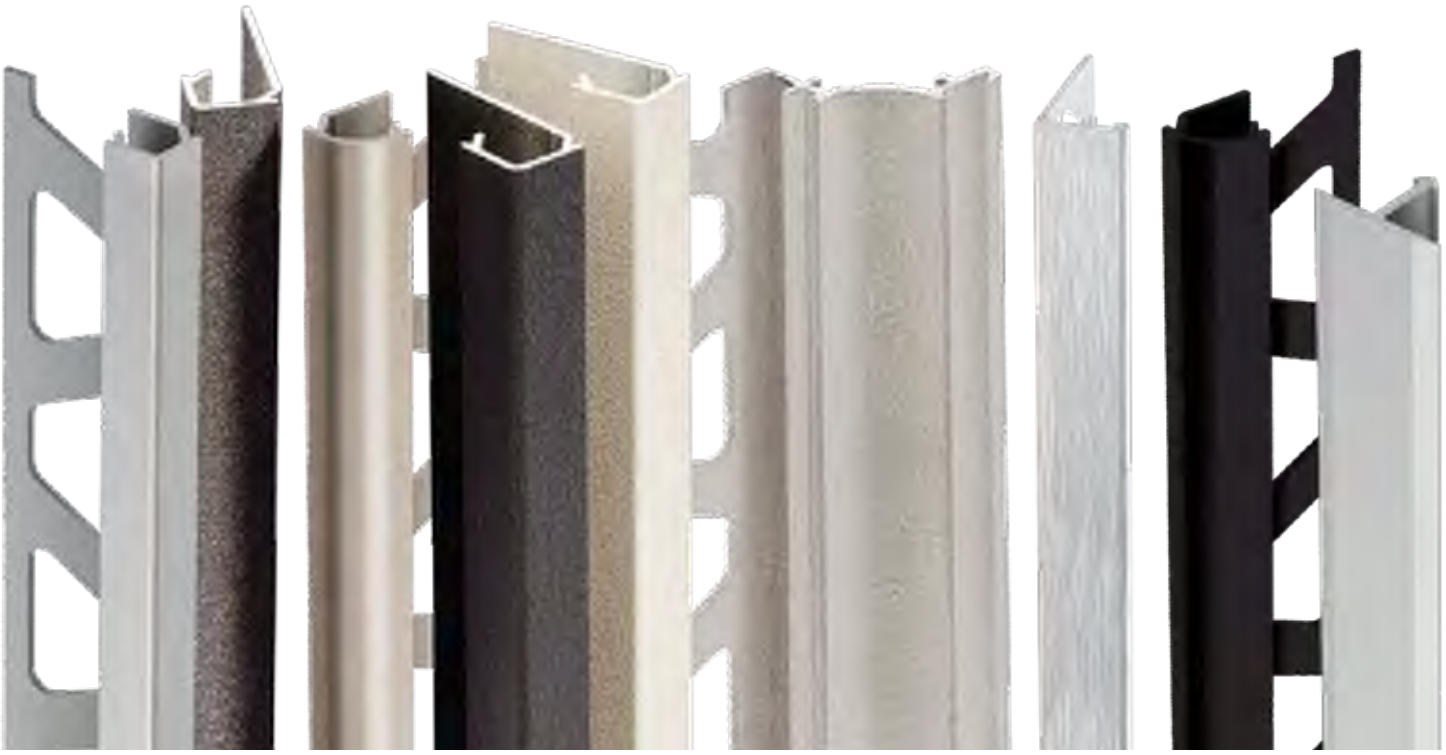
Schluter®-Profiles

Details make the difference

Schluter Systems®

PROFILE OF INNOVATION

Protect.
Define.
Design.



Ensure the integrity of your tile installation and embrace your design options with Schluter finishing and edge-protection profiles.

Protect Tile Edges

Tile edges can be quite brittle, and if left unprotected, the exposed edges will likely crack and chip. Schluter offers a variety of finishing and edge-protection profiles to protect tile edges at outside and inside corners, on walls and floors.

Shapes & Sizes & Colors & Finishes

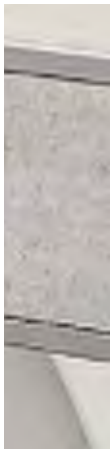
A large selection of finishing and edge-protection profiles available in a vast assortment of materials, finishes, and colors offers you increased flexibility in design. Trim and protect your tile with a finishing profile in classic metals, color-coated or textured color-coated aluminum, or PVC. From sleek to square to round to fine, you're sure to find a shape that suits your style.

No More Caulking

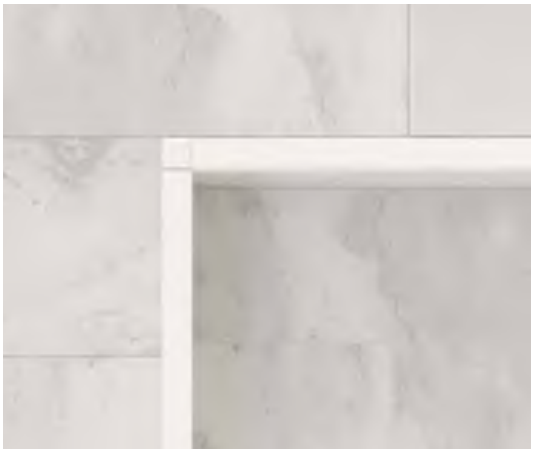
Cove-shaped profiles provide an attractive, clean, and maintenance-free alternative for inside wall corners and floor/wall (including countertop/backsplash) transitions. They're practical, easy to clean, and eliminate the need for caulk!

RF-004-BU

Crisp whites and subtle metallics come together to create a tranquil, modern his and hers space.



RF-004-BU



QUADEC square-shaped profiles taper off the tile edges of the vanity and niche while DILEX-BWA eliminates the need for caulking between the vanity and pony wall.

RF-004-BU

TRENDLINE textured color-coated aluminum finishes, allow you to craft cohesive designs with your tile. Whether you choose to create a complementary or contrasting look, the design possibilities are endless.

RF-004-BU

The QUADEC profile in Cream subtly accentuates the niche, while the DILEX-EKE blends in with the grout and the DECO-SG renders itself nearly invisible as it holds the glass shower wall.

RF-004-BU

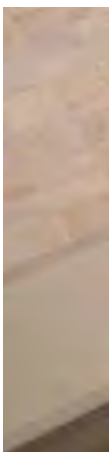
What is more striking than black on white? In this bathroom, the black shower drain blends in with the shower floor while crisp white profiles contour the niche and nestle between the floor and wall.

RF-004-BU

JOLLY offers a discreet and minimalist reveal to elegantly frame the elongated niche. DILEX-EKE eliminates the need for grout and separates the individual tile fields at the floor/wall transition. DECO-SG acts as a support channel for the glass wall.

RF-004-BU

Details make the difference in this quaint bathroom. Tiled walls with matching profiles give the allure of a larger space, while the tileable grate virtually disappears into the shower floor.



QUADEC square-shaped profile and corners used to finish the tile edges on the wall, shower curb and niche. DILEX-EKE PVC corner movement joint profile used to create a seamless transition between the shower walls and floor.

RF-004-BU

Modern and warm greys are complemented by polished chrome accents in this stately bathroom featuring a tiled countertop and curbless shower.

The shower niche and tiled countertop are framed using the QUADEC profile in polished chrome anodized aluminum. DILEX-EKE seals abutting walls in the shower.

RF-004-BU

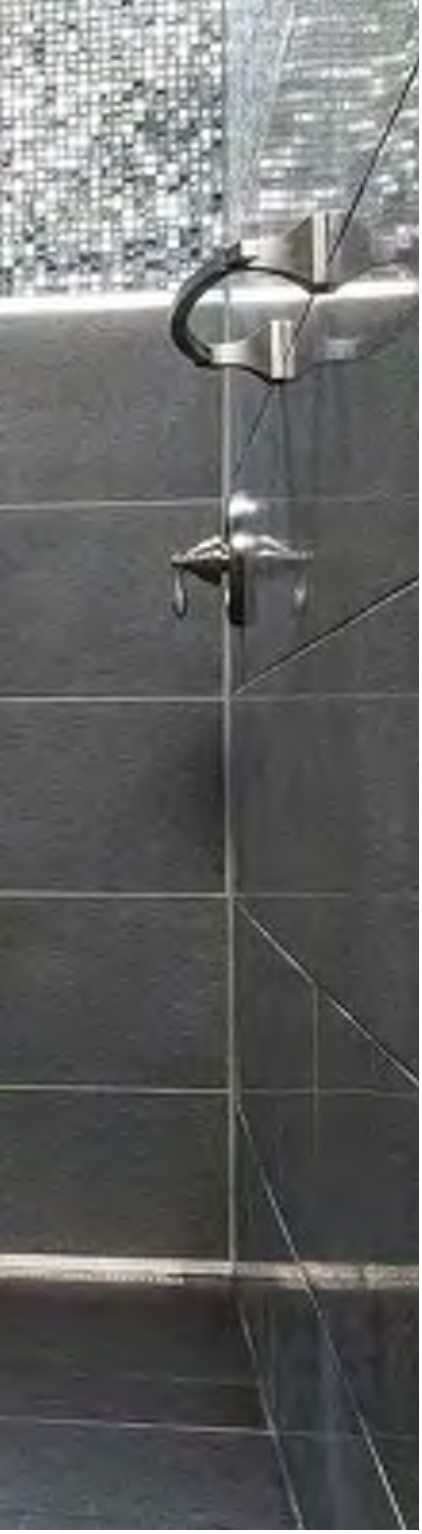
This rustic chic bathroom features a curbless shower with large-format floor tile and matte black fixtures.

RF-004-BU

The clean and modern look of QUADEC profiles in matte white frame the vanity countertop, pony wall, and shower niche. JOLLY protects the outside edges of the shower wall, while DILEX-EKE acts as a transition from floor to wall in the shower.

RF-004-BU

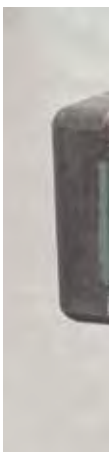
Stainless steel profiles and a sleek linear drain accent the stunning mosaic tile in this contemporary curbless bathroom.



RONDEC bullnose profile and corner piece accessories used to finish the tile edges on the partition wall and shower bench. DESIGNLINE decorative profile applied to the wall. DILEX-EKE PVC corner movement joint profile inserted in the shower corners and along the bench to create a seamless transition. SHOWERPROFILE-S system profile eliminates cutting the wall tile to match the slope of the shower base, and allows for an easy installation of the first course of tile along the top edge of the profile.

RF-004-BU

White and pewter profiles blend with the floor and wall tiles, while a beautiful glass mosaic wall and elegant linear drain complement this modern bathroom.



RF-004-BU

RONDEC bullnose profile and matching corners used to finish the tile edges on the walls, tub surround, shower bench, and to trim the shower niche. RONDEC-CT double-rail edging profile applied to the sink rail. DILEX-AHK cove-shaped profile used to create a smooth transition between the walls and floor. SHOWERPROFILE-S system profile eliminates the need to cut the wall tile to match the slope of the shower base, and allows for an easy installation of the first course of tile along the top edge of the profile.

RF-004-BU

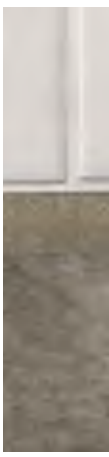
Matte white profiles blend seamlessly into the tile around the window area and between the countertop and backsplash.

RF-004-BU

RONDEC-STEP edges out the tiled countertop while QUADEC frames out the tiled window ledge. DILEX-BWA replaces the need for grout between the countertop and wall tile.

RF-004-BU

Beige profiles blend perfectly with the large-format tiles on the countertop, as well as frame the mosaic insert in the backsplash.

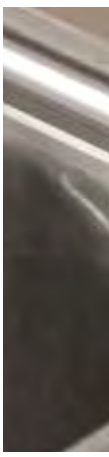


RF-004-BU

RONDEC-CT double-rail edging profile applied to the sink rail. RONDEC bullnose profile used to finish the tile edges of the backsplash, and produce the tiled-under sink. DILEX-AHK cove-shaped profile used to create a smooth transition between the countertop and backsplash. QUADEC-FS double-rail edging profile used to frame the mosaic insert in the backsplash. DILEX-EKE PVC movement joint profile inserted in the backsplash corners for a seamless transition. Matching corners used throughout.

RF-004-BU

The satin anodized aluminum profile on the sink rail creates a bold, sleek finish in this kitchen design.



RONDEC-STEP edging profile applied to the sink rail. RONDEC bullnose profile and large radius sink corners used to produce the tiled-under sink. DILEX-AHK cove-shaped profile used to create a smooth transition between the countertop and backsplash.

RF-004-BU

Subway tiles on the backsplash, porcelain tiles with granite look, and brushed aluminum profiles that match the appliances create this contemporary kitchen.

RF-004-BU

RONDEC bullnose profile and corners used to finish the countertop trim and tile edges of the backsplash. RONDEC was also used to produce the tiled-under sink. RONDEC-CT double-rail edging profile applied to the sink rail. DILEX-AHK cove-shaped profile used to create a smooth transition between the countertop and backsplash.

RF-004-BU

Transitioning from the tile floor to carpet is done effortlessly in this adjoining dining room and living room space, while adding a clean, finishing touch that blends in perfectly with the decor.

RF-004-BU

RENO-TK floor profile used to create a smooth transition between the tile and carpet. RONDEC bullnose profile and matching corners used to finish the edges of the tile base. DILEX-EKE PVC corner movement joint profile used to create a seamless transition between the floor and wall.

RF-004-BU

RENO-V floor profile used to create a smooth transition between the tile and wood.

RF-004-BU

RENO-TK floor profile used to create a smooth transition between the tile and carpet. RONDEC bullnose profile and matching corners used to finish the edges of the tile base. DILEX-EKE PVC corner movement joint profile used to create a seamless transition between the floor and wall.

RF-004-BU

Schluter®
Profiles

Leaving tile edges unfinished not only leads to damage, it also drastically diminishes the aesthetic appeal of the design. Schluter® profiles finish and protect tile edges, helping to ensure your installation will stand the test of time.

10-Foot *(3.05 m)* Profile Options Also Available!

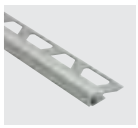
All profiles come in a standard length of 8' 2-1/2" *(2.5 m)*. In addition, many profiles are available in 10' *(3.05 m)* lengths to accommodate elevated ceiling heights and longer spans.

Look for the 3 symbol in our product tables on pages 38-39 to find available models and colors.

✓ **Longer spans** ✓ **Fewer joints** ✓ **Less waste**

Tile Edges and Outside Wall Corners

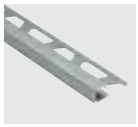
Profiles for tiled edges and outside wall corners finish and protect exposed edges of tiled surfaces such as walls and countertops.



Schluter®-RONDEC

Bullnose profile creating a soft finish to a tiled edge or outside corner installation.

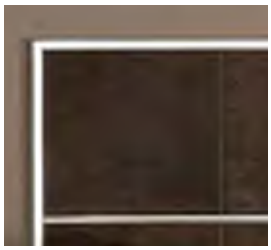
Accessories include: inside and outside corner pieces, sink corner pieces, end caps, and connectors.



Schluter®-QUADEC

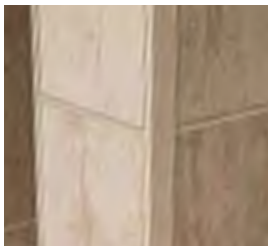
Square-shaped profile creating a sleek look.

Accessories include: inside and outside corner pieces, end caps, and connectors.



Schluter®-JOLLY

Straight-edge profile for the outside corners of tiled surfaces on walls. Ideal for creating decorative transitions on walls.

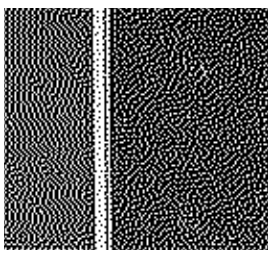


Schluter®-FINEC

Slim reveal profile to finish external tile edges with a discreet, minimalist design. Ideal for protecting mitered edges.

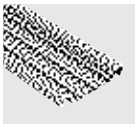
Schluter®-DECO-DE

Stainless steel profile for 135° outside corners of tiled surfaces.



Decorative Profiles

Decorative strip profiles are used to create design accents and interesting contrasts in the tile field. They can be used to frame a mosaic insert, create a break between two different tiles, or as a decorative accent to break up a large tile field.



Schluter®-QUADEC-FS

Double-rail feature strip profile with square edges matching QUADEC. Features a recessed section for field or accent tile inserts.

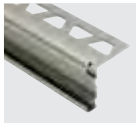
Accessories include: inside and outside corner pieces.

Schluter®-DESIGNLINE

Border profile used to create decorative designs in tile fields on walls or floors.

Countertops

Profiles for countertops finish and protect exposed edges of tiled surfaces. The various finishes available offer endless design possibilities.



Schluter®-RONDEC-CT

Double-rail profile with symmetrically rounded edges matching RONDEC. Features a recessed section for field or accent tile inserts.

Accessories include: inside and outside corner pieces.

Schluter®-RONDEC-STEP

RONDEC-STEP features a symmetrically rounded edge and is available in various finishes of anodized aluminum.

Accessories include: 90° and 135° inside and outside corners.

Schluter®-SCHIENE-STEP

Designed to cover the sub-assembly. SCHIENE-STEP is offered in brushed stainless steel and features a thin, straight edge.

Accessories include: inside and outside corner pieces and connectors.

For a complete list of Schluter® profiles please visit www.schluter.com

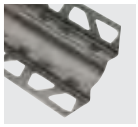
Inside Wall Corners

Cove-shaped profiles eliminate the need for caulking, are easy-to-clean and do not trap debris or moisture, making them suitable for use in areas with strict hygienic requirements such as showers and kitchen countertops.

Schluter®-DILEX-AHK

Anodized aluminum profile for applications where limited movement is expected.

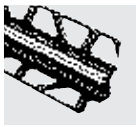
Accessories include: inside and outside corner pieces, end caps, and connectors.



Schluter®-DILEX-EHK

Stainless steel profile for for applications where limited movement is expected.

Accessories include: inside and outside corner pieces, end caps, and connectors.



Schluter®-DILEX-EKE

PVC movement joint profile forming a discreet, uniform joint. Available in various colors to match grout.

Perimeter Joints

A perimeter joint is designed to allow movement and reduce stress in large, tiled areas. These types of profiles also eliminate the need for caulking to create a sleek, permanent movement zone that isolates the tile covering from fixed building elements, such as bathtubs and shower trays. Profiles are available in an assortment of colors and finishes to match the grout.

Schluter®-DILEX-BWA

PVC perimeter joint profile that isolates the tile covering from fixed building elements. Available in various colors to match grout.

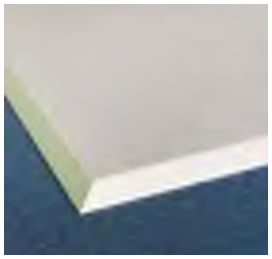
For a complete list of Schluter® profiles please visit www.schluter.com

Floor Transitions

Transitions from a tiled floor to other surfaces need to be protected, and floor profiles are designed to ensure a smooth transition, while preventing tile edges from chipping and cracking.

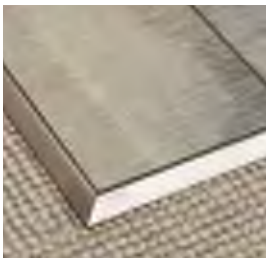
Schluter®-RENO-U

Designed to protect tile edges and provide a smooth transition between tile coverings and floor coverings at lower elevations by abutting both surfaces.



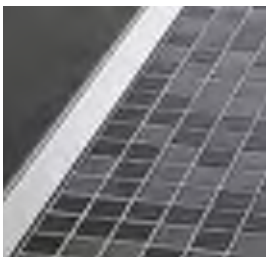
Schluter®-RENO-TK

Designed to protect tile edges and provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet.



Schluter®-RENO-V

Designed to protect tile edges and provide a smooth transition between tile coverings and floor coverings at lower elevations.



Schluter®-RENO-T

Designed to provide transitions between existing, same-height, hard surface floor coverings.

Schluter®-SCHIENE

Designed to protect tile edges that are typically bordered by carpet, at expansion joints, or as decorative edging for stairs.

For a complete list of Schluter® profiles please visit www.schluter.com

Item Name	Resilient Vinyl Flooring
Item Type	Resilient Vinyl Plank Flooring
Description	Luxury Vinyl Tile Wood Grain Planks
Manufacturer	Interface Americas, Inc.
Model	Textured Woodgrains A004
Dimensions	25CM X 1M X 4.5mm
Color	A00406 Antique Light Oak
Finish	Ceramor
Material Composition	Heavy Performance Luxury Vinyl Tile
CSI #	096500 - Resilient Flooring
Omniclass #	22096500 - Resilient Flooring
Classification	ASTM F1700: Class III printed firm vinyl plank Type B Embossed
Best Practices	Floor Score Certified
Quality Standards	Minimum wear layer thickness of 20 mils (0.020”), having vinyl content of not less than 34 percent, and having uniform disbursement of color throughout the thickness of the tile.
Accessibility Compliance	Coefficient of Friction (ASTM D2047, Slip Resistance)
Accessories	Underlayment: Selitbloc 999162 1.5 mm thick
Warranty	15-year Limited Commercial Wear Warranty
Notes	LVT specified for Stairwell must match the LVT procured for Guestrooms.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

SPECIAL INSTRUCTIONS

Random Ashlar installation, glue down application. Glue underlayment to the slab then glue the LVT to the underlayment. Seam seal between LVT planks in wet areas for added protection. Follow the manufacturer's instructions for more detail for both installation and maintenance. Do not drill through the LVT as this will void the warranty and create a pinch point in the room which will be of concern. interface will provide seaming diagrams and take-offs upon request.

Install underlayment with moisture barrier facing up. Align underlayment to ensure there are no gaps or overlapping seams.

FROM NATURE CHIC – TO CITY SLEEK

With the ONE Quartz Surfaces® assortment, we've brought together the beauty of quartz and modern technology to create new and exciting possibilities. ONE Quartz Surfaces® gives you more design choices for your next project. The low maintenance and durability of ONE Quartz Surfaces® countertops make it perfect for any application, commercial or residential. Functional yet chic, that's what ONE Quartz Surfaces® is all about.

AVAILABLE IN:

Within these unique series, you'll have more selection than ever before.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Wilsonart International, Inc.
Model	Q4007
Dimensions	3/4" Thick
Color	Duomo
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Fire/Smoke Rating	ASTM E84 Class 1 (NFPA Class A) FS-25 or less.
Structural Performance	Mohs Hardness Scale: 6 to 6.5. Density: Not less than 2 g/cm3 when tested per ASTM C97.
Thermal Performance	Thermal shock: Pass 5 cycles, tested per ASTM C484.
Best Practices	UL Greenguard certified
Quality Standards	NSF/ANSI 51 Certified. Stain resistance: Passes ANSI Z124.6. Water absorption: Maximum 0.04 percent, tested per ASTM C97. Chemical resistance: Not Affected when tested per ASTM C650.
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	N
Thickness	3/4"
Finish	Polished
Warranty	One (1) year minimum warranty against defects in materials and workmanship. Commercial Lifetime warranty
Notes	Refer to drawings for edge profile. Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2'-0" apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

**Test results vary slightly depending on pattern.*
The information contained in this section is based on technical data which Wilsonart LLC believes to be reliable, and is intended for use by persons having knowledge of this technical area at their own discretion.

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel

Medium (V2)

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty.
Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

APPLICATION NOTES:

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

Fifteen Year Limited Warranty, visit daltile.com for complete warranty details.♦

Twenty Five Year Commercial Limited Warranty, visit daltile.com for complete warranty details.

Lifetime Residential Limited Warranty, visit daltile.com for complete warranty details.*

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Wilsonart International, Inc.
Model	Q1001
Dimensions	3/4" Thick
Color	Serene
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Fire/Smoke Rating	ASTM E84 Class 1 (NFPA Class A) FS-25 or less.
Structural Performance	Mohs Hardness Scale: 6 to 6.5. Density: Not less than 2 g/cm3 when tested per ASTM C97.
Thermal Performance	Thermal shock: Pass 5 cycles, tested per ASTM C484.
Best Practices	UL Greenguard certified
Quality Standards	NSF/ANSI 51 Certified. Stain resistance: Passes ANSI Z124.6. Water absorption: Maximum 0.04 percent, tested per ASTM C97. Chemical resistance: Not Affected when tested per ASTM C650.
Accessibility Compliance	Not Applicable
Water Sense	Not Applicable
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	N
Thickness	3/4"
Finish	Polished
Warranty	One (1) year minimum warranty against defects in materials and workmanship. Commercial Lifetime warranty
Notes	Refer to drawings for edge profile

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Ceiling Tile
Item Type	N/A
Description	Acoustical Ceiling Tile
Manufacturer	USG
Model	Clean Room Class 100 (ISO C5) Acoustical Panels with Climaplus Performance, Item No. #3260
Dimensions	2'-0" x 2'-0" x 5/8" Panels, Unperforated
Color	White
Finish	Smooth-textured panel with an embossed, vinyl-laminated face.
Material Composition	Wet formed mineral fiber.
CSI #	095123 - Acoustical Ceilings
Fire/Smoke Rating	ASTM E-1264 Classification (Class 100: Type X, Pattern GI), ASTM E-84, Class A
Acoustical Performance	0-0.55 NRC, 35 CAC
Thermal Performance	Resistance: R-1.6
Best Practices	USDA Certified Biobased Product, 55% Recycled Content
Content	Wet formed mineral fiber.
Suspension	USG Donn Brand Suspension System
Product	Clean Room Class 100 (ISO C5) Acoustical Panels with Climaplus Performance, Item No. #56099.
Edge	Square
Finish	Smooth-textured panel with an emboossed, vinyl-laminated face.
Warranty	30 Year Limited Warranty. USG Donn Brand Suspension System and USG panels and tile with Climaplus performance, when used together, to be free from defects in materials and workmanship at time of manufacture.

Maintenance
Can be cleaned easily with a damp sponge, mild detergent and water. Do not use acetate, ammonia, or highly concentrated chlorine, bromide or other harsh chemicals.

Metric sizes available
Contact sales for minimum quantities and lead times.

Notes
1. For details, see LEED report tool at usgdesignstudio.com or cgcdesignstudio.com.
2. Fire-rated items: see UL design details.
3. LR values are shown as averages.
4. NRC rating for USG Clean Room™ ClimaPlus™ Class 100 panels is 0.10. USG does not consider a ceiling panel to be acoustically rated if NRC is less than 0.50.
5. Field-cut edges of USG Clean Room™ panels may be sealed with white latex paint.
6. Clean Room-rated applications require a suspension system with gasketed tee flanges such as USG Donn® Brand CE.™
7. Not intended for kitchen/food prep applications. Use unperforated product (Class 100)—item numbers 56099 and 56091.
8. This product has achieved both BioPreferred initiatives: Federal Procurement Preference and Certified Product Labeling. See the complete listing of all USG ceiling panels on biopreferred.gov website.

New Movement to Minimalism

As popular as the contemporary tone-on-tone look of cement may be, it's even more appealing with the added depth and richness of the Portfolio™ series. An impressive palette of neutral hues creates calm monochromatic effects. The colors and sizes easily combine for customized results. Manufactured in the USA and offered in 24 x 24, 12 x 24, and 6 x 24 – Portfolio is an incredibly resourceful choice that's bound to be a favorite in any commercial space.

- MODULAR MINIMALISM
  - Tone-on-tone concrete look supports any style, giving designers added flexibility to create lasting looks
  - Broad color offering of 11 different options across a warm and cool palette
  - Three popular sizes, including a 6 x 24 rectangle, allow for a modular approach to floor and wall designs
  - Coordinating 2 x 2 mosaics and linear decorative mosaics
- TECHNICAL SUPPORT
  - ColorBody™ tile with rectified edges for near seamless designs
  - A modern European look and feel manufactured in the USA

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	✓
Wet & Level – Interior Floor	≥ 0.42	✓
Shower Floors (Residential or Light Commercial)	≥ 0.42	✓*
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	✓*

A DCOF value of ≥0.42 is the standard for tiles specified for level interior spaces expected to be walked upon when wet, as stated in ANSI A137.1-A326.3. For more information about DCOF and the DCOF AcuTest™, visit daltile.com/DCOF.

APPLICATION NOTES:

Suitable for exterior applications in freezing and non-freezing climates, when proper installation methods are followed.

2 x 2 mosaic suitable for exterior applications in non-freezing climates, when proper installation methods are followed.

* 2 x 2 mosaic tile only

PERFORMANCE CHARACTERISTICS

	ASTM#	Floor/Linear Mosaic Result	2 x 2 Mosaic Result
Water Absorption	C373	< 0.5%	< 3.0%
Breaking Strength	C648	> 275 lbs	> 250 lbs
Scratch Hardness	MOHS	8.0	8.0
Chemical Resistance	C650	Resistant	Resistant

For additional information on test results, visit us at: daltile.com/information/TestResults.

TRIM

	Type	Number	Size	Pieces/ Carton
	Bullnose	P-43C9	3 x 12	30
	Cove Base	P-36C9TB	6 x 12	22
	Cove Base Outcorner	PC-36C9TB	1 x 6	15

Cove base trim is intended to coordinate with floor tile in the standard 90-degree installation position.

Cove base and cove corner trim are suitable for non-freezing climates only.

INSTALLATION

Grout Joint Recommendation	Shade Variation
Floor: 1/8" (3/16" when multiple sizes are installed in a modular pattern, and/or when installing tile with a length 15" or greater in a staggered brick-joint pattern; overlap should not exceed 33%.) **Mosaic:** 1/8"	Random (V2)

DURABILITY

Floor Surface Wear Resistance

1	Residential Bathrooms	3	All Residential / Light Commercial
2	All Residential Areas	4	All Residential / Commercial

NOTES

Since there are variations in all fired ceramic and natural products, tile and trim supplied for your particular installation may not match samples. Final confirmation should be made from actual tiles and trim prior to installation. Manufactured in accordance with ANSI A137.1 standards.

Not for use on ramps. Water, oil, grease, improper drainage and certain footwear can create slippery conditions. Floor applications expected to be exposed to these conditions require extra caution in product selection.

For additional information refer to "Factors to Consider" at: daltile.com/Factors.

Special consideration needs to be given when installing tiles greater than 15 inches. Please refer to daltile.com/LargeTiles for more information.

Special care should be taken when grouting with dark pigmented colors. A grout release is recommended to prevent finely powdered pigments from lodging in the pores of the surface. Use of a latex modified thin-set is recommended for installation.

Item Name	Tile Floor
Item Type	Porcelain Floor Tile
Description	Porcelain Plank Floor Tile, Herringbone Pattern
Manufacturer	Daltile
Model	Saddle Brook
Dimensions	6" x 36" x 5/16" thick
Color	SD13 Oak Trail
Finish	Matte
Material Composition	Porcelain
CSI #	093000 - Tiling
Omniclass #	22-09 30 13 - Tiling
Quality Standards	ANSI A108/A118/A136.1 American National Specifications for the Installation of Ceramic Tile; ANSI A326.3 American National Standard Test Method for VMeasuring Dynamic Coefficient of Friction of Hard Surface Flooring Materials; ASTM C373 Standard Test Methods for Determination of Water Absorption and Associated Properties for Pressed Ceramic Tiles and Boil Method for Extruded Ceramic Tiles; TCNA Handbook for Ceramic, Glass, and Stone Tile Installation
Accessibility Compliance	All Horizontal Surfaces: COF 0.42 when wet (ANSI A326.3)
Part of an Assembly	N
Recommended Grout	Refer to Design Guideline Drawings for Grout mark number.
Coefficient of Friction	Greater than or equal to 0.42 Wet (Natural)
Finish	Matte
Product/Color	Saddle Brook SD13 Oak Trail
Lead Time	5-7 Days
Notes	Refer to Design Guideline Drawings for Installation Method.

