HCJ

ENGINEER, EVERSTEAD ENGINEERING & DESIGN LLC.

Architectural floor plan of a building with a grid system. The plan shows various rooms labeled with letters and numbers (e.g., A1, B1, C1, D1, E1, F1, G1, H1, I1, J1, K1, L1, M1, N1, O1, P1, Q1, R1, S1, T1, U1, V1, W1, X1, Y1, Z1). It also includes a detailed staircase layout with stairs labeled 'STAIR' and 'STAIRCASE'. The plan is divided into sections by a central corridor and a large open area. Dimensions are provided for various sections and overall building dimensions. The plan is oriented with North at the top.

WARNING: Trusses must be handled with care to prevent damage and injury.

This truss placement diagram is to be used only as an installation aid; it is not a structural diagram. These trusses are designed as individual building components to be installed in accordance with the building design at the specification of the building designer. See individual design sheets for each truss design identified on the placement drawing.

Professional advice should be sought regarding handling, installation, temporary and permanent bracing before erecting trusses. Temporary and permanent bracing is required during installation of trusses to prevent possible collapse.

For general guidance regarding bracing, consult "BCSI-601" available jointly from WTC&A & TPI.

Premier Building Supply must be notified of any issues requiring a back charge prior to any work being done. Premier Building Supply reserves the right to bill its service staff in lieu of being back charged.
