Triangle denotes the left end of the Truss as it appears on the Engineered Drawings provided.

Unless otherwise specified by Engineer Of Record, Wheeler Lumber, LLC recommends an uplift connection at each bearing point per the following:

# of Uplift	Connector
0 - 495:	(1) H2.5A
495 - 990:	(2) H2.5A
990 - 1245:	(1) HTS20

Installation per Simpson Strong-Tie guidelines.

For Reactions greater than 1245#, refer to EOR.

THIS IS A TRUSS LAYOUT DIAGRAM ONLY. These trusses are designed as individual building components to be incorporated into the building design at the specification of the building designer. See individual design sheets for each truss design identified on the placement drawing. The building designer is responsible for temporary and permanent bracing of the trusses during construction. The building designer is responsible for ensuring that the trusses are properly supported by the walls and columns in the building design. The building designer is responsible for ensuring that the trusses are properly supported by the walls and columns in the building design. The building designer is responsible for ensuring that the trusses are properly supported by the walls and columns in the building design.
