From: Gene Williams, P.E.

Senior Staff Engineer

Application Number: PL2021263

Application Type: Engineering Plan Review

Application Name: OSAGE 3RD PLAT - STREET/STORM

The Development Services Department has received payment in the amount of EPRIF for the engineering plan review and inspection fee and therefore approves the engineering plans dated and sealed on DATE for the above referenced project. These plans were initially received by our department on July 09, 2021. The following conditions must be satisfied prior to the start of construction.

- 1. Contact Development Services Inspections (816) 969-1200 at least 48 hours prior to the onset of construction.**
2. Submit a Land Disturbance Permit application and the required attachments to the Erosion Control Specialist prior to any land disturbance activities that are to occur prior to obtaining a building permit. Approval of these plans does not constitute approval of the erosion control plan. **Contact the Development Services Department at (816) 969-1200 for land disturbance permitting details.**
3. Contact the Right-of-Way Inspector at (816) 969-1200 prior to any land disturbance activities within the rights-of-way. These activities may require a permit.
4. Any public improvements will require a set of record drawings. One (1) full-size (24"x36") set of records drawings (including the As-graded Master Drainage Plan) shall be submitted initially for review. The final submittal will require a complete set in a multi-page Portable Document Format (pdf).
5. Note that any improvements installed over City utilities or within City easements will not be repaired or replaced if future utility maintenance is required, including, but not limited to, pavement, curbing and guttering, landscaping, trees, shrubs, or other items.

Please contact me if you have any questions or comments.

Sincerely,

Gene Williams, P.E.
Senior Staff Engineer
