Date: 02/24/2024

Inspector: Chase Behler

OBSERVATIONS

Location: East end of building pad where fill placement was placed

Report Narrative:

No one was on site (Saturday) - Tested soil compaction on east half of pad where majority of fill went, waiting on proctor. Soil was very hard on top, not many flat spots good for testing due to sheepsfoot/roller tracks. There appears to be two different fill materials on the north and south sides.

Discrepancy: No
