Detailed description of work:

Install new underground service lateral conduit/conductors from new utility transformer location to the building. Reinstall existing service/metering equipment on the building after earth is excavated approximately 6 feet below existing grade. Extend conduit and service entrance wires above to junction box and splice service entrance wires where they enter the building. Install new 100 amp house panel to the right of service equipment and extend conduit/wires above to existing panel housing and splice wiring where it enters the building. Install new underground service lateral conduit/conductors from new utility transformer location to neighboring building (229 NW Blue Pkwy, Lee's Summit, MO, 64063).
