DR-007-RDF	Hollow metal door	Flush, fire and/or temperature-rise-rated
DR-007-SC	Hollow metal door	Flush, fire and/or temperature-rise-rated
DR-008-AC	Wood Door, Sliding and window assembly	Four Lite Barn Door: SS (Square Sticking), Window/Fixed Partition: SS (Square Sticking), with white laminated glass
DR-008-RD	Wood Door, Sliding and window assembly	1-Panel Sliding Doors with soft-close, One Side Overlap, Standard Style, Custom Vertical Lattice Window/fixed panel with Custom Vertical Lattice to match sliding door
DR-009-RD	Wood Door, Sliding	1-Panel Sliding Pocket Door with soft-close, One Side Overlap, Standard

Ref	ID	Description
	Pocket	Style, Custom Horizontal Slats as shown in Design Guideline Drawings

Door Frames

Ref	ID	Description
DF-001-CE	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.
DF-001-CU	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.
DF-001-RDF	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.
DF-001-SC	Hollow Metal Frame	Standard steel frames for Door openings wider than 48 inches; Level 2 & 3 steel doors; Wood doors, unless otherwise indicated.
DF-004-EZ	Door frame, concealed frameless	Concealed split door frame system with concealed hinges

Door Hardware

Ref	ID	Description

T10_Interior Stairs

Ref	ID	Description
DH-003-YA_T10	Door Closer	Architectural Door Closer with cover; parallel arm configuration
DH-007-PK_T10	Door seal	Fire/smoke gasketing, adhesive-backed
DH-022-MK_T10	Hinge	Five knuckle standard weight hinge
DH-041-SG_T10	Latchset	10 Line Cylindrical latch set
DH-043-TM_T10	Door Stop	Cast brass floor stop
DH-045-RX_T10	Door holder/release	Wall-mounted door holder

T15A_Interior Vestibule Entry

Ref	ID	Description
DH-018-SA_T15A	Remote RFID Reader	Stand-alone remote RFID reader to control electronic access control devices in perimeter areas, common areas, and restricted areas.
DH-025-SA_T15A	Exit push button for automatic sliding door	Flush-mounted Exit Pushbutton
DH-026-SL_T15A	Key switch	Key switch for automatic sliding doors
DH-027-SG_T15A	Lock cylinder	Mortise lock cylinder, 6-pin
DH-029-SA_T15A	Power Supply	Boxed power supply unit for electronic door hardware
DH-030-AI_T15A	Intercom/ remote door control system	Audio door answering and door release system • Simple door answering (1 door) • Electronic call tone from door station • Press-to-talk communication at master • Hands free communication at door • Monitor entry area undetected from inside • Voice and call tone volume controls • Variety of remote stations available • Door release • Simple 2 conductor wiring between door and master station (with separate 2 conductor wiring for door release)

T16_Elec_Server Closet_Hskp Storage_Laundry Storage

Ref	ID	Description
DH-006-TM_T16	Door Stop	Wrought concave wall bumper
DH-007-PK_T16	Door seal	Fire/smoke gasketing, adhesive-backed
DH-009-YA_T16	Door closer	Heavy-Duty Non-Hold Open Parallel Arm with Removable Stop, Adjustable Size
DH-016-SA_T16	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-022-MK_T16	Hinge	Five knuckle standard weight hinge

T17_Linen Storage_Linen Chute_Storage

Ref	ID	Description
DH-003-YA_T17	Door Closer	Architectural Door Closer with cover; parallel arm configuration
DH-006-TM_T17	Door Stop	Wrought concave wall bumper
DH-007-PK_T17	Door seal	Fire/smoke gasketing, adhesive-backed
DH-016-SA_T17	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-022-MK_T17	Hinge	Five knuckle standard weight hinge

T18_Elevator Machine Room

Ref	ID	Description
DH-003-YA_T18	Door Closer	Architectural Door Closer with cover; parallel arm configuration
DH-007-PK_T18	Door seal	Fire/smoke gasketing, adhesive-backed
DH-016-SA_T18	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-022-MK_T18	Hinge	Five knuckle standard weight hinge
DH-042-TM_T18	Door Stop	Cast brass floor stop

T20_Lending Closet

Ref	ID	Description
DH-006-TM_T20	Door Stop	Wrought concave wall bumper
DH-007-PK_T20	Door seal	Fire/smoke gasketing, adhesive-backed
DH-046-SA_T20	Lock	Mortise lock with trim
DH-047-TM_T20	Flush Bolt	Flush Bolt, 2-point latching
DH-048-MK_T20	Hinge	Five Knuckle Standard Weight Hinge

T23_Mens_Womens_Employee Restroom

Ref	ID	Description
DH-003-YA_T23	Door Closer	Architectural Door Closer with cover; parallel arm configuration
DH-006-TM_T23	Door Stop	Wrought concave wall bumper
DH-007-PK_T23	Door seal	Fire/smoke gasketing, adhesive-backed
DH-022-MK_T23	Hinge	Five knuckle standard weight hinge
DH-049-TM_T23	Door trim - push/pull	Push plate and pull plate
DH-050-TM_T23	Deadbolt	Cylindrical Deadbolt
DH-051-RW_T23	Lockset, privacy, for guestroom baths and bedrooms	Cylindrical lockset, privacy function

T24_Fitness Center_Guest Laundry

Ref	ID	Description
DH-003-YA_T24	Door Closer	Architectural Door Closer with cover; parallel arm configuration
DH-006-TM_T24	Door Stop	Wrought concave wall bumper
DH-007-PK_T24	Door seal	Fire/smoke gasketing, adhesive-backed
DH-016-SA_T24	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-022-MK_T24	Hinge	Five knuckle standard weight hinge

T25A_Pool Vesitbule to Corridor

Ref	ID	Description
DH-006-TM_T25A	Door Stop	Wrought concave wall bumper
DH-012-RX_T25A	Door closer	Concealed overhead door closer
DH-013-VD_T25A	Exit Device	Panic exit device, exit only (no outside trim), electric latch retraction
DH-014-SG_T25A	Lock cylinder	Rim cylinder, 6-pin configuration
DH-016-SA_T25A	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)

T25B_Pool to Pool Vestibule

Ref	ID	Description
DH-006-TM_T25B	Door Stop	Wrought concave wall bumper
DH-012-RX_T25B	Door closer	Concealed overhead door closer
DH-013-VD_T25B	Exit Device	Panic exit device, exit only (no outside trim), electric latch retraction
DH-014-SG_T25B	Lock cylinder	Rim cylinder, 6-pin configuration
DH-018-SA_T25B	Remote RFID Reader	Stand-alone remote RFID reader to control electronic access control devices in perimeter areas, common areas, and restricted areas.

T25C_Pool Equipment

Ref	ID	Description
DH-007-PK_T25C	Door seal	Fire/smoke gasketing, adhesive-backed

Ref	ID	Description
DH-009-YA_T25C	Door closer	Heavy-Duty Non-Hold Open Parallel Arm with Removable Stop, Adjustable Size
DH-016-SA_T25C	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-017-MK_T25C	Hinge	Five Knuckle Standard Weight Hinge with non-removable pin

T25D_Pool Storage

Ref	ID	Description
DH-006-TM_T25D	Door Stop	Wrought concave wall bumper
DH-007-PK_T25D	Door seal	Fire/smoke gasketing, adhesive-backed
DH-009-YA_T25D	Door closer	Heavy-Duty Non-Hold Open Parallel Arm with Removable Stop, Adjustable Size
DH-016-SA_T25D	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-017-MK_T25D	Hinge	Five Knuckle Standard Weight Hinge with non-removable pin
DH-047-TM_T25D	Flush Bolt	Flush Bolt, 2-point latching

T29_General Manager from Welcome Desk

Ref	ID	Description
DH-006-TM_T29	Door Stop	Wrought concave wall bumper
DH-016-SA_T29	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-044-TM_T29	Door Silencers	High Grade Rubber, Triangular

T30_Offices

Ref	ID	Description
DH-006-TM_T30	Door Stop	Wrought concave wall bumper
DH-016-SA_T30	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-022-MK_T30	Hinge	Five knuckle standard weight hinge
DH-044-TM_T30	Door Silencers	High Grade Rubber, Triangular

T31_Food Prep_House Laundry_Engineer_Mechanical

Ref	ID	Description
DH-003-YA_T31	Door Closer	Architectural Door Closer with cover; parallel arm configuration
DH-006-TM_T31	Door Stop	Wrought concave wall bumper
DH-016-SA_T31	Entry Lock (less deadbolt)	Electronic mortise lockset with 1" (25.4mm) and 5/8" (15.9mm) dead-locking latch bolt (LESS DEADBOLT)
DH-022-MK_T31	Hinge	Five knuckle standard weight hinge
DH-044-TM_T31	Door Silencers	High Grade Rubber, Triangular

T33_Cross Corridor

Ref	ID	Description
DH-003-YA_T33	Door Closer	Architectural Door Closer with cover; parallel arm configuration
DH-006-TM_T33	Door Stop	Wrought concave wall bumper
DH-007-PK_T33	Door seal	Fire/smoke gasketing, adhesive-backed
DH-045-RX_T33	Door holder/release	Wall-mounted door holder
DH-052-MK_T33	Door hinge	Template-produced, standard weight ball-bearing hinge, swing-clear hingem stainless steel
DH-053-VD_T33	Exit Device	Rim panic exit device, with surface vertical rods, with outside lever trim

T33A_Cross Corridor Pocket Doors

Ref	ID	Description
DH-054-MR_T33A	Door hinge	Continuous swing-clear hinge
DH-055-AR_T33A	Exit Device, recessed for cross-corridor applications	Inset (recessed) rim panic exit device, with concealed vertical top rod, with outside trim, fire-rated.

CT-003-WIL	Simulated Stone	Engineered Quartz Countertop with eased edge

Thresholds

Ref	ID	Description
TH-001-A1-BS	Threshold	Marble Threshold
TH-001-JG	Threshold	Marble Threshold

Tile - Ceiling

Ref	ID	Description
TC-001-USG	Ceiling Tile	Acoustical Ceiling Tile

Tile - Floor

Ref	ID	Description
TF-002-CT	Tile Floor	Large Format Porcelain Tile
TF-002-DA	Tile Floor	Floor TIle
TF-003-CT	Tile Floor	Large Format Porcelain Tile
TF-003-DA	Tile Floor	Floor TIle
TF-006-CT	Tile Floor	Tile Floor
TF-007-CT	Tile Floor	Porcelain Plank Floor Tile, Herringbone Pattern
TF-007-DA	Tile Floor	Porcelain Plank Floor Tile, Herringbone Pattern

Tile - Wall

Ref	ID	Description
TW-002-CT	Wall Tile	Large Format Porcelain Tile
TW-002-DA	Wall TIle	Porcelain Wall Tile
TW-003-CT	Wall Tile	Porcelain Wall Tile
TW-006-A1-CT	Wall Tile	Porcelain Tile
TW-006-CT	Wall Tile	Large Format Porcelain Tile
TW-007-CT	Wall Tile	Porcelain Wall Tile
TW-008-CT	Wall Tile	Porcelain Wall Tile
TW-008-DA	Wall TIle	Porcelain Wall Tile
TW-009-CT	Wall Tile	Unglazed Porcelain Tile
TW-009-DA	Wall TIle	Porcelain Mosaic Wall Tile

Transitions Strips

Ref	ID	Description
TS-001-SCH	Transition Strip	Metal Edge Trim
TS-003-SCH	Transition Strip	Finishing edge-protection profile, metal tile trim.

Trim

Ref	ID	Description

Wood Base

Ref	ID	Description
WB-001-BM	Wood Base	Painted Hardwood Base

Wood Finish

Ref	ID	Description
WF-001	Wood Finish	Stained Millwork
WF-002-SW	Wood Stain	Wood Handrail Stain

Wood Trim

Ref	ID	Description

Laminate

Ref	ID	Description
LA-001-WIL	Plastic Laminate	General purpose laminate product
LA-002-WIL	Plastic Laminate	General purpose laminate product
LA-004-NV	Plastic Laminate	High Pressure Laminate (HPL)
LA-004-WIL	Plastic Laminate	Thermally Fused Melamine
LA-005-NV	Plastic Laminate	High Pressure Laminate (HPL)
LA-006-WIL	Plastic Laminate	Thermally Fused Melamine
LA-007-WIL	Plastic Laminate	General purpose laminate product
LA-008-WIL	Plastic Laminate	General purpose laminate product

Underlayment

Ref	ID	Description
UL-002-LA	Tile Underlayment	High performance, pliable, light weight peel and stick membrane underlayment system that minimizes impact noises and the transmission of cracks
UL-003-LA	Tile Underlayment	Premium quality, high yielding, fast-drying, fiber reinforced, cement-based underlayment for skim-coating, smoothing and leveling floor substrates
UL-004-LA	Tile Underlayment	Lightweight one-step, polymer fortified, Large and Heavy Tile mortar for interior and exterior installation for walls and floors

TownePlace Suites Generation 5 Public Space Preamble

PREAMBLE

Instruction For Use of Documentation

The total required information provided to design and build a TownePlace Suites by Marriott is contained in the criteria documents identified below which relay standardized public space, guestrooms, guestroom corridors, back of house and building site + exterior. Real Living is the decor package for the Public Space and Guestrooms.

Comprehensive Criteria Documents for TownePlace Suites by Marriott are:

1. Design Standards
2. Design Guideline Drawings
3. Specifications as indicated below:

A. Building Product Manual (BPM)
Volume 1 - Building Site + Exterior
Volume 2 - Public Space
Volume 3 - Guestroom
Volume 4 - Food Service & Guest Laundry Equipment

B. Exterior Signage Specifications

C. Interior Signage Specifications

D. Interior Design Specification Manual

Alternate Sources of Information:

1. Change Bulletins
2. Additional Tools

Description Follows:

1. Design Standards provide a written macro view of the overall design elements required for TownePlace Suites by Marriott.
2. The Design Guideline Drawings - provide more specific design direction via drawings to supplement the Design Standards.
3. The Interior Design Specification Manual lists items required that are generally referred to as Furniture, Fixture, & Equipment or FF&E items. These items and the accepted suppliers listed, have been contracted by Marriott and can be supplied through Marriott's procurement division.
4. The Building Product Manual (BPM) lists all the finishes required for the building and the building products that are typically installed and supplied by the General Contractor. This document must be used in conjunction with the drawings for the contractor supplied items as specific dimensions and criteria are referenced in both documents. Because of the high quality of design expected for TownePlace Suites by Marriott, Marriott has specified acceptable suppliers who have worked closely with Marriott on the initial TownePlace Suites Design. All of these documents are integral elements of the complete design and construction information. The project architect is responsible for incorporating all components of the criteria documents in the development of any TownePlace Suites by Marriott Project.

Use of Drawings

Building Product Manual (BPM) mark numbers and Interior Design Specification Manual x-ref numbers are shown on the Design Guideline Drawings as a base number only. Refer to the BPM and Interior Design Specification Manual for mark numbers and x-ref numbers plus a suffix for product and FFE alternates and additional acceptable manufacturers.

** In the BPM **acceptable manufacturers** of same material/product are indicated by a suffix of "XX", the abbreviation of the manufacturer's name. (i.e., PL-101-MO for MOEN or PL-101-KO for Kohler). If there aremultiple manufacturers, and the item looks very similar, and it is only a matter of style, then it is considered avariation of manufacturer and not an alternate and would receive the mfr. suffix.*

** In the BPM **alternate** materials/products/designs are indicated by a suffix of "A1", "A2", "A3", etc. indicating "alternate", following the base number (i.e., PL-101-A1).*

General Compliance Requirements

The Owner's / Franchisee's Consulting Design Professional shall be responsible for verifying and complying with all applicable laws, covenants, codes, ordinances, rules, regulations, restrictions, etc. The Design Professional shall pay close attention to the requirements of the federal accessibility law, Americans with Disability Act (ADA), local and state accessibility regulations, and the applicable fire, life safety requirements. It is also the responsibility of each hotel owner to ensure that all products have been adjusted in dimension, quantity and hand suit the specific site conditions.

GENERAL NOTES

1. All images, photographs, renderings of specified items contained in this specification package area for general design intent and reference only.
2. Refer to the preamble for terms, conditions, abbreviations, definitions, responsibilities, and general guidelines for all specified items.
3. Refer to drawings for exact locations and/or mounting heights of furniture, fixtures, and equipment. In the event of a discrepancy between drawings and specifications, please contact Marriott International immediately for written clarification.
4. Submittal of shop drawings & finish samples to Marriott International for review and written approval is required for any item supplied by a vendor other than the specified source.
5. Design Documentation firm to verify that all flammability requirements are met for property location. The requirements noted within this specification are general and local flammability may be more stringent.
6. Install all products and finishes per manufacturer's recommendations.
7. Final quantity of items to be based on final plans, room quantity, and final matrix.

Plumbing Fixture and Residential Appliances - General Notes

1. All plumbing fixtures and residential appliances to be of contract quality and suitable for commercial use.
2. Site measurements required.

ABBREVIATIONS

General Schedule Abbreviations:

ADA	Americans with Disabilities Act
AFF	Above Finish Floor
ASTM	American Society of Testing Materials
AWI	American Woodworking Institute
CEF	Corridors, Elevators, and Foyers
CF/CI	Contractor Furnished/ Contractor Installed
COM	Customer's Own Material
GC	General Contractor
GR	Guest Room
GRB	Guest Room Bath
LY	Lineal Yard
MF/MI	Manufacturer Furnished/ Manufacturer
N/A	Installed Not Applicable
NFPA	National Fire Protection Association
NY	Narrow Yards
OF/CI	Owner Furnished/ Contractor Installed
OF/MI	Owner Furnished/ Manufacturer Installed
OF/CI	Owner Furnished/ Owner Installed
RFP	Request for Proposal
SF	Square Feet
SY	Square Yard
UL	Underwriters Laboratory

A. Toilet Accessory Abbreviations:

For your use in utilizing the Toilet Accessories within the Building Product Manuals, the following information is supplied:

1. The Assembly is the type of restroom or bathroom. The Assembly is not recognized by a number.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'TA' for Toilet Accessory Commodity. The first character of the 3-character suffix categorizes each toiletaccessory commodity component, then is numbered sequentially.

   100 – Grab Bars
   200 – Toilet Tissue / Facial Tissue
   300 – Glass Shelf / Iron Board Caddy
   400 – Towel Bar / Towel Ring / Robe Hook
   500 – Soap Dish / Shampoo Dispenser / Shower Accessory Ledge / Shower Footrest
   600 – Shower Curtain Rod / Glass Shower (components)
   700 – Shower Seat / Tub Seat
   800 – Public Restroom (Feminine Napkin Dispenser / Paper Towel Dispenser / Receptacle / Soap Dispenser / Seat Cover)
   900 – Miscellaneous

B. Plumbing Fixture Abbreviations:

For your use in utilizing the Plumbing Fixtures within the Building Product Manuals, the following information is supplied:

1. The Assembly No. contains 3 characters or prefix to define the type of assembly. The 2-character suffix is numericallysequential. Example TUB-01.

TUB - Tub	EWS - Eye Wash
WHL - Whirlpool	MOP - Mop Sink
SHR - Shower	CLO - Cleanout
SNK - Sink	FLD - Floor Drain
SVS - Service Sink	FSK - Floor Sink
WCL - Water Closet	LIT - Lint Interceptor
URN - Urinal	HYD - Hydrant
WCR - Water Cooler	RDR - Roof Drain

2. Mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'PL' for Plumbing Commodity. The first character of the 3-character suffix categorizes each plumbing commodity component, then isnumbered sequentially. Example PL-101, PL-102, etc.

100 – Sinks & Mop Sinks
200 – Faucets
300 – Toilets / Urinal / Water Cooler
400 – Shower Heads
500 – Shower Diverters
600 – Shower Surrounds / Shower Pans / Base / Tub
700 – Shower Doors
800 – Fittings
900 – Miscellaneous (Floor Drains, Clean Outs)

C. Door Hardware Abbreviations:

For your use in utilizing the Door Hardware within the Building Product Manuals, the following information is supplied:

1. The Assembly No. or Door Hardware Type No. contains 1 character or prefix "T". The 2-character suffix is numericallysequential. Example T-01.
2. Within each assembly, mark numbers are assigned to each component within the assembly. The component contains 2 characters or prefix 'DH' for Door Hardware Commodity. The 3-character suffix is numbered sequentially. Example DH-001,DH-002, etc.

D. Carpet or wall coverings will no longer be specified within the Building Product Manuals. Reference the Interior DesignSpecification Manuals.

BPM (Building Product Manual) Number Nomenclature

(Items are numbered with the item prefix and then consecutive numbers starting with 001 - "Mark Number" unless indicated otherwise)

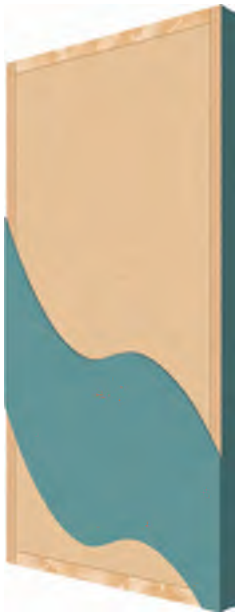
Division 08 14 23.13
High Pressure Decorative Laminate Doors

LD2000 HPDL PC-3

Wood Particleboard Core
Non-Rated or 20-Minute Rated



FACES:	GP50, nominal 0.050" (1.3mm) thick, High Pressure Decorative Laminate (HPDL) faces to meet minimum requirements of National Electrical Manufacturers Association (NEMA) Standard LD3 HPDL.
SUBSTRATE:	HPDL applied directly to the assembled core unit
CORE:	Particleboard ANSI A208.1 LD1 Option: LD2
STILES:	(ME) Matching with decorative laminate face, AWS Type C HPDL Option: Wood edges painted or stained to complement decorative laminate face
RAILS:	Mill option structural composite lumber, wood, or composite material
ASSEMBLY:	Stiles and rails are securely bonded to the core and the assembled unit is sanded prior to application of faces.
ADHESIVES:	Type 1
MAXIMUM SIZE:	Positive Pressure or Neutral Pressure 3'0" x 9'0" (914mm x 2743mm) Positive Pressure or Neutral Pressure 4'0" x 8'0" (1219mm x 2438mm)
THICKNESS:	Non-Rated 1-⅜" (35mm) or 1-¾" (45mm) 20-Minute Rated 1-¾" (45mm)
WARRANTY:	Life of original installation; for interior use only. SEE WARRANTY TERMS AND CONDITIONS.
STANDARDS:	WDMA IS-1A and AWS Premium Grade Performance attributes meet or exceed WDMA IS-1A and AWS Extra Heavy Duty standards when specified with blocking for surface applied hardware without through bolts as noted below.
FIRE-RATING:	Positive Pressure tested in accordance with UBC 7-2 1997, UL 10C, and NFPA 252. Neutral Pressure with hose stream tested in accordance with UBC 7 1994 and UL 10B. For additional information on fire doors, please refer to the Lynden Door Fire Door Technical Sheets.
ACOUSTICAL RATING:	STC 32 ASTM E90-09 – Non-Operable* OITC 30 ASTM E90-09 – Non-Operable ** When installed with one row of NGP 5075, one row of NGP 5060, a NGP 335S x STC 2 Auto Door Bottom, and NGP 60FP Corner Pads; or one row of Pemko S773, one row of Pemko S44, a Pemko PDB 411 AE Auto Door Bottom, and Pemko ACP 112 Corner pads; the STC performance will be equal to an operable test rating of STC 32.*
ENVIRONMENTAL ATTRIBUTES:	This product is TSCA Title VI compliant. This product is manufactured with pre-consumer recycled material. For additional information on product contribution, please refer to the GreenDor™ Contribution Sheets.

Manufacturing Options

BLOCKING:	6" (152mm) blocking for closer reinforcement only; additional blocking requires LD2000 HPDL PC-5 construction.
MACHINING:	Machining for hardware, open cutouts, installation of lites and louvers, applied moldings, plant-ons, raceways, dutch doors, doors and transoms. Hardware cutouts shall be factory machined from manufacturers' templates and shop drawings. *Note: Fire rated doors must glazed under label service.*

Pattern: Type 1, Vertical Custom Lattice

Hardware: ADA Pull

Soft Close Track: Recessed floor track

Mounting: Low profile header mounting

SINGLE SLIDING

Our single sliding doors are a great alternative for swinging doors, especially where narrow hallways restrict operation. Each door uses a small, floor mounted guide that is always concealed to align and stabilize the door where it overlaps with an adjacent wall.

For wall-mounted situations (barn-door style mounting), there are optional brackets and fascia available. Leave brackets exposed for an industrial look or use a fascia for a more finished appearance. Larger panel overlaps with adjacent walls increase privacy and striking to a jamb or wall (one-side overlap) allows for locking options.

Opening Width	Max Panel	Usage	Overlap	Clearance
22" to 70"	5×10 or 6×8	High Frequency	1/2" to 3"	Approx 95%

SLIDING POCKET

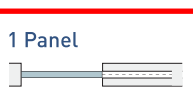
Our unique take on the sliding pocket door builds on its advantages of eliminating the need for clearance for a door swing and to completely disappear when not in use. To that we add the ability to fully extend a door from its pocket so that the complete stile and rail are visible.

The pocket door comes with an edge-mounted finger pull to retrieve it from the pocket. It also does not require a wider stile at the trailing end of the door for the stiles to look uniform when the door is extended (see technical detail below).

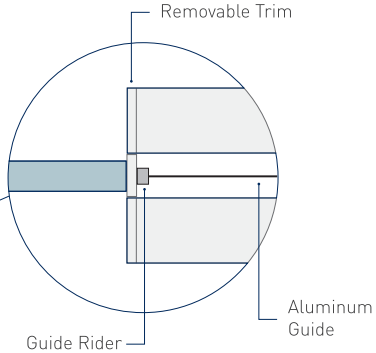
Opening Width	Max Panel	Usage	Overlap	Clearance
24" to 72"	5×10 6×8	High Frequency	None	100%

SYSTEM EXAMPLES

1 Panel



2 Panel - Symmetrical



Technical Detail: Pocket Guide

To make sure that our panels perform reliably in pockets we use a continuous aluminum guide on the floor of the pocket. This prevents the door from possibly scraping on the inside of the pocket and is engaged even when the door is extended out of pocket by our guide rider.

We recommend trim at the leading edge of the pocket that narrows the gap for a cleaner look.

- All EzyJamb, CavKit and SlideSet products are made to order.
- Lead times apply to all EzyJamb, CavKit and SlideSet orders. Typical lead time from date of order to date of delivery is 15-20 working days. Longer lead times may apply in some cases. Always confirm exact lead time with EZ Concept prior to placing order.
- All orders are accepted by EZ Concept on a FIFO basis (first in, first out). For urgent orders, please refer to the point below.

Floor to Ceiling Doors

- Floors to ceiling doors require no header jamb as the door extends the total height of the wall, when framing for this type of application allow the ceiling framing and drywall to carry on through to the adjacent space.

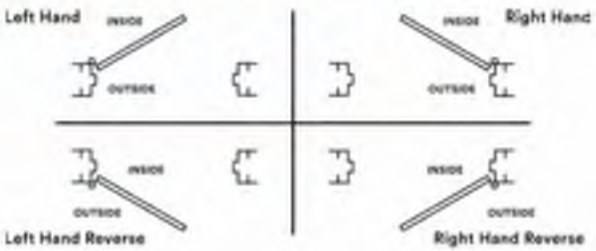
Expedited Orders

- For urgent orders, manufacturing processes can be expedited on request. Expedited orders can be dispatched within 7-10 working days from receipt of order. A minimum charge of $150 or 40% total order cost, whichever is greater is applicable to expedited orders.
- Expedition of EzyJamb, CavKit and SlideSet orders is not always possible and is subject to operational requirements. Always confirm exact lead time with EZ Concept prior to placing order.

Custom Door Sizes

- Custom size EzyJamb, CavKit and SlideSet products are available on request. Longer leader times and additional charges may apply for custom sizes. Custom latch plate punching is available on request.

North America Door Handing



ⓘ Hand all doors by standing outside and facing the door.

DF-004-EZ

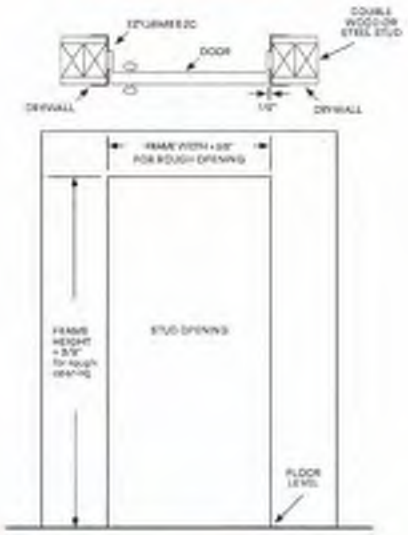
Installation Instructions

Step 1

Ensure that the stud opening is square and level and is the correct size.

Make sure the rough opening has double studs, the manufacturer strongly recommends wood studs or a minimum 18 gauge .030 metal studs on both sides of the opening. Studco recommends double studs for this installation

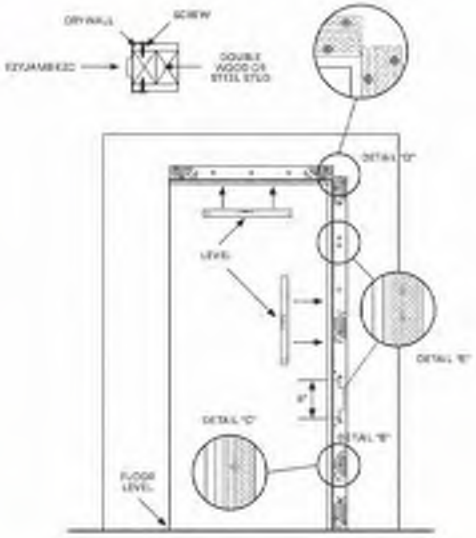
ⓘ Where using concealed hinges, the stud must be **notched** at each hinge location to ensure proper fitment.



Step 2

Fasten hinge side first, making sure jamb is level and as tight against stud opening as possible. Then screw sill 8" centers up, sills, screwing back through drywall into stud jamb. See Detail 'B' and 'C'.

Double screw all ends as Detail D, and beside hinge position - both above and below hinge if using concealed hinges as Detail E.



Step 2A | Head Installation

Head jamb as inserted in jamb.

Locate head into joiner and make flush with jamb so the head joiner is not seen.

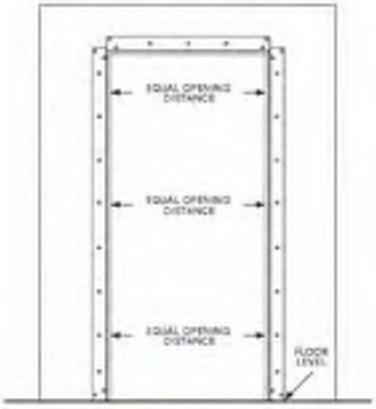
Remove the remaining head joiner out of the strike jamb into the end of the head (as shown) to receive the strike jamb.

EzyJamb | EZC Classic Adjust Door Frame

Installation Instructions

Step 3

Fasten the final vertical section (strike jamb) below the head section. Ensure that the spacing between the two vertical sections are spaced evenly at the required distance.

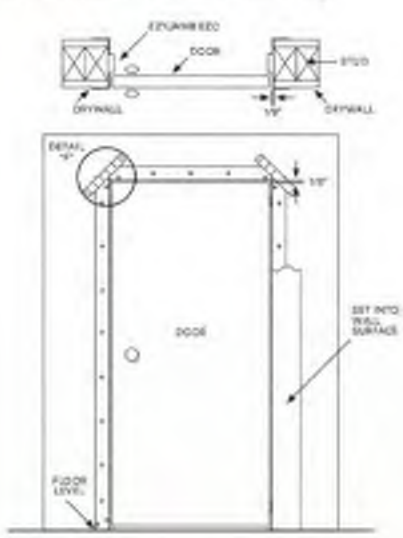


Step 4

Ensure the perforated side strips sit flat against the drywall to enable the jamb sections to be easily set into the wall surface. Finish the jamb with drywall compound.

All the corners must be paper taped and mudded in as Detail F.

Hang the door in position leaving 1/8" clearance from the top and the hinged side using the EzyJamb Standard or Invisible Hinges. Install the striker plate into position to align with the latch slide on striking.



Completed Installation

The completed jamb is flush finishes and can be painted in with the whole wall area to fully conceal any fixing, achieving simple clean lines around the door face.

For further information or assistance in installation of EzyJamb products, please visit:

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Door Closer
Item Type	Surface Door Closer
Description	Architectural Door Closer with cover; parallel arm configuration
Manufacturer	Yale
Model	2701
Dimensions	13-5/8" L x 3-7/8" H x 7-5/8" Arm Extension
Color	689
Finish	Plated
Material Composition	Aluminum alloy
CSI #	08 71 00 - Door Hardware
Omniclass #	22-08 71 00 Door Hardware
Grade	ANSI Grade 1
Fire/Smoke Rating	UL and cUL listed for 3 hour assemblies
Operation	Manual, hydraulic
Best Practices	Recycled content
Quality Standards	ANSI/BHMA A156.4, Grade 1 certified; UL / cUL listed for use on fire rated doors; UL10C listed for positive pressure fire test; 8301 and 8501 door closers are designed to comply with requirements for the Americans with Disabilities Act (A.D.A) and ANSI standard A117.1
Accessibility Compliance	ADA and ANSI/BHMA A117.1
Accessories	Drop plate required for glazed doors
Cover Finish	689, Aluminum
Opening Degree	Adjustable, from 85° to 110° in 5° increments
Cover Material	Metal
Mounting Type	Surface
Stop Type	Integral
Warranty	10 years

Options	For detailed information see "Options"
Door Prep	ANSI/BHMA A156.115
Minimum Stile	4-1/2" (114mm)

Certification Compliance

ANSI/BHMA	Certified ANSI A156.2 Series 4000 — Grade 1
UL	UL listed to U.S.A. and Canadian safety standards Listed for 3 hour doors (double doors require 41- option)
Positive Pressure	Meets ANSI/UL 10C, Positive Pressure Fire Test of Door Assemblies
ADA	All levers conform to ADA requirement for barrier-free accessibility
California Code	Levers (L, J & P) conform to California Administrative Code Title 19 and 24
Hurricane Code	All individual components of a total door opening are required to comply with each code. Refer to the SARGENT Website (www.sargentlock.com) for specific code compliance listings for both the lock hardware and other door components.

Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

MicroShield™

MicroShield®

As part of their promise to provide innovative solutions to their customers, certain ASSA ABLOY Group brands offer the MicroShield® technology a silver-based antimicrobial coating designed to inhibit the growth of bacteria.
MicroShield® is a registered trademark of Yale Security Inc., an ASSA ABLOY Group company.

MicroShield® Coating

- Revolutionary finish coating available on all SARGENT product lines, utilizes a silver-based antimicrobial compound from Agion Technologies
- As an integral part of the finish coating, MicroShield lasts for the life of the hardware
- MicroShield coating permanently suppresses the growth of bacteria, algae, fungus, mold and mildew. It is effective against a broad spectrum of bacteria.
- Non-toxic and completely safe. The Agion antimicrobial compound is EPA and NSF approved and FDA listed for use in medical and food preparation equipment.
- Applications: Anywhere there is need for a clean environment (hospitals, laboratories, schools, medical centers, daycare, food processing etc.)

Windstorm Certifications

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Windstorm Certifications: Florida Building Codes & UL Listings

SARGENT Manufacturing's products meet building codes that require hurricane, windstorm and FEMA certifications, including some of the most stringent building codes as specified in the Florida Building Code, Miami Dade Code and the International Building Code. Listed below are certifications and standards met by the 10 Line lock.

Florida Building Code: FL2998

UL Certification Directory: ZHEM.R21744 – Latching Hardware

ANSI/SDI-BHMA A250.13	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies"
ANSI/ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
(TAS) 201	"Impact Test Procedures"*
(TAS) 202	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
(TAS) 203	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* Published in the "Florida Building Code"

UL Certification Directory: ZHLL.R21744 – Products for Use in Windstorm-rated Assemblies

Certifications to meet assembly requirements are done in conjunction with doors from ASSA ABLOY Group companies CECO DOOR and CURRIES.

ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
AAMA/WDMA/CSA 101/I.S.2/A440	"Standard/Specification for Windows, Doors, and Unit Skylights"
FEMA Publication 320	"Taking Shelter From the Storm: Building a Safe Room for Your Home or Small Business", investigated with respect to impact and pressure requirements only.
FEMA Publication 361	"Design and Construction Guidance for Community Safe Rooms", investigated with respect to impact and pressure requirements only.
ICC 500	"ICC/NSSA Standard for the Design and Construction of Storm Shelters", investigated with respect to impact and pressure testing. Minimum missile impact speeds vary with the design wind speed desired for a particular product. The information below correlates design wind speed to the minimum missile speeds as discussed in Table 305.1.1 of ICC 500.

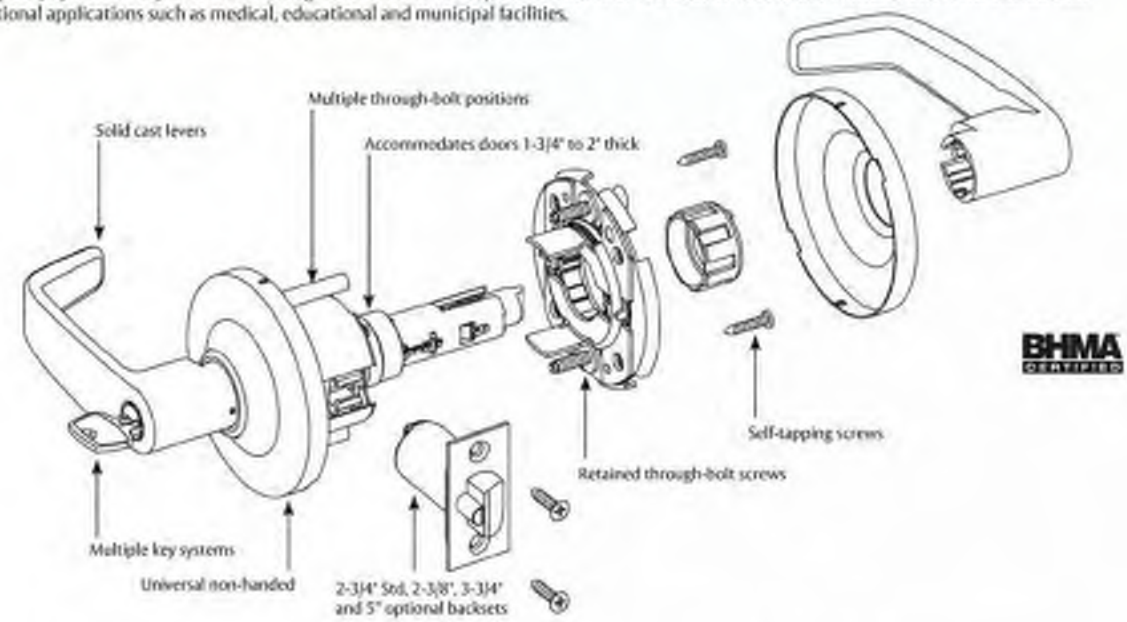
Features & Benefits

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Features & Benefits

A heavy duty cylindrical key-in-lever lock designed to exceed the requirements of ANSI 156.2 Series 4000 Grade 1. The 10 Line is the standard for institutional applications such as medical, educational and municipal facilities.



Strength, Durability and Security

- Cycle Test: Exceeds 9 times ANSI/BHMA A156.2 Grade 1 requirements
- Abusive Locked Lever Torque- without entry gained: Exceeds 1.5 times ANSI/BHMA A156.2 Grade 1 requirements
- **7 YEAR LIMITED WARRANTY** – no service required to maintain warranty

Convenience

- Installs in 1 minute or less
- Quickly adapts to fit multiple through-bolt positions
- User friendly packaging
- User friendly instruction sheets
- Convenient installation diagram on box

Design

- Solid feel and precise lever action
- Slim rose design available
- Decorative Levers — Coastal Series designs – Gulfport and Yarmouth
- Levers are solid one piece cast construction, except "J" lever

Flexibility

- Fits a variety of door preparations with adaptable through-bolt positioning
- Accommodates retrofit applications with optional 2-3/8", 3-3/4" and 5" backset latches
- 6 ADA lever styles to complement a wide array of design applications
- Levers (B, L, J & P) are non-handed for efficient warehousing and for ease of installation
- 11 Architectural grade finishes
- 21 Functions
- SARGENT uses engineered solutions and flexible manufacturing processes to accommodate special applications

Security

- Torx® and spanner screws optional
- Classroom security and multiple locking functions available
- Vandal resistant trim optional (FW- option)
- Security key systems available (Signature, Keso, BR-XC, XC)

Applications

- Designed to conform to national & state fire and handicapped requirements
- Grade 1 Lock
- Heavy duty commercial and institutional interior and exterior doors
- Offices
- Schools/Universities
- Hospitals
- Manufacturing facilities

Functions

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Single Cylinder Functions

04 Storeroom or Closet

10G04

- Deadlocking latch
- Latch by lever inside or key outside
- Outside lever rigid at all times
- **ANSI/BHMA F86**

05 Entrance or Office

10G05

- Deadlocking latch
- Latch by either lever unless outside lever is locked by push/turn button in inside lever
- Push button released by key outside or lever inside
- Turn button must be released manually
- Key retracts latch when outside lever is locked
- **ANSI/BHMA F109**

24 Entrance or Office

10G24

- Deadlocking latch
- Latch by either lever unless outside lever is locked by push button in inside lever
- Push button released by key or turning inside lever
- Closing door does not unlock outside lever or release button
- Key in outside lever retracts latch when outside lever is locked and releases inside push button
- **ANSI/BHMA F82A**

37 Classroom

10G37

- Deadlocking latch
- Latch by either lever unless outside lever is locked by key
- Key in outside lever locks or unlocks outside lever and retracts latch
- Inside lever always operative
- **ANSI/BHMA F84**

44 Service Station

10G44

- Deadlocking latch
- Latch by either lever unless outside lever is locked by push button in inside lever
- Key retracts latch when outside lever is locked
- Push button released by turning inside lever, closing door, or by key in outside lever unless push button is fixed in locked position by turning coin slot in inside lever
- Slotted inside button must be manually released
- **ANSI/BHMA F92**

50 Hotel, Dormitory or Apartment

10G50

- Deadlocking latch
- Latch by key outside and lever inside
- Outside lever always rigid
- Depressing push button when door is closed shuts out all keys except emergency key and projects visual occupancy indicator in cylinder face
- Push button released by turning inside lever automatically reactivating all keys and retracting visual occupancy indicator
- Lock out key fixes push button in locked position, shutting out all keys except emergency
- Push button fixed by lockout key must be released manually
- Lock out key provided
- See option page for restrictions to 50 function
- Emergency key ordered separately. Part # 6267EMK
- **ANSI/BHMA F93**

54 Corridor, Dormitory

10G54

- Deadlocking latch
- Latch by either lever unless outside lever is locked by push button inside or key outside
- Rotating inside lever or closing door releases inside button only, but does not unlock the outside lever if locked by key
- Key outside locks or unlocks outside lever and also retracts latchbolt when locked
- **ANSI/BHMA F90**

Freewheeling Locked Lever Option

- Available on all locking functions except 10G70 and 10G71
- Provides protection from vandalism and added security
- Stops in the rose prevent the lever from traveling beyond 60° in either direction
- Not available in "J" Lever Design and some options

Shaded lever indicates it is rigid at all times.

Functions

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Double Cylinder Functions

16 Classroom Security, Apartment, Exit, Privacy

10G16

- Deadlocking latch
- Latch by either lever unless outside lever is locked by key in inside lever
- Key in outside lever retracts latch when outside lever is locked
- Inside lever always operative
- **ANSI/BHMA F88**

17 Utility, Asylum or Institutional

10G17

- Deadlocking latch
- Both levers rigid at all times
- Latch by key either side
- Use only on rooms with more than one exit
- **ANSI/BHMA F87**

26 Store or Storeroom

10G26

- Deadlocking latch
- Latch by either lever
- Key in either lever locks or unlocks both levers
- **ANSI/BHMA F91**

30 Communicating

10G30

- Deadlocking latch
- Latch by either lever
- Key in either lever locks or unlocks its own lever only
- Use only on rooms with more than one exit
- **ANSI/BHMA F80**

38 Classroom Security Intruder

10G38

- Deadlocking latch
- Latch by either lever unless outside lever is locked by key
- Key in either lever locks or unlocks outside lever
- Inside lever always operable
- Locked indication on inside rose standard with this function
- **ANSI/BHMA F110**

Non-Cylinder Functions

13 Exit

10G13

- Deadlocking latch
- Latch by inside lever
- Outside lever rigid at all times
- **ANSI/BHMA F89**

15 Passage

10U15

- Latch by either lever
- **ANSI/BHMA F75**

15-3 Exit or Communicating

10G15-3

- Deadlocking latch
- Blank rose outside
- Latch by lever inside
- Minimum clearance of 1-1/8" on single doors and 2-1/4" between double doors

65 Privacy/Bathroom

10U65

- Latch by either lever unless outside lever is locked by push button in inside lever
- Turning inside lever or closing door releases button
- Emergency button in outside lever unlocks, with use of a blade screwdriver in outside lever and releases inside button
- **ANSI/BHMA F76A**

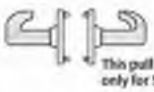
68 Hospital Privacy

10U68

- Latch by either lever unless outside lever is locked by push button in inside lever
- Turning inside lever or closing door releases button
- Rotating thumbturn in outside lever unlocks the outside lever and releases the inside button
- Not available in the "J" lever design

93 Single & 94 Double Lever Pulls

10U93/10U94



- For wood or custom hollow metal doors
- Lever and rose both sides joined by two through-bolts
- Requires special door preparation—see template

94-2 Double Lever Pull

10U94-2

- For wood or custom hollow metal doors
- Lever and rose both sides joined by two through-bolts
- Dummy latch plate
- Uses standard door prep template

Shaded lever indicates it is rigid at all times.

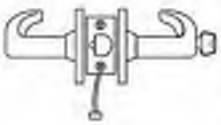
Electromechanical Functions & Accessories

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

70 Electromechanical (Fail Safe)
71 Electromechanical (Fail Secure)

10G70



- 10G70: Power off, unlocks outside lever
- 10G71: Power off, locks outside lever
- Deadlocking latch
- Key retracts latch
- Inside lever always allows egress
- Voltage requirements: 12VDC or 24VDC Regulated; always specify voltage
- 250mA at 24VDC or 500mA at 12VDC
- Provided with ElectroLynx® 8-Pin Connector

RX- Monitoring of Inside Lever

- Patent Pending design
- Non-Contact Switch
- Bidirectional lever rotation
- Non-handed design
- Internal switch offers N/O & N/C
- Modular wire harness with ElectroLynx® 8-pin connector
- Available functions: 04, 05, 15, 37, 70 & 71

Requirements for Electrical and Data Transfer

To answer the demand for "smart" electronic access control and locking solutions that require fast, easy, and cost-effective installation, ASSA ABLOY Group brands use the ElectroLynx® standardized plug-in connectors and color-coded wiring system.

With ElectroLynx, doorway components come pre-wired for easy hookup to the power source. Key to the system is the transfer device hinge that carries power from the frame to the locking hardware.

Features of ElectroLynx®:

- Makes it easy to bring power to the locking hardware
- Wires have connectors that snap together, like plugging a telephone into a jack

To connect 10 Line Electrified Lock to the electronic access control system, the following items are required:

- 10 Line Electrified Lock
- ASSA ABLOY Door Group pre-wired door, or ElectroLynx® retrofit cable (order from McKINNEY)
- Electronic transfer device (ElectroLynx® electronic transfer hinge or Electrical Power Transfer with standard hinge, from McKINNEY)
- ElectroLynx® cable from the hinge to above the ceiling (order from McKINNEY)

Information regarding cable selection, hinge requirements and order strings can be found in the McKINNEY Transfer Device Solutions catalog. Consult 800-810-WIRE (9473) with questions on application specifications and requirements.

McKINNEY QC8 ElectroLynx® hinge are recommended for Electrified 10 Line Applications

12VDC & 24VDC Power Supplies:

- UL Class 2 Listed
- Four 12V models and four 24V models available
- Integral battery charging capability keeps sealed lead acid gel/cell at full charge in case of line voltage failure (737-battery sold separately)
- Fused line voltage input with one, four, or eight DC outputs (depending on model)
- Each circuit can be individually turned on and off via a slide switch; the power status of each is shown by an LED.
- In the event of a DC short the problem is confined to the zone of difficulty
- Fire alarm interface standard

SARGENT MODEL No.	DESCRIPTION
3521	12V - 1 AMP POWER SUPPLY
3541	12V - 3 AMP POWER SUPPLY

738	24V - 5 AMP HOUR BACKUP BATTERY

Securitron PowerJump™ ICPT

The Securitron PowerJump ICPT Inductive Coupling Power Transfer delivers power contactlessly and invisibly between the frame and door to power electrified hardware on the door. The PowerJump can be installed at the latch side or hinge side of the door and transfers up to 6 watts of power without pins or wires across the door gap, eliminating points of vulnerability and wear ... and no need to core drill the door. The PowerJump is field selectable for 12VDC or 24VDC systems and is ideal for fail secure applications. The unit can hold electrified latches open in continuous duty or can momentarily energize the lockset for latch retraction.

Additional information regarding this product can be found at www.securitron.com

Strikes and Miscellaneous Parts

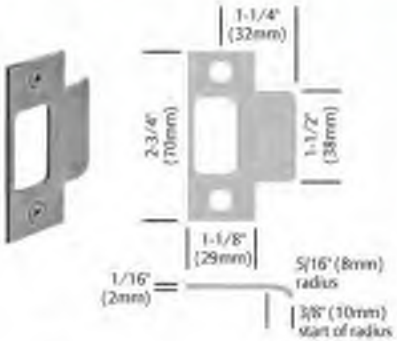
10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Strikes

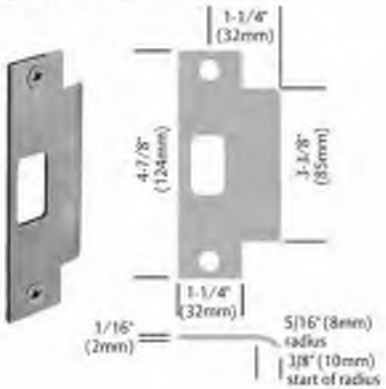
- Finishes: 03, 04, 09, 10, 10B, 10BE, 10BL, 20D, 32, 32D, BSP, WSP

2-3/4" Curved Lip Strike – Standard



- Brass, bronze or stainless steel
- Furnished standard with 1-1/4" (32mm) curved lip from center of strike screw holes to end of lip
- Lip lengths 1" (25mm), 1-1/4" (32mm) standard, 1-1/2" (38mm), 1-3/4" (44mm) and 2" (51mm)
- Plastic strike box AM-0044 included
- To order strike separately, specify 800 strike x finish x lip length

4-7/8" Curved Lip Strike: (28-Option)



- Brass, bronze or stainless steel
- Conforms to ANSI standard
- Furnished standard with curved lip 1-1/4" (32mm) from center of strike screw holes to end of lip
- Lip lengths 1-1/8" (29mm), 1-1/4" (32mm), 1-3/8" (35mm), 1-5/8" (42mm), 1-7/8" (48mm), 2-1/8" (54mm), 2-3/8" (60mm), 2-5/8" (66mm), 2-7/8" (73mm)
- 77-1141 Wrought strike box available separately
- To order strike separately, specify 808 strike x finish x lip length

ANSI Wrought Strike Box

- Used with ANSI 4-7/8" strike (#808)
- To order with lock, specify option WBS
- To order separately, specify 77-1141

Miscellaneous Parts

Part No.	Description
10-3188	1-3/8" Adapter plate pack (set of 2)
01-0949	30-option, washer only
C10-3	Emergency release cylinder (65 function)
10-0043	Push pin tool
10-2052	Screw pack (standard)
10-2070	Screw pack (28- option)
10-3048	Inside rose assembly
10-3049	Outside rose assembly
82-3855	6 lobe bit pack 6 bits (Sizes – T8, T9, T10, T15, T20, T25, T27) Requires 9/32" driver
82-3856	Spanner bit pack 5 bits (Sizes – 6, 8, 10, 12, 14) Requires 1/4" driver

C10-1

6300

7P-7300B

All cylinders are supplied with 2 nickel silver change keys.
When cylinders are ordered keyed to 5 pin systems, the (6th) last chamber will be empty.

Cylinders are supplied random keyed unless specified 1 bitted or master keyed. For master keyed orders provide keying details as requested on SARGENT Keyed Order Lead Sheets, located in the price book or contact customer service.

To order cylinders separately, specify part number x keyway x finish (i.e. C10-1 x LA x 15)

^Locks will be provided with the applicable tailpiece per the type interchangeable and/or removable core being used.

For example standard cores and Degree® cores require different tailpieces. When ordering complete locks, the appropriate option code must be specified in accordance to the permanent core being used. See pages 12-14 for cylinder options.

Cylinders with Competitive Keyways

Competitive Keyway	Part Number
Schlage® C	SC-C10-1
Schlage® E	SE-C10-1

All cylinders are 6-pin, 0-bitted and supplied with two brass key blanks.
Cylinders include tail piece.

Refer to Cylinders and Components catalog for more information.

Architectural Specifications

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Suggested Architectural Specifications - 2.0 Cylindrical Locks

A. Locks shall be 10 Line as manufactured by Sargent Manufacturing Company, New Haven, CT.

B. Locks shall exceed the requirements of ANSI/BHMA A156.2 Series 4000, Grade 1 with all standard trims, as follows:
1. Cycle Test: Exceeds 5 times ANSI/BHMA A156.2 Grade 1 requirements
2. Abusive Locked Lever Torque — without entry gained: Exceeds 1.5 times ANSI/BHMA A156.2 Grade 1 requirements

C. Locks shall be non-handed with bi-directional lever operation, except the "G" and "Y" lever designs.

D. Through-bolt mounting shall be adaptable to fit a variety of standard cylindrical lock preps.

E. Locks shall comply with UL 10C positive pressure requirements.

F. Locks required for fire doors shall be listed by Underwriters Laboratories for ratings of 3 hours (A label) and less, for doors up to 4'0" (1.2m) x 10'0" (3.0m) and pairs of doors 8'0" (2.4m) x 10'0" (3.0m).

G. Lock levers shall be made of solid material.

H. Lock shall be available in a minimum of six different lever designs.

I. Locks shall have a 2-3/4" (70mm) backset standard.

J. Strikes shall be non-handed with a curved lip. Provide wrought boxes with strikes.

K. Locks shall have brass 6-Pin cylinder standard.

L. Provide two nickel silver keys with each lock.

J. Locks shall have a seven year limited warranty.

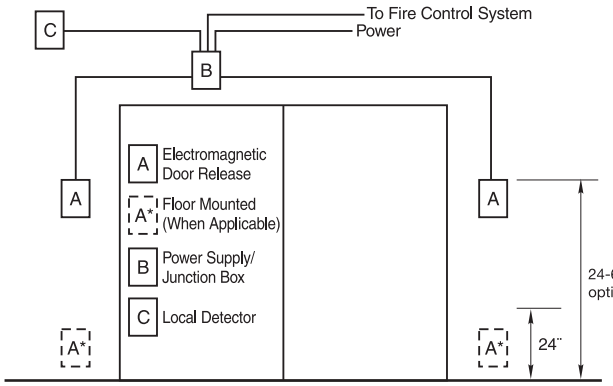
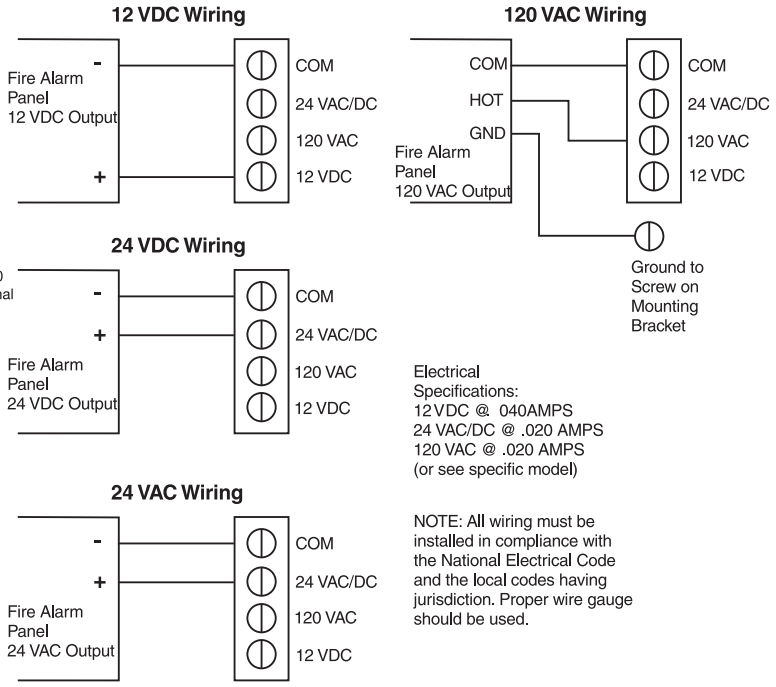
Schematics





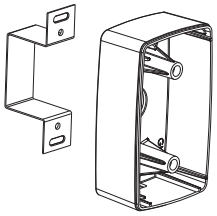
Electrical Specifications:
12 VDC @ 040AMPS
24 VAC/DC @ .020 AMPS
120 VAC @ .020 AMPS
(or see specific model)

NOTE: All wiring must be installed in compliance with the National Electrical Code and the local codes having jurisdiction. Proper wire gauge should be used.

Operation Narrative

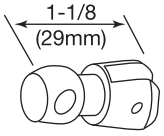
Doors are to be normally held open. The electromagnetic door releases will be energized with the voltage shown (at right) in the hardware set for this opening. Power shall be controlled by the fire control system. It will interrupt the power if alarmed, causing the doors to be released, thus allowing the door closers to close the doors. When power is restored the magnets will re-energize, permitting the doors to be manually returned to their held open position.

Accessories

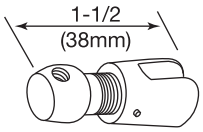


1-1/2" (38mm) Extension (for use only with Models 997M, 998M & 994M) Mounts behind wall cover.

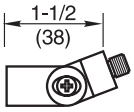
XK996M
Part# 996631M-*



994M Swivel Armature (cannot be used with extension spacers)
Part# 900-3



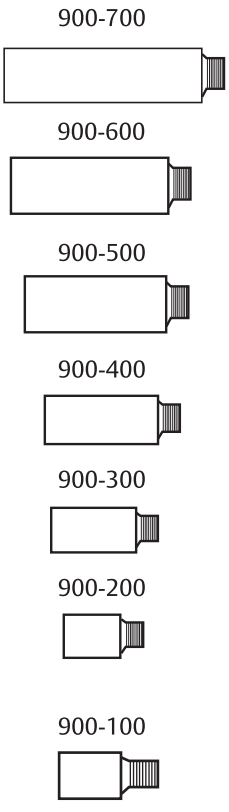
Base Unit Armature Extension Mounts between armature and contact plate.
Part# 900
Cannot be used with model 994M



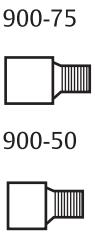
Armature Extension 90° Bend
Part# 900-Z
Must be used with 900 base unit. Those two pieces will extend armature 3" longer than the contact plate.

*specify finish

Spacer lengths – must be used with 900 base



For dimensions, see chart below



Extension pieces must be used in conjunction with 900 Base Unit

Part# 900-700 = 7"
Part #900-600 = 6"
Part# 900-500 = 5"
Part# 900-400 = 4"
Part# 900-300 = 3"
Part# 900-200 = 2"
Part# 900-100 = 1"
Part# 900-75 = 3/4"
Part# 900-50 = 1/2"

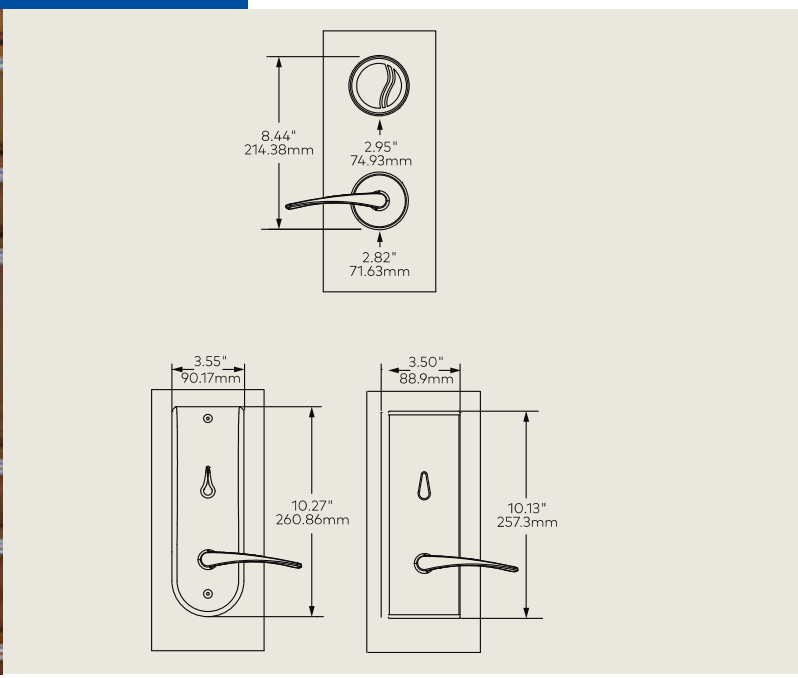
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

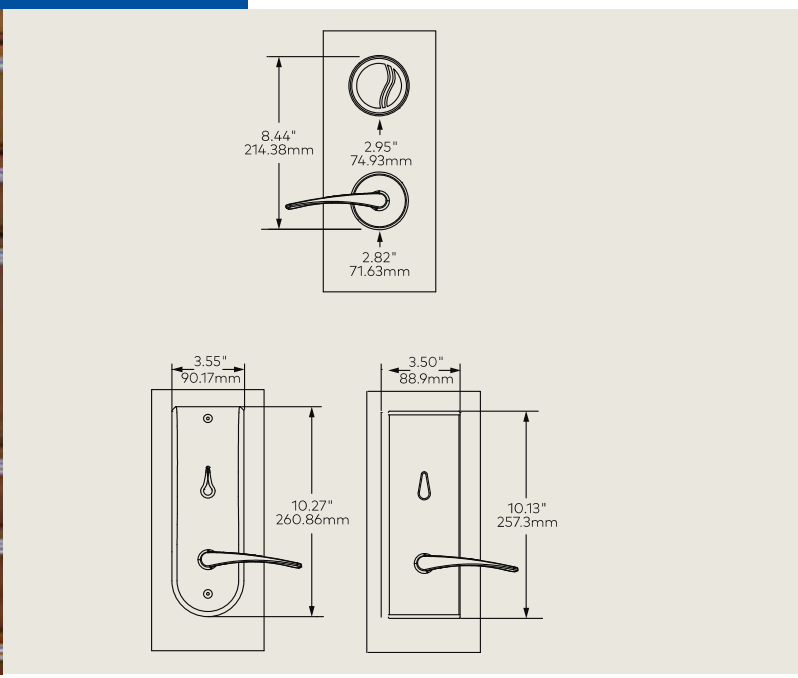
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

DH-016-SA_T17

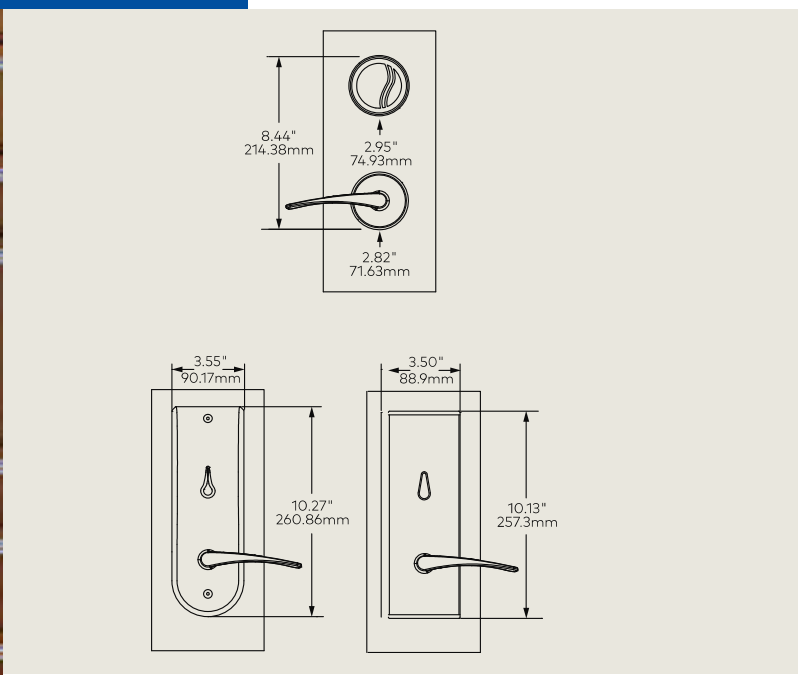
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

DH-016-SA_T18

Mechanical Features

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Handing	Factory-handed mortise (left, right, left reverse, right reverse)
Lever	ADA Compliant Apogee Arc Continental Elevon Gala Troy
Deadbolt	1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Door Thickness	1¾" (44.5mm) to 2⅛" (53.98mm) for standard product
Weight	Approx. 8.0 lbs with hardware
Housing Construction	Escutcheons: Zinc Levers: Brass, zinc, or stainless steel
Standard Finishes	Bright chrome, bright brass, satin chrome, satin brass, dark mahogany
Inside Trim Options	Optional ädəse or MT inside escutcheon
Standard Backset	2¾" (69.9mm) from door edge to lever
Locking Options	ANSI lock case with 1¼" or 1" lock front mortise Options: automatic deadbolt, door ajar European lock case mortise (20 x 165 mm) with 20 x 233 mm lock front mortise
Online Configurations	Messenger Ready: DAJ mortise (ANSI lock case) Standard (stand alone) inside escutcheon
	Messenger Online: Lock controller board with Messenger capability DAJ mortise (ANSI lock case) Inside escutcheon equipped with Messenger module

Mobile Access Options (Quantum RFID Series)

BLE compatible BLE ready BLE enabled	Standard Lock. Upgradable to BLE by adding BLE connector cable, end cap and BLE module Upgradable to BLE with BLE module End cap with BLE module included, no further upgrades needed

Batteries

Alkaline - Four AA battery pack	Battery life is up to 2 years Low battery indicator: alerts staff that batteries need to be changed soon

Lock Operation

Date/Time Stamp	Real-time; date and hours/minutes
Interrogation	Obtain key usage reports from the lock by using a handheld unit at the door, or increase efficiency by performing a remote Interrogation using Messenger (optional)
Pre-registered Keycards	Keys can be made up to ten days in advance without cancelling current or arriving guests
Keycard Expiration	Configurable expiration dates; can be automatically set for check out date or manually applied when making key during check in process.
Passage Mode	Set by authorized keycard or Messenger system. Can also be configured to perform an automated/pre-defined passage mode time.
Lockout Mode	Set by authorized keycard or Messenger system
Keycards Accepted	Mifare Classic keycards (4 byte NUID)
Feedback	Light indicators in reader
Diagnostics	Light indicators and handheld display
Audit Trail	Up to 4,000 events
Disability Feature	RCU readers interface with automatic power operated doors for special openings
Privacy Override	Emergency keycards

Certifications & Testing

Accessibility Standard	ADA compliant levers (Code of Federal Regulations 28 CFR Part 36 – 1994 "ADA Standards for Accessible Design")
BHMA/ANSI	Certified to be compliant with Grade One performance tests for "ANSI/BHMA A256.13-2012 Standard for Mortise Locks and Latches," and "ANSI/BHMA A256.25-2013 Standard for Electrified Locking Devices." (Only locks tested and approved by non-biased third-party test lab are allowed in the "BHMA Certified Products Directory" found at www.buildershardware.com)
Fire Rating	Listed for pre-prepared manufactured doors and certified for retrofitting on existing doors by Underwriters Laboratories for use on fire doors having up to a three-hour rating. a. U.L. Certification: GWVW.R12071 "Accessories for Single-point Locks and Latches and Fire Exit Hardware." Evaluated in accordance with UL 10B and UL 10C. b. U.L. Listing: GYQS.R11247 "Electrically Controlled Single-point Locks and Latches." Evaluated in accordance with UL 10B and UL 10C. c. Also classified in accordance with Uniform Building Code Standard 7-2, "Fire Test of Door Assemblies" (1997)
Electronics	FCC Part 15 Class A and CE directive 89/336/EEC compliant
Environmental Operating Conditions	Indoor side: 32°F to 151°F (0°C to 66°C) Outdoor side: -31°F to 151°F (-35°C to 66°C) 0% to 85% non-condensing humidity at 86°F (30°C)

Certifications

8200/R8200/7800 Series Mortise Locks

SARGENT ASSA ABLOY

Certification Compliance

ANSI/BHMA	Certified to ANSI/BHMA A156.13 Series 1000 Operational Grade 1 and Security Grade 1 with all standard trims. ANSI/ASTM F476-84 Grade 40 with concealed mortise cylinder. **Note:** LFIC (Removable) Cylinders and SFIC Cylinders do not meet Security Grade 1 requirements.
ADA	Meets A117.1 Accessibility Code. Meets BOMA International 4.13.8 Complies with American Disability Act; Consult local authorities
UL-cUL	UL and cUL Listed to US and Canadian safety standards for A label 4 x 10 single and 8 x 10 double (3 hour fire door) and lesser class doors, stamped letter F and UL symbol on armored front indicate listing
Positive Pressure	Meets ANSI/UL 10C, Positive Pressure Fire Test of Door Assemblies
California	California State Reference Code (Formerly Title 19, California State Fire Marshal Standard) All levers with returns comply; levers return to within 1/2" (13mm) of door face
Tornado and Hurricane Codes	See below

Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

Windstorm Certifications: Florida Building Codes & UL Listings

SARGENT Manufacturing's products meet building codes that require hurricane, windstorm and FEMA certifications, including some of the most stringent building codes as specified in the Florida Building Code, Miami Dade Code and the International Building Code. Listed below are certifications and standards met by the 7800/8200 lock.

