| 11.                                                                    |                                                                     |                                                                     |                                                                  | * Should be noted City of CS now Colbern Rd project has a separate permit, contractor & BMPs.                    |

\* **Note:** The permit differentiates between conditions requiring repairs and maintenance, and those requiring corrective action. The permit requires maintenance in order to keep controls in effective operating condition and requires repairs if controls are not operating as intended. Corrective actions are triggered only for specific, more serious conditions, which include: 1) A required stormwater control was never installed, was installed incorrectly, or not in accordance with the requirements in Part 2 and/or 3; 2) You become aware that the stormwater controls you have installed and are maintaining are not effective enough for the discharge to meet applicable water quality standards or applicable requirements in Part 3.1; 3) One of the prohibited discharges in Part 2.3.1 is occurring or has occurred; or 4) EPA requires corrective actions as a result of a permit violation found during an inspection carried out under Part 4.2. If a condition on your site requires a corrective action, you must also fill out a corrective action form found at [www.epa.gov/npdes/stormwater/swppp](http://www.epa.gov/npdes/stormwater/swppp). See Part 5 of the permit for more information.

# Condition and Effectiveness of Pollution Prevention (P2) Practices (CGP Part 2.3)

Discovery Park Lee's Summit  
5/14/2025 Inspection

The site did not receive a rain event measuring at least 2.0 inches since the last inspection. Site received approximately 0.53" rain since last inspection. Clear discharge was noted during the inspection. Monitoring BMPs over site will continue to help improve storm water flow on property. It should be noted that City of Lee's Summit NW Colbern Road project has a separate permit, contractor and BMPs.

Photo 1 – Zone 1 – Inlet cleaned, dust noted from grading activities.

Photo 2 – Zone 2 – Silt fence in good condition, NW Colbern Rd being paved.

Photo 3 – Lake to Outfall 001 in Zone 1 – No discharge noted.

Photo 4 – Outfall 002 in Zone 3 – Clear discharge noted.