SADDLE BROOK™

GLAZED PORCELAIN with REVEAL IMAGING®

daltile®

IMAGINE WHAT'S POSSIBLE

Above and cover photos feature Saddle Brook™ Farmhouse 6 x 36 on the floor.

The Beautiful Look of Hardwood without Compromise

Let the warmth and timeless look of hardwood flow through the entire home with Saddle Brook glazed porcelain tile. An authentic hardwood visual is combined with four natural wood tones to give a realistic look on a durable, scratch-resistant surface.

- AUTHENTIC APPEAL
  - Timeless design and a warm color palette are combined for an authentic look
  - Reveal Imaging® technology creates an incredibly authentic visual by combining rich color with a wide variation of natural wood patterns
  - Popular plank size with coordinating trim
- RICHNESS OF WOOD WITHOUT THE WORRY
  - High moisture resistance, which is ideal to bring a wood look to areas such as bathrooms and kitchens
  - Ease of maintenance and high durability of glazed porcelain

PRE-CONSUMER RECYCLED MATERIALS

GLAZED PORCELAIN with REVEAL IMAGING®

SIZES

		Thickness	Sq. Ft./ Carton	Pieces/ Carton
	6 x 36 Floor Tile (5-7/8" x 35-7/16") (15.00 cm x 90.00 cm)	5/16"	13.05	9

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	✓
Wet & Level – Interior Floor	≥ 0.42	✓
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

A DCOF value of ≥ 0.42 is the standard for tiles specified for level interior spaces expected to be walked upon when wet, as stated in ANSI A137.1-2012, Section 9.6. For more information about DCOF and the DCOF AcuTest™, visit daltile.com/DCOF.

APPLICATION NOTES:

Suitable for exterior applications in freezing and non-freezing climates, when proper installation methods are followed.

TRIM

	Type	Number	Size	Pieces/ Carton
	Bullnose	S-43H9	3 x 18	16

Floor bullnose trim is intended to coordinate with floor tile in the standard 90-degree installation position.

INSTALLATION

Grout Joint Recommendation	Shade Variation
3/16" (Overlap should not exceed 33% when installing tile with a length 15" or greater in a staggered brick-joint pattern.)	High (V3)

PERFORMANCE CHARACTERISTICS

	ASTM#	Result
Water Absorption	C373	< 0.5%
Breaking Strength	C648	> 275 lbs
Scratch Hardness	MOHS	8.0
Chemical Resistance	C650	Resistant
Abrasion Resistance	C1027	3

For additional information on test results, visit us at: daltile.com/information/TestResults.

NOTES

Since there are variations in all fired ceramic and natural products, tile and trim supplied for your particular installation may not match samples. Final confirmation should be made from actual tiles and trim prior to installation. Manufactured in accordance with ANSI A137.1 standards.

Not for use on ramps. Water, oil, grease, improper drainage and certain footwear can create slippery conditions. Floor applications expected to be exposed to these conditions require extra caution in product selection.

For additional information refer to "Factors to Consider" at: daltile.com/Factors.

Special consideration needs to be given when installing tiles greater than 15 inches. Please refer to daltile.com/LargeTiles for more information.

Use of a latex modified thin-set is recommended for installation. For more information, visit daltile.com.

Saddle Brook XT™ with StepWise™ technology is also available for exterior floor applications. For more information, visit daltile.com/SaddleBrookXT.

IMAGINE WHAT'S POSSIBLE™

TW-002-DA

INTRODUCING SURFACES
LIKE YOU'VE NEVER SEEN THEM BEFORE.

Panoramic Porcelain Surfaces™ features porcelain that performs and design that delivers for your walls, floors and countertops. This collection offers breathtaking views, stunning visuals and seamless design with no boundaries.

THE POSSIBILITIES: **LIMITLESS**

With Panoramic Porcelain Surfaces™, you have a unique opportunity to let your imagination run wild.

If you've ever dreamt of using limestone slab in places limestone should never be used, Panoramic can help you make those dreams come true. Or, if you've ever wished you could bathe a room in marble, now you can create that look at a fraction of the cost.

SET THE STAGE FOR LUXURY

ELEMENTAL **SELECTION**

Elevate the ambiance of virtually any space with the sophisticated marble looks within Elemental Selection.

Create drama with striking vein patterns, or infuse tranquility with subtle marbling designs. Large format slabs create fewer grout lines for a more seamless appearance in both glossy and matte finishes. By combining the look of natural stone with the value and ease of porcelain, Elemental Selection reinvents classic décor.

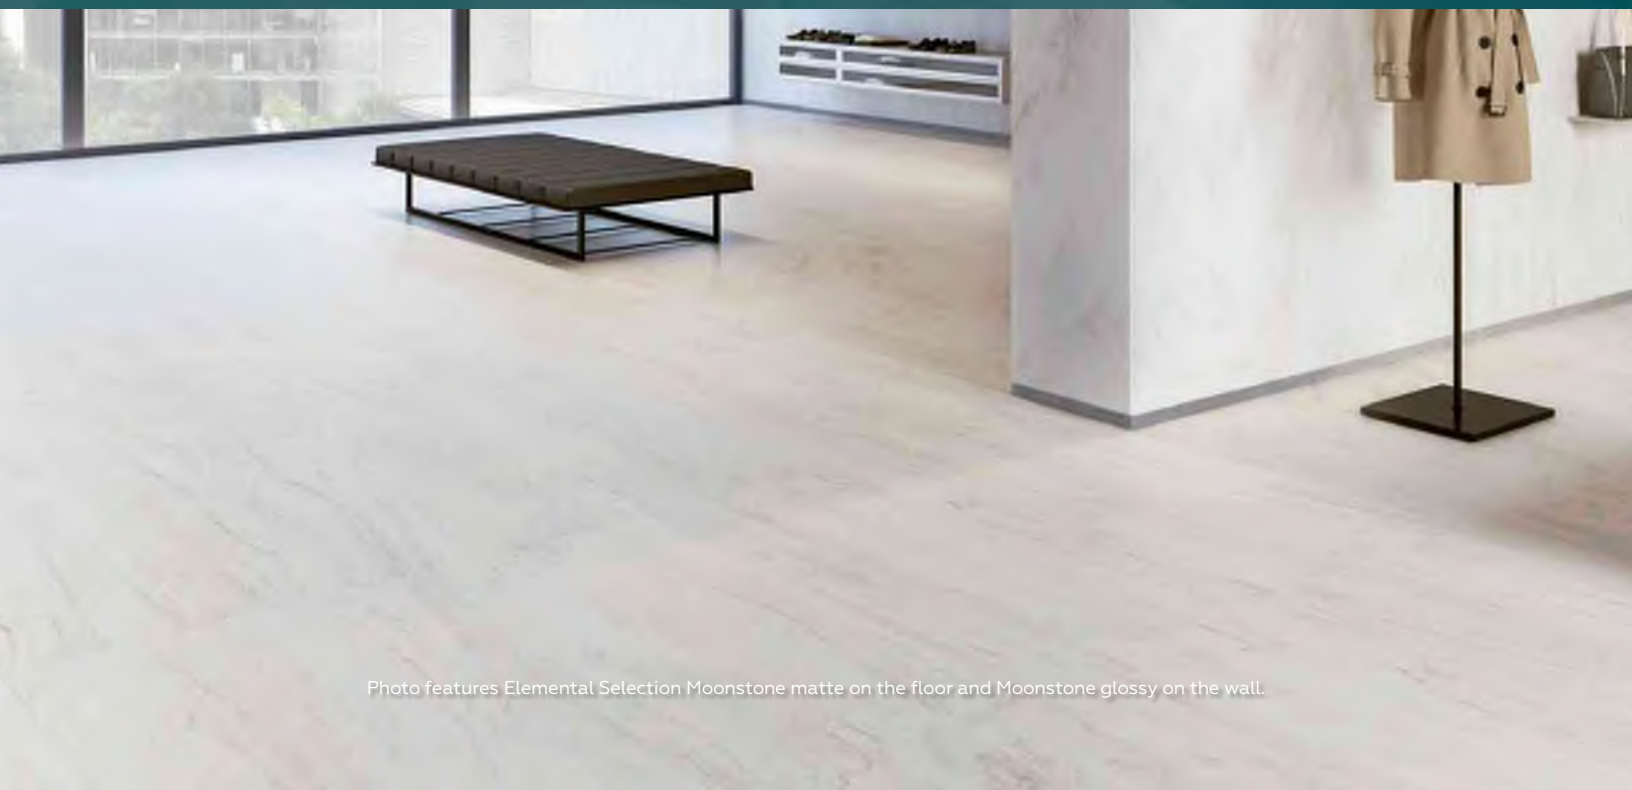

Photo features Elemental Selection Moonstone matte on the floor and Moonstone glossy on the wall.

INDUSTRIAL **SELECTION**

Capture a sense of strength and character with Industrial Selection.

Bring the urban chic feel of a downtown gallery or loft to virtually any space with the look of sleek concrete. Large format slabs provide seamless style to more closely mimic the essence of poured concrete while the smooth, matte finish adds a touch of sophistication. Infuse your space with the robust, stoic presence of concrete while enjoying the versatility of porcelain tile with Industrial Selection.

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	✓
Wet & Level – Interior Floor	≥ 0.42	✓*
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

A DCOF value of ≥ 0.42 is the standard for tiles specified for level interior spaces expected to be walked upon when wet, as stated in ANSI A137.1-2012, Section 9.6. For more information about DCOF and the DCOF AcuTest™, visit daltile.com/DCOF.

APPLICATION NOTES:

Suitable for exterior applications in freezing and non-freezing climates, when proper installation methods are followed.

* Matte finish only.

INSTALLATION

Grout Joint Recommendation	Shade Variation
1/8"	**Medium (V2):** Industrial Selection, Metallic Selection **High (V3):** Elemental Selection

NOTES

Special consideration must be given when installing tiles greater than 15 inches. Please refer to ANSI A108.19 standards for Gauged Porcelain Slabs for more information.

Use of an LFT (Large Format Tile) mortar is required. Thin-set mortars are not suitable for Panoramic Porcelain Surfaces.

Since there are variations in all fired ceramic products, tile and trim supplied for your particular installation may not match these samples. Final color selection should be made from actual panels
and trim and not from product samples or color reproductions.

Water, oil, grease, etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection. Not for use on ramps.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For additional information refer to "Factors to Consider" at daltile.com/Factors.

IMAGINE WHAT'S POSSIBLE™

TW-008-DA

INTRODUCING SURFACES
LIKE YOU'VE NEVER SEEN THEM BEFORE.

Panoramic Porcelain Surfaces™ features porcelain that performs and design that delivers for your walls, floors and countertops. This collection offers breathtaking views, stunning visuals and seamless design with no boundaries.

THE POSSIBILITIES: **LIMITLESS**

With Panoramic Porcelain Surfaces™, you have a unique opportunity to let your imagination run wild.

If you've ever dreamt of using limestone slab in places limestone should never be used, Panoramic can help you make those dreams come true. Or, if you've ever wished you could bathe a room in marble, now you can create that look at a fraction of the cost.

SET THE STAGE FOR LUXURY

ELEMENTAL **SELECTION**

Elevate the ambiance of virtually any space with the sophisticated marble looks within Elemental Selection.

Create drama with striking vein patterns, or infuse tranquility with subtle marbling designs. Large format slabs create fewer grout lines for a more seamless appearance in both glossy and matte finishes. By combining the look of natural stone with the value and ease of porcelain, Elemental Selection reinvents classic décor.

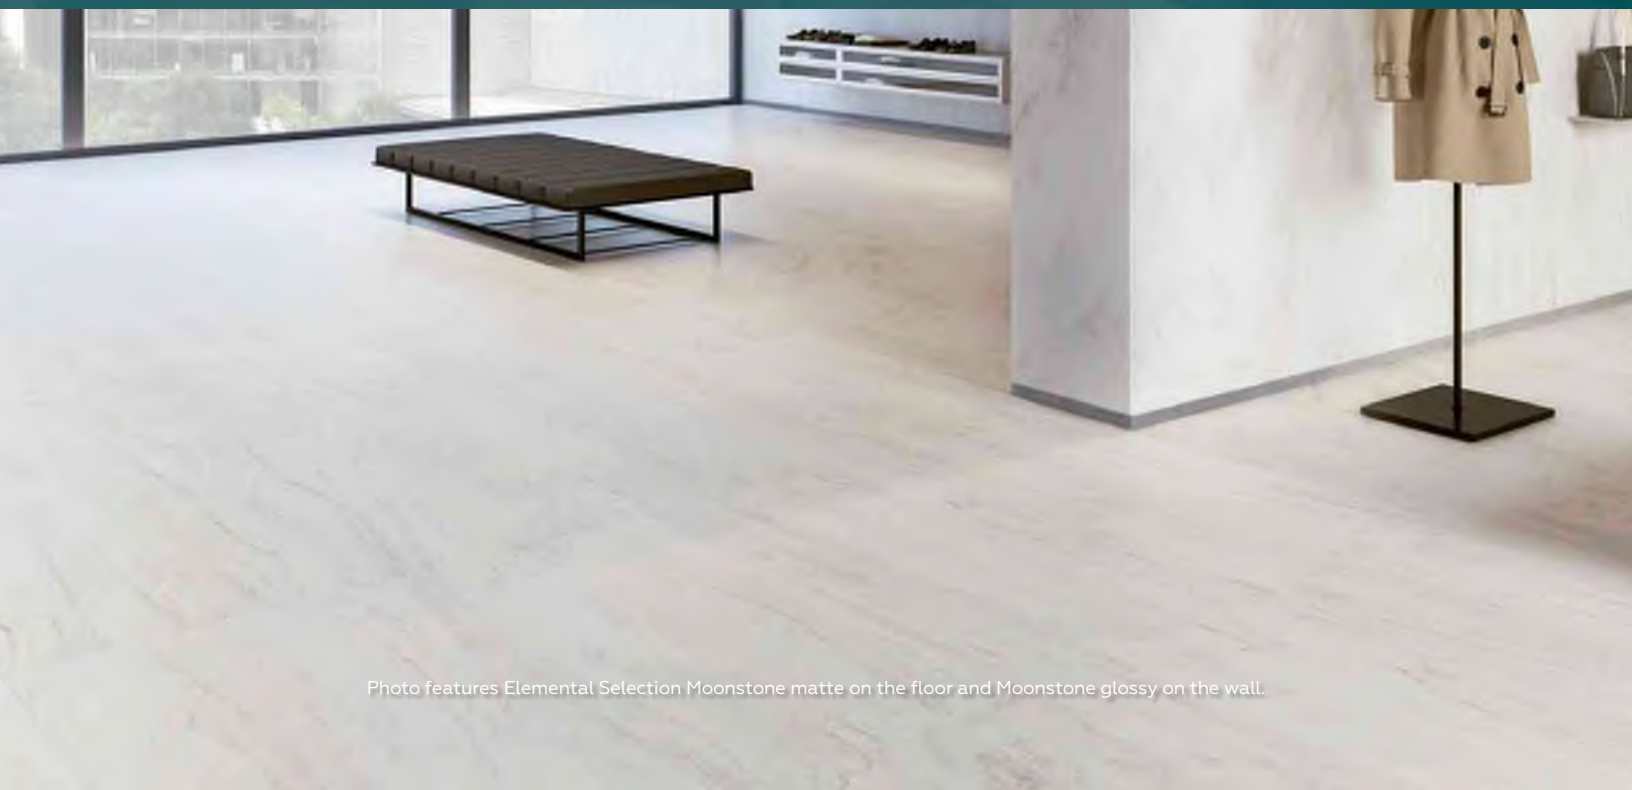

Photo features Elemental Selection Moonstone matte on the floor and Moonstone glossy on the wall.

INDUSTRIAL **SELECTION**

Capture a sense of strength and character with Industrial Selection.

Bring the urban chic feel of a downtown gallery or loft to virtually any space with the look of sleek concrete. Large format slabs provide seamless style to more closely mimic the essence of poured concrete while the smooth, matte finish adds a touch of sophistication. Infuse your space with the robust, stoic presence of concrete while enjoying the versatility of porcelain tile with Industrial Selection.

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	✓
Wet & Level – Interior Floor	≥ 0.42	✓*
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

A DCOF value of ≥ 0.42 is the standard for tiles specified for level interior spaces expected to be walked upon when wet, as stated in ANSI A137.1-2012, Section 9.6. For more information about DCOF and the DCOF AcuTest™, visit daltile.com/DCOF.

APPLICATION NOTES:

Suitable for exterior applications in freezing and non-freezing climates, when proper installation methods are followed.

* Matte finish only.

INSTALLATION

Grout Joint Recommendation	Shade Variation
1/8"	**Medium (V2):** Industrial Selection, Metallic Selection **High (V3):** Elemental Selection

NOTES

Special consideration must be given when installing tiles greater than 15 inches. Please refer to ANSI A108.19 standards for Gauged Porcelain Slabs for more information.

Use of an LFT (Large Format Tile) mortar is required. Thin-set mortars are not suitable for Panoramic Porcelain Surfaces.

Since there are variations in all fired ceramic products, tile and trim supplied for your particular installation may not match these samples. Final color selection should be made from actual panels
and trim and not from product samples or color reproductions.

Water, oil, grease, etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection. Not for use on ramps.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For additional information refer to "Factors to Consider" at daltile.com/Factors.

ceramic technics ltd

TW-009-CT

An innovative project.
A new look at ceramics.

Firenze Surfaces and Forms is a rich and ambitious project that multiplies sensory impressions. Sight and touch listen to a story that is based on colors and surfaces. Elements naturally combine with one another, breaking the boundaries of conventional classifications. Shapes and materials entertain an intimate dialogue that, without much ado, define the style of every space.

Ceramic Technics Ltd

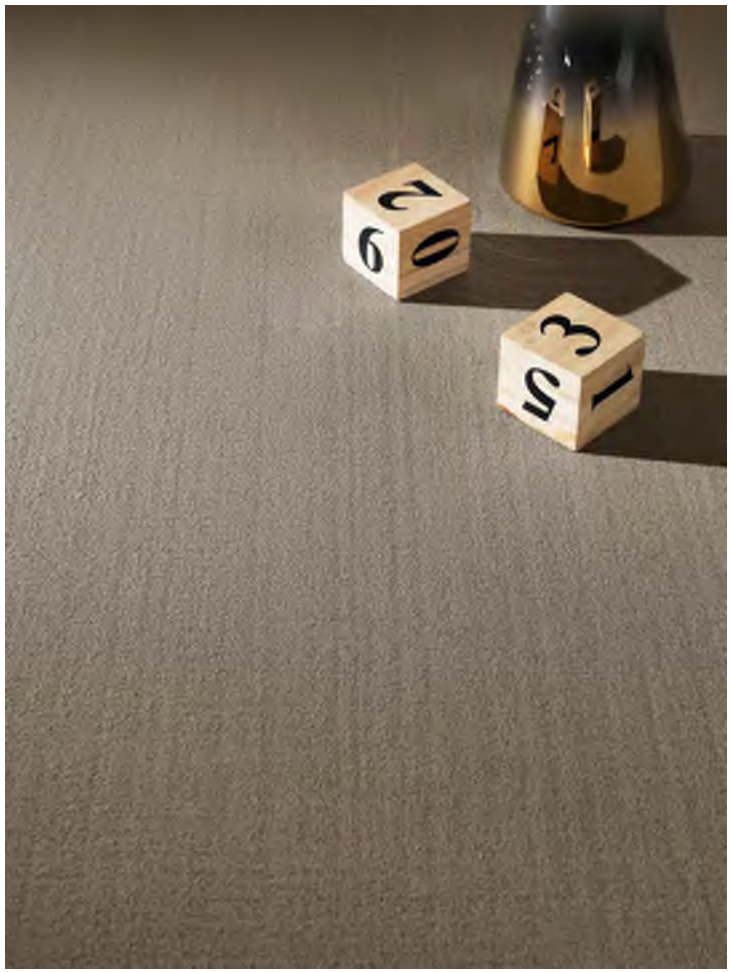
3 SURFACES

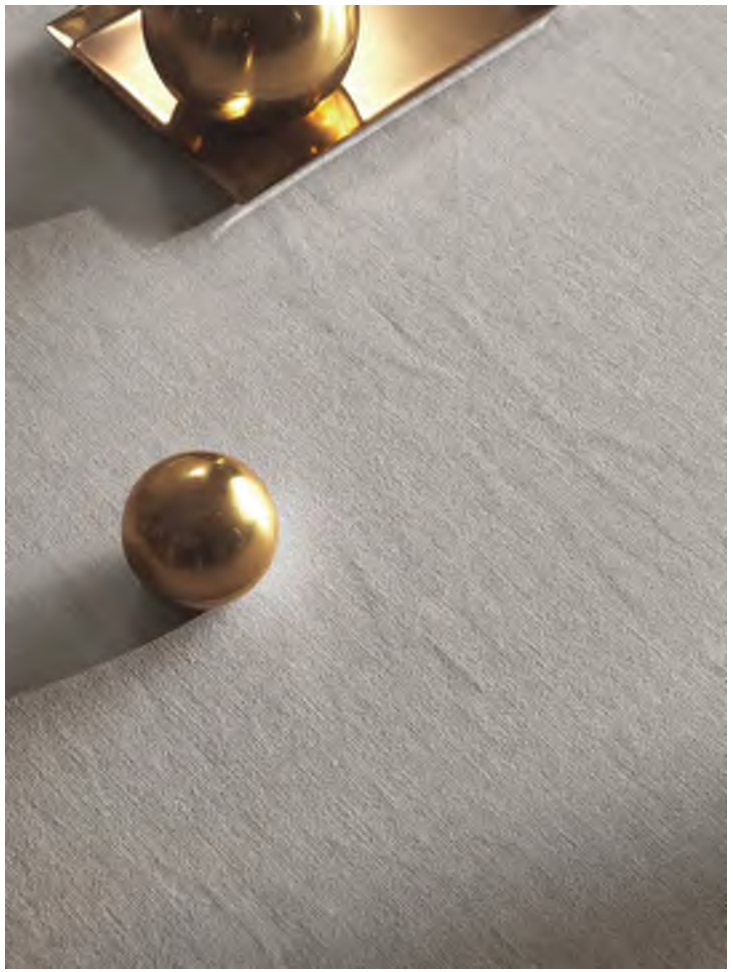
▶ PLASTER

Soft structured surface, with a spatula texture where shiny streaks follow precisely the movement of the spatula. Suitable for elegant and contemporary settings.



▶ MATTER

Provides a grainy, opaque concrete effect, which is rough but easily cleaned. Suitable for outdoor use or post-industrial environments.



▶ CANVAS

Gentle textures combined with delicate graphics. The relief of the linen texture is enhanced by the folds of the canvas in a play of shadows, enhancing its' three-dimensionality. An original effect suitable for environments with a sophisticated and post-modern flavor.

PLASTER

A soft surface that is pleasing to touch.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Wall TIle
Item Type	Porcelain Wall Tile
Description	Porcelain Mosaic Wall Tile
Manufacturer	Daltile
Model	Archer Pattern UM21
Dimensions	12-15/16" x 12-15/16" x 3/8"
Color	Sky Blend
Finish	Matte
Material Composition	Glazed Porcelain
CSI #	093000 - Tiling
Omniclass #	22 - 093000 - Tiling
Part of an Assembly	N
Recommended Grout	Refer to Design Guideline Drawings for Grout mark number.
Coefficient of Friction	N/A
Finish	Matte
Product/Color	UM21 Archer Pattern Sky Blend
Warranty	N/A

Shape Things Up

Create a harmonious vibe with Uniform Mosaics™. This transitional collection, inspired by the natural look of wood & concrete, offers contemporary shapes in an array of color combinations. Uniform Mosaics™ will add visual depth to your designs.

- TAKE SHAPE
  - Choose from modern mosaic shapes such as 3D Cube Mosaic and Archer Mosaic.
  - TruEdge™ rectification technology ensures precise edges and tight grout joints for a seamless and more authentic look
- UNIFORMED DESIGN
  - Mosaic pieces coordinate with linear pieces offered in our Uniform Concrete™ and Uniform Wood™ collections.
  - Suitable for floor and wall/backsplash applications.

SIZES

		Thickness	Sq. Ft./ Carton	Pieces/ Carton
	Archer Mosaic Mesh-mounted (12-15/16" x 12-15/16") (32.87cm x 32.87cm)	3/8"	8.19	7
	3D Cube Mesh-mounted (11-1/2" x 11-1/2") (29.21 cm x 29.21cm)	3/8"	6.20	10

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	✓
Wet & Level – Interior Floor	≥ 0.42	✓
Shower Floors (Residential or Light Commercial)	≥ 0.42	✓*
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

A DCOF value of ≥0.42 is the standard for tiles specified for level interior spaces expected to be walked upon when wet, as stated in ANSI A137.1-A326.3. For more information about DCOF and the DCOF AcuTest™, visit daltile.com/DCOF.

APPLICATION NOTES:

Suitable for exterior applications in freezing and non-freezing climates, when proper installation methods are followed.

* Mosaic tile suitable only when a linear drain system is used and proper installation methods are followed

INSTALLATION

Grout Joint Recommendation	Shade Variation
Mosaic: 1/8"	Medium (V2) (UC10-UC16, UC18-UC19) High (V3) (UM20-UM23)

PERFORMANCE CHARACTERISTICS

	ASTM#	Result
Water Absorption	C373	<0.5%
Breaking Strength	C648	> 275 lbs
Scratch Hardness	MOHS	8.0
Chemical Resistance	C650	Resistant
Abrasion Resistance	C1027	N/A

For additional information on test results, visit us at: daltile.com/information/TestResults.

NOTES

Since there are variations in all fired ceramic and natural products, tile and trim supplied for your particular installation may not match samples. Final confirmation should be made from actual tiles and trim prior to installation. Manufactured in accordance with ANSI A137.1 standards.

Not for use on ramps. Water, oil, grease, improper drainage and certain footwear can create slippery conditions. Floor applications expected to be exposed to these conditions require extra caution in product selection.

For additional information refer to "Factors to Consider" at: daltile.com/Factors.

Special care should be taken when grouting with dark pigmented colors. A grout release is recommended to prevent finely powdered pigments from lodging in the pores of the surface. Use of a latex modified thin-set is recommended for installation.

PROFILE OF INNOVATION

FLOOR PROFILES

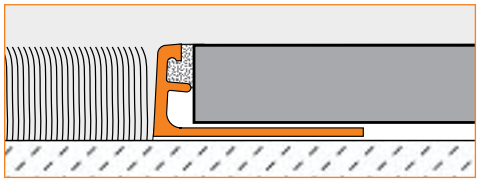
INNOVATIVE SOLUTIONS FOR CERAMIC AND STONE TILE

FINISHING, EDGE PROTECTION, AND TRANSITIONS

Because ceramic and stone tiles are inherently brittle, their exposed edges can chip and crack if left unprotected. Transitions between floor surfaces and at thresholds are particularly vulnerable to damage. Schluter-Systems offers a variety of profiles to provide edge protection and transitioning at thresholds and between adjacent surfaces, resulting in durable, maintenance-free tiled coverings. The profiles can be grouped into two categories: transitions between same-height surfaces and transitions between different-height surfaces

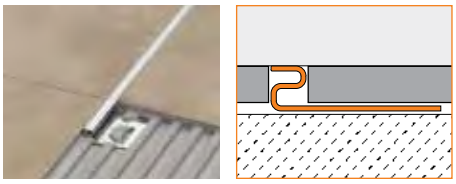
Application and Function

Same-height Transitions

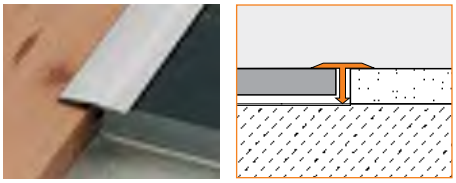


1.1 Schluter®-SCHIENE is designed to provide edging for tile coverings. Typical applications include edge protection where tile is bordered by carpet, at expansion joints, or as a decorative edging for stairs. SCHIENE is available in stainless steel, solid brass, aluminum, and anodized aluminum. The profile features a trapezoid- perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and an 87° sloped vertical wall section that transfers point loads to the substrate and surface covering while protecting tile edges from damage. SCHIENE, in solid brass, aluminum, and anodized aluminum, features a 5° sloped top flange and fillet at the anchoring leg/vertical section interface to enhance edge protection by reducing stresses on the tile, and, in sizes greater than 1/4" *(6 mm)*, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of SCHIENE, in all materials, is available with a special radius perforation "R" so that the profile can be used to form curves.

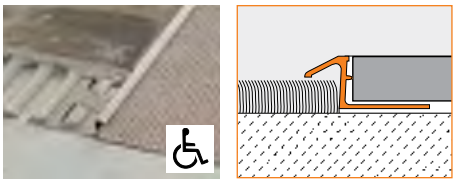
1.1 Schluter®-SCHIENE



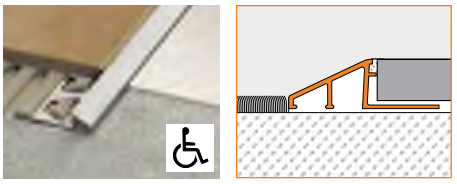
1.6 Schluter®-DECO



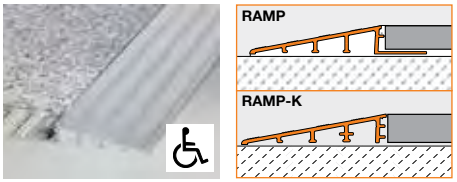
1.3 Schluter®-RENO-T



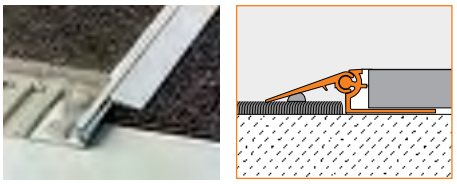
1.4 Schluter®-RENO-TK



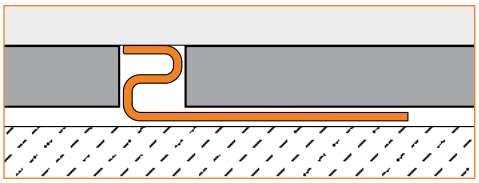
1.2 Schluter®-RENO-U



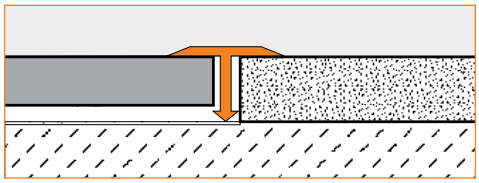
1.8 Schluter®-RENO-RAMP/-K



1.7 Schluter®-RENO-V

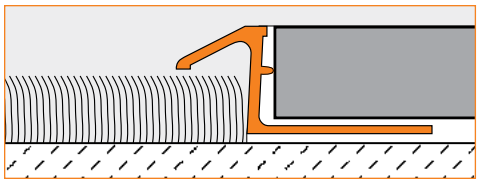


1.6 Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings, such as wood or carpet. The profile is available in stainless steel, solid brass, chrome-plated solid brass, and anodized aluminum. DECO features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a 1/4" *(6 mm)*-wide visible surface that meets the high aesthetic requirements of showrooms, lobbies, galleries, exhibition booths, etc. The anchoring leg of DECO, in solid brass, chrome-plated solid brass, and anodized aluminum, is available with a special radius perforation "R" so that the profile can be used to form curves. DECO in chrome-plated brass requires a relatively large bending radius.

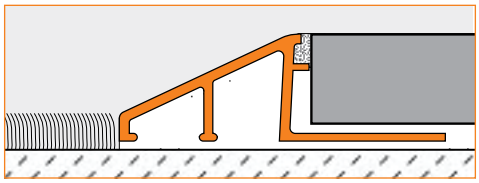


1.3 Schluter®-RENO-T is designed to provide transitions between existing same-height, hard-surface floor coverings (e.g., ceramic tile or natural stone, parquet flooring, concrete pavers, laminate, etc.), primarily in retrofit applications. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-T is installed within the existing joint cavity and overlaps adjoining surface materials, thus preventing edges from becoming damaged when subjected to mechanical stress. RENO-T, in brass and anodized aluminum size 9/14, is flexible in the lateral direction and can be used in curved applications.