Florida Building Code: FL2998

UL Certification Directory: ZHEM.R21744 – Latching Hardware

ANSI/SDI-BHMA A250.13	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies"
ANSI/ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
(TAS) 201	"Impact Test Procedures"*
(TAS) 202	"Criteria for Testing Impact and Non-Impact Resistant Building Envelope Components Using Uniform Static Air Pressure"
(TAS) 203	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* Published in the "Florida Building Code"

UL Certification Directory: ZHLL.R21744 – Products for Use in Windstorm-rated Assemblies

Certifications to meet assembly requirements are done in conjunction with doors from ASSA ABLOY Group companies CECO DOOR and CURRIES.

Features

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

The patented SARGENT Mortise Locks are designed and constructed with high quality components to provide maximum security, performance and durability. These locks represent over a century of innovation and experience in manufacturing hardware and are the industry's benchmark for mortise locks: strong, durable, flexible, innovative and secure.

Specifications

- For Doors 1-3/4" (44mm) thick standard
- Backset 2-3/4" (70mm) only
- Outside Front Plate Brass, bronze or stainless steel. 8" (203mm) x 1-1/4" (31mm), ANSI/BHMA Standard A156.115
- Front adjustable at any angle from flat to beveled 1/8" (3mm) in 2" (51mm)
- Hubs for Knobs/Levers
  - 7800: sintered iron copper infiltrated
  - 8200: cold forged steel
  - R8200: investment cast steel
- Auxiliary Deadlatch is stainless steel and non-handed
- Specify hand on order; easily field reversible (if no hand is specified RH will be provided)
- Strike: Brass, bronze or stainless steel; ANSI Standard; curved lip, non-handed (strike box optional)
- Keys: Two, nickel silver (control key or emergency key must be ordered when required)
- Cylinder: Brass, size #41 (1-1/8") standard (except for Freewheeling, size #46 (1-3/4"))
- Can be masterkeyed or grand masterkeyed. Construction keying available. LA standard keyway
- Stile: 4-1/2" (114mm) minimum stile for 7800/8200/R8200, 4-3/4" (121mm) minimum stile for electrical function locks
- Door Prep: ANSI/BHMA A156.115 or A156.115W modified per template (see template)
- Warranty: 10 year limited warranty, 2 year limited warranty on electrified locks. Warranty limited to replacement of lockbody and/or components

Maximum Strength & Durability

- Certified to and exceeds ANSI/BHMA A156.13, Series 1000, Operational Grade 1 and Security Grade 1 with all standard trims
- Exceeds cycle testing requirements by 14 times the ANSI/BHMA A156.13 Grade 1 standard
- Case: 12 gauge heavy duty wrought steel, zinc dichromate plated. Thickness 7/64" (3mm) (.109")
- 1/8" (.125") cold-rolled steel inside front holds lock securely in door
- Heavy duty wrought steel hubs and high carbon steel spring cartridge provide superior strength and cycle life for 8200 locks
- Latchbolt is stainless steel with 3/4" (19mm) projection one-piece, anti-friction reversible latch
- Deadbolt is one-piece hardened stainless steel with 1" (25mm) projection
- Optional 8200 stainless steel hubs for Institutional setting (specify 3- option)
- Patent pending and/or patent www.assaabloydss.com/patents

Features

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Maximum Flexibility

- Fast and easy installation. Lock is easily re-handed without removing parts or opening the lock case
- Aesthetic design. Many escutcheon and lever styles available to match a wide range of styles
- Many standard architectural grade finishes, including Polished Nickel (US14) & Satin Nickel (US15) finishes
- 53 functions including 4 electrical functions. The most in the industry for a broad range of applications
- Versatile. Offered for door thicknesses ranging from 1-3/8" (35mm) to 6" (152mm)
- Available with vandalism deterrent trim and/or secure fastener options Torx® and spanner screws for high abuse conditions
- Available with push/pull trim, perfect for hospital applications
- Status indicator options provide peace of mind on the locked/unlocked status of a door

Innovation

- First in the industry to offer a multi-functional lockbody that embodies 8 functions in 1 lockbody
- Easy operation. Only 30° of lever rotation required to retract latchbolt
- Lever springs contained inside of the lock case for easier installation
- SARGENT's revolutionary MicroShield® available. This antimicrobial silver-based finish coating permanently suppresses the growth of bacteria, algae, fungus, mold and mildew. EPA and NSF approved and FDA listed
- Broad offering of electro-mechanical configurations offer higher security for the most demanding access/egress control applications featuring ElectroLynx® quick connectors

Security

- Multiple security trim options available: free-wheeling, security escutcheon and anti-vandal pull trim (patent pending)
- Security key systems available (Degree, Signature, Keso, Keso F1, & XC)

Simplí™ Roseless Trim & R8200 Series Mortise Locks

SARGENT
ASSA ABLOY

Information

This elegant trim by SARGENT seamlessly unifies the lever and the door. Compatible with most Studio Collection and Coastal Series decorative levers, Simplí creates a flawless aesthetic vision on any door opening.

Simpli is offered on the R8200 Series mortise lock, which was specially designed to accept the roseless trim. In addition to the R8200 Series, Simpli is also available with the RDL Series tubular locks and Harmony R8200 Series mortise locks.

- Certified to and exceeds ANSI/BHMA A156.13, Series 1000, Operational Grade 1 and Security Grade 1
- Offered with most 8200 functions
- Available with Coastal Series and many Studio Collection levers (except MC, MK, MN, MP, MT, Gramercy Series, Wooster Square and Grant Park)
- Selected levers return within ½" of the door face
- Simpli roseless trim is not compatible with the 8200 lockbody; can only be used with R8200 locks
- All standard cylinder options are available
- Patent pending and/or patent www.assaabloydss.com/patents

Escutcheon Designs

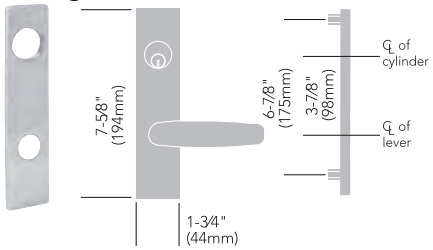
8200/R8200/7800 Series Mortise Locks

SARGENT ASSA ABLOY

Cylinders will protrude from escutcheon face on double cylinder functions only.

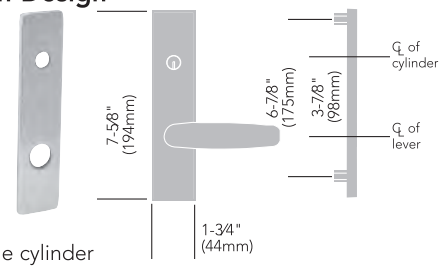
LE1/LE2 Escutcheon Design

- Escutcheon: LE-Cast
- LE1- (2) Exposed screws inside
- LE2- (2) Concealed screws inside
- LE1 is available with standard, Coastal & Studio Levers
- LE2 is available with standard levers only



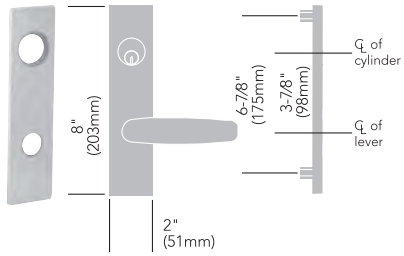
LE3/LE4 Escutcheon Design

- Concealed Cylinder designed Escutcheon, Exposed Barrel Only
- Escutcheon: LE-Cast
- LE3- (2) Exposed screws inside
- LE4- (2) Concealed screws inside
- Not available on double cylinder functions
- Only available with #41 size cylinders
  - limited keyway and key system offerings – see cylinders section
- If cylinder is ordered separately: specify 78- for concealed cylinder
- LE3 & LE4 are available with standard levers only
- UL437 not available
- Not available with DG2 & DG3 cylinders



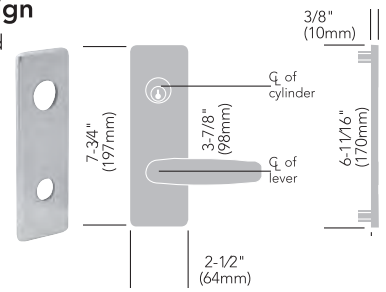
LW1 Escutcheon Design

- Escutcheon: LW1- Wrought
- (2) Exposed screws inside
- LW1 is available with standard levers only



LS Escutcheon Design

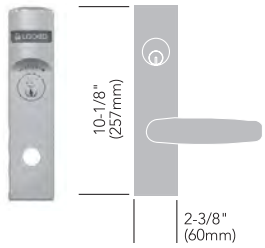
- Escutcheon: LS-Forged
- Security Trim: Cylinder is protected by the Escutcheon
- (4) Spanner security screws are exposed on inside trim standard
- LS is available with standard levers only



Note: The LS Escutcheon is not available with cylinder options: 10-63-, 11-60-, 11-63-, 11-64-, 60-, 63-, 64-, 70-, 72-, 73-, 65-73-, 65-73-7P-, 73-7P-, 81-, 82-, 83-, 84-, F1-82-, F1-82- & F1-83-. Also not available with electrified functions: 70, 71, 72, 73

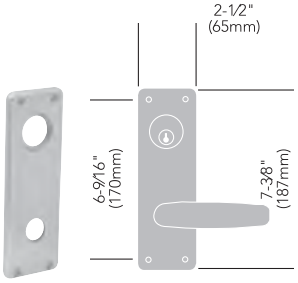
VN1 Escutcheon Design

- Escutcheon: Forged
- Thrubolt mounting screws (2)
- Exposed screws inside
- Used only with indicator options
- Available with all lever styles
- Refer to page 34



WT Escutcheon Design

- Escutcheon: WT-Heavy wrought
- Surface mounted both inside and outside
- (4) Exposed screws both inside and outside
- WT is available with standard levers only



SARGuide™ 8200 Mortise Lock (TL- Option)

- Escutcheon: TL-WT Heavy wrought
- Surface mounted both inside and outside
- (4) Exposed screws both inside and outside
- SARGuide opening 2" x 3/4"
- TL-WT is available with standard levers only

Note: SARGuide is only available with TL- WT Escutcheon.

SARGuide™, with integrated electroluminescent "EXIT" signage, addresses the increasing concern about safe public egress, particularly in low-visibility conditions. SARGuide™ can be wired for continuous operation or for operation only when an emergency alarm is activated.

Mortise Features

- Lamp can be used on internal trim (for external trim, consult factory)
- Includes all features of the 8200 Mortise Lock
- Available with WT escutcheon design only and all standard lever designs. Must specify TL- Option when ordering

SARGuide™ Features

- Illuminated utilizing the patented FLATLITE® electroluminescent lamp embedded within the mortise lock escutcheon
- Dual voltage: 24VAC or VDC input with battery back-up
- Lamp replacement kit available

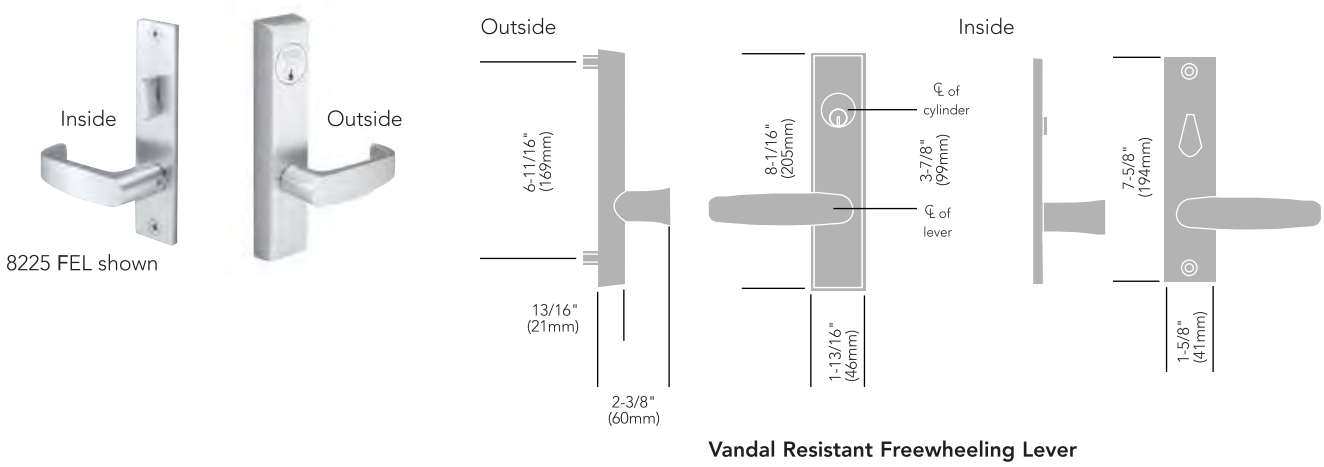
Freewheeling (FE) Trim Design

8200 Series Mortise Locks



Vandal Resistant Freewheeling Lever

Note: Maximum projection varies by lever design. Largest projection is "A" lever – 3-9/16" (90mm)

Features

The Freewheeling Mortise Trim is designed for areas that are susceptible to vandalism including schools, universities, public buildings, back doors of businesses and any exterior doors where excessive or abusive force might be applied to the lever handle trim.

This design allows the outside lever handle to swing freely, down to 70°, in the "locked" mode. This eliminates resetting the trim after vandalism attempts because the lever automatically returns to its original position.

- For 1-3/4" (44mm) doors standard. For 2" (51mm) and 2-1/4" (57mm) thick doors, must specify door thickness on order
- Vandal resistant trim
- Meets or exceeds ANSI/BHMA A156.13 Series 1000 Operational Grade 1 and Security Grade 1. LFIC (Removable) and SFIC cylinders do not meet Security Grade 1
- Forged brass outside escutcheon trim provides added protection against vandalism (32 and 32D finishes not available)
- Stainless steel lever bushing protects against wear
- Stainless steel lugs and through-bolted trim design for proper alignment and increased security
- Functions available — 04, 05, 16, 17, 24, 25, 26, 31, 35, 36, 37, 38, 39, 40, 51, 65, 66
- Levers A, B, E, F, J, L, P, W available
- Lever designs J, L and P have lever returns within 1/2" (13mm)
- Cylinder will protrude from escutcheon face on double cylinder functions only
- Cylinder sizes #46 (1-3/4") outside, #41 (1-1/8") inside standard on 1-3/4" (44mm) doors
- Specify hand. Easily field rehanded
- Patent pending and/or patent www.assaabloydss.com/patents
- Options available: 3-, 10-, 11-, 11-60-*, 11-63-*, 11-64-*, 11-70-7P-*, 11-72-7P-*, 11-73-7P-*, 11-65-73-7P-*, 21-, 23-, 36-, 37-, 60-*, 63-*, 64-*, 70-*, 72-*, 73-*, 65-73-*, 65-73-7P-*, 73-7P-*, 74-, 75-, 76-, 77-, 82-, SG- & WBS-

* Can not be used as the inside cylinder with freewheeling trim (#41 cylinder required)

Behavioral Health Series™ Trim

8200 Series Mortise Locks

SARGENT
ASSA ABLOY

8200 Push/Pull Trim (ALP)

(Paddle shown horizontally)

The 8200 mortise lock with push/pull trim provides an aesthetically-pleasing alternative to standard push/pull products. Ease of operation, along with the strength, versatility and integrity of the 8200 mortise lock, allows its use in many types of environments. Perfect for health care facilities, including behavioral health units, patient room doors and operating rooms.

Features

- Paddles can be mounted in vertically (up or down) and horizontally (towards hinge)
  - with Cylinder - paddle mounts vertically down or horizontally
- Easy installation
- Trim is non-handed; lockbody is easily field reversible
- Through-bolted trim for stability
- Torx® and spanner screws optional with ALP
- Lead lining is optional (Lockbody only), specify 74- option
- Covers are cast stainless steel
- Paddles are cast stainless steel
- Finish: 32D
- Patent pending and/or patent www.assaabloydss.com/patents

See Specialty Hardware Catalog 90712 for more details

8200 Series with BHW* Trim

Part of the Behavioral Health Series™ of products, the 8200 mortise lock with BHW trim provides an innovative solution for behavioral health environments. The unique integrated lever and escutcheon combines aesthetics with safety. Ease of operation, along with the strength and versatility of the 8200 mortise lock allows its use in many applications.

Features

- Available in 37 functions
- Uses standard mortise prep
- ANSI/BHMA Grade 1
- Tapered surfaces on all components
- Handed
- Available with MicroShield® antimicrobial coating
- Trim only option available with existing sectional and escutcheon trim only
- Trim only kits
  - 694-1 Trim only, non-keyed functions
  - 694-2 Trim only, single cylinder functions
  - 694-3 Trim only, double cylinder functions
- ADA Compliant
- Matching thumbturn available
- Finish: 32D
- 6 Lobe head security screws (Torx® type)
- Patent pending and/or patent www.assaabloydss.com/patents

See Specialty Hardware Catalog 90712 for more details

8200 with BHL* Trim

The SARGENT BHL trim is part of the Behavioral Health Series™ of products. With an array of functions, this trim can be used on virtually any opening in healthcare applications. Sloping surfaces and overlapping rose and lever address safety concerns common in behavioral health. Optimal for tough environments, the SARGENT 8200 mortise lock provides impressive strength and reliability.

Features

- Available in 21 functions
- UL Fire Rated
- ANSI/BHMA Grade 1
- Outside and inside levers will freely rotate up and down 45° when in the locked condition.
- Sloped surfaces
- Non-Handed
- Concealed hardware
- Overlapping lever and rose construction
- ADA compliant
- Finish: 32D
- Available with MicroShield® antimicrobial coating

See Specialty Hardware Catalog 90712 for more details

* Although these products are better designed for behavioral health applications than traditional trim, they do not eliminate the risk that an object can be affixed to, or around them

PT Push/Pull Trims & Anti-Vandal Option

8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

7800 Push/Pull Trim (PT)

(Paddle shown horizontally)

Typically used in the healthcare environment, push/pull trim is known for its ease of operation. Because the mortise lock with trim is more durable and secure than a cylindrical lock, conference rooms, handicapped restrooms, laboratories and pharmacies are appropriate applications.

Features

- Paddles can be mounted in vertically (up or down) and horizontally (towards hinge)
  - with Cylinder — paddle mounts vertically down or horizontally
  - with thumb turn — paddle mounts horizontally only
- Handing is easily field reversible
- Through-bolted trim for stability
- Functions available: 04, 15, 16, 17, 24, 26, 37, 43, 45, 50, 65
- Paddles & Covers are cast stainless steel, brass or bronze

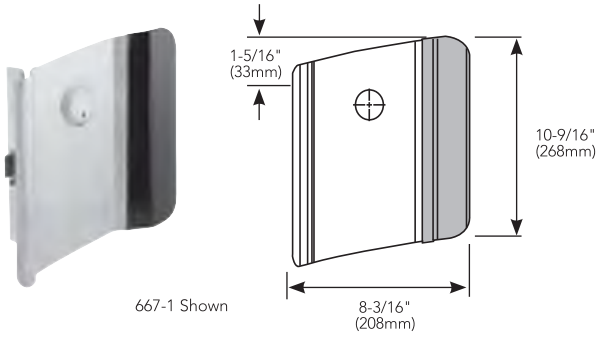
See Specialty Hardware Catalog 90712 for more details

7800/8200 Anti-Vandal Trim (AV)

Designed for exterior doors that require extra security or resistance to vandalism. AV anti-vandal trim plates have an extended lip on the active side of the door to provide extra protection for the latchbolt, deadbolt and deadlatch. A matte plastic coated grip edge provides a comfortable pull that feels good over wide temperature ranges. Fully through-bolted without exposed exterior fasteners for a clean look and increased security.

Features

- Heavy duty 12 gauge stainless steel in 32D finish only
- Through-bolted through mortise lockbody and door for added strength
- Handed: specify RHRB or LHRB
- ADA Compliant
- Patent Pending
- Available with all inside trim except LS/KS, FE and PT
- Options not available with AV trim: 1-, 31-, 49-, 50-, 68-, 69, 76, 77-, 85, 86, 87, DX- & SG-
- See chart to right for available functions
- For inactive door, available without protective lip
- Anti-Vandal Trim is available as a retrofit (667-_ Kit) or with the lock, as an "AV" option



667 AV Retrofit Kit

Retrofit kits for 7800, 7900, 8200 & 9200 mortise locks 667 Kit includes:

- AV Pull
- (4) 1/4-20 screws
- (4) Cup washers
- 1SB Rosette
- Instructions & Templates

RHRB	LHRB	Functions
667-1 82-4034	667-2 82-4035	04, 06, 17, 28, 29, 30, 50, 51, 52, 91 & 92 -1 & -2 Trim has an extended lip, cylinder hole and through-bolt post for mounting Inside trim
667-3* 82-4036	667-4* 82-4037	03, 20, 21, 23, & 31 -3 & -4 Trim has an extended lip & cylinder hole for deadbolt functions only

- No outside trim
- Auxiliary deadlatch
- Latch holdback — set by rotating & holding trim, then rotate key toward latchbolt. Lever will remain in rotated position for unlocked indication

Indicator options available for both sectional and escutcheon trim.

Functions & Descriptions

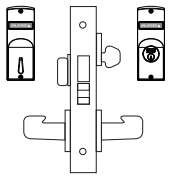
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Single Cylinder with Deadbolt

◊*‡24 Room Door

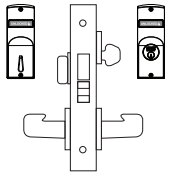
8200, R8200 & 7800



- Key outside or thumbturn inside retracts and projects deadbolt
- Trim either side retracts latchbolt
- Latchbolt & deadbolt operate independently of each other
- **ANSI F21**

*25 Dormitory or Exit

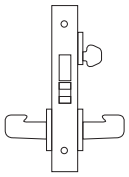
8200, R8200 & 7800



- Key outside or thumbturn inside retracts and projects deadbolt
- Trim from either side retracts latchbolt, when the deadbolt is in the retracted position
- Trim outside is locked, when the deadbolt is projected
- When deadbolt is projected, Trim inside retracts latchbolt and deadbolt simultaneously, unlocking outside trim
- **ANSI F13**

◊27 Closet or Storeroom

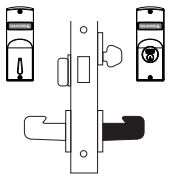
8200, R8200 & 7800



- Key outside retracts and projects deadbolt
- Trim from either side retracts latchbolt
- Same as 24 function without thumbturn
- Latchbolt & deadbolt operate independently of each other

28 Dummy Trim Deadlock

8200, R8200 & 7800

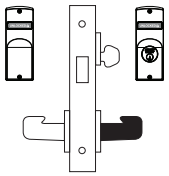


- Deadbolt operation only
- Key outside retracts and projects deadbolt
- Trim inside always retracts deadbolt
- Trim outside is always locked
- Thumbturn inside retracts and projects deadbolt

Note: Indicator shows deadbolt position only

30 Dummy Trim Deadlock

8200, R8200 & 7800

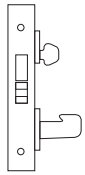


- Deadbolt operation only
- Key outside retracts and projects deadbolt
- Trim inside always retracts deadbolt
- Trim outside is always locked
- Same as 28 Function without a thumbturn

Note: Indicator shows deadbolt position only

◊*35 Storeroom

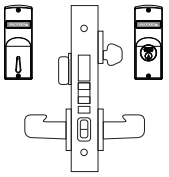
8200, R8200 & 7800



- Key outside retracts and projects deadbolt
- Trim outside retracts latchbolt, except when deadbolt is projected
- No inside trim or cylinder

‡43 Apartment Corridor Door

8200, R8200 & 7800



- Key and thumbturn both retract & project the deadbolt
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Key retracts both latchbolt and deadbolt, trim outside remains locked
- Trim inside always retracts latchbolt (and deadbolt simultaneously), trim outside remains locked
- Auxiliary deadlatch
- **ANSI F20**

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim
◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

Functions & Descriptions

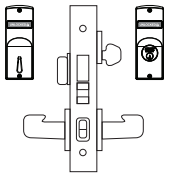
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Single Cylinder with Deadbolt

‡45 Dormitory or Exit

8200, R8200 & 7800

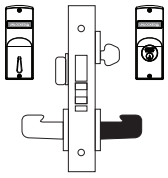


- Key and thumbturn both retract & project deadbolt
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Key retracts both latchbolt and deadbolt, trim outside remains locked
- Trim inside always retracts latchbolt (and deadbolt simultaneously), trim outside remains locked
- Same as an 8243 without Auxiliary Deadlatch
- **ANSI F12**

Note: Indicator shows deadbolt position only

*‡ 50 Hotel Guest

8200, R8200 & 7800

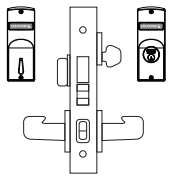


- Hotel Cylinder (50 Function) Required (Standard & Emergency Keys)
- Standard Key retracts latchbolt only, will not retract or project deadbolt
- Emergency Key (ordered separately) will retract latchbolt & deadbolt and also project deadbolt
- Thumbturn retracts & projects deadbolt
- Trim inside retracts latchbolt & deadbolt simultaneously
- Trim outside is always locked
- Auxiliary deadlatch
- Available with Conventional, LFIC (60- & 63-), Degree (60-, 63-, & 64-) and Keso (82- & F1-82-) key systems
- **ANSI F15**

Note: Indicator shows deadbolt position only

◊47 Front Door or Apartment Corridor Door

8200, R8200 & 7800

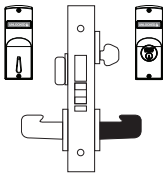


- Key and thumbturn both retract & project deadbolt
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Key retracts both latchbolt and deadbolt, trim outside remains locked
- Trim inside retracts latchbolt only, deadbolt is retracted manually & trim outside remains locked
- **ANSI F08/F10**

Note: Indicator shows deadbolt position only

*51 Storeroom Deadbolt

8200, R8200 & 7800



- Key and thumbturn both retract & project the deadbolt
- Key will also retract latchbolt
- Trim inside retracts latchbolt & deadbolt simultaneously
- Trim outside is always locked
- Auxiliary deadlatch
- Same as 50 function with a std. cylinder

Note: Indicator shows deadbolt position only

Copyright © 2004-2020, SARGENT Manufacturing Company. All rights reserved. Reproduction in whole or in part without the express written permission of SARGENT Manufacturing Company is prohibited. Patent pending and/or patent www.assaabloydss.com/patents.

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Functions & Descriptions

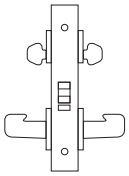
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Double Cylinder without Deadbolt

*‡16 Apartment, Exit or Public Restroom

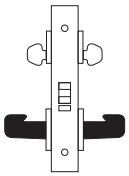
8200, R8200 & 7800



- Key outside retracts latchbolt
- Key inside is required to lock and unlock trim outside
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- Special -105 cam, required for inside cylinder (supplied)
- **ANSI F09**

◊‡17 Asylum or Institutional

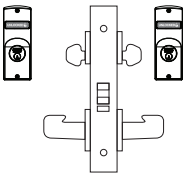
8200, R8200 & 7800



- Key from either side retracts latchbolt
- Trim on both sides are locked at all times
- Auxiliary deadlatch
- **ANSI F30**

*38 Classroom Security Intruder Latchbolt

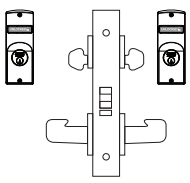
8200, R8200 & 7800



- Key from either side locks & unlocks outside trim
- Key from either side retracts latchbolt
- Trim outside retracts latchbolt, except when locked
- Trim inside always retracts latchbolt
- A Multi-Function 8200/R8200/7800 Lockbody
- Auxiliary deadlatch
- **ANSI F32**

*42 Classroom Security Intruder Latchbolt

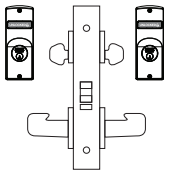
8200



- **Handed function; handing must be specified. This function is NOT field reversible for handing.**
- Key inside only locks outside trim (does not unlock)
- Key outside locks and unlocks outside trim
- Key outside retracts latchbolt
- Trim outside retracts latchbolt, except when locked
- Trim inside always retracts latchbolt
- Auxiliary deadlatch

◊59 Double Locking

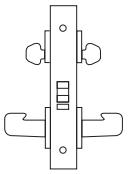
8200 & R8200



- Key from either side locks & unlocks both the inside & outside trims
- Key from either side retracts latchbolt
- Key from either side can retract latchbolt without unlocking trims
- Auxiliary deadlatch

90 Classroom Security Holdback

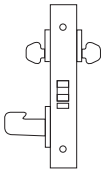
8200



- Key from either side retracts latchbolt, also locks & unlocks outside trim
- Latchbolt can be locked in the retracted position by key from either side
- Trim inside always retracts latchbolt
- Auxiliary deadlatch
- Latch holdback — to set, rotating & hold lever, then rotate key twice toward latchbolt. Lever will remain in rotated position indicating it is unlocked

92 All Purpose Holdback

8200 & 7800



- Key outside retracts latchbolt
- Key inside can lock latchbolt in retracted position when the lever is rotated
- Trim inside always retracts latchbolt
- No outside trim
- Auxiliary deadlatch
- 7892 "T " turn is used in place of knob
- Special -105 cam required for inside cylinder (Supplied Standard)
- Latch holdback — to set, rotating & hold lever, then rotate key twice toward latchbolt. Lever will remain in rotated position indicating it is unlocked

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Functions & Descriptions

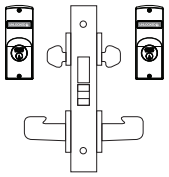
8200/R8200/7800 Series Mortise Locks

SARGENT ASSA ABLOY

Double Cylinder with Deadbolt

◊*‡26 Store Door

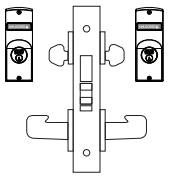
8200, R8200 & 7800



- Key from either side retracts & projects deadbolt
- Trim from either side retracts latchbolt
- Latchbolt and deadbolt are independent of each other
- **ANSI F14**

*40 Classroom Security Intruder Deadbolt

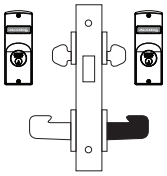
8200, R8200 & 7800



- Key from either side retracts or projects deadbolt which also unlocks or locks outside trim
- Trim outside retracts latchbolt, except when locked
- Trim outside is only locked by projecting the deadbolt
- Trim inside retracts both latchbolt and deadbolt simultaneously, and unlocks outside trim
- Auxiliary deadlatch
- Same as an 8239 with Auxiliary deadlatch
- **ANSI F34**

29 Dummy Trim Deadlock

8200, R8200 & 7800

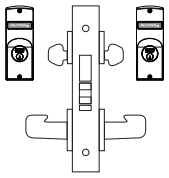


- Deadbolt operation only
- Key on either side retracts & projects deadbolt
- Trim inside retracts deadbolt
- Trim outside is always locked

Note: Indicator shows deadbolt position only

41 Classroom Security Intruder Deadbolt

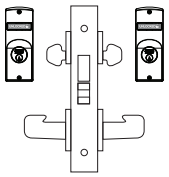
8200, R8200 & 7800



- Key from either side retracts and projects deadbolt
- When deadbolt is projected, 1st key rotation retracts deadbolt, 2nd key rotation unlocks trim outside
- Key retraction of latchbolt from either side unlocks trim outside
- Trim outside retracts latchbolt, except when locked
- Trim inside (when deadbolt is projected) retracts both latchbolt and deadbolt simultaneously and the outside trim remains locked
- Auxiliary deadlatch

*39 Classroom Security Intruder Deadbolt

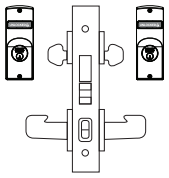
8200, R8200 & 7800



- Key either from side retracts or projects deadbolt which also unlocks or locks outside trim
- Trim outside retracts latchbolt, except when locked
- Trim outside is only locked by projecting the deadbolt
- Trim inside retracts both latchbolt and deadbolt simultaneously, and unlocks outside trim
- **ANSI F33**

46 Dormitory or Exit

8200, R8200 & 7800



- Key from either side retracts and projects deadbolt
- Key from either side retracts both latchbolt and deadbolt, trim outside remains locked
- Trim outside is locked by toggle or projecting deadbolt
- Trim outside is unlocked by toggle only
- Trim inside (when deadbolt is projected) retracts both latchbolt and deadbolt simultaneously and the outside trim remains locked

Note: Indicator shows deadbolt position only

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

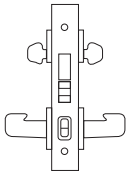
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Double Cylinder with Deadbolt

◊48 Store Door

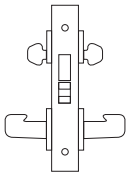
8200, R8200 & 7800



- Key from either side retracts and projects deadbolt
- Key from either side retracts latchbolt
- Trim outside is locked by toggle or projecting deadbolt and unlocked by toggle only
- Trim inside (when deadbolt is projected) retracts latchbolt only, and outside trim remains locked
- **ANSI F25**

◊49 Security Deadbolt

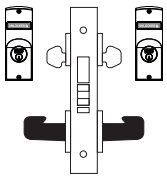
8200 & R8200



- Key from either side retracts and projects deadbolt
- Key from either side retracts latchbolt
- Trim inside & outside are locked only when deadbolt is projected

◊52 Institutional Deadbolt

8200, R8200 & 7800



- Key from either side retracts and projects deadbolt
- Key from either side retracts latchbolt
- Trim inside and out are always locked
- Auxiliary deadlatch

Note: Indicator shows deadbolt position only

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Functions & Descriptions

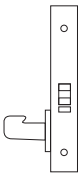
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Non-Keyed

13 Exit Latch

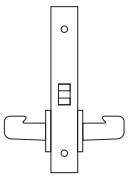
8200, R8200 & 7800



- No outside trim or cylinder
- Trim inside retracts latchbolt
- A Multi-Function 8200/R8200/7800 Lockbody
- Auxiliary deadlatch
- **ANSI F31**

‡15 Passage or Closet

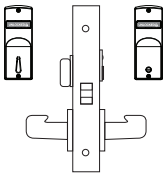
8200, R8200 & 7800



- Trim from either side retracts latchbolt at all times
- **ANSI F01**

*‡ 65 Privacy Bath/Bedroom

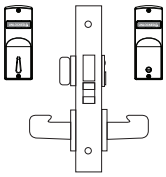
8200, R8200 & 7800



- Trim outside retracts latchbolt except when locked by thumbturn
- Trim inside retracts latchbolt and unlocks outside trim
- Emergency Release locks/unlocks trim outside-by coin, screwdriver or Emergency key (14-0057) ordered separately
- Thumbturn locks and unlocks trim outside
- Closing the door will unlock outside trim
- **ANSI F22**

*66 Privacy Bath/Bedroom

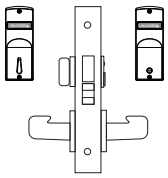
8200, R8200 & 7800



- Trim outside retracts latchbolt except when deadbolt is projected
- Trim inside retracts both latchbolt and deadbolt simultaneously, unlocking the outside trim
- Emergency Release retracts and projects deadbolt — by coin, screw driver or Emergency key (14-0057) ordered separately
- Thumbturn retracts and projects deadbolt
- **ANSI F19**

◊68 Privacy Bath/Bedroom

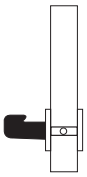
8200, R8200 & 7800



- Trim from either side retracts latchbolt at all times
- Thumbturn retracts and projects deadbolt
- Emergency release retracts and projects deadbolt — by coin, screwdriver or Emergency key (14-0057) ordered separately
- Latchbolt and deadbolt are independent of each other
- **ANSI F02**

93 Trim Dummy

8200, R8200 & 7800



- Trim on inside of door is always rigid
- Trim only used as door pull
- For double door applications, installed on the inactive door, use template #4298 to accept latchbolt from active door

Note: Lever is through-bolted

*8200 Available with Freewheeling Trim
‡7800 Available with Push/Pull Trim

If shaded, knob or lever rigid at all times

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Functions & Descriptions

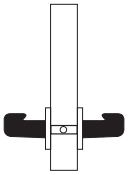
8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Non-Keyed

94 Trim Dummy

8200, R8200 & 7800

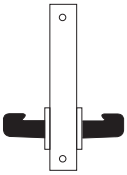


- Trim on both sides are always rigid
- Trim only used as door pull
- Recommended for double door applications on the inactive door, use template #4298, to accept latchbolt from active door

Note: Lever not surface mounted

96 Double Trim Dummy

8200, R8200 & 7800



- Trim on both sides of the door
- Both trims are always rigid
- Includes lock case and armor front
- Not recommended on double door applications (will not accept latchbolt from active door)

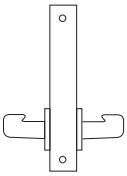
95 Single Trim Dummy

8200, R8200 & 7800

- Trim inside only
- Trim is always rigid
- Includes lock case and armor front
- Not recommended on double door applications (will not accept latchbolt from active door)

97 Active Trim Dummy

8200, R8200 & 7800



- Trim on both sides are active
- Includes lock case and armor front
- Not recommended on double door applications (will not accept latchbolt from active door)

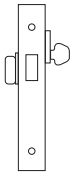
SARGENT
ASSA ABLOY

Deadbolt Only

◊03 Classroom Deadlock

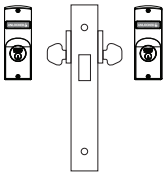
8200



- Deadbolt operation only
- Key outside retracts and projects deadbolt
- Thumbturn inside retracts deadbolt only, will not project it
- **ANSI F29**

◊22 Deadlock

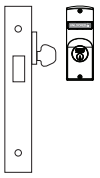
8200



- Deadbolt operation only
- Key outside or inside retracts and projects deadbolt
- **ANSI F16**

◊20 Deadlock

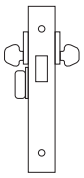
8200



- Deadbolt operation only
- Key outside retracts and projects deadbolt
- No inside operation
- **ANSI F18**

◊23 Classroom Deadlock

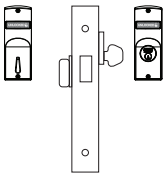
8200



- Deadbolt only operation
- Key outside or inside retracts and projects deadbolt
- Thumbturn inside retracts deadbolt, does not project deadbolt
- Same as 03 function with cylinder inside
- Not Available with Behavioral Health Trim

◊21 Deadlock

8200



- Deadbolt operation only
- Key outside retracts and projects deadbolt
- Thumbturn inside retracts and projects deadbolt
- **ANSI F17**

Indicator options available for both sectional and escutcheon trim.

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Electrical Functions & Monitoring Options

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

SARGENT 8200 Electromechanical Mortise locks are designed to handle single opening, stand alone applications, or can be readily integrated into sophisticated access control systems. They meet ANSI/BHMA A156.13 Grade 1 requirements, are UL listed on fire doors, and satisfy industry standards for operating temperature, shock and fire hazard.

Featuring EcoFlex® Technology*

- **Reduces energy consumption up to 96%, as certified by GreenCircle**
  - Lower operating costs
  - Assists with load reduction in optimizing energy performance credit in LEED
  - Reduces number of power supplies required
- **Field configurable to fail-safe or fail-secure**
- **Operates from 12-24VDC, offering greater flexibility in system design**
- **Innovative actuator design provides superior reliability**
  - Higher performance and reduced maintenance
  - Ability to have longer cable runs without negatively impacting lock function
  - Reduces risk of voltage drops and eliminates inductive kickback
  - Lower total cost of ownership

**Patent pending*

Electrical Requirements for electromechanical functions:

Voltage: Operates from 12-24VDC Regulated. Full wave rectification installed inside the lockbody.

Current:

- Actuator draw = .015 Amp continuous
- Maximum (2) locks per 1 Amp power supply (1/2 Amp peak current draw)

Operating Temp.: Max. 151°F (66°C), Min –31°F (-35°C)

UL and CUL listed for use on Fire Doors

Note: Repeated operation at voltage exceeding +/- 10% is not recommended

Warning:

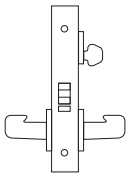
- **Do not** connect locks to a circuit sharing an additional electromagnetic device as the lock may be damaged
- Transient voltage must be suppressed at the source or before connecting with the lock
- Varistor rated at 35 volts (peak) may be used for transient voltage protection

Note: Opening the lockbody or the actuator replacement in the field by non-authorized personnel voids UL label and lock warranty

Electromechanical Functions

70 Electrical (Fail Safe)
71 Electrical (Fail Secure)

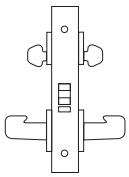
8200 & R8200



- 70 function — Power ON, locks outside lever
- 71 function — Power ON, unlocks outside lever
- Specify voltage: 12VDC or 24VDC (operates from 12-24VDC)
- Key outside retracts latchbolt
- Lever outside retracts latchbolt, except when locked
- Lever outside can only be locked electronically
- Lever inside always retracts latchbolt
- Auxiliary deadlatch

72 Electrical (Fail Safe)
◊73 Electrical (Fail Secure)

8200 & R8200



- 72 function — Power ON, locks both levers
- 73 function — Power ON, unlocks both levers
- Specify voltage: 12VDC or 24VDC (operates from 12-24VDC)
- Key on either side retracts latchbolt
- Lever from either side retracts latchbolt, except when levers are locked
- Both Levers can only be locked & unlocked electronically
- Levers can not be locked separately, only together
- Auxiliary deadlatch

Electrified Mortise Locks with Standard Monitoring Options

- Single Pole Double Throw (SPDT) type C switches
- **RX- option — Request-to-Exit or Enter Signaling Switch**
  - Two switches mounted internally in lockbody that provide independent monitoring of inside and outside lever rotation
  - Available in all functions with non rigid levers
  - Not available for the following options: 1-, 3-, 74-
  - Not available for the following trims: LS or FE
- **LX- option — Latchbolt Monitor**
  - Single switch mounted within lockbody signaling latchbolt position
  - Available for all non deadbolt functions
  - Not available with DX or 74-
- **DX- option — Deadbolt Monitor**
  - Switch mounted internally in lockbody that indicates deadbolt position
  - Not available for the following options: 3-, 74- or LX-
  - Available in all deadbolt functions

◊**CAUTION**: Not recommended for use on any door used for Life Safety egress

Copyright © 2004-2020, SARGENT Manufacturing Company. All rights reserved. Reproduction in whole or in part without the express written permission of SARGENT Manufacturing Company is prohibited. Patent pending and/or patent www.assabloydss.com/patents.

Electrical Functions & High Security Monitoring Options

8200/R8200/7800 Series Mortise Locks

SARGENT ASSA ABLOY

Electrified Mortise Locks with High Security Monitoring:

The high security monitoring options of our industry-leading Integrated Wiegand locks are now available in a mortise lock that can be used as a stand-alone electrified lock or in conjunction with a wall reader. Every NAC lock is shipped with door position and request to exit monitoring installed. NAC locks ordered with deadbolt are supplied with deadbolt monitoring.

Functions:

Function	Description		Illustration
NAC-82274	Fail Safe	No key override, no deadbolt	NAC-82275	Fail Secure		
NAC-82284	Fail Safe	No key override with deadbolt	NAC-82285*	Fail Secure		NAC-82270	Fail Safe	Key override, no deadbolt	NAC-82271	Fail Secure		
NAC-82280	Fail Safe	Key override with deadbolt	NAC-82281*	Fail Secure		
- Fail Safe: Power off, unlocks outside trim
- Fail Secure: Power off, locks outside trim
- Key Override: Key outside retracts latch and/or deadbolt when trim is locked electronically
- Deadbolt projected and retracted by thumbturn or key

Indicator available for NAC-82281 and NAC-82285, Fail Secure, only when used with PHR option

Indicator options available for both sectional and escutcheon trim.

High Security Monitoring Options

- **Internal End-of-Line Monitoring**

  Integrated directly into the mortise lock, internal end-of-line resistors monitor the line from the access control panel to the lock. Typically, resistors are installed at the panel or above the door, creating vulnerability between the resistors and the locks. Incorporating resistors within the lock eliminates any risk of undetected tampering or damage, while also reducing installation costs, simplifying specifications, and offering the assurance of a factory installed and tested product.

  Select a compatible resistor configuration and add the appropriate prefix to your order string:

  – **R01:** Mercury and Lenel compatible 1KΩ/2KΩ resistance supervision

  – **R03:** Software House compatible 1KΩ/2KΩ resistance supervision

  – **R04:** AMAG compatible 4-state supervision

- **Deadbolt Privacy Function (PHR-)**

  – Engaging the deadbolt disables remote access control unlocking (keypad or card reader) or scheduled unlock.

  – Ideal for personal privacy areas, such as nursing rooms, on-call doctors' rooms, restrooms, and shower areas

  – To order, add the PHR- prefix to your order string

  Note: PHR is only available on Fail Secure functions

- **Integrated Door Position Switch (IDP-)**

  – The patented IDP option adds a magnetic door position switch in series with the internal auxiliary latch and latchbolt position switches to provide three factor monitoring.

  – This offers added assurance that the door is secure, reduces the likelihood of attack, and is aesthetically pleasing because it conceals the door position switch behind the front plate and the magnet behind the strike.

  – To order, add the IDP- prefix to your order string

Ordering Examples:

R01-IDP-NAC-82271-12V-LN-MD-26D-LHR

R04-PHR-IDP-NAC-82281-24V-LN-MD-26D-RHR

Electrical Requirements & Accessories

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Requirements for Electrical and Data Transfer

To answer the demand for "smart" electronic access control and locking solutions that require fast, easy, and cost-effective installation, ASSA ABLOY Group brands use the ElectroLynx® standardized plug-in connectors and color-coded wiring system.

With ElectroLynx®, doorway components come pre-wired for easy hookup to the power source. The key to the system is the transfer device hinge that carries power from the frame to the locking hardware.

Features of ElectroLynx®:

- Makes it easy to bring power to the locking hardware
- Wires have connectors that snap together, like plugging a telephone into a jack

To connect an 8200 & R8200 Electrified Mortise Lock to the electronic access control system, the following items are required:

- 8200 & R8200 Electrified Mortise Lock
- ASSA ABLOY Door Group pre-wired door, or ElectroLynx® retrofit cable (order from McKINNEY)
- Electronic transfer device (ElectroLynx® electronic transfer hinge or Electrical Power Transfer with standard hinge, from McKINNEY)
- ElectroLynx® cable from the hinge to above the ceiling (order from McKINNEY)

Information regarding cable selection, hinge requirements and order strings can be found in the McKINNEY Transfer Device Solutions catalog. Consult 800-810-WIRE (9473) with questions on application specifications and requirements.

McKINNEY QC8 ElectroLynx® Hinges for 8270-8274 functions and the RX- Option is recommended.
McKINNEY QC12 ElectroLynx® Hinges for LX- or DX- Option is recommended.

Securitron PowerJump™ ICPT

The Securitron PowerJump ICPT Inductive Coupling Power Transfer delivers power contactlessly and invisibly between the frame and door to power electrified hardware on the door. The PowerJump can be installed at the latch side or hinge side of the door and transfers up to 6 watts of power without pins or wires across the door gap, eliminating points of vulnerability and wear…and no need to core drill the door. The PowerJump is field selectable for 12VDC or 24VDC systems and is ideal for fail secure applications. The unit can hold electrified latches open in continuous duty or can momentarily energize the lockset for latch retraction.

Additional information regarding this product can be found at www.securitron.com

12VDC & 24VDC Power Supplies:

- UL Class 2 Listed
- Four 12V models and four 24V models available
- Integral battery charging capability keeps sealed lead acid gel/cell at full charge in case of line voltage failure (737-battery sold separately)
- Fused line voltage input with one, four, or eight DC outputs (depending on model)
- Each circuit can be individually turned on and off via a slide
  switch; the power status of each is shown by an LED
- In the event of a DC short, the problem is confined to the zone of difficulty
- Fire alarm interface standard

SARGENT MODEL No.	DESCRIPTION

Indicators

7800/8200 Series Mortise Locks

SARGENT
ASSA ABLOY

Applications

7800/8200 Series indicators can be used in a variety of applications and are most commonly used to identify occupancy or display the locked/unlocked status of a room.

- Restrooms
- Quiet rooms
- Nursing mother's rooms
- Classroom doors

Features

- Inside, outside or both sides of the door
- Sectional or escutcheon trim
- Available with 34 different functions – including thumbturn functions
- Viewing window 25% larger than competition
- Patent pending curved design for viewing at multiple angles
- Window located prominently above the cylinder
- Highly reflective viewing window for increased safety
- Optional directional engraving available – must specify handing
- Retrofitable for existing applications

Functions

- Indicators are available with the following 7800 and 8200 Series functions. See pages 19-28 for details.

05	37	51

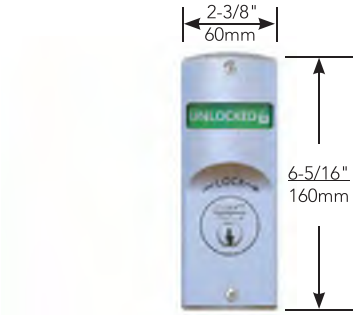
Sectional Trim

- Surface mounted
- Torx security screws provided
- Compatible with select sectional trim rose designs: O, LN, E, TR, CR, CO, TO, E2, E3
- Compatible with all thumbturn designs
- Available with optional directional arrow engraving
- Not compatible with BHW, BHL, or BHD trims

Specify option code when ordered with lock. See page 35 for indicator codes.



Retrofit/Upgrade Kits

Retrofit/upgrade kits are available for existing applications only. Each kit includes single side indicator plate with mechanism, screw pack, plastic template and instructions.

To order retrofit/upgrade kits, specify by model number. Door thickness, handing and indicator option code must also be specified with kit. Retrofit/upgrade kits with directional engraving must include lock handing.

See page 36 for how to order examples. **Note: Indicators for both sides of door require two kits.**

	Model #	Used with Functions	Available Option Codes	Indicator Location
	SA190	20, 21, 22, 24, 25, 26, 28, 29, 30, 39, 40, 41, 43, 45, 46, 47, 50, 51, 52, PHR-NAC-82281	Outside Trim: V10, V20, V30, V40, V50, V60 Inside Trim: V01, V03, V04, V06	Inside and/or Outside*
	SA191	36, 56, 57, 58, 67		
	SA192	05, 37, 38, 42, 59		
	SA193	65, 66, 68	V10, V20, V30, V40, V50, V60	Outside
	SA194	21, 24, 25, 28, 43, 45, 47, 50, 51, 66, 68, PHR-NAC-82281, PHR-NAC-82285	V01, V03, V04, V06	Inside
	SA196	56, 57, 58, 65, 67		
	SA197	30, 37, PHR-NAC-82285	Outside Trim: V10, V20, V30, V40, V50, V60 Inside Trim: V01, V03, V04, V06	Inside, Outside

*When indicators are required on both sides of the door, 2 upgrade kits must be ordered, one kit for each side.

Indicators

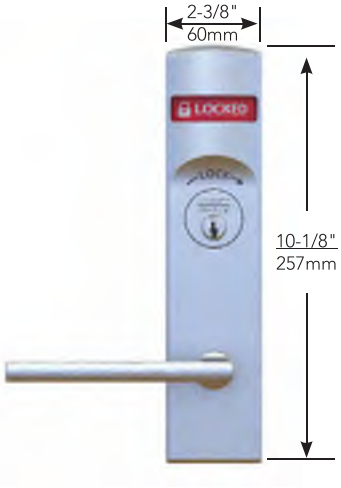
7800/8200 Series Mortise Locks

SARGENT
ASSA ABLOY

Escutcheon Trim

- Unique escutcheon (VN1) for both inside and outside of door for indicator functions
- Non-indicator functions provide with standard escutcheons as ordered, i.e. LE1, LE2, LE3, LE4, LW1, LS or WT
- Through-bolted
- Torx security screws optional
- Compatible with all thumbturn designs
- Available with optional directional arrow engraving
- Not compatible with select lever designs: MK, MT, H001, H002, H003, H004, H005, H006, H007, H008, H009, H010, H011

Specify option code when ordered with lock. See page 35 for indicator option codes.



Trim Kits

Complete trim kits are available to retrofit/upgrade existing applications.

Trim kit includes levers and escutcheons with mechanism for both sides of door, screw pack, door marker and instructions.

To order trim kit only, specify by adding option code IS and the indicator option code (see pg. 35 for codes) to the complete order string. The IS option code will be used for all trim kits for the VN1 escutcheon with indicators. Both inside and outside will be supplied.

Option Code	Functions
IS	All functions*

*Escutcheon indicator trim kits available for all functions as listed on page 32

Note: Escutcheon applications require both sides of the door to have the unique VN1 escutcheon. Kits will be provided as a set.

How to Order Example

Option Codes	Function	Esctucheon	Lever	Door Thickness	Hand	Finish
IS-V04-	8256*	VN1	L	1-3/4"	RH	26D

* The function of the existing lock is required so the proper escutcheons can be provided.

Office & Inner Entry Lock x escutcheon trim x inside indicator - Unlocked/Locked – Red/White x trim only.

Sectional Trim Only Indicators

The following indicators are available with sectional trim only and have different features and options than the indicators found on pages 32-36. To order the following sectional indicators with locksets, specify option codes 49- or 50-.

49- Option Visual Status Indicator for Non Secure Applications

Inside Only

- Designed to work with Classroom security functions
- Red/White indicator plate standard
- Mounts on inside of door
- Functions and Roses available:
  – 30, 36 & 37 Functions with 7800, 8200 and R8200 locks, CR, L, LN, TR, E & O Roses
  – 26, 29, 38, 39, 40 and 41 Functions with 7800, 8200, and R8200 locks & LN Roses Only
- As retrofit, order 185C x finish

185C

49- Option Occupancy Indicator with Emergency Release

- Ideal for restrooms or conference rooms where easy determination of use needs to be made
- OCC/VAC indicator plate standard
- Mounts on outside of door
- Emergency coin operated release standard
- Functions and Roses available:
  – 65, 66, 68 Functions with 7800, 8200, and R8200 locks, CR, E, L, LN, O & TR Roses
- As retrofit, order 185P x finish

185P

50- Option Secured Indicator Rose

- Non-handed with lever and mounting posts field reversible
- VAC/OCC indicator plate standard
- Mounts on outside of door
- Available for the following functions: 24, 25, 26, 28, 29, 30, 36, 37, 38, 39, 40, 41, 43, 45, 50, 51, 52, 57, 58, 67 - with Rose Trim only
- Patent pending design
- Not available with Roseless trim (R8200)
- For retrofit, order 185S x suffix x finish:

Suffix	Door Thickness
-1	1-3/8" (35mm)
-2	1-3/4" (44mm)
-3	2" (51mm)
-4	2-1/4" (57mm)

Note: For 49- and 50- Options, key will not retract latch when used with 37 and 38 functions

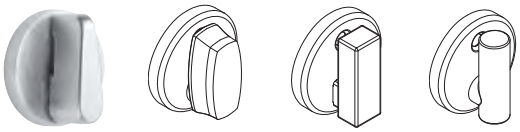
Thumbturn Designs

8200/R8200/7800 Series Mortise Locks

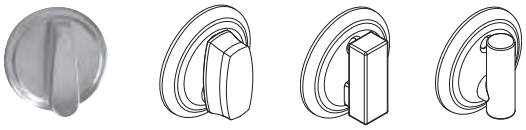
SARGENT
ASSA ABLOY

130KB Round Backplate
(Shown with Standard Turn)



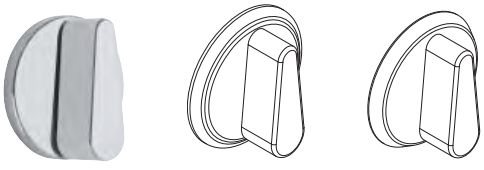
- Round backplate supplied standard with L, O, LN roses and R8200 roseless trim
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-1/2" (38mm) round brass or stainless steel plate
- Meets ADA Requirements

130KT Traditional Backplate
(Shown with Standard Turn)



- Dual radii edge backplate supplied standard with TO and TR roses
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-3/4" (44mm) round brass plate
- Meets ADA Requirements

130LB Large Round Backplate
(Shown with Large ADA Turn)

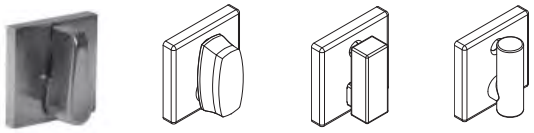


- Available with R8200 & 8200 with sectional trim
- 40% larger than standard thumbturn
- Specify LB as an option for ADA turn
- 2" (51mm) round brass, zinc, or stainless steel plate & turn
- 130LT - Traditional backplate, 130LC — Contemporary backplate
- Meets ADA Requirements

126 T-Turn
(7892 function only)

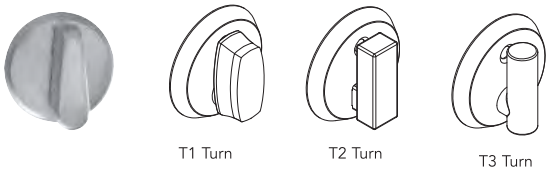
- 2-3/16" (56mm) round stainless steel backplate
- 2-3/8" (61mm) tall thumbturn
- Available in brass or bronze finishes only
- Surface mounted with three screws
- Order as "SST" trim with 7892 function

130KA Square Backplate
(Shown with Standard Turn)



- Square backplate supplied standard with E, E2, E3 or E4 roses
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-1/2" (38mm) round brass or stainless steel plate
- Meets ADA Requirements

130KC Contemporary Backplate
(Shown with Standard Turn)



- Beveled edge backplate supplied standard with CO and CR roses
- Standard turn automatically supplied with sectional trim for R8200 & 8200 locks
- Specify T1, T2 or T3 as an option for decorative turns
- 1-3/4" (44mm) round brass or stainless steel plate
- Meets ADA Requirements

130KBHA Turn for use with 8200 Mortise BHW, ALP, BHL and BHD Trim

- 3-3/4" x 2-1/2" rectangular shape
- Stainless steel housing
- Meets ADA and OMH Requirements

130W Round Backplate
(Shown with Standard Turn)

- Used with 7800 with sectional trim
- 1-1/2" (38mm) round brass or stainless steel plate

Emergency Releases & Accessories

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

Emergency Releases

184KB Emergency Release (used with R8200 & 8200 with sectional trim)

- 1-1/2" (38mm) round brass, bronze or stainless steel plate
- For 65, 66 and 68 functions only

Studio Collection Emergency

- 184KC Emergency Release Contemporary
- 184KT Emergency Release – Traditional

184W Emergency Release (used with 7800 with sectional trim)

- 1-1/2" (38mm) round brass, bronze or stainless steel plate
- For 65, 66 and 68 functions only

184KA Emergency Release (used with E rose)

- 1-1/2" (38mm) square brass, bronze or stainless steel plate
- For 65, 66 and 68 functions only

Emergency Key 14-0057

- Carbon steel
- For 65, 66 and 68 functions only
- Must be ordered separately

184KBHA Emergency Release (used with BHW, ALP, BHL and BHD trim)

- 3-3/4" x 2-1/2" rectangular shape
- Stainless steel housing
- Meets ADA and OMH Requirements

Accessories

130KBCVR Cap

- Thumbturn plate
- Covers hole in door when thumb turn is no longer needed

82-4023 Cap

- 2" round
- Covers hole for levers and roses

Door Thickness	Part Number
1-3/8"	82-4022
1-3/4"	82-4023

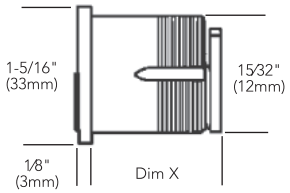
40 Series Type Cylinder

- Cylinder body: Solid brass
- Cap: Brass, bronze or stainless steel
- All functions take a Standard Cam Functions
- Standard Cam 13-0664
- 16 & 92 Inside Cam -105
- 50 Hotel Cam -115 supplied standard with all Hotel Function Cylinders



7850/8250 Function Hotel Cylinder

- When door is locked by deadbolt, only emergency key is able to unlock
- Must request emergency key separately (7268EMX x reg #)
- Supplied with Cam suffix -115 for Hotel Functions

78- Option Exposed Barrel

- Standard for use only with SARGENT Escutcheon Trims KE3, KE4, LE3, LE4
- Available 6-Pin standard or 7-Pin optional
- NOT available with 50-, 60-, 70- or other specialty or higher security options
- See function table for cam required
- Not available in 50 function
- Plug finishes: 4, 15 (similar to 26 finish)

124 Series Mortise Cylinder Turn Lever

- Turn lever: Brass, bronze or aluminum
- Cap: Brass, bronze or stainless steel
- Must be ordered separately

10- Option Signature Series

- The protected system offers the building owner full control over duplication of keys. Highly pick-resistant cylinders
- 10-63- Option — Signature cylinder with Large Format Interchangeable Cores

F1-82- and 82- Option KESO

- The system offers the building owner full control over duplication of keys
- Highly pick-resistant cylinders
- Expanded levels of masterkeying
- F1-83- & 83- Option — Keso removable core
- 84- Option — Keso construction core cylinder

11- Option XC Key System

- Patented system works with existing SARGENT keyway adding increased security
- 11- XC standard cylinder
- 11-63- Large format interchangeable core
- 11-73- Small format interchangeable core

DG1, DG2, DG3 - Degree Series

- Utility patented, bump resistant and requires the use of a patented key
- All three locking mechanisms within the same system to be operated with just one key
- See Degree Key System Catalog for available options

Not all cylinder series offered in sizes listed above, for complete cylinder information, see Cylinders & Components, Degree, Signature, Keso, Keso F1 or XC catalogs.

Cylinders & Rosettes

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

51- Option Old Style Removable Core

- Available for **existing systems only** Permanent Removable Cores
- Control key used to remove core, must request control key separately

60- or 70- Option Plastic Construction Core

- For doors that do not require key locking during the construction period
- Operate with coin or flat screw driver
- For use with LFIC (removable) (60- Option) or SFIC (70- Option) core

63- Option Large Format Interchangeable (Removable) Core

- Allows immediate removal of the core. Virtually unlimited key changes
- Available 10-63-, 11-60-, 11-63- & 11-64-
- For disposable core, see 60- Option
- 64- Option- LFIC 6-Pin construction core
- Control key used to remove core, must request control key separately

7300B Interchangeable Core

- Small Format Interchangeable Core (SFIC)
- SARGENT Interchangeable Core cylinders and MasterKey Systems are available for increased security through quick change of keying. It is unnecessary to remove a cylinder
- SARGENT 7300B Interchangeable Cores are available in SARGENT 4A and 4B keyways, as well as the following standard competitor keyways: A, B, C, D, E, F, G, H, J, K, L, M
- For disposable core, see 70- Option
- 65-73 Option — 6-Pin SFIC uncombinated
- 65-73-7P Option — 7-Pin SFIC - uncombinated
- 70- Option — Disposable SFIC
- 72- Option — Construction SFIC
- 11-72- Construction core provided for use with 11-7300 cylinder housing
  11-70- temporary plastic core prepared to accept 11-7300 core
- 73- Option — 6-Pin SFIC, SARGENT 4A, 4B keyways
- 73-7P Option — 7-Pin SFIC, SARGENT 4A, 4B keyways
- Control key used to remove core (ordered separately)

1SB Cylinder Collar

- Standard for 7800 BHD, 8200 BHL & BHW mortise locks
- Stainless steel
- 1-29/32" diameter
- Available in 4 sizes
- Projection from door:
  1SB-1 5/16" (8mm)
  1SB-2 7/16" (11mm)
  1SB-3 9/16" (14mm)
  1SB-4 11/16" (16mm)
- Finishes: 32, 32D

21- Option Lost Ball Construction System

- The SARGENT construction keying system protects the building owner by providing temporary masterkeying during the construction period

1KB Rosette with 8200 & R8200 sectional trim

- Used with mortise cylinders and No. 90 blocking rings when cylinders project from door
- Furnished standard with L, O, LN, CO, CR, TO and TR roses
- Brass, bronze or stainless steel
- 1-1/2" (38mm) diameter, includes compression spring
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP
- Projection from door:
  1KB-1 5/16" (8mm) — Standard
  1KB-2 7/16" (11mm)
  1KB-3 9/16" (14mm)
  1KB-4 11/16" (16mm)

IKA Rosette with 8200 sectional trim

- Used with mortise cylinders
- Furnished standard with the E, E2, E3 and E4 roses
- Brass, bronze or stainless steel
- 1-1/2" (38mm) Square, includes compression spring
- Projection from door:
  1KA-1 5/16" (8mm) — Standard
  1KA-2 7/16" (11mm)
  1KA-3 9/16" (14mm)
  1KA-4 11/16" (16mm)
  1KB-4 11/16" (16mm)
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP

No. 97 Rosette

- Standard for cylinders ordered separately from hardware
- Standard for 7800 knob mortise & 4870 deadbolt
- Brass, bronze or stainless steel
- 1-11/16" diameter (43mm), 9/32" (7mm) projection, includes compression spring
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 32, 32D, BSP, WSP

No. 90 Blocking Ring

- Used with 1KB rosettes as spacer when mortise cylinder projects from face of door
- Brass, bronze or stainless steel
- Finishes: 3, 4, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP

1KB-5 Cylinder Retaining Cap

- Required for double cylinder functions on KS and LS Escutcheon *only*
- Steel or stainless steel
- 1-15/32" (37mm) diameter
- 9/16" (14mm) projection
- Finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 20D, 26, 26D, 32, 32D, BSP, WSP

Cylinder Cams For Mortise Locks

SARGENT Conventional Cylinders

- Standard

Std Cam
(13-0664)
for all functions except for 50 and the Inside cam for 16 & 92 function locks

-105 Cam
(13-0665)
16 & 92 Function Inside Cylinder Cam

-115 Cam
(13-2045)
50 Function Hotel Cam, supplied with 50 function cylinders

SARGENT Large Format Interchangeable Core Cylinders

- 6300 Cams are factory installed and are not removable
- 6300 Cams are not sold separately
- Specify required Cam as a suffix: 63-44-105 cam
- For Standard Cam: no suffix is required

Std 6300 Cam
for all functions except for 50 and the Inside cam for 16 & 92 function locks

-105 Cam
for 6300 Series 16 & 92 function I/S Cylinder

-115 Cam
for 6300 Series 50 (Hotel) function, supplied with 50 function cylinders

See Cylinder catalogs for additional information

ADA and Handicap Warning

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

ADA and Handicap Warning

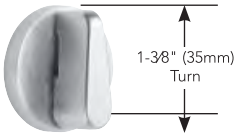
Lever Return to Door

- Lever designs J, L and P
- Lever returns within 1/2" (13mm) of door face or less
- Meets ADA Compliance for national codes

Tactile Handicapped Warning

- Abrasive Coating:
  Options 85-, 86- & 87-
  – Complete lever abrasive coated
- Milled 1/16" Grooves:
  Options 75-, 76- & 77-
  – B, E, J, L, P and W Levers — Grooves on backside surface of lever
  – F Lever — Grooves on top and bottom surface of lever

Standard Thumbturn



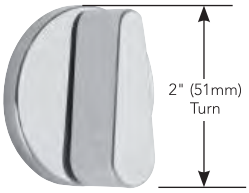
- Meets ADA Compliance for national codes
- Order as: 130KB, 130KC, 130KT, 130W or 130KA x finish

See page 38 for design

Tactile Handicapped Warning

- Knurled B & C Knobs available ; options 75-, 76-, & 77-
- Knobs are NOT ADA compliant

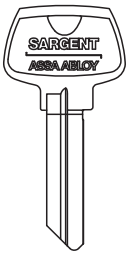
LB - Thumbturn



- Meets the tougher local ADA requirements
- 40% larger than standard thumb turn
- Order as: 130LB, 130LC or 130 LT x finish

See page 38 for design

Keys



- Large key bows are available in Sargent C family of keyways
- Standard key bows can have attachments added to increase the grip area
- Keys are NOT ADA compliant

Multi-Functional Lockbody

8200/R8200/7800 Series Mortise Locks

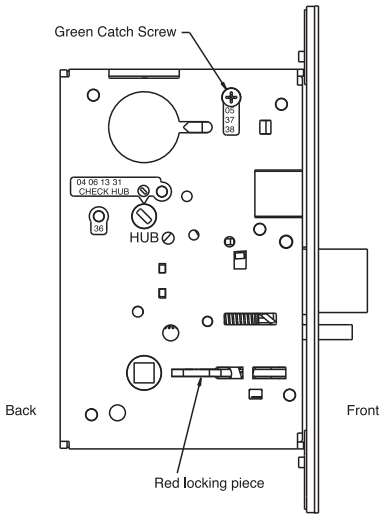
SARGENT
ASSA ABLOY

How to Change Lock Function:

The Green Catch Screw must be located in the designated location as specified on the lock case to produce the desired function.

