Sign Permit Review

Reviewed By: Hector Soto Jr.

Rejected

1. SIGN SIZE. The proposed freestanding sign with two support posts and an open base most closely meets the City's definition of a ground sign. The City's sign ordinance limits ground signs to a maximum structure height of 6' and limits the sign area to 16 sq. ft. The proposed sign has a maximum structure height of 25' and a sign face area of 112.37 sq. ft., well in excess of the height and square footage allowances for a ground sign. Staff cannot approve the proposed sign.

An alternative design approach for a larger sign under the City's sign ordinance is for a monument sign where the sign cabinet sits on a masonry or similar base that provides a solid and continuous structure from the ground to the top of the sign. Monument signs are allowed a maximum height of 12', a maximum sign face area of 72 sq. ft. and an overall structure area (sign face + sign base) of 96 sq. ft. The proposed sign will need to incorporate the required solid base and reduce the height, sign face area and sign structure area to the aforementioned standards in order for staff to be able to approve the sign permit.

The review conducted by the City of Lee's Summit Development Services Department shall not be construed as a structural review of the project.