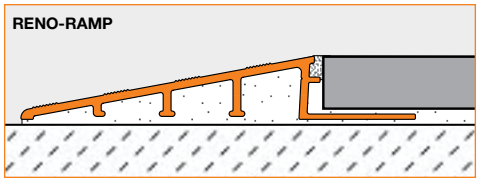
Different-height Transitions

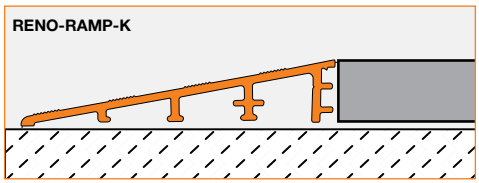


1.4 Schluter®-RENO-TK is designed to provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-TK features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface to eliminate trip hazards and protect tile edges. The 1/4" *(6 mm)* channel beneath the sloped flange of the profile hides and protects the cut edge of lower adjoining surface coverings. All sizes of the RENO-TK are compliant with the Americans with Disabilities Act (ADA). RENO-TK, in anodized aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of RENO-TK, in solid brass and anodized aluminum, sizes 60 to 100, is available with a special radius perforation "R" so that the profile can be used to form curves.

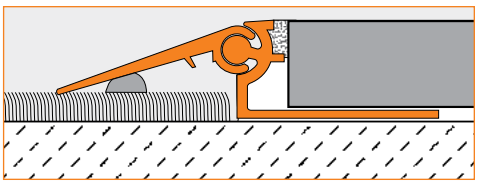


1.2 Schluter®-RENO-U is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-U features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface (approximately 25°) that eliminates trip hazards and protects tile edges. The leading edge of the profile abuts the lower surface covering, typically VCT. RENO-U, in aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. In installations where the leading edge abuts a lower surface covering, all sizes of RENO-U, except the 3/4" *(20 mm)* and 11/16" *(17.5 mm)*, are compliant with the Americans with Disabilities Act (ADA). In installations where the leading edge rests on top of the lower floor covering (e.g., finished concrete), the 3/4" *(20 mm)*, 11/16" *(17.5 mm)*, and 9/16" *(15 mm)* sizes are not ADA-compliant.
Note: When using Schluter® uncoupling membranes with RENO-U profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.





1.8 Schluter®-RENO-RAMP is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete, particularly in commercial applications where wheel carts are used (e.g., bakeries, hospitals, etc.). The profile is available in anodized aluminum. RENO-RAMP features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped transition surface that terminates at the height of the tile edge. The profile protects tile edges and provides a sloped surface to eliminate trip hazards and allow easy access for wheel carts. RENO-RAMP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.
Note: When using Schluter® uncoupling membranes with RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
Schluter®-RENO-RAMP-K is a variant of the profile without an anchoring leg. RENO-RAMP-K is installed adjacent to existing floor coverings, e.g., retrofitting between existing floor coverings and bare concrete without having to disturb the existing flooring. All sizes of RENO-RAMP, except sizes 9/16" *(15 mm)* and 3/4" *(20 mm)*, are compliant with the Americans with Disabilities Act (ADA).



1.7 Schluter®-RENO-V is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations. The profile is available in anodized aluminum. RENO-V features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a movable transition arm that allows the profile to adjust to the height of the adjacent floor covering via a ball-and-socket joint. The profile protects tile edges and provides a sloped surface to eliminate trip hazards. RENO-V features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. RENO-V is also suitable for heavy-duty applications (e.g., entrances to garages or loading docks). In such cases, the adjustable arm is backfilled with mortar.

Material Properties and Areas of Application

Schluter edge-protection and transition profiles are resistant to most chemicals encountered in tiled environments. In special cases, the suitability of a proposed type of profile must be verified based on the anticipated chemical, mechanical, and/or other stresses. Exceptions and special considerations are listed below:

Stainless steel profiles are roll-formed, resulting in a slightly different contour from those made of extruded brass or aluminum. Stainless steel can sustain high mechanical stresses and is particularly well suited for applications requiring resistance against chemicals and acids; for example in the food industry, breweries, dairies, commercial kitchens, and hospitals, as well as in residential applications. Typically, the profiles are formed using stainless steel 304 (1.4301 = V2A). For more severe chemical exposure, such as de-icing salts and chemicals used in swimming pools, we recommend the use of stainless steel 316 L (1.4404 = V4A), which offers even higher corrosion resistance than the 304. Even stainless steel cannot withstand all chemical exposures, such as hydrochloric acid, hydrofluoric acid or certain chlorine, chloride, and brine concentrations.

Chrome-plated solid brass is ideal for matching chrome fixtures. Surfaces must be protected against abrasion or scratching.

Solid brass can sustain high mechanical stresses, as well as most chemicals commonly encountered in tiled environments. Solid brass that is exposed to air will oxidize, resulting in a natural patina. If exposed to moisture or aggressive substances, heavy oxidation and spotting may occur.

Aluminum profiles must be tested to verify their suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline. Since aluminum is sensitive to alkaline substances, exposure to the alkali (depending on the concentration and duration of exposure) may result in corrosion (aluminum hydroxide formation). Therefore, it is important to remove mortar or grout residue from visible surfaces. In addition, ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water.

Anodized aluminum profiles feature an anodized layer that retains a uniform appearance during normal use, but is not color-stable in exterior applications. The surface is susceptible to scratching and wear and may be damaged by grout or setting material. Therefore, these materials must be removed immediately. Otherwise, the description regarding aluminum applies.

Cutting Profiles

Observe all safety instructions and standards as directed by the cutting tool manufacturer, including protective eyewear, hearing protection, and gloves.

Always measure carefully and dry fit the profiles, corners, and connectors to ensure proper fit and alignment prior to setting tile.

Aluminum profiles may be cut using any of the following options:

- **Hacksaw** with a bimetal blade and the highest teeth per inch (TPI) available.
- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Chop saw or Miter Saw** with a non-ferrous blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Stainless steel profiles may be cut using any of the following options:

- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Band Saw** with a metal cutting blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Installation

SCHIENE, JOLLY, DECO, RENO-TK, RENO-U, RENO-RAMP, and RENO-V

1. Select the profile according to tile thickness and format.

   Note: When using Schluter® uncoupling membranes with RENO-U and RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.

   For RENO-U and RENO-RAMP, fill the cavity beneath the sloped section of the profile with thin-set mortar. Follow this step when RENO-V is used in heavy-duty applications, as well.
3. Press the perforated anchoring leg of the profile into the mortar and align.
4. Trowel additional thin-set mortar over the perforated anchoring leg to ensure full coverage and support of the tile edges.
5. Solidly embed the tiles so that the tiled surface is flush with the top of the profile; the profile should not be higher than the tiled surface, but rather up to approx. 1/32" *(1 mm)* lower.
6. Set the tile to the integrated joint spacer, which ensures a uniform joint of 1/16" - 1/8" *(1.5 - 3 mm)*. For DECO and stainless steel profiles, leave a space of approximately 1/16" - 1/8" *(1.5 - 3 mm).*
7. Fill the joint completely with grout or setting material.
8. Remove grout or mortar residue from the visible surface of the profile.

RENO-RAMP-K

1. Fill the cavity beneath the sloped section of the profile with thin-set mortar.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.
3. Press the profile into the mortar and abut to the adjacent floor covering. The profile should not be higher than the adjacent floor covering, but rather up to approx. 1/32" *(1 mm)* lower.
4. Fill the joint completely with grout or setting material.
5. Work with materials and tools that will not scratch or damage sensitive surfaces. Setting materials must be removed immediately.

RENO-T

1. Select the profile according to joint width, to ensure proper support of the lateral crosspiece.
2. The joint cavity must be at least 3/8" *(9 mm)* deep and free of debris. Substances that inhibit adhesion must be removed from the sides of the joint.

3. Fill the joint with elastomeric sealant such as Schluter®-KERDI-FIX or similar. Then insert the vertical leg of RENO-T in the joint so that the lateral crosspiece rests completely on the edges of the surface coverings.
4. Remove any excess sealant with a suitable cleaner.

Maintenance

Schluter edge-protection and transition profiles require no special maintenance or care and are resistant to mold and fungi. Clean profiles periodically using neutral cleaning agents.

Stainless steel surfaces exposed to the environment or aggressive substances should be cleaned periodically using a mild household cleaner. Regular cleaning maintains the neat appearance of stainless steel and reduces the risk of corrosion. All cleaning agents must be free of hydrochloric acid, hydrofluoric acid, and chlorides. Stainless steel surfaces develop a sheen when treated with a chrome-polishing agent.

Oxidation films on exposed **solid brass** or **aluminum** can be removed by using a conventional polishing agent, but will form again.

In the case of **anodized aluminum**, **color-coated aluminum,** and **chrome-plated solid brass**, do not use abrasive cleaning agents.

Schluter® Systems Floor Profiles 5-Year Limited Warranty

LIMITED WARRANTY COVERAGE: Subject to the conditions and limitations as stated in this **Schluter® Systems Floor Profiles 5-Year Limited Warranty** (the "**Limited Warranty**"), Schluter Systems warrants that its Schluter®-SCHIENE, Schluter®-JOLLY, Schluter®-RENO-TK, Schluter®-DECO, Schluter®-RENO-U, Schluter®-RENO-T, Schluter®-RENO-RAMP, Schluter®-RENO-RAMP-K, and Schluter®-RENO-V (collectively, the "**Products**") will be free from manufacturing defects and will perform as described in the Schluter Systems Floor Profiles Technical Data Sheet (collectively, the "**Written Materials**"[1]) for a period of five (5) years from the date of purchase when installed and used in accordance with the terms and conditions of the Written Materials and industry standard guidelines that are not in conflict with the Written Materials in effect at the time of installation.

For the purposes of this Limited Warranty, "**Owner**" is defined as the original end user of the property in which the Products are installed; and "**Tile Assembly**" is defined to include the Products, non-reusable flooring surfaces, and applicable setting and grouting materials.

This Limited Warranty is only applicable to installations in the United States of America and Canada. Schluter Systems is not responsible or liable under any circumstances for determining the suitability of the Products for the Owner's intended purpose. It is the responsibility of the Owner to consult with an experienced and professional installer to ensure the suitability of the Products, subfloor/substrate and all building materials in the installation and that the Written Materials are followed properly.

RESOLUTION: If the Products are installed and used in accordance with the terms and conditions as described hereinabove and such Products are proven defective within the applicable warranty term, the Owner's exclusive remedy and the sole obligation of Schluter Systems, at its election, shall be to (a) reinstall or replace the failed portion of the Tile Assembly or (b) pay an amount not to exceed the original square foot cost of the installation of the Tile Assembly verified to be defective. Due to conditions beyond the control of Schluter Systems (e.g., color and shade availability, discontinuation, normal wear and tear), Schluter Systems cannot guarantee or warrant an exact match to the specific tile, stone, or other flooring materials used in the original installation. In such event, substantially similar materials may be substituted.

EXCLUSIONS FROM COVERAGE: This Limited Warranty excludes and in no event shall Schluter Systems have any liability for any indirect, special, incidental, punitive, exemplary, or consequential damages, including lost profits, arising out of or otherwise connected to the failure of the Products or Tile Assembly, regardless of any strict liability or active or passive negligence of Schluter Systems, and regardless of legal theory, whether in contract, tort, extra-contractual or other. This Limited Warranty further excludes any loss or damage arising out of or otherwise connected to: acts of war, terrorism, fire, explosion, natural disaster, acts of God, any failure to comply with the Written Materials, inadequate subfloor/substrate, improper preparation or other failure of subfloor/substrate, faulty or negligent penetration of the Products or subfloor/substrate, intentional acts of destruction, structural failure, misuse of or failure to maintain the Products, normal wear and tear, scratches, dents, corrosion or discoloration (whether caused by excessive heat, chemical cleaning products, abrasive agents or otherwise), efflorescence and shading which are a natural occurrence with cementitious materials and are not considered a defective condition for the purposes of this Limited Warranty, variations of texture, color or shade from those on product samples, packaging materials or other marketing materials, or other causes unrelated to the Products (e.g. floor covering failure, excess point loading, overvoltage). This Limited Warranty excludes exterior applications and applications utilizing glass tile or other non-approved floor coverings, unless specifically approved in writing on a case by case basis by the Schluter Systems Technical Services Director.

This Limited Warranty is conditioned and will be considered null and void and Schluter Systems will have the right to refuse any claims if: (a) the Products have been improperly stored or installed, or (b) the Products are subject to abusive or abnormal use, lack of maintenance, or used in a manner other than that for which the Products were designed or in any way contrary to the Written Materials.

DISCLAIMER: There are no warranties beyond this expressed warranty as stated herein. To the extent permitted by law, all other warranties, representations or conditions, expressed or implied, are hereby disclaimed and excluded, including but not limited to the implied warranties of **MERCHANTABILITY** or **FITNESS FOR A PARTICULAR PURPOSE** (as limited to such purposes as described in the Written Materials) or arising from a course of dealing, usage of trade or otherwise by law. ANY IMPLIED WARRANTIES ARISING BY OPERATION OF LAW ARE LIMITED IN DURATION TO THE TERM OF THIS LIMITED WARRANTY. NO REPRESENTATION, PROMISE, AFFIRMATION OR STATEMENT BY ANY EMPLOYEE OR AGENT OF SCHLUTER SYSTEMS WILL BE ENFORCEABLE AGAINST SCHLUTER SYSTEMS UNLESS IT IS SPECIFICALLY INCLUDED IN THIS LIMITED WARRANTY OR AUTHORIZED IN WRITING BY THE SCHLUTER SYSTEMS TECHNICAL SERVICES DIRECTOR. This Limited Warranty is given in lieu of any other warranty, whether expressed or implied. The remedies contained herein are the only remedies available for breach of this Limited Warranty. This Limited Warranty extends only to the Owner and is not transferable or assignable unless authorized by written agreement and signed by the Schluter Systems Technical Services Director or otherwise prohibited by specific state or provincial law. This Limited Warranty gives you specific legal rights; some states and provinces do not allow disclaimers or other restrictions of implied warranties; some of the above disclaimers may not apply to you. **No changes or modifications of any terms or conditions of this Limited Warranty are permitted unless duly authorized in writing by the Schluter Systems Technical Services Director.** This Limited Warranty shall supersede and replace any and all prior oral or written warranties, agreements, or other representations made by or on behalf of Schluter Systems relative to the Products or the application of the Products and shall apply to any installation occurring on or after April 8, 2019. If the Products are used in conjunction with other Schluter products, a different Schluter warranty may apply. For the most current information and materials regarding Schluter Systems warranties and programs, please visit https://www.schluter.com/schluter-us/en_US/downloadfiles.

MAKING A CLAIM: To make a claim under this Limited Warranty, the Owner must provide Schluter Systems[2] with written notice within thirty (30) days of any alleged defect in the Products covered by this Limited Warranty, together with date and proof of purchase of such Products and/or all of its components and name and address of all installers and all invoices related to the original installation, failing which this Limited Warranty shall have no legal effect[3]. Schluter Systems reserves the right at its election and as a condition of this Limited Warranty to inspect the alleged failed and/or defective Products.

All U.S. Claims shall be sent to:

Schluter Systems L.P.
Attn: Warranty Claims Dept.
194 Pleasant Ridge Road
Plattsburgh, NY 12901-5841

All Canadian Claims shall be sent to:

Schluter Systems (Canada), Inc.
Attn: Warranty Claims Dept.
21100 chemin Ste-Marie
Ste-Anne-de-Bellevue, QC H9X 3Y8

[1] If there are any conflicting terms between any Written Materials, the most recently updated document shall be deemed to control.

[2] This Limited Warranty is limited to sales of the Products made in and intended for use in the United States and Canada. For the purposes of this Limited Warranty, Schluter Systems L.P. shall offer warranty coverage to Owners located in the United States, and Schluter Systems (Canada) Inc. shall offer warranty coverage to Owners located in Canada.

[3] In the event that Owner fails to provide such required invoices relating to the original installation, Schluter Systems shall pay Owner an amount equal to the average, reasonable costs of a comparable installation. If the parties fail to agree on such amount, such dispute shall promptly, and in the first instance, be submitted: (a) if a U.S. claim, to arbitration in Clinton County, New York, in accordance with the rules of the American Arbitration Association, or (b) if a Canadian claim, in the Province of Quebec, Canada, in accordance with the ADRIC Arbitration Rules. Any outcome of such arbitration proceeding shall be final and binding upon the parties hereto.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Transition Strip
Item Type	Metal Edge Trim
Description	Finishing edge-protection profile, metal tile trim.
Manufacturer	Schluter Systems
Model	Jolly
Color	Stainless Steel 316L
Material Composition	Stainless Steel
CSI #	093000 - Tiling
Omniclass #	22-093013
Part of an Assembly	N
Lead Time	To be verified
Warranty	Warranted to be free from manufacturing defects for a period of 5 years from the date of the purchase order

PROFILE OF INNOVATION

FLOOR PROFILES

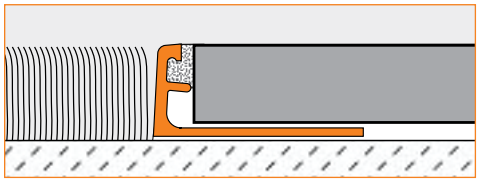
INNOVATIVE SOLUTIONS FOR CERAMIC AND STONE TILE

FINISHING, EDGE PROTECTION, AND TRANSITIONS

Because ceramic and stone tiles are inherently brittle, their exposed edges can chip and crack if left unprotected. Transitions between floor surfaces and at thresholds are particularly vulnerable to damage. Schluter-Systems offers a variety of profiles to provide edge protection and transitioning at thresholds and between adjacent surfaces, resulting in durable, maintenance-free tiled coverings. The profiles can be grouped into two categories: transitions between same-height surfaces and transitions between different-height surfaces

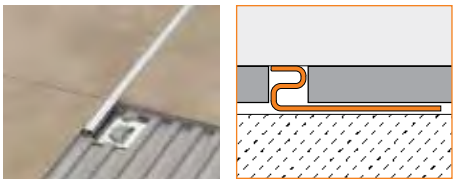
Application and Function

Same-height Transitions

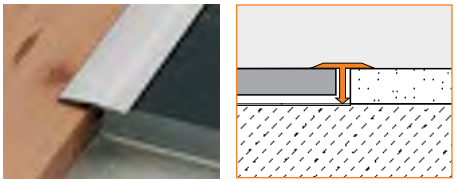


1.1 Schluter®-SCHIENE is designed to provide edging for tile coverings. Typical applications include edge protection where tile is bordered by carpet, at expansion joints, or as a decorative edging for stairs. SCHIENE is available in stainless steel, solid brass, aluminum, and anodized aluminum. The profile features a trapezoid- perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and an 87° sloped vertical wall section that transfers point loads to the substrate and surface covering while protecting tile edges from damage. SCHIENE, in solid brass, aluminum, and anodized aluminum, features a 5° sloped top flange and fillet at the anchoring leg/vertical section interface to enhance edge protection by reducing stresses on the tile, and, in sizes greater than 1/4" *(6 mm)*, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of SCHIENE, in all materials, is available with a special radius perforation "R" so that the profile can be used to form curves.

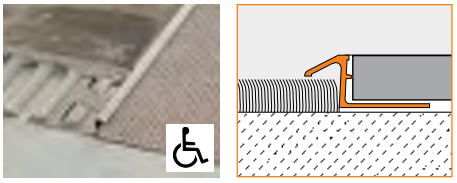
1.1 Schluter®-SCHIENE



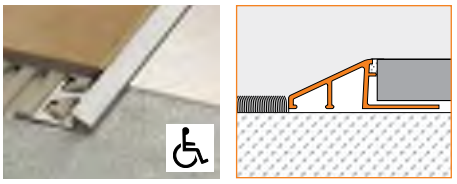
1.6 Schluter®-DECO



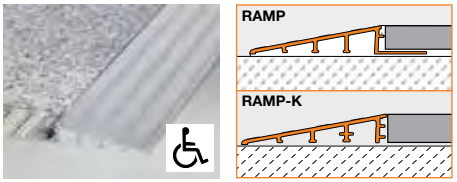
1.3 Schluter®-RENO-T



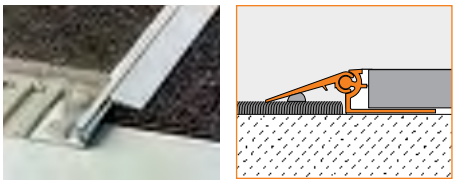
1.4 Schluter®-RENO-TK



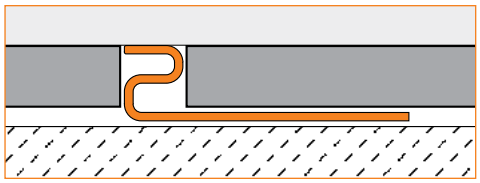
1.2 Schluter®-RENO-U



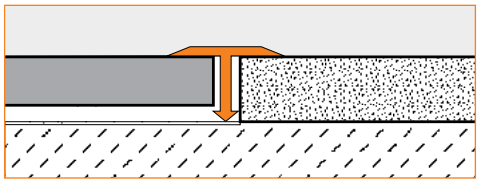
1.8 Schluter®-RENO-RAMP/-K



1.7 Schluter®-RENO-V

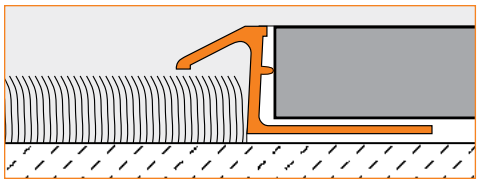


1.6 Schluter®-DECO is designed to provide decorative lines within tile coverings and edge protection at transitions from tile coverings to other same-height surface coverings, such as wood or carpet. The profile is available in stainless steel, solid brass, chrome-plated solid brass, and anodized aluminum. DECO features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a 1/4" *(6 mm)*-wide visible surface that meets the high aesthetic requirements of showrooms, lobbies, galleries, exhibition booths, etc. The anchoring leg of DECO, in solid brass, chrome-plated solid brass, and anodized aluminum, is available with a special radius perforation "R" so that the profile can be used to form curves. DECO in chrome-plated brass requires a relatively large bending radius.

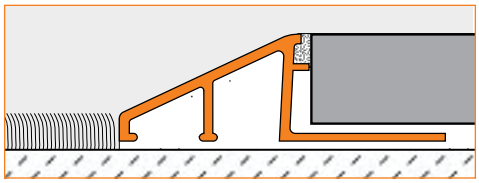


1.3 Schluter®-RENO-T is designed to provide transitions between existing same-height, hard-surface floor coverings (e.g., ceramic tile or natural stone, parquet flooring, concrete pavers, laminate, etc.), primarily in retrofit applications. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-T is installed within the existing joint cavity and overlaps adjoining surface materials, thus preventing edges from becoming damaged when subjected to mechanical stress. RENO-T, in brass and anodized aluminum size 9/14, is flexible in the lateral direction and can be used in curved applications.

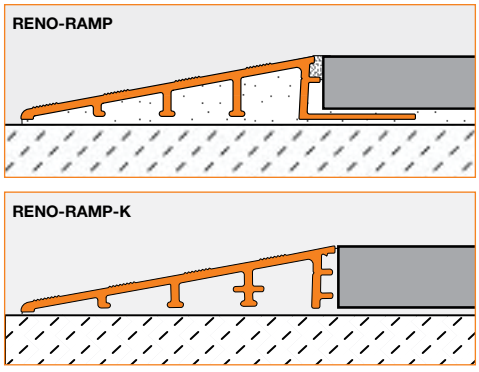
Different-height Transitions



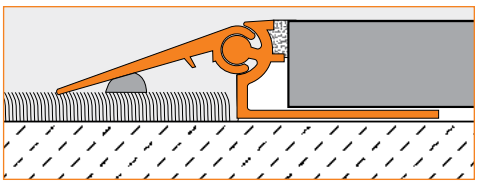
1.4 Schluter®-RENO-TK is designed to provide a smooth transition from tile coverings to floor coverings at lower elevations, typically carpet. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-TK features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface to eliminate trip hazards and protect tile edges. The 1/4" *(6 mm)* channel beneath the sloped flange of the profile hides and protects the cut edge of lower adjoining surface coverings. All sizes of the RENO-TK are compliant with the Americans with Disabilities Act (ADA). RENO-TK, in anodized aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. The anchoring leg of RENO-TK, in solid brass and anodized aluminum, sizes 60 to 100, is available with a special radius perforation "R" so that the profile can be used to form curves.



1.2 Schluter®-RENO-U is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete. The profile is available in stainless steel, solid brass, and anodized aluminum. RENO-U features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped surface (approximately 25°) that eliminates trip hazards and protects tile edges. The leading edge of the profile abuts the lower surface covering, typically VCT. RENO-U, in aluminum, features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. In installations where the leading edge abuts a lower surface covering, all sizes of RENO-U, except the 3/4" *(20 mm)* and 11/16" *(17.5 mm)*, are compliant with the Americans with Disabilities Act (ADA). In installations where the leading edge rests on top of the lower floor covering (e.g., finished concrete), the 3/4" *(20 mm)*, 11/16" *(17.5 mm)*, and 9/16" *(15 mm)* sizes are not ADA-compliant.
Note: When using Schluter® uncoupling membranes with RENO-U profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.



1.8 Schluter®-RENO-RAMP is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations or finished concrete, particularly in commercial applications where wheel carts are used (e.g., bakeries, hospitals, etc.). The profile is available in anodized aluminum. RENO-RAMP features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a sloped transition surface that terminates at the height of the tile edge. The profile protects tile edges and provides a sloped surface to eliminate trip hazards and allow easy access for wheel carts. RENO-RAMP features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile.
Note: When using Schluter® uncoupling membranes with RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
Schluter®-RENO-RAMP-K is a variant of the profile without an anchoring leg. RENO-RAMP-K is installed adjacent to existing floor coverings, e.g., retrofitting between existing floor coverings and bare concrete without having to disturb the existing flooring. All sizes of RENO-RAMP, except sizes 9/16" *(15 mm)* and 3/4" *(20 mm)*, are compliant with the Americans with Disabilities Act (ADA).



1.7 Schluter®-RENO-V is designed to provide a smooth transition between tile coverings and floor coverings at lower elevations. The profile is available in anodized aluminum. RENO-V features a trapezoid-perforated anchoring leg, which is secured in the mortar bond coat beneath the tile, and a movable transition arm that allows the profile to adjust to the height of the adjacent floor covering via a ball-and-socket joint. The profile protects tile edges and provides a sloped surface to eliminate trip hazards. RENO-V features an integrated joint spacer that establishes a defined joint cavity between the tile and the profile. RENO-V is also suitable for heavy-duty applications (e.g., entrances to garages or loading docks). In such cases, the adjustable arm is backfilled with mortar.

Material Properties and Areas of Application

Schluter edge-protection and transition profiles are resistant to most chemicals encountered in tiled environments. In special cases, the suitability of a proposed type of profile must be verified based on the anticipated chemical, mechanical, and/or other stresses. Exceptions and special considerations are listed below:

Stainless steel profiles are roll-formed, resulting in a slightly different contour from those made of extruded brass or aluminum. Stainless steel can sustain high mechanical stresses and is particularly well suited for applications requiring resistance against chemicals and acids; for example in the food industry, breweries, dairies, commercial kitchens, and hospitals, as well as in residential applications. Typically, the profiles are formed using stainless steel 304 (1.4301 = V2A). For more severe chemical exposure, such as de-icing salts and chemicals used in swimming pools, we recommend the use of stainless steel 316 L (1.4404 = V4A), which offers even higher corrosion resistance than the 304. Even stainless steel cannot withstand all chemical exposures, such as hydrochloric acid, hydrofluoric acid or certain chlorine, chloride, and brine concentrations.

Chrome-plated solid brass is ideal for matching chrome fixtures. Surfaces must be protected against abrasion or scratching.

Solid brass can sustain high mechanical stresses, as well as most chemicals commonly encountered in tiled environments. Solid brass that is exposed to air will oxidize, resulting in a natural patina. If exposed to moisture or aggressive substances, heavy oxidation and spotting may occur.

Aluminum profiles must be tested to verify their suitability if chemical stresses are anticipated. Cementitious materials, in conjunction with moisture, become alkaline. Since aluminum is sensitive to alkaline substances, exposure to the alkali (depending on the concentration and duration of exposure) may result in corrosion (aluminum hydroxide formation). Therefore, it is important to remove mortar or grout residue from visible surfaces. In addition, ensure that the profile is solidly embedded in the setting material and that all cavities are filled to prevent the collection of alkaline water.

Anodized aluminum profiles feature an anodized layer that retains a uniform appearance during normal use, but is not color-stable in exterior applications. The surface is susceptible to scratching and wear and may be damaged by grout or setting material. Therefore, these materials must be removed immediately. Otherwise, the description regarding aluminum applies.

Cutting Profiles

Observe all safety instructions and standards as directed by the cutting tool manufacturer, including protective eyewear, hearing protection, and gloves.

Always measure carefully and dry fit the profiles, corners, and connectors to ensure proper fit and alignment prior to setting tile.

Aluminum profiles may be cut using any of the following options:

- **Hacksaw** with a bimetal blade and the highest teeth per inch (TPI) available.
- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Chop saw or Miter Saw** with a non-ferrous blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Stainless steel profiles may be cut using any of the following options:

- **Variable-Speed Angle Grinder** set to the lowest speed using the Schluter®-PROCUT-TSM cutting wheel.
- **Band Saw** with a metal cutting blade.

Regardless of the cutting tool used, remove any burrs from the cut end of the profile with a file or similar before installation.

Installation

SCHIENE, JOLLY, DECO, RENO-TK, RENO-U, RENO-RAMP, and RENO-V

1. Select the profile according to tile thickness and format.

   Note: When using Schluter® uncoupling membranes with RENO-U and RENO-RAMP profiles, factor in the thickness of the membrane over the anchoring leg when selecting the profile height.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.

   For RENO-U and RENO-RAMP, fill the cavity beneath the sloped section of the profile with thin-set mortar. Follow this step when RENO-V is used in heavy-duty applications, as well.
3. Press the perforated anchoring leg of the profile into the mortar and align.
4. Trowel additional thin-set mortar over the perforated anchoring leg to ensure full coverage and support of the tile edges.
5. Solidly embed the tiles so that the tiled surface is flush with the top of the profile; the profile should not be higher than the tiled surface, but rather up to approx. 1/32" *(1 mm)* lower.
6. Set the tile to the integrated joint spacer, which ensures a uniform joint of 1/16" - 1/8" *(1.5 - 3 mm)*. For DECO and stainless steel profiles, leave a space of approximately 1/16" - 1/8" *(1.5 - 3 mm).*
7. Fill the joint completely with grout or setting material.
8. Remove grout or mortar residue from the visible surface of the profile.

RENO-RAMP-K

1. Fill the cavity beneath the sloped section of the profile with thin-set mortar.
2. Using a notched trowel, apply thin-set mortar to the area where the profile is to be placed.
3. Press the profile into the mortar and abut to the adjacent floor covering. The profile should not be higher than the adjacent floor covering, but rather up to approx. 1/32" *(1 mm)* lower.
4. Fill the joint completely with grout or setting material.
5. Work with materials and tools that will not scratch or damage sensitive surfaces. Setting materials must be removed immediately.

RENO-T

1. Select the profile according to joint width, to ensure proper support of the lateral crosspiece.
2. The joint cavity must be at least 3/8" *(9 mm)* deep and free of debris. Substances that inhibit adhesion must be removed from the sides of the joint.

