Site Visit - Tim with Spire was onsite, he stated they have been staying at 5ft-6ft depths and will be able to get 18ft in the critical areas. He had some questions and he will reach out to the Engineer over the project. I have sent an email to inform her that Tim would be reaching out. I also asked Tim if he could get us as-built's, bore logs, etc. to help verify the depths and alignment. We will continue monitoring the work.
