

Town Centre Lot 1 – Re-zoning description

This plan proposes re-zoning from CP-2 to PI (planned industrial) of the site area indicated in our submission. As advised by city staff, the proposed land use of storage requires re-zoning to planned industrial. To the best of our knowledge, this change fits within city staff's vision for future development in the area. It is also our understanding that this storage site will fulfill a need within the City of Lee's Summit that is desired.
