Site Visit Inspection	Matt Munger	Partial	Tuesday, July 02, 2024
------------------------------	-------------	---------	------------------------

Corrective Action Required

1	Misc	Site Visit - I spoke with Manny the foreman onsite and I inquired about depths as they were boring while I was onsite. He stated they were 5ft or greater in most areas from where they started on the north side of SW 26th Street and have gone south on SW 26th Street. Manny did say they were running into rock closer to the area that will need the extra depth. He stated they would need to have different to come into breakup the rock. Currently they are in the 10ft utility easement outside of ROW.
