X-2b

Easy
Installation

SAFE &
DURABLE

ECO-
FRIENDLY

18W
replaces up to 150W

Die-casting aluminum, excellent heat dissipation

- J-box included, no need for extra housing
- Fire-free flexible pipe

Space-Saving Solution

For solving the problem that the ceiling is too small to install the normal LED flush light panel, we launch this recessed slim panel LED Downlight which only occupies 2.16 inches in height without housing can, supporting retrofit, remodel or new construction installation.

Top Class Standard

ETL listed and Energy Star certified downlight features quality assurance, ensuring safe operation and lower consumption. In addition, this IC rated downlight is permitted to be in contact with combustible material, offering a fire-free operating environment and extra protection for you.

Thoughtful Design

5%-100% triac dimming without flickers and buzz, much easier to suit different needs. Airtight construction prevents insects from entering the light as well as ensures safe operation even in damp location. Rugged aluminum housing, excellent corrosion resistance and heat dissipation. The light would meet various needs in applications such as stores, shopping malls, hotels, restaurants, cafe, bars, closets, kitchens, hallways, basement, etc.