There are three locations: one location for 05, 37 & 38 functions; one location for 04, 06, 13, & 31 functions; and one location for 36 function.

Note: To change to functions 04, 06, 13, & 31, the hub must be at the 45° position as specified on the case before screwing in the green catch screw.



Function & Part Listing for the Multifunction Lockbody

Function	#41 Cylinder	Cyl. Collars	Lever/Knob Requirements	Thumb turn
04 Store Room / Closet (F07)	1	* 1 - 1KB	** Inside Trim Set & *** Outside Trim Set	Not used
05 Office / Entry (F04)	1	* 1 - 1KB	** Inside Trim Set & *** Outside Trim Set	++ 1
06 Store Room / Service	1	* 1 - 1KB	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
13 Communicating / Exit	Not used	Not used	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
31 Utility	1	* 1 - 1KB	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
36 Closet	1	* 1 - 1KB	+ Trim One Side Kit, Inside Lever/ Knob & Rose/Escutcheon	Not used
37 Classroom (F05)	1	* 1 - 1KB	** Inside Trim Set & *** Outside Trim Set	Not used
38 Classroom Security (F32)	2	* 2 - 1KB-2	** Inside Trim Set & *** Outside Trim Set	Not used

***Cylinder Collars:** Noted are based on 1-3/4" Thick Doors with standard #41 size cylinders. Other sized doors and cylinders will required different collar sizes and possibly blocking rings - see chart on page 41 of this catalog for details
****Inside trim sets include:** Inside lever/knob, inside rose or escutcheon, trim pack (spindles, through-bolt screws, set screw, inside adapter plate assembly), trim finish screws (for escutcheons)
*****Outside trim sets include:** Outside lever/knob, outside rose or escutcheon, outside mounting plate, two through-bolt studs, washers, retaining nut, and cylinder rosettes (for cylinder functions only)
+ Trim One-Side Kit includes: adapter assembly, spindle, through-bolt screws and plate adapter assembly. An inside lever is always used with this kit and is used on either side of the door as required
++ Thumb turn: Rose trims use 130KB thumb turn for Levers, and 130W thumb turn for Knobs.
Escutcheon trims require escutcheon to be ordered according to function/design, to receive thumb turn affixed to it

Type of Rose/Escutcheon		Kit Part Number
Trim One Side Kit	**E, O, KW, LN & LW1** (Standard trim only — not for use with Studio levers)	**82-3208**
Trim One Side Kit	**KE & LE (1 & 3)** (Standard trim only — not for use with Studio levers)	**82-3209**
Trim One Side Kit	**L Rose & WT**	**82-3210**
Trim One Side Kit	**Blank Rose (1-3/4" door)**	**82-4023**

Note: 8200/R8200/7800 Series Mortise Locks are certified for all functions including electrical functions and trims without exceptions.

Architectural Specifications

8200/R8200/7800 Series Mortise Locks

SARGENT
ASSA ABLOY

2.1 Heavy Duty Mortise Locks

A. Heavy duty mortise locks shall be 8200/R8200/7800 Series as manufactured by SARGENT Manufacturing Company, New Haven, CT.
B. Locks shall meet or exceed the requirements of ANSI/BHMA A156.13 Series 1000, Operational Grade 1, and Security Grade 1 with all standard trims.
C. Locks shall be easily re-handed without opening the lockbody.
D. Locks shall comply with UL 10C positive pressure requirements.
E. Locks required for fire doors shall be listed by Underwriters Laboratories for ratings of A label (3 hours) and less, for doors up to 4'0" (1.2m) x 10' 0" (3.05m) and pairs of doors 8'0" (2.4m) x 10'0" (3.05m).
F. Construction:
   1. Lock functions shall be manufactured in a single-sized case formed from 12 gauge steel minimum.
   2. Lock cases shall be closed on all sides and back.
   3. Locks shall have field adjustable, beveled, armored front, with a .125 inch (3mm) thickness minimum.
   4. Locks shall have a one piece, 3/4" inch (19mm) throw anti-friction stainless steel latch.
   5. Deadbolts, where specified, shall be full one inch (25mm) throw made of one-piece hardened stainless steel.
   6. Where required by the Federal Bureau of Prisons, locks can be furnished optionally with stainless steel hubs.
G. Locks shall have a 2-3/4" (70mm) backset, standard.
H. Strikes shall be non-handed with a curved lip.
I. To ensure proper alignment, trim, knobs or levers, shall be through-bolted and fully interchangeable between rose and escutcheon.
J. Locks shall have brass 6-Pin cylinder, standard.
K. Provide status indicators with highly reflective color and wording for "locked/unlocked" or "vacant/occupied" with customer wording options if required. Indicator to be located above the cylinder with the inside thumbturn not blocking the visibility of the indicator status. Indicator window size to be a minimum of 2.1" x 0.6" with a curved design allowing a 180 degree viewing angle with protective covering to prevent tampering.
L. Locks shall have a 10 year limited warranty. 2 year limited warranty on electrified locks.
M. Behavioral Health, Mortise: ANSI/BHMA A156.13, Series 1000, Operational and Security Grade 1 mortise type manufactured to Office of Mental Health (OMH) requirements with behavioral health lever and rose trim or integrated trim. Locksets to be manufactured with a corrosion resistant, formed steel case. Levers and roses are manufactured from stainless steel material. Provide optional lead-lining (lock body), Torx® fasteners, and Antimicrobial coating as specified in Hardware Sets.

2.2 EcoFlex® Electrified Mortise Locks

A. SARGENT 8200/R8200 Electrified Mortise Locks
   1. General: ANSI/BHMA certified extra heavy duty, lever type mortise lock conforming to ANSI/BHMA A156.13 Series 1000, Grade 1 requirements and ANSI A117.1 accessibility guidelines. All functions manufactured in a single sized case formed from a minimum 12 gauge steel. Lockset is field-adjustable for handing without opening the lock body with a beveled armored front that is 0.125" minimum thickness and utilizes a one-piece 3/4" anti-friction stainless steel latchbolt. To insure proper alignment, all trim, shall be thru-bolted and fully interchangeable between rose and escutcheon designs. Lock is UL listed and labeled for use on up to 3 hour fire rated openings.
      a. Backsets: 2-3/4".
      b. Deadbolt: Optional 1" throw made of stainless steel and 2 hardened steel roller inserts.
      c. Strikes: Provide wrought boxes and strikes with proper lip length to protect trim but not to project more than 1/8" beyond trim, frame or inactive leaf. Where required, provide open back strike and protected to allow practical and secure operation.
   2. Provide access control mortise lock series, type and functions where specified in hardware groups, with provisions below:
      a. Emergency override access capability with key cylinder retraction of lock latch bolt without necessary electronic activation.
      b. Inside lever retracts latch and deadbolt simultaneously for free egress.
      c. Refer to "KEYING" specification section for keying system requirements.
      d. Lever and finish to match corresponding mechanical locking hardware.
   3. Locking and unlocking of the lever handle by electronic operation contained completely within the body of the mortise lock.
      a. Field configurable Fail Safe /Fail Secure by means of an external DIP switch setting.
      b. Operationally voltage-insensitive 12 to 24 VDC.
      c. Energy Performance: Maximum standby current required for functional operation not to exceed 50 mA at 24 VDC limiting potential inductive kickback or the need for external diodes.
      d. Functional locking operation not affected by cable runs greater than 500 feet using a minimum 22 AWG wire.
   4. Monitoring: Optional real time monitoring of latchbolt, deadbolt, door open/closed status and valid egress where specified. Valid egress signaled by activation of the Request-to-Exit (RX) micro switch integral to the inside lever of the lockset on the unsecure side of the door capable of shunting external alarms. Door open/closed status provided by monitoring the deadlatch and latchbolt in series with optional integrated magnetic door position switch.
   5. Perform centralized control of the integrated locking functions by means of a single cable run to the access control panel independent of any proprietary power supplies, interface boards or controllers.
      a. End of line termination points by means of factory pre-wired Molex® connectors and harnesses.
      b. Source power electrical hard wiring and connections by others.
   6. Specified Manufacturer: Sargent Manufacturing (SA) — 8200/R8200 Series.

Specifications

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

65G05 Shown

A standard duty key-in-lever lock designed to exceed the requirements of ANSI A156.2, Series 4000 and Grade 2.

Specifications

For Doors	1-3/8" (35mm) to 1-3/4" (44mm) only
Backset	2-3/4" (70mm) standard 2-3/8" (60mm) optional (20- option)
Cylindrical Housing	Steel zinc dichromate finish
Front	Wrought brass and stainless steel 2-1/4" (57mm) x 1-1/8" (29mm)
Strike	800 Curved Lip, Brass or Stainless Steel Standard 808 ANSI Curved Lip available (28- option) 505 Full Lip strike available (14- option)
Hand	Universal, non-handed
Latch	Brass 1/2" (13mm) throw
Keys	Two, nickel silver
Cylinder	Brass, 6- pin, LA keyway standard
Finishes	3, 4, 10, 10B, 10BE, 26, 26D
Door Prep	ANSI A115.2 (161) Modified
Minimum Stile	4-1/2" (114mm)

Certification Compliance

ANSI/BHMA	Meets ANSI A156.2 Series 4000 — Grade 2
UL	UL listed to U.S.A. and Canadian safety standards Listed for 3 Hour Doors
Positive Pressure	Meets ANSI/UL 10C, Positive Pressure Fire Test of Door Assemblies
ADA	All levers conform to ADA requirement for barrier-free accessibility
California Code	Levers conform to California Administrative Code Title 19 and 24
Hurricane Code	All individual components of a total door opening are required to comply with each code. Refer to the SARGENT Website (www.sargentlock.com) for specific code compliance listings for both the lock hardware and other door components

Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

Windstorm Certifications

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

Windstorm Certifications: Florida Building Codes & UL Listings

SARGENT Manufacturing's products meet building codes that require hurricane, windstorm and FEMA certifications, including some of the most stringent building codes as specified in the Florida Building Code, Miami Dade Code and the International Building Code. Listed below are certifications and standards met by the 6500 lock.

Florida Building Code: FL2998
UL Certification Directory: ZHEM.R21744 – Latching Hardware

ANSI/SDI-BHMA A250.13	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies"
ANSI/ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
(TAS) 201	"Impact Test Procedures"*
(TAS) 202	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
(TAS) 203	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* Published in the "Florida Building Code"

UL Certification Directory: ZHLL.R21744 – Products for Use in Windstorm-rated Assemblies

Certifications to meet assembly requirements are done in conjunction with doors from ASSA ABLOY Group companies CECO DOOR and CURRIES.

ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
AAMA/WDMA/CSA 101/I.S.2/A440	"Standard/Specification for Windows, Doors, and Unit Skylights"
FEMA Publication 320	"Taking Shelter From the Storm: Building a Safe Room for Your Home or Small Business", investigated with respect to impact and pressure requirements only.
FEMA Publication 361	"Design and Construction Guidance for Community Safe Rooms", investigated with respect to impact and pressure requirements only.
ICC 500	"ICC/NSSA Standard for the Design and Construction of Storm Shelters", investigated with respect to impact and pressure testing. Minimum missile impact speeds vary with the design wind speed desired for a particular product. The information below correlates design wind speed to the minimum missile speeds as discussed in Table 305.1.1 of ICC 500.

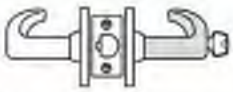
Functions

6500 Series Cylindrical Lever Lock

SARGENT
ASSA ABLOY

04 Storeroom or Closet



65G04
- Deadlocking latch
- Latch by lever inside or key outside
- Outside lever rigid at all times
- ANSI/BHMA F86

05 Entrance or Office

65G05
- Deadlocking latch
- Latch by either lever unless outside lever is locked by push/turn button in inside lever
- Push button released by key outside or lever inside
- Turn button must be released manually
- Key retracts latch when outside lever is locked
- ANSI/BHMA F109

15 Passage

65U15
- Latch by either lever
- ANSI/BHMA F75

37 Classroom

65G37
- Deadlocking latch
- Latch by either lever unless outside lever is locked by key
- Key in outside lever locks or unlocks outside lever
- Inside lever always operative
- ANSI/BHMA F84

65 Privacy/Bathroom

65U65
- Latch by either lever unless outside lever is locked by push button in inside lever
- Turning inside lever or closing door releases button
- Emergency button in outside lever unlocks, with use of a blade screwdriver outside lever and releases inside button
- Bathroom key supplied only when ordered separately
- ANSI/BHMA F76

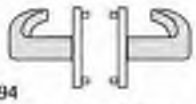
15-3 Exit or Communicating (Special Order)

65G15-3
- Deadlocking latch
- Blank rose outside
- Latch by lever inside
- Minimum clearance of 1-1/2" (38mm) between double doors

93 Single Lever Pull

65U93
- For wood or custom hollow metal doors
- Lever and rose attached by three surface applied screws

94 Double Lever Pull



65U94
- For wood or custom hollow metal doors
- Lever and rose both sides through-bolted and three surface applied screws each side

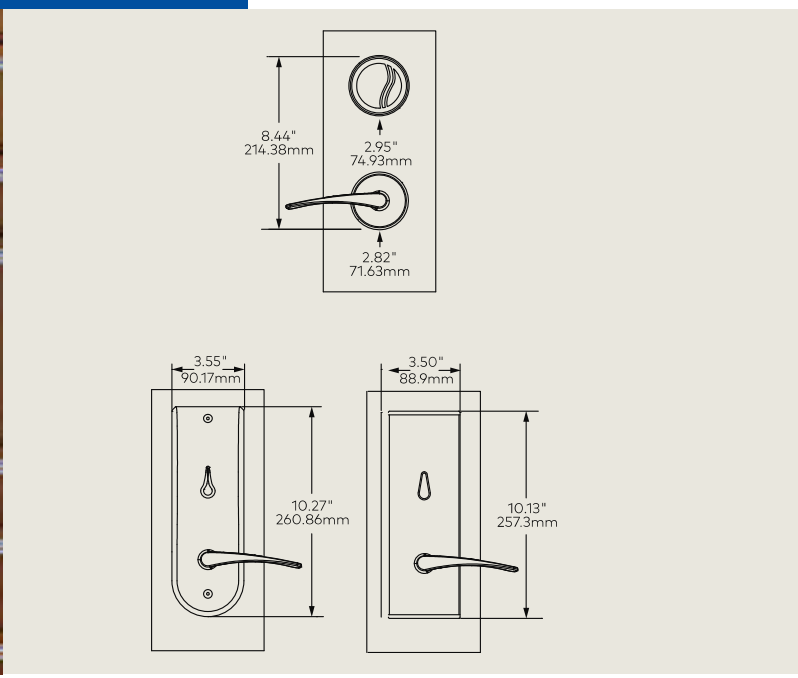
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

INTRODUCTION

Rixson Overhead Concealed closers offer an aesthetically appealing way to close a door. In situations where a closer is needed but concealment is required, Rixson offers several different series to meet your application demands. Concealed for minimal appearance, these offset hung or center hung (single or double acting) door closers provide control without sacrificing the aesthetics of the opening.

GENERAL INFORMATION

Non-Hold Open closers do not hold the door open. This feature cannot be changed in the field on the 608, 700, or 800 series closers.

Hold Open closers hold the door open. This feature cannot be changed in the field on the 608, 700, or 800 series closers.

The degree of swing must be specified on some closers (refer to specific product pages for requirements).

When the door closer must be concealed above the ceiling or drywall, a longer or extended spindle is required. Regular and 1/2" extended spindles available. Closer adjustment valves must always be accessible.

End caps are used to cover the mortise edges for wood doors on center hung 608 and 700/800 models. Two 199 End Caps can be furnished; one for the top arm and one for the bottom pivot.

Mounting brackets or boxes for aluminum, wood or metal frames must be specified when ordering the 608 and 700/800 series.

SPECIFICATIONS

Model 91DCP:

Model 91DCP shall be used for offset hung doors. Closer shall fit in a 1-3/4 x 4 aluminum tube. Closer shall have adjustable spring that complies to accessibility codes. Adjustable spring, backcheck, and closing speed valves must be accessible after door is installed. Where applicable, a hold open feature is achieved in the track. Closer shall be Grade 1 per ANSI A156.4. Closer shall be fire rated UL10C for doors tested for overhead concealed products up to 3 hours.

Models 700/800

Model 700 for single acting center hung doors. Hydraulic closer mechanism to fit in minimum 1-3/4" x 4" aluminum frame. Closer shall have a sized spring determined by the door width. Adjustable hydraulic backcheck and closing speed valves. Closers for single acting doors shall be handed and preloaded for positive closing action. Vertically adjustable center hung bottom pivot included. For double acting doors, use model 800 with adjustable closing speed for each swing direction. Hold open (option) is achieved through the closer body and degree called out.

Model 608

Compact cast iron body to fit in minimum 1-3/4 x 4" aluminum frame. Closer shall have separate and independent closing and latch speed control valves. Optional hold open at 90 or 105°. For center hung applications, arm shall have door centering adjustments and be directly connected to the closer spindle. Closer body is non-handed, single or double acting. Vertically adjustable center hung bottom pivot included. For independently hung doors use model 0608 with slide track arm and channel.

Model 0608

Application

- Exterior or interior doors
- Door weight up to 200 lbs.
- Maximum door size 3'8" x 8'

Features

- Single acting
- Non-handed
- Available non-hold open (N) (door swings to 130°)
- Available automatic hold open - specify 90° or 105° (A)
- Arms only available in sprayed finishes
- Adjustable closing and latch speeds
- Removable frame stop required
- Product should always be used with auxiliary floor or wall stop
- Hanging means by others. Recommended product - pivot set 547. See Pivot Catalog.
- Cannot be used with a top pivot
- 2 year limited warranty

Optional Features

- Extended spindle; 1/2" longer than standard closer spindle. Must be ordered as part of the closer; cannot be added later

Models

- M0608 should be used on metal doors and frames. Package includes closer body, arm, frame mounting box 608049PKG*, and cover plate. Frame size 2" x 5-1/2" minimum.
- MW0608 closer should be used on wood doors and metal frames. Package includes closer body, arm, frame mounting box 608049PKG* and cover plate. Frame size 2" x 5-1/2" minimum.
- W0608 closer should be used on wood doors and frames. Package includes closer body, arm, frame mounting box 608049PKG and cover plate. Frame size 2" x 5-1/2" minimum.
- AW0608 closer should be used on wood doors and aluminum frames. Package includes closer body, arm and frame mounting clips. Frame size 1-3/4" x 4".

Revision Date:

Item Name	Exit Device
Item Type	Panic Exit Device, electric
Description	Panic exit device, exit only (no outside trim), electric latch retraction
Manufacturer	Von Duprin (Allegion)
Model	EL99NL-OP
Dimensions	8" x 2 3/4" x2 3/8" (203mm x 70mm x 60mm)
Color	Satin Chrome
Finish	US26D
Material Composition	Steel
CSI #	08 71 00 - Door Hardware
Omniclass #	22-08 71 00 - Door Hardware
Grade	ANSI/BHMA Grade 1
Fire/Smoke Rating	Up to 3 hours
Operation	Manual, no dogging
Best Practices	Recycled content
Quality Standards	ANSI/BHMA
Accessibility Compliance	ADA and ANSI A117.1
Accessories	Requires one (1) electric power transfer (EPT10); one (1) power supply (PS914)
Warranty	10 years

PUSH	Touchbar trim embossed 'PUSH'
RSS	Red silk-screened lettered touchbar trim
KN	Knurled touchbar
SG	Safety glow

Miscellaneous

CE	CE labeled
LCP	Less cover plate
IOWDA	#IOWDA cover plate
RAT REL	Ratchet release assy

Door material

AL	Aluminum door
HM	Hollow metal
WD	Wood door
CP	Composite door
INS2	Insulclad - 1/2"
INS4	Insulclad - 1/4"
SC	Steelcraft, HH device only

Door application

D	Double egress
P	Pair of doors
S	Single door

Note: Not all options are listed. See the specific device type pages for complete options available.

98/99 Rim exit device

98 and 99 rim exit devices for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 2014, Grade 1. The 98 device has a smooth mechanism case and the 99 device has a grooved case. The rim device is non-handed except when the following device options are used: SD (special dogging), -2 (double cylinder) or SS (signal switch). Covers stock hollow metal doors with 86 or 161 cutouts on single doors (may cover cutouts on pairs – consult template).

Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device

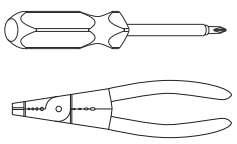
Electric Power Transfer (EPT)

EPT2, EPT10, & EPT10C

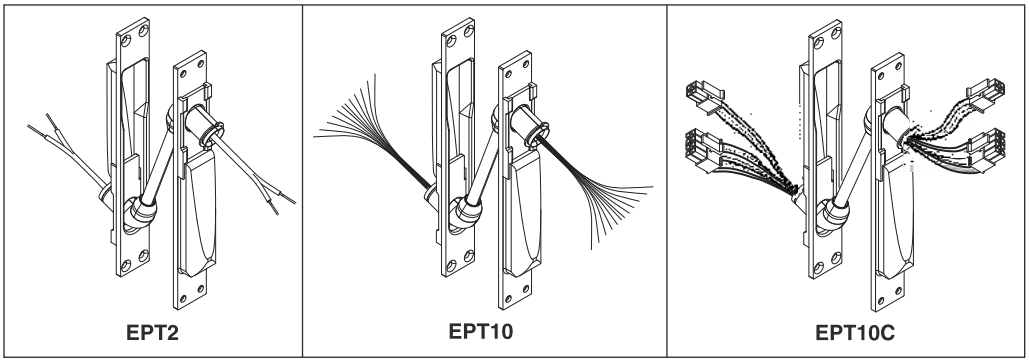
VON DUPRIN®

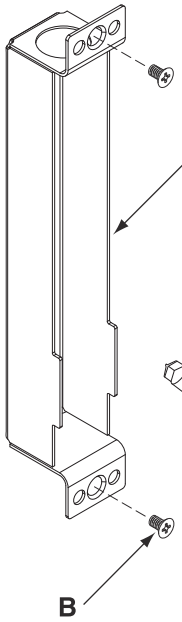
Installation Instructions

Tools for Install

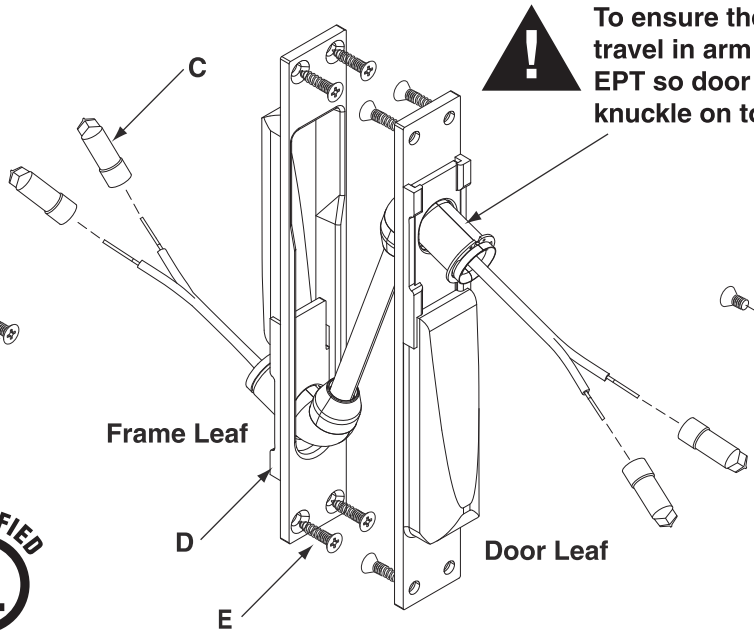


Read all Warnings Before Starting Installation!

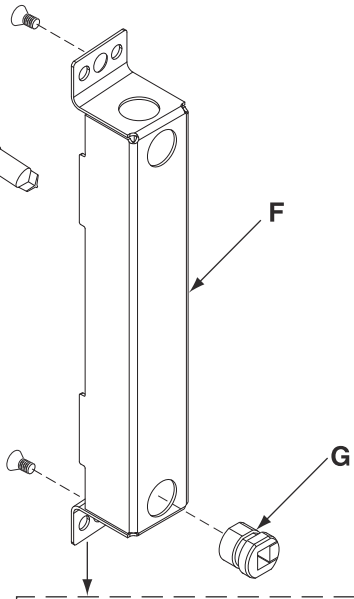


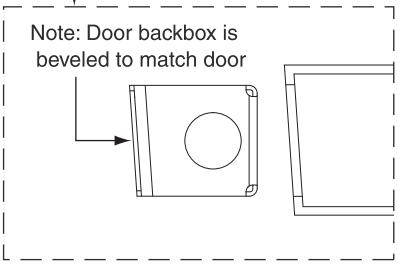


To ensure the maximum amount of travel in arm for cam lift hinges, install EPT so door side leaf is oriented with knuckle on top.



EPT2 Shown





A. Frame Backbox
B. Metal - #10-24 x 3/8” Flat Phillips Head Machine Screw (4)
   Wood - #10 x 3/4” Flat Phillips Head Wood Screw (4)

General Information

An electric power transfer (EPT) provides a wiring path from the door to the frame.

These instructions assume that a factory-prepped door and frame are being used. If the door and frame have not been factory-prepped, see the included dimensioned template.

Before beginning the installation, review “Specifications” and “Warnings”.

Specifications

Applications

EPT **can** be used for:

- Door Thickness - 1-3/4” minimum
  Note: The following specifications apply to a 1-3/4” thick door.
- 0 - 180° opening with up to 5” butt hinges
- 0 - 180° opening with up to 3/4” offset pivots
- 0 - 130° opening with 5-1/2” butt hinges
- 0 - 110° opening with 6” butt hinges

EPT **cannot** be used for:

- 1-1/2” offset pivots
- larger than 6” butt hinges
- pocket pivots
- swing clear hinges
- center hung door (center pivot)
- balanced door

Electrical Ratings

EPT2

- Two 18AWG wires
- Max. Rating: 24VDC, 5A or 120VAC NEC Class 3

EPT10 & EPT10C

- Ten 24AWG wires
- Max Rating: 24VDC, 1A

Read all Warnings Before Starting Installation!

⚠ CAUTION Do not exceed rated specifications (shown above).

⚠ CAUTION EPT must be installed in accordance with these instructions by a qualified electrician.

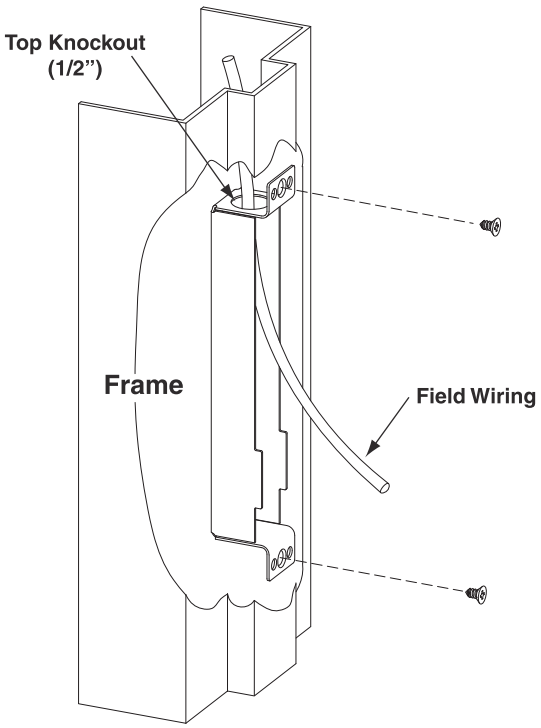
⚠ CAUTION Wiring must be in accordance with all local codes and regulations.

Installation

1 Use Template from Back Page to Verify Preparation

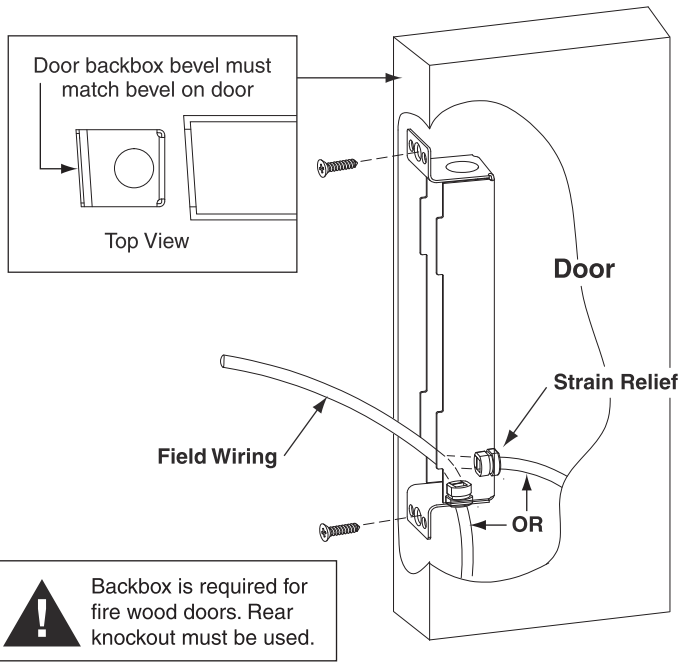
2 Mount Frame Backbox

A. Remove knockout from top
B. Install 1/2" conduit, if used
C. Pull 5" of field wiring through knockout



3 Mount Door Backbox

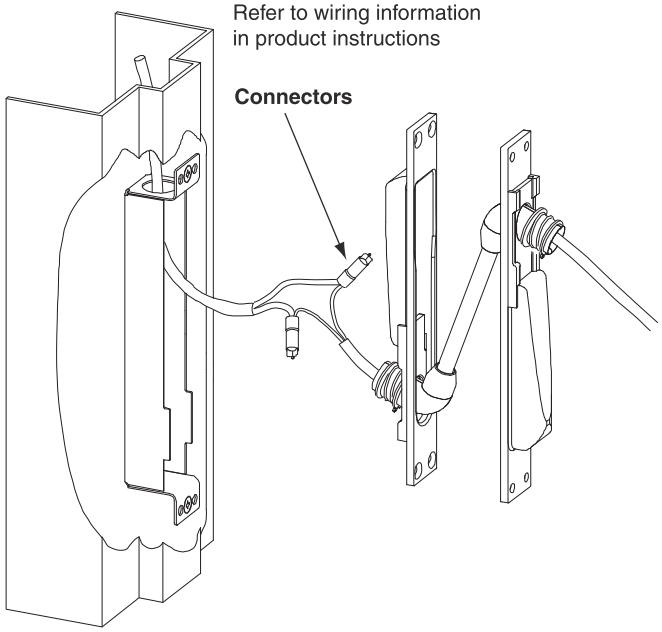
A. Ensure backbox bevel matches door bevel
B. Remove knockout: - from bottom for **metal** doors
- from back for **wood** doors
C. Pull 5" of field wiring through knockout
D. Install strain relief



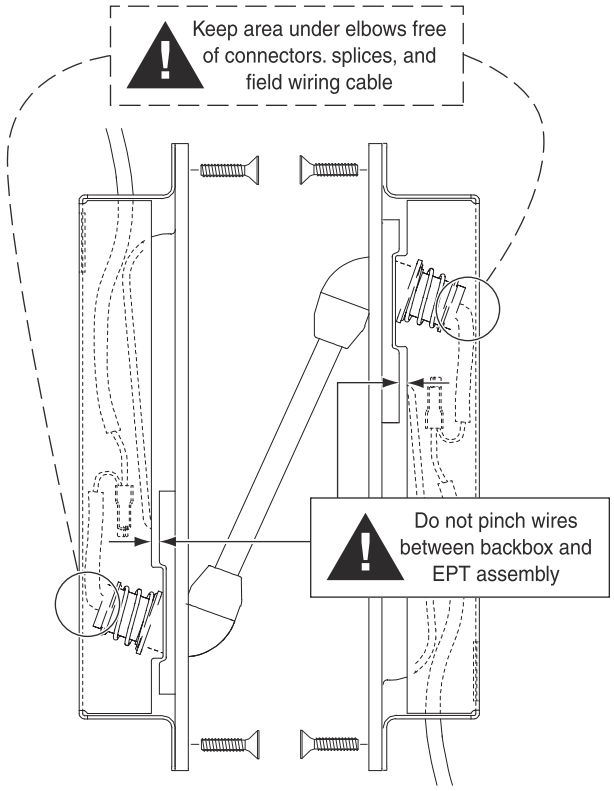
Backbox is required for fire wood doors. Rear knockout must be used.

4 Connect Wires

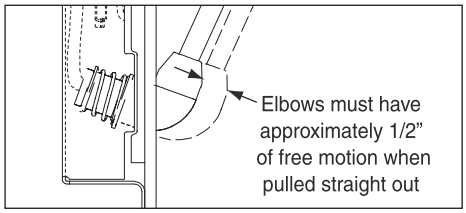
Refer to wiring information in product instructions



5 Mount EPT Assembly

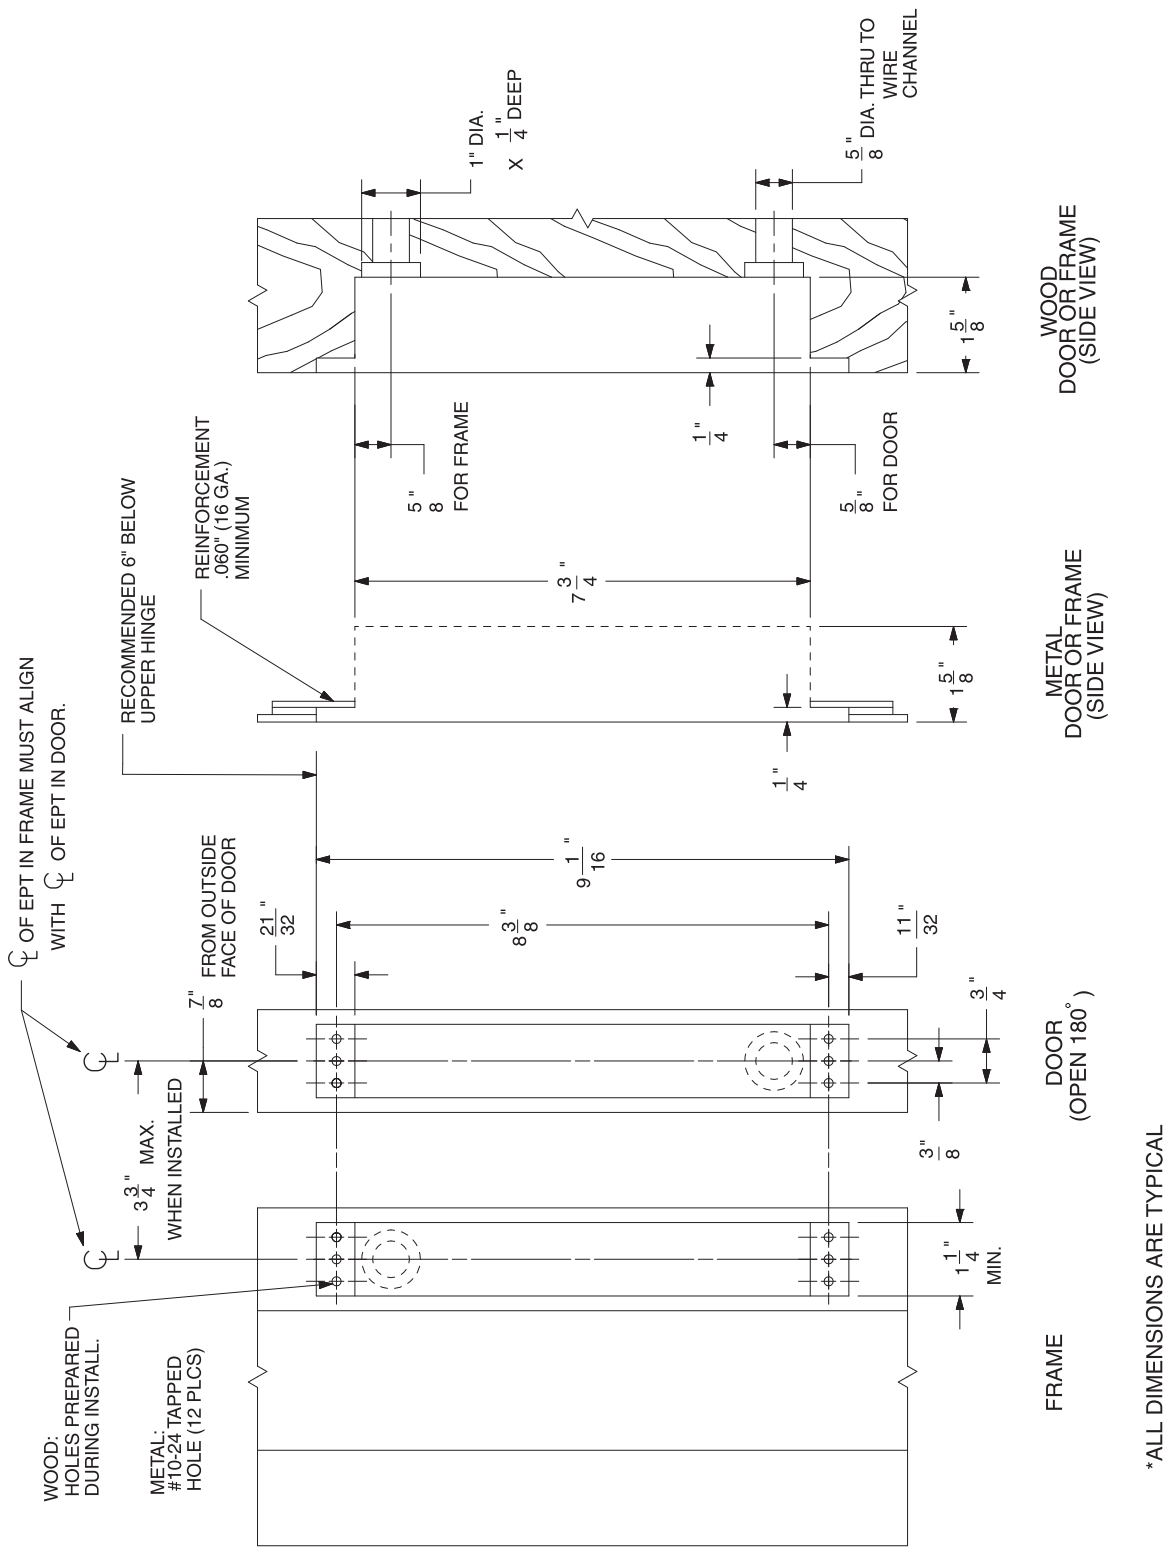


6 Verify that door opens and closes properly without binding and that electrical components function



Template

Note: This drawing is not to scale



ALLEGION™

VON DUPRIN®

PS914

4 amp high in rush power supply

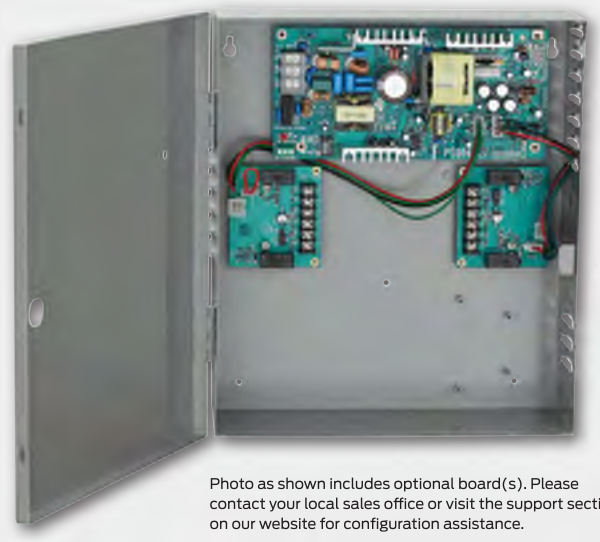


Photo as shown includes optional board(s). Please contact your local sales office or visit the support section on our website for configuration assistance.

Overview

Von Duprin power supply and option board products were designed to meet the specific requirements of electrified fire exit devices.

Installation is simplified by utilizing a flat mounting design and polarized locking connectors for option boards. This design eliminates the need for racks and side connectors. The flat mounting of the option boards also provides for easier access to the terminal blocks for connection of electrified devices (such as electrified panic devices, strikes, card readers, etc.).

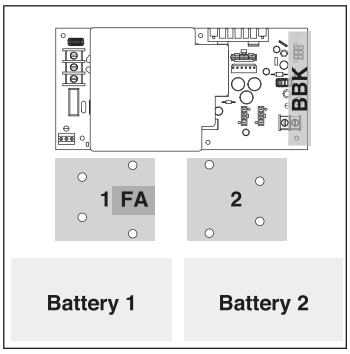
Common to the line of PS900 Series power supplies is a constant output rating at both 12v and 24v settings, universal 120 VAC to 240 VAC input, and polarized option board connectors. New fire alarm interface board mounting allows outputs to be configured as switched (power cut) or unswitched (power continues) when signal is provided.

Features and benefits

- 4A @ 12/24 VDC constant output, field selectable with jumper
- Designed for use with electrified panic devices requiring high in rush current
- Provides low-voltage, Class 2, filtered and regulated power
- Universal 120-240 VAC, fused primary input
- Two polarized option board connectors
- AC input and DC output monitoring circuit with LED indicators
- Externally visible AC input indicator with isolated SPDT contacts
- High-voltage protective cover for AC circuitry (not shown)
- Battery back-up board auto-selects voltage
- Optional Fire Alarm plug-in board available
- UL 294, ULC-S318, RoHS, and FCC Part 15 certified

Configuration options

Available option board, fire alarm and battery backup connection locations:



Exit device support

Von Duprin QEL	Up to 8[1]
Von Duprin EL	Up to 8[1,2]
Falcon EL	Up to 8[1,2]

1. Requires the use of two 900-4RL option boards

2. Distance from power supply may be limited with multiple EL applications - consult technical support for wire run lengths

PS914 power supply specifications

Specification	Description
Input voltage	120/240 VAC, 50/60 Hz, universal input
Output voltage	4A @ 12 or 24 VDC Field selectable with jumper Switching supply, 5% regulation, 360mVpp max ripple
Enclosure	Grey/baked enamel 14" x 12" x 4" (H x W x D) Eight ½" x ¾" knockouts Hinged cover with lock down screws
Operating temperature	32º - 120ºF (0º - 49ºC)
Certifications	ANSI/UL 294 ULC-S318 RoHS FCC Part 15 Class 2
Battery backup (install on main board)	900-BB: Battery backup board only 900-BBK: Battery backup kit (backup board plus battery pack)
Available option boards	900-FA: Plug-in fire alarm (must be installed on option board) 900-2RS*: 2 Relay option board capable of individual or sequential operation for single and pair door applications 900-4R*: 4 Relay option board 900-4RL*: 4 Relay option board with integrated logic and individual or sequential operation capability for controlling security interlocks, auto operators and time delay function 900-8F*: Fused, 8 zone option board 900-8P*: PTC, 8 zone option board
AC primary fuse size	6.3A, 250v, 5 x 20mm
Battery fuse size	7.5A 32v ATO blade style
DC output protection	Overload protection - current limited foldback circuit
Indicators	LED indicators: - AC input (visible on outside of enclosure) - DC output Isolated SPDT contacts to monitor AC power status
Weight (power supply)	Approx. 9.0 lbs
Weight (each battery)	4.0 lbs
AC input termination	3 position terminal block with protective cover Wire capacity: 10 AWG max.
DC output termination	2 position terminal block Wire capacity: 12 AWG max.
Option board connectors	2
Fire alarm board connector	Yes (requires connection on option board)
Keylock	Optional
Accessories	900-BAT: Backup battery pack

* Compatible with plug-in fire alarm board (900-FA)

40 Series Mortise Cylinders and 34 Series Rim Cylinders

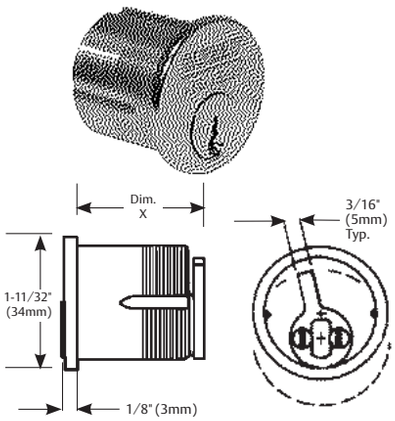
Cylinders and Components

SARGENT®
ASSA ABLOY

40 Series Mortise Cylinder

- Cylinder: Solid brass, 1-5/32" (29mm) diameter
- Cap: Brass, bronze or stainless steel
- Furnished standard with No. 97 rosette and compression spring
- Optional Collars/Spacers available and ordered separately, refer to product catalogs for additional information
- See Cam Chart on Page 6 for cam required
- 6 pin standard; for 7 pin specify "7 pin", size 42 minimum
- No. 41 cylinder not available in 7 pin
- Mortise cylinder assemblies that are ordered without hardware are supplied with standard SARGENT offset cam 13-0664
- Cylinder finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 15, 20D, 32, 32D
- Plug finishes: 4, 15

	Length under cylinder head									
Cylinder No.	41	42	43	44	46	48	50	52	54	56
Dim. X	1-1/8" (29mm)	1-1/4" (32mm)	1-3/8" (35mm)	1-1/2" (38mm)	1-3/4" (44mm)	2" (51mm)	2-1/4" (57mm)	2-1/2" (64mm)	2-3/4" (70mm)	3" (76mm)

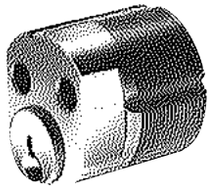


50-40 Series Hotel Type Cylinder

Features same as standard 40 Series cylinders except:

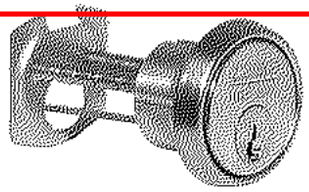
- For use with 7850 or 8250 lock only
- 6 pin only
- Contact factory for compatibility requirements for existing 6 pin systems
- Uses only cam #115 (13-2045)
- Guest and Master keys will only retract the latch bolt but not project or retract the dead bolt
- Emergency keys (catalog # 7268 EMK) retract the latchbolt and deadbolt and can also project the deadbolt
- C Series keyways supplied standard, specify if different keyway is required. On 1 bitted or KD, CA key way will be supplied if not otherwise specified
- Consult Sargent Key records dept. when adding Hotel cylinders to existing key systems for compatibility
- Length under cylinder head (Dim. X)
  50-43 1-3/8" (35mm); 50-44 1-1/2" (38mm)

78-40 Series Exposed Shell Only Cylinders



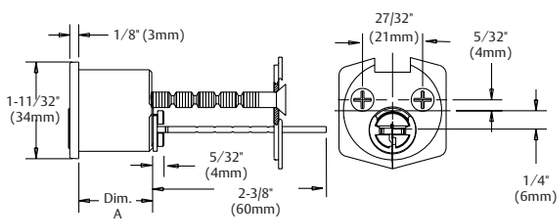
- Cylinder: Solid brass, 1-5/32" (29mm) diameter
- 6 pin standard, for 7 pin specify "7 pin"
- For use with SARGENT mortise locks with Escutcheon Trim (KE 3/4, LE 3/4) only
- See Function Table on Page 6 for cam required
- 78-41 6 pin; single cylinder function only except 50
- 78-42 6 or 7 pin; single cylinder functions only
- 78-43 6 or 7 pin; all functions except 50
- Plug finishes: 4, 15

34 Series Rim Type Cylinder



- 27/32" (21mm) screw pattern for through-bolted SARGENT exit devices
- Cylinder: Solid brass
- Cap: Brass, bronze or stainless steel
- Furnished standard with No. 97 rosette and compression spring, "break-off" screws and back plate
- 6 pin standard, for 7 pin specify "7 pin"
- Horizontal tail piece only
- Cylinder finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 15, 20D, 32, 32D
- Plug finishes: 4, 15

No. of Pins	Door Thickness when used with outside trim	Dim. A (Min.)
6	2-3/8" to 3-1/4" (60mm to 82mm)	1-1/16" (27mm)
7	2-1/2" to 3-1/2" (64mm to 89mm)	1-7/32" (31mm)



All cylinders are standard 6 pin and are supplied with 2 nickel silver change keys unless noted. In cylinders ordered for 5 pin systems, the (6th) last chamber will be empty.

When double cylinder locksets are keyed alike on both sides, 2 change keys are supplied.

For cylinders in competitive keyways, see Page 11.

Cylinders are supplied random keyed unless specified 1 bitted or master keyed. For master keyed orders provide keying details as requested on SARGENT Keyed Order Lead Sheets, located in the price book or contact customer service.

Cylinders BHMA A156.5 Grade 1 listed except hotel functions.

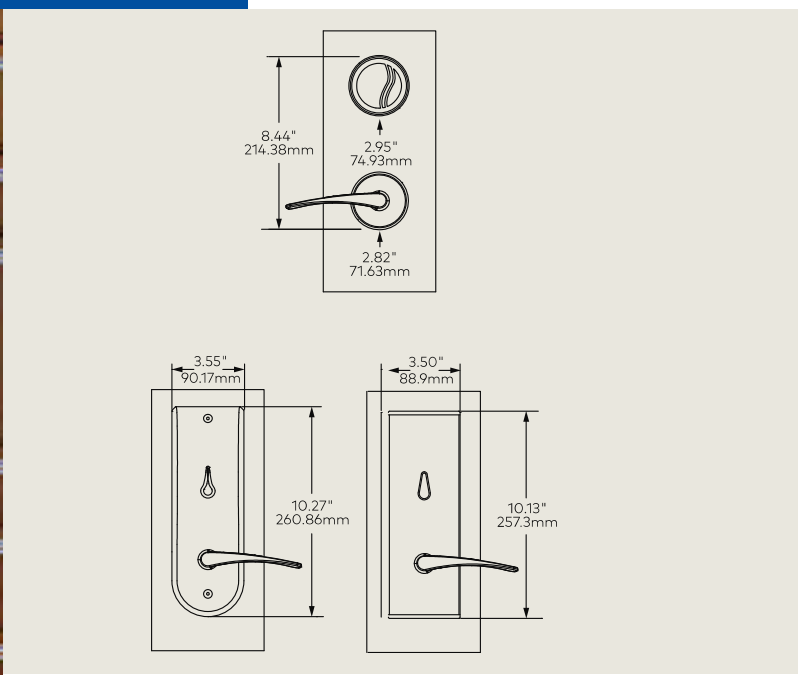
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

Mechanical Features

INTRODUCTION

Rixson Overhead Concealed closers offer an aesthetically appealing way to close a door. In situations where a closer is needed but concealment is required, Rixson offers several different series to meet your application demands. Concealed for minimal appearance, these offset hung or center hung (single or double acting) door closers provide control without sacrificing the aesthetics of the opening.

Series	Architectural Grade	Commodity Grade	Single Acting	Double Acting	Handed	ADA Compliant Model Available	Grade 1 Certified	Door Weight

GENERAL INFORMATION

Non-Hold Open closers do not hold the door open. This feature cannot be changed in the field on the 608, 700, or 800 series closers.

Hold Open closers hold the door open. This feature cannot be changed in the field on the 608, 700, or 800 series closers.

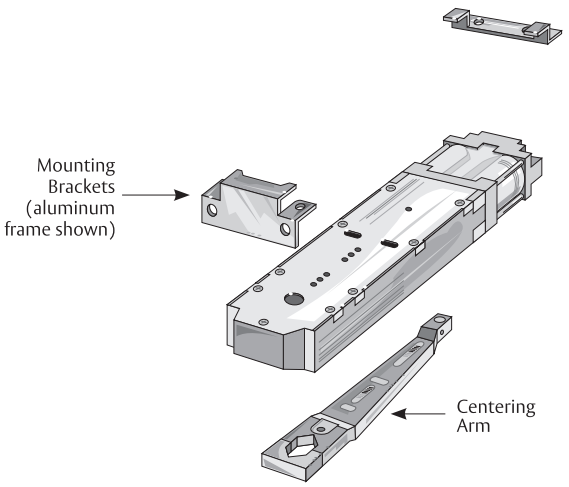
The degree of swing must be specified on some closers (refer to specific product pages for requirements).

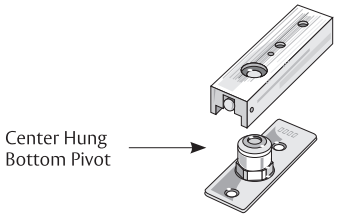
When the door closer must be concealed above the ceiling or drywall, a longer or extended spindle is required. Regular and 1/2" extended spindles available. Closer adjustment valves must always be accessible.

End caps are used to cover the mortise edges for wood doors on center hung 608 and 700/800 models. Two 199 End Caps can be furnished; one for the top arm and one for the bottom pivot.

Mounting brackets or boxes for aluminum, wood or metal frames must be specified when ordering the 608 and 700/800 series.

800 Series Shown





SPECIFICATIONS

Model 91DCP:

Model 91DCP shall be used for offset hung doors. Closer shall fit in a 1-3/4 x 4 aluminum tube. Closer shall have adjustable spring that complies to accessibility codes. Adjustable spring, backcheck, and closing speed valves must be accessible after door is installed. Where applicable, a hold open feature is achieved in the track. Closer shall be Grade 1 per ANSI A156.4. Closer shall be fire rated UL10C for doors tested for overhead concealed products up to 3 hours.

Models 700/800

Model 700 for single acting center hung doors. Hydraulic closer mechanism to fit in minimum 1-3/4" x 4" aluminum frame. Closer shall have a sized spring determined by the door width. Adjustable hydraulic backcheck and closing speed valves. Closers for single acting doors shall be handed and preloaded for positive closing action. Vertically adjustable center hung bottom pivot included. For double acting doors, use model 800 with adjustable closing speed for each swing direction. Hold open (option) is achieved through the closer body and degree called out.

Model 608

Compact cast iron body to fit in minimum 1-3/4 x 4" aluminum frame. Closer shall have separate and independent closing and latch speed control valves. Optional hold open at 90 or 105°. For center hung applications, arm shall have door centering adjustments and be directly connected to the closer spindle. Closer body is non-handed, single or double acting. Vertically adjustable center hung bottom pivot included. For independently hung doors use model 0608 with slide track arm and channel.

Model 0608

Application

- Exterior or interior doors
- Door weight up to 200 lbs.
- Maximum door size 3'8" x 8'

Features

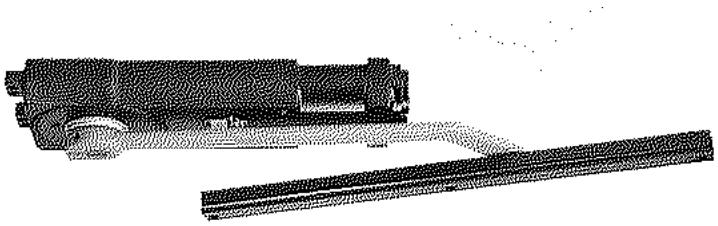
- Single acting
- Non-handed
- Available non-hold open (N) (door swings to 130°)
- Available automatic hold open - specify 90° or 105° (A)
- Arms only available in sprayed finishes
- Adjustable closing and latch speeds
- Removable frame stop required
- Product should always be used with auxiliary floor or wall stop
- Hanging means by others. Recommended product - pivot set 547. See Pivot Catalog.
- Cannot be used with a top pivot
- 2 year limited warranty

Optional Features

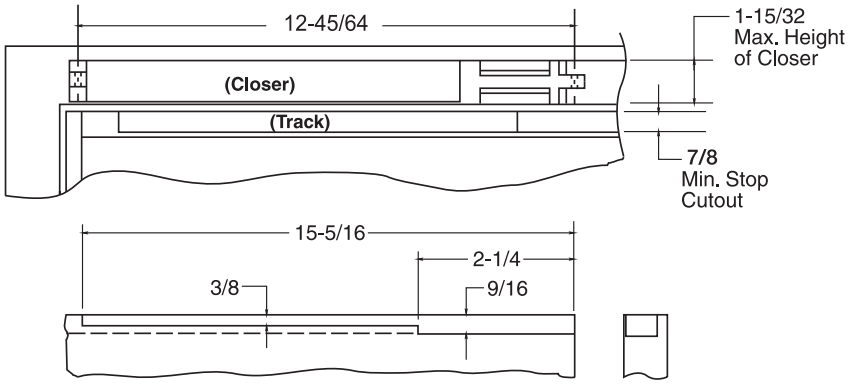
- Extended spindle; 1/2" longer than standard closer spindle. Must be ordered as part of the closer; cannot be added later

Models

- M0608 should be used on metal doors and frames. Package includes closer body, arm, frame mounting box 608049PKG*, and cover plate. Frame size 2" x 5-1/2" minimum.
- MW0608 closer should be used on wood doors and metal frames. Package includes closer body, arm, frame mounting box 608049PKG* and cover plate. Frame size 2" x 5-1/2" minimum.
- W0608 closer should be used on wood doors and frames. Package includes closer body, arm, frame mounting box 608049PKG and cover plate. Frame size 2" x 5-1/2" minimum.
- AW0608 closer should be used on wood doors and aluminum frames. Package includes closer body, arm and frame mounting clips. Frame size 1-3/4" x 4".



TECHNICAL INFO



*Note that mounting channels must be welded into frames prior to shipment to job site.

Detail

1 Prefixes

None	Standard
AX	Accessible device
CD	Cylinder dogging - panic only
CDSI	Cylinder dogging with security indicator
CI	Cylinder dogging indicator
CD-CX	Chexit cylinder dogging
CX	Chexit
DI	Dogging indicator
E	Electric locking mortise/lever
EL	Electric latch retraction
HDSI	Hex dogging with security indicator
HH	Hurrican device
LD	Less dogging
LX	Latch bolt monitoring
LX-LC	Latch bolt monitoring, low current
LX-RX	Latch bolt monitoring, request to exit
LX-RX-LC	Latch bolt monitoring, request to exit low current
PL	Pullman latch
PN	Pneumatic latch retraction
QEL	Quiet electric latch retraction
QM	Quiet mechanical
RX	Request to exit
RX2	Double request to exit
RX-AUX	Request to exit, auxiliary
RX-LC	Request to exit, low current
SD	Special dogging -panic only
SS	Signal switch
WP-RX	Waterproof request to exit
WS	Windstorm (FEMA rated) surface vertical rod device
XP	Heavy protection - rim

2 Device series

98	Series 98-smooth
99	Series 99-grooved

3 Device type

None	Rim device
27	Surface mounted vertical rod device
47	Concealed vertical rod device
47WDC	Concealed vertical rod wood door device
48	Concealed vertical rod device
49	Concealed vertical cable device
50WDC	Concealed vertical cable wood door device
52	Rim device with remote trim input (pool exit hardware)
57	Three-point latch device
75	Mortise lock device

4 Trim functions

EO	For AD or CO locks, order the panic as Exit Only (EO)
DT	Dummy trim
EO	Exit only
HL	Hospital pull trim
K	Knob
K-BE	Knob - blank escutcheon
K-DT	Knob, rigid - dummy trim
K-NL	Knob, rigid - night latch
L	Lever (classroom)
L-BE	Lever - blank escutcheon
L-DT	Lever, rigid - dummy trim
L-NL	Lever, rigid - night latch
NL	Night latch
NL-OP	Night latch cylinder assembly, optional pull
TL	Turn lever
TL-BE	Turn lever - blank escutcheon
TP	Thumbpiece
TP-BE	Thumbpiece - blank escutcheon

5 Rating

F	Fire exit hardware
Blank	Panic exit hardware

6 Suffix

-2	Double cylinder (rim and mortise only)
-2SI	Double cylinder with security indicator (rim only)
CON	Connectors
WH	Weep holes

7 Finish

605	Bright Brass
606	Satin Brass
612	Satin Bronze
619	Satin Nickel
622/711	Matte Black/Matte Black, Anodized
625	Bright Chrome
626	Satin Chrome
626AM	Satin Chrome, Antimicrobial
628	Aluminum, Anodized
630	Satin Stainless
630AM	Satin Stainless, Antimicrobial
643e	Aged Bronze
693	Black Paint
710	Dark Brown, Anodized

8 Door width / Door thickness

Door width		Door thickness	
3'	Standard default	1 3/4"	Standard
4'		2 1/4"	Optional
2'	Vertical only		

9 Handing

LHR	Left hand reverse
RHR	Right hand reverse

10 Less bottom rod/cable

LBR	Less bottom rod
LBL	Less bottom latch
LBR-AFL	LBR with fire pin
LBL-AFL	LBL with fire pin

11 Trim options/finish

See trim options/finish for each device type

12 Lever style

06	Standard default (optional levers available

13 Accessories

CYL	Cylinder
GBK	Glass bead kit
SEC	Security screws
SLM	SLM blocking
SNB	Sex bolts

14 Other information

Touchbar options

BRAILLE	Vision impaired touchpad, raised letter, and braille
PUSH	Touchbar trim embossed 'PUSH'
RSS	Red silk-screened lettered touchbar trim
KN	Knurled touchbar
SG	Safety glow

Miscellaneous

CE	CE labeled
LCP	Less cover plate
IOWDA	#IOWDA cover plate
RAT REL	Ratchet release assy

Door material

AL	Aluminum door
HM	Hollow metal
WD	Wood door
CP	Composite door
INS2	Insulclad - 1/2"
INS4	Insulclad - 1/4"
SC	Steelcraft, HH device only

Door application

D	Double egress
P	Pair of doors
S	Single door

Note: Not all options are listed. See the specific device type pages for complete options available.

98/99 Rim exit device

98 and 99 rim exit devices for all types of single and double doors with mullion, UL listed for panic exit hardware. Devices are certified to ANSI/BHMA A156.3 2014, Grade 1. The 98 device has a smooth mechanism case and the 99 device has a grooved case. The rim device is non-handed except when the following device options are used: SD (special dogging), -2 (double cylinder) or SS (signal switch). Covers stock hollow metal doors with 86 or 161 cutouts on single doors (may cover cutouts on pairs – consult template).

Specifications

Device functions	Device ships EO/DT/NL; Field selectable; For TP, K or L remove NL drive screw from device
Device lengths	3' 2'4' to 3' (711mm to 914mm) Door size 4' 2'10" to 4' (864mm to 1219mm) Door size
Device centerline from finished floor	39 13/16" (1011mm) 39 11/16" (1008mm) with mullion
Center case	8" x 2 3/4" x2 3/8" (203mm x 70mm x 60mm)

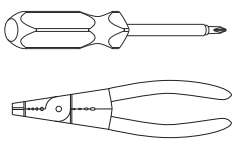
Electric Power Transfer (EPT)

EPT2, EPT10, & EPT10C

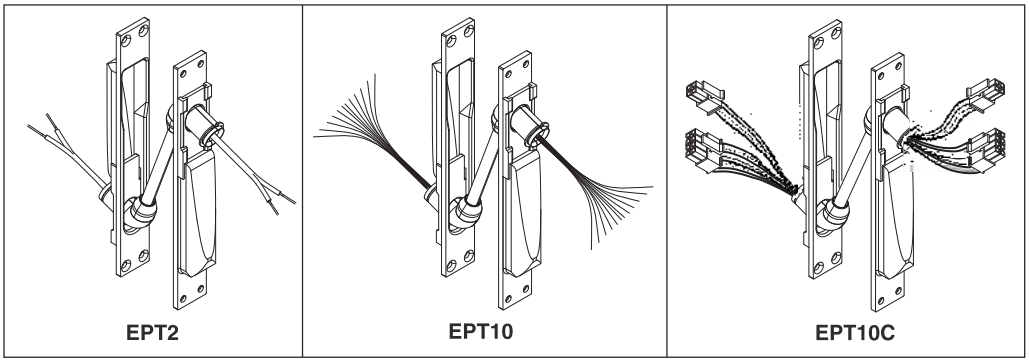
VON DUPRIN®

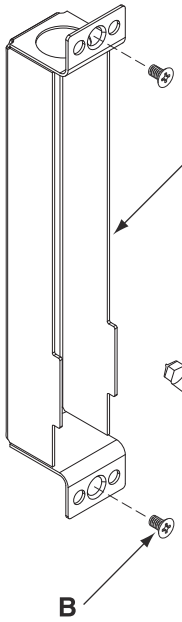
Installation Instructions

Tools for Install

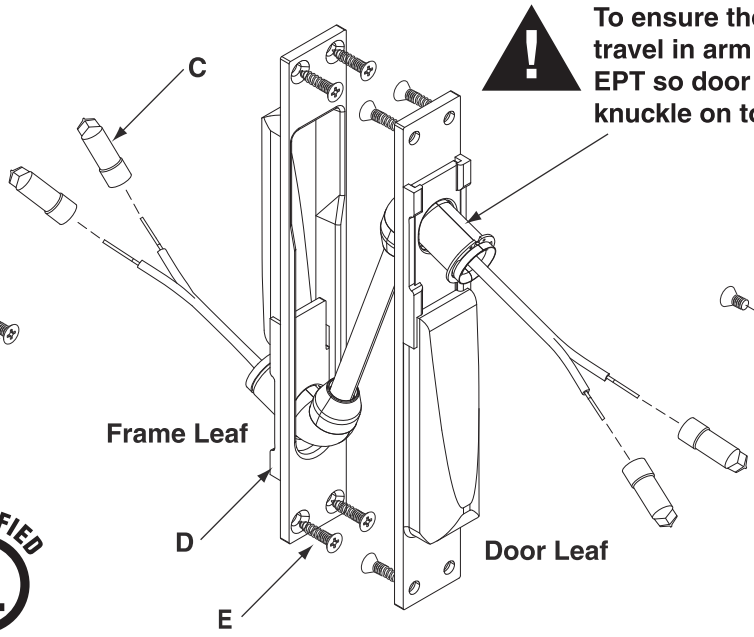


Read all Warnings Before Starting Installation!

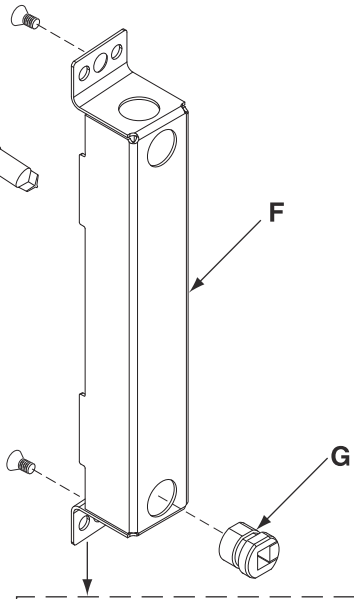


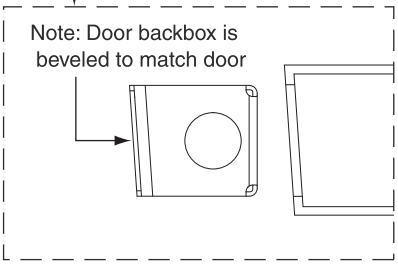


To ensure the maximum amount of travel in arm for cam lift hinges, install EPT so door side leaf is oriented with knuckle on top.



EPT2 Shown





A. Frame Backbox
B. Metal - #10-24 x 3/8” Flat Phillips Head Machine Screw (4)
   Wood - #10 x 3/4” Flat Phillips Head Wood Screw (4)
C. EPT2 - Wire Connectors 12 Gauge Yellow (4)
   EPT10 - Wire Connectors 18 Gauge Violet (20)
   EPT10C - Wire Connectors 18 Gauge Violet (20)
D. EPT Assembly
E. Metal - #10-24 x 3/4” Flat Phillips Head Machine Screw (8)
   Wood - #10 x 3/4” Flat Phillips Head Wood Screw (8)
F. Door Backbox

General Information

An electric power transfer (EPT) provides a wiring path from the door to the frame.

These instructions assume that a factory-prepped door and frame are being used. If the door and frame have not been factory-prepped, see the included dimensioned template.

Before beginning the installation, review “Specifications” and “Warnings”.

Specifications

Applications

EPT **can** be used for:

- Door Thickness - 1-3/4” minimum
  Note: The following specifications apply to a 1-3/4” thick door.
- 0 - 180° opening with up to 5” butt hinges
- 0 - 180° opening with up to 3/4” offset pivots
- 0 - 130° opening with 5-1/2” butt hinges
- 0 - 110° opening with 6” butt hinges

EPT **cannot** be used for:

- 1-1/2” offset pivots
- larger than 6” butt hinges
- pocket pivots
- swing clear hinges
- center hung door (center pivot)
- balanced door

Electrical Ratings

EPT2

- Two 18AWG wires
- Max. Rating: 24VDC, 5A or 120VAC NEC Class 3

EPT10 & EPT10C

- Ten 24AWG wires
- Max Rating: 24VDC, 1A

Read all Warnings Before Starting Installation!

