RE: Stormtech MC-7200 Installation at Caliber Collision, Lee's Summit, MO

On June 21st and 22nd, 2022, Dustin Ketchum and Dirk Hudson of Advanced Drainage System visited the project site to review the construction procedure for the StormTech chamber system. ADS observed a portion of the StormTech chamber system being installed and confirmed our Construction Guide being adhered to by the contractor. Noted topics included end cap configuration, manifold piping and fittings, and clean stone placement within the geotextile envelope.

ADS recorded that the geotextile fabric, stone, and chambers were being installed in general accordance with ADS installation standards. The StormTech chamber system was operational and functioning as designed.

If you have questions or would like further clarification, please feel free to reach out to me at dirk.hudson@ads-pipe.com or at 816-602-4201.

Thank you,

A handwritten signature in black ink that reads "Dirk Hudson". The signature is written in a cursive, flowing style.