3. Fill the joint with elastomeric sealant such as Schluter®-KERDI-FIX or similar. Then insert the vertical leg of RENO-T in the joint so that the lateral crosspiece rests completely on the edges of the surface coverings.
4. Remove any excess sealant with a suitable cleaner.

Maintenance

Schluter edge-protection and transition profiles require no special maintenance or care and are resistant to mold and fungi. Clean profiles periodically using neutral cleaning agents.

Stainless steel surfaces exposed to the environment or aggressive substances should be cleaned periodically using a mild household cleaner. Regular cleaning maintains the neat appearance of stainless steel and reduces the risk of corrosion. All cleaning agents must be free of hydrochloric acid, hydrofluoric acid, and chlorides. Stainless steel surfaces develop a sheen when treated with a chrome-polishing agent.

Oxidation films on exposed **solid brass** or **aluminum** can be removed by using a conventional polishing agent, but will form again.

In the case of **anodized aluminum**, **color-coated aluminum,** and **chrome-plated solid brass**, do not use abrasive cleaning agents.

Schluter® Systems Floor Profiles 5-Year Limited Warranty

LIMITED WARRANTY COVERAGE: Subject to the conditions and limitations as stated in this **Schluter® Systems Floor Profiles 5-Year Limited Warranty** (the "**Limited Warranty**"), Schluter Systems warrants that its Schluter®-SCHIENE, Schluter®-JOLLY, Schluter®-RENO-TK, Schluter®-DECO, Schluter®-RENO-U, Schluter®-RENO-T, Schluter®-RENO-RAMP, Schluter®-RENO-RAMP-K, and Schluter®-RENO-V (collectively, the "**Products**") will be free from manufacturing defects and will perform as described in the Schluter Systems Floor Profiles Technical Data Sheet (collectively, the "**Written Materials**"[1]) for a period of five (5) years from the date of purchase when installed and used in accordance with the terms and conditions of the Written Materials and industry standard guidelines that are not in conflict with the Written Materials in effect at the time of installation.

For the purposes of this Limited Warranty, "**Owner**" is defined as the original end user of the property in which the Products are installed; and "**Tile Assembly**" is defined to include the Products, non-reusable flooring surfaces, and applicable setting and grouting materials.

This Limited Warranty is only applicable to installations in the United States of America and Canada. Schluter Systems is not responsible or liable under any circumstances for determining the suitability of the Products for the Owner's intended purpose. It is the responsibility of the Owner to consult with an experienced and professional installer to ensure the suitability of the Products, subfloor/substrate and all building materials in the installation and that the Written Materials are followed properly.

RESOLUTION: If the Products are installed and used in accordance with the terms and conditions as described hereinabove and such Products are proven defective within the applicable warranty term, the Owner's exclusive remedy and the sole obligation of Schluter Systems, at its election, shall be to (a) reinstall or replace the failed portion of the Tile Assembly or (b) pay an amount not to exceed the original square foot cost of the installation of the Tile Assembly verified to be defective. Due to conditions beyond the control of Schluter Systems (e.g., color and shade availability, discontinuation, normal wear and tear), Schluter Systems cannot guarantee or warrant an exact match to the specific tile, stone, or other flooring materials used in the original installation. In such event, substantially similar materials may be substituted.

EXCLUSIONS FROM COVERAGE: This Limited Warranty excludes and in no event shall Schluter Systems have any liability for any indirect, special, incidental, punitive, exemplary, or consequential damages, including lost profits, arising out of or otherwise connected to the failure of the Products or Tile Assembly, regardless of any strict liability or active or passive negligence of Schluter Systems, and regardless of legal theory, whether in contract, tort, extra-contractual or other. This Limited Warranty further excludes any loss or damage arising out of or otherwise connected to: acts of war, terrorism, fire, explosion, natural disaster, acts of God, any failure to comply with the Written Materials, inadequate subfloor/substrate, improper preparation or other failure of subfloor/substrate, faulty or negligent penetration of the Products or subfloor/substrate, intentional acts of destruction, structural failure, misuse of or failure to maintain the Products, normal wear and tear, scratches, dents, corrosion or discoloration (whether caused by excessive heat, chemical cleaning products, abrasive agents or otherwise), efflorescence and shading which are a natural occurrence with cementitious materials and are not considered a defective condition for the purposes of this Limited Warranty, variations of texture, color or shade from those on product samples, packaging materials or other marketing materials, or other causes unrelated to the Products (e.g. floor covering failure, excess point loading, overvoltage). This Limited Warranty excludes exterior applications and applications utilizing glass tile or other non-approved floor coverings, unless specifically approved in writing on a case by case basis by the Schluter Systems Technical Services Director.

This Limited Warranty is conditioned and will be considered null and void and Schluter Systems will have the right to refuse any claims if: (a) the Products have been improperly stored or installed, or (b) the Products are subject to abusive or abnormal use, lack of maintenance, or used in a manner other than that for which the Products were designed or in any way contrary to the Written Materials.

DISCLAIMER: There are no warranties beyond this expressed warranty as stated herein. To the extent permitted by law, all other warranties, representations or conditions, expressed or implied, are hereby disclaimed and excluded, including but not limited to the implied warranties of **MERCHANTABILITY** or **FITNESS FOR A PARTICULAR PURPOSE** (as limited to such purposes as described in the Written Materials) or arising from a course of dealing, usage of trade or otherwise by law. ANY IMPLIED WARRANTIES ARISING BY OPERATION OF LAW ARE LIMITED IN DURATION TO THE TERM OF THIS LIMITED WARRANTY. NO REPRESENTATION, PROMISE, AFFIRMATION OR STATEMENT BY ANY EMPLOYEE OR AGENT OF SCHLUTER SYSTEMS WILL BE ENFORCEABLE AGAINST SCHLUTER SYSTEMS UNLESS IT IS SPECIFICALLY INCLUDED IN THIS LIMITED WARRANTY OR AUTHORIZED IN WRITING BY THE SCHLUTER SYSTEMS TECHNICAL SERVICES DIRECTOR. This Limited Warranty is given in lieu of any other warranty, whether expressed or implied. The remedies contained herein are the only remedies available for breach of this Limited Warranty. This Limited Warranty extends only to the Owner and is not transferable or assignable unless authorized by written agreement and signed by the Schluter Systems Technical Services Director or otherwise prohibited by specific state or provincial law. This Limited Warranty gives you specific legal rights; some states and provinces do not allow disclaimers or other restrictions of implied warranties; some of the above disclaimers may not apply to you. **No changes or modifications of any terms or conditions of this Limited Warranty are permitted unless duly authorized in writing by the Schluter Systems Technical Services Director.** This Limited Warranty shall supersede and replace any and all prior oral or written warranties, agreements, or other representations made by or on behalf of Schluter Systems relative to the Products or the application of the Products and shall apply to any installation occurring on or after April 8, 2019. If the Products are used in conjunction with other Schluter products, a different Schluter warranty may apply. For the most current information and materials regarding Schluter Systems warranties and programs, please visit https://www.schluter.com/schluter-us/en_US/downloadfiles.

MAKING A CLAIM: To make a claim under this Limited Warranty, the Owner must provide Schluter Systems[2] with written notice within thirty (30) days of any alleged defect in the Products covered by this Limited Warranty, together with date and proof of purchase of such Products and/or all of its components and name and address of all installers and all invoices related to the original installation, failing which this Limited Warranty shall have no legal effect[3]. Schluter Systems reserves the right at its election and as a condition of this Limited Warranty to inspect the alleged failed and/or defective Products.

All U.S. Claims shall be sent to:

Schluter Systems L.P.
Attn: Warranty Claims Dept.
194 Pleasant Ridge Road
Plattsburgh, NY 12901-5841

All Canadian Claims shall be sent to:

Schluter Systems (Canada), Inc.
Attn: Warranty Claims Dept.
21100 chemin Ste-Marie
Ste-Anne-de-Bellevue, QC H9X 3Y8

[1] If there are any conflicting terms between any Written Materials, the most recently updated document shall be deemed to control.

[2] This Limited Warranty is limited to sales of the Products made in and intended for use in the United States and Canada. For the purposes of this Limited Warranty, Schluter Systems L.P. shall offer warranty coverage to Owners located in the United States, and Schluter Systems (Canada) Inc. shall offer warranty coverage to Owners located in Canada.

[3] In the event that Owner fails to provide such required invoices relating to the original installation, Schluter Systems shall pay Owner an amount equal to the average, reasonable costs of a comparable installation. If the parties fail to agree on such amount, such dispute shall promptly, and in the first instance, be submitted: (a) if a U.S. claim, to arbitration in Clinton County, New York, in accordance with the rules of the American Arbitration Association, or (b) if a Canadian claim, in the Province of Quebec, Canada, in accordance with the ADRIC Arbitration Rules. Any outcome of such arbitration proceeding shall be final and binding upon the parties hereto.

Schluter Systems L.P. • 194 Pleasant Ridge Road, Plattsburgh, NY 12901-5841 • Tel.: 800-472-4588 • Fax: 800-477-9783

Product Data Sheet
MINWAX® Wood Finish™

DESCRIPTION:

Minwax® Wood Finish™ is a penetrating oil-based wood stain, which provides beautiful rich color that enhances the natural wood grain. It applies easily, absorbs deep into the pores of the wood, and is ideal for staining unfinished wood furniture, cabinets, doors, trim, molding, and hardwood floors.

RECOMMENDED USE:

Interior Use Only

SURFACE PREPARATION:

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (NIOSH approved) and proper containment and cleanup. For more information, call the National Lead Information Center at 1-800-424-LEAD (in US) or contact your local health authority.

Surface must be dry, clean, and free of dirt, grease, glue and existing coatings before staining.

Sand the wood in the direction of the grain using fine-grade sandpaper (#220) until smooth. Remove all sanding dust.

To ensure uniform acceptance of stain color and beautiful results, pretreat the wood with **Minwax® Pre-Stain Wood Conditioner** following label directions.

PRODUCT PREPARATION AND COLOR TESTING:

Stir stain thoroughly before and occasionally during use.

Always test stain on a scrap piece or hidden area of wood to verify desired color.

STAIN APPLICATION :

1. Apply stain in the direction of the grain with a brush or clean cloth.
2. Allow the stain to penetrate 5-15 minutes to achieve desired color. The more time the stain is allowed to penetrate, the richer and darker the color will be.
3. Remove stain that has not penetrated the wood with a clean cloth. Wipe in the direction of the grain, while blending light and dark areas to obtain uniform color. DO NOT ALLOW STAIN THAT HAS NOT PENETRATED THE WOOD TO DRY ON THE WOOD SURFACE.

4. To darken color, apply a second coat after 4-6 hours – repeating directions for application of first coat. Do not sand between coats of stain.
5. Dry time may be extended due to high humidity, low temperatures or inadequate ventilation.

CLEAR FINISH APPLICATION:

After a minimum of 8 hours, complete your project by applying a clear protective finish such as **Minwax® Fast-Drying Polyurethane** or Minwax® **Helmsman® Spar Urethane**. For a low odor, water clean-up clear finish, apply Minwax® Water Based Oil-Modified Polyurethane or **Minwax® Polycrylic® Protective Finish** after 24 hours.

Minwax® **Polycrylic®** should not be used over **Red Mahogany** stain.

Complete your floor finishing project with Minwax® Super Fast-Drying Polyurethane For Floors or **Minwax® Ultimate Floor Finish.**

CLEANUP/STORAGE:

Use mineral spirits or paint thinner, following manufacturer's safety instructions.

SAFETY:

DANGER! HARMFUL OR FATAL IF SWALLOWED. COMBUSTIBLE! VAPOR HARMFUL. IRRITATES EYES, SKIN AND RESPIRATORY TRACT.

CAUTIONS: CONTAINS ALIPHATIC HYDROCARBONS. Contents are **COMBUSTIBLE**. Keep away from heat and open flame. **VAPOR HARMFUL**. Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (NIOSH approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water for 15 minutes and get medical attention. For skin contact, wash thoroughly with soap and water. In case of respiratory difficulty, provide fresh air and call physician. If swallowed, do not induce vomiting. Call Poison Control Center, hospital emergency room, or physician immediately. **DELAYED EFFECTS FROM LONG-TERM OVEREXPOSURE.** Contains solvents which can cause permanent brain and nervous system damage. Intentional misuse by deliberately concentrating and inhaling the contents can be harmful or fatal. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF REACH OF CHILDREN.**

DANGER: Rags, steel wool, other waste soaked with this product, and sanding residue may spontaneously catch fire if improperly discarded. Immediately place rags, steel wool, other waste soaked with this product, and sanding residue in a sealed, water-filled, metal container. Dispose of in accordance with local fire regulations. CONFORMS TO ASTM D-4236. Contact a physician for more health information.

Web Site: www.wilsonart.com

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	High Pressure Laminate (HPL)
Manufacturer	Nevamar
Model	S6001 T
Dimensions	0.048"/1.2mm Thickness, 36 W x 96 L, 36 W x 120 L, 36 W x 144L, 48 W x 98 L, 48 W x 120 L, 60 W x 96 L, 60 W x 120 L, 60 W x 144 L
Color	Black
Finish	Textured/ Armored Protection
Material Composition	Melamine impregnated decorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Grade	NG48
Fire/Smoke Rating	ASTM E-84/UL723, 40 Flame Spread/Smoke Density 120 Unbonded, 95 Flame Spread/95 Smoke Density Bonded
Best Practices	Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Black S6001T
Warranty	1 Year Limited
Notes	Recommended substrates for laminates are Medium to High Density Fiberboard (MDF), Particleboard,or Metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Technical Bulletin

High Pressure Laminate

Three standard grades of **Nevamar® High Pressure Laminate** are suitable for most applications:

General Purpose Type NG48 is most often used in horizontal applications where high impact resistance and a durable, decorative surface is required.

Postforming Type NF39 is designed for manufacturing countertops and other horizontal surfaces where the laminate may be heated and rolled over the substrate edge to eliminate seams.

Type NF28 is designed for applications where impact resistance is less critical. Type NF28 can also be postformed.

Product Description

High pressure laminate is manufactured in a flat press by combining decorative papers saturated in melamine resin with phenolic-impregnated kraft layers at pressures exceeding 1000 psi (6.9 MPa) and temperatures approaching 300˚F (150˚C). The panels are trimmed to size and the backs are sanded to facilitate bonding. The thickness of the laminate is determined by the number of kraft layers used. The laminating process combines the durability of melamine resins with the aesthetics of decorative papers creating a surfacing material that has been the standard for many years.

Most textured finish items are produced with Nevamar's exclusive **Armored Protection® Surface** and have all the properties of conventional laminate. But it also has superior abrasion and scuff resistance due to a very thin deposit of microscopic particles of aluminum oxide on the conventional melamine layer. Armored Protection® Surface has significantly better wear value than the NEMA standard for laminates. It also offers superior resistance to scuffing and retain a "brand new" appearance during most of their useful life. All other properties meet the normal NEMA test requirements.

Standard Nominal Sizes

Type		Thickness*	Width*	Length	Colors
NG48	(in.)	0.048	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	1.2	914,1219,1524	2438,3048,3658	
NF39	(in.)	0.039	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	1.0	914,1219,1524	2438,3048,3658	
NF28	(in.)	0.028	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	0.7	914,1219,1524	2438,3048,3658	

*Other widths and thicknesses available upon request.

Typical Uses

Nevamar® standard laminate is designed for either horizontal, vertical, or postforming applications. This laminate is seen on countertops, tables, vanities, interior doors, cabinets, contract furniture, and retail store fixtures.

Fabrication Tips

When working with Nevamar® HPL, these techniques will produce a quality application.

1. Proper conditioning of the laminate, substrate, and backing sheet minimizes possible warping, shrinking, or expansion of assembled panels. Ideally, all components should be conditioned at 70˚F to 75˚F (21˚C to 25˚C) and 45 to 50 percent relative humidity for 48-hours prior to assembly.
2. Always bond laminate to a suitable substrate such as medium to high density fiberboard, particleboard, or metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.
3. Recommended adhesives include solvent or water-based contact cement, white glue (PVA), epoxy, and hot melt glue. Consult your adhesive supplier for specific application requirements.
4. The use of a backing sheet is recommended to minimize warpage. The thickness of the backing sheet should be relatively equal to the thickness of the decorative laminate on the face of the assembly.
5. All saw blades and router bits used for cutting should be carbide tipped. Feed rate should be slow and tool speed should be high.

6. All edges of laminate should be filed smooth with file direction towards substrate to help prevent stress cracks and to minimize chipping.
7. Inside corners of cutouts for electrical outlets, sinks, etc., should have a minimum radius of 1/8" (3 mm) and be filed smooth. This reduces the likelihood of stress cracks.
8. When fasteners are required, it is advisable to first drill an oversized hole through the laminate. This reduces the likelihood of stress cracks.
9. See the Nevamar® Postforming Technical Bulletin for postforming application tips.
10. All laminate is intended for interior use only, and should not be exposed to extreme humidity, continuous sunlight, or temperatures above 275˚F (135˚C) for extended periods of time.

Fire Test Data

High pressure decorative laminate is frequently used in installations governed by local fire codes. Burning characteristics of laminate are greatly influenced by the adhesive and substrate used. Listed below are typical flame spread index and smoke developed values for Nevamar® standard grade laminate. When specifying Class I or A rated laminate, refer to Nevamar® Fire Rated Technical Bulletin.

CAN/ULC-S102M
Laminated Plastic Surface Burning Characteristics

Sample Type	Flame Configuration	Spread Index	Smoke Developed Values
NG48	Bonded* to	40	120
NF39	Inorganic	40	65
NF28	Cement Board	35	35

*Bonded with N® Sodium Silicate Sealer and Wonderbond® WB-104A with M-172L. All work should be designed, assembled, and installed in compliance with pertinent local fire codes.

Codes and Certifications

1. U.S. Federal Motor Vehicle Safety Standard #302 "Flammability of Interior Materials." Nevamar® Type G48, F39, and F28 comply.
2. NSF-International Standard 35, "Laminated Plastics for Surfacing Food Service Equipment." Nevamar® Type G48, F39, and F28 comply.
3. American National Standards Institute/National Electrical Manufacturers Association (ANSI/NEMA), LD3-1995, "High- Pressure Decorative Laminate." Nevamar® Type NG48, NF39, and NF28 comply.
4. MIL-P-17171E(SH), "High Pressure Decorative Laminate." Nevamar® NG48 complies with Type I.
5. U.S. Federal Specification L-P-508H, "Plastic Sheet, Laminated, Decorative and Nondecorative." Nevamar® Type NG48, NF39, and NF28 comply.
6. International Organization for Standardization, ISO-4586, "Decorative High Pressure Laminates (HPL)." Nevamar® Type NG48, NF39, and NF28 comply.

Care and Maintenance

Nevamar® decorative laminate provides a durable surface that is easy to maintain using ordinary care.

To maintain the laminate's lasting beauty, cleaning with a solution of warm water and liquid dishwashing detergent is all that should be required in most cases.

Stains may be removed with most non-abrasive household cleaners such as FORMULA 409®, GLASS PLUS® or WINDEX® with AMMONIA D®. Light scrubbing with a soft bristled brush may be necessary to remove stains from the depth of the structure on some textured surfaces.

If the stain persists, use a paste of baking soda and water and apply with a soft bristled brush. Light scrubbing for 10-20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force may damage the decorative surface, especially if it has a gloss finish.

Stubborn stains that resist any of the above cleaning methods may require the use of undiluted household bleach. Apply the bleach to the stain and let stand no longer than 1 1/2 minutes. Rinse thoroughly with warm water and wipe dry. This step may be repeated if the stain appears to be going away and the color of the laminate has not been affected. WARNING: Prolonged exposure of the laminate surface to bleach will cause discoloration.

Many commercially available products contain substances that may damage or discolor a laminate surface. ABRASIVE CLEANERS SHOULD NOT BE USED. Particular care should be used with any products labeled CAUTION or WARNING. Any questions or concerns should be referred to the product's manufacturer or call 1-877-726-6526. Do not allow harsh materials to remain in contact with the laminate surface. Examples of these are as follows:

- Toilet bowl cleaners
- Chlorine bleach
- Hydrogen Peroxide
- Coffee pot cleaners
- Oven cleaners
- Hard water stain removers
- Drain cleaners
- Fruit and berry juice
- Metal cleaners and polishes
- Tub and tile cleaners

Limited Warranty

Subject to the limitations set forth below, Panolam Industries International Inc. (Panolam) expressly warrants that our products are reasonably free of defects in material and workmanship, and when properly handled and fabricated will conform, within accepted tolerances, to applicable manufacturing specifications as set forth in our technical brochure. This warranty shall extend to the original buyer for a period of twelve (12) months from the date of shipment of this product by Panolam, and shall not be assignable by the original buyer. This warranty does not cover damage resulting from accident, misuse, alteration, abuse or lack of reasonable care.

Due to the variety of uses and applications to which this product may be put, and because the manufacturer has no control over the end products fabricated, the warranty set forth above is exclusive and in lieu of all warranties, expressed or implied, in fact or by operation of law or otherwise, or arising by course of dealing or performance, custom or usage in the trade, including, without limitation, the implied warranties of fitness for a particular purpose and merchantability, and Panolam shall have no obligation or liability to any person or entity in connection with or arising from the furnishing, sale, installation or repair, use or subsequent sale of any product supplied by it.

Our maximum liability arising out of the sale of the products or their use, whether based upon warranty, contract, tort or otherwise, shall not exceed the actual payments received by us in connection therewith. In no event shall we be liable for special, incidental or consequential damages, including, but not limited to, arising hereunder or from the loss of profits, or loss of use damages, sales of the products.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	D427-60
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Linen
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Linen D427-60
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Website: www.wilsonart.com

PRODUCT OVERVIEW

Wilsonart® Thermally Fused Laminate (TFL) Panels are a key component of the Wilsonart® Coordinated Surfaces program. When combined with Wilsonart's vast array of high performance laminate offerings and edgebanding options, TFL Panels complete a suite of products unmatched in the industry for coordinated color, pattern, and finish selections.

Wilsonart TFL Panels are designed for interior use only and have a wide range of applications. Common design elements are decorative wall panels, cabinetry, furniture, and shelving. TFL Panels are well-suited for installations requiring resistance to stains, surface wear, and scratching.

Standard panel widths are 49 and 61 inches. Standard panel length is 97 inches. Custom widths and lengths are available on special order.

Particleboard and Medium Density Fiberboard (MDF) core materials are standard, in thicknesses ranging from 3/8 inch to 1-1/8 inches depending on core material. Options include no-added-urea-formaldehyde and moisture-resistant fabrications.

TFL Panels and integral edgebanding are available in over 200 colors and 6 finishes. Wilsonart offers the widest array of designs in the industry - woodgrains, solids, and abstracts. Laminate facers qualify as NEMA LD-3 Type VGL general-purpose laminates, primarily for vertical applications.

TECHNICAL DATA

TFL Panel particleboard and medium density fiberboard core materials comply with ANSI and Composite Panel Association performance criteria.

Panel assemblies comply with NEMA test standards for Type VGL laminate panels, as follows:

NEMA Test	TFL Panel Test Results
Light Resistance	Slight effect
Cleanability (cycles)	20 max.
Stain Resistance Reagents 1-10 Reagents 11-15	 No effect Moderate effect
Boiling Water Resistance	No effect
High Temperature Resistance	Slight effect
Impact Resistance	15"
Radiant Heat Resistance	60 seconds
Surface Wear Resistance (cycles)	Solid Colors - 400 Woodgrains - 125 Abstracts - 125

Refer to the Wilsonart TFL Panels Guide Specification for detailed technical data.

SUSTAINABLE DESIGN

LEED® 2009 potential credits can be obtained in the New Construction & Major Renovations (NC) and Commercial Interiors (CI) categories for the following:

- MR 4 Recycled Content
- MR 5 Regional Materials
- MR 6 Rapidly Renewable Content
- MR 7 Certified Wood
- IEQ 4.4 Low-Emitting Materials

Wilsonart TFL Panels can be fabricated to comply with CARB emissions requirements.

©Wilsonart LLC 2015

CERTIFICATIONS

CPA Certifications for sustainability and CARB formaldehyde emission limitations.

FSC sustainability certifications.

FABRICATION

Refer to Wilsonart Thermally Fused Laminate Panels Fabrication Manual and Wilsonart Fabrication Drawings for detailed information.

WARRANTY

Wilsonart offers a 1 year Limited Warranty against material defects.

CARE AND MAINTENANCE

Refer to the Wilsonart website for care and maintenance instructions.

CUSTOMER SERVICE

For samples, literature, technical assistance, or questions, please call the toll-free Hotline at 800-433-3222, Monday through Friday, 8:00 am to 5:00 pm, CST or visit our website.

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	High Pressure Laminate (HPL)
Manufacturer	Nevamar
Model	S3022 T
Dimensions	0.048"/1.2mm Thickness, 36 W x 96 L, 36 W x 120 L, 36 W x 144L, 48 W x 98 L, 48 W x 120 L, 60 W x 96 L, 60 W x 120 L, 60 W x 144 L
Color	Deep Blue
Finish	Textured/ Armored Protection
Material Composition	Melamine impregnated decorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Grade	NG48
Fire/Smoke Rating	ASTM E-84/UL723, 40 Flame Spread/Smoke Density 120 Unbonded, 95 Flame Spread/95 Smoke Density Bonded
Best Practices	Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Deep Blue S3022T
Warranty	1 Year Limited
Notes	Recommended substrates for laminates are Medium to High Density Fiberboard (MDF), Particleboard,or Metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Technical Bulletin

High Pressure Laminate

Three standard grades of **Nevamar® High Pressure Laminate** are suitable for most applications:

General Purpose Type NG48 is most often used in horizontal applications where high impact resistance and a durable, decorative surface is required.

Postforming Type NF39 is designed for manufacturing countertops and other horizontal surfaces where the laminate may be heated and rolled over the substrate edge to eliminate seams.

Type NF28 is designed for applications where impact resistance is less critical. Type NF28 can also be postformed.

Product Description

High pressure laminate is manufactured in a flat press by combining decorative papers saturated in melamine resin with phenolic-impregnated kraft layers at pressures exceeding 1000 psi (6.9 MPa) and temperatures approaching 300˚F (150˚C). The panels are trimmed to size and the backs are sanded to facilitate bonding. The thickness of the laminate is determined by the number of kraft layers used. The laminating process combines the durability of melamine resins with the aesthetics of decorative papers creating a surfacing material that has been the standard for many years.

Most textured finish items are produced with Nevamar's exclusive **Armored Protection® Surface** and have all the properties of conventional laminate. But it also has superior abrasion and scuff resistance due to a very thin deposit of microscopic particles of aluminum oxide on the conventional melamine layer. Armored Protection® Surface has significantly better wear value than the NEMA standard for laminates. It also offers superior resistance to scuffing and retain a "brand new" appearance during most of their useful life. All other properties meet the normal NEMA test requirements.

Standard Nominal Sizes

Type		Thickness*	Width*	Length	Colors
NG48	(in.)	0.048	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	1.2	914,1219,1524	2438,3048,3658	
NF39	(in.)	0.039	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	1.0	914,1219,1524	2438,3048,3658	
NF28	(in.)	0.028	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	0.7	914,1219,1524	2438,3048,3658	

*Other widths and thicknesses available upon request.

Typical Uses

Nevamar® standard laminate is designed for either horizontal, vertical, or postforming applications. This laminate is seen on countertops, tables, vanities, interior doors, cabinets, contract furniture, and retail store fixtures.

Fabrication Tips

When working with Nevamar® HPL, these techniques will produce a quality application.

1. Proper conditioning of the laminate, substrate, and backing sheet minimizes possible warping, shrinking, or expansion of assembled panels. Ideally, all components should be conditioned at 70˚F to 75˚F (21˚C to 25˚C) and 45 to 50 percent relative humidity for 48-hours prior to assembly.
2. Always bond laminate to a suitable substrate such as medium to high density fiberboard, particleboard, or metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.
3. Recommended adhesives include solvent or water-based contact cement, white glue (PVA), epoxy, and hot melt glue. Consult your adhesive supplier for specific application requirements.
4. The use of a backing sheet is recommended to minimize warpage. The thickness of the backing sheet should be relatively equal to the thickness of the decorative laminate on the face of the assembly.
5. All saw blades and router bits used for cutting should be carbide tipped. Feed rate should be slow and tool speed should be high.

6. All edges of laminate should be filed smooth with file direction towards substrate to help prevent stress cracks and to minimize chipping.
7. Inside corners of cutouts for electrical outlets, sinks, etc., should have a minimum radius of 1/8" (3 mm) and be filed smooth. This reduces the likelihood of stress cracks.
8. When fasteners are required, it is advisable to first drill an oversized hole through the laminate. This reduces the likelihood of stress cracks.
9. See the Nevamar® Postforming Technical Bulletin for postforming application tips.
10. All laminate is intended for interior use only, and should not be exposed to extreme humidity, continuous sunlight, or temperatures above 275˚F (135˚C) for extended periods of time.

Fire Test Data

High pressure decorative laminate is frequently used in installations governed by local fire codes. Burning characteristics of laminate are greatly influenced by the adhesive and substrate used. Listed below are typical flame spread index and smoke developed values for Nevamar® standard grade laminate. When specifying Class I or A rated laminate, refer to Nevamar® Fire Rated Technical Bulletin.

CAN/ULC-S102M
Laminated Plastic Surface Burning Characteristics

Sample Type	Flame Configuration	Spread Index	Smoke Developed Values
NG48	Bonded* to	40	120
NF39	Inorganic	40	65
NF28	Cement Board	35	35

*Bonded with N® Sodium Silicate Sealer and Wonderbond® WB-104A with M-172L. All work should be designed, assembled, and installed in compliance with pertinent local fire codes.

Codes and Certifications

1. U.S. Federal Motor Vehicle Safety Standard #302 "Flammability of Interior Materials." Nevamar® Type G48, F39, and F28 comply.
2. NSF-International Standard 35, "Laminated Plastics for Surfacing Food Service Equipment." Nevamar® Type G48, F39, and F28 comply.
3. American National Standards Institute/National Electrical Manufacturers Association (ANSI/NEMA), LD3-1995, "High- Pressure Decorative Laminate." Nevamar® Type NG48, NF39, and NF28 comply.
4. MIL-P-17171E(SH), "High Pressure Decorative Laminate." Nevamar® NG48 complies with Type I.
5. U.S. Federal Specification L-P-508H, "Plastic Sheet, Laminated, Decorative and Nondecorative." Nevamar® Type NG48, NF39, and NF28 comply.
6. International Organization for Standardization, ISO-4586, "Decorative High Pressure Laminates (HPL)." Nevamar® Type NG48, NF39, and NF28 comply.

Care and Maintenance

Nevamar® decorative laminate provides a durable surface that is easy to maintain using ordinary care.

To maintain the laminate's lasting beauty, cleaning with a solution of warm water and liquid dishwashing detergent is all that should be required in most cases.

Stains may be removed with most non-abrasive household cleaners such as FORMULA 409®, GLASS PLUS® or WINDEX® with AMMONIA D®. Light scrubbing with a soft bristled brush may be necessary to remove stains from the depth of the structure on some textured surfaces.

If the stain persists, use a paste of baking soda and water and apply with a soft bristled brush. Light scrubbing for 10-20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force may damage the decorative surface, especially if it has a gloss finish.

Stubborn stains that resist any of the above cleaning methods may require the use of undiluted household bleach. Apply the bleach to the stain and let stand no longer than 1 1/2 minutes. Rinse thoroughly with warm water and wipe dry. This step may be repeated if the stain appears to be going away and the color of the laminate has not been affected. WARNING: Prolonged exposure of the laminate surface to bleach will cause discoloration.