⚠ CAUTION Do not exceed rated specifications (shown above).

⚠ CAUTION EPT must be installed in accordance with these instructions by a qualified electrician.

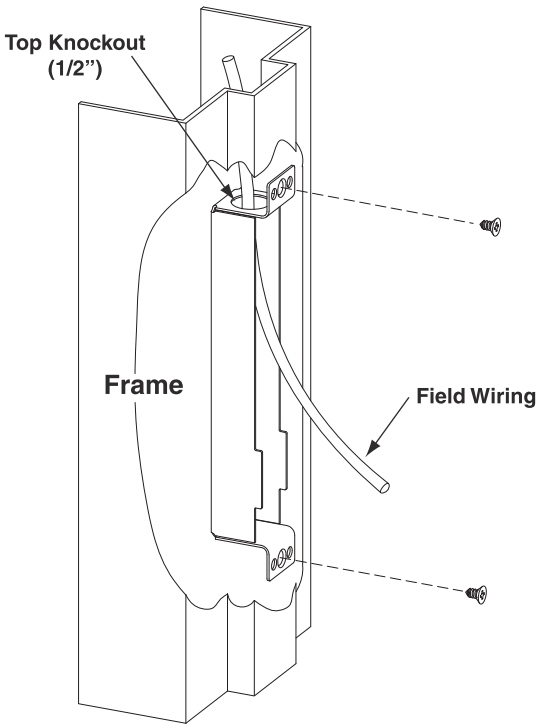
⚠ CAUTION Wiring must be in accordance with all local codes and regulations.

Installation

1 Use Template from Back Page to Verify Preparation

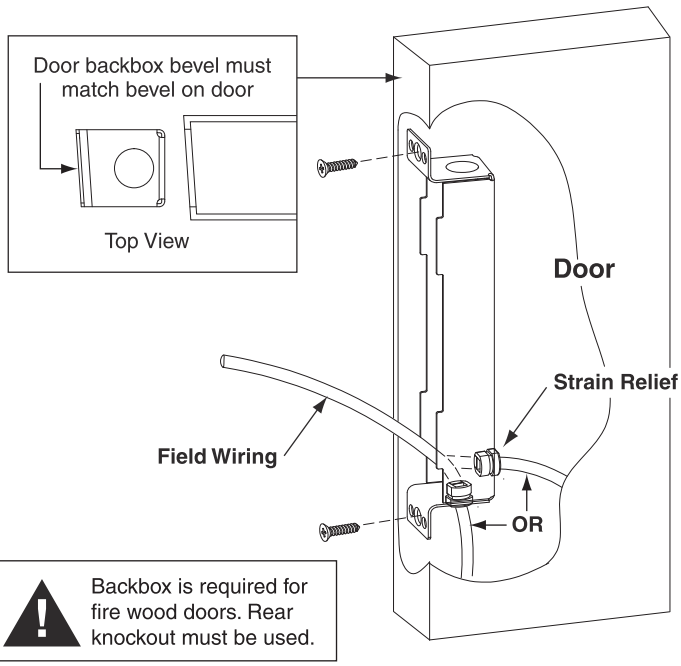
2 Mount Frame Backbox

A. Remove knockout from top
B. Install 1/2" conduit, if used
C. Pull 5" of field wiring through knockout



3 Mount Door Backbox

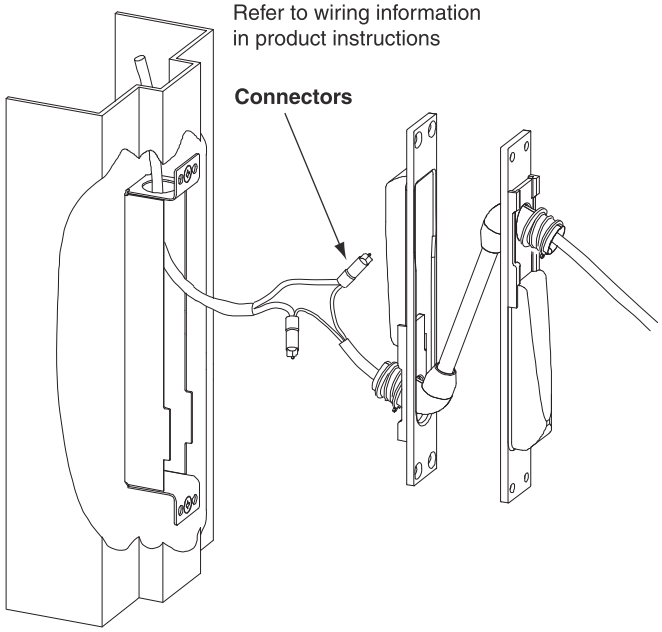
A. Ensure backbox bevel matches door bevel
B. Remove knockout: - from bottom for **metal** doors
- from back for **wood** doors
C. Pull 5" of field wiring through knockout
D. Install strain relief



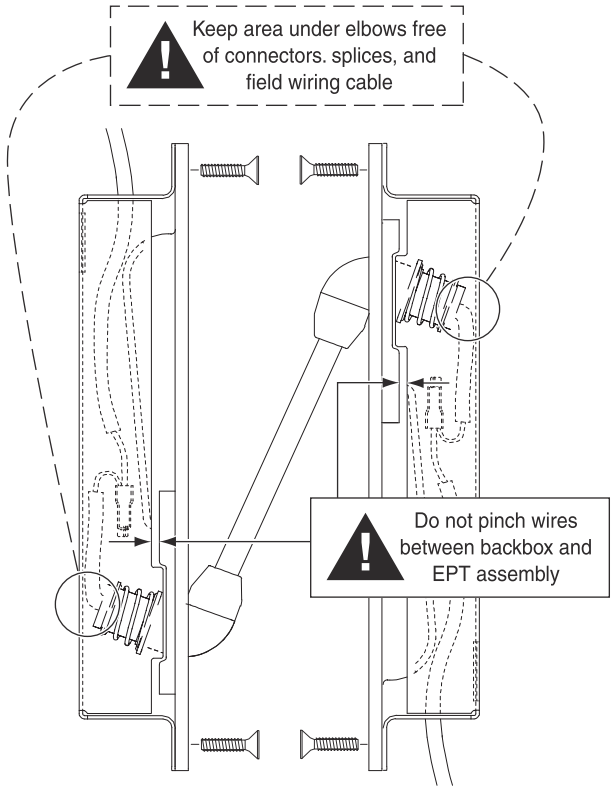
Backbox is required for fire wood doors. Rear knockout must be used.

4 Connect Wires

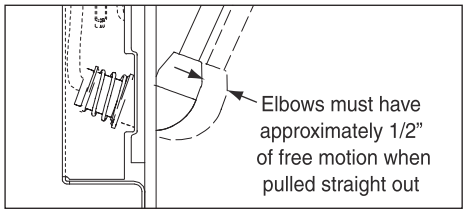
Refer to wiring information in product instructions



5 Mount EPT Assembly

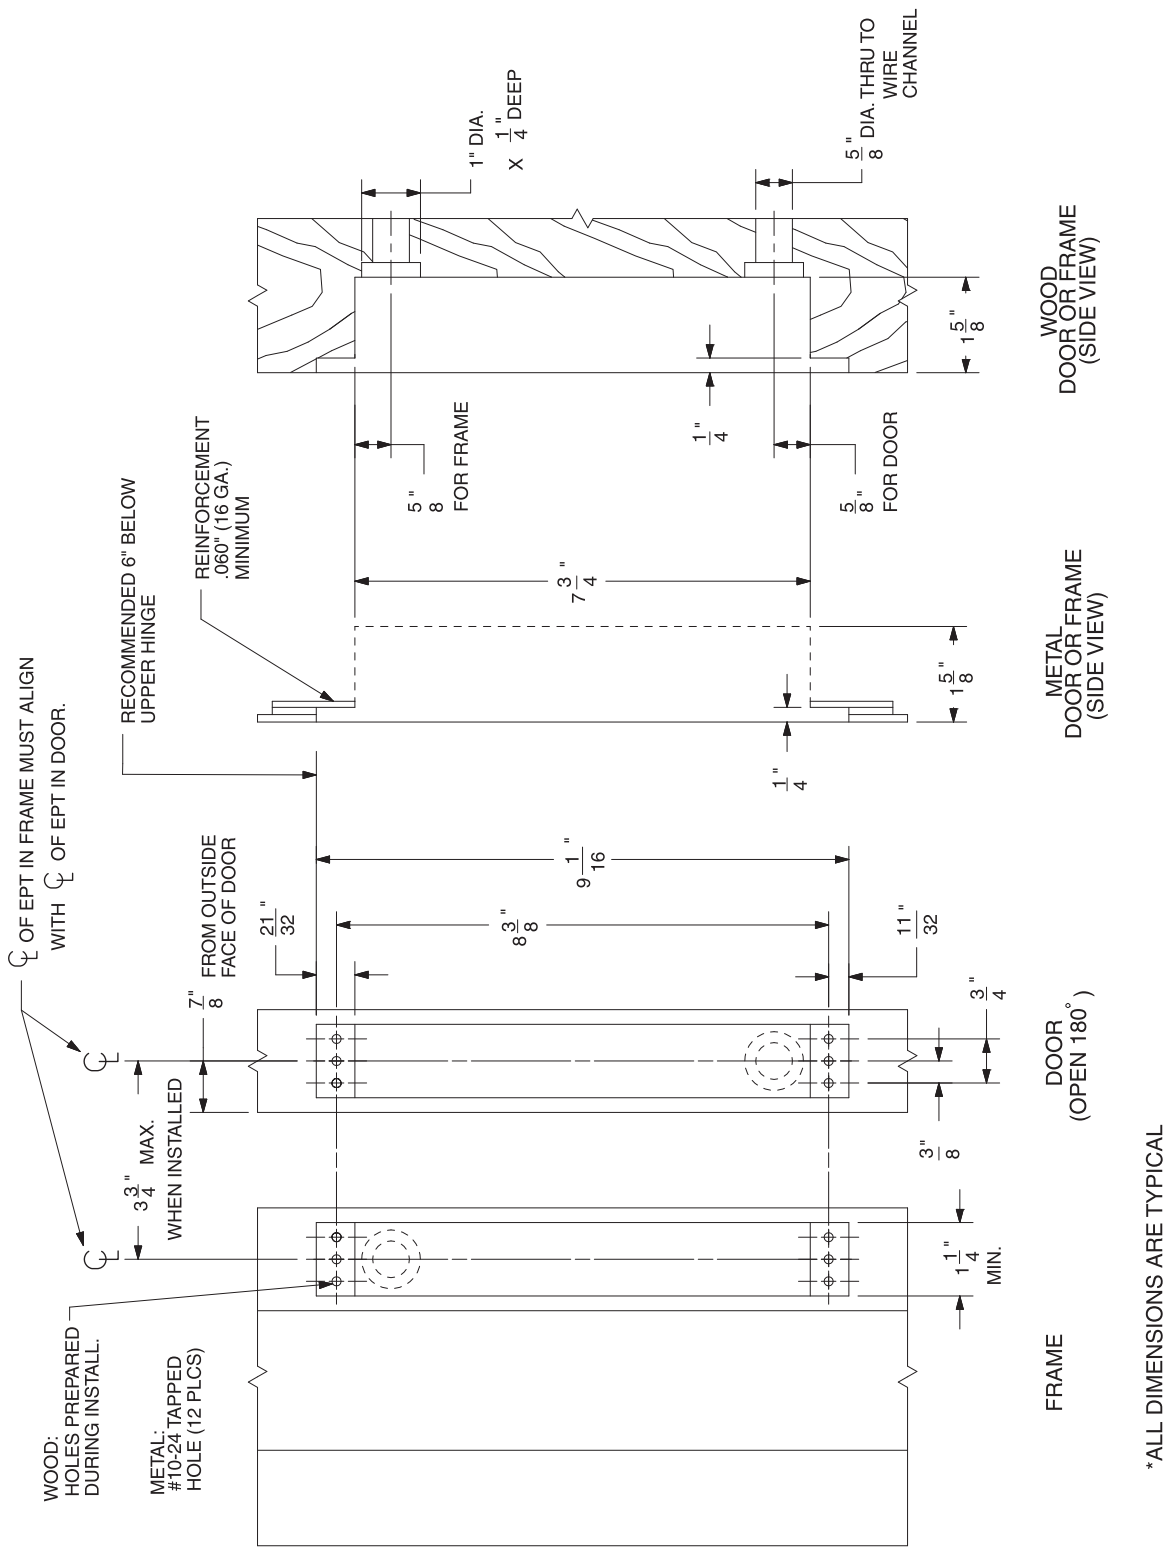


6 Verify that door opens and closes properly without binding and that electrical components function



Template

Note: This drawing is not to scale



ALLEGION™

VON DUPRIN®

PS914

4 amp high in rush power supply

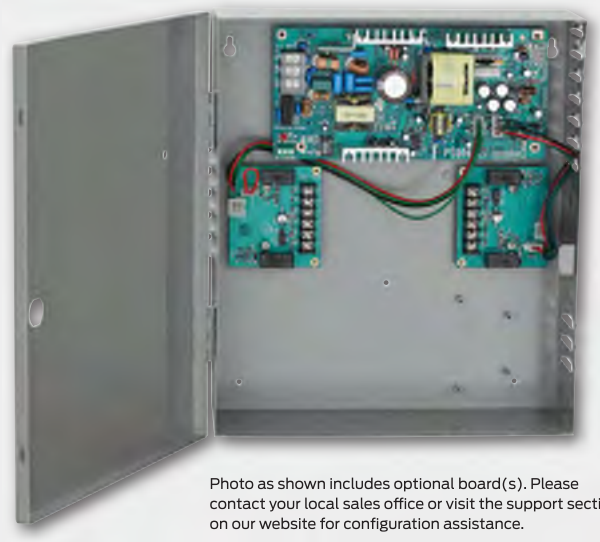


Photo as shown includes optional board(s). Please contact your local sales office or visit the support section on our website for configuration assistance.

Overview

Von Duprin power supply and option board products were designed to meet the specific requirements of electrified fire exit devices.

Installation is simplified by utilizing a flat mounting design and polarized locking connectors for option boards. This design eliminates the need for racks and side connectors. The flat mounting of the option boards also provides for easier access to the terminal blocks for connection of electrified devices (such as electrified panic devices, strikes, card readers, etc.).

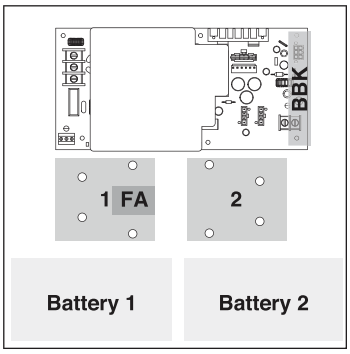
Common to the line of PS900 Series power supplies is a constant output rating at both 12v and 24v settings, universal 120 VAC to 240 VAC input, and polarized option board connectors. New fire alarm interface board mounting allows outputs to be configured as switched (power cut) or unswitched (power continues) when signal is provided.

Features and benefits

- 4A @ 12/24 VDC constant output, field selectable with jumper
- Designed for use with electrified panic devices requiring high in rush current
- Provides low-voltage, Class 2, filtered and regulated power
- Universal 120-240 VAC, fused primary input
- Two polarized option board connectors
- AC input and DC output monitoring circuit with LED indicators
- Externally visible AC input indicator with isolated SPDT contacts
- High-voltage protective cover for AC circuitry (not shown)
- Battery back-up board auto-selects voltage
- Optional Fire Alarm plug-in board available
- UL 294, ULC-S318, RoHS, and FCC Part 15 certified

Configuration options

Available option board, fire alarm and battery backup connection locations:



Exit device support

Von Duprin QEL	Up to 8[1]
Von Duprin EL	Up to 8[1,2]
Falcon EL	Up to 8[1,2]

1. Requires the use of two 900-4RL option boards

2. Distance from power supply may be limited with multiple EL applications - consult technical support for wire run lengths

PS914 power supply specifications

Specification	Description
Input voltage	120/240 VAC, 50/60 Hz, universal input
Output voltage	4A @ 12 or 24 VDC Field selectable with jumper Switching supply, 5% regulation, 360mVpp max ripple
Enclosure	Grey/baked enamel 14" x 12" x 4" (H x W x D) Eight ½" x ¾" knockouts Hinged cover with lock down screws
Operating temperature	32º - 120ºF (0º - 49ºC)
Certifications	ANSI/UL 294 ULC-S318 RoHS FCC Part 15 Class 2
Battery backup (install on main board)	900-BB: Battery backup board only 900-BBK: Battery backup kit (backup board plus battery pack)
Available option boards	900-FA: Plug-in fire alarm (must be installed on option board) 900-2RS*: 2 Relay option board capable of individual or sequential operation for single and pair door applications 900-4R*: 4 Relay option board 900-4RL*: 4 Relay option board with integrated logic and individual or sequential operation capability for controlling security interlocks, auto operators and time delay function 900-8F*: Fused, 8 zone option board 900-8P*: PTC, 8 zone option board
AC primary fuse size	6.3A, 250v, 5 x 20mm
Battery fuse size	7.5A 32v ATO blade style
DC output protection	Overload protection - current limited foldback circuit
Indicators	LED indicators: - AC input (visible on outside of enclosure) - DC output Isolated SPDT contacts to monitor AC power status
Weight (power supply)	Approx. 9.0 lbs
Weight (each battery)	4.0 lbs
AC input termination	3 position terminal block with protective cover Wire capacity: 10 AWG max.
DC output termination	2 position terminal block Wire capacity: 12 AWG max.
Option board connectors	2
Fire alarm board connector	Yes (requires connection on option board)
Keylock	Optional
Accessories	900-BAT: Backup battery pack

* Compatible with plug-in fire alarm board (900-FA)

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Lock cylinder
Item Type	Rim Cylinder
Description	Rim cylinder, 6-pin configuration
Manufacturer	Sargent (Assa Abloy)
Model	34
Dimensions	NA
Finish	US15
Material Composition	Solid brass
CSI #	08 71 00 - Door Hardware
Omniclass #	22-08 71 00 - Door Hardware
Grade	BHMA A156.5 Grade 1
Operation	Manual
Best Practices	Recycled content
Quality Standards	BHMA A156.5
Accessibility Compliance	ADA and ANSI A117.1
Accessories	No. 97 rosette and compression spring, “break-off" screws and back plate
Warranty	Lifetime

40 Series Mortise Cylinders and 34 Series Rim Cylinders

Cylinders and Components

SARGENT®
ASSA ABLOY

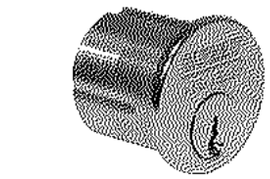
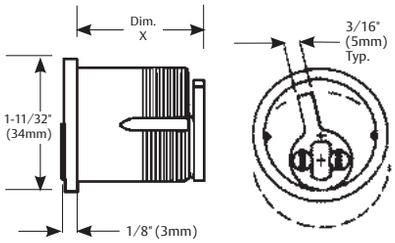
40 Series Mortise Cylinder

- Cylinder: Solid brass, 1-5/32" (29mm) diameter
- Cap: Brass, bronze or stainless steel
- Furnished standard with No. 97 rosette and compression spring
- Optional Collars/Spacers available and ordered separately, refer to product catalogs for additional information
- See Cam Chart on Page 6 for cam required
- 6 pin standard; for 7 pin specify "7 pin", size 42 minimum
- No. 41 cylinder not available in 7 pin
- Mortise cylinder assemblies that are ordered without hardware are supplied with standard SARGENT offset cam 13-0664
- Cylinder finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 15, 20D, 32, 32D
- Plug finishes: 4, 15

	Length under cylinder head									
Cylinder No.	41	42	43	44	46	48	50	52	54	56
Dim. X	1-1/8" (29mm)	1-1/4" (32mm)	1-3/8" (35mm)	1-1/2" (38mm)	1-3/4" (44mm)	2" (51mm)	2-1/4" (57mm)	2-1/2" (64mm)	2-3/4" (70mm)	3" (76mm)





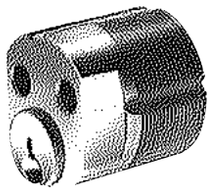
50-40 Series Hotel Type Cylinder

Features same as standard 40 Series cylinders except:

- For use with 7850 or 8250 lock only
- 6 pin only
- Contact factory for compatibility requirements for existing 6 pin systems
- Uses only cam #115 (13-2045)
- Guest and Master keys will only retract the latch bolt but not project or retract the dead bolt
- Emergency keys (catalog # 7268 EMK) retract the latchbolt and deadbolt and can also project the deadbolt
- C Series keyways supplied standard, specify if different keyway is required. On 1 bitted or KD, CA key way will be supplied if not otherwise specified
- Consult Sargent Key records dept. when adding Hotel cylinders to existing key systems for compatibility
- Length under cylinder head (Dim. X)
  50-43 1-3/8" (35mm); 50-44 1-1/2" (38mm)

78-40 Series Exposed Shell Only Cylinders

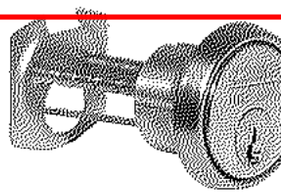
- Cylinder: Solid brass, 1-5/32" (29mm) diameter
- 6 pin standard, for 7 pin specify "7 pin"
- For use with SARGENT mortise locks with Escutcheon Trim (KE 3/4, LE 3/4) only
- See Function Table on Page 6 for cam required
- 78-41 6 pin; single cylinder function only except 50
- 78-42 6 or 7 pin; single cylinder functions only
- 78-43 6 or 7 pin; all functions except 50
- Plug finishes: 4, 15

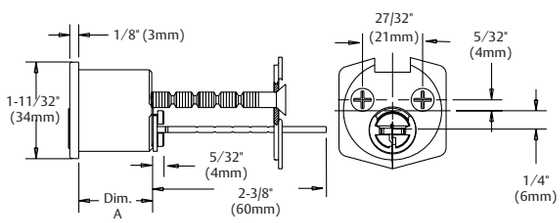


34 Series Rim Type Cylinder

- 27/32" (21mm) screw pattern for through-bolted SARGENT exit devices
- Cylinder: Solid brass
- Cap: Brass, bronze or stainless steel
- Furnished standard with No. 97 rosette and compression spring, "break-off" screws and back plate
- 6 pin standard, for 7 pin specify "7 pin"
- Horizontal tail piece only
- Cylinder finishes: 3, 4, 9, 10, 10B, 10BE, 10BL, 15, 20D, 32, 32D
- Plug finishes: 4, 15

No. of Pins	Door Thickness when used with outside trim	Dim. A (Min.)
6	2-3/8" to 3-1/4" (60mm to 82mm)	1-1/16" (27mm)
7	2-1/2" to 3-1/2" (64mm to 89mm)	1-7/32" (31mm)





All cylinders are standard 6 pin and are supplied with 2 nickel silver change keys unless noted. In cylinders ordered for 5 pin systems, the (6th) last chamber will be empty.

When double cylinder locksets are keyed alike on both sides, 2 change keys are supplied.

For cylinders in competitive keyways, see Page 11.

Cylinders are supplied random keyed unless specified 1 bitted or master keyed. For master keyed orders provide keying details as requested on SARGENT Keyed Order Lead Sheets, located in the price book or contact customer service.

Cylinders BHMA A156.5 Grade 1 listed except hotel functions.

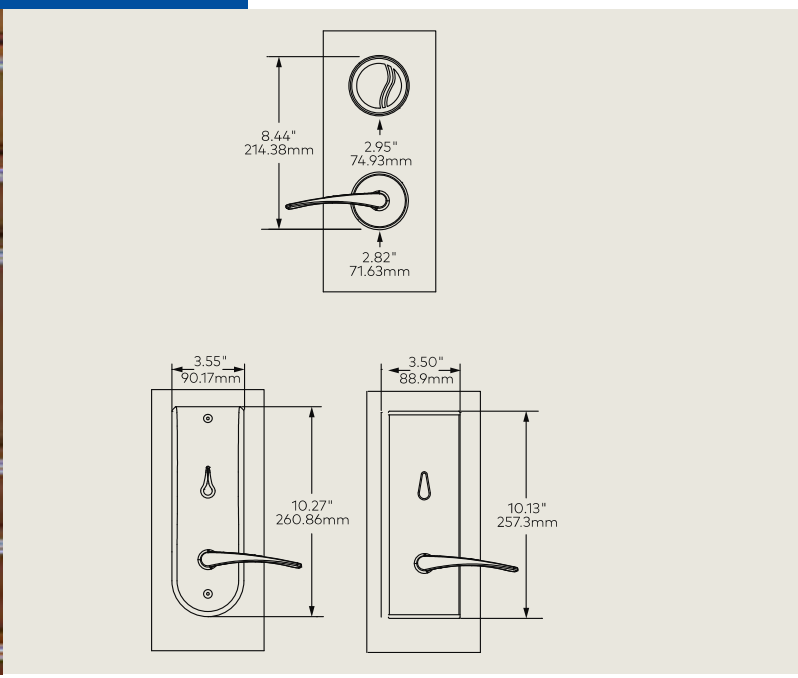
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

Mechanical Features

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Handing	Factory-handed mortise (left, right, left reverse, right reverse)
Lever	ADA Compliant Apogee Arc Continental Elevon Gala Troy
Deadbolt	1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Door Thickness	1¾" (44.5mm) to 2⅛" (53.98mm) for standard product
Weight	Approx. 8.0 lbs with hardware
Housing Construction	Escutcheons: Zinc Levers: Brass, zinc, or stainless steel
Standard Finishes	Bright chrome, bright brass, satin chrome, satin brass, dark mahogany
Inside Trim Options	Optional ädəse or MT inside escutcheon
Standard Backset	2¾" (69.9mm) from door edge to lever
Locking Options	ANSI lock case with 1¼" or 1" lock front mortise Options: automatic deadbolt, door ajar European lock case mortise (20 x 165 mm) with 20 x 233 mm lock front mortise
Online Configurations	Messenger Ready: DAJ mortise (ANSI lock case) Standard (stand alone) inside escutcheon
	Messenger Online: Lock controller board with Messenger capability DAJ mortise (ANSI lock case) Inside escutcheon equipped with Messenger module

Mobile Access Options (Quantum RFID Series)

BLE compatible BLE ready BLE enabled	Standard Lock. Upgradable to BLE by adding BLE connector cable, end cap and BLE module Upgradable to BLE with BLE module End cap with BLE module included, no further upgrades needed

Batteries

Alkaline - Four AA battery pack	Battery life is up to 2 years Low battery indicator: alerts staff that batteries need to be changed soon

Lock Operation

Date/Time Stamp	Real-time; date and hours/minutes
Interrogation	Obtain key usage reports from the lock by using a handheld unit at the door, or increase efficiency by performing a remote Interrogation using Messenger (optional)
Pre-registered Keycards	Keys can be made up to ten days in advance without cancelling current or arriving guests
Keycard Expiration	Configurable expiration dates; can be automatically set for check out date or manually applied when making key during check in process.
Passage Mode	Set by authorized keycard or Messenger system. Can also be configured to perform an automated/pre-defined passage mode time.
Lockout Mode	Set by authorized keycard or Messenger system
Keycards Accepted	Mifare Classic keycards (4 byte NUID)
Feedback	Light indicators in reader
Diagnostics	Light indicators and handheld display
Audit Trail	Up to 4,000 events
Disability Feature	RCU readers interface with automatic power operated doors for special openings
Privacy Override	Emergency keycards

Certifications & Testing

Accessibility Standard	ADA compliant levers (Code of Federal Regulations 28 CFR Part 36 – 1994 "ADA Standards for Accessible Design")
BHMA/ANSI	Certified to be compliant with Grade One performance tests for "ANSI/BHMA A256.13-2012 Standard for Mortise Locks and Latches," and "ANSI/BHMA A256.25-2013 Standard for Electrified Locking Devices." (Only locks tested and approved by non-biased third-party test lab are allowed in the "BHMA Certified Products Directory" found at www.buildershardware.com)
Fire Rating	Listed for pre-prepared manufactured doors and certified for retrofitting on existing doors by Underwriters Laboratories for use on fire doors having up to a three-hour rating. a. U.L. Certification: GWVW.R12071 "Accessories for Single-point Locks and Latches and Fire Exit Hardware." Evaluated in accordance with UL 10B and UL 10C. b. U.L. Listing: GYQS.R11247 "Electrically Controlled Single-point Locks and Latches." Evaluated in accordance with UL 10B and UL 10C. c. Also classified in accordance with Uniform Building Code Standard 7-2, "Fire Test of Door Assemblies" (1997)
Electronics	FCC Part 15 Class A and CE directive 89/336/EEC compliant
Environmental Operating Conditions	Indoor side: 32°F to 151°F (0°C to 66°C) Outdoor side: -31°F to 151°F (-35°C to 66°C) 0% to 85% non-condensing humidity at 86°F (30°C)

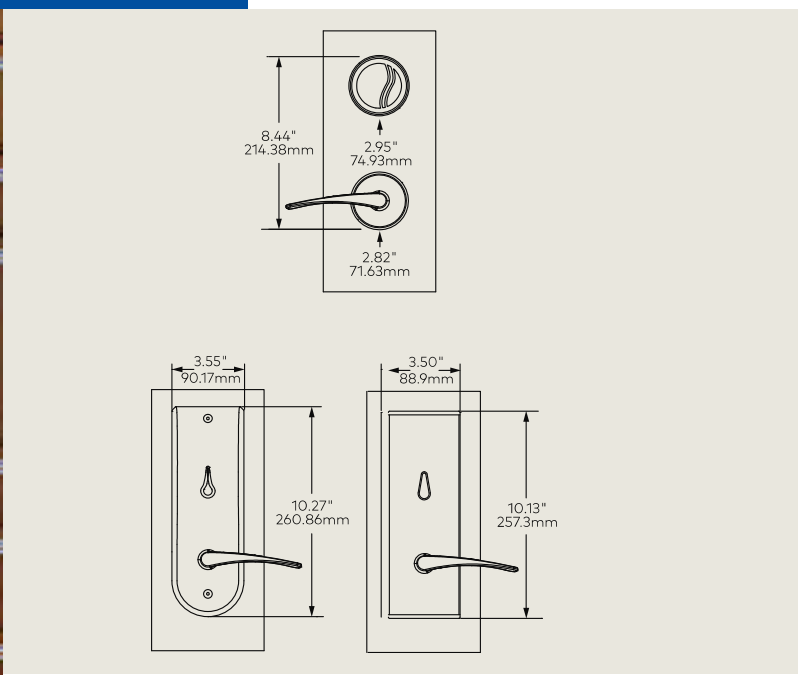
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

DH-016-SA_T29

Mechanical Features

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Handing	Factory-handed mortise (left, right, left reverse, right reverse)

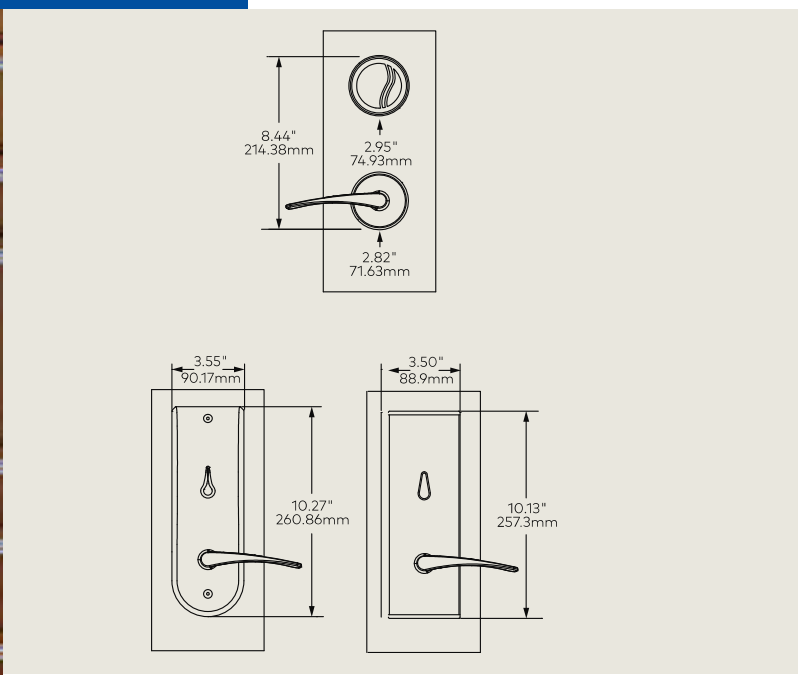
Saflok Quantum™ RFID

dormakaba



Overview
The Saflok Quantum RFID lock offers a unique two-piece modular design with a choice of inside escutcheon look. Synonymous with superior performance, the lock is renowned for access control, life safety and security. The Quantum RFID is easy to use and works with dormakaba Access Management Software.

Mobile Access
The Quantum RFID is Bluetooth Low Energy (BLE) capable and can operate using the dormakaba Mobile Access Solutions.

Applications
- Suitable for small to very large scale hotels
- Easily replaces existing mechanical or electronic door locks throughout a facility
- Access control for guest rooms, common areas as well as back-of-house

Security Features
- High security and tamperproof design
- 1" solid deadbolt (optional auto deadbolt)
- Staff monitoring - Keycard audits
- Tracking mortise for door ajar reporting

Low Maintenance
- Batteries last up to 2 years
- Low battery indicator alerts staff
- Lock programming and audit records are not erased during battery replacement
- Operates with a completely sealed contactless reader

Access control management software
The Quantum RFID lock is supported by dormakaba's robust access management software solution that features an array of access control workflows for both guest and staff access. Optionally, choose dormakaba's online access management solution for superior control and monitoring.

DH-016-SA_T31

Mechanical Features

Description	Electronic mortise lockset with 1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Handing	Factory-handed mortise (left, right, left reverse, right reverse)
Lever	ADA Compliant Apogee Arc Continental Elevon Gala Troy
Deadbolt	1" (25.4mm) throw deadbolt and ⅝" (15.9mm) dead-locking latch bolt
Door Thickness	1¾" (44.5mm) to 2⅛" (53.98mm) for standard product
Weight	Approx. 8.0 lbs with hardware
Housing Construction	Escutcheons: Zinc Levers: Brass, zinc, or stainless steel
Standard Finishes	Bright chrome, bright brass, satin chrome, satin brass, dark mahogany
Inside Trim Options	Optional ädəse or MT inside escutcheon
Standard Backset	2¾" (69.9mm) from door edge to lever
Locking Options	ANSI lock case with 1¼" or 1" lock front mortise Options: automatic deadbolt, door ajar European lock case mortise (20 x 165 mm) with 20 x 233 mm lock front mortise
Online Configurations	Messenger Ready: DAJ mortise (ANSI lock case) Standard (stand alone) inside escutcheon
	Messenger Online: Lock controller board with Messenger capability DAJ mortise (ANSI lock case) Inside escutcheon equipped with Messenger module

Mobile Access Options (Quantum RFID Series)

BLE compatible BLE ready BLE enabled	Standard Lock. Upgradable to BLE by adding BLE connector cable, end cap and BLE module Upgradable to BLE with BLE module End cap with BLE module included, no further upgrades needed

Batteries

Alkaline - Four AA battery pack	Battery life is up to 2 years Low battery indicator: alerts staff that batteries need to be changed soon

Lock Operation

Date/Time Stamp	Real-time; date and hours/minutes
Interrogation	Obtain key usage reports from the lock by using a handheld unit at the door, or increase efficiency by performing a remote Interrogation using Messenger (optional)
Pre-registered Keycards	Keys can be made up to ten days in advance without cancelling current or arriving guests
Keycard Expiration	Configurable expiration dates; can be automatically set for check out date or manually applied when making key during check in process.
Passage Mode	Set by authorized keycard or Messenger system. Can also be configured to perform an automated/pre-defined passage mode time.
Lockout Mode	Set by authorized keycard or Messenger system
Keycards Accepted	Mifare Classic keycards (4 byte NUID)
Feedback	Light indicators in reader
Diagnostics	Light indicators and handheld display
Audit Trail	Up to 4,000 events
Disability Feature	RCU readers interface with automatic power operated doors for special openings
Privacy Override	Emergency keycards

Certifications & Testing

Accessibility Standard	ADA compliant levers (Code of Federal Regulations 28 CFR Part 36 – 1994 "ADA Standards for Accessible Design")
BHMA/ANSI	Certified to be compliant with Grade One performance tests for "ANSI/BHMA A256.13-2012 Standard for Mortise Locks and Latches," and "ANSI/BHMA A256.25-2013 Standard for Electrified Locking Devices." (Only locks tested and approved by non-biased third-party test lab are allowed in the "BHMA Certified Products Directory" found at www.buildershardware.com)
Fire Rating	Listed for pre-prepared manufactured doors and certified for retrofitting on existing doors by Underwriters Laboratories for use on fire doors having up to a three-hour rating. a. U.L. Certification: GWVW.R12071 "Accessories for Single-point Locks and Latches and Fire Exit Hardware." Evaluated in accordance with UL 10B and UL 10C. b. U.L. Listing: GYQS.R11247 "Electrically Controlled Single-point Locks and Latches." Evaluated in accordance with UL 10B and UL 10C. c. Also classified in accordance with Uniform Building Code Standard 7-2, "Fire Test of Door Assemblies" (1997)
Electronics	FCC Part 15 Class A and CE directive 89/336/EEC compliant
Environmental Operating Conditions	Indoor side: 32°F to 151°F (0°C to 66°C) Outdoor side: -31°F to 151°F (-35°C to 66°C) 0% to 85% non-condensing humidity at 86°F (30°C)

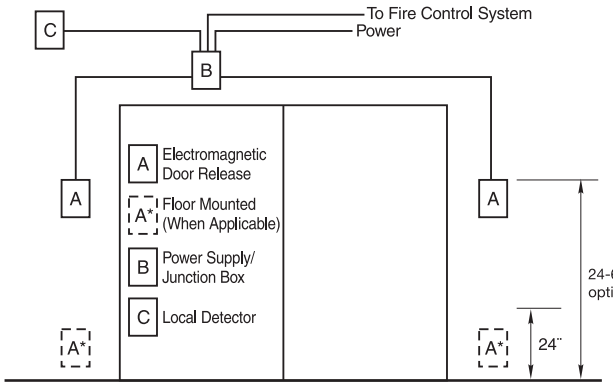
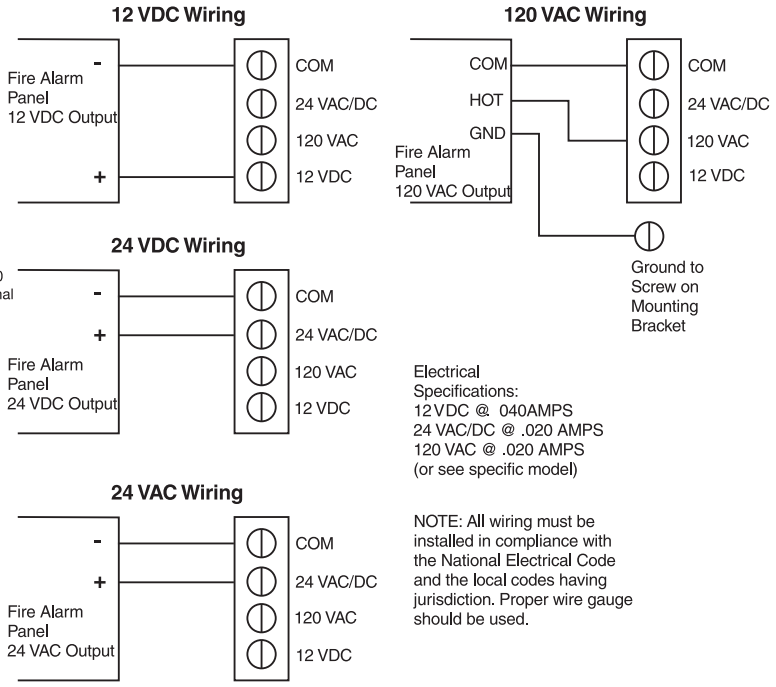
Schematics





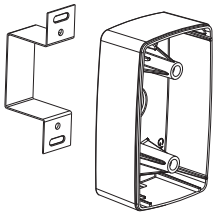
Electrical Specifications:
12 VDC @ 040AMPS
24 VAC/DC @ .020 AMPS
120 VAC @ .020 AMPS
(or see specific model)

NOTE: All wiring must be installed in compliance with the National Electrical Code and the local codes having jurisdiction. Proper wire gauge should be used.

Operation Narrative

Doors are to be normally held open. The electromagnetic door releases will be energized with the voltage shown (at right) in the hardware set for this opening. Power shall be controlled by the fire control system. It will interrupt the power if alarmed, causing the doors to be released, thus allowing the door closers to close the doors. When power is restored the magnets will re-energize, permitting the doors to be manually returned to their held open position.

Accessories



1-1/2" (38mm) Extension (for use only with Models 997M, 998M & 994M) Mounts behind wall cover.

XK996M
Part# 996631M-*

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Exit Device
Item Type	Panic Exit Device
Description	Rim panic exit device, with surface vertical rods, with outside lever trim
Manufacturer	Von Duprin (Allegion)
Model	99L -BE-F X 17 Lever
Dimensions	8" x 2 3/4" x2 3/8"
Finish	US26D
Material Composition	Steel
CSI #	08 71 00 - Door Hardware
Omniclass #	22-08 71 00 - Door Hardware
Grade	ANSI/BHMA Grade 1
Classification	Fire exit device
Fire/Smoke Rating	Up to 3 hours
Operation	Manual, no dogging
Best Practices	Recycled content
Quality Standards	ANSI/BHMA
Accessibility Compliance	ADA and ANSI A117.1
Accessories	Provide #299 Top Strike, #304L Bottom Strike, Top and Bottom Latches
Warranty	10 years

ALLEGION™

VON DUPRIN®

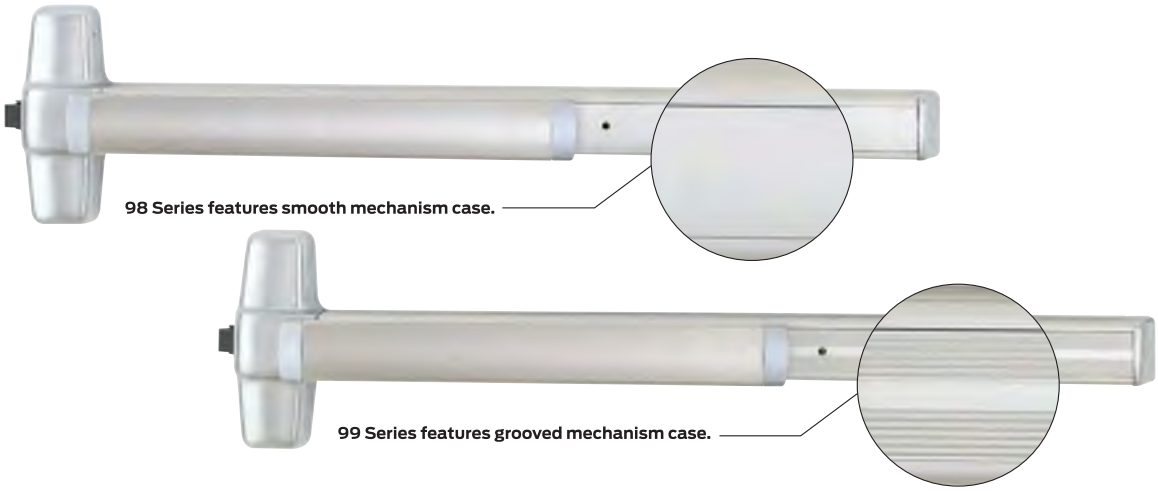
98/99™ Series

Exit devices

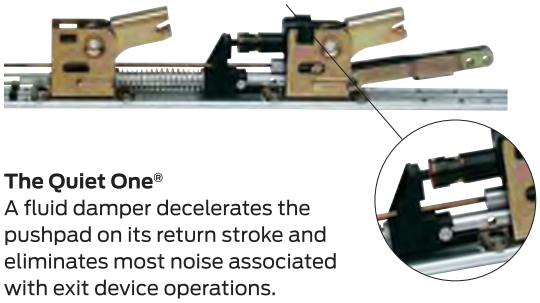
Introduction

Exit devices are a critical part of the fire and life safety egress system and will provide safe and reliable service when properly applied and maintained. Von Duprin designs and manufactures exit devices in accordance to ISO 9001 Quality Management System and meets or exceeds accepted U.S. domestic and International standards. All 98 and 99 Series exit devices are UL listed for panic hardware or fire hardware, and are certified to ANSI A156.3, 2008, Grade 1. Many models are also certified for Hurricane Resistant Applications. Consult your local Security & Safety consultant (SSC) or the Von Duprin factory for current listings.

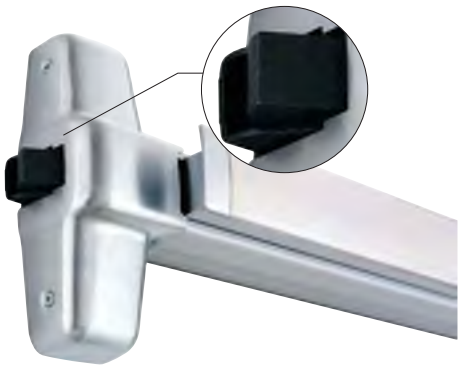
It is intended that the information included in this publication, when properly used, will provide clear and reliable guidelines to the proper general selection and application. However, the scope of the information is necessarily limited.



Von Duprin exit devices are available in two external surface styles, designated 98 and 99 Series.



The Quiet One®
A fluid damper decelerates the pushpad on its return stroke and eliminates most noise associated with exit device operations. Furnished on all 98/99™ Series exit devices.



Latch bolt
Deadlocking latchbolt provides security and improved performance at standard device cost.

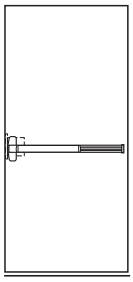
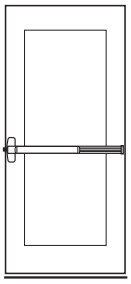
Popular double door applications

Single door applications

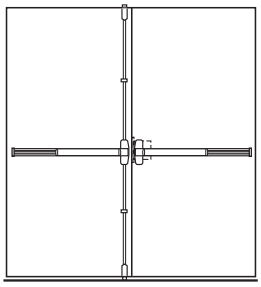


Single mortise lock device

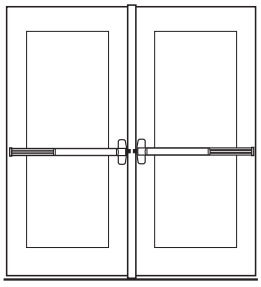


Single rim device

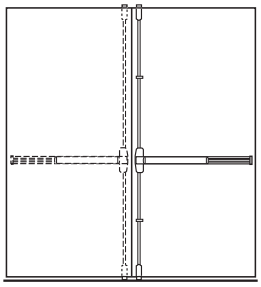
Double door applications



Mortise lock and surface mounted or concealed vertical cable/rod device combination—same direction

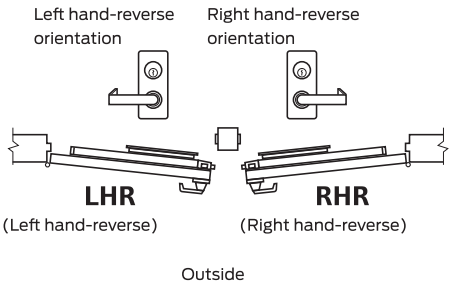


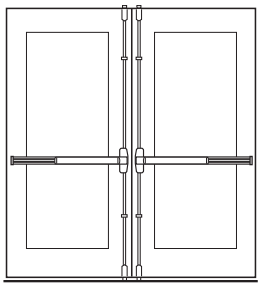
Two rim devices with mullion—same direction



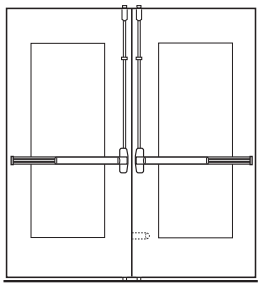
Two vertical rods—double egress

Door handing

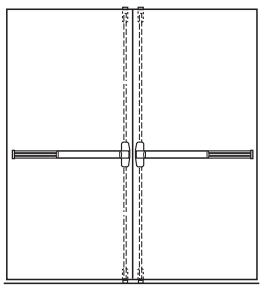




Two surface mounted vertical rod devices—same direction (do not use with overlapping astragal)



Two fire exit hardware vertical cables/rods with auxilary fire latch-LBR option

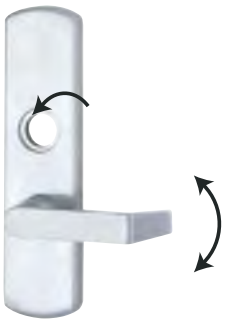


Two concealed vertical cables/rods

Outside trim operation

Trim operation lever or knob

Standard

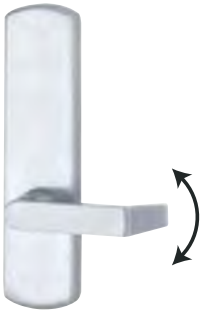


Key locks and unlocks lever or knob. e.g., 996L (Classroom)

Night latch

Key retracts latch bolt. Lever or knob is rigid. Use NL suffix, e.g. 996LNL. (Storeroom)

Blank escutcheon



Lever or knob always active. Use BE suffix, e.g., 996L-BE. (Passage)

Dummy

Lever or knob rigid for pull operation. Use DT suffix, e.g., 996L-DT.

996L Breakaway™ lever

The 996L Breakaway trim has become the standard lever trim offering on the 98L/99L Series devices. The Breakaway design is especially effective in areas where vandalism to door hardware is a problem. The design intent is to discourage costly repairs from becoming necessary. The Breakaway feature is not available on the NL (night-latch) or DT (dummy trim) versions.

374T/376T Series thumbturn control

Standard operation, key locks and unlocks thumbturn. Optional operation, key unlocks thumbturn, re-locks when key is removed. This operation is created by changing the cylinder plate included with control. Use 1 1/4" mortise cylinder with a straight cam. Schlage cam reference L583-475. Use with a pull trim (990DT pictured).

98-F/99-F Rim exit device

The 299F Strike ships standard, optional strikes available

499F Strike with 9854/9954 mullion

98-F and 99-F Rim fire exit devices for all types of single doors up to 4' x 10' (1219mm x 3048mm) or 8' x 10' (2438mm x 3048mm) double doors with 9954 or 9854 mullion, UL listed for fire exit hardware. See page 76 for detailed information on UL listed fire exit hardware label and door opening size information. Devices are ANSI A156.3 – 2014 Grade 1. The 98-F device has a smooth mechanism case and the 99-F device has a grooved case. The rim device is non-handed except when the following device options are used: -2 (double cylinder) or SS (signal switch). See opposite page for available outside trim and device functions.

Finishes – US3, US3A, US4, US4A, US10, US26, US26D, US26D-AM Antimicrobial, US28, 313, 315 & 643E. US15 and US32D available with 98 Series only.

Specifications

Device functions	Device ships EO/DT/NL. Field selectable. For TP, K or L remove NL drive screw from device.
Device lengths	3' 2'4" to 3' (711mm to 914 mm) Door size 4' 2'10" to 4' (864 mm to 1219 mm) Door size
Device centerline from finished floor	39 13/16" (1011 mm) 39 11/16" (1008 mm) with mullion
Center case dimensions	8" x 2 3/4" x2 3/8" (203mm x 70mm x 60mm)
Mechanism case dimensions	2 1/4" x 2 1/4" (57mm x 57mm)
Projection	Pushbar neutral – 3 13/16" (97 mm) Pushbar depressed – 3 1/16" (78 mm)
Latch bolt	Deadlocking, 3/4" (19mm) throw
Fasteners & sex bolts (SNB)	Includes screw pack for 1 3/4" (44mm) and 2 1/4" (57mm) thick metal or wood doors. Optional 425 SNB available for metal doors. 425 & 825 SNB required on wood doors without SLM blocking. See page 11 for quantities.
Electric options	**LX** Latchbolt monitor switch **RX** Pushpad monitor switch **RX2** Double pushpad monitor switch **E** Electric locking & unlocking trim **EL** Electric latch retraction **QEL** Quiet electric latch retraction **SS** Signal switch **CX** Chexit delayed exit **ALK** Alarm exit kit **WP-RX** Waterproof request to exit **CON** Allegion Connect
Mechanical options	**-2** Double cylinder **AX** Accessible device **GBK** Glass bead kit **PN** Pneumatic latch retraction **XP** Extra protection **SNB** Sex bolts **SEC** Security screws **SLM** Special Laminate Material Blocking
Dogging option	No mechanical dogging. EL and QEL option available
Strikes	**299F** – Dull black, 499F with mullions

XP
Extra protection
- 90° latch-to-strike contact
- Force resistance of 2,000+ lbs.

RX
Pushpad monitor switch
- Signals use of an opening
- SPDT switch to monitor pushpad

EL
Electric latch retraction
- Enables remote unlatching
- Alternative to manual dogging

ALK
Alarm exit kit
- Unauthorized opening triggers 85-decibel horn
- Set in armed or disarmed mode by key

QEL
Quiet electric latch retraction
- Bolt retraction via switch
- Converts exit door to push-pull operation

CX
Chexit delayed exit
- Meets NFPA 101 requirements
- Self-contained controls, locking, alarm

AX
Accessible device
- UL certified to meet new 5 lb. maximum operating force requirement
- Exceeds ANSI/BHMA requirements

SG
Safety glow
- Shows exit door location in darkness or smoke
- Developed to meet MEA standards

PN
Pneumatic latch retraction
- For areas where electrical devices banned
- Special linkage for mechanical or pneumatic dogging

CON
Allegion Connectors
- Common connectors to connect various door hardware all the way to the power supply

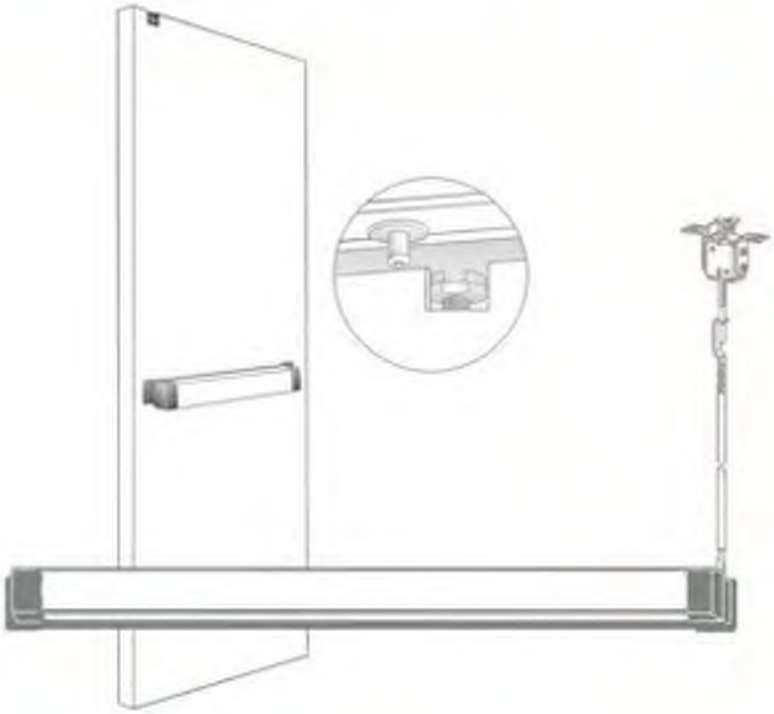
METAL DOOR OPERATIONAL HARDWARE

THE RITE DOOR

D3676 SERIES

INSET EXIT DEVICE HARDWARE



FEATURES

- Patented top latching mechanism interlocks door to frame
- Strong, durable construction for a high level of security
- Adjustable steel rods protected in contoured covers
- Easy to install
- Clean, unobtrusive design
- Pushbar clad or anodized, not plated, in a variety of finishes

SPECIFICATIONS

D3676 Series Certifications:

- UL Panic-Fire Exit Hardware, 3-Hour Fire Label
- California State Fire Marshall
- New York City MEA*
- Warnock/Hersey Listing

D8576 Series Certifications:

- UL 305 Panic Hardware
- ANSI/BHMA A156.3 Grade 1
- California State Fire Marshall
- New York City MEA*

**Consult Factory for specific number*

Materials

- Pushbar made of extruded aluminum, clad or anodized in a variety of finishes.

Handing

- Specify Handing.

Pushbar Length

- Standard sizes: dimensioned for 24", 30", 36", and 48" openings.

Door Height

- Standard unit adjustable for doors up to 8' 0". For doors over 8' 0" above bar height, up to 10 ft use D3655-02 Tall Door Kit.

Door Thickness

- 1-3/4" only.

Projection

- 5/8" from door face when fully projected.

Dogging

- Standard dogging with hex key or optional cylinder dogging for D8576 Series only.
- Electric dogging also available for D3676 and D8576 Series.

D3080 Entry Trim

- See Trim Section.

INSET EXIT DEVICE HARDWARE

OPTIONS AND ACCESSORIES

Silent Electrification Motorized Latch Retraction – SE

- The SE Motorized Latch Retraction option provides near-silent operation for quiet environments such as hospitals, offices, hotels, and libraries where solenoid-driven devices would be disruptive.

Electric Latch Retraction – LR

- The LR option uses a solenoid mounted in the pushbar for instantaneous unlocking and locking of the exit device from a remote location or access control device. LR option is not available on rim type exit devices (see EL option).

Request to Exit (REX) – Monitor / Signal Switch – M1 M2

- Mounted in the exit device pushbar on the hinge end, the switch can be used to activate signal light, horn, monitor, or other devices.

Cylinder Dogging

- For management control of dogging exit devices for life-safety exit devices only. Nonrated doors, standard.

Electric Dogging – ED

- A holding magnet keeps the pushbar depressed (set manually) and the latch retracted for lower profile exit devices, resulting in less damage and quieter operation.

Matching End Caps – MEC

- Matching end caps are available for applications where it is preferable that the end caps match the finish of the exit device. Available for US finishes only.

Available Finishes

- 13E Dark Oxidized Satin Bronze – Powdercoat
- 313 Dark Bronze Anodized
- 335 Black Anodized

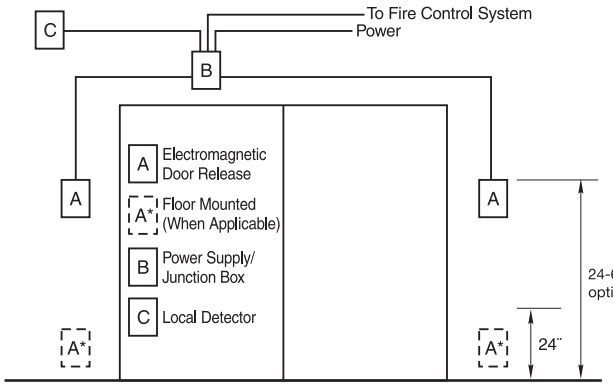
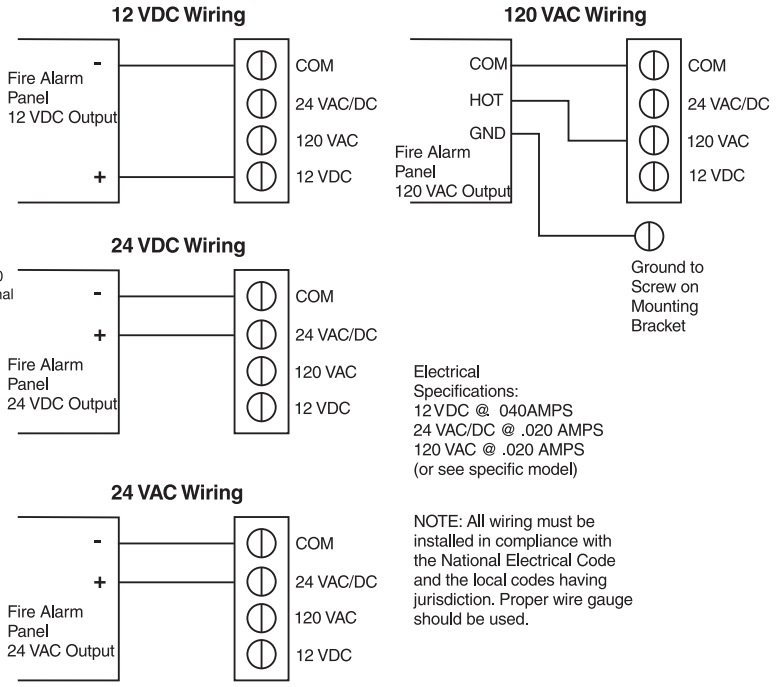
Schematics





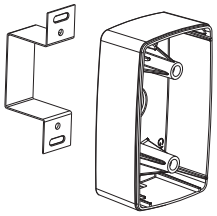
Electrical Specifications:
12 VDC @ 040AMPS
24 VAC/DC @ .020 AMPS
120 VAC @ .020 AMPS
(or see specific model)

NOTE: All wiring must be installed in compliance with the National Electrical Code and the local codes having jurisdiction. Proper wire gauge should be used.

Operation Narrative

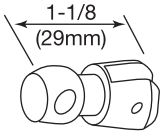
Doors are to be normally held open. The electromagnetic door releases will be energized with the voltage shown (at right) in the hardware set for this opening. Power shall be controlled by the fire control system. It will interrupt the power if alarmed, causing the doors to be released, thus allowing the door closers to close the doors. When power is restored the magnets will re-energize, permitting the doors to be manually returned to their held open position.

Accessories

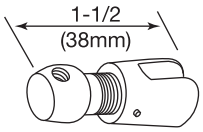


1-1/2" (38mm) Extension (for use only with Models 997M, 998M & 994M) Mounts behind wall cover.

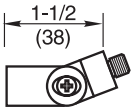
XK996M
Part# 996631M-*



994M Swivel Armature (cannot be used with extension spacers)
Part# 900-3

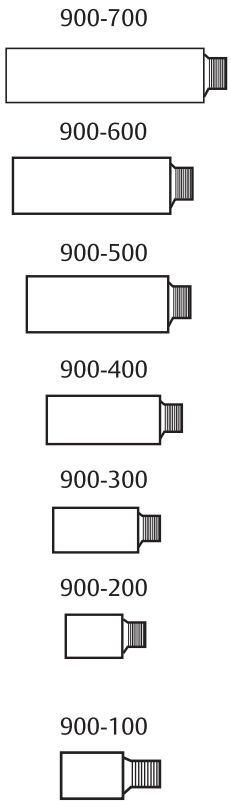


Base Unit Armature Extension Mounts between armature and contact plate.
Part# 900
Cannot be used with model 994M



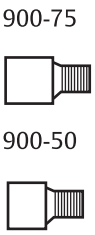
Armature Extension 90° Bend
Part# 900-Z
Must be used with 900 base unit. Those two pieces will extend armature 3" longer than the contact plate.

*specify finish



For dimensions, see chart below

Spacer lengths – must be used with 900 base



Extension pieces must be used in conjunction with 900 Base Unit

Part# 900-700 = 7"
Part #900-600 = 6"
Part# 900-500 = 5"
Part# 900-400 = 4"
Part# 900-300 = 3"
Part# 900-200 = 2"
Part# 900-100 = 1"
Part# 900-75 = 3/4"
Part# 900-50 = 1/2"

Specifications

For Doors	1-3/4" (44mm) thick door adjusts to 2" (51mm) standard 1-3/8" (35mm) thick door, 1- Option for Adapter plates
Backsets	2-3/4" (70mm) backset w/ 1-1/8" front (standard) 2-3/8" (60mm) backset w/ 1" wide front (specify 20-) 3-3/4" (95mm) backset w/ 1-1/8" front (specify 23-) 5" (127mm) backset w/ 1-1/8" Front (specify 25-)
Cylindrical Housing	Steel, zinc dichromate finish
Front	Wrought brass, bronze and stainless steel 2-1/4" (57mm) x 1-1/8" (29mm) Fixed Bevel 2-1/4" (57mm) x 1" (25mm) (included with 20-)
Strike	Wrought brass, bronze and stainless steel 800 curved lip strike — standard 808 curved lip ANSI strike (28- option) Wrought box strike available (WBS- option)
Hand	All 10 Line Locks are non-handed except for the G & Y Levers
Roses	Heavy wrought brass and bronze
Latch	Stainless steel 1/2" (13mm) throw Brass 3/4" (19mm) throw for pairs of doors (41- option)
Cylinder	Brass, 6 pin, LA keyway standard
Keys	Two, nickel silver
Masterkeying	Can be master keyed or grand master keyed Construction key systems available
Finishes	03, 04, 09, 10, 10B, 10BE, 10BL, 14, 15, 20D, 26, 26D, BSP, WSP
Options	For detailed information see “Options”
Door Prep	ANSI/BHMA A156.115
Minimum Stile	4-1/2" (114mm)

Certification Compliance

ANSI/BHMA	Certified ANSI A156.2 Series 4000 — Grade 1
UL	UL listed to U.S.A. and Canadian safety standards Listed for 3 hour doors (double doors require 41- option)
Positive Pressure	Meets ANSI/UL 10C, Positive Pressure Fire Test of Door Assemblies
ADA	All levers conform to ADA requirement for barrier-free accessibility
California Code	Levers (L, J & P) conform to California Administrative Code Title 19 and 24
Hurricane Code	All individual components of a total door opening are required to comply with each code. Refer to the SARGENT Website (www.sargentlock.com) for specific code compliance listings for both the lock hardware and other door components.

Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

MicroShield™

MicroShield®

As part of their promise to provide innovative solutions to their customers, certain ASSA ABLOY Group brands offer the MicroShield® technology, a silver-based antimicrobial coating designed to inhibit the growth of bacteria.
MicroShield® is a registered trademark of Yale Security Inc., an ASSA ABLOY Group company.

MicroShield® Coating

- Revolutionary finish coating available on all SARGENT product lines, utilizes a silver-based antimicrobial compound from Agion Technologies
- As an integral part of the finish coating, MicroShield lasts for the life of the hardware
- MicroShield coating permanently suppresses the growth of bacteria, algae, fungus, mold and mildew. It is effective against a broad spectrum of bacteria.
- Non-toxic and completely safe. The Agion antimicrobial compound is EPA and NSF approved and FDA listed for use in medical and food preparation equipment.
- Applications: Anywhere there is need for a clean environment (hospitals, laboratories, schools, medical centers, daycare, food processing etc.)

Windstorm Certifications

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Windstorm Certifications: Florida Building Codes & UL Listings

SARGENT Manufacturing's products meet building codes that require hurricane, windstorm and FEMA certifications, including some of the most stringent building codes as specified in the Florida Building Code, Miami Dade Code and the International Building Code. Listed below are certifications and standards met by the 10 Line lock.

Florida Building Code: FL2998
UL Certification Directory: ZHEM.R21744 – Latching Hardware

ANSI/SDI-BHMA A250.13	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies"
ANSI/ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
(TAS) 201	"Impact Test Procedures"*
(TAS) 202	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
(TAS) 203	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* Published in the "Florida Building Code"

UL Certification Directory: ZHLL.R21744 – Products for Use in Windstorm-rated Assemblies

Certifications to meet assembly requirements are done in conjunction with doors from ASSA ABLOY Group companies CECO DOOR and CURRIES.

ASTM E330	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"
AAMA/WDMA/CSA 101/I.S.2/A440	"Standard/Specification for Windows, Doors, and Unit Skylights"
FEMA Publication 320	"Taking Shelter From the Storm: Building a Safe Room for Your Home or Small Business", investigated with respect to impact and pressure requirements only.
FEMA Publication 361	"Design and Construction Guidance for Community Safe Rooms", investigated with respect to impact and pressure requirements only.
ICC 500	"ICC/NSSA Standard for the Design and Construction of Storm Shelters", investigated with respect to impact and pressure testing. Minimum missile impact speeds vary with the design wind speed desired for a particular product. The information below correlates design wind speed to the minimum missile speeds as discussed in Table 305.1.1 of ICC 500.

