1. Please review the study for completion and format as defined in the City's Access Management Code.

2. No turn lane assessment was completed. Hook will be a major arterial. Left turn lanes will be required at every intersection. Location and length should be studied and recommended within the study.

3. A Unimproved Road Policy section should be included and separate from the future traffic considerations. Additionally, Thompson Drive should be constructed with two 12-foot wide lanes and 6-foot wide paved shoulders, meeting the interim road standard. Discussion in this section should explain why this cross-section is acceptable (e.g. projected volume and when the road will be required to be built to a full urban standard - 80%, 11,000 vpd,etc.).

4. The section looking at the City's TFMP does not include any evaluation of Hook Road.