Many commercially available products contain substances that may damage or discolor a laminate surface. ABRASIVE CLEANERS SHOULD NOT BE USED. Particular care should be used with any products labeled CAUTION or WARNING. Any questions or concerns should be referred to the product's manufacturer or call 1-877-726-6526. Do not allow harsh materials to remain in contact with the laminate surface. Examples of these are as follows:

- Toilet bowl cleaners
- Chlorine bleach
- Hydrogen Peroxide
- Coffee pot cleaners
- Oven cleaners
- Hard water stain removers
- Drain cleaners
- Fruit and berry juice
- Metal cleaners and polishes
- Tub and tile cleaners

Limited Warranty

Subject to the limitations set forth below, Panolam Industries International Inc. (Panolam) expressly warrants that our products are reasonably free of defects in material and workmanship, and when properly handled and fabricated will conform, within accepted tolerances, to applicable manufacturing specifications as set forth in our technical brochure. This warranty shall extend to the original buyer for a period of twelve (12) months from the date of shipment of this product by Panolam, and shall not be assignable by the original buyer. This warranty does not cover damage resulting from accident, misuse, alteration, abuse or lack of reasonable care.

Due to the variety of uses and applications to which this product may be put, and because the manufacturer has no control over the end products fabricated, the warranty set forth above is exclusive and in lieu of all warranties, expressed or implied, in fact or by operation of law or otherwise, or arising by course of dealing or performance, custom or usage in the trade, including, without limitation, the implied warranties of fitness for a particular purpose and merchantability, and Panolam shall have no obligation or liability to any person or entity in connection with or arising from the furnishing, sale, installation or repair, use or subsequent sale of any product supplied by it.

Our maximum liability arising out of the sale of the products or their use, whether based upon warranty, contract, tort or otherwise, shall not exceed the actual payments received by us in connection therewith. In no event shall we be liable for special, incidental or consequential damages, including, but not limited to, arising hereunder or from the loss of profits, or loss of use damages, sales of the products.

CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Phantom Pearl 8211-60
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

Run grain direction vertically unless noted otherwise.
PVC Edgebanding
Melamine at all vertical surfaces/HPL at all horizontal surfaces

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Copyright 2019, Wilsonart LLC

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Description	107	335	350
Thickness	0.045" ± 0.005" (1.14mm ± 0.13mm)	0.028" + 0.001 - 0.004" (0.71mm + 0.03 - 0.10mm)	0.036" ± 0.005" (0.91mm ± 0.13mm)
Weight per square foot	0.322#	0.186#	0.260#

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

5. **Warranty**

6. **Maintenance**

Real Living Decor Package

Issue Date: Nov 23, 2022
Revision Date:

Item Name	Tile Underlayment
Item Type	Crack Suppression Membrane
Description	High performance, pliable, light weight peel and stick membrane underlayment system that minimizes impact noises and the transmission of cracks
Manufacturer	Laticrete International
Model	Fracture Ban 90 (90 mils)
Dimensions	2.3mm thick; 39.25 in. x 30.6 ft Roll
Material Composition	Rubberized membrane
CSI #	09 30 00 Tiling
Omniclass #	22 - 093000 Tiling
Acoustical Performance	Airborne Sound ASTM E90
Structural Performance	ANSI A118.12, ANSI A118.13
Best Practices	Contains Recycled Content
Quality Standards	Impact Insulation Class (IIC) ASTM E2179
Accessories	Primer: As required by the membrane manufacturer.
Thickness	2.3mm
Sound Reduction	IIC = 50; STC = 57
Roll Length	30.6 ft (100 ft² coverage, 24 rolls per pallet)
Product	Fracture Ban 90 (90 mils)
Width	39.25 in.
Warranty	DS 025.0: 25 Year System Warranty DS 230.05: 5 Year System Warranty DS 230.10: 10 Year System Warranty DS 230.13: 1 Year Product Warranty
Notes	1. Product that complies with ANSI A118.12 and is recommended by the manufacturer for the application indicated. Include reinforcement and accessories recommended by manufacturer. 2. Provide self-bonding elastomeric membrane capable of heavy-duty service per ASTM C627. Liquid-applied products will not be allowed.

3. PRODUCT DESCRIPTION
A high performance, pliable, light weight peel and stick membrane designed for use under thin-bed adhesives for ceramic tile, stone and other hard surface installations. This reinforced high strength membrane performs as an anti-fracture and an acoustical underlayment system that eliminates the transmission of stresses from the substrate while dampening the transmission of impact and air borne noise through the floor to the room below. The unique design of this peel and stick membrane allows for usage in both commercial and residential settings where a quick dependable turnaround is required.

Uses
- Residential and commercial
- Retail, malls and stores
- Offices, hotel/motel, hospitals
- Apartment and condo buildings

Advantages
- Provides anti-fracture/sound reduction in one convenient easy to install product
- For installation requiring a quick dependable turnaround
- Hot-applied polymer modified asphaltic adhesive coated on a 100% polyester non-woven with a 60# release liner paper
- Has a white non-woven surface for easy chalk line identification
- Provides a water resistive barrier
- Prevents in plane cracks up to 3/8” (9.5 mm)

Suitable Substrates
- Cement Mortar Bed
- Exterior Glue Plywood (Interior Only)
- Oriented Strand Board (OSB)
- Precast Floor Panels
- Gypsum Underlayments
- Radiant Heated Floors
- Ceramic Tile
- Terrazzo
- Stone
- Self-Leveling and Patching Compounds
- Backer Board
- Existing VAT
- VCT and Vinyl Floors
- Concrete

Packaging
One roll of FRACTURE BAN 40 is 40 mils (1 mm) thick 39.25 in. x 69 ft (1 m x 21 m) or 225 ft² (21 m²). 24 rolls per pallet.

One roll of FRACTURE BAN 90 is 90 mils thick (2.3 mm) 39.25 in. x 30.6 ft (1 m x 9.33 m) or 100 ft² (9.3 m²). 24 rolls per pallet.

FRACTURE BAN Primer
4x1 Gal (4x3.8L) Carton, 48 per pallet
5 Gal (18.9 L) plastic pail, 28 per pallet
245 Gal (927.4 L) heavy-duty intermediate bulk container (IBC)

Approximate Coverage
- One roll of FRACTURE BAN 40 covers 225 ft² (20.9 m²)
- One roll of FRACTURE BAN 90 covers 100 ft² (9.3 m²)

FRACTURE BAN Primer is a concentrate and must be diluted with clean potable water at a 1:1 (primer:water) ratio. Mix/stir concentrate thoroughly prior to and after diluting.

Shelf Life

Factory sealed containers of this product are guaranteed to be of first quality for one (1) year if stored at temperatures >32°F (0°C) and <110°f (43°c).>

Limitations

- FRACTURE BAN™ is not intended for use as a waterproofing membrane. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane (see Section 10 FILING SYSTEMS).
- FRACTURE BAN can only be used in wet areas with NXT® Epoxy Primer
- Do not install moisture-sensitive tile or stone with water based setting materials on top of FRACTURE BAN peel & stick membranes. Also, dimensionally weak natural stone tile that normally would not be categorized as moisture sensitive; such as travertine, limestone, marble and agglomerates can exhibit doming, cupping or curing when wet-set using medium-bed mortar methods of installation over impervious sheet membranes such as FRACTURE BAN. For this reason, areas requiring more than 3/8” (10 mm) buildup require the use of a NXT™ self-leveling underlayment’s or cured 3701 Fortified Mortar application before installation of FRACTURE BAN. When installing natural stone, always do a mockup area of the proposed installation and allow materials to reach full cure to ensure achieving the desired effect.
- Not recommended for use on concrete floors where hydrostatic head pressure exists or moisture vapor transmission in excess of 5 lbs. per 1000 ft² per 24hrs (283?g/s• m^2) as determined by calcium chloride kit test ASTM F1869 is present or 75% RH when tested per ASTM F2170. If the moisture vapor transmission is greater than 5 lbs. per 1000 ft² per 24hrs (283?g/s• m^2) then first coat the concrete floor using NXT Vapor Reduction Coating according to Data Sheet DS 507.0 then proceed with the FRACTURE BAN Primer and FRACTURE BAN membrane application.
- Not recommended for use where horizontal floor movement is greater than 1/4" (6.4 mm). Existing cracks larger than 3/16" (4.8 mm) should be prepared with proper backing material prior to installation of membrane
- Not recommended to cover joints or cracks larger than 3/8" (9.5 mm)
- Not recommended for use where vertical floor movement is present
- For installations over plywood subfloors, please refer to TCNA Method F125A. For expansion joints, reference TCNA Method EJ171
- Must be covered with ceramic tile, stone, or other hard finish. Use protection board for temporary cover prior to finishing horizontal surfaces.
- Do not use solvent based sealants or sealers where contact with membrane may occur
- Do not install when surface temperature is below 40°F (4°C), when ambient temperature is expected to be below 50°F (10°C) during placement or before material takes final set or when temperature will be above 90°F (32°C).
- Do not allow FRACTURE BAN Primer to freeze.
- Do not install FRACTURE BAN or FRACTURE BAN Primer over particleboard, chipboard, hardboard (Masonite), Luan panels, asbestos, interior glue plywood, gypsum-based patching materials, asphalt, coal tar, or lightweight insulating concrete or any other dimensionally unstable materials.
- If FRACTURE BAN is going to be used on an exterior application, FRACTURE BAN Primer must be replaced with NXT® Vapor Reduction Coating and used along with FRACTURE BAN 40 only. Apply the NXT® Vapor Reduction Coating according to DS 507 and then install the FRACTURE BAN 40 directly to the surface primed with the NXT® Vapor Reduction Coating.
- If FRACTURE BAN is going to be used on an exterior application, FRACTURE BAN Primer must be replaced with VAPOR BAN™ Primer ER and used along with FRACTURE BAN 40 only. Apply the VAPOR BAN™ Primer ER according to DS 35222 and then install the FRACTURE BAN 40 directly to the surface primed with the VAPOR BAN™ Primer ER .
- Note: Surfaces must be structurally sound, stable and rigid enough to support ceramic/stone tile, thin brick and similar finishes. Substrate deflection under all live, dead and impact loads, including concentrated loads, must not exceed L/360 for thin bed ceramic tile/brick installations or L/480 for thin bed stone installations where L=span length.

Cautions

- Consult SDS for safety information.
- During cold weather, protect finished work from traffic until fully cured.
- Read and understand the Product Data Sheet and Safety Data Sheet.
- Perform a mock-up to ensure product will perform as required.
- Check www.laticrete.com for any technical bulletins or updated information about the product and its application.
- FRACTURE BAN Primer causes serious eye irritation. In case of eye contact, wash immediately with water.
- Wear gloves and protective goggles.
- When spraying FRACTURE BAN Primer, avoid breathing the fine mist and use a NIOSH approved respirator.
- Contact LATICRETE Technical Services for more information or to answer questions regarding installation.
- Not for submerged applications.
- Keep FRACTURE BAN Primer out of reach of children.

- When treating cracks in a concrete floor or going over saw cut joints install the FRACTURE BAN must be applied a minimum of 3 times the width of the tile being installed. The tile installed over the crack cannot be in contact with the concrete. Follow TCNA Method F125 for the treatment of hairline cracks, shrinkage cracks, and saw cut or control joints. A LATICRETE polymer fortified thin-set should be used to feather the edge of the membrane at least 12" (305 mm) from the edge in order to eliminate any abrupt changes in surface height.

4. TECHNICAL DATA

Applicable Standard

- ANSI A118.12, ANSI A118.13, ASTM C627, ASTM E2179, ASTM E492, ASTM E90

Physical Properties

Standard	Description	Requirement	Test Result	
			40 mil	90 mil
ASTM C627	Robinson Floor Test	Cycles 1 - 14	Extra Heavy	Heavy
ASTM E2179	IIC Rating	Calculate	42	50
ASTM E2179	ΔIIC	›10	14	18
ASTM E90	Airborne Sound	Calculate	54	57

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

•

Surface Preparation

All substrates must be structurally sound, clean and free of dirt, oil, grease, paint, laitance, efflorescence, concrete sealers or curing compounds. Make rough or uneven concrete smooth to a wood float or better finish with a underlayment. Do not level with asphalt based products. Maximum deviation in plane must not exceed 1/4" in 10 ft (6 mm in 3 m) with no more than 1/16" in 1 ft (1.5 mm in 0.3 m) variation between high spots. Refer to Technical Data Sheet 152 “Bonding Ceramic Tile, Stone or Brick Over Wood Floors” (refer to section 10, FILING SYSTEMS).

For concrete floor construction:

To remove any bond-inhibiting materials, clean the surface by mechanically grinding to obtain an International Concrete Repair Institute (ICRI) concrete surface profile (CSP) #2. If the concrete requires further grinding to clean the surface causing a higher CSP, smooth the surface using a slurry bond coat of 254 Platinum or a NXT™ patching or self leveling underlayment.

For wood floor construction:

1. Installer must verify that deflection under all live, dead and impact loads of interior plywood floors does not exceed industry standards of L/360 for ceramic tile and brick or L/480 for stone installations where L=span length.

2. Minimum construction for interior plywood floors.

SUBFLOOR: 5/8" (15 mm) thick exterior glue plywood, either plain with all sheet edges blocked or tongue and groove, over bridged joists spaced 16" (400 mm) o.c. maximum; fasten plywood 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. along intermediate supports with 8d ring-shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3 mm) between sheet ends and 1/4" (6 mm) between sheets edges; all sheet ends must be supported by a framing member; glue sheets to joists with construction adhesive.

UNDERLAYMENT: 5/8" (15 mm) thick exterior glue plywood fastened 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. in the panel field (both directions) with 8d ring-shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3 mm) to 1/4" (6 mm) between sheets and 1/4" (6 mm) between sheet edges and any abutting surfaces; offset underlayment joists from joints in subfloor and stagger joints between sheet ends; glue underlayment to subfloor with construction adhesive. Refer to Technical Data Sheet 152 “Requirements for Direct Bonding of Ceramic or Stone Tiles Over Wood Floors” for complete details.

Application

1. Install FRACTURE BAN™ to a clean properly prepared and primed floor as described in the FRACTURE BAN Primer Data Sheet.

2. Measure the area and cut membrane length 6” to 8” (152-203 mm) longer than needed to allow for a trimmed fit.
3. Lay the pre-cut membrane directly on subfloor with release liner side down.
4. Pull release paper off membrane while hand-smoothing ridges and air pockets to ensure a good bond with 100% contact with subfloor. Once release paper is pulled from membrane an immediate bond will form. It may be extremely difficult to pull membrane from floor once bonded.
5. Trim excess material as needed at walls, corners or termination areas.
6. Apply the next roll in the same fashion as the first roll insuring that the each roll butts up to the previous roll without any gaps.
7. Do not overlap the edges in order to provide a flat surface for subsequent wear surface installation.
8. To ensure a good bond between the FRACTURE BAN and the primed floor, roll the surface with a 75-100 lb. (34-45 kg) floor roller after each section of FRACTURE BAN is installed.
9. Install tile using the appropriate LATICRETE® polymer fortified thin-set.

Perimeter Isolation Strip

When using FRACTURE BAN as an acoustical underlayment it is essential that all walls and building elements are isolated from the floor. The use of acoustical ceiling panels in the space below would provide additional sound control.

Exterior Applications

When applying the NXT® Vapor Reduction Coating according to DS-507 and then install the FRACTURE BAN 40 directly to the surface primed with the NXT® Vapor Reduction Coating. When applying the VAPOR BAN™ Primer ER according to DS-35222 and then install the FRACTURE BAN 40 directly to the surface primed with the VAPOR BAN™ Primer ER. *Note: It is recommended to install a perimeter isolation strip before placing and trimming FRACTURE BAN Membrane. Attach the perimeter isolation strip to the perimeter wall of the entire subfloor, as well as around the perimeter of any protrusions, in order to isolate or break the vibration transmission path between the floor and the wall. Temporarily fasten perimeter isolation strip in place with masking, duct, or carpet tape. The perimeter isolation strip can then be removed after the tiles have set firm. The joints can then be filled with an appropriate acoustical sealant.*

All surfaces must be primed prior to the installation of FRACTURE BAN. FRACTURE BAN Primer is a concentrate and must be diluted with clean potable water prior to application. Always stir or shake FRACTURE BAN Primer concentrate prior to diluting. Water must always be carefully measured in order to ensure proper dilution is achieved. Use a mixing paddle to thoroughly combine primer and water. FRACTURE BAN Primer can be broom, roller, mop, or spray applied. Substrate temperature must be a minimum 40°F (4°C) during primer application and throughout drying time. Additionally, air temperature must be maintained between 50–90°F (10–32°C) during primer application and throughout drying time. The primed surface must also be protected from weather, water and direct sunlight.

6. AVAILABILITY AND COST

Availability

LATICRETE materials are available worldwide.

For Distributor Information, Call:

Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010

For on-line distributor information, visit LATICRETE at **laticrete.com**

Cost

Contact a LATICRETE Distributor in your area.

7. WARRANTY

See 10. FILING SYSTEM:

- DS 025.0: 25 Year System Warranty
- DS 230.05: 5 Year System Warranty
- DS 230.10: 10 Year System Warranty
- DS 230.13: 1 Year Product Warranty

8. MAINTENANCE

Non-finish LATICRETE and LATAPOXY installation materials require no maintenance but installation performance and durability may depend on properly maintaining products supplied by other manufacturers.

9. TECHNICAL SERVICES

Technical Assistance

Revision 1

Real Living Decor Package

Issue Date: Nov 23, 2022
Revision Date:

Item Name	Tile Underlayment
Item Type	Floor Leveling Compound
Description	Premium quality, high yielding, fast-drying, fiber reinforced, cement-based underlayment for skim-coating, smoothing and leveling floor substrates
Manufacturer	Laticrete International
Model	Skim Lite
Dimensions	Not Applicable
Material Composition	Cement-Based, fiber reinforced, with high polymer content
CSI #	09 30 00 Tiling
Omniclass #	22 - 093000 Tiling
Compressive Strength	ASTM C109 1800 to 2100 psi (12.4 to 14.8 MPa)
Structural Performance	Flexural Strength (ASTM C1708) - 900 to 1000 psi (6.2 to 6.9 MPa); Tensile Strength (ASTM C1585) - 300 to 400 psi (2.1 to 2.8 MPa)
Warranty	DS 230.13: 1 Year Product Warranty
Notes	1. For areas up to 4 square feet only: a. Feather finish, use to smooth ridges, fill cracks, gouges and joints. b. Trowelable underlayment patch for thickness up to ½ inch without aggregate; up to 1-inch with aggregate. Can be feather edged. 2. Maximum variation in surface of leveling coat shall not exceed 1/8" in 8'-0" from required plane. 3. Leveling coat shall be cured at least 24 hours before tile is applied. 4. Surface to which leveling coat is to be applied shall be free of any coatings, oil, and wax.

SKIM LITE

DS-506-0721

Globally Proven Construction Solutions

1. PRODUCT NAME
SKIM LITE

2. MANUFACTURER
LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 1235
Toll Free: 1.800.243.4788, ext. 1235
Fax: +1.203.393.1684
Website: laticrete.com

3. PRODUCT DESCRIPTION
Skim Lite is a premium quality, high yielding, fast-drying, fiber reinforced, cement-based underlayment designed for skim-coating, smoothing and leveling prior to the application of floor coverings. Skim Lite offers the customer light weight properties while maintaining strong surface, being rated for caster wheel use. With installer safety in mind, this product contains no respirable crystalline silica levels that exceed the OSHA action level*.

Uses
- Repairs

Advantages
- Rapid setting formula
- Ready for finished flooring in as soon as 20 minutes
- Fiber Reinforced
- High polymer content
- Apply from skim depth to 1” (25 mm)
- Contains no respirable crystalline silica levels that exceed the OSHA action level*
- Caster Wheel Safe
- 40% lighter weight formula
- Fantastic workability and consistent results
- High coverage rate
- Direct replacement for NXT Skim, SUPERCAP SkimCoat, DRYTEK Skimcoat
- Can be applied over Gypsum based substrates

* OSHA action level set forth in OSHA’s Respirable Crystalline Silica (RCS) standard for construction, 29 CFR 1926.1153, as tested by an independent laboratory to be below the OSHA action level for respirable crystalline silica - see laticrete.com/silica

Suitable Substrates
- Cement Backer Board
- Cement Mortar Bed
- Cement Terrazzo
- Ceramic Tile and Stone
- Concrete
- Non-Cushioned Sheet Vinyl
- Vinyl Tile
- Exterior Glue Plywood (Interior Only)
- Gypsum Underlayments
- Oriented Strand Board (OSB) (Interior Only)

Packaging
8 lb. bag / 96 per pallet / individually packaged
Part: 0918-0008-21

Approximate Coverage

Substrate	Coverage at a feather-edge/skim
Smooth Profile (Underlay., Plywood, etc.)	380 SQ FT* (35.3 M^2)
Rough Profile (Concrete, OSB, etc.)	190 SQ FT* (17.6 M^2)

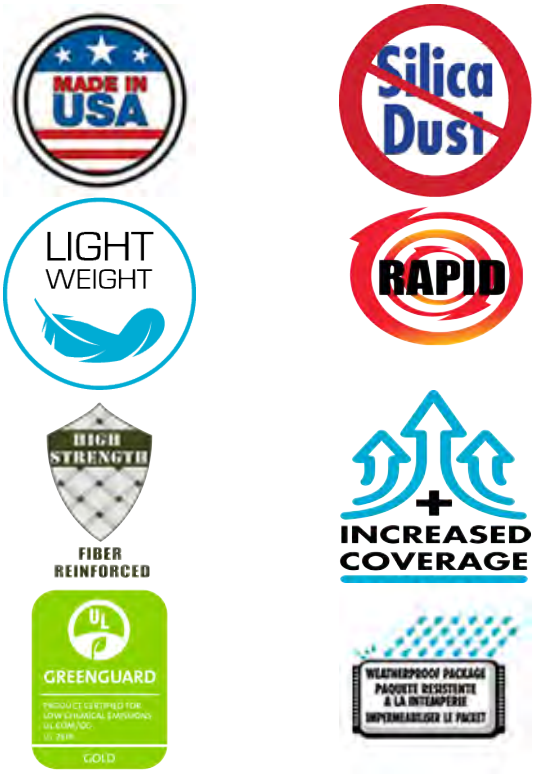
*Calculated coverage indicated is approximate. Coverage will vary depending on the texture of the surface and/or the thickness the material is applied at.

Shelf Life
Factory sealed containers of this product are guaranteed to be of first quality for one (1) year if stored off the ground in a dry area.

Limitations
- For interior use only.
- Do not install LATICRETE® SKIM LITE over particleboard, chipboard, hardboard (Masonite®), Luan panels, asbestos, asphalt, coal tar, or lightweight insulating concrete or any other dimensionally unstable materials.
- Do not install when surface temperature is below 40°F (4°C) or above 90°F (32°C).
- Do not install over painted surfaces.
- Do not exceed recommended mixing ratio as indicated in mixing instructions. Over watering will weaken product properties.
- Do not apply SKIM LITE over waterproofing or crack isolation membranes.
- Adhesives/mastics, mortars and grouts for ceramic tile, pavers, brick and stone are not replacements for waterproofing membranes. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane on top of the dry SKIM LITE.
- Not for use in submerged applications.
- During cold weather, protect finished work from traffic until fully cured.
- Always refer to finished floor manufacturer's recommendations regarding installation instructions, restrictions, moisture conditions and compatibility.
- Always test performance suitability and compatibility of finished floor systems prior to their application. Sample surfaces should be installed as a field test so as to be representative of entire surface and tested for intended use.

Cautions
- Read and understand the Product Data Sheet and Safety Data Sheet.
- Check www.laticrete.com for any technical bulletins or updated information about the product and its application.
- Contact your local LATICRETE Technical Sales Representative with any questions.
- Consult SDS for more safety information.
- Contains portland cement. Causes severe skin burns and serious eye damage. May cause an allergic skin reaction. Wear protective clothing, gloves and eye protection. In case of contact, flush thoroughly with water.
- Do not take internally.
- Keep out of reach of children.

4. TECHNICAL DATA



Physical Properties

Technical Data	Results
Set Time	15 to 20 minutes*
Compressive Strength (ASTM C109)	1800 to 2100 psi (12.4 to 14.8 MPa)
Flexural Strength (ASTM C1708)	900 to 1000 psi (6.2 to 6.9 MPa)
Tensile Strength (ASTM C1585)	300 to 400 psi (2.1 to 2.8 MPa)

*Drying time is a function of jobsite temperature and other conditions such as humidity and/or installation thickness. Low substrate temperatures and/or high ambient humidity will extend the drying time.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Preparing surface for Concrete Substrate
- Clean substrate to eliminate dust, dirt, oil, grease, paint or any contaminants which may inhibit bonding. Do not use chemicals to clean substrate. Remove any loose particles and vacuum.

- Test surface bond strength of substrate. If minimum 100 psi (0.7 MPa) bond strength is not achieved or the substrate is contaminated, remove contaminants by mechanical means. Retest surface.
- Inspect for contraction joints, construction joints, and cracks in the substrate which may be subject to movement after installation of LATICRETE® SKIM LITE. These must be maintained as joints in the new surface.
- Maintain substrate temperature between 40°F (4°C) and 90°F (32°C) during application and air temperature between 50–90°F (10–32°C) during drying. Provide adequate ventilation to ensure uniform drying.
- For very absorptive concrete, apply a fine mist of water on top of the prepared concrete using a pump garden type sprayer, just prior to SKIM LITE application. Concrete should readily absorb water. Broom out excess standing water. Do not apply SKIM LITE where there is standing water on top of the concrete. If water beads or does not absorb within 60 seconds, additional surface prep is needed.

Preparing for poured Gypsum Underlayment

- Tensile strength of the gypsum underlayment must be at least 100 psi (0.7 MPa), tested in accordance with ASTM C1583.
- Any loose or damaged poured gypsum underlayment will have to be repaired.
- All dirt, oil, paint, laitance, efflorescence, sealers, curing compounds, dust, construction debris, and any other bond breaking contaminants must be removed by diamond grinding or shot blasting.
- Use of chemicals to remove contaminants is prohibited. Use of sweeping compound is not recommended as they may contain oil which will act as a bond breaker.
- Water drop test is recommended to determine if concrete is absorptive prior to application. Refer to DS-502_NXT Primer product data sheet for water drop test instruction. If the water drop test yields a non-suction/non-absorptive result the surface must be prepared by diamond grinding or shot blasting.
- Surface temperature must be 50–90°F (10–32°C) during application and for 24 hours after installation. In all cases, the surface temperature of the prepared concrete slab must be warm enough to avoid condensation on the surface of the concrete.

Embossing Non-Cushioned Vinyl Floors and VCT

Completely remove any wax or other coatings. Roughen smooth surfaces. Wash and rinse thoroughly with clean water. Allow to dry.

Preparing Ceramic Tile or Terrazzo

Ensure tiles are well bonded to the substrate. Mechanically abrade with a carborundum disk. Wash and rinse thoroughly with clean water. Allow to dry.

Preparing Non-Water Soluble Cutback Adhesive

Scrape non-water soluble cutback adhesive residue from the floor and remove excess material. Ensure remaining adhesive residue is completely dry.

Mixing

Mix 2.0 qts. (1.9 L) of clean cool water per 8 lb. (3.6 kg) bag of LATICRETE® SKIM LITE. Add product to water and mix for 3 minutes with a heavy duty drill (650 rpm) to obtain a lump free mix.

Note:

- **Material can be re-mixed to extend pot-life but do NOT add more water when re-mixing.**
- **A Helix Paint Mixer is not preferred.**

Mixing with NXT EMBOSSING ADMIX (for embossing non-cushioned vinyl and VCT flooring)

Mix 2.4 qts. (2.3 L) of NXT EMBOSSING ADMIX per 8 lb. (3.6 kg) bag of NXT SKIM. Add SKIM LITE to NXT EMBOSSING ADMIX and mix for 3 minutes with a heavy duty drill (650 rpm) to obtain a lump free mix.

Note:

- **Material can be re-mixed to extend pot-life but do NOT add more water when re-mixing.**
- **A Helix Paint Mixer is not preferred.**

Application

Apply blended material to substrate with trowel at a thickness from feather-edge to 1" (25 mm) for all surfaces. After initial set of material (approx. 10–15 min.), remove all overlap marks, seams and inconsistencies by scraping with a steel trowel. Key in but do not over trowel. Material can be walked on after 15 to 20 minutes at 70°F (21°C) or higher, depending on thickness.

Flooring Installation

Finished floor goods may be installed as soon as 20 minutes after application, subject to thickness, drying conditions and type of flooring materials. Always refer to finished floor manufacturer's recommendations regarding installation instructions, restrictions, moisture conditions and compatibility. Always test performance suitability and compatibility of finished floor systems prior to their application. Sample surfaces should be installed as a field test so as to be representative of entire surface and tested for intended use.

6. AVAILABILITY AND COST

Availability

LATICRETE materials are available worldwide.

MULTIMAX™ LITE

DS-34082-1220

Globally Proven Construction Solutions

1. PRODUCT NAME
MULTIMAX™ LITE

2. MANUFACTURER
LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 1235
Toll Free: 1.800.243.4788, ext. 1235
Fax: +1.203.393.1684
Website: laticrete.com

3. PRODUCT DESCRIPTION
The ultimate, lightweight one-step, polymer fortified, Large and Heavy Tile mortar for interior and exterior installation of ceramic tile, porcelain tile, glass tile, stone, quarry tile, pavers and brick. MULTIMAX LITE features maximum non-sag performance on walls and maximum buildup of up to ¾" (19 mm) without shrinkage on floors. MULTIMAX LITE "contains no respirable crystalline silica levels that exceed the OSHA action level* and has a smooth, lightweight, easy-to-trowel consistency and a long open time for ease of installation. The robust formula is fiber-reinforced for maximum strength and durability, exceeding ANSI A118.15 requirements. MULTIMAX LITE utilizes LATICRETE HYDROMATIC CURE CHEMISTRY™. This technology accelerates the hydration process to rapidly consume the water in the system, allowing the material to cure in a predictable manner. MULTIMAX LITE is a LATICRETE functional equivalent to 255 MULTIMAX and exceeds its performance criteria.
Equipped with Microban Anti-Microbial Protection

***** OSHA action level set forth in OSHA's Respirable Crystalline Silica (RCS) standard for construction, 29 CFR 1926.1153, as tested by an independent laboratory to be below the OSHA action level for respirable crystalline silica - see www.laticrete.com/silica

Uses
- For wall installations of ceramic tile, porcelain tile, glass tile and stone.
- Can be used as a Large and Heavy Tile mortar for flooring installations.
- Ideal for showers, bathrooms and areas where mastic is used.

Advantages
- Lightweight- 25 lb (11.3 kg) bag has coverage of 50 lb (22.7 kg) traditional mortar
- Equipped with anti-microbial technology to protect the treated article.
- Incredible non-sag performance even with heavy tile.
- 40 Minute Open Time
- Smooth creamy
- Exceeds ISO 13007-C2TES1P1 classificatiobn
- lightweight formula.
- Submerged applications
- Exceeds ANSI A118.15 HET, A118.4 and A118.11
- ASTM C627 Extra Heavy (TCNA)
- High shear bond strength.
- Bonds to most substrates
- 25 Year System Warranty**.
- Excellent Large and Heavy Tile performance
- 3/4" (19 mm) thick without shrinkage
- One mortar for Large and Heavy Tile
- walls and thin-bed installations
- Fiber-reinforced for maximum strength and performance
- Ideal for Gauged Porcelain Tile and Gauged Porcelain Tile Panels

Suitable Substrates
- Brick Masonry
- Cement Backer Board
- Cement Plaster/Render
- Cement Terrazzo
- Concrete
- Concrete Block

- Concrete Masonry
- Existing Ceramic Tile and Stone
- Gypsum Plaster
- HYDRO BAN Board
- Mortar Bed
- Properly Prepared Vinyl Or Other Resilient Tile
- STRATA_MAT
- Exterior Glue Plywood (Interior Only)
- Gypsum Wallboard
- Plastic Laminate

Approximate Coverage

	ft^2	m^2
Wall Application 4.9 qts (4.6L) of water		
1/4" x 3/8" (6 mm x 9 mm) notched trowel	50-60	4.6 - 5.5
Large and Heavy Tile Application 5.1 qts (4.8 L) of Water		
1/2" x 1/2" (12 mm x 12 mm) notched trowel	40 - 50	3.7 - 4.6
Thin Bed Applications—5.3 qts (5 L) of Water		
1/4" x 1/4" (6 mm x 6 mm) notched trowel	85 - 95	7.9 - 8.8
1/4" x 3/8" (6 mm x 9 mm) notched trowel	60 - 70	5.5 - 6.5

Shelf Life
Advanced plastic bag provides two (2) year shelf life. (non-rapid versions only) ***High humidity will reduce the shelf life of bagged product.