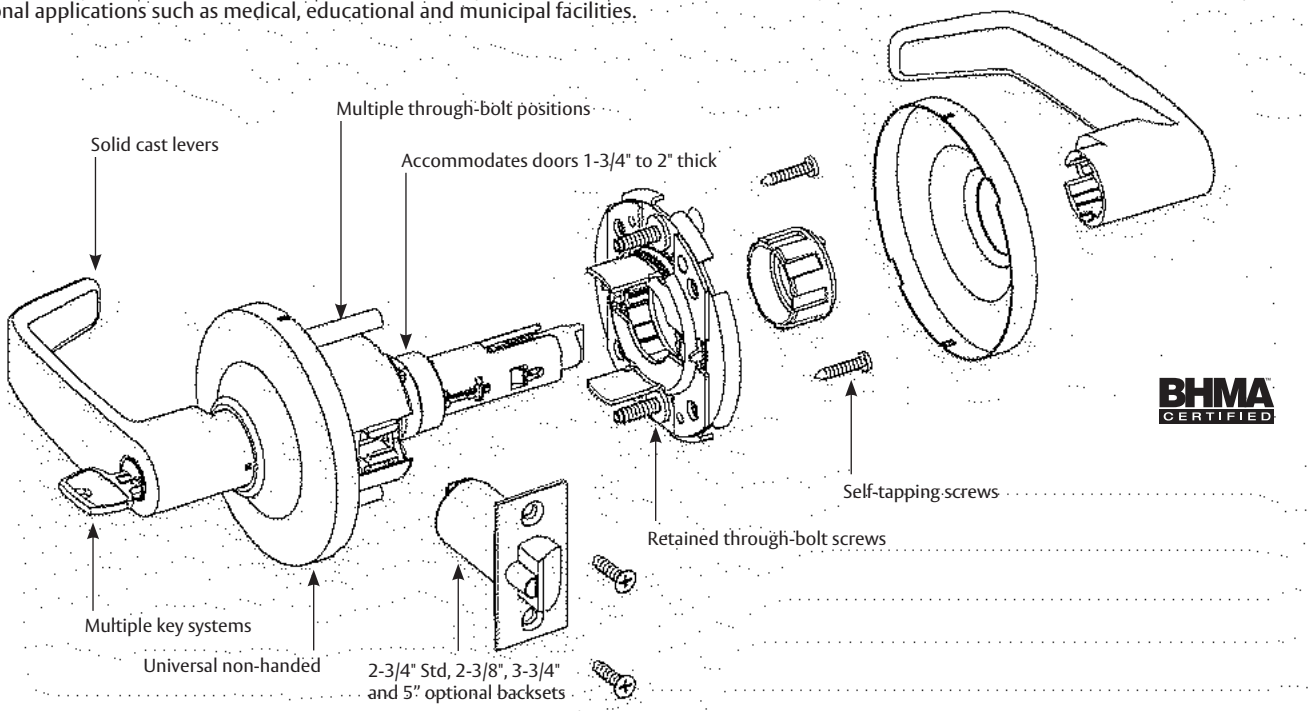
Features & Benefits

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Features & Benefits

A heavy duty cylindrical key-in-lever lock designed to exceed the requirements of ANSI 156.2 Series 4000 Grade 1. The 10 Line is the standard for institutional applications such as medical, educational and municipal facilities.



Strength, Durability and Security

- Cycle Test: Exceeds 9 times ANSI/BHMA A156.2 Grade 1 requirements
- Abusive Locked Lever Torque- without entry gained: Exceeds 1.5 times ANSI/BHMA A156.2 Grade 1 requirements
- **7 YEAR LIMITED WARRANTY** – no service required to maintain warranty

Convenience

- Installs in 1 minute or less
- Quickly adapts to fit multiple through-bolt positions
- User friendly packaging
- User friendly instruction sheets
- Convenient installation diagram on box

Design

- Solid feel and precise lever action
- Slim rose design available
- Decorative Levers — Coastal Series designs – Gulfport and Yarmouth
- Levers are solid one piece cast construction, except "J" lever

Flexibility

- Fits a variety of door preparations with adaptable through-bolt positioning
- Accommodates retrofit applications with optional 2-3/8", 3-3/4" and 5" backset latches
- 6 ADA lever styles to complement a wide array of design applications
- Levers (B, L, J & P) are non-handed for efficient warehousing and for ease of installation
- 11 Architectural grade finishes
- 21 Functions
- SARGENT uses engineered solutions and flexible manufacturing processes to accommodate special applications

Security

- Torx® and spanner screws optional
- Classroom security and multiple locking functions available
- Vandal resistant trim optional (FW- option)
- Security key systems available (Signature, Keso, BR-XC, XC)

Applications

- Designed to conform to national & state fire and handicapped requirements
- Grade 1 Lock
- Heavy duty commercial and institutional interior and exterior doors
- Offices
- Schools/Universities
- Hospitals
- Manufacturing facilities

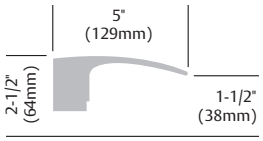
Lever & Rose Designs

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

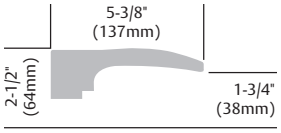
B Lever Design

- Lever: B–Solid Cast



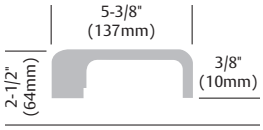
Y Lever Design - Coastal Design - Yarmouth

- Lever: Y–Solid Cast
- Handed



J Lever Design

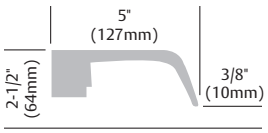
- Lever: J–Wrought



J lever – not available with Freewheeling or Interchangeable Core

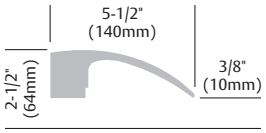
L Lever Design

- Lever: L–Solid Cast



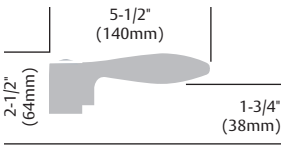
P Lever Design

- Lever: P–Solid Cast



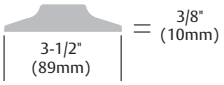
G Lever Design - Coastal Design - Gulfport

- Lever: G–Solid Cast
- Handed



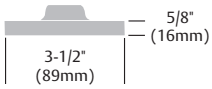
G Rose Design

- Rose G - Heavy Wrought



L Rose Design

- Rose L - Heavy Wrought



NOTE: Any rose or lever on this page can be combined to suit individual taste.

NOTE: All lever height measurements represent total distance from door face.

Functions

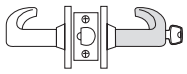
10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Single Cylinder Functions

04 Storeroom or Closet

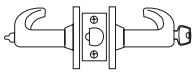
10G04



- Deadlocking latch
- Latch by lever inside or key outside
- Outside lever rigid at all times
- **ANSI/BHMA F86**

05 Entrance or Office

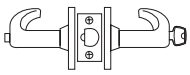
10G05



- Deadlocking latch
- Latch by either lever unless outside lever is locked by push/turn button in inside lever
- Push button released by key outside or lever inside
- Turn button must be released manually
- Key retracts latch when outside lever is locked
- **ANSI/BHMA F109**

24 Entrance or Office

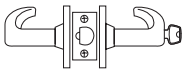
10G24



- Deadlocking latch
- Latch by either lever unless outside lever is locked by push button in inside lever
- Push button released by key or turning inside lever
- Closing door does not unlock outside lever or release button
- Key in outside lever retracts latch when outside lever is locked and releases inside push button
- **ANSI/BHMA F82A**

37 Classroom

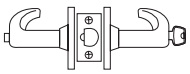
10G37



- Deadlocking latch
- Latch by either lever unless outside lever is locked by key
- Key in outside lever locks or unlocks outside lever and retracts latch
- Inside lever always operative
- **ANSI/BHMA F84**

44 Service Station

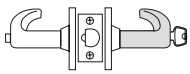
10G44



- Deadlocking latch
- Latch by either lever unless outside lever is locked by push button in inside lever
- Key retracts latch when outside lever is locked
- Push button released by turning inside lever, closing door, or by key in outside lever unless push button is fixed in locked position by turning coin slot in inside lever
- Slotted inside button must be manually released
- **ANSI/BHMA F92**

50 Hotel, Dormitory or Apartment

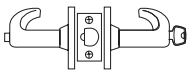
10G50



- Deadlocking latch
- Latch by key outside and lever inside
- Outside lever always rigid
- Depressing push button when door is closed shuts out all keys except emergency key and projects visual occupancy indicator in cylinder face
- Push button released by turning inside lever automatically reactivating all keys and retracting visual occupancy indicator
- Lock out key fixes push button in locked position, shutting out all keys except emergency
- Push button fixed by lockout key must be released manually
- Lock out key provided
- See option page for restrictions to 50 function
- Emergency key ordered separately. Part # 6267EMK
- **ANSI/BHMA F93**

54 Corridor, Dormitory

10G54



- Deadlocking latch
- Latch by either lever unless outside lever is locked by push button inside or key outside
- Rotating inside lever or closing door releases inside button only, but does not unlock the outside lever if locked by key
- Key outside locks or unlocks outside lever and also retracts latchbolt when locked
- **ANSI/BHMA F90**

Freewheeling Locked Lever Option

- Available on all locking functions except 10G70 and 10G71
- Provides protection from vandalism and added security
- Stops in the rose prevent the lever from traveling beyond 60° in either direction
- Not available in "J" Lever Design and some options

Shaded lever indicates it is rigid at all times.

Functions

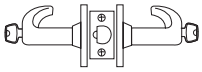
10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Double Cylinder Functions

16 Classroom Security, Apartment, Exit, Privacy

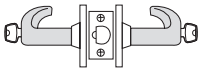
10G16



- Deadlocking latch
- Latch by either lever unless outside lever is locked by key in inside lever
- Key in outside lever retracts latch when outside lever is locked
- Inside lever always operative
- **ANSI/BHMA F88**

17 Utility, Asylum or Institutional

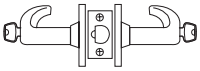
10G17



- Deadlocking latch
- Both levers rigid at all times
- Latch by key either side
- Use only on rooms with more than one exit
- **ANSI/BHMA F87**

26 Store or Storeroom

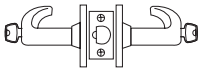
10G26



- Deadlocking latch
- Latch by either lever
- Key in either lever locks or unlocks both levers
- **ANSI/BHMA F91**

30 Communicating

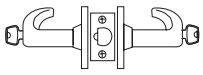
10G30



- Deadlocking latch
- Latch by either lever
- Key in either lever locks or unlocks its own lever only
- Use only on rooms with more than one exit
- **ANSI/BHMA F80**

38 Classroom Security Intruder

10G38

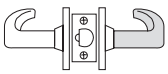


- Deadlocking latch
- Latch by either lever unless outside lever is locked by key
- Key in either lever locks or unlocks outside lever
- Inside lever always operable
- Locked indication on inside rose standard with this function
- **ANSI/BHMA F110**

Non-Cylinder Functions

13 Exit

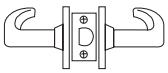
10G13



- Deadlocking latch
- Latch by inside lever
- Outside lever rigid at all times
- **ANSI/BHMA F89**

15 Passage

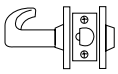
10U15



- Latch by either lever
- **ANSI/BHMA F75**

15-3 Exit or Communicating

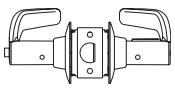
10G15-3



- Deadlocking latch
- Blank rose outside
- Latch by lever inside
- Minimum clearance of 1-1/8" on single doors and 2-1/4" between double doors

65 Privacy/Bathroom

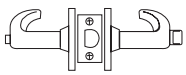
10U65



- Latch by either lever unless outside lever is locked by push button in inside lever
- Turning inside lever or closing door releases button
- Emergency button in outside lever unlocks, with use of a blade screwdriver in outside lever and releases inside button
- **ANSI/BHMA F76A**

68 Hospital Privacy

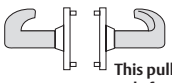
10U68



- Latch by either lever unless outside lever is locked by push button in inside lever
- Turning inside lever or closing door releases button
- Rotating thumbturn in outside lever unlocks the outside lever and releases the inside button
- Not available in the "J" lever design

93 Single & 94 Double Lever Pulls

10U93/10U94

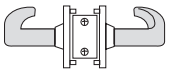


This pull only for 93

- For wood or custom hollow metal doors
- Lever and rose both sides joined by two through-bolts
- Requires special door preparation — see template

94-2 Double Lever Pull

10U94-2



- For wood or custom hollow metal doors
- Lever and rose both sides joined by two through-bolts
- Dummy latch plate
- Uses standard door prep template

Shaded lever indicates it is rigid at all times.

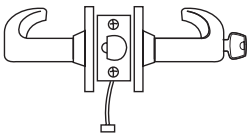
Electromechanical Functions & Accessories

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

70 Electromechanical (Fail Safe)
71 Electromechanical (Fail Secure)

10G70



- 10G70: Power off, unlocks outside lever
- 10G71: Power off, locks outside lever
- Deadlocking latch
- Key retracts latch
- Inside lever always allows egress
- Voltage requirements: 12VDC or 24VDC Regulated; always specify voltage
- 250mA at 24VDC or 500mA at 12VDC
- Provided with ElectroLynx® 8-Pin Connector

RX- Monitoring of Inside Lever

- Patent Pending design
- Non-Contact Switch
- Bidirectional lever rotation
- Non-handed design
- Internal switch offers N/O & N/C
- Modular wire harness with ElectroLynx® 8-pin connector
- Available functions: 04, 05, 15, 37, 70 & 71

Requirements for Electrical and Data Transfer

To answer the demand for "smart" electronic access control and locking solutions that require fast, easy, and cost-effective installation, ASSA ABLOY Group brands use the ElectroLynx® standardized plug-in connectors and color-coded wiring system.

With ElectroLynx, doorway components come pre-wired for easy hookup to the power source. Key to the system is the transfer device hinge that carries power from the frame to the locking hardware.

Features of ElectroLynx®:

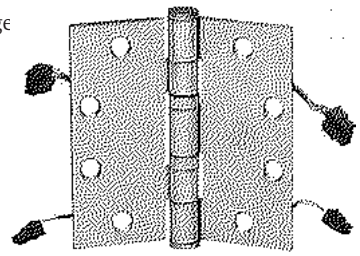
- Makes it easy to bring power to the locking hardware
- Wires have connectors that snap together, like plugging a telephone into a jack

To connect 10 Line Electrified Lock to the electronic access control system, the following items are required:

- 10 Line Electrified Lock
- ASSA ABLOY Door Group pre-wired door, or ElectroLynx® retrofit cable (order from McKINNEY)
- Electronic transfer device (ElectroLynx® electronic transfer hinge or Electrical Power Transfer with standard hinge, from McKINNEY)
- ElectroLynx® cable from the hinge to above the ceiling (order from McKINNEY)

Information regarding cable selection, hinge requirements and order strings can be found in the McKINNEY Transfer Device Solutions catalog. Consult 800-810-WIRE (9473) with questions on application specifications and requirements.

McKINNEY QC8 ElectroLynx® hinge are recommended for Electrified 10 Line Applications



12VDC & 24VDC Power Supplies:

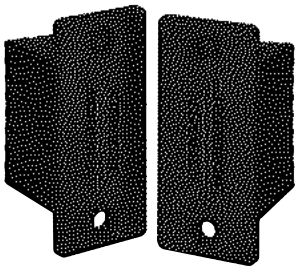
- UL Class 2 Listed
- Four 12V models and four 24V models available
- Integral battery charging capability keeps sealed lead acid gel/cell at full charge in case of line voltage failure (737-battery sold separately)
- Fused line voltage input with one, four, or eight DC outputs (depending on model)
- Each circuit can be individually turned on and off via a slide switch; the power status of each is shown by an LED.
- In the event of a DC short the problem is confined to the zone of difficulty
- Fire alarm interface standard

SARGENT MODEL No.	DESCRIPTION
3521	12V - 1 AMP POWER SUPPLY
3541	12V - 3 AMP POWER SUPPLY
3551	12V - 4.5 AMP POWER SUPPLY
3571	12V - 6 AMP POWER SUPPLY
737	12V - 5 AMP HOUR BACKUP BATTERY

SARGENT MODEL No.	DESCRIPTION
3520	24V - 1 AMP POWER SUPPLY
3540	24V - 2 AMP POWER SUPPLY
3550	24V - 4 AMP POWER SUPPLY
3570	24V - 6 AMP POWER SUPPLY
738	24V - 5 AMP HOUR BACKUP BATTERY

Securitron PowerJump™ ICPT

The Securitron PowerJump ICPT Inductive Coupling Power Transfer delivers power contactlessly and invisibly between the frame and door to power electrified hardware on the door. The PowerJump can be installed at the latch side or hinge side of the door and transfers up to 6 watts of power without pins or wires across the door gap, eliminating points of vulnerability and wear ... and no need to core drill the door. The PowerJump is field selectable for 12VDC or 24VDC systems and is ideal for fail secure applications. The unit can hold electrified latches open in continuous duty or can momentarily energize the lockset for latch retraction.



Additional information regarding this product can be found at www.securitron.com

Strikes and Miscellaneous Parts

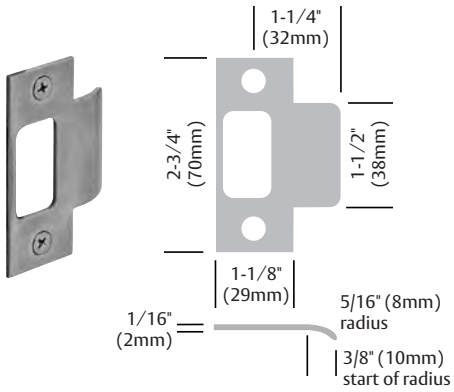
10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Strikes

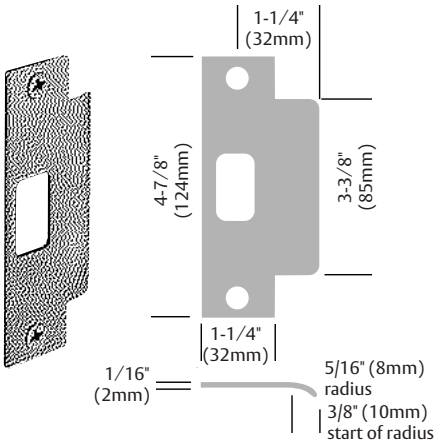
- Finishes: 03, 04, 09, 10, 10B, 10BE, 10BL, 20D, 32, 32D, BSP, WSP

2-3/4" Curved Lip Strike – Standard



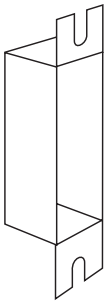
- Brass, bronze or stainless steel
- Furnished standard with 1-1/4" (32mm) curved lip from center of strike screw holes to end of lip
- Lip lengths 1" (25mm), 1-1/4" (32mm) standard, 1-1/2" (38mm), 1-3/4" (44mm) and 2" (51mm)
- Plastic strike box AM-0044 included
- To order strike separately, specify 800 strike x finish x lip length

4-7/8" Curved Lip Strike: (28-Option)



- Brass, bronze or stainless steel
- Conforms to ANSI standard
- Furnished standard with curved lip 1-1/4" (32mm) from center of strike screw holes to end of lip
- Lip lengths 1-1/8" (29mm), 1-1/4" (32mm), 1-3/8" (35mm), 1-5/8" (42mm), 1-7/8" (48mm), 2-1/8" (54mm), 2-3/8" (60mm), 2-5/8" (66mm), 2-7/8" (73mm)
- 77-1141 Wrought strike box available separately
- To order strike separately, specify 808 strike x finish x lip length

ANSI Wrought Strike Box



- Used with ANSI 4-7/8" strike (#808)
- To order with lock, specify option WBS
- To order separately, specify 77-1141

Miscellaneous Parts

Part No.	Description
10-3188	1-3/8" Adapter plate pack (set of 2)
01-0949	30-option, washer only
C10-3	Emergency release cylinder (65 function)
10-0043	Push pin tool
10-2052	Screw pack (standard)
10-2070	Screw pack (28- option)
10-3048	Inside rose assembly
10-3049	Outside rose assembly
82-3855	6 lobe bit pack 6 bits (Sizes – T8, T9, T10, T15, T20, T25, T27) Requires 9/32" driver
82-3856	Spanner bit pack 5 bits (Sizes – 6, 8, 10, 12, 14) Requires 1/4" driver

All cylinders are supplied with 2 nickel silver change keys.
When cylinders are ordered keyed to 5 pin systems, the (6th) last chamber will be empty.

Cylinders are supplied random keyed unless specified 1 bitted or master keyed. For master keyed orders provide keying details as requested on SARGENT Keyed Order Lead Sheets, located in the price book or contact customer service.

To order cylinders separately, specify part number x keyway x finish (i.e. C10-1 x LA x 15)

^Locks will be provided with the applicable tailpiece per the type interchangeable and/or removable core being used.

For example standard cores and Degree® cores require different tailpieces. When ordering complete locks, the appropriate option code must be specified in accordance to the permanent core being used. See pages 12-14 for cylinder options.

Cylinders with Competitive Keyways

Competitive Keyway	Part Number
Schlage® C	SC-C10-1
Schlage® E	SE-C10-1

All cylinders are 6-pin, 0-bitted and supplied with two brass key blanks.
Cylinders include tail piece.

Refer to Cylinders and Components catalog for more information.

Mechanical & Cylinder Options

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Mechanical Options:

Thin Doors	**1-**	Adapter plates for 1-3/8" thick doors
Backset Options	**20-**	2-3/8" backset latch with 1" front
	23-	3-3/4" backset x 2-1/4" x 1-1/8" front
	25-	5" backset x 2-1/4" x 1-1/8" front
Strike	**28-**	Strike #808. Lip length 1-1/4". Lip lengths 1-5/8" to 2-7/8" in 1/4" increments only.
Security Fasteners	**36-**	Six lobe security head screws
	37-	Spanner head screws
3/4" Throw	**41-**	3/4" throw latchbolt x 2-3/4" backset
Lead Lined	**74-**	Lead lining I/S rose, O/S rose, and latch tube
Tactile Warning Options	**75-**	Tactile warning - handicap warning milled on backside of inside lever
	76-	Tactile warning - handicap warning milled on backside of outside lever
	77-	Tactile warning - handicap warning milled on backside of both levers
	85-	Tactile warning - abrasive coating on inside lever
	86-	Tactile warning - abrasive coating on outside lever
	87-	Tactile warning - abrasive coating on both levers
Freewheeling Trim	**FW-**	Freewheeling locking levers (G, L, B, P, Y levers only)
Finish Protection	**SG-**	MicroShield® antimicrobial clear powder coat (only available with 15 and 26D finishes)
	CPC-	Clear Powder Coat over 26D – 10G05 x LL x 26D x CPC
Request to Exit	**RX-**	Request to exit - monitors inside lever rotation (available with functions: 04, 05, 15, 37, 70 & 71)
Box Strike	**WBS-**	Wrought box strike

Cylinder Options:

Conventional Cylinder	**DG1-**	Sargent Degree key system level 1 (bump resistant with patented keys)
Degree Key System	**DG1-21-** *	Degree level 1 construction master keying
	DG1-60-	Degree level 1 removable disposable construction core
	DG1-63-	Degree level 1 removable core
	DG1-64-	Degree level 1 removable construction keyed LFIC
	DG1-65-*	Degree level 1 unassembled/uncombinated fixed core component cylinder (packed loose for field keying)
	DG1-63-65-	Degree level 1 unassembled/uncombinated removable core LFIC (packed loose for field keying)
	DG2- *	Sargent Degree key system level 2 (geographically exclusive; bump and pick resistant)
	DG2-21- *	Degree level 2 construction master keying
	DG2-60-*	Degree level 2 removable disposable construction core
	DG2-63-*	Degree level 2 removable core
	DG2-64-*	Degree level 2 removable construction keyed LFIC
	DG2-65-*	Degree level 2 unassembled/uncombinated fixed core component cylinder (packed loose for field keying)
	DG2-63-65-*	Degree level 2 unassembled/uncombinated removable core LFIC (packed loose for field keying)
	DG3-*	Sargent Degree key system level 3 (geographically exclusive; UL437 certified; bump and pick resistant)
	DG3-21- *	Degree level 3 construction master keying
	DG3-60-*	Degree level 3 removable disposable construction core
	DG3-63-*	Degree level 3 removable core
	DG3-64-*	Degree level 3 removable construction keyed LFIC
Signature Key System	**10-***	SARGENT Signature key system
	10-21-*	SARGENT Signature construction key system (lost ball)
Signature: Large Format Interchangeable Core (Removable Core)	**10-63-***	SARGENT Signature LFIC (removable core) cylinder

Note: Cylinder Options continued on the following page

Cylinder Options

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Cylinder Options:

XC- Key System	**11-***	XC Key System (not available with other Key Systems, unless specified)
	11-21-*	XC- Construction Key System (Lost Ball)
XC- Large Format Interchangeable Core (Removable Core)	**11-60-***	Lock to accept XC-LFIC (removable core) and provided with disposable plastic core; XC-LFIC permanent core ordered separately
	11-63-*	Lock provided with XC-LFIC (removable core); Includes master keying, grand master keying
	11-64-*	Lock to accept XC-LFIC (removable core) and provided with keyed construction core; XC-LFIC permanent core ordered separately.
XC- Small Format Interchangeable Cores	**11-70-7P-***	Lock to accept XC-SFIC (7-pin, removable core) and provided with disposable plastic core; XC-SFIC permanent core ordered separately (G, L, B, P, Y levers only)
	11-72-7P-*	Lock to accept XC-SFIC (7-pin, removable core) and provided with keyed construction core; XC-SFIC permanent core ordered separately (G, L, B, P, Y levers only)
	11-73-7P-*	Lock provided with XC-SFIC (7-pin, removable core); Includes master keying, grand master keying (G, L, B, P, Y levers only)
	11-65-73-7P-*	Lock provided with uncombinated SFIC (7-pin, removable core); Packed loose (G, L, B, P, Y levers only)
Construction Key Systems	**21-***	SARGENT Lost Ball Construction Keying for Conventional, XC and Signature Series (N/A with 63- or 73-)
	22-*	SARGENT Construction Split Key System for Conventional Cylinders (existing systems only) (N/A with 10-, 11-, 63- or 73-)
Large Format Interchangeable Core (Removable Core)	**60-***	Lock to accept LFIC (removable core) and provided with disposable plastic core; LFIC permanent core ordered separately
	63-*	Lock provided with LFIC (Removable Core) Cylinder — (Includes masterkeying, grand masterkeying)
	64-*	Lock to accept LFIC (removable core) and provided with keyed construction core; LFIC permanent core ordered separately
Small Format Interchangeable Cores	**70-***	Lock to accept SFIC (6 or 7-pin, removable core) and provided with disposable plastic core; SFIC permanent core ordered separately (G, L, B, P, Y levers only)
	72-*	Lock to accept SFIC (6 or 7-pin, removable core) and provided with keyed construction core; SFIC permanent core ordered separately (G, L, B, P, Y levers only)
	73-*	Lock provided with SFIC (6-pin, removable core); Includes master keying, grand master keying (G, L, B, P, Y levers only)
	73-7P-*	Lock provided with SFIC (7-pin, removable core); Includes master keying, grand master keying (G, L, B, P, Y levers only)
	65-73-*	Lock provided with uncombinated SFIC (6-pin, removable core); Packed loose (G, L, B, P, Y levers only)
	65-73-7P-*	Lock provided with uncombinated SFIC (7-pin, removable core); Packed loose (G, L, B, P, Y levers only)
Keso & Keso F1	**80-***	Lock to accept Keso and Keso F1 cylinders — no cylinders provided (G, L, B, P, Y levers only)
	82-*	Lock provided with SARGENT Keso Security Cylinder (G, L, B, P, Y levers only)
	F1-82-*	Lock provided with SARGENT Keso F1 Security Cylinder (Patented) (G, L, B, P, Y levers only)
Bump Resistant	**BR-**	Bump Resistant Cylinder (available with Conventional & Conventional XC Cylinders only)
Less Cylinder	**LC-**	Lock supplied less Cylinder
Schlage® Keyways	**SC-***	Schlage® C keyway cylinder, 0 bitted
	SE-*	Schlage® E keyway cylinder, 0 bitted
Accepts Schlage® Cylinders	**30-***	Lever to accept Schlage® fixed core cylinder - cylinder is not provided
	SF-*	L lever to accept Schlage® large format interchangeable core (supplied less core, tailpiece included)

* Options not available with 10G50

Notes:

- To order the 10 Line Lock for use with ASSA V-10 (VA & VS) cylinders, specify the Less Cylinder (LC-) option. V-10 cylinders are available from ASSA, Inc. @ 800-235-7482.
- 10 Line locks will be provided with the applicable tailpiece per the type interchangeable and/or removable core being used. For example standard cores and Degree® cores require different tailpieces. Appropriate option codes must be specified in accordance to the permanent core being used.

Architectural Specifications

10 Line Cylindrical Lever Locks

SARGENT
ASSA ABLOY

Suggested Architectural Specifications - 2.0 Cylindrical Locks

A. Locks shall be 10 Line as manufactured by Sargent Manufacturing Company, New Haven, CT.

B. Locks shall exceed the requirements of ANSI/BHMA A156.2 Series 4000, Grade 1 with all standard trims, as follows:
   1. Cycle Test: Exceeds 5 times ANSI/BHMA A156.2 Grade 1 requirements
2. Abusive Locked Lever Torque — without entry gained: Exceeds 1.5 times ANSI/BHMA A156.2 Grade 1 requirements

C. Locks shall be non-handed with bi-directional lever operation, except the “G” and “Y” lever designs.

D. Through-bolt mounting shall be adaptable to fit a variety of standard cylindrical lock preps.

E. Locks shall comply with UL 10C positive pressure requirements.

F. Locks required for fire doors shall be listed by Underwriters Laboratories for ratings of 3 hours (A label) and less, for doors up to 4'0" (1.2m) x 10'0" (3.0m) and pairs of doors 8'0" (2.4m) x 10'0" (3.0m).

G. Lock levers shall be made of solid material.

H. Lock shall be available in a minimum of six different lever designs.

I. Locks shall have a 2-3/4" (70mm) backset standard.

J. Strikes shall be non-handed with a curved lip. Provide wrought boxes with strikes.

K. Locks shall have brass 6-Pin cylinder standard.

L. Provide two nickel silver keys with each lock.

J. Locks shall have a seven year limited warranty.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Single-sliding doors.
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Besam (Assa Abloy)
Model	Unislide OHC Series, Single-Slide - Unislide OC-S (Exterior) / Type 310, Unislide OC-A" with Access Control Package (Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the BEA Wizard Threshold" by Besam. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the manufacturer's standard device. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Automatic sliding doors.
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Stanley Access Technologies
Model	Dura-Glide, Series 3000 Single-Slide - Model 313834 (Exterior) / Model 313834 (Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail; Refer to the Design Guideline Drawings
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refet to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the “STAN-GUARD Threshold Sensor” by Stanley. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Single-sliding doors.
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Besam (Assa Abloy)
Model	Unislide OHC Series, Single-Slide - Unislide OC-S (Exterior) / Type 310, Unislide OC-A" with Access Control Package (Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail
Color	To Match PPG Bone White, refer to Notes
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Notes	Maintenance Period: 12 months following date of Substantial Completion. Product Data Web Link: https://tinyurl.com/2uxmu25e Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing
Operating Range: Minus 30 deg F (Minus 34 deg C) to 130 deg F (54 deg C).
Safety Search Circuitry: Shall be provided which will recycle the doors when an object is encountered during the closing cycle. The circuitry shall search for that object on the next closing cycle by reducing the door speed at the position the object was previously encountered, and will continue to close in check speed until the doors are fully closed, at which time the doors will reset to normal speed. If the obstruction is encountered again, the doors shall come to a full stop. The door shall remain stopped until the obstruction is removed and an operate signal is given, resetting the door to its normal speed.
The doors shall be provided with a "Fail-Secure Electric Carriage Lock" in the header to prevent the doors from sliding in the night mode. This device shall not interfere with emergency breakout function.
The doorway presence-sensing device shall be the “STAN-GUARD Threshold Sensor” by Stanley. The sensor shall be factory-installed to the underside of the header. The interior door sensing device shall be disabled (night mode) by a key switch furnished by others and installed by Door Installer/Contractor.

Automatic Entrance Doors_Grey Color Scheme

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Single-sliding doors
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Besam (Assa Abloy)
Model	Unislide OHC Series, Single-Slide - Unislide OC-S (Exterior) / Type 310, Unislide OC-A" with Access Control Package (Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail
Color	Custom color to match Aluminum Window color and as approved by the Marriott Representative
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

IMAGE NOT AVAILABLE

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes
Notes	Maintenance Period: 12 months following date of Substantial Completion. Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

SPECIAL INSTRUCTIONS

Opening force: Sliding doors provided with a breakaway device shall require no more than 50 lbf (222N) applied 1 inch (25 mm) from the leading edge of the lock stile for the breakout panel to open
Entrapment Force Requirements: Not more than 30 lbf required to prevent stopped door from closing

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Single-sliding doors
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Horton Automatics
Model	Series 2003 Belt Drive, Single-Slide - Type 310, Model SO-SX,SX-SO (Exterior) / Type 310, Model SO-SX,SX-SO with optional muntin(Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail
Color	Custom color to match Aluminum Window color and as approved by the Marriott Representative
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum.
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.

Revision Date: Nov 23, 2022

Item Name	Automatic Entrance Doors, Single Sliding
Item Type	Automatic sliding doors
Description	The system shall consist of sliding aluminum doors, sidelights, header, operator, and actuating controls. All components shall be factory assembled in the header, adjusted and tested.
Manufacturer	Stanley Access Technologies
Model	Dura-Glide, Series 3000 Single-Slide - Model 313834 (Exterior) / Model 313834 (Interior)
Dimensions	Medium stile (4") with intermediate 4-inch muntin 10-inch bottom rail; Refer to the Design Guideline Drawings
Color	Custom color to match Aluminum Window color and as approved by the Marriott Representative
Finish	Refer to Notes
Material Composition	Aluminum, ASTM B221, 6063-T6 alloy and temper.
CSI #	084229 - Automatic Entrances
Omniclass #	22-084229 Automatic Entrances
Operation	Electronic automatic, single-sliding directional operation. In compliance with NFPA 101, the sliding door panels shall allow “breakout” to the full open position to provide instant egress at any point in the door’s movement. Break-out feature shall comply with requirements of Authorities Having Jurisdiction. To allow safe egress, automatic operation shall be discontinued when the sliding panel is in the “breakout” mode. Doors and sidelights shall be sized to prevent pinch points at meeting stiles.
Best Practices	Recycled content of aluminum
Quality Standards	ANSI/BHMA A156.10, "American National Standard for Power Operated Pedestrian Doors." UL 325 Standard for Door, Drapery, Gate, Louver, and Window Operators and Systems.
Accessibility Compliance	All door openings shall comply with ADA Chapter 4 Entrances, Doors, and Gates/ANSI A117.1.
Accessories	Hardware for emergency breakaway function: Arms and bottom pivot assemblies supplied by the manufacturer, adjustable to comply with applicable codes. Electrified slide lock shall automatically lock all sliding door panels when the door panels are in the closed position. Fail-secure carriage lock. Weather-stripping shall be slide-in type, replaceable pile mohair seals retained by aluminum extrusions. Card reader (Refer to Door Hardware Schedule) will be mounted on vestibule side of interior unit. Manufacturer’s standard one-piece extruded aluminum header with a replaceable aluminum track extending full width of entrance unit. Combination

IMAGE NOT AVAILABLE

	Activation Motion Sensor/Safety Presence Sensor. Manufacturer's standard sign: red background with 1-inch high contrasting letters with the words "IN EMERGENCY PUSH TO OPEN." Door Panels: 1/4" tempered, clear glass. Sidelite panels: 5/8" insulated. As recommended by the storefront framing manufacturer for applications indicated.
Warranty	System Warranty: 2 years Finish Warranty: Refer to Notes

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Glazed Storefront & Entrance Doors
Item Type	Aluminum-Framed Storefront system, thermally-broken
Description	Interior and Exterior Aluminum Storefront Framing, Doors, Door Frames, Lights, and Fixed Windows
Manufacturer	EFCO
Model	Storefront: Series 403, Outside Glazed/Set; Doors: with D500 Wide / D300 Medium/ or D200 Narrow Stile Entrance Doors
Dimensions	Frame: 2" sightline x 4-1/2" depth; Refer to Design Guideline Drawings for Door & Assembly Dimensions
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum extrusions, complying with ASTM B221, 6063-T6 alloy and temper. Glazing as specified below.
CSI #	084113 - Aluminum-Framed Entrances and Storefronts
Omniclass #	22-084113 Aluminum-Framed Entrances and Storefronts
Acoustical Performance	Enhanced OITC and STC Performance available. Comply with the Owner's requirements according to project conditions.
Structural Performance	Design for windload of 30 PSF with maximum deflection in both vertical and horizontal mullions not to exceed 1/175 of span. Water Penetration: ASTM E331 no water penetration at a test pressure of 6.24 PSF. Air Leakage per ASTM E283: Fixed window walls maximum of 0.06 CFM per sq. ft. of total exterior surface areas.
Thermal Performance	System U-factor shall comply with requirements of Authorities Having Jurisdiction.
Operation	NA
Best Practices	Recycled content of aluminum.
Quality Standards	AAMA “Storefront and Entrance Manual”. ANSI/AAMA 101 "Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors"
Accessibility Compliance	Comply with ANSI A117.1 and ADA.
Accessories	Entrance door hardware shall be supplied with doors as follows: Continuous Hinges, 780-112 HD, Hager, Kynar finish, color to match door. Push/Pull, Style “CO-12” by Kawneer, or approved substitution by other listed manufacturer, No. 26 Finish. Closers, surface mounted type, LCN 4041-CUSH, cover to be color to match door. Weather Stripping (3 sides).

	Bottom Sweep .Handicapped Threshold, clear aluminum mill finish. Provide construction cylinder and replace with final cylinder specified in Door Hardware Section within Building Product Manual. Final cylinders, panic devices, electric strikes and card readers by Door Hardware Section within Building Product Manual.
Part of an Assembly	N
Warranty	5 years (Structural). For Finish warranties, refer to notes
Notes	Product Data Web Link: https://tinyurl.com/yy6fpcdf Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Insulating Glass complying with IGCC requirements and as follows: - Total Thickness: 1” - Thickness of Each Pane: 1/4" - Air Space Thickness: 1/2" Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Low-e coating shall be applied to No. 2 surface. Minimum insulated glass assembly performance: - Visible Light Transmittance (VLT): 70 - Solar Heat Gain Coefficient (SHGC): 0.38 - Light to Solar Gain (LSG) Ratio: 1.85 Sealing System: Manufacturer's Standard Dual Seal as follows: - Desiccant: Molecular Sieve or Silica Gel or Blend of Both. - Spacer Material: Manufacturer's Standard Metal with Anodized Finish. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Glazed Storefront & Entrance Doors
Item Type	Aluminum-Framed Storefront system, thermally-broken.
Description	Interior and Exterior Aluminum Storefront Framing, Doors, Door Frames, Lights, and Fixed Windows
Manufacturer	Kawneer North America
Model	Storefront: Trifab VersaGlaze 451T, Front Glazed; Doors: 500 Wide / 350 Medium / or 190 Narrow Stile Entrance Doors
Dimensions	Frame: 2" sightline x 4-1/2" depth; Refer to Design Guideline Drawings for Door & Assembly Dimensions
Color	Clear Anodized or to match Clear Anodized, refer to notes
Finish	Refer to Notes
Material Composition	Aluminum extrusions, complying with ASTM B221, 6063-T6 alloy and temper. Glazing as specified below.
CSI #	084113 - Aluminum-Framed Entrances and Storefronts
Omniclass #	22-084113 Aluminum-Framed Entrances and Storefronts
Acoustical Performance	Enhanced OITC and STC Performance available. Comply with the Owner's requirements according to project conditions.
Structural Performance	Design for windload of 30 PSF with maximum deflection in both vertical and horizontal mullions not to exceed 1/175 of span. Water Penetration: ASTM E331 no water penetration at a test pressure of 6.24 PSF. Air Leakage per ASTM E283: Fixed window walls maximum of 0.06 CFM per sq. ft. of total exterior surface areas.
Thermal Performance	System U-factor shall comply with requirements of Authorities Having Jurisdiction.
Operation	NA
Best Practices	Recycled content of aluminum.
Quality Standards	AAMA “Storefront and Entrance Manual”. ANSI/AAMA 101 "Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors"
Accessibility Compliance	Comply with ANSI A117.1 and ADA.
Accessories	Entrance door hardware shall be supplied with doors as follows: Continuous Hinges, 780-112 HD, Hager, Kynar finish, color to match door. Push/Pull, Style “CO-12” by Kawneer, or approved substitution by other listed manufacturer, No. 26 Finish. Closers, surface mounted type, LCN 4041-CUSH, cover to be color to match door. Weather Stripping (3 sides).

	Bottom Sweep .Handicapped Threshold, clear aluminum mill finish. Provide construction cylinder and replace with final cylinder specified in Door Hardware Section within Building Product Manual. Final cylinders, panic devices, electric strikes and card readers by Door Hardware Section within Building Product Manual.
Part of an Assembly	N
Warranty	5 years (Structural). For Finish warranties, refer to notes
Notes	Product Data Web Link: https://tinyurl.com/msh53y4y Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Insulating Glass complying with IGCC requirements and as follows: - Total Thickness: 1” - Thickness of Each Pane: 1/4" - Air Space Thickness: 1/2" Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Low-e coating shall be applied to No. 2 surface. Minimum insulated glass assembly performance: - Visible Light Transmittance (VLT): 70 - Solar Heat Gain Coefficient (SHGC): 0.38 - Light to Solar Gain (LSG) Ratio: 1.85 Sealing System: Manufacturer's Standard Dual Seal as follows: - Desiccant: Molecular Sieve or Silica Gel or Blend of Both. - Spacer Material: Manufacturer's Standard Metal with Anodized Finish. Finish Options: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.11

Where required, provide safety glass complying with CPSC 16 CFR Part 1201.

Insulating Glass complying with IGCC requirements and as follows:
- Total Thickness: 1”
- Thickness of Each Pane: 1/4"
- Air Space Thickness: 1/2"
Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201.
Low-e coating shall be applied to No. 2 surface.
Minimum insulated glass assembly performance:
- Visible Light Transmittance (VLT): 70
- Solar Heat Gain Coefficient (SHGC): 0.38
- Light to Solar Gain (LSG) Ratio: 1.85
Sealing System: Manufacturer's Standard Dual Seal as follows:
- Desiccant: Molecular Sieve or Silica Gel or Blend of Both.
- Spacer Material: Manufacturer's Standard Metal with Anodized Finish.
Finish Options:
1. Powder Coat Systems:
a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4).
b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG PCNT23118 (Coraflon).
2. Liquid-applied systems:
a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC110423F (Acrynar).
b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG UC110423F (Duranar).
3. Anodized Finish Systems:
a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Glazed Storefront & Entrance Doors
Item Type	Aluminum-Framed Storefront system, thermally-broken.
Description	Interior and Exterior Aluminum Storefront Framing, Doors, Door Frames, Lights, and Fixed Windows
Manufacturer	Oldcastle Building Envelope
Model	Storefront: Series 3000 Front Set; Doors: WS-500 Wide / MS-375 Medium / or NS-212 Narrow Stile Entrance Doors
Dimensions	Frame: 2" sightline x 4-1/2" depth; Refer to Design Guideline Drawings for Door & Assembly Dimensions
Color	To Match PPG Bone White, refer to Notes
Finish	Refer to Notes
Material Composition	Aluminum extrusions, complying with ASTM B221, 6063-T6 alloy and temper. Glazing as specified below.
CSI #	084113 - Aluminum-Framed Entrances and Storefronts
Omniclass #	22-084113 Aluminum-Framed Entrances and Storefronts
Acoustical Performance	Enhanced OITC and STC Performance available. Comply with the Owner's requirements according to project conditions.
Structural Performance	Design for windload of 30 PSF with maximum deflection in both vertical and horizontal mullions not to exceed 1/175 of span. Water Penetration: ASTM E331 no water penetration at a test pressure of 6.24 PSF. Air Leakage per ASTM E283: Fixed window walls maximum of 0.06 CFM per sq. ft. of total exterior surface areas.
Thermal Performance	System U-factor shall comply with requirements of Authorities Having Jurisdiction.
Operation	NA
Best Practices	Recycled content of aluminum.
Quality Standards	AAMA “Storefront and Entrance Manual”. ANSI/AAMA 101 "Voluntary Specifications for Aluminum, Vinyl (PVC) and Wood Windows and Glass Doors"
Accessibility Compliance	Comply with ANSI A117.1 and ADA.
Accessories	Entrance door hardware shall be supplied with doors as follows: Continuous Hinges, 780-112 HD, Hager, Kynar finish, color to match door. Push/Pull, Style “CO-12” by Kawneer, or approved substitution by other listed manufacturer, No. 26 Finish. Closers, surface mounted type, LCN 4041-CUSH, cover to be color to match door. Weather Stripping (3 sides). Bottom Sweep .Handicapped Threshold, clear

	aluminum mill finish. Provide construction cylinder and replace with final cylinder specified in Door Hardware Section within Building Product Manual. Final cylinders, panic devices, electric strikes and card readers by Door Hardware Section within Building Product Manual.
Part of an Assembly	N
Warranty	5 years (Structural). For Finish warranties, refer to notes
Notes	Product Data Web Link: https://tinyurl.com/5e7sw4bd Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Insulating Glass complying with IGCC requirements and as follows: - Total Thickness: 1” - Thickness of Each Pane: 1/4" - Air Space Thickness: 1/2" Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201. Low-e coating shall be applied to No. 2 surface. Minimum insulated glass assembly performance: - Visible Light Transmittance (VLT): 70 - Solar Heat Gain Coefficient (SHGC): 0.38 - Light to Solar Gain (LSG) Ratio: 1.85 Sealing System: Manufacturer's Standard Dual Seal as follows: - Desiccant: Molecular Sieve or Silica Gel or Blend of Both. - Spacer Material: Manufacturer's Standard Metal with Anodized Finish. Finish Options & Colors: 1. Powder Coat Systems: a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4). b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon). 2. Liquid-applied systems: a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar). b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar). 3. Anodized Finish Systems: a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

data-sheet/
Where required, provide safety glass complying with CPSC 16 CFR Part 1201.

Insulating Glass complying with IGCC requirements and as follows:
- Total Thickness: 1”
- Thickness of Each Pane: 1/4"
- Air Space Thickness: 1/2"
Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201.
Low-e coating shall be applied to No. 2 surface.
Minimum insulated glass assembly performance:
- Visible Light Transmittance (VLT): 70
- Solar Heat Gain Coefficient (SHGC): 0.38
- Light to Solar Gain (LSG) Ratio: 1.85
Sealing System: Manufacturer's Standard Dual Seal as follows:
- Desiccant: Molecular Sieve or Silica Gel or Blend of Both.
- Spacer Material: Manufacturer's Standard Metal with Anodized Finish.
Finish Options & Colors:
1. Powder Coat Systems:
a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4).
b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon).
2. Liquid-applied systems:
a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar).
b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar).
3. Anodized Finish Systems:
a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

Accessories	Entrance door hardware shall be supplied with doors as follows: Continuous Hinges, 780-112 HD, Hager, Kynar finish, color to match door. Push/Pull, Style “CO-12” by Kawneer, or approved substitution by other listed manufacturer, No. 26 Finish. Closers, surface mounted type, LCN 4041-CUSH, cover to be color to match door. Weather Stripping (3 sides). Bottom Sweep .Handicapped Threshold, clear aluminum mill finish. Provide construction cylinder and replace with final cylinder specified in Door Hardware Section within Building Product Manual. Final cylinders, panic devices, electric strikes and card readers by Door Hardware Section within Building Product Manual.
Part of an Assembly	N
Warranty	5 years (Structural). For Finish warranties, refer to notes.
Notes	Product Data Web Link:

https://www.ykkap.com/commercial/productguide/storefront/yes45tufront/product-data-sheet/
Where required, provide safety glass complying with CPSC 16 CFR Part 1201.

Insulating Glass complying with IGCC requirements and as follows:
- Total Thickness: 1”
- Thickness of Each Pane: 1/4"
- Air Space Thickness: 1/2"
Glass shall be fully-tempered or laminated where required. Where required, provide safety glass complying with CPSC 16 CFR Part 1201.
Low-e coating shall be applied to No. 2 surface.
Minimum insulated glass assembly performance:
- Visible Light Transmittance (VLT): 70
- Solar Heat Gain Coefficient (SHGC): 0.38
- Light to Solar Gain (LSG) Ratio: 1.85
Sealing System: Manufacturer's Standard Dual Seal as follows:
- Desiccant: Molecular Sieve or Silica Gel or Blend of Both.
- Spacer Material: Manufacturer's Standard Metal with Anodized Finish.
Finish Options & Colors:
1. Powder Coat Systems:
a. Non-Florida or Non-Coastal Projects require powder coat polyester complying with AAMA 2604, 10-year warranty. Color PPG-PCTT2314 (Enviracon 4).
b. For Florida and other coastal region projects, use 100% FEVE resin powder coating complying with AAMA 2605 with 20-year warranty. Color PPG-PCNT88101 (Coraflon).
2. Liquid-applied systems:
a. Use 2-coat, 50% PVDF resin system complying with AAMA 2604, 10-year warranty. Color PPG-UC43350 (Acrynar).
b. For Florida and coastal regions, use 2-coat, 70% PVDF resin system complying with AAMA 2605 with 20-year warranty. Color PPG-UC43350 (Duranar).
3. Anodized Finish Systems:
a. Electrolytically Deposited Anodic Coating, Class 1, Designation AAM12C21A44 conforming to AAMA 611 with 10-year warranty.

Whirlpool

30-inch Wide Top-Freezer Refrigerator - EZ Connect Icemaker Kit Compatible - 18.2 cu. ft.

4.3

64 Reviews

BASE MSRP
$899.00

There's always a place for fresh and frozen favorites inside the 30" wide top-freezer refrigerator with 18 cu. ft. capacity. To give you more convenient storage options, the Flexi-Slide™ bin quickly moves side-to-side. Electronic temperature controls let you choose the right temperature for your frozen favorites, and you won't have to fill ice trays in the top-freezer refrigerator again thanks to the compatible, easy-to-install EZ Connect icemaker kit (icemaker kit sold separately - model no. ECKMFEZ2).

AVAILABLE COLOR OPTIONS

WRT549SZD

Electrical: A 115-volt, 60-Hz, AC-only, 15- or 20-amp fused, grounded electrical supply is required. It is recommended that a separate circuit serving only your refrigerator be provided. Use an outlet that cannot be turned off by a switch. Do not use an extension cord.

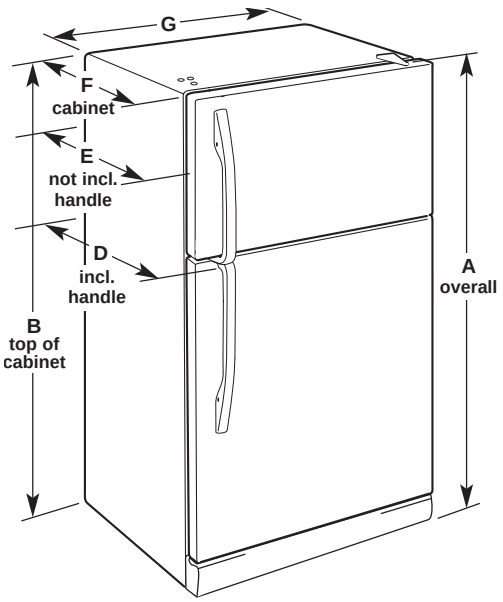
NOTE: Before performing any type of installation, cleaning, or removing a light bulb, turn the control (Thermostat, Refrigerator or Freezer Control depending on the model) to OFF and then disconnect the refrigerator from the electrical source. When you are finished, reconnect the refrigerator to the electrical source and reset the control (Thermostat, Refrigerator or Freezer Control depending on the model) to the desired setting. See "Using the Controls."

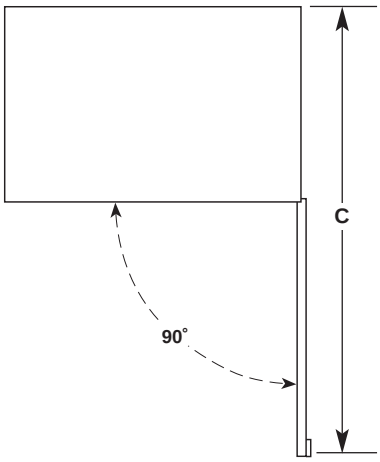
Water: A cold water supply with water pressure between 30 and 120 psi (207 and 827 kPa) is required to operate ice maker and water dispenser. If you have questions about your water pressure, call a licensed, qualified plumber.

IMPORTANT: The pressure of the water coming out of a reverse osmosis system going to the water inlet valve of the refrigerator needs to be between 30 and 120 psi (207 and 827 kPa).

Reverse Osmosis Water Supply: If a reverse osmosis water filtration system is connected to your cold water supply, the water pressure to the reverse osmosis system needs to be a minimum of 40 to 60 psi (276 to 414 kPa).

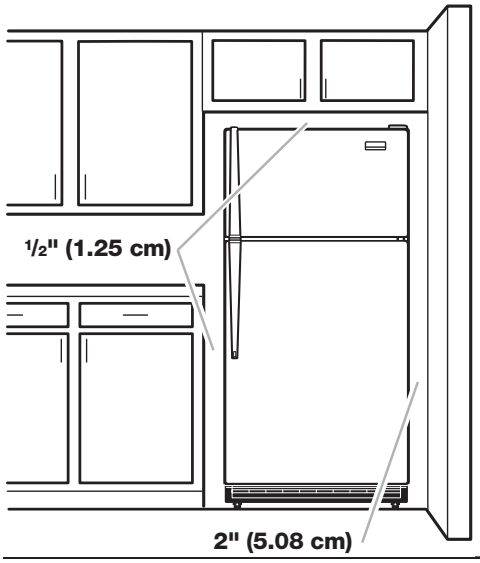
PRODUCT DIMENSIONS





Model Number	Model Size	Reversible Door	Height - Overall "A"	Height - Top of Cabinet "B"	Depth - Door Open 90° "C"	Depth - With Handles "D"	Depth - Without Handles "E"	Depth - Cabinet Only "F"	Width - Cabinet "G"
WRT108FZD WRT138FZD WRT148FZD WRT318FZD WRT318FMD	18.2 cu. ft.	Yes	65⅞" (167.3 cm)	65⅜" (166 cm)	59¾" (151.8 cm)	33½" (85 cm)	31⅜" (79.7 cm)	28⅞" (73.3 cm)	29¾" (75.6 cm)
WRT519SZD WRT549SZD	19.2 cu. ft.	Yes	65⅞" (167.3 cm)	65⅜" (166 cm)	59⅞" (152 cm)	34½" (87.6 cm)	32⅞" (83.5 cm)	28⅞" (73.3 cm)	29¾" (75.6 cm)

LOCATION REQUIREMENTS



To ensure proper ventilation for your refrigerator, allow for a ½" (1.25 cm) space on each and between overhead cabinets and refrigerator top. Allow at least 1" (2.5 cm) between back of cabinet and the wall. If your refrigerator has an ice maker, make sure you leave some extra space at the back for the water line connections.

If you are installing your refrigerator next to a fixed wall, leave 2" (5 cm) minimum on the hinge side (depending on your model) to allow for the door to swing open.

NOTE: This refrigerator is intended for use in a location where the temperature ranges from a minimum of 55°F (13°C) to a maximum of 110°F (43°C). The preferred room temperature range for optimum performance, which reduces electricity usage and provides superior cooling, is between 60°F (15°C) and 90°F (32°C). It is recommended that you do not install the refrigerator near a heat source, such as an oven or radiator.

Because Whirlpool Corporation policy includes a continuous commitment to improve our products, we reserve the right to change materials and specifications without notice.

Dimensions are for planning purposes only. For complete details, see Installation Instructions packed with product. Specifications subject to change without notice.

Revision 1

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Item Name	Elevator - Traction
Item Type	Passenger (Elevator A)
Description	Electric traction elevator, machine room-less (MRL); 2500 lb - 3000 lb capacity; 150 ft. per minute minimum speed.
Manufacturer	KONE
Model	EcoSpace
Dimensions	Minimum 6'-8" Wide x 4'-3" Deep x 8'-0"
Material Composition	Stainless steel, plastic laminate
CSI #	142123 - Electric Traction Elevators
Omniclass #	22-142123 - Electric Traction Elevators
Classification	Passenger elevator
Operation	Simplex selective collective for single elevators.
Best Practices	Recycled content of materials, low-emitting materials
Quality Standards	ANSI/ASME 17.1 “Safety Code for Elevators and Escalators”
Accessibility Compliance	ADA and ANSI A117.1
Accessories	Push-button controls with Braille; Hall push-buttons; Infrared door re-opening sensor; Fire Emergency Service; Emergency communication system
Door Frames	Stainless steel
Signage	As required by Authorities Having Jurisdiction
Doors	Stainless steel hoistway entrance doors
Ceiling	Stainless steel with recessed LED lighting.
Control Panel	Push-button controls with Braille
Handrail	Flat profile, satin stainless steel
Walls	Plastic Laminate, refer to elevator finishes (grain to run vertically & matched) / black baked enamel reveals. Up-Charge for using Wilsonart / Match to be approved by Marriott
Base	Stainless steel, No. 4 (satin) finish
Warranty	1 year
Notes	Acceptable Manufacturers: Kone Elevator; Customer Service; (630) 577-1650; www.kone.us Otis Elevator Co; Customer Service; (800) 441-6847; www.otis.com Mitsubishi Electric; Customer Service; (714) 220-4700; www.mitsubishielectric.com Schindler Elevator Corporation; Customer Service; (973) 397-6500; www.schindler.com ThyssenKrupp Elevator; Customer Service; (800) 824-9666; www.thyssenkruppelevator.com

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	Matte
Material Composition	Melamine impregnated decorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12 Matte
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Linen Chutes

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Linen Chute
Item Type	Linen Chute
Description	Laundry Chute
Manufacturer	Chutes International
Model	Linen Chute
Dimensions	24" diameter
Material Composition	16 gage aluminized steel per NFPA 82
CSI #	149133 - Laundry and Linen Chutes
Omniclass #	22-149133 - Laundry and Linen Chutes
Fire/Smoke Rating	2-Hour rated partitions (1-1/2 hour for doors)
Quality Standards	Underwriter's Laboratories, Inc. (UL); NFPA 13 “Installation of Sprinkler Systems”; NFPA82 “Standard on Incinerators and Waste and Linen Handling Systems and Equipment”
Accessories	Flushing Spray Head: 3/4" IPS; installed above top intake door. Sprinkler Heads: 1/2 IPS; located at or above top service opening of chute, at alternate floor levels in buildings over two stories in height, and at lowest service area, unless otherwise required by local code. Recess heads out of chute area through which linen travels, with rea designed to avoid collection of foreign matter. Offsets (bends) in the chute, if required, shall be made the same diameter as the chute of 16 gage aluminized steel and have an additional layer of 13 gage aluminized steel reinforcing the impact area. Offsets are not to deviate more than 15 degrees off the vertical axis of the chute.
Warranty	Furnish manufacturer’s standard one (1) year warranty from date of temporary certificate of occupancy or similar, locally mandated permission to use the project common areas for their intended use. Warranty shall apply to defects in product workmanship and materials.
Notes	1. Vent: Extend full diameter chute section through roof; [terminate top 4'-0" above roof]. Equip 16 gage aluminized steel vent cap with ventilation air space around full diameter of vent riser, insect screen, condensation gutter, roof flashing. Provide roof curb at low slope roofs, installed by roofing contractor. 2. For New Build projects the door in to the space containing the Chute Intake door is required to have a Card Reader. If card reader is provided, the Chute Intake door is permitted to be unlocked by a key. a. UL Labeled Door Units: Provide UL 1-1/2 hour labeled door units with 30-minute temperature rise of 250 deg. F., (139 deg. C.), complete with closers. b. Chute Intake Door/Frame Units: Provide self-closing units at each landing and at heights above

IMAGE NOT AVAILABLE

floor as indicated. Use manufacturer's recommended heights if not otherwise shown. Provide 21 inch x 18 inch door size. Equip doors with positive latch, latch handle, and manufacturer's standard keyed cylinder locks. [Key outside locks and unlocks door.] [Key outside opens door, but when removed locks door.] Provide manufacturer's standard stainless steel door units, ANSI Type 302/304 with standard satin finish or No. 3 directional polish.
c. Factory Bolt Doors to Intake Throat.
3. Discharge Hopper: Horizontal rolling, UL 1-1/2 hour labeled, spring counterbalanced with fusible link. Provided with required offsets and reinforcing, structural angle door around discharged opening, 2" IPS drain at low point of hopper, pipe pedestal support, 28" wide x 36" high x 14 gage stainless steel hopper door, manufacturer's standard self-latching devices.
4. Electrical Interlocks are only required for projects 4 stories and above, unless otherwise required by local codes.
Electrical Interlocks: Equip the intake door units with electrical interlocks. All doors are normally unlocked. When system is energized by opening one door, the remaining doors shall be automatically locked until system is de-energized. Provide manual control switch stations where indicated.

Item Name	Lockers
Item Type	Metal Lockers
Description	Two tier units with full perimeter concealed ventilation system. Refer to Design Guideline Drawings for quantity.
Manufacturer	Hadrian Inc
Model	Emperor Corridor Lockers
Dimensions	12" wide x 15" deep x 36" high
Color	603 Almond
Finish	Powder Coated
Material Composition	Sheet Steel: ASTM A1008, Mild, stretcher-leveled cold-rolled carbon sheet steel free of buckling, scale, and surface imperfections
CSI #	105113 - Metal Lockers
Omniclass #	22-105113 - Metal Lockers
Accessibility Compliance	ANSI A117.1-Side Reach Requirement
Accessories	Metal number plate, rubber bumpers, and hat/bookshelf
Notes	1. Body and Shelf: 24 Gauge 2. Doors: 16 Gauge 3. Door Frames: 16 Gauge 4. Hinges: Minimum 2" wide, full loop, tight pin type. Matching 12 gauge, "Z" type base, 4" high at non-recessed lockers. Finished filler panels, end panels, continuous sloped 20-gauge metal tops and top filler panels to close off all openings, finished to match lockers. Sloped tops are to be in lengths as long as practicable, but not less than four lockers. Recessed Handle and Latch: Manufacturer's standard housing to form a recess for latch lifter and locking devices; non-protruding latch lifter containing strike and eye for padlock; and automatic, pre-locking, pry-resistant latch with latching action with not less than three-point latching. Locking device supplied by Owner.

Aastra 6865i

Exceptional Value in a Fully Featured, Expandable IP Phone

The Aastra 6865i offers exceptional flexibility in a true enterprise grade SIP desktop phone that can support up to 9 lines, has Dual Gigabit Ethernet ports and features a large 3.4" 128x48 pixel LCD display with soft white backlighting and large fonts making the screen easy to read in any lighting conditions. With its 8 programmable keys, XML capabilities, native DHSG/EHS headset support, a true HD handset and a speakerphone that delivers remarkable wideband HD audio quality, the Aastra 6865i SIP phone is ideally suited for the small to large business market that needs Gigabit throughput for PC connectivity.

Aastra 6865i

Key Features and Benefits

Remarkable Audio

All 6800i Series SIP phones feature Aastra's high definition Hi-Q™ audio technology to deliver enhanced performance and voice clarity. Integrating HD wideband audio codecs, advanced audio processing and hardware components that support a true wideband frequency range, the 6865i offers a superior voice experience on each audio path – handset, speakerphone or headset port – making conversations crystal clear and more life-like.

Enhanced Call Management

With an extensive storage capacity for personal directories, callers logs, redial lists, and 8 programmable keys, the Aastra 6865i is designed to easily manage access to all of the most frequently used call management features of the phone. Even more productivity enhancing features are available at the push of a button including: Shared Call Appearance (SCA), Busy Lamp Fields (BLF), 3-way conferencing, transfer, call waiting, call park, call pickup, intercom and paging. The 6865i is also an expandable desktop phone supporting up to three expansion modules further enhancing its productivity capabilities with additional programmable keys that can be used to access the broad list of advanced features offered by this powerful phone.

Flexible Headset Options

The Aastra 6865i features an innovative headset port that uniquely provides dual support for DHSG/EHS and modular 4-pin headset connections. Users with wireless headsets that support DHSG/EHS can now connect directly to the 6865i without the added cost of additional adaptors or cables.

Environmentally Friendly

All Aastra 6800i Series SIP phones have been designed to be environmentally friendly. Using dynamic PoE class reporting, the 6865i has a PoE Class 2 rating that automatically switches classes when an expansion module is connected enabling the phone and network switches to efficiently manage its power consumption. The Aastra 6865i also supports an optional Efficiency Level "V" compliant power adaptor if required. With smaller packaging that includes 100% recycled and biodegradable material, the Aastra 6800i Series is one of the most environmentally friendly family of SIP phones on the market.

Feature Keys

- Up to 9 lines with 2 dedicated line keys with LED
- 8 Programmable keys with LEDs
- 4-way navigation key with Select/OK button
- Dedicated function keys including: Conference, Transfer, Callers List, Hold, Redial, Goodbye, Options, 2 volume keys, Mute (with LED) and Speaker/ Headset (with LED)

Audio and Codecs

- Aastra Hi-Q™ Audio Technology
- Hearing aid compatible (HAC) handset
- Full-duplex quality speakerphone
- Wideband handset and speakerphone
- Codecs: G.711 µ-law / A-law, G.729, G.722, AMR*, AMR-WB(G.722.2)*, G.726, iLBC, BV16, BV32, L16
- Echo cancellation
- Comfort noise utilization
- Packet loss concealment
- Voice Quality Metrics, including MOS
- DHSG/EHS and 4-pin modular headset supported

Display and Indicators

- Monochrome LCD
  - 3.4" 128x48 pixel graphical backlit display
  - Soft white backlight for user comfort in any lighting condition
- LED for call and message waiting indication

Security

- User and administrator level passwords for login
- Encryption of configuration files
- HTTPS configuration downloaded and web management
- Phone lock with PIN
- Digest Authentication
- Transport Layer Security (TLS)
- Secure Real-Time Protocol (SRTP)

XML API Capabilities

- Display control based on user actions or events
- Dynamic Phone Configuration
- RTP Streaming Control
- CTI applications
- Extensive XML documentation and sample Apps

Localization

- Multi-lingual support – English, French, Spanish, Italian, German
  - Downloadable language pack support for customization and additional language translations
- Country-Specific call progress tones and cadences
- Latin1, Latin2 Character sets

Protocol

- IETF SIP (RFC3261) and associated RFCs

Networking and Provisioning

- Dual 10/100/1000 Mbps Ethernet ports (LAN/PC)
- Manual or Dynamic Host Configuration Protocol (DHCP) IP address setup
- Support of multiple DHCP options: 2,12,42,43,60,66,77,120,132,159,160
- Time and date synchronization using SNTP
- Quality of Service support – IEEE 802.1 p/Q VLAN and priority tagging, Type of Service (TOS), and Differentiated Services Code Point
- Network Address Translation (NAT), STUN, TURN support
- Integrated HTTP/HTTPS server for web administration and maintenance including a built-in troubleshooting section
- Mass deployment via central provisioning of user configuration files – TFTP, FTP, HTTP, HTTPS
- TR-069 support
- Redundant server support
  - DNS-SRV
  - Backup proxy/registrar server support
- RTCP support (RFC1889)
- RTP streaming for Paging and Intercom applications
- IEEE 802.1x
- LLDP-MED

Expansion Modules

- Up to three Expansion Modules supported

Power

- PoE Class 2
- Dynamic PoE class changes when expansion modules are added
- Level "V" energy efficiency rated power adapters available
  - 87-00012AAA-A (Europe)
  - 87-00013AAA-A (North America)
  - D6700-0131-48-20 (Universal)

Package Content

- Aastra 6865i phone
- Handset and coil cord
- Adjustable 2-angle stand (35° & 60°)

Accessories

- M685i LCD Expansion Module – 80C00007AAA-A
- M680i Paper Expansion Module – 80C00010AAA-A
- Wall Mount Kit – 80C00011AAA-A

Part Number

- Aastra 6865i – 80C00001AAA-A

RFID Encoder and Updater

This highly qualified and sophisticated RFID encoder and updater is embedded into one single device. It is designed with functionality, reliability and durability in mind.

Features

- For encoding, verification and auto-update of RFID cards.
- Card standards: ISO 14.443A/B and ISO 15.693.
- Sound signals.
- Several possibilities for powering via USB, via PoE (power over Ethernet) or external power.
- Configurable through web interface.
- Horizontal (table) or vertical (wall) mounting.
- Color display.

Technical Data

	SPECIFICATIONS
Dimensions (W x H x D)	83,3 x 152,0 x 42,2 mm $3^{9/32}$ x $5^{31/32}$ x $1^{21/32}$ in
Dimensions card holder (W x H x D)	88,7 x 85,8 x 48,0 mm $3^{1/2}$ x $3^{3/8}$ x $1^{57/64}$ in
Encoder material	ABS UL 94V - 0
Card holder material	PC UL 94V - 0, semitransparent
Automatic adjustment	10 to 100 Mbit/s networks when connected to the server via TCP/IP
Temperature range	Intended for indoor use only; +5°C to +50°C.
Relative humidity	10-90 %; non-condensing
Power	5V DC, 500 mA
Software requirements and compatibility	Visionline: Application server version 1.12.0 or higher. Vision: Compatible with all Vision RFID locks. 2800: Supported in SW version 1.2.0 and higher.

