U.S. Patent No. 7,707,798

## Step 1: Choose a Vertical or Canted System

Envisor screens are the perfect alternative to parapet walls and they satisfy even the strictest screening code requirements. Both styles feature our patented attachment method, which secure our screens directly to the equipment with no rooftop penetration. Screen heights are available to screen virtually anything you desire.

## Step 2: Decide on a Panel Style

Panels are available in 5 standard styles allowing you to control the project without sacrificing the essential elements of the building design. The panels are constructed of thermoformed high impact ABS with co-extruded UV protective layer on both sides. The panels are held firmly in place using a rust-free, double tracked aluminum rail system. This enables the panels to slide side-to-side for easy access to the unit during servicing and maintenance. Don't see a panel that fits your project? Tell us and we'll make one that you design.

## Step 3: Select a Top Trim (optional)

Decorative top trim options offer the flexibility to further customize the elegant appearance of the screens by **picking up on your building design elements** and incorporating those details into the screen itself. Although optional, they offer one more way to make screens part of the design, not part of the problem. We can manufacture any size and shape top trim you create.

## Step 4: Pick a Designer Color

Our designer colors complement most architectural applications, but don't let standard colors limit your creativity. We have the ability to match to any cross-referenced color specifications. Send us samples to match. We've even matched a color to a rock! Colors are only approximate. Please call for actual samples.

## Step 5: Custom Designed Solutions

Envisor equipment screens can be manufactured in a limitless combination of shapes and configurations to help reduce cost, add to the aesthetics of a building, or both. Let us design one for you! Just tell us the equipment manufacturer, the model numbers, and the special requirements you might have.