Limitations
- Not for use directly over particle board, luan, Masonite® or hardwood floors.
- For veneer installations using this product, consult local building code requirements regarding limitations and installation system specifications.
- Adhesives/mastics, mortars and grouts for ceramic tile, pavers, brick and stone are not replacements for waterproofing membranes. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane (see Section 10 FILING SYSTEM).
- Suitable for use with glass tile only when used as a thin bed adhesive. Maximum adhesive mortar thickness not to exceed 3/16" (4.7mm). Follow glass tile manufacturers installation instructions.

Cautions
- Consult SDS for safety information.
- Some marbles and other natural stone have low flexural strength and might not be suitable for installation over wood floors.
- Use LATAPOXY® 300 Adhesive for installing green marble or water sensitive stone and agglomerates, and resin backed tiles and stones.
- During cold weather, protect finished work from traffic until fully cured.
- For white and light-colored stones, use MULTIMAX LITE (white).

4. TECHNICAL DATA

MICROBAN

Silica Dust

Applicable Standard
- ANSI A118.15
- ANSI A118.11
- ANSI A118.4
- ISO 13007-1

Data Sheets are subject to change without notice. For latest revision, visit laticrete.com.

Physical Properties

Test	Test Method	Results
28 day Cure 20 cycle Freeze/Thaw Quarry Tile Shear Strength	ANSI A118.15 7.3.3	400-500 psi (2.7 - 3.4 MPa)
30 minute Open Time	ANSI A118.15 5.3.5	100-125 psi (0.7 - 0.8 MPa)
28 day Quarry Tile Shear Strength	ANSI A118.15 7.3.2	400-500 psi (2.7 - 3.4 MPa)
14 day cure 14 day Heat Age Porcelain Tile Shear Strength	ANSI A118.15 7.2.7	500-600 psi (3.4 - 4.1 MPa)
28 day Cure 20 Cycle Freeze/Thaw Porcelain Tile Shear Strength	ANSI A118.15 7.2.6	425-475 psi (2.9 - 3.2 MPa)
7 day Cure 7 day Water Immersion Shear Strength	ANSI A118.15 7.1.3	325-425 psi (2.2 - 2.9 MPa)
7 day Porcelain Tile Shear Strength	ANSI A118.15 7.2.3	500-600 psi (3.4 - 4.1 MPa)
1 day Porcelain Tile Shear strength	ANSI A118.15 7.2.2	225-275 psi (1.5 - 1.8 MPa)
14 day Cure 14 Day Heat Cure wall tile shear strength	ANSI A118.15 7.1.4	550-600 psi (3.7 - 4.1 MPa)
7 Day Wall Tile Shear Strength	ANSI A118.15 7.1.2	525 -575 psi (3.6 - 3.9 MPa)
7 day Water Immersion Shear Strength, Porcelain Mosaic Tile	ANSI A118.15 7.2.4	350-450 psi (2.41-3.10 MPa)
28 day Shear Bond, Porcelain Mosaic Tile	ANSI A118.15 7.2.5	500-600 psi (3.45-4.14 MPa)
28 day Shear Bond, Quarry Tile/Plywood	ANSI A118.11 4.1.1.2	180-250 psi (1.24-1.72 MPa)
Sag on Wall	ANSI A118.15.6.0	0 in. (0 mm)
28 day Cure Tensile Adhesive Strength	ISO 13007-4.4 4.2	1.5-2.0 Mpa
7 day Cure 21 day Water Immersion Tensile Adhesive Strength	ISO 13007-4.4 4.3	1.0-1.5 Mpa
14 day Cure 14 Day Heat Age Tensile Adhesive Strength	ISO 13007-4.4 4.4	1.5-2.0 MPa
7 day Cure 21 Day Water Immersion 25 Freeze/Thaw Cycle Tensile Adhesive Strength	ISO 13007-4.4 4.5	1.0-1.5 Mpa
Transverse Deformation	ISO 13007-4.4 4.5	3.0-3.5

Working Properties

Property Name	Property Value
Open Time @ 70° F (21°C)	**40 Minutes**
Pot Life @ 70° F (21°C)	**4 hours**
Time To Traffic	**24 hours**

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Surface Preparation

All surfaces should be between 40°F (4°C) and 90°F (32°C) and structurally sound, clean and free of all dirt, oil, grease, paint, concrete sealers or curing compounds. Rough or uneven concrete surfaces should be made smooth with a LATICRETE latex fortified underlayment or leveling mortar to provide a proper finish. Dry, dusty concrete slabs or masonry should be dampened and excess water swept off. Installation may be made on a damp surface. All slabs must be plumb and true to within 1/4" (6 mm) in 10 ft (3 m).

Note: MULTIMAX Lite does not require a minimum cure time for concrete slabs. Expansion joints shall be provided through the tile work from all construction or expansion joints in the substrate. Follow ANSI specification A108.01–3.7 "Requirements For Movement Joints: Preparations by Other Trades" or TCNA detail EJ-171 "Movement Joints—Vertical & Horizontal". Do not cover expansion joints with mortar.

1. Installer must verify that deflection under all live, dead and impact loads of interior plywood floors does not exceed industry standards of L/360 for ceramic tile and brick or L/480 for stone installations where L=span length.
2. Minimum construction for interior plywood floors. **SUBFLOOR**: 5/8" (15 mm) thick exterior glue plywood, either plain with all sheet edges blocked or tongue and groove, over bridged joints spaced 16" (400 mm) o.c. maximum; fasten plywood 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. along intermediate supports

with 8d ring-shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3 mm) between sheet ends and 1/4" (6 mm) between sheet edges at the perimeter; all sheet ends must be supported by a framing member; glue sheets to joints with construction adhesive.
UNDERLAYMENT: 5/8" (15 mm) thick exterior glue plywood fastened 6" (150 mm) o.c. along sheet ends and 8" (200 mm) o.c. in the panel field (both directions) with 8d ring shank, coated or hot dip galvanized nails (or screws); allow 1/8" (3mm) to 1/4" (6 mm) between sheets and 1/4" (6 mm) between sheet edges and any abutting surfaces; offset underlayment joints from joints in subfloor and stagger joints between sheet ends; glue underlayment to subfloor with construction adhesive. Refer to Technical Data Sheet 152 “Bonding Ceramic Tile, Stone or Brick Over Wood Floors”.
Mixing: For walls and Large Heavy Tile applications: Place clean, potable water into a clean pail. Use approximately 4.8-5.0 qts (4.5-4.7 L) of water for 25 lbs (11.3 kg) of powder. (To mix smaller quantities use 3.7 parts powder to 1 part water.) **For Thin Bed applications:** Use approximately 5.2–5.4 qts (4.9-5.1 L) of water for 25 lbs (11.3kg) of powder. (To mix smaller quantities use 3.4 parts powder to 1 part water.) Slowly add MULTIMAX LITE. Mix with a mixer to a smooth, trowelable consistency. Allow mortar to slake for 5 minutes. Remix without adding any more water or powder. During use, stir occasionally to keep mix fluffy. DO NOT temper with water.

Mixing with PERMACOLOR® Select Color Kits (MULTIMAX LITE white only) Requires 2 PERMACOLOR® Select Color Kits. (Each Color Kit contains 2 individual color packets, use all 4 color packets) Place water in a clean mixing container. Remove color packets from the cardboard container as well as the protective plastic sleeve. The internal bag is a water dispersible packet – when using the 25 lbs. (11.3 kg) bag of MULTIMAX LITE, drop all color packs directly in to water in clean mixing container. Mix with a drill mixer until pigment is dispersed evenly in container and the dispersible packet is no longer visible. Add MULTIMAX LITE and mix as directed above. Please note that additional water may be necessary when using PERMACOLOR Select color Kits.

Application: Walls: Key materials into substrate thoroughly. Comb on additional mortar with the notche side, use 1/4" x 3/8" (6 mm x 9 mm) notched trowel. Back butter all tile and stone 8" x 8" (200 mm x 200 mm) or larger to provide full bedding of the veneer. **Large Heavy Tile**: Key the mortar to the substrate with the flat side of the trowel. Press firmly to work into the surface. Comb on additional mortar with the notched side. Use 1/2" x 1/2" (12 mm x 12 mm) or 3/4" (18 mm) half loop trowel. Grouting: Grout installation after a minimum of 24 hours curing time at 70°F (21°C). Grout with PERMACOLOR® Select, PERMACOLOR®Λ Grout, SPECTRALOCK® PRO Premium Grout†, SPECTRALOCK PRO Grout†, 1500 Sanded Grout or 1600 Unsanded Grout gauged with 1776 Grout Enhancer or with water. Cleaning Clean tools with water.

6. AVAILABILITY AND COST

Availability
LATICRETE materials are available worldwide.

For Distributor Information, Call:
Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010
For on-line distributor information, visit LATICRETE at **laticrete.com**

Cost
Contact a LATICRETE Distributor in your area.

7. WARRANTY

See 10. FILING SYSTEM:
- DS 025.0: 25 Year System Warranty
- DS 230.13: 1 Year Product Warranty
- DS 230.15APD: LATICRETE 15 Year Tile & Stone System Warranty
- DS 230.99: LATICRETE Lifetime System Warranty (United States and Canada)

8. MAINTENANCE

LATICRETE and LATAPOXY grouts require routine cleaning with a neutral pH soap and water. All other LATICRETE and LATAPOXY materials require no maintenance but installation performance and durability may depend on properly maintaining products supplied by other manufacturers.

9. TECHNICAL SERVICES

Technical Assistance
Information is available by calling the LATICRETE Technical Service Hotline:
Toll Free: 1.800.243.4788, ext. 1235
Telephone: +1.203.393.0010, ext. 1235
Fax: +1.203.393.1948

Building Product Manual Paint Schedule

***Note** Edit this Paint Schedule to delete products not required for Project. Some of the products listed have lower VOC values, but use may result in higher cost to Project. Designer should evaluate and select appropriate products based on the Sustainable requirements for the Project. It should be noted that colorants may add to the VOC content of some of the products and the actual final VOC levels vary based on the color. Achieving a true 0 VOC content for the final product may not be realistic. Green Seal Standard GS-11 levels exclude colorant and water added at point of sale at this time.*

Note 1. Paints, coatings and primers meet or exceed the VOC and chemical component limits of Green Seal Standard GS-11 (2010) requirements.

Note 2. VOC content when calculated according to 40 CFR 59, Subpart D (EPA Method 24). Clear wood finishes, floor coatings, stains, and shellacs do not exceed the VOC limits of the South Coast Air Quality Management District (SCAQMD) Rule 1113, Architectural Coatings (in effect January 1, 2004). VOC Levels shown are unthinned without colorants, actual levels may vary based on colors used.

Note: 3. Revisions from last version are shown in **BOLD**.

Operating Supplies & Equipment User Guide

Operating Supplies and Equipment (OS&E)
New Build and Conversion Projects

The purchasing business is a competitive industry, driven by attractive pricing, quality products, and flawless execution. The easiest and most cost effective way to handle your Operating Supplies and Equipment is to purchase directly through Marriott's Architecture and Construction (A&C) Procurement Team. The Marriott team is A&C's best advocate. Educating Marriott's owner and franchisee community about A&C Procurement and the unique benefits of working as one team, we can together strengthen our industry relationships, and continue to open competitive, viable Marriott branded properties. For Marriott A&C Procurement, volumes are dependent on performance, and work is awarded by our owners and franchisees on a project by project basis. Leveraging industry expertise, volume pricing, and established relationships, A&C Procurement offers competitive, customer-focused purchasing services at cost-effective prices. What sets A&C Procurement apart from other purchasing firms?

Marriott Alignment

Collaboration goes a long way, and A&C's ability to work side-by-side with Marriott Operations and additional internal teams cannot be duplicated by any other supplier in the business. Responsible for developing and maintaining Marriott's design standards, A&C Procurement can quickly and efficiently meet the needs of the property. Additionally, partnering with Marriott Operations, regional leaders, and opening teams ensures a smooth and seamless move-in, allowing operators to focus their attention on the details that matter most.

Competitive Pricing

Leveraging volume pricing and loyal supplier relationships, A&C offers proven and competitive pricing for the quality specifications identified.

Reduced Budget Risks

Providing preliminary budget guidelines, A&C works with clients to rapidly develop sample budgets, identifying upfront opportunities to generate cost savings.

Loyal Supplier Relations

Unique access to a diverse pool of new and established suppliers provides choice for Marriott owners and franchisees.

Extended Services

A&C's service model extends well beyond simply purchasing. Unlike the competition, a team of knowledgeable support representatives take on the responsibility in **preparing the detailed specification and quantity** list as well as coordinate the warehouse and move in services.

Product Knowledge / Expertise

Solely focused on hospitality purchasing, A&C Procurement has a great depth for the business and Marriott's brands. More than just a team of buyers, an experienced commodity contracting team is dedicated to evaluating suppliers and contracting high-quality, cost competitive products that demonstrate superior durability. Monitoring industry shifts, globally, our commodity contractors work to ensure long-term pricing is maintained long after a hotel opens. – And replenishing is not an afterthought. Products provided at opening are retained for replacement purposes, ensuring uniformity in hotel offerings and a consistent guest experience.

Refined Customer Service

Managing $250M in purchasing volumes, our customer service extends well beyond a property's grand opening. Aligned with Marriott Operations, as well as regional teams and opening managers, we complete projects with ease and strive to provide 100% customer satisfaction.

For further information on the OS&E Purchasing Process and Services through Marriott A&C, please contact Kim Riffle, Director of Purchasing at 301-380-1588 or Kim.Riffle@Marriott.com.

Operating Supplies & Equipment Tools and Resources

Tools and Resources - Operating Supplies & Equipment

Building a new hotel is a massive undertaking, often involving several key players, hundreds of process steps, and thousands of pages in documentation. The submittal process involved in building a new Marriott hotel is extremely valuable to your finished product, and everyone benefits from staying on track with the endeavor, including our guests. Marriott International and Global Design are together dedicated to providing the knowledge and support Owners and Franchisees need to make their endeavors successful. In addition to the information provided here, take advantage of other guiding tools and resources now available:

Lobo:

Simplifying the process for Marriott Owners and Franchisees, Global Design's Website, Lobo, allows Owners, Franchisees, and other consultants to easily and quickly access design guideline documentation and the additional tools involved in building or renovating a Marriott branded hotel. An intuitive tool, Lobo provides a secure system to obtain architectural drawings, specification information, and additional documentation needed by Marriott investors.

Please use the link below and click on "Request Access" to register for a new log-in:
http://globaldesign.marriott.com.

Marriott Global Source (MGS):

Check out Marriott's Architecture and Construction (A&C) channel and access a variety of additional resources, including Design Standards, key contact lists, case studies, timelines, checklists, process information, and more. Access Marriott's Architecture and Construction (A&C) homepage:

The contents hereof are to be returned immediately upon termination of any relationship or agreement giving the user authorization to possess or use such information or materials. Marriott reserves the right to take all actions and seek all available remedies, whether legal and/or equitable, for any unauthorized or illegal use of the Design Guidelines or any of its content.

These documents are intended to serve as a starting point for complete design to be performed by licensed professionals. They have been prepared with the sole purpose of conveying the brand benchmark for this particular product only. The architect, engineer, designer or any other design professional of record is responsible for compliance with any and all laws or regulations of any type or description governing the proposed construction.

These design guidelines may be altered, amended or supplemented by Marriott in its sole discretion from time to time. It is your responsibility to familiarize yourself with the contents of the Design Guidelines and to keep yourself apprised of any and all updates to it on https://lobo.marriott.com.

In the event of any inconsistency or conflict between a provision in these Design Guidelines and any federal, state, provincial, state or local statute, regulation, order or other law, such law will supersede the conflicting or inconsistent provision(s) of these Design Guidelines in all properties subject to that law. All owners/developers should seek independent legal counsel for advice concerning application of and compliance with any applicable law.

Introduction and Overview

This Sign Manual provides the general criteria for selection, sizing, and placement of the exterior signs on the hotel buildings. Sign selection, sizing and placement for custom, conversion, and existing buildings shall be reviewed by one of Marriott's accepted exterior sign suppliers and Marriott Global Design and Project Management Team.

Alternate colors and materials shall not be used on the signage shown in these guidelines. Any request for deviation must be submitted to Marriott Global Design and Project Management Team.

The manual is a guideline for franchisees, owners, and /or their architects and contractors and includes appropriate information for rendering building elevations for the permitting process. This Sign Manual is not intended for fabrication of signs. Contact one of Marriott's accepted exterior sign suppliers and/or Global Design and Project Management Team for procurement and installation information.

There are six types of signs outlined in this manual:

Channel Letters

Channel letters are used on Building exterior signage.

Entry Letters

Serves as a street level brand identification.

Monuments

Ground level monument signage is the main property identifier at street level, locations should be determined based on where the sign can be seen from vehicular traffic and where landscaping can best enhance the monument.

Pylons

Pylons are used in jurisdictions which require them, not a mandatory requirement by Marriott.

Directionals

Directional signs shall be provided to guide vehicular traffic through the property.

Blade signs

Blade signs are to be used in urban markets where exterior landscape is unavailable for a monument or pylon sign.

The selection of colors, materials and formats for TownePlace Suites property signage reflect the stature associated with the brand.

The primary signage structure shall not include non-Marriott brands unless required by code or development agreement. Signs shared by multiple brands shall be reviewed and approved by Marriott Global Design & Project Management prior to jurisdictional review and/or supplier fabrication.

Channel Letters

Channel Letters Size Relative to the Space Available

Design intent is to ensure legibility based on site constraints for sight lines and distances.

New-build design development should include appropriate location and area for sign placement.

Backer board, raceways and wire-ways are not allowed.
Letters to be flush mount on building.

Channel Letter Color

When the building color is light toned the sign letters are black during the day, illuminating white at night (dual-color film) or red during the day, illuminating red at night.

Where the building color is dark toned, white faces by day and night should be used.

Alternate colors and materials should never be substituted on the illuminated channel letters shown in these guidelines.

Size and Placement of the Words “By Marriott”

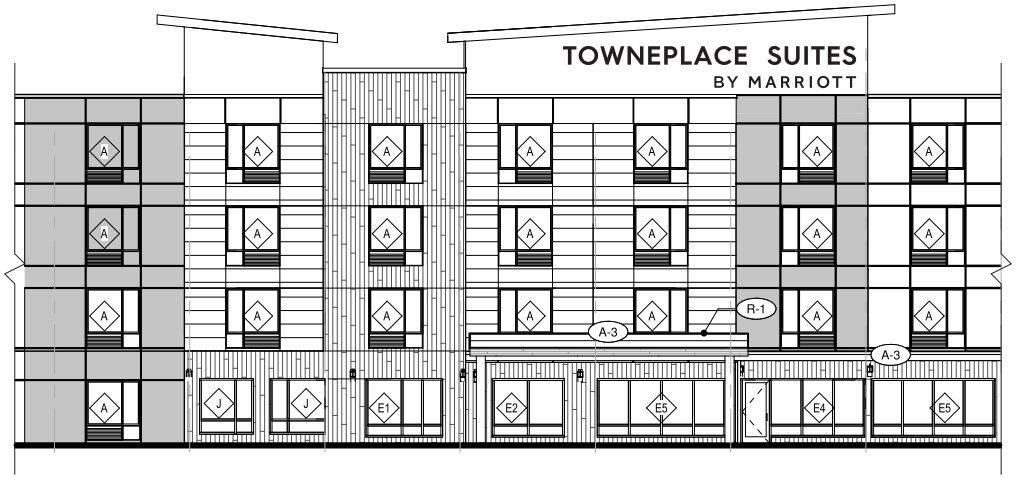
Proportion, size, and placement is included in these guidelines. Any exceptions must be approved by Marriott Global Design Team.

Channel Letter Applications

Black option channel letters on a light tone background.

Letters will appear black during the daytime and will illuminate white at night.

The “By Marriott” channel letters on front building elevation to be right justified to the “TownePlace Suites”.



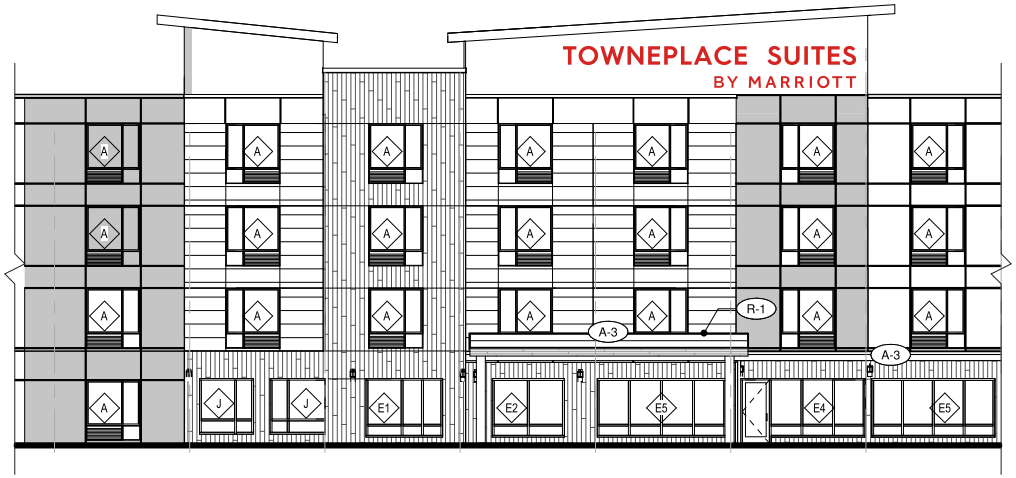
Front Elevation - Daytime View | Letters appear black during the daytime.

Nighttime View | Letters illuminate white at night.

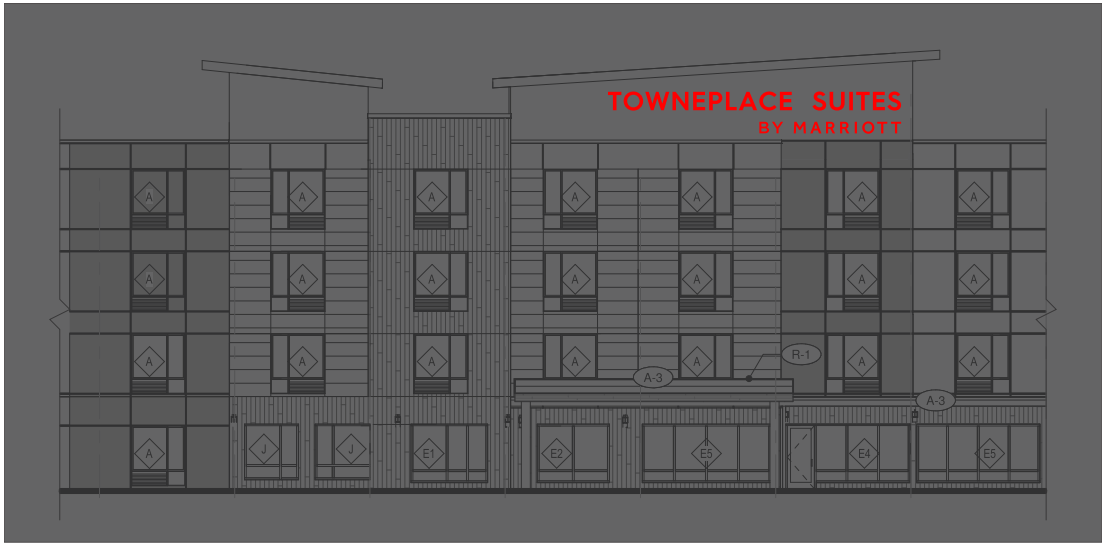
Channel Letter Applications

Channel letters on a light colored background

The “By Marriott” channel letters on front building elevation to be right justified to the “TownePlace Suites”.



Front Elevation - Daytime View | Letters appear red during the daytime.

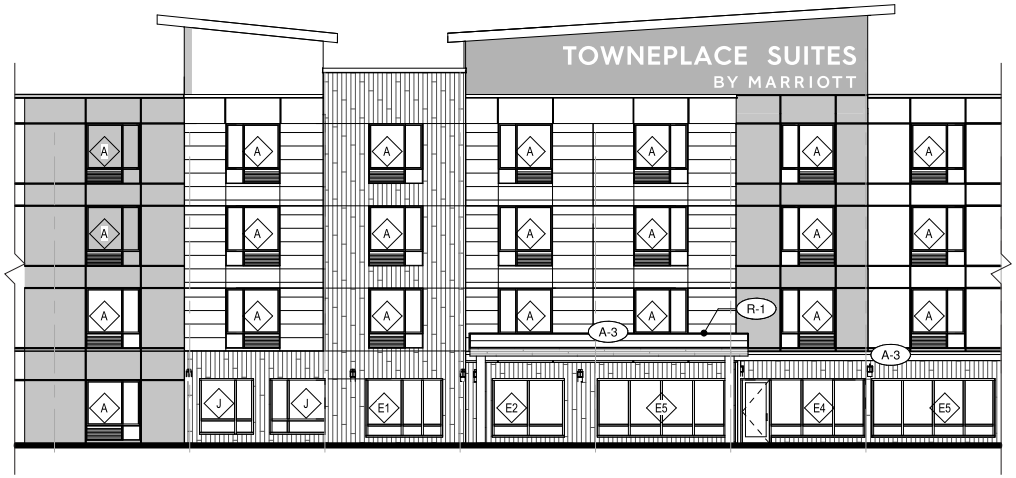


Nighttime View | Letters illuminate red at night.

Channel Letter Applications

Channel letters on a dark colored background

The “By Marriott” channel letters on front building elevation to be right justified to the “TownePlace Suites”.



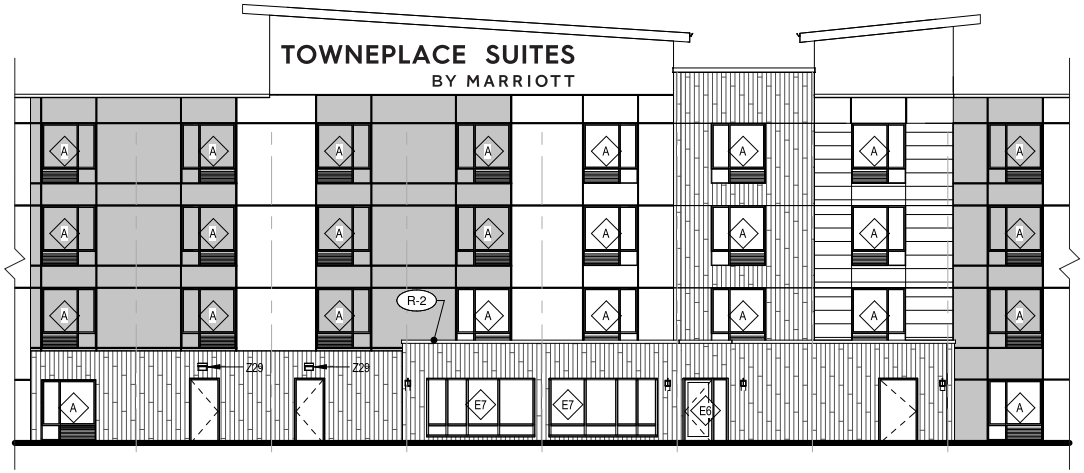
Front Elevation - Daytime View | Letters appear white during the daytime.

Nighttime View | Letters illuminate white at night.

Channel Letter Applications

Channel letters on a light colored background

The “By Marriott” channel letters on rear building elevation to be right justified to the “TownePlace Suites”.



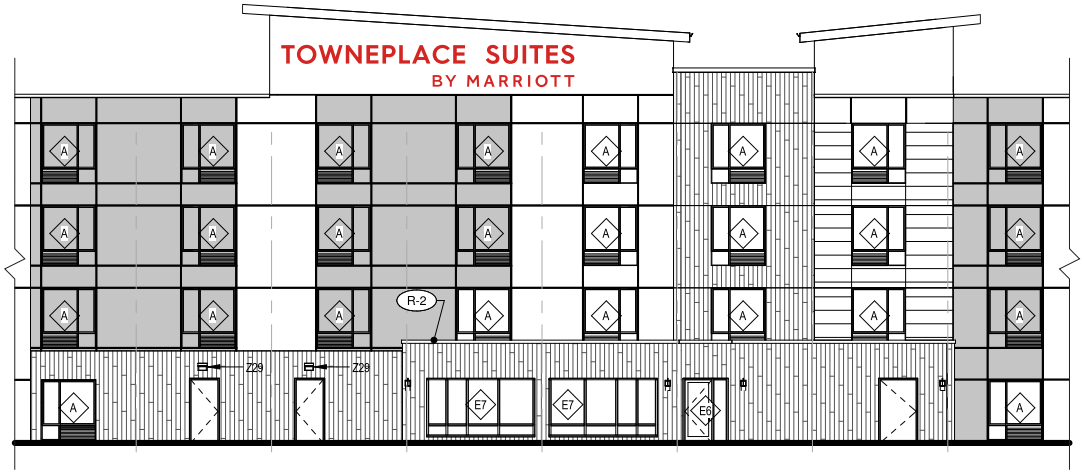
Rear Elevation - Daytime View | Letters appear black during the daytime.

Nighttime View | Letters illuminate white at night.

Channel Letter Applications

Channel letters on a light colored background

The “By Marriott” channel letters on rear building elevation to be right justified to the “TownePlace Suites”.



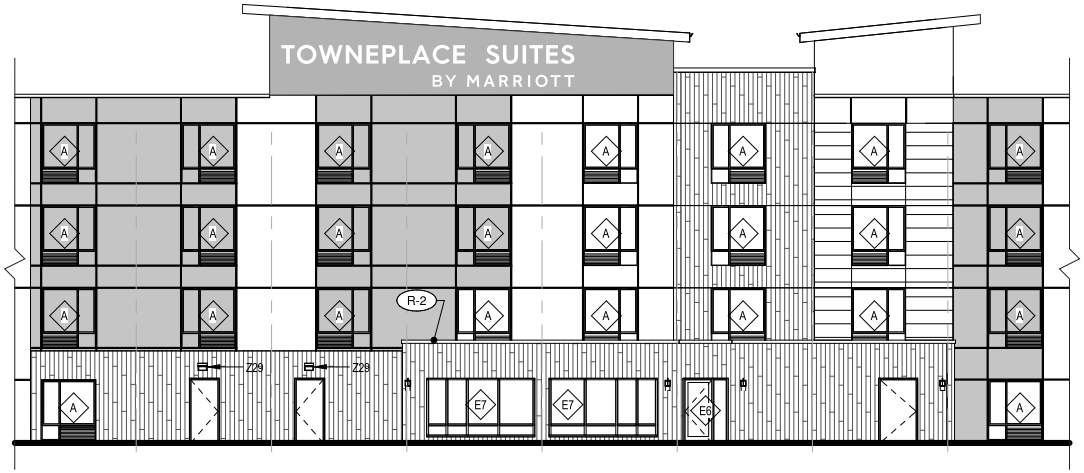
Rear Elevation - Daytime View | Letters appear red during the daytime.

Nighttime View | Letters illuminate red at night.

Channel Letter Applications

Channel letters on a dark colored background

The “By Marriott” channel letters on rear building elevation to be right justified to the “TownePlace Suites”.