2. To mount the encoder

The RFID encoder can either be mounted on a wall or be placed on a table etc; dimensions in Figure 2 below in mm (inches).

2.1 Dimensions

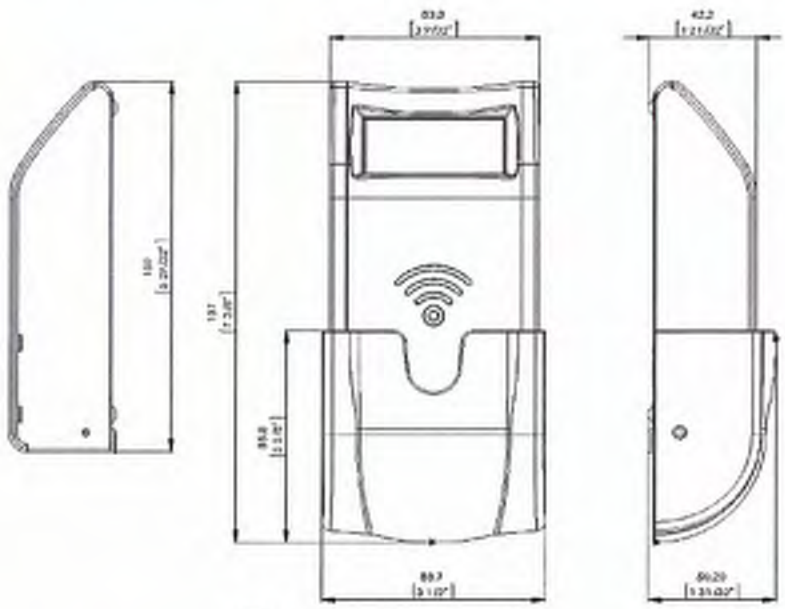

Figure 2: Encoder dimensions

Note: The RFID encoder can be mounted either horizontally or vertically.

2.2 Mounting kit

The RFID encoder is delivered with a mounting kit containing the following items:

Description	Quantity	Usage
Screws 2,9x25mm	2	For mounting the RFID encoder on a wall
Collar screw 3,5x25mm	1	For mounting the RFID encoder on a wall
Screws 2,5x6,4mm	4	For mounting the card holder and mounting brackets
Expand plugs 6x30	3	
Mounting brackets	2	
Adhesive Velcro strips	2	If the RFID encoder should be mounted without using screws

Table 1: Mounting kit

2.3 To mount on the wall

The encoder can be mounted on the wall either with the enclosed screws or with the enclosed Velcro strips.

If the encoder should be mounted with screws:

- fasten the mounting brackets at the bottom of the encoder with the two mounting bracket screws
- fasten the encoder on the wall with the collar screw at the suspension and two screws at the mounting brackets

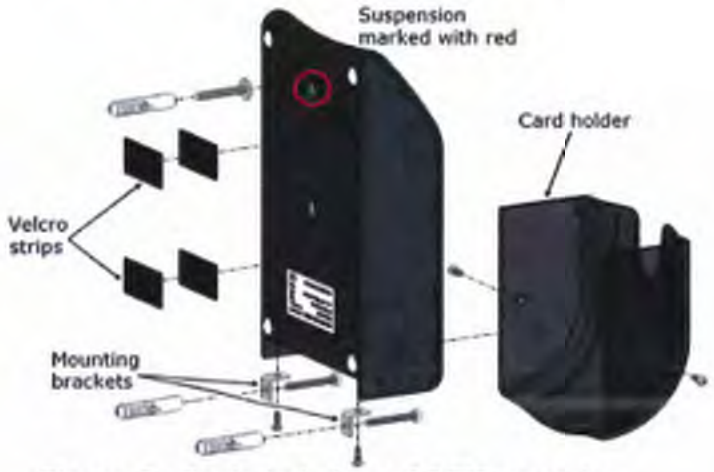

Figure 3: Exploded view of RFID encoder, card holder and mounting details

Note: When mounting the encoder on the wall, the parameter 'Wall mounted' must be enabled; this can be done via the **RFID Encoder Configuration Utility** (see chapter 5). If Visionline is applicable, it can also be done via the web interface (see chapter 7).

Honeywell

Genesis 7580

Area-Imaging Scanner

Honeywell's Genesis™ 7580, the world's first presentation area-imaging scanner engineered to decode all standard 1D, PDF and 2D codes, provides enhanced productivity and revolutionary imaging technology in an elegant, yet durable design.

The 7580 is redefining industry standards for imaging solutions. Breakthrough performance and a versatile form factor make this product suitable for environments ranging from manufacturing to healthcare to retail POS.

Patented CodeGate® technology along with an activation button support menu-scanning and other targeted-scanning applications.

Unlike other scanners with multiple on-board interfaces, the 7580 has four dedicated memory banks—each one capable of storing full configuration settings for RS232, keyboard wedge, USB and 46xx RS485 interfaces.

Automatic cable detection and configuration simplifies migration to a new interface by eliminating the need to scan programming bar codes. Three additional patented technologies augment the 7580's unmatched feature set:

Shielded LEDs minimize the intense flashing common among other area imagers.

CodeSelect™ allows the 7580 to capture up to seven bar codes in a single flash and output data in any predetermined order.

TotalFreedom® expands scanner funtionality by allowing formatting, parsing and decoding plug-ins to be loaded directly to the 7580 instead of the host system.

Features

- **Motion Tolerance:** Aggressively reads bar codes passing by the scan window
- **Multiple On-Board Interfaces:** Reduces overall system cost
- **TotalFreedom:** Load image processing, decoding and formatting plug-ins directly on the scanner instead of the host system
- **Image Capture:** Improves document management by capturing and storing electronic images, including coupons, personal checks, signatures and damaged packages
- **Mobile Phone Reading:** Excels at scanning coupons and mobile tickets directly from the screen of a mobile device
- **Flexible Licensing Solution:** Meets diverse scanning requirements by offering models with limited decoding capabilities—purchase decoding licenses to enable additional functionality as the need arises
- **CodeSelect:** Scans up to 7 bar codes in a single flash and outputs data in any predetermined order
- **Optional EAS:** Increases efficiency by simultaneously deactivating EAS tags and decoding bar codes from up to 7 inches away

FDE-003-HW

Genesis 7580 Technical Specifications

Mechanical	
Dimensions (LxWxH)	80 mm x 83 mm x 150 mm (3.2" x 3.3" x 5.9")
Weight	340 g (12 oz)
Electrical	
Input Voltage	12 VDC ± 0.25 V
Operating Power	2.0 W (167 mA @ 12 V)
Standby Power	1.3 W (109 mA @ 12 V)
Host System Interfaces	USB, RS232, Keyboard Wedge, IBM 46xx (RS485)
Auxiliary Ports	EAS with interlock (EAS model)
Environmental	
Operating Temperature	0°C to 40°C (32°F to 104°F)
Storage Temperature	-40°C to 60°C (-40°F to 140°F)
Humidity	0% to 95% relative humidity, non-condensing
Drop	Designed to withstand 1.5 m (5') drops
Environmental Sealing	Sealed to resist airborne particulate contaminants
Light Levels	100,000 Lux
Scan Performance	
Scan Pattern	Area Image (832 x 504 pixel array)
Motion Tolerance	200 cm/s (78 in/s) for 13 mil UPC at optimal focus
Scan Angle	Horizontal: 46°; Vertical: 28°
Print Contrast	20% minimum reflectance difference
Pitch, Skew	70°, 75°
Decode Capability	Reads standard 1D, PDF, 2D, Postal and OCR symbologies *Note: Decode capabilities dependent on kit configuration
Warranty	2 year factory warranty

1 Getting Started

About This Manual

This User's Guide provides installation and programming instructions for the Genesis 7580g area-imaging scanners. Product specifications, dimensions, warranty, and customer support information are also included.

Honeywell bar code scanners are factory programmed for the most common terminal and communications settings. If you need to change these settings, programming is accomplished by scanning the bar codes in this guide.

An asterisk (*) next to an option indicates the default setting.

Unpacking Your Device

After you open the shipping carton containing the product, take the following steps:

- Check for damage during shipment. Report damage immediately to the carrier who delivered the carton.
- Make sure the items in the carton match your order.
- Save the shipping container for later storage or shipping.

Connecting the Device

Connecting with USB

A scanner can be connected to the USB port of a computer.

1. Connect the appropriate interface cable to the device first, then to the computer.

USB Connection:

2. The scanner beeps.
3. Verify the scanner operation by scanning a bar code from the Sample Symbols in the back of this manual.

The unit defaults to a USB PC Keyboard. Refer to page 2-3 for other USB terminal settings.

For additional USB programming and technical information, refer to "USB Application Note," available at www.honeywellaidc.com.

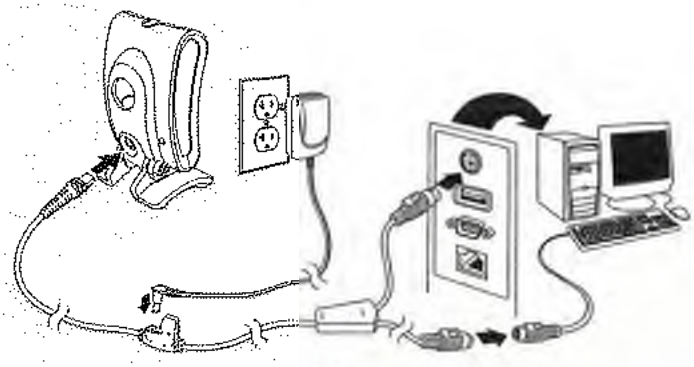
Connecting with Keyboard Wedge

A scanner can be connected between the keyboard and PC as a "keyboard wedge," where the scanner provides data output that is similar to keyboard entries. The following is an example of a keyboard wedge connection:

1. Turn off power and disconnect the keyboard cable from the back of the terminal/computer.

2. Connect the appropriate interface cable to the device and to the terminal/computer.

Keyboard Wedge Connection:



Note: The power supply must be ordered separately, if needed.

3. Turn the terminal/computer power back on. The scanner beeps.

4. Verify the scanner operation by scanning a bar code from the Sample Symbols in the back of this manual. The scanner beeps once.

The unit defaults to an IBM PC AT and compatibles keyboard wedge interface with a USA keyboard. A carriage return (CR) suffix is added to bar code data.

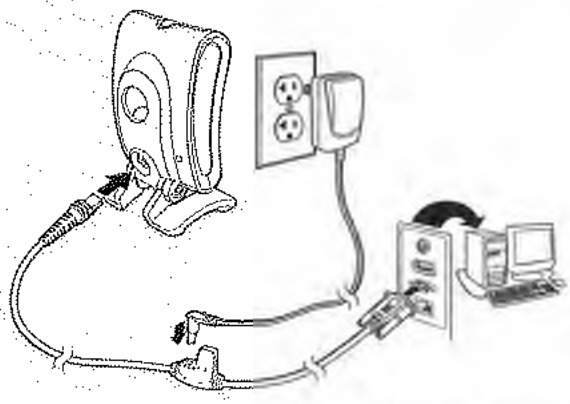
Connecting with RS232 Serial Port

1. Turn off power to the terminal/computer.

2. Connect the appropriate interface cable to the scanner.

Note: For the scanner to work properly, you must have the correct cable for your type of terminal/computer.

RS232 Serial Port Connection:



3. Plug the serial connector into the serial port on your computer. Tighten the two screws to secure the connector to the port.

4. Once the scanner has been fully connected, power up the computer.

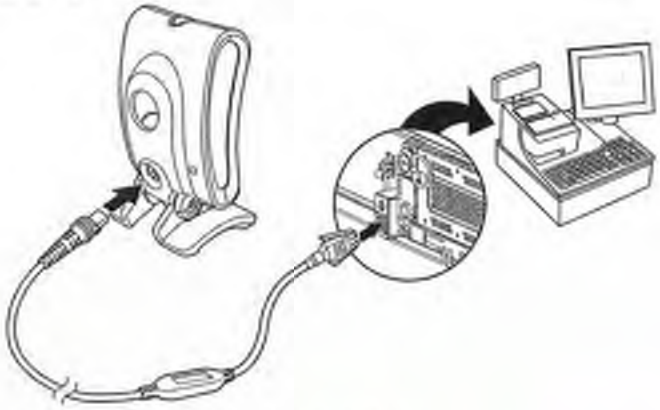
This interface programs 115,200 baud, 8 data bits, no parity, and 1 stop bit.

Connecting with RS485

A Genesis scanner can be connected for an IBM POS terminal interface.

1. Connect the appropriate interface cable to the device, then to the computer.

RS485 Connection:



2. Turn the terminal/computer power back on. The scanner beeps.
3. Verify the scanner operation by scanning a bar code from the Sample Symbols in the back of this manual. The scanner beeps once.

For further RS485 settings, refer to RS485, page 2-2.

Connecting with EAS

A Genesis scanner can be connected to a Checkpoint EAS system.

Refer to EAS Settings beginning on page 7-1 for configuration codes and further EAS programming information.

iCT 250

The smart and compact desktop device designed for maximum efficiency

- Provide merchants with a compact payment device in minimum countertop space.
- Offer a unique payment experience from an ergonomic, intuitive device.
- Accept all electronic payment methods including EMV chip & PIN, magstripe and NFC/ contactless.
- Enable brand promotion with a color display and customization capabilities.

security smartcard magstripe contactless color display

The iCT 250 offers a smart and effective payment experience on minimum counterspace.

Highest Security
The iCT 250 meets the highest security requirements and is PCI PTS 3.x certified with SRED and Open protocol modules. The optional PIN privacy shield provides additional PIN entry confidentiality.

All Payment Options
Offering EMV chip & PIN, magstripe, and NFC/contactless payment, the iCT 250 also enables new NFC couponing and wallet applications.

Designed for Merchants
Among the world's smallest and lightest devices, the iCT 250 is designed for easy handling and robust daily use. The backlit keypad and color LCD display make PIN entry and menu navigation easy and intuitive. Large keys and power buzzer speed transactions and reduce PIN entry errors.

All Connectivity & Communication
Equipped with an unparalleled array of communication technologies such as high speed modem, or Ethernet, the iCT 250 delivers anytime, anywhere connectivity.

Brand Promotion
Brand promotion is empowered by a crisp color graphic display, software customization and hardware personalization options (top casing, printer cover flap or lens).

Telium 2
Powered by the Ingenico Group, Telium 2 technology is the result of 30 years' experience in the payment industry. Secure, highly integrated and fast, Telium 2 is the world's best platform for secure payment services. With advanced functions, it can easily manage more than 2,000 graphical libraries and handle new business service apps. Telium 2 is the fully scalable, reliable operating system embedded into Ingenico Group's 27 million terminals deployed worldwide.

Number of Paper Inputs	Standard: 2 Maximum: 5
Paper Input Capacity	Standard: 650 pages 20 lb or 75 gsm bond Maximum: 2300 pages 20 lb or 75 gsm bond 650 pages 20 lb or 75 gsm bond
Paper Output Capacity	Up to: Standard: 250 pages 20 lb or 75 gsm bond Maximum: 250 pages 20 lb or 75 gsm bond
Paper Weight Range Supported	lb.: 16 - 32 lb. (Standard Tray) 16 - 58 lb. (Multipurpose Feeder)
Optional Paper Handling	550-Sheet Lockable Tray, 250-Sheet Tray, 550-Sheet Tray
Recommended Monthly Page Volume	2000 - 20000 pages[2]
Maximum Monthly Duty Cycle	Up to: 175000 pages per month[3]

Cartridges & Imaging

Laser Cartridge Yields	Up to: 15,000[4]-page High Yield Cartridge 6,000[4]-page Cartridge 20,000[4]-page Extra High Yield Cartridge 25,000[4]-page Ultra High Yield Cartridge
Imaging Unit Estimated Yield	Up to: 60000 pages, based on 3 average letter/A4-size pages per print job and ~ 5% coverage[5]
Cartridge(s) Shipping with Product	6,000[4]-page Starter Return Program Toner Cartridge
Replacement Cartridges:	Product functions only with replacement cartridges designed for use in a specific geographical region. See www.lexmark.com/regions for more details.

Hardware

Processor	Dual Core, 1000 MHz
Memory	Standard: 512 MB Maximum: 512 MB
Hard Disk	Not Available

Printer Languages	Standard: PCL 5e Emulation, PCL 6 Emulation, Microsoft XPS (XML Paper Specification), Personal Printer Data Stream (PPDS), PostScript 3 Emulation, PDF 1.7 emulation, Direct Image, AirPrint™
Fonts and Symbol Sets	2 PCL bitmap fonts, OCR-A, OCR-B scalable PCL 5e fonts, For more information, refer to the Technical Reference., 84 scalable PCL fonts, 91 scalable PostScript fonts, 3 of 9 scalable PCL 5e fonts in Narrow, Regular and Wide, 5 PPDS bitmap fonts, 39 scalable PPDS fonts
Touch Screen Display	No

Connectivity

Direct USB	Yes
Ethernet Network	Yes
Wireless	Wireless Option
Network Protocol Support	TCP/IP IPv6, TCP/IP IPv4, AppleTalk™, TCP, UDP
Network Printing Methods	LPR/LPD, Direct IP (Port 9100), Pull Printing, Microsoft Web Services WSD, Secure IP (Port 96xx), FTP, TFTP, Enhanced IP (Port 9400), ThinPrint .print integration, IPP 1.0, 1.1, 2.0 (Internet Printing Protocol)

Network Management Protocols	DHCP, APIPA (AutoIP), mDNS, IGMP, WINS, DDNS, SNMPv3, SNMPv1, SNMPv2c, Telnet, NTP, ICMP, HTTP, DNS, ARP, HTTPs (SSL[6]/TLS), Finger
Network Security	SNMPv3, 802.1x Authentication: MD5, MSCHAPv2, LEAP, PEAP, TLS, TTLS
Optional Network Ports	Marknet N8370 WiFi Option, Marknet N8372 WiFi Option

Supported Operating Systems

Microsoft Windows Operating Systems Supported	Windows 10, Windows 8.1, Windows 8, Windows 8 x64, Windows 7 x64, Windows 8.1 x64, Windows 7
Apple Operating Systems Supported	Apple OS X (10.6, 10.7, 10.8, 10.9, 10.10, 10.11, 10.12, 10.13)
Linux Operating Systems Supported	Debian GNU/Linux 7.0, 8.0, Ubuntu 16.04 LTS, Fedora 23, 24, openSUSE Linux 42.3, Red Hat Enterprise Linux WS 6, 7, openSUSE Linux 13.2, SUSE Linux Enterprise Server 10, 11, 12
Citrix MetaFrame	Microsoft Windows 2000 Server running Terminal Services with Citrix MetaFrame XP Presentation Server or Citrix MetaFrame Presentation Server 3.0., Microsoft Windows Server 2012 with Citrix XenApp 6.0, 6.5, Microsoft Windows 2000 Server running Terminal Services with Citrix Presentation Server 3.0, 4.0, Microsoft Windows 2000 Server running Terminal Services with Citrix Presentation Server 4.0

Novell Operating Systems Supported	Novell Open Enterprise Server on SUSE Linux Enterprise Server, Novell NetWare 5.1(SP 6+), 6.0(SP 3+) with Novell Distributed Print Services (NDPS), Novell Open Enterprise Server 2 SP2 on SuSE Linux Enterprise Server 10 SP3 3, Novell NetWare 6.5 Open Enterprise Server, Novell Open Enterprise Server 11 on SUSE Linux Enterprise Server 11, Novell Open Enterprise Server 2 on SUSE Linux Enterprise Server 10 SP4
UNIX Operating Systems Supported	Sun Solaris x86 10, 11, Sun Solaris SPARC 10, 11, IBM AIX 6.1, 7.1

Electrical & Operation

ENERGY STAR	Yes
ENERGY STAR Typical Electricity Consumption	TEC: 2.1 kilowatt-hours per week
Noise Level	Operating: 14 dBA (Idle) 56 dBA (Print)
Duplex Print Noise Level	Operating: 56 dBA
Average Power	0.1 watts (Hibernate Mode) 2.2 watts (Sleep Mode) 9.5 watts (Ready Mode) 670 watts (Printing)

Specified Operating Environment	Humidity: 8 to 80% Relative Humidity Altitude: 0 - 5000 Meters (16,404 Feet) Temperature: 10 to 32°C (50 to 90°F)
Product Certifications	ENERGY STAR, ICES-003 Class B, BSMI Class B, VCCI Class B, US FDA, UL 60950-1, FCC Class B, cUL CAN/CSA-C22.2 60950-1, NOM, CB EN/IEC 60950-1, CB EN/IEC 60825-1, CE DoC (EN 62301 Class B, EN 62311, CE EN/IEC 60950-1, CE EN/IEC 60825-1, EN 61000-3, EN 55022 Class B, EuP, EN 55024, UL), EFTA (CE), KCC, CCC, CECP, CEL, C-tick DoC, UL-AR, KC mark, UL GS mark, EC 1275, MET-I, ISO 532B, ECMA-370, TED, GOST-R, SII, TER
UNSPSC Code	43212105
Harmonized Tariff Code	8443.32.1010
Country of Origin	China (PRC)
License/Agreement Terms	Printers are sold subject to certain license/agreement conditions. See www.lexmark.com/printerlicense for details.

Warranties

Limited Warranty	See Statement of Limited Warranty: 1-Year Exchange, Return-to-Base Service

[1]Print and copy speeds measured in accordance with ISO/IEC 24734 and ISO/IEC 24735 respectively (ESAT). For more information see: www.lexmark.com/ISOspeeds.
[2]"Recommended Monthly Page Volume" is a range of pages that helps customers evaluate Lexmark's product offerings based on the average number of pages customers plan to print on the device each month. Lexmark recommends that the number of pages per month be within the stated range for optimum device performance, based on factors including: supplies replacement intervals, paper loading intervals, speed, and typical customer usage.
[3]"Maximum Monthly Duty Cycle" is defined as the maximum number of pages a device could deliver in a month using a multishift operation. This metric provides a comparison of robustness in relation to other Lexmark printers and MFPs.
[4]Average standard page yield value declared in accordance with ISO/IEC 19752.
[5]Actual Yield may vary based on other factors such as device speed, paper size and feed orientation, toner coverage, tray source, percentage of black-only printing and average print job complexity.
[6]This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit. (http://www.openssl.org/)

†"Recommended Monthly Page Volume" is a range of pages that helps customers evaluate Lexmark's product offerings based on the average number of pages customers plan to print on the device each month. FDE-006-HP

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Front Desk Equipment
Item Type	Front Desk Printer
Description	Connectivity: USB Features: Wireless Media Size: 3 x 5 in, A4, A5, A6, Legal, Letter Media Type: Cards, Envelopes, Labels, Plain Paper, Recycled Paper, Transparencies
Manufacturer	HP
Model	Laser Jet Enterprise M607dn
Dimensions	15 x 17 x 18.3
Notes	Verify all Front Desk Equipment with Owner.

SPECIAL INSTRUCTIONS

Data sheet

HP LaserJet Enterprise M607 series

This HP LaserJet with JetIntelligence combines performance, energy efficiency, and security.[1]

This HP LaserJet Printer with JetIntelligence combines exceptional performance and energy efficiency with professional-quality documents right when you need them—all while protecting your network from attacks with the industry's deepest security.[1]

HP LaserJet Enterprise M607dn

HP LaserJet Enterprise M607n

The world's most secure printing[1]

- With HP Sure Start, each printer regularly checks its operating code and repairs itself from attempted hacks.
- Run-time intrusion detection continually monitors to detect and stop attacks, then automatically reboots.
- Centralize control of your printing environment with HP Web Jetadmin—and help build business efficiency.[2]
- Give workgroups what they need to succeed. Easily choose and deploy over 175 HP and third-party solutions.

High-speed performance meets energy efficiency

- Speed through tasks and save paper. Print two-sided documents nearly as fast as single-sided.
- This printer wakes up fast and prints your first page faster—in as quickly as 7.8 seconds.[4]
- This printer uses exceptionally low amounts of energy thanks to its innovative design and toner technology.[5]
- Paper handling options include a wheeled stand and 550-sheet input feeder for paper sizes 4 x 6" to legal.

More. Performance and Protection.

- Produce sharp text, bold blacks, and crisp graphics with precision black toner.
- Help retain the Original HP quality you paid for with anti-fraud and cartridge authentication technology.
- Help retain the Original HP quality you paid for with anti-fraud and cartridge authentication technology.

[1] Based on HP review of 2016 published security features of competitive in-class printers. Only HP offers a combination of security features that can monitor to detect and automatically stop an attack then self-validate software integrity in a reboot. For a list of printers, visit http://www.hp.com/go/PrintersThatProtect. For more information: http://www.hp.com/go/printersecurityclaims [2] HP Web Jetadmin is available for download at no additional charge at http://www.hp.com/go/webjetadmin [3] Measured using ISO/IEC 24734, excludes first set of test documents. For more information, see http://www.hp.com/go/printerclaims. Exact speed varies depending on the system configuration, software application, driver, and document complexity. [4] Measured after 15 min in sleep. Exact speed varies depending on the system configuration, software application, driver, document complexity and time in sleep. [5] Energy claim based on TEC data reported on energystar.gov as of January 2017. Data normalized to determine energy efficiency of in-class laser printers with published speed of 55 to 75 ppm. Subject to device settings. Actual results may vary. [6] An FCC Class A emissions compliant device meets the less stringent (higher) levels of emissions allowed by the FCC for a product operation in a commercial environment. An FCC class A device cannot be marketed for use in a residential environment and an FCC class A device should not be purchased for use in a residential environment due to the increased risk of interference to radio communications.

FDE-006-HP

Product walkaround

1. Hardware Integration Pocket[3]
2. 2.7-inch (6.9 cm) color graphics display with keypad
3. Easy-access USB port
4. 100-sheet multipurpose tray 1
5. Front door access to toner cartridges
6. 550-sheet input tray 2
7. 500-sheet output bin
8. Automatic two-sided printing
9. Host USB port
10. Host USB port
11. Gigabit Ethernet network port
12. Hi-Speed USB 2.0 printing port

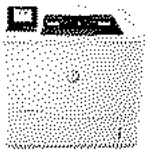
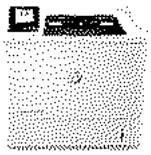
Series at a glance





Model	HP LaserJet Enterprise M607dn	HP LaserJet Enterprise M607n
Part number	K0Q15A	K0Q14A
Print speeds (letter/A4)[2]	Up to 55/52 ppm	Up to 55/52 pages per minute (ppm)
Control panel	2.7-inch (6.9 cm) LCD with keypad	2.7-inch (6.9 cm) LCD with keypad
Automatic two-sided printing	√	Not available
Hardware Integration Pocket[3]	√	Not available
100-sheet tray 1, 550-sheet tray 2	√	√
550-sheet paper feeder[4]	Optional (up to four)	Optional (up to four)
2,100-sheet paper feeder[4]	Optional	Optional
Envelope feeder	Optional (up to two)	Optional (up to two)
Printer stand	Optional	Optional
5-bin stapler/stacker/mailbox with job offset	Optional	Optional
Direct mobile printing	Optional wireless direct[5]/NFC[6]	Optional wireless direct[5]/NFC[6]
Wireless networking	Optional[7]	Optional[7]
HP High-Performance Secure Hard Disk	Optional	Optional

[1]An administrator must enable the easy-access USB port before use. [2]Measured using ISO/IEC 24734; excludes first set of test documents. For more information, see hp.com/go/printerclaims. Exact speed varies depending on the system configuration, software application, driver, and document complexity. [3]Solutions deployed through the Hardware Integration Pocket (HIP) may require additional purchase. HIP not available on the HP LaserJet Enterprise M607n and M608n. [4]All models come standard with the 100-sheet multipurpose tray and 550-sheet tray 2. The HP LaserJet Enterprise M608x and M609x models come with one additional 550-sheet paper feeder standard, and can add up to three additional optional 550-sheet paper feeders and the optional 2,100-sheet paper feeder. The M607n, M607dn, M608n, M608dn, and M609dn models can add up to four additional 550-sheet paper feeders and the optional 2,100-sheet paper feeder. [5]Wi-Fi Direct printing is embedded in the HP LaserJet Enterprise M608x and M609x models. All other models can add wireless direct with the purchase of the optional HP Jetdirect 3000w NFC/Wireless Direct Accessory. Mobile device needs to be connected directly to the signal of a Wi-Fi Direct® supported MFP or printer prior to printing. Depending on mobile device, an app or driver may also be required. For details, see hp.com/go/mobileprinting. Wi-Fi Direct is a registered trademark of Wi-Fi Alliance®. [6]Touch-to-print capability is optional for all models (except M608x and M609x) with purchase of the optional HP Jetdirect 3000w NFC/Wireless Direct Accessory. Mobile device must support Near Field Communication (NFC)-enabled printing. For more information, see hp.com/go/businessmobileprinting. [7]All models can add wireless networking with the purchase of the optional HP Jetdirect 2900nw Print Server. Wireless performance is dependent on physical environment and distance from access point, and may be limited during active VPN connections. [8]Bluetooth Low Energy is standard only on the HP LaserJet Enterprise M608x and M609x models, and it cannot be added to other models. Bluetooth is a trademark owned by its proprietor and used by HP Inc. under license.

HP Services

Downtime can have serious consequences, so HP provides support beyond the standard warranty. You benefit from reduced risk, maximized uptime, predictable service delivery and no unbudgeted repair costs. HP Care Pack Services provide a comprehensive suite of protection services designed to keep HP hardware and software up and running so employees can stay productive.

Next Business Day Onsite with Defective Media Retention:
Customers can retain their hard disk drive and keep control of sensitive data.

Next Business Day Exchange:
Ships a permanent replacement unit overnight via premium airfreight, if hardware issue cannot be resolved remotely. Shipping charges are prepaid by HP.

Same Day Onsite – 4 hour 9x5 and 13x5:
Sends an HP technician to customers' site the same business day for repair, within 4 hours, if the issue cannot be resolved through remote support. Various support window times are available, for different requirements.

For carepack availability visit: hp.com/go/cpc

Top features

Only HP Enterprise printers repair themselves from attacks in real time while offering outstanding manageability. Automatically monitor threats, detect intrusions, and validate operating software while centrally managing your fleet with ease.[1]

With speeds up to 55 pages per minute,[3] fast first page out, and a variety of paper-handling options, you get confidence that your employees can speed through their tasks without interruption.

Help protect your printer using Original HP Toner cartridges with JetIntelligence.

Accessories

L0H17A - HP LaserJet 550-Sheet Paper feeder
L0H18A - HP LaserJet 2100 sheet Paper feeder
L0H19A - HP LaserJet Printer Stand
L0H20A - HP LaserJet Stapler/Stacker/ Mailbox
L0H21A - HP Envelope Feeder
B5L28A - HP Internal USB Ports
B5L29A - HP Secure High Perf Hard Disk Drive

FDE-006-HP

HP LaserJet Enterprise M607 series

Technical Specifications	HP LaserJet Enterprise M607dn(K0Q15A)	HP LaserJet Enterprise M607n(K0Q14A)
Print speed	**Letter:** Up to 55 ppm black; [8]; **First Page Out Black:** As fast as 5.3 sec; [10]	
Print resolution	**Black (best):** Up to 1200 x 1200 dpi	
Print Technology	Laser; **Print Resolution Technologies:** FastRes 1200; 1200 x 1200 dpi	
Print Cartridges Number	1 (black)	
Standard Print Languages	HP PCL 6, HP PCL 5 (HP PCL 5 driver available from the Web only), HP postscript level 3 emulation, native PDF printing (v 1.7), Apple AirPrint™	
Printer Smart Software Features	Print preview, duplex printing, print multiple pages per sheet (2, 4, 6, 9, 16), collation, watermarks, store print jobs, easy-access USB	Print preview, print multiple pages per sheet (2, 4, 6, 9, 16), collation, watermarks, store print jobs, easy-access USB
Printer Management	HP JetAdvantage Security Manager; HP SNMP Proxy Agent; HP Web JetAdmin Software; HP WS Pro Proxy Agent; Printer Administrator Resource Kit for HP Universal Print Driver	
Standard Connectivity	1 Hi-Speed USB 2.0 Device; 2 Hi-Speed USB 2.0 Host; 1 Gigabit Ethernet 10/100/1000T network	
Network Capabilities	Yes, via HP Jetdirect Ethernet embedded print server (standard) which supports: 10Base-T, 100Base-Tx, 1000Base-T; 802.3az (EEE) support on Fast Ethernet and Gig Links; IPsec (standard); 802.11a/b/g/n wireless networking (optional).	
Wireless Capability	Energy Star: 2.131 kWh/Week	
Mobile Printing Capability	HP ePrint; Apple AirPrint™; Mopria-certified[7]	
Memory	**Standard:** 512 MB ; **Maximum:** 1.5 GB, MAX memory, when 1GB Accessory DIMM is installed	
Processor Speed	1.2 GHz / **Hard disk:** Optional, 500 GB (with accessory B5L29A)	
Duty Cycle	**Monthly, letter:** Up to 250,000 pages **Recommended Monthly Page Volume:** 5000 to 20,000 pages	
Paper Handling	**Input Capacities:** 100-sheet multipurpose feeder, 550-sheet input feeder; Up to 650 sheets standard labels legal; **Output Capacities:** 500 sheet output bin; up to 500 sheets standard labels legal; **Duplex Options:** Automatic (standard); **Envelope Feeder:** Yes, 75 (optional); **Standard Paper Trays:** 2; **Media Types Supported:** Paper (plain, light, bond, recycled, heavy, extra heavy, cardstock, pre-printed, pre-punched, colored, rough, heavy rough), mono transparency, labels, letterhead, envelope, heavy envelope; **Media Weight Supported:** Feeder 1: 16 to 53 lb bond (plain), 16 to 24 lb (envelopes); feeder 2: 16 to 32 lb bond (plain); **Media Sizes Supported:** feeder 1: Letter, legal, statement, executive, Oficio (8.5 x 13 in), envelopes [No. 9, No. 10, Monarch(7 3/4)], 3 x 5, 4 x 6, 5 x 7, 5 x 8; feeder 2: letter, executive, legal; **Media Sizes Custom:** feeder 1: 3 x 5 to 8.5 x 14 in; feeder 2: 3.90 x 5.83 to 8.5 x 14 in	**Input Capacities:** 100-sheet multipurpose feeder, 550-sheet input feeder; Up to 650 sheets standard labels legal; **Output Capacities:** 500 sheet output bin; up to 500 sheets standard labels legal; **Duplex Options:** Manual (driver support provided); **Envelope Feeder:** Yes, 75 (optional); **Standard Paper Trays:** 2; **Media Types Supported:** Paper (plain, light, bond, recycled, heavy, extra heavy, cardstock, pre-printed, pre-punched, colored, rough, heavy rough), mono transparency, labels, letterhead, envelope, heavy envelope; **Media Weight Supported:** Feeder 1: 16 to 53 lb bond (plain), 16 to 24 lb (envelopes); feeder 2: 16 to 32 lb bond (plain); **Media Sizes Supported:** feeder 1: Letter, legal, statement, executive, Oficio (8.5 x 13 in), envelopes [No. 9, No. 10, Monarch(7 3/4)], 3 x 5, 4 x 6, 5 x 7, 5 x 8; feeder 2: letter, executive, legal; **Media Sizes Custom:** feeder 1: 3 x 5 to 8.5 x 14 in; feeder 2: 3.90 x 5.83 to 8.5 x 14 in
Product Dimensions	**W x D x H:** 17 x 18.3 x 15 in; **Maximum:** 17 x 40.9 x 17.8 in	
Product Weight	47.7 lbs	
What's in the box	HP LaserJet Printer; HP Black Original LaserJet Toner Cartridge (~11K yield); CD with software drivers and documentation;Documentation (Hardware Install Guide); Power cord[2]	
Warranty Features	One-year, next-business day, onsite warranty. Warranty and support options vary by product, country and local legal requirements. Go to hp.com/support to learn about HP award winning service and support options in your region. (wty code 4G)	
Energy Efficiency Compliance	ENERGY STAR® qualified; EPEAT® Silver; EPEAT® Gold (#AAZ, #201 options only)	
Control Panel	2.7-in (6.86 cm) QVGA LCD (color graphics) rotating (adjustable angle) display with 24-key pad	
Display Description	2.7-in (6.86 cm) QVGA LCD (color graphics) rotating (adjustable angle)	
Software Included	HP Connected, HP Device Experience (DXP), HP PCL 6 (XPS) Printer Driver, HP Software Installer/Uninstaller, Mac OS Welcome Screen (Directs users to 123.HP.com or OS App Source for printer software), Online user manuals	
Fonts and Typefaces	105 internal TrueType fonts scalable in HP PCL, 92 internal scalable fonts in HP postscript level 3 emulation (Euro symbol built-in); 1 internal Unicode Fonts (Andale Mono WorldType); 2 Internal Windows Vista 8 Fonts (Calibri, Cambria); Additional font solutions available via third-party flash memory cards; HP LaserJet Fonts and IPDS Emulation available at http://www.hp.com/go/laserjetfonts	
Compatible Operating Systems	Android, Linux Boss (5.0), Linux Debian (7.0, 7.1, 7.2, 7.3, 7.4, 7.5, 7.6, 7.7, 7.8, 7.9, 8.0, 8.1, 8.2, 8.3, 8.4, 8.5, 8.6), Linux Fedora (22, 23, 24), Linux Mint (17, 17.1, 17.2, 17.3, 18), Linux Red Hat Enterprise (6.0, 7.0), Linux SUSE (13.2, 42.1), Linux Ubuntu (12.04, 14.04, 15.10, 16.04, 16.10), OS macOS 10.12 Sierra, OS X 10.10 Yosemite, OS X 10.11 El Capitan, UNIX, Windows 10 all 32- & 64-bit editions (excluding RT OS for Tablets), Windows 7 all 32- & 64-bit editions, Windows 8/8.1 all 32- & 64-bit editions (excluding RT OS for Tablets), Windows Vista all 32bit editions (Home Basic, Premium, Professional, etc.), Windows XP SP3 32-bit editions (XP Home, XP Pro, etc.)	
Compatible Network Operating Systems	Citrix MetaFrame Presentation Server 3.0, Citrix MetaFrame XP Presentation Server (Feature Release 1, 2, and 3), Citrix on Windows Server 2003/2003R2, Citrix on Windows Server 2008/2008R2/2008 R2 SP1, Citrix on Windows Server 2012/2012R2, Citrix Presentation Server 4.0/4.5, Citrix XenApp 5.0 (Plus Feature Pack 2 & 3) for Windows Server 2008 Terminal Services 32- and 64-bit, Citrix XenApp 6.0/6.5 [for Windows Server 2008 R2 Terminal Services, 32- and 64-bit], Citrix XenApp 6.0/6.5/7.5 [for Windows Server 2008 R2 SP1 Terminal Services, 32- and 64-bit], Citrix XenApp 7.5 [for Windows Server 2012 and 2012 R2 Terminal Services, 64-bit], Citrix XenDesktop 5.6 [for Windows Server 2008 R2 Terminal Services, 32- and 64-bit], Citrix XenDesktop 5.6/7.0/7.5 [for Windows Server 2008 R2 SP1 Terminal Services, 32- and 64-bit], Citrix XenDesktop 7.0/7.5 [for Windows Server 2012 and 2012 R2 Terminal Services, 64-bit], Novell NetWare 6.5/SP8 Novell Clients www.novell.com/iprint, Novell iPrint Appliance v1.0, Novell Open Enterprise Server 11/SP1, Novell Open Enterprise Server 2 for Linux, Novell Servers www.novell.com/iprint), Windows Server 2003/2003 R2 32-/64-bit (SP1/SP2) Standard/Enterprise/Datacenter (+ Cluster & Terminal Services), Windows Server 2003/2003 R2 32-bit (SP1/SP2), Standard/Enterprise (+ Cluster & Terminal Services), Windows Server 2008 32-/64-bit (SP2) Standard/Enterprise (+ Cluster & Terminal Services), Windows Server 2008 R2 64-bit (SP1) Standard/Enterprise (+ Cluster & Terminal Services), Windows Server 2008/2008 R2 32-/64-bit (SP1/SP2) Standard/Enterprise/Datacenter (+ Cluster & Terminal Services), Windows Server 2012/2012 R2 64-bit Standard/Foundation/Essentials/Datacenter (+ Cluster & Terminal Services

Overview

The ThinkCenter Tiny-in-One 22" Gen3 helps you create a modular All-In-One (AIO) workspace free of cables and clutter. This borderless LED panel with a lift / tilt / pivot / swivel stand and DisplayPort connectivity delivers reliable performance at an affordable price. Slip a Tiny PC into the back, tuck your cables through the included clip and enjoy seamless, distraction-free computing. The ThinkCentre Tiny-in-One 22" Gen3 includes Eye Comfort features that reduce a user's eye fatigue, enable a better user experience and enhance office user productivity.

Features & Benefits

- One step, no-tool setup
- Equipped with camera and microphone for VOIP phone and video
- Borderless, sleek screen for enhanced visual information
- VESA-compatible mount allows device to be installed almost anywhere
- Compatible with Tiny PCs as well as almost all brand notebooks and desktops

What's in the Box

- One TIO 22 GEN3
- Stand and base
- AC power adapter
- Power Cord
- CD containing multilingual user guide, setup test pattern and Windows installation file
- Quick start and safety poster

FDE-010-LN

Features

Perfect for users, even better for IT managers

Power-packed and business-ready, the ThinkCentre M Series, which includes the Tower, SFF, Thin Client, and the M920 Tiny, is the perfect choice for progressive IT managers looking for high-performance, reliable, and secure desktop solutions. Easy to set up, deploy, and manage in any office environment, the M Series boasts the latest processing, memory, and storage technology, and have a number of large storage capacity options. In addition, robust security features come built-in to safeguard your critical data and provide reliability your organization can count on.

For real results, you need real power

With the latest generation of Intel® processors, cutting-edge DDR4 memory, and the option of solid-state storage, the compact ThinkCentre M920 Tiny is as powerful and responsive as a full-sized desktop. It enables you to get more things done, more quickly—and with more elbow room, too.

What are you waiting for?

For an even faster, smoother, and more responsive PC experience, opt for a hard drive with Intel® Optane™ memory. By recognizing the way you work, this smart next-gen technology accelerates

FDE-010-LN

It's good to have high-speed connections

When it comes to ports, the ThinkCentre M920 Tiny has plenty. It includes USB 3.1 Gen 2** technology for faster charging and data transfers, even if your PC is shut down or in sleep mode. The ports are placed conveniently, too—enabling you to hook up an extra hard drive or monitor in seconds.

Can fit—and work—anywhere

On a bookshelf, behind a monitor, under the desk...you can fit your ThinkCentre M920 Tiny anywhere. What's more, it's been rigorously tested to MIL-SPEC standards, so it works in almost any environment—from the Arctic to the desert and everywhere in between.

FDE-010-LN

Shown with optional VGA and Serial ports punch-outs

Easy to use, configure, & upgrade

If your PC is out of reach, you can switch it on remotely with a simple shortcut, Alt+P. The ThinkCentre M920 Tiny also has a number of expansion slots, enabling it to be configured to meet your business needs. What's more, should you need to swap out any components with the optional tool-less screw, you can slide off the side panel without any tools.

Go green, save green

Every ThinkCentre M920 Tiny is equipped with Smart USB Protection. Smart USB Protection prevents theft of sensitive data and ensures no malware enters the system or network through USB ports, by letting you restrict what USB devices can access the PC. In addition, the TPM, or Trusted Platform Module, provides hardware-based security, including the generating and storing of cryptographic keys, while a Kensington Lock slot lets you physically secure your ThinkCentre M920 Tiny desktop.

FDE-010-LN

One less thing to worry about

Every ThinkCentre M920 Tiny is equipped with Smart USB Protection. It lets you restrict what USB devices can access the PC, while ensuring that no malware enters the system or network through USB ports. In addition, there's TPM, or the Trusted Platform Module, providing hardware-based security, including the generating and storing of cryptographic keys, while a Kensington Lock port lets you physically secure your M920 Tiny.

Tech Specs

Processor	Up to 8th Generation Intel® Core™ i7-8700T 6 core Processor (2.40GHz, up to 4.0GHz with Turbo Boost technology, 12MB Cache)
Operating System	• Windows 10 Home • Windows 10 Pro - **Lenovo recommends Windows 10 Pro**

FDE-010-LN

Storage	• 2.5" HDD • PCIe add-on cards
Graphics	Intel® Integrated Graphics
Expansion Slots	• 1 x M.2 SSD or Intel® Optane™ • 1 x M.2 WiFi
Optical Drive	DVD-RW Multi-burner (optional)

Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Welcome Desk
Item Type	Reception Millwork
Description	Plastic Laminate Clad Custom Millwork that houses Front Desk Equipment consisting of cabinets, shelves and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries, MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual
Millwork Hardware	Refer to Specifications within Building Product

	Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. a. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer. 8. Base Cabinet Units: a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued

and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.
9. Drawers:
a. Provide box-type construction with sub-front and back joined with glued dovetail or rabbeted into sides and secured with glue and mechanical fasteners. Clear coat all exposed surfaces. Match color of sides and bottoms with drawer fronts.
b. Drawer Fronts: 3/4-inch-thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine).
c. Drawer Sides Sub-fronts, and Backs: Not less than 1/2-inch hardwood dovetail construction or 3/4-inch thick Particle Board faced with Thermoset Decorative Overlay (melamine). Provide PVC edge banding to match finish of fronts.
d. Exposed fronts fastened to Sub-fronts with mounting screws from interior of body.
e. Drawer bottom of not less than 1/4-inch thick plywood faced with Thermoset Decorative Panel overlay (melamine), set into rabbets in back, sides, and sub-fronts.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include printer, CPU, monitor, keyboard, telephone, data, cash drawers, key card programmer, etc. All Welcome Desk drawers and cabinets are to be lockable.

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop
Manufacturer	Wilsonart International, Inc.
Model	Q1017
Dimensions	3/4" Thick
Color	Vesuvius
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661
Fire/Smoke Rating	ASTM E84 Class 1 (NFPA Class A) FS-25 or less.
Structural Performance	Mohs Hardness Scale: 6 to 6.5. Density: Not less than 2 g/cm3 when tested per ASTM C97.
Thermal Performance	Thermal shock: Pass 5 cycles, tested per ASTM C484.
Best Practices	UL Greenguard certified
Quality Standards	NSF/ANSI 51 Certified. Stain resistance: Passes ANSI Z124.6. Water absorption: Maximum 0.04 percent, tested per ASTM C97. Chemical resistance: Not Affected when tested per ASTM C650.
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	N
Thickness	3/4"
Finish	Polished
Warranty	One (1) year minimum warranty against defects in materials and workmanship. Commercial Lifetime warranty
Notes	Refer to drawings for edge profile

SPECIAL INSTRUCTIONS

Label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2'-0" apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Copyright 2019, Wilsonart LLC

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Blistering	**65 seconds**	≥ 40 seconds

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Heavy-Duty
BHMA Grade 1 Compliant
Adjustable in 1/2" increments

233™/255™ Pilaster Standards and Supports

Applications For use on walls, in closets, between studs, within window frames and in bookcases, entertainment centers, kitchen cabinets and medicine cabinets. Color coordinated shelf clips add a finished look to custom projects.

Load Rating Varies per size*, BHMA grade 1 compliant

Mounting Wall

Material Steel or aluminum

Finishes Almond (ALM), Brass-look (BR), Brown (BRN), White (WH), Zinc (ZC), Economy Zinc (E): Attractive, long-lasting, corrosion resistant finishes

Features Clips are adjustable on 1/2" centers and provide stable support for a variety of shelf options, including wood, plywood, particle board, glass, wire or metal. Pilaster nail holes are pre-drilled. A variety of shelf support accessories are available.

KV's built-in shelving hardware creates a custom look, while also providing sturdy, discreet support and outstanding versatility. Available in surface- or mortise-mount styles.

233 Series Surface-Mount Pilaster Standards

- For surface-mounted applications
- Dimensions: 13/16" wide x 3/16" deep x selected length
- 23-gauge high strength steel
- Vertically adjustable in 1/2" increments
- Stamped numbers make installation easier
- Pre-drilled screw/nail holes
- Pre-punched staple holes
- Made in the USA
- Available from open stock

255 Series Mortise-Mount Pilaster Standards

- For surface- or flush-mounted applications
- Dimensions: 5/8" wide x 3/16" deep x selected length
- Aluminum standards: 17-gauge aluminum
- Galvanized steel (E) standards: 20-gauge galvanized steel
- Steel standards: 23-gauge high strength steel
- Vertically adjustable in 1/2" increments
- Stamped numbers make installation easier
- Pre-drilled screw/nail holes
- Pre-punched staple holes
- Made in the USA
- Available from open stock

233™/255™ Pilaster Standards and Supports

233
Pilaster Standard

255
Pilaster Standard

1. Product Name

233 and 255 Pilaster Standards. For built-in shelving and bookcase applications.

2. Manufacturer

Knape & Vogt® Manufacturing Company
2700 Oak Industrial Dr. NE, Grand Rapids, MI USA 49505-6026
616.459.3311 | www.kv.com

3. Product Description

Basic Use: 233 and 255 Pilaster Standards are designed for built-in shelving on walls, in closets, between studs and within window frames and bookcase applications.

233 and 255 Pilaster Standards are available in steel or aluminum. They mount to most wall types and in wood bookcases and cabinets. They accommodate KV steel or aluminum supports, and are available in various styles/confi gurations. 233 and 255 Pilaster Standards are adjustable on 1/2" centers.

Composition and Materials:

233 Steel Standards: 23-gauge high strength steel.
255 Steel Standards: 23-gauge high strength steel.
255 Galvanized Steel (E) Standards: 20-gauge galvanized steel.
255 Aluminum Standards: 17-gauge aluminum.

Sizes:

233 Steel Standards: 13/16" wide x 3/16" deep x selected length.
Lengths: 12", 18", 24", 30", 36", 42", 48", 60", 72", 84", and 96".
255 Steel Standards: 5/8" wide x 3/16" deep x selected length.
Lengths: 12", 18", 24", 30", 36", 42", 48", 60", 72", 84", and 96".
255 Aluminum Standards: 5/8" wide x 3/16" deep x selected length.
Lengths: 12", 18", 24", 30", 36", 42", 48", 60", 72", 84", and 96".

Finishes:

233 Steel Standards: Brass-look (electro-plated cold rolled steel), and Zinc (zinc-plated cold rolled steel).

255 Steel Standards: Almond, Brown or White (powder-coated cold rolled steel); Brass-look and zinc (zinc-plated cold rolled steel), and Economy Zinc (galvanized steel).

255 Aluminum Standards: Aluminum; electro-plated aluminum), and Brown or Walnut (powder-coated aluminum).

4. Technical Data

Applicable Standards: The KV 255 Steel Standard, when used with specific KV steel shelf rests, has been tested and meets the ANSI/BHMA (A156.9-2003) cabinet hardware standard for shelf rests and standards. However, representative testing in a fully configured application is the only way to assure proper performance, durability, and safety.

The aforementioned shelf support load limit is intended as a guide only and not as a warranty. Actual load bearing capabilities depend upon the type of cabinet/wall material and use of appropriate shelf standard mounting fasteners, installation technique, shelf standard spacing, shelf size and construction.

Environmental Considerations:

Environment: Excessive humidity, salts, or other chemical agents can corrode the finish and attack metal or plastic components.

Fastening: Inadequate or incorrect fasteners can result in the standards pulling loose and causing damage.

Alignment: Improper standard and clip alignment can result in a system that is ineffective and unsafe.

5. Installation

233 Pilaster Standards can be installed on the surface. The 233 Pilaster Standard can be mounted with nails, staples, or screws.

255 Pilaster Standards can be installed on the surface, or made flush with the wall or cabinet by making a dado cut. The 255 Pilaster Standard can be mounted with nails, staples, or screws.

Surface mounting: Mark the installation location. Position the standards so that numbers are right-side up. Nail the top hole of the standards into the desired position at equal heights. Check horizontal and vertical alignment with a level. Finish nailing.

For wallboard, plywood paneling, masonry and other non-wood surfaces, use a #3 flat head screw and appropriate hollow wall anchor to properly secure the standard. Note: Proper nails are supplied for 255 Standards; screws and anchors are not.

Flush mounting: Mark the installation location and width of each standard, and rout each dad cut to the desired depth. Position the standards so that numbers are right-side up. Nail the top hole of the standards into the desired position at equal heights. Check horizontal alignment with a level. Finish nailing.

6. Availability and Cost

Availability: Knape & Vogt (KV) products are available from stocking distributors and through KV Representatives worldwide.

Cost: Current pricing is available from area KV Representatives. Please call for the nearest representative at: 800.253.1561.

7. Warranty

Limited Lifetime Warranty: Knape & Vogt offers its standard Limited Lifetime Warranty to the initial purchaser of commercial products. This warranty covers defects in materials and workmanship which occur during normal use, and the remedy is limited to repair or replacement of defective products, at KV's option. Certain types of defects and damage are excluded from warranty coverage, costs and expenses are not covered, and additional restrictions apply. A copy of the Limited Lifetime Warranty, with all warranty details, limitations and disclaimers, is available on the Customer Care Connection location at www.kv.com or from KV Customer Service, 2700 Oak Industrial Drive, Grand Rapids, MI 49505, (800) 253-1561.

8. Maintenance

233 and 255 Pilaster Standards require no maintenance. Inspect for proper fit periodically and adjust when necessary. Replace as required or recommended by application.

9. Technical Services

Knape & Vogt and area representatives can assist with any application. For further information, or for the name of the representative nearest you, please call Knape & Vogt Customer Service: 800.253.1561 or visit our website at: www.kv.com.

10. Filing Systems

Additional product information, data sheets, application sheets, and a full catalog are available upon request from Knape & Vogt.

330 Roller catch

- Most economical solution recommended for low frequency opening applications
- Independent rollers allow positive action and self-alignment
- Cushioned rollers absorb shock and noise, hold door away from cabinet
- Application allows for easy adjustment
- Packed with screws and brads

Certifications
- Meets ANSI/BHMA A156.9, B83071

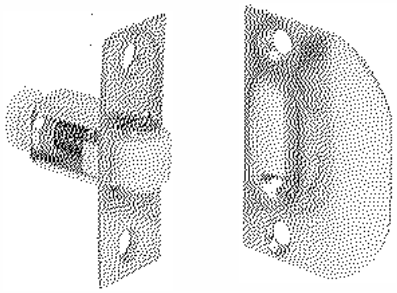
Dimensions
- Case: 1-1/4" high x 11/16" wide
- Strike: 1-1/4" high x 3/8" wide

Material substrate
- Made from wrought steel

Finishes

BHMA	Description	Substrate	Finish
604	Clear zinc	Steel	F2C

For other colors, consult factory.



335 Roller catch

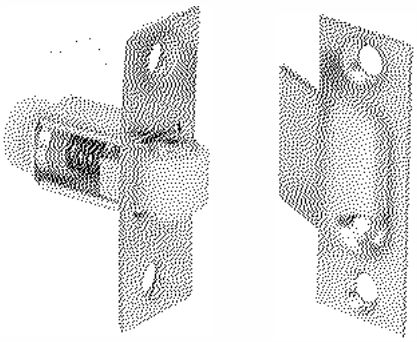
- Recommended for higher frequency opening applications
- Smooth, positive latching action insured by powerful conical spring
- Durable nylon roller insures quiet operation
- Adjustable tension. Adjustments can be varied from 4 to 17 lbs. of holding power making possible a wide range of door performance
- Easily installed on thin doors
- Full lip style strike designed for simplified mortising
- Packed with sheet metal screws

Certifications
- Meets ANSI/BHMA A156.16, L27081 for brass and L87081 for steel

Dimensions
- Face plate: 7/8" wide x 2-1/4" high
- Bore: 1-3/4" deep x 13/16" diameter
- Strike: 1-5/8" wide x 2-1/4" high, lip to center- 1-3/16"

Material substrate
- Made from wrought brass

See finishes below



336 Roller catch

- Recommended for higher frequency opening applications
- Smooth, positive latching action insured by powerful conical spring
- Durable nylon roller insures quiet operation
- Adjustable tension. Adjustments can be varied from 4 to 17 lbs of holding power making possible a wide range of door performance
- Easily installed on thin doors
- Standard box type strike designed for neat appearance
- Packed with sheet metal screws

Certifications
- Meets ANSI/BHMA A156.16, L27081 for brass and L87081 for steel

Dimensions
- Face plate: 7/8" wide x 2-1/4" high
- Bore: 13/16" diameter x 1-3/4" deep
- Strike: 7/8" wide x 2-1/4" high, lip to center- 1-1/8"

Material substrate
- Made from wrought brass

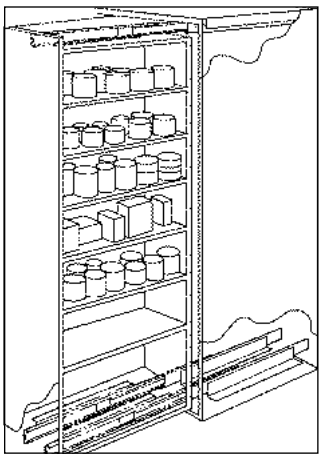
MODEL 301-2590

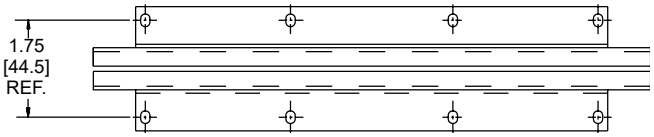
Undermount Shelf Slide
Non-Disconnect
Over Travel

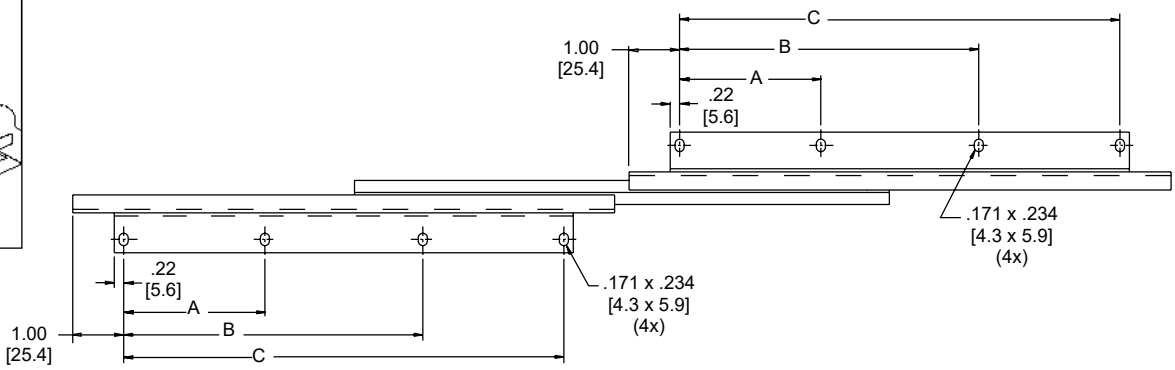
Applications: Pull-out storage shelves, kitchen pull-out pantries, and entertainment centers. Battery trays, storage bins, and generators.

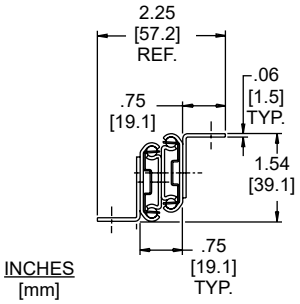
301-2590
QUICK REFERENCE

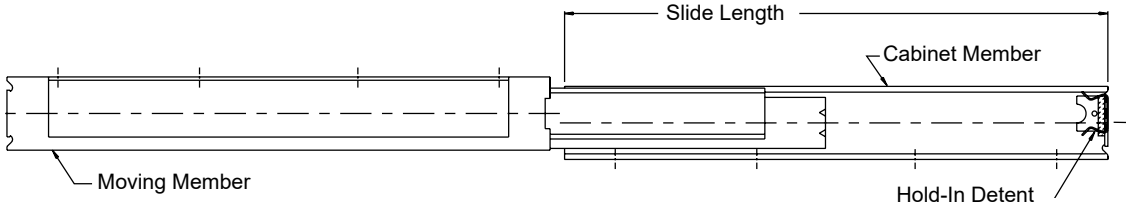
Side Space: .75" [19.1 mm] slide only
2.25" [57.2 mm] with brackets
Length: 12"–28" [305 mm–711 mm]
Overall slide dimensions: .50" x 1.62"
Load rating: Up to 155 lb. [70 kg.]*











Finish	Bright electro-zinc (C) or black zinc (CB) plating
Length	12"–28" [305 mm–711 mm]
Height	1.54" [39.1 mm]
Side Space	.75" [19.1 mm] slide only 2.25" [57.2 mm] with brackets
Load	Up to 155 lbs [70 kg]* Capacity
Travel	Slide length plus .83" [21.1 mm]
Mounting	Bracket/undermount
Hardware	#8 pan head or round head screws
Features	Hold-in detent, silenced open and closed, slide is handed

* Load rating based on a 16" wide shelf cycled 50,000 times.

Part Number	Slide Length	Slide Travel	Load Rating lb. [kg] per pair*	A	B	C

301-2590-28	28.00 [711]	28.83 [732.3]	85 [39]	7.00 [177.8]	19.00 [482.6]	26.00 [660.4]

1. Mark a line at least 1/4" [6.4 mm] in from the right side of the cabinet opening and parallel to the cabinet side.
2. Locate a point on this line 1.00" [25.4 mm] back from the desired front of the slide.
3. Using #8 pan or round head screws, mount the cabinet member bracket through the first hole at this point.

   NOTE: For maximum strength, ensure that the hold-in detent spring is installed inside the cabinet.
4. Mount the left hand slide similarly, locating the screw centerline of the cabinet member bracket at least 1/4" [6.4 mm] in from the left side of the opening.
5. Keeping the right and left hand slides parallel, install the remainder of the cabinet member screws.

   NOTE: When using soft materials such as particle board, replace rear cabinet mounting screws with through bolts.
6. With slides extended, center the shelf and drive the screws up through the moving member brackets into the bottom of the shelf.

   NOTE: If the unit is mounted too close to the floor reverse the procedure above and install the moving member screws first.

Slide Ordering Instructions

Complete your slide order for Accuride model 301-2590 by specifying the following:

20 Pair	C	301-2590	-16	D
Total Required Slides				
	Slide Finish			
		Slide Model Number		
			Slide Length	
				Optional Polybag Packaging

Packaging

Distributor (D) Pack: All lengths are packaged 5 pair per box. Polybag includes one pair of slides and mounting screws.

Bulk Pack: Slides only. Left hand slides and right hand slides are packaged in separate boxes.

Lengths 12"–18"	20 each per box
Lengths 20"–28"	10 each per box

Specifications

Slide members and ball retainers: Cold rolled steel
Ball bearings: Carburized steel

RoHS compliant

NOTE: Specifications, materials, prices, terms, and delivery are subject to change without notice.

daltile®

IMAGINE WHAT'S POSSIBLE™

INTRODUCING SURFACES
LIKE YOU'VE NEVER SEEN THEM BEFORE.

Panoramic Porcelain Surfaces™ features porcelain that performs and design that delivers for your walls, floors and countertops. This collection offers breathtaking views, stunning visuals and seamless design with no boundaries.

THE POSSIBILITIES: **LIMITLESS**

With Panoramic Porcelain Surfaces™, you have a unique opportunity to let your imagination run wild.

If you've ever dreamt of using limestone slab in places limestone should never be used, Panoramic can help you make those dreams come true. Or, if you've ever wished you could bathe a room in marble, now you can create that look at a fraction of the cost.

SET THE STAGE FOR LUXURY

ELEMENTAL **SELECTION**

Elevate the ambiance of virtually any space with the sophisticated marble looks within Elemental Selection.

Create drama with striking vein patterns, or infuse tranquility with subtle marbling designs. Large format slabs create fewer grout lines for a more seamless appearance in both glossy and matte finishes. By combining the look of natural stone with the value and ease of porcelain, Elemental Selection reinvents classic décor.

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	✓
Wet & Level – Interior Floor	≥ 0.42	✓*
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

A DCOF value of ≥ 0.42 is the standard for tiles specified for level interior spaces expected to be walked upon when wet, as stated in ANSI A137.1-2012, Section 9.6. For more information about DCOF and the DCOF AcuTest™, visit daltile.com/DCOF.

APPLICATION NOTES:

Suitable for exterior applications in freezing and non-freezing climates, when proper installation methods are followed.

* Matte finish only.

INSTALLATION

Grout Joint Recommendation	Shade Variation
1/8"	**Medium (V2):** Industrial Selection, Metallic Selection **High (V3):** Elemental Selection

NOTES

Special consideration must be given when installing tiles greater than 15 inches. Please refer to ANSI A108.19 standards for Gauged Porcelain Slabs for more information.

Use of an LFT (Large Format Tile) mortar is required. Thin-set mortars are not suitable for Panoramic Porcelain Surfaces.

Since there are variations in all fired ceramic products, tile and trim supplied for your particular installation may not match these samples. Final color selection should be made from actual panels
and trim and not from product samples or color reproductions.

Water, oil, grease, etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection. Not for use on ramps.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For additional information refer to "Factors to Consider" at daltile.com/Factors.

SLAB FACE – BOOK MATCHED APPLICATION

ELEMENTAL SELECTION SKU'S – 12 MM ONLY

STATUARIO CM03

CALACATTA CM04

DIAMOND MINE CM12

GYPSUM CALACATTA CM22*

CALACATTA ARIES CM21*

* Book matched faces also offered in 6mm Calacatta Aries and Gypsum Calacatta slabs.

Cover photo features Panoramic Porcelain Surfaces™ Elemental Selection Gypsum Calacatta matte on the floor and Gypsum Calacatta glossy on the doors.

Inside back cover photo features Industrial Selection Manor White glossy around the fireplace and on the countertop.

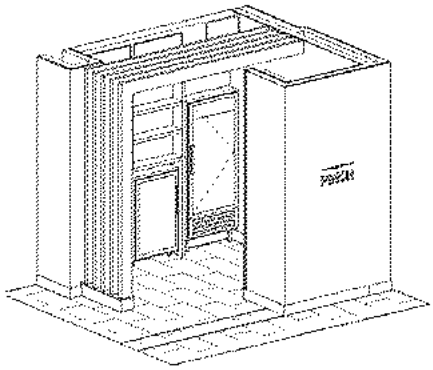
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	In-A-Pinch (with & without Beer & Wine) and Sundries
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries; MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable

Revision 1

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 6. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include In-A-Pinch equipment, glass doors, lighting, power/data, slat walls, etc.

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer. 8. Base Cabinet Units: a. Base Cabinet Top Frames: 3/4-inch solid wood

with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.
9. Drawers:
a. Provide box-type construction with sub-front and back joined with glued dovetail or rabbeted into sides and secured with glue and mechanical fasteners. Clear coat all exposed surfaces. Match color of sides and bottoms with drawer fronts.
b. Drawer Fronts: 3/4-inch-thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine).
c. Drawer Sides Sub-fronts, and Backs: Not less than 1/2-inch hardwood dovetail construction or 3/4-inch thick Particle Board faced with Thermoset Decorative Overlay (melamine). Provide PVC edge banding to match finish of fronts.
d. Exposed fronts fastened to Sub-fronts with mounting screws from interior of body.
e. Drawer bottom of not less than 1/4-inch thick plywood faced with Thermoset Decorative Panel overlay (melamine), set into rabbets in back, sides, and sub-fronts.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include printer, CPU, monitor, keyboard, power/data, etc.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop
Manufacturer	Wilsonart International, Inc.
Model	Q1017
Dimensions	3/4" Thick
Color	Vesuvius
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661
Fire/Smoke Rating	ASTM E84 Class 1 (NFPA Class A) FS-25 or less.
Structural Performance	Mohs Hardness Scale: 6 to 6.5. Density: Not less than 2 g/cm3 when tested per ASTM C97.
Thermal Performance	Thermal shock: Pass 5 cycles, tested per ASTM C484.
Best Practices	UL Greenguard certified
Quality Standards	NSF/ANSI 51 Certified. Stain resistance: Passes ANSI Z124.6. Water absorption: Maximum 0.04 percent, tested per ASTM C97. Chemical resistance: Not Affected when tested per ASTM C650.
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	N
Thickness	3/4"
Finish	Polished
Warranty	One (1) year minimum warranty against defects in materials and workmanship. Commercial Lifetime warranty
Notes	Refer to drawings for edge profile

SPECIAL INSTRUCTIONS

Label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

TECHNICAL DATA
Wilsonart® Quartz

Wilsonart
2501 Wilsonart Drive
P.O. Box 6110
Temple, TX 76503-6110

1. Distributor

Wilsonart LLC
2501 Wilsonart Drive
P.O. Box 6110
Temple, Texas 76503-6110
Toll-Free: 800-433-3222
Website: www.wilsonart.com

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

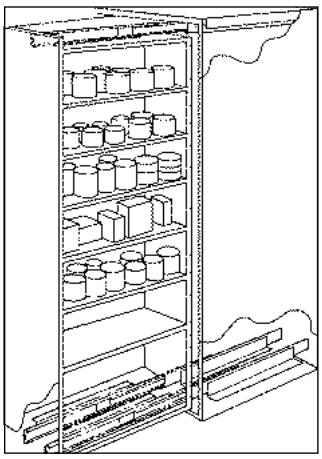
MODEL 301-2590

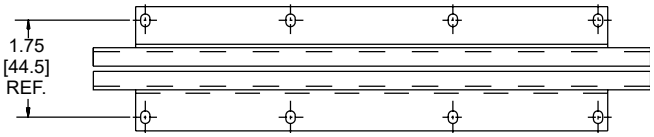
Undermount Shelf Slide
Non-Disconnect
Over Travel

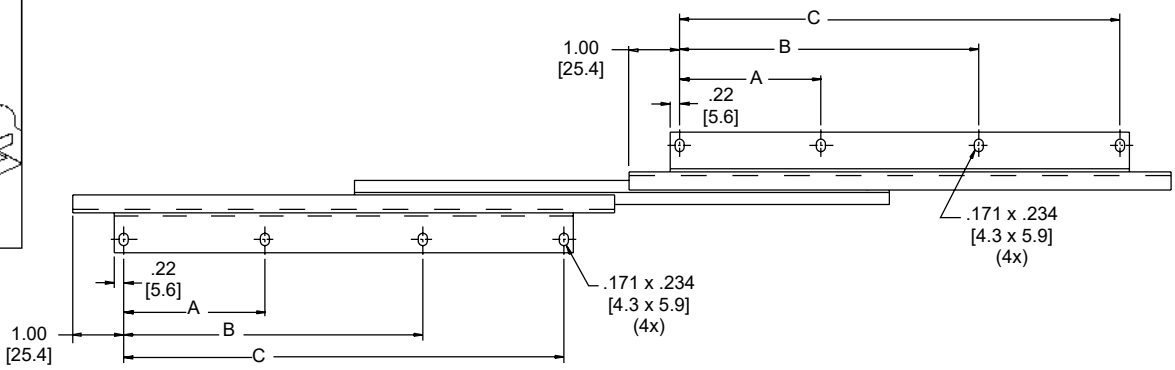
Applications: Pull-out storage shelves, kitchen pull-out pantries, and entertainment centers. Battery trays, storage bins, and generators.

