---	---

PROJECT SUMMARY

Work Description: Relocation of conduit along Olive St to avoid new storm sewer improvements, with one new crossing that will require extra depth. Vaults will need to be adjusted along this project corridor to match the final grade. Coordinate those adjustments with the city's contractor. There are also poles that will be replaced, Google Fiber will need to transfer to those poles once placed. There is one location where Google Fiber will need to adjust vaults and conduit, the vaults at the corner of Main and Orchard will need to be shifted with the conduit adjusted to the new vault locations. The conduit extending south from that intersection will need to be lowered in place, due to the fiber hierarchy. This lowering in place needs to be coordinated with the city's contractor to ensure the extract location, depth, and restoration is covered sufficiently.	Total Length of Boring: 692 Total Length of Excavation: 60 Number of Street Cuts: Number of Street Crossings: 5
---	---

By acceptance of this permit, the permittee is subject to all requirements, duties and obligations set out in Article III of Chapter 26 of the City Code of Ordinances and the City of Lee's Summit Design and Construction Manual. Both documents are available online on the City's website. If you need assistance obtaining access to these documents please call (816) 969-1800.

PERMIT CONDITIONS