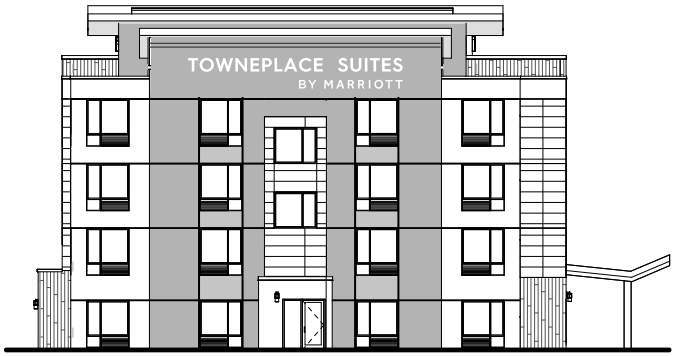


Rear Elevation - Daytime View | Letters appear white during the daytime.

Nighttime View | Letters illuminate white at night.

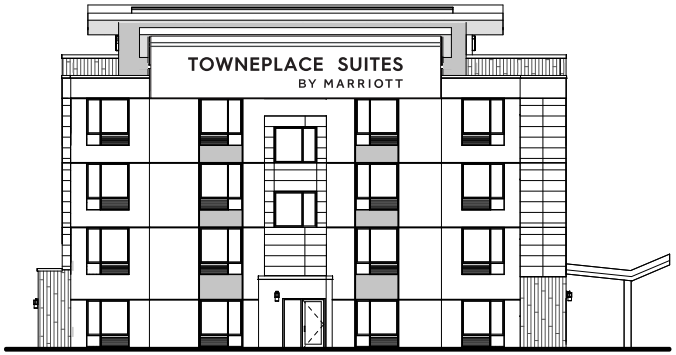
Channel Letter Applications

Channel letter colors to be chosen accordingly based on whether background is light or dark per exterior color schemes chosen.



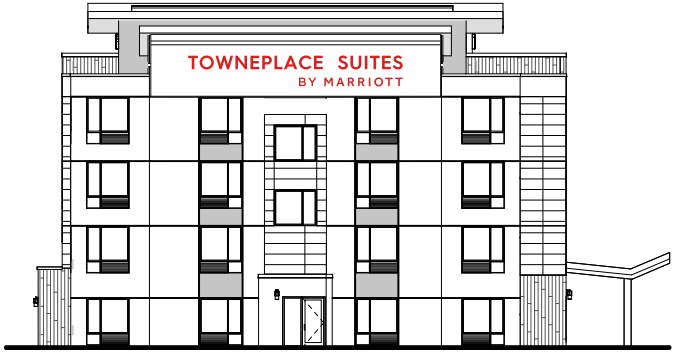
End Elevation

For Dark Colored Building Backgrounds | Letters to appear white during the day and illuminate white at night.



End Elevation

For Light Colored Building Backgrounds | Letters to appear black during the day and illuminate white at night.



End Elevation

For Light Colored Building Backgrounds | Letters to appear red during the day and illuminate red at night.

Building Channel Letters

Channel Letter Specifications:

Construction:
.040" aluminum channel letter with .063” with aluminum backs/ 1.5-2.0mm aluminum channel letter cases

Face Material:
3/16" 2447 white acrylic
or 3/16” Plaskolite 2406 white acrylic/ 3-4mm 30% translucent opal acrylic

Trim Cap:
1" black/ factory painted black trim cap

Illumination:
GE 7100K White LED’s as required
or Sloan Prism 24 6500K White LED’s as required

Exterior Finish:
Pre-finished black

Interior Finish:
Paint reflective white

Channel Letter Face Specifications:

Face Material:
3/16" 2447 white acrylic or 3/16” Plaskolite 2406 white acrylic/ 1.5-2.0mm aluminum channel letter cases

Interior Signage Specifications

These design guidelines and all materials, procedures, systems and content herein contained or depicted (the "Design Guidelines") have been prepared for and/or developed by Marriott International, Inc. or its affiliate ("Marriott"), and are the sole and exclusive property of Marriott, which owns all right, title and interest therein, including all copyright, and which reserves all rights herein. All contents should be used only as authorized by Marriott and should not be copied either in whole or in part without its written consent.

The content herein may be protected by patent, trademark, trade secret, copyright, or other intellectual property and proprietary rights and laws, and is the private and confidential property of Marriott. The contents contain proprietary trade secrets that are the private and confidential property of Marriott. Unauthorized use, disclosure, or reproduction of any kind of the Design Guidelines or any contents or material contained in these Design Guidelines is expressly prohibited. The contents hereof are to be returned immediately upon termination of any relationship or agreement giving the user authorization to possess or use such information or materials. Marriott reserves the right to take all actions and seek all available remedies, whether legal and/or equitable, for any unauthorized or illegal use of the Design Guidelines or any of its content.

These documents are intended to serve as a starting point for complete design to be performed by licensed professionals. They have been prepared with the sole purpose of conveying the brand benchmark for this particular product only. The architect, engineer, designer or any other design professional of record is responsible for compliance with any and all laws or regulations of any type or description governing the proposed construction.

These design guidelines may be altered, amended or supplemented by Marriott in its sole discretion from time to time. It is your responsibility to familiarize yourself with the contents of the Design Guidelines and to keep yourself apprised of any and all updates to it on https://lobo.marriott.com.

In the event of any inconsistency or conflict between a provision in these Design Guidelines and any federal, provincial, state or local statute, regulation, order or other law, such law will supersede the conflicting or inconsistent provision(s) of these Design Guidelines in all properties subject to that law. All owners/developers should seek independent legal counsel for advice concerning application of and compliance with any applicable law.

Overview

This document provides the information to assist in obtaining Marriott International approved brand standard signage for your property. These standards are intended to promote brand unity and to reflect the quality and image of the Marriott International brand. The specifications focus on interior sign requirements with exterior signage limited to various pool, parking and informational elements. Any deviation from these specifications requires review and approval by your Marriott Global Design contact. These specifications will provide you a basic understanding of the interior signage requirements. This document is not anticipated to provide all the knowledge required for successful signage project execution.

New Builds, Conversions & Renovations

Signage for your facility is an integral part of the Guest experience while promoting the brand. Signage is also required for occupancy as there are numerous Life Safety codes to adhere to. Accessibility compliance and other safety communication elements are also required. The detailed planning and code requirements for your property can best be achieved by utilizing professional planning. Planning may be obtained from our accepted sign suppliers.

The following steps are a guide to the sign planning process:

- Review of property plans
- Determination on local code requirements
- Understanding of ADA
- Understanding of brand standards
- Wayfinding and Orientation planning expertise
- Planning and documentation of specific sign requirements
    - Message schedule development
    - Location Plan development
- Estimating
- Evacuation map development
- Project Management

Maintenance Updates

Sign replacement may be required as you maintain your property. Contact an accepted sign supplier for these maintenance and smaller renovation/construction signage requirements. Refer to Lobo for a list of accepted sign suppliers.

Sign Categories

Signage requirements can more easily be understood and selected by understanding the various sign categories, covered in depth on the following pages.

- Identification (general and guest rooms)
- Directional / Wayfinding
- Informational
- Life Safety & Loss Prevention
- Guest Services (Pool, Fitness, etc)
- Specialty
- Exterior and Miscellaneous

Accessibility

Only accepted sign suppliers can manufacture signage for Marriott properties. The accepted sign suppliers are responsible for Regulation Compliance including, but not limited to, the Americans with Disabilities Act, NFPA, ICC, ANSI, and state and local codes. The signage manufacturer, in the event dual language signage is required, is responsible for translations and signage layout complying with local codes for the location of the property.

For detailed requirements regarding ADA compliance in the U.S. and U.S. territories, see www.ada.gov. Outside the U.S. and U.S. territories, be sure to follow local jurisdiction requirements. Always review detailed requirements regarding ADA compliance in the U.S. and U.S. territories, because they are always changing.

ADA Signage Requirements Address

- Adequate text sizes
- Sufficient message and background contrast
- Provision of tactile copy and Grade II Braille

Permanent Room ID Signs

All signs that designate permanent rooms and spaces whose function will not change must comply with the ADA and ICC signage guidelines. Room ID signs are required by federal and state law: ICC A117.1 - 2009, § 703.

Examples Of Permanent Rooms & Spaces:

Guest Room ID, General Room ID, Stairs, Restrooms, Meeting Rooms, etc.

Tactile/Visual Character:

Permanent room ID signs require both visual and tactile characters. Either one sign with both or two separate signs shall be provided. Tactile restroom signs are required by federal and state law: ICC A117.1 - 2009, § 703. CA All Gender Door Signs are required by California Building Code: 11B-703.7.2.6.

Scope of ADA:

The ADA signage guidelines are primarily intended to make facilities accessible to the blind and visually impaired. These guidelines specifically apply to the U.S. and all U.S. territories. Properties outside the U.S. must comply with local laws.

Overview:

All existing and new signage should be surveyed to verify compliance with these guidelines. All signage that does not meet the guidelines specified in this manual should be replaced.

Directional/Informational Signs

All signs providing direction to, or information about, functional spaces of the building or site must comply with ADA and ICC signage guidelines. Directional signs are required to meet the visual standards under accessibility guidelines. Overhead signs are not required by accessibility guidelines; but if used, these signs must comply with the visual standards (ICC A117.1 - 2009, § 703.2).

Examples of Directional/Informational Signs:

Public Space Directional, Guest Corridor Directional, Elevator Directory, No Smoking Signs, Caution & Warning Signs, etc.

Visual Characters:

Directional/Informational signs require only visual characters. Tactile graphics and Braille are NOT required.

Accessible Entrance:

The Accessible Entrance sign and its various versions are required by accessibility guidelines for applicable locations (ICC A117.1 - 2009, §703.6.3.1).

Overall Design

The materials, colors, finishes and fonts shown here are required to meet the brand standards required by Marriott International.

Notes

Refer to technical drawing specs for detailed production information such as dimensions, fabrication materials, and mounting hardware.

Room Identification

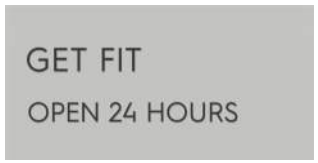
These signs are used and required by ADA to identify all permanent rooms and spaces. ADA requires these signs to have upper case, tactile letters with corresponding Braille translations for the room title. They also have specific mounting requirements to be compliant, see appendix for additional information.

Guest Room Number
4”h x 4”w

1-2 Line Room Identification
3"h x 6"w

1-2 Line Room Identification
3"h x 8.5"w

3-4 Line Room Identification
8"h x 10"w



Room Identification Open 24 Hours

Life Safety Signs

These signs are required by Building Codes to identify and provide information for egress and safety. ADA regulations also apply. The sign standards shown meet the general Life Safety code requirements but may vary by local and state jurisdictions. You are encouraged to consult with your sign supplier and local authorities to ensure the proper signage is posted.

All signs on this page are required by state building/fire code regulations (Chapter 10, "Means of Egress"). The overall design of Elevator Evacs and the Guest Room Evac Maps may change based on state and city codes.

Elevator Evac - Exits
14"h x 11.75"w

Elevator Evac - Stairs
14"h x 11.75"w

Guest Room Evac Map
12"h x 4.375"w

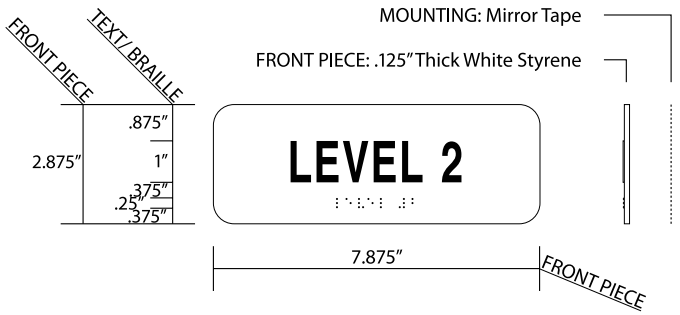
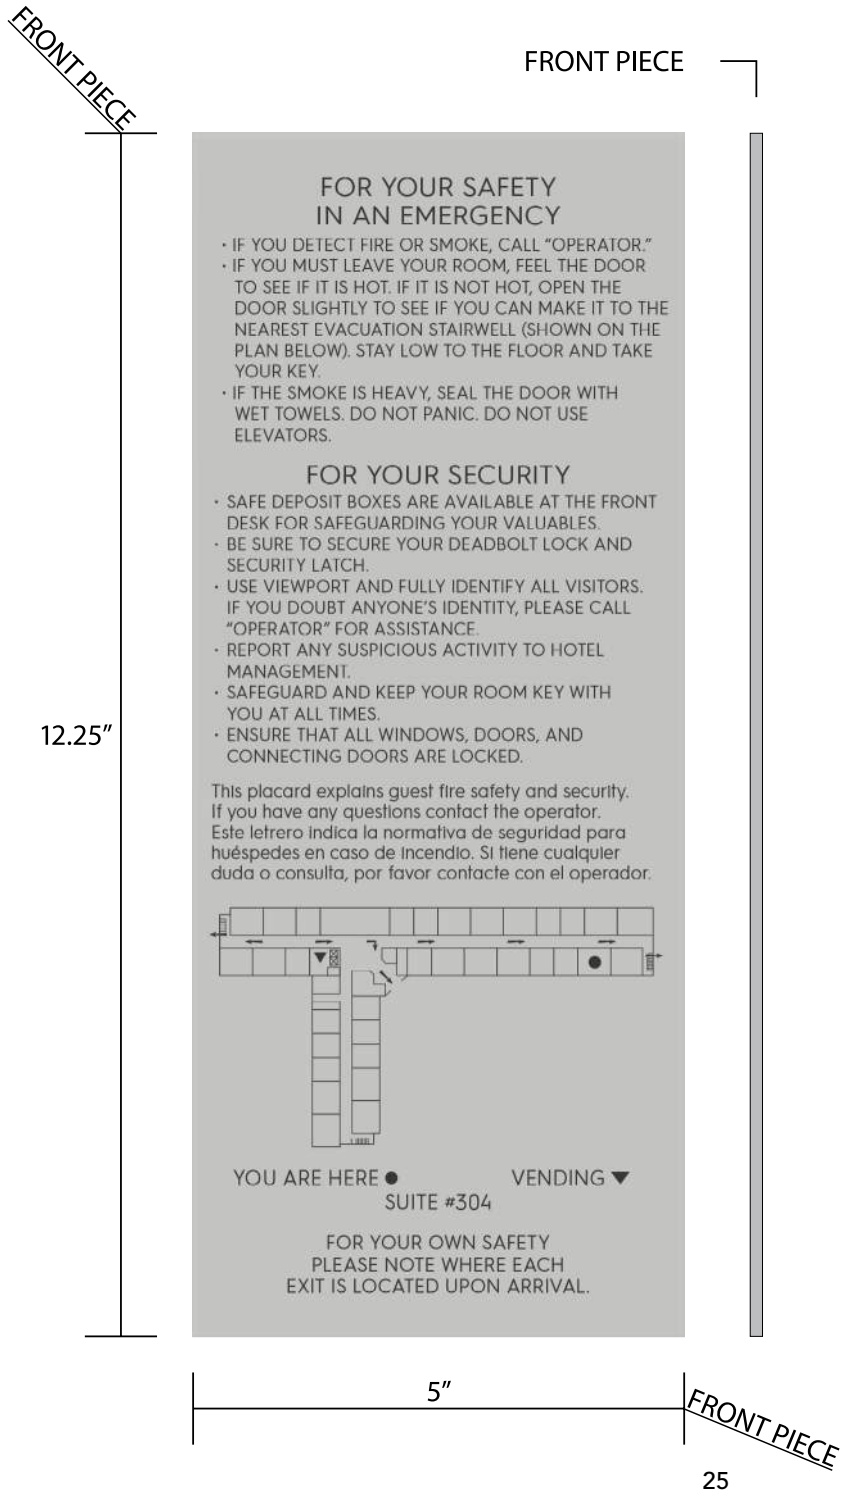
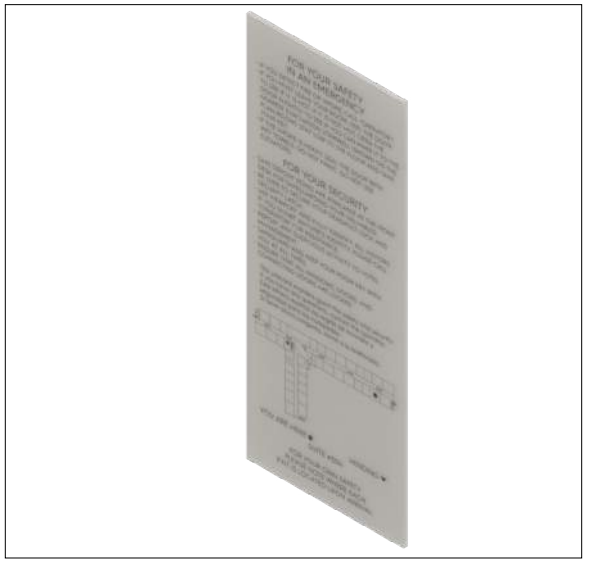
Elevator Evacuation Map
14"h x 11.75"w



Stair Identification & Level Sign
18"h x 12"w, 2.875"h x 7.875"w





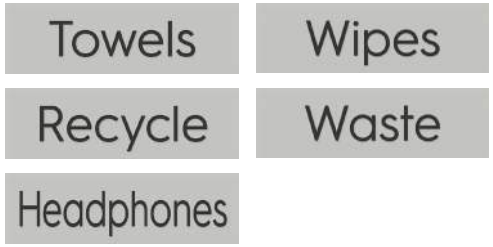
Guest Room Evac Map
12.25"h x 5"w

Fitness Center

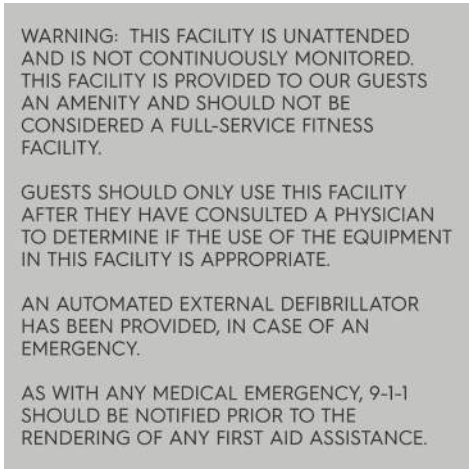
These signs inform guests of the rules, regulations and amenities in the Fitness Center. These signs should match the design of, and be consistent with, the other signs in your sign system. Signs should be constructed of .080" thick aluminum or Fiberbrite with fence mounting brackets and have face applied 7-year exterior grade vinyl, screen printed graphics or digitally printed graphics.

The Fitness Center Rules and the Automated Defibrillator signs are dependent upon the hotel's needs.

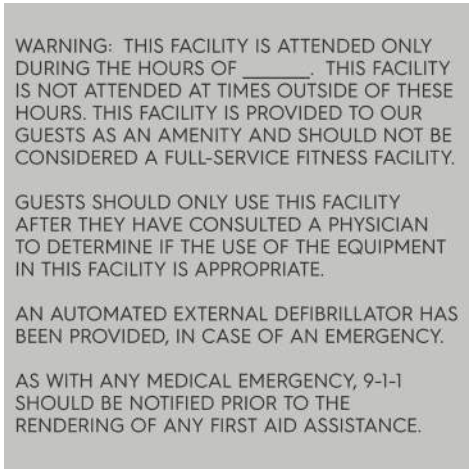
Fitness Center Rules
23.875"h x 23.875"w



Towels & Wipes
1.5"h x 5"w



Automated External Defibrillator
Fitness Center Unattended
20.875"h x 20.875"w



Automated External Defibrillator
Fitness Center Attended
20.875"h x 20.875"w

Swimming Pools

These signs inform guests of the rules, regulations and amenities in the Swimming Pool Area. The text shown is brand approved, but requirements vary greatly from state to state. You are encouraged to consult with your sign supplier and local authorities to ensure the proper signage is posted.

Most states provide rules and regulations concerning swimming pool signage. The signs needed and the verbiage is largely influenced by the respective state law, so each of these signs is dependent upon the hotel's city and state codes.

Pool Area Use Rules
23.75"h x 23.75"w

Whirlpool Spa Rules
36.875"h x 33.875"w

No Lifeguard
17"h x 36"w

No Diving
15"h x 15"w

Parking Signs

The signs shown are select standard signs that appear at the porte-cochère and arrival parking area. Additional signs may be required as part of your separate exterior sign package. You are encouraged to consult with your sign supplier and local authorities to ensure the proper signage is posted and is applicable to your exterior conditions.

The clearance sign is required if there is a portico, the others are dependent upon the hotel's needs.

Guest Registration Parking
18" x 12"

Parking Notice
15" x 15"

Clearance for Porte-cochère
10" x 60"

Sign Installation

The ADA specifies the mounting heights and locations of signs, based on the type of sign being used. These requirements apply to the majority of interior signs. Any questions about the installation of a specific sign type may be directed toward your sign supplier.

chapter organization

- This chapter is a part of an integrated series of Chapters.
- This chapter is a part of an integrated series of Chapters.

definitions

- Design Standard: a minimum requirement to be fulfilled without exception
- Best Practice: a recommended design guideline, practice or way to execute a design standard
- Expanded Information: an explanation of a design standard or best practice
- Reference (internal): a reference to another document / section within the design standards or to a design strategy / guide within the brand standards

  Exception: Fire Protection & Life Safety Design Standard references are to external codes only

Marriott Confidential & Proprietary Information

The contents of the Design Standards are confidential and proprietary to Marriott International, Inc. and may not be reproduced, disclosed, distributed or used without the express permission of an authorized representative of Marriott.

English is the official and binding language of these design standards. The translated versions are provided as a courtesy only and are not controlling and have no legal effect.

16.1 Overview

A. Purpose: This Chapter of the Design Standards is designed to inform and communicate Marriott International's Safety & Security minimum design standards for new build properties and conversions / property improvement plans.

1. The minimum design standards described in this chapter have been developed to help provide safe and secure properties for guests and employees.

2. The safety & security standards and best practices mitigate or eliminate risk factors associated with likely threats and incidents which holistically enhance guest and employee safety & security.

B. Global Safety & Security - Security Design Process: All projects are initiated with a project specific Risk Assessment.

1. Managed Properties: The Risk Assessment sets the foundation of the Functional Requirements Report which states the relevant safety & security measures required for that particular managed property. The following is an overview of the Global Safety & Security (GS&S) design process for managed properties.

2. Franchised Properties: Comply with the Risk Assessment and the requirements in this Chapter.

C. Design Integration: The Design Standards are organized into complementary chapters to facilitate the integration of design requirements into the design process. Design Standard chapters provide design criteria, facility requirements and general material qualities that facilitate the development of the final design and documentation.

1. EI This chapter (Safety & Security) is intended to be used in conjunction with the current set of chapters that comprise each brand's MI Design Standards.

D. Local Regulation Compliance: Comply with and integrate governing laws, codes and regulations into the project safety and security measures. See Overview & Project Administration <GR1> for the "Code & Regulation Compliance" section. If conflicts arise, notify a member of Marriott International's Global Safety & Security (GS&S) Security Design (SD) team for resolution.

E. Accepted Manufacturers and Specifications: Equipment must be procured using only Marriott International Global Safety & Security accepted brands. Contact Security Design Services for the latest list which is amended on a quarterly basis.

16.2 Access Control

A. Application: Access Control provides selective limits and constraints on the property, facilities and individual rooms.

1. Methods: Access is controlled or monitored with the aid of a physical constraint or equipment such as a storage cabinet lock, an electronic door lock, manual key lock, gates or roller shutters.

    a. Accepted Manufacturers: Equipment must be procured using only Marriott International Global Safety & Security accepted brands.

2. Location: The Security Office / Security Control Center is the primary location for managing access control and security systems. The telephone operators or Call Center may serve as a secondary monitoring location.

B. Site & Building Access: Provide site access controls on the property and within the property buildings.

1. Site Access: Dependent on the Risk Assessment of the property, the following measures will be required. Refer to the functional requirement(s) of each property.
    • Site perimeter wall / fence demarcation
    • Site perimeter vehicle and pedestrian gates
    • Vehicle building entrances equipped with barriers, gates and / or roller shutters
    • Loading bay areas with partition from general parking, and roller shutters at the loading dock platform

2. Parking Structures: (See <1>.) Provide facilities, measures and access controls based on the Risk Assessment Functional Requirements.

3. Exterior Doors: Must have the capability to be secured from the outside and designated egress doors must have the appropriate panic hardware to allow persons to egress in accordance with Marriott's Fire Protection & Life Safety requirements.

4. Pools & Recreational Areas: (See <4C>) To mitigate access by unauthorized persons, provide controlled access at the perimeter of swimming pool, whirl pool, deck areas and recreation facilities. Provide controlled access to avoid entrance conflicts, and allow means of egress paths from the building to exterior through the pool area.

5. Heating, Ventilation & Air Conditioning (HVAC): See <15A> for criteria for locating outside air intakes to mitigate the possibility of allowing undesirable contaminants.

marriott international. all rights reserved. August 2023

6. Utilities: Secure and control access for site utilities including but not limited to the following.
   • Domestic Water System
   • Gas Supply
   • Electric Supply
   • Telephone System
   • Generators and Fuel Supply Tanks

C. Electronic Access Control:

1. System integration:
   • Access Control Points - Integrate with video surveillance camera, where applicable, and provide the access control software.
   • Access Control Alarm - Activate video surveillance camera for ease of monitoring.

2. Electronic Lock System: Refer to Mobile Key Certified Lock Standard implementations in MGS.

3. Guestroom Entries: Provide certified models for the RFID lock systems with BLE (Bluetooth Low Energy) as listed in the Mobile Key Certified Lock Standard.

4. BP Network locks are highly recommended, but not required.

5. RFID (radio-frequency identification), proximity activated, on-line (network) ready Guestroom and guest facility access locks are required

D. Electronic Access Control System Components & Locations:

1. System PC Control: Integrate lock server with property management system. Include a handheld lock programmer and interrogator unit.

2. Mini-terminal, Room Controller: Provide one for each of the following if applicable:
   • Front Desk, Check-in Station
   • Concierge Desk
   • Guest Floor Lounge
   • Front Office at Rooms Control
   • Security Office/Security Control Centre

3. Card Encoders: Provide at each mini terminal, plus system PC.

E. Guestroom Entry Lock Components: Review locking schemes and the interface with the PMS with Marriott International. See <13A>.

1. Locks include the following:
   • Stand-alone battery-operated ANSI 4 switch mortise (to allow events like inside door opening and door ajar also recorded in audit trail)

- Automatic Dead Bolt (ADB)
- 2.5 cm (1 inch) dead bolt length
- 1.9 cm (3/4 inch) latch length
- Accessible type lever handles
- Faceplate and trim
- No exposed fasteners
- Electronic, multi-technology, operated lock with audit trail and minimum of 500 recalls
- No master hard key cylinder

F. Access Control Front-End:

1. Non-Guestroom Door Locks:
   - Electronic Guestroom door locks may be used at other locations within the property. However, locks must exclude the automatic dead bolt.
   - Guest Facility Areas: Provide Marriott Mobile Key Certified RFID with BLE key reader.
   - Remote Access Readers (RAR): Card RARs can be used to secure doors, except at Guestrooms. These may also be required where locks cannot mount on doors or where fail-safe passage (emergency ingress) is required.

2. Remote Access Readers (RAR): Related devices are as follows:
   - Card Access Reader: Mounted on adjacent wall.
   - Power Supply (Overhead): Design for specified door latch.
   - Design the electric strike, electronic locks and magnetic lock for the specified door
   - Door Contact Sensor: Design for specified doors with magnetic locks
   - Panic Exit Device: Electrified Mechanical Design for specified door
   - Fire Alarm Signal: Route to specified door
   - Supplemental Equipment: As required by system design or regional conditions

3. Remote Access Readers (RAR) Locations: Provide at the following locations and as dictated by individual property requirements:
   - Fitness Center
   - Swimming Pool Area
   - Remote Guest Entrances
   - Guest Floor Lounge
   - Business Center
   - Employee Entrance
   - Ballrooms & Meeting Spaces
   - Elevator Control Unit (ECU)

G. Electronic Lock System - Locations: Provide at the following locations (not all properties require spaces as listed).

marriott international. all rights reserved. August 2023

1. Front of House (FOH):
   - FOH Office from FOH area
   - Parking structure vestibule
   - Fitness Center Reception Area
   - Meeting Rooms
   - Ballroom & Function Rooms (Upon Security Design Services review)
   - Business Center
   - Guestrooms and Suites
   - Suite Pantry
   - Guest Main and / or Side Entrance (dependent on operating conditions).
   - Inside guest lifts / elevators: Access control system must provide capability to program access to specific floors, not only groupings.
   - Executive Lounge
   - Swimming Pool and Guest-only sport & recreational areas
   - Kids Club
2. Back of House (BOH)
   - Banquet Storage
   - Guestroom Corridor entering Service Elevator Area
   - Guest floor Linen Storage and / or Housekeeping Room
   - Guest floor Linen Chute Room
   - Executive Offices staff entry (Finance, HR, etc.)
   - Nurse and Medical Rooms
   - Contract Service Storage (outsourced contractor)
   - Ancillary and Main Receiving Room / Office
   - Maintenance / Engineering Office, Workshop and Storage
   - Bulk refrigerated storage (if applicable)
   - Dry Storage
   - Telecom Equipment
   - MATV system Room
   - Staff Entrance
   - Inside Service Lifts / Elevators
   - Access to BOH Corridors from FOH / Public Areas, and from loading bays.
   - Roof access enclosure
3. Valuable & Sensitive Areas:
   - Luggage Room
   - Lost and Found Room
   - Banquet Beverage Storage
   - Liquor Storage
   - Silver Storage
   - A/V Storage
   - Sound System Equipment Room
   - Guest Safe Deposit Box Room (staff entrance)

• Cash Counting Room
• Guest Package Storage
• Computer Room / IT Room and Server / Data Center Rooms / IDF Rooms
• Control Rooms: Building Management System, Fire Command Center (FCC), and Security Control Room (CCTV Room)
• Security Office at Loading Bay

4. BP No Master Keys: For the following locations (not all properties have spaces as listed), exclude master keys or electronic master key access.
• Gift Shop
• General Manager (GM) Office
• DOF / Controller Office
• General Cashier Office
• Director of Human Resources Office
• Human Resources Office
• Food Storeroom
• Beverage Storeroom
• Lost and Found Room
• Computer Room

H. Other Lockable & Secure Spaces (non-electronic):

1. Provide controlled access to the following (not all properties require spaces as listed).
• Meeting and Event spaces (per Security Design review)
• Guestroom Balcony, Patio, and / or terrace doors (primary and secondary lock)
• Guest Safe Deposit Box Viewing Room door with remote release
• Receiving Area / Loading Bay - provide doors / gates to secure from pedestrian and vehicle access
• Food Production Facilities / Kitchens
• Service Bars
• Storage Cages
• Exterior doors: Securable, latching hardware, NFPA approved for that application
• Guestroom Connecting Doors: Provide a 25.4mm (1 inch) deadbolt and 19mm (¾ inch) latch with thumb turn located on guestroom side only. Password or PIN type access control readers not permitted.

I. Door Vision Panels & Viewports: Provide enclosed areas with visual access at doors for the following locations (not all properties require spaces as listed),

1. Back of House: Provide visual access at high volume, 2-way traffic doors.

2. Door Vision Panels:
• Restaurant Service Entrance

marriott international. all rights reserved. August 2023

- Food Production Storage (Cold room) Walk-In Unit
- Guestroom: Viewports with privacy covers
- Guestroom floor ice dispensing and vending
- Guest Laundry
- Cashier Area
- Counting Room / Area
- Guest Safe Deposit Box Room / Area
- Employee Break Room

J. Elevators: (See <7B> and <12>.) Comply with the following.

1. Emergency Medical Evacuation: Size elevator cab and door openings to accommodate stretcher movement from each floor. See governing code for stretcher requirements.