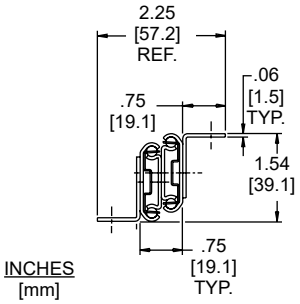
301-2590
QUICK REFERENCE

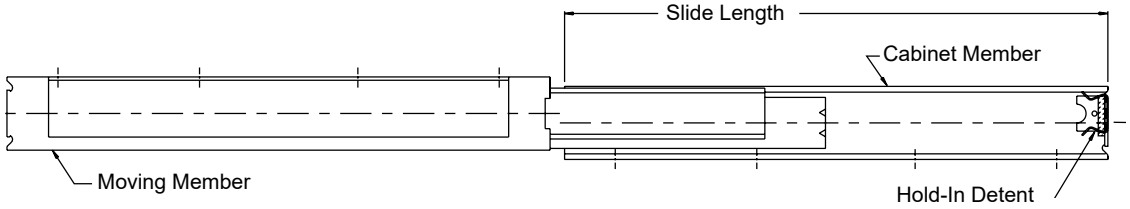
Side Space: .75" [19.1 mm] slide only
2.25" [57.2 mm] with brackets
Length: 12"–28" [305 mm–711 mm]
Overall slide dimensions: .50" x 1.62"
Load rating: Up to 155 lb. [70 kg.]*











Finish	Bright electro-zinc (C) or black zinc (CB) plating
Length	12"–28" [305 mm–711 mm]
Height	1.54" [39.1 mm]
Side Space	.75" [19.1 mm] slide only 2.25" [57.2 mm] with brackets
Load	Up to 155 lbs [70 kg]* Capacity
Travel	Slide length plus .83" [21.1 mm]
Mounting	Bracket/undermount
Hardware	#8 pan head or round head screws
Features	Hold-in detent, silenced open and closed, slide is handed

* Load rating based on a 16" wide shelf cycled 50,000 times.

1. Mark a line at least 1/4" [6.4 mm] in from the right side of the cabinet opening and parallel to the cabinet side.
2. Locate a point on this line 1.00" [25.4 mm] back from the desired front of the slide.
3. Using #8 pan or round head screws, mount the cabinet member bracket through the first hole at this point.

   NOTE: For maximum strength, ensure that the hold-in detent spring is installed inside the cabinet.
4. Mount the left hand slide similarly, locating the screw centerline of the cabinet member bracket at least 1/4" [6.4 mm] in from the left side of the opening.
5. Keeping the right and left hand slides parallel, install the remainder of the cabinet member screws.

   NOTE: When using soft materials such as particle board, replace rear cabinet mounting screws with through bolts.
6. With slides extended, center the shelf and drive the screws up through the moving member brackets into the bottom of the shelf.

   NOTE: If the unit is mounted too close to the floor reverse the procedure above and install the moving member screws first.

Slide Ordering Instructions

Complete your slide order for Accuride model 301-2590 by specifying the following:

20 Pair	C	301-2590	-16	D
Total Required Slides				
	Slide Finish			
		Slide Model Number		
			Slide Length	
				Optional Polybag Packaging

Packaging

Distributor (D) Pack: All lengths are packaged 5 pair per box. Polybag includes one pair of slides and mounting screws.

Bulk Pack: Slides only. Left hand slides and right hand slides are packaged in separate boxes.

Lengths 12"–18"	20 each per box
Lengths 20"–28"	10 each per box

Specifications

Slide members and ball retainers: Cold rolled steel
Ball bearings: Carburized steel

RoHS compliant

NOTE: Specifications, materials, prices, terms, and delivery are subject to change without notice.

Real Living Decor Package

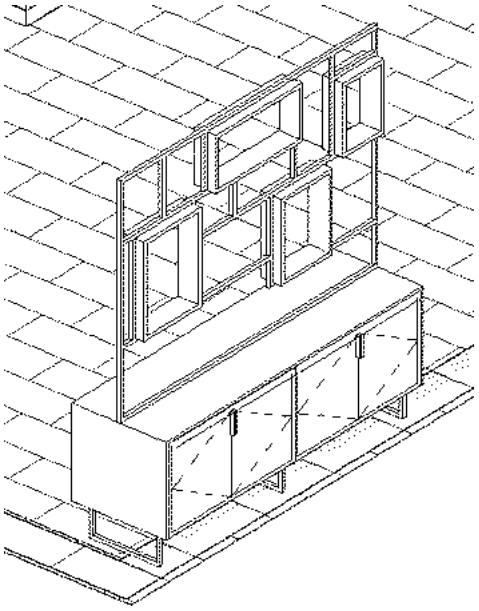
Issue Date: **Aug 30, 2021**
Revision Date:



Item Name	Hub Credenza Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of metal frame, metal legs, cabinets, shelves and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries, MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Millwork Hardware	Refer to Specifications within Building Product Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer. 8. Base Cabinet Units: a. Base Cabinet Top Frames: 3/4-inch solid wood

with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with ceiling fixtures for ceiling anchors. Mount pulls vertically.

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Belstone
Model	Dodi
Dimensions	Refer to Design Guideline Drawings
Color	Demitasse
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Notes	Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Revision Date:

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	JG Edelen
Model	EHS-836
Dimensions	Refer to Design Guideline Drawings
Color	Goldfield
Finish	Polished Straight Edge
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Finish	Polished Straight Edge
Notes	Refer to drawings for edge profile Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

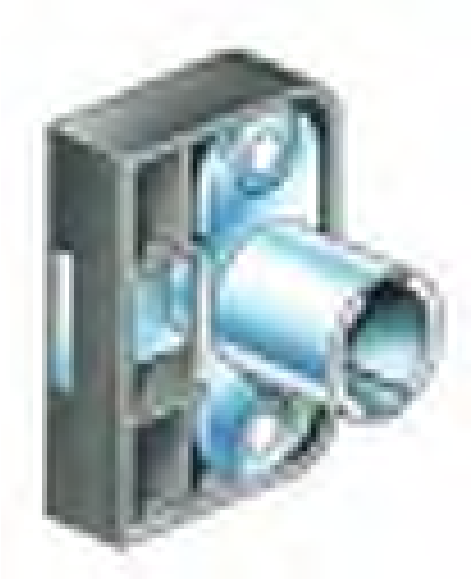
Item Name	Door Locks
Item Type	Locks
Description	Cabinet Lock for Doors
Manufacturer	CompX-Timberline
Model	290 Series
Finish	Satin Nickel
CSI #	12 32 16
Omniclass #	22-12 32 16
Quality Standards	ANSI/BHMA A156.9 Cabinet Hardware
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	Y
Screw/Nail	As recommended by Manufacturer
Finish	US15
Lead Time	Standard lead times are 3-5 business days from receipt of purchase order. Lead time should be verified with manufacturer.
Warranty	Warranted one year from the date of purchase order.
Notes	Use C700LP-15 Plugs https://tinyurl.com/2s3jxrad



SPECIAL INSTRUCTIONS

All locks in the same component to be on the same key, unless noted otherwise. Other millwork items on the hotel property with locks shall be keyed separately. Ensure master key is different at each hotel in the system.

Revision Date:

Item Name	Decorative Metal Fabrications
Item Type	Aluminum Sheet & Tube
Description	1/8" thick aluminum sheet metal and 1" x 1" Aluminum Tube, Powder Coated
Manufacturer	Not Applicable
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Tiger Drylac 049/66230, Color: Brown C33
Finish	Metallic Smooth/Matte; Fluropolymer (PVDF) 70% resin, 2-coat system complying with AAMA 2605
CSI #	057500 - Decorative Formed Metal
Omniclass #	22 - 057500 - Decorative Formed Metal
Quality Standards	Aluminum Plate and Sheet: ASTM B209/B209M, Alloy 6061-T6; Aluminum Extruded Bar and Tubes: ASTM B221, Alloy 6063-T5. Comply with NAAMM "Metal Finishes Manual" for “Architectural and Metal Products” for recommendations relative to application and designations of finishes. for type of use and finish indicated.
Part of an Assembly	N
Notes	Sheet metal directly adhered to substrate per manufacturer's recommended adhesive. Form decorative metal to required shapes and sizes, true to line and level with true curves and accurate angles and surfaces. Finish exposed surfaces to smooth, sharp, well-defined lines and arris.

SPECIAL INSTRUCTIONS

If finished in the field; refer to the Building Product Manual Paint Schedule in the appendix for interior painted metal surfaces.

TIGER Drylac® Powder Coatings

SERIES 49 - interior and exterior applications

POLYESTER TGIC WEATHER RESISTANT POWDER COATING FOR INTERIOR AND EXTERIOR APPLICATIONS

Typical applications

- residential windows and doors
- lawn mowers and garden equipment
- patio furniture
- automotive accessories
- bicycles and motorcycles
- agricultural machinery
- sporting goods
- internal ship components

Product details

Standard packaging	in original 44 & 55 lb (20 & 25 kg) boxes and 5 lb (2.5 kg) minipack
Specific gravity (ASTM D792)	approximately 1.2-1.8 g/cm^3 depending on pigmentation
Theoretical coverage	at 2.5 mils (60 µm) film thickness: **51.5 ft²/lb (11.1 m²/kg)**. Refer also to "Theoretic Powder Coating Coverage Chart" version 00-1001 (imperial) version 00-1000 (metric)
Storage stability	12 months at no more than 77 °F (25 °C) avoid direct and extended exposure to heat

Finish

finish	gloss
smooth *glossy*	80-95+*
smooth *semi-gloss*	55-65*
smooth *matte*	15-25*
rough texture *glossy*	visual
rough texture *matte*	visual
fine texture	visual
fluorescent	visual
clear, glitter, candy tones	visual
dormant transparent	visual
holographic	visual
metallic and other special effects	visual

* *Gloss level according to ASTM 523 at 60° angle (doesn't apply to metallic effect powder coatings). The measured gloss level of effect powder coatings can diverge from the details given in this Product Data Sheet. The creation of tolerance samples is recommended.*

Available as stock product in a selection of colors and finishes (see color charts). It can be made to order in non-stock colors (minimum order quantity applies).

Features

- good weather resistance
- good mechanical properties
- good flow
- good coverage
- good storage stability
- available in Out Gassing Forgiving (OGF) formulation
- Underwriter Laboratories recognized component (UL approved)

Underwriters Laboratories Inc., (UL) Recognition.

Pretreatment

The following table reflects the common methods of pre-treatment with regards to various substrates and applications. In selecting the proper type of pretreatment, the suitability of the type of powder coating for a desired application according to the guidelines on this page should be observed.

	Aluminum			Galvanized Steel				Steel		
Degreasing	○			○				○		
1) Chromating	○	○	○	○	○	○	○			
2) Pre-Anodizing	○	○	○							
2) Chrome free	○	○	○	○	○					
Iron Phosphating								○	○	
Zinc Phosphating				○	○	○	○	○	○	○
Blasting								○	○	○
3) Sweeping				○	○	○	○			
	I	E	A	I	E	A	S	I	E	S[4]

Application: I = interior; E = exterior; A = architectural; S = steel

1) according to ASTM B 449
2) according to GSB quality and test regulations. The suitability of this type of pretreatment needs to be established through a boiling water test and subsequent cross-hatch adhesion and adhesive tape removal test
3) only for zinc coated parts >1.8 mils (>45 µm)
4) for a two-coat process/TIGER Shield

Processing

Corona and Tribostatic*

** For Tribostatic powder coatings, confirm before ordering. Suitability of metallic effects for Tribostatic processing must be verified prior to actual application. Please refer to the latest edition of the relevant application guidelines for metallic effect powder coatings.*

Since not all powder coatings are suitable for recycling/reclaim, please verify before ordering.

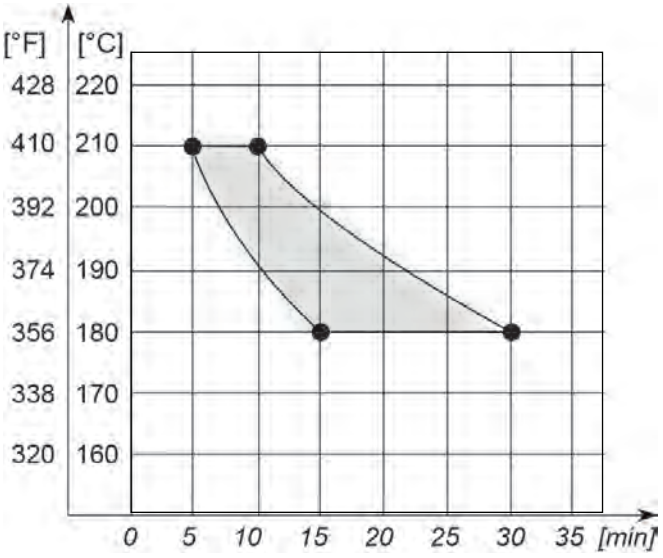
Product data sheet

TIGER Drylac® Powder Coatings

Cure parameters

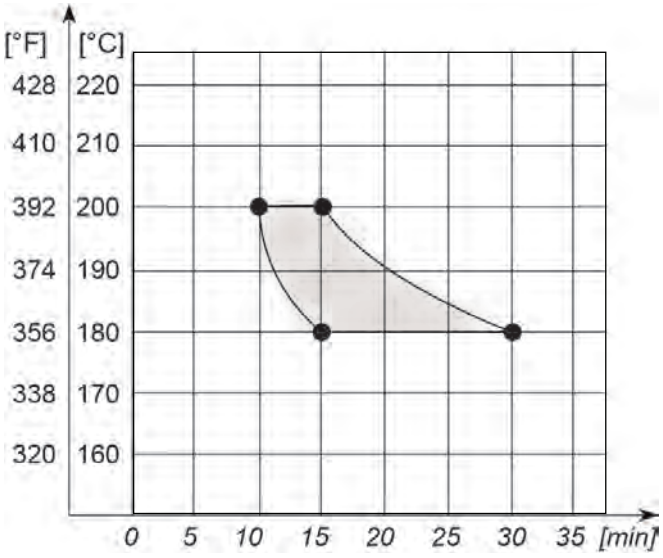
(substrate temperature versus curing time)

smooth *glossy*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
410 °F (210 °C)	5 minutes	10 minutes

smooth *matte*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
392 °F (200 °C)	10 minutes	15 minutes

Cure parameters must be closely observed since mechanical properties will develop before full cross-linking.

Test results

Checked under laboratory conditions on iron phosphated steel test panels Bonderite B-1000 or equivalent. Cure conditions are according to the cure curves. Actual product performance may vary due to product-specific properties such as gloss, color, effect and finish as well as application-related and environmental influences. When used as a two-coat system, the increase in film thickness will result in a decrease of mechanical properties.

test method	test	Series 49 smooth *glossy*	Series 49 smooth *semi-gloss*	Series 49 smooth *matte*
ISO 2360	**recommended film thickness**	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)
ASTM D523	**gloss - 60°**	80-95+	55-65	15-25
ASTM D3359 method B	**cross cut tape test** 1mm cutting distance	5B	5B	5B
ASTM D522	**mandrel bending test** cracking of coating	≤1/8 inch (≤3 mm)	≤5/32 inch (≤4 mm)	≤3/16 inch (≤5 mm)
ASTM D2794	**ball impact test** cracking of coating	80 in/lb no appearance of cracks down to the substrate	80 in/lb no appearance of cracks down to the substrate	80 in/lb no appearance of cracks down to the substrate
ASTM D3363	**pencil hardness**	2H minimum	2H minimum	2H minimum
ASTM D2247	**determination of resistance to humidity** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering
ASTM B117	**salt spray resistance** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering

Cleaning recommendations: refer to the latest edition of TIGER “Cleaning Recommendations” information sheet, Version 00-1005.

Series 49

Please note

For metallic finishes, it is recommended to observe the guidelines published in the latest edition of TIGER Drylac® "Application guidelines for metallic effect powder coatings".

Please consult the manufacturer before applying any 2-coat systems that feature (i) a primer or e-coat as base coat and (ii) a metallic effect powder coating as a top coat.

Top coating with a clear exterior grade powder coating over an interior grade powder coating does not result into a weather resistant coating system.

Post-bending properties of any part must be verified prior to application. Minor cracks in the coated surface may lead to corrosion.

Joint sealants and any other auxiliary products, such as glazing aids, gliding waxes, drilling and cutting lubricants, which come in contact with the coated surface, must be pH-neutral and free of substances that may damage the finish. Therefore, a suitability test at the applicator's end, prior to coating, is highly recommended.

In general, colors in the red, orange and yellow range may require an increased film thickness to achieve full hiding.

Please read and understand the Safety Data Sheet (SDS) before use.

Chemical resistance

The required chemical resistance of a powder coating depends, among other things, on its formulation. Chemical resistance requirements must be considered according to processing conditions and final use of the finished product. This is best established during the product specification process. Agreement between all parties involved must be reached about the requirements for such chemical resistance as well as the test method, which may be performed in accordance with PCI test method #8 "Solvent Cure Test". Furthermore, the test duration and concentration of the test media need to be agreed upon.

Disclaimer

TIGER's verbal and written recommendations for the use of its products are based upon experience and in accordance with current technological standards. These are provided in order to support the buyer or user. They are non-committal and do not create any additional commitments to the purchase agreement. They do not release the buyer from verifying the suitability of TIGER products for the intended application. TIGER warrants that its products are free of flaws and defects to the extent stipulated in the Terms of Delivery and Payment.

As part of TIGER product information program, each Product Data Sheet is updated periodically. The latest version shall prevail. It is recommended to always check for the latest editions on TIGER's website download area www.tiger-coatings.com to make sure you have the most current version of this Product Data Sheet. The information on TIGER's Product Data Sheets are subject to change without notification.

This Product Data Sheet supersedes and replaces all previous Product Data Sheet versions and notes to customers published in relation to this product and is only intended to provide a general overview on the product.

Latest versions of Technical Information Sheets and Terms of Delivery and Payment are downloadable from www.tiger-coatings.com and form an integral part of this Product Data Sheet.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Paint - Wood
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Wood Millwork Paint
Manufacturer	Sherwin Williams
Model	Solo 100% Acrylic Interior-Exterior (A76 Series)
Color	SW7068 Grizzle Gray
Finish	Semi-gloss
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	Solo 100% Acrylic Interior-Exterior (A76W00051)
Finish	Semi-gloss
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish.
All walls to receive Gloss, Enamel Paint, or Murals to have a Level 5 Gypsum Board Finish.

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

A76-Series

CHARACTERISTICS

Solo 100% Acrylic Interior-Exterior creates a scrubbable finish that is resistant to burnishing, wearing, and blocking. **Solo** is excellent choice for specifications where 100% acrylic interior finishes are required. It is designed for use on doors, trim, walls, & shutters. **Solo** can be applied to surfaces with a pH up to 13.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350-400 sq. ft. per gallon @ 4 mils wet; 1.5 mils dry

Drying Time, @ 77°F (25°C), 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 35-45 units @ 60°

Tinting with CCE only:

Base:	oz. per gallon:	Strength:
Extra White	0-6	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor

Extra White A76W00051
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 38 ± 2%

Weight Solids: 50 ± 2%

Weight per Gallon: 10.16 lbs (4.61 kg)

Flash Point: NA

Vehicle Type: 100% Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 52.42 grains/(hr ft^2 in Hg)

Mildew Resistant
This coating contains agents which inhibit the growth of mildew on the surface of this coating film.

COMPLIANCE

As of 07/28/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	No
MIR-Manufacturer Inventory	No
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F (10°C). No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 1/4 to 1/2 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.015-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

SPECIFICATIONS

Apply 2 topcoats of Solo directly over existing properly prepared, interior or exterior coatings, or new interior bare drywall, plaster (cured with a pH of less than 13), masonry (cured with a pH of less than 13) and non-bleeding wood.

Interior

Drywall: Self-prime using 2 coats of Solo
or
1 coat ProMar 200 Zero V.O.C. Primer
2 coats Solo

Plaster: Self-prime using 2 coats of Solo
or
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Wood: Self-prime using 2 coats of Solo
or
1 coat Premium Wall and Wood Primer
2 coats Solo

Interior and Exterior

Aluminum, Galvanized & Steel:(if needed)
1 coat All Surface Enamel Latex Primer
2 coats Solo

Block:
1 coat ConFlex Block Filler
2 coats Solo

Masonry, Cement, Stucco:
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Exterior

Wood, Composition Board:
1 coat Exterior Oil-Based Wood Primer
or
1 coat Exterior Latex Wood Primer
2 coats Solo

Plywood:
1 coat Exterior Latex Wood Primer
2 coats Solo

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

continued on back

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Paint - Wood
Item Type	Interior Water-based Acrylic Latex Paint
Description	Interior Wood Millwork Paint
Manufacturer	Sherwin Williams
Model	Solo 100% Acrylic Interior-Exterior (A76 Series)
Color	SW9170 Acier
Finish	Semi-gloss
CSI #	099000 - Painting
Omniclass #	22-099000
Best Practices	Low-VOC, UL Greenguard Certified
Quality Standards	Interior paint: Comply with Green Seal GS-11; MPI Architectural Painting Specification Manual; 40 CFR, Part 59, Subpart D 2001, National Volatile Organic Compound Emission Standards for Architectural Coatings
Eco-Feature(s) *as per manufacturer	Formulated without lead, mercury or chromates.
Product Type	Solo 100% Acrylic Interior-Exterior (A76W00051)
Finish	Semi-gloss
Lead Time	Standard lead times are 3-5 days from receipt of purchase order. Lead time should be confirmed by the manufacturer.
Warranty	Limited Lifetime

SPECIAL INSTRUCTIONS

Primer, undercoat, block filler, finish coat(s) are to be compatible and of the same manufacturer. All primers and undercoats are to be tinted to 50% lighter than the selected and approved finish coat color. All finish coats are to be tinted 25% darker than the primer coat until approved finish coat color is achieved. When the color schedule calls for the use of DEEP TONES (interior and/or exterior), it is the responsibility of the painting contractor to utilize the appropriate Deep Base Primers as manufactured by the painting company for use on the substrate for which they are intended.

Required Wall Finish Levels:
All walls to receive VWC are to have a Level 3 (minimum) Gypsum Board Finish.
All walls to receive Paint (or light to medium weight wall covering) are to have a Level 4 Gypsum Board Finish.
All walls to receive Gloss, Enamel Paint, or Murals to have a Level 5 Gypsum Board Finish.

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

A76-Series

CHARACTERISTICS

Solo 100% Acrylic Interior-Exterior creates a scrubbable finish that is resistant to burnishing, wearing, and blocking. **Solo** is excellent choice for specifications where 100% acrylic interior finishes are required. It is designed for use on doors, trim, walls, & shutters. **Solo** can be applied to surfaces with a pH up to 13.

Color: Most Colors

To optimize hide and color development, always use the recommended P-Shade primer

Coverage: 350-400 sq. ft. per gallon @ 4 mils wet; 1.5 mils dry

Drying Time, @ 77°F (25°C), 50% RH:

Touch:	1 Hour
Recoat:	4 Hours

Drying and recoat times are temperature, humidity, and film thickness dependent

Finish: 35-45 units @ 60°

Tinting with CCE only:

Base:	oz. per gallon:	Strength:
Extra White	0-6	SherColor
Deep Base	4-12	SherColor
Ultradeep Base	10-12	SherColor

Extra White A76W00051
(may vary by color)

V.O.C. (less exempt solvents):
less than 50 grams per litre; 0.42 lbs. per gallon
As per 40 CFR 59.406

Volume Solids: 38 ± 2%

Weight Solids: 50 ± 2%

Weight per Gallon: 10.16 lbs (4.61 kg)

Flash Point: NA

Vehicle Type: 100% Acrylic

Shelf Life: 36 months unopened

WVP Perms (US): 52.42 grains/(hr ft^2 in Hg)

Mildew Resistant
This coating contains agents which inhibit the growth of mildew on the surface of this coating film.

COMPLIANCE

As of 07/28/2020, Complies with:

OTC	Yes
OTC Phase II	Yes
SCAQMD	Yes
CARB	Yes
CARB SCM 2007	Yes
Canada	Yes
LEED® v4 & v4.1 Emissions	Yes
LEED® v4 & v4.1 V.O.C.	Yes
EPD-NSF® Certified	No
MIR-Manufacturer Inventory	No
MPI®	Yes

APPLICATION

Apply at temperatures above 50°F (10°C). No reduction needed.

Brush:

Use a nylon-polyester brush.

Roller:

Use a 1/4 to 1/2 inch nap synthetic cover.

For specific brushes and rollers, please refer to our Brush and Roller Guide.

Spray—Airless

Pressure	2000 p.s.i.
Tip	.015-.021 inch

APPLICATION TIPS

Make sure product is completely agitated (mechanically or manually) before use.

SPECIFICATIONS

Apply 2 topcoats of Solo directly over existing properly prepared, interior or exterior coatings, or new interior bare drywall, plaster (cured with a pH of less than 13), masonry (cured with a pH of less than 13) and non-bleeding wood.

Interior

Drywall: Self-prime using 2 coats of Solo
or
1 coat ProMar 200 Zero V.O.C. Primer
2 coats Solo

Plaster: Self-prime using 2 coats of Solo
or
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Wood: Self-prime using 2 coats of Solo
or
1 coat Premium Wall and Wood Primer
2 coats Solo

Interior and Exterior

Aluminum, Galvanized & Steel:(if needed)
1 coat All Surface Enamel Latex Primer
2 coats Solo

Block:
1 coat ConFlex Block Filler
2 coats Solo

Masonry, Cement, Stucco:
1 coat Loxon Concrete and Masonry Primer
2 coats Solo

Exterior

Wood, Composition Board:
1 coat Exterior Oil-Based Wood Primer
or
1 coat Exterior Latex Wood Primer
2 coats Solo

Plywood:
1 coat Exterior Latex Wood Primer
2 coats Solo

Other primers may be appropriate.

When repainting involves a drastic color change, a coat of primer will improve the hiding performance of the topcoat color.

Solo®

100% Acrylic Interior-Exterior Semi-Gloss

SURFACE PREPARATION

WARNING! Removal of old paint by sanding, scraping or other means may generate dust or fumes that contain lead. Exposure to lead dust or fumes may cause brain damage or other adverse health effects, especially in children or pregnant women. Controlling exposure to lead or other hazardous substances requires the use of proper protective equipment, such as a properly fitted respirator (**NIOSH** approved) and proper containment and cleanup. For more information, call the National Lead Information Center at **1-800-424-LEAD** (in US) or contact your local health authority.

Remove all surface contamination by washing with an appropriate cleaner, rinse thoroughly and allow to dry. Existing peeled or checked paint should be scraped and sanded to a sound surface. Glossy surfaces should be sanded dull. Stains from water, smoke, ink, pencil, grease, etc. should be sealed with the appropriate primer/sealer. Recognize that any surface preparation short of total removal of the old coating may compromise the service length of the system.

Aluminum and Galvanized Steel:

Wash to remove any oil, grease, or other surface contamination. All corrosion must be removed with sandpaper, wire brush, or other abrading method.

Caulking:

Gaps between walls, ceilings, crown moldings, and other interior trim can be filled with the appropriate caulk after priming the surface.

Concrete Block:

All new surfaces must be cured according to recommendations—usually about 30 days. Rough surfaces can be filled with ConFlex Block Filler to provide a smooth surface. The filler must be thoroughly dry before topcoating.

Drywall:

Fill cracks and holes with patching paste/spackle and sand smooth. Joint compounds must be cured and sanded smooth. Remove all sanding dust.

Masonry, Concrete, Cement:

All new surfaces must be cured according to the supplier's recommendations—usually about 30 days. Remove all form release and curing agents. Rough surfaces can be filled to provide a smooth surface. If painting cannot wait 30 days, allow the surface to cure 7 days and prime the surface with Loxon Concrete & Masonry Primer.

Stucco:

Remove any loose stucco, efflorescence, or laitance. Allow new stucco to cure at least 30 days before painting. If painting cannot wait 30 days, allow the surface to dry 7 days and prime with Loxon Concrete & Masonry Primer. Repair cracks, voids, and other holes with an elastomeric patch or sealant.

SURFACE PREPARATION

Mildew:

Prior to attempting to remove mildew, it is always recommended to test any cleaner on a small, inconspicuous area prior to use. Bleach and bleaching type cleaners may damage or discolor existing paint films. Bleach alternative cleaning solutions may be advised.

Mildew may be removed before painting by washing with a solution of 1 part liquid bleach and 3 parts water. Apply the solution and scrub the mildewed area. Allow the solution to remain on the surface for 10 minutes. Rinse thoroughly with water and allow the surface to dry before painting. Wear protective eyewear, waterproof gloves, and protective clothing. Quickly wash off any of the mixture that comes in contact with your skin. Do not add detergents or ammonia to the bleach/water solution.

Steel:

Rust and mill scale must be removed using sandpaper, wire brush, or other abrading method. Bare steel must be primed the same day as cleaned.

Plaster:

Must be cured, usually 30 days, and hard. If painting cannot wait, allow the surface to dry 7 days and prime with Loxon Concrete and Masonry Primer. Soft, porous, or powdery plaster should be treated with a solution of 1 pint household vinegar to 1 gallon of water. Repeat until the surface is hard, rinse with water and allow to dry before painting.

Vinyl or other PVC Building Products :

Clean the surface thoroughly by scrubbing with warm, soapy water. Rinse thoroughly, prime with appropriate white primer. Do not paint vinyl with any color darker than the original color. Do not paint vinyl with a color having a Light Reflective Value (LRV) of less than 56. Painting with darker colors lower than an LRV of 56 may cause vinyl to warp. Follow all painting guidelines of the vinyl manufacturer when painting. Only paint properly installed vinyl siding. Deviating from the manufacturer's painting guidelines may cause the warranty to be voided.

Wood, Plywood, Composition Board:

Clean the surface thoroughly then sand any exposed wood to a fresh surface. Patch all holes and imperfections with a wood filler or putty and sand smooth. All patched areas must be primed. Knots and some woods, such as redwood and cedar, contain a high amount of tannin, a colored wood extract. If applied to these bare woods, it may show some staining.

Exterior: If staining persists, spot prime severe areas with 1 coat of Exterior Oil-Based Wood Primer prior to using.

Interior: If staining persists, spot prime severe areas with 1 coat of Multi-Purpose Oil-Based Primer.

CAUTIONS

Protect from freezing.
Non-photochemically reactive.

Before using, carefully read **CAUTIONS on label**

Use only with adequate ventilation. To avoid overexposure, open windows and doors or use other means to ensure fresh air entry during application and drying. If you experience eye watering, headaches, or dizziness, increase fresh air, or wear respiratory protection (**NIOSH** approved) or leave the area. Avoid contact with eyes and skin. Wash hands after using. Keep container closed when not in use. Do not transfer contents to other containers for storage. **FIRST AID:** In case of eye contact, flush thoroughly with large amounts of water. Get medical attention if irritation persists. If swallowed, call Poison Control Center, hospital emergency room, or physician immediately. **WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. **DO NOT TAKE INTERNALLY. KEEP OUT OF THE REACH OF CHILDREN.**

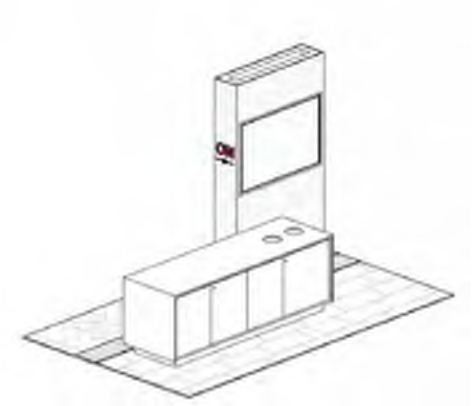
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	On Us Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries, MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual
Millwork Hardware	Refer to Specifications within Building Product

	Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to

support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.
8. Base Cabinet Units:
a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include food equipment, trash/linen bins, power/data, etc.
No pulls required.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Part of an Assembly	Y
Finish	Polished Straight Edge
Notes	Refer to drawings for edge profile Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Description	107	335	350
Thickness	0.045" ± 0.005" (1.14mm ± 0.13mm)	0.028" + 0.001 - 0.004" (0.71mm + 0.03 - 0.10mm)	0.036" ± 0.005" (0.91mm ± 0.13mm)
Weight per square foot	0.322#	0.186#	0.260#

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

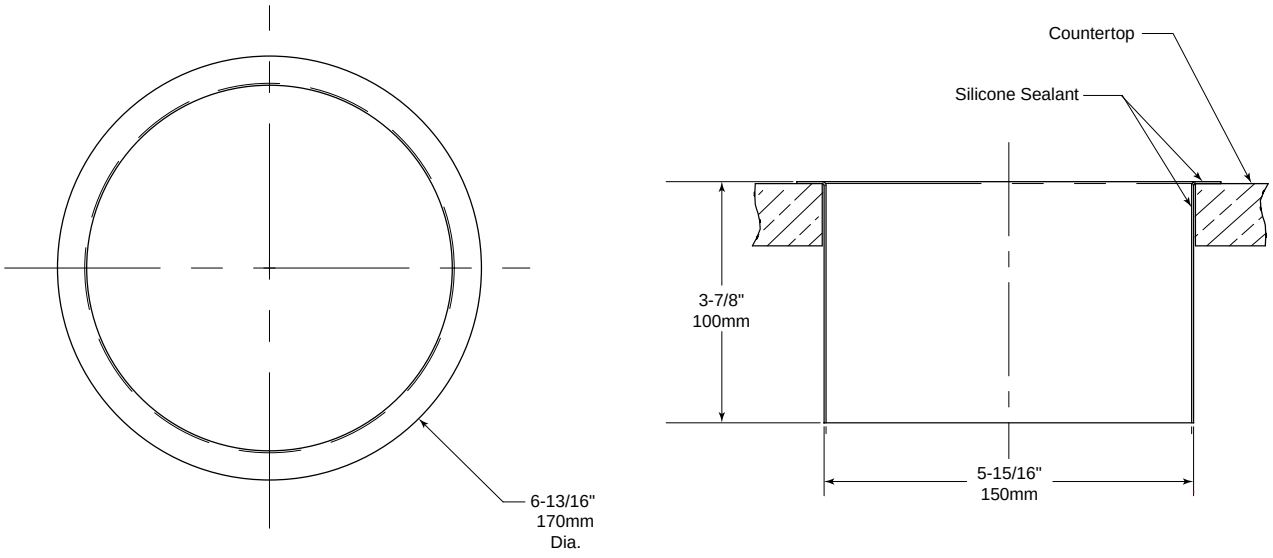
Technical Data

CIRCULAR WASTE CHUTE FOR MOUNTING IN COUNTERTOPS

B-532



Rough Countertop Opening
6-1/8" ± 1/16" (155 ± 1.5mm)

MATERIALS:

Circular Waste Chute — Type-300, 22-gauge (0.8mm) stainless steel. Exposed surfaces have satin finish.

INSTALLATION:

Unit is designed for installation in 6-1/8" ± 1/16" (155 ± 1.5mm) diameter hole in any countertop. To install unit permanently in place, cut hole in countertop. Fill in underside of waste chute lip and around portion of waste chute body which protrudes down into mounting hole with silicone sealant (not furnished). Install unit into countertop hole. Once unit is in place, wipe off any excess glue with a clean rag.

SPECIFICATION:

Circular waste chute for mounting in countertops shall be type-300 stainless steel with 5-7/8" (150mm) inside diameter, flat lip and satin finish on exposed surfaces. Waste chute opening shall provide access to deposit waste into waste receptacle (not furnished) placed under the countertop.

Circular Waste Chute For Mounting In Countertops shall be Model B-532 of Bobrick Washroom Equipment, Inc., Clifton Park, New York; Jackson, Tennessee; Los Angeles, California; Bobrick Washroom Equipment Company, Scarborough Ontario; Bobrick Washroom Equipment Pty. Ltd., Australia; and Bobrick Washroom Equipment Limited, United Kingdom.

The illustrations and descriptions herein are applicable to production as of the date of this Technical Data Sheet.
The manufacturer reserves the right to, and does from time to time, make changes and improvements in designs and dimensions.

Revised 6/30/15 Printed in U.S.A.

Item Name	Buffet Island Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of sheet metal lining, metal legs, cabinets, shelves and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries, MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable

Revision Date:

Millwork Hardware	Refer to Specifications within Building Product Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at

blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.
8. Base Cabinet Units:
a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with power/data, etc.

Notes	Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

TECHNICAL DATA
Wilsonart® Quartz

Wilsonart
2501 Wilsonart Drive
P.O. Box 6110
Temple, TX 76503-6110

1. Distributor

Wilsonart LLC
2501 Wilsonart Drive
P.O. Box 6110
Temple, Texas 76503-6110
Toll-Free: 800-433-3222
Website: www.wilsonart.com

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Medium (V2)

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty.
Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

APPLICATION NOTES:

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

Fifteen Year Limited Warranty, visit daltile.com for complete warranty details.♦

Twenty Five Year Commercial Limited Warranty, visit daltile.com for complete warranty details.

Lifetime Residential Limited Warranty, visit daltile.com for complete warranty details.*

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Wilsonart International, Inc.
Model	Q1001
Dimensions	3/4" Thick
Color	Serene
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Fire/Smoke Rating	ASTM E84 Class 1 (NFPA Class A) FS-25 or less.
Structural Performance	Mohs Hardness Scale: 6 to 6.5. Density: Not less than 2 g/cm3 when tested per ASTM C97.
Thermal Performance	Thermal shock: Pass 5 cycles, tested per ASTM C484.
Best Practices	UL Greenguard certified
Quality Standards	NSF/ANSI 51 Certified. Stain resistance: Passes ANSI Z124.6. Water absorption: Maximum 0.04 percent, tested per ASTM C97. Chemical resistance: Not Affected when tested per ASTM C650.
Accessibility Compliance	Not Applicable
Water Sense	Not Applicable
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	N
Thickness	3/4"
Finish	Polished
Warranty	One (1) year minimum warranty against defects in materials and workmanship. Commercial Lifetime warranty
Notes	Refer to drawings for edge profile

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Physical Properties

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

Copyright 2020, Wilsonart LLC

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

POLYESTER TGIC WEATHER RESISTANT POWDER COATING FOR INTERIOR AND EXTERIOR APPLICATIONS

Typical applications

- residential windows and doors
- lawn mowers and garden equipment
- patio furniture
- automotive accessories
- bicycles and motorcycles
- agricultural machinery
- sporting goods
- internal ship components

Product details

Standard packaging — in original 44 & 55 lb (20 & 25 kg) boxes and 5 lb (2.5 kg) minipack

Specific gravity (ASTM D792) — approximately 1.2-1.8 g/cm^3 depending on pigmentation

Theoretical coverage — at 2.5 mils (60 µm) film thickness: **51.5 ft²/lb (11.1 m²/kg)**. Refer also to "Theoretic Powder Coating Coverage Chart" version 00-1001 (imperial) version 00-1000 (metric)

Storage stability — 12 months at no more than 77 °F (25 °C) avoid direct and extended exposure to heat

Finish

finish	gloss
smooth *glossy*	80-95+*
smooth *semi-gloss*	55-65*
smooth *matte*	15-25*
rough texture *glossy*	visual
rough texture *matte*	visual
fine texture	visual
fluorescent	visual
clear, glitter, candy tones	visual
dormant transparent	visual
holographic	visual
metallic and other special effects	visual

* *Gloss level according to ASTM 523 at 60° angle (doesn't apply to metallic effect powder coatings). The measured gloss level of effect powder coatings can diverge from the details given in this Product Data Sheet. The creation of tolerance samples is recommended.*

Available as stock product in a selection of colors and finishes (see color charts). It can be made to order in non-stock colors (minimum order quantity applies).

Features

- good weather resistance
- good mechanical properties
- good flow
- good coverage
- good storage stability
- available in Out Gassing Forgiving (OGF) formulation
- Underwriter Laboratories recognized component (UL approved)

Underwriters Laboratories Inc., (UL) Recognition.

Pretreatment

The following table reflects the common methods of pre-treatment with regards to various substrates and applications. In selecting the proper type of pretreatment, the suitability of the type of powder coating for a desired application according to the guidelines on this page should be observed.

	Aluminum			Galvanized Steel				Steel		
Degreasing	○			○				○		
1) Chromating	○	○	○	○	○	○	○			
2) Pre-Anodizing	○	○	○							
2) Chrome free	○	○	○	○	○					
Iron Phosphating								○	○	
Zinc Phosphating				○	○	○	○	○	○	○
Blasting								○	○	○
3) Sweeping				○	○	○	○			
	I	E	A	I	E	A	S	I	E	S[4]

Application: I = interior; E = exterior; A = architectural; S = steel

1) according to ASTM B 449
2) according to GSB quality and test regulations. The suitability of this type of pretreatment needs to be established through a boiling water test and subsequent cross-hatch adhesion and adhesive tape removal test
3) only for zinc coated parts >1.8 mils (>45 µm)
4) for a two-coat process/TIGER Shield

Processing

Corona and Tribostatic*

** For Tribostatic powder coatings, confirm before ordering. Suitability of metallic effects for Tribostatic processing must be verified prior to actual application. Please refer to the latest edition of the relevant application guidelines for metallic effect powder coatings.*

Since not all powder coatings are suitable for recycling/reclaim, please verify before ordering.

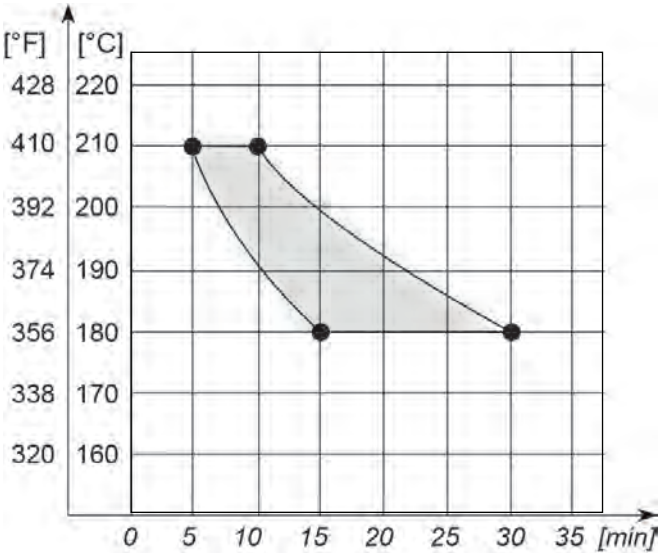
Product data sheet

TIGER Drylac® Powder Coatings

Cure parameters

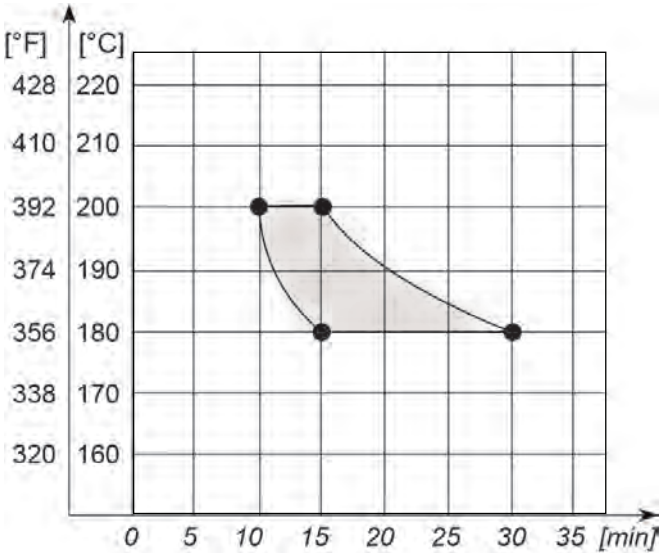
(substrate temperature versus curing time)

smooth *glossy*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
410 °F (210 °C)	5 minutes	10 minutes

smooth *matte*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
392 °F (200 °C)	10 minutes	15 minutes

Cure parameters must be closely observed since mechanical properties will develop before full cross-linking.

Test results

Checked under laboratory conditions on iron phosphated steel test panels Bonderite B-1000 or equivalent. Cure conditions are according to the cure curves. Actual product performance may vary due to product-specific properties such as gloss, color, effect and finish as well as application-related and environmental influences. When used as a two-coat system, the increase in film thickness will result in a decrease of mechanical properties.

test method	test	Series 49 smooth *glossy*	Series 49 smooth *semi-gloss*	Series 49 smooth *matte*
ISO 2360	**recommended film thickness**	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)
ASTM D523	**gloss - 60°**	80-95+	55-65	15-25
ASTM D3359 method B	**cross cut tape test** 1mm cutting distance	5B	5B	5B
ASTM D522	**mandrel bending test** cracking of coating	≤1/8 inch (≤3 mm)	≤5/32 inch (≤4 mm)	≤3/16 inch (≤5 mm)
ASTM D2794	**ball impact test** cracking of coating	80 in/lb no appearance of cracks down to the substrate	80 in/lb no appearance of cracks down to the substrate	80 in/lb no appearance of cracks down to the substrate
ASTM D3363	**pencil hardness**	2H minimum	2H minimum	2H minimum
ASTM D2247	**determination of resistance to humidity** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering
ASTM B117	**salt spray resistance** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering

Cleaning recommendations: refer to the latest edition of TIGER “Cleaning Recommendations” information sheet, Version 00-1005.

Series 49

TIGER Drylac® Powder Coatings

Please note

For metallic finishes, it is recommended to observe the guidelines published in the latest edition of TIGER Drylac® "Application guidelines for metallic effect powder coatings".

Please consult the manufacturer before applying any 2-coat systems that feature (i) a primer or e-coat as base coat and (ii) a metallic effect powder coating as a top coat.

Top coating with a clear exterior grade powder coating over an interior grade powder coating does not result into a weather resistant coating system.

Post-bending properties of any part must be verified prior to application. Minor cracks in the coated surface may lead to corrosion.

Joint sealants and any other auxiliary products, such as glazing aids, gliding waxes, drilling and cutting lubricants, which come in contact with the coated surface, must be pH-neutral and free of substances that may damage the finish. Therefore, a suitability test at the applicator's end, prior to coating, is highly recommended.

In general, colors in the red, orange and yellow range may require an increased film thickness to achieve full hiding.

Please read and understand the Safety Data Sheet (SDS) before use.

Chemical resistance

The required chemical resistance of a powder coating depends, among other things, on its formulation. Chemical resistance requirements must be considered according to processing conditions and final use of the finished product. This is best established during the product specification process. Agreement between all parties involved must be reached about the requirements for such chemical resistance as well as the test method, which may be performed in accordance with PCI test method #8 "Solvent Cure Test". Furthermore, the test duration and concentration of the test media need to be agreed upon.

Disclaimer

TIGER's verbal and written recommendations for the use of its products are based upon experience and in accordance with current technological standards. These are provided in order to support the buyer or user. They are non-committal and do not create any additional commitments to the purchase agreement. They do not release the buyer from verifying the suitability of TIGER products for the intended application. TIGER warrants that its products are free of flaws and defects to the extent stipulated in the Terms of Delivery and Payment.

As part of TIGER product information program, each Product Data Sheet is updated periodically. The latest version shall prevail. It is recommended to always check for the latest editions on TIGER's website download area www.tiger-coatings.com to make sure you have the most current version of this Product Data Sheet. The information on TIGER's Product Data Sheets are subject to change without notification.

This Product Data Sheet supersedes and replaces all previous Product Data Sheet versions and notes to customers published in relation to this product and is only intended to provide a general overview on the product.

Latest versions of Technical Information Sheets and Terms of Delivery and Payment are downloadable from www.tiger-coatings.com and form an integral part of this Product Data Sheet.

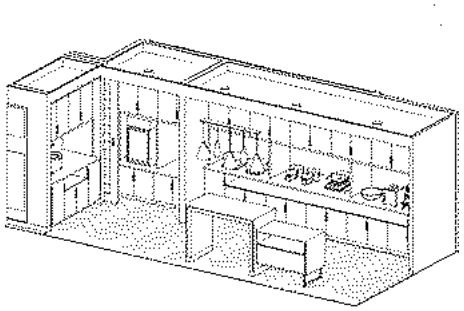
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Buffet Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves, and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries; MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications
Millwork Hardware	Refer to Specifications
Pattern/ Color	Refer to drawings for finishes. Review and approval

	of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4” particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.

8. Base Cabinet Units:
a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.
9. Wall Cabinet Units:
a. Tops and Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back rail.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include Buffet equipment, lighting, power/data etc.

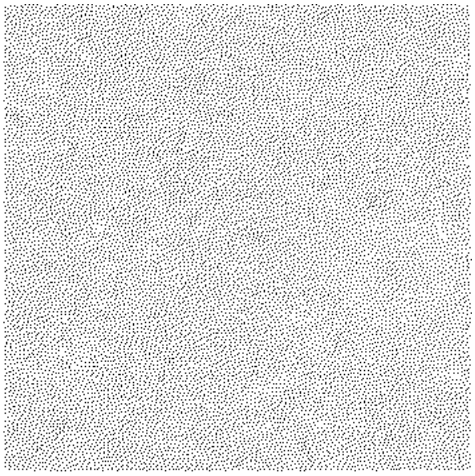
Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Belstone
Model	Dodi
Dimensions	Refer to Design Guideline Drawings
Color	Demitasse
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Notes	Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

FROM NATURE CHIC – TO CITY SLEEK

With the ONE Quartz Surfaces® assortment, we've brought together the beauty of quartz and modern technology to create new and exciting possibilities. ONE Quartz Surfaces® gives you more design choices for your next project. The low maintenance and durability of ONE Quartz Surfaces® countertops make it perfect for any application, commercial or residential. Functional yet chic, that's what ONE Quartz Surfaces® is all about.

AVAILABLE IN:

Within these unique series, you'll have more selection than ever before.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

Abrasion Wear Index	ASTM C501-84(2009)	Wear Index: 136

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

100% Engineered Stone | **Non Porous** | **Easy to Clean** | **Low Maintenance** | **Shock Resistant** | **Stain Resistant** * | **Scratch Resistant** | **Everlasting Sheen** | **Modern Collection of Colors**

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Website: www.wilsonart.com

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Copyright 2019, Wilsonart LLC

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Description	107	335	350
Thickness	0.045" ± 0.005" (1.14mm ± 0.13mm)	0.028" + 0.001 - 0.004" (0.71mm + 0.03 - 0.10mm)	0.036" ± 0.005" (0.91mm ± 0.13mm)

Blistering	**65 seconds**	≥ 40 seconds

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Manufacturer	Nevamar
Model	S6001 T
Dimensions	0.048"/1.2mm Thickness, 36 W x 96 L, 36 W x 120 L, 36 W x 144L, 48 W x 98 L, 48 W x 120 L, 60 W x 96 L, 60 W x 120 L, 60 W x 144 L
Color	Black
Finish	Textured/ Armored Protection
Material Composition	Melamine impregnated decorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Grade	NG48
Fire/Smoke Rating	ASTM E-84/UL723, 40 Flame Spread/Smoke Density 120 Unbonded, 95 Flame Spread/95 Smoke Density Bonded
Best Practices	Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Black S6001T
Warranty	1 Year Limited
Notes	Recommended substrates for laminates are Medium to High Density Fiberboard (MDF), Particleboard,or Metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

High Pressure Laminate

Three standard grades of **Nevamar® High Pressure Laminate** are suitable for most applications:

General Purpose Type NG48 is most often used in horizontal applications where high impact resistance and a durable, decorative surface is required.

Postforming Type NF39 is designed for manufacturing countertops and other horizontal surfaces where the laminate may be heated and rolled over the substrate edge to eliminate seams.

Type NF28 is designed for applications where impact resistance is less critical. Type NF28 can also be postformed.

Product Description

High pressure laminate is manufactured in a flat press by combining decorative papers saturated in melamine resin with phenolic-impregnated kraft layers at pressures exceeding 1000 psi (6.9 MPa) and temperatures approaching 300˚F (150˚C). The panels are trimmed to size and the backs are sanded to facilitate bonding. The thickness of the laminate is determined by the number of kraft layers used. The laminating process combines the durability of melamine resins with the aesthetics of decorative papers creating a surfacing material that has been the standard for many years.

Most textured finish items are produced with Nevamar's exclusive **Armored Protection® Surface** and have all the properties of conventional laminate. But it also has superior abrasion and scuff resistance due to a very thin deposit of microscopic particles of aluminum oxide on the conventional melamine layer. Armored Protection® Surface has significantly better wear value than the NEMA standard for laminates. It also offers superior resistance to scuffing and retain a "brand new" appearance during most of their useful life. All other properties meet the normal NEMA test requirements.

Standard Nominal Sizes

Type		Thickness*	Width*	Length	Colors
NG48	(in.)	0.048	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	1.2	914,1219,1524	2438,3048,3658	
NF39	(in.)	0.039	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	1.0	914,1219,1524	2438,3048,3658	
NF28	(in.)	0.028	36,48,60	96,120,144	All solids, patterns & woodgrains
	(mm)	0.7	914,1219,1524	2438,3048,3658	

*Other widths and thicknesses available upon request.

Typical Uses

Nevamar® standard laminate is designed for either horizontal, vertical, or postforming applications. This laminate is seen on countertops, tables, vanities, interior doors, cabinets, contract furniture, and retail store fixtures.

Fabrication Tips

When working with Nevamar® HPL, these techniques will produce a quality application.

1. Proper conditioning of the laminate, substrate, and backing sheet minimizes possible warping, shrinking, or expansion of assembled panels. Ideally, all components should be conditioned at 70˚F to 75˚F (21˚C to 25˚C) and 45 to 50 percent relative humidity for 48-hours prior to assembly.
2. Always bond laminate to a suitable substrate such as medium to high density fiberboard, particleboard, or metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.
3. Recommended adhesives include solvent or water-based contact cement, white glue (PVA), epoxy, and hot melt glue. Consult your adhesive supplier for specific application requirements.
4. The use of a backing sheet is recommended to minimize warpage. The thickness of the backing sheet should be relatively equal to the thickness of the decorative laminate on the face of the assembly.
5. All saw blades and router bits used for cutting should be carbide tipped. Feed rate should be slow and tool speed should be high.

6. All edges of laminate should be filed smooth with file direction towards substrate to help prevent stress cracks and to minimize chipping.
7. Inside corners of cutouts for electrical outlets, sinks, etc., should have a minimum radius of 1/8" (3 mm) and be filed smooth. This reduces the likelihood of stress cracks.
8. When fasteners are required, it is advisable to first drill an oversized hole through the laminate. This reduces the likelihood of stress cracks.
9. See the Nevamar® Postforming Technical Bulletin for postforming application tips.
10. All laminate is intended for interior use only, and should not be exposed to extreme humidity, continuous sunlight, or temperatures above 275˚F (135˚C) for extended periods of time.

Fire Test Data

High pressure decorative laminate is frequently used in installations governed by local fire codes. Burning characteristics of laminate are greatly influenced by the adhesive and substrate used. Listed below are typical flame spread index and smoke developed values for Nevamar® standard grade laminate. When specifying Class I or A rated laminate, refer to Nevamar® Fire Rated Technical Bulletin.

4. MIL-P-17171E(SH), "High Pressure Decorative Laminate." Nevamar® NG48 complies with Type I.
5. U.S. Federal Specification L-P-508H, "Plastic Sheet, Laminated, Decorative and Nondecorative." Nevamar® Type NG48, NF39, and NF28 comply.
6. International Organization for Standardization, ISO-4586, "Decorative High Pressure Laminates (HPL)." Nevamar® Type NG48, NF39, and NF28 comply.

Care and Maintenance

Nevamar® decorative laminate provides a durable surface that is easy to maintain using ordinary care.

To maintain the laminate's lasting beauty, cleaning with a solution of warm water and liquid dishwashing detergent is all that should be required in most cases.

Stains may be removed with most non-abrasive household cleaners such as FORMULA 409®, GLASS PLUS® or WINDEX® with AMMONIA D®. Light scrubbing with a soft bristled brush may be necessary to remove stains from the depth of the structure on some textured surfaces.

If the stain persists, use a paste of baking soda and water and apply with a soft bristled brush. Light scrubbing for 10-20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force may damage the decorative surface, especially if it has a gloss finish.

Stubborn stains that resist any of the above cleaning methods may require the use of undiluted household bleach. Apply the bleach to the stain and let stand no longer than 1 1/2 minutes. Rinse thoroughly with warm water and wipe dry. This step may be repeated if the stain appears to be going away and the color of the laminate has not been affected. WARNING: Prolonged exposure of the laminate surface to bleach will cause discoloration.

Many commercially available products contain substances that may damage or discolor a laminate surface. ABRASIVE CLEANERS SHOULD NOT BE USED. Particular care should be used with any products labeled CAUTION or WARNING. Any questions or concerns should be referred to the product's manufacturer or call 1-877-726-6526. Do not allow harsh materials to remain in contact with the laminate surface. Examples of these are as follows:

- Toilet bowl cleaners
- Chlorine bleach
- Hydrogen Peroxide
- Coffee pot cleaners
- Oven cleaners
- Hard water stain removers
- Drain cleaners
- Fruit and berry juice
- Metal cleaners and polishes
- Tub and tile cleaners

Limited Warranty

Subject to the limitations set forth below, Panolam Industries International Inc. (Panolam) expressly warrants that our products are reasonably free of defects in material and workmanship, and when properly handled and fabricated will conform, within accepted tolerances, to applicable manufacturing specifications as set forth in our technical brochure. This warranty shall extend to the original buyer for a period of twelve (12) months from the date of shipment of this product by Panolam, and shall not be assignable by the original buyer. This warranty does not cover damage resulting from accident, misuse, alteration, abuse or lack of reasonable care.

Due to the variety of uses and applications to which this product may be put, and because the manufacturer has no control over the end products fabricated, the warranty set forth above is exclusive and in lieu of all warranties, expressed or implied, in fact or by operation of law or otherwise, or arising by course of dealing or performance, custom or usage in the trade, including, without limitation, the implied warranties of fitness for a particular purpose and merchantability, and Panolam shall have no obligation or liability to any person or entity in connection with or arising from the furnishing, sale, installation or repair, use or subsequent sale of any product supplied by it.

Our maximum liability arising out of the sale of the products or their use, whether based upon warranty, contract, tort or otherwise, shall not exceed the actual payments received by us in connection therewith. In no event shall we be liable for special, incidental or consequential damages, including, but not limited to, arising hereunder or from the loss of profits, or loss of use damages, sales of the products.

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	High Pressure Laminate (HPL)
Manufacturer	Nevamar
Model	S3022 T
Dimensions	0.048"/1.2mm Thickness, 36 W x 96 L, 36 W x 120 L, 36 W x 144L, 48 W x 98 L, 48 W x 120 L, 60 W x 96 L, 60 W x 120 L, 60 W x 144 L
Color	Deep Blue
Finish	Textured/ Armored Protection
Material Composition	Melamine impregnated decorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Grade	NG48
Fire/Smoke Rating	ASTM E-84/UL723, 40 Flame Spread/Smoke Density 120 Unbonded, 95 Flame Spread/95 Smoke Density Bonded
Best Practices	Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Deep Blue S3022T
Warranty	1 Year Limited
Notes	Recommended substrates for laminates are Medium to High Density Fiberboard (MDF), Particleboard,or Metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Typical Uses

Nevamar® standard laminate is designed for either horizontal, vertical, or postforming applications. This laminate is seen on countertops, tables, vanities, interior doors, cabinets, contract furniture, and retail store fixtures.

Fabrication Tips

When working with Nevamar® HPL, these techniques will produce a quality application.

1. Proper conditioning of the laminate, substrate, and backing sheet minimizes possible warping, shrinking, or expansion of assembled panels. Ideally, all components should be conditioned at 70˚F to 75˚F (21˚C to 25˚C) and 45 to 50 percent relative humidity for 48-hours prior to assembly.
2. Always bond laminate to a suitable substrate such as medium to high density fiberboard, particleboard, or metals. It should not be glued directly to plaster walls, gypsum wallboard, or concrete.
3. Recommended adhesives include solvent or water-based contact cement, white glue (PVA), epoxy, and hot melt glue. Consult your adhesive supplier for specific application requirements.
4. The use of a backing sheet is recommended to minimize warpage. The thickness of the backing sheet should be relatively equal to the thickness of the decorative laminate on the face of the assembly.
5. All saw blades and router bits used for cutting should be carbide tipped. Feed rate should be slow and tool speed should be high.

6. All edges of laminate should be filed smooth with file direction towards substrate to help prevent stress cracks and to minimize chipping.
7. Inside corners of cutouts for electrical outlets, sinks, etc., should have a minimum radius of 1/8" (3 mm) and be filed smooth. This reduces the likelihood of stress cracks.
8. When fasteners are required, it is advisable to first drill an oversized hole through the laminate. This reduces the likelihood of stress cracks.
9. See the Nevamar® Postforming Technical Bulletin for postforming application tips.
10. All laminate is intended for interior use only, and should not be exposed to extreme humidity, continuous sunlight, or temperatures above 275˚F (135˚C) for extended periods of time.

Fire Test Data

6. International Organization for Standardization, ISO-4586, "Decorative High Pressure Laminates (HPL)." Nevamar® Type NG48, NF39, and NF28 comply.

Care and Maintenance

Nevamar® decorative laminate provides a durable surface that is easy to maintain using ordinary care.

To maintain the laminate's lasting beauty, cleaning with a solution of warm water and liquid dishwashing detergent is all that should be required in most cases.

Stains may be removed with most non-abrasive household cleaners such as FORMULA 409®, GLASS PLUS® or WINDEX® with AMMONIA D®. Light scrubbing with a soft bristled brush may be necessary to remove stains from the depth of the structure on some textured surfaces.

If the stain persists, use a paste of baking soda and water and apply with a soft bristled brush. Light scrubbing for 10-20 strokes should remove most stains. Although baking soda is a low abrasive, excessive scrubbing or exerting too much force may damage the decorative surface, especially if it has a gloss finish.

Stubborn stains that resist any of the above cleaning methods may require the use of undiluted household bleach. Apply the bleach to the stain and let stand no longer than 1 1/2 minutes. Rinse thoroughly with warm water and wipe dry. This step may be repeated if the stain appears to be going away and the color of the laminate has not been affected. WARNING: Prolonged exposure of the laminate surface to bleach will cause discoloration.

Many commercially available products contain substances that may damage or discolor a laminate surface. ABRASIVE CLEANERS SHOULD NOT BE USED. Particular care should be used with any products labeled CAUTION or WARNING. Any questions or concerns should be referred to the product's manufacturer or call 1-877-726-6526. Do not allow harsh materials to remain in contact with the laminate surface. Examples of these are as follows:

- Toilet bowl cleaners
- Chlorine bleach
- Hydrogen Peroxide
- Coffee pot cleaners
- Oven cleaners
- Hard water stain removers
- Drain cleaners
- Fruit and berry juice
- Metal cleaners and polishes
- Tub and tile cleaners

Limited Warranty

Subject to the limitations set forth below, Panolam Industries International Inc. (Panolam) expressly warrants that our products are reasonably free of defects in material and workmanship, and when properly handled and fabricated will conform, within accepted tolerances, to applicable manufacturing specifications as set forth in our technical brochure. This warranty shall extend to the original buyer for a period of twelve (12) months from the date of shipment of this product by Panolam, and shall not be assignable by the original buyer. This warranty does not cover damage resulting from accident, misuse, alteration, abuse or lack of reasonable care.

Due to the variety of uses and applications to which this product may be put, and because the manufacturer has no control over the end products fabricated, the warranty set forth above is exclusive and in lieu of all warranties, expressed or implied, in fact or by operation of law or otherwise, or arising by course of dealing or performance, custom or usage in the trade, including, without limitation, the implied warranties of fitness for a particular purpose and merchantability, and Panolam shall have no obligation or liability to any person or entity in connection with or arising from the furnishing, sale, installation or repair, use or subsequent sale of any product supplied by it.

Our maximum liability arising out of the sale of the products or their use, whether based upon warranty, contract, tort or otherwise, shall not exceed the actual payments received by us in connection therewith. In no event shall we be liable for special, incidental or consequential damages, including, but not limited to, arising hereunder or from the loss of profits, or loss of use damages, sales of the products.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Busing Station Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries, MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual
Millwork Hardware	Refer to Specifications within Building Product

	Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to

support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.
8. Base Cabinet Units:
a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include trash/linen bins.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Physical Properties

Test Description	**Typical Results**	**Test**
Flexural Strength (psi)	>6,000	ASTM D 790
	31 - 75	EN14617-2
Thermal Expansion Coefficient	16 x 10^{-6} - 20.8 x 10^{-6*}	EN14617-11
Impact Resistance	3.4 – 7.35	EN14617-9
Stain Resistance	No Effect	EN14617-10
High Temperature Heat Resistance	No Effect to Slight Effect	ISO 4586
Chemical Resistance (acids and bases)	C4	EN14617-10
Abrasion Resistance	>100	ASTM C501
	23.6 – 27.5	EN14617-4

Copyright 2020, Wilsonart LLC

Density (g/cm^3)	>2.1	ASTM C97
Compressive Strength (One Axis – Dry) (psi)	>20,000	ASTM C170
Moisture Absorption	<0.03	ASTM C97
	<0.03	EN14617-1
Freeze and Thaw Resistance	0.999	EN14617-5
Fire Behavior	Class 1/A Rating	ASTM E 84

**Test results vary slightly depending on pattern.*
The information contained in this section is based on technical data which Wilsonart LLC believes to be reliable, and is intended for use by persons having knowledge of this technical area at their own discretion.

