**Re: Highland Meadows 5<sup>th</sup> Plat**

Anderson Engineering has received your comments dated May 2, 2022 and have the following responses:

City of Lee's Summit – Asbuilt Review – Street/Storm  
Sue Pyles, P.E. – (816) 969-1245

1. Please choose the most appropriate option within the bracket in the As-Graded certification. **Certification statement has been revised to say that the information was obtained by my firm.**
2. Please include the existing contours beyond the as-built contours. They should tie together to provide a complete picture of the grading. **The site was topographically surveyed up to the Highland Meadow - 5<sup>th</sup> Plat, platted boundary. Any additional surface data that we have available was added to the plan with this resubmittal.**
3. Please include spot elevations along the rear of Lots 147-154 at the intersections of adjacent lot corners. **Spot elevations at the locations listed above have been added to the plan.**
4. The following spot elevations do not match the as-graded contours. Please revise as needed.
  - a. Lot 143/Lot 144 front lot corner.
  - b. Lot 146/Lot 147 rear lot corner.
  - c. Lot 152/Lot 153 front lot corner.
  - d. Lot 154 rear right (east) lot corner.
  - e. Lot 158 front left (east) lot corner.**The elevations at the locations listed above have been reviewed and corrected as necessary.**
5. The following spot elevations can't be verified until existing contours beyond proposed contours are provided.
  - a. Lot 134 front and rear west lot corners.
  - b. Lots 142-144 rear lot corners.
  - c. Lot 155 rear west lot corner.**Existing contours have been added outside the as-built surface.**

If you have any further questions, feel free to contact me at 913-284-9362 or by email at [gcates@ae-inc.com](mailto:gcates@ae-inc.com).

Sincerely,

Garrett Cates, PE
