Re: Long-Term Monitoring Plan Survey Points
Lots 7A (Area A), 7B (Area C), and 7C (Area B)
Mine Remediation at Streets of West Pryor
Lee's Summit, Missouri

Dear Mr. Olson,

This document serves to convey the results of the settlement monitoring that was conducted on the Streets West of Pryor project for the month of January 2024. This report has been updated with information provided by the surveyor, which has been documented in the updated Figure 2. During this monitoring period, potential ground movements were monitored using a combination of surface monitoring points (SMPs) and survey points that were established on sanitary and storm sewer inlets and/or manholes. Surveys of SMPs were attempted by BHC Civil Engineering & Surveying, Inc (BHC). As per field notes from BHC, attempts were made to locate project SMPs but due to ice and snow covering the survey area, field crew members were unable to locate any SMPs for this study period. Additional data points will be added to the monitoring record as they become available, and updated settlement monitoring results will be provided.

Table 1 and graphic plots show the updated data for SMPs. The current survey readings were obtained on January 18, 2023, in general accordance with the Long-Term Monitoring Plan (LTMP). Table 1 documents the monitoring events to date and Exhibit 1 presents the graphic plots that depict the data obtained in relation to elapsed time. The installations of the sleeved rod monuments have been completed, and elevation data recorded.

Due to complications surrounding winter conditions, no inference to surface subsidence can be made based off of the null dataset provided during this monitoring period. 2D graphical models have been marked with "NULL" for relative 18 January 2024 time periods.

Note: Point's 10-14 on previous exhibits are Control Point's for monitoring and have been removed to simplify exhibit. Point's 100-103 are monitoring points as shown on the exhibit. Monitoring Point #100 is on an Inlet @ NE Corner of Site

Note: Lid replaced and mark removed on Inlet A-1 after initial monitoring. Point's 104-106 above are new

Inlet Lids on Structures B-1 and A-3 have been adjusted since the initial monitoring. The new location of points will now be monitored.

Note: The certification on this exhibit is to verify that the horizontal and vertical positions shown hereon were collected under my direct supervision. This certification does not intend to show anything other what is shown on the exhibit. We are not certifying any reason or cause for the differences in the locations or elevations.
