Re: Village at Discovery Park, Lots 5-8 – PL2024136 Response Letter

City reviewers,

This letter is in response to the Commercial Final Development Plan Applicant's Letter dated August 02, 2024. The engineering plans have been revised to address the comments. The original comments are below and follow the order as shown in the review comments. Our responses are in bold, and follow each individual comment.

Planning Review

1. MECHANICAL SCREENING. Building perspectives and elevations have been provided and appear to show that building parapet wall heights are sufficient to fully screen all RTUs from view on all sides. Confirmation of adequate screening shall be done at the time of occupancy inspection. Should it be found at that time that adequate screening via the parapet wall heights is not achieved, screening of any visible RTUs shall be required using a metal screen system.

This comment is only informational and requires no further action at this time.

Understood.

Engineering Review

1. 8/1: It appears that the drops thru the following structures do not meet City requirements, please evaluate and revise as necessary: 1B, 1C, 2B, 2C, 4A, 6B.

Storm sewer has been revised to meet City requirements.

Fire Review

1. All issues pertaining to life safety and property protection from the hazards of fire, explosion or dangerous conditions in new and existing buildings, structures and premises, and to the safety to fire fighters and emergency responders during emergency operations, shall be in accordance with the 2018 International Fire Code.

Understood,

Please review attached submittal and if there is any additional information needed you may contact by email at ndixon@crockettengineering.com or at 573-447-0292.

Sincerely,

Crockett Engineering Consultants, LLC
