Building Permit Review Department

Address: 2222 SW Heartland Ct.

Please find enclosed and attached the appropriate code responses and/or revisions to the submitted drawings per Permit number listed above. Revisions on the drawings have been clouded to aid in making it readily identifiable where the changes occur.

To address the scheduled roof ridge board being spliced and not having any continuity of strength and support, I have detailed a design solution on Sheet A701.2 to support the spliced ridge board in compliance with the code.

Thank You.
