Re: Long-Term Monitoring Plan Survey Points
Lots 7A (Area A), 7B (Area C), and 7C (Area B)
Mine Remediation at Streets of West Pryor (SOWP)
Lee's Summit, Missouri

Dear Mr. Olson,

During the monitoring period of January 2025, extreme cold and snow conditions hindered comprehensive settlement monitoring activities as outlined in the Long-Term Monitoring Plan (LTMP). Due to significant snow cover, BHC surveyors were unable to locate or access many survey monuments, limiting observations to Foundation Monitoring Nails (FMNs) TBM1-3. While this restricted the scope of data collection, the observations recorded from FMNs TBM1-3 provided valuable information for this reporting period.

No additional data from surface monitoring points (SMPs) or survey monuments were collected during this period. However, based on the consistent readings from FMNs and the previous monitoring data, no significant deviations have been observed beyond those previously documented. SMP C110 remains out of tolerance, as noted in earlier reports, exceeding the 0.08 ft threshold established in the LTMP. Since its initial out-of-tolerance reading on January 5, 2023, SMP C110 has demonstrated minimal variation, with fluctuations limited to approximately 0.01 ft. These consistent readings suggest that SMP C110 has stabilized, likely following its initial settling or a potential one-time disturbance, such as the movement of heavy equipment.

This report has been updated to reflect the limitations experienced during the January 2025 monitoring period and includes the data obtained from FMNs TBM1-3. The updated results have been documented in Table 2 and Exhibit 2, which accompany this letter. Further observations will be conducted as conditions permit, ensuring compliance with the LTMP requirements.

103	1006322.29	2812351.55	988.07	Inlet A-1	See Note Below					
	Value Greater than 0.08'				104	1006511.50	2812680.58	987.40		Inlet E-2
	Value Greater than 0.04'				105	1006601.94	2812547.13	986.35		Inlet F-2
	Value Greater than 0.02'				106	1006319.59	2812353.76	988.24		Inlet A-1

Note: Lid replaced and mark removed on Inlet A-1 after initial monitoring. Point's 104-106 above are new or replacement monitoring points on the site.

Inlet Lids on Structures B-1 and A-3 have been adjusted since the initial monitoring. The new location of points will now be monitored.

Note: Point's 10-14 on previous exhibits are Control Point's for monitoring and have been removed to simplify exhibit. Point's 100-103 are monitoring points as shown on the exhibit. Monitoring Point #100 is on an Inlet @ NE Corner of Site

Note: The certification on this exhibit is to verify that the horizontal and vertical positions shown hereon were collected under my direct supervision. This certification does not intend to show anything other what is shown on the exhibit. We are not certifying any reason or cause for the differences in the locations or elevations.