2. Mixed-Use Projects: Do not share guestroom floor elevators with other building uses. For mixed-use projects, where stairs might be shared for evacuation purposes, contact regional Global Safety & Security, Security Design for advice and guidance.

3. Parking: Passenger shuttle elevators serving parking structures do not access Guestroom floors but terminate as close as possible at the main Lobby entry within view of the Front Desk.

K. Emergency Staircases:

1. See the MI Fire Protection & Life Safety policy. Emergency staircases have unrestricted re-entry at each floor and staircase doors must be unlocked with free access both ways.

2. As a minimum, provide panic hardware on the discharge door from the emergency staircase for egress to the exterior. Access to the emergency stairwell is restricted from the exterior to interior of the staircase at the discharge level.

3. Each project is different in terms of size, occupancy type and layout, etc. Emergency staircase re-entry requirements are agreed in consultation with MI FLS and GS&S, therefore each project design team must contact their regional MI Global Safety & Security, Security Design representative for advice and guidance.

16.3 Safety - Features & Design Elements

A. Safety Information Signage: Provide safety information signage at the following locations and at areas identified by the Risk Assessment Functional Requirements.

1. Locations:

   a. See signage and graphics specifications.
      • Fitness Center
      • Swimming Pool Areas
      • Whirl Pools
      • Guestrooms
      • Guestroom Balconies
      • Outdoor Recreation Facilities
      • Fire Pits
      • Fireplaces

   b. Distraction Graphic: Apply a brand approved logo or pattern, at 5'-0" (1.5 m) height AFF, to full height clear glass doors and glass panels. Pattern may be an applied film or embedded into the glass and must meet local code requirements. Coordinate design with MI project team and submit for acceptance.

2. Parking Structures: See <1>.

   a. Pedestrian: Coordinate vehicle signage with pedestrian and overall project signage planning requirements and specifications.

   b. Low Clearance: Provide signs to warn drivers of low clearance areas.

3. Evacuation Plan: Provide Guestroom evacuation plan with American Hotel Lodging Safety Tips signage on room side of entry door. See <7A> and <14>.

4. Innkeeper's Statute: Provide governing authority's innkeeper's statute on room side of entry door.

B. Slip Resistance: Provide slip resistant walking surfaces (wet and dry conditions) in compliance with the minimum dynamic coefficient of friction standard as required by ANSI A137.1 and ANSI A326.3 testing, ASTM E303-93 and governing regulations. The minimum standard is a dynamic coefficient of friction (DCOF) of 0.42 and applicable to interior and exterior surfaces that are:
   • Generally, flat and horizontal
   • Sloped and for ramps
   • Steps and stair treads

marriott international. all rights reserved. August 2023

• Ramps in parking structures

C. Change in Elevation: Comply with accessibility design requirements (<GR1>), governing regulations and the following for stairs, steps, ramps, guard rails, handrails, etc.

1. Exit Stairs: Comply with <14>.
2. Exterior Stairs: If stairs are required at walkways, provide a minimum of three risers. See <1>.
3. Steps & Stairs: Make steps and stairs apparent and easy to use with the appropriate application of the following elements.
    a. Steps: Avoid one and two riser stairs, use ramps or flight of stairs with three risers minimum.
    b. Tread Depth: 28 cm (11 inch) minimum
    c. Nosings: Identify tread edge for full width of stair tread.
    d. Riser Height: 10 cm (4 inch) minimum and 17.8 cm (7 inch) maximum
    e. Contrast: Change floor color or materials to identify stair location.
    f. Headroom: 2.03 m (6-8) minimum
    g. Handrails: At a minimum, provide graspable shaped handrails at both sides of stairs. Design and fasten to resist a minimum force of 0.73 kN/m (50 lbs./lf) and a single concentrated force of 0.89 kN (200 lbs.) applied in any direction.
    h. Guard & Rail Assembly: Protect open areas at stairs and stair runs with guard and rail assembly and see design criteria below.
    i. Lighting: Provide general illumination to identify stairs.
4. Guard & Rail Assembly: Provide guard and rail assembly protection at the following areas.
    a. Balconies: Provide at open sides of balconies. See <7A>.
    b. Stairs: See "Steps & Stairs" above.
    c. Open Floors & Walkways: At open area level changes to prevent a person from accidentally stepping or walking off the upper floor.
    d. Site, Parking & Retaining Walls: In areas accessible to the public, provide guard and rail assemblies on open sides where the level exceeds 76 cm (30 inch); integrate with landscaping.
    e. Guard & Rail Assembly Design Criteria: Provide for the following.

• Height: 107 cm (42 inch)
• Openings: Design to restrict the passage of a 10 cm (4 inch) diameter ball
• Bottom Rail: 5 cm (2 inch) maximum above floor
• Design to restrict climbing
• Design and fasten to resist a minimum force of 0.73 kN/m (50 lbs./lf) and a single concentrated force of 0.89 kN (200 lbs.) applied in any direction
• Design intermediate rails and panels to resist a horizontal load of 0.22 kN (50 lbs.) per 0.093 m² (1 sq. ft.)

5. Ramps: Provide where steps are not permitted, and where required by governing code and accessibility regulations.

    a. Handrails: If slopes are steeper than 1:20, provide graspable shaped handrails. Use design criteria as required for stairs above.

    b. Rise: Do not exceed 77 cm (30 inch).

    c. Exterior Ramps: When changes in elevation are required at walkways, accommodate whenever possible by ramps with slopes sufficiently shallow so that handrails are not necessary. See <1>.

    d. Interior Ramps: Maximum slope is 1:12 or 8%.

D. Walkway, Doorway & Circulation Widths: Design the features to allow easy access for people and services.

1. Corridors & Aisles: Generally guest area aisles and corridors require a minimum width of 1.5 m (5 ft.). See <7B>.

    a. BOH Areas: Back-of-house personnel service corridors are typically larger requiring 2 m (6.5 ft.) minimum for circulation with paths capable of accommodating pallet size deliveries. See <8B>, <9>, <10> and <11B>.

    b. Banquet Service Corridors: Provide minimum of 3 m (10 ft.) clear width. See <6> and <8B>.

2. Door Widths: Provide door sizes with minimum widths as follows.

    a. Personnel Circulation: 0.91 m (3 ft.)

    b. BOH Service Circulation: 1.07 m (3.5 ft.) for moving materials, equipment, housekeeping carts and laundry carts.

    c. Equipment Movement: 0.91 m (3 ft.) each door of door pairs at locations requiring equipment movement for Queen Marys, hot boxes, boiler equipment, etc.

    d. F&B Refrigerated & Frozen Unit Storage: Door pairs to accommodate pallet width. See <10>.

marriott international. all rights reserved. August 2023

3. Pool Decks & Terraces: See <4C>.

    a. Paths to Pool: 1.5 m (5 ft.) wide

    b. Rescue Access: Deck width not less than 1.22 m (4 ft.) at entire perimeter.

    c. Whirl Pools: Separate from swimming pool minimum width of 1.22 m (4 ft.).

4. Parking Sidewalks: (See <1>.) Provide 1.5 m (5 ft.) minimum width sidewalks for primary circulation routes, and 1.22 m (4 ft.) minimum width for secondary routes.

5. Traffic Circulation Features: Provide proposed property traffic and parking analysis for MI's acceptance. See <1>.

    a. Sizes / Widths: Provide 2-way circulation with 90 degree parking in the following minimum widths:

Single Lane Driveways	3.6 m	(12 ft.)
Two-Way Drives	7.0 m	(24 ft.)
Curb-to-Curb	19.5 m	(64 ft.)
Wall-to-Wall	19.5 m	(64 ft.)

    b. Service / Delivery Entrance: Provide controlled service access designed to minimize vehicular conflict with pedestrians.

E. Bathrooms: Provide slip resistant bathroom floors in bathing facilities.

1. Bathroom Floors: Comply with the minimum dynamic coefficient of friction standard as required by ANSI 137.1 and A326.1 testing and governing regulations.

2. Bathing Facilities: Comply with ASTM F462 slip resistance, dynamic coefficient of friction standard for bathtubs, shower floors and receptors.

F. Grab Bars: In guest bathrooms, to mitigate slip and falls, mount and securely fasten grab bars to withstand minimum of 113 kg (250 lbs.) force in any direction. Provide grab bars at the following locations. Comply with <7A>.

1. Bathtub: Mount to assist with entering, exiting and maneuvering within the bathtub.

    • Built-in Tubs: On “plumbing wet wall”, mount grab bar vertically, above and inside outer edge of tub.

    • Free-Standing Tub: Mount grab bar horizontally on tub surround, tub ledge or a position convenient to person entering and exiting tub.

2. Shower Enclosure: (See <7A>.) When a footrest or bench is provided, mount grab bar on shower wall convenient to person using sidewall or corner mounted footrest.

G. Safety Glass & Glazing: Provide Safety Glass & Glazing in compliance with the U.S. Consumer Product Safety Commission (CPSC) and governing codes at the following locations.

1. Human Impact: Provide tempered or laminated safety glass at locations subject to human impact. Examples include the following:
   • Doors and sidelights
   • Full height windows (without guard rails or curbs)
   • Balcony and patio doors and windows
   • Shower enclosures and glass doors
   • Bathtub surround and screens
   • Room dividers and doors
   • Mirrors (safety backing)

2. Skylights: In skylight and overhead assemblies above occupied spaces, provide laminated glass. If tempered glass, provide screening below skylight to prevent glass from falling on occupied areas.

H. Operable Windows: Limit window operation to 10 cm (4 inch) maximum opening with manufacturer's restrictive safety stop integrated with the window fabrication (unless prohibited by code). Provide with manufacturer's "key" for maintenance operation.

I. Emergency Response: Provide the following system devices and equipment to alert occupants and employees to an emergency condition and allows them to mitigate the situation.

1. Shut Off: Provide shut off devices in the following locations.

   a. Whirl Pool: Provide emergency stop button to shut off whirl pool jets and pump. Locate control adjacent to 15 minute timer outside of reach from persons in the pool. See <4C>.

2. Eye Wash Stations: Connect units (see <15B>) to tepid water pipe and drain systems. Reservoir types are not allowed. Install permanent units where chemicals are mixed, dispensed and used in concentrated form at the following locations:
   • Swimming / Whirl Pool Equipment Room, see <4C>
   • Maintenance Shop, see <9>
   • Laundry Facilities, see <11A>
   • Housekeeping Chemical Station, see <11B>
   • Commercial Kitchen Warewashing, see <15B>

marriott international. all rights reserved. August 2023

3. House Telephones: Provide telephones for guests and employees per Administrative Telephone Guidelines (see <13A>) including the following locations:
   • Lobby Area
   • Fitness Center
   • Swimming Pool
   • Guest Laundry
   • Receiving Area
   • Remote outdoor recreation facilities

4. Emergency Electrical Systems: Provide emergency power for standby and backup electric power loads. See <15C>.

   a. Standby Power: Maintains standby power for required Fire Protection and Life Safety systems. See <14>.

   b. Backup Power: Maintains backup power for property Operations and Security per project and Marriott's requirements.

J. Water Safeguards: Design water features and facilities to ensure water quality, and avoid splashing and spillage issues. Employ a consultant familiar with the proposed water features and facility designs.

1. Decorative Fountains & Ponds: Design with sufficient horizontal dimension to prevent water splashing on adjacent walkways.

2. Swimming Pool / Whirl Pool: Design and construct pool details, drains, pumps and equipment to prohibit hazards that cause tripping, slipping, or suction entrapment of hair and people. See <4C>.

   a. Filtration: Provide separate systems for the pool, whirl pool and water features.

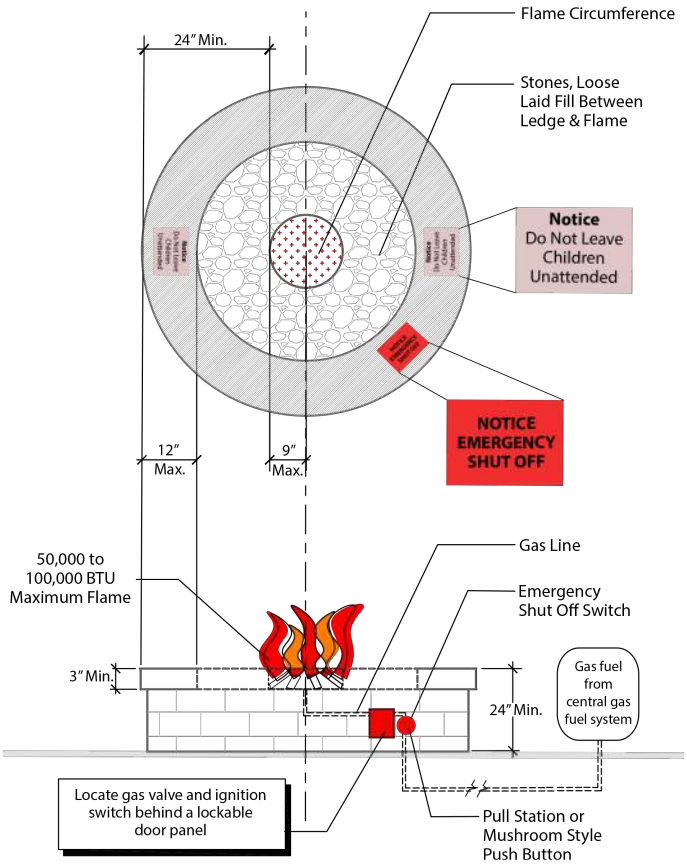
   b. Pool Suction Drains: To avoid entrapping people in pool suction drains, comply with the provisions of the governing authority and the U.S. "Virginia Graeme Baker Pool and Spa Safety Act" that include features such as the following:
      • Drain Covers (grates): Provide with anti-entrapment devices or systems
      • Suction Drains: Two drains located at least 92 cm (3 ft.) apart or an unblockable drain
      • Safety Vacuum Release System (SVRS): SVRS or other automatic pump shut off system

   c. Rescue Assistance: Provide a minimum of 1.22 m (4 ft.) deck area at the perimeter of swimming and whirl pools.

K. Open Flame Features (Outdoor): To mitigate potential risks associated with open flame features (fire pits, bowls, features, etc.), incorporate the following safeguards after initial contact with Global Safety & Security, Security Design.

1. Pipe the feature's gas fuel from the property's central gas fuel system. See Fireplaces, below, for Ethanol requirements.
2. Products rated for outdoor use only with UL approved components. Maximum flame of 50,000 to 100,000 BTU.
3. Manufacturer: Follow manufacturer's installation, operations and maintenance guidelines and the requirements in this chapter, whichever is more stringent. Consult with MI Risk Management for specific conditions.
4. Gas valve and ignition switch behind lockable panel adjacent to and within line of sight of the open flame
5. Emergency shut off, readily visible and accessible
6. Automatic gas shut off, when flame is extinguished
7. Design with stormwater drain
8. No structure, coverings or decorative elements above the area defined by a 3 m (10 ft.) radius from the center of the open flame
9. Safety signage and graphics
10. Approval of fire and building agency having jurisdiction
    a. Example: Fire Pit (Outdoor) Diagram

marriott international. all rights reserved. August 2023



L. Fireplaces: Provide the following safeguards at fireplace locations after initial contact with Global Safety & Security, Security Design Services.

1. Carbon Monoxide (CO) Detector: Locate detector in room with fireplace including a sounder, connect to the fire alarm control panel (see <14>). Exceptions are electric fireplaces.

2. Thermal Protection Screens: Equip fireplace opening with a barrier or screen (such as iron or steel mesh) to prevent children from access to hot surfaces.

3. Wood Burning Fireplaces: Properly store wood in a dry and protected space, and away from heat and flame. Remove and dispose of ash in non-combustible containers.

4. Timer: Provide a timer to automatically turn off fireplace after a reasonable time (usually 30 minutes). Exceptions are wood burning and public area fireplaces.

5. Venting: Vent fuel burning fireplaces to the exterior. Ventless, fuel burning fireplaces are not accepted for sleeping rooms and other similar confined areas. Exceptions are electric fireplaces.

6. Signage & Graphics: Provide the following safety signage and graphics for guest operated fireplaces:

a. Safe operation of the fireplace

b. Caution regarding presence of children

c. Timer operation

7. Approvals: Provide fireplace units and construction that are certified by an independent agency and code authority. Products must maintain UL approved components or equivalent.

8. Manufacturer: Follow manufacturer's installation, operations and maintenance guidelines and the requirements in this chapter, which ever is most stringent. Consult with MI Risk Management for specific conditions.

9. Ethanol Burning Fireplaces and Products: Follow the requirements above and include the following.

   a. Products: Required to have a spill-sensor feature which prevents operation of the unit for a set time until the fuel has been wiped clean.

   b. Fuel Refilling: Performed by a properly trained individual in one of the following ways. Do not refill fuel or move unit when hot.
      • Replace the entire fuel tank
      • Refill from a spill-proof container supplied by the manufacturer. Refilling through a funnel is not allowed.

   c. Indoor Units: Provide at least one carbon monoxide (CO) detector in the room with a sounder alarm, connect to the fire alarm control panel. Include a readily available fire extinguisher in the area.

   d. Fuel Storage - Indoor:
      • Store in an approved fuel container with a volume not-to-exceed 20L (5.3gal) per container.
      • Store fuel containers within a secured approved flammable liquid cabinet with a total volume of fuel not-to-exceed 94.6L (25gal)
      • Clearly mark storage cabinets "Flammable"
      • Fuel is not permitted in basement areas.
      • Gasoline and propane are not permitted in the building with ethanol.

   e. Fuel Storage - Outdoor: Preferred
      • Store fuel in a secured and locked area.
      • Fuel storage above the 94.6L (25gal) allowed within the building: Store outside at a minimum of 6m (20 feet) away from the building, street, alley or public way.
      • In lieu of the 6m (20 feet) distance: A fire barrier wall without openings and no less than .76m (30 inch) above and to the sides of the storage area is permitted.

marriott international. all rights reserved. August 2023

M. Electrical: Provide emergency electrical service duplex outlets connected to the backup power source. See <15C>.

N. Lighting: Provide lighting, an important aspect of access control and safety management. Comply with the Design Standard lighting levels and criteria. See <15C>.

1. Light Levels: The following locations require "average maintained" light levels.
   - Walkways
   - Parking Structures, see <1>
   - Building Entry Areas, see <1>
   - Back-of-House Areas (BOH), see <8B>, <9>, <10> and <11B>
   - Outdoor Recreation Facilities

2. High Risk Area: High risk areas may require higher lighting levels per Safety & Security Review.
   - Public Restrooms: Provide lighting controls at remote electric panel board. See <15C>.
   - Parking Lots & Driveways: Locate light poles to minimize the need for impact protection. Do not block or obstruct illumination source with trees.

O. Rooftop: : When working on rooftops, comply with local government legislation or the O.S.H.A. “Walking and Working Surfaces; Personal Protective Equipment (Fall Protection Systems)” May 2003, whichever is more stringent. If conflicts arise, notify a member of Marriott International Global Safety & Security, Security Design Services team for resolution.

16.4 Security Facilities

A. Security Office: A Security Office is not required for prototypical Brand designs. Property security monitoring for Back-of-House (BOH) areas, employees entrances, deliveries, package inspection, control of materials and issuing employee identification badges, electronic keys and hard keys is conducted from the front administration offices or engineering spaces.
   If a Security Office is required for custom (nonprototypical) properties, coordinate the security facility design with the Risk Assessment's Functional Requirements.

16.5 Security Systems & Equipment

A. Accepted Manufacturer: Equipment must be procured using only Marriott International Global Safety & Security accepted brands.

B. Communication - Telephone: Provide telephones at security offices, control rooms and duty posts.

C. Communication - Radio System: Provide a multi-frequency, UHF or VHF, 2-way radio system utilized by property's security employees for routine and emergency communication.

   1. Radio System Reception: Design system without dead areas within the building, the building exterior and property site.

   2. Devices & Location: Provide the following devices in the designated Front Office space.

      a. Repeater: Design to eliminate dead areas.

      b. Antenna: System designed specifically for project by an equipment manufacturer.

      c. Portable Radios: Issued to employees.

   3. Supplemental Equipment: Provide as required by system design or regional conditions.

   4. Backup Operational Power: Required for continuous system and repeater operation. See <15C>.

D. Communications - Intercom: Provide an intercom system to supplement the radio and telephone communications

   1. BP Video intercoms: Provide where possible

E. Inspection Tour Recording System:

marriott international. all rights reserved. August 2023

1. Documentation: Provide electronic date and time stamped employee patrol documentation system.
2. Inspection Tour Recording System: Provide at the Security Office / Security Control Room and include the following.
    a. Patrol Management System Software
    b. Wand Home Base
    c. Control Unit
    d. Wands: Portable
    e. Batteries: Nicad
    f. Wand Holster: Portable
3. Location Identifiers: Approximately 50 to 100 at strategic checkpoints throughout the property as established by the Safety & Security Representative.
4. Supplemental Equipment: As required by system design or regional conditions.

F. Property Safes: In order to safeguard cash and property, provide the following:

1. Safe Deposit Boxes: See <8A> for design and layout of the safe deposit box rooms. Meet the following minimum specifications:
    • 10mm thick aluminum alloy door
    • Stainless steel facia
    • Electronic key locking to allow permanent monitoring
    • Sizes to differ dependent on hotel requirement, but a mixture of medium (laptop size) and large (backpack size) size boxes
    a. Quantity: Provide one 10 box unit for every increment of 200 guestrooms.
2. Cash Drop Safes: See <8A>:
    • Cashier & Counting Room: Provide a safe. Alternatively, the safe(s) can be located in a dedicated safe room accessible from BOH corridor and / or FOH office.
    • Two compartment, Class "C" construction rated safe
    • House Safe - UL Class "B", 2-hour rated. Locate separate large floor safe in corner of Cashier's Room.

16.6 Closed-Circuit Television (CCTV) Video Surveillance System (VSS)

A. CCTV Video Surveillance System (VSS): The general purpose of the CCTV VSS is asset protection. The Safety & Security Review may also require the VSS to mitigate risks associated with crimes against persons.

1. BP Accepted Manufacturer: Equipment must be procured using only Marriott International Global Safety & Security accepted brands.

B. CCTV VSS Back-End:

1. Digital Video Recorder:

a. Resolution: 1080p minimum or higher (dependent on the camera functional requirements)

b. Frames per Second: Provide for the following camera recording activity conditions in view of the camera.
• No Activity: 1 frame per second
• Detected Activity: 15 frames per second or higher (dependent on the camera functional requirements)

c. Storage: 30 days minimum or higher (dependent on the DVR / NVR functional requirements)

d. Transfer Ability: Transfer streaming video to a media device such as DVD, CD, etc.

C. CCTV VSS Front-End:

1. CCTV Camera Specifications: Provide the following minimum requirements.
• IP Digital Color Digital Cameras: Fixed Cameras to auto iris/manual zoom 180 degree and 360 degree
• Auto Dome Systems: Pan Tilt Zoom (PTZ) / auto focus / self-contained units

• Thermal Outdoor Cameras
• Camera Dome Enclosures: Required for cameras in public locations and some Back of House locations
• Resolution: 1080p minimum or higher
• Fisheye cameras are not permitted where identification is most important, such as the main entrance.
• Wireless and Wifi based CCTV cameras are not permitted.

2. CCTV VSS Camera Locations: Maximize camera views as indicated for location and evaluate possible view obstruction such as soffits, decorative fixtures and lighting levels. The following list describes locations CCTV cameras are required, however subject to further review and assessment by

marriott international. all rights reserved. August 2023

Global Safety& Security, Security Design additional cameras and locations may be required:

a. Front of House (FOH):
   • Lobby: View lobby activity, full view of front desk / reception and identify persons entering and exiting elevators to guestroom floors and public spaces. See <2A>.
   • Front Desk: Fixed camera at rear of Front Desk wall (back wall of assisted or unassisted check-in kiosks) to identify guests and observe activity at the desk (see <2A>).
   • Public Entry Foyer: Identify persons entering and exiting (see <2A>)
   • Public / Meeting Spaces Elevator Foyers: Identify persons entering and exiting the elevator.

b. Back of House (BOH):
   • Receiving Area: View activity in Receiving Area. Provide second camera located to identify persons entering and exiting the BOH corridor onto the Receiving Area (see <9> and <10>)
   • Employee Entrance: Identify persons entering and exiting (see <8B>)
   • Computer Equipment Room: Identify persons entering and exiting (see <13A>)
   • Perimeter Doors: Identify persons entering and exiting (see <8A> and <9>)
   • Outside IT Rooms and Server / Data Center Rooms: Identify persons entering and exiting (see <8A> and <9>)
   • Inside Data Center/ Server Rooms: Monitor activity at both front and rear of racks

c. Areas with valuables & sensitive transactions:
   • Drop Safe: Identify employee cashier drop safe activity (see <8A>)
   • Cashiers Room: Identify persons inside and outside the room
   • Luggage Storage and Lost and Found Rooms: Identify persons and luggage inside and outside the rooms (see <2A>)
   • Guest Safe Deposit Boxes: Identify employees accessing guest safe deposit boxes from the safe, and to identify guest(s) which used the deposit facility (see <2A> and <8A>)
   • Point-of-Sale (POS) Workstations: Must be able to view the POS activity and workstation (see <2A> and <5>)
   • Critical Assets: Provide at other locations with valuable assets such as at ATMs, valuable artwork, and cash handling locations, (e.g., Cashier Counting room).

d. Other Areas:
   • Within all elevators, and elevator landings / lobbies (guest and service)
   • Car parks, internal roads and vehicle entry / exit points to the property

boundary and building

• Exit Stairs: Identify persons entering and exiting the perimeter exit doorways (see <7B>)

• Internal footpaths and pedestrian entry / exit points to the property boundary and building

3. CCTV Locations Not Allowed: The following are locations CCTV cameras are prohibited.
   • Pool, sauna, and / or whirlpool
   • Fitness Center or Movement Studios
   • Inside meeting rooms and ballrooms

16.7 Security Alarm Systems

A. Systems:

1. Intrusion Alarm System: The purpose of the intrusion alarm system is to provide a means to detect and alert the property safety & security representative of an unauthorized entry or use of restricted doors and / or areas.

2. Duress (Panic) Alarm System: The purpose of the duress alarm system is to provide a means for staff and guests to alert the property safety & security representative they require assistance due to either safety or security related incidents.

3. Accepted Manufacturer: Equipment must be procured using only Marriott International Global Safety & Security accepted brands.

B. Back-End:

1. Integration: Integrate the Intrusion and Duress (Panic) Alarms with CCTV VSS and building access control system to provide efficient and effective oversight of incidents. Once an alarm is triggered, the nearest CCTV camera view is shown on the wall monitor.

2. A computer based central Graphical User Interface (GUI) integration system is required if there are more than 50 sensors for intrusion alarm.

3. On-line Access Control: When using a network online access control systems, integrate with the intrusion alarm system.

4. System Control Communication Panel: Locate in the Security Office / Security Control Room. Intrusion and duress alarms when triggered are alerted to the Security Control Room or an appropriate location dependent on

marriott international. all rights reserved. August 2023

the property, (e.g., Call Center / FOH office).
• Monitor the location 24 hours by trained personnel
• Provide the alarm with an audible and visual alert in the SCR. However, no audible alert is sounded at the location of the alert incident.
• System Printer: Near Security Dispatcher and in Call Center
• Alarm Zone Module: Each contact, duress / panic and motion alarm point; required for each door alarm, duress / panic alarm and motion detector location.

5. Live & Recorded Video: Display automatically on the access control workstation when intrusion alarms are detected.

    a. Recorded Video: Bookmark with the intrusion alarm information for ease of future investigation.

6. Network: Alarm systems are hard wired; wireless is not approved.

7. Alpha Numeric Keypad: Control arming of the system by the panel located in the Security Office / Security Control Room. Provide local arming keypads for critical areas which are unmanned for lengths of time and related to the planned manning operations. Subject to direction form Marriott International Security Design, locations may include:
    • Server Room / Data Center
    • Guest Safe Deposit Box Room
    • Safe Room / Cash Drop-Safe Room
    • Cashier Counting Room

C. Front-End:

1. Devices: There are many types of alarm devices available to achieve a desired goal. The three main types employed by Marriott International are as follows:
    • Motion sensors
    • Door contact sensors
    • Duress / Panic buttons

2. Motion Sensor Locations:
    • Server / Data Center Rooms
    • Inside emergency staircases of mixed-use developments
    • Safe Deposit Box Rooms
    • Ceiling in Cashier's Office
    • Safe Room / Cash Drop-Safe Room

3. Door Contact Sensor Locations:
    • Building perimeter exterior doors
    • Human Resources
    • Critical Back-of-House doors

• Shipping / Receiving and Storage
• Liquor Storage
• Roof Access
• Safe Deposit Box Room doors
• Mixed-Use Properties: Adjoining doors between hotel and non-MI or shared areas

4. Duress / Panic Alarm: Provide at the following locations:
   • Front Desk, each Welcome Pedestal, check-out station
   • Front Office Workroom

D. Additional Locations: Some properties may require additional alarm sensor locations dependent on the review by Global Safety & Security, Security Design. These may include but not limited to:
• Access doors to emergency staircases
• Critical Mechanical, Electric & Plumbing rooms, (e.g., gas, telecom, mains power, HVAC, potable water, etc.)
• Roller shutters

16.8 R Coordination

A. R Reference: Coordinate with requirements of other Chapters
• <GR1>, <GR2>, <GR3>, <GR4>
• <1>
• <2A>, <2B>
• <3>
• <4A>, <4B>, <4C>, <4D>

Legal Disclaimer

These design guidelines and all materials, procedures, systems and content herein contained or depicted (the “Design Recommendations”) have been prepared for and/or developed by Marriott International, Inc. or its affiliate (”Marriott”), and are the sole and exclusive property of Marriott, which owns all right, title and interest therein, including all copyright, and which reserves all rights herein. All content should be used only as authorized by Marriott and should not be copied either in whole or in part without its written consent.

The content herein may be protected by patent, trademark, trade secret, copyright, or other intellectual property and proprietary rights and laws, and is the private and confidential property of Marriott. The contents contain proprietary trade secrets that are the private and confidential property of Marriott. Unauthorized use, disclosure, or reproduction of any kind of the Design Guidelines or any contents or material contained in these Design Guidelines is expressly prohibited. The contents hereof are to be returned immediately upon termination of any relationship or agreement giving the user authorization to possess or use such information or materials. Marriott reserves the right to take all actions and seek all available remedies, whether legal and/or equitable, for any unauthorized or illegal use of the Design Guidelines or any of its content.

These documents are intended to serve as a starting point for complete design to be performed by licensed professionals. They have been prepared with the sole purpose of conveying the brand benchmark for this particular product only. The architect, engineer, designer or any other design professional of record is responsible for compliance with any and all laws or regulations of any type or description governing the proposed construction.

These design guidelines may be altered, amended or supplemented by Marriott in its sole discretion from time to time. It is your responsibility to familiarize yourself with the contents of the Design Guidelines and to keep yourself apprised of any and all updates to it on https://lobo.marriott.com.

In the event of any inconsistency or conflict between a provision in these Design Guidelines and any federal, state, provincial, state or local statute, regulation, order or other law, such law will supersede the conflicting or inconsistent provision(s) of these Design Guidelines in all properties subject to that law. All owners/developers should seek independent legal counsel for advice concerning application of and compliance with any applicable law.

Objective

The Exterior Construction signage design recommendation manual provides the general criteria for selection and sizing of the Construction signage for Classic Select brands, otherwise referred to as Coming soon signage or Opening soon signage. This signage shall only be used temporarily during the construction of the building and needs to be removed before opening.

Alternative designs,colors and fonts shall not be used on the signage. Any requests for deviations must be coordinated with the Marriott Project manager.

The manual is a guideline for owners, franchisees, architects and contractors. It is not intended for fabrication of signs. Contact one of Marriott's accepted sign vendors and/or Marriott Global design for procurement and installation information.
