

Manufacturer: Sherwin Williams

Color: Peppercorn

Number: SW7674

Primer: S-W Macropoxy 646-100 FC Epoxy, 3.0-6.0 mils DFT per coat

Finish: S-W 2K Waterbased Anti-Graffiti Coating Satin

Location: Exterior Coolers

Contact: Jessica Newell 224-223-5180

Description:

The coolers are provided with a paint grip finish that is intended to be painted, however does not lend itself to the direct application of plaster or other materials. The paint specified is a 2-part exterior grade anti-graffiti coating that is intended for this use, and the custom color will match the color of the plaster finish on the remaining parts of the exterior. Fully enclosing the coolers/freezer on the exterior of the building has cost implications of heating/cooling the enclosed spaces to avoid potential condensation issues in the future.
