RE: REVISION TO FRAMING OVER UPPER LEVEL EGRESS WINDOW AND REVISION TO W8X10 STEEL BEAM.

Everstead has been notified of the following changes to structural members to accommodate the roof truss layout / design:

1. W8x10 beam originally shown in the garage has been shortened to just support the upper-level wall as a girder truss is being provided to support the 3rd car garage roof.
 - a. The Wheeler truss layout and design has been reviewed by the EOR. The reduced span of the W8x10 beam to extend from the rear garage wall to the W12x30 steel beam in the garage is acceptable.
2. The (2) 2x6 header above the 3'0"/5'0" egress window above the garage roof has been omitted.
 - a. The Wheeler truss layout and design has been reviewed by the EOR and a double top plate has sufficient capacity to accommodate the design loads provided the double top plate has an improved nailing pattern:
 - i. Face nail double top plates together with:
 1. 16d common nails spaced at 8" on center extending 16" past the supporting jack studs.
 - OR
 2. 10d box nails spaced at 6" on center extending 16" past the supporting jack studs.

Please feel free to contact us with any further questions on this matter.

Sincerely,

CHRIS DAVIS, PE
