3. Review of West access drawings- As the primary entrance for the facility there shall be no restrictions in or out of the facility by emergency vehicles. The mountable median is acceptable provided that it is designed and constructed in a way that will not damage equipment mounted on the undercarriage of the apparatus (drawings available on request). Due to the railroad tracks being located south of the entrance, there shall be no physical restrictions to turning north on Main Street. Another mountable curb and signage is recommended for this location as well.

What is the percent of slope on the proposed St. Luke's access?

1. For staff to support a waiver to the URP, the connection to Victoria must be built. Since Fire cannot support any restrictive movements to the entrance on Main, the only alternative is the access point on Victoria.
