

CIVIL ENGINEERING / SURVEYING / UTILITIES

March 28, 2023

Mike Weisenborn
Project Manager
City of Lee's Summit

**RE: Saint Luke's East Hospital – ASC Expansion & Renovation Construction Revisions,
Application PL2022382**

Dear Mr. Weisenborn:

Our current civil plans show a 60" storm main being relocated around our proposed building expansion. This relocated storm main is labeled as storm line 100 in our civil plans and is just north of the proposed building expansion. The owner has requested that we revise the layout of this relocated storm main to minimize lost parking spots during construction. The storm main relocation will now go under a main drive aisle around the campus. This relocation also affects the position of our relocated private sanitary lateral and limits of pavement replacement. The primary revisions for this change are shown on C201, C401, and C502. Other sheets have been included for clarity.

If you have any further questions, please contact me at kurt.yoder@ibhc.com or 913-905-1567.

Sincerely,

Kurt Yoder
Project Engineer