Certifications
Wilsonart® Quartz is UL GREENGUARD Standard and Gold Standard Certified for low chemical emissions.
NSF 51 Food Zone and FDA food contact compliant.
Wilsonart Quartz is Kosher certified under the Kashruth Division of the Orthodox Union.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per ISO 4586-2 Method 31 (B)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect® *
3. Claire® Germicidal Cleaner (Country Fresh Scent) **
4. Claire® Disinfectant Spray Q (Country Fresh Scent) **
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray *
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner *
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant *
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose® II 256 *
17. Diversey™ Oxivir 1 *
18. Diversey™ Oxivir Tb Wipes *
19. Diversey™ Stride® Floral Neutral Cleaner
20. Diversey™ Virex® II 256 *
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel *
27. Purell® Food Service Surface Sanitizer *
28. Purell® Professional Surface Disinfectant *
29. Purell® Healthcare Surface Disinfectant *
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed materials were placed in contact with Wilsonart® Quartz surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Quartz per BIFMA HCF 8.1-2014 (Section 6 / Modified)
No effect was exhibited except as noted (* or **) on the following:

1. Beckart Environmental, Inc. (Stabilized Chlorine Dioxide Mixed with Water at 3000ppm)
2. Benefect®
3. Claire® Germicidal Cleaner (Country Fresh Scent)
4. Claire® Disinfectant Spray Q (Country Fresh Scent)
5. Clean Republic – All Purpose Everyday Cleaner (Hypochlorous Acid – 0.003% Solution)
6. Clorox® Anywhere® Hard Surface Sanitizing Spray
7. Clorox® Clean-Up (Cleaner & Bleach)
8. Clorox® Disinfecting Bleach w/6% Sodium Hypochlorite (24:1/Water:Bleach)
9. Clorox® Disinfecting Spray
10. Clorox® Disinfecting Wipes
11. Clorox Healthcare® Bleach Germicidal Cleaner
12. Clorox Healthcare® Hydrogen Peroxide Cleaner Disinfectant *
13. Clorox Healthcare® Fuzion® Cleaner Disinfectant
14. Clorox Healthcare® VersaSure® Cleaner Disinfectant Wipes
15. Clorox® Total 360 Disinfectant Cleaner
16. Diversey™ Expose II 256
17. Diversey™ Oxivir 1 *
18. Diversey™ Stride® Floral Neutral Cleaner
19. Diversey™ Tb Wipes *
20. Diversey™ Virex II 256
21. Fabuloso® Complete (Multi-Purpose Cleaner)
22. Lysol® Professional Disinfectant Spray
23. Microban® 24 Hour (Multi-Purpose Cleaner)
24. PDI Sani-Prime® Germicidal Spray
25. PDI Super Sani-Cloth® Germicidal Disposable Wipes
26. PURELL® Advanced Hand Sanitizer Gel
27. Purell® Food Service Surface Sanitizer
28. Purell® Professional Surface Disinfectant
29. Purell® Healthcare Surface Disinfectant
30. Simple Green® Concentrated (All-Purpose Cleaner)
31. Spic and Span® Everyday (Antibacterial Cleaner)

Test procedure: Listed reagent materials were placed in contact with Wilsonart® Quartz surface with a one-inch square 100% cotton cloth completely saturated and covered with a 2” (50.8mm) diameter watch cover glass for 15 minute duration. The reagents listed above were removed with clean cloth and the area was then cleaned with clean cloth and distilled water only. The surface area was allowed to dry for 1-hour prior to evaluation for effect.
* Causes slight change of gloss or color.
** Causes slight damage, with degree of damage proportionate to length of exposure and concentration.

Issue Date: Aug 30, 2021
Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

Copyright 2019, Wilsonart LLC

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Description	107	335	350
Thickness	0.045" ± 0.005" (1.14mm ± 0.13mm)	0.028" + 0.001 - 0.004" (0.71mm + 0.03 - 0.10mm)	0.036" ± 0.005" (0.91mm ± 0.13mm)
Weight per square foot	0.322#	0.186#	0.260#

Blistering	**65 seconds**	≥ 40 seconds

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

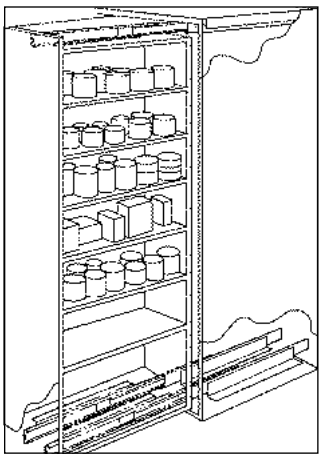
MODEL 301-2590

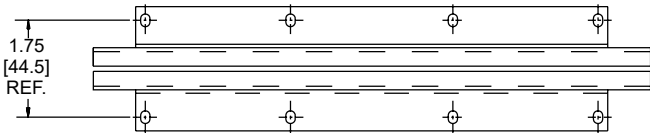
Undermount Shelf Slide
Non-Disconnect
Over Travel

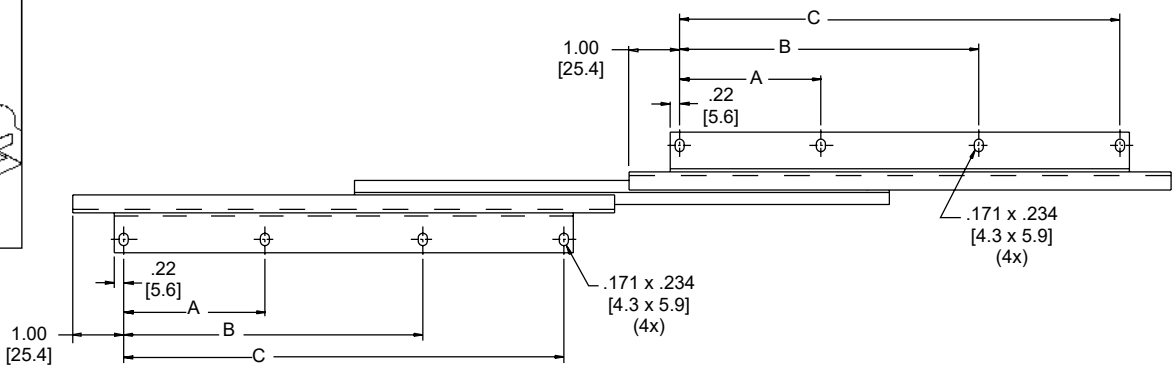
Applications: Pull-out storage shelves, kitchen pull-out pantries, and entertainment centers. Battery trays, storage bins, and generators.

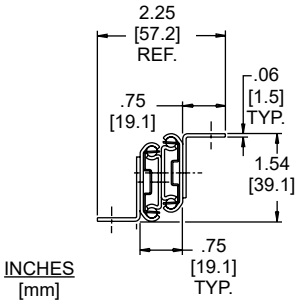
301-2590
QUICK REFERENCE

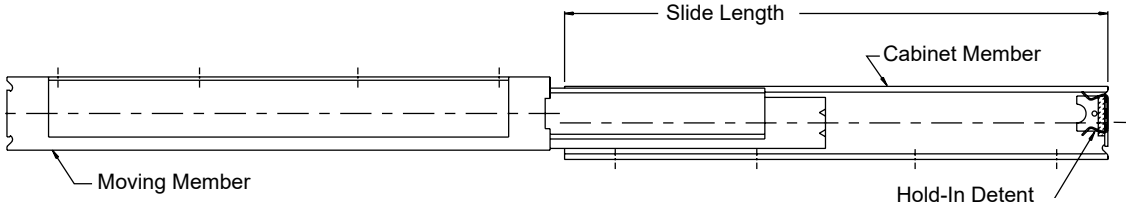
Side Space: .75" [19.1 mm] slide only
2.25" [57.2 mm] with brackets
Length: 12"–28" [305 mm–711 mm]
Overall slide dimensions: .50" x 1.62"
Load rating: Up to 155 lb. [70 kg.]*











Finish	Bright electro-zinc (C) or black zinc (CB) plating
Length	12"–28" [305 mm–711 mm]
Height	1.54" [39.1 mm]
Side Space	.75" [19.1 mm] slide only 2.25" [57.2 mm] with brackets
Load	Up to 155 lbs [70 kg]* Capacity
Travel	Slide length plus .83" [21.1 mm]
Mounting	Bracket/undermount
Hardware	#8 pan head or round head screws
Features	Hold-in detent, silenced open and closed, slide is handed

* Load rating based on a 16" wide shelf cycled 50,000 times.

Part Number	Slide Length	Slide Travel	Load Rating lb. [kg] per pair*	A	B	C
301-2590-12	12.00 [305]	12.83 [325.9]	155 [70]	4.00 [101.6]	6.00 [152.4]	10.00 [254.0]
301-2590-14	14.00 [356]	14.83 [376.7]	148 [67]	4.00 [101.6]	8.00 [203.2]	12.00 [304.8]

301-2590-26	26.00 [660]	26.83 [681.5]	95 [43]	7.00 [177.8]	17.00 [431.8]	24.00 [609.6]
301-2590-28	28.00 [711]	28.83 [732.3]	85 [39]	7.00 [177.8]	19.00 [482.6]	26.00 [660.4]

1. Mark a line at least 1/4" [6.4 mm] in from the right side of the cabinet opening and parallel to the cabinet side.
2. Locate a point on this line 1.00" [25.4 mm] back from the desired front of the slide.
3. Using #8 pan or round head screws, mount the cabinet member bracket through the first hole at this point.

   NOTE: For maximum strength, ensure that the hold-in detent spring is installed inside the cabinet.
4. Mount the left hand slide similarly, locating the screw centerline of the cabinet member bracket at least 1/4" [6.4 mm] in from the left side of the opening.
5. Keeping the right and left hand slides parallel, install the remainder of the cabinet member screws.

   NOTE: When using soft materials such as particle board, replace rear cabinet mounting screws with through bolts.
6. With slides extended, center the shelf and drive the screws up through the moving member brackets into the bottom of the shelf.

   NOTE: If the unit is mounted too close to the floor reverse the procedure above and install the moving member screws first.

Slide Ordering Instructions

Complete your slide order for Accuride model 301-2590 by specifying the following:

20 Pair	C	301-2590	-16	D
Total Required Slides				
	Slide Finish			
		Slide Model Number		
			Slide Length	
				Optional Polybag Packaging

Packaging

Distributor (D) Pack: All lengths are packaged 5 pair per box. Polybag includes one pair of slides and mounting screws.

Bulk Pack: Slides only. Left hand slides and right hand slides are packaged in separate boxes.

Lengths 12"–18"	20 each per box
Lengths 20"–28"	10 each per box

Specifications

Slide members and ball retainers: Cold rolled steel
Ball bearings: Carburized steel

RoHS compliant

NOTE: Specifications, materials, prices, terms, and delivery are subject to change without notice.

Issue Date: **Aug 30, 2021**
Revision Date:

Item Name	Decorative Metal Fabrications
Item Type	Aluminum Sheet & Tube
Description	1/8" thick aluminum sheet metal and 1" x 1" Aluminum Tube, Powder Coated
Manufacturer	Not Applicable
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Tiger Drylac 049/66230, Color: Brown C33
Finish	Metallic Smooth/Matte; Fluropolymer (PVDF) 70% resin, 2-coat system complying with AAMA 2605
CSI #	057500 - Decorative Formed Metal
Omniclass #	22 - 057500 - Decorative Formed Metal
Quality Standards	Aluminum Plate and Sheet: ASTM B209/B209M, Alloy 6061-T6; Aluminum Extruded Bar and Tubes: ASTM B221, Alloy 6063-T5. Comply with NAAMM "Metal Finishes Manual" for “Architectural and Metal Products” for recommendations relative to application and designations of finishes. for type of use and finish indicated.
Part of an Assembly	N
Notes	Sheet metal directly adhered to substrate per manufacturer's recommended adhesive. Form decorative metal to required shapes and sizes, true to line and level with true curves and accurate angles and surfaces. Finish exposed surfaces to smooth, sharp, well-defined lines and arris.

SPECIAL INSTRUCTIONS

If finished in the field; refer to the Building Product Manual Paint Schedule in the appendix for interior painted metal surfaces.

TIGER Drylac® Powder Coatings

SERIES 49 - interior and exterior applications

POLYESTER TGIC WEATHER RESISTANT POWDER COATING FOR INTERIOR AND EXTERIOR APPLICATIONS

Typical applications

- residential windows and doors
- lawn mowers and garden equipment
- patio furniture
- automotive accessories
- bicycles and motorcycles
- agricultural machinery
- sporting goods
- internal ship components

Product details

Standard packaging	in original 44 & 55 lb (20 & 25 kg) boxes and 5 lb (2.5 kg) minipack
Specific gravity (ASTM D792)	approximately 1.2-1.8 g/cm^3 depending on pigmentation
Theoretical coverage	at 2.5 mils (60 µm) film thickness: **51.5 ft²/lb (11.1 m²/kg)**. Refer also to "Theoretic Powder Coating Coverage Chart" version 00-1001 (imperial) version 00-1000 (metric)
Storage stability	12 months at no more than 77 °F (25 °C) avoid direct and extended exposure to heat

Finish

finish	gloss
smooth *glossy*	80-95+*
smooth *semi-gloss*	55-65*
smooth *matte*	15-25*
rough texture *glossy*	visual
rough texture *matte*	visual
fine texture	visual
fluorescent	visual
clear, glitter, candy tones	visual
dormant transparent	visual
holographic	visual
metallic and other special effects	visual

* *Gloss level according to ASTM 523 at 60° angle (doesn't apply to metallic effect powder coatings). The measured gloss level of effect powder coatings can diverge from the details given in this Product Data Sheet. The creation of tolerance samples is recommended.*

Available as stock product in a selection of colors and finishes (see color charts). It can be made to order in non-stock colors (minimum order quantity applies).

Features

- good weather resistance
- good mechanical properties
- good flow
- good coverage
- good storage stability
- available in Out Gassing Forgiving (OGF) formulation
- Underwriter Laboratories recognized component (UL approved)

Underwriters Laboratories Inc., (UL) Recognition.

Pretreatment

The following table reflects the common methods of pre-treatment with regards to various substrates and applications. In selecting the proper type of pretreatment, the suitability of the type of powder coating for a desired application according to the guidelines on this page should be observed.

	Aluminum			Galvanized Steel				Steel		
Degreasing	○			○				○		
[1] Chromating	○	○	○	○	○	○	○			
[2] Pre-Anodizing	○	○	○							
[2] Chrome free	○	○	○	○	○					
Iron Phosphating								○	○	
Zinc Phosphating				○	○	○	○	○	○	○
Blasting								○	○	○
[3] Sweeping				○	○	○	○			
	I	E	A	I	E	A	S	I	E	S[4]

Application: I = interior; E = exterior; A = architectural; S = steel

1) according to ASTM B 449
2) according to GSB quality and test regulations. The suitability of this type of pretreatment needs to be established through a boiling water test and subsequent cross-hatch adhesion and adhesive tape removal test
3) only for zinc coated parts >1.8 mils (>45 µm)
4) for a two-coat process/TIGER Shield

Processing

Corona and Tribostatic*

** For Tribostatic powder coatings, confirm before ordering. Suitability of metallic effects for Tribostatic processing must be verified prior to actual application. Please refer to the latest edition of the relevant application guidelines for metallic effect powder coatings.*

Since not all powder coatings are suitable for recycling/reclaim, please verify before ordering.

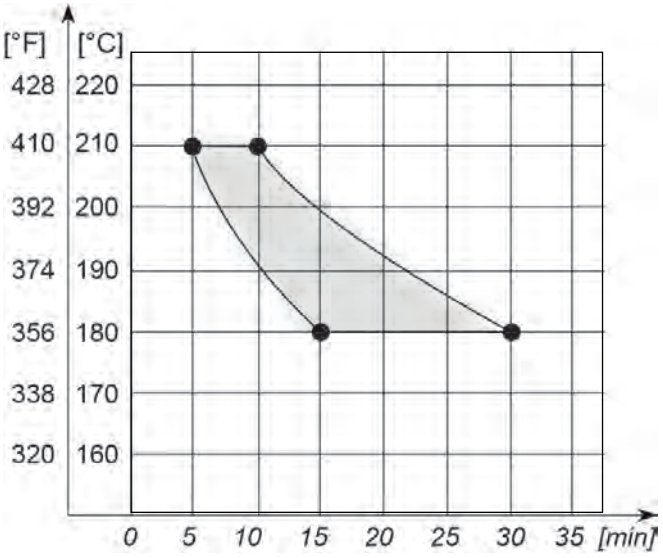
Product data sheet

TIGER Drylac® Powder Coatings

Cure parameters

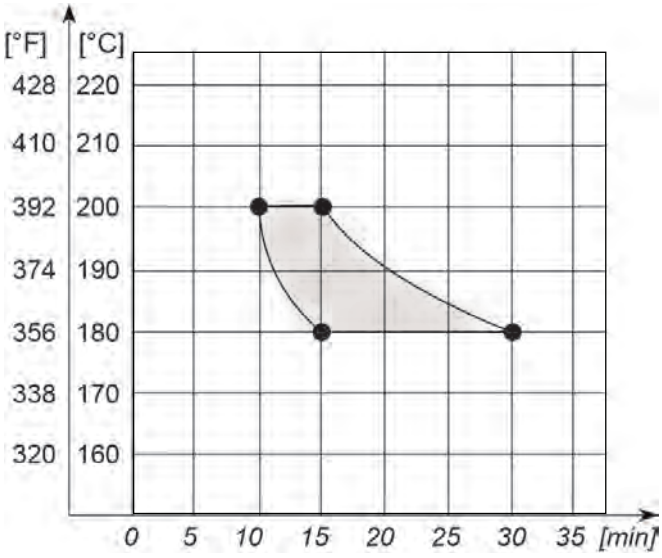
(substrate temperature versus curing time)

smooth *glossy*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
410 °F (210 °C)	5 minutes	10 minutes

smooth *matte*



substrate temp.	min. curing time	max. curing time
356 °F (180 °C)	15 minutes	30 minutes
392 °F (200 °C)	10 minutes	15 minutes

Cure parameters must be closely observed since mechanical properties will develop before full cross-linking.

Test results

Checked under laboratory conditions on iron phosphated steel test panels Bonderite B-1000 or equivalent. Cure conditions are according to the cure curves. Actual product performance may vary due to product-specific properties such as gloss, color, effect and finish as well as application-related and environmental influences. When used as a two-coat system, the increase in film thickness will result in a decrease of mechanical properties.

test method	test	Series 49 smooth *glossy*	Series 49 smooth *semi-gloss*	Series 49 smooth *matte*
ISO 2360	**recommended film thickness**	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)	2.5-3.5 mils (60-80 µm)
ASTM D523	**gloss - 60°**	80-95+	55-65	15-25
ASTM D3359 method B	**cross cut tape test** 1mm cutting distance	5B	5B	5B
ASTM D522	**mandrel bending test** cracking of coating	≤1/8 inch (≤3 mm)	≤5/32 inch (≤4 mm)	≤3/16 inch (≤5 mm)
ASTM D2794	**ball impact test** cracking of coating	80 in/lb no appearance of cracks down to the substrate	80 in/lb no appearance of cracks down to the substrate	80 in/lb no appearance of cracks down to the substrate
ASTM D3363	**pencil hardness**	2H minimum	2H minimum	2H minimum
ASTM D2247	**determination of resistance to humidity** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering
ASTM B117	**salt spray resistance** 1,000 hours	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering	maximum undercutting 1/8 inch (3 mm), no blistering

Cleaning recommendations: refer to the latest edition of TIGER “Cleaning Recommendations” information sheet, Version 00-1005.

Series 49

TIGER Drylac® Powder Coatings

Please note

For metallic finishes, it is recommended to observe the guidelines published in the latest edition of TIGER Drylac® "Application guidelines for metallic effect powder coatings".

Please consult the manufacturer before applying any 2-coat systems that feature (i) a primer or e-coat as base coat and (ii) a metallic effect powder coating as a top coat.

Top coating with a clear exterior grade powder coating over an interior grade powder coating does not result into a weather resistant coating system.

Post-bending properties of any part must be verified prior to application. Minor cracks in the coated surface may lead to corrosion.

Joint sealants and any other auxiliary products, such as glazing aids, gliding waxes, drilling and cutting lubricants, which come in contact with the coated surface, must be pH-neutral and free of substances that may damage the finish. Therefore, a suitability test at the applicator's end, prior to coating, is highly recommended.

In general, colors in the red, orange and yellow range may require an increased film thickness to achieve full hiding.

Please read and understand the Safety Data Sheet (SDS) before use.

Chemical resistance

The required chemical resistance of a powder coating depends, among other things, on its formulation. Chemical resistance requirements must be considered according to processing conditions and final use of the finished product. This is best established during the product specification process. Agreement between all parties involved must be reached about the requirements for such chemical resistance as well as the test method, which may be performed in accordance with PCI test method #8 "Solvent Cure Test". Furthermore, the test duration and concentration of the test media need to be agreed upon.

Disclaimer

TIGER's verbal and written recommendations for the use of its products are based upon experience and in accordance with current technological standards. These are provided in order to support the buyer or user. They are non-committal and do not create any additional commitments to the purchase agreement. They do not release the buyer from verifying the suitability of TIGER products for the intended application. TIGER warrants that its products are free of flaws and defects to the extent stipulated in the Terms of Delivery and Payment.

As part of TIGER product information program, each Product Data Sheet is updated periodically. The latest version shall prevail. It is recommended to always check for the latest editions on TIGER's website download area www.tiger-coatings.com to make sure you have the most current version of this Product Data Sheet. The information on TIGER's Product Data Sheets are subject to change without notification.

This Product Data Sheet supersedes and replaces all previous Product Data Sheet versions and notes to customers published in relation to this product and is only intended to provide a general overview on the product.

Latest versions of Technical Information Sheets and Terms of Delivery and Payment are downloadable from www.tiger-coatings.com and form an integral part of this Product Data Sheet.

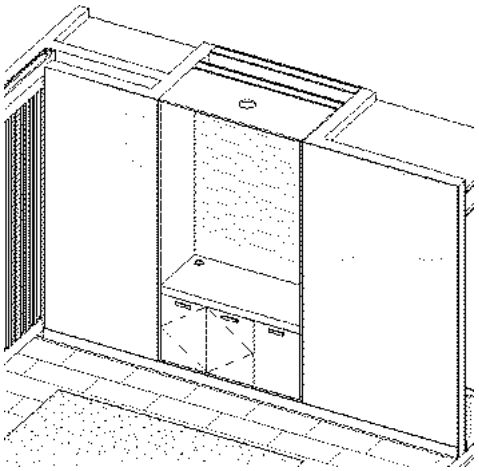
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Flex Storage Millwork
Item Type	Public Millwork
Description	Plastic Laminate Clad Custom Millwork consisting of cabinets, shelves and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries, MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual
Millwork Hardware	Refer to Specifications within Building Product

	Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer. 8. Base Cabinet Units: a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued

and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with power/data, etc.
MDF Panel at rear of wall cabinet to be prepped for vinyl wall covering finish as recommended by wall covering manufacturer.

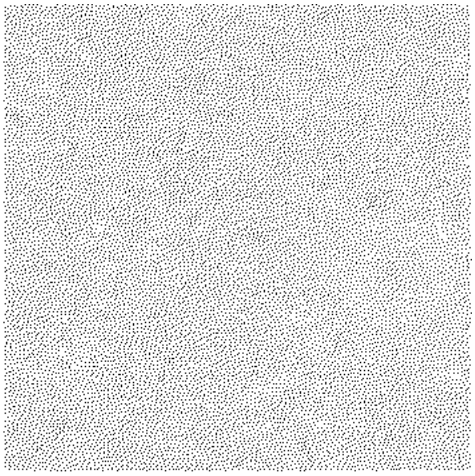
Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Belstone
Model	Dodi
Dimensions	Refer to Design Guideline Drawings
Color	Demitasse
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Notes	Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Real Living Decor Package

Issue Date: Nov 23, 2022
Revision Date:

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	JG Edelen
Model	EHS-836
Dimensions	Refer to Design Guideline Drawings
Color	Goldfield
Finish	Polished Straight Edge
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Finish	Polished Straight Edge
Notes	Refer to drawings for edge profile Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Wilsonart International, Inc.
Model	Q4007
Dimensions	3/4" Thick
Color	Duomo
Finish	Polished
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Fire/Smoke Rating	ASTM E84 Class 1 (NFPA Class A) FS-25 or less.
Structural Performance	Mohs Hardness Scale: 6 to 6.5. Density: Not less than 2 g/cm3 when tested per ASTM C97.
Thermal Performance	Thermal shock: Pass 5 cycles, tested per ASTM C484.
Best Practices	UL Greenguard certified
Quality Standards	NSF/ANSI 51 Certified. Stain resistance: Passes ANSI Z124.6. Water absorption: Maximum 0.04 percent, tested per ASTM C97. Chemical resistance: Not Affected when tested per ASTM C650.
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	N
Thickness	3/4"
Finish	Polished
Warranty	One (1) year minimum warranty against defects in materials and workmanship. Commercial Lifetime warranty
Notes	Refer to drawings for edge profile. 2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)

* Please consult Wilsonart® Quartz Design Library on www.wilsonart.com for available slab sizes by pattern

Revision Date:

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#15504-31
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Charcoal
Finish	31 Traceless
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI 3. A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Charcoal 15504-31
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Refer to Design Guide Project Master, Section 12 32 16 for Casework and 12 36 23 for Countertops.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

2. Product Description

Recommended Uses

Wilsonart® Laminate, types 107, 335, and 350, is suitable for use on fine quality residential and contract furniture, fixtures and casework, and also for architectural application on columns, wainscoting, valances, cornices, interior doors and divider systems.

- **General Purpose (HGS) Type 107** is most frequently used for work surfaces on counters, islands, vanities, desks and tables. Typical vertical uses include surfacing for wall panels, teller cages and the front panels of workstations, such as those in hospitals, airports and restaurants. Type 107 is produced for both horizontal and vertical interior applications where the surface must be functional, durable and decorative.
- **Vertical Surface (VGP) Type 335** is the usual choice to surface cabinet walls, doors and drawer panels. It often appears on the vertical surfaces of desks, restaurants booths and maître d' stations, and as architectural cladding. Type 335 is intended for vertical applications where a functional, durable, decorative surface must absorb somewhat less impact than a comparable horizontal surface. VGP surfaces may be postformed to achieve radius edges.
- **Postforming (HGP) Type 350** adds the decorative capability of a soft edge to any typical laminate use. Common applications of post forming laminates are formed edges for counters, desktops, cabinet doors and drawer panels. Type 350 is intended for use on vertical and horizontal interior surfaces where it is necessary or desirable to roll the laminate on a simple radius over the edge of the substrate. This eliminates seams and leaves an attractive surface.

Product Composition

Decorative surface papers impregnated with melamine resins are pressed over Kraft paper core sheets impregnated with phenolic resin. These sheets are then bonded at pressures greater than 1000 pounds per square inch at temperatures approaching 300°F (149°C). Finished sheets are trimmed, and the backs are sanded to facilitate bonding.

Basic Limitations

Wilsonart Laminate is for interior use only and is not recommended for direct application to plaster, concrete walls, or gypsum wallboard. It is not structural material and must be bonded to a suitable substrate.

Do not subject Wilsonart Laminate to extremes in humidity, temperatures higher than 275°F (135°C) for substantial periods of time, or intense, continuous, direct sunlight.

Patterns & Colors
Available in the full range of Wilsonart solid colors, stones, marbles, woodgrains, leathers and patterns. See all patterns and colors at www.wilsonart.com. Please see actual sample before specifying.

Finishes – Confirm finish availability on individual designs by going to www.wilsonart.com

- #01 High Gloss - Premium
  A mirror sheen finish, which gives a smooth, brilliant appearance. #01-High Gloss finish also features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and can be used for horizontal applications such as countertops and light-to-medium commercial applications. Excellent for vertical applications and carries a premium upcharge.
  Nominal Glossometer Reading = 110
- #07 Textured Gloss - Premium
  A fine textured finish with a sheen level indicative of a waxed wood, polished stone, or other moderately reflective materials. #07 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 42
- #12 SoftGrain - Premium
  A dense wood grain structure that is low gloss and soft to the touch. Subtle highlights of reflectivity randomly occur within the embossed grains, creating a sophisticated raw wood look. #12 finish features AEON™™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 8
- #16 Casual Rustic - Premium
  A woodgrain texture with a blend of grain variations ranging from linear to subtle movement with random, irregular features. The overall low gloss surface is accented with higher sheen woodgrain ticking and random highlights. #16 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 6
- #18 Linearity - Premium
  A directional texture running the length of the sheet, having a narrow, random and matte-gloss linear quality. It is complementary to linear wood-grains, and linear patterns (such as the “Satin” series), and provides dimension and visual movement to solid colors. #18 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 18
- #19 Leno Weave – Premium
  Random intersecting horizontal and vertical lines create a geometric weave with a matte-gloss finish. Recommended for horizontal and vertical applications. #19 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 15
- #21 Soft Silk – Premium
  A smooth, ultra-matte finish with a silky, soft touch. This minimalist finish gives the surface a genuine stone feel. Recommended for horizontal and vertical applications. #21 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge,
  Nominal Glossometer Reading = 8
- #22 Antique - Premium
  A mixture of varying low gloss features combined with organic movement, indicative of the surface of an aged stone or an antique metal. Recommended for horizontal and vertical

applications. Antique features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
Nominal Glossometer Reading = 9

- #28 Gloss Line - Premium
  A linear woodgrain texture with varied widths of narrow grain structures in an alternating mix of matte and gloss surfaces areas. Recommended for horizontal and vertical applications. Gloss Line features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 5
- #35 Mirage-Ultra Premium
  Subtle variations in matte and gloss finish connect to nature's own finishes: rough and weathered, smooth and polished. Wilsonart HD premium pricing. Recommended for horizontal and vertical applications.
  Nominal Gloss Reading = 50
- #38 Fine Velvet Texture
  A smooth textured finish with moderate reflective value.
  Nominal Glossometer Reading = 14
- #52 Quarry - Premium
  Premium finish emulating the "pitted" look of polished natural stone. Recommended for horizontal and vertical applications. #52 features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium upcharge.
  Nominal Glossometer Reading = 55
- #55 Glaze-Ultra Premium
  A layering of matte features over a semi-gloss glaze, creates this timeworn effect. Wilsonart HD premium pricing. Recommended for horizontal and vertical application.
  Nominal Gloss Reading = 25
- #57 Aligned Oak – HD Premium
  Authentic realism is brought to the surfaces using synchronized texture as each elegantly aged oak design exhibits the natural dimension and feel or real world. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 7
- #60 Matte
  Textured finish with a moderate reflective quality. Recommended for horizontal and vertical applications.
  Nominal Glossometer Reading = 10
- #78 FineGrain - Premium
  The FineGrain premium finish features the polish and luxe of a real wood veneer, with a subtle, narrow grain structure that runs the length of the sheet. #78 finish features AEON™ ENHANCED SCRATCH & SCUFF-RESISTANT PERFORMANCE TECHNOLOGY, and carries a premium.
  Nominal Glossometer Reading = 38

NOTE: Nominal Glossometer readings are made at a 60° angle of incidence.

Finish Availability: Not all finishes are available in all patterns and colors. Some finish options have limited size availability. Please check with your Wilsonart representative or consult the pattern availability lookup on our website at www.wilsonart.com, to verify size availability by finish type.

Standard Sheet Widths

36"	48"	60"
914mm	1219mm	1524mm

Standard Sheet Lengths

96"	120"	144"
2438mm	3048mm	3658mm

Copyright 2019, Wilsonart LLC

NOTE: Not all sizes are available from stock; contact your Wilsonart representative for details on local availability. Minimums apply to non-standard designs and finishes in sizes other than 48"x96" and 60"x144". Please check with your Wilsonart representative.

Thickness and Weight

Blistering	**65 seconds**	≥ 40 seconds

*Radius for face is actually the radius of the form around which the laminate is postformed. The radius for back is actually the radius to which the decorative face is postformed.

Typical Fire Test Data

High-pressure laminates are subject to Flame Spread and Smoke Developed standards in structures where codes establish such conditions.

Copyright 2019, Wilsonart LLC

Test data to determine compliance with these codes are obtained by the Steiner Tunnel Test method of the American Society for Testing Materials (ASTM-E-84, Standard Test Method for Surface Burning Characteristics of Building Materials). Tests were conducted in accordance with test method and mounting procedure as described in paragraph X1.7.2 of the test method. This procedure is cataloged by Underwriters Laboratories, Inc. as UL 723.
Here is typical data for Wilsonart laminates, averaged from two specific tests:

Typical Flame Spread and Smoke Developed Properties

Product Type	Test Condition	Flame Spread	Smoke Developed
General Purpose Type 107	Unbonded	50	45
Vertical Surface Type 335	Unbonded	45	40
Postforming Type 350	Unbonded	60	35
General Purpose Type 107	Bonded with contact adhesive to particleboard substrate; 3/8"	40	100
Vertical Surface Type 335	Bonded with contact adhesive to particleboard substrate; 3/8"	40	155
Postforming Type 350	Bonded with contact adhesive to particleboard substrate; 3/8"	50	140

When you wish to specify decorative laminate for a Class I or A fire rating, please refer to the Fire-Rated Laminate Tech Data.

Model Code Designations used to determine flame spread classification

Flame Spread Classification (Max. Rating)	International (IBC)	Life Safety (NFPA 101)
25	A	A
75	B	B
200	C	C

RE: Architectural Woodwork Quality Standard, 8th Edition, Version 1.0, - 2003

All Model Codes regulate the generation of smoke by interior finish material. In all cases they specify a maximum smoke development rating of 450.

Codes and Certifications

General Standards
Wilsonart Laminates, types 107, 335 and 350, conform to the voluntary standards of the American National Standards Institute, for thickness, performance properties and appearance. Wilsonart Laminates 107,335 and 350 meet or exceed the International Standards Organization specifications as found in ISO 4586, titled "High-Pressure Decorative Laminate (HPDL) – Sheets Based on Thermosetting Resins – Part I: specifications."

Specific Product Standards
U.S. Federal Specification L-P 508H, April 9, 1977, "Plastic Sheets, Laminated, Decorative and Non-decorative." Spells out criteria for decorative laminates for federal installations. Wilsonart 107, 335 and 350 laminates comply.

NSF International (NSF) #35 "Laminated Plastic for Surfacing for Food Service Equipment." All solid colors and printed patterns in Basic Types 107, 335 and 350, comply.

Copyright 2019, Wilsonart LLC

U.S. Federal Register, August 9, 1984, Housing and Urban Development Mobile Home Construction and Safety Standard, (24CFR) 3280.203. General Purpose Type 107 and Vertical Surface Type 335 comply.

U.S. Federal Test Method, Federal Aviation Regulation, DOT, Part 25.853, Airworthiness Standards: Transport Category Airplane (Interior Finish). Vertical Surface Type 335 and Postforming Type 350 comply with parts A and C.

U.S. Federal Motor Vehicle Safety Standard (FMVSS) 302, "Flammability of Interior Materials." Basic Types 107, 335 and 350 comply.

U.S. Military Standard MIL-P-17171E (SHIPS)/Plastic Laminate. General Purpose Type 107 complies.

Branded Cleaner and Sanitizer Resistance for Wilsonart® Laminate
No effect was exhibited except as noted (* or **) on the following:

1. Clorox Healthcare Bleach Germicidal Cleaner *
2. Clorox Healthcare Versa Sure Cleaner Disinfectant Wipes
3. Oxivir TB
4. Oxivir 1
5. Virex II 256
6. Benefect
7. PDI Super Sani-Cloth Germicidal Disposable Wipes
8. PDI Sani-Prime Germicidal Spray
9. Expose II 256
10. Stride Floral Neutral Cleaner *
11. PURELL Advanced Instant Hand Sanitizer *

Test procedure: Listed materials were placed in contact with Wilsonart® Laminate surface under 1" (25.4mm) diameter watch cover glass for 16 hours duration prior to evaluation for effect. The branded cleaners and sanitizers listed above were cleaned with water only.

* *Causes slight change of gloss or color.*
** *Causes slight damage, with degree of damage proportionate to length of exposure and concentration.*

4. <u>Installation: Fabrication and Assembly Recommendations</u>

Fabrication should follow approved methods. Assembled pieces should meet the specifications of KCMA (Kitchen Cabinetmakers Manufacturers Association), ANSI A-161.2-1998 (revised), and "Architectural Woodwork Quality Standards, Guide Specifications and Quality Certification Program" guidelines of the Architectural Woodwork Institute where applicable.

Wilsonart laminates must be bonded to a substrate of reliable quality, such as particleboard, medium density fiberboard or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates. Basic Types laminate may not be used as structural members.

Bond with adhesives and follow the techniques recommended by the adhesive manufacturer. Recommended adhesives are permanent types, such as urea and polyvinyl acetate (PVA), and contact types. Wilsonart adhesives are recommended for most bonding conditions.

To avoid stress cracking, do not use square-cut inside corners. All inside corners should have a minimum of 1/8" (3.175mm) radius and all edges should be routed smooth.

Copyright 2019, Wilsonart LLC

Drill oversized holes for screws or bolts. Screws or bolts should be slightly countersunk into the face side of a laminate-clad substrate.
Take care to ensure an appropriate acclimation between the laminate and the substrate prior to fabrication. The face and backing laminates and the substrate should be conditioned in the same environment for 48 hours before fabrication.
Recommended conditioning temperature is about 75°F (24°C). Laminates should be conditioned at 45% to 55% relative humidity.

With postforming machinery, Wilsonart 335 and 350 will postform at a nominal sheet temperature range of 325°F to 338°F (163°C to 170°C) in 20 ± 5 seconds.

Carbide-tipped saw and router blades should be used for cutting. High tool speed and low feed speed are advisable. Cutting blades should be kept sharp. Use a hold-down to prevent any vibration.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Type 107 General Purpose (HGS) Laminate
Description	General purpose laminate product
Manufacturer	Wilsonart
Model	#7850-12
Dimensions	0.045" Plus Minus 0.005" Thickness, Standard Sheet Widths 36", 48", 60" x Standard Sheet Lengths 96", 120", 144"
Color	Beigewood
Finish	SoftGrain
Material Composition	Melamine impregnated deccorative surface papers combined with fire retardant phenolic treated kraft paper
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Beigewood 7850-12
Warranty	1 Year
Notes	Recommended substrates for laminates are Particleboard, Medium Density Fiberboard (MDF) or plywood with one A-face. High-pressure laminate, plaster, concrete and gypsum board should not be considered suitable substrates.

SPECIAL INSTRUCTIONS

1. Run grain direction vertically unless noted otherwise.
2. PVC Edgebanding:
a. Exposed Ends: Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
b. Semi-exposed Ends; Grade VGS plastic laminate or minimum 0.030-inch thick PVC edge banding. Color to match exposed faces.
3. Melamine at all vertical surfaces/HPL at all horizontal surfaces
4. Elevator Interior Cab: Materials shall comply with NEMA LD-3
a. Fire-Retardant Treated Particleboard Panels : Minimum ½-inch thick backup for plastic laminate veneered panels, provided with suitable anti-warp backing; to meet ASTM E84 Class “A” rating with flame-spread rating of 25 or less.

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022

Item Name	Plastic Laminate
Item Type	Thermally Fused Laminate (TFL)
Description	Thermally Fused Melamine
Manufacturer	Wilsonart
Model	N/A
Dimensions	Standard panels are 49 and 61 inches. Standard panel lenth is 97 inches.
Color	Gray 1500-60
Finish	Matte
Material Composition	Laminate Composition: Melamine saturated decorative layers thermally fused to both core face surfaces with heat and pressure. Stain resistant surface with wear and scratch resistance.
CSI #	064023 - Interior Architectural Woodwork
Omniclass #	22-064023 - Interior Architectural Woodwork
Fire/Smoke Rating	ASTM E-84 Flame Spead 50, Smoke Density 45 Unbonded. Flame Spread 40, Smoke Density 100 Bonded
Best Practices	17% Post-consumer content, Greenguard Certified
Quality Standards	Architectural Woodwork Standards (AWS); ANSI A161.2 “Standards for Fabricated High Pressure Decorative Laminate Countertops”, NEMA LD3 “High Pressure Decorative Laminates”
Accessories	Manufacturer's recommended adheisve
Part of an Assembly	N
Product/Color	Thermally Fused Laminate/1500-60 Gray
Warranty	1 Year
Notes	Panel Core Material: Composite panel product composed primarily of cellulosic materials and a bonding system, resulting in a durable and dimensionally stable substrate suitable for decorative laminate overlays. Panel core material can be particleboard or medium density fiberboard.

SPECIAL INSTRUCTIONS

All substrates should be sanded smooth, and should be clean and free of oil or grease, and uniform in thickness.

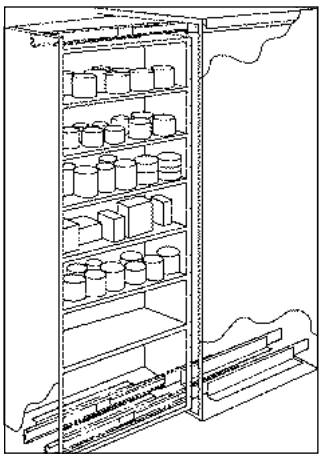
MODEL 301-2590

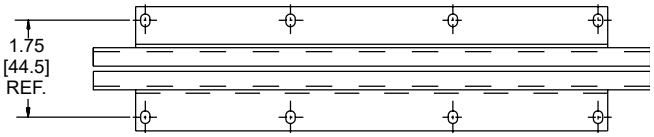
Undermount Shelf Slide
Non-Disconnect
Over Travel

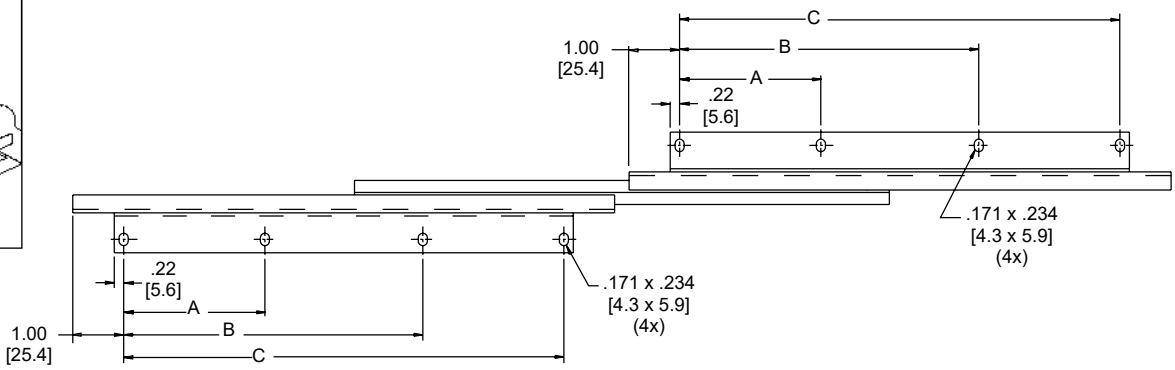
Applications: Pull-out storage shelves, kitchen pull-out pantries, and entertainment centers. Battery trays, storage bins, and generators.

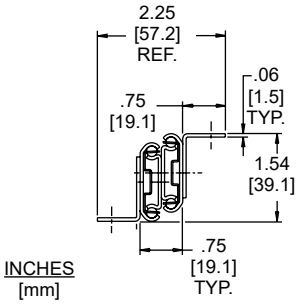
301-2590
QUICK REFERENCE

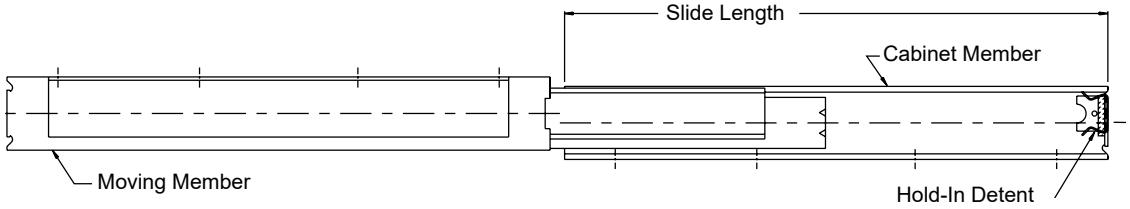
Side Space: .75" [19.1 mm] slide only
2.25" [57.2 mm] with brackets
Length: 12"–28" [305 mm–711 mm]
Overall slide dimensions: .50" x 1.62"
Load rating: Up to 155 lb. [70 kg.]*











Finish	Bright electro-zinc (C) or black zinc (CB) plating
Length	12"–28" [305 mm–711 mm]
Height	1.54" [39.1 mm]
Side Space	.75" [19.1 mm] slide only 2.25" [57.2 mm] with brackets
Load	Up to 155 lbs [70 kg]* Capacity
Travel	Slide length plus .83" [21.1 mm]
Mounting	Bracket/undermount
Hardware	#8 pan head or round head screws
Features	Hold-in detent, silenced open and closed, slide is handed

* Load rating based on a 16" wide shelf cycled 50,000 times.

Part Number	Slide Length	Slide Travel	Load Rating lb. [kg] per pair*	A	B	C

1. Mark a line at least 1/4" [6.4 mm] in from the right side of the cabinet opening and parallel to the cabinet side.
2. Locate a point on this line 1.00" [25.4 mm] back from the desired front of the slide.
3. Using #8 pan or round head screws, mount the cabinet member bracket through the first hole at this point.

   NOTE: For maximum strength, ensure that the hold-in detent spring is installed inside the cabinet.
4. Mount the left hand slide similarly, locating the screw centerline of the cabinet member bracket at least 1/4" [6.4 mm] in from the left side of the opening.
5. Keeping the right and left hand slides parallel, install the remainder of the cabinet member screws.

   NOTE: When using soft materials such as particle board, replace rear cabinet mounting screws with through bolts.
6. With slides extended, center the shelf and drive the screws up through the moving member brackets into the bottom of the shelf.

   NOTE: If the unit is mounted too close to the floor reverse the procedure above and install the moving member screws first.

Slide Ordering Instructions

Complete your slide order for Accuride model 301-2590 by specifying the following:

20 Pair	C	301-2590	-16	D
Total Required Slides				
	Slide Finish			
		Slide Model Number		
			Slide Length	
				Optional Polybag Packaging

Packaging

Distributor (D) Pack: All lengths are packaged 5 pair per box. Polybag includes one pair of slides and mounting screws.

Bulk Pack: Slides only. Left hand slides and right hand slides are packaged in separate boxes.

Lengths 12"–18"	20 each per box
Lengths 20"–28"	10 each per box

Specifications

Slide members and ball retainers: Cold rolled steel
Ball bearings: Carburized steel

RoHS compliant

NOTE: Specifications, materials, prices, terms, and delivery are subject to change without notice.

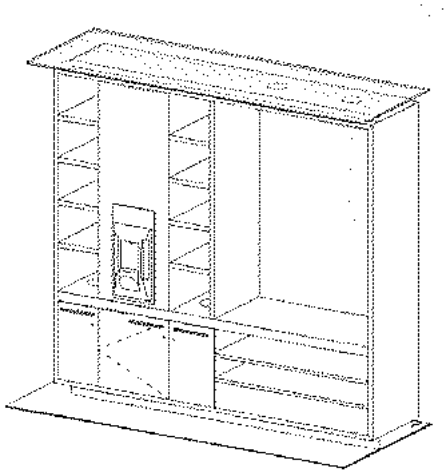
Revision 1

Real Living Decor Package

Issue Date: Aug 30, 2021
Revision Date: Nov 23, 2022



Item Name	Hydration Station
Item Type	Fitness Millwork
Description	Plastic Laminate Clad Custom Millwork that houses trash/linen bins, hydration equipment, yoga mats and towels. Consists of cabinets, shelves and countertops.
Manufacturer	R.B. Woodcraft, J. Suss Industries; MGroup; MillRock Casework
Model	Not Applicable
Dimensions	Refer to Design Guideline Drawings
Color	Refer to Design Guideline Drawings and Building Product Manual
Finish	Refer to Design Guideline Drawings and Building Product Manual
Material Composition	Cabinet to Door Interface shall be Frameless, Flush (Full) Overlay. Grain direction to be horizontal on doors, drawer fronts, knee space panels, aprons & end panels.
CSI #	12 32 16 - Manufactured Plastic Laminate Clad Casework
Omniclass #	22-12 32 16 - Manufactured Plastic Laminate Clad Casework
Grade	Lumber shall be in accordance with the AWS Grade specified for the product being fabricated. Moisture content shall be 6% to 12% for boards up to 2-inches nominal thickness, and shall not exceed 19% for thicker pieces.
Classification	Particle Board: ANSI A208.1, Mat-Formed Particle Board, Grade 1-M-2, with minimum density of 45 pcf. Internal bond of 60 psi, and minimum screw holding capacity of 225 lb. on faces and 200 lb. on edges. Hardboard: ANSI A135.4, Class 1, tempered. E. MDF: ANSI A208.2, Grade 130.
Acoustical Performance	Door & Drawer bumpers to be placed on all cabinet doors and drawers.
Best Practices	Use products with no urea-formaldehyde resins. Use adhesives with Low VOC content.
Quality Standards	Architectural Woodwork Standards (AWS)
Accessibility Compliance	ANSI A117.1 current version, ADAAG
Part of an Assembly	N
Design & Construction	See attached specifications. All listed millwork must be manufactured in accordance with the attached specifications.
Lighting	Not Applicable
Plastic Laminate	Refer to Specifications within Building Product Manual

Real Living Decor Package

Issue Date: **Aug 30, 2021**
Revision Date: **Nov 23, 2022**

Millwork Hardware	Refer to Specifications within Building Product Manual
Pattern/ Color	Refer to drawings for finishes. Review and approval of finish samples required prior to manufacturing.
Fabric Wrapped Panels	Not Applicable
Lead Time	TBD
Notes	1. Public Space Casework: Interior face of exposed cabinet units shall be Thermoset Decorative Overlay (melamine), to match door fronts as shown in the Design Guideline Drawings. a. Exposed & Semi-Exposed ends: Grade VGS plastic laminate or minimum 1mm thick PVC edge banding. Color to match exposed faces. b. Interior unexposed face of units that are likely to become wet should be constructed of polyester overlaid plywood cabinet liner materials: Cabinet Liner Industrial Panel by Olympic Panel Products, LLC or approved substitution. 2. Top and Bottom Rails; and Sub-toe Boards: Not less than 3/4-inch particleboard faced with Grade VGS plastic laminate to match door and drawer fronts. Machine ends for wood-dowel or mechanical dowel fasteners to receive top, bottom, and back. Base ends to extend to floor. Finish exposed ends to match doors and doors and drawer fronts. 3. Unexposed Ends: Not less than 3/4-inch tempered hardboard; finished with Thermoset Decorative Overlay (Melamine). Attach to front frame in same manner as exposed ends. 4. Back Panels: Not less than 1/4-inch tempered hardboard or MDF; finished with Thermoset Decorative Overlay (Melamine). 5. Doors 48 Inches or Less in Height: 3/4 inch thick, Particle Board cores. Front faces to be Grade VGS plastic laminate overlay, and back faces to be Thermoset Decorative Overlay (melamine). Provide stop silencers at the top and bottom of all hinged doors. 6. Shelving (within cabinetry): Not less than 3/4" particle board with Thermoset Decorative Overlay (melamine) to match cabinet interior, PVC edge banding; adjustable at least every 1-1/2 inch; clear plastic [seismic] shelf clip pressed into 5mm holes bored in cabinet side. Fabricate base shelf to half depth. Exposed Fixed Shelving Units: Front faces to be Grade VGS plastic laminate overlay. 7. Filler Strips: Provide as needed to close spaces between cabinets and walls, ceilings, and indicated equipment. Fabricate from same material and with same finish as cabinets. Oversize for field cutting to suit field conditions and assure continuous enclosure of open spaces. Provide raw (unfinished) cleats at

blind corners and appliance openings as required to support countertops, minimum 3/4-inch x 1-1/2 inch x 8 foot length, to be field cut and fit by the installer.
8. Base Cabinet Units:
a. Base Cabinet Top Frames: 3/4-inch solid wood with mortise and tenon or doweled connections, glued and pinned or screwed. Base Cabinet Stretchers: 3/4-by-4-1/2-inch plywood, Particle Board, or MDF strips or solid-wood boards at front and back of cabinet, glued and pinned or screwed.
b. Base Cabinet Stretchers may be provided as an option to base cabinet top frames.
c. Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back bottom rail.
d. Corner Blocks: Glued and fastened in each of four top corners to maintain cabinet squareness and rigidity.
9. Wall Cabinet Units:
a. Tops and Bottoms: Not less than 1/2-inch hardwood plywood faced with Thermoset Decorative Overlay (Melamine) to match door and drawer fronts, fully supported by and secured in rabbets in end panels, front frame, and back rail.

SPECIAL INSTRUCTIONS

Architect / General Contractor to coordinate millwork with equipment sizes and requirements, to include hydration equipment, trash/linen bins, power/data, etc.

Item Name	Simulated Stone
Item Type	Engineered Quartz
Description	Engineered Quartz Countertop with eased edge
Manufacturer	Belstone
Model	Dodi
Dimensions	Refer to Design Guideline Drawings
Color	Demitasse
Material Composition	Quartz aggregate, resin, and color pigments formed into flat slabs. Slabs shall contain a minimum of 88% quartz.
CSI #	123661 - Simulated Stone Countertops
Omniclass #	22-123661 - Simulated Stone Countertops
Accessories	Adhesive per Manufacturer's Recommendation
Part of an Assembly	Y
Notes	Acceptable Manufacturers: Belstone; Alex McGuinness; alex@belstoneproducts.com; (818) 373-4900; www.projectstone.com MGroup; Drew Murray; drew.murray@mgroupcorp.com; (706) 302-5590; www.mgroupcorp.com Daltile; Morgan Stephenson; (214) 309-4531; morgan.stephenson@daltile.com; www.daltile.com JG Edelen; Kelly Smith; (410) 918-1200; ksmith@jgedelen.com; www.jgedelen.com Wilsonart; Richelle Sigafoos; (215) 219-1133; sigafor@wilsonart.com; www.wilsonart.com/ Designer Tile and Stone; Timi Mustapha; (301) 325-1981; timi@designertilestone.com; www.designertilestone.com

SPECIAL INSTRUCTIONS

Provide label of the manufacturers name shall be permanently stamped on the underside of all countertops (engineered quartz, granite, milk glass, etc.) at least approximately every foot or so in run (or one direction) an at least every 2’-0” apart in the opposite direction. The intent is to guarantee that the label will appear on every top no matter how large or small in an accessible/readable location. As long as that is accomplished the guideline for measurements above is flexible. Label to include percentage of quartz on engineered quartz tops.

PRODUCT **INFORMATION**

INSTALLATION

Grout Joint Recommendation	Shade Variation
Tile : 1/16"	Medium (V2)

APPLICATIONS

	Target DCOF wet	Suitable
Dry & Level – Interior Floor	N/A	
Wet & Level – Interior Floor	≥ 0.42	
Shower Floors (Residential or Light Commercial)	≥ 0.42	
Exterior Floor Applications (including pool decking & other wet areas with minimal footwear)	≥ 0.60	
Ramps & Inclines	≥ 0.65	
Walls/Backsplashes	N/A	✓
Countertops	N/A	✓
Pool Linings	N/A	

ONE Quartz Surfaces do not meet minimum coefficient of friction thresholds recommended by safety standard-setting organizations. Water, oil, grease, etc., create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection.

Quartz not suitable for exterior applications due to small resin content. The sun will etch the material.

SLAB PERFORMANCE CHARACTERISTICS

	Test Method	Average Result*
Abrasion Wear Index	ASTM C501	≥ 135
Bulk Specific Gravity	ASTM C97	≤ 2500 kg / cubic meter
Chemical Resistance	ASTM C650	Resistant to typical household cleaners
Coefficient of Thermal Expansion	ASTM C531	≤ 4.0 • 10^{-5} °C^{-1}
Flexural Strength	ASTM C880	≥ 35 MPa
Water Absorption	ASTM C97	≤ 0.10%
Scratch Resistance (Mohs Hardness)	ASTM C1895	≥ 5
Stain Resistance	ANSI Z124.6	Pass
Thermal Shock Resistance	ASTM C484	Pass – No Effect

* Custom testing results by color are available upon request.

NOTES

ONE Quartz Surfaces products are nonporous, reducing the potential for bacteria growth, resist common food stains and are stronger than natural granite.

ONE Quartz Surfaces products are virtually maintenance free.

ONE Quartz Surfaces products contain natural quartz stone providing consistent color and visual movement. A wide range of color options allow for more design freedom.

ONE Quartz Surfaces products have a durable, scratch-resistant surface.

ONE Quartz Surfaces products are heat and scorch-resistant under normal cooking conditions (use of a trivet is recommended for longer or extreme heat exposure).

Visit daltile.com/countertops-product-category/one-quartz for additional polished, semi-polished, honed and leather finish details.

Twenty-Five year limited warranty. Visit daltile.com/countertops-product-category/one-quartz or details.

Fifteen-year limited warranty on imported materials.
Visit daltile.com/countertops-product-category/one-quartz for details.

White thin-set or mortar is recommended for the lighter colors of ONE Quartz Surfaces tiles.

WARNING: This product can expose you to chemicals known to the State of California to cause cancer, including crystalline Silica (airborne particles of respirable size) in dust created if the product is dry cut/ground/polished or pulverized during fabrication/installation/removal. For more information, go to www.P65Warnings.ca.gov.

For information refer to "Factors to Consider" at daltile.com/Factors.

DIMENSIONAL **STONE**

QUARTZ TAKES ON A WHOLE NEW DIMENSION

Our Dimensional team offers complete cut to size projects imported directly to the jobsite. Brought to you by the experts at Daltile®.

FORGET ONE-SIZE-FITS-ALL.

Or shape, for that matter. Our Dimensional program offers procurement, fabrication, and delivery for any project-all executed to your specifications.

Our team will help you identify exactly what you need to bring your vision to reality. Acting as a dedicated project manager, they'll walk you through every step, from inception to completion. Ask about our quantity survey, shop drawing and cutting ticket services!

LEAVE YOUR LIMITS BEHIND.

In addition to our standard product offering, we can also match most any color pallet. The experts at Daltile won't hesitate to make sure your project takes shape with complete coordination and precision.

STEP-BY-STEP

CUSTOM CUT TO YOUR SPECS. ON YOUR TERMS.

- We provide a digital take-off to identify the project scope, which includes materials, size, quantity, and edge treatment.
- You'll receive samples and pricing - we'll also provide support during the bid process to help determine the right material for the right location.
- Then you'll review CAD-generated shop tickets for confirmation that your goals are achieved.
- Now, your stone can be fabricated, delivered on time, within sequence, and ready to install.
- Each project is reviewed by an independent Daltile inspector. They ensure that color, size, calibration, and packaging meets your requirements prior to shipment.

LET US HANDLE ALL THE DETAILS

Contact your local Daltile Architectural Representative, Sales Representative or visit daltile.com to get started.

TECHNICAL SPECIFICATION

Quartz is one of nature's hardest minerals. Our surfaces are composed of 93% quartz, and are therefore designed to last.

In a unique Daltile process, we take the innate strength of quartz and combine it with numerous polymers and dashes of pigments. The result: A range of durable and beautiful quartz surfaces in a wide variety of colors and finishes.

100% Engineered Stone | **Non Porous** | **Easy to Clean** | **Low Maintenance** | **Shock Resistant** | **Stain Resistant** * | **Scratch Resistant** | **Everlasting Sheen** | **Modern Collection of Colors**

ONE **QUARTZ®** FAQ

QUARTZ IS A VERSATILE, DURABLE MATERIAL THAT'S AVAILABLE IN A WIDE RANGE OF COLORS AND STYLES. Also known as engineered stone, quartz is made from a combination of resin and natural quartz crystals. The natural crystals in quartz countertops make each surface unique, while resin gives the material its durability and resistance to everyday wear and tear. Because quartz is a man-made product, this material can be tinted and shaped in a wide variety of ways. Unique colors, edge treatments, inlays and other style accents add to the aesthetic appeal of this product.

In general, engineered stone is less expensive than naturally sourced materials after installation, sealing and maintenance are considered. The exceptional strength, durability and aesthetic appeal of quartz make this product a popular alternative to granite, a stone known for its lasting beauty. In addition, quartz is remarkably easy to maintain.

IS QUARTZ A SAFE COUNTERTOP MATERIAL?

Quartz, or engineered stone, is highly resistant to the routine wear and tear of daily life. Because quartz is made from a tough combination of natural crystals and resin, this product is very durable and long lasting. Quartz is a safe material for bathroom, kitchen or office countertops, but standard precautions must be taken to protect this man-made material from damage and prevent fading of your quartz countertop colors.

Although quartz countertops are resistant to scratches, dents, scuffs, burns and stains, these surfaces can be damaged when exposed to heat or to certain chemicals or tools. Gentle cleaning with a mild detergent and water is all that's required to maintain these surfaces. To keep your quartz countertops safe from damage, take care not to expose them to harsh chemicals, permanent dyes or inks, abrasive cleansers, direct heat or knives and other metal tools.

WHAT COLORS DO QUARTZ COUNTERTOPS COME IN?

Quartz countertops come in a broad spectrum of colors and patterns, from cool pastels to rich, dark tones. Quartz is a man-made material that combines the strength and durability of resin with distinctive of natural quartz crystals. This material can be tinted in a nearly unlimited range of shades to match any interior color scheme. Whether you're decorating a kitchen in warm earth tones or remodeling a bathroom with pink and white surfaces, you can find a shade that complements your decor and any living space.

QUARTZ COLORS AND TREATMENTS

Quartz is an extremely versatile material, which can be tinted, treated or shaped to accommodate almost any homeowner's tastes. When you're shopping for quartz countertops, choosing the perfect color may be challenging. With so many different shades to choose from, it can be difficult to make a decision with confidence. A knowledgeable provider should be able to help you with this stage of the process by giving you a comprehensive overview of your choices and making suggestions for shades that will complement your design.

When it comes to designing a quartz countertop, you aren't limited to traditional, squared edge treatments. There are a number of different edge treatments to choose from, with beveled or rounded styles. Inlays add a touch of elegance to a countertop surface by accenting the contours of the counter. These unique treatments take a countertop a step beyond the ordinary and give your kitchen or bathroom an extra touch of style.

CHOOSING COLORS FOR YOUR COUNTERTOPS

The color of your quartz countertops can make a big difference in the visual dimensions of your kitchen or bathroom. Light colors will create a sense of space, enlarging the room visually. If you have a small kitchen or bath, quartz countertops in white, cream, beige or gray may be preferable to darker, richer tones. In a larger kitchen or a game room, a dark gray, brown or dramatic black surface can add style and elegance to your interior.

The colors you select will affect a room's atmosphere and character. If you're decorating a professional office, a black or charcoal quartz countertop can give your decor a sense of dignity and stability. In a master bathroom, a rich gold or beige creates a look of luxury. The colors of quartz countertops may be variegated with flecks or swirls of various colors that give your countertops the natural appearance of stone.

Most manufacturers come out with new color series on a regular basis. Although the latest trends may be appealing, choose a color that will stand the test of time to get the most value.

QUARTZ IN KITCHENS AND BATHROOMS

Quartz is a non-porous material that does not require a sealant to protect the surface against dirt, moisture or germs. The polymers used to manufacture quartz make the surfaces extremely sturdy and durable. In the kitchen, quartz countertops are resistant to ordinary contact with metal, ceramic, glass or other materials commonly used in cookware. However, quartz countertops should not be scraped with metal tools. When you're cutting food, use a cutting board rather than cutting or slicing directly onto a quartz surface.

In the kitchen, protecting food from exposure to bacteria is a big concern. Quartz countertops are non-porous, meaning that these surfaces are continuous and smooth and do not have any tiny openings in the surface. Unlike wood and some forms of stone, quartz will not absorb water or other liquids. Bacteria have no place to grow on a quartz surface, as long as it's wiped clean after preparing food. Use a cutting board made of marble or another non porous material to avoid scratching your countertops.

Germs tend to collect in bathrooms as well as kitchens. The moisture and warmth that gather in the bathroom make it a breeding ground for bacteria, mold and mildew. A sink or vanity topped with quartz offers protection against bacterial growth as well as longevity and beauty. With regular cleaning, quartz countertops keep bathrooms sanitary by discouraging the growth of bacteria, mold and mildew. When cleaning quartz countertops, do not use bleach or other harsh or abrasive cleansers. Bleach may discolor or damage a quartz counter.

ONE **QUARTZ®** FAQ

FINAL CONSIDERATIONS

When you're shopping for quartz countertops, you'll soon find that you have many choices in style and color. Because quartz countertops are man-made, this material can be manufactured in nearly any color. You can choose from a wide range of countertop edge treatments, from traditional rounded or cornered styles to more dramatic looks.

The cost and performance of quartz countertops increases their appeal to homeowners who are looking for resilience and aesthetic value at a competitive price to other alternatives. As you search for quartz countertops, look for a reliable provider with a reputation for quality craftsmanship. Because the supplier you choose may also install the product, it's important to review the quality of the company's labor as well as the quality of its products before you make this important investment.

WHAT MAINTENANCE IS REQUIRED FOR QUARTZ COUNTERTOPS?

Low maintenance requirements make quartz countertops appealing to many homeowners. Quartz countertops are manufactured with a combination of hard quartz crystals and durable resin polymers that make them extremely resilient. In addition, the leading manufacturers provide a 10 to 15 year limited warranty that covers manufacturer's defects. Routine care and cleaning is very simple, and with basic precautions to prevent stains, dents or scratches, safe quartz countertops can lend beauty and a sense of permanence to a home for decades.

Manufacturer's warranties will not cover damages caused by the owner's use of the product unless damage is linked to an error made by the company. Your quartz countertops must be installed by a professional contractor in order to be covered by the warranty, in most cases. Follow the manufacturer's specific recommendations for maintaining your new countertops to get the maximum value from this investment.

ROUTINE CARE AND CLEANING

With the right care, quartz countertops can lend aesthetic appeal to your kitchen, bathroom or office for years. Quartz can be cleaned easily with a mild detergent, water and a soft cloth or paper towel. Abrasive cleansers or harsh scouring pads and cleansers that contain bleach should not be used with quartz. Engineered stone surfaces do not require polishing to keep them shiny and smooth, but they should be cleaned gently to maintain their distinctive shine.

A rounded plastic knife should be used to remove dried foods or liquids on a quartz surface. Dried paint or grease can be gently scraped away with a plastic knife. Avoid using metal knives and utensils directly on the countertop, as metal may scratch the quartz.

Grease from cooking is a concern in many kitchens. To remove grease from your quartz countertops, use a product recommended by your manufacturer. Harsh cleansers should not be used to remove grease or other cooking stains. Gently scrape away hardened grease with a plastic knife before applying cleanser.

PREVENTING STAINS AND SCRATCHES

While quartz countertops are resistant to scratches, scuffs, dents, stains and burns, these surfaces are not damage-proof. Homeowners must take care to avoid exposing quartz countertops to permanent inks, markers or dyes, as these substances may not be removable. If a countertop is marked by a permanent marker or dye, rinse the area with water as soon as possible, then apply a cleansing product approved by the manufacturer if the stain is still visible. Clean the area again with water after applying the cleanser.

Turpentine and other paint stripping products may damage or discolor a quartz surface. To be on the safe side, avoid exposing quartz to any strong chemicals or solvents unless your manufacturer recommends them for use in removing stubborn stains or hardened grease. If exposure to a potentially harmful chemical solvent occurs, clean the area with water immediately.

Quartz countertops can be damaged by direct exposure to heat. When cooking, use trivets or heating pads to guard the countertop surface against direct exposure to hot cookware or coffee pots. Although quartz is resistant to stains from juice, wine, coffee and other food substances, it is best to wipe up spills immediately to prevent possible stains. When chopping vegetables, slicing bread or preparing other foods with sharp utensils, use a cutting board to prevent scratches.

Very little maintenance is required for quartz countertops. This engineered product does not require sealants, and its non-porous surface makes it a durable, sanitary option for kitchens or bathrooms. To ensure that you get the most life from your countertops and that your warranty covers any unexpected damages, follow the manufacturer's instructions for care and quartz countertop maintenance.

PROTECTING QUARTZ SURFACES

Quartz countertops can stand up to a lot of wear and tear, but they shouldn't be exposed to excessive impact or harsh chemicals. In the kitchen, use hot pads or trivets on your countertops to prevent hot skillets or pots from making contact with quartz surfaces. In the bathroom, curling irons and other heated appliances shouldn't be left sitting on sinks or vanities.

Although quartz is non porous and resists stains, liquid spills should be wiped up promptly. Coffee, wine, vinegar, lemon juice and other liquids should not be allowed to sit on a quartz countertop for long periods of time. If permanent dye or ink is spilled on the counter, rinse the area promptly with water, then use a cleanser approved by the manufacturer for removing permanent stains. If you need to scrape dried food or paint or hardened grease off a quartz countertop, use a rounded plastic utensil, like a putty knife.

To get the maximum use from this investment, choose quartz countertops that are covered by a warranty. A manufacturer's warranty will replace or repair a countertop if it shows evidence of a manufacturer's defect. With a reliable warranty and proper care, quartz is a safe countertop material.

Website: www.wilsonart.com

2. Product Descriptions

Product Composition

Wilsonart® Quartz is manufactured with up to 93 percent high quality natural quartz crystals, high quality polyester binders, and proprietary coloring agents that are homogeneous, with uniform color throughout their thickness.

Basic Limitations

Wilsonart® Quartz is designed for interior use only, ideal for residential and commercial applications. Wilsonart Quartz is a solid, non-porous, highly durable surface and resistant to scratching, staining, and water absorption and is virtually maintenance free.

Fabrication

Refer to the Wilsonart Quartz Fabrication Manual or contact a Wilsonart® Quartz Fabricator or Distributor for details.

Colors and Finishes

Wilsonart® Quartz has created a wide array of colors. Wilsonart Quartz is available in a polished finish.
Glossometer reading: >45

Sheet Dimensions:

	Wilsonart® Quartz Standard Size
Available Sizes	120” (306 cm) x 55” (140 cm), 120” (306 cm) x 63” (160 cm), 126” (320 cm) x 63” (160 cm), 130” (330 cm) x 65” (166 cm)
Thickness	Product Type 062 = 0.79" (2 cm) ± 0.060"(0.15 cm)
Thickness	Product Type 063 = 1.18" (3 cm) ± 0.060"(0.15 cm)
Approximate Weight	Product Type 062 = 10 lbs./ft^2 (2 cm)
Approximate Weight	Product Type 063 = 15 lbs./ft^2 (3 cm)
